b. Where the POTW has determined that an Industrial User meets the criteria for classification as a Non-Significant Categorical Industrial User, the POTW must evaluate, at least once per year, whether an Industrial User continues to meet the criteria in R317-8-8.2(15)(b),

c. In the case of Industrial Users subject to reduced reporting requirements under R317-8-8.11(4)(c), the POTW must randomly sample and analyze the effluent from Industrial Users and conduct inspections at least once every two years. If the Industrial User no longer meets the conditions for reduced reporting in R317-8-8.11(4)(c), the POTW must immediately begin sampling and inspecting the Industrial User at least once a year.

6. Evaluate, at least once every two years, whether each such Significant Industrial User needs a plan to control slug discharges. For purposes of this subsection, a slug discharge is any discharge of a non-routine, episodic nature, including but not limited to an accidental spill or a non-customary batch discharge, which has a reasonable potential to cause interference or pass through, or in any other way violate the POTW's regulations, local limits or Permit conditions. The results of such activities shall be available to the Executive Secretary upon request. Significant Industrial Users are required to notify the POTW immediately of any changes at its facility affecting potential for a slug discharge. Significant Industrial Users must be evaluated within one year of being designated a Significant Industrial User. If the POTW decides that a slug control plan is needed, the plan shall contain, at a minimum, the following elements:

a. Description of discharge practices, including non-routine batch discharges;

b. Description of stored chemicals;

c. Procedures for immediately notifying the POTW of slug discharges, including any discharge that would violate a prohibition under R317-8-8.5 with procedures for follow-up written notification within five days;

d. If necessary, procedures to prevent adverse impact from accidental spills, including inspection and maintenance of storage areas, handling and transfer of materials, loading and unloading operations, control of plant site run-off, worker training, building of containment structures or equipment, measures for containing toxic organic pollutants (including solvents), and/or measures and equipment for emergency response. The results of these activities shall be made available to the Executive Secretary upon request;

7. Investigate instances of noncompliance with pretreatment standards and requirements, as indicated in the reports and notices required by R317-8-8.11, or indicated by analysis, inspection, and surveillance activities. Sample taking and analysis and the collection of other information shall be performed with sufficient care to produce evidence admissible in enforcement proceedings or in judicial actions;

8. Comply with all applicable public participation requirements of State law and rules. These procedures shall include provision for at least annually providing public notification, in the largest daily newspaper published in the municipality in which the POTW is located, of Industrial Users which, at anytime during the previous 12 months, were in significant noncompliance with applicable pretreatment requirements. For the purposes of this provision, an Industrial User is in significant noncompliance if its violation meets one or more of the following criteria:

a. Chronic violations of wastewater discharge limits, defined here as those in which sixty-six percent or more of all of the measurements taken during a six month period exceed (by any magnitude) a numeric Pretreatment Standard or Requirement including instantaneous limits, for the same pollutant parameter;

b. Technical Review Criteria (TRC) violations, defined here as those in which thirty-three percent or more of all of the measurements for each pollutant parameter taken during a six-month period equal or exceed the product of the numeric Pretreatment Standard or Requirement including instantaneous limit multiplied by the applicable TRC. TRC = 1.4 for BOD, TSS, fats, oil and grease, and 1.2 for all other pollutants except pH;

c. Any other violation of a pretreatment effluent limit

(daily maximum or longer-term average) that the Control Authority determines has caused, alone or in combination with other discharges, interference or pass through (including endangering the health of POTW personnel or the general public);

d. Any discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of its emergency authority under R317-8-8.8(6)(a)8. to halt or prevent such a discharge:

e. Failure to meet, within 90 days after the schedule date, a compliance schedule milestone contained in a local control mechanism or enforcement order for starting construction, completing construction, or attaining final compliance:

f. Failure to provide within 45 days after the due date, required reports such as baseline monitoring reports, 90-day compliance reports, periodic self-monitoring reports, and reports on compliance with compliance schedules;

g. Failure to accurately report noncompliance; and

h. Any other violation or group of violations, which may include a violation of Best Management Practices, which the Control Authority determines will adversely affect the operation or implementation of the local pretreatment program.

9. Funding. The POTW shall have sufficient resources and qualified personnel to carry out all required authorities and procedures. In some limited circumstances, funding and personnel may be delayed by the Executive Secretary when the POTW has adequate legal authority and procedures to carry out the pretreatment program requirements and a limited aspect of the program does not need to be implemented immediately.

10. Local Limits. The POTW shall develop local limits as required in section R317-8-8.5(4)(a) or demonstrate that they are not necessary.

11. Enforcement Response Plan. The POTW shall develop and implement an enforcement response plan. This plan shall contain detailed procedures indicating how the POTW will investigate and respond to instances of industrial user noncompliance. The plan shall, at a minimum;

a. Describe how the POTW will investigate instances of noncompliance;

b. Describe the types of escalating enforcement responses the POTW will take in response to all anticipated types of industrial user violations and the time periods within which responses will take place;

c. Identify (by title) the official(s) responsible for each type of response;

d. Adequately reflect the POTW's primary responsibility to enforce all applicable pretreatment requirements and standards, as detailed in R317-8-8.8(6)(a) and (b).

12. List of Industrial Users. The POTW shall prepare a list of its Industrial Users meeting the criteria of R317-8-8.2(15)(a). The list shall identify the criteria in R317-8-8.2(15)(a) applicable to each Industrial User and, for Industrial Users meeting the criteria in R317-8-8.2(15)(a), shall also indicate whether the POTW has made a determination pursuant to R317-8-8.2(15)(b) that such Industrial User should not be considered a Significant Industrial User. This list and any subsequent modifications thereto, shall be submitted to the Executive Secretary as a nonsubstantial program modification. Discretionary designations or de-designations by the Control Authority shall be deemed to be approved by the Executive Secretary 90 days after submission of the list or modifications thereto, unless the Executive Secretary determines that a modification is in fact a substantial modification.

13. State Program in Lieu of POTW Program. Notwithstanding the provision of R317-8-8.8(1), the State may assume responsibility for implementing the POTW pretreatment program requirements set forth in R317-8-8.8(6) in lieu of requiring the POTW to develop a pretreatment program. However, this does not preclude POTW's from independently developing pretreatment programs.

(7) A POTW that chooses to receive electronic documents must satisfy the requirements of 40 CFR Part 3 - (Electronic reporting).

8.9 POTW PRETREATMENT PROGRAMS AND/OR AUTHORIZATION TO REVISE PRETREATMENT STANDARDS: SUBMISSION FOR APPROVAL

(1) Who Approves the Program. A POTW requesting approval of a POTW pretreatment program shall develop a program description which includes the information set forth in R317-8-8.9(2)(a),(b),(c) and (d). This description shall be submitted to the Executive Secretary, who will make a determination on the request for program approval in accordance with the procedure described in R317-8-8.10.

(2) Contents of POTW Program Submission.

(a) The program submission shall contain a statement from the city attorney or a city official acting in comparable capacity or the attorney for those POTWs which have independent legal counsel, that the POTW has authority adequate to carry out the programs described in R317-8-8.8. This statement shall:

1. Identify the provision of the legal authority under R317-8-8.8(6)(a) which provides the basis for each procedure under R317-8-8.8(6)(b);

2. Identify the manner in which the POTW will implement the program requirements set forth in R317-8-8.8 including the means by which pretreatment standards will be applied to individual Industrial Users (e.g., by order, permit, ordinance, etc.); and

3. Identify how the POTW intends to ensure compliance with pretreatment standards and requirements, and to enforce them in the event of noncompliance by Industrial Users.

(b) The program submission shall contain a copy of any statutes, ordinances, regulations, agreements, or other authorities relied upon by the POTW for its administration of the program. This submission shall include a statement reflecting the endorsement or approval of the local boards or bodies responsible for supervising and/or funding the POTW pretreatment program if approved.

(c) The program submission shall contain a brief description, including organization charts, of the POTW organization which will administer the pretreatment program. If more than one agency is responsible for administration of the program the responsible agencies should be identified, their respective responsibilities delineated and their procedures for coordination set forth.

(d) The program submission shall contain a description of the funding levels and full and part time manpower available to implement the program.

(3) Conditional POTW Program Approval. The POTW may request conditional approval of the pretreatment program pending the acquisition of funding and personnel for certain elements of the program. The request for conditional approval shall meet the requirements of R317-8-8.9(2) of this subsection except that the requirements of this section may be relaxed if the submission demonstrates that:

(a) A limited aspect of the program does not need to be implemented immediately;

(b) The POTW had adequate legal authority and procedures to carry out those aspects of the program which will not be implemented immediately; and

(c) Funding and personnel for the program aspects to be implemented at a later date will be available when needed. The POTW shall describe in the submission the mechanism by which this funding will be acquired. Upon receipt of a request for conditional approval, the Executive Secretary will establish a fixed date for the acquisition of the needed funding and personnel. If funding is not acquired by this date the conditional approval of the POTW pretreatment program and any removal allowances granted to the POTW may be modified

or withdrawn.

(4) Content of Removal Credit Submission. The request for authority to revise Categorical Pretreatment Standards shall contain the information required in 40 CFR 403.7(d).

(5) Approval Authority Action. A POTW requesting POTW pretreatment program approval shall submit to the Executive Secretary three copies of the submission described in R317-8-8.9(2), and if appropriate R317-8-8.9(4). Within 60 days after receiving a submission, the Executive Secretary shall make a preliminary determination of whether the submission meets the requirements of this section. Upon a preliminary determination that the submission meets the requirements of this section, the Executive Secretary will:

(a) Notify the POTW that the submission has been received and is under review; and

(b) Commence the public notice and evaluation activities set forth in R317-8-8.10.

(6) Notification Where Submission is Defective. If, after review of the submission as provided for in paragraph (5) above, the Executive Secretary determines that the submission does not comply with the requirements of R317-8-8.9(2), (3) and, if appropriate, (4), the Executive Secretary will provide notice in writing to the applying POTW and each person who has requested individual notice. This notification will identify any defects in the submission and advise the POTW and each person who has requested individual notice of the means by which the POTW can comply with the applicable requirements of R317-8-8.9(2), (3) and, if appropriate, (4).

(7) Consistency With Water Quality Management Plans.

(a) In order to be approved, the POTW pretreatment program shall be consistent with any approved water quality management plan, when the plan includes management agency designations and addresses pretreatment in a manner consistent with R317-8-8. In order to assure such consistency, the Executive Secretary will solicit the review and comment of the appropriate water quality planning agency during the public comment period provided for in R317-8-8.10(2)(a)2. prior to approval or disapproval of the program.

(b) Where no plan has been approved or when a plan has been approved but lacks management agency designations and/or does not address pretreatment in a manner consistent with this section, the Executive Secretary will solicit the review and comment of the appropriate 208 planning agency.

8.10 APPROVAL PROCEDURES FOR POTW PRETREATMENT PROGRAMS AND POTW GRANTING OF REMOVAL CREDITS. The following procedure will be adopted in approving or denying requests for approval of POTW pretreatment programs and applications for removal credit authorization.

(1) Deadline for Review of Submission. The Executive Secretary will have 90 days from the date of public notice of a submission complying with the requirements of R317-8-8.9(2), and where removal credit authorization is sought with the requirements of 40 CFR 403.7(e) and R317-8-8.9(4) to review the submission. The Executive Secretary shall review the submission to determine compliance with the requirements of R317-8-8.8(2) and (6), and where removal credit is sought, with R317-8-8.7. The Executive Secretary may have up to an additional 90 days to complete the evaluation of the submission if the public comment period provided for in R317-8-8.10(2)(a)2. is extended beyond thirty (30) days or if a public hearing is held as provided for in R317-8-8.10(2)(b). In no event, however, will the time for evaluation of the submission exceed a total of 180 days from the date of public notice of a submission meeting the requirements of R317-8-8.9(2) and, in the case of a removal credit application 403.7(e) and R317-8-8.9(2).

(2) Public Notice and Opportunity for Public Hearing. Upon receipt of a submission the Executive Secretary will commence his review. Within 20 days after making a determination that a submission meets the requirements of R317-8-8.9(2), and when a removal credit authorization is sought under 40 CFR 403.7(d) and R317-8-8.7 the Executive Secretary will:

(a) Issue a public notice of request for approval of the submission:

1. This public notice will be circulated in a manner designed to inform interested and potentially interested persons of the submission. Procedures for the circulation of public notice will include: mailing notices of the request for approval of the submission to designated CWA section 208 planning agencies, federal and state fish, shellfish, and wildlife resource agencies (unless such agencies have asked not to be sent the notices); and to any other person or group who has requested individual notice, including those on appropriate mailing lists; and publication of a notice of request for approval of the submission in the largest daily newspaper within the jurisdiction served by the POTW.

2. The public notice will provide a period of not less than 30 days following the date of the public notice during which time interested persons may submit their written views on the submission;

3. All written comments submitted during the 30-day comment period will be retained by the Executive Secretary and considered in the decision on whether or not to approve the submission. The period for comment may be extended at the discretion of the Executive Secretary.

(b) The Executive Secretary will also provide an opportunity for the applicant, any affected State, any interested state or federal agency, person or group of persons to request a public hearing with respect to the submission.

1. This request for public hearing shall be filed within the thirty (30) day or extended comment period described in R317-8-8.10(2)(a)2. of this subsection and will indicate the interest of the person filing such a request and the reasons why a hearing is warranted.

2. The Executive Secretary will hold a public hearing if the POTW so requests. In addition, a hearing will be held if there is a significant public interest in issues relating to whether or not the submission should be approved. Instances of doubt will be resolved in favor of holding the hearing.

3. Public notice of a public hearing to consider a submission and sufficient to inform interested parties of the nature of the hearing and right to participate will be published in the same newspaper as the notice of the original request. In addition, notice of the hearing will be sent to those persons requesting individual notice.

(3) Executive Secretary Decision. At the end of the thirty (30) day or extended comment period and within the ninety (90) day or extended period provided for in R317-8-8.10(1) of this section, the Executive Secretary will approve or deny the submission based upon the evaluation in R317-8-8.10(1) and taking into consideration comments submitted during the comment period and the record of the public hearing, the Executive Secretary will so notify the POTW and each person who has requested individual notice. If the Approval Authority makes a determination to deny the request, the Approval Authority shall so notify the POTW and each person who has requested individual notice. This notification will include suggested modification and the Executive Secretary may allow the requestor additional time to bring the submission into compliance with applicable requirements.

(4) EPA Objection to Executive Secretary's Decision. No POTW pretreatment program or authorization to grant removal allowances will be approved by the Executive Secretary if following the thirty (30)-day or extended evaluation period provided for in R317-8-8.10(2)(a)2. and any public hearing held pursuant to this section, the Regional Administrator sets forth in

writing objections to the approval of such submission and the reasons for such objections. A copy of the Regional Administrator's objections will be provided to the applicant and to each person who has requested individual notice. The Regional Administrator shall provide an opportunity for written comments and many convene a public hearing on his or her objections. Unless retracted, the Regional Administrator's objections shall constitute a final ruling to deny approval of a POTW pretreatment program or authorization to grant removal allowances 90 days after the date the objections are issued.

(5) Notice of Decision. The Executive Secretary will notify those persons who submitted comments and participated in the public hearing, if held, of the approval or disapproval of the submission. In addition, the Executive Secretary will cause to be published a notice of approval or disapproval in the same newspapers as the original notice of request was published. The Executive Secretary will identify any authorization to modify Categorical Pretreatment Standards which the POTW may make for removal of pollutants subject to the pretreatment standards.

(6) Public Access to Submission. The Executive Secretary will ensure that the submission and any comments on the submission are available to the public for inspection and copying.

8.11 REPORTING REQUIREMENTS FOR POTWS AND INDUSTRIAL USERS

(1) Reporting Requirement for Industrial Users Upon Effective Date of Categorical Pretreatment Standards Baseline Report. Within 180 days after the effective date of a Categorical Pretreatment Standards or 180 days after the final administrative decision made upon a category determination submission under R317-8-8.6, whichever is later, existing Industrial Users subject to such Categorical Pretreatment Standards and currently discharging to or scheduled to discharge to a POTW shall be required to submit to the Control Authority a report which contains the information listed in paragraphs (a) through (g) of this Section. Where reports containing this information have already been submitted to the Executive Secretary, the Industrial User will not be required to submit this information again. At least 90 days prior to commencement of discharge, new sources and sources that become Industrial Users subsequent to promulgation of an applicable Categorical Standards, shall be required to submit to the Control Authority a report which contains the information listed in R317-8-8.11(1)(a)through (e). New sources shall also be required to include in this report information on the method of pretreatment the source intends to use to meet applicable pretreatment standards. New Sources shall give estimates of the information requested in R317-8-8.11(1)(d) and (e).

(a) Identifying Information. The User shall submit the name and address of the facility, including the name of the operator and owners.

(b) Permits. The User shall submit a list of any environmental control permits held by or for the facility.

(c) Description of Operations. The User shall submit a brief description of the nature, average rate of production and Standard Industrial Classification of the operation carried out by the Industrial User. This description should include a schematic process diagram which indicates points of discharge to the POTW from the regulated process.

(d) Flow measurement. The User shall submit information showing the measured average daily and maximum daily flow, in gallons per day, to the POTW from each of the following: regulated process streams and other streams as necessary to allow use of the combined wastestream formula (see Section 40 CFR 403.6(e)). The Control Authority may allow for verifiable estimates of these flows where justified by cost or feasibility considerations.

(e) Measurement of pollutants.

1. The User shall identify the pretreatment standards applicable to each regulated process.

2. The User shall submit the results of sampling and analysis identifying the nature and concentration, or mass, of regulated pollutants in the discharge from each regulated process when required by the standard or the Control Authority. Both daily maximum and average concentration or mass, where required shall be reported. The sample shall be representative of daily operations. In cases where the Standard requires compliance with a Best Management Practice or pollution prevention alternative, the User shall submit documentation as required by the Control Authority or the applicable standards to determine compliance with the Standard;

3. The User shall take a minimum of one representative sample to compile that data necessary to comply with the requirements of R317-8-8.11.

4. Samples shall be taken immediately downstream from pretreatment facilities if such exist or immediately downstream from the regulated process if no pretreatment exists. If other wastewaters are mixed with the regulated wastewater prior to pretreatment the User should measure the flows and concentrations necessary to allow use of the combined wastestream formula in order to evaluate compliance with the pretreatment standards. When an alternate concentration or mass limit has been calculated in accordance with the combined wastestream formula this adjusted limit along with supporting data shall be submitted to the Control Authority.

5. Sampling and analysis shall be performed in accordance with the techniques prescribed in 40 CFR 136 and amendments thereto. When 40 CFR 136 does not contain sampling or analytical techniques for the pollutant in question, or when the Administrator determines that the 40 CFR 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analysis shall be performed by using validated analytical methods or any other applicable sampling and analytical procedures, including procedures suggested by the POTW or other parties, approved by the Administrator.

6. The Control Authority may allow the submission of a baseline report which utilizes only historical data so long as the data provides information sufficient to determine the need for industrial pretreatment measures.

7. The baseline report shall indicate the time, date and place of sampling, and methods of analysis, and shall certify that such sampling and analysis is representative of normal work cycles and expected pollutant discharges to the POTW.

(f) Certification. The User shall submit a statement, reviewed by an authorized representative of the Industrial User and certified by a qualified professional, indicating whether pretreatment standards are being met on a consistent basis and, if not, whether additional operation and maintenance and/or additional pretreatment is required for the Industrial User to meet the pretreatment standards and requirements.

(g) Compliance Schedule. If additional pretreatment and/or operation and maintenance are required to meet the pretreatment standards, the Industrial User shall submit the shortest schedule by which the Industrial User will provide such additional pretreatment and/or operation and maintenance. The completion date in this schedule shall not be later than the compliance date established for the applicable pretreatment standard.

1. When the Industrial User's Categorical Pretreatment Standards has been modified by a removal allowance under R317-8-8.7, the combined wastestream formula under R317-8-8.6,or by a fundamentally different factors variance under R317-8-8.15 at the time the User submits the report required by R317-8-8.11(1), the information required by R317-8-8.11(1)(f) and (g) shall pertain to the modified limits.

2. If the Categorical Pretreatment Standards is modified by a removal allowance under R317-8-8.7, the combined wastestream formula under R317-8-8.6, or by a fundamentally

different factors variance under 40 CFR 403.13 after the User submits the report required by R317-8-8.11(1), any necessary amendments to the information requested by R317-8-8.11(1)(f) and (g) shall be submitted by the User to the Control Authority within 60 days after the modified limit is approved.

(2) Compliance Schedule for Meeting Categorical Pretreatment Standards. The following conditions shall apply to the schedule required by R317-8-8.11(1)(g):

(a) The schedule shall contain increments of progress in the form of dates for the commencement and completion of major events leading to the construction and operation of additional pretreatment required for the Industrial User to meet the applicable Categorical Pretreatment Standards e.g., hiring an engineer, completing preliminary plans, completing final plans, executing contract for major components, commencing construction, completing construction, etc.);

(b) No increment referred to in paragraph (a) of above shall exceed 9 months;

(c) Not later than 14 days following each date in the schedule and the final date for compliance, the Industrial User shall submit a progress report to the Control Authority including, at a minimum, whether or not it complied with the increment of progress to be met on that date and, if not, the date on which it expects to comply with this increment of progress, the reason for delay, and the steps being taken by the Industrial User to return the construction to the schedule established. In no event shall more than 9 months elapse between such progress reports to the Control Authority;

(3) Report on Compliance with Categorical Pretreatment Standard Deadline. Within 90 days following the date for final compliance with applicable Categorical Pretreatment Standards or in the case of a new source following commencement of the introduction of wastewater into the POTW, any Industrial User subject to pretreatment standards and requirements shall submit to the Control Authority a report containing the information described in R317-8-8.11(1)(d), e), and (f). For Industrial Users subject to equivalent mass or concentration limits established by the Control Authority in accordance with the procedures in R317-8-8.6 this report shall contain a reasonable measure of the User's long term production rate. For all other Industrial Users subject to Categorical Pretreatment Standards expressed in terms of allowable pollutant discharge per unit of production (or other measure of operation), this report shall include the User's actual production during the appropriate sampling period.

(4) Periodic Reports on Continued Compliance.

(a) Any Industrial User subject to a Categorical Pretreatment Standards (except a Non-Significant Categorical User as defined in R317-8-8.2(15)(b) after the compliance date of such pretreatment standard or, in the case of a new source, after commencement of the discharge into the POTW, shall submit to the Control Authority during the months of June and December, unless required more frequently in the pretreatment standard or by the Executive Secretary, a report indicating the nature and concentration of pollutants in the effluent which are limited by such Categorical Pretreatment Standards. In addition, this report shall include a record of measured or estimated average and maximum daily flows for the reporting period for the discharge reported in R317-8-8.11(1)(d) of this section except that the Control Authority may require more detailed reporting of flows. In cases where the Pretreatment Standard requires compliance with a Best Management Practice (or pollution prevention alternative), the User shall submit documentation required by the Control Authority or the Pretreatment Standard necessary to determine the compliance status of the User. At the discretion of the Control Authority and in consideration of such factors as local high or low flow rates, holidays, budget cycles, etc., the Control Authority may agree to alter the months during which the above reports are to be submitted.

(b) The Control Authority may authorize the Industrial User subject to a Categorical Pretreatment Standard to forego sampling of a pollutant regulated by a Categorical Pretreatment Standard if the Industrial User has demonstrated through sampling and other technical factors that the pollutant is neither present nor expected to be present in the Discharge, or is present only at background levels from intake water and without any increase in the pollutant due to activities of the Industrial User. This authorization is subject to the following conditions:

1. The Control Authority may authorize a waiver where a pollutant is determined to be present solely due to sanitary wastewater discharged from the facility provided that the sanitary wastewater is not regulated by an applicable Categorical Standard and other wise includes no process wastewater.

2. The monitoring waiver is valid only for the duration of the effective period of the Permit or other equivalent individual control mechanism, but in no case longer than 5 years. The User must submit a new request for the waiver before the waiver can be granted for each subsequent control mechanism.

3. In making a demonstration that a pollutant is not present, the Industrial User must provide data from at least one sampling of the facility's process wastewater prior to any treatment present at the facility that is representative of all wastewater from all processes.

The request for a monitoring waiver must be signed in accordance with paragraph (11) of this section and include the certification statement in 40 CFR 403.6(a)(2)ii. Non-detectable sample results may only be used as a demonstration that a pollutant is not present if the EPA approved method from 40 CFR part 136 with the lowest minimum detection level for that pollutant was used in the analysis.

4. Any grant of the monitoring waiver by the Control Authority must be included as a condition in the User's Control mechanism. The reasons supporting the waiver and any information submitted by the User in its request for the waiver must be maintained by the Control Authority for 3 years after expiration of the waiver.

5. Upon approval of the monitoring waiver and revision of the User's control mechanism by the Control Authority, the Industrial User must certify on each report with the statement below, that there has been no increase in the pollutant in its wastestream due to activities of the Industrial User:

"Based on my inquiry of the person or persons directly responsible for managing compliance with the Pretreatment Standard for 40 CFR .... (specify applicable National Pretreatment Standard part(s)), I certify that, to the best of my knowledge and belief, there has been no increase in the level of ....(list pollutant(s)) in the wastewaters due to the activities at the facility since filing of the last periodic report under R317-8-8.11(4)(a)."

6. In the event that a waived pollutant is found to be present or is expected to be present based on changes that occur in the User's operations, the User must immediately: Comply with the monitoring requirements of paragraph (4)(a) of this section or other more frequent monitoring requirements imposed by the Control Authority; and notify the Control Authority.

7. This provision does not supersede certification processes and requirements established in Categorical Pretreatment Standards, except as otherwise specified in the Categorical Pretreatment Standard.

(c) The Control Authority may reduce the requirement in paragraph (4)(a) of this section to a requirement to report no less frequently than once a year, unless required more frequently in the Pretreatment Standard or by the Approval Authority, where the Industrial User meets all of the following conditions:

1. The Industrial User's total categorical wastewater flow does not exceed any of the following:

a. 0.01 percent of the design dry weather hydraulic capacity of the POTW, or 5,000 gallons per day, whichever is smaller, as measured by a continuous effluent flow monitoring device unless the Industrial User discharges in batches;

b. 0.01 percent of the design dry weather organic treatment capacity of the POTW; and

c. 0.01 percent of the maximum allowable headworks loading for any pollutant regulated by the applicable Categorical Pretreatment Standard for which approved local limits were developed by a POTW in accordance with R317-8-8.5(4) and paragraph (3) of this section;

2. The Industrial User has not been in significant noncompliance, as defined in R317-8-8.8(6)(b)8. for any time in the past two years;

3. The Industrial User does not have daily flow rates, production levels, or pollutant levels that vary so significantly that decreasing the reporting requirement for this Industrial User would result in data that are not representative of conditions occurring during the reporting period pursuant to paragraph (6)(c) of this section;

4. The Industrial User must notify the Control Authority immediately of any changes at its facility causing it to no longer meet conditions of paragraph (4)(c)1. or 2. of this section. Upon notification, the Industrial User must immediately begin complying with the minimum reporting in paragraph (4)(a) of this section; and

5. The Control Authority must retain documentation to support the Control Authority's determination that a specific Industrial User qualifies for reduced reporting requirements under paragraph (4)(c) of this section for a period of 3 years after the expiration of the term of the control mechanism.

(d) For Industrial Users subject to equivalent mass or concentration limits established by the Control Authority in accordance with the procedures in R317-8-8.6 the report required by R317-8-8.11(4)(a) shall contain a reasonable measure of the User's long term production rate. For all other Industrial Users subject to Categorical Pretreatment Standards expressed only in terms of allowable pollutant discharge per unit of production (or other measure of operation), the report required by R317-8-11(4)(a) shall include the User's actual average production rate for the reporting period.

(5) Notice of Potential Problems Including Slug Loading. All categorical and non-categorical Industrial Users shall notify the POTW immediately of all discharges that could cause problems to the POTW, including any slug loadings, as defined in R317-8-8.5.

(6) Monitoring and Analysis to Demonstrate Continued Compliance.

(a) Except in the case of Non-Significant Categorical User, the reports required in R317-8-8.11(1), (3), (4) and (8) shall contain the results of sampling and analysis of the discharge, including the flow, the nature and concentration, or production and mass where requested by the Control Authority, of pollutants contained therein which are limited by the applicable pretreatment standards. This sampling and analysis may be performed by the Control Authority in lieu of the Industrial User. Where the POTW performs the required sampling and analysis in lieu of the Industrial User, the User will not be required to submit the compliance certification. In addition, where the POTW itself collects all the information required for the report, including flow data, the Industrial User will not be required to submit the report.

(b) If sampling performed by an Industrial User indicates a violation, the User shall notify the Control Authority within 24 hours of becoming aware of the violation. The User shall also repeat the sampling and analysis and submit the results of the repeat analysis to the Control Authority within 30 days after becoming aware of the violation. Where the Control Authority has performed the sampling and analysis in lieu of the Industrial User , the Control Authority must perform the repeat sampling and analysis unless it notifies the User of the violation and requires the User to perform the repeat analysis. Resampling is not required if;

1. The Control Authority performs sampling at the Industrial User at a frequency of at least once per month, or

2. The Control Authority performs sampling at the User between the time when the initial sampling was conducted and the time when the User or the Control Authority receives the results of this sampling.

(c) The reports required in this section shall be based upon data obtained through appropriate sampling and analysis performed during the period covered by the report, which data is representative of conditions occurring during the reporting period. The Control Authority shall require that frequency of monitoring necessary to assess and assure compliance by Industrial Users with applicable Pretreatment Standards and Requirements. Grab samples must be used for pH, cyanide, total phenols, oil and grease, sulfide, and volatile organic compounds. For all other pollutants, 24-hour composite samples must be obtained through flow-proportional composite sampling techniques, unless time proportional composite sampling or grab sampling is authorized by the Control Authority. Where time-proportional composite sampling or grab sampling is authorized by the Control Authority, the samples must be representative of the Discharge and the decision to allow the alternative sampling must be documented in the Industrial User file for that facility or facilities. Using protocols (including appropriate preservation) specified in 40 CFR part 136 and appropriate EPA guidance, multiple grab samples collected during a 24-hour period may be composited prior to the analysis as follows: For cyanide, total phenols, and sulfides the samples may be composited in the laboratory or in the field; for volatile organics and oil and grease the samples may be composited in the laboratory. Composite samples for other parameters unaffected by the compositing procedures as documented in approved EPA methodologies may be authorized by the Control Authority, as appropriate.

(d) For sampling required in support of baseline monitoring and 90-day compliance reports, a minimum of four grab samples must be used for pH, cyanide, total phenols, oil and grease, sulfide, and volatile organics compounds for facilities which historical sampling data do not exist; for facilities for which historical sampling data are available, the Control Authority may authorize a lower minimum. For the reports required by paragraphs (4) and (8) of this section, the Control Authority shall require the number of grab samples necessary to assess and assure compliance by Industrial Users with Applicable Pretreatment Standards and Requirements.

(e) All analyses shall be performed in accordance with procedures contained in 40 CFR 136 or with any other test procedures approved by the Administrator. Sampling shall be performed in accordance with the techniques approved by the Administrator. Where 40 CFR 136 does not include sampling or analytical techniques are inappropriate for the pollutant in question, sampling and analyses shall be performed using validated analytical methods or any other sampling and analytical procedures, including procedures suggested by the POTW or other parties and approved by the Administrator.

(f) If an Industrial User subject to the reporting requirement in R317-8-8.11(4) or (8) monitors any pollutant more frequently than required by the Control Authority, using the procedures prescribed in, R317-8-8.11(6)(e), the results of this monitoring shall be included in the report.

(7) Compliance Schedule for POTWs. The following conditions and reporting requirements shall apply to the compliance schedule for development of an approvable POTW pretreatment program.

(a) The schedule shall contain increments of progress in

the form of dates for the commencement and completion of major events leading to the development and implementation of a POTW pretreatment program.

(b) No increment referred to in paragraph (a) above shall exceed nine months.

(c) Not later than 14 days following each date in the schedule and the final date for compliance, the POTW shall submit a progress report to the Executive Secretary including, as a minimum, whether or not it complied with the increment of progress to be met on such date and, if not, the date on which it expects to comply with this increment of progress, the reason for delay, and the steps taken by the POTW to return to the schedule established. In no event shall more than nine months elapse between such progress reports to the Executive Secretary.

(8) Reporting requirements for Industrial User not subject to Categorical Pretreatment Standards. The Control Authority shall require appropriate reporting from those Industrial Users with discharges that are not subject to Categorical Pretreatment Standards. Significant Noncategorical Industrial Users shall submit to the Control Authority at least once every six months (on dates specified by the Control Authority) a description of the nature, concentration, and flow of the pollutants required to be reported by the Control Authority. In cases where a local limit requires compliance with a Best Management Practice or pollution prevention alternative, the User must submit documentation required by the Control Authority to determine the compliance status of the User. These reports shall be based on sampling and analysis performed in the period covered by the report and performed in accordance with the techniques described in 40 CFR 136 and amendments thereto. Where 40 CFR 136 does not contain sampling or analytical techniques for the pollutant in question, or where the Executive Secretary determines that the 40 CFR 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analysis shall be performed by using validated analytical methods or any other applicable sampling and analytical procedures, including procedures suggested by the POTW or other persons, approved by the Administrator. This sampling and analysis may be performed by the Control Authority in lieu of the significant noncategorical Industrial User. Where the POTW itself collects all the information required for the report, the noncategorical significant Industrial User will not be required to submit the report.

(9) Annual POTW reports. POTWs with approved pretreatment programs shall provide the Executive Secretary with a report that briefly describes the POTW's program activities, including activities of all participating agencies, if more than one jurisdiction is involved in the local program. The report required by this section shall be submitted no later than one year after approval of the POTW's pretreatment program and at least annually thereafter, and shall include, at a minimum, the following:

(a) An updated list of the POTW's Industrial Users, including their names and addresses, or a list of deletions and additions keyed to a previously submitted list. The POTW shall provide a brief explanation of each deletion. This list shall identify which Industrial Users are subject to Categorical Pretreatment Standards and specify which standards are applicable to each Industrial User. The list shall indicate which Industrial Users are subject to local standards that are more stringent than the Categorical Pretreatment Standards. The POTW shall also list the Industrial Users that are subject only to local requirements. The list must also identify Industrial Users subject to Categorical Pretreatment Standards that are subject to reduced reporting requirements under paragraph (4)(c), and identify which Industrial Users are Non-Significant Categorical Industrial Users.

(b) A summary of the status of Industrial User compliance over the reporting period;

(c) A summary of compliance and enforcement activities (including inspections) conducted by the POTW during the reporting period;

(d) A summary of changes to the POTW's pretreatment program that have not been previously reported to the Approval Authority; and

(e) Any other relevant information requested by the Executive Secretary.

(10) Notification of changed discharge. All Industrial Users shall promptly notify the POTW in advance of any substantial change in the volume or character of pollutants in their discharge including the listed or characteristic hazardous wastes for which the Industrial User has submitted initial notification under R317-8-8.11(14)(d).

(11) Signatory Requirements for Industrial User Reports. The reports required by R317-8-8.11(1), (3) and (4) shall include the certification statement as set forth in 40 CFR and 403.6(a)(2)(ii) and shall be signed as follows;

(a) By a responsible corporate officer if the Industrial User submitting the reports is a corporation. A responsible corporate officer means:

1. A president, secretary, treasurer, or vice-president of the corporation in charge of a principal business function, or any other person who performs similar policy or decision-making functions for the corporation, or

2. The manager of one or more manufacturing, production, or operation facilities provided, the manager is authorized to make management decisions which govern the operation of the regulated facility including having the explicit or implicit duty of making major capital investment recommendations, and initiate and direct other comprehensive measures to assure long-term environmental compliance with environmental laws and regulations; can ensure that the necessary systems are established or actions taken to gather complete and accurate information for control mechanism requirements; and where authority to sign documents has been assigned or delegated to the manager in accordance with corporate procedures.

(b) By a general partner or proprietor if the Industrial User submitting the reports is a partnership or sole proprietorship respectively.

(c) By a duly authorized representative of the individual designated in paragraph (a) or (b) above, if;

1. The authorization is made in writing by the individual described in paragraph (a) or (b) above.

2. The authorization specifies either an individual or a position having responsibility for the overall operation of the facility from which the Industrial Discharge originates, such as the position of plant manager, operator of a well, or well field superintendent, or a position of equivalent responsibility, or having overall responsibility for environmental matters for the company; and

3. The written authorization is submitted to the Control Authority.

(d) If an authorization is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, or overall responsibility for environmental matters for the company, a new authorization satisfying the requirements must be submitted to the Control Authority prior to or together with any reports to be signed by an authorized representative.

(12) Signatory Requirements for POTW Reports. Reports submitted to the Executive Secretary by the POTW in accordance with R317-8-8.11(7) and (9) shall be signed by a principal executive officer, ranking elected official or other duly authorized employee. The duly authorized employee must be an individual or position having responsibility for the overall operation of the facility or the Pretreatment Program. This authorization must be made in writing by the principal executive officer or ranking elected official, and submitted to the

Approval Authority prior to or together with the report being submitted.

(13) Provisions Governing Fraud and False Statements. The reports and other documents required to be submitted or maintained by R317-8-8.11(1), (3), (4), (7), (8), (11) and (12) shall be subject to the Utah Water Quality Act as amended and all other State and Federal laws pertaining to fraud and false statements.

(14) Record-Keeping Requirements.

(a) Any Industrial User and POTW subject to the reporting requirements established in this subsection shall maintain records of all information resulting from any monitoring activities required by this section, including documentation associated with Best Management Practices. Such records shall include for all samples:

1. The date, exact place, method, and time of sampling and the names of the person or persons taking the samples;

2. The dates and times analyses were performed;

3. Who performed the analyses;

4. The analytical techniques or methods used; and

5. The results of the analyses.

(b) Any Industrial User or POTW subject to these reporting requirements established in this section (including documentation associated with Best Management Practices shall be required to retain for a minimum of 3 years any records of monitoring activities and results, whether or not such monitoring activities are required by this section, and shall make such records available for inspection and copying by the Executive Secretary, and by the POTW in the case of an Industrial User. This period of retention shall be extended during the course of any unresolved litigation regarding the Industrial User or POTW or when requested by the Executive Secretary.

(c) A POTW to which reports are submitted by an Industrial User pursuant to R317-8-8.11 shall retain such reports for a minimum of 3 years and shall make such reports available for inspection and copying by the Executive Secretary. This period of retention shall be extended during the course of any unresolved litigation regarding the discharge of pollutants by the Industrial User or the operation of the POTW pretreatment program or when requested by the Executive Secretary.

(d) Notification to POTW by Industrial User.

1. The Industrial User shall notify the Executive Secretary, the POTW, and State hazardous waste authorities in writing of any discharge into the POTW of a substance, which if otherwise disposed of, would be a hazardous waste under R315-2. Such notification must include the name of the hazardous waste as set forth in R315-2, the EPA hazardous waste number, and the type of discharge (continuous, batch, or other). If the Industrial User discharges more than 100 kilograms of such waste per calendar month to the POTW, the notification shall also contain the following information to the extent such information is known and readily available to the Industrial User: An identification of the hazardous constituents contained in the wastes, an estimation of the mass and concentration of such constituents in the wastestream discharged during that calendar month and an estimation of the mass of constituents in the wastestream expected to be discharged during the following twelve months. All notifications must take place within 180 days of the effective date of this rule. Industrial Users who commence discharging after the effective date of this rule shall provide the notification no later than 180 days after the discharge of the listed or characteristic hazardous waste. Any notification under this paragraph need be submitted only once for each hazardous waste discharged. However, notifications of changed discharges must be submitted under R317-8-8.11(10). The notification requirement in this section does not apply to pollutants already reported under the self-monitoring requirements of R317-8-8.11(1), (3), and (4).

2. Dischargers are exempt from the requirements of R317-8-8.11(14)(d) during a calendar month in which they discharge no more than fifteen kilograms of hazardous wastes, unless the wastes are acute hazardous wastes as specified in R315-2. Discharge of more than fifteen kilograms of non-acute hazardous wastes in a calendar month, or of any quantity of acute hazardous wastes as specified in 40 R315-2, requires a one-time notification. Subsequent months during which the Industrial User discharges more than such quantities of any hazardous waste do not require additional notification.

3. In the case of any new regulations adopted by EPA or the Utah Solid and Hazardous Waste Board identifying additional characteristics of hazardous waste or listing any additional substance as a hazardous waste, the Industrial User must notify the POTW, the EPA Regional Waste Management Division Director, and State hazardous waste authorities of the discharge of such substance within 90 days of the effective date of such regulations.

4. In the case of notification made under R317-8-8.11(14)(d), the Industrial User shall certify that it has a program in place to reduce the volume and toxicity of hazardous wastes generated to the degree it has determined to be economically practical.

(15) Annual certification by Non-Significant Categorical Industrial Users. A facility determined to be a Non-Significant Categorical Industrial User pursuant to R317-8-8.2(15)(b) must annually submit the following certification statement, signed in accordance with the signatory requirements in paragraph (11) of this section. This certification must accompany any alternative report required by the Control Authority:

"Based on my inquiry of the person or persons directly responsible for managing compliance with the Categorical Pretreatment Standards under 40 CFR (state section), I certify that, to the best of my knowledge and belief that during the period from (include start of reporting date) to (include end of reporting date):

The facility described as (include facility name) met the definition of a Non-Significant Categorical Industrial User as described in R317-8-8.2(15)(b), the facility complied with all applicable Pretreatment Standards and requirements during this reporting period; and the facility never discharged more than 100 gallons of total categorical wastewater on any given day during this reporting period." This compliance certification is based upon the following information: (include information required by the control mechanism)

(15) The Control Authority that chooses to receive electronic documents must satisfy the requirements of 40 CFR Part 3 - (Electronic reporting).

8.12 CONFIDENTIALITY OF INFORMATION. Any information submitted to the Executive Secretary pursuant to these regulations may be claimed as confidential by the person making the submission. Any such claim must be asserted at the time of submission in the manner prescribed on the application form or instructions, or, in the case of other submissions, by stamping the words "confidential business information" on each page containing such information. If no claim is made at the time of submission, the Executive Secretary may make the information available to the public without further notice. If a claim is asserted, the information will be treated in accordance with the procedures in the 40 CFR Part 2. Information and data provided to the Executive Secretary pursuant to this part which is effluent data shall be available to the public without restriction. All other information which is submitted to the State or POTW shall be available to the public at least to the standards of 40 CFR 2.302.

8.13 NET/GROSS CALCULATION. Categorical Pretreatment Standards may be adjusted to reflect the presence of pollutants in an Industrial User's intake water in accordance with this section.

(1) Application. Any Industrial User wishing to obtain credit for intake pollutants must make application to the Control Authority. Upon request of the Industrial User, the applicable standard will be calculated on a "net" basis (i.e., adjusted to reflect credit for pollutants in the intake water) if the requirements of R317-8-8.13(2) are met.

(2) Criteria

(a) Either:

1. The applicable Categorical Pretreatment Standards contained in 40 CFR subchapter N specifically provide that they shall be applied on a net basis, or

2. The Industrial User must demonstrate that the control system it proposes or uses to meet applicable Categorical Pretreatment Standards would, if properly installed and operated, meet the standards in the absence of pollutants in the intake water.

(b) Credit for generic pollutants such as biochemical oxygen demand (BOD), total suspended solids (TSS) and oil and grease should not be granted unless the Industrial User demonstrates that the constituents of the generic measure in the User's effluent are substantially similar to the constituents of the generic measure in the intake water or unless appropriate additional limits are placed on process water pollutants either at the outfall or elsewhere.

(c) Credit shall be granted only to the extent necessary to meet the applicable Categorical Pretreatment Standard(s), up to a maximum value equal to the influent value. Additional monitoring may be necessary to determine eligibility for credits and compliance with standard(s) adjusted under this section.

(d) Credit shall be granted only if the User demonstrates that the intake water is drawn from the same body of water as that into which the POTW discharges. The Control Authority may waive this requirement if it finds that no environmental degradation will result.

8.14 UPSET PROVISION

(1) Definition. "Upset" as used in this subsection means an exceptional incident in which there is unintentional and temporary noncompliance with Categorical Pretreatment Standards because of factors beyond the reasonable control of the Industrial User. An upset does not include noncompliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

(2) Effect of an Upset. An upset constitutes an affirmative defense to an action brought for noncompliance with Categorical Pretreatment Standards if the requirements of R317-8-8.14(3) are met.

(3) Conditions Necessary for a Demonstration of Upset. An Industrial User who wishes to establish the affirmative defense of upset shall demonstrate, through properly signed, contemporaneous operating logs, or other relevant evidence that:

(a) An upset occurred and the Industrial User can identify the cause(s) of the upset;

(b) The facility was at the time being operated in a prudent and workmanlike manner and in compliance with applicable operation and maintenance procedures;

(c) The Industrial User has submitted the following information to the POTW and Control Authority within 24 hours of becoming aware of the upset or if this information is provided orally, a written submission within five days:

1. A description of the indirect discharge and cause of noncompliance;

2. The period of noncompliance, including exact dates and times or, if not corrected, the anticipated time the noncompliance is expected to continue;

3. Steps being taken and/or planned to reduce, eliminate and prevent recurrence of the noncompliance.

(4) Burden of Proof. In any enforcement proceeding the Industrial User seeking to establish the occurrence of an upset shall have the burden of proof.

(5) Reviewability of Agency Consideration of Claims of Upset. In the usual exercise of prosecutorial discretion, State enforcement personnel will review any claims that noncompliance was caused by an upset. No determinations made in the course of the review constitutes final agency action subject to judicial review. Industrial Users will have the opportunity for a judicial determination on any claim of upset only in an enforcement action brought for noncompliance with Categorical Pretreatment Standards.

(6) User responsibility in case of upset. The Industrial User shall control production or discharges to the extent necessary to maintain compliance with Categorical Pretreatment Standards upon reduction, loss or failure of its treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost or fails.

8.15 BYPASS PROVISION

(1) Definitions.

(a) "Bypass" means the intentional diversion of wastestreams from any portion of an Industrial User's treatment facility.

(b) "Severe property damage" means substantial physical damage to property, damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.

(2) Bypass not violating applicable pretreatment standards or requirements. An Industrial User may allow any bypass to occur which does not cause pretreatment standards or requirements to be violated, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provisions of R317-8-8.15(3) and (4).

(3) Notice.

(a) If an Industrial User knows in advance of the need for a bypass, it shall submit prior notice to the Control Authority, if possible at least ten days before the date of the bypass.

(b) An Industrial User shall submit oral notice of an unanticipated bypass that exceeds applicable pretreatment standards to the Control Authority within 24 hours from the time the Industrial User becomes aware of the bypass. A written submission shall also be provided within 5 days of the time the Industrial User becomes aware of the bypass. The written submission shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times and if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent reoccurrence of the bypass. The Control Authority may waive the written report on a case-by-case basis if the oral report has been received within 24 hours.

(4) Prohibition of bypass.

(a) Bypass is prohibited and the Control Authority may take enforcement action against an Industrial User for a bypass, unless:

1. Bypass was unavoidable to prevent loss of life, personal injury, or severe property damage;

2. There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated waters, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventative maintenance; and

3. The Industrial User submitted notices as required under R317-8-8.15(3).

(b) The Control Authority may approve an anticipated

bypass, after considering its adverse effects, if the Control Authority determines that it will meet the three conditions listed in R317-8-8.15(4)(a).

8.16 MODIFICATION OF POTW PRETREATMENT PROGRAMS

(1) General. Either the Executive Secretary or a POTW with an approved POTW Pretreatment Program may initiate program modification at any time to reflect changing conditions at the POTW. Program modification is necessary whenever there is a significant change in the operation of a POTW pretreatment program that differs from the information in the POTW's submission, as approved under Section R317-8-8.10.

(2) Procedures. POTW pretreatment program modifications shall be accomplished as follows:

(a) For substantial modifications, as defined in R317-8-8.16(3):

1. The POTW shall submit to the Executive Secretary a statement of the basis for the desired modification, a modified program description or such other documents the Executive Secretary determines to be necessary under the circumstances.

2. The Executive Secretary shall approve or disapprove the modification based on its regulatory requirements of R317-8-8.8(6) and using the procedures in R317-10(2) through (6), except as provided in paragraphs (2)4. of this section. The modification shall become effective upon approval by the Executive Secretary.

3. The modification shall be incorporated into the POTW's UPDES permit after approval. The permit will be modified to incorporate the approved modification in accordance with R317-8-5.6(3)(g).

4. The Approval Authority need not publish a notice of decision provided: The notice of request for approval states that the request will be approved if no comments are received by a date specified in the notice; no substantive comments are received; and the request is approved without change.

(b) The POTW shall notify the Executive Secretary of any other (i.e. non-substantial) modifications to its pretreatment program at least 45 days prior to when they are to be implemented by the POTW, in a statement similar to that provided for in R317-8-8.16(2)(a)1. Such non-substantial program modifications shall be deemed to be approved by the Executive Secretary, unless the Executive Secretary determines that a modification submitted is in fact a substantial modification, 90 days after the submission of the POTW's statement. Following such "approval" by the Executive Secretary such modifications shall be incorporated in the POTW's permit in accordance with R317-8-5.6(2)(g). If the Executive Secretary determines that a modification reported by a POTW is in fact a substantial modification, the Executive Secretary shall notify the POTW and initiate the procedures in R317-8-8.16(2)(a).

(3) Substantial modifications.

(a) The following are substantial modifications for purposes of this section:

1. Changes to the POTW's legal authorities;

2. Changes to local limits, which result in less stringent local limits;

3. Changes to the POTW's control mechanism;

4. Changes to the POTW's method for implementing Categorical Pretreatment Standards (e.g., incorporation by reference, separate promulgation, etc.):

5. A decrease in the frequency of self-monitoring or reporting required of Industrial Users;

6. A decrease in the frequency of Industrial User inspections or sampling by the POTW;

7. Changes to the POTW's confidentiality procedures;

8. Significant reductions in the POTW's Pretreatment Program resources (including personnel commitments, equipment, and funding levels); and

9. Changes in the POTW's sludge disposal and management practices.

(b) The Executive Secretary may designate other specific modifications in addition, to those listed in R317-8-8.16(3)(a), as substantial modifications.

(c) A modification that is not included in R317-8-8.16(3)(a) is nonetheless a substantial modification for purposes of this section if the modification:

1. Would have a significant impact on the operation of the POTW's Pretreatment Program;

2. Would result in an increase in pollutant loadings at the POTW; or

3. Would result in less stringent requirements being imposed on Industrial Users of the POTW.

8.17 VARIANCES FROM CATEGORICAL PRETREATMENT STANDARDS FOR FUNDAMENTALLY DIFFERENT FACTORS (FDF). A variance may be granted, using the procedures of 40 CFR 403.13, to an Industrial User if data specific to the User indicates it presents factors fundamentally different from those considered by EPA in developing the limit at issue.

40 CFR 403.13 is incorporated into this rule by reference as indicated in R317-8-1.10(6)

R317-8-9. Pesticide Discharge Permit.

9.1 APPLICABILITY.

(1) This section applies to qualified groups of operators who discharge on or near surface waters of the State from the application of (1) biological pesticides or (2) chemical pesticides (hereinafter collectively "pesticides"), when the pesticide application is for one of the following pesticide use patterns:

(a) Mosquito and Other Insect Pests - to control public health/nuisance and other insect pests that may be present on or near standing or flowing surface water. Public health/nuisance and other insect pests in this use category include but are not limited to mosquitoes and black flies.

(b) Weed and Algae Control - to control invasive or other nuisance weeds and algae in water and at water's edge, including irrigation ditches and/or irrigation canals.

(c) Aquatic Nuisance Animal Control - to control invasive or other nuisance animals in water and at water's edge. Aquatic nuisance animals in this use category include, but are not limited to fish, lampreys, and mollusks.

(d) Forest Canopy Pest Control - application of a pesticide to a forest canopy to control the population of a pest species (e.g., insect or pathogen) where to target the pests effectively a portion of the pesticide unavoidably will be applied over and deposited to water.

(2) Qualified Operator Groups. Certain types of entities (operators), engaged in the above pesticide use patterns, will be required to submit a NOI and obtain coverage under a Pesticide General Permit (PGP) as detailed below:

Operator Group 1 - All Operators involved with any discharges to Category 1 (R317-2-12) waters of the State. All operators involved in the discharge of pesticides on or near surface waters of State, which have been determined by the Water Quality Board to be Category 1 waters of the State must submit a NOI to obtain coverage under the PGP. The NOI must detail each area and watershed where a discharge is to occur. Only pesticide applications which are made to restore or maintain water quality or to protect public health or the environment would be covered under the PGP for discharges on or near Category 1 surface waters of the State.

Operator Group 2 - All Government or Quasi-Governmental Agencies or Special Service Districts. All government agency operators (federal, state, county or local agencies and special service districts) involved in the discharge of pesticides under the conditions described above, as a primary

purpose or as a significant activity in their operations, must submit a NOI describing each area and watershed where a discharge is to occur to obtain PGP coverage regardless of the size of the area to be treated.

Operator Group 3 - Other Operators. Other operators engaged in the discharge of pesticides for the conditions described above as a primary purpose or as a significant activity in their operations, like private pest control companies, water supply or canal companies or other large operators whose discharges exceed the treatment area thresholds detailed in Table 2 below must apply for a NOI to obtain coverage under the PGP as detailed in Table 1 below.

Operator Group 4 - Operators involved in a "Declared Pest Emergency Situation". All operators that otherwise aren't required to obtain a NOI, but become involved in a "declared pest emergency situation", as defined below, and will exceed any of the treatment area thresholds in Table 2 must submit a NOI to obtain PGP coverage as detailed in Table 1 below.

9.2 DEFINITIONS. The following definitions specifically pertain to aspects of pesticide discharge permitting in the UPDES program and should be used in conjunction with the definitions shown in R317-1-1 and R317-8-1.5.

(1) "Biological Pesticides" (also called biopesticides) means microbial pesticides, biochemical pesticides and plant-incorporated protectants (PIP). Microbial pesticide means a microbial agent intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or dessicant, that (a) is a eucaryotic microorganism including, but not limited to, protozoa, algae, and fungi; (b) is a procaryotic microorganism, including, but not limited to, Eubacteria and Archaebacteria; or (c) is a parasitically replicating microscopic element, including but not limited to, viruses (40 CFR 158.2100(b)).

(2) "Biochemical pesticide" means a pesticide that (a) is a naturally-occurring substance or structurally-similar and functionally identical to a naturally-occurring substance; (b) has a history of exposure to humans and the environment demonstrating minimal toxicity, or in the case of a synthetically-derived biochemical pesticide, is equivalent to a naturally-occurring substance that has such a history; and (c) Has a non-toxic mode of action to the target pest(s)(40 CFR 158.2000(a)(1)). Plant-incorporated protectant means a pesticidal substance that is intended to be produced and used in a living plant, or in the production thereof, and the genetic material necessary for production of such a pesticidal substance. It also includes any inert ingredient contained in the plant, or production thereof (40 CFR 174.3).

(3) "Chemical Pesticides" means all pesticides not otherwise classified as biological pesticides.

(4) "Declared Pest Emergency Situation" means an event defined by a public declaration by a federal agency, state, or local government of a pest problem determined to require control through application of a pesticide beginning less than ten days after identification of the need for pest control. This public declaration may be based on a; significant risk to human health; significant economic loss; or significant risk to Endangered species, Threatened species, Beneficial organisms, or, the environment.

(5) "NOI" means "Notice of Intent", the formal document submitted by an operator to the Division of Water Quality (DWQ) to request coverage under the Pesticide General Permit.

(6) "Operator" means any entity involved in the application of a pesticide which may result in a discharge to waters of the State that meets either or both of the following two criteria:

(a) The entity has control over the financing for, or the decision to perform pesticide applications that result in discharges, including the ability to modify those decisions or;

(b) The entity has day-to-day control of, or performs activities that are necessary to ensure compliance with the permit (e.g., they are authorized to direct workers to carry out activities required by the permit or perform such activities themselves).

(7) "surface waters of the State" means waterbodies, waterways, streams, lakes or rivers that contain standing or flowing water at the time of pesticide application.

(8) "Treatment Area" means the entire area, whether over land or water, where the pesticide application is intended to provide pesticidal benefits or may have an environmental impact. In some instances, the treatment area will be larger than the area where pesticides are actually applied.

9.3 ADMINISTRATIVE REQUIREMENTS.

(1) All operators who are included in the use patterns specified in R317-8-9.1, and discharge to active surface waters of the State as a result of the application of a pesticide must be covered by a UPDES permit, beginning October 31, 2011, by submitting a NOI to obtain coverage under the Pesticide General Permit (PGP). In the event that a discharge occurs prior to submitting a NOI, you must comply with all other requirements of the PGP immediately. All operators will automatically be covered under the PGP for the first five-year permit term of October 31, 2011 to October 30, 2016 if they submit a NOI by February 15, 2012. To obtain PGP coverage for the second and all succeeding PGP five-year terms, all operators must submit a NOI prior to the expiration date (October 30) of the PGP every five years. Each NOI submission will secure permit coverage for the full five-year term of the PGP.

(2) New, qualified operators, who require PGP coverage after February 15, 2012 must submit a NOI in accordance with Table 1 below. The NOI will secure PGP coverage for the remainder of the five-year term of the PGP in effect at that time. For continued PGP coverage during the next five-year permit cycle, a new NOI must be submitted before the expiration of the present PGP, as detailed above.

Table 1. Discharge Authorization Date (a/)

Category	NOI Submittal Deadline	Discharge Authorization Date
Operators who know or should have reasonably known, prior to commencement of discharge, that they annual treatment area threshold identified in R317-8-9.3 (4).	At least 10 days prior to commencement of discharge	No earlier than 10 days after the complete and accurate NOI is mailed and postmarked.will exceed an
Operators who do not know or would have reasonably not known until after commencement of discharge, that they will exceed an annual treatment area threshold identified in R317-8-9.3(4).	At least 10 days prior to exceeding an annual treatment area threshold.	Original authorization terminates when annual treatment area threshhold is exceeded. Operator is reauthorized no earlier than 10 days after complete and accurate NOI is mailed and postmarked.
Operators commencing discharge in response to a declared pest emergency situation.	No later than 30 days after commencement of discharge.	Immediately, for activities conducted in response to a declared pest emergency situation.

a/ In the event that a discharge occurs prior to your submitting a NOI, you must comply with all other requirements of the PGP immediately.

(3) PGP Coverage Termination. PGP coverage may be terminated by non-submission of a NOI at the end of the present PGP five-year term, or by submission of a signed Notice of Termination (NOT) form to the DWQ.

(4) Annual Treatment Area Thresholds.

Table 2. Annual Treatment Area Thresholds

Rule Section	Pesticide Use Class	Annual Threshold
R317-8-9.1(1)(a)	Mosquitoes and Other Insect Pests	6,400 acres of Treatment Area
R317-8-9.1(1)(b)	Weed and Algae Control	
	-In Water	80 acres of treatment area a/
	-At Water's Edge	100 linear miles of treatment area at water's edge b/
R317-8-9.1(1)(c)	Aquatic Nuisance Animal Control	
	-In Water	80 acres of treatment area a/
	-At Water's Edge	100 linear miles of treatment area at water's edge b/
R317-8-9.1(1)(d)	Forest Canopy Pest Control	6,400 acres of treatment area

a/ Calculations should include the area of the applications made to active surface waters of the State at the time of pesticide application. For calculating annual treatment area totals, count each pesticide application activity as a separate activity. For example, applying pesticides twice a year to a ten acre site should be counted as twenty acres of treatment area.

b/ Calculations should include the linear extent of the application made at water's edge adjacent to active surface waters of the State and at the time of pesticide application. For calculating annual treatment totals, count each pesticide application activity and each side of a linear water body as a separate activity or area. For example, treating both sides of a ten mile ditch is equal to twenty miles of water treatment area.

(5) All applicators or operators, whether or not falling into the use categories, or required to obtain PGP coverage, or whether or not meeting the minimum annual treatment area thresholds shown in R317-8-9.3(4) must conform to the Technology Based Effluent limitations in the PGP and to all applicable rules and regulations of the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA). The permittee is expected to familiarize himself with the PGP and conform to its requirements, if he discharges any pesticides prior to obtaining a NOI. After February 15, 2012 the permittee is authorized to discharge under the terms and conditions of the PGP only with submission of a completed electronic NOI in accordance with Table 1 above.

(6) Based on a review of the NOI or other information, the DWQ may delay authorization to discharge under the PGP or may determine that additional technology-based and/or water quality-based effluent limitations are necessary; or may deny coverage under this PGP and require submission of an application for an individual UPDES permit in accordance with this rule. If the Executive Secretary determines an individual UPDES permit is required, that permitting process will proceed independently.

Notice of Continuation October 4, 2007 **19-5-104**
40 CFR 503

R317. Environmental Quality, Water Quality.
R317-12. General Requirements: Tax Exemption for Water Pollution Control Equipment.
R317-12-1. Application.

Application for certification shall be made on forms provided by the State Department of Environmental Quality, and shall include all information requested thereon and such additional reasonably necessary information as is requested by the executive secretary of the Water Quality Board.

R317-12-2. Eligibility for Certification.

Certification shall be made only for taxpayers who are owners, operators (under a lease) or contract purchasers of a trade or business that utilizes Utah property with a pollution control facility to prevent or minimize pollution.

R317-12-3. Review Period.

Date of filing shall be date of receipt of the final item of information requested and this filing date shall initiate the 120-day review period.

R317-12-4. Conditions for Eligibility.

(1) All materials, equipment and structures (or part thereof) purchased, leased or otherwise procured and services utilized for construction or installation in a water pollution control facility shall be eligible for certification, provided:

(a) such materials, equipment, structures (or part thereof), and services installed, constructed, or acquired result in a demonstrated reduction of pollutant discharges, and

(b) the primary purpose of such materials, equipment, structures (or part thereof), and services is preventing, controlling, reducing, or disposing of water pollution.

(2) The above includes expenditures which reduce the amount of pollutants produced as well as expenditures which result in removal of pollutants from waste streams. The materials, equipment, structures (or part thereof), and services that are necessary for the proper functioning of water pollution control facilities meeting the requirements of (1)(a) and (b) above, including equipment required for compliance monitoring, shall be eligible for certification.

R317-12-5. Limitations on Certification.

Applications for certification shall be certified by the executive secretary of the Water Quality Board after consultation with the State Tax Commission and only if:

(1) plans for the water pollution control facility in question require review and approval by the Water Quality Board and have been so approved, or

(2) the water pollution control facility is specifically required by the Water Quality Board, including facilities constructed for pretreatment of wastes prior to discharge to a public sewerage system in accordance with R317-8-8.1, but excluding facilities which are permitted by rule under R317-6-6.2 (Ground Water Discharge Permit by Rule) unless required to obtain an individual permit by the Water Quality Board, or

(c) the water pollution control facility is required and permitted by another statutory board within the Department of Environmental Quality, or

(d) the water pollution control facility eliminates or reduces the discharge of pollutants which would be regulated by the Water Quality Board, if such pollutants were discharged.

R317-12-6. Exemptions from Certification.

The following items are specifically not eligible for certification:

(1) materials and supplies used in the normal operation or maintenance of the water pollution control facilities;

(2) materials, equipment, and services used to monitor water, unless required for a permit or approval from a statutory board within the Department of Environmental Quality;

(3) materials, equipment, and services for collection, treatment, and disposal of human wastes, unless the primary purpose of such materials, equipment and services is the treatment of industrial wastes;

(4) materials, equipment and services used in removal, treatment, or disposal of pollutants from contaminated ground water, if the applicant caused the ground water contamination by failing to comply with applicable permits, approvals, rules, or standards existing at the time the contamination occurred.

R317-12-7. Duty to Issue Certification.

Upon determination that facilities described in any application under R317-12-1 satisfy the requirements of these rules and Sections 19-2-123 through 19-2-127 the executive secretary of the Water Quality Board shall issue a certification of pollution control facility to the applicant.

R317-12-8. Appeal and Revocation.

(1) A decision of the executive secretary of the Water Quality Board may be reviewed by filing a Request for Agency Action as provided in the administrative rules for Water Quality, R317.

(2) Revocation of prior certification shall be made for any of the circumstances prescribed in Section 19-2-126, after consultation with the State Tax Commission.

R337. Financial Institutions, Credit Unions.
R337-10. Rule Designating Applicable Federal Law for Credit Unions Subject to the Jurisdiction of the Department of Financial Institutions.
R337-10-1. Authority, Scope and Purpose.

(1) This rule is issued pursuant to Section 7-1-325.

(2) Violations of federal law designated by this rule may only be enforced by the department by taking action permitted under Title 7 and the applicable chapters set forth in Section 7-1-325.

(3) This rule designates which one or more federal laws the department may enforce and are applicable to credit unions subject to the jurisdiction of the department.

R337-10-2. Definitions.

(1) "Department" means the Department of Financial Institutions.

(2) "Federal Law" means:

(a) a statute passed by the Congress of the United States; or

(b) a final regulation:

(i) adopted by an administrative agency of the United States government; and

(ii) published in the code of federal regulations or the federal register.

R337-10-3. Applicable Federal Law.

In accordance with Section 7-1-325, the following federal laws are applicable to credit unions subject to the jurisdiction of the department:

(1) Truth in Lending Act, 15 U.S.C. Sec. 1601 et seq., and its implementing federal regulations;

(2) Equal Credit Opportunity Act, 15 U.S.C. Sec. 1691, and its implementing federal regulations;

(3) Truth in Savings Act, 12 U.S.C. Sec. 4301 et seq., and its implementing federal regulations;

(4) Bank Secrecy Act, 12 U.S.C. Sec. 1829b, 12 U.S.C. Sec. 1951 through 1959, and 31 U.S.C. Sec. 5311 through 5332, and its implementing federal regulations;

(5) Federal Credit Union Act ("Prompt Corrective Action"), 12 U.S.C. Sec. 1790d, and its implementing federal regulations;

(6) Federal Credit Union Act, 12 U.S.C. Sec. 1757(5)("Loans and lines of credit to officials"), and its implementing federal regulations;

(7) Real Estate Settlement Procedures Act, 12 U.S.C. Sec. 2601 et seq., and its implementing federal regulations;

(8) Fair Credit Reporting Act, 15 U.S.C. Sec. 1681 et seq., and its implementing federal regulations;

(9) Expedited Funds Availability Act, 12 U.S.C. Sec. 4001 et seq., and its implementing federal regulations;

(10) Electronic Fund Transfers Act, 15 U.S.C. Sec. 1693 et seq., and its implementing federal regulations;

Notice of Continuation January 20, 2012

R343. Financial Institutions, Nondepository Lenders.
R343-1. Rule Governing Form of Disclosures For Title Lenders, Who Are Under the Jurisdiction of the Department of Financial Institutions.
R343-1-1. Authority, Scope and Purpose.

(1) This rule is issued pursuant to Section 7-24-203(2).

(2) This rule establishes minimum standards for the form of disclosure to protect the public interest.

R343-1-2. Definitions.

(1) "Department" means the Department of Financial Institutions.

R343-1-3. Form of Disclosure.

(1) Content of disclosure form. The disclosure form required by this rule must include:

(a) a statement about the cost of obtaining the loan in the format prescribed in Section 226.18 and Appendix H of Truth in Lending 12 CFR 226;

(b) a statement that failure to make any payment by the end of the contractual grace period may result in repossession of the property pledged to secure the loan;

(c) a statement that title loans are typically high cost loans and that lower cost loans are usually available to consumers with reasonable credit. Consumers should compare the "Annual Percentage Rate" of the loan with other loans that are available from other lenders that typically offer loans;

(d) a statement that if the consumer is obtaining the loan because of problems with their credit they may wish to obtain credit counseling or financial advice from entities listed under "Credit and Debt Counseling" in the yellow pages or the department or a governmental agency which regulates Utah lenders.

(e) the statements described above shall be disclosed on the front side of the disclosure form preceding the borrowers' signature line.

(2) Type size of the disclosure form. The disclosure form required by this rule must be of the following font sizes:

(a) the terms for "Annual Percentage Rate" and "Finance Charge" shall be 12 point;

(b) no other disclosure shall be as conspicuous except the creditor's identity;

(c) all other disclosures shall be at least 9 point.

(3) Disclosure requirements; timing and method of disclosures.

(a) The title lender shall provide the disclosure form to the consumer in writing before the consumer completes the loan agreement.

(b) Disclosures must be readily understandable. The disclosures required by this rule must be conspicuous, simple, direct and designed to call attention to the nature and significance of the information provided. Examples of methods that could call attention to the nature and significance of the information provided include:

(i) A plain-language heading to call attention to the disclosures;

(ii) Boldface or italics for key words; and

(iii) Distinctive type style, and graphic devices, such as shading or sidebars, when the disclosures are combined with other information.

Notice of Continuation January 6, 2012

R392. Health, Disease Control and Prevention, Environmental Services.

R392-100. Food Service Sanitation.

R392-100-1. Authority and Purpose.

(1) This rule is authorized by Subsections 26-1-30(2), and 26-15-2.

(2) This rule establishes definitions; sets standards for management and personnel, food operations, and equipment and facilities; and provides for food establishment plan review, permit issuance, inspection, employee restriction, and permit suspension to safeguard public health and provide consumers food that is safe, unadulterated, and honestly presented.

R392-100-2. Incorporation by Reference.

(1) The requirements as found in the U.S. Public Health Service, Food and Drug Administration, Food Code 2009, Chapters 1 through 8, Annex 1, and Annex 2, Federal Food, Drug, and Cosmetic Act, 21, U.S.S. 342, Sec. 402 are adopted and incorporated by reference, with the exclusion of Sections 8-302.14(C)(2),(D) and (E), 8-905.40, and 8-909.20; and

(2) with the following additions or amendments:

(a) In section 1-201.10, insert a new paragraph after paragraph (2) under Core Item to read: "(3) 'Core Item' will also be referred to as 'non-critical' in the state rule."

(b) In section 1-201.10 under Priority Item, replace the semicolon and the word "and" at the end of paragraph (2) with a period; replace the period at the end of paragraph (3) with "; and"; and insert a new paragraph after paragraph (3) to read: "(4) 'Priority Item' will also be referred to as 'critical 1' in the state rule."

(c) In section 1-201.10 under Priority Foundation Item, replace the semicolon and the word "and" at the end of paragraph (2) with a period; replace the period at the end of paragraph (3) with,"; and"; and add a new paragraph after paragraph (3) to read: "(4) 'Priority foundation item' will also be referred to as 'critical 2' in the state rule."

(d) After section 2-102.11 paragraph (17), add a new section to read: "2-102-12 Food Employee Training.

Food employees shall be trained in food safety as required under 26-15-5 and shall hold a valid food handler's permit issued by a local health department."

(e) After section 4-204-123 paragraph (B), add a section to read: "4-204.124 Restraint of Pressurized Containers.

Carbon dioxide, helium or other similar pressurized containers must be restrained or secured to prevent the tanks from falling over. Food managers shall be trained and certified as required under 26-15a and R392-101."

(f) At the end of section 5-101.12, add: "The process shall be in accordance with the American Water Works Association (AWWA) C651-2005 for disinfection and testing."

(g) At the end of section 5-202.13, add: "Where the distance to the adjacent wall is closer than three pipe diameters, the air gap shall not be less than 1-1/2 inch."

(h) After the the reference to the section number "5-202.13" in section 5-203.15 paragraph (A), delete the article "a" and insert: "an American Society of Safety Engineers (ASSE) 1022".

(i) After the reference to paragraph (B) in section 5-402.11 paragraph (A), delete the coma; insert the word "and"; and delete the text, ", and (D)" that follows the reference to paragraph (C).

(j) Delete paragraph (D) from section 5-402.11.

(k) Amend section 8-103.10 to read:

"8-103.10 Modifications and Waivers.

(A) The regulatory authority may grant a variance by modifying or waiving the requirements of this Code if in the opinion of the regulatory authority a health hazard or nuisance will not result from the variance. If a variance is granted, the regulatory authority shall retain the information specified under section 8-103.11 in its records for the food establishment.

(B) A variance or waiver issued by the regulatory authority and the documentation required in section 8-103.11 must be copied to the Utah Department of Health, Office of Epidemiology, Environmental Sanitation Program within 5 working days of issuance.

(C) A variance or waiver intended for a food establishment which is of a chain with stores in more than one local health jurisdiction in the State must be approved by the Utah Department of Health prior to issuance."

(l) Amend section 8-103.11 to add:

"(D) In addition, a variance from section 3-301.11 may be issued only when:

(1) the variance is limited to a specific task or work station;

(2) the applicant has demonstrated good cause why section 3-301.11 cannot be met;

(3) suitable utensils are used to the fullest extent possible with ready-to-eat foods in the rest of the establishment; and

(4) the applicant can demonstrate active management control of this risk factor at all times."

(m) Amend Section 8-302.14 (C) to read:

"A statement specifying whether the food establishment is mobile or stationary and temporary or permanent."

(n) Amend section 8-304.10 paragraph (A) to read:

"(A) Upon request, the regulatory authority shall provide a copy of the food service sanitation rule according to the policy of the local regulatory agency."

(o) Amend section 8-401.10 paragraph(A) to read:

"(A) Except as specified in paragraphs (B) and (C) of this section, the regulatory authority shall inspect a food establishment at least once every 6 months and twice in a season for seasonal operations."

(p) Amend section 8-501.10 paragraph (B) to read:

"(B) Requiring appropriate medical examinations, including collection of specimens for laboratory analysis, of a suspected food employee or conditional employee; and"

(q) Add a paragraph after 8-501.10 paragraph (B) to read:

"(C) Meeting reporting requirements under Communicable Disease Rule R386-702 and Injury Reporting Rule R386-703."

(r) Amend section 8-601.10 to read:

"Due process and equal protection shall be afforded as required by law in all enforcement and regulatory actions."

(s) Amend section 8-801.30 to read:

"Service is effective at the time the notice is served or when service is made as specified in section 8-801-20 paragraph (B)."

(t) Amend section 8-903.10 to read:

"8-903.10 Impoundment of Adulterated Food Products Authorized.

(A) The impoundment of adulterated food is authorized under Section 26-15-9, UCA.

(B) The regulatory authority may impound, by use of a hold order, any food product found in places where food or drink is handled, sold, or served to the public, but is found or is suspected of being adulterated and unfit for human consumption,

(C) Upon five days notice and a reasonable opportunity for a hearing to the interested parties, to condemn and destroy the same if deemed necessary for the protection of the public health and

(D) If the regulatory authority has reasonable cause to believe that the hold order will be violated, or finds that the order is violated, the regulatory authority may remove the food that is subject to the hold order to a place of safekeeping."

(u) Amend section 8-903.60 to read:

"The regulatory authority may examine, sample, and test food in order to determine its compliance with this Code in section 8-402.11."

(v) Amend section 8-903.90 to read:
"The regulatory authority shall issue a notice of release from a hold order and shall physically remove the hold tags, labels, or other identification from the food if the hold order is vacated."
(w) Amend section 8-904.30 number/catchline to read:
"8-904.30 Contents of the Summary Suspension Notice."
(x) Amend section 8-905.10 paragraph (A) to read:
"(A) A person who receives a notice of hearing shall file a response within 10 calendar days from the date of service. Failure to respond may result in license suspension, license revocation, or other administrative penalties."
(y) Amend section 8-905.20 to read:
"A response to a hearing notice or a request for a hearing as specified in section 8-905.10 shall be in written form and contain the following:
(A) Response to a notice of hearing must include:
(1) An admission or denial of each allegation of fact;
(2) A statement as to whether the respondent waives the right to a hearing;
(3) A statement of defense, mitigation, or explanation concerning all claims; and
(4) A statement as to whether the respondent wishes to settle some or all of the claims made by the regulatory authority.
(B) A request for hearing must include:
(1) A statement of the issues of fact specified in section 8-905.30 paragraph (B) for which a hearing is requested; and
(2) A statement of defense, mitigation, denial, or explanation concerning each allegation of fact.
(C) Witnesses - In addition to the above requirements, if witnesses are requested, the response to a notice of hearing and a request for hearing must include the name, address, telephone number, and a brief statement of the expected testimony for each witness.
(D) Legal Representation - Legal counsel is allowed, but not required. All documents filed by the respondent must include the name, address, and telephone number of the respondent's legal counsel, if any."
(z) Amend section 8-905.50 paragraph (A)(1) to read:
"(1) Except as provided in paragraph (B) of this section, within 5 calendar days after receiving a written request for an appeal hearing from:
(aa) Adopt subsections 8-905.50 paragraphs(A)(1)(a) through (c) without changes.
(ab) Amend subsection 8-905.50 paragraph(A)(2) to read:
(2) Within 30 calendar days after the service of a hearing notice to consider administrative remedies for other matters as specified in section 8-905.10(C) or for matters as determined necessary by the regulatory authority."
(ac) Amend section 8-905.60 number/catchline to read:
"8-905.60 Notice of Hearing Contents."
(ad) Amend section 8-905.80 number/catchline to read:
"8-905.80 Expeditious and Impartial Hearing."
(ae) Amend section 8-905.90 number/catchline to read:
"8-905.90 Confidentially of Hearing and Proceedings."
(af) Amend section 8-905.90 paragraph (A) to read:
"(A) Hearings will be open to the public unless compelling circumstances, such as the need to discuss a person's medical or mental health condition, a food establishment's trade secrets, or any other matter private or protected under federal or state law."
(ag) Delete section 8-905.90 subparagraphs (A)(1) and (2).
(ah) Amend section 8-906.30 paragraph (B) to read:
"(B) Unless a party appeals to the head of the regulatory authority within 10 calendar days of the hearing or a lesser number of days specified by the hearing officer:"
(ai) Adopt subsection 8-906.30 paragraphs (B)(1) through (2) without changes.
(aj) Amend section 8-907.60 to read:
"Documentary evidence may be received in the form of a copy or excerpt if provided to the hearing officer and opposing party prior to the hearing as ordered by the hearing officer."
(ak) Amend section 8-908.20 to read:
"Respondents accepting a consent agreement waive their rights to a hearing on the matter, including judicial review."
(al) Amend section 8-911.10 paragraph (B) to read:
"(B) Any person who violates any provision of this rule may be assessed a civil penalty as provided in section 26-23-6."
(am) Amend section 8-913.10 number/catchline to read:
"8-913.10 Petitions, Penalties, Contempt, and Continuing Violations."
(an) Amend section 8-913.10 paragraph (B) to replace the phrase "(designate amount)" with the phrase, "$5,000".
(ao) Add paragraph 8-913.10(D) to read:
"(D) The adjudicative body, upon proper findings, shall assess violators a fee for each day the violation remains in contempt of its order."
(3) All parts of the food establishment shall be designed, constructed, maintained, and operated to meet the standards of the state construction code adopted by the Utah Legislature under. A copy of the construction code is available at the office of the local building inspector.

KEY: public health, food services, sanitation
January 26, 2012 26-1-30(2)
Notice of Continuation January 20, 2012 26-15-2

R392. Health, Disease Control and Prevention, Environmental Services.

R392-200. Design, Construction, Operation, Sanitation, and Safety of Schools.

R392-200-1. General Provisions.

A. Purpose. This rule provides minimum requirements for the protection of the health and safety of the school occupants and the general public.

B. Application. The provisions of this rule are applicable to the design, construction, operation, maintenance, safety, health, and sanitation of schools, their grounds, and accessory structures thereto.

C. Construction or Remodeling of School Buildings

1. On and after the effective date of this rule, all school buildings or appurtenances that are constructed or extensively remodeled shall be designed, constructed, remodeled, and maintained in accordance with the standards set forth in rule.

2. Architectural plans for new or for an extensive renovation of an existing facility shall be submitted to the Department or its designated representative for review and approval prior to construction. Any changes required for approval shall be included into the plans and adhered to in the construction of the facility.

3. Existing schools shall be maintained in accordance to the health and sanitary standards established in this rule.

D. Definitions

1. "Approved" means acceptable to the Director or local health officer based on his determination that there is conformance with appropriate standards and good public health practice.

2. "Department" means the Utah Department of Health or its authorized agents.

3. "Director" means the Executive Director of the Utah Department of Health, or designated representative.

4. "Facility" means a place, an institution, a building or part thereof, a set of buildings, or an area, whether or not enclosing a building or set of buildings, and its associated premises that is used for the education of individuals and that may be owned and/or operated by public or private agencies.

5. "Hot Water" means water heated to a temperature of not less than 120 degrees Fahrenheit (49 degrees Celsius) at the outlet.

6. "Instructor" means teacher, teaching assistant, teacher's aid, or any other such individual responsible for a particular class.

7. "Local Health Officer" means the health officer of any municipal, county, or district health department, or his designated representative.

8. "School" shall mean any public or private educational institution or facility owned and/or operated by federal, state, or local governments, religious organizations, private agencies, or individuals.

9. "Solid Wastes" means any discarded organic matter, refuse, rubbish, hazardous waste, special waste, garbage, trash, and other waste materials resulting from the operation of the facility.

10. "Toxic" means any substance that may have an adverse physiological effect on a person or persons.

11. "Wastewater" means sewage or water-carried wastes, and shall include, but not be limited to, the discharges from all plumbing fixtures or facilities.

R392-200-2. Site Selection.

A. Site Standards

1. The topography of the site shall permit the drainage of surface waters from the grounds without creating a nuisance during inclement weather, thawing periods, lawn sprinkling, or irrigation.

2. The school site shall not be located in an area where there is a history or high possibility of flooding, high ground water, snow or earth slides, earthquake fault, or an area that was a repository for hazardous substances.

3. The school site shall be located to eliminate the negative influence of railroads, freeways, highways, heavy traffic roads, industrial areas, airports and aircraft flight patterns, fugitive dust, odors, or other areas where auditory problems, malodorous conditions, or safety and health hazards exist.

R392-200-3. School Grounds.

A. General

1. Fences, if needed, shall be constructed of sufficient height around elementary school playgrounds to exclude animals and prevent children from entering local streets or parking lots. Fencing shall be constructed of smooth materials with no barbs or projections and shall be maintained in good repair.

2. Electrical transmission lines, poles, transformer boxes, and other electrical equipment shall be located to prevent an electrical or obstacle safety hazard. Well pumps or other electrical equipment on the school property shall be enclosed and protected with a minimum six feet high woven wire fence or other suitable enclosure.

3. Walkways shall be provided between the school building and other buildings on the school grounds. Walkways shall be graded to allow proper drainage, and constructed of smooth impervious materials to prevent a safety hazard. Walkways and parking areas shall be maintained in good repair.

4. Illumination shall be provided for walkways, building entrances, parking areas, roads, and similar areas, during hours of use.

5. Elevated lawn sprinkler heads shall not be permanently installed and shall not be left in place on playgrounds or other recreational areas.

6. Service roads, parking areas, and walkways shall be constructed and located to facilitate movement of vehicular and pedestrian traffic and to prevent or reduce safety hazards.

7. The playground area shall be located in a safe and supervised area. All parts of the school grounds shall be kept free of weeds, holes, ditches, stones, ashes, cinders, pieces of wire or glass, tree stumps, dead limbs of trees, or other obstructions that create safety hazards or rodent harborage areas.

8. Playground equipment, if provided, shall be located to permit adequate supervision. Playground sites shall be located where the hazard of elementary school age children crossing streets or parking areas is eliminated.

9. During school hours dogs, cats, or other animals shall not be allowed on school property. Seeing eye dogs or animals used for school instructional purposes may be allowed if adequately controlled.

10. If bicycles are permitted at school, a designated area shall be provided for bicycle parking. The parking area shall be located where it will not create a safety hazard by obstructing building entry/exit ways, walkways, or vehicular traffic.

R392-200-4. Food Service.

A. General

1. The design, construction, installation, and operation of food service facilities and equipment shall be in compliance with R392-100 and other appropriate local regulations.

2. Food not prepared on site shall be obtained from approved sources and shall be transported and served in accordance with R392-100.

3. Local health department approval shall be obtained prior to any function where food will be served or prepared from other than school lunch facilities.

R392-200-5. Sanitary Facilities and Controls.

A. Water Supply - General

1. The water supply shall be of adequate volume and pressure and of a safe, sanitary quality and shall comply with the requirements of the State of Utah public drinking water Rules. All bottled water shall comply with the bottled water requirements of the Utah Department of Agriculture.

2. If the water supply is interrupted for any reason, for 4 hours or more, the local health officer shall be notified. The local health officer may require the school to be closed or an approved alternative source of potable water shall be provided.

3. Non-potable water supply systems used for irrigation or similar purposes shall be operated in a completely separate storage and support system from potable water and shall be maintained in compliance with Section 19-4-112 of the Utah Code Annotated 1953 as amended.

4. Water supply pumps, storage, treatment facilities, and other mechanical equipment shall be protected from unauthorized access.

5. If water is to be supplied by the school's independent water supply system, plans and specifications for such a water system shall meet Utah State safe drinking water standards and shall be submitted to and approved by the Department of Environmental Quality prior to construction.

B. Wastewater - General

1. All wastewater shall be disposed of by a public sewage system or by a sewage disposal system constructed and operated according to the Utah Department of Environmental Quality wastewater disposal rules.

2. If a sewer service is interrupted for any reason, for 4 hours or more, the local health officer shall be notified. The local health officer may require the school to be closed or an approved alternate sanitary facility shall be provided.

3. All schools installing or modifying an on-site sewage disposal system shall submit plans to the health officer having jurisdiction for review and approval prior to construction or modification.

C. Plumbing - General. Plumbing shall be sized, installed, and maintained in accordance with the requirements of the Utah Plumbing Code.

D. Toilet Facilities - General. Toilet room facilities shall be located and available on each floor having classrooms or other instructional areas. Locked facilities are prohibited unless students have reasonable access to them or to other facilities that are reasonably accessible.

1. Toilet Rooms

a. Self-closing entrance doors shall be provided if privacy is not achieved using shielding to break the line of vision from outside the toilet room.

b. If a toilet room is designed for use by more than one person at a time, each toilet therein shall be enclosed on all four sides by a separate stall. The height of the stalls shall allow sufficient light or ventilation therein. The stall partitions and door shall be at least 16 inches from the floor.

c. In new or extensively remodeled establishments, toilet rooms shall be mechanically vented to the outside of the building. A system shall be installed to resupply the air that is exhausted.

d. Toilet rooms used by girls in grades 4 and above, and/or women shall have at least one conveniently located covered waste receptacle.

e. Each toilet room shall be provided with an easily cleanable waste container that shall be emptied as often as necessary, at least daily, and shall be kept clean.

f. All toilet room fixtures shall be kept clean and maintained in good repair.

g. Each toilet fixture shall be provided with a supply of toilet tissue at all times.

h. Toilet rooms shall be available for use at all times the school is open or used for school approved activities.

i. Conveniently located toilet facilities shall be easily accessible for all recreational facilities and areas utilized for school functions or approved activities by the school.

j. Rest room walls, floors, and ceilings shall be light colored, smooth, non-absorbent, easily cleanable, and shall be kept clean and maintained in good repair.

E. Lavatory Facilities

1. Lavatory Installation

a. Lavatories with hot and cold water shall be located in or immediately adjacent to toilet facilities.

b. Lavatories with hot and cold water shall be located in or conveniently adjacent to classrooms where normal activities require the students to wash their hands either before or after performing the classroom activities. Such classrooms shall include, but are not limited to, elementary classrooms, home economics, art, chemistry, biology, auto shop, wood and metal shop, and drama. The hot water at these locations shall not exceed 126 degrees F.

c. Lavatories, including soap, towels, and hot water shall be provided for all persons required to handle any liquids that may burn, irritate, or otherwise be harmful to the skin.

2. Lavatory Faucets. Each lavatory shall be provided with hot and cold water, utilizing a mixing valve or combination faucet. Steam-mixing valves are prohibited. Any self-closing, slow-closing, or metering faucet used shall be designed to provide a flow of water for an average of 10 seconds without the need to reactivate the faucet.

3. Lavatory Supplies

a. A supply of hand cleaning soap or detergent shall be conveniently available near each lavatory.

b. Sanitary towels in an appropriate dispenser or a forced-air mechanical hand-drying device providing heated air shall be conveniently located near each lavatory. Common towels are prohibited. If disposable towels are used, easily cleanable waste receptacles shall be provided.

4. Lavatory Maintenance. Lavatories and all related fixtures shall be kept clean and maintained in good repair.

F. Shower Facilities

1. Shower Installation

a. Showers shall be provided for classes in physical education if students are required to change clothes. Each shower shall be provided with hot and cold water utilizing a mixing valve or combination faucet. Nothing in this section shall prohibit the use of water temperature controls to ensure the safety of the student. Shower floors and adjacent areas shall have a non-skid surface.

b. At least one shower head shall be provided for each sixteen students utilizing any adjacent dressing area at any one time.

c. Privacy showers shall be provided.

d. A dressing room area with non-skid floors and floor drains shall be provided adjacent to shower facilities and shall be equipped with benches constructed of easily cleanable impervious materials. Showers shall be constructed to prevent water flow into the drying and dressing room area. Carpeting is prohibited in dressing rooms.

e. In new or extensively remodeled facilities, shower area dressing rooms shall be mechanically vented to the outside of the building. A system shall be installed to resupply the air that is exhausted.

f. Toilet rooms shall be conveniently located to shower and dressing rooms.

2. Maintenance

a. Shower rooms and adjacent areas when used shall be cleaned at least daily.

b. Shower room walls, floors and ceilings shall be light colored, smooth, nonabsorbent, easily cleanable, and shall be kept clean and maintained in good repair.

3. Shower Supplies. If towels are supplied by the school, they shall be laundered to ensure exposure to a water

temperature of 168 degrees F, for a combined wash and rinse period of at least 25 minutes or an equivalent washing procedure. Such towels, if provided, shall be furnished clean weekly or at time of reissue. The use of common towels is prohibited.

G. Drinking Fountains

1. General

a. Fountains shall be designed so the water stream will arch into the basin. The stream of water shall be of a sufficient height and constant pressure to enable the user to drink without touching the mouth guard. Vertical flow, bubbler type fountains are prohibited. Fountains shall be constructed of impervious material such as stainless steel, porcelain, vitreous china or enameled cast iron.

b. Fountains shall be kept clean and in good repair.

c. Fountains shall not be installed in toilet rooms or other areas where exposure to contamination from human wastes or toxic or hazardous materials could occur.

d. The height of the fountain at the drinking level shall be convenient to students utilizing the fountain.

e. Conveniently located drinking fountains shall be easily accessible for all recreational facilities and areas utilized for school functions.

f. If water under pressure cannot be made available, all bottled water that is provided shall comply with the bottled water requirements of the Utah Department of Agriculture, with a suitable faucet for the filling of individual cups. Individual single-service drinking cups shall be dispensed from an approved dispenser.

g. The use of common cups is prohibited.

H. Swimming Pools

1. General

a. Swimming pools shall be constructed, operated, and maintained in accordance with R392-302.

b. Plans for swimming pools, diving pools, or therapy pools intended for installation at any facility covered by this rule shall be reviewed and approved by the Department or its designated representative prior to installation.

I. Solid Wastes

1. Containers

a. Cleanable waste containers shall be available in each classroom, and shall be kept clean and in good repair.

b. Shops, chemistry labs, and similar areas shall have appropriate waste containers for solid waste disposal.

c. Solid wastes shall be kept in durable, easily cleanable, insect-proof and rodent-proof containers that do not leak and do not absorb liquids.

d. Containers, refuse bins, compactors, and compactor systems located or stored outside shall be easily cleanable, shall be provided with tight-fitting lids, doors, and covers, and shall be kept covered. Containers designed with drains shall have drain plugs in place at all times, except during cleaning.

e. There shall be a sufficient number of containers to hold all the garbage, refuse, and other solid waste that accumulates.

f. Soiled containers shall be cleaned at a frequency that is adequate to prevent odors and insect and rodent attraction. Suitable facilities, including hot water and detergent or steam, shall be provided and used for washing containers. Liquid waste from compacting or cleaning operations shall be disposed as sewage and not allowed to enter any storm drain.

g. Suitable facilities, including hot water and detergent, shall be provided and used for washing containers.

2. Storage

a. Any solid wastes stored on the premises shall be inaccessible to insects, rodents, and other animals. Outside storage of unprotected plastic bags or wet-strength paper bags or baled units containing garbage or refuse is prohibited. Cardboard or other packaging material that contains no garbage or food wastes need not be stored in covered containers, if such material is protected in an enclosure or baled so a litter problem or other nuisance is not created.

b. Solid waste storage rooms, if used, shall be constructed of easily cleanable, nonabsorbent, washable materials, shall be kept clean, shall be insect- and rodent-proof, and shall be kept free of odors.

c. Outside storage areas or enclosures shall be easily cleanable and shall be kept clean. Solid waste containers, refuse bins and compactor systems located outside shall be kept covered and properly located or stored on or above a smooth surface of nonabsorbent material, such as concrete or asphalt, that is kept clean and maintained in good repair.

3. Disposal

a. Solid waste shall be disposed of often enough to prevent the development of odor or the attraction or propagation of insects or rodents.

b. The open burning of any trash, garbage or other wastes on the premises is prohibited except as provided by law.

c. No disposal of solid waste shall occur on the premises.

J. Hazardous Wastes

1. General. Disposal of hazardous wastes shall comply with the Utah hazardous waste management rules and applicable local regulations.

K. Insect and Rodent Control

1. General. Effective measures intended to minimize the presence of rodents, flies, cockroaches, bedbugs, lice, or other vermin on the premises shall be utilized. The premises shall be maintained so that propagation, harborage, or feeding of vermin is prevented.

2. Openings. Openings to the outside shall be effectively protected against the entrance of insects, rodents, and other animals. Screens for windows, doors, skylights, intake and exhaust air ducts, and other openings to the outside shall be tight fitting and free of breaks. Screening material shall not be less than sixteen mesh to the inch.

3. Pesticide Application. Restricted-use pesticides shall not be used within buildings or on the grounds unless formulated and dispensed by a pesticide applicator certified by the Utah State Department of Agriculture. All labeled directions for use shall be specifically followed, and products without label directions are prohibited from use.

R392-200-6. Construction and Maintenance of Physical Facilities.

A. Floors, Walls, and Ceilings

1. Construction. All buildings shall be of sound construction with floors, walls, and ceilings constructed of nonporous, cleanable material and shall be maintained in good condition.

2. Lighting - General

a. A comfortable lighting environment shall be provided in every classroom with light quality that meets the requirements of all applicable parts of this rule.

b. Permanently fixed artificial light sources shall be installed to provide, at a distance of 30 inches from the floor, sufficient light intensities on instructional surfaces, including chalkboards, without causing excess intensity eyestrain.

c. All light fixtures located in student areas shall be shielded to protect the students from injury in case of bulb breakage.

d. Light intensity ratios shall not exceed levels for surfaces causing excessive eye accommodation. Instructional areas shall have predominantly light colors to obtain low brightness ratios. Instructional areas shall not exceed the following brightness ratios:

(1) Between the task and immediately adjacent surfaces, including between a task and a desk top; ratio 3:1

(2) Between the task and more remote darker surfaces, including between a task and the floor; ratio 3:1

(3) Between the task and the more remote lighter surfaces, including between a task and the ceiling; ratio 1:5

(4) Between windows or other luminous objects and surfaces adjacent to them, except the ratio between windows and adjacent chalkboards may be exceeded; ratio 20:1

(5) Between the chalkboard and the wall or other visually adjacent area; ratio 1:3

e. Reflectance of the finishes in instructional areas shall be within the following range 0:

(1) Percentage of Reflectances

(a) Ceilings - 70 to 90

(b) Walls - 40 to 60

(c) Floors - 30 to 50

(d) Chalkboards - 15 to 20

(e) Desks and equipment - 35 to 50

f. Light fixtures shall be cleaned and repaired, and burned out bulbs or lamps replaced as often as necessary in order to maintain the illumination levels required in this section.

g. Any light fixtures emitting noise at a bothersome level shall be repaired or replaced.

B. Ventilation

1. General

a. Rooms shall be provided with natural or mechanical ventilation that admits fresh air and is sufficient to remove or prevent the accumulation of obnoxious odors, smoke, dust, and fumes. In classrooms where combustible vapors may accumulate, such vapors shall be vented either through a fume hood or by other adequate roomwide ventilation.

b. A minimum clean air replacement of 10 cubic feet per minute per person in classrooms shall be maintained. The lining of ducts with fibrous or asbestos materials is prohibited.

c. Air vents shall be placed so no person becomes chilled or overheated in any occupied room.

2. Special Ventilation

a. Intake and exhaust air ducts shall be maintained to prevent the entrance of dust, dirt, and other contaminating materials.

b. In new or extensively remodeled establishments, all rooms from which obnoxious odors, vapors or fumes originate shall be mechanically vented to the outside of the building.

C. Heating

1. Heating facilities shall be properly installed and vented and shall be maintained in a safe working condition. Unvented space heaters producing products of combustion are prohibited.

2. A temperature of 68-74 degrees F during winter months shall be maintained in classrooms. However, on a temporary basis, during a severe winter energy crisis, the temperature may be reduced to 65 degrees F. The temperature in a swimming pool area shall be warmer than the water temperature of the pool.

D. Cooling

1. By September 1, 1998 the school district administrator shall develop a written plan to mitigate adverse health effects of excessive heat to students and staff at each school in his district. The plan, to be called the Classroom Temperature Health Intervention Plan, for each school shall:

a. include district medical, environmental, engineering and health staff in the development of the plan;

b. cover school days during the period September 1 through September 15; however, annual plans after 1998 shall cover the period May 1 through September 15;

c. specify the method by which the heat health hazard level shall be determined as required in Subsection R392-200-6(D)(6);

(1) the plan must require that at least one temperature measurement be taken daily;

(a) the date, time, place, and temperature of the measurement must be recorded on a log to be kept at the school building administration office for two years. The log shall be made available to the local health officer at his request.

(b) school areas supplied by a properly operating air conditioning system are exempted from this Subsection R392-200-6(D)(1)(c);

d. identify interventions for each of the heat health hazard levels listed in tables 1 and 2, and the procedures for ensuring their timely implementation;

e. include an emergency plan in individualized health care plans for all children with special health care needs as identified by a health assessment of the student population;

f. be filed with the local health officer by October 1, 1998;

g. be updated and filed with the local health officer prior to October 1, 1999. After October 1, 1999 the plan shall be updated as changes occur in the school population or in the school facilities and at least annually.

2. The school district administrator shall ensure that the plans required in Subsection R392-200-6(D)(1) are executed effectively.

3. The school district administrator shall develop and file the plans required in Subsection R392-200-6(D)(1) with the local health officer prior to the first day of classes for a new school beginning operation after September 1, 1998.

4. The school district administrator shall prepare a written evaluation of the implementation of the plan required in Subsection R392-200-6(D)(1) and submit it to the local health officer prior to October 1, 1999.

5. The local health officer may require the school district administrator to correct a school plan required in Subsection R392-200-6(D)(1) that he determines is ineffective at preventing adverse health impacts of high heat on the students and staff of the school.

6. The school district administrator shall select one of the following two methods to determine the heat health hazard level in each school:

a. Method 1: Chart the temperature reading taken from a simple wall or hand held dry bulb thermometer into column 2 of table 1. Find the corresponding heat health hazard level in column 1;

(1) the thermometer must have a full range accuracy of plus or minus 2%;

b. Method 2: Properly use a sling psychrometer to determine the relative humidity. Chart the relative humidity into column 1 of table 2. Find the temperature reading taken from a simple wall or hand held dry bulb thermometer in one of the columns directly across from the relative humidity reading. Find the corresponding heat health hazard level at the top of the column in which the temperature is found.

(1) the thermometer must have a full range accuracy of plus or minus 2%;

TABLE 1
DRY BULB INDEX

Heat Health Hazard Level	Thermometer Temperature
Caution	80-89.9 degrees F
Extreme Caution	90-99.9 degrees F
Danger	greater than or equal to 100 degrees F

TABLE 2
TEMPERATURE-HUMIDITY INDEX

% Relative Humidity	Dry Bulb Temperature (degrees F) Caution	Extreme Caution
0	95.0-112.9	113.0-131.9
10	89.5-107.4	107.5-124.4
20	87.5-103.4	103.5-118.4
30	86.0-99.9	100.0-114.9

40	84.0-97.4	97.5-111.9
50	82.0-95.4	95.5-108.9
60	81.5-93.4	93.5-106.9
70	78.5-91.4	91.5-104.9
80	77.5-89.9	90.0-103.4
90	76.5-88.9	90.0-101.4
100	75.0-87.4	87.5-99.9

% Relative Humidity	Dry Bulb Temperature (degrees F) Danger
0	greater than or equal to 132.0
10	greater than or equal to 125.0
20	greater than or equal to 119.0
30	greater than or equal to 115.0
40	greater than or equal to 112.0
50	greater than or equal to 109.0
60	greater than or equal to 107.0
70	greater than or equal to 105.0
80	greater than or equal to 103.5
90	greater than or equal to 101.5
100	greater than or equal to 100.0

7. The school building administrator shall ensure that the local health officer is notified immediately when:

a. the heat health hazard level of Danger is reached anywhere inside the school where students or staff are present for an hour or longer; or

b. on the same day two incidents occur in the school where health symptoms, such as heat stroke, cramps and heat exhaustion, may have been caused by heat and a heat health hazard level of Caution, Extreme Caution, or Danger has been recorded in the school.

E. Maintenance of Heating, Ventilation and Air Conditioning Equipment.

1. The school building administrator has final responsibility to ensure that the heating, ventilating, and air-conditioning system inspection and necessary maintenance activities are conducted at proper time intervals according to the manufacturer's recommendations with qualified in-house or contracted service technicians to provide peak performance of all equipment and systems.

F. Cleaning Physical Facilities

1. General

a. Floors shall be cleaned at least daily.

b. Walls, ceilings, and attached equipment shall be kept clean.

c. Hose bibs with back flow prevention devices shall be provided with running water for washing walkways, courts, passageways, and other common use areas.

2. Utility Facility. In new or extensively remodeled facilities at least one utility sink or curbed cleaning facility with a floor drain shall be located on each floor and used for the cleaning of mops or similar wet floor cleaning tools and for the disposal of mop water or similar liquid wastes. The use of lavatories for this purpose is prohibited.

3. Custodian Closets

a. Custodial closets, equipment and supply storage rooms shall be kept clean and orderly and shall be kept locked if toxic supplies are present.

b. Separate storerooms or cabinets shall be provided for cleaning materials, pesticides, paints, flammables, or other hazardous or toxic chemicals, and for tools and maintenance equipment. These areas shall be kept locked and used for no other purpose and shall comply with the Uniform Fire Code.

c. Oiled mops, dust cloths, rags, and other materials subject to spontaneous combustion shall be properly stored in approved fire resistant containers as required by the Uniform Fire Code.

R392-200-7. Health and Safety.

A. Health

1. A centrally located room or area, with a readily accessible phone, shall be available for emergency use in providing care for persons who are ill, injured or suspected of having any contagious disease. In new structures, a clinic room shall be provided and shall have lavatory facilities with hot and cold running water, soap, individual towels, first aid supplies, and lockable cabinet space for storage of first-aid supplies. Clinic rooms or areas used for emergency treatment and first-aid shall be kept clean, orderly, and in good repair. A school nurse or other appropriately trained individual shall be on the premises and available during normal school hours. In addition, at least two individuals shall be available that have an approved current basic first-aid certificate.

2. Each emergency care room or clinic area shall be provided with a cot or bed, and each cot or bed shall have a washable surface, or cover, or be provided with disposable sheets and pillowcases for each user. Multiuse sheets or covers, if used, shall be laundered after each use.

3. Prescription medications shall be present only on an individual prescription basis and shall be administered only as prescribed by appropriate personnel.

4. All prescription or over the counter medication administered by school personnel, shall be stored in a secure, locked drawer or cabinet.

5. Specified sleeping areas shall be provided with sleeping facilities including cots or pads. Washable or disposable covers, if supplied by the school, shall be maintained in good repair and shall be washed at least weekly and before reissue.

6. In injury high risk areas such as, but not limited to, shops, home economics, playgrounds, and gymnasiums, the instructor shall have an approved current basic first-aid certificate. A readily accessible first-aid kit shall be available in each high risk classroom area, and shall be maintained in good condition.

B. Safety

1. Instructional, athletic, or recreational equipment shall be kept clean, safe, and in good repair. Body contact equipment surfaces shall be routinely cleaned and sanitized at least weekly to minimize the potential of disease transmission.

2. Recreational equipment shall not have open-ended hooks, moving parts that could pinch or crush fingers, sharp edges or rough surfaces, or form rings or angles with a diameter more than 5 inches but less than 10 inches.

3. Outside recreational equipment other than swings shall be placed so that the intended activity has at least 10 feet clearance from fences, buildings, or other stationary objects that may cause injury. Swings shall have at least 16 feet clearance from objects that may cause injury.

4. Play equipment shall have handrails.

5. Recreational equipment that requires anchoring for its use, shall be securely anchored to the ground. Anchoring devices shall not protrude above ground level.

6. Handrails shall be properly installed on stairways, ramps, and outside steps, and shall be in good repair.

7. Gas supply lines serving science laboratories, home economics areas, shops, and other rooms utilizing multiple outlets shall have a master shut-off valve that is readily accessible.

8. Home economics areas, shops, offices and other rooms using electrically operated instruction equipment shall be supplied with a master electric switch readily accessible.

9. All shops shall be kept clean, orderly, and in a sanitary condition. Cleaning and sweeping shall be done in a way that contamination of the air is minimized.

10. Substances that are deemed harmful or hazardous to the health, safety and welfare of instructors and/or students who use them shall be accompanied by specific directions with respect to the proper use, storage, handling and disposal of such supplies and to the potential risks or hazards associated with such supplies.

11. Provisions, including the development and posting of

operating instructions, regulations, or procedures, for students shall be posted and reviewed in class in industrial arts, physical sciences, or vocational educational areas using equipment or hazardous devices. Such instructions shall be written at a sixth grade reading level.

12. Loose clothing including, but not limited to, ties, lapels, cuffs, torn clothing or similar garments that can become entangled in moving machinery shall not be worn when operating equipment.

13. Wrist watches, rings, or other jewelry shall not be worn in any class where they constitute a safety hazard.

14. Students shall confine their hair, if there is a risk of hair entanglement in moving parts of machinery.

15. Exposure to noise or toxic dusts, gases, mists, fumes, or vapors shall be sufficiently controlled so that a health hazard does not occur and shall be in accordance with Utah Occupational, Safety, and Health Administration (OSHA) requirements and applicable local regulations.

16. Approved safety equipment including, but not limited to, aprons, gloves, and safety glasses, shall be available to and worn by all students engaged in activities where there is exposure to hazardous conditions.

17. Safety zones consistent with OSHA requirements shall be marked around areas of equipment where there is danger of possible injury to students.

18. If there is exposure to skin or eye contamination with poisonous, infectious, or irritating materials, an emergency shower and a lavatory with hot and cold running water, soap, and towels or an eye wash fixture shall be available. Self-closing, slow-closing, or metered faucets are prohibited.

19. If there is exposure to infectious organisms, a lavatory with hot and cold running water, soap, and towels shall be available.

20. Where appropriate, a laboratory, auto shop, wood shop, and other such classrooms shall be equipped with an approved fume hood and the required make-up air system meeting applicable national design standards.

21. Facilities shall be available for the proper storage of clothing and of athletic, instructional, and recreational equipment and supplies.

22. Cleaning materials, tools, and maintenance equipment shall be safely stored.

23. Poisonous, dangerous or otherwise harmful plants and/or animals shall not be located in classrooms.

24. Toxic or hazardous materials including, but not limited to, chemicals, poisons, corrosive substances, or flammable liquids, shall be stored in a ventilated, locked fire resistant area with access only by authorized personnel. Such storage area shall comply with Uniform Fire Code and National Fire Protection Association requirements.

25. Oxygen, acetylene, and other high pressure cylinders, including empty cylinders, shall be properly secured and stored. The valve hoods shall be in place when the tanks are not in use.

26. No flammable, explosive, toxic, or hazardous liquids, gases, or chemicals shall be placed, stored, or used in any building or part of a building used for school purposes, except in approved quantities as necessary for use in laboratories, shops, and approved utility rooms. Such liquids, gases, or chemicals shall be kept in tightly sealed containers and stored in safety cabinets or approved storage rooms when not in actual use.

R392-200-8. Inspection and Enforcement.

A. Inspection Frequency

1. An inspection of a school shall be performed at least once every six months. Additional inspections of the school shall be performed as often as necessary for the enforcement of this rule.

2. Whenever a school is constructed or extensively remodeled, the owner or person in charge thereof shall notify the Department or local health officer having jurisdiction, to arrange for an inspection of the school facilities prior to being put into use in order to determine compliance with this rule.

B. Access. The Director, local health officer, or their representative after proper identification, shall be permitted to enter any school at any reasonable time for the purpose of making inspections to determine compliance with this rule.

C. Report of Inspections. Whenever an inspection of a school is made, the findings shall be recorded on an inspection report form acceptable to the Director.

D. Correction of Violations. The completed inspection report form shall specify a reasonable period of time for the correction of the violations found, and correction of the violations shall be accomplished within the period specified.

E. Enforcement

1. The Director and local health officer are charged with the enforcement of the provisions of this rule.

2. The provisions of this rule shall not prevent any city, county, or city and county health department or district from adopting and enforcing standards of sanitation, health, safety, and hygiene for schools more strict than those contained in this rule.

3. Primary enforcement of this rule shall be the responsibility of the local health department. The Director shall periodically review and determine the adequacy of enforcement by local health departments and cooperate with and provide assistance to local health departments if he determines enforcement by a local health department is inadequate.

4. The Director or the local health officer may, if he determines a serious health hazard exists, order closed all or part of a school.

Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.
R392-300. Recreation Camp Sanitation.
R392-300-1. Definitions.

Day-Use Area means any parcel or tract of land designated as a recreation park, picnic grounds, or recreational area which may be located within the confines of an organized recreation camp or it may be an area developed by participating person or groups to satisfy their recreational demands. It shall include but is not limited to: Centers for public gathering for the purpose of witnessing or participating in special outdoor events such as automobile racing, off highway vehicle activity, competitive sports, hunting and fishing activities, etc. Occupation of the area is limited specifically to day use and does not include overnight accommodations.

Director means the Executive Director of the Utah Department of Health.

Modern Camp means a campground of two or more campsites accessible by any type of vehicular traffic. The camp is used wholly or in part for recreation, training or instruction, social, religious activity or physical education or whose primary purpose is to provide an outdoor group living experience. The site is equipped with permanent buildings for the purpose of sleeping, a culinary water supply under pressure, food service facilities, and may be operated on a seasonal or short term basis. These types of camps shall include but are not limited to privately owned campgrounds such as youth camps, church camps, boy or girl scout camps, mixed age group, family group camps, etc.

Semi-developed - A campground of two or more campsites accessible by any type of vehicular traffic. Facilities are provided for both protection of site and comfort of users. Roads, trails and campsites are defined and basic facilities (water flush toilets and/or vault toilets, tables, fireplaces or tent pads) are provided. The camps include but are not limited to National Forest campgrounds, Bureau of Reclamation campgrounds, Utah State Park campgrounds, and youth camps. Campground operators who provide camping for organized groups for a period of seven (7) or more consecutive days must comply with the requirements in Table I.

Semi-primitive - A campground usually accessible by walk-in, equestrian, or motorized trail vehicles. Rudimentary facilities (vault toilets or earthen pit privies* and/or fireplaces) are provided. When pit privies are anticipated at a camp, approval for use must be obtained from the Director of the Utah Department of Health or the local health department having jurisdiction. Such facilities or improvements are designed for protection of the site and not for the comfort of the campers in the area.

Service Building - A building housing toilet, lavatories, bathing facilities, and other such facilities as may be required for use by these regulations.

Wastewater means discharges from all plumbing facilities such as rest rooms, kitchen, and laundry fixtures either separately or in combination.

R392-300-2. General.

2.1 It shall be the duty of each person operating a camp in the State of Utah to carry out the provisions of these regulations. Such person should also have the duty of controlling the conduct of camp occupants to this end, and should make at least one daily inspection of the entire camp for these purposes. All camp toilet and washroom facilities shall be inspected as frequently as necessary by the camp operator, to assure that it is operating in a sanitary manner.

2.2 Severability - If any provision of this code, or its application to any person or circumstance is declared invalid, the application of such provision to other person or circumstances, and the remainder of this code, shall not be affected thereby.

2.3 All applicable building, zoning, electrical, health, fire codes and all local ordinances shall be complied with.

2.4 Campsites, including day-use areas, shall be constructed to provide adequate surface drainage, and shall be isolated from any existing or potential health hazard or nuisance.

R392-300-3. Water Supply.

3.1 Potable water supply systems for use by camp occupants shall meet the requirements of the State of Utah rules relating to public drinking water supplies.

*Design and construction of all earthen privies must comply with standards set forth by the Utah Department of Environmental Quality.

3.2 In addition to the requirements of the rules and regulations relating to public drinking water supplies, the design of water system facilities shall be based on these suppliers engineer's estimate of water demands, but shall in no case be less than the following:

The distribution system serving modern camps with full facilities or semi-developed camps and day-use areas shall maintain a water system pressure in excess of 20 psi at all points in the distribution system during peak hourly flow conditions. Non-community systems in remote areas can be exempted from this requirement, on a case-by-case basis, if flow from the system is always unregulated and free-flowing. Where appropriate, the peak hourly flow will be calculated on the number of fixture units as presented in the Utah Plumbing Code.

Other exceptions to the above requirements may be permitted on a case-by-case basis, as permitted by the State of Utah public drinking water rules.

3.2.1 The source and storage requirements as indicated above do not include water demands for outside use or fire protection. However, if the culinary system is intended to provide water for such uses, the water requirements indicated above must be appropriately increased. Specific information on water requirements (e.g. area of land to be irrigated) must be provided for Department of Health review.

3.3 Construction of a public drinking water supply system intended to serve occupants of any recreation camp shall not commence until plans prepared by a licensed professional registered engineer (in accordance with Title 58, Chapter 22, Professional Engineers, and Land Surveyors Licensing Act) have been submitted to and approved in writing by the Utah Department of Environmental Quality. Following construction, the system may not be placed in service until a final inspection is made by a representative of the Utah Department of Environmental Quality or local health department having jurisdiction.

3.3.1 All systems must be monitored in accordance with the State of Utah public drinking water rules, and in cooperation with the local health department having jurisdiction.

3.4 Any culinary system or any portion thereof that is drained seasonally must be cleaned, flushed, and disinfected prior to use. Furthermore, a water sample of satisfactory bacteriologic quality, i.e. a sample showing not more than one coliform bacteria per 100 ml sample, must be obtained before the system is placed into service.

3.4.1 Systems operated on a seasonal basis may be required to sample for bacteriologic analysis at an accelerated frequency as determined by the Director of the local health department having jurisdiction.

R392-300-4. Wastewater.

4.1 All wastewater shall be discharged to a public sewer system where accessible and within 300 feet of the recreational camp property line.

4.2 Where connection to a public sewer is not available,

wastewater shall be discharged into a wastewater disposal system meeting requirements of the State of Utah Code of Waste Disposal Regulations except as provided in 4.4. Unless water usage rates are available, design shall be based on not less than 30 gallons per day per person for modern camps. Design shall be based on 5 gallons per day per person for semi-developed camps and day-use areas. If these camps have water flush systems, then the design must be based on a minimum of 30 gallons per day per person.

4.3 All plans for the construction or alteration of a wastewater disposal system shall initially be submitted to the local health department having jurisdiction. Where plan approval is required by law to be provided by the State Department of Health, such plans will be forwarded by the local authority along with any appropriate comments. Construction or alteration of the disposal system shall not commence until the plans have been approved in writing by the appropriate health agency.

4.4 In camps providing other than water flush type toilets, waste disposal facilities shall be approved by the Director or local health authorities having jurisdiction.

R392-300-5. Plumbing.

5.1 The minimum plumbing fixtures to be provided are as follows:

TABLE I
Required Plumbing Fixtures For Modern Camps

Plumbing Fixtures	Ratio of Plumbing Fixtures For Number of Camp Occupants(a)		
	Males	Females	Both Sexes
Water Closets	1:40	1:25	--
Urinals	1:50	--	--
Lavatories	1:35	1:35	
Showers(b)	1:35	1:35	
Drinking Fountains(c)	--	--	1:300
Service Sink or Hose Bibb	--	--	1 per service building

(a) Or fraction thereof
(b) Shower facilities should be provided with hot water
(c) The use of common drinking cups is prohibited

TABLE II
Required Plumbing Fixtures For Semi-Developed and Semi-Primitive Camps(a)

Plumbing Fixtures	Ratio of Plumbing Fixtures Per Number of Camp Occupants		
	Males	Females	Both Sexes
Water Closets	1:50	1:25	
Urinals	1:50	--	
Lavatories			1:50
Drinking Fountains			1:300
Service Sink or Hose Bibb			1 per service building

(a) In semi-developed or semi-primitive camps which provide other than water flush-type toilets, Table II will not apply. See Section 4.4.

5.2 Service buildings shall be located not less than 15 feet and not more than 500 feet from any living and camping spaces served.

5.3 Wherever toilet facilities for males and females are located in the same building, and adjacent to each other, they shall be separated by a sound-resistant wall. Direct line of sight to each rest room shall be effectively obstructed.

5.4 Soap and toilet tissue in suitable dispensers and waste receptacles with lids should be provided in each service building. Where lavatories are not provided, other adequate hand cleansing facilities should be provided.

5.5 Where lavatories are provided, clean individual towels or other adequate hand drying facilities should be provided.

5.6 All plumbing installed in any camp shall comply with provisions of the Utah Plumbing Code and applicable local plumbing codes.

R392-300-6. Operation and Maintenance.

6.1 When tents, permanent or semi-permanent buildings are provided, they shall be of sound construction, shall assure adequate protection against the weather, and shall include essential facilities to permit maintenance in a clean and operable condition, and shall provide adequate storage for personal belongings.

6.2 In any permanent or semi-permanent building, the total window area in any room should be equal to at least 10 percent and in no case less than 5 percent of the floor area. For ventilation, windows shall be openable or mechanical ventilation must be provided.

6.3 Each structure made available for occupancy shall comply with the requirements of the Uniform Building Code, except for tents.

6.4 In dormitory type facilities, beds shall be separated by a horizontal distance of at least 5 feet, reducible to 3 feet if beds are alternated head to foot, except in the case of double deck bunks, which shall have a minimum horizontal separation of 6 feet under all circumstances. If suitable permanent partitions are installed between beds, spacing requirements may be modified upon approval of the Director or director of the local health department having jurisdiction.

6.5 Each bed, bunk, cot or sleeping facility made available for use by occupants shall be maintained in a sanitary condition. Mattresses, mattress covers, quilts, blankets, pillows, pillow slips, sheets, comforters and other bedding shall be made available to each occupant not furnishing his own. Bedding shall be kept clean and in good repair. Pillows shall have pillow slips and sheets shall be large enough to completely cover mattresses. Bedding shall be changed daily or in between occupant use.

6.6 All buildings, rooms, and equipment, including furnishings and equipment in camping areas, and the grounds surrounding them shall be maintained in a clean and operable condition.

6.7 Where electric power is available, service buildings shall be provided with outside lighting to indicate the location and entrance doorways of each.

6.8 Where necessary, all means shall be employed to eliminate or control infestations of insects and rodents within all parts of any camp. This shall include approved screening or other approved control of outside openings in structures intended for occupancy or food service facilities.

6.9 Each organized recreation camp shall be equipped with at least a standard 24-unit first aid kit which shall be kept filled and ready for use. Such kit(s) will be readily accessible and be conveniently located in the program, food service or office areas. Each recreation camp staff should have an individual who is adequately trained to render first aid. This individual should possess at least a certificate of completion of the Basic First Aid Course as presented by the American National Red Cross or its equivalent.

R392-300-7. Food Service.

7.1 When food service is provided for camp occupants, food service employees, food, ice, vending machines, food storage, preparation and serving facilities shall comply with R392-100 or applicable local food service regulations.

7.2 Local regulations may require food service facilities plan approval prior to the initiation of construction.

R392-300-8. Solid Wastes.

8.1 Solid wastes originating in any camp or picnic area shall be stored in a sanitary manner in approved, watertight containers with lids, or the equivalent, approved by the local health department. The containers shall be conveniently located and the contents shall be disposed of in a manner approved by the state or local health department having jurisdiction.

R392-300-9. Swimming Pool.

9.1 Any swimming pool, wading or therapy pool made available to camp occupants shall comply with R392-302 and applicable local regulations.

KEY: public health, recreation areas
1987 26-15-2
Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.

R392-301. Recreational Vehicle Park Sanitation.

R392-301-1. Definitions.

Recreational Vehicle - means a vehicular unit, other than a mobile home, designed as a temporary dwelling for travel, recreational and vacational use, which is either self-propelled or is mounted on or pulled by another vehicle, including: travel trailer, camp trailer, folding tent trailer, truck camper, or motor home.

Dependent Recreational Vehicle - means a recreational vehicle that is dependent upon a service building for toilet facilities, hand washing facilities, shower or bathing facilities and is not designed for the connection to water or sewer utilities.

Director - means the Executive Director of the Utah Department of Health.

Independent Recreational Vehicle - means a recreational vehicle equipped with a toilet, bath or shower which, to be functional, requires connection to outside water and sewer utilities.

Recreational Vehicle Park - means any site, tract or parcel of land on which facilities have been developed to provide temporary living quarters for two or more recreational vehicles. Such a park may be developed or owned by a private, public or non-profit organization catering to the general public or restricted to the organizational or institutional members and their guests only.

Sanitary Dump Station - means a properly designed and constructed facility intended to receive the discharge of wastewater from any holding tank or similar device installed in any recreational vehicle, and having a means of discharging the contents, in an acceptable manner, to an approved wastewater disposal system.

Self-Contained Recreational Vehicle - means a recreational vehicle which can function independent of connections to outside sewer and water utilities. It must contain at least a water-flush toilet and a sink which are connected to water storage and wastewater holding tanks within the recreational vehicle. Any additional plumbing fixtures included in the vehicle shall also be connected to the wastewater holding tank.

Service Building - means a building or room housing toilet, lavatory and bathing facilities, and such other facilities as may be required for the use of recreational vehicle park occupants.

Wastewater - means discharges from all plumbing facilities, such as rest rooms, kitchen and laundry fixtures, either separately or in combination.

R392-301-2. General.

2.1 It shall be the duty of each person operating a recreational vehicle park in the state of Utah to carry out the provisions of this rule. Each person operating a recreational vehicle park shall also have the duty of controlling the conduct of park occupants to this end, and shall make at least one daily inspection of the entire park for these purposes. Central toilet and washroom facilities shall be inspected as necessary by the park operator.

2.2 Severability - If any provision of this rule or its application to any person or circumstance is declared invalid, the application of such provision to other persons or circumstances, and the remainder of this rule, shall not be affected thereby.

2.3 Park sites shall be designed and constructed to provide adequate surface drainage, and shall be isolated from any existing or potential health hazard or nuisance.

2.4 All applicable local and state building, zoning, electrical, health, fire codes and all local ordinances shall be complied with.

R392-301-3. Water Supplies.

3.1 Potable water supply systems for use by recreational vehicle park occupants shall meet the requirements of the state of Utah rules relating to public drinking water supplies.

3.2 In addition to the requirements of the rules relating to public drinking water supplies, the design of water system facilities shall be based on the suppliers engineer's estimate of water demands, but shall in no case be less than the following:

3.2.1 For independent and self-contained recreational vehicles.

3.2.1.1 Source Capacity - 100 gallons per day per vehicle space.

3.2.1.2 Storage Volume - 50 gallons per vehicle space.

3.2.1.3 Distribution system capacity shall maintain a water system pressure in excess of 20 psi at all points in the distribution system during peak hourly flow conditions. Non-community systems in remote areas can be exempted from this requirement, on a case-by-case basis, if flow from the system is always unregulated and free-flowing. The peak hourly flow shall be based on Figure 3.1.

Other exceptions to the above requirements may be made as permitted by the state of Utah public drinking water rules.

3.2.1.4 Any space set aside for the exclusive use of self-contained recreational vehicles shall have access to a water supply acceptable to the Director, or director of the local health department.

3.2.2 For the service building serving dependent recreational vehicles.

3.2.2.1 Source Capacity - 100 gallons per day per vehicle space.

3.2.2.2 Storage Volume - 50 gallons per vehicle space.

3.2.2.3 Distribution system capacity shall maintain a water system pressure in excess of 20 psi at all points in the distribution system during peak hourly flow conditions. Non-community systems in remote areas can be exempted from this requirement, on a case-by-case basis, if flow from the system is always unregulated and free-flowing. The peak hourly flow shall be calculated for the number of fixture units as presented in the Utah Plumbing Code.

Other exceptions to the above requirements may be made as permitted in the state of Utah public drinking water rules.

3.3 The source and storage requirements as indicated above do not include water demands for outside use or fire protection. However, if the culinary system is intended to provide water for such uses, the water requirements indicated above must be appropriately increased. Specific information on watering requirements (e.g., area of land to be irrigated) must be provided for Department of Health review.

3.4 Construction of a public drinking water supply system intended to serve occupants of any recreational vehicle park shall not commence until plans prepared by a licensed professional registered engineer, in accordance with Title 58, Chapter 22, Professional Engineers, and Land Surveyors Licensing Act, have been submitted to and approved in writing by the Utah Department of Environmental Quality. Following construction, the system may not be placed in service until a final inspection is made by a representative of the Utah Department of Environmental Quality or the local health department having jurisdiction.

3.4.1 All systems must be monitored in accordance with the state of Utah public drinking water rules and in cooperation with the local health department having jurisdiction.

3.5 Any culinary system or portion thereof that becomes drained seasonally must be cleaned, flushed and disinfected prior to use. Furthermore, a water sample of satisfactory bacteriologic quality, i.e. a sample showing no more than one coliform bacteria per 100 ml. sample, must be obtained before being placed into service.

3.5.1 Systems operated on a seasonal basis may be required to sample for bacteriologic analysis at an accelerated

frequency as determined by the Director or director of the local health department having jurisdiction.

3.6 In any recreational vehicle park the following requirements shall apply:

3.6.1 Water service shall be made available to each designated recreational vehicle space in accordance with the requirements of the Utah Department of Health. This provision may be modified when spaces are provided to accommodate dependent or self-contained units only, in which case a conveniently located on-threaded hydrant or other acceptable water supply fixture shall be provided and shall be protected against the hazards of backflow and hose contamination.

3.6.2 Water connections serving independent recreational vehicles shall be at least 4 inches above the surrounding surface elevation and shall be separated at least 5 feet horizontally from the sewer riser for such vehicles. Lines serving water and sewer connections shall be separated at least 10 feet horizontally except as provided below:

3.6.2.1 The bottom of the water service pipe, at all points, shall be at least 18 inches above the top of the wastewater drainage line at its highest point, and in no instance less than 24 inches horizontal separation.

3.6.2.2 The water service pipe shall be placed on an undisturbed shelf excavated at one side of the common trench.

3.6.2.3 The number of joints in the water and sewer pipe shall be kept to a minimum. The materials and joints of both water and sewer pipe shall be of a strength and durability and installed in accordance with the provisions of the Utah Plumbing Code.

3.7 In any recreational vehicle park or portion thereof where it is not feasible to pipe water into the area, an alternate supply may be permitted upon approval of the Director or local health authorities having jurisdiction.

R392-301-4. Wastewater.

4.1 All wastewater shall be discharged to a public sewer system where accessible within 30 feet of the recreational vehicle park property line.

4.2 Where connection to a public sewer is not available, wastewater shall be discharged into a wastewater disposal system meeting requirements of the state rules for waste disposal. Unless water usage rates are available, design shall be based on not less than 125 gallons per day per recreational vehicle space.

4.3 All plans for the construction or alteration of a wastewater disposal system shall initially be submitted to the local health department having jurisdiction. Where plan approval is required by law to be provided by the Department of Environmental Quality, such plans shall be forwarded by the local authority along with any appropriate comments. Construction or alteration of the disposal system shall not commence until the plans have been approved in writing by the appropriate health agency.

4.3.1 Sewer service shall be made available to each designated space designed and intended to accommodate independent recreational vehicles, in accordance with the requirements of the rules for waste disposal.

4.3.2 Sewer risers serving independent recreational vehicles shall be provided with tight covers when not in use.

4.3.3 A trap is prohibited between the sewer riser and sewer lateral.

4.3.4 The connection and connecting line between the recreational vehicle drain outlet and the sewer riser shall be watertight and self-draining.

4.3.5 The rim of the sewer riser shall extend not more than 4 inches above adjacent ground surface elevations. Surface drainage shall be directed away from the sewer riser. (See also Subsection 3.6.2)

4.3.6 Camping vehicles, not equipped with plumbing fixtures shall not be located in a camping vehicle park unless effective means are provided to collect and contain dish washing, bathing or other liquid waste material and to properly dispose of these wastes by means approved for the purpose to prevent discharge upon the ground.

4.4 A sanitary station of approved design shall be provided for the disposal of wastewater originating in any recreational vehicle when not covered under Subsection 4.3.1. The design shall be based on not less than 50 gallons per day per "self-contained" trailer space.

R392-301-5. Service Building.

5.1 In any recreational vehicle park which accepts patrons with dependent vehicles or tents, adequate service building facilities shall be provided and shall meet the following requirements:

5.1.1 They shall be located not less than 15 feet and not more than 500 feet from any living spaces served.

5.1.2 They shall be of permanent construction and be provided with adequate light, heat and ventilation.

5.1.3 They shall be properly maintained and operated with interiors of smooth, moisture resistant materials, to permit frequent washing and cleaning.

5.1.4 They shall be adequately equipped with lavatories with water under adequate pressure, and with flush type toilet fixtures to serve all recreational vehicle parking spaces not otherwise provided with such facilities.

R392-301-6. Plumbing.

6.1 The minimum plumbing fixtures which shall be available to all park occupants are as follows, except as indicated in Subsection 6.8.

6.2 Approved sanitary drinking fountains shall be provided for the use of occupants at a ratio of one per 300 occupants.

6.3 Whenever toilet facilities for male and females are located in the same building, and adjacent to each other, they shall be separated by a sound-resistant wall. Direct line of sight to each rest room shall be effectively obstructed.

6.4 Adequate, clean individual towels shall be supplied for each guest not furnishing his own. Other approved hand-drying facilities may be substituted for individual towels.

6.5 Soap and toilet tissue in suitable dispensers and waste receptacles with lids shall be provided in each rest room.

6.6 Essential laundering facilities should be available to park occupants. If included as part of the park facilities, there shall be provided for each 12 parking spaces, or fraction thereof, at least one laundry tray, washtub or washing machine, served by proper wastewater disposal facilities.

6.7 Plumbing fixtures which normally require water for their operation shall be supplied with an adequate potable water supply under pressure.

6.8 Where water cannot be made available, exceptions to the above requirement may be granted upon approval of the Director or local health authorities having jurisdiction.

6.9 All plumbing installed in any recreational vehicle park shall comply with provisions of the Utah Plumbing Code and local plumbing codes.

R392-301-7. Operation and Maintenance.

7.1 All buildings, rooms, and equipment and the grounds surrounding them shall be maintained in a clean and operable condition.

7.2 Where electric power is available, service buildings shall be provided with outside lighting to indicate the location and entrance doorways of each.

7.3 All necessary means shall be employed to eliminate or control any infestations of insects and rodents within all parts of any recreational vehicle park. This shall include proper

screening or other approved control of outside openings in structures intended for occupancy or for food storage.

R392-301-8. Swimming Pools.

8.1 Each swimming pool, wading or therapy pool made available to occupants shall comply with R392-302 and applicable local regulations.

R392-301-9. Solid Wastes.

9.1 Solid wastes, originating in any recreational vehicle park, shall be stored in a sanitary manner in approved, watertight containers with lids, or the equivalent, approved by the local health department. The containers shall be conveniently located and the contents shall be disposed of in a manner approved by the state or local health department having jurisdiction.

R392-301-10. Food Service.

10.1 When food service is made available to park occupants, food service employees, food, ice, vending machines, food storage, preparation and serving facilities shall comply with the requirements of R392-100.

TABLE I

Plumbing Fixtures	Ratio of Plumbing Fixtures Per Number of Camp Occupants(1)	
	Males	Females
Water closets	1/50	1/25
Urinals	1/50	--
Lavatories	1/50	1/50
Shower(2)	1/35	1/35

(1)Or fraction thereof. The number of park occupants shall be calculated on the basis of 3.5 persons for each recreational vehicle space.

(2)Showers are optional, but if provided shall comply with the table. Water system requirements under Subsection 3.2 may be modified to compensate for the absence of showers upon approval of the Director.

TABLE II
Required Plumbing Fixtures
Labor Camp Occupants for Service Buildings

Plumbing Fixtures	Ratio of Plumbing Fixtures For Labor Camp Occupants(1)	
	Males	Females
Water Closets	1/10	1/8
Urinals	1/25	--
Lavatories	1/12	1/12
Shower/Bath	1/8	1/8

(1)In camps which provide other than water flush-type toilets, urinals, lavatories and showers may be deleted.

KEY: public health, recreation areas
1993 26-15-2
Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.

R392-302. Design, Construction and Operation of Public Pools.

R392-302-1. Authority and Purpose of Rule.

This rule is authorized under Section 26-15-2. It establishes minimum standards for the design, construction, operation and maintenance of public pools.

R392-302-2. Definitions.

The following definitions apply in this rule.

(1) "Bather Load" means the number of persons using a pool at any one time or specified period of time.

(2) "Cleansing shower" means the cleaning of the entire body surfaces with soap and water to remove any matter, including fecal matter, that may wash off into the pool while swimming.

(3) "Department" means the Utah Department of Health.

(4) "Executive Director" means the Executive Director of the Utah Department of Health, or his designated representative.

(5) "Facility" means any premises, building, pool, equipment, system, and appurtenance which appertains to the operation of a public pool.

(6) "Float Tank" means a tank containing skin-temperature salt water that is designed to provide for solitary body floatation upon or within the water.

(7) "Gravity Drain System" means a pool drain system wherein the drains are connected to a surge or collector tank and rather than drawing directly from the drain, the circulation pump draws from the surge or collector tank and the surface of the water contained in the tank is maintained at atmospheric pressure.

(8) "High Bather Load" means 90% or greater of the designed maximum bather load."

(9) "Hydrotherapy Pool" means a pool designed primarily for medically prescribed therapeutic use.

(10) "Illuminance Uniformity" means the ratio between the brightest illuminance falling on a surface compared to the lowest illuminance falling on a surface within an area. The value of illuminance falling on a surface is measured in foot candles.

(11) "Interactive Water Feature" means a recirculating water feature designed, installed or used for recreational use, in which there is direct water contact from the feature with the public, and when not in operation, all water drains freely so there is no ponding.

(12) "Lamp Lumens" means the quantity of light, illuminance, produced by a lamp.

(13) "Lifeguard" means an attendant who supervises the safety of bathers.

(14) "Living Unit" means one or more rooms or spaces that are, or can be, occupied by an individual, group of individuals, or a family, temporarily or permanently for residential or overnight lodging purposes. Living units include motel and hotel rooms, condominium units, travel trailers, recreational vehicles, mobile homes, single family homes, and individual units in a multiple unit housing complex.

(15) "Local Health Officer" means the health officer of the local health department having jurisdiction, or his designated representative.

(16) "Pool" means a man-made basin, chamber, receptacle, tank, or tub which, when filled with water, creates an artificial body of water used for swimming, bathing, diving, recreational and therapeutic uses.

(17) "Pool Deck" means the area contiguous to the outside of the pool curb, diving boards, diving towers and slides.

(18) "Pool Shell" means the rigid encasing structure of a pool that confines the pool water by resisting the hydrostatic pressure of the pool water, resisting the pressure of any exterior soil, and transferring the weight of the pool water (sometimes through other supporting structures) to the soil or the building that surrounds it.

(19) "Private Residential Pool" means a swimming pool, spa pool or wading pool used only by an individual, family, or living unit members and guests, but not serving any type of multiple unit housing complex of four or more living units.

(20) "Public Pool" means a swimming pool, spa pool, wading pool, or special purpose pool facility which is not a private residential pool.

(21) "Saturation Index" means a value determined by application of the formula for calculating the saturation index in Table 5, which is based on interrelation of temperature, calcium hardness, total alkalinity and pH which indicates if the pool water is corrosive, scale forming or neutral.

(22) "Spa Pool" means a pool which uses therapy jet circulation, hot water, cold water, bubbles produced by air induction, or any combination of these, to impart a massaging effect upon a bather. Spa pools include, spas, whirlpools, hot tubs, or hot spas.

(23) "Special Purpose Pool" means a pool with design and operational features that provide patrons recreational, instructional, or therapeutic activities which are different from that associated with a pool used primarily for swimming, diving, or spa bathing.

(24) "Splash Pool" means the area of water located at the terminus of a water slide or vehicle slide.

(25) "Swimming Pool" means a pool used primarily for recreational, sporting, or instructional purposes in bathing, swimming, or diving activities.

(26) "Surge Tank" means a tank receiving the gravity flow from an overflow gutter and main drain or drains from which the circulation pump takes water which is returned to the system.

(27) "Turnover" means the circulation of a quantity of water equal to the pool volume through the filter and treatment facilities.

(28) "Vehicle Slide" means a recreational pool where bathers ride vehicles, toboggans, sleds, etc., down a slide to descend into a splash pool.

(29) "Unblockable Drain" means a drain of any size or shape such that a representation of the torso of a 99 percentile adult male cannot sufficiently block it to the extent that it creates a body suction entrapment hazard.

(30) "Wading Pool" means any pool or pool area used or designed to be used by children five years of age or younger for wading or water play activities.

(31) "Water Slide" means a recreational facility consisting of flumes upon which bathers descend into a splash pool.

R392-302-3. General Requirements.

(1) This rule does not require a construction change in any portion of a public pool facility if the facility was installed and in compliance with law in effect at the time the facility was installed, except as specifically provided otherwise in this rule. However if the Executive Director or the Local Health Officer determines that any facility is dangerous, unsafe, unsanitary, or a nuisance or menace to life, health or property, the Executive Director or the Local Health Officer may order construction changes consistent with the requirements of this rule to existing facilities.

(2) This rule does not regulate any private residential pool. A private residential pool that is used for swimming instruction purposes shall not be regulated as a public pool.

R392-302-4. Water Supply.

(1) The water supply serving a public pool and all plumbing fixtures, including drinking fountains, lavatories and showers, must meet the requirements for drinking water established by the Department of Environmental Quality.

(2) All portions of water supply, re-circulation, and distribution systems serving the facility must be protected against backflow. Water introduced into the pool, either directly or through the circulation system, must be supplied through an air gap.

R392-302-5. Sewer System.

(1) Each public pool must discharge waste water to a public sanitary sewer system if the sewer system is within 300 feet of the property line. Where no public sanitary sewer system is available within 300 feet of the property line, the local health department may approve connections made to a disposal system designed, constructed, and operated in accordance with the minimum requirements of the Department of Environmental Quality.

(2) Each public pool must connect to a sewer or wastewater disposal system through an air break to preclude the possibility of sewage or waste backup into the piping system. Pools constructed and approved after December 31, 2010 shall connect to a sewer or wastewater disposal system through an air gap.

R392-302-6. Construction Materials.

(1) Each public pool and the appurtenances necessary for its proper function and operation must be constructed of materials that are inert, non-toxic to humans, impervious, enduring over time, and resist the effects of wear and deterioration from chemical, physical, radiological, and mechanical actions.

(2) All public pools shall be constructed with a pool shell that meets the requirements of this section R392-302-6. Vinyl liners that are not bonded to a pool shell are prohibited. A vinyl liner that is bonded to a pool shell shall have at least a 60 mil thickness. Sand, clay or earth walls or bottoms are prohibited.

(3) The pool shell of a public pool must withstand the stresses associated with the normal uses of the pool and regular maintenance. The pool shell shall by itself withstand, without any damage to the structure, the stresses of complete emptying of the pool without shoring or additional support.

(4) In addition to the requirements of R392-302-6(3), the interior surface of each pool must be designed and constructed in a manner that provides a smooth, easily cleanable, non-abrasive, and slip resistant surface. The pool shell surfaces must be free of cracks or open joints with the exception of structural expansion joints. The owner of a non-cementitious pool shall submit documentation with the plans required in R392-302-8(5) that the surface material has been tested and passed by an American National Standards Institute (ANSI) accredited testing facility using one of the following standards that is appropriate to the material used:

(a) for a fiberglass reinforced plastic spa pool, the International Association of Plumbing and Mechanical Officials (IAPMO) standard IAPMO/ANSI Z 124.7-1997;

(b) for a fiberglass reinforced plastic swimming pool, the IAPMO IGC 158-2000 standard;

(c) for pools built with prefabricated pool sections or pool members, the International Cast Products Association (ICPA) standard ANSI/ICPA SS-1-2001; or

(d) a standard that has been approved by the Department based on whether the standard is applicable to the surface and whether it determines compliance with the requirements of this section R392-302-6.

(5) The pool shell surface must be of a white or light pastel color.

R392-302-7. Bather Load.

(1) The bather load capacity of a public pool is determined as follows:

(a) Ten square feet, 0.929 square meters, of pool water surface area must be provided for each bather in a spa pool during maximum load.

(b) Twenty-four square feet, 2.23 square meters, of pool water surface area must be provided for each bather in an indoor swimming pool during maximum load.

(c) Twenty square feet, 1.86 square meters, of pool water surface area must be provided for each bather in an outdoor swimming pool during maximum load.

(d) Fifty square feet, 4.65 square meters, of pool water surface must be provided for each bather in a slide plunge pool during maximum load.

(2) The department may make additional allowance for bathers when the facility operator can demonstrate that lounging and sunbathing patrons will not adversely affect water quality due to over-loading of the pool.

R392-302-8. Design Detail and Structural Stability.

(1) The designing architect or engineer is responsible to certify the design for structural stability and safety of the public pool.

(2) The shape of a pool and design and location of appurtenances must be such that the circulation of pool water and control of swimmer's safety are not impaired. The designing architect or engineer shall designate sidewalls and endwalls on pool plans.

(3) A pool must have a circulation system with necessary treatment and filtration equipment as required in R392-302-16, unless turnover rate requirements as specified in sub-section R392-302-16(1) can be met by continuous introduction of fresh water and wasting of pool water under conditions satisfying all other requirements of this rule.

(4) Where a facility is subject to freezing temperatures, all parts of the facility subject to freezing damage must be adequately and properly protected from damage due to freezing, including the pool, piping, filter system, pump, motor, and other components and systems.

(5) The pool operator or the designing architect or engineer shall submit plans for a new pool, pool renovation or pool remodeling project to the local health department for approval. This includes the replacement of equipment which is different from that originally approved by a health authority having jurisdiction. The local health department may require a pool renovation or pool remodeling project to meet the current requirements of R392-302.

R392-302-9. Depths and Floor Slopes.

(1) In determining the horizontal slope ratio of a pool floor, the first number shall indicate the vertical change in value or rise and the second number shall indicate the horizontal change in value or run of the slope.

(a) The horizontal slope of the floor of any portion of a pool having a water depth of less than 5 feet, 1.52 meters, may not be steeper than a ratio of 1 to 10 except for a pool used exclusively for scuba diving training.

(b) The horizontal slope of the floor of any portion of a pool having a water depth greater than 5 feet, 1.52 meters, must be uniform, must allow complete drainage and may not exceed a ratio of 1 to 3 except for a pool used exclusively for scuba diving training. The horizontal slope of the pool bottom in diving areas must be consistent with the requirements for minimum water depths as specified in Section R392-302-11 for diving areas.

R392-302-10. Walls.

(1) Pool walls must be vertical or within 11 degrees of vertical for a minimum distance of 2 feet 9 inches, 83.82 centimeters, below the water line in areas with a depth of 5 feet, 1.52 meters, or greater. Pool walls must be vertical or within 11 degrees of vertical for a minimum distance equal to or greater

than one half the pool depth as measured from the water line.

(2) Where walls form an arc to join the floors, the transitional arc from wall to floor must:

(a) have its center no less than 2 feet 9 inches, 83.82 centimeters, below the normal water level in areas with a depth greater than 5 feet, 1.52 meters;

(b) have its center no less than 75% of the pool depth beneath the normal water level, in areas of the pool with a depth of 5 feet, 1.52 meters, or less;

(c) be tangent to the wall;

(d) have a radius at least equal to or greater than the depth of the pool minus the vertical wall depth measured from the water line, as described in Subsection R392-302-9(1), minus 3 inches, 7.62 centimeters, to allow draining to the main drain. Radius minimum = Pool Depth - Vertical wall depth - 3 inches, 7.62 centimeters, where the water depth is greater than 5 feet, 1.52 meters; and

(e) have a radius which may not exceed a length greater than 25% of the water depth, in areas with a water depth of 5 feet, 1.52 meters, or less.

(3) Underwater ledges are prohibited except when approved by the local health officer for a special purpose pool. Underwater ledges are prohibited in areas of a pool designed for diving. Where underwater ledges are allowed, a line must mark the extent of the ledge within 2 inches, 5.08 centimeters, of its leading edge. The line must be at least 2 inches, 5.08 centimeters, in width and in a contrasting dark color for maximum visual distinction.

(4) Underwater seats and benches are allowed in pools so long as they conform to the following:

(a) Seats and benches shall be located completely inside of the perimeter shape of the pool;

(b) The horizontal surface shall be a maximum of 20 inches, 51 centimeter, below the water line;

(c) An unobstructed surface shall be provided that is a minimum of 10 inches, 25 centimeters, and a maximum of 20 inches front to back, and a minimum of 24 inches,61 centimeters, wide;

(d) The pool wall under the seat or bench shall be flush with the leading edge of the seat or bench and meet the requirements of R392-302-10(1) and (2);

(e) Seats and benches may not replace the stairs or ladders required in R392-302-12, but are allowed in conjunction with pool stairs;

(f) Underwater seats may be located in the deep area of the pool where diving equipment (manufactured or constructed) is installed, provided they are located outside of the minimum water envelope for diving equipment; and

(g) A line must mark the extent of the seat or bench within 2 inches, 5.08 centimeters, of its leading edge. The line must be at least 2 inches, 5.08 centimeters, in width and in a contrasting dark color for maximum visual distinction.

R392-302-11. Diving Areas.

(1) Where diving is permitted, the diving area design, equipment placement, and clearances must meet the minimum standards established by the USA Diving Rules and Regulations 2004, Appendix B, which are incorporated by reference.

(2) Where diving from a height of less than 3.28 feet, 1 meter, from normal water level is permitted, the diving bowl shall meet the minimum depths outlined in Section 6, Figure 1 and Table 2 of ANSI/NSPI-1, 2003, which is adopted by reference, for type VI, VII and VIII pools according to the height of the diving board above the normal water level. ANSI/NSPI pool type VI is a maximum of 26 inches, 2/3 meter, above the normal water level; type VII is a maximum of 30 inches, 3/4 meter, above the normal water level; and type VIII is a maximum of 39.37 inches, 1 meter, above the normal water level.

(3) The use of a starting platform is restricted to competitive swimming events or supervised training for competitive swimming events.

(a) If starting platforms are used for competitive swimming or training, the water depth shall be at least four feet.

(b) The operator shall either remove the starting platforms or secure them with a lockable cone-type platform safety cover when not in competitive use.

(4) Areas of a pool where diving is not permitted must have "NO DIVING" or the international no diving icon, or both provided in block letters at least four inches in height in a contrasting color on the deck, located on the horizontal surface of the deck or coping as close to the water's edge as practical.

(a) Where the "NO DIVING" warnings are used, the spacing between each warning may be no greater than 25 feet.

(b) Where the icon alone is used on the deck as required, the operator shall also post at least one "NO DIVING" sign in plain view within the enclosure. Letters shall be at least four inches in height with a stroke width of at least one-half inch.

R392-302-12. Ladders, Recessed Steps, and Stairs.

(1) Location.

(a) In areas of a pool where the water depth is greater than 2 feet, 60.96 centimeters, and less than 5 feet, 1.52 meters, as measured vertically from the bottom of the pool to the mean operating level of the pool water, steps or ladders must be provided, and be located in the area of shallowest depth.

(b) In areas of the pool where the water depth is greater than 5 feet, 1.52 meters, as measured vertically from the bottom of the pool to the mean operating level of the pool water, ladders or recessed steps must be provided.

(c) A pool over 30 feet, 9.14 meters, wide must be equipped with steps, recessed steps, or ladders as applicable, installed on each end of both side walls.

(d) A pool over 30 feet, 9.14 meters, wide and 75 feet, 22.8 meters, or greater in length, must have ladders or recessed steps midway on both side walls of the pool, or must have ladders or recessed steps spaced at equal distances from each other along both sides of the pool at distances not to exceed 30 feet, 9.14 meters, in swimming and diving areas, and 50 feet, 15.23 meters, in non-swimming areas.

(e) Ladders or recessed steps must be located within 15 feet, 4.56 meters, of the diving area end wall.

(f) No pool shall be equipped with fewer that two means of entry or exit as outlined above.

(2) Handrails.

(a) Handrails must be rigidly installed and constructed in such a way that they can only be removed with tools.

(b) Handrails must be constructed of corrosion resistant materials.

(c) The outside diameter of handrails may not exceed 2 inches, 5.08 centimeters.

(3) Steps.

(a) Steps must have at least one handrail. The handrail shall be mounted on the deck and extend to the bottom step either attached at or cantilever to the bottom step. Handrails may also be mounted in the pool bottom of a wading area at the top of submerged stairs that lead into a swimming pool; such handrails must also extend to the bottom step either attached at or cantilever to the bottom step.

(b) Steps must be constructed of corrosion-resistant material, be easily cleanable, and be of a safe design.

(c) Steps leading into pools must be of non-slip design, have a minimum run of 10 inches, 25.4 centimeters, and a maximum rise of 12 inches, 30.48 centimeters.

(d) Steps must have a minimum width of 18 inches, 45.72 centimeters, as measured at the leading edge of the step.

(e) Steps must have a line at least 1 inch, 2.54 centimeters, in width and be of a contrasting dark color for a maximum

visual distinction within 2 inches, 5.08 centimeters, of the leading edge of each step.

(4) Ladders.

(a) Pool ladders must be corrosion-resistant and must be equipped with non-slip rungs.

(b) Pool ladders must be designed to provide a handhold, must be rigidly installed, and must be maintained in safe working condition.

(c) Pool ladders shall have a clearance of not more than 5 inches, 12.7 centimeters, nor less than 3 inches, 7.62 centimeters, between any ladder rung and the pool wall.

(d) Pool ladders shall have rungs with a maximum rise of 12 inches, 30.5 centimeters, and a minimum width of 14 inches, 35.6 centimeters.

(5) Recessed Steps.

(a) Recessed steps shall have a set of grab rails located at the top of the course with a rail on each side which extend over the coping or edge of the deck.

(b) Recessed steps shall be readily cleanable and provide drainage into the pool to prevent the accumulation of dirt on the step.

(c) Full or partial recessed steps must have a minimum run of 5 inches, 12.7 centimeters, and a minimum width of 14 inches, 35.56 centimeters.

R392-302-13. Decks and Walkways.

(1) A continuous, unobstructed deck at least 5 feet, 1.52 meters, wide must extend completely around the pool. The deck is measured from the pool side edge of the coping if the coping is flush with the pool deck, or from the back of the pool curb if the coping is elevated from the pool deck. Pool curbs shall be a minimum of 12 inches wide. The pool deck may include the pool coping if the coping is installed flush with the surrounding pool deck. If the coping is elevated from the pool deck, the maximum allowed elevation difference between the top of the coping surface and the surrounding deck is 19 inches, 38.1 centimeters. The minimum allowed elevation is 4 inches.

(2) Deck obstructions are allowed to accommodate diving boards, platforms, slides, steps, or ladders so long as at least 5 feet, 1.52 meters, of deck area is provided behind the deck end of any diving board, platform, slide, step, or ladder. Other types of deck obstructions may also be allowed by the local health officer so long as the obstructions meet all of the following criteria:

(a) the total pool perimeter that is obstructed equals less than 10 percent of the total pool perimeter; likewise, no more than 15 feet, 4.56 meters, of pool perimeter can be obstructed in any one location;

(b) multiple obstructions must be separated by at least five feet, 1.52 meters;

(c) an unobstructed area of deck not less than five feet, 1.52 meters, is provided around or through the obstruction and located not more than fifteen feet, 4.55 meters, from the edge of the pool.

(d) the design of the obstruction does not endanger the health or safety of persons using the pool; and

(e) written approval for the obstruction is obtained from the local health official prior to, or as part of, the plan review process.

(3) The deck must slope away from the pool to floor drains at a grade of 1/4 inch, 6.35 millimeters, to 3/8 inch, 9.53 millimeters, per linear foot.

(4) Decks and walkways must be constructed to drain away any standing water and must have non-slip surfaces.

(5) Wooden decks, walks or steps are prohibited.

(6) Deck drains may not return water to the pool or the circulation system.

(7) The operator shall maintain decks in a sanitary condition and free from litter.

(8) Carpeting may not be installed within 5 feet, 1.52 meters, of the water side edge of the coping. The operator shall wet vacuum any carpeting as often as necessary to keep it clean and free of accumulated water.

(9) Steps serving decks must meet the following requirements:

(a) Risers of steps for the deck must be uniform and have a minimum height of 4 inches, 10.2 centimeters, and a maximum height of 7 inches, 17.8 centimeters.

(b) The minimum run of steps shall be 10 inches, 25.4 centimeters.

(c) Steps must have a minimum width of 18 inches, 45.72 centimeters.

R392-302-14. Fencing.

(1) A fence or other barrier is required and must provide complete perimeter security of the facility, and be at least 6 feet, 1.83 meters, in height. Openings through the fence or barrier, other than entry or exit access when the access is open, may not permit a sphere greater than 4 inches, 10.16 centimeters, to pass through it at any location. Horizontal members shall be equal to or more than 45 inches, 114.3 centimeters, apart.

(a) If the local health department determines that the safety of children is not compromised, it may exempt indoor pools from the fencing requirements.

(b) The local health department may grant exceptions to the height requirements in consideration of architectural and landscaping features for pools designed for hotels, motels and apartment houses.

(2) A fence or barrier that has an entrance to the facility must be equipped with a self-closing and self-latching gate or door. Except for self-locking mechanisms, self-latching mechanisms must be installed 54 inches, 1.37 meters, above the ground and must be provided with hardware for locking the gate when the facility is not in use. A lock that is separate from the latch and a self locking latch shall be installed with the lock's operable mechanism (key hole, electronic sensor, or combination dial) between 34 inches, 86.4 centimeters, and 48 inches, 1.219 meters, above the ground. All gates for the pool enclosure shall open outward from the pool.

(3) The gate or door shall have no opening greater than 0.5 inches, 1.27 centimeters, within 18 inches, 45.7 centimeters, of the latch release mechanism.

(4) Bathing areas must be separated from non-bathing areas by barriers with a minimum height of 4 feet, 1.22 meters, or by a minimum of 5 feet, 1.53 meters, distance separation.

R392-302-15. Depth Markings and Safety Ropes.

(1) The depth of the water must be plainly marked at locations of maximum and minimum pool depth, and at the points of separation between the swimming and non-swimming areas of a pool. Pools must also be marked at intermediate 1 foot, 30.48 centimeters, increments of depth, spaced at distances which do not exceed 25 feet, 7.62 meters. Markings must be located above the water line or within 2 inches, 5.8 centimeters, from the coping on the vertical wall of the pool and on the edge of the deck or walk next to the pool with numerals at least 4 inches, 10.16 centimeters, high.

(2) A pool with both swimming and diving areas must have a floating safety rope separating the swimming and diving areas. An exception to this requirement is made for special activities, such as swimming contests or training exercises when the full unobstructed length of the pool is used.

(a) The safety rope must be securely fastened to wall anchors. Wall anchors must be of corrosion-resistant materials and must be recessed or have no projections that may be a safety hazard if the safety rope is removed.

(b) The safety rope must be marked with visible floats spaced at intervals of 7 feet, 2.13 meters or less.

(c) The rope must be at least 0.5 inches, 1.27 centimeters, in diameter, and of sufficient strength to support the loads imposed on it during normal bathing activities.

(3) A pool constructed with a change in the slope of the pool floor must have the change in slope designated by a floating safety rope and a line of demarcation on the pool floor.

(a) The floating safety rope designating a change in slope of the pool floor must be attached at the locations on the pool wall that place it directly above and parallel to the line on the bottom of the pool. The floating safety rope must meet the requirements of Subsections R392-302-15(2)(a),(b),(c).

(b) A line of demarcation on the pool floor must be marked with a contrasting dark color.

(c) The line must be at least 2 inches, 5.08 centimeters, in width.

(d) The line must be located 12 inches, 30.48 centimeters, toward the shallow end from the point of change in slope.

(4) The department may exempt a spa pool from the depth marking requirement if the spa pool owner can successfully demonstrate to the department that bather safety is not compromised by the elimination of the markings.

R392-302-16. Circulation Systems.

(1) A circulation system, consisting of pumps, piping, filters, water conditioning and disinfection equipment and other related equipment must be provided. The operator shall maintain the normal water line of the pool at the overflow rim of the gutter, if an overflow gutter is used, or at the midpoint of the skimmer opening if skimmers are used whenever the pool is open for bathing. An exemption to this requirement may be granted by the department if the pool operator can demonstrate that the safety of the bathers is not compromised.

(a) The circulation system shall meet the minimum turnover time listed in Table 1.

(b) If a single pool incorporates more than one the pool types listed in Table 1, either:

(i) the entire pool shall be designed with the shortest turnover time required in Table 1 of all the turnover times for the pool types incorporated into the pool or

(ii) the pool shall be designed with pool-type zones where each zone is provided with the recirculation flow rate that meets the requirements of Table 1.

(c) The Health Officer may require the pool operator to demonstrate that a pool is performing in accordance with the approved design.

(d) The operator shall run circulation equipment continuously except for periods of routine or other necessary maintenance. Pumps with the ability to decrease flow when the pool has little or no use are allowed as long as the same number of turnovers are achieved in 24 hours that would be required using the turnover time listed in Table 1 and the water quality standards of R392-302-27 can be maintained. The circulation system must be designed to permit complete drainage of the system.

(e) Piping must be of non-toxic material, resistant to corrosion and be able to withstand operating pressures.

(f) Plumbing must be identified by a color code or labels.

(2) The water velocity in discharge piping may not exceed 10 feet, 3.05 meters, per second, except for copper pipe where the velocity for piping may not exceed 8 feet, 2.44 meters, per second.

(3) Suction velocity for all piping may not exceed 6 feet, 1.83 meters, per second.

(4) The circulation system must include a strainer to prevent hair, lint, etc., from reaching the pump.

(a) Strainers must be corrosion-resistant with openings not more than 1/8 inch, 3.18 millimeters, in size.

(b) Strainers must provide a free flow capacity of at least four times the area of the pump suction line.

(c) Strainers must be readily accessible for frequent cleaning.

(d) Strainers must be maintained in a clean and sanitary condition.

(e) Each pump strainer must be provided with necessary valves to facilitate cleaning of the system without excessive flooding.

(5) A vacuum-cleaning system must be provided.

(a) If this system is an integral part of the circulation system, connections must be located in the walls of the pool, at least 8 inches, 20.32 centimeters, below the water line. This requirement does not apply to vacuums operated from skimmers.

(b) The number of connections provided must facilitate access to all areas of the pool through hoses less than 50 feet, 15.24 meters, in length.

(6) A rate-of-flow indicator, reading in gallons per minute, must be properly installed and located according to manufacturer recommendations. The indicator must be located in a place and position where it can be easily read.

(7) Pumps must be of adequate capacity to provide the required number of turnovers of pool water as specified in Subsection R392-302-16, Table 1. The pump or pumps must be capable of providing flow adequate for the backwashing of filters. Under normal conditions, the pump or pumps must supply the circulation rate of flow at a dynamic head which includes, in addition to the usual equipment, fitting and friction losses, an additional loss of 15 feet, 4.57 meters, for rapid sand filters, vacuum precoat media filters or vacuum cartridge filters and 40 feet, 12.19 meters, for pressure precoat media filters, high rate sand filters or cartridge filters, as well as pool inlet orifice loss of 15 feet, 4.57 meters.

(8) A pool equipped with heaters must meet the requirements for boilers and pressure vessels as required by the State of Utah Boiler and Pressure Vessel Rules, R576-201, and must have a fixed thermometer mounted in the pool circulation line downstream from the heater outlet. The heater must be provided with a heatsink as required by manufacturer's instructions.

(9) The area housing the circulation equipment must be designed with adequate working space so that all equipment may be easily disassembled, removed, and replaced for proper maintenance.

(10) All circulation lines to and from the pool must be regulated with valves in order to control the circulation flow.

(a) All valves must be located where they will be readily and easily accessible for maintenance and removal.

(b) Multiport valves must comply with National Sanitation Foundation NSF/ANSI 50-2007, which is incorporated and adopted by reference.

(11) Written operational instructions must be immediately available at the facility at all times.

TABLE 1
Circulation

Pool Type	Min. Number of Wall Inlets	Min. Number of Skimmers per 3,500 square ft. or less	Min. Turnover Time
1. Swim	1 per 10 ft., 3.05 m.	1 per 500 sq. ft., 46.45 sq. m.	8 hrs.
2. Swim, high bather load	1 per 10 ft., 3.05 m.	1 per 500 sq. ft., 46.45 sq. m.	6 hrs.
3. Wading pool	1 per 20 ft., 6.10 m.	1 per 500 sq. ft. 46.45 sq. m.	1 hr.

	min. of 2 equally spaced		
4. Spa	1 per 20 ft., 6.10 m.	1 per 100 sq. ft., 9.29 sq. m.	0.5 hr.
5. Wave	1 per 10 ft., 3.05 m.	1 per 500 sq. ft., 46.45 sq. m.	6 hrs.
6. Slide	1 per 10 ft., 3.05 m.	1 per 500 sq. ft., 46.45 sq. m.	1 hr.
7. Vehicle slide	1 per 10 ft., 3.05 m.	1 per 500 sq. ft., 46.45 sq. m.	1 hr.
8. Float tank	1	1	15 min. with 2 turnovers between patrons
9. Special Purpose Pool	1 per 10 ft., 3.05 m.	1 per 500 sq. ft., 46.45 sq. m.	1 hr.

(12) Each air induction system installed must comply with the following requirements:

(a) An air induction system must be designed and maintained to prevent any possibility of water back-up that could cause electrical shock hazards.

(b) An air intake may not introduce contaminants such as noxious chemicals, fumes, deck water, dirt, etc. into the pool.

(13) The circulation lines of jet systems and other forms of water agitation must be independent and separate from the circulation-filtration and heating systems.

R392-302-17. Inlets.

(1) Inlets for fresh or treated water must be located to produce uniform circulation of water and to facilitate the maintenance of a uniform disinfectant residual throughout the entire pool.

(2) If wall inlets from the circulation system are used, they must be flush with the pool wall and submerged at least 5 feet, 1.52 meters, below the normal water level or at the bottom of the vertical wall surface tangent to the arc forming the transition between the vertical wall and the floor of the pool. Except as provided in Subsections R392-302-31(2)(l) and (3)(e), wall inlets must be placed every 10 feet, 3.05 meters, around the pool perimeter.

(a) The department or the local health officer may require floor inlets to be installed in addition to wall inlets if a pool has a width greater than 50 feet, 4.57 meters, to assure thorough chemical distribution. If floor inlets are installed in addition to wall inlets, there must be a minimum of one row of floor inlets centered on the pool width. Individual inlets and rows of inlets shall be spaced a maximum of 15 feet, 4.57 meters, from each other. Floor inlets must be at least 15 feet, 4.57 meters, from a pool wall with wall inlets.

(b) Each wall inlet must be designed as a non-adjustable orifice with sufficient head loss to insure balancing of flow through all inlets. The return loop piping must be sized to provide less than 2.5 feet, 76.20 centimeters, of head loss to the most distant orifice to insure approximately equal flow through all orifices.

(3) If floor inlets from the circulation system are used, they must be flush with the floor. Floor inlets shall be placed at maximum 15 foot, 4.46 meter, intervals. The distance from floor inlets to a pool wall shall not exceed 7.5 feet, 2.29 meters if there are no wall inlets on that wall. Each floor inlet must be designed such that the flow can be adjusted to provide sufficient head loss to insure balancing of flow through all inlets. All floor inlets must be designed such that the flow cannot be adjusted without the use of a special tool to protect against swimmers being able to adjust the flow. The return supply piping must be sized to provide less than 2.5 feet, 76.20 centimeters, of head loss to the most distant orifice to insure approximately equal flow through all orifices.

(4) The department may grant an exemption to the inlet placement requirements on a case by case basis for inlet designs that can be demonstrated to produce uniform mixing of pool water.

R392-302-18. Outlets.

(1) No feature or circulation pump shall be connected to less than two outlets unless the pump is connected to a gravity drain system or the pump is connected to an unblockable drain. All pool outlets shall meet the following design criteria:

(a) The grates or covers of all submerged outlets in pools shall conform to the standards of ASME A112.19.8a-2008.

(b) The outlets must be constructed so that if one of the outlets is completely obstructed, the remaining outlets and related piping will be capable of handling 100 percent of the maximum design circulation flow.

(c) All pool outlets that are connected to a pump through a single common suction line must connect to the common suction line through pipes of equal diameter. The tee feeding to the common suction line from the outlets must be located approximately midway between outlets.

(d) An outlet system with more than one outlet connected to a pump suction line must not have any valve or other means to cut any individual outlet out of the system.

(e) At least one of the circulation outlets shall be located at the deepest point of the pool and must be piped to permit the pool to be completely and easily emptied.

(f) The center of the outlet covers or grates of multiple main drain outlets shall not be spaced more than 30 feet, 9.14 meters, apart nor spaced closer than 3 feet, 0.914 meters, apart.

(g) Multiple pumps may utilize the same outlets only if the outlets are sized to accommodate 100 percent of the total combined design flow from all pumps and only if the flow characteristics of the system meet the requirements of subsection R392-302-18(2) and (3).

(h) There must be one main drain outlet for each 30 feet, 9.14 meters, of pool width. The centers of the outlet covers or grates of any outermost main drain outlets must be located within 15 feet, 4.57 meters, of a side wall.

(i) Devices or methods used for draining pools shall prevent overcharging the sanitary sewer.

(j) No operator shall allow the use of a pool with outlet grates or covers that are broken, damaged, missing, or not securely fastened.

(2) Notwithstanding Section R392-302-3, all public pools must comply with Subsections R392-302-18(2) and (3). The pool operator shall not install, allow the installation of, or operate a pool with a drain, drain cover, or drain grate in a position or an application that conflicts with any of the following mandatory markings on the drain cover or grate under the standard required in R392-302-18(1)(a):

(a) whether the drain is for single or multiple drain use;

(b) the maximum flow through the drain cover; and

(c) whether the drain may be installed on a wall or a floor.

(3) The pool operator shall not install, allow the installation of, or operate a pool with a drain cover or drain grate unless it is over or in front of:

(a) the sump that is recommended by the drain cover or grate manufacturer;

(b) a sump specifically designed for that drain by a Registered Design Professional as defined in ASME A112.19.8a-2008; or

(c) a sump that meets the ASME A112.19.8a-2008

standard.

(4) Notwithstanding Section R392-302-3, all public pools must comply with this subsection R392-302-18(4). The pool owner or certified pool operator shall retrofit by December 19, 2009 each pool circulation system on existing pools that do not meet the requirements of subsections R392-302-18(1) through R392-302-18(1)(g) and R392-302-18(2) through (3)(c). The owner or operator shall meet the retrofit requirements of this subsection by any of the following means:

(a) Meet the requirements of R392-302-18(1)(a) and R392-302-18(2) through (3)(c) and install a safety vacuum release system which ceases operation of the pump, reverses the circulation flow, or otherwise provides a vacuum release at a suction outlet when it detects a blockage; that has been tested by an independent third party; and that conforms to ASME standard A112.19.17-2002 or ASTM standard F2387;

(i) To ensure proper operation, the certified pool operator shall inspect and test the vacuum release system at least once a week but no less often than established by the manufacturer. The certified pool operator shall test the vacuum release system in a manner specified by the manufacturer. The certified pool operator shall log all inspections, tests and maintenance and retain the records for a minimum of two years for review by the Department and local health department upon request.

(ii) The vacuum release system shall include a notification system that alerts patrons and the pool operator when the system has inactivated the circulation system. The pool operator shall submit to the local health department for approval the design of the notification systems prior to installation. The system shall activate a continuous clearly audible alarm that can be heard in all areas of the pool or a continuous visible alarm that can be seen in all areas of the pool. An easily readable sign shall be posted next to the sound or visible alarm source. The sign shall state, "DO NOT USE THE POOL IF THIS ALARM IS ACTIVATED." and provide the phone number of the pool operator.

(iii) No operator shall allow the use of a pool that has a single drain with a safety vacuum release system if the safety vacuum release system is not functioning properly.

(b) Install an outlet system that includes no fewer than two suction outlets separated by no less than 3 feet, 0.914 meters, on the horizontal plane as measured from the centers of the drain covers or grates or located on two different planes and connected to pipes of equal diameter. The outlet system shall meet the requirements of R392-302-18(1)(a) through R392-302-18(1)(g) and 18(2) through (3)(c);

(c) Meet the requirements of R392-302-18(1)(a) and R392-302-18(2) through (3)(c) and installing (or having an existing) gravity drain system;

(d) Install an unblockable drain that meets the requirements of R392-302-18(1)(a) and R392-302-18(2) through (3)(c); or

(e) Any other system determined by the federal Consumer Products Safety Commission to be equally effective as, or better than, the systems described in 15 USC 8003 (c)(1)(A)(ii)(I), (III), or (IV) at preventing or eliminating the risk of injury or death associated with pool drainage systems.

R392-302-19. Overflow Gutters and Skimming Devices.

(1) A pool having a surface area of over 3,500 square feet, 325.15 square meters, must have overflow gutters. A pool having a surface area equal to or less than 3,500 square feet, 325.15 square meters, must have either overflow gutters or skimmers provided.

(2) Overflow gutters must extend completely around the pool, except at steps, ramps, or recessed ladders. The gutter system must be capable of continuously removing pool water at 100 percent of the maximum flow rate. This system must be connected to the circulation system by means of a surge tank.

(3) Overflow gutters must be designed and constructed in compliance with the following requirements:

(a) The opening into the gutter beneath the coping or grating must be at least 3 inches, 7.62 centimeters, in height with a depth of at least 3 inches, 7.62 centimeters.

(b) Gutters must be designed to prevent entrapment of any part of a bather's body.

(c) The edge must be rounded so it can be used as a handhold and must be no thicker than 2.5 inches, 6.35 centimeters, for the top 2 inches, 5.08 centimeters.

(d) Gutter outlet pipes must be at least 2 inches, 5.08 centimeters, in diameter. The outlet grates must have clear openings and be equal to at least one and one-half times the cross sectional area of the outlet pipe.

(4) Skimmers complying with National Sanitation Foundation NSF/ANSI 50-2007 standards or equivalent are permitted on any pool with a surface area equal to or less than 3,500 square feet, 325.15 square meters. At least one skimming device must be provided for each 500 square feet, 46.45 square meters, of water surface area or fraction thereof. Where two or more skimmers are required, they must be spaced to provide an effective skimming action over the entire surface of the pool.

(5) Skimming devices must be built into the pool wall and must meet the following general specifications:

(a) The piping and other components of a skimmer system must be designed for a total capacity of at least 80 percent of the maximum flow rate of the circulation system.

(b) Skimmers must be designed with a minimum flow rate of 25 gallons, 94.64 liters, per minute and a maximum flow rate of 55 gallons, 208.12 liters, per minute. The local health department may allow a higher maximum flow through a skimmer up to the skimmer's NSF rating if the piping system is designed to accommodate the higher flow rates. Alternatively, skimmers may also be designed with a minimum of 3.125 gallons, 11.83 liters, to 6.875 gallons, 26.02 liters, per lineal inch, 2.54 centimeters, of weir.

(6) Each skimmer weir must be automatically adjustable and must operate freely with continuous action to variations in water level over a range of at least 4 inches, 10.16 centimeters. The weir must operate at all flow variations. Skimmers shall be installed with the normal operating level of the pool water at the midpoint of the skimmer opening or in accordance with the manufacturer's instructions.

(7) An easily removable and cleanable basket or screen through which all overflow water passes, must be provided to trap large solids.

(8) The skimmer must be provided with a system to prevent air-lock in the suction line. The anti-air-lock may be accomplished through the use of an equalizer pipe or a surge tank or through any other arrangement approved by the Department that will assure a sufficient amount of water for pump suction in the event the pool water drops below the weir level. If an equalizer pipe is used, the following requirements must be met:

(a) An equalizer pipe must be sized to meet the capacity requirements for the filter and pump;

(b) An equalizer pipe may not be less than 2 inches, 5.08 centimeters, in diameter and must be designed to control velocity through the pipe in accordance with section R392-302-16(3);

(c) This pipe must be located at least 1 foot, 30.48 centimeters, below a valve or equivalent device that will remain tightly closed under normal operating conditions. In a shallow pool, such as a wading pool, where an equalizer outlet can not be submerged at least one foot below the skimmer valve, the equalizer pipe shall be connected to a separate dedicated outlet with an anti-entrapment outlet cover in the floor of the pool that meets the requirements of ASME A112.19.8a-2008; and

(d) The equalizer pipe must be protected with a cover or

grate that meets the requirements of ASME A112.19.8a-2008 and is sized to accommodate the design flow requirement of R392-302-19(5).

(9) The operator shall maintain proper operation of all skimmer weirs, float valves, check valves, and baskets. Skimmer baskets shall be maintained in a clean and sanitary condition.

(10) Where skimmers are used, a continuous handhold is required around the entire perimeter of the pool except in areas of the pool that are zero depth and shall be installed not more than 9 inches, 2.86 centimeters, above the normal operating level of the pool. The decking, coping, or other material may be used as the handhold so long as it has rounded edges, is slip-resistant, and does not exceed 3.5 inches, 8.89 centimeters, in thickness. The overhang of the coping, decking, or other material must not exceed 2 inches, 5.08 centimeters, nor be less than 1 inch, 2.54 centimeters beyond the pool wall. An overhang may be up to a maximum of 3 inches to accommodate an automatic pool cover track system.

R392-302-20. Filtration.

(1) The filter system must provide for isolation of individual filters for backwashing or other service.

(2) The filtration system must be designed to allow the pool operator to easily observe the discharge backwash water from the filter in order to determine if the filter cells are clean.

(3) A public pool must use either a rapid sand filter, hi-rate sand filter, precoat media filter, a cartridge filter or other filter types deemed equivalent by the Department. All filters must comply with the standard NSF/ANSI 50-2007.

(4) Gravity and pressure rapid sand filter requirements.

(a) Rapid sand filters must be designed for a filter rate of 3 gallons, 11.36 liters, or less, per minute per square foot, 929 square centimeters, of bed area at time of maximum head loss. The filter bed surface area must be sufficient to meet the design rate of flow required by Section R392-302-16, Table 1, for required turnover.

(b) The filter system must be provided with influent pressure, vacuum, or compound gauges to indicate the condition of the filters. Air-relief valves must be provided at or near the high point of the filter or piping system.

(c) The filter system must be designed with necessary valves and piping to permit:

(i) filtering of all pool water;

(ii) individual backwashing of filters to a sanitary sewer at a minimum rate of 15 gallons, 56.78 liters, per minute per square foot, 929 square centimeters, of filter area;

(iii) isolation of individual filters;

(iv) complete drainage of all parts of the system;

(v) necessary maintenance, operation and inspection in a convenient manner.

(d) Each pressure type filter tank must be provided with an access opening of at least a standard size 11 inch, 27.94 centimeters, by 15 inch, 38.10 centimeters, manhole with a cover.

(5) Hi-rate sand filter requirements.

(a) Hi-rate sand filters must be designed for a filter rate of less than 18 gallons, 68.14 liters, per minute per square foot, 929 square centimeters, of bed area. The filter bed area must be sufficient to meet the design rate of flow required by Section R392-302-16, Table 1, for required turnover. Minimum flow rates must be at least 13 gallons, 49.21 liters, per minute per square foot, 929 square centimeters, of bed area. The minimum flow rate requirement may be reduced to a rate of no less than 10 gallons per minute per square foot of bed area where a multiple filter system is provided, and where the system includes a valve or other means after the filters which is designed to regulate the backwash flow rate and to assure that adequate backwash flow can be achieved through each filter per the filter manufacturer's requirements.

(b) The filter tank and all components must be installed in compliance with the manufacturer's recommendations.

(c) An air-relief valve must be provided at or near the high point of the filter.

(d) The filter system must be provided with an influent pressure gauge to indicate the condition of the filter.

(6) Vacuum or pressure type precoat media filter requirements.

(a) The filtering area must be compatible with the design pump capacity as required by R392-302-16(7). The design rate of filtration may not exceed 2.0 gallons per minute per square foot, 7.57 liters per 929 square centimeters, of effective filtering surface without continuous body feed, nor greater than 2.5 gallons per minute per square foot, 9.46 liters per 929 square centimeters, with continuous body feed.

(b) Where body feed is provided, the feeder device must be accurate to within 10 percent, must be capable of continual feeding within a calibrated range, and must be adjustable from two to six parts per million. The device must feed at the design capacity of the circulation pump.

(c) Where fabric is used, filtering area must be determined on the basis of effective filtering surfaces.

(d) The filter and all component parts must be designed and constructed of materials which will withstand normal continuous use without significant deformation, deterioration, corrosion or wear which could adversely affect filter operations.

(e) If a precoat media filter is supplied with a potable water supply, then the water must be delivered through an air gap.

(f) The filter plant must be provided with influent pressure, vacuum, or compound gauges to indicate the condition of the filter. In vacuum-type filter installations where the circulating pump is rated at two horsepower or higher, an adjustable high vacuum automatic shut-off device must be provided to prevent damage to the pump. Air-relief valves must be provided at or near the high point of the filter system.

(g) A filter must be designed to facilitate cleaning by one or more of the following methods: backwashing, air-bump-assist backwashing, automatic or manual water spray, or agitation.

(h) The filter system must provide for complete and rapid draining of the filter.

(i) Diatomaceous earth filter backwash water must discharge to the sanitary sewer system through a separation tank. The separation tank must have a visible precautionary statement warning the user not to start up the filter pump without first opening the air relief valve.

(j) Personal protection equipment suitable for preventing inhalation of diatomaceous earth or other filter aids must be provided.

(7) The department may waive National Sanitation Foundation, NSF/ANSI 50-2007, standards for precoat media filters and approve site-built or custom-built vacuum precoat media filters, if the precoat media filter elements are easily accessible for cleaning by hand hosing after each filtering cycle. Site-built or custom-built vacuum precoat media filters must comply with all design requirements as specified in Subsection R392-302-20(6). Any design which provides the equivalent washing effectiveness as determined by the department may be acceptable. Where the department or the local health department determines that a potential cross-connection exits, a hose bib in the vicinity of the filter to facilitate the washing operation must be equipped with a vacuum breaker listed by the International Association of Plumbing and Mechanical Officials, IAPMO, the American Society of Sanitary Engineering, A.S.S.E., or other nationally recognized standard.

(8) Vacuum or pressure type cartridge filter requirements.

(a) Sufficient filter area must be provided to meet the

design pump capacity as required by Subsection R392-302-16, Table 1.

(b) The designed rate of filtration may not exceed 0.375 gallons, 1.42 liters, per minute per square foot, 929 square centimeters, of effective filter area.

(c) The filter and all component parts must be designed and constructed of materials which will withstand normal continuous use without significant deformation, deterioration, corrosion or wear which could adversely affect filter operations. The filter element must be constructed of polyester fiber only.

(d) The filter must be fitted with influent and effluent pressure gauges, vacuum, or compound gauges to indicate the condition of the filter. In vacuum type filter installations where the circulating pump is rated at two horsepower or higher, an adjustable high vacuum automatic shut-off must be provided to prevent damage to the pump. Air-relief valves must be provided at or near the high point of the filter system.

(e) Cleaning of cartridge type filters must be accomplished in accordance with the manufacturer's recommendations.

R392-302-21. Disinfectant and Chemical Feeders.

(1) A pool must be equipped with a disinfectant feeder or feeders which conform to the National Sanitation Foundation, NSF/ANSI 50-2007, standards relating to adjusted output rate chemical-feeding equipment and flow through chemical feeding equipment for swimming pools, or be deemed equivalent by the department.

(2) Where oxidation-reduction potential controllers are used, the operator shall perform supervisory water testing, calibration checks, inspection and cleaning of sensor probes and chemical injectors in accordance with the manufacturer's recommendations. If specific manufacturer's recommendations are not made, the operator shall perform inspections, calibration checks, and cleaning of sensor probes at least weekly.

(3) Where compressed chlorine gas is used, the following additional features must be provided:

(a) Chlorine and chlorinating equipment must be located in a secure, well-ventilated enclosure separate from other equipment systems or equipment rooms. Such enclosures may not be below ground level. If an enclosure is a room within a building, it must be provided with vents near the floor which terminate at a location out-of-doors. Enclosures must be located to prevent contamination of air inlets to any buildings and areas used by people. Forced air ventilation capable of providing at least one complete air change per minute, must be provided for enclosures.

(b) The operator shall not keep substances which are incompatible with chlorine in the chlorine enclosure.

(c) The operator shall secure chlorine cylinders to prevent them from falling over. The operator shall maintain an approved valve stem wrench on the chlorine cylinder so the supply can be shut off quickly in case of emergency. The operator shall keep valve protection hoods and cap nuts in place except when the cylinder is connected.

(d) Doors to chlorine gas and equipment rooms must be labeled DANGER CHLORINE GAS in letters at least 4 inches, 10.16 centimeters, in height and display the United States Department of Transportation placard and I.D. number for chlorine gas.

(e) The chlorinator must be designed so that leaking chlorine gas will be vented to the out-of-doors.

(f) The chlorinator must be a solution feed type, capable of delivering chlorine at its maximum rate without releasing chlorine gas to the atmosphere. Injector water must be furnished from the pool circulation system with necessary water pressure increases supplied by a booster pump. The booster must be interlocked with both the pool circulation pump and with a flow switch on the return line.

(g) Chlorine feed lines may not carry pressurized chlorine gas.

(h) The operator shall keep an unbreakable bottle of ammonium hydroxide, of approximately 28 percent solution in water, readily available for chlorine leak detection.

(i) A self-contained breathing apparatus approved by NIOSH for entering environments that are immediately dangerous to life or health must be available and must have a minimum capacity of fifteen minutes.

(j) The breathing apparatus must be kept in a closed cabinet located outside of the room in which the chlorinator is maintained, and must be accessible without use of a key or lock combination.

(k) The facility operator shall demonstrate to the local health department through training documentation, that all persons who operate, or handle gas chlorine equipment, including the equipment specified in Subsections R392-203-21(3)(h) and (i) are knowledgeable about safety and proper equipment handling practices to protect themselves, staff members, and the public from accidental exposure to chlorine gas.

(l) The facility operator or his designee shall immediately notify the local health department of any inadvertent escape of chlorine gas.

(4) Bactericidal agents, other than chlorine and bromine, and their feeding apparatus may be acceptable if approved by the department. Each bactericidal agent must be registered by the U.S. Environmental Protection Agency for use in swimming pools.

(5) Equipment of the positive displacement type and piping used to apply chemicals to the water must be sized, designed, and constructed of materials which can be cleaned and maintained free from clogging at all times. Materials used for such equipment and piping must be resistant to the effects of the chemicals in use.

(6) All auxiliary chemical feed pumps must be wired electrically to the main circulation pump so that the operation of these pumps is dependent upon the operation of the main circulation pump. If a chemical feed pump has an independent timer, the main circulation pump and chemical feed pump timer must be interlocked.

R392-302-22. Safety Requirements and Lifesaving Equipment.

(1) Areas of a public pool with water depth greater than six feet or a width greater than forty feet and a depth greater than four feet where a lifeguard is required under Subsection R392-302-30(2) shall provide for a minimum number of elevated lifeguard stations in accordance with Table 2. Elevated lifeguard stations shall be located to provide a clear unobstructed view of the pool bottom by lifeguards on duty.

(2) A public pool must have at least one unit of lifesaving equipment. One unit of lifesaving equipment must consist of the following: a Coast Guard-approved ring buoy with an attached rope equal in length to the maximum width of the pool plus 10 feet and a life pole or shepherd's crook type pole with blunted ends and a minimum length of 12 feet, 3.66 meters. The facility operator may substitute a rescue tube for a ring buoy where lifeguard service is provided. Additional units must be provided at the rate of one for each 2,000 square feet, 185.8 square meters, of surface area or fraction thereof. The operator of a pool that has lifeguard services shall provide at least one backboard designed with straps and head stabilization capability.

(3) A public pool must be equipped with a first aid kit which includes a minimum of the following items:

2 Units eye dressing packet;
2 Units triangular bandages;
1 CPR shield;
1 scissors;

1 tweezers;
6 pairs disposable medical exam gloves; and
Assorted types and sizes of the following: self adhesive bandages, compresses, roller type bandages and bandage tape.

(a) The operator shall keep the first-aid kit filled, available, and ready for use.

(4) Lifesaving equipment must be mounted in readily accessible, conspicuous places around the pool deck. The operator shall maintain it in good repair and operable condition. The operator and lifeguards shall prevent the removal of lifesaving equipment or use of it for any reason other than its intended purpose.

(5) Where no lifeguard service is provided in accordance with Subsection R392-302-30(2), a warning sign must be placed in plain view and shall state: WARNING - NO LIFEGUARD ON DUTY and BATHERS SHOULD NOT SWIM ALONE, with clearly legible letters, at least 4 inches high, 10.16 centimeters. In addition, the sign must also state CHILDREN 14 AND UNDER SHOULD NOT USE POOL WITHOUT RESPONSIBLE ADULT SUPERVISION.

(6) Where lifeguard service is required, the facility must have a readily accessible area designated and equipped for emergency first aid care.

TABLE 2

Safety Equipment and Signs

	POOLS WITH LIFEGUARD	POOLS WITH NO LIFEGUARD
Elevated Station	1 per 2,000 sq. ft., 185 sq. meters, of pool area or fraction	None
Backboard	1 per facility	None
Room for Emergency Care	1 per facility	None
Ring Buoy with an attached rope equal in length to the maximum width of the pool plus 10 feet, 3.05 meters	1 per 2,000 sq. ft., 185 sq. meters, of pool area or fraction	1 per 2,000 sq. ft., 185 sq. meters, of pool area or fraction
Rescue Tube (used as a substitute for ring buoys when lifeguards are present)	1 per 2,000	None sq. ft., 185 sq. meters, of pool area or fraction
Life Pole or Shepherds Crook	1 per 2,000 sq. ft. 185, sq. meters, of pool area or fraction	1 per 2,000 sq. ft. 185, sq. meters, of pool area or fraction
First Aid Kit	1 per facility	1 per facility

R392-302-23. Lighting, Ventilation and Electrical Requirements.

(1) A pool constructed after September 16, 1996 may not be used for night swimming in the absence of underwater lighting. The local health officer may grant an exemption to this if the pool operator demonstrates that a 6 inch, 15.24 centimeters, diameter black disk on a white background placed in the deepest part of the pool can be clearly observed from the pool deck during night time hours. The local health department shall keep a record of this exemption on file. The pool operator shall keep a record of this exemption on file at the facility.

(2) Where night swimming is permitted and underwater lighting is used, artificial lighting shall be provided so that all areas of the pool, including the deepest portion of the pool shall be visible. Underwater lights shall provide illumination equivalent to 0.5 watt of incandescent lamp light per square foot, 0.093 square meter, of pool water surface area. The Local Health Officer may waive underwater lighting requirements if overhead lighting provides a minimum of 15 foot candles, 161 lux, illumination over the entire pool surface.

(3) Where night swimming is permitted and underwater luminaires are used, area lighting must be provided for the deck areas and directed away from the pool surface as practical to reduce glare. The luminance must be at least 5 horizontal foot candles of light per square foot, 929 square centimeters, of deck area, but less than the luminance level for the pool shell.

(4) Electrical wiring must conform with Article 680 of the National Fire Protection Association 70: National Electrical Code 2005 edition which is adopted and incorporated by reference.

(a) Wiring may not be routed under a pool or within the area extending 5 feet, 1.52 meters, horizontally from the inside wall of the pool as provided in Article 680 of the National Electric Code, without the written approval of the department. The department may deny the installation and use of any electrical appliance, device, or fixture, if its power service is routed under a pool or within the area extending 5 feet, 1.52 meters, horizontally from the inside wall of the pool, except in the following circumstances;

(i) For underwater lighting,
(ii) electrically powered automatic pool shell covers, and
(iii) competitive judging, timing, and recording apparatus.

(5) Buildings containing indoor pools, pool equipment rooms, access spaces, bathhouses, dressing rooms, shower rooms, and toilet spaces must be ventilated in accordance with American Society of Heating, Refrigerating and Air-Conditioning Engineers Standard 62.1-2004, which is incorporated and adopted by reference.

R392-302-24. Dressing Rooms.

(1) The operator shall maintain all areas and fixtures within dressing rooms in an operable, clean and sanitary condition. Dressing rooms must be equipped with minimum fixtures as required in Subsection R392-302-25(1). The local health department may exempt any bathers from the total number of bathers used to calculate the fixtures required in Subsection R392-302-25(1) who have private use fixtures available within 150 feet, 45.7 meters of the pool.

(2) A separate dressing room with required shower areas must be provided for each sex. The entrances and exits must be designed to break the line of sight into the dressing areas from other locations.

(3) Dressing rooms must be constructed of materials that have smooth, non-slip surfaces, and are impervious to moisture.

(4) Floors must slope to a drain and be constructed to prevent accumulation of water.

(5) Carpeting may not be installed on dressing room floors.

(6) Junctions between walls and floors must be coved.

(7) Partitions between dressing cubicles must be raised at least 10 inches, 25.4 centimeters, above the floor or must be placed on continuous raised masonry or concrete bases at least 4 inches, 10.16 centimeters, high.

(8) Lockers must be set either on solid masonry bases 4 inches, 10.16 centimeters, high or on legs elevating the bottom locker at least 10 inches, 25.4 centimeters, above the floor.

(a) Lockers must have louvers for ventilation.

(9) A dressing room must exit to the shallowest area of the pool. The dressing room exit door and the pool deck must be separated by at least 10 feet, 3.05 meters, and be connected by an easily cleanable walkway.

R392-302-25. Toilets and Showers.

(1) The minimum number of toilets and showers for dressing room fixtures must be based upon the designed

maximum bather load. Required numbers of fixtures must be based upon 50 percent of the total number of bathers being male and 50 percent being female, except where the facility is used exclusively by one sex. The minimum number of sanitary fixtures must be in accordance with Table 4.

TABLE 4

Sanitary Fixture Minimum Requirements

Water Closets

Male	Female
1:1 to 25	1:1 to 25
2:26 to 75	2:26 to 75
3:76 to 125	3:76 to 125
4:126 to 200	4:126 to 200
5:201 to 300	5:201 to 300
6:301 to 400	6:301 to 400

Over 400, add one fixture for each additional 200 males or 150 females.
Where urinals are provided, one water closet less than the number specified may be provided for each urinal installed, except the number of water closets in such cases may not be reduced to less than one half of the minimum specified.

(2) Lavatories must be provided on the basis of one for each water closet up to four, then one for each two additional water closets.

(3) One shower head for each sex must be provided for each 50 bathers or fraction thereof.

(4) Potable water must be provided at all shower heads. Water heaters and thermostatically controlled mixing valves must be inaccessible to bathers and must be capable of providing 2 gallons per minute, 7.57 liters per minute, of 90 degree F. water to each shower head for each bather.

(5) Soap must be dispensed at all lavatories and showers. Soap dispensers must be constructed of metal or plastic. Use of bar soap is prohibited.

(6) Fixtures must be designed so that they may be readily cleaned. Fixtures must withstand frequent cleaning and disinfecting.

(7) At least one covered waste can must be provided in each restroom.

R392-302-26. Visitor and Spectator Areas.

(1) Visitors, spectators, or animals may not be allowed within 10 feet, 3.05 meters, of the pool. Service animals are exempt from this requirement.

(2) Food or drink is prohibited within ten feet, 3.05 meters, of the pool. Beverages must be served in non-breakable containers.

(3) Trash containers must be provided in visitor and spectator areas. The entire area must be kept free of litter and maintained in a clean, sanitary condition.

R392-302-27. Disinfection and Quality of Water.

(1) Disinfection Process.

(a) A pool must be continuously disinfected by a process which:

(i) Is registered with the United States Environmental Protection Agency as a disinfecting process or disinfectant product for water;

(ii) Imparts a disinfectant residual which may be easily and accurately measured by a field test procedure appropriate to the disinfectant in use;

(iii) Is compatible for use with other chemicals normally used in pool water treatment;

(iv) Does not create harmful or deleterious effects on bathers if used according to manufacturer's specifications; and

(v) Does not create an undue safety hazard if handled, stored and used according to manufacturer's specifications.

(b) The active disinfecting agent used must meet the concentration levels listed in Table 6 for all circumstances, bather loads, and the pH level of the water.

(2) Testing Kits.

(a) An easy to operate pool-side disinfectant testing kit, compatible with the disinfectant in use and accurate to within 0.5 milligrams per liter, must be provided at each pool.

(b) If chlorine is the disinfectant used, it must be tested by the diethyl-p-phenylene diamine method, the leuco crystal violet method, or another test method approved by the Department.

(c) If cyanuric acid or stabilized chlorine is used, a testing kit for cyanuric acid, accurate to within 10.0 milligrams per liter must be provided.

(d) Expired test kit reagents may not be used.

(3) Chemical Quality of Water.

(a) If cyanuric acid is used to stabilize the free residual chlorine, or if one of the chlorinated isocyanurate compounds is used as the disinfecting chemical, the concentration of cyanuric acid in the water must be at least ten milligrams per liter, but may not exceed 100 milligrams per liter.

(b) The difference between the total chlorine and the free chlorine in a pool shall not be greater than 0.5 milligrams per liter. If the concentration of combined residual chlorine is greater than 0.5 milligrams per liter the operator shall breakpoint chlorinate the pool water to reduce the concentration of combined chlorine.

(c) Total dissolved solids shall not exceed 1,500 milligrams per liter over the startup total dissolved solids of the pool water.

(d) Total alkalinity must be within the range from 100 to 125 milligrams per liter for a plaster lined pool, 80 to 150 milligrams per liter for a spa pool lined with plaster, and 125 to 150 milligrams per liter for a pool lined with other approved construction materials.

(e) A calcium hardness of at least 200 milligrams per liter must be maintained.

(f) The saturation index value of the pool water must be within the range of positive 0.3 and minus 0.3. The saturation index shall be calculated in accordance with Table 5.

(4) Water Clarity and Temperature.

(a) The water must have sufficient clarity at all times that the drain grates or covers in the deepest part of the pool are readily visible. As an alternative test for clarity, a black disk, six inches in diameter, must be readily visible if placed on a white field in the deepest part of the pool.

(b) Pool water temperatures for general use should be within the range of 82 degrees Fahrenheit, 28 degrees Celsius, to 86 degrees Fahrenheit, 30 degrees Celsius.

(c) The minimum water temperature for a pool is 78 degrees Fahrenheit, 26 degrees Celsius.

(d) The local health departments may grant exemption to the pool water temperature requirements for a special purpose pool including a cold plunge pool, but may not exempt maximum hot water temperatures for a spa pool.

TABLE 5

CHEMICAL VALUES AND FORMULA FOR CALCULATING SATURATION INDEX

The formula for calculating the saturation index is:
SI = pH + TF + CF + AF - TDSF
SI means saturation index
TF means temperature factor
CF means calcium factor
mg/l means milligrams per liter
deg F means degrees Fahrenheit
AF means alkalinity factor
TDSF means total dissolved solids factor.

Temperature	Calcium Hardness	Total Alkalinity

deg. F	TF	mg/l	CF	mg/l	AF
32	0.0	25	1.0	25	1.4
37	0.1	50	1.3	50	1.7
46	0.2	75	1.5	75	1.9
53	0.3	100	1.6	100	2.0
60	0.4	125	1.7	125	2.1
66	0.5	150	1.8	150	2.2
76	0.6	200	1.9	200	2.3
84	0.7	250	2.0	250	2.4
94	0.8	300	2.1	300	2.5
105	0.9	400	2.2	400	2.6
128	1.0	800	2.5	800	2.9

Total Dissolved Solids

mg/l	TDSF
0 to 999	12.1
1000 to 1999	12.2
2000 to 2999	12.3
3000 to 3999	12.4
4000 to 4999	12.5
5000 to 5999	12.55
6000 to 6999	12.6
7000 to 7999	12.65
each additional 1000, add	.05

If the SATURATION INDEX is 0, the water is chemically in balance.
If the INDEX is a minus value, corrosive tendencies are indicated.
If the INDEX is a positive value, scale-forming tendencies are indicated.
EXAMPLE: Assume the following factors:
pH 7.5; temperature 80 degrees F, 19 degrees C;
calcium hardness 235; total alkalinity 100; and total dissolved solids 999.
pH = 7.5
TF = 0.7
CF = 1.9
AF = 2.0
TDSF = 12.1
TOTAL: 7.5 + 0.7 + 1.9 + 2.0 - 12.1 = 0.0
This water is balanced.

TABLE 6

DISINFECTANT LEVELS AND CHEMICAL PARAMETERS

	POOLS	SPAS	SPECIAL PURPOSE
Stabilized Chlorine (milligrams per liter)			
pH 7.2 to 7.6	2.0(1)	3.0(1)	2.0(1)
pH 7.7 to 8.0	3.0(1)	5.0(1)	3.0(1)
Non-Stabilized Chlorine (milligrams per liter)			
pH 7.2 to 7.6	1.0(1)	2.0(1)	2.0(1)
pH 7.7 to 8.0	2.0(1)	3.0(1)	3.0(1)
Bromine (milligrams per liter)	4.0(1)	4.0(1)	4.0(1)
Iodine (milligrams per liter)	1.0(1)	1.0(1)	1.0(1)
Ultraviolet and Hydrogen Peroxide (milligrams per liter hydrogen peroxide)	40.0(1)	40.0(1)	40.0(1)
pH	7.2 to 7.8	7.2 to 7.8	7.2 to 7.8
Total Dissolved Solids (TDS) over start-up TDS (milligrams per liter)	1,500	1,500	1,500
Cyanuric Acid (milligrams per liter)	10 to 100	10 to 100	10 to 100
Maximum Temperature (degrees Fahrenheit)	104	104	104
Calcium Hardness (milligrams per liter as calcium carbonate)	200(1)	200(1)	200(1)
Total Alkalinity (milligrams per liter as calcium carbonate)			
Plaster Pools	100 to 125	80 to 150	100 to 125
Painted or Fiberglass Pools	125 to 150	80 to 150	125 to 150
Saturation Index (see Table 5)	Plus or Minus 0.3	Plus or Minus 0.3	Plus or Minus 0.3
Chloramines (combined chlorine residual, milligrams per liter)	0.5	0.5	0.5

Note (1): Minimum Value

(5) Pool Water Sampling and Testing.

(a) At the direction of the Local Health Officer, the pool operator or a representative of the local health department shall collect a pool water sample from each public pool at least once per month or at a more frequent interval as determined by the Local health Officer. A seasonal public pool during the off season and any public pool while it is temporarily closed, if the pool is closed for an interval exceeding half of that particular month, are exempt from the requirement for monthly sampling. The operator or local health department representative shall submit the pool water sample to a laboratory approved under R444-14 to perform total coliform and heterotrophic plate count testing.

(b) The operator or local health department shall have the laboratory analyze the sample for total coliform and heterotrophic plate count using methods allowed under R444-14-4.

(c) If the operator submits the sample as required by local health department, the operator shall require the laboratory to report sample results within five working days to the local health department and operator.

(d) A pool water sample fails bacteriological quality standards if it:

(i) Contains more than 200 bacteria per milliliter, as determined by the heterotrophic plate count or

(ii) Shows a positive test for presence of coliform or contains more than 1.0 coliform organisms per 100 milliliters.

(e) Not more than 1 of 5 samples may fail bacteriological quality standards. Failure of any bacteriological water quality sample shall require submission of a second sample within one lab receiving day after the sample report has been received.

R392-302-28. Cleaning Pools.

(1) The operator shall clean the bottom of the pool as often as needed to keep the pool free of visible dirt.

(2) The operator shall clean the surface of the pool as often as needed to keep the pool free of visible scum or floating matter.

(3) The operator shall keep all pool shell surfaces, handrails, floors, walls, and ceilings of rooms enclosing pools, dressing rooms and equipment rooms clean, sanitary, and in good repair.

(4) The operator shall respond to all discovered releases of fecal matter into a public pool in accordance with the following protocol: Centers for Disease Control and Prevention. Fecal Accident Response Recommendations for Pool Staff and Notice to Readers--Revised Guidance for Responding to Fecal Accidents in Disinfected Swimming Venues. Morbidity Mortality Weekly Report February 15, 2008 Volume 57, pages 151-152 and May 25, 2001 Volume 50, pages 416-417, which are incorporated by reference. The operator shall include in the records required in R392-302-29(2) information about all fecal matter releases into a public pool. The records shall include date, time, and where the fecal matter was discovered; whether the fecal matter was loose or solid; and the responses taken. The Local Health Officer may approve the alteration of the required Centers for Disease Control protocol for the hyperchlorination step for a loose fecal release if an operator is able to achieve a 99.9 percent kill or removal of cryptosporidium oocysts in the entire pool system by another method such as ultraviolet light, ozone, or enhanced filtration prior to allowing bathers to reenter the pool.

R392-302-29. Supervision of Pools.

(1) Public pools must be supervised by an operator that is certified or recertified by a program of training and testing that is approved by the Utah Department of Health. The local health department may determine the appropriate numbers of pools any one certified operator may supervise using criteria based on pool compliance history, local considerations of time and distance, and the individual operator's abilities.

(2) The pool operator must keep written records of all information pertinent to the operation, maintenance and sanitation of each pool facility. Records must be available at the facility and be readily accessible. The pool operator must make records available to the department or the local health department having jurisdiction upon their request. These records must include disinfectant residual in the pool water, pH and temperature of the pool water, pool circulation rate, quantities of chemicals and filter aid used, filter head loss, filter washing schedule, cleaning and disinfecting schedule for pool decks and dressing rooms, occurrences of fecal release into the pool water or onto the pool deck, bather load, and other information required by the local health department. The pool operator must keep the records at the facility, for at least two operating seasons.

(3) The public pool owner, in consultation with the qualified operator designated in accordance with 392-302-29(1), shall develop an operation, maintenance and sanitation plan for the pool that will assure that the pool water meets the sanitation and quality standards set forth in this rule. The plan shall be in writing and available for inspection by the local health department. At a minimum the plan shall include the frequency of measurements of pool disinfectant residuals, pH and pool water temperature that will be taken. The plan shall also specify who is responsible to take and record the measurements.

(4) If the public pool water samples required in Section R392-302-27(5) fail bacteriological quality standards as defined in Section R392-302-27(5), the local health department shall require the public pool owner and qualified operator to develop an acceptable plan to correct the problem. The local health department may require more frequent water samples, additional training for the qualified operator and also may require that:

(a) the pool operator measure and record the level of disinfectant residuals, pH, and pool water temperature four times a day (if oxidation reduction potential technology is used in accordance with this rule, the local health department may reduce the water testing frequency requirement) or

(b) the pool operator read flow rate gauges and record the pool circulation rate four times a day.

(5) Bather load must be limited if necessary to insure the safety of bathers and pool water quality as required in Section R392-302-27.

(6) A sign must be posted in the immediate vicinity of the pool stating the location of the nearest telephone and emergency telephone numbers which shall include:

(a) Name and phone number of nearest police, fire and rescue unit;

(b) Name and phone number of nearest ambulance service;

(c) Name and phone number of nearest hospital.

(7) If a telephone is not available at poolside, emergency telephone numbers must be provided in a form that can be taken to a telephone.

R392-302-30. Supervision of Bathers.

(1) Access to the pool must be prohibited when the facility is not open for use.

(2) Lifeguard service must be provided at a public pool if direct fees are charged or public funds support the operation of the pool. If a public pool is normally exempt from the requirement to provide lifeguard services, but is used for some purpose that would require lifeguard services, then lifeguard services are required during the period of that use. For other pools, lifeguard service must be provided, or signs must be clearly posted indicating that lifeguard service is not provided.

(3) A lifeguard must meet each of the following:

(a) Be trained and certified by the American Red Cross, Ellis and Associates, or an equivalent program as approved by the department in Standard Level First Aid, C.P.R. for professional rescuers, and Life Guarding.

(b) Be on duty at all times when the pool is open to use by bathers, except as provided in Subsection R392-302-30(2).

(c) Have full authority to enforce all rules of safety and sanitation.

(4) A lifeguard may not have any other duties to perform other than the supervision and safety of bathers while he or she is assigned lifeguarding duties.

(5) Where lifeguard service is required, the number of lifeguards must be sufficient to allow for continuous supervision of all bathers, and surveillance over total pool floor areas.

(6) Lifeguards must be relieved in the rotation of lifeguarding responsibilities at least every 30 minutes with a work break of at least 10 minutes every hour.

(7) The facility operator and staff are responsible for the enforcement of the following personal hygiene and behavior rules:

(a) A bather using the facility must take a cleansing shower before entering the pool enclosure. A bather leaving the pool to use the toilet must take a second cleansing shower before returning to the pool enclosure.

(b) The operator and lifeguards shall exclude any person having a communicable disease transmissible by water from using the pool. A person having any exposed sub-epidermal tissue, including open blisters, cuts, or other lesions may not use a public pool. A person who has or has had diarrhea within the last two weeks caused by an unknown source or from any communicable or fecal-borne disease may not enter any public pool.

(c) Any child under three years old, any child not toilet trained, and anyone who lacks control of defecation shall wear a water resistant swim diaper and waterproof swimwear. Swim diapers and waterproof swimwear shall have waist and leg openings fitted such that they are in contact with the waist or leg around the entire circumference.

(d) Running, boisterous play, or rough play, except supervised water sports, are prohibited.

(e) Easily readable placards embodying the above rules of personal hygiene and behavior must be conspicuously posted in the pool enclosure and in the dressing rooms and offices.

(f) The lifeguards and operator shall only allow diaper changing in restrooms or changing stations not at poolside. The person or persons who change the diaper must wash their hands thoroughly with soap before returning to the pool. The diapered person must undergo a cleansing shower before returning to the pool.

R392-302-31. Special Purpose Pools.

(1) Special purpose pools must meet all applicable requirements of all Sections of R392-302 in addition to those of this Section as they apply to special design features and uses of special purpose pools.

(a) Special purpose pool projects require consultation with the local health department having jurisdiction in order that consideration can be given to areas where potential problems may exist and before deviations from some of the requirements are approved.

(b) The local health officer shall require such measures as deemed necessary to assure the health and safety of special purpose pool patrons.

(2) Spa Pools.

(a) This subsection supercedes R392-302-6(5). A spa pool

shell may be a color other than white or light pastel.

(b) Spa pools shall meet the bather load requirement of R392-302-7(1)(a).

(c) A spa pool may not exceed a maximum water depth of 4 feet, 1.22 meters. The department may grant exceptions to the maximum depth requirement for a spa pool designed for special purposes, such as instruction, treatment, or therapy.

(d) This subsection supercedes R392-302-12(1)(f). A spa pool may be equipped with a single entry/exit. A spa pool must be equipped with at least one handrail for each 50 feet, 15.24 meters, of perimeter, or portion thereof, to designate the point of entry and exit. Points of entry and exit must be evenly spaced around the perimeter of the spa pool and afford unobstructed entry and egress.

(e) This subsection supercedes R392-302-12(3)(c). In a spa pool where the bottom step serves as a bench or seat, the bottom riser may be a maximum of 14 inches, 35.56 centimeters.

(f) This subsection supercedes R392-302-13(1). A spa pool must have a continuous, unobstructed deck at least 3 feet, 91.44 centimeters, wide around 25 percent or more of the spa.

(g) This subsection supercedes R392-302-13(5). The department may allow spa decks or steps made of sealed, clear-heart redwood.

(h) A pool deck may be included as part of the spa deck if the pools are separated by a minimum of 5 feet, 1.52 meters. The department may grant an exception to deck and pool separation requirements if a spa pool and another pool are constructed adjacent to each other and share a common pool sidewall which separates the two pools. The common pool side wall may not exceed 12 inches, 30.48 centimeters, in width.

(i) This subsection supersedes R392-302-15. The local health officer may exempt a spa pool from depth marking requirements if the spa pool owner can successfully demonstrate to the local health officer that bather safety is not compromised by the elimination of the markings.

(j) A spa pool must have a minimum of one turnover every 30 minutes.

(k) Spa pool air induction systems shall meet the requirements of R392-302-16(12)(a) through (b). Jet or water agitation systems shall meet the requirements of R392-302-16(13).

(l) Spa pool filtration system inlets shall be wall-type inlets and the number of inlets shall be based on a minimum of one for each 20 feet, 6.10 meters, or fraction thereof, of pool perimeter.

(m) Spa pool outlets shall meet all of the requirements of subsections R392-302-18(1) through R392-302-18(4)(e); however, the following exceptions apply:

(i) Multiple spa outlets shall be spaced at least three feet apart from each other as measured from the centers of the drain covers or grates or a third drain shall be provided and the separation distance between individual outlets shall be at the maximum possible spacing.

(ii) The department may exempt an acrylic or fiberglass spa from the requirement to locate outlets at the deepest point in the pool if the outlets are located on side walls within three inches of the pool floor and a wet-vacuum is available on site to remove any water left in the pool after draining.

(n) A spa pool must have a minimum number of surface skimmers based on one skimmer for each 100 square feet, 9.29 square meters of surface area.

(o) A spa pool must be equipped with an oxidation reduction potential controller which monitors chemical demands, including pH and disinfectant demands, and regulates the amount of chemicals fed into the pool circulation system. A spa pool constructed and approved prior to September 16, 1996 is exempt from this requirement if it is able to meet bacteriological quality as required in Subsection R392-302-27(5)(e).

(p) A spa pool is exempt from the Section R392-302-22, except for Section R392-302-22(3).

(q) The maximum water temperature for a spa pool is 104 degrees Fahrenheit, 40 degrees Celsius.

(r) A spa pool shall meet the total alkalinity requirements of R392-302-27(3)(d).

(s) A spa pool must have an easily readable caution sign mounted adjacent to the entrance to the spa or hot tub which contains the following information:

(i) The word "caution" centered at the top of the sign in large, bold letters at least two inches in height.

(ii) Elderly persons and those suffering from heart disease, diabetes or high blood pressure should consult a physician before using the spa pool.

(iii) Persons suffering from a communicable disease transmissible via water may not use the spa pool. Persons using prescription medications should consult a physician before using the spa.

(iv) Individuals under the influence of alcohol or other impairing chemical substances should not use the spa pool.

(v) Bathers should not use the spa pool alone.

(vi) Pregnant women should not use the spa pool without consulting their physicians.

(vii) Persons should not spend more than 15 minutes in the spa in any one session.

(viii) Children under the age of 14 must be accompanied and supervised by at least one responsible adult over the age of 18 years, when lifeguards are not on duty.

(ix) Children under the age of five years are prohibited from bathing in a spa or hot tub.

(x) Running or engaging in unsafe activities or horseplay in or around the spa pool is prohibited.

(t) Water jets and air induction ports on spa pools must be controlled by an automatic timer which limits the duration of their use to 15 minutes per each cycle of operation. The operator shall mount the timer switch in a location which requires the bather to exit the spa before the timer can be reset for another 15 minute cycle or part thereof.

(3) Wading Pools.

(a) Wading pools shall be separated from other pools. Wading pools may not share common circulation, filtration, or chemical treatment systems, or walls.

(b) A wading pool may not exceed a maximum water depth of 2 feet, 60.96 centimeters.

(c) The deck of a wading pool may be included as part of adjacent pool decks.

(d) A wading pool must have a minimum of one turnover per hour and have a separate circulation system.

(e) A wading pool that utilizes wall inlets shall have a minimum of two equally spaced inlets around its perimeter at a minimum of one in each 20 feet, 6.10 meters, or fraction thereof.

(f) A wading pool shall have drainage to waste through a quick opening valve to facilitate emptying the wading pool should accidental bowel discharge or other contamination occur.

(4) Hydrotherapy Pools.

(a) A hydrotherapy pool shall at all times comply with R392-302-27 Disinfection and Quality of Water, R392-302-28 Cleaning of Pools and R392-302-29 Supervision of Pools unless it is drained cleaned, and sanitized after each individual use.

(b) A hydrotherapy pool is exempt from all other requirements of R392-302, only if use of the hydrotherapy pool is restricted to therapeutic uses and is under the continuous and direct supervision of licensed medical or physiotherapy personnel.

(c) Local health departments may enter and examine the use of hydrotherapy pools to respond to complaints, to assure that use of the pool is being properly supervised, to examine records of testing and sampling, and to take samples to assure

that water quality and cleanliness are maintained.

(d) A local health officer may grant an exception to section R392-302-31(4)(a) if the operator of the hydrotherapy pool can demonstrate that the exception will not compromise pool sanitation or the health or safety of users.

(5) Float Tanks.

(a) Float tank circulation systems, consisting of pumps, piping, filters, and disinfection equipment must be provided which will clarify and disinfect the tank's volume of water in 15 minutes or less.

(b) The total volume of water within a float tank must be turned over at least twice between uses by patrons.

(6) Water Slides.

(a) Slide Flumes.

(i) The flumes within enclosed slides must be designed to prevent accumulation of hazardous concentrations of toxic chemical fumes.

(ii) All curves, turns, and tunnels within the path of a slide flume must be designed so that body contact with the flume or tunnel does not present an injury hazard. The slide flume must be banked to keep the slider's body safely inside the flume.

(iii) The flume must be free of hazards including joints and mechanical attachments separations, splinters, holes, cracks, or abrasive characteristics.

(iv) Wall thickness of flumes must be thick enough so that the continuous and combined action of hydrostatic, dynamic, and static loads and normal environmental deterioration will not cause structural failures which could result in injury. The facility operator or owner shall insure that repairs or patchwork maintains original designed levels of safety and structural integrity. The facility operator or owner shall insure that repairs or patchwork is performed in accordance with manufacturer's guidelines.

(v) Multiple-flume slides must have parallel exits or be constructed, so that the projected path of their centerlines do not intersect within a distance of less than 8 feet, 2.44 meters, beyond the point of forward momentum of the heaviest bather permitted by the engineered design.

(vi) A slide flume exit must provide safe entry into the splash pool. Design features for safe entry include a water backup, and a deceleration distance adequate to reduce the slider's exit velocity to a safe speed. Other methods may be acceptable if safe exiting from the slide flume is demonstrated to the department.

(b) Flume Clearance Distances.

(i) A distance of at least 4 feet, 1.22 meters, must be provided between the side of a slide flume exit and a splash pool side wall.

(ii) The distance between nearest sides of adjacent slide flume exits must be at least 6 feet, 1.83 meters.

(iii) A distance between a slide flume exit and the opposite end of the splash pool, excluding steps, must be at least 20 feet, 6.10 meters.

(iv) The distance between the side of the vehicle flume exit and the pool side wall must be at least 6 feet, 1.83 meters.

(v) The distance between nearest sides of adjacent vehicle slide flume exits must be at least 8 feet, 2.44 meters.

(vi) The distance between a vehicle slide flume exit and the opposite end of the splash pool, excluding steps, must be long enough to provide clear, unobstructed travel for at least 8 feet, 2.44 meters, beyond the point of forward momentum of the heaviest bather permitted by the engineered design.

(c) Splash Pool Dimensions.

(i) The depth of a water slide splash pool at the end of a horizontally oriented slide flume exit must be at least 3 feet, 9.14 centimeters, but may be required to be deeper if the pool design incorporates special features that may increase risks to bathers as determined by the department.

(ii) The depth must be maintained in front of the flume for a distance of at least 20 feet, 6.10 meters, from which point the splash pool floor may have a constant slope upward. Slopes may not be designed or constructed steeper than a 1 to 10 ratio.

(iii) The operating water depth of a vehicle slide splash pool, at the flume exit, must be a minimum of 3 feet 6 inches, 1.07 meters. This depth must be maintained to the point at which forward travel of the vehicle ends. From the point at which forward travel ends, the floor may have a constant upward slope to the pool exit at a ratio not to exceed 1 to 10.

(iv) The department may waive minimum depth and distance requirements for a splash pool and approve a special exit system if the designer can demonstrate to the department that safe exit from the flume into the splash pool can be assured.

(v) A travel path with a minimum width of 4 feet, 1.22 meters, must be provided between the splash pool deck and the top of the flume.

(d) General Water Slide Requirements.

(i) Stairways serving a slide may not retain standing water. Stairways must have non-slip surfaces and shall conform to the requirements of applicable building codes.

(ii) Vehicles, including toboggans, sleds, inflatable tubes, and mats must be designed and manufactured of materials which will safeguard the safety of riders.

(iii) Water slides shall meet the bather load requirements of R392-302-7(1)(d).

(e) Water Slide Circulation Systems.

(i) Splash pool overflow reservoirs must have sufficient volume to contain at least two minutes of flow from the splash pool overflow. Splash pool overflow reservoirs must have enough water to insure that the splash pool will maintain a constant water depth.

(ii) The circulation and filtration equipment of a special purpose pool must be sized to turn over the entire system's water at least once every hour.

(iii) Splash pool overflow reservoirs must circulate water through the water treatment system and return when flume supply service pumps are turned off.

(iv) Flume pumps and motors must be sized, as specified by the flume manufacturer, and must meet all National Sanitation Foundation, NSF/ANSI 50-2007, Section 6. Centrifugal Pumps, standards for pool pumps.

(v) Flume supply service pumps must have check valves on all suction lines.

(vi) The splash pool and the splash pool overflow reservoir must be designed to prohibit bather entrapment as water flows from the splash pool to the overflow reservoir.

(vii) Perimeter overflow gutter systems must meet the requirements of Section R392-302-19, except that gutters are not required directly under slide flumes or along the weirs which separate splash pools and splash pool overflow reservoirs.

(viii) Pump reservoir areas must be accessible for cleaning and maintenance.

(f) Caution Signs.

(i) A caution sign must be mounted adjacent to the entrance to a water slide that states at least the following warnings:

(A) The word caution centered at the top of the sign in large bold letters at least two inches in height.

(B) No running, standing, kneeling, tumbling, or stopping on flumes or in tunnels.

(C) No head first sliding at any time.

(D) The use of a slide while under the influence of alcohol or impairing drugs is prohibited.

(E) Only one person at a time may travel the slide.

(F) Obey instructions of lifeguards and other staff at all times.

(G) Keep all parts of the body within the flume.

(H) Leave the splash pool promptly after exiting from the

slide.

(7) Interactive Water Feature Requirements.

(a) All parts of the interactive water feature shall be designed, constructed, maintained, and operated so there are no slip, fall, or other safety hazards, and shall meet the standards of the construction code adopted by the Utah Legislature under Section 58-56-4. A copy of the construction code is available at the office of the local building inspector.

(b) Interactive water feature nozzles that spray from the ground level shall be flush with the ground, with openings no greater than one-half inch in diameter. Spray devices that extend above ground level shall be clearly visible.

(c) Areas adjacent to the water feature collection zones shall be sloped away at a minimum of two percent from the interactive water feature to deck drains or other approved surface water disposal systems. A continuous deck at least 3 feet, 0.91 meters, wide as measured from the edge of the collection zones must extend completely around the interactive water feature.

(d) Water discharged from all interactive water feature fountain or spray features shall freely drain by gravity flow through a main drain fitting to a below grade sump or collection system which discharges to a collector tank.

(e) All interactive water feature foggers and misters that produce finely atomized mists shall be supplied directly from a potable water source and not from the underground reservoir.

(f) The interactive water feature shall have an automated oxidation reduction potential (ORP) and pH controller installed and in operation whenever the feature is open for use. The controller shall be capable of maintaining disinfection and pH levels within the requirements for special purpose pools listed in Table 6. In addition, an approved secondary disinfection system the meets the requirements of in R392-302-33 (4)(c) through (4)(f)(iii) shall be installed and in operation whenever the feature is open for use.

(g) A sign shall be posted in the immediate vicinity of interactive water feature stating that pets are prohibited.

(h) If the interactive water feature is operated at night, five foot-candles of light shall be provided in the all areas of the water feature. Lighting shall be installed in accordance with manufacturer's specifications and approved for such use by UL or NSF.

(i) Hydraulics.

(i) The interactive water feature filter system shall be capable of filtering and treating the entire water volume of the water feature within 30 minutes.

(ii) The interactive water feature filter system shall draft from the collector tank and return filtered and treated water to the tank via a minimum of 4 equally spaced inlet fittings. Inlet spacing shall also meet the requirements of section R392-302-17.

(iii) The interactive water feature circulation system shall be on a separate loop and not directly interconnected with the interactive water feature pump.

(iv) The suction intake of the interactive water feature pump in the underground reservoir shall be located adjacent to the circulation return line and shall be located to maximize uniform circulation of the tank.

(v) An automated water level controller shall be provided for the interactive water feature, and the drinking water line that supplies the feature shall be protected from any back flow by an air gap.

(vi) The water velocity through the feature nozzles of the interactive water features shall meet manufacturer's specifications and shall not exceed 20 feet per second.

(vii) The minimum size of the interactive water feature sump or collector tank shall be equal to the volume of 3 minutes of the combined flow of all feature pumps and the filter pump. Access lids or doors shall be provided to the sump and collector tank. The lids or doors shall be sized to allow easy maintenance and shall provide security from unauthorized access. Stairs or a ladder shall be provided as needed to ensure safe entry into the tank for cleaning and inspection.

(viii) The suction intake from the interactive water feature circulation pump shall be located in the lowest portion of the underground reservoir.

(ix) A means of vacuuming and completely draining the interactive water feature tank shall be provided.

(j) An interactive water feature is exempt from:

(i) The wall requirement of section R392-302-10;

(ii) The ladder, recessed step, stair, and handrail requirements of section R392-302-12;

(iii) The fencing and access barrier requirements of section R392-302-14;

(iv) The outlet requirements of section R392-302-18;

(v) The overflow gutter and skimming device requirements of section R392-302-19;

(vi) The safety and lifesaving requirements of section R392-302-22, except that an interactive water feature shall be equipped with a first aid kit as required by subsection R392-302-22(3);

(vii) The dressing room requirements of section R392-302-24 as long toilets, lavatories and changing tables are available within 150 feet; and

(viii) The pool water clarity and temperature requirements of subsection R392-302-27(4).

R392-302-32. Advisory Committee.

(1) An advisory committee to the Department regarding regulation of public pools is hereby authorized.

(2) The advisory committee shall be appointed by the Executive Director. Representatives from local health departments, pool engineering, construction or maintenance companies and pool owners may be represented on the committee.

(3) Consistent with R380-1, the Executive Director may seek the advice of the advisory committee regarding interpretation of this rule, the granting of exemptions and related matters.

R392-302-33. Cryptosporidiosis Watches and Warnings.

(1) The Executive Director or local health officer may issue cryptosporidiosis watches or cryptosporidiosis warnings as methods of intervention for likely or indicated outbreaks of cryptosporidiosis. The Executive Director or local health officer may issue a cryptosporidiosis watch if there is a heightened likelihood of a cryptosporidiosis outbreak. The Executive Director or local health officer may issue a cryptosporidiosis warning if there have been reports of cryptosporidiosis above the background level reported for the disease. The Executive Director or local health officer shall include the geographic area and pool type covered in the warning and may restrict certain persons from using public pools.

(2) If a cryptosporidiosis watch or a cryptosporidiosis warning has been issued, the operator of any public pool shall post a notice sign that meets the requirements of this section, the standard for "notice" signs established in ANSI Z353.2-2002, which is adopted by reference, and the approval of the local health officer to assure compliance with this section and the ANSI standard. An Adobe Acrobat .pdf version of the sign that meets the requirements of this section and the ANSI standard for 10-foot viewing is available from the Department or the local health department. The notice sign shall be placed so that all patrons are alerted to the cryptosporidium-targeted requirements prior to deciding whether to use the swimming pool. The sign shall be at least 17 inches, 43 centimeters, wide by 11 inches, 28 centimeters, high. The sign may need to be larger, depending on the placement of the sign, to meet the

ANSI standard.

(a) Centered immediately below the blue panel shall appear the words "CRYPTO DISEASE PREVENTION" in capital letters.

(b) The body of the notice sign shall be in upper case letters at least 1.0 centimeters high and include the following four bulleted statements in black letters:

-All with diarrhea in the past 2 weeks shall not use the pool.

-All users must shower with soap to remove all fecal material prior to pool entry and after using the toilet or a diaper change.

-All less than 3 yrs or who wear diapers must wear a swim diaper and waterproof swimwear. Diapers may only be changed in restrooms or changing stations.

-Keep pool water out of your mouth.

(3) If a cryptosporidium warning has been issued, each operator of a public pool subject to the warning shall, at a minimum, implement the following cryptosporidium counter measures:

(a) maintain the disinfectant concentration within the range between two mg/l (four mg/l for bromine) and the concentration listed on the product's Environmental Protection Agency mandated label as the maximum reentry concentration, but in no case more than five mg/l (10 mg/l for bromine);

(b) maintain the pH between 7.2 and 7.5; and

(c) maintain the cyanuric acid level that meets the requirement of R392-302-27(3), except the maximum level shall be reduced to 30 mg/l.

(4)(a) If a cryptosporidium warning has been issued, in addition to the requirements listed in R392-302-33(3), the owner or operator of a public pool shall implement any additional cryptosporidium countermeasures listed in subsection below sufficient to achieve at least a 99.9 percent destruction or removal of cryptosporidium oocysts twice weekly, except as provided in R392-302-33(4)(b).

(b) Hyperchlorination using sodium hypochlorite or calcium hypochlorite to achieve a concentration multiplied by time (CT) value of 15,300 mg/l minutes. Table 7 lists examples of chlorine concentrations and time periods that may be used to achieve the required CT value. The operator shall not allow anyone to use the pool if the chlorine concentration exceeds the Environmental Protection Agency maximum reentry concentration listed on the product's label, but in no case if the concentration exceeds five mg/l. The operator of any public pool not required to have a lifeguard by R392-302-30(2) shall hyperchlorinate at least once weekly.

(c) A full flow ultraviolet treatment system that meets the requirements of National Sanitation Foundation standard NSF/ANSI 50-2007, which is incorporated by reference. The owner or operator shall ensure that the system is installed and operated according to the manufacturer's recommendations. The owner or operator shall obtain from the manufacturer of the system documentation of third-party challenge testing that the system can achieve a single pass 99.9 percent inactivation of cryptosporidium or the bacteriophage MS2 at the pool design flow rate and during normal operating conditions. The owner or operator shall maintain and make available for inspection the manufacturer's documentation.

(d) An ozone treatment system that achieves a CT value of 7.4 and a flow-through rate at least four times the volume of the pool every three and a half days. The system shall meet the requirements of National Sanitation Foundation standard NSF/ANSI 50-2007, which is incorporated by reference. The owner or operator shall ensure that the system is installed and operated according to the manufacturer's recommendations.

(e) A cryptosporidium oocyst-targeted filter system installed and operated according to the manufacturer's recommendations. The filter shall meet the requirements of R392-302-20. The owner or operator shall obtain from the manufacturer of the system documentation of third-party challenge testing that the system can achieve a single pass 99 percent reduction of particles in the range of 4 to 6 microns or cryptosporidium oocysts at the pool design flow rate and normal operating conditions. The owner or operator shall maintain and make available for inspection the manufacturer's documentation.

(f) A system approved by the local health officer. The health officer's approval of a system for use as an alternative shall be based on the system's documented ability to:

(i) achieve cryptosporidium removal or inactivation to a level at least equivalent to the requirements in R392-302-33(4)(a);

(ii) assure safety for swimmers and pool operators; and

(iii) comply with all other applicable rules and federal regulations.

TABLE 7

Chlorine Concentration and Contact Time to Achieve CT = 15,300

Chlorine Concentration	Contact Time
1.0 mg/l	15,300 minutes (255 hours)
10 mg/l	1,530 minutes (25.5 hours)
20 mg/l	765 minutes (12.75 hours)

(5) If the Executive Director or local health officer issues a restriction on the use of public pools by certain persons as part of the cryptosporidium warning the operator shall restrict persons within that segment of the population from using the facility.

(6) If the Executive Director or local health officer determines that a pool is a cryptosporidiosis threat to public health, he may order the pool to close. The owner or operator of the pool may not reopen until the person issuing the order has rescinded it.

KEY: pools, spas, water slides
October 18, 2010 26-15-2
Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.
R392-400. Temporary Mass Gatherings Sanitation.
R392-400-1. Authority.

This rule is authorized under Utah Code Section 26-15-2.

R392-400-2. Purpose.

It is the purpose of this rule:

(1) to protect, preserve and promote the physical health of the public;

(2) to prevent and control the incidence of communicable diseases;

(3) to reduce hazards to health and environment;

(4) to maintain adequate sanitation and public health;

(5) to protect the safety of the public; and

(6) to promote the general welfare.

R392-400-3. Definitions.

(1) "Department" means the Utah Department of Health (UDOH).

(2) "Director" means the executive director of the Utah Department of Health or the executive director's designee.

(3) "Drinking Water Station" means a location where a person may obtain safe drinking water free of charge.

(4) "First Aid Station" means a temporary or permanent enclosed space or structure where a person can receive first aid and emergency medical care.

(5) "Health Officer" means the director of the local health department having jurisdiction or the health officer's designee.

(6) "Operator" means a person, group, corporation, partnership, governing body, association, or other public or private organization legally responsible for the overall operation of a temporary mass gathering.

(7) "Owner" means any person who alone, jointly, or severally with others:

(a) has legal title to any premises, with or without accompanying actual possession thereof or;

(b) has charge, care, or control of any premises, as legal or equitable owner, agent of the owner, or lessee.

(8) "Permit" means a written form of authorization written in accordance with this rule.

(9) "Person" means any individual, public or private corporation and its officers, partnership, association, firm, trustee, executor of an estate, the State or its departments, institution, bureau, agency, county, city, political subdivision, or any legal entity recognized by law.

(10) "Safe Drinking Water" means potable water meeting State safe drinking water rules or bottled water as regulated by the Utah Department of Agriculture and Food.

(11) "Safe Drinking Water System" means a system for delivering safe drinking water that is approved by the local health officer.

(12) "Solid Waste" means garbage, refuse, trash, rubbish, hazardous waste, dead animals, sludge, liquid or semi liquid waste, other spent, useless, worthless, or discarded materials or materials stored or accumulated for the purpose of discarding, materials that have served their original intended purpose.

(13) "Staff' means any person who:

(a) works for or provides services for or on behalf of the operator or a vendor, or

(b) is a vendor at a gathering.

(14) "Temporary Mass Gathering" or "Gathering" means an actual or reasonably anticipated assembly of 500 or more people, which continues or can reasonably be expected to continue for two or more hours per day, at a site for a purpose different from the designed use and usual type of occupancy. A temporary mass gathering does not include an assembly of people at a location with permanent facilities designed for that specific assembly, unless the designed occupancy levels are exceeded.

(15) "Vendor" means any person who sells or offers food for public consumption.

(16) "Wastewater" means used water or water carried wastes produced by man, animal, or fowl.

R392-400-4. Permit To Operate Required.

(1) A person may not operate a temporary mass gathering without a valid written permit issued by the health officer.

(2) The health officer may exempt a parade from the permit requirement if the operator submits an application as required in Section R392-400-6 and the health officer determines that the availability of existing public sanitary facilities, drinking water and trash containers is sufficient to protect public health.

(3) A temporary mass gathering may not exceed 30 days unless otherwise approved by the health officer.

R392-400-5. Gathering Operator Required On Site.

(1) The operator shall establish a headquarters at the gathering site.

(2) The operator or the operator's designee shall be present at the gathering at all times during operating hours.

R392-400-6. Permit Application Required.

(1) The health officer shall prescribe the application process, and shall require the applicant to submit an application at least 15 days prior to the first advertisement of the gathering and at least 30 days prior to the first day of the gathering. The health officer may grant an exception to this requirement on a case by case basis because of the nature of the event, scarcity of problems associated with the event in the past or other public health related criteria.

(2) An application for a permit shall be in writing to the health officer and include the following information:

(a) name, address, telephone number, and fax number (if applicable) of the operator;

(b) number of people expected to attend the gathering;

(c) a description of the type of gathering to be held with the date(s) and times the gathering will be held;

(d) estimated length of stay of attendees;

(e) name, address, telephone number, and fax number (if applicable) of property owner;

(f) location of the gathering and a site plan delineating the area where the gathering is to be held including the following:

(i) the parking area available for patrons;

(ii) location of entrance, exit, and interior roadways and walks;

(iii) location, type, and provider of restroom facilities;

(iv) location and description of water stations;

(v) location and number of food stands, and the types of food to be served if known;

(vi) location, number, type, and provider of solid waste containers;

(vii) location of operator's headquarters at the gathering;

(viii) a plan to provide lighting adequate to ensure the comfort and safety of attendees and staff;

(ix) location of all parking areas designated for the gathering and under the operator's control.

(g) the name of the solid and liquid waste haulers with whom the operator has contracted, unless exempted by this rule;

(h) a site clean up plan after the gathering;

(i) total number, and qualifications of first aid station personnel;

(j) plan for directional and exit signs;

(k) a plan developed by the operator to address nuisances or health hazards associated with animals present at the gathering;

(l) plans to address hazardous conditions as required in

Section R392-400-13;

(m) emergency medical services operational plan approved by the local licensed emergency medical services agency director, including the location of all first aid stations and emergency medical resources;

(n) any other information specifically requested by the health officer as necessary to protect public health.

(3) The health officer shall require a separate application for each temporary mass gathering.

(4) The health officer shall consider the proximity and risk of known health hazards when determining the acceptability of a proposed gathering site.

R392-400-7. Permit.

(1) The health officer may attach conditions or grant waivers to a permit, in accordance with this rule, in order to meet specific public health and safety concerns.

(2) The health officer may deny a permit for any of the following reasons:

(a) failure of the applicant to show that the gathering will be held or operated in accordance with the requirements and standards of this rule;

(b) submission of incorrect, incomplete, or false information in the application ;

(c) the gathering will be in violation of law.

(3) The health officer shall return a denied permit application to the applicant within 5 working days of submission, specifying the basis for denial in writing.

(4) The applicant may appeal a denied permit in accordance with the procedures established by the local Board of Health.

R392-400-8. Inspections.

(1) The director and health officer may conduct inspections before, during, and after a gathering to ensure compliance with R392-400 and approved plans.

(2) The operator shall provide the director and health officer with access to all areas of the gathering that the director and health officer deem necessary and the number of access credentials they request.

(3) The operator shall effectively communicate the director's and health officer's access privileges to staff.

R392-400-9. Notice Of Violation Or Closing.

(1) The health officer may issue a notice of violation to the owner, operator or the operator's designee if the gathering fails to meet the requirements of this rule or the conditions of the permit.

(2) The health officer shall, in accordance with R392-100 Food Service Sanitation, direct the disposition of any food items, including ice and water, that have been adulterated or are otherwise unfit for human consumption.

(3) The health officer may issue a notice of closure of the gathering or part thereof to the owner, operator or the operator's designee if the health officer determines that conditions at the gathering constitute a serious or imminent health hazard.

(4) No gathering site or part thereof that has been closed may be used for a gathering until the department or health officer determines that the conditions causing the closure have been abated and written approval is received from the department or health officer. The director or health officer shall remove the posted notice whenever the violation(s) upon which closing, and posting were based has been remedied.

(5) No unauthorized person may deface or remove a posted notice from any gathering site that has been closed by the director or local health officer.

(6) The operator may appeal a notice or closure in accordance with the procedures established by the local Board of Health or the Utah Administrative Procedures Act, whichever is applicable.

R392-400-10. Solid Waste Management.

(1) The operator shall contract with a solid waste hauler approved by health officer. The operator is exempt from this requirement if the operator is approved by the health officer as a solid waste hauler and is identified as the solid waste hauler for the gathering. The health officer shall establish written criteria for approving a solid waste hauler.

(2) The operator shall provide and strategically locate a sufficient number of covered waste containers approved by the health officer to effectively accommodate the solid waste generated at the gathering.

(3) The operator shall ensure that the waste containers are emptied as often as necessary to prevent overflowing, littering, or insect or rodent infestation.

(4) The operator shall ensure that solid waste and litter are cleaned from the property periodically during the gathering and that, within 24 hours following the gathering, the property is free of solid waste and is clean. On a case by case basis, the health officer may allow for more than 24 hours to clean up the site because of the time of year, nature of the event or other extenuating circumstances if the health officer is satisfied that the extension will not adversely affect the public health

(5) The operator shall ensure that litter is prevented from being blown from the gathering site onto adjacent properties.

(6) The operator shall ensure that all solid waste is collected and disposed of at a solid waste disposal or recycling facility meeting State and local solid waste disposal facility requirements.

(7) The operator, staff, participants, and spectators shall comply with all applicable State and local requirements for solid waste management.

R392-400-11. Site Maintenance.

(1) All buildings or structures provided for the gathering shall be maintained in a safe, clean condition, in good repair, and in compliance with all applicable laws.

(2) A gathering that provides overnight parking for occupied recreational vehicles in connection with the gathering, shall comply with R392-301 Recreational Vehicle Park Sanitation and local recreational vehicle parks regulations.

(3) The operator shall eliminate any infestation of vermin within any part of a structure intended for occupancy, food storage, or restroom facilities prior to, during, and immediately following a gathering.

(4) The operator is responsible for the maintenance and sanitary condition of the gathering site and facilities. The operator shall prevent the occurrence of any nuisance and immediately take steps to cause the abatement of any nuisance or insanitary condition that may develop.

(5) A gathering site shall be constructed to provide surface drainage adequate to prevent flooding of the gathering site and to prevent water related nuisances on adjacent properties.

(6) Sufficient signs shall identify and show the location of first aid, restroom and drinking water facilities so spectators and participants can readily find them from any place on the gathering site.

(7) The operator shall provide lighting adequate to ensure the comfort and safety of attendees.

(8) All parking areas used for the gathering and under the control of the gathering operator must meet the requirements of this rule.

R392-400-12. Emergency Medical Care Requirements.

(1) The operator shall ensure that the gathering has at least one first aid station. The health officer or local licensed emergency medical services agency director(s) may require more than one first aid station as they deem necessary because

of the nature of the event, time of year, risk of injuries or other public health and safety needs.

(2) First aid stations shall contain the following minimum equipment and maintain the minimum levels over the duration of the gathering:

(a) 1 Bag mask ventilation unit with adult, child, and infant mask sizes
(b) 3 Oropharyngeal airways, adult, child, and infant sizes
(c) 1 Pocket mask
(d) 1 portable oxygen apparatus (tank, regulator, case)
(e) 1 Oxygen extension tubing
(f) 2 adult and 1 child nasal cannula
(g) 2 adult and 1 child non-rebreather mask
(h) 1 adult and 1 child blood pressure cuff
(i) 1 stethoscope
(j) 2 pillows
(k) 2 emesis basins
(l) 4 blankets
(m) 4 sheets
(n) 12 towels
(o) six 5x9 or 8x10 trauma dressings
(p) thirty 4x4 gauze dressings
(q) 12 kerlix or other roller bandage
(r) 3 roles of adhesive tape
(s) 3 cervical collars, 1 regular, 1 no-neck, one pediatric
(t) 1 back board with straps
(u) 6 non-traction extremity splints (e.g.,cardboard, ladder, SAM splints, air splints)
(v) 10 triangular bandages
(w) 2 pair of shears
(x) 1 obstetrical kit
(y) 2 pen lights
(z) 100 assorted bandaids
(aa) 1 traction splint
(bb) 2 tubes of oral glucose
(cc) 1 box of exam gloves
(dd) 4 biohazard bags
(ee) 1 portable suction device
(ff) 1 basic life support jump kit for every 2 gathering medical providers
(gg) 1 automatic external defibrillator
(hh) 1 examination table, cot or bed.

(3) First aid stations shall afford privacy to a person receiving care or treatment.

(4) First aid stations shall be of sufficient size to accommodate the number of care givers required, and the predicted number of sick or injured persons.

(5) First aid stations shall be strategically located to provide expedient medical care for those attending or participating in the gathering.

(6) First aid stations shall be easily accessible by emergency vehicles. The operator shall provide the local licensed emergency medical services director(s) a map of the gathering site which includes location of first aid stations, emergency vehicle ingress and egress routes, landing zones (if applicable) and rendezvous locations.

(7) A first aid station shall be clearly marked and identifiable as a first aid station.

(8) At least two state-licensed or certified medical providers, such as an emergency medical technician, paramedic, nurse, physician's assistant or medical doctor shall be present to staff each first aid station. A gathering having more than 2,500 attendees shall have at least two additional emergency medical providers for each additional 5,000 attendees or fraction thereof. The health officer or local licensed emergency medical services agency director(s) may require additional emergency medical services personnel as deemed necessary because of the nature of the event, time of year, risk of injuries or other public health and safety needs.

(9) First aid stations shall be staffed by individuals meeting the following minimum requirements:

(a) is at least 18 years of age;

(b) has a current state license or certification showing competency to be an emergency medical technician, paramedic, nurse, physician's assistant or physician.

(10) The operator shall ensure that the medical staff have access to telephones or radios to contact outside emergency medical. The operator shall provide the local licensed emergency medical services director(s) the telephone numbers and radio frequencies for accessing the gathering medical providers.

(11) The local health officer or local licensed emergency medical services agency director may require the operator to provide dedicated stand-by ambulances and personnel at the gathering. The operator will be financially responsible for the costs of funding dedicated stand-by ambulances and personnel, but not for the costs of providing transportation services to individual patients.

(12) The operator shall ensure that the staff person in charge of the first aid station keeps accurate records of patients and treatment, and that the health officer is notified of all cases involving a serious injury or communicable disease in accordance with R386-702 Communicable Disease Rule and R386-703 Injury Reporting Rule.

(13) The operator shall ensure that the staff person in charge of the first aid station completes a Department approved pre-hospital care form showing all assistance given each person attended and that these forms are submitted to the Department within 72 hours following the gathering.

R392-400-13. Hazardous Conditions.

The operator shall develop contingency plans for dangerous conditions during the gathering. The plans may include evacuation, cancellation or delay of the gathering and provision for support facilities.

R392-400-14. Food Protection.

(1) The operator and vendors shall comply with R392-100 Food Service Sanitation.

(2) The operator shall assure that food vendors obtain required food service operating permits from the health officer.

R392-400-15. Safe Drinking Water Supply Requirements.

(1) The operator shall ensure that all drinking water is from a state-approved safe drinking water supply or bottled water approved by the Utah Department of Agriculture and Food.

(2) Safe drinking water hauled to the gathering shall be hauled and dispensed in a manner that protects public health as determined by the health officer.

(3) The operator shall provide and strategically locate drinking water stations to effectively meet the drinking water needs of attendees and staff. At least four drinking water stations are required. An additional drinking water station is required for each additional 150 attendees or fraction thereof, above 500 persons. The health officer may reduce the number of additional drinking water stations or require more than one drinking water station for each additional 150 attendees or fraction thereof above 500 persons because of the time of year, heat index, nature of the event or other public health related criteria. If containers are needed to drink the water at the required drinking water stations, the operator must provide single use containers.

R392-400-16. Wastewater Disposal Requirements.

(1) All wastewater shall discharge to a public wastewater treatment system unless no such system is available or practical for use as determined by the health officer.

(2) Where a public sewer is not available or practical for connection, wastewater shall discharge into a wastewater treatment system approved in accordance with State and local wastewater rules.

(3) The health officer may allow portable restroom facilities and wastewater holding tanks only where an approved sewer system is not available or practical for connection.

(4) The number of toilets and facilities shall be provided in accordance with the following Table.

TABLE

Minimum Numbers of Toilets Required

Average Time at Gathering (hours)

Peak Crowd	1	2	3	4	5
500	2	4	4	5	6
1000	4	6	8	8	9
2000	5	6	9	12	14
3000	6	9	12	16	20
4000	8	13	16	22	25
5000	12	15	20	25	31
6000	12	15	23	30	38
7000	12	18	26	35	44
8000	12	20	30	40	50
10000	15	25	38	50	63
12500	18	31	47	63	78
15000	20	38	56	75	94
17500	22	44	66	88	109

(a) If alcoholic beverages are consumed at the gathering, the operator shall increase the number of required toilets by 40%.

(b) For one year following the effective date of this rule the health officer may allow portable multi-urinal stations to substitute for up to 1/3 of the estimated men's portion of the required toilets.

(c) The operator shall provide a minimum of one toilet that is accessible by handicapped persons and at a rate of 5% of total toilets.

(d) Toilet facilities for men and women located in the same building and adjacent to each other shall be separated by an opaque, sound resistant wall. Direct line of sight from outside a toilet facility to the toilets and urinals shall be effectively obstructed.

(e) The operator shall locate portable toilets a minimum of 100 feet from any food service operation and not more than 300 feet from grand stand or spectator or from other areas of activity which pertain to the gathering, as outlined in the permit application. Where site conditions limit the placement of portable toilets, the health officer may allow exemptions to these distances.

(f) The operator shall provide working hand wash stations at a minimum rate of one per 10 portable toilets or portion thereof. The operator shall provide soap, water and single use towels at each hand wash station. Where conditions make the use of soap and water impractical, the health officer may allow sanitizing gel in place of soap and water. Sanitizing gel may not be used in place of soap and water at hand wash stations used by food service workers.

(g) The operator shall provide a minimum of one covered trash container for every 10 portable toilets or portion thereof.

(h) The operator or coordinator shall ensure that all portable toilets are of sound construction (such as non-absorbent polyethylene), easily cleanable, and durable.

(i) The tank capacity of each portable toilet shall not be less than 60 gallons. Chemicals used for sanitizing agents in portable toilets must be acceptable for use by the treatment facility accepting the sewage.

(j) Each portable toilet must be secured against vandalism and adverse weather conditions by tie downs, anchors or similar effective means.

(k) The operator shall contract with a liquid waste hauler that meets local health department requirements. The operator is exempt from this requirement if the operator is approved by the health officer as a liquid waste hauler and is identified as the liquid waste hauler for the gathering.

(i) the operator shall require in the contract with the liquid waste hauler that the hauler shall meet the requirements of this Subsection.

(ii) the liquid waste hauler shall have a written contract with a wastewater treatment facility indicating that the wastewater treatment facility will accept the wastewater.

(iii) the liquid waste hauler must manifest all disposal of liquid waste materials. The liquid waste hauler shall present the manifest to the health officer for the health officer's review upon request.

(l) The operator shall ensure that all wastewater is removed from each portable toilet at least once every 24 hours. On a case by case basis, the health officer may change this frequency because of the time of year, weather conditions, nature of the event or other public health related criteria. All wastewater removed shall be disposed of at a wastewater treatment facility in accordance with State and local wastewater disposal laws.

(m) Each portable toilet must be serviced and sanitized at time intervals that will maintain sanitary conditions of each toilet.

(n) At the conclusion of the gathering, each portable restroom unit must be serviced and removed within 48 hours. The health officer may extend or shorten this time because of the time of year, weather conditions, the nature of the event or to meet other public health needs.

R392-400-17. Penalty.

(1) Any person who violates any provision of this rule may

be assessed a penalty as provided in Subsection 26-23-6.

(2) Each day such violation is committed or permitted to continue shall constitute a separate violation.

(3) In addition to other penalties imposed, any person who violates any requirement of this rule shall be liable for all expenses incurred by the department and local health department in removing or abating any nuisance, source of filth, cause of sickness or infection, health hazard, or sanitation violation.

R392-400-18. Severability.

If a provision, clause, sentence, or paragraph of this rule or the application thereof to any person or circumstances shall be ruled invalid, such ruling shall not affect the other provisions or applications of this rule, and to this end the provisions of this rule are severable.

March 15, 2010 26-15-2
Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.
R392-401. Roadway Rest Stop Sanitation.
R392-401-1. Definitions.

Director - shall mean the Executive Director of the Utah Department of Health.

Roadway Rest Stop - shall mean any building, or buildings, or grounds, parking areas, including the necessary toilet, hand washing, water supply and wastewater facilities intended for the accommodation of people using such facilities while traveling on public roadways. It does not include scenic view or roadside picnic areas or other parking areas if these are properly identified as not offering public facilities.

Wastewater - shall mean discharges from all plumbing facilities such as rest rooms, kitchen, and laundry fixtures either separately or in combination.

R392-401-2. General.

2.1 It shall be the duty of each person operating a roadway rest stop in the State of Utah to carry out the provisions of these regulations.

2.2 Severability - If any provision of this code, or its application to any person or circumstances is declared invalid, the application of such provision to other persons or circumstances, and the remainder of this code, shall not be affected thereby.

2.3 Roadway rest stops shall be designed and constructed to provide adequate surface drainage and shall be isolated from any existing or potential health hazard or nuisance.

2.4 All applicable building, zoning, electrical, health, fire codes and all local ordinances shall be complied with.

R392-401-3. Water Supply.

3.1 Potable water supply systems for use in roadway rest stops shall meet the requirements of the State of Utah rules and regulations relating to public drinking water supplies.

3.2 In addition to the requirements of the rules and regulations relating to public drinking water supplies, the design of water system facilities shall be based on the suppliers engineer's estimates of water demands, but shall in no case be less than the following:

Source Capacity - 7 gallons per vehicle served during peak day (with flushometer valves).

Storage Volume - 3.5 gallons per vehicle served during peak day (with flushometer valves).

Distribution System Capacity shall maintain a water system pressure in excess of 20 psi at all points in the distribution system during peak hourly flow conditions. Non-community systems in remote areas can be exempted from this requirement, on a case-by-case basis, if flow from the system is always unregulated and free-flowing. The peak hourly flow shall be calculated on a per building basis for the number of fixture units as presented in the Utah Plumbing Code.

Other exceptions to the above requirements may be made as permitted by the State of Utah public drinking water rules.

3.2.1 The source and storage requirements as indicated above do not include water demands for outside use or fire protection. However, if the culinary system is intended to provide water for such uses, the water requirements indicated above must be appropriately increased. Specific information on watering requirements (e.g. area of land to be irrigated) must be provided for Department of Health review.

3.3 Construction of a public drinking water supply system intended to serve occupants of any roadway rest stop shall not commence until plans prepared by a licensed professional registered engineer (in accordance with Title 58, Chapter 22, Professional Engineers, and Land Surveyors Licensing Act) have been submitted to and approved in writing by the Utah Department of Environmental Quality. Following construction, the system may not be placed in service until a final inspection is made by a representative of the Utah Department of Environmental Quality or local health department having jurisdiction.

3.3.1 All systems must be monitored in accordance with the State of Utah public drinking water rules in cooperation with the local health department in that jurisdiction.

3.4 Any culinary system or portion thereof that is drained seasonally must be cleaned, flushed, and disinfected, and a water sample of satisfactory bacteriologic quality, i.e. a sample showing not more than one coliform bacteria per 100 ml sample, must be obtained before being placed into service.

3.5 In any roadway rest stop where it is not feasible to pipe water into the area, an alternate supply may be permitted upon approval of the Director or director of the local health department having jurisdiction.

R392-401-4. Wastewater.

4.1 All wastewater shall be discharged to a public sewer system where accessible and within 300 feet of the roadway rest stop property line.

4.2 Where connection to a public sewer is not available, wastewater shall be discharged into a wastewater disposal system meeting requirements of the Utah rules for waste disposal. Unless water usage rates are available, design shall be based on not less than five (5) gallons per day per vehicle.

4.3 All plans for the construction or alteration of a wastewater disposal system shall initially be submitted to the local health department having jurisdiction. Where plan approval is required by law to be provided by the State Department of Environmental Quality, such plans will be forwarded by the local authority along with any appropriate comments. Construction or alteration of the disposal system shall not commence until the plans have been approved in writing by the appropriate health agency.

R392-401-5. Plumbing.

5.1 Adequate plumbing fixtures shall be made available at all roadway rest stops. Water closets and lavatories shall be provided for each sex. The total number of fixtures required shall be based upon survey results conducted to determine traffic density and estimated rest stop use, assuming that one water closet will serve 9 vehicles per hour. Sanitary drinking fountains shall be provided for use at roadway rest stops except when otherwise determined by the Director or director of the local health department having jurisdiction. Common drinking cups are prohibited. A service sink shall be installed to facilitate cleanup procedures.

5.2 Where water cannot be made available, exceptions to the above requirements may be made upon approval of the Director or local health authorities having jurisdiction. Toilet facilities other than the water flush type may be installed when approved by the Director or local health authorities having jurisdiction.

5.3 Wherever toilet facilities for males and females are located in the same building, and adjacent to each other, they shall be separated by a sound-resistant wall. Direct line of sight to each rest room shall be effectively obstructed.

5.4 Soap and toilet tissue in suitable dispensers and individual towels or other approved hand drying facilities and suitable waste receptacles with lids should be provided in each rest room, except as provided in Section 5.2.

5.5 Plumbing fixtures which normally require water for their operation shall be supplied with an adequate potable water supply under pressure.

5.6 All plumbing installed in roadway rest stops shall comply with the provisions of the Utah Plumbing Code and applicable local plumbing codes.

R392-401-6. Solid Wastes.

6.1 All solid wastes originating in any roadway rest stop shall be stored in a sanitary manner in approved, watertight containers with lids, or the equivalent, approved by the local health department. The containers shall be conveniently located, and the contents shall be disposed of in a manner approved by the State or local health department having jurisdiction.

R392-401-7. Maintenance.

7.1 All buildings, equipment, facilities and ground surrounding them shall be maintained in a clean and operable condition.

7.2 All necessary means shall be employed to eliminate or control any infestations of insects and rodents within all parts of the roadway rest stop. This shall include effective screening or other approved control of outside openings in structures intended for public use.

1987 26-15-2
Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.

R392-402. Mobile Home Park Sanitation.

R392-402-1. Definitions.

Director - shall mean the Executive Director of the Utah Department of Health.

Mobile Home - shall mean a factory assembled structure or structures equipped with the necessary service connections and made so as to be readily movable as a unit or units on its (their) own running gear and designed to be used as a dwelling unit(s) without a permanent foundation*. A modular home transported on wheels to its foundation shall not be considered a mobile home.

Mobile Home Park - shall mean a parcel (or contiguous parcels) of land which has been so designed and improved that it contains three or more mobile home lots available to the general public for the placement thereon of mobile homes for occupancy.

Service Building** - shall mean a building housing toilets, lavatories, bathing facilities, a service sink, and may also include laundry and other accommodations as may be required. Comfort of the occupant is provided for by adequate heating, lighting and ventilation.

Wastewater - shall mean discharges from all plumbing facilities, such as rest rooms, kitchen and laundry fixtures either separately or in combination.

*The phrase "without a permanent foundation" indicates that the mobile support system is maintained with the intent that the unit may be moved at the convenience of the owner.

**See Service Building.

R392-402-2. General.

2.1 It shall be the duty of each person operating a mobile home park in the State of Utah to carry out the provisions of these regulations. Such person should also have the duty of controlling the conduct of park occupants to this end, and shall make at least one daily inspection of the entire mobile home park for these purposes.

2.2 Severability - If any provision of this code, or its application to any person or circumstance is declared invalid, the application of such provision to other persons or circumstances, and the remainder of this code, shall not be affected thereby.

2.3 Mobile home park sites shall be designed and constructed to provide adequate surface drainage, and shall be isolated from any existing or potential health hazard or nuisance.

2.4 All applicable building, zoning, electrical, health, fire codes and all local ordinances shall be complied with.

R392-402-3. Water Supplies.

3.1 Potable water supply systems for use by mobile home park occupants shall meet the requirements of the State of Utah rules and regulations relating to public drinking water supplies.

3.2 In addition to the requirements of the rules and regulations relating to public drinking water supplies, the design of water system facilities shall be based on the suppliers engineer's estimates, but shall in no case be less than the following:

Source Capacity - 800 gallons per day per mobile home unit, peak daily flow.

Storage Volume - 400 gallons per mobile home unit, average daily flow.

Distribution System Capacity - Shall maintain a water system pressure in excess of 20 psi at all points in the distribution system during peak hourly flow conditions. Non-community systems in remote areas can be exempted from this requirement, on a case-by-case basis, if flow from the system is always unregulated and free-flowing. The peak hourly flow requirements shall meet or exceed those shown on Fig. 3.1.

Other exceptions to the above requirements may be permitted on a case-by-case basis as permitted by the State of Utah public drinking water rules.

3.2.1 The source and storage requirements as indicated above do not include water demands for outside use or fire protection. However, if the culinary system is intended to provide water for such uses, the water requirements indicated above must be appropriately increased. Special information on watering requirements (e.g. area of land to be irrigated) must be provided for Department of Health review.

3.3 Construction of a public drinking water supply system intended to serve occupants of any mobile home park shall not commence until plans prepared by a licensed professional registered engineer (in accordance with Title 58, Chapter 22, Professional Engineers, and Land Surveyors Licensing Act) have been submitted to and approved in writing by the Utah Department of Environmental Quality. Following construction, the system may not be placed in service until a final inspection is made by a representative of the Utah Department of Environmental Quality or local health department having jurisdiction.

3.3.1 All systems must be monitored in accordance with the State of Utah public drinking water rules and in cooperation with the local department having jurisdiction.

3.4 Any culinary system or portion thereof that is drained seasonally must be cleaned, flushed, and disinfected prior to use. Furthermore, a water sample of satisfactory bacteriologic quality, i.e. a sample showing not more than one coliform bacteria per 100 ml sample, must be obtained before being placed into service.

3.4.1 Systems operated on a seasonal basis may be required to sample for bacteriologic analysis at an accelerated frequency as determined by the Director or director of the local health department having jurisdiction.

3.5 In any mobile home park, the following requirements shall apply:

3.5.1 Water service lines shall be made available to each mobile home space in accordance with the requirements of the Utah Plumbing Code and as further required in the following sections.

3.5.2 Shut-off valves on water connections for individual mobile homes shall be of the inverted key pattern stop-and-waste type or an approved anti-siphon yard hydrant.

3.5.3 Water connections serving individual mobile homes shall be at least 4 inches above the surrounding surface and shall be separated at least 5 feet horizontally from the sewer riser for such mobile homes. Water and sewer lines serving mobile home connections shall be separated at least 10 feet horizontally. Water and sewer lines may be installed closer, provided the following is adhered to:

3.5.3.1 The bottom of the water service pipe, at all points, shall be at least 18 inches above the top of the wastewater drainage line at its highest point, and in no instance less than 24 inches horizontal separation.

3.5.3.2 The water service pipe shall be placed on an undisturbed shelf excavated at one side of the common trench.

3.5.3.3 The number of joints in the service pipes shall be kept to a minimum. Materials and joints of both the water and sewer pipe shall be of a strength and durability, and so installed to prevent leakage under adverse conditions.

R392-401-4. Wastewater.

4.1 All wastewater shall be discharged to a public sewer system where accessible and within 300 feet of the mobile home park property line.

4.2 Where connection to a public sewer is not available, wastewater shall be discharged into a wastewater disposal system meeting requirements of the State of Utah rules for waste disposal. Unless water usage rates are available, design shall be

based on not less than 400 gallons per day per mobile home unit.

4.3 All plans for the construction or alteration of a wastewater disposal system shall initially be submitted to the local health department having jurisdiction. Where plan approval is required by law to be provided by the State Department of Environmental Quality, such plans will be forwarded by the local authority along with any appropriate comments. Construction or alteration of the disposal system shall not commence until the plans have been approved in writing by the appropriate health agency.

4.3.1 Sewer service shall be made available to each designated mobile home space in accordance with the State of Utah rules for waste disposal.

4.3.2 Sewer risers serving individual mobile homes shall be provided with tight covers when not in use.

4.3.3 A trap is prohibited between the sewer riser and sewer lateral.

4.3.4 The connection and connecting line between the mobile home drain outlet and the sewer riser shall be watertight and self-draining.

4.3.5 The rim of the sewer riser shall not extend more than 4 inches above adjacent ground surface elevations. Surface drainage shall be directed away from the sewer riser. (See also Section 3.5.3.)

R392-402-5. Plumbing, Service Building.

5.1 The minimum plumbing fixtures which shall be available to all park occupants are as follows:

TABLE

Plumbing Fixtures	Ratio of Plumbing Fixtures Per Number of Park Occupants*	
	Males	Females
Water Closets	1:50	1:25
Urinals	1:50	--
Lavatories	1:50	1:50
Shower**	1:35	1:35

*Or fraction thereof. The number of park occupants shall be calculated on the basis of 3.5 persons for each mobile home.

**Showers are optional, but if provided shall comply with the table. Water system requirements under Section 3.2 may be modified to compensate for the absence of showers upon approval of the Director.

Service Building

5.2 In any mobile home park which accepts patrons with dependent recreational vehicles or tents, adequate service building facilities shall be provided and shall meet the following requirements:

5.2.1 They shall be located not less than 15 feet and not more than 500 feet from any living spaces served.

5.2.2 They shall be of permanent construction, and be provided with adequate light, heat and ventilation.

5.2.3 They shall be properly maintained and operated with interiors of smooth, moisture resistant materials, to permit frequent washing and cleaning.

5.2.4 They shall be adequately equipped with lavatories and with flush type toilet fixtures to serve all mobile home parking spaces not otherwise provided with such facilities.

5.3 All plumbing in mobile home parks shall comply with provisions of the Utah Plumbing Code, and applicable local plumbing codes. (This section does not apply to individual mobile homes per se.)

5.4 Plumbing fixtures which normally require water for their operation shall be supplied with adequate potable water supply under pressure.

R392-402-6. Operation and Maintenance.

6.1 All buildings, rooms and equipment in service buildings and the grounds surrounding them shall be maintained in a clean and operable condition.

6.2 All necessary means shall be employed to eliminate or control any infestations of insects and rodents within all parts of any mobile home park. This shall include adequate screening, skirting, or other approved control of outside openings in structures intended for occupancy or for food storage.

6.3 Whenever provisions are made for the accommodation of any recreational vehicles, such as travel trailers, camp trailers, truck campers or motor homes, in any mobile home park, such accommodations must conform to the requirements of R392-301.

R392-402-7. Solid Wastes.

7.1 Solid wastes, originating in any mobile home park, shall be stored in a sanitary manner in approved, watertight containers with lids, or the equivalent, approved by the local health department. The containers shall be conveniently located and the contents shall be disposed of in a manner approved by the state or local health department having jurisdiction.

R392-402-8. Swimming Pools.

8.1 Any swimming pool, wading pool or therapy pool made available to occupants of a mobile home park shall comply with R392-302 and with applicable local regulations.

KEY: public health, mobile homes
1987 26-15-2
Notice of Continuation January 20, 2012

R392. Health, Disease Control and Prevention, Environmental Services.
R392-501. Labor Camp Sanitation.
R392-501-1. Definitions.

Director - shall mean the Executive Director of the Utah Department of Health.

Labor Camp shall mean one or more buildings, structures, tents or related facilities together with surrounding grounds set aside for use as living quarters for groups of migrant laborers or temporary housing facilities intended to accommodate construction, mining or demolition workers, etc.

Service Building - shall mean a building housing toilets, lavatories, bathing facilities, a service sink, and may also include laundry and such other facilities as may be required.

Wastewater - shall mean discharges from all plumbing facilities such as rest rooms, kitchen, and laundry fixtures, either separately or in combination.

R392-501-2. General.

2.1 It shall be the duty of each person operating a labor camp in the State of Utah to carry out the provisions of these regulations. Such person should also have the duty of controlling the conduct of camp occupants to this end, and should make at least one daily inspection of the entire camp while in operation, for these purposes. All camp toilet and washroom facilities shall be inspected as necessary.

2.2 Severability - If any provision of this code, or its application to any person or circumstance is declared invalid, the application of such provision to other persons or circumstances, and the remainder of this code, shall not be affected thereby.

2.3 All applicable building, zoning, electrical, health, fire, and animal control codes and all local ordinances must be complied with.

2.4 Labor camp sites shall be constructed to provide adequate surface drainage and shall be isolated at least 100 feet from barnyards, corrals and any existing or potential health hazard or nuisance.

R392-501-3. Water Supply.

3.1 Potable water supply systems for labor camp occupants shall meet the requirements of the State of Utah rules and regulations relating to public drinking water supplies.

3.2 In addition to the requirements of the rules and regulations relating to public drinking water supplies, the design of water system facilities shall be based on the suppliers engineer's estimates of water demands, but shall in no case be less than the following:

Source Capacity -50 gallons per day per person.

Storage Volume - 25 gallons per person.

Distribution System Capacity shall maintain a water system pressure in excess of 20 psi at all points in the distribution system during peak hourly flow conditions. Non-community systems in remote areas can be exempted from this requirement, on a case-by-case basis, if flow from the system is always unregulated and free-flowing. The peak hourly flow should be calculated for the number of fixture units presented in the Utah Plumbing Code.

Other exceptions to the above requirements may be permitted on a case-by-case basis as permitted by the State of Utah public drinking water rules.

3.2.1 The source and storage requirements as indicated above do not include water demands for outside use or fire protection. However, if the culinary system is intended to provide water for such uses, the water requirements indicated above must be appropriately increased. Specific information on watering requirements (e.g. area of land to be irrigated) must be provided for Department of Health review.

3.3 Construction of a public drinking water supply system intended to serve occupants of any labor camp shall not commence until plans prepared by a licensed professional registered engineer (in accordance with Title 58, Chapter 22, Professional Engineers, and Land Surveyors Licensing Act) have been submitted to and approved in writing by the Utah Department of Environmental Quality. Following construction, the system may not be placed in service until a final inspection is made by a representative of the Utah Department of Environmental Quality or local health department having jurisdiction.

3.3.1 All systems must be monitored in accordance with the State of Utah public drinking water rules, and in cooperation with the local health department having jurisdiction.

3.4 Any culinary system or portion thereof that is drained seasonally must be cleaned, flushed, and disinfected prior to use. Furthermore, a water sample of satisfactory bacteriologic quality, i.e. a sample showing not more than one coliform bacteria per 100 ml sample must be obtained before being placed into service.

3.4.1 Systems operated on a seasonal basis may be required to sample for bacteriologic analysis at an accelerated frequency as determined by the Director or director of the local health department having jurisdiction.

3.5 In any labor camp where it is infeasible to pipe water into the area, an alternate supply may be permitted upon approval of the Director or director of the local health department having jurisdiction.

R392-501-4. Wastewater Disposal.

4.1 All wastewater shall be discharged to a public sewer system where accessible and within 300 feet of the labor camp property line.

4.2 Where connection to a public sewer is not available, wastewater shall be discharged into a wastewater disposal system meeting requirements of the State of Utah rules for waste disposal. Unless water usage rates are available, design shall be based on not less than 50 gallons per day per person.

4.3 All plans for the construction or alteration of a wastewater disposal system shall initially be submitted to the local health department having jurisdiction. Where plan approval is required by law to be provided by the State Department of Environmental Quality, such plans will be forwarded by the local authority along with any appropriate comments. Construction or alteration of the disposal system shall not commence until the plans have been approved in writing by the appropriate health agency.

R392-501-5. Plumbing.

5.1 Adequate plumbing fixtures shall be available to all labor camp occupants as required below:

5.2 Wherever toilet facilities for males and females are located in the same building, and adjacent to each other, they shall be separated by a sound-resistant wall. Direct line of sight to each rest room entrance shall be effectively obstructed.

5.3 Soap and toilet tissue in suitable dispensers, and individual towels or other approved hand drying facilities shall be provided in rest rooms. The use of common towels in connection with such facilities is prohibited except in single-family quarters.

5.4 Suitable waste receptacles with lids shall be provided for each rest room.

5.5 Plumbing fixtures which normally require water for their operation shall be supplied with an adequate potable water supply under pressure. Water will be provided for showers and lavatories at a minimum temperature of 90 degrees F.

5.6 In camps where dormitory type facilities are provided or where individual family units are not plumbed, sanitary type drinking fountains shall be conveniently located.

5.7 All service buildings shall:

5.7.1 Be located not less than 15 feet and not more than 500 feet from any sleeping quarters served.

5.7.2 Where practical, be of permanent construction, and be provided with adequate light, heat and ventilation.

5.7.3 Have interiors of smooth, moisture-resistant material, to permit frequent washing and cleaning.

5.7.4 Have all outer openings effectively screened.

5.7.5 Where electric power is available, service buildings shall be provided with outside lighting to indicate the location and entrance doorways of each.

5.8 Where water cannot be made available, exceptions to the above requirements may be granted upon approval of the Director or local health authorities having jurisdiction. Separate facilities for men and women are not required in single-family quarters.

5.9 All plumbing in labor camps shall comply with provisions of the Utah Plumbing Code, and applicable local plumbing codes.

5.10 Essential laundering facilities shall be available to camp occupants and if included as part of the labor camp facilities, shall provide for each 40 occupants, or fraction thereof, at least one laundry tray, washtub, or washing machine served with an adequate supply of water.

R392-501-6. Maintenance.

6.1 All buildings, rooms and equipment and the grounds surrounding them shall be maintained in a clean and operable condition and be protected from rubbish accumulation.

6.2 All necessary means shall be employed to eliminate and control any infestations of insects and rodents within all parts of any labor camp. This shall include approved screening or other control of outside openings in structures intended for occupancy or food service facilities.

6.3 Each structure made available for occupancy shall be of sound construction, shall assure adequate protection against weather, and shall include essential facilities to permit maintenance in a clean and operable condition. Comfort and safety of occupants shall be provided for by adequate heating, lighting, ventilation or insulation when necessary to reduce excessive heat. Total window area in permanent structures should be equal to at least 10 percent and in no case less than 5 percent of the floor area. Windows shall be openable or mechanical ventilation must be provided.

6.4 Each structure made available for occupancy shall comply with the requirements of the Uniform Building Code. This section shall not apply to tent camps.

6.5 In dormitory type facilities, beds shall be separated by a horizontal distance of at least five (5) feet, reducible to three (3) feet if beds are alternated head to foot, except in the case of double deck bunks, which shall have a minimum horizontal separation of six (6) feet under all circumstances. If suitable permanent partitions are installed between beds, spacing requirements may be modified upon approval of the Director or director of the local health department having jurisdiction.

6.6 Each bed, bunk, cot or other sleeping facility for use by occupants shall be maintained in a sanitary condition. Mattresses, mattress covers, quilts, blankets, pillows, pillow slips, sheets, comforters, and other bedding shall be kept clean and in good repair. Bedding shall be made available to each occupant not furnishing his own. Pillows shall have pillow slips and sheets shall be large enough to completely cover mattresses. Bedding shall be changed daily or in between occupant use.

6.7 Floors, walls and ceilings in permanent and semi-permanent structures shall be of smooth, nonabsorbent, easily cleanable materials, kept clean and in good repair.

6.8 All combustion type room heating devices shall be supplied with proper vent pipes. Gas-fired facilities shall meet standards of the American Gas Association.

R392-501-7. Food Service.

7.1 All food, food service employees, ice, vending machines, food storage, preparation and serving facilities made available by the camp management except those restricted to individual or single-family quarters shall comply with R392-100.

7.2 Where occupant is permitted or required to cook his own food, a space for kitchen facilities shall be provided, and shall be equipped with a cooking stove in good working order and with adequate and sufficient fuel, a kitchen sink, a refrigerator and convenient storage space for food and necessary utensils. All food items provided by camp management shall be wholesome and suitable for human consumption.

R392-501-8. Solid Wastes.

8.1 Solid wastes originating in any labor camp shall be stored in a sanitary manner, in watertight containers with lids, or the equivalent, approved by the local health department. The containers shall be conveniently located and the contents shall be disposed of in a manner approved by the state or local health department having jurisdiction.

1987 26-15-2
Notice of Continuation January 20, 2012

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-2A. Inpatient Hospital Services.
R414-2A-1. Introduction and Authority.

This rule defines the scope of inpatient hospital services that are available to Medicaid clients for the treatment of disorders other than mental disease. This rule is authorized under Section 26-18-3 and governs the services allowed under 42 CFR 440.10.

R414-2A-2. Definitions.

(1) "Admission" means the acceptance of a Medicaid client for inpatient hospital services.

(2) "Diagnosis Related Group (DRG)" is the CMS-coding that determines reimbursement for the resources that a hospital uses to treat a client with a specific diagnosis or medical need and is further described in Section R414-2A-9 of this rule.

(3) "Hyperbaric Oxygen Therapy" is therapy that places the patient in an enclosed pressure chamber for medical treatment.

(4) "Inpatient" is an individual whose severity of illness and intensity of service requires continuous care in a hospital, as noted by InterQual Criteria as noted in Section R414-1-12.

(5) "Inpatient Hospital Services" are services that a hospital provides for the care and treatment of inpatients with disorders other than mental illness, under the direction of a physician or other practitioner of the healing arts.

(6) "Leave of Absence" from an inpatient facility is a patient's absence for therapeutic or rehabilitative purposes where the patient does not return by midnight of the same day.

(7) "Observation" means monitoring a patient to evaluate the patient's condition, symptoms, diagnosis, or appropriateness of inpatient admission.

(8) "Other Practitioner of the Healing Arts" means a doctor of dental surgery or a podiatrist.

(9) "Prepaid Mental Health Plan" means the prepaid, capitated program through which the Department pays contracted community mental health centers to provide all needed inpatient and outpatient mental health services to residents of the community mental health center's catchment area who are enrolled in the plan.

R414-2A-3. Client Eligibility Requirements.

Inpatient hospital services are available to categorically and medically needy individuals who are under the care of a physician or other practitioner of the healing arts.

R414-2A-4. Hospital Admission Requirements.

(1) Each hospital providing inpatient services must have a utilization review plan as described in 42 CFR 482.30.

(2) The attending physician or other practitioner of the healing arts must sign a physician acknowledgement statement that meets the requirements of 42 CFR 412.46.

(3) For psychiatric patients, the attending physician must certify and recertify the need for inpatient psychiatric services as described in 42 CFR 441.152.

R414-2A-5. Prepaid Mental Health Plan.

A Medicaid client residing in a county for which a prepaid mental health contractor provides mental health services must obtain authorization for inpatient psychiatric services from the prepaid mental health contractor for the client's county of residence.

R414-2A-6. Service Coverage.

(1) Inpatient hospital services encompass all medically necessary and therapeutic medical services and supplies that the physician or other practitioner of the healing arts orders that are appropriate for the diagnosis and treatment of a patient's illness.

(2) The Department does not pay for physician services rendered by a non-Medicaid provider.

(3) Diagnostic services performed by the admitting hospital or by an entity wholly owned or operated by the hospital within three days prior to the date of admission to the hospital, are inpatient services.

(4) Medical supplies, appliances, drugs, and equipment required for the care and treatment of a client during an inpatient stay are reimbursed as part of payment under the DRG.

(5) Services associated with pregnancy, labor, and vaginal or C-section delivery are reimbursed as inpatient service as part of payment under the DRG, even if the stay is less than 24 hours

(6) Services provided to an inpatient that could be provided on an outpatient basis are reimbursed as part of payment under the DRG.

(7) Inpatient hospital psychiatric services are available only to clients not residing in a county covered by a prepaid mental health plan.

R414-2A-7. Limitations.

(1) Inpatient admissions for 24 hours or more solely for observation or diagnostic evaluation do not qualify for reimbursement under the DRG system.

(2) Inpatient hospital care for treatment of alcoholism or drug dependency is limited to medical treatment of symptoms associated with drug or alcohol detoxification.

(3) Abortion procedures must first be reviewed and preauthorized by the Department as meeting the requirements of Section 26-18-4 and 42 CFR 441.203.

(4) Sterilization and hysterectomy procedures must first be reviewed and preauthorized by the Department as meeting the requirements of 42 CFR 441, Subpart F.

(5) Organ transplant services are governed by Rule R414-10A, Transplant Services Standards.

(6) Take home supplies, dressings, non-rental durable medical equipment, and drugs are reimbursed as part of payment under the DRG.

(7) Hyperbaric oxygen therapy is limited to service in a facility in which the hyperbaric unit is accredited by the Undersea and Hyperbaric Medical Society.

(8) Inpatient services solely for pain management do not qualify for reimbursement under the DRG system. Pain management is adjunct to other Medicaid services.

(9) Medicaid does not cover inpatient admissions for the treatment of eating disorders.

(10) Physician services provided by a physician who is paid by a hospital are inpatient services reimbursed as part of payment billed on a 1500 form. Payment for physician services provided by providers who are not paid by the hospital is governed by Rule R414-10.

(11) Inpatient rehabilitation services must first be reviewed and preauthorized.

(12) Inpatient psychiatric services not covered by mental health contractual agreements must first be reviewed and preauthorized by the Department to assure that the admission meets the requirements of 42 CFR 412.27 and Part 441, Subpart D.

R414-2A-8. Coinsurance.

Each Medicaid client is responsible for a coinsurance payment as established in the Utah State Medicaid Plan and incorporated by reference in Rule R414-1.

R414-2A-9. Reimbursement Methodology.

(1) Payments for inpatient hospital services are paid on a prospectively determined amount for each qualifying patient discharge under a Diagnosis Related Group (DRG) system. DRG weights are established to recognize the relative amount of resources consumed to treat a particular type of patient. The

DRG classification scheme assigns each hospital patient to one of over 500 categories or DRGs based on the patient's diagnosis, age and sex, surgical procedures performed, complicating conditions, and discharge status. Each DRG is assigned a weighting factor which reflects the quantity and type of hospital services generally needed to treat a patient with that condition. A preset reimbursement is assigned to each DRG. The DRG system allows for outliers for those discharges that have significant variance from the norm.

(2) For purposes of reimbursement, the day of admission is counted as a full day and the day of discharge is not counted.

(3) When a patient receives SNF-level, ICF-level, or other sub-acute care in an acute-care hospital or in a hospital with swing-bed approval, payment is made at the swing-bed rate.

(4) Reimbursement for services in the emergency department is limited to codes and diagnoses that are medically necessary emergency services. The provider manual lists appropriate emergency codes. The provider must list the discharge diagnosis on the claim form as one of the first five diagnoses.

(5) If a patient is readmitted for the same or a similar diagnosis within 30 days of a discharge, the Department may review and evaluate both claims to determine if, based on severity of illness and intensity of service, the claims should be combined into a single DRG payment or paid separately. Cost effectiveness may also be part of this determination but is not a primary factor.

(6) Exceptions to the 30-day readmission policy must still meet the severity of illness requirements for the allowance of a second DRG payment and are limited to:

(a) pregnancy;

(b) chemotherapy; and

(c) hyperbilirubinemia appearing in newborn infants within the first week of life.

(7) The Department pays for physician interpretation of laboratory services separately from the DRG payment. Laboratory technical services are included within the DRG for the inpatient admission.

(8) If an observation stay meets the intensity and severity for inpatient hospitalization, the patient becomes an inpatient and the observation services are reimbursed as part of payment under the DRG.

KEY: Medicaid
January 11, 2012 **26-1-5**
Notice of Continuation November 8, 2007 **26-18-3**
26-18-3.5

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-7C. Alternative Remedies for Nursing Facilities.
R414-7C-1. Authority and Purpose.

(1) The department conducts on-site inspections of nursing facilities to determine compliance with state and federal Medicaid standards. When the department finds that a nursing facility is out of compliance with requirements of participation, the department may apply remedies to eliminate deficiencies and bring the facility into compliance.

(2) Authority to apply the remedies described in this section is defined in the federal Omnibus Budget Reconciliation Act (OBRA) of 1987 (P.L. 100-203), which mandates compliance with requirements of participation for the Medicaid program, and in Section 26-18-3 of the Utah Code Annotated 1953. Section 1919(h) of the Social Security Act specifies remedies available to a state when a skilled nursing facility (SNF) or nursing facility (NF) is out of compliance with the requirements for participation in the Medicaid program. This section requires the state to ensure prompt compliance, and it further specifies that the available remedies are in addition to other remedies available under state or federal law and, except for fines, are imposed prior to the conduct of a hearing.

(3) This rule establishes criteria for the imposition of remedies authorized by statute.

(4) The department adopts and incorporates by reference the regulations in 42 CFR, Part 488-Survey, Certification, and Enforcement Procedures, as amended in the Federal Register for November 10, 1994, 59 FR 56237.

R414-7C-2. Civil Fines.

(1) Interest shall be assessed on the unpaid balance of the fine, beginning on the due date. The interest rate charged shall be the average of the bond equivalent of the weekly 90-day U.S. treasury bill auction rates during the period for which interest will be charged.

(2) Disposition of Fines Collected.

(a) The department shall deposit fines and corresponding interest collected from Medicaid certified facilities in the General Fund in accordance with Section 26-18-3(5).

(b) Fines collected by the department must be applied in accordance with Section 1919 of the act for the protection of the health and property of residents.

Notice of Continuation January 24, 2012 **26-1-5**
26-18-3

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-10. Physician Services.
R414-10-1. Introduction and Authority.

(1) The Physician Services Program provides a scope of physician services to meet the basic medical needs of eligible Medicaid recipients. It encompasses the art and science of caring for those who are ill through the practice of medicine or osteopathy defined in Title 58, Chapter 12, UCA.

(2) Physician services are a mandatory Medicaid, Title XIX, program authorized by Sections 1901 and 1905(a)(1) of the Social Security Act, 42 CFR 440.50, October 1996 edition, and Sections 26-1-5 and 26-18-3, UCA.

R414-10-2. Definitions.

In addition to the definitions in R414-1, the following definitions apply to this rule:

(1) "Childhood health evaluation and care" (CHEC) means the Utah-specific term for the federally mandated program of early and periodic screening, diagnosis, and treatment for children under the age of 21.

(2) "Client" means an individual eligible to receive covered Medicaid services from an enrolled Medicaid provider.

(3) "Clinical Laboratory Improvement Amendments" (CLIA) means the federal Health Care Financing Administration program that limits reimbursement for laboratory services based on the equipment and capability of the physician or laboratory to provide an appropriate, competent level of laboratory service.

(4) "Cognitive services" means non-invasive diagnostic, therapeutic, or preventive office visits, hospital visits, therapy, and related nonsurgical services.

(5) "Covered Medicaid service" means service available to the eligible Medicaid client within the constraints of Medicaid policy and criteria for approval of service.

(6) "Current Procedural Terminology" (CPT) means the manual published by the American Medical Association that provides a systematic listing and coding of procedures and services performed by physicians and simplifies the reporting of services, which is adopted and incorporated by reference. Some limitations are addressed in R414-26.

(7) "Early and periodic screening, diagnosis, and treatment" (EPSDT) means the federally mandated program for children under the age of 21.

(8) "Family planning" means diagnosis, treatment, medications, supplies, devices, and related counseling in family planning methods to prevent or delay pregnancy.

(9) "Health Common Procedures Coding System" (HCPCS) means a system mandated by the Health Care Financing Administration to code procedures and services. This system utilizes the CPT Manual for physicians, and individually developed service codes and definitions for nonphysician providers. The coding system is used to provide consistency in determining payment for services provided by physicians and noninstitutional providers.

(10) "Intensive, inpatient hospital rehabilitation service" means an intense rehabilitation program provided in an acute care general hospital through the services of a multidisciplinary, coordinated, team approach directed toward improving the ability of the patient to function.

(11) "Package surgical procedures" means preoperative office visits and preparation, the operation, local infiltration, topical or regional anesthesia when used, and the normal, uncomplicated follow-up care extending up to six weeks post-surgery.

(12) "Patient" means an individual who is receiving covered professional services provided or directed by a licensed practitioner of the healing arts enrolled as a Medicaid provider.

(13) "Personal supervision" means the critical observation and guidance of medical services by a physician of a nonphysician's activities within that nonphysician's licensed scope of practice.

(14) "Physician services," whether furnished in the office, the recipient's home, a hospital, a skilled nursing facility, or elsewhere, means services provided:

(a) within the scope of practice of medicine or osteopathy; and

(b) by or under the personal supervision of an individual licensed to practice medicine or osteopathy.

(15) "Prior authorization" means the required approval for provision of a service, that the provider must obtain from the Department before providing that service.

(16) "Professional component" means that part of laboratory or radiology service that may be provided only by a physician capable of analyzing a procedure or service and providing a written report of findings.

(17) "Provider" means an entity or a licensed practitioner of the healing arts providing approved Medicaid services to patients under a provider agreement with the Department.

(18) "Services" means the types of medical assistance specified in Sections 1905(a)(1) through (25) of the Social Security Act and interpreted in 42 CFR 440, October 1996 edition, which are adopted and incorporated by reference.

(19) "Technical component" means that part of laboratory or radiology service necessary to secure a specimen and prepare it for analysis, or to take an x-ray and prepare it for reading and interpretation.

R414-10-3. Client Eligibility Requirements.

Physician services are available to categorically and medically needy eligible individuals.

R414-10-4. Program Access Requirements.

(1) Physician services are available only from a physician who meets all requirements necessary to participate in the Utah Medicaid Program and who has signed a provider agreement.

(2) Physician services are available only from a physician who renders medically necessary physician services in accordance with his specific provider agreement and with Department rules.

(3) An eligible Medicaid client may seek physician services from:

(a) a physician in private practice who is an enrolled Medicaid provider;

(b) a Health Maintenance Organization (HMO) that has a contract with the Department;

(c) a federally qualified community health center; or

(d) any other organized practice setting recognized by the Department for providing physician services.

R414-10-5. Service Coverage.

(1) Physician services involve direct patient care and securing and supervising appropriate diagnostic ancillary tests or services in order to diagnose the existence, nature, or extent of illness, injury, or disability. In addition, physician services involve establishing a course of medically necessary treatment designed to prevent or minimize the adverse effects of human disease, pain, illness, injury, infirmity, deformity, or other impairments to a client's physical or mental health.

(2) Physician services may be provided only within the parameters of accepted medical practice and are subject to limitations and exclusions established by the Department on the basis of medical necessity, appropriateness, and utilization control considerations.

(3) Program limitations and noncovered services are established by specific program policy maintained in the Physician Provider Manual and updated by notification through Medicaid Information Bulletins. Following is a general list of medical and health care services excluded from coverage:

(a) Services rendered during a period the recipient was ineligible for Medicaid;

(b) Services medically unnecessary or unreasonable;

(c) Services which fail to meet existing standards of professional practice, or which are currently professionally unacceptable;

(d) Services requiring prior authorization, but for which such authorization was not received;

(e) Services, elective in nature, based on patient request or individual preference rather than medical necessity;

(f) Services fraudulently claimed;

(g) Services which represent abuse or overuse;

(h) Services rejected or disallowed by Medicare when the rejection was based upon any of the reasons listed above.

(i) Services for which third party payors are primarily responsible, e.g., Medicare, private health insurance, liability insurance. Medicaid may make a partial payment up to the Medicaid maximum if the limit has not been reached by a third party.

(j) If a procedure or service is not covered for any of the above reasons or because of specific policy exclusion, all related services and supplies, including institutional costs, are excluded for the standard post operative recovery period.

(4) Experimental or medically unproven physician services or procedures are excluded from coverage. Criteria established and approved by the Department staff and physician consultants are used to identify noncovered services and procedures. Policy statements developed by the Department of Health and Human Services, Health Care Financing Administration, Coverage Issues Bureau, are also used to determine Department policy for noncovered services.

(5) Certain services are excluded from coverage because medical necessity, appropriate utilization, and cost effectiveness of the services cannot be assured. A variety of lifestyle factors contribute to the "syndromes" associated with such services, and there is no specific therapy or treatment identified except for those that border on behavior modification, experimental, or unproven practices. Services include:

(a) Sleep apnea or sleep studies, or both;

(b) pain clinics; and

(c) Eating disorders clinics.

(6) When a service or procedure does not qualify for coverage under the Medicaid program because it is an elective cosmetic, reconstructive, or plastic surgery, all related services, supplies, and institutional costs are excluded from coverage.

(7) Medications for appetite suppression, surgical procedures, unproven or experimental treatments, or educational, nutritional support programs for the treatment of obesity or weight control, are excluded from coverage.

(8) Cognitive or Office Services:

(a) Cognitive services by a provider are limited to one service per client per day. These services are defined as office visits, hospital visits except for those following a package surgical procedure, therapy visits, and other types of nonsurgical services. When a second office visit for the same problem or a hospital admission occurs on the same date as another service, the physician shall combine the services as one service and select a procedure code that indicates the overall care given.

(b) Routine physical examinations, not part of an otherwise medically necessary service, are excluded from coverage, except in the following circumstances:

(i) Preschool and school age children, including those who are EPSDT (CHEC) eligible, participating in the ongoing CHEC program of scheduled services and follow-up care.

(ii) New patients seeing a physician for the first time with an initial complaint where a comprehensive physical examination, including a medical and social history, is necessary.

(iii) Medically necessary examinations associated with birth control medication, devices, and instructions.

(c) Family planning services may be provided only by or under the supervision of a physician and only to individuals of childbearing age, including sexually active minors. The following services are excluded from coverage as family planning services:

(i) Experimental or unproven medical procedures, practices, or medication.

(ii) Surgical procedures for the reversal of previous elective sterilization, both male and female.

(iii) Infertility studies.

(iv) In-vitro fertilization.

(v) Artificial insemination.

(vi) Surrogate motherhood, including all services, tests, and related charges.

(vii) Abortion, except where the life of the mother would be endangered if the fetus were carried to term, or where pregnancy is the result of rape or incest.

(d) After-hours service codes may be used only by a private physician, primary care provider, who responds to treat a patient in the physician's private office for a medical emergency, accident, or injury after regular office hours. Only one of the after hours CPT codes may be used per visit.

(e) Laboratory services provided by a physician in his office are limited to the waived tests or those types of laboratory tests identified by the federal Health Care Financing Administration for which each individual physician is CLIA certified to provide, bill, and receive Medicaid payment.

(f) A specimen collection fee is covered for service in a physician's office only when a specimen is to be sent to an outside laboratory, and the physician or one of his office staff under his personal supervision actually extracts the specimen from a patient, and only by one of the following tasks:

(i) Drawing a blood sample through venipuncture, i.e., inserting into a vein a needle with syringe or vacutainer to draw the specimen; or

(ii) Collecting a urine sample by catheterization.

(iii) A drawing fee for finger, heel, or ear sticks is limited to only infants under the age of two years.

(g) Eye examinations are covered, but only once each calendar year.

(h) Contact lenses are covered only for aphakia, nystagmus, keratoconus, severe corneal distortion, cataract surgery, and in those cases where visual acuity cannot be corrected to at least 20/70 in the better eye.

(9) Psychiatric Services:

(a) Psychiatric services or psychosocial diagnosis and counseling are specialty medical services. Psychiatric services, whether in a private office, a group practice, or private clinic setting, may only be provided directly and documented and billed to the Department by the private physician. Charting and documentation must clearly reflect the private physician's direct provision of care.

(b) Nonphysician psychosocial counseling services are excluded from coverage as a Medicaid benefit. The personal supervision policy, R414-45, may not be applied to psychiatric services.

(c) Admission to a general hospital for psychiatric care by a physician requires prior authorization and is limited to those cases determined by established criteria and utilization review standards to be of a severity that appropriate intensity of service cannot be provided in any alternate setting.

(d) Coverage for treatment of organic brain disease is limited to that provided by the primary care provider.

(10) Laboratory and Radiology Services:

(a) Physicians prepared in a highly specialized field of practice, e.g., neurology or neurosurgery, who provide consultation and diagnostic radiology services in an independent setting at the request of a private physician may bill

for both the technical and professional component of the radiology service.

(b) Dermatologists with specialized preparation in pathology services specifically for the skin may provide and bill for those services.

(11) Hospital Services:

(a) A patient hospitalized for nonsurgical services may require more than one visit per day because of the patient's condition and treatment needs. Since physician visits are limited to one per day, the physician shall select one procedure code to define the overall care given. If intensive care services are provided, or critical care service codes are used to define service provided, the Department requires additional documentation from the physician. The medical record must show documentation of medical necessity and result of the additional service.

(b) If, for the convenience of the physician and not for medical necessity, a patient is transferred between physicians within the same hospital or from one hospital to another hospital, both physicians may only use subsequent hospital care service codes to define and bill for services provided. Under this policy limitation, services associated with the following codes are excluded from coverage as a Medicaid benefit:

(i) Consultation; and

(ii) Initial hospital care services.

(c) Treatment of alcoholism or drug dependency in an inpatient setting is limited to acute care for detoxification only.

(d) Services for pregnant women who do not meet United States residency requirements (undocumented aliens) are limited to only hospital admission for labor and delivery. Medicaid does not cover prenatal services.

(12) Abortion, Sterilization and Hysterectomy:

(a) Abortion procedures are limited to:

(i) those where the pregnancy is the result of rape or incest; or

(ii) a case with medical certification of necessity where a woman suffers from a physical disorder, physical injury, or physical illness, including a life-endangering physical condition caused by or arising from the pregnancy itself that would, as certified by a physician, place the woman in danger of death unless an abortion is performed.

(b) Sterilization and hysterectomy procedures are limited to those which meet the requirements of 42 CFR 441, Subpart F, October 1996 edition, which is adopted and incorporated by reference.

(13) Cosmetic, Plastic, or Reconstructive Services:

(a) Cosmetic, plastic, or reconstructive surgery procedures may only be covered when medically necessary to:

(i) correct a congenital anomaly;

(ii) restore body form or function following an accidental injury; or

(iii) revise severe disfiguring and extensive scarring resulting from neoplastic surgery.

(14) Surgical Services:

(a) Surgical procedures defined and coded in the CPT Manual are limited by Utah Medicaid policy to prior authorization, or are excluded from coverage. Limitations are documented on the Medical and Surgical Procedures Prior Authorization List, reviewed and revised yearly and maintained in the Physician Provider Manual through notification by Provider Bulletins.

(b) Surgical procedures are "package" services. The package service includes:

(i) the preoperative examination, initiation of the hospital record, and development of a treatment program either in the physician's office on the day before admission, or in the hospital or the physician's office on the same day as admission to the hospital;

(ii) the operation;

(iii) any topical, local, or regional anesthesia; and

(iv) the normal, uncomplicated follow-up care covering the period of hospitalization and office follow-up for progress checks or any service directly related to the surgical procedure for up to six weeks post surgery.

(c) Interpretation of "package" services:

(i) A physician may not bill for an office visit the day prior to surgery, for preadmission or admission workup, or for subsequent hospital care while the patient is being prepared, hospitalized, or under care for a "package" surgical service.

(ii) Consultation services may be billed by the consulting physician only when consultation and no other service is provided. When a consulting physician admits and follows a patient, independently or concurrently with the primary physician, only admission codes and subsequent care codes may be used.

(iii) Office visits for up to six weeks following the hospitalization which relate to the same diagnosis are part of the "package" service. The only exception to either inpatient or office service is for service related to complications, exacerbations, or recurrence of other diseases or problems requiring additional or separate service.

(d) Procedures exempt from the "package" definition are identified in the CPT Manual by an asterisk. The CPT Manual outlines the surgical guidelines which apply to documentation and billing of procedures marked by an asterisk.

(e) Complications, exacerbations, recurrence, or the presence of other diseases or injuries requiring services concurrent with the initial surgical procedure during the listed period of normal follow-up care, may warrant additional charges only when the record shows extensive documentation and justification of additional services.

(f) When an additional surgical procedure is carried out within the listed period of follow-up care for a previous surgery, the follow-up periods continue concurrently to their normal terminations.

(g) Preoperative examination and planning are covered as separate services only in the following circumstances:

(i) When the preoperative visit is the initial visit for the physician and prolonged detention or evaluation is required to establish a diagnosis, determine the need for a specific surgical procedure, or prepare the patient;

(ii) When the preoperative visit is a consultation and the consulting physician does not assume care of the patient; or

(iii) When diagnostic procedures, not part of the basic surgical procedure, e.g., bronchoscopy prior to chest surgery, are provided during the immediate preoperative period.

(h) Exploratory laparotomy procedures confirm a diagnosis and determine the extent of necessary treatment. A physician may request payment only if the exploratory procedure is the only procedure done during an operative session.

(i) The services of an assistant surgeon are specialty services to be provided only by a licensed physician, and are covered only on very complex surgical procedures. Procedures not authorized for assistant surgeon coverage are listed in the Physician Provider Manual and updated by Medicaid Provider Bulletins as necessary. Medicare guidelines for limitation of assistant surgeon coverage are used, since those decisions are made at the national level with physician consultation.

(j) Medicaid does not cover surgical procedures, experimental therapies, or educational, nutritional, support programs for treatment of obesity or weight control.

(15) Diagnostic and Therapeutic Procedures:

(a) Diagnostic needle procedures, e.g., lumbar puncture, thoracentesis, and jugular, femoral vein, or subdural taps, when performed as part of a necessary workup for a serious medical illness or injury, are covered in addition to other medical care on the same day.

(b) Diagnostic "oscopy" procedures, e.g., endoscopy, bronchoscopy, and laparoscopy, are covered separately from any major surgical procedure. However, when an "oscopy" procedure is done the same day or at the same operative session as another procedure, the "oscopy" procedure may only be covered as a multiple procedure.

(c) Magnetic resonance imaging (MRI) is covered only for service to the brain, spinal cord, hip, thigh and abdomen.

(d) Therapeutic needle procedures, e.g., scalp vein insertion, injections into cavities, nerve blocks, are covered in addition to other medical care on the same day.

(e) Puncture of a cavity or joint for aspiration followed by injection of a medication is covered as one procedure and identified by specific CPT code.

(16) Anesthesia Services:

Anesthesia services are covered only when administered by a licensed anesthesiologist or nurse anesthetist who remains in attendance for the sole purpose of rendering general anesthesia services. Standby or monitoring by the anesthesiologist or anesthetist during local anesthesia is not a covered Medicaid anesthesia service.

(17) Transplant Services:

Except for kidney and cornea transplants, Medicaid limits organ transplant services to those procedures for which selection criteria have been approved and documented in R414-10A.

(18) Modifiers:

Modifiers may be used only, as defined in the CPT Manual, to show that a service or procedure has been altered to some degree but not changed in definition or code. The following limitations apply:

(a) The professional component, modifier 26, may be used only with laboratory and radiology service codes and only when direct analysis, interpretation, and written report of findings are provided by a physician on a laboratory or radiology procedure.

(b) Unusual services are identified by use of modifier 22, along with the appropriate CPT code. A prepayment review of unusual services shall be completed by Medicaid professional staff or physician consultants. A report of the service and any important supporting documentation must be submitted with the claim for review.

(c) Anesthesia by surgeon is identified by use of modifier 47. The operating surgeon may not use modifier 47 in addition to the basic procedure code. Anesthesia provided by the surgeon is part of the basic procedure being provided.

(d) Mandated services as defined by CPT and identified by modifier 32 are noncovered services.

(e) Reference laboratory services identified by modifier 90 are noncovered services.

(19) Medications:

(a) Drugs and biologicals are limited to those approved by the Food and Drug Administration (FDA), or those approved by the Drug Utilization Review Board (DUR) for off-label use, which is use for a condition different from that initially intended for the drug or biological. Medicaid coverage of drugs and biologicals is based on individual need and orders written by a physician when the drug is given in accordance with accepted standards of medical practice and within the protocol of accepted use for the drug.

(i) Generic drugs shall be used whenever a generic product approved by the FDA is available. If the physician determines that a brand name drug is medically necessary, the physician may override the generic requirement by writing on the prescription in his own hand writing "name brand medically necessary". Preprinted messages, abbreviations, or notations by a second party, do not meet the override requirement. The pharmacist shall fill the prescription with the generic equivalent product if the override procedure is not followed.

(ii) Injectable medications approved in HCPCS are identified in the "J" code list published by the Health Care Financing Administration or the Department, or both. The list is reviewed and revised yearly and maintained in the Physician Provider Manual by notification and update through Medicaid Provider Bulletins.

(iii) The "J" code covers only the cost of an approved product.

(iv) Office visits only for administration of medication are excluded from coverage. However, an injection code which covers the cost of the syringe, needle and administration of the medication may be used with the "J" code when medication administration is the only reason for an office call.

(v) When an office service is provided for other purposes, in addition to medication administration, only the office visit and a "J" code may be used to bill for the service provided.

(vi) The office visit code and injection code may never be used together. Only one of the codes may be used to define the service provided.

(vii) Vitamin B-12 is limited to use only in treating conditions where physiological mechanisms produce pernicious anemia. Use of Vitamin B-12 in treating any unrelated condition is excluded from coverage.

(b) Vitamins may be provided only for:

(i) Pregnant women: Prenatal vitamins with 1 mg folic acid.

(ii) Children through age five: Children's vitamins with fluoride.

(iii) Children through age one: multiple vitamin (A, C, and D) without fluoride.

(iv) Children through age 15: Fluoride supplement.

(c) Human growth stimulating hormones are limited to CHEC eligible children under the age of 15 who meet the established internal criteria for coverage that has been published and is available in the Provider Manual.

(d) Methylphenidates, amphetamines, and other central nervous system stimulants require prior authorization and may be provided only for treatment of Attention Deficit Disorder (ADD).

(e) Medications for appetite suppression are not a covered service.

(f) Non-prescription, over-the-counter items are limited, and notification of changes consistent with this rule is made by Provider Bulletin and Provider Manual updates.

(g) Nutrients may be provided only as established in R414-71-6.

R414-10-6. Copayment Policy.

Each Medicaid client is responsible to pay a copayment amount that complies with the requirements of the Utah Medicaid State Plan and Rule R414-1.

KEY: Medicaid
May 1, 2010 26-1-5
Notice of Continuation January 24, 2012 26-18-3

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-10A. Transplant Services Standards.
R414-10A-1. Introduction and Authority.

(1) This rule establishes standards and criteria for tissue and organ transplantation services.

(2) Section 9507 of the federal Consolidated Omnibus Budget Reconciliation Act of 1985 (COBRA), codified as section 1903(i)(1) of the Social Security Act, requires states, as part of the Medicaid program, to establish standards for coverage of transplantation services.

(3) Under the ruling issued by the Federal District Court for the District of Utah, Central Division, Civil No. 96405, the Department of Health has absolute discretion to fund transplantation services under Title XIX of the Social Security Act and if transplantation services are covered, there must be no discrimination on the basis of age.

R414-10A-2. Definitions.

For purposes of Rule R414-10A:

(1) "Abstinence" means the documented non-use of any abusable psychoactive substance by the client with random monthly drug screen tests.

(2) "Active infection" means current presumptive evidence of invasion of tissue or body fluids by bacteria, viruses, fungi, rickettsiae, or parasites which is not demonstrated to be effectively controlled by the host, antibiotic or antimicrobial agents.

(3) "Age group" means patients documented in the medical literature with an age at the time of transplantation related to the current age of the client as listed below:

(a) Birth through 12 months;

(b) One through 12 years;

(c) 13 through 20 years;

(d) 21 through 30 years;

(e) 31 through 40 years; or

(f) 41 through 54 years.

(g) Department medical consultants may consider other age groups, documented by the medical literature and the transplant center to have conclusive relevance to the client's survival.

(4) "Active substance abuse" means the current use of any abusable psychoactive substance which is not appropriately prescribed and taken under the direction of a physician or is not medically indicated.

(5) "Allogenic" means having a different genetic constitution but belonging to the same species.

(6) "Autologous" means the products or components of the same individual person.

(7) "Bone marrow transplantation" means transplantation of cells from the bone marrow stem cells, peripheral blood stem cells, or cord blood stem cells to supplant the client bone marrow.

(8) "Client" means an individual eligible to receive covered Medicaid services from an enrolled Medicaid provider.

(9) "Department" means the Utah Department of Health.

(10) "Donor lymphocyte infusion" means infusion of allogenic lymphocytes into the client.

(11) "Drug screen" means random testing for tobacco, marijuana, alcohol, benzodiazepines, narcotics, methadone, cocaine, amphetamines, and barbiturates.

(12) "Emergency transplantation" means any transplantation which for reasons of medical necessity requires that a transplant be performed less than five days after determination of the need for the procedure.

(13) "Intestine transplantation" means transplantation of both the small bowel and colon.

(14) "Medical literature" means articles and medical information which have been peer reviewed and accepted for publication or published.

(15) "Medically necessary" means a client's medical condition which meets all the criteria and none of the contraindications for the type of transplantation requested.

(16) "Multiple transplantations" means, except for corneas, the transplantation of more than one tissue or organ during the same or different operative procedure.

(17) "Multivisceral transplantation" means the transplantation of liver, pancreas, omentum, stomach, small intestine and colon.

(18) "Patient" means a person who is receiving covered professional services provided or directed by a licensed practitioner of the healing arts enrolled as a Medicaid provider.

(19) "Remission" means the lack of any evidence of the leukemia on physical examination and hematological evaluation, including normocellular bone marrow with less than five percent blast cells, and peripheral blood counts within normal values, except for clients who are receiving maintenance chemotherapy.

(20) "Services" means the type of medical assistance specified in sections 1905(a)(1) through (24) of the Social Security Act and interpreted in the 42 CFR Section 440, Subpart A, October 1992 edition, which is adopted and incorporated by reference.

(21) "Substance abuse rehabilitation program" means a rehabilitation program developed and conducted by an inpatient facility that, at a minimum, meets the standards of organization and staff of a chemical dependency/substance abuse specialty hospital specified in Sections R432-102-4 and 5.

(22) "Syngeneic" means possessing identical genotypes, as monozygotic or identical twins.

(23) "Transplantation" means the transfer of a human organ or tissue from one person to another or from one site to another in the same individual, except for skin, tendon, and bone.

(24) "Vital end-organs" means organs of the body essential to life, e.g., the heart, the liver, the lungs, and the brain.

R414-10A-3. Client Eligibility Requirements for Coverage for Transplantation Services.

Transplantation services are available to categorically eligible and medically needy individuals who are Title XIX eligible and meet criteria listed in Sections R414-10A-6 through 22 at the time the transplantation service is provided.

R414-10A-4. Program Access Requirements.

(1) Transplantation services may be provided only for those eligible clients who meet the criteria listed in Sections R414-10A-6 through 22 for services covered under the Utah Medicaid program.

(2) Transplantation services for the organ needed by the client may be provided only in a transplant center approved by the United States Department of Health and Human Services as a Medicare designated center or by the Department in accordance with criteria in Section R414-10A-7.

(3) Transplantation services may be provided out-of-state only when the authorized service is not available in an approved facility in the state of Utah.

(4) Criteria listed in Rule R414-10A applicable to transplantation services and transplant centers in the state of Utah also apply to out-of-state transplant services and facilities.

(5) Post transplant authorization for transplantation services provided under emergency circumstances may be given only when:

(a) all Utah Medicaid criteria listed in Sections R414-10A-6 through 22 are met; and

(b) both the transplant center and the board-certified or board-eligible specialist evaluation required by Subsection R414-10A-6(3) are submitted with the recommendation that the

tissue or organ transplantation be authorized.

R414-10A-5. Service Coverage.

(1) Transplantation services are covered by the Utah Medicaid program only when criteria listed in Sections R414-10A-6 through 22 are met.

(2) Transplantations which are experimental or investigational or which are performed on an experimental or investigational basis are not covered.

(3) Multiple transplantation services may be provided only when the criteria for the specific multiple transplantations are met.

(4) Staff shall not consider criteria for single tissue or organ transplantation in reviewing requests for multiple transplantations.

(5) Transplantation of additional tissues or organs, different from prior transplantations, may be provided only when the criteria for multiple transplantations of all provided or scheduled multiple tissue or organ transplantations are met.

(6) The Utah Medicaid program covers repeat transplantations of the same tissues or organs only when the Department approves a new prior authorization under criteria found in Sections R414-10A-6 through 22.

(7) Payment for emergency transplantations may be provided only when the service is provided for a transplantation with criteria approved in Sections R414-10A-6 through 22. Payment will not be made until Department staff has reviewed all of the information required by Sections R414-10A-6 through 22 and determined that the patient and the transplant center met criteria for approval and provision of the service at the time of the transplantation.

(8) The Utah Medicaid program does not cover the following transplantation services:

(a) Beta cells or other pancreas cells not part of a pancreatic organ transplantation.

(b) Cells or tissues transplanted into the coronary arteries, myocardium, central nervous system, or spinal cord.

(c) Stem cells other than hematological stem cells.

(d) Donor lymphocyte infusions for clients who have not had a prior bone marrow transplantation.

(9) The Utah Medicaid program does not cover the following procedures:

(a) Temporary or implanted ventricular assist devices with the exception of intra-aortic balloon assist devices.

(b) Temporary or implanted biventricular assist devices.

(c) Temporary or implanted mechanical heart.

R414-10A-6. Prior Authorization.

(1) Prior authorization is required for all transplantation services except for the following transplants:

(a) cornea transplantation.

(b) kidney, heart and liver transplantation performed in a Utah transplant center, which has been Medicare-approved for the last five or more years.

(2) The prior authorization request for transplantation services must be initiated by the client's referring physician. Failure to submit all required information with the prior authorization request will delay processing of the request for transplantation.

(3) The initial request for prior authorization of any transplantation, except heart, liver, cornea, or kidney, must contain all of the following:

(a) A description of the medical condition which necessitates a transplantation.

(b) Transplantation treatment alternatives utilized previous to the transplantation request.

(c) Transplantation treatment alternatives considered and discarded, including discussion of why the alternatives have been discarded.

(d) Comprehensive examination, evaluation and recommendations completed by a board-certified or board-eligible specialist in a field directly related to the client's condition which necessitates the transplantation, such as a nephrologist, gastroenterologist, cardiologist, or hematologist.

(e) Comprehensive psycho-social evaluation of the client must include a comprehensive history regarding substance abuse and compliance with medical treatment.

(f) Psycho-social evaluation of parent(s) or guardian(s) of the client, if the client is less than 18 years of age. The psycho-social evaluation must include a comprehensive history regarding substance abuse, and past and present compliance with medical treatment.

(g) Comprehensive psychiatric evaluation of the client, if the client has a history of mental illness.

(h) Comprehensive psychological or developmental testing, as requested by the Department.

(i) Comprehensive infectious disease evaluation for a client with a recent or current suspected infectious episode.

(j) Documentation by the client's referring physician that a client with a history of substance abuse has successfully completed a substance abuse program or has documented abstinence for a period of at least six months before any transplantation service can be authorized.

(k) At least two negative drug screens within three months of the request date for prior authorization. The Utah Medicaid program requires monthly drug screens until the transplant date or until the transplant is denied if either of the two random drug screens are positive for drug use, past drug screens have been positive for drug use, or the Department requests the monthly screens. If the client has a history of substance abuse that does not include the drugs listed in Subsection R414-10A-2(11), then the drug screens must include the other substance(s) upon drug testing availability.

(l) Hospital and outpatient records for at least the last two years, unless the patient is less than two years of age, in which case all records.

(m) Pretransplant evaluation for a client diagnosed with cancer that includes staging of the cancer, laboratory tests, and imaging studies. A letter documenting that the transplant evaluation has been completed and that all medical records documentation from the evaluation have been transmitted to the Department.

(n) Any other medical evidence needed to evaluate possible contraindications for the type of transplantation being considered. Contraindications are listed in this rule under each organ or transplant type.

(o) The transplant center must document, by a current medical literature review, a one-year survival rate from patients having received transplantation for the age group, specific diagnosis(es), condition and type of transplantation proposed for the client. Survival rate must be calculated by the Kaplan-Meier product-limit method or the actuarial life table method: "Kaplan, G., Meier, P. Non-Parametric estimation from incomplete observations. Journal of American Statistical Association 53:457-481, 1958. Cox, D.R., Oakes, D. Analysis of survival data. Chapman and Hill, 1984." adopted and incorporated by reference. At least ten patients in the appropriate age group must be alive at the end of the one or three year period to document adequate confidence intervals. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(p) The transplant center must document by a current medical literature review, a one year graft function rate for patients having received pancreas, kidney or small bowel transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. Graft function rate must be calculated by the Kaplan-Meier product-limit method or the actuarial life table method: "Kaplan,

G., Meier, P. Non-Parametric estimation from incomplete observations. Journal of American Statistical Association 53:457-481, 1958. Cox, D.R., Oakes, D. Analysis of survival data. Chapman and Hill, 1984." adopted and incorporated by reference. The time to graft failure will be determined by the use of insulin post-pancreas transplantation, by the use of dialysis post-renal transplantation, and the use of total parenteral nutrition post-small bowel transplantation. At least ten patients in the appropriate age group must have documented graft function at the end of the one year period to document adequate confidence intervals. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(q) Bone marrow transplantation centers must document, by a current medical literature review, a one-year and a three-year survival rate from patients having received transplantation for the age group, specific diagnosis(es), condition and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(r) The transplant center must provide written recommendations for each client which support the need for the transplant. The recommendations must reflect use of both the transplant center's own patient selection criteria and the Utah Medicaid program criteria as noted in Sections R414-10A-8 through 22. Agreement of the transplant center to provide the required service must also be established.

(s) The physician must provide, for review by the Department, any additional medical information which could affect the outcome of the specific transplant being requested.

(t) The completed request for authorization, along with all required information and documentation, must be delivered to:

Utah Department of Health
Bureau of Coverage and Reimbursement Policy
Utilization Management Unit
Transplant Coordinator
288 North 1460 West
P.O. Box 143103
Salt Lake City, Utah 84114-3103

(u) If incomplete documentation is received by the Department, the client's case is pended until the requested documentation has been received.

(4) Prior authorization for each donor lymphocyte infusion must contain all of the following:

(a) A description of the medical condition that necessitates a donor lymphocyte infusion.

(b) Comprehensive examination, evaluation and recommendations completed by a board-certified or board-eligible specialist in a field directly related to the client's condition that necessitates the transplantation, such as a nephrologist, gastroenterologist, cardiologist, or hematologist. The evaluation must document that the proposed donor lymphocyte infusion for the client is a medically necessary service as defined in Subsections R414-1-2(18)(a) and (b).

(c) Hospital and outpatient records for at least the last six months. If the patient is less than six months of age, the Department requires all case records.

(d) The transplant center must document by a current medical literature review that the donor lymphocyte infusion is a medically necessary service as defined in Subsections R414-1-2(18)(a) and (b) for the age group, specific diagnosis(es), condition, and type of transplantation the client has previously received.

R414-10A-7. Criteria for Transplantation Centers or Facilities.

Transplantation services are covered only in a transplant center or facility which demonstrates the following qualifications to the Department:

(1) Compliance with criteria listed in Sections R414-10A-6 through 22.

(2) The transplant center must document cost effectiveness and quality of service. The transplant center must complete, and submit to the Department for evaluation, documentation specific to the surgical experience of the requesting transplant center, showing applicable one and three year survival rates for all patients receiving transplantation in the last three years. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Out-of-state transplant centers must meet all of the criteria and requirements listed by the Department in Sections R414-10A-6 through 22.

(4) Transplantation services are covered in out-of-state transplant centers only when the service is not available in an approved facility in Utah, and agreement is reached between the Department and the requesting physician that service out-of-state is essential to the individual case.

(5) Reimbursement to out-of-state transplant centers is provided only when the transplant center and the Department can agree upon arrangements which conform to the Department payment methodology.

(6) Corneal transplant facilities must document:

(a) certification or licensure by the Department as an ambulatory surgical center or an acute care general hospital; and

(b) that the surgeon is board-certified or board-eligible in ophthalmology.

(7) Heart, heart lung, intestine, lung, pancreas, kidney, and liver transplant centers must document all of the following:

(a) Current approval by the U.S. Department of Health and Human Services as a Medicare-approved center for transplantation of the organ(s) requested for the client.

(b) Current full membership in the United Network for Organ Sharing for the specific organ transplantation requested for the client.

(8) Bone marrow transplant centers must document approval by the National Marrow Donor Program as a bone marrow transplantation center.

R414-10A-8. Criteria and Contraindications for Cornea Transplantation.

(1) Cornea transplantation services may be provided to a client of any age.

(2) The following are contraindications for cornea transplantation or penetrating keratoplasty:

(a) Active infection.

(b) The presence of an associated disease, such as macular degeneration or diabetic retinopathy severe enough to prevent visual improvement with a successful corneal transplantation.

R414-10A-9. Criteria and Contraindications for Bone Marrow Transplantation.

(1) Bone marrow transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for bone marrow transplantation must meet requirements of Subsections R414-10A-9(2)(a) or (b).

(a) Allogenic and syngeneic bone marrow transplantations may be approved for payment only when the client has an HLA-matched donor. The donor must be compatible for all or a five-out-of-six match of World Health Organization recognized HLA-A, -B, and -DR antigens as determined by appropriate serologic typing methodology.

(i) The Department authorizes payment for a search of related family members, unrelated persons or both to find a suitable donor.

(ii) The transplant center staff must complete, and submit to the Department for evaluation, a current medical literature

review, documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate, or by having a greater than or equal to 55 percent three-year survival rate or by meeting the one-year and three-year survival rates for patients receiving bone marrow transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) Autologous bone marrow transplantation performed in conjunction with total body radiation or high dose chemotherapy, may be approved for payment only if a current medical literature review, completed by the transplant center staff and sent to the Department for staff review and evaluation, documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate, or by having a greater than or equal to 55 percent three-year survival rate or by meeting the one-year and three-year survival rates for patients receiving bone marrow transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) Clients for autologous bone marrow transplantations must have adequate marrow function and no evidence of marrow involvement by the primary malignancy at the time the marrow is harvested.

(3) The client for bone marrow transplantation must meet all of the following requirements:

(a) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(b) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(c) Psycho-social assessment that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(d) The client must have a strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(e) If the client has a history of substance abuse, then the client must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(f) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original bone marrow disease will not recur and limit survival to less than 75% one-year survival rate, or to less than 55% three-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(4) Any single contraindication listed below precludes approval for Medicaid payment for bone marrow transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation if accompanied by significant compromise of one or more vital end-organs.

(c) Active substance abuse.

(d) Presence of systemic dysfunction or malignant disease which could limit successful clinical outcome or interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(e) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(f) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predicted).

(iii) Restrictive pulmonary disease (FVC less than 50% of predicted).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent or unresolved pulmonary infarction.

(g) Cancer, unless treated and eradicated for two or more years or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 75% one-year survival rate, or a greater than or equal to 55 percent three-year survival rate, or by meeting the one-year and three-year survival rates after transplantation for the age group, specific cancer, diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(h) Cardiovascular diseases:

(i) Intractable cardiac arrhythmias.

(ii) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(iii) Severe generalized arteriosclerosis.

(i) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(j) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(5) Prior to the approval of transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s) of a client who is under 18 years of age, to assure compliance to medication and follow-up care, if an indication of non-compliance documented by any of the behaviors listed in Subsections R414-10A-9(4)(j)(i) through (iv) is demonstrated by the parent(s) or guardian(s) of the client.

(6) The client for donor lymphocyte infusion must produce documentation by current medical literature review and the client's referring physician that the donor lymphocyte infusion is a medically necessary service as defined in Subsections R414-1-2(18)(a) and (b).

R414-10A-10. Criteria and Contraindications for Heart Transplantation.

(1) Heart transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for heart transplantation must meet all of the following requirements:

(a) The client must have irreversible, progressive heart disease with a life expectancy of one year or less without transplantation, or documented evidence of progressive pulmonary hypertension and no other reasonable medical or surgical alternative to transplantation available.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to

75 percent one-year survival rate for patients receiving heart transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) Severe cardiac dysfunction.

(d) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(e) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(f) Psycho-social assessment that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(g) The client must have strong motivation to undergo the procedure, as documented by the medical and psycho-social assessment.

(h) If the client has a history of substance abuse, then the client must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(i) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original heart disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below precludes approval for Medicaid payment for heart transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation if accompanied by significant compromise of one or more non-cardiac vital end-organs.

(c) Active substance abuse.

(d) Presence of systemic dysfunction or malignant disease which could limit successful clinical outcome, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(e) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(f) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predicted).

(iii) Restrictive pulmonary disease (FVC less than 50% of predicted).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent or unresolved pulmonary infarction.

(g) Cancer, unless treated and eradicated for two or more years or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 75% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(h) Cardiovascular diseases:

(i) Severe pulmonary hypertension documented in patients 18 years of age and older by a pulmonary vascular resistance greater than eight Wood units, or pulmonary vascular resistance of six or seven Wood units in which a nitroprusside infusion is unable to reduce the pulmonary vascular resistance to less than three Wood units or is unable to reduce the pulmonary artery systolic pressure to below 50 mmHg.

(ii) Severe pulmonary hypertension documented in patients less than 18 years of age and more than six months of age by a pulmonary vascular resistance greater than six pulmonary vascular resistance index units (PVRI), or in which a nitroprusside infusion is unable to reduce the pulmonary vascular resistance to less than six PVRI.

(iii) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(iv) Severe generalized arteriosclerosis.

(i) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(j) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s), if an indication of non-compliance is demonstrated by the parent(s) or guardian(s) of a client who is under 18 years of age. Non-compliance is demonstrated by documentation of any of the behaviors listed in Subsections R414-10A-10(3)(j)(i) through (iv).

R414-10A-11. Criteria and Contraindications for Intestine Transplantation.

(1) Intestine transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for intestine transplantation must meet all of the following requirements:

(a) The client must have short bowel syndrome or irreversible, progressive small bowel disease that requires daily hyperalimentation with no other reasonable medical or surgical alternative to transplantation available.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year small bowel graft function rate for patients receiving intestine transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 85 percent one-year survival rate for patients receiving intestine transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(e) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social

stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long term follow up and the immunosuppressive program which is required.

(f) Psycho-social assessment that the client has sufficient mental, emotional, and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(g) The client must have a strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(h) If the client has a history of substance abuse, then he must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(i) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original intestinal disease will not recur and limit graft function survival to less than 75% one-year survival rate.

(j) The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below precludes approval for Medicaid payment for small bowel transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation, if accompanied by significant compromise of one or more vital end-organs.

(c) Active substance abuse.

(d) Presence of systemic dysfunction or malignant disease which could limit survival, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(e) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(f) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predicted).

(iii) Restrictive pulmonary disease (FVC less than 50% of predicted).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent or unresolved pulmonary infarction.

(g) Cancer, unless treated and eradicated for two or more years, or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 85% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(h) Cardiovascular diseases:

(i) Myocardial infarction within six months.

(ii) Intractable cardiac arrhythmias.

(iii) Class III or IV cardiac dysfunction by New York Heart Association criteria.

(iv) Prior congestive heart failure, unless a cardiovascular consultant determines adequate cardiac reserve.

(v) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(vi) Severe generalized arteriosclerosis.

(i) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(j) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s), if an indication of non-compliance is demonstrated by the parent(s) or guardian(s) of a client who is under 18 years of age. An indication of non-compliance by the parent(s) or guardian(s) is documented by any of the behaviors listed in Subsections R414-10A-11(3)(j)(i) through (iv).

R414-10A-12. Criteria and Contraindications for Kidney Transplantation.

(1) Kidney transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) All indications for kidney transplantation listed below must be met by each client.

(a) The client must have irreversible, progressive end-stage renal disease.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year successful renal graft function rate for patients receiving renal transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 90 percent one-year survival rate for patients receiving renal transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(e) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(f) Psycho-social assessment that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(g) The client must have strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(h) If the client has a history of substance abuse, then the client must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(i) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original

renal disease will not recur and limit graft function to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below shall preclude approval for Medicaid payment for kidney transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation if accompanied by significant compromise of one or more non-renal end-organs.

(c) Active substance abuse.

(d) Presence of systemic dysfunction or malignant disease which could limit successful clinical outcome, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(e) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(f) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predicted).

(iii) Restrictive pulmonary disease (FVC less than 50% of predicted).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent pulmonary infarction.

(g) Cancer, unless treated and eradicated for two or more years or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 90% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(h) Cardiovascular diseases:

(i) Myocardial infarction within six months.

(ii) Intractable cardiac arrhythmias.

(iii) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(iv) Severe generalized arteriosclerosis.

(i) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(j) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s), if an indication of non-compliance is demonstrated by the parent(s) or guardian(s) of a client who is under 18 years of age. An indication of non-compliance by the parent(s) or guardian(s) is documented by any of the behaviors listed in Subsections R414-10A-12(3)(j)(i) through (iv).

R414-10A-13. Criteria and Contraindications for Liver Transplantation.

(1) Liver transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) A client for liver transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review, documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving liver transplantation for the age group, specific diagnosis(es), condition, and type of liver transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(c) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long term follow up and the immunosuppressive program which is required.

(d) Psycho-social assessment that the client has sufficient mental, emotional, and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(e) The client must have a strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(f) If the client has a history of substance abuse, then the client must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(g) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original liver disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below precludes approval for Medicaid payment for liver transplantation:

(a) Active infection outside the hepatobiliary system.

(b) Acute severe hemodynamic compromise at the time of transplantation, if accompanied by significant compromise of one or more non-hepatic vital end-organs.

(c) Hepatitis B surface antigen positive, except for cases of fulminant hepatitis B.

(d) Stage IV hepatic coma.

(e) Active substance abuse.

(f) Presence of systemic dysfunction or malignant disease which could limit successful clinical outcome, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(g) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(h) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predicted).

(iii) Restrictive pulmonary disease (FVC less than 50% of predicted).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent or unresolved pulmonary infarction.

(i) Cancer, unless treated and eradicated for two or more years or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 75% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall

use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(j) Cardiovascular diseases:

(i) Myocardial infarction within six months.

(ii) Intractable cardiac arrhythmias.

(iii) Class III or IV cardiac dysfunction by New York Heart Association criteria: "Goldman, L. et al. Comparative reproducibility and validity of systems assessing cardiovascular functional class: Advantages of a new specific activity scale. American Heart Association Circulation 64: 1227, 1981.", adopted and incorporated by reference.

(iv) Prior congestive heart failure, unless a cardiovascular consultant determines adequate cardiac reserve.

(v) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(vi) Severe generalized arteriosclerosis.

(k) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(l) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s) of a client who is under 18 years of age, to assure compliance with medications and follow-up care, if an indication of non-compliance documented by any of the behaviors listed in Subsections R414-10A-13(3)(l)(i) through (iv) is demonstrated by the parent(s) or guardian(s) of the client.

R414-10A-14. Criteria and Contraindications for Lung Transplantation.

(1) Lung transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for lung transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review, documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving lung transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(c) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long term follow up and the immunosuppressive program which is required.

(d) Psycho-social assessment that the client has sufficient mental, emotional, and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(e) The client must have a strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(f) The client with a history of substance abuse must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(g) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original lung disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below shall preclude approval for payment for lung transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation, if accompanied by significant compromise of one or more non-pulmonary vital end-organs.

(c) Active substance abuse.

(d) Presence of systemic dysfunction or malignant disease which could limit survival, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(e) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation for the patient.

(f) Cancer, unless treated and eradicated for two or more years or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 75% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(g) Cardiovascular diseases:

(i) Myocardial infarction within six months;

(ii) Intractable cardiac arrhythmias;

(iii) Class III or IV cardiac dysfunction by New York Heart Association criteria.

(iv) Prior congestive heart failure, unless a cardiovascular consultant determines adequate cardiac reserve.

(v) Symptomatic or occlusive peripheral vascular or cerebrovascular disease;

(vi) Severe generalized arteriosclerosis.

(h) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(i) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s), if an indication of non-compliance is demonstrated by the parent(s) or guardian(s) of a client who is under 18 years of age. An indication of non-compliance by the parent(s) or guardian(s) is documented by any of the behaviors listed in Subsections R414-10A-14(3)(i)(i) through (iv).

R414-10A-15. Criteria and Contraindications for Pancreas Transplantation.

(1) Pancreas transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) All indications for pancreas transplantation listed

below must be met by each client.

(a) The client must have type I diabetes mellitus.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a pancreas graft function rate greater than or equal to 75 percent at one-year for patients receiving pancreas transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 90 percent one-year survival rate for patients receiving pancreas transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(e) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that he and his parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required

(f) Psycho-social assessment that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(g) The client must have strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(h) If the client has a history of substance abuse, then he must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(i) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original pancreas disease will not recur and limit graft function rate to less than 75% at one-year. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below precludes approval for Medicaid payment for pancreas transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation if accompanied by significant compromise of one or more end-organs.

(c) Active peptic ulcer.

(d) Active substance abuse.

(e) Presence of systemic dysfunction or malignant disease which could limit successful clinical outcome, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(f) Irreversible musculoskeletal disease resulting in progressive weakness or in confinement to bed.

(g) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(h) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predictable).

(iii) Restrictive pulmonary disease (FVC less than 50% of predictable).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent pulmonary infarction.

(i) Cancer, unless treated and eradicated for two or more years or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 90% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(j) Cardiovascular diseases:

(i) Myocardial infarction within six months.

(ii) Intractable cardiac arrhythmias.

(iii) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(iv) Severe general arteriosclerosis.

(k) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(l) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s), if an indication of non-compliance is demonstrated by the parent(s) or guardian(s) of a client who is under 18 years of age. An indication of non-compliance by the parent(s) or guardian(s) is documented by any of the behaviors listed in Subsections R414-10A-15(3)(l)(i) through (iv).

R414-10A-16. Criteria and Contraindications for Small Bowel Transplantation.

(1) Small bowel transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for small bowel transplantation must meet all of the following requirements:

(a) The client must have short bowel syndrome or irreversible, progressive small bowel disease that requires daily hyperalimentation with no other reasonable medical or surgical alternative to transplantation available.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year small bowel function rate for patients receiving small bowel transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability for successful clinical outcome by having a greater than or equal to 85 percent one-year survival rate for patients receiving small bowel transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client.

The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) Medical assessment that the client is a reasonable risk for surgery with a likelihood of tolerance for immunosuppressive therapy.

(e) Medical assessment by the client's referring physician that the client has sufficient mental, emotional and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long term follow up and the immunosuppressive program which is required.

(f) Psycho-social assessment that the client has sufficient mental, emotional, and social stability and support to ensure that the client and parent(s) or guardian(s) will strictly adhere to the long-term follow-up and the immunosuppressive program which is required.

(g) The client must have a strong motivation to undergo the procedure as documented by the medical and psycho-social assessment.

(h) If the client has a history of substance abuse, then he must successfully complete a substance abuse rehabilitation program or must have documented abstinence for a period of at least six months before the Department reviews a request for transplantation services.

(i) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original small bowel disease will not recur and limit small bowel function survival to less than 85% one-year survival rate.

(j) The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(3) Any single contraindication listed below shall preclude approval for Medicaid payment for small bowel transplantation:

(a) Active infection.

(b) Acute severe hemodynamic compromise at the time of transplantation, if accompanied by significant compromise of one or more vital end-organs.

(c) Active substance abuse.

(d) Presence of systemic dysfunction or malignant disease which could limit survival, interfere with compliance with a disciplined medical regimen or rehabilitation after transplantation.

(e) Neuropsychiatric disorder which could lead to non-compliance or inhibit rehabilitation of the patient.

(f) Pulmonary diseases:

(i) Cystic fibrosis.

(ii) Obstructive pulmonary disease (FEV1 less than 50% of predicted).

(iii) Restrictive pulmonary disease (FVC less than 50% of predicted).

(iv) Unresolved pulmonary roentgenographic abnormalities of unclear etiology.

(v) Recent or unresolved pulmonary infarction.

(g) Cancer, unless treated and eradicated for two or more years, or unless a current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents a greater than or equal to 75% one-year survival rate after transplantation for the age group, specific cancer, diagnosis(es), condition and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(h) Cardiovascular diseases:

(i) Myocardial infarction within six months.

(ii) Intractable cardiac arrhythmias.

(iii) Class III or IV cardiac dysfunction by New York Heart Association criteria.

(iv) Prior congestive heart failure, unless a cardiovascular consultant determines adequate cardiac reserve.

(v) Symptomatic or occlusive peripheral vascular or cerebrovascular disease.

(vi) Severe generalized arteriosclerosis.

(i) Evidence of other major organ system disease or anomaly which could decrease the probability of successful clinical outcome or decrease the potential for rehabilitation.

(j) Behavior pattern documented in the client's medical or psycho-social assessment which could interfere with a disciplined medical regimen. An indication of non-compliance by the client is documented by any of the following:

(i) Non-compliance with medications or therapy.

(ii) Failure to keep scheduled appointments.

(iii) Leaving the hospital against medical advice.

(iv) Active substance abuse.

(4) Prior to approval of the transplantation, the transplantation team must document a plan of care, agreed to by the parent(s) or guardian(s), if an indication of non-compliance is demonstrated by the parent(s) or guardian(s) of a client who is under 18 years of age. An indication of non-compliance by the parent(s) or guardian(s) is documented by any of the behaviors listed in Subsections R414-10A-16(3)(j)(i) through (iv).

R414-10A-17. Criteria and Contraindications for Heart and Lung Transplantation.

(1) Heart-lung transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for heart-lung transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review, documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving heart-lung transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) The requirements listed in:

(i) Subsections R414-10A-10(2)(c) through (i).

(ii) Subsections R414-10A-10(3)(a) through (g), and (i) through (j).

(iii) Subsection R414-10A-10().

R414-10A-18. Criteria and Contraindications for Intestine and Liver Transplantation.

(1) Intestine-liver transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for intestine-liver transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year small bowel function rate for patients receiving small bowel transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research

by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving intestine-liver transplantation for the age group, specific diagnosis(es), and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents that the underlying original disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) The requirements listed in:

(i) Subsections R414-10A-13(2)(b) through (g).

(ii) Subsections R414-10A-13(3)(a) through (l).

(iii) Subsection R414-10A-13(4).

R414-10A-19. Criteria and Contraindications for Kidney-Pancreas Transplantation.

(1) Kidney-pancreas transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for kidney-pancreas transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year kidney and pancreas function rates for patients receiving kidney-pancreas transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 90 percent one-year survival rate for patients receiving kidney-pancreas transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents that the underlying original disease will not recur and limit survival to less than 90% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) The requirements listed in:

(i) Subsections R414-10A-12(2)(d) through (i).

(ii) Subsections R414-10A-12(3)(a) through (j).

(iii) Subsection R414-10A-12(4).

R414-10A-20. Criteria and Contraindications for Combined Liver-Kidney Transplantation.

(1) Liver-kidney transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for liver-kidney transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review, documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving liver-kidney transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting a renal graft function rate greater than or equal to 75 percent at one year for patients receiving liver-kidney transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documenting that the underlying original disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) The requirements listed in:

(i) Subsections R414-10A-13(2)(b) through (g).

(ii) Subsections R414-10A-13(3)(a) through (l).

(iii) Subsection R414-10A-13(4).

R414-10A-21. Criteria and Contraindications for Multivisceral Transplantation.

(1) Multivisceral transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for multivisceral transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year pancreas and small bowel function rates for patients receiving multivisceral transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving multivisceral transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents that the underlying original disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) The requirements listed in:

(i) Subsections R414-10A-13(2)(b) through (g).

(ii) Subsections R414-10A-13(3)(a) through (l).

(iii) Subsection R414-10A-13(4).

R414-10A-22. Criteria and Contraindications for Liver and Small Bowel Transplantation.

(1) Liver-small bowel transplantation services may be provided for a Medicaid eligible client of any age who meets the following criteria.

(2) The client for liver-small bowel transplantation must meet all of the following requirements:

(a) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year small bowel function rate for patients receiving small bowel transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(b) The transplant center staff must complete, and submit to the Department for staff review and evaluation, a current medical literature review documenting a probability of successful clinical outcome by having a greater than or equal to 75 percent one-year survival rate for patients receiving liver-small bowel transplantation for the age group, specific diagnosis(es), condition, and type of transplantation proposed for the client. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(c) A current medical literature review, completed by the transplant center staff and submitted to the Department for staff review and evaluation, documents that the underlying original disease will not recur and limit survival to less than 75% one-year survival rate. The Department shall use independent research by staff medical consultants to evaluate the documentation submitted by the transplant center.

(d) The requirements listed in:

(i) Subsections R414-10A-13(2)(b) through (g).

(ii) Subsections R414-10A-13(3)(a) through (l).

(iii) Subsection R414-10A-13(4).

KEY: Medicaid
July 23, 2007 26-1-5
Notice of Continuation January 24, 2012 26-18-1

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-14A. Hospice Care.
R414-14A-1. Introduction and Authority.

This rule is authorized by Sections 26-1-5 and 26-18-3, and Pub L. No. 111 148 of the Affordable Care Act. It implements Medicaid hospice care services as found in 42 U.S.C. 1396d(o).

R414-14A-2. Definitions.

The definitions in Rule R414-1 apply to this rule. In addition:

(1) "Attending physician" means a physician who:

(a) is a doctor of medicine or osteopathy; and

(b) is identified by the client at the time he or she elects to receive hospice care as having the most significant role in the determination and delivery of the client's medical care.

(2) "Cap period" means the 12-month period ending October 31 used in the application of the cap on reimbursement for inpatient hospice care as described in Subsection R414-14A-23(5).

(3) "Employee" means an employee of the hospice provider or, if the hospice provider is a subdivision of an agency or organization, an employee of the agency or organization who is appropriately trained and assigned to the hospice unit. "Employee" includes a volunteer under the direction of the hospice provider.

(4) "Hospice care" means care provided to terminally ill clients by a hospice provider.

(5) "Hospice provider" means a provider that is licensed under the provisions of Rule R432-750 and is primarily engaged in providing care to terminally ill individuals.

(6) "Physician" means a doctor of medicine or osteopathy who is licensed by the state of Utah.

(7) "Representative" means an individual who has been authorized under state law to make health care decisions, including initiating, continuing, refusing, or terminating medical treatments for a client who cannot make health care decisions.

(8) "Terminally ill" means the client has a medical prognosis to live no more than six months if the illness runs its normal course.

(9) "Adult" means a hospice client who is at least 21 years of age.

R414-14A-3. Client Eligibility Requirements.

(1) A client who is terminally ill may obtain hospice care pursuant to this rule.

(2) A client's certification of a terminal condition required for hospice eligibility must be based on a face-to-face assessment by a physician conducted no more than 90 days prior to the date of enrollment.

(3) A client dually enrolled in Medicare and Medicaid must elect the hospice benefit for both Medicare and Medicaid. The client must receive hospice coverage under Medicare. Election for the Medicaid hospice benefit provides the client coverage for Medicare co-insurance and coverage for room and board expenses while a resident of a Medicare-certified nursing facility, intermediate care facility for people with an intellectual disability (ICF/ID), or freestanding hospice facility.

R414-14A-4. Program Access Requirements.

(1) Hospice care may be provided only by a hospice provider licensed by the Department, that is Medicare certified in accordance with 42 CFR Part 418, and that is a Medicaid provider.

(2) A hospice provider must have a valid Medicaid provider agreement in place prior to initiating hospice care for Medicaid clients. The Medicaid provider agreement is effective on the date a Medicaid provider application is received in the Department and may not be made retroactive to an earlier date, including an earlier effective date of Medicare hospice certification.

(3) At the time of a change of ownership, the previous owner's provider agreement terminates as of the effective date of the change of ownership.

(4) The Department accepts all waivers granted to hospice agencies by the Centers for Medicare and Medicaid Services as part of the Medicare certification process.

(5) Hospice agencies participating in the Medicaid program shall provide hospice care in accordance with the requirements of 42 CFR Part 418.

R414-14A-5. Service Coverage.

Hospice care categories eligible for Medicaid reimbursement are the following:

(1) "Routine home care day" is a day in which a client who has elected to receive hospice care is at home and is not receiving continuous home care as defined in Subsection R414-14A-5(2). For purposes of routine home care day, extended stay residents of nursing facilities are considered at home.

(2) "Continuous home care day" is a day in which a client who has elected to receive hospice care receives a minimum of eight aggregate hours of care from the hospice provider during a 24-hour day, which begins and ends at midnight. The eight aggregate hours of care must be predominately nursing care provided by either a registered nurse or licensed practical nurse. Continuous home care is only furnished during brief periods of crisis in which a patient requires continuous care that is primarily nursing care to achieve palliation or management of acute medical symptoms. Extended stay residents of nursing facilities are not eligible for continuous home care day.

(3) "Inpatient respite care day" is a day in which the client who has elected hospice care receives short-term inpatient care when necessary to relieve family members or other persons caring for the client at home.

(4) "General inpatient care day" is a day in which a client who has elected hospice care receives general inpatient care for pain control or acute or chronic symptom management that cannot be managed in a home or other outpatient setting. General inpatient care may be provided in a hospice inpatient unit, a hospital, or a nursing facility.

(5) "Room and Board" is medication administration, performance of personal care, social activities, routine and therapeutic dietary services, meal service including direct feeding assistance, maintaining the cleanliness of the client's room, assistance with activities of daily living, durable equipment, prescribed therapies, and all other services unrelated to care associated with the terminal illness that would be covered under the Medicaid State Plan nursing facility benefit.

R414-14A-6. Hospice Election.

(1) A client who meets the eligibility requirement for Medicaid hospice must file an election statement with a particular hospice. If the client cannot cognitively make informed health care decisions or is under 18 years of age, the client's legally authorized representative may file the election statement.

(2) Each hospice provider designs and prints his own election statement. The election statement must include the following:

(a) identification of the particular hospice that will provide care to the client;

(b) the client's or representative's acknowledgment that he or she has been given a full understanding of the palliative rather than curative nature of hospice care, as it relates to the client's terminal illness;

(c) for adult clients, acknowledgment that the client waives certain Medicaid services as set forth in Section R414-14A-9;

(d) acknowledgment that the client or representative may

revoke the election of the hospice benefit at any time in the future and therefore become eligible for Medicaid services waived at the time of hospice election as set forth in Section R414-14A-8; and

(e) the signature of the client or representative.

(3) The effective date of the election may be the first day of hospice care or a later date, but may be no earlier than the date of the election statement

(4) An election to receive hospice care remains effective through the initial election period and through the subsequent election periods without a break in care as long as the client:

(a) remains in the care of a hospice;

(b) does not revoke the election; and

(c) is not discharged from the hospice.

(5) The hospice provider must notify the Department at the time a Medicaid client selects the hospice benefit, including selecting the hospice provider under a change of designated hospice. The notification must include a copy of the hospice election statement and the physician's certification of terminal illness for hospice care. Authorization for reimbursement of hospice care begins no earlier than the date notification is received by the Department for an eligible Medicaid client, except as provided in Section R414-14A-20.

(6) Subject to the conditions set forth in this rule, a client may elect to receive hospice care during one or more of the following election periods:

(a) an initial 90-day period;

(b) a subsequent 90-day period; or

(c) an unlimited number of subsequent 60-day periods.

R414-14A-7. Change in Hospice Provider.

(1) A client or representative may change, once in each election period, the designation of the particular hospice from which hospice care will be received.

(2) The change of the designated hospice is not a revocation of the election for the period in which it is made.

(3) To change the designation of hospice provider, the client must file, with the hospice provider from which care has been received and with the newly designated hospice provider, a statement that includes the following information:

(a) the name of the hospice provider from which the client has received care;

(b) the name of the hospice provider from which the client plans to receive care; and

(c) the date the change is to be effective.

(4) The client must file the change on or before the effective date.

R414-14A-8. Revocation and Re-election of Hospice Services.

(1) A client or legal representative may voluntarily revoke the client's election of hospice care at any time during an election period.

(2) To revoke the election of hospice care, the client or representative must file a statement with the hospice provider that includes the following information:

(a) a signed statement that the client or representative revokes the client's election for Medicaid coverage of hospice care.

(b) the date that the revocation is to be effective, which may not be earlier than the date that the revocation is made; and

(c) an acknowledgment signed by the patient or the patient's representative that the patient will forfeit Medicaid hospice coverage for any remaining days in that election period.

(3) Upon revocation of the election of Medicaid coverage of hospice care for a particular election period, a client:

(a) is no longer covered under Medicaid for hospice care;

(b) resumes Medicaid coverage for the benefits waived under Section R414-14A-9 (for adult clients); and

(c) may at any time elect to receive hospice coverage for any other hospice election periods that he or she is eligible to receive.

(4) If an election has been revoked, the client or his representative may at any time file an election in accordance with this rule for any other election period that is still available to the client.

(5) Hospice providers may not encourage adult clients to temporarily revoke hospice services solely for the purpose of avoiding financial responsibility for Medicaid services that have been waived at the time of hospice election as described in Section R414-14A-9.

(6) Hospice providers must send notification to the Department within ten calendar days that a client has revoked hospice benefits. Notification must include a copy of the revocation statement signed by the client or the client's legal representative.

R414-14A-9. Rights Waived to Some Medicaid Services for Adult Clients.

(1) For the duration of an election for hospice care, an adult client waives all rights to Medicaid for the following services:

(a) hospice care provided by a hospice other than the hospice designated by the client, unless provided under arrangements made by the designated hospice; and

(b) any Medicaid services that are related to the treatment of the terminal condition for which hospice care was elected or a related condition or are duplicative of hospice care except for services:

(i) provided by the designated hospice;

(ii) provided by another hospice under arrangements made by the designated hospice; and

(iii) provided by the client's attending physician if the services provided are not otherwise covered by the payment made for hospice care.

(2) Medicaid services for illnesses or conditions not related to the client's terminal illness are not covered through the hospice program but are covered when provided by the appropriate provider.

R414-14A-10. Concurrent Care for Clients Under 21 Years of Age.

(1) For the duration of the election of hospice care, clients under 21 years of age may only receive hospice care which is provided by the designated hospice, or that has been provided under arrangements made by the designated hospice.

(2) Clients under 21 years of age who elect to receive Medicaid hospice care may also receive concurrent Medicaid State Plan treatment for the terminal illness and other related conditions.

(3) For life prolonging treatment rendered to clients under 21 years of age, Medicaid shall reimburse the appropriate Medicaid enrolled medical care providers directly through the usual and customary Medicaid billing procedures. Hospice providers are not responsible to reimburse medical care providers for life prolonging treatment rendered to hospice clients who are under 21 years of age.

(4) Each pediatric hospice provider shall develop a training curriculum to ensure that the hospice's interdisciplinary team members, including volunteers, are adequately trained to provide hospice care to clients who are under 21 years of age. All staff members and volunteers who provide pediatric hospice care must receive the training before they provide hospice care services, and at least annually thereafter. The training shall include the following pediatric specific elements:

(a) Growth and development;

(b) Pediatric pain and symptom management;

(c) Loss, grief and bereavement for pediatric families and

the child;

(d) Communication with family, community and interdisciplinary team;

(e) Psycho-social and spiritual care of children;

(f) Coordination of care with the child's community.

(5) For pediatric care, the Hospice Program shall adopt the National Hospice and Palliative Care Organization's (NHPCO) Standards for Hospice Programs.

R414-14A-11. Notice of Hospice Care in a Nursing Facility, ICF/ID, or Freestanding Inpatient Hospice Facility.

(1) The hospice provider must notify the Department at the time a Medicaid client residing in a Medicare certified nursing facility, a Medicaid-certified ICF/ID, or a Medicare freestanding inpatient hospice facility elects the Medicaid hospice benefit or at the time a Medicaid client who has elected the Medicaid hospice benefit is admitted to a Medicare certified nursing facility, a Medicaid certified ICF/ID, or a Medicare freestanding inpatient hospice facility.

(2) The notification must include a prognosis of the time the client will require skilled nursing facility services under the hospice benefit.

(3) Except as provided in Section R414-14A-20, reimbursement for room and board begins no earlier than the date the hospice provider notifies the Department that the client has elected the Medicaid hospice benefit.

R414-14A-12. Notice of Independent Attending Physician.

The hospice provider must notify the Department at the time a Medicaid client designates an attending physician who is not a hospice employee.

R414-14A-13. Extended Hospice Care.

(1) Clients who accumulate 12 or more months of hospice benefits are subject to an independent utilization review by a physician with expertise in end-of-life and hospice care selected by the Department.

(2) If Medicare determines that a patient is no longer eligible for Medicare reimbursement for hospice services, the patient will no longer be eligible for Medicaid reimbursement for hospice services. Providers must immediately notify Medicaid upon learning of Medicare's determination. Medicaid reimbursement for hospice services will cease the day after Medicare notifies the hospice provider that the client is no longer eligible for hospice care.

R414-14A-14. Provider Initiated Discharge from Hospice Care.

(1) The hospice provider may not initiate discharge of a patient from hospice care except in the following circumstances:

(a) the patient moves out of the hospice provider's geographic service area or transfers to another hospice provider by choice;

(b) the hospice determines that the patient is no longer terminally ill; or

(c) the hospice provider determines, under a policy set by the hospice for the purpose of addressing discharge for cause, that the patient's behavior (or the behavior of other persons in the patient's home) is disruptive, abusive, or uncooperative to the extent that delivery of care to the patient or the ability of the hospice to operate effectively is seriously impaired.

(2) The hospice provider must carry out the following activities before it seeks to discharge a patient for cause:

(a) advise the patient that a discharge for cause is being considered;

(b) make a diligent effort to resolve the problem that the patient's behavior or situation presents;

(c) ascertain that the discharge is not due to the patient's use of necessary hospice services; and

(d) document the problem and efforts to resolve the problem in the patient's medical record.

(3) Before discharging a patient for any reason listed in Subsection R414-14A-14(1), the hospice provider must obtain a physician's written discharge order from the hospice provider's medical director. If a patient also has an attending physician, the hospice provider must consult the physician before discharge and the attending physician must include the review and decision in the discharge documentation.

(4) A client, upon discharge from the hospice during a particular election period, for reasons other than immediate transfer to another hospice:

(a) is no longer covered under Medicaid for hospice care;

(b) resumes Medicaid coverage of the benefits waived during the hospice coverage period; (for adult clients); and

(c) may at any time elect to receive hospice care if the client is again eligible to receive the benefit in the future.

(5) The hospice provider must have in place a discharge planning process that takes into account the prospect that a patient's condition might stabilize or otherwise change if that patient cannot continue to be certified as terminally ill. The discharge planning process must include planning for any necessary family counseling, patient education, or other services before the patient is discharged because the patient is no longer terminally ill.

R414-14A-15. Hospice Room and Board Service.

If a client residing in a nursing facility, ICF/ID or a freestanding hospice inpatient unit elects hospice care, the hospice provider and the facility must have a written agreement under which the total care of the individual must be specified in a comprehensive service plan, the hospice provider is responsible for the professional management of the client's hospice care, and the facility agrees to provide room and board and services unrelated to the care of the terminal condition to the client. The agreement must include:

(1) identification of the services to be provided by each party and the method of care coordination to assure that all services are consistent with the hospice approach to care and are organized to achieve the outcomes defined by the hospice plan of care;

(2) a stipulation that Medicaid services may be provided only with the express authorization of the hospice;

(3) the manner in which the contracted services are coordinated, supervised and evaluated by the hospice provider;

(4) the delineation of the roles of the hospice provider and the facility in the admission process; needs assessment process, and the interdisciplinary team care conference and service planning process;

(5) requirements for documenting that services are furnished in accordance with the agreement;

(6) the qualifications of the personnel providing the services; and

(7) the billing and reimbursement process by which the nursing facility will bill the hospice provider for room and board and receive payment from the hospice provider.

(8) In cases in which nursing facility residents revoke their hospice benefits, it is the responsibility of the hospice provider to notify the nursing facility of the revocation. The notice must be in writing and the hospice provider must provide it to the nursing facility on or before the revocation date.

R414-14A-16. In Home Physician Services.

In-home physician visits by the attending physician are authorized for hospice clients if the attending physician determines that direct management of the client in the home setting is necessary to achieve the goals associated with a hospice approach to care.

R414-14A-17. Continuous Home Care.

When the hospice provider determines that a patient requires at least eight hours of primarily nursing care in order to manage an acute medical crisis, the hospice provider will maintain documentation to support the requirement that the services provided were reasonable and necessary and were in compliance with an established plan of care in order to meet a particular crisis situation. Continuous home care is a covered benefit only as necessary to maintain the terminally ill client at home.

R414-14A-18. General Inpatient Care.

(1) General inpatient care is authorized without prior authorization for an initial ten calendar day length of stay. Prior authorization is required for any additional general inpatient care days during the same stay to verify that the client's needs meet the requirements for general inpatient care. If a hospice provider requests additional days, the subsequent requests are subject to clinical review and approval by qualified Department staff.

(2) General inpatient care days may not be used due to the breakdown of the primary care giving living arrangements or the collapse of other sources of support for the recipient.

(3) Prior authorization for additional days beyond the initial ten calendar day stay must be obtained before the hospice care is provided, except as allowed in Section R414-14A-20.

R414-14A-19. Inpatient Respite Care.

When the hospice provider determines that a patient requires a short-term inpatient respite stay in order to relieve the family members or other persons caring for the client at home, the hospice provider will maintain documentation to support the requirement that the services provided were reasonable and necessary to relieve a particular caregiver situation. Inpatient respite care may not be reimbursed for more than five consecutive days at a time. Inpatient respite care may not be reimbursed for a patient residing in a nursing facility, ICF/ID, or freestanding hospice inpatient unit.

R414-14A-20. Notification and Prior Authorization Grace Periods.

(1) If a new patient is already Medicaid eligible upon admission to hospice care, the hospice provider must submit a prior authorization request form to the Department in order to receive reimbursement for hospice services it renders, except in the following circumstances:

(a) during weekend, holidays, and after regular Department business hours, a hospice provider may begin service to a new Medicaid hospice enrollee, including covering room and board, or initiate a different hospice care requiring prior authorization for a grace period up to ten calendar days before notifying the Department;

(b) before the end of the ten calendar day grace period, the hospice provider must complete and submit the prior authorization request form to the Department in order to receive reimbursement for hospice services it renders;

(c) if the hospice provider does not submit the prior authorization request form timely, the Department will not reimburse the provider for the care that it renders before the date that the form is received.

R414-14A-21. Post-Payment for Services Provided While in Medicaid-Pending Status.

(1) If a new client is not Medicaid eligible upon admission to hospice services but becomes Medicaid eligible at a later date, the Department will reimburse a hospice provider retroactively to allow the hospice eligibility date to coincide with the client's Medicaid eligibility date if:

(a) the Department determines that the client met Medicaid eligibility requirements at the time the service was provided;

(b) the hospice care met the prior authorization criteria at the time of delivery; and

(c) the hospice provider reimburses the Department for care related to the client's terminal illness delivered by other Medicaid providers during the retroactive period.

(2) The hospice provider must provide a copy of the initial care plan and any other documentation to the Department adequate to demonstrate the hospice care met prior authorization criteria at the time of delivery.

R414-14A-22. Hospice Care Reimbursement.

(1) The Department shall provide payment for hospice care in accordance with the methodology set forth in the Utah Medicaid State Plan.

(2) A hospice provider may not charge a Medicaid client for a service that the client is entitled to receive under Medicaid.

(3) Medicaid reimbursement to a hospice provider for services provided during a cap period is limited to the cap amount specified in Subsection R414-14A-23(5).

(4) Medicaid does not apply the aggregate caps used by Medicare.

(5) The Department provides payment for hospice care on the basis of the geographic location where the service is provided as described in the Medicaid State Plan.

(6) Routine home care, continuous home care, general inpatient care, inpatient respite care services, and hospice room and board, are reimbursable to the hospice provider only.

(7) Hospice general inpatient care and inpatient respite care are not reimbursed by Medicaid for services provided in a Veterans Administration hospital or military hospital.

R414-14A-23. Payment for Hospice Care Categories.

(1) The Department establishes payment amounts for the following categories:

(a) Routine home care.

(b) Continuous home care.

(c) Inpatient respite care.

(d) General inpatient care.

(e) Room and Board service.

(2) The Department reimburses the hospice provider at the appropriate payment amount for each day for which an eligible Medicaid recipient is under the hospice's care.

(3) The Medicaid reimbursement covers the same services and amounts covered by the equivalent Medicare reimbursement rate for comparable service categories.

(4) The Department makes payment according to the following procedures:

(a) Payment is made to the hospice for each day during which the client is eligible and under the care of the hospice, regardless of the amount of services furnished on any given day.

(b) Payment is made for only one of the categories of hospice care described in Subsection R414-14A-23(1) for any particular day.

(c) On any day in which the client is not an inpatient, the Department pays the hospice provider the routine home care rate, unless the client receives continuous home care as provided in Subsection R414-14A-5(2) for a period of at least eight hours. In that case, the Department pays a portion of the continuous home care day rate in accordance with Subsection R414-14A-23(4)(d).

(d) The hospice payment on a continuous care day varies depending on the number of hours of continuous services provided. The number of hours of continuous care provided during a continuous home care day is multiplied by the hourly rate to yield the continuous home care payment for that day. A minimum of eight hours of licensed nursing care must be furnished on a particular day to qualify for the continuous home care rate.

(e) Subject to the limitations described in Subsection R414-14A-23(5), on any day on which the client is an inpatient in an approved facility for inpatient care, the appropriate inpatient rate (general or respite) is paid depending on the category of care furnished. The inpatient rate (general or respite) is paid for the date of admission and all subsequent inpatient days, except the day on which the client is discharged. For the day of discharge, the appropriate home care rate is paid unless the client dies as an inpatient. In the case where the client dies as an inpatient, the inpatient rate (general or respite) is paid for the discharge day. Payment for inpatient respite care is subject to the requirement that it may not be provided consecutively for more than five days at a time.

(5) Payment for inpatient care is limited as follows:

(a) The total payment to the hospice for inpatient care (general or respite) is subject to a limitation that total inpatient care days for Medicaid clients not exceed 20 % of the total days for which these clients had elected hospice care. Clients afflicted with AIDS are excluded when calculating inpatient days. For a client who is under 21 years of age, an inpatient stay in a hospital for the purpose of receiving life prolonging treatment for the terminal illness is not counted toward the cap on reimbursement for inpatient hospice care.

(b) At the end of a cap period, the Department calculates a limitation on payment for inpatient care for each hospice to ensure that Medicaid payment is not made for days of inpatient care in excess of 20 percent of the total number of days of hospice care furnished to Medicaid clients by the hospice.

(c) If the number of days of inpatient care furnished to Medicaid clients is equal to or less than 20% of the total days of hospice care to Medicaid clients, no adjustment is necessary.

(d) If the number of days of inpatient care furnished to Medicaid clients exceeds 20% of the total days of hospice care to Medicaid clients, the total payment for inpatient care is determined in accordance with the procedures specified in Subsection R414-14A-23(5)(e). That amount is compared to actual payments for inpatient care, and any excess reimbursement must be refunded by the hospice.

(e) If a hospice exceeds the number of inpatient care days described in Subsection R414-14A-23(5)(d), the total payment for inpatient care is determined as follows:

(i) Calculate the ratio of the maximum number of allowable inpatient days to the actual number of inpatient care days furnished by the hospice to Medicaid clients.

(ii) Multiply this ratio by the total reimbursement for inpatient care made by the Department.

(iii) Multiply the number of actual inpatient days in excess of the limitation by the routine home care rate.

(iv) Sum the amounts calculated in Subsection R414-14A-23(5)(e)(ii) and (iii).

(6) The hospice provider may request an exception to the inpatient care payment limitation if the hospice provider demonstrates the volume of Medicaid enrollees during the cap period was insufficient to reasonably achieve the required 20% ratio.

R414-14A-24. Payment for Physician Services.

(1) The following services performed by hospice physicians are included in the rates described in Sections R414-14A-22 and 23:

(a) General supervisory services of the medical director.

(b) Participation in the establishment of plans of care, supervision of care and services, periodic review and updating of plans of care, and establishment of governing policies by the physician member of the interdisciplinary group.

(2) For services not described in Subsection R414-14A-24(1), direct care services related to the terminal illness or a related condition provided by hospice physicians are reimbursed according to the Medicaid reimbursement fee schedule for physician services. Services furnished voluntarily by physicians are not reimbursable.

(3) Services of the client's attending physician, including in-home services, are reimbursed according to the Medicaid fee schedule for State Plan physician services. Services furnished voluntarily by physicians are not reimbursable.

R414-14A-25. Hospice Payment Covers Special Modalities.

No additional Medicaid payment will be made for chemotherapy, radiation therapy, and other special modalities of care for palliative purposes regardless of the cost of the services.

R414-14A-26. Payment for Nursing Facility, ICF/ID, and Freestanding Inpatient Hospice Unit Room and Board.

(1) For clients in a nursing facility, ICF/ID, or a freestanding hospice inpatient unit who elect to receive hospice care from a Medicaid enrolled hospice provider, Medicaid will pay the hospice provider an additional per diem for routine home care services to cover the cost of room and board in the facility. For nursing facilities and ICFs/ID, the room and board rate is 95 % of the amount that the Department would have paid to the nursing facility or ICF/ID provider for that client if the client had not elected to receive hospice care. For freestanding hospice inpatient facilities, the room and board rate is 95% of the statewide average paid by Medicaid for nursing facility services.

(2) The Department shall reimburse the hospice provider for room and board. Upon receiving payment for room and board, the hospice provider shall reimburse the nursing facility. The reimbursement is payment in full for the services described in Section R414-14A-15. The facility cannot bill Medicaid separately.

(3) If a hospice enrollee in a nursing facility, ICF/ID, or a freestanding hospice inpatient unit has a monetary obligation to contribute to his cost of care in the facility, the facility must collect and retain the contribution. The hospice must reimburse the facility the reduced amount received from Medicaid directly or from a Medicaid Health Plan.

R414-14A-27. Limitation on Liability for Certain Hospice Coverage Denials.

If the hospice provider or the Department determines that a client is not terminally ill while receiving hospice care under this rule, the client is not responsible to reimburse the Department. If the Department denies reimbursement to the hospice provider, the hospice provider may not seek reimbursement from the client.

R414-14A-28. Medicaid Health Plans and Hospice.

(1) If a Medicaid-only client is enrolled in a Medicaid health plan, the hospice selected by the client must have a contract with the health plan. The health plan is responsible to reimburse the hospice for hospice care. The Department will not directly reimburse a hospice provider for a Medicaid-only client covered by a health plan.

(2) If a Medicaid-only client enrolled in a health plan elects hospice care before being admitted to a nursing facility, ICF/ID, or a freestanding hospice inpatient unit, the health plan is responsible to reimburse the hospice provider for both the hospice care and the room and board until the client is disenrolled from the health plan by the Department. At the point the health plan determines that the enrollee will require care in the nursing facility for greater than 30 days, the health plan will notify the Department of the prognosis of extended nursing facility services. The Department will schedule disenrollment from the health plan to occur in accordance with the terms of the health plan contract for care provided in skilled nursing facilities.

(3) If a hospice enrollee is covered by Medicare for

hospice care, the Medicaid health plan is responsible for the health plan's payment rate less any amount paid by Medicare and other payors. The health plan is responsible for payment even if the Medicare covered service is rendered by an out-of-plan provider or was not authorized by the health plan.

(4) The health plan is responsible for room and board expenses of a hospice enrollee receiving Medicare hospice care while the client is a resident of a Medicare-certified nursing facility, ICF/ID, or freestanding hospice facility until the client is disenrolled from the health plan by the Department. On the 31st day, the client is disenrolled from the health plan and enrolled in the Medicaid fee-for-service hospice program. At the point the Department determines that the enrollee will require care in the nursing facility for greater than 30 days, the Department will schedule disenrollment from the health plan to occur in accordance with the terms of the health plan contract for care provided in skilled nursing facilities. The room and board expenses will be set in accordance with Section R414-14A-26.

(5) The hospice provider is responsible for determining if an applicant for hospice care is covered by a Medicaid health plan prior to enrolling the client, for coordinating services and reimbursement with the health plan during the period the client is receiving the hospice benefit, and for notifying the health plan when the client disenrolls from the hospice benefit.

R414-14A-29. Marketing by Hospice Providers.

Hospice providers may not engage in unsolicited direct marketing to prospective clients. Marketing strategies shall remain limited to mass outreach and advertisements, except when a prospective client or legal representative explicitly requests information from a particular hospice provider. Hospice providers shall refrain from offering incentives or other enticements to persuade a prospective client to choose that provider for hospice care.

R414-14A-30. Medicaid 1915c HCBS Waivers and Hospice.

(1) For hospice enrollees covered by a Medicaid 1915c Home and Community-Based Services Waiver, hospice providers shall provide medically necessary care that is directly related to the patient's terminal illness.

(2) The waiver program may continue to provide services that are:

(a) unrelated to the client's terminal illness and;

(b) assessed by the waiver program as necessary to maintain safe residence in a home or community-based setting in accordance with waiver requirements.

(3) The waiver case management agency and the hospice case management agency shall meet together upon commencement of hospice services to develop a coordinated plan of care that clearly defines the roles and responsibilities of each program.

KEY: Medicaid
February 1, 2012 26-1-4.1
Notice of Continuation September 30, 2009 26-1-5
26-18-3

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-45. Personal Supervision by a Physician.
R414-45-1. Introduction and Authority.

This rule defines medical services provided under the supervision of a physician or osteopath. Physician services are authorized by Sections 1901 and 1905(a)(5) of the Social Security Act, and 42 CFR 440.50, 491.2, October 1992 ed., which are adopted and incorporated by reference. Reference is also made to Title 58, Chapters 12 and 31; and R156-12d, R156-31.

R414-45-2. Definitions.

In addition to the definitions in R414-1 and R156-12d-3, the following definitions also apply to this rule:

(1) "Consultation and referral plan" means a written document defined to include the nature, frequency, and methods of consultation and supervision, and the methods of documentation of records.

(2) "Non-physician" means a nurse practitioner or a physician assistant.

(3) "Non-physician services" means those medical services rendered, incident to a physician's services, by a nurse practitioner or a physician assistant.

(4) "Personal supervision" means the critical observation and guidance by a physician of a non-physician's activities within the non-physician's scope of practice.

R414-45-3. Client Eligibility Requirements.

Medical services under the personal supervision of a physician or osteopath are available to categorically and medically needy individuals.

R414-45-4. Program Access Requirements.

(1) A physician licensed to practice medicine or osteopathy under Title 58, Chapter 12, must personally render medical services or supervise those services, rendered incident to the physician's services, by a nurse practitioner or a physician assistant.

(a) When a consultation and referral plan regarding supervised procedures is in place in both the physician's office and the non-physician's office, the Medicaid standard for personal supervision is the physician's availability by telephone.

(b) Any non-physician medical service provided in the course of treatment prescribed by a physician for any Medicaid client must meet the personal supervision requirement.

(2) A physician must be present for sufficient periods of time to provide the medical direction, services, consultation, supervision, and signing of the medical records, as specified in R156-12d-8(1).

(3) This rule does not apply to Rural Health Clinics.

R414-45-5. Service Coverage.

Services under this rule may include medical services provided personally by a physician or osteopath or those services rendered, incident to the physician's services, by a nurse practitioner or a physician assistant, under the personal supervision of the physician.

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-510. Intermediate Care Facility for Individuals with Mental Retardation Transition Program.
R414-510-1. Introduction and Authority.

(1) This rule implements the Intermediate Care Facility for Individuals with Mental Retardation (ICF/MR) Transition Program. Program participation is voluntary and allows an individual to transition out of an ICF/MR into the Community Supports Waiver for Individuals with Intellectual Disabilities and Other Related Conditions Home and Community-Based Services (HCBS) Waiver Program.

(2) This rule is authorized by Section 26-18-3. Waiver services for this program are optional and provided in accordance with 42 CFR 440.225.

R414-510-2. Definitions.

(1) "ICF/MR Transition Program applicant" is an individual who meets the eligibility requirements found in Section R414-510-3 of this rule, and who submits an ICF/MR Transition Program application to the Utah Department of Health, Division of Health Care Financing during the open application period as described in Subsection R414-510-4(2) of this rule.

(2) "Slot" refers to the funding that is available for one individual to participate in the ICF/MR Transition Program.

R414-510-3. Client Eligibility Requirements.

Services are available to an individual who:

(1) receives ICF/MR benefits under the Utah Medicaid State Plan;

(2) has a diagnosis of mental retardation or a related condition;

(3) meets ICF/MR level of care criteria defined in Section R414-502-8;

(4) meets the Utah Department of Human Services, Division of Services for People with Disabilities state funding eligibility criteria found in Subsection 62A-5-102(4); and

(5) has resided in a Medicaid-certified ICF/MR located in Utah for at least 12 consecutive months.

R414-510-4. Program Access Requirements.

(1) Legislative appropriations determine the number of individuals selected in the particular year for placement in the program.

(2) Upon new legislative appropriation for the program, the Department announces an open application period for accepting applications.

(3) After the open application period, the Department places the name of each ICF/MR Transition Program applicant on both a longevity list and a random list. On the longevity list, the Department ranks each ICF/MR Transition Program applicant according to length of consecutive stay in an ICF/MR in Utah. On the random list, the Department randomly ranks each ICF/MR Transition Program applicant based on a computerized random selection.

(4) The Department takes evenly from the longevity list and the random list for placement in the Community Supports Waiver for Individuals with Intellectual Disabilities and Other Related Conditions HCBS Waiver Program. If the Legislature funds an odd number of program slots, the Department places one additional individual from the longevity list.

(5) If an ICF/MR Transition Program applicant is selected for transition and has a spouse who also resides in a Utah ICF/MR and who meets the eligibility criteria in Section R414-510-2, the Department shall provide an additional slot for the spouse to participate in the transition program without affecting the number of available slots from the longevity and random lists.

(6) Once the Department places individuals into the program for the year's appropriation, the longevity and random lists are retired and no longer used. The Department makes no new placements into the program to replace individuals who leave the program for whatever reason.

(7) As the Legislature makes new appropriations for the program, the Department creates new longevity and random lists for each new appropriation and selects individuals for the program as described in subsections (2) through (4).

R414-510-5. Service Coverage.

This rule incorporates by reference the services and limitations found in the Medicaid 1915(c) HCBS Services Waiver and the Community Supports Waiver for Individuals with Intellectual Disabilities and Other Related Conditions, State Implementation Plan, Effective July 1, 2005.

R414-510-6. Reimbursement Methodology.

The Department of Human Services (DHS) contracts with DHCF to set 1915(c) HCBS waiver rates for waiver covered services. The DHS rate-setting process is designed to comply with requirements under the 1915(c) HCBS Waiver program and other applicable Medicaid rules. Medicaid requires that rates for services not exceed customary charges.

Notice of Continuation January 9, 2012 26-18-3

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.

R414-61. Home and Community-Based Services Waivers.

R414-61-1. Introduction and Authority.

(1) This rule establishes authority for the Department of Health to administer all Section 1915(c) waivers.

(2) The rule is authorized by Section 26-18-3 and Section 1915(c) of the Social Security Act.

R414-61-2. Incorporation by Reference.

The Department incorporates by reference the following home and community-based services waivers:

(1) Waiver for Technology Dependent/Medically Fragile Individuals, effective July 1, 2008;

(2) Waiver for Individuals Age 65 or Older, effective July 1, 2010;

(3) Waiver for Individuals with Acquired Brain Injuries, effective July 1, 2009;

(4) Waiver for Individuals with Physical Disabilities, effective July 1, 2011;

(5) Community Supports Waiver for Individuals with Intellectual Disabilities and Other Related Conditions, effective July 1, 2010;

(6) New Choices Waiver, effective July 1, 2010.

These documents are available for public inspection during business hours at the Utah Department of Health, Division of Medicaid and Health Financing, located at 288 North 1460 West, Salt Lake City, UT, 84114-3102.

January 24, 2012 26-18-3
Notice of Continuation February 24, 2010

R438. Health, Disease Control and Prevention, Laboratory Services.

R438-12. Rule for Law Enforcement Blood Draws.

R438-12-1. Definitions.

(1) "Director" means the Executive Director of the Department of Health.

(2) "Department" means the Department of Health.

R438-12-2. Authorized Individual - Qualifications.

Pursuant to section 26-1-30(2)(s), individuals other than physicians, registered nurses, or practical nurses shall meet one of the following requirements as a prerequisite for authorization to withdraw blood for the purpose of determining its alcoholic or drug content when requested to do so by a peace officer:

(1) training in blood withdrawal procedures obtained as a defined part of a successfully completed college or university course taken for credit, or

(2) training in blood withdrawal procedures obtained as a defined part of a successfully completed training course which prepares individuals to function in routine clinical or emergency medical situations, or

(3) training of no less than three weeks duration in blood withdrawal procedures under the guidance of a licensed physician.

R438-12-3. Permits for Authorized Individuals.

(1) Pursuant to section 26-1-30(2)(s), the Department shall issue permits to withdraw blood for the purpose of determining the alcoholic or drug content therein, when requested by a peace officer, to qualified applicants, as determined by the Department. The permit shall be of a size suitable for framing and a wallet-sized permit card shall be issued with the permit.

(2) Application to obtain a permit shall be made to the Director, Division of Epidemiology and Laboratory Services on forms provided by the Department.

(3) The permit shall be prominently displayed in the facility where the permit holder is employed. When the permit holder is requested to withdraw blood for the above stated purpose at a location other than the facility indicated above, he must have a valid permit card on his person.

(4) The effective date of a permit shall be the date the application is approved by the Department, which date shall appear on the permit and on the wallet-sized permit card. Permits shall be valid for a three year period on a calendar year basis. The date the permit expires shall appear on the permit and on the wallet-sized permit card. Permits shall be subject to termination or revocation pursuant to R438-12-4.

(5) Application to renew permits shall be made to the Director, Division of Epidemiology and Laboratory Services before the end of each three year permit period. Such application shall be made on forms provided by the Department. The permit holder shall either certify that he has been engaged in performing blood withdrawal procedures during the current permit period or submit a certificate signed by a physician attesting to his competence to perform blood withdrawal procedures.

(6) Permit holders must notify the Director, Division of Epidemiology and Laboratory Services within 15 days of a change in name or mailing address. Permits or permit cards that are destroyed or lost may be replaced upon written request from the permit holder.

R438-12-4. Cause for Permit Termination or Revocation.

Violation of this rule violates Section 26-23-6 and is cause to cancel any permit issued under this rule.

Permits shall be subject to termination or revocation under any one of the following:

1. The permit holder has made any misrepresentation of a material fact in his application, or any other communication to the Department or its representatives, which misrepresentation was material to the eligibility of the permit holder.

2. The permit holder is not qualified under R438-12-2 to hold a permit.

3. The permit holder after having received a permit has been convicted of a felony or of a misdemeanor which misdemeanor involves moral turpitude.

4. The permit holder does not comply with the display or possession requirements stated in R438-12-3.C.

R438-12-5. Published List of Authorized Individuals.

The Department shall publish annually, a list of individuals authorized to withdraw blood for determination of its alcoholic or drug content, when requested to do so by a peace officer. This list shall include the individual's name, mailing address, and permit number. The list shall be made available to all state and local law enforcement agencies, all local health departments, and any other person or agency requesting the information. The Department may publish amended lists when deemed necessary.

January 6, 2010 41-6a-523
Notice of Continuation January 20, 2012 26-1-30(2)(s)

R444. Health, Disease Control and Prevention, Laboratory Improvement.

R444-11. Rules for Approval to Perform Blood Alcohol Examinations.

R444-11-1. Definitions.

A. "CHEMIST" means any person conducting the blood alcohol determinations and meeting the minimum qualification of this rule.

B. "DIRECTOR" means the Director of the Division of Epidemiology and Laboratory Services.

C. "DEPARTMENT" means the Department of Health.

D. "LABORATORY" means any place in which examinations for the determination of blood alcohol level are performed.

E. "REVIEW" means a visit to a laboratory by a reviewer for the purpose of determining compliance with R444-11.

F. "REVIEWER" means a representative of the Director authorized to conduct a review.

G. "SUPERVISOR" means a person responsible for the performance of blood alcohol determinations, who meets the personnel requirements of this rule.

R444-11-2. Authorization and Administration.

A. Department - Powers and Duties

The Department, under the powers and duties conferred upon it by Section 26-1-30(2)(m), upon being assured that a laboratory wishing to become approved or to maintain approval status has satisfied the requirements for approval, as detailed below, shall approve such a laboratory to conduct examinations for the determinations of blood alcohol levels.

B. Responsibilities - Department

It shall be the responsibility of the Department to assist any laboratory in the State which desires to obtain approval to conduct examinations for the determination of blood alcohol levels to gain and maintain approval. Toward this end, the Department will offer training, laboratory reviews, procedure evaluation studies, and reference materials to any laboratory requesting the services.

C. Requirements for Approval

Any laboratory desiring to be approved to provide blood alcohol determinations must have official approval of the Department.

1. Approval is conditional on meeting the herein specified minimum standards for personnel and facilities, as well as the herein specified minimum technical standards for the procedures used to examine specimens submitted to that laboratory for the presence or absence of alcohol in the blood. In addition the laboratory shall:

a. successfully participate in an acceptable proficiency testing program offered or authorized by the Department;

b. report agreement with reference laboratories using the same or similar procedures. Standard methods of evaluation will be used;

c. maintain an on-going quality control program; and

d. agree to a not less than biennial review of the laboratory.

2. A laboratory is approved under this rule if the laboratory is Medicare-approved or holds a Clinical Laboratory Improvement Act of 1967 (CLIA) certificate, under 42 CFR part 493, 1990 edition, which is incorporated by reference, for the specialty or subspecialty associated with the testing covered by this rule.

Failure to meet the minimum requirements, as determined by review or performance evaluation, shall be sufficient grounds for withdrawal of approval until the minimum standards can be met.

D. Initial Approval - Provisional Approval

A laboratory that has not been previously approved but that wishes to be considered for approval must request, in writing, a review of its facilities. The review will be to determine whether the laboratory and the affected personnel meet the minimum standards as established below. The reviewer shall report his findings to the Director and recommend action to be taken.

E. Full Approval - Period During Which Approval is Valid

After evaluation of the report of the reviewer, the Director may grant approval to the laboratory for one calendar year, subject to annual renewal, providing the laboratory continues to meet minimum standards as determined by procedural evaluation or on-site observations of both physical facilities and technical performance.

The approved laboratory shall notify the Director in writing when changes of personnel occur and shall submit a curriculum vitae on new personnel performing duties in the chemistry-toxicology laboratory. This notification shall be submitted within ten days of the status change.

F. Revocation of Approval

Approval of any laboratory may be revoked if:

1. the laboratory changes to a method other than that for which it has been approved without prior approval from the Department;

2. any person other than the person qualified to perform the testing is permitted to perform and report the results of blood alcohol determinations;

3. results of proficiency testing indicate a lack of ability to perform at satisfactory levels;

4. required minimum standards for performance of the examination are not maintained; or

5. safety standards are not maintained for personnel performing these examinations or personnel working in the surrounding laboratory environment.

G. Reinstatement of a Disapproved Laboratory

A laboratory that has lost approval because of a change in procedures or through the loss of qualified personnel may have approval reinstated by:

1. requesting a laboratory review during which processing of specimens and testing procedures will be observed by the reviewer;

2. providing all necessary information for the evaluating of credentials of new personnel assigned to the laboratory section in which blood alcohol determinations are made; and

3. continuing to participate, satisfactorily, in the proficiency testing program.

A laboratory that has lost approval through an unacceptable performance in proficiency testing may request a review to determine the reason for unacceptable performance.

Upon being assured by the reviewer that corrections leading to satisfactory and acceptable performance have been made, the Director may reinstate approval based on compliance with this rule.

H. Publishing Lists of Approved Laboratories - Reports

The Department shall publish at least annually a list of laboratories meeting the minimum standards established under this rule. Included on the list shall be the name and location of the laboratory, the name of the director, supervisor, and the chemist qualified to perform the examinations. This list shall be sent to all municipal, county, and state law enforcement agencies and laboratory directors in the state. The Department may publish semi-annual amendments to the list in a newsletter.

R444-11-3. Minimum Standards - Methods to be Employed.

The following minimum standards are as the basis for approval of a laboratory to conduct examinations for the determination of blood alcohol levels.

A. Personnel Qualifications

Minimum educational requirements for a person performing chemical examinations for the determination of blood alcohol levels shall be a recognized Bachelor of Arts or

Bachelor of Science Degree or equivalent degree issued after a full course of resident instruction in one or more established and accredited institutions of higher education, with major work for a degree in one or more fields of chemistry, as shown by a transcript of credits. A Bachelor Degree in the biological sciences may be accepted where related work experience has been acquired, providing that the earned degree includes a minimum of 25 quarter hours of courses in chemistry. In addition to the bachelor degree or equivalent, the supervising chemist shall have demonstrated proficiency in blood alcohol determinations as gained by attendance at pertinent courses or the equivalent in practical clinical chemical laboratory training and experience.

Persons who have successfully completed a regular four year course in an established and accredited college or university, with major work leading to a degree in medical technology, providing the course shall have included not less than 25 quarter hours of chemistry, may also meet the minimum personnel requirements, provided subsequent training has been acquired in the field of clinical chemistry.

A person who is and who has been performing blood alcohol determinations for not less than two years, but who does not meet the above requirements, may also be qualified providing that, as determined by the Division of Epidemiology and Laboratory Services Advisory Committee, the person has completed not less than one year of pertinent education beyond the high school level, or has received training through a training program, providing the person is shown to be competent to perform these examinations as demonstrated by an examination and satisfactory participation in a proficiency testing program offered or authorized by the Department, and providing that the person is employed under the full-time supervision of a person meeting the qualifications presented in R444-11-3A.

Registration by nationally recognized certifying boards may be accepted by the Director, on recommendation of the Division of Epidemiology and Laboratory Services Advisory Committee, in lieu of the bachelor degree.

Technical personnel unable to meet these requirements may assist in the preparation and processing of specimens, but may not be responsible for any of the definitive analyses.

B. Required and Recommended Minimum Standards for Laboratory Facilities

The facilities provided for blood alcohol determinations shall meet reasonable standards for the procedure selected. There shall be sufficient space to process and examine the specimens commensurate with the workload of the laboratory. Facilities shall be clean, well-lighted, properly ventilated and with adequate temperature control to meet the requirements for the test performed in the laboratory. Adequate and proper storage facilities shall be available for the reagents used in the testing and shall be convenient to the area in which the tests are performed.

C. Laboratory Equipment and Supplies

All equipment, reagents, and glassware necessary for the satisfactory performance of blood alcohol determinations shall be on hand or readily available on the premises. Equipment shall be in good working order. Included in this equipment shall be all items specified for the procedure selected as recorded in techniques published in recognized professional publications.

Notice of Continuation January 20, 2012

R495. Human Services, Administration.
R495-810. Government Records Access and Management Act.
R495-810-1. Access to Department of Human Services Records.

A. Authority. This rule is authorized by Section 63G-2-204(2) and Section 62A-1-111.

B. Definitions. Words used in this rule are defined in Section 63G-2-103.

C. Requests for Access. Requests for records shall be submitted to any Department of Human Services office. If the record requested is maintained in that office, that office's designated GRAMA Officer will respond to the request. If the record is not maintained in the office where the request is filed, the request will be sent immediately to the appropriate Department of Human Services office.

R495-810-2. Fee Schedule for Records Copies.

A. Fee Rates.

1. Fees for copies are based on the number of records to be copied and are as follows:

a. paper: $.25 per side of sheet;

b. audio tape: $5.00 per tape; and

c. video tape: $15.00 per tape.

2. For records which require compiling and reporting in another format, a fee of $25.00 per hour may be charged, or $50.00 per hour if the request requires programmer/analyst assistance, however no charge may be made for the first quarter hour of staff time.

3. Mailing. The fee for mailing is the actual cost of postage.

B. Payment Waiver.

1. The Department of Human Services shall fulfill a record request without charge in accordance with Section 63G-2-203(4).

2. The Department shall require payment of future estimated fees before beginning to process a request when fees are expected to exceed $50 or the requester has not paid fees from previous requests.

R495-810-3. Records Modification and Clarification.

A. Hearings. Administrative Hearings regarding denied requests to amend records shall be conducted informally in accordance with Administrative Rule 497-100.

KEY: government documents
December 11, 2007 63G-2-204
Notice of Continuation January 17, 2012

R495. Human Services, Administration.
R495-878. Americans with Disabilities Act Grievance Procedures.
R495-878-1. Authority and Purpose.

(1) This rule is made under authority of Section 63A-1-111 and Subsection 63G-3-201(3). As required by 28 CFR 35.107, the Utah Department of Human Services, as a public entity that employs more than 50 persons, adopts and publishes the grievance procedures within this rule for the prompt and equitable resolution of complaints alleging any action prohibited by Title II of the Americans with Disabilities Act, as amended.

(2) The purpose of this rule is to implement the provisions of 28 CFR 35 which in turn implements Title II of the Americans with Disabilities Act, which provides that no individual shall be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by the department because of a disability.

R495-878-2. Definitions.

(1) "ADA Coordinator" means the employee assigned by the executive director to investigate and facilitate the prompt and equitable resolution of complaints filed by qualified persons with disabilities.

(2) "Department" means the Department of Human Services created by Section 62A-1-102.

(3) "Designee" means an individual appointed by the executive director to investigate allegations of ADA non-compliance in the event the ADA Coordinator is unable or unwilling to conduct an investigation for any reason, including a conflict of interest. A designee does not have to be an employee of the department; however, the designee must have a working knowledge of the responsibilities and obligations required of employers and employees by the ADA.

(4) "Director" means the head of the division of the Department affected by a complaint filed under this rule.

(5) "Disability" is defined in 28 CFR 35.104.

(6) "Executive Director" means the executive director of the department.

(7) "Major life activities" is defined in 28 CFR 35.104.

(8) "Qualified Individual" is defined in 28 CFR 35.104.

R495-878-3. Filing of Complaints.

(1) Any qualified individual or their authorized representative may file a complaint alleging noncompliance with Title II of the Americans with Disabilities Act, as amended, or the federal regulations promulgated thereunder.

(2) Qualified individuals or their authorized representatives shall file their complaints with the Department's ADA Coordinator, unless the complaint alleges that the ADA Coordinator was non-compliant, in which case qualified individuals shall file their complaints with the Department's designee.

(3) Qualified individuals or their authorized representatives shall file their complaints within 180 days after the date of the alleged noncompliance to facilitate the prompt and effective consideration of pertinent facts and appropriate remedies; however, the Executive Director has the discretion to direct that the grievance process be utilized to address legitimate complaints filed more than 180 days after alleged noncompliance.

(4) Each complaint shall:

(a) Be in writing and delivered to:
ADA Coordinator
Department of Human Services
195 North 1950 West
Salt Lake City, Utah 84116

(b) Include the complainant's name and address;

(c) Include the nature and extent of the qualified individual's disability;

(d) Describe the department's alleged discriminatory action in sufficient detail to inform the department of the nature and date of the alleged violation;

(e) Describe the action and accommodation desired; and

(f) Be signed by the complainant or by his legal representative.

(5) Complaints filed on behalf of classes or third parties shall describe or identify by name, if possible, the alleged victims of discrimination.

R495-878-4. Investigation of Complaints.

(1) The ADA coordinator or designee shall investigate complaints to the extent necessary to assure all relevant facts are collected and documented. This may include gathering all information listed in Subsection R495-878-3(4) of this rule if it is not made available by the complainant.

(a) If the ADA Coordinator requires additional information from the complainant to complete the investigation, the ADA Coordinator shall send the complainant a records release form. This form shall be returned within 10 days of notice.

(2) The ADA coordinator or designee may seek assistance from the Attorney General's staff and budget staff in determining what action, if any, should be taken on the complaint. The ADA coordinator or designee may also consult with the director of the affected division in making a recommendation.

(3) The ADA coordinator or designee shall consult with representatives from other state agencies that may be affected by the decision, including the Office of Planning and Budget, the Division of Risk Management, the Division of Facilities Construction Management, and the Office of the Attorney General before making any recommendation that would:

(a) involve an expenditure of funds beyond what is reasonably able to be accommodated within the applicable line item so that it would require a separate appropriation; or

(b) require facility modifications;

R495-878-5. Recommendation and Decision.

(1) If the ADA coordinator or designee is unable to make a recommendation within the 15 working day period, the complainant shall be notified in writing, or in another accessible format suitable to the complainant, stating why the recommendation is delayed and what additional time is needed.

(2) Within 30 calendar days after receiving the complaint, the ADA coordinator or designee shall recommend to the director what action, if any, should be taken on the complaint. The recommendation shall be in writing.

(3) The director may confer with the ADA coordinator or designee and the complainant and may accept or modify the recommendation to resolve the complaint. The director or designee shall render a decision within 10 working days after the director's receipt of the recommendation from the ADA coordinator or designee. The director shall take all reasonable steps to implement the decision. The director's decision shall be in writing, and shall be delivered to the complainant.

R495-878-6. Appeals.

(1) The complainant may appeal the director's decision to the executive director within ten working days after the complainant's receipt of the director's decision.

(2) The appeal shall be in writing.

(3) The executive director may name a designee to assist on the appeal. The ADA coordinator and the director's designee may not also be the executive director's designee for the appeal.

(4) In the appeal the complainant shall describe in sufficient detail why the decision does not effectively address the complainant's needs.

(5) The executive director or designee shall review the ADA coordinator's recommendation, the director's decision, and the points raised on appeal prior to reaching a decision. The executive director may direct additional investigation as necessary. The executive director shall consult with representatives from other state agencies that would be affected by the decision, including the Office of Planning and Budget, the Division of Risk Management, the Division of Facilities Construction Management, and the Office of the Attorney General before making any decision that would:

(a) involve an expenditure of funds beyond what is reasonably able to be accommodated within the applicable line item so that it would require a separate appropriation; or

(b) require facility modifications;

(6) The executive director shall issue a final decision within 15 working days after receiving the complainant's appeal. The decision shall be in writing, and shall be delivered to the complainant.

(7) If the executive director or designee is unable to reach a final decision within the 15 working day period, the complainant shall be notified in writing why the final decision is being delayed and the additional time needed to reach a final decision.

R495-878-7. Relationship to Other Laws.

This rule does not prohibit or limit the use of remedies available to individuals under:

(a) the state Anti-Discrimination Complaint Procedures, Section 34A-5-107, and Section 67-19-32;

(b) the Federal ADA Complaint Procedures, 28 CFR 35.170 through 28 CFR 35.178; or

(c) any other Utah State or federal law that provides equal or greater protection for the rights of individuals with disabilities.

R527. Human Services, Recovery Services.
R527-5. Release of Information.
R527-5-1. Statutory Authority and Purpose.

(1) The Office of Recovery Services (ORS) is authorized to adopt, amend, and enforce rules by Title 62A, Chapter 11, Section 107(8).

(2) This rule establishes how ORS records may be accessed under Title 63G, Chapter 2, the Government Records Access and Management Act (GRAMA).

R527-5-2. Definitions.

(1) Terms used in this rule are defined either explicitly in section 63G-2-103 or implicitly in the text of subsection 63G-2-201.

(2) "Restricted", as used in subsection 63G-2-201(3)(b), refers to records to which access is restricted pursuant to court rule, another state statute, federal statute, or federal regulation. These records are not subject to the procedures for access and disclosure outlined in GRAMA.

R527-5-3. Request for Release of Information.

(1) Written requests for information governed by GRAMA may be submitted in accordance with section 63G-2-204 to:

(a) Office of Recovery Services
ATTN: ORS Records
515 East 100 South
P.O. Box 45033
Salt Lake City, UT 84145-0033.

(2) Written requests for expedited release of information in accordance with section 63G-2-204 may be submitted to:

(a) Office of Recovery Services
ATTN: ORS Records
515 East 100 South
P.O. Box 45033
Salt Lake City, UT 84145-0033.

(3) Written requests for information sent by e-mail in accordance with section 63G-2-204 may be sent to:

(a) orsrecords@utah.gov.

R527-5-4. Appeal of Denial of Request for Release of Information.

A request to appeal the denial to access a record governed by GRAMA shall be submitted in accordance with Section 63G-2-401 to:

(1) the Director of the Office of Recovery Services for records maintained by ORS.

R527-5-5. Public Information.

(1) In accordance with Utah Code Sections 63G-2-103 (21) and 63G-2-201 a record is public unless classified as private, controlled, protected, or exempt.

(2) In accordance with Utah Code Section 63G-2-307, a record may be classified or reclassified at any time, including after the record has been requested.

R527-5-6. Private Information.

(1) Private records include the following:

(a) the address, date of birth, and Social Security number (SSN)of ORS case participants;

(b) information about state employees, former employees and applicants, except as provided for in 63G-2-302.

(2) Private records may be disclosed when:

(a) disclosure is required by other statutes;

(b) disclosure is for purposes directly connected with any investigation, prosecution, or criminal or civil proceeding conducted in connection with Utah's child support enforcement plan and all other programs administered by the Office of Recovery Services;

(c) a parent who has physical custody of the child, a parent without physical custody of the child, a relative to whom physical custody of the child has voluntarily been given, or a parent's attorney, demonstrates that the other party's address is required in order to serve legal process as the result of a judicial action to establish or modify an order or judgment for bona fide child support, spousal support, medical support, or child care. This information may not be disclosed if the person whose address is being sought has requested that case information be safeguarded;

(d) a parent who has physical custody of the child, a parent without physical custody of the child, a relative to whom physical custody of the child has been voluntarily given, or a parent's attorney, requests the other party's address related to parent-time based on Title 62A, Section 11, Subsection 304.4;

(e) income information is needed to establish a support order or review a support order for possible modification. This information may only be released to the court or administrative Presiding Officer, the other party or the other party's authorized representative;

(f) a case participant's Social Security number, address or employment information is needed by authorized governmental entities, including law enforcement agencies and;

(i) the requesting entity enforces, litigates or investigates civil, criminal or administrative law and the record is necessary to a proceeding or investigation; or

(ii) the requesting entity is one that collects information for pre-sentence, probationary or parole purposes.

(g) a governmental agency provides written assurance that the record is necessary to the governmental entity's duties and functions and will be used for a purpose similar to the purposes for which ORS collected or obtained the information and that the record use produces a public benefit outweighing the individual privacy right protecting the record;

(3) A private record shall be disclosed in accordance with the requirements of Utah Code Section 63G-2-202.

(4) Private records may not be released when a protective order has been issued in violation of 42 USC 654(26), or if there is reason to believe the release of information may result in physical or emotional harm to the person.

R527-5-7. Controlled Information.

(1) A record is controlled if it meets the requirements of Utah Code Section 63G-2-304.

(2) Controlled records can only be released under the provisions of Utah Code Section 63G-2-202(2).

R527-5-8. Protected Information.

(1) A record is protected if it meets the requirements of Utah Code Section 63G-2-305.

(2) Protected records can only be released under the provisions of Utah Code Section 63G-2-202(4).

R527-5-9. Restricted Records Exempt from Release Under GRAMA.

(1) A record is restricted from release by ORS if it meets the requirements of Utah Code Section 63G-2-201(3)(b).

R527-5-10. Fees.

(1) ORS may provide requested records without a charge unless:

(a) The request is for records which require programmer assistance.

(b) The request is a repeat request by the same requester for information already provided within the last three months.

(2) Contact ORS Records for specific fee amounts.

R549. Human Services, Public Guardian (Office of).
R549-1. Eligibility and Services Priority.
R549-1-1. Purpose.

(1) The purpose of this rule is to provide:

(a) Procedures and standards for the determination of eligibility and establish services as required by Title 62A, Chapter 14, Part-1, Utah Code.

R549-1-2. Authority.

(1) This rule is authorized pursuant to UCA 62A-14-105(2).

R549-1-3. Definitions.

(1) Terms used in this rule are defined in Section 62A-14-102.

R549-1-4. Eligibility.

(1) Individuals who have been found or are likely to be found legally incapacitated and in need of guardianship and/or conservatorship, and who have no other responsible, willing and able person to serve as their guardian, may be eligible for the services provided by Human Services, Office of Public Guardian "Office".

R549-1-5. Priority.

(1) The Office will give priority to incapacitated individuals whose need for guardianship and/or conservatorship is more critical than other incapacitated individuals, as follows and in the following order:

(a) Individuals who are in life-threatening situations, where immediate guardianship assistance or intervention is necessary for the preservation of life or the prevention of serious harm or injury.

(b) Individuals who are experiencing abuse, neglect or self-neglect or financial exploitation.

(c) Individuals who are at significant risk of experiencing abuse, neglect or self-neglect or financial exploitation.

Notice of Continuation February 1, 2012

R590. Insurance, Administration.
R590-70. Insurance Holding Companies.
R590-70-1. Authority.

This rule is adopted pursuant to Section 31A-2-201, Utah Code Annotated, which authorizes rules to implement the Insurance Code.

R590-70-2. Definitions.

A. "Executive officer" means any individual charged with active management and control, in an executive capacity, including a president, vice president, treasurer, secretary, controller, and any other individual performing for a person, whether incorporated or unincorporated, functions corresponding to those performed by the foregoing officers.

B. "Ultimate controlling person" means that person within an insurance holding company system which is not controlled by any other person.

C. All other terms used herein shall have the same meanings prescribed in Section 31A-1-301 of the Utah Code.

R590-70-3. Acquisition of Control - Statement Filing.

A. A person required to file a statement pursuant to Section 31A-16-103 shall furnish the required information on Holding Company Form A, entitled "Statement Regarding the Acquisition of Control of or Merger with a Domestic Insurer."

B. The applicant shall promptly advise the commissioner of any changes in the information so furnished arising subsequent to the date upon which such information was furnished but prior to the commissioner's disposition of the application.

R590-70-4. Registration of Insurers - Statement Filing.

A. An insurer required to file a statement pursuant to Section 31A-16-105 U.C.A., shall furnish the required information on Holding Company Form B, entitled "Insurance Holding Company System Registration Statement.

B. An amendment to Holding Company Form B shall be filed within 15 days after the end of any month in which the following occurs:

1. There is a change in the control of the registrant, in which case the entire form shall be made current;

2. There is a material change in the information given in Item 5 or Item 6 of the form, in which case the respective item shall be made current;

C. An amendment to Holding Company Form B shall be filed by May 1 of each year. Such amendment shall make current all information in Holding Company Form B.

R590-70-5. Alternative and Consolidated Registrations.

A. Any authorized insurer may file a registration statement on behalf of any affiliated insurer or insurers which are required to register under Section 31A-16-105 U.C.A. A registration statement may include information regarding any insurer to the insurance holding company system even if such insurer is not authorized to do business in this State. In lieu of filing a registration statement on Holding Company Form B, the authorized insurer may file a copy of the registration statement or similar report which it is required to file in its State of domicile, provided:

1. the statement or report contains substantially similar information required to be furnished on Holding Company Form B; and

2. the filing insurer is the principal insurance company in the insurance holding company system.

B. The question of whether the filing insurer is the principal insurance company in the insurance holding company system is a question of fact and an insurer filing a registration statement or report in lieu of Holding Company Form B on behalf of an affiliated insurer, shall set forth a simple statement of facts which will substantiate the filing insurer's claim that it, in fact, is the principal insurer in the insurance holding company system.

C. With the prior approval of the commissioner, an unauthorized insurer may follow any of the procedures which could be done by an authorized insurer under paragraph (a) above.

R590-70-6. Disclaimers and Termination of Registration.

A disclaimer of affiliation pursuant to Section 31A-16-105(10) U.C.A., or a request for termination of registration pursuant to Section 31A-16-105(6) U.C.A., claiming that a person does not, or will not upon the taking of some proposed action, control any other person (hereinafter referred to as the "subject") shall contain the following information:

A. the number of authorized, issued and outstanding voting securities of the subject;

B. with respect to the person whose control is denied and all affiliates of such person:

1. The number and percentage of shares of the subject's voting securities which are held of record or known to be beneficially owned, and the number of such shares concerning which there is a right to acquire, directly or indirectly,

2. Information as to all transactions in any voting securities of the subject which were effected during the past six months by such persons.

C. All material relationships and bases for affiliation between the subject and the person whose control is denied and all affiliates of such person.

D. A statement explaining why such person should not be considered to control the subject.

R590-70-7. Extraordinary Dividends and Other Distributions.

Requests for approval of extraordinary dividends or any other extraordinary distribution shall include the following:

A. the date established for payment of the dividend:

B. a statement as to whether the dividend is to be in cash or other property and, if in property, the fair market value of such property together with an explanation of the basis for valuation;

C. the amounts and dates of dividends paid in the last 12 month period (including the date proposed for payment of the dividend for which approval is sought);

D. a balance sheet and statement of income for the period intervening from the last annual statement filed with the commissioner and the end of the month preceding the month in which the request for dividend approval is submitted;

E. a brief statement as to the effect of the proposed dividend upon the insurer's surplus and the reasonableness of surplus in relation to the insurer's outstanding liabilities and the adequacy of surplus relative to the insurer's financial needs.

R590-70-8. Forms - General Requirements.

A. Forms A, B, C, and D are intended to be guides in the preparation of the statements required by Sections 31A-16-103, 31A-16-105, and 31A-16-106. They are not intended to be blank forms which are to be filled in. These statements filed shall contain the numbers and captions of all items, but the text of the items may be omitted provided the answers thereto are prepared in such a manner as to indicate clearly the scope and coverage of the items. All instructions, whether appearing under the items of the form or elsewhere therein, are to be omitted. Unless expressly provided otherwise, if any item is inapplicable or the answer thereto is in the negative, an appropriate statement to that effect shall be made.

B. Three complete copies of each statement including exhibits and all other papers and documents filed as a part thereof, shall be filed with the commissioner by personal

delivery or mail addressed to: Insurance Commissioner of the State of Utah. A copy of Form C shall be filed in each state in which an insurer is authorized to do business, if the commissioner of that state has notified the insurer of its request in writing, in which case the insurer has 14 days from receipt of the notice to file such form. At least one of the copies shall be manually signed in the manner prescribed on the form. Unsigned copies shall be conformed. If the signature of any person is affixed pursuant to a power of attorney or other similar authority, a copy of such power of attorney or other authority shall also be filed with the statement.

C. Statements should be prepared on paper 8 1/2"x 11" in size and preferably bound at the top or the top left-hand corner. Exhibits and financial statements, unless specifically prepared for the filing, may be submitted in their original size. All copies of any statement, financial statements, or exhibits shall be clear, easily readable and suitable for photocopying. Debits in credit categories and credits in debit categories shall be designated so as to be clearly distinguishable as such on photocopies. Statements shall be in the English language and monetary values shall be stated in United States currency. If any exhibit or other paper or document filed with the statement is in a foreign language, it shall be accompanied by a translation into the English language and any monetary value shown in a foreign currency normally shall be converted into United States currency.

D. Forms A, B, C, and D can be obtained from the Utah State Insurance Department.

R590-70-9. Forms - Incorporation by Reference, Summaries and Omissions.

A. Information required by any item of Form A, Form B or Form D may be incorporated by reference in answer or partial answer to any other item. Information contained in any financial statement, annual report, proxy statement, statement filed with a governmental authority, or any other document may be incorporated by reference in answer or partial answer to any item of Form A, Form B or Form D provided such document or paper is filed as an exhibit to the statement. Excerpts of documents may be filed as exhibits if the documents are extensive. Documents currently on file with the commissioner which were filed within three years need not be attached as exhibits. References to information contained in exhibits or in documents already on file shall clearly identify the material and shall specifically indicate that such material is to be incorporated by reference in answer to the item. Matter shall not be incorporated by reference in any case where such incorporation would render the statement incomplete, unclear or confusing.

B. Where an item requires a summary or outline of the provisions of any document, only a brief statement shall be made as to the pertinent provisions of the document. In addition to such statement, the summary or outline may incorporate by reference particular parts of any exhibit or document currently on file with the commissioner which was filed within three years and may be qualified in its entirety by such reference. In any case where two or more documents required to be filed as exhibits are substantially identical in all material respects except as to the parties thereto, the dates of execution, or other details, a copy of only one of such documents need be filed with a schedule identifying the omitted documents and setting forth the material details in which such documents differ from the documents a copy of which is filed.

R590-70-10. Forms-Information Unknown or Unavailable and Extension of Time to Furnish.

A. Information required need be given only insofar as it is known or reasonably available to the person filing the statement. If any required information is unknown and not reasonably available to the person filing, either because the obtaining thereof would involve unreasonable effort or expense, or because it rests peculiarly within the knowledge of another person not affiliated with the person filing, the information may be omitted, subject to the following conditions:

(1) The person filing shall give such information on the subject as it possesses or can acquire without unreasonable effort or expense, together with the sources thereof; and

(2) The person filing shall include a statement either showing that unreasonable effort or expense would be involved or indicating the absence of any affiliation with the person within whose knowledge the information rests and stating the result of a request made to such person for the information.

B. If it is impractical to furnish any required information, document or report at the time it is required to be filed, there may be filed with the commissioner as a separate document:

(1) identifying the information, document or report in question;

(2) stating why the filing thereof at the time required is impractical; and

(3) requesting an extension of time for filing the information, document or report to a specified date. The request for extension shall be deemed granted unless the commissioner within 60 days after receipt thereof enters an order denying the request.

R590-70-11. Forms - Additional Information and Exhibits.

In addition to the information expressly required to be included in Form A, Form B, Form C and Form D, there shall be added such further material information, if any, as may be necessary to make the information contained therein not misleading. The person filing may also file such exhibits as it may desire in addition to those expressly required by the statement. Such exhibits shall be so marked as to indicate clearly the subject matters to which they refer. Changes to Forms A, B, C or D shall include on the top of the cover page the phrase: "Change No. (insert number) to" and shall indicate the date of the change and not the date of the original filing.

R590-70-12. Summary of Registration - Statement Filing.

An insurer required to file an annual registration statement pursuant to Section 31A-16-105, Utah Code is also required to furnish information required on Form C, hereby made a part of these regulations. An insurer shall file a copy of Form C in each state in which the insurer is authorized to do business, if requested by the commissioner of that state.

R590-70-13. Separability.

If any provision of this rule or the application thereof to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of such provision to other persons or circumstances shall not be affected thereby.

KEY: insurance law
1992 31A-2-201
Notice of Continuation January 10, 2012

R590. Insurance, Administration.

R590-95. Rule to Permit the Same Minimum Nonforfeiture Standards for Men and Women Insureds Under the 1980 CSO and 1980 CET Mortality Tables.

R590-95-1. Authority.

This rule is promulgated by the Insurance Commissioner pursuant to Subsections 31A-2-201 and 31A-22-408 Utah Code Annotated.

R590-95-2. Purpose.

The purpose of this rule is to permit individual life insurance policies to provide the same cash surrender values and paid-up nonforfeiture benefits to both men and women. No change in minimum valuation standards is implied by this rule.

R590-95-3. Definitions.

A. As used in this rule, "1980 CSO Table, with or without Ten-Year Select Mortality Factors" means that mortality table, consisting of separate rates of mortality for male and female lives, developed by the Society of Actuaries Committee to Recommend New Mortality Tables for Valuation of Standard Individual Ordinary Life Insurance, incorporated in the 1980 NAIC Amendments to the Model Standard Valuation Law and Standard Nonforfeiture Law for Life Insurance, and referred to in those models as the Commissioners 1980 Standard Ordinary Mortality Table, with or without Ten-Year Select Mortality Factors.

B. As used in this rule, "1980 CSO Table (M), with or without Ten-Year Select Mortality Factors" means that mortality table consisting of the rates of mortality for male lives from the 1980 CSO Table, with or without Ten-Year Select Mortality Factors.

C. As used in this rule, "1980 CSO Table (F), with or without Ten-Year Select Mortality Factors means that mortality table consisting of the rates of mortality for female lives from the 1980 CSO Table with or without Ten-Year Select Mortality Factors.

D. As used in this rule, "1980 CET Table" means that mortality table consisting of separate rates of mortality for male and female lives, developed by the Society of Actuaries Committee to Recommend New Mortality Tables for Valuation of Standard Individual Ordinary Life Insurance, incorporated in 1980 NAIC Amendments to the Model Standard Valuation Law and Standard Nonforfeiture Law for Life Insurance, and referred to in those models as the Commissioners 1980 Extended Term Insurance Table.

E. As used in this rule, "1980 CET Table (M)" means that mortality table consisting of the rates of mortality for male lives from the 1980 CET Table.

F. As used in this rule, "1980 CET Table (F)" means that mortality table consisting of the rates of mortality for female lives from the 1980 CET Table.

G. As used in this rule, "1980 CSO and 1980 CET Smoker and Nonsmoker Mortality Tables" mean the mortality tables with separate rates of mortality for smokers and nonsmokers derived from the 1980 CSO and 1980 CET Mortality Tables by the Society of Actuaries Task Force on Smoker/Nonsmoker Mortality and adopted by the NAIC in December 1983.

R590-95-4. Rule A.

For any policy of insurance on the life of either a male or female insured delivered or issued for delivery in this state after the operative date of Subsection 31A-22-408(6)(d), U.C.A. for that policy form,

(i) a mortality table which is a blend of the 1980 CSO Table (M) and the 1980 CSO Table (F) with or without Ten-Year Select Mortality Factors may at the option of the company be substituted for the 1980 CSO Table, with or without Ten-Year Select Mortality Factors, and

(ii) a mortality table which is of the same blend as used in (i) but applied to form a blend of the 1980 CET Table (M) and the 1980 CET Table (F) may at the option of the company be substituted for the 1980 CET Table for use in determining minimum cash surrender values and amounts of paid-up nonforfeiture benefits.

The following tables will be considered as the basis for acceptable tables:

A. 100% Male 0% Female for tables to be designated as "the 1980 CSO-A" and "1980 CET-A" tables.

B. 80% Male 20% Female for tables to be designated as the "1980 CSO-B" and "1980 CET-B" tables.

C. 60% Male 40% Female for tables to be designated as the "1980 CSO-C" and "1980 CET-C" tables.

D. 50% Male 50% Female for tables to be designated as the "1980 CSO-D" and "1980 CET-D" tables.

E. 40% Male 60% Female for tables to be designated as the "1980 CSO-E" and "1980 CET-E" tables.

F. 20% Male 80% Female for tables to be designated as the "1980 CSO-F" and "1980 CET-F" tables.

G. 0% Male 100% Female for tables to be designated as the "1980 CSO-G" and "1980 CET-G" tables.

Tables A and G are not to be used with respect to policies issued on or after January 1, 1985 except where the proportion of persons insured is anticipated to be 90% or more of one set or the other or except for certain policies converted from group insurance. Such group conversions issued on or after January 1, 1986 must use mortality tables based on the blend of lives by sex expected for such policies if such group conversions are considered as extensions of the Norris decision. This consideration has not been clearly defined by court or legislative action in all jurisdictions. The values of 1000qx for blended Tables B, C, D, E and F are shown in Appendix I. The letter in Appendix II states the method by which selection factors may be obtained. Table A is the same as 1980 CSO Table (M) and 1980 CET Table (M) and Table G is the same as 1980 CSO Table (F) and 1980 CET Table (F). Appendices I and II are available from the Insurance Department.

R590-95-4A. Rule B.

In determining minimum cash surrender values and amounts of paid-up nonforfeiture benefits for any policy of insurance on the life of either a male or female insured on a form of insurance with separate rates for smokers and nonsmokers delivered or issued for delivery in this state after the operative date of Subsection 31A-22-408-(6)(d) for that policy form, in addition to the mortality tables that may be used according to Section 4,

(i) a mortality table which is a blend of the male and female rates of mortality according to the 1980 CSO Smoker Mortality Table, in the case of lives classified as smokers, or the 1980 CSO Nonsmoker Mortality Table, in the case of lives classified as nonsmokers, with or without Ten-Year Select Mortality Factors, may at the option of the company be substituted for the 1980 CSO Table, with or without Ten-Year Select Mortality Factors, and

(ii) a mortality table which is of the same blend as used in (i) but applied to form a blend of the male and female rates of mortality according to the corresponding 1980 CET Smoker Mortality Table or 1980 CET Nonsmoker Mortality Table may at the option of the company be substituted for the 1980 CET Table.

The following blended mortality tables will be considered acceptable:

SA: 100% Male 0% Female smoker tables designated as "1980 CSO-SA" and "1980 CET-SA" Tables.

SB: 80% Male 20% Female smoker tables designated as "1980 CSO-SB" and "1980 CET-SB" Tables.

SC: 60% Male 40% Female smoker tables designated as

"1980 CSO-SC" and "1980 CET-SC" Tables.

SD: 50% Male 50% Female smoker tables designated as "1980 CSO-SD" and "1980 CET-SD" Tables.

SE: 40% Male 60% Female smoker tables designated as "1980 CSO-SE" and "1980 CET-SE" Tables.

SF: 20% Male 80% Female smoker tables designated as "1980 CSO-SF" and "1980 CET-SE" Tables.

SG: 0% Male 100% Female smoker tables designated as "1980 CSO-SG" and 1980 CET-SG" Tables.

NA: 100% Male 0% Female nonsmoker tables designated as "1980 CSO-NA" and "1980 CET-NA" Tables.

NB: 80% Male 20% Female nonsmoker tables designated as "1980 CSO-NB" and "1980 CET-NB" Tables.

NC: 60% Male 40% Female nonsmoker tables designated as "1980 CSO-NC" and "1980 CET-NC" Tables.

ND: 50% Male 50% Female nonsmoker tables designated as "1980 CSO-ND" and "1980 CET-ND" Tables.

NE: 40% Male 60% Female nonsmoker tables designated as "1980 CSO-NE" and "1980 CET-NE" Tables.

NF: 20% Male 80% Female nonsmoker tables designated as "1980 CSO-NF" and "1980 CET-NF" Tables.

NG: 0% Male 100% Female nonsmoker tables designated as "1980 CSO-NG" and "1980 CET-NG" Tables.

Tables SA, SG, NA and NG are not acceptable as blended tables unless the proportion of persons insured is anticipated to be 90% or more of one sex or the other.

R590-95-5. Unfair Discrimination.

It shall not be a violation of Subsection 31A-23-302(3) of Utah Code for an insurer to issue the same kind of policy of life insurance on both a sex distinct and sex neutral basis.

R590-95-6. Separability.

If any provision of this rule or the application thereof to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of such provision to other persons or circumstances shall not be affected thereby.

KEY: insurance law
1993 **31A-2-101**
Notice of Continuation January 10, 2012 **31A-2-201**
31A-22-408

R590. Insurance, Administration.
R590-114. Letters of Credit.
R590-114-1. Authority.

This rule is adopted pursuant to Section 31A-2-201(3), which authorizes rules to implement the Insurance Code, and Section 31A-17-404(3), which provides for a rule to determine the form of letters of credit used as security to protect a ceding insurer in a transaction of reinsurance.

R590-114-2. Purpose and Scope.

A. The purpose of this rule is to determine, in accordance with the guidelines of Section 31A-17-404(3), the form of letter of credit security which will be acceptable to protect a ceding insurer in a transaction of reinsurance in which the alternative security factors of Section 31A-17-404(3) or 31A-17-404(6) are not present and funds of the reinsurer are retained by the ceding insurer in the form of a letter of credit. Security is maintained in order that credit for the reinsurance may be allowed the ceding insurer as either an asset or a deduction from liabilities. The allowance or disallowance of credit in reinsurance transactions may be used to determine compliance with other financial requirements of the Insurance Code.

B. This rule shall apply to all persons transacting insurance under the Utah Insurance Code.

R590-114-3. Definitions.

In addition to the definitions of Section 31A-1-301, the following definitions shall apply for the purposes of this rule:

A. "Clean" shall refer to a letter of credit which does not require the presentation of any documents other than a sight draft for a draw upon available funds.

B. "Evergreen clause" shall refer to a provision in a letter of credit which prevents expiration of the letter unless advance notice is given by the issuer.

R590-114-4. Rule.

A. Letter of Credit requirements. A letter of credit issued to comply with Section 31A-17-404(3)(c)(iii), shall meet the following requirements. Full compliance with this rule shall be accomplished if the letter of credit takes the form of the "Model Letter of Credit", which is available from the Insurance Department. Letters of credit:

1. Shall be issued by a bank or trust company which is a member of the Federal Reserve system;
2. Shall name the ceding insurer as the sole beneficiary;
3. Shall be "clean", as defined;
4. Shall be unconditional and not subject to any qualifications outside the letter of credit;
5. May not contain references to any other agreements, documents or entities;
6. Shall be irrevocable, and may not be reduced or revoked without the written consent of the beneficiary;
7. Shall contain an "evergreen clause", as defined;
8. Shall have a term of not less than one year and shall be automatically extended for not less than one additional year unless the issuer, not less than 30 days prior to expiration, notifies both the ceding insurer and the reinsurer that the letter will not be renewed;
9. Shall state that the obligation of the bank is not contingent upon reimbursement;
10. Shall state whether it is subject to the laws of this state;
11. Shall provide that all drafts drawn be presentable at a bank office in the United States;
12. May contain a boxed reference section with the name of the applicant and other appropriate information for internal identification only, not to affect the terms of the letter or the obligations of the bank.

B. Nonrenewal or withdrawal of a letter of credit. In the event of nonrenewal or withdrawal of a letter of credit, the ceding insurer shall be able to withdraw the balance of the letter of credit and place the resulting sums in trust to secure continuing obligations under the reinsurance contract until it receives a renewal letter of credit or an alternative form of security which meets the standards of this rule or the Insurance Code.

C. Inspection. A letter of credit used as security under this rule shall be readily available for inspection by the commissioner or his designee upon request.

R590-114-5. Separability.

If any provision of this rule or its application to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of the provision to other persons or circumstances may not be affected.

KEY: insurance
1994 31A-17-404
Notice of Continuation January 10, 2012

R590. Insurance, Administration.
R590-142. Continuing Education Rule.
R590-142-1. Authority.

This rule is promulgated pursuant to:

(1) Subsection 31A-2-201(3) that authorizes the commissioner to adopt rules to implement the provisions of the Utah Insurance Code;

(2) Subsection 31A-23a-202(1) that authorizes the commissioner to adopt a rule to prescribe the continuation requirements for a producer and a consultant;

(3) Subsection 31A-23a-202(5) that authorizes the commissioner to adopt a rule to prescribe the processes and procedures for continuing education provider registration and course approval;

(4) Subsection 31A-26-206(1) that authorizes the commissioner to adopt a rule to prescribe the continuing education requirements for an adjuster; and

(5) Subsection 31A-35-401.5 that authorizes the commissioner to adopt a rule to implement the continuing education requirement for renewal of a bail bond producer license.

R590-142-2. Purpose and Scope.

(1) The purpose of this rule is to implement the continuing education requirements of Sections 31A-23a-202, 31A-26-206, and 31A-35-401.5.

(2) This rule applies to all continuing education providers and individual producer, consultant, and adjuster licensees under Sections 31A-23a-202, 31A-26-206, and 31A-35-401.5.

R590-142-3. Definitions.

For the purpose of this rule the Commissioner adopts the definitions as set forth in Sections 31A-1-301, 31A-23a-102, 31A-26-102, 31A-35-102, and the following:

(1) "Classroom course" means:

(a) a course of study that:

(i) is taught on-site by a live instructor at the same location;

(ii) requires monitoring of a student; and

(iii) may require examination of course content to be performed by a student; or

(b) an interactive course of study that:

(i) is taught by a live instructor from a separate location;

(A) is delivered to a student via:

(I) computer;

(II) teleconference;

(III) webinar; or

(IV) some other method acceptable to the commissioner; or

(ii) is not taught by a live instructor;

(A) is delivered to a student via computer; or

(B) some other method acceptable to the commissioner;

(iii) requires two-way interaction between a student and the instrument of instruction;

(iv) requires monitoring of a student; and

(v) requires examination of course content to be performed by a student.

(2) "Credit hour" means one 50-minute period of insurance related instruction consisting of:

(a) a classroom course;

(b) a home study course; or

(c) some other method acceptable to the commissioner;

(3) "Designated internet site" means an internet site that is designated by the commissioner for a provider to submit a student's course completion information.

(4) "Home-study course" means a non-interactive course of study that:

(a) is not taught by a live instructor;

(b) is completed by a student via:

(i) computer;

(ii) video recording, if the video is professionally produced;

(iii) text book; or

(iv) some other method acceptable to the commissioner;

(c) does not require two-way interaction between a student and the instrument of instruction;

(d) does not require monitoring of a student; and

(e) requires examination of course content to be performed by the student.

(5) "Insurance related instruction" means that amount of time that is assigned by the commissioner to a course of study to satisfy the requirements of continuing education credit hours under this rule, in which assignment of value shall be made on the basis of:

(a) content;

(b) presentation; and

(c) format.

(6) "Monitoring of a student" means a person or system in place who verifies participation in and completion of a course.

(7) "Nonprofit provider" means an organization that fits the definition of nonprofit corporation as defined in 16-6a-102(34).

(8) "Provider" means a person who offers a course of study or program for credit to an applicant to satisfy the continuing education requirements of this rule.

R590-142-4. Continuing Education Requirements.

A producer, consultant, and adjuster licensee shall comply with, and a continuing education provider shall be familiar with, the following continuing education requirements:

(1) the number of credit hours of continuing education insurance related instruction required to be completed biennially as a prerequisite to license renewal shall be in accordance with Sections 31A-23a-202, 31A-26-206, and 31A-35-401.5;

(2) a licensee may obtain continuing education credit hours at any time during the two-year licensing period;

(3) not more than half of the total credit hours required shall be satisfied by courses provided by insurers;

(4) upon renewal of a license, no continuing education credit hours in excess of the number required to renew the license may be carried over or applied to any subsequent licensing period;

(5) a licensee shall attend a course in its entirety in order to receive credit for the course;

(6) a licensee may repeat a course for credit but will not be permitted to take a course for credit more than once in a license continuation period;

(7) a nonresident licensee who satisfies the licensee's home state's continuing education requirement is considered to have satisfied Utah's continuing education requirement; and

(8) a licensee with a professional designation may use the continuing education credit hours required to maintain the designation to satisfy the requirement of the commissioner if:

(a) the hours are sufficient to meet the current continuing education requirement described in Sections 31A-23a-202 and 31A-26-206; and

(b) the professional designation consists of one or more of the following:

(i) Accredited Customer Service Representative (ACSR);

(ii) Accredited Financial Examiner (AFE) or Certified Financial Examiner (CFE);

(iii) Accredited Insurance Examiner (AIE) or Certified Insurance Examiner (CIE);

(iv) Certified Financial Planner (CFP);

(v) Certified Insurance Counselor (CIC);

(vi) Certified Risk Manager (CRM);

(vii) Registered Employee Benefits Consultant (REBC);

(viii) Chartered Property Casualty Underwriter (CPCU)

with completion of the Continuing Professional Development (CPD) program; or

(ix) Certified Life Underwriter (CLU), Chartered Financial Consultant (ChFC) or Registered Health Underwriter (RHU) with completion of the Professional Achievement in Continuing Education (PACE) recertification program.

R590-142-5. Experience Credit.

(1) Continuing education credit hours may be granted to a licensee for experience credit at the discretion of the commissioner, including credit for experience such as the authoring of an insurance book, course or article.

(2) Membership by a producer or consultant in a state or national professional producer or consultant association is considered to be a substitute for two credit hours for each year during which the producer or consultant is a member of the association, except as provided in (3) below.

(3) No more than two hours of continuing education credit shall be granted per year during the two-year license continuation period, regardless of the number of professional associations of which the producer or consultant is a member.

(4) An approved continuing education course taught by an approved instructor holding a Utah producer, consultant, or adjuster license shall receive twice the number of credit hours allocated by the commissioner for the course, except as provided in (5) below.

(5) Credit for instruction of a course shall be granted no more than once per license renewal period for each course taught.

(6) Continuing education experience credit shall not be granted for committee service.

R590-142-6. Controls and Reporting of Credit Hours.

(1) Within 14 days of completion of a course of study, the provider shall:

(a) furnish to each student successfully completing the course a certificate of completion; and

(b) electronically submit a course completion record to a designated Internet site identifying the student and course information for each student that completed the course.

(2) In the event the provider fails to notify the commissioner of a student's course completion, the licensee may use the certificate of completion as proof of having successfully completed the course.

(3) The provider shall keep proof of successful electronic attendance submission on file for a period of at least the current calendar year plus two years.

R590-142-7. Course Requirements.

(1) Prior to offering a course for credit in Utah, a person must register as a provider and submit a completed continuing education course filing form and course outline for review by the commissioner.

(2) Upon receipt of a completed continuing education course filing form and course outline, the commissioner shall:

(a) approve a course as qualifying for credit in accordance with the standards of this rule;

(b) issue a course number; and

(c) assign the number of hours to be awarded to the approved course; or

(d) disapprove a course as not qualifying for credit; and

(e) furnish an explanation of the reason for disapproval of the course.

(3) A course must be submitted to and approved by the commissioner at least 30 days prior to being offered, except that post approval of a course may be granted by the commissioner upon submission of a written request and supporting documentation of a course attended.

(4) A course advertisement shall not state or imply that a course has been approved by the commissioner unless written confirmation of the approval has been received by the provider.

(5) A department employee may attend a course at no cost for the purpose of auditing the course for compliance.

(6) The following course topics are examples of subject areas that qualify for approval if they contribute to the knowledge and professional competence of an individual licensee as a producer, consultant, or adjuster, and demonstrate a direct and specific application to insurance:

(a) a particular line of insurance:

(b) investments or securities in connection with variable contracts;

(c) principles of risk management;

(d) insurance laws and administrative rules;

(e) tax laws related to insurance;

(f) accounting/actuarial considerations in insurance;

(g) business or legal ethics; and

(h) other course subject areas may be acceptable if the provider can demonstrate that they contribute to professional competence and otherwise meet the standards set forth in this rule.

(7) The following course topics are examples of subject areas that do not qualify for approval:

(a) computer training and software presentations;

(b) motivation;

(c) psychology;

(d) sales training;

(e) communication skills;

(f) recruiting;

(g) prospecting;

(h) personnel management;

(i) time management; and

(j) any course not in accordance with this rule.

(8) The following continuing education standards must be met for a course to qualify for continuing education credit:

(a) the course must have significant intellectual or practical content to enhance and improve the insurance knowledge and professional competence of participants;

(b) the course must be developed by persons who are qualified in the subject matter and instructional design;

(c) the course content must be up to date;

(d) the instructor must be qualified with respect to course content and teaching methods;

(e) the instructor may be considered qualified if through formal training or experience, the instructor has obtained sufficient knowledge to competently instruct the course;

(f) the number of participants and physical facilities for a course must be consistent with the teaching method specified;

(g) the course must include some means for evaluating the quality of the course content;

(h) the course must provide for a method to authenticate each student's identity; and

(i) the course must be taught in a manner compliant with the Americans With Disabilities Act to enable licensees with a physical or mental disability to complete the continuing education requirements.

(9) The following are additional requirements for an interactive computer course of study that is not taught by a live instructor:

(a) provide during each hour of the course at least four interactive inquiry periods that include one or more of the following type of exam questions:

(i) multiple choice

(ii) matching; or

(iii) true false;

(b) the inquiry periods shall occur at regular and relatively evenly-spaced intervals between each period;

(c) the inquiry periods shall cover material from the applicable section of the course that was presented to the

student;

(d) one of the inquiry periods must be administered at the end of the course;

(e) identify all incorrect responses and inform the student of the correct response with an explanation of the correct answer;

(f) require answering 70% of the inquiries for each period correctly to demonstrate mastery of the current section, including the final section, before the student is allowed by the program to proceed to the next section or complete the course;

(g) in the event a student does not achieve the 70% correct response rate necessary to advance to the next section, generate a different set of inquiries for the section, which may be repeated as necessary on a random or rotating basis;

(h) provide a method to reasonably authenticate the student's identity on a periodic hourly basis, including upon entering, during, and exiting the course; and

(i) provide for a method to directly transmit the final course completion results to the provider or a printed course completion receipt to be sent to the provider for issuance of a completion certificate.

(10) A continuing education course shall not be offered or taught by a person who has:

(a) a lapsed, surrendered, suspended, or revoked provider registration;

(b) a suspended or revoked insurance license; or

(c) been prohibited from teaching a course.

(11) Continuing education credit may not be granted for a course that is:

(a) not approved by the commissioner; or

(b) offered or taught by a person who has:

(i) a lapsed, surrendered, suspended, or revoked provider registration; or

(ii) been prohibited from teaching a course.

R590-142-8. Provider Requirements.

(1) A provider or a state or national professional producer or consultant association may:

(a) offer a qualified course for a license type or line of authority on a geographically accessible basis; and

(b) collect a reasonable fee for funding and administration of a continuing education program, subject to the review and approval of the commissioner.

(2) A person must register with the commissioner as a provider prior to acting as a provider in Utah.

(3) To initially register as a provider, a person must:

(a) electronically submit a completed provider registration form;

(b) submit a course outline that includes information regarding the course content and the number of credit hours requested for the course; and

(c) pay an initial registration fee, as identified in Rule R590-102, except as provided in (4) below.

(4) A nonprofit provider is not required to pay a registration fee.

(5) To renew a provider registration, a provider, other than a non-profit provider, must pay an annual renewal fee, as identified in Rule R590-102, prior to the annual renewal date.

(6) To renew a non-profit provider registration, electronic notification must be submitted to the commissioner prior to the annual renewal date, of the intent to renew the registration.

(7) Prior to a course being taught, a provider shall:

(a) post the course offering to a designated internet site;

(b) provide the commissioner with the name and resume of the instructor or instructors who will be teaching the course; and

(c) include identifying information as to any insurance license previously or currently held by the instructor or instructors who will be teaching the course.

(8) A provider shall report to the commissioner:

(a) an administrative action taken against the provider in any jurisdiction; and

(b) a criminal prosecution taken against the provider in any jurisdiction.

(9) The report required by Subsection (8) shall:

(a) be filed:

(i) at the time of submitting the initial provider registration; and

(ii) within 30 days of the:

(A) final disposition of the administrative action; or

(B) initial appearance before a court; and

(b) include a copy of the complaint or other relevant legal documents related to the action or prosecution described in Subsection (8).

(10) The commissioner may prohibit any person from acting as a provider or instructor in Utah if the commissioner determines that:

(a) the person is not competent and trustworthy; or

(b) the person or course of study fails to meet the qualifying standards.

R590-142-9. Loss of Provider Registration and Course Disapproval.

(1) A provider registration, other than a non-profit provider registration, shall lapse if a provider fails to pay an annual renewal fee prior to the annual renewal date.

(2) A non-profit provider registration shall lapse if electronic notification of the intent to renew the registration is not submitted to the commissioner prior to the annual renewal date.

(3) To reinstate a lapsed or surrendered provider registration, other than a non-profit provider registration, a provider must:

(a) submit a completed provider registration form; and

(b) pay a reinstatement fee, as identified in Rule R590-102.

(4) To reinstate a lapsed or surrendered non-profit provider registration, a non-profit provider must submit a completed provider registration form.

(5) A provider registration may be suspended or revoked, an instructor prohibited from teaching a course, or a course disapproved, if the commissioner determines that:

(a) a course teaching method or course content no longer meets the standards of this rule;

(b) a provider reported that an individual had completed a course in accordance with the standards furnished for course credit, when in fact the individual has not done so;

(c) a provider or instructor conducting a course instructs for less than the number of credit hours approved by the commissioner, but reports the full credits for the individual attending the course;

(d) credit for a course was not electronically reported to a designated internet site in a timely manner for an individual who satisfactorily completed a course in accordance with the standards furnished for course credit;

(e) a provider or instructor:

(i) lacks sufficient education or experience in the subject matter of the course;

(ii) has had a provider registration suspended or revoked in another jurisdiction;

(iii) has had an insurance license suspended or revoked; or

(iv) is otherwise no longer qualified in accordance with the standards of this rule; or

(f) there is other good cause evidencing that:

(i) a provider registration should be suspended or revoked;

(ii) an instructor should be disallowed from teaching a course; or

(iii) a course should be disapproved.

(6) The commissioner may disapprove any course, whether or not it had been previously approved, if:

(a) the commissioner determines that the course of study fails to meet the qualifying standards; or

(b) a change of 50% or more has been made in the course content since the initial approval of the course, subject to resubmission of the course for review and subsequent approval of the course by the commissioner.

(7) A provider may re-apply for a course that has been disapproved upon providing satisfactory proof to the commissioner that the conditions responsible for the disapproval have been corrected.

(8) To reinstate a suspended or revoked provider registration, a provider must:

(a) submit a completed provider registration form;

(b) submit a course outline that includes information regarding the course content and the number of credit hours requested for the course;

(c) pay a reinstatement fee, as identified in Rule R590-102, except as provided in Section 8(4) of this Rule; and

(d) provide satisfactory proof to the commissioner that the conditions responsible for the suspension or revocation have been corrected.

(9) A person with a revoked provider registration may not apply for a new registration for five years from the date the registration was revoked without the express approval by the commissioner, unless otherwise specified in the revocation order.

R590-142-10. Penalties.

A person found to be in violation of this rule shall be subject to penalties as provided under Section 31A-2-308.

R590-142-11. Enforcement Date.

The commissioner will begin enforcing this rule on the effective date of the rule.

R590-142-12. Severability.

If any provision of this rule or its application to any person or situation is held to be invalid, that invalidity shall not affect any other provision or application of this rule which can be given effect without the invalid provision or application, and to this end the provisions of this rule are declared to be severable.

KEY: insurance continuing education
August 23, 2011 **31A-2-201**
Notice of Continuation January 10, 2012 **31A-23a-202**
31A-26-206
31A-35-401.5

R590. Insurance, Administration.
R590-143. Life And Health Reinsurance Agreements.
R590-143-1. Authority.

This rule is adopted and promulgated by the commissioner pursuant to Section 31A-2-201.

R590-143-2. Scope.

This rule shall apply to all domestic life and accident and health insurers and to all other licensed life and accident and health insurers which are not subject to a substantially similar rule in their domiciliary state. This rule shall also similarly apply to licensed property and casualty insurers with respect to their accident and health business. This rule does not apply to assumption reinsurance, yearly renewable term reinsurance or certain nonproportional reinsurance such as stop loss or catastrophe reinsurance.

R590-143- 3. Accounting Requirements.

A. No insurer subject to this rule may, for reinsurance ceded, reduce any liability or establish any asset in any financial statement filed with the department if, by the terms of the reinsurance agreement, in substance or effect, any of the following conditions exist:

(1) Renewal expense allowances provided or to be provided to the ceding insurer by the reinsurer in any accounting period, are not sufficient to cover anticipated allocable renewal expenses of the ceding insurer on the portion of the business reinsured, unless a liability is established for the present value of the shortfall (using assumptions equal to the applicable statutory reserve basis on the business reinsured). Those expenses include commissions, premium taxes and direct expenses including, but not limited to, billing, valuation, claims and maintenance expected by the company at the time the business is reinsured;

(2) The ceding insurer can be deprived of surplus or assets at the reinsurer's option or automatically upon the occurrence of some event, such as the insolvency of the ceding insurer, except that termination of the reinsurance agreement by the reinsurer for nonpayment of reinsurance premiums or other amounts due, such as modified coinsurance reserve adjustments, interest and adjustments on funds withheld, and tax reimbursements, is not considered to be such a deprivation of surplus or assets;

(3) The ceding insurer is required to reimburse the reinsurer for negative experience under the reinsurance agreement, except that neither offsetting experience refunds against current and prior years' losses under the agreement nor payment by the ceding insurer of an amount equal to the current and prior years' losses under the agreement upon voluntary termination of in force reinsurance by the ceding insurer shall be considered such a reimbursement to the reinsurer for negative experience. Voluntary termination does not include situations where termination occurs because of unreasonable provisions which allow the reinsurer to reduce its risk under the agreement. An example of such a provision is the right of the reinsurer to increase reinsurance premiums or risk and expense charges to excessive levels forcing the ceding company to prematurely terminate the reinsurance treaty;

(4) The ceding insurer must, at specific points in time scheduled in the agreement, terminate or automatically recapture all or part of the reinsurance ceded;

(5) The reinsurance agreement involves the possible payment by the ceding insurer to the reinsurer amounts other than from income realized from the reinsured policies. For example, it is improper for a ceding company to pay reinsurance premiums, or other fees or charges to a reinsurer which are greater than the direct premiums collected by the ceding company;

(6) The treaty does not transfer all of the significant risk inherent in the business being reinsured. The following table identifies for a representative sampling of products or type of business, the risks which are considered to be significant. For products not specifically included, the risks determined to be significant shall be consistent with this table.

Risk categories:

(a) Morbidity

(b) Mortality

(c) Lapse

This is the risk that a policy will voluntarily terminate prior to the recoupment of a statutory surplus strain experienced at issue of the policy.

(d) Credit Quality (C1)

This is the risk that invested assets supporting the reinsured business will decrease in value. The main hazards are that assets will default or that there will be a decrease in earning power. It excludes market value declines due to changes in interest rate.

(e) Reinvestment (C3)

This is the risk that interest rates will fall and funds reinvested (coupon payments or monies received upon asset maturity or call) will therefore earn less than expected. If asset durations are less than liability durations, the mismatch will increase.

(f) Disintermediation (C3)

This is the risk that interest rates rise and policy loans and surrenders increase or maturing contracts do not renew at anticipated rates of renewal. If asset durations are greater than the liability durations, the mismatch will increase. Policyholders will move their funds into new products offering higher rates. The company may have to sell assets at a loss to provide for these withdrawals.

* LTC = Long Term Care Insurance
LTD = Long Term Disability Insurance

(7)(a) The credit quality, reinvestment, or disintermediation risk is significant for the business reinsured and the ceding company does not (other than for the classes of business excepted in Paragraph (7)(b)) either transfer the underlying assets to the reinsurer or legally segregate such assets in a trust or escrow account or otherwise establish a mechanism satisfactory to the commissioner which legally segregates, by contract or contract provision, the underlying assets.

(b) Notwithstanding the requirements of Paragraph (7)(a), the assets supporting the reserves for the following classes of business and any classes of business which do not have a significant credit quality, reinvestment or disintermediation risk may be held by the ceding company without segregation of such assets:

-Health Insurance - LTC/LTD

-Traditional Non-Par Permanent
-Traditional Par Permanent
-Adjustable Premium Permanent
-Indeterminate Premium Permanent
-Universal Life Fixed Premium
(no dump-in premiums allowed)

The associated formula for determining the reserve interest rate adjustment must use a formula which reflects the ceding company's investment earnings and incorporates all realized and unrealized gains and losses reflected in the statutory statement. The following is an acceptable formula: Rate = 2 (I + CG)/(X + Y - I - CG); Where: I is the net investment income CG is capital gains less capital losses X is the current year cash and invested assets plus investment income due and accrued less borrowed money. Y is the same as X but for the prior year

(8) Settlements are made less frequently than quarterly or payments due from the reinsurer are not made in cash within 90 days of the settlement date.

(9) The ceding insurer is required to make representations or warranties not reasonably related to the business being reinsured.

(10) The ceding insurer is required to make representations or warranties about future performance of the business being reinsured.

(11) The reinsurance agreement is entered into for the principal purpose of producing significant surplus aid for the ceding insurer, typically on a temporary basis, while not transferring all of the significant risks inherent in the business reinsured and, in substance or effect, the expected potential liability to the ceding insurer remains basically unchanged.

B. Notwithstanding Subsection A, an insurer subject to this rule may, with the prior approval of the commissioner, take such reserve credit or establish such asset as the commissioner may deem consistent with the Insurance Code and Rules including actuarial interpretations or standards adopted by the Department.

C.(1) Agreements entered into after the effective date of this rule which involve the reinsurance of business issued prior to the effective date of the agreements, along with any subsequent amendments thereto, shall be filed by the ceding company with the commissioner within 30 days from its date of execution. Each filing shall include data detailing the financial impact of the transaction. The ceding insurer's actuary who signs the financial statement actuarial opinion with respect to valuation of reserves shall consider this rule and any applicable actuarial standards of practice when determining the proper credit in financial statements filed with this department. The actuary should maintain adequate documentation and be prepared upon request to describe the actuarial work performed for inclusion in the financial statements and to demonstrate that such work conforms to this rule.

(2) Any increase in surplus net of federal income tax resulting from arrangements described in Subsection C(1) shall be identified separately on the insurer's statutory financial statement as a surplus item (aggregate write-ins for gains and losses in surplus in the Capital and Surplus Account, page 4 of the Annual Statement) and recognition of the surplus increase as income shall be reflected on a net of tax basis in the "Reinsurance ceded" line, page 4 of the Annual Statement as earnings emerge from the business reinsured. (For example, on the last day of calendar year N, company XYZ pays a $20 million initial commission and expense allowance to company ABC for reinsuring an existing block of business. Assuming a 34% tax rate, the net increase in surplus at inception is $13.2 million ($20 million - $6.8 million) which is reported on the "Aggregate write-ins for gains and losses in surplus" line in the Capital and Surplus account. $6.8 million (34% of $20 million) is reported as income on the "Commissions and expense allowances on reinsurance ceded" line of the Summary of Operations.

At the end of year N+1 the business has earned $4 million. ABC has paid $.5 million in profit and risk charges in arrears for the year and has received a $1 million experience refund. Company ABC's annual statement would report $1.65 million (66% of ($4 million - $1 million -$.5 million) up to a maximum of $13.2 million) on the "Commissions and expense allowance on reinsurance ceded" line of the Summary of Operations, and -$1.65 million on the "Aggregate write-ins for gains and losses in surplus" line of the Capital and Surplus account. The experience refund would be reported separately as a miscellaneous income item in the Summary of Operations.)

R590-143-4. Written Agreements.

A. No reinsurance agreement or amendment to any agreement may be used to reduce any liability or to establish any asset in any financial statement filed with the department, unless the agreement, amendment or a binding letter of intent has been duly executed by both parties no later than the "as of date" of the financial statement.

B. In the case of a letter of intent, a reinsurance agreement or an amendment to a reinsurance agreement must be executed within a reasonable period of time, not exceeding 90 days from the execution date of the letter of intent, in order for credit to be granted for the reinsurance ceded.

C. The reinsurance agreement shall contain provisions which provide that:

(1) The agreement shall constitute the entire agreement between the parties with respect to the business being reinsured thereunder and that there are no understandings between the parties other than as expressed in the agreement; and

(2) Any change or modification to the agreement shall be null and void unless made by amendment to the agreement and signed by both parties.

R590-143-5. Existing Agreements.

Insurers subject to this rule shall reduce to zero by June 30, 1997 any reserve credits or assets established with respect to reinsurance agreements entered into prior to the effective date of this rule which, under the provisions of this rule would not be entitled to recognition of the reserve credits or assets; provided, however, that the reinsurance agreements shall have been in compliance with laws or rules in existence immediately preceding the effective date of this rule.

R590-143-6. Severability.

If a provision of this rule or its application to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of such provisions is not effected.

Notice of Continuation January 10, 2012

R590. Insurance, Administration.
R590-147. Annual and Quarterly Statement Filing Instructions.
R590-147-1. Authority.

This rule is promulgated pursuant to Subsection 31A-2-201(3), which authorizes the commissioner to establish by rule specific requirements for filing forms, rates, or reports required by the Utah Insurance Code; Section 31A-2-202, which authorizes the commissioner to require statements, reports and information to be delivered to the department or the National Association of Insurance Commissioners (NAIC) in a form specified by the commissioner; and Section 31A-4-113, which authorizes the commissioner to prescribe by rule the information to be submitted with and form of the annual statement.

R590-147-2. Purpose.

The purpose of this rule is to provide instructions for the filing of insurer annual and quarterly statements and required supplemental schedules, exhibits, and documents.

R590-147-3. Scope.

This rule applies to all insurers required to file annual and quarterly statements with the commissioner in this state.

R590-147-4. Definitions.

(1) For purposes of this rule:

(a) the commissioner adopts the definitions as particularly set forth in Section 31A-1-301; and

(b) "Insurer" includes all licensees who are licensed under Chapters 5, 7, 8, 9, 14 or 15 of Title 31A of the Utah Code.

R590-147-5. Rule.

(1) The annual statement, quarterly statements, and required supplemental schedules, exhibits, and documents shall be prepared in accordance with the latest edition of the NAIC annual and quarterly statement instructions and the accounting practices and procedures manual published by the NAIC.

(2)(a) All insurers shall file their annual statements, quarterly statements, and required supplemental schedules, exhibits, and documents electronically with the NAIC in accordance with the NAIC annual and quarterly statement instructions. The commissioner may allow insurers that operate only in Utah to file hard copy forms with the department and exempt them from filing electronically with the NAIC.

(b) Domestic insurers ONLY shall additionally file two paper copies of all documents required by Subsection R590-147-5(1) with the department, in accordance with the deadlines established in the NAIC annual and quarterly statement instructions.

(c) Foreign and alien insurers shall NOT file paper copies of documents required by Subsection R590-147-5(1) with the department, unless specifically requested by the commissioner.

(3) Administrative penalties, authorized by 31A-2-308, may be assessed to any insurer that:

(a) Fails to file an annual statement, quarterly statements, or required supplemental schedules, exhibits, and documents by the dates specified in the NAIC and department annual and quarterly statement instructions, or by the deadline established in any filing extensions granted by the department; or

(b) Fails to file a complete annual or quarterly statement filing.

(4) NAIC and department filing instructions, including due dates, may be found at the following websites: www.naic.org and www.insurance.utah.gov.

R590-147-6. Separability.

If any provision of this rule or the application thereof to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of such provision to other persons or circumstances shall not be affected thereby.

R590-147-7. Enforcement Date.

The commissioner will begin enforcing the revised portions of this rule 45 days from the effective date of the rule.

31A-4-113

R590. Insurance, Administration.
R590-150. Commissioner's Acceptance of Examination Reports.
R590-150-1. Authority.

This rule is issued pursuant to the general rule making authority vested in the commissioner by Section 31A-2-201, Utah Code, and pursuant to Subsection 31A-2-203(4), Utah Code.

R590-150-2. Purpose and Scope.

The purpose of this rule is to identify the examination reports that the commissioner will accept in lieu of his own examination and report. This rule applies to all insurers licensed under Chapters 5, 9, and 14 of Title 31A of the Utah Code.

R590-150-3. Rule.

In lieu of an examination under Section 31A-2-203 of the Utah Code, of any domestic, foreign or alien insurer licensed in this state, the commissioner may accept an examination report on the company as prepared by the insurance department for the company's state of domicile or port-of-entry until January 1, 1994. Thereafter, such reports may only be accepted if: (1) the insurance department was, at the time of the examination, accredited under the National Association of Insurance Commissioners' Financial Regulation Standards and Accreditation Program; or (2) the examination is performed under the supervision of an accredited insurance department or with the participation of one or more examiners who are employed by an accredited state insurance department and who, after a review of the examination work papers and report, state under oath that the examination was performed in a manner consistent with the standards and procedures required by their insurance department.

R590-150-4. Separability.

If any provision of this rule or the application thereof to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of such provision to other persons or circumstances may not be affected thereby.

1992 31A-2-203(4)
Notice of Continuation January 10, 2012

R590. Insurance, Administration.
R590-263. Commonly Selected Health Benefit Plans.
R590-263-1. Authority.

This rule is promulgated pursuant to Subsection 31A-30-205(1)(d)(iii) wherein the commissioner is directed to adopt a rule.

R590-263-2. Purpose and Scope.

(1) The purpose of this rule is to provide the standard for a carrier to determine the most commonly selected small employer group health benefit plans.

(2) This rule applies to all carriers that offer a health benefit plan to a small employer in the defined contribution market.

R590-263-3. Most Commonly Selected.

(1) As used in Subsection 31A-30-205(1)(d), the four most commonly selected small employer group health benefit plans to be offered as of January 1 each year are the carrier's four plans that are currently marketed to small employer groups that have the largest number of covered individuals as of the preceding July 1 or another date approved by the commissioner.

(2) If a carrier removes one of the four most commonly selected plans from the market, the carrier shall again determine the four most commonly selected small employer group health benefit plans currently marketed by the carrier so that there are four plans at all times.

(3) The carrier shall:

(a) maintain the documentation used to determine the four plans in Subsection (1) for a period of the current calendar year plus three years; and

(b) make the documentation available for review upon the commissioner's request.

R590-263-4. Penalties.

A person found to be in violation of this rule shall be subject to penalties as provided under Section 31A-2-308.

R590-263-5. Enforcement Date.

The commissioner will begin enforcing this rule January 1, 2012.

R590-263-6. Severability.

If any provision of this rule or its application to any person or circumstances is for any reason held to be invalid, the remainder of the rule and the application of the provision to other persons or circumstances shall not be affected thereby.

January 25, 2012 31A-30-205(1)(d)(iii)

R592. Insurance, Title and Escrow Commission.
R592-14. Delay or Failure to Record Documents and the Insuring of Properties with the False Appearance of Unmarketability as Unfair Title Insurance Practices.
R592-14-1. Authority.

This rule is promulgated by the Title and Escrow Commission pursuant to Section 31A-2-404(2).

R592-14-2. Purpose and Scope.

(1) The purpose of this rule is to prohibit intentional delay, neglect or refusal by insurers, through their agents, to record or deliver for recording documentation necessary to support policy insuring provisions, resulting in the false appearance of unmarketability, in the record only, of property which would otherwise be marketable. This practice is deemed to be an unfair or deceptive act or practice detrimental to free competition in the business of insurance and injurious to the public.

(2) This rule applies to all title insurers and producers.

R592-14-3. Definitions.

For the purpose of this rule, the Commission adopts the definitions as particularly set forth in Section 31A-1-301 and in addition the following:

A. "Document" means any instrument in writing relating to real property described in any title insurance policy, contract or commitment, and reasonably required for the support of the insuring provisions.

B. "Record" means to cause to be delivered to the county recorder, or other public official as may be appropriate, any document in the possession or control of any title insurance company or title insurance agent for which a request to record has been made by an insured party, title insurance company or title insurance agent.

R592-14-4. Definition and Classification of Unfair or Deceptive Practices and Material Inducements.

A. Any knowing conduct by a title insurance company or title insurance agent which results in the failure, neglect, refusal to record, or to obtain for recording, any document which, unless recorded, results in the apparent unmarketability of title or a title which may not be insurable by another insurer, is defined as an unfair or deceptive act or practice as prohibited by Section 31A-23a-402.

B. The issuance or agreement to issue title insurance, or the affirmation of current marketability of title, when the possible recording of documents of title has not occurred, and the record does not manifest a title which would be insurable according to generally accepted title insurance standards, is classified and proscribed as an advantage and material inducement to obtaining title insurance business as prohibited under Section 31A-23a-402(2)(c)(i)(D).

R592-14-5. Enforcement Date.

The commissioner will begin enforcing this rule upon the rule's effective date.

R592-14-6. Severability.

If any provision or clause of this rule or the application of it to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of this provision to other persons or circumstances may not be affected by it.

August 9, 2011 31A-2-404
Notice of Continuation January 10, 2012

R600. Labor Commission, Administration.
R600-3. Definitions Applicable to Construction Licensees.
R600-3-1. Authority and Scope.

A. The Commission enacts this rule pursuant to authority granted by 34-28-2(2), 34A-2-103(8)(c), 34A-5-102(2) and 34A-6-103(2).

B. This rule defines terms and establishes procedures by which an unincorporated entity that is a construction licensee may rebut its status as an employer for purposes of Title 34, Chapter 28, Payment of Wages; Title 34A, Chapter 2, Workers' Compensation Act; Title 34A, Chapter 5, Utah Antidiscrimination Act; and Title 34A, Chapter 6, Utah Occupational Safety and Health Act.

R600-3-2. Definitions.

A. An "active manager" is one who directs or causes the direction of the management and policies of the unincorporated entity, whether through the ownership of voting shares, by contract, or otherwise. Status as an active manager requires a documented history of voting on, approving, or otherwise deciding a substantial matter involving the business of the unincorporated entity, including without limitation:

1. Authorizing a member or any other person to do any act on behalf of the company that is not in the ordinary course of the company's business or business of the kind carried on by the company;

2. Making a distribution to members;

3. Resolving a dispute connected with the company's business;

4. Making a substantial change in the business purpose of the unincorporated entity;

5. Authorizing the unincorporated entity to acquire or merge with another entity; or

6. Authorizing a sale, lease, exchange or other disposition of a substantial asset of the unincorporated entity, other than in the usual and regular course of the business.

B. "Directly holds at least an 8% ownership interest" means that the individual owns in his or her individual capacity at least 8% of the stock, capital, or equity of the unincorporated entity, or is entitled to at least 8% of the unincorporated entity's profits. C. "Indirectly holds at least an 8% ownership interest" means that the individual's total aggregate ownership interest from all sources, including a corporation, partnership, estate, trust or some other form of beneficial interest, totals at least 8% of the unincorporated entity's stock, capital, equity, or profits.

1. For example, if an individual owns 50% of company A which in turns owns 20% of the subject unincorporated entity, then the individual holds a 10% indirect ownership interest in the unincorporated entity.

D. "Subject to supervision or control in the performance of work" means that:

1. The unincorporated entity has the right to control what the worker does and how he or she does it, regardless of whether the unincorporated entity actually exercises that authority; or

2. The unincorporated entity has the right to control the business aspects of the work, such as:

a. How the worker is paid;

b. Whether expenses are reimbursed;

c. Who is responsible to provide tools and supplies;

d. Who arranges for administrative support, advertising, and similar functions.

R600-3-3. Procedures to Challenge Presumption that Unincorporated Entity is the Employer.

A. Declaratory Actions. An interested party may request a determination regarding an unincorporated entity's status as an employer by filing a petition for declaratory order in accordance with Rule R600-1.

B. In Connection with Other Adjudicative Proceedings.

1. In proceedings to adjudicate a claim of unpaid wages, employment discrimination, or violation of occupational safety and health standards, an unincorporated entity may submit evidence that rebuts the presumption that the unincorporated entity is an employer,

2. Notwithstanding the burden of proof required to prove the underlying claim, the unincorporated entity may only rebut the presumption that it is the employer by clear and convincing evidence.

R628. Money Management Council, Administration.
R628-17. Limitations on Commercial Paper and Corporate Notes.
R628-17-1. Authority.
This rule is issued pursuant to Section 51-7-18(2)(b).

R628-17-2. Scope.
This rule establishes limits on the dollar amount of public funds that a public treasurer may invest in commercial paper or corporate obligations of a single issuer.

R628-17-3. Purpose.
The purpose of this rule is to provide guidelines for treasurers when investing public funds in commercial paper or corporate obligations. The guidelines established by this rule are designed to be flexible enough to allow public treasurers to receive competitive market rates on funds placed in these types of investment instruments while maintaining sufficient protection from loss.

R628-17-4. Definitions.
For the purpose of this rule:
Commercial paper means: an unsecured promissory note that matures on a specific date, and is issued by industrial, utility, and finance companies. The commercial paper must meet the criteria for investment as described in Section 51-7-11(3).
Corporate obligation means: A secured or unsecured note with original term to maturity ranging from nine months to thirty years that is issued by an industrial, utility or finance company. The corporate obligation must meet the criteria for investment as described in Section 51-7-11(3).

R628-17-5. General Rule.
The maximum amount of any public treasurer's portfolio which can be invested in a single issuer of commercial paper and corporate obligations shall be as follows:
1. Portfolios of $10,000,000 or less may not invest more than 10% of the total portfolio with a single issuer.
2. Portfolios greater than $10,000,000 but less than $20,000,000 may not invest more than $1,000,000 in a single issuer.
3. Portfolios of $20,000,000 or more may not invest more than 5% of the total portfolio with a single issuer.
The amount or percentages used in determining the amount of commercial paper and or corporate obligations a treasurer may purchase, shall be determined by the book value of the portfolio at the time of purchase.

January 9, 2007 51-7-18(2)(b)
Notice of Continuation January 9, 2012

R642. Natural Resources; Oil, Gas and Mining; Administration.
R642-100. Records of the Division and Board of Oil, Gas and Mining.
R642-100-100. Responsibility and Authority.

110. Authority for the R642-100 rules is found in the Government Records Access and Management Act (GRAMA) (U.C.A. 63G-2-101, et seq.)

120. The Utah Division and Board of Oil, Gas and Mining ("Division" and "Board") will be considered as an agency for the purposes of the GRAMA.

130. The Director of the Division of Oil, Gas and Mining ("Director") will be considered to be the Agency Head for the purposes of activities under the GRAMA.

140. The Division and Board maintain an office at 1594 West North Temple, Suite 1210, P.O. Box 145801, Salt Lake City, Utah 84114-5801.

R642-100-200. Requests for Records.

210. Records may be requested by any person desiring access to Division or Board records.

220. Requests will be submitted in writing to the Administrative Assistant to the Director and Secretary to the Board.

230. All requests will be made at the Division office address listed in R642-100-140 in person during regular office hours or through the U.S. Mail and will be set forth with reasonable specificity:

231. The name of the record requested;

232. The date the record was made;

233. The form in which the record is needed, and;

234. The name and address and daytime phone number of the requester.

240. Forms are available at the Division to make records requests.

R642-100-300. Fees for Records.

310. The Division and Board of Oil, Gas and Mining will charge fees to supply records to all requestors, except as provided in R642-100-400 and R642-100-700.

320. Fees for records will reflect direct and indirect costs incurred by the Division and Board and will follow any policy guidance of the Division of Finance, Department of Administrative Services. The Division and Board may require payment of past fees and future estimated fees before processing a request if fees are expected to exceed $50.00, or if a requester has not paid fees from previous requests.

330. Fees will be reasonable and at a minimum, enable the Division and Board to obtain its actual cost of duplicating, compiling, or retrieving records from archival storage.

340. When a record is requested for inspection or review by a requester within the Division offices and no extraordinary efforts are made by the Division or Board in compiling or retrieving the record, no fee will be assessed to the requester.

R642-100-400. Waiver of Fees for Records.

410. Under the Government Records Access and Management Act (GRAMA) (U.C.A. 63G-2-101 et seq.), fees may be waived by the Director under any of the following circumstances:

411. When release of the record, in the opinion of the Director, benefits the public interest;

412. If the individual making the records request is the subject of a record and access is not otherwise restricted under U.C.A. 63G-2-101 et seq.

413. If the requestor is an individual specified in Section 63G-2-202(1) or (2), or

414. If the requester's rights are directly implicated by a record and he or she is impecunious.

420. Requests for a waiver of fees will be made in writing to the Director and will set forth the reasons why a requester desires a waiver of fees. The Director may delegate the authority to waive fees.

R642-100-500. Classification and Release of Records and Exceptions.

510. Records of the Division and Board will be classified and released in accordance with the Government Records Access and Management Act (GRAMA).

520. All records of the Division and Board which are not public as described in the GRAMA will be maintained as having restricted access as authorized under the GRAMA.

530. Any person denied access to a record of the Division or Board under the procedures outlined in GRAMA has the opportunity to appeal to the Director for more liberal access to a particular record. Appeals will be in writing and include:

531. A description of the record requested;

532. An explanation of how the release of the record would serve the interest of the public and how, in the appellant's opinion, the public's interest outweighs the privacy interests of restricted access.

533. The identity of the requester and an address where he or she may be contacted.

540. The Division will share its records with other agencies on a case-by-case basis in consideration of applicable laws.

R642-100-600. Responses to Requests for Records.

610. Responses to requests for records by the Division will be in writing and will be performed in accordance with the provisions of the Government Records Access and Management Act (GRAMA), U.C.A. 63G-2-101 et seq.

620. The Division and Board may respond to requests for information by means of prepared forms.

630. Rule 6 of the Utah Rules of Civil Procedure will apply to calculate time periods specified in GRAMA.

R642-100-700. Official Transcripts of Division and Board Proceedings.

710. The right to copy verbatim transcripts of Board and Division proceedings prepared by a Certified Court Reporter will be considered to be the property of the Reporter.

720. Unless otherwise classified as eligible for a more restricted classification by the Board or Division, all official transcripts will be considered as public records which are open for inspection or review in the Division offices at the address listed in R642-100-140.

730. Persons desiring copies of the official transcripts of the Board and Division proceedings will be provided with the name and address of the court reporter.

KEY: public records
1994 63G-2-101 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.

R643-870. Abandoned Mine Reclamation Regulation Definitions.

R643-870-500. Definitions as Used in R643-870 through R643-886.

"Abandoned Mine Reclamation Account" or "Account" means an account created in the general fund which is established for the purpose of providing monies to administer the abandoned mine reclamation program.

"Act" means Title 40, Chapter 10, Utah Code Annotated, known as Regulation of Coal Mining and Reclamation Operations.

"Director" means the Director of the Office of Surface Mining Reclamation and Enforcement.

"Division" means the Division of Oil, Gas and Mining.

"Eligible lands and water" means land and water eligible for reclamation or drainage abatement expenditures which were mined for coal or which were affected by such mining, wastebanks, coal processing, or other coal mining processes and left or abandoned in either an unreclaimed or inadequately reclaimed condition prior to August 3, 1977, and for which there is no continuing reclamation responsibility. Provided, however, that lands and water damaged by coal mining operations after that date may also be eligible if they meet the requirements specified in R643-874-124 and R643-874-125. For additional eligibility requirements for water projects, see R643-874-140. For additional eligibility requirements for lands affected by remining operations see R643-874-128. For eligibility requirements for lands affected by mining for minerals other than coal, see R643-875-140.

"Emergency" means a sudden danger or impairment that presents a high probability of substantial physical harm to the health, safety, or general welfare of people before the danger can be abated under normal program operation procedures.

"Expended" means that moneys have been obligated, encumbered, or committed by contract by the Division for work to be accomplished or services to be rendered.

"Extreme danger" means a condition that could reasonably be expected to cause substantial physical harm to persons, property, or the environment and to which persons or improvements on real property are currently exposed.

"Left or abandoned in either an unreclaimed or inadequately reclaimed condition" means lands and water:

(a) Which were mined or which were affected by such mining, wastebanks, processing or other mining processes prior to August 3, 1977,and on which all mining has ceased;

(b) Which continue, in their present condition, to degrade substantially the quality of the environment, prevent or damage the beneficial use of land or water resources, or endanger the health and safety of the public; and

(c) For which there is no continuing reclamation responsibility under State or Federal Laws, except as provided in R643-874-124 and R643-874-142.

"Office" or "OSM" means the Federal Office of Surface Mining Reclamation and Enforcement.

"Owner" means the owner of real property who is shown to be the owner of record on the plats located in the county courthouse of the county in which the real property is located.

"Permanent facility" means any structure that is built, installed, or established to serve a particular purpose or any manipulation or modification of the surface that is designed to remain after the reclamation activity is completed, such as a relocated stream channel or diversion ditch.

"Project" means a delineated area containing one or more abandoned mine land problems. A project may be a group of related reclamation activities with a common objective within a political subdivision of a state or within a logical, geographically defined area, such as a watershed or conservation district.

"Reclamation activity" means the restoration, reclamation, abatement, control, or prevention of adverse effects of past mining.

"Reclamation Plan" means a plan submitted by the Division and approved by the Office of Surface Mining Reclamation and Enforcement.

"Reclamation Program" means the program established by the Division in accordance with this chapter for reclamation of lands and water adversely affected by past mining, including the reclamation plan and annual applications for grants.

"Secretary" means the Secretary of the Department of Interior or his or her representative.

KEY: mines, reclamation
December 16, 1997 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-872. Abandoned Mine Reclamation Fund.
R643-872-100. Scope.

The rules under R643-872 set forth general responsibilities for administration of Abandoned Mine Land Reclamation Programs and procedures for the Abandoned Mine Reclamation Fund to finance such programs.

120. Abandoned Mine Reclamation Fund.

121. A Fund known as the Abandoned Mine Reclamation Fund is established under the authority of Section 40-10-25.1 for the purpose of providing moneys to administer the Abandoned Mine Reclamation Program. This Fund will be managed in accordance with the Federal Office of Management and Budget Circular No. A-102 and applicable state guidelines.

KEY: mines, reclamation
1994 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.

R643-874. General Reclamation Requirements.

R643-874-100. Scope.

The rules under R643-874 establish land and water eligibility requirements, reclamation objectives and priorities, and reclamation contractor responsibility.

110. Applicability. The provisions of R643-874 apply to all reclamation projects carried out with monies from the Account.

120. Eligible Lands and Water. Lands and water are eligible for reclamation activities if:

121. They were mined or affected by mining processes;

122. They were mined prior to August 3, 1977, and left or abandoned in either an unreclaimed or inadequately reclaimed condition; and

123. There is no continuing responsibility for reclamation by the operator, permittee, or agent of the permittee under statutes of the state or federal government, or the state as a result of bond forfeiture. Bond forfeiture will render lands or water ineligible only if the amount forfeited is sufficient to pay the total cost of the necessary reclamation. In cases where the forfeited bond is insufficient to pay the total cost of reclamation, additional moneys from the Account may be sought.

124. Notwithstanding paragraphs 120, 121, 122, and 123 of this section, coal lands and waters damaged and abandoned after August 3, 1977, by coal mining processes are also eligible for funding if the Division finds in writing that:

124.100. They were mined for coal or affected by coal mining processes; and

124.200. The mining occurred and the site was left in either an unreclaimed or inadequately reclaimed condition between August 4, 1977, and:

124.210. January 21, 1981, and that any funds for reclamation or abatement that are available pursuant to a bond or other form of financial guarantee or from any other source are not sufficient to provide for adequate reclamation or abatement at the site; or

124.220. November 5, 1990, that the surety of the mining operator became insolvent during such period and that, as of November 5, 1990, funds immediately available from proceedings relating to such insolvency or from any financial guarantee or other source are not sufficient to provide for adequate reclamation or abatement at the site; and

124.300. The site qualifies as a priority 1 or 2 site pursuant to Section 40-10-25(2)(a) and (b) of the Act. Priority will be given to those sites that are in the immediate vicinity of a residential area or that have an adverse economic impact upon a community.

125. The Reclamation Program may expend funds made available under Sections 40-10-25.1(2) and (3) of the Act for reclamation and abatement of any site eligible under paragraph 124 of this section, if the Reclamation Program, with the concurrence of the Secretary, makes the findings required in paragraph 124 of this section and the Reclamation Program determines that the reclamation priority of the site is the same or more urgent than the reclamation priority for the lands and water eligible pursuant to paragraphs 120, 121, 122, or 123 of this section that qualify as a priority 1 or 2 site under Section 40-10-25(2) of the Act.

126. With respect to lands eligible pursuant to paragraph 124 or 125 of this section, monies available from sources outside the Account or that are ultimately recovered from responsible parties shall either be used to offset the cost of the reclamation or transferred to the Account if not required for further reclamation activities at the permitted site.

127. If reclamation of a site covered by an interim or permanent program permit is carried out under the Abandoned Mine Reclamation Program, the permittee of the site shall reimburse the Account for the cost of reclamation that is in excess of any bond forfeited to ensure reclamation. Neither the Secretary nor the State performing reclamation under paragraph 124 or 125 of this section shall be held liable for any violations of any performance standards or reclamation requirements specified in the Coal Regulatory portion of the Act (Section 40-10-1 et seq.) nor shall a reclamation activity undertaken on such lands or waters be held to any standards set forth in the Coal Regulatory portion of the Act (Section 40-10-1 et seq.).

128. Surface coal mining operations on lands eligible for remining pursuant to Section 40-10-25(6) of the Act shall not affect the eligibility of such lands for reclamation activities after the release of the bonds or deposits posted by any such operation as provided by R645-301-800. If the bond or deposit for a surface coal mining operation on lands eligible for remining is forfeited, funds available under this title may be used if the amount of such bond or deposit is not sufficient to provide for adequate reclamation or abatement, except that if conditions warrant the director of the Division shall immediately exercise his/her authority under Section 40-10-25(6)(c) of the Act.

130. Reclamation Objectives and Priorities.

131. Reclamation projects should be accomplished in accordance with OSM's "Final Guidelines for Reclamation Programs and Projects" (45 FR 14810-14819, March 6, 1980).

132. Reclamation projects shall reflect the priorities of Section 40-10-25(2) of the Act. Generally, projects lower than a priority 2 should not be undertaken until all known higher priority coal projects either have been accomplished, are in the process of being reclaimed, or have been approved for funding by the Secretary, except in those instances where such lower priority projects may be undertaken in conjunction with a priority 1 or 2 site in accordance with OSM's "Final Guidelines for Reclamation Programs and Projects."

140. Utilities and other facilities.

141. The Reclamation Program, prior to certification of the completion of all coal-related reclamation under Section 40-10-28.1 of the Act, may expend up to 30 percent of the funds granted annually pursuant to Section 40-10-25(1) of the Act for the purpose of protecting, repairing, replacing, constructing, or enhancing facilities relating to water supplies, including water distribution facilities and treatment plants, to replace water supplies adversely affected by coal mining practices.

142. If the adverse effect on water supplies referred to in this section occurred both prior to and after August 3, 1977, the project shall remain eligible, notwithstanding the criteria specified in R643-874-122, if the Reclamation Program finds in writing, as part of its eligibility opinion, that such adverse effects are due predominantly to effects of mining processes undertaken and abandoned prior to August 3, 1977.

143. If the adverse effect on water supplies referred to in this section occurred both prior to and after the dates (and under the criteria set forth under Section 40-10-25(4) of the Act, the project shall remain eligible, notwithstanding the criteria specified in R643-874-122, if the Reclamation Program finds in writing, as part of its eligibility opinion, that such adverse effects are due predominately to the effects of mining processes undertaken and abandoned prior to those dates.

144. Enhancement of facilities or utilities under this section shall include upgrading necessary to meet any local, State, or Federal public health or safety requirement. Enhancement shall not include, however, any service area expansion of a utility or facility not necessary to address a specific abandoned mine land problem.

150. Limited liability. The State shall not be liable under any provision of Federal law for any costs or damages as a result of action taken or omitted in the course of carrying out an approved abandoned mine reclamation plan. This section shall not preclude liability for costs or damages as a result of gross

negligence or intentional misconduct by the State. For purposes of this section, reckless, willful, or wanton misconduct shall constitute gross negligence or intentional misconduct.

160. Contractor responsibility. Every successful bidder for a Reclamation Program contract must be eligible under federal regulation 30 CFR 773.15(b)(1) at the time of contract award to receive a permit or conditional permit to conduct surface coal mining operations. Bidder eligibility must be confirmed by OSM's automated Applicant/Violator System for each contract to be awarded.

KEY: mines, reclamation
November 1, 1997 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-875. Noncoal Reclamation.
R643-875-100. Scope.

The rules under R643-875 establish land and water eligibility requirements for noncoal reclamation.

120. Eligible lands and water prior to certification. Noncoal lands and water are eligible for reclamation if:

121. They were mined or affected by mining processes;

122. They were mined and left or abandoned in either an unreclaimed or inadequately reclaimed condition prior to August 3, 1977;

123. There is no continuing responsibility for reclamation by the operator, permittee, or agent of the permittee under statutes of the state or federal government or by the state as a result of bond forfeiture. Bond forfeiture will render lands or water ineligible only if the amount forfeited is sufficient to pay the total cost of the necessary reclamation. In cases where the forfeited bond is insufficient to pay the total cost of reclamation, monies sufficient to complete the reclamation may be sought under R643-886 or R643-888;

124. The reclamation has been requested by the Governor; and

125. The reclamation is necessary to protect the public health, safety, general welfare, and property from extreme danger of adverse effects of noncoal mining practices.

130. Certification of completion of coal sites.

131. The Governor may submit to the Secretary a certification of completion expressing the finding that the Reclamation Program has achieved all existing known coal-related reclamation objectives for eligible lands and waters pursuant to Section 40-10-25(3) of the Act, or has instituted the necessary processes to reclaim any remaining coal related problems. In addition to the above finding, the certification of completion shall contain:

131.100. A description of both the rationale and the process utilized to arrive at the above finding for the completion of all coal-related reclamation pursuant to Section 40-10-25(2) of the Act.

131.200. A brief summary and resolution of all relevant public comments concerning coal-related impacts, problems, and reclamation projects received by the Reclamation Program prior to preparation of the certification of completion.

131.300. A Reclamation Program agreement to acknowledge and give top priority to any coal-related problem(s) that may be found or occur after submission of the certification of completion and during the life of the approved abandoned mine reclamation program.

132. After review and verification of the certification, the Director will provide notice in the Federal Register and opportunity for public comment. After evaluation, the Director will concur with the certification and provide final notice in the Federal Register.

133. Following concurrence by the Director, the Reclamation Program may implement a noncoal reclamation program pursuant to provisions in Section 40-10-28.1 of the Act.

140. Eligible lands and water subsequent to certification.

141. Following certification by the Reclamation Program of the completion of all known coal projects and the Director's concurrence in such certification, eligible noncoal lands, waters, and facilities shall be those-

141.100. Which were mined or processed for minerals or which were affected by such mining or processing, and abandoned or left in an inadequate reclamation status prior to August 3, 1977. In determining the eligibility under this subsection of Federal lands, waters, and facilities under the jurisdiction of the Forest Service or Bureau of Land Management, in lieu of the August 3, 1977, date, the applicable date shall be August 28, 1974, and November 26, 1980, respectively; and

141.200. For which there is no continuing reclamation responsibility under State or other Federal laws.

142. If eligible coal problems are found or occur after certification under R643-875-130, the Reclamation Program must address the coal problem utilizing State share funds no later than the next grant cycle, subject to the availability of funds distributed to the Reclamation Program in that cycle. The coal project would be subject to the coal provisions specified in Sections 40-10-25 through 40-10-28 of the Act.

150. Reclamation priorities for noncoal program.

151. This section applies to reclamation projects involving the restoration of lands and water adversely affected by past mineral mining; projects involving the protection, repair, replacement, construction, or enhancement of utilities (such as those relating to water supply, roads, and other such facilities serving the public adversely affected by mineral mining and processing practices); and the construction of public facilities in communities impacted by coal or other mineral mining and processing practices.

152. Following certification pursuant to R643-875-130, the projects and construction of public facilities identified in paragraph 151 of this section shall reflect the following priorities in the order stated:

152.100. The protection of public health, safety, general welfare and property from the extreme danger of adverse effects of mineral mining and processing practices;

152.200. The protection of public health, safety, and general welfare from the adverse effects of mineral mining and processing practices; and

152.300. The restoration of land and water resources and the environment previously degraded by the adverse effects of mineral mining and processing practices.

153. Enhancement of facilities or utilities shall include upgrading necessary to meet local, State, or Federal public health or safety requirements. Enhancement shall not include, however, any service area expansion of a utility or facility not necessary to address a specific abandoned mine land problem.

154. Notwithstanding the requirements specified in paragraph 151 of this section, where the Governor, after determining that there is a need for activities or construction of specific public facilities related to the coal or minerals industry in the State, submits a grant application as required by paragraph 154 of this section and the Director concurs in such need, as set forth in paragraph 155 of this section, then the Division may use annual grants made available under Section 40-10-25(1) of the Act to carry out such activities or construction.

155. To qualify for funding pursuant to the authority in paragraph 153 of this section, the Reclamation Program must submit a grant application that specifically sets forth:

155.100. The need or urgency for the activity or the construction of the public facility;

155.200. The expected impact the project will have on the coal or minerals industry in the State;

155.300. The availability of funding from other sources and, if other funding is provided, its percentage of the total costs involved;

155.400. Documentation from other local, State, and Federal agencies with oversight for such utilities or facilities regarding what funding resources they have available and why this specific project is not being fully funded by their agency;

155.500. The impact on the State, the public, and the minerals industry if the activity or facility is not funded;

155.600. The reason why this project should be selected before a priority project relating to the protection of the public health and safety or the environment from the damages caused by past mining activities; and

155.700. An analysis and review of the procedures used by the Reclamation Program to notify and involve the public in this funding request and a copy of all comments received and their resolution by the Reclamation Program.

160. Exclusion of certain noncoal reclamation sites. Money from the Account shall not be used for the reclamation of sites and areas designated for remedial action pursuant to the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901 et seq.) or that have been listed for remedial action pursuant to the Comprehensive Environmental Response Compensation and Liability Act of 1980 (42 U.S.C. 9601 et seq.).

170. Land acquisition authority-noncoal. The requirements specified in R643-877 (Rights of Entry) and R643-879 (Acquisition, Management and Disposition of Lands and Water) shall apply to the Reclamation Program's noncoal program except that, for purposes of this section, the references to "coal" shall not apply. In lieu of the term "coal", the word "noncoal" should be used.

180. Lien requirements. The lien requirements found in R643-882 (Reclamation on Private Land) shall apply to the Reclamation Program's noncoal reclamation program under Section 40-10-28.1 of the Act, except that for purposes of this section, references made to "coal" shall not apply. In lieu of the term "coal", the word "noncoal" should be used.

190. Limited liability. The State shall not be liable under any provision of Federal law for any costs or damages as a result of action taken or omitted in the course of carrying out an approved state abandoned mine reclamation program or plan. This section shall not preclude liability for costs or damages as a result of gross negligence or intentional misconduct by the Reclamation Program. For purposes of the preceding sentence, reckless, willful, or wanton misconduct shall constitute gross negligence or intentional misconduct.

200. Contractor responsibility. Every successful bidder for a Reclamation Program contract must be eligible under federal regulation 30 CFR 773.15(b)(1) at the time of contract award to receive a permit or conditional permit to conduct surface coal mining operations. Bidder eligibility must be confirmed by OSM's automated Applicant/Violator System for each contract to be awarded.

KEY: mines, reclamation
June 22, 1995 **40-10-1 et seq.**
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-877. Rights of Entry.
R643-877-100. Scope.

The rules under R643-877 establish procedures for entry upon lands or property by the Division for reclamation purposes.

110. Written Consent for Entry. Written consent from the owner of record and lessee, or their authorized agents, is the preferred means for obtaining agreements to enter lands in order to carry out reclamation activities. Nonconsentual entry will be undertaken only after good faith efforts to obtain written consent have failed.

120. Entry for Studies or Exploration. The state or its agents, employees, or contractors, will have the right to enter upon any property for the purpose of conducting studies or exploratory work to determine the existence of adverse effects of past mining practices and the feasibility of restoration, reclamation, abatement, control, or prevention of such adverse effects.

130. Entry and Consent to Reclaim.

131. The Division will take all reasonable actions to obtain written consent from the owner of record of the land or property to be entered in advance of such entry. The consent will be in the form of a signed statement by the owner of record or his authorized agent which, as a minimum, includes a legal description of the land to be entered, the projected nature of work to be performed on the lands and any special conditions for entry. The statement will not include any commitment by the state to perform reclamation work nor to compensate the owner for entry.

132. The Division will give notice of its intent to enter for purposes of conducting reclamation at least 30 days before entry upon the property. The notice will be in writing and will be mailed, return receipt requested, to the owner, if known, with a copy of the findings required by R643-877. If the owner is not known, or if the current mailing address of the owner is not known, notice will be posted in one or more places on the property to be entered where it is readily visible to the public and advertised once in a newspaper of general circulation in the locality in which the land is located. The notice posted on the property and advertised in the newspaper will include a statement of where the findings required by R643-877 may be inspected or obtained.

133. If consent is not obtained, then, prior to entry under R643-877, the Board will find in writing with supporting reasons that:

133.100. Land or water resources have been or may be adversely affected by past mining practices;

133.200. The adverse effects are at a state where, in the interest of the public health, safety, or the general welfare, action to restore, reclaim, abate, control, or prevent should be taken; and

133.300. The owner of the land or water resources where entry must be made to restore, reclaim, abate, control, or prevent the adverse effects of past coal mining practices is not known or readily available, or the owner will not give permission for the Division, its agents, employees, or contractors to enter upon such property to restore, reclaim, abate, control, or prevent the effects of past mining practices.

140. Entry for Emergency Reclamation.

141. The Division, its agents, employees, or contractors will have the right to enter upon any land where an emergency exists and on any other land to have access to the land where the emergency exists to restore, reclaim, abate, control, or prevent the adverse effects of mining practices and to do all things necessary to protect the public health, safety, or general welfare.

142. Prior to entry under R643-877, the Board will, after notice and hearing, make a finding of fact in accordance with Section 40-10-27 of the Act.

KEY: mines, mining law, reclamation
June 22, 1995 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-879. Acquisition, Management, and Disposition of Lands and Water.
R643-879-100. Scope.

The rules under R643-879 establish procedures for acquisition of eligible land and water resources for emergency and reclamation purposes by the Division under an approved Reclamation Program. It also provides for the management and disposition of lands acquired by the state and establishes requirements for the redeposit of proceeds from the use or sale of land.

110. Land Eligible for Acquisition.

111. Land adversely affected by past coal mining practices may be acquired with moneys from the Account by the Division if, after notice and hearing, the Board finds that acquisition is necessary for successful reclamation and that:

111.100. The acquired land will serve recreation, historic, conservation, and reclamation purposes or provide open space benefits after restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal mining practices, and

111.200. Permanent facilities will be constructed on the land for the restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal mining practices.

112. Coal refuse disposal sites and all coal refuse thereon may be acquired with moneys from the Account if, after notice and hearing, the Board finds that the acquisition of such land is necessary for successful reclamation and will serve the purposes of the Abandoned Mine Reclamation Program or that public ownership is desirable to meet an emergency situation and prevent recurrence of adverse effects of past coal mining practices.

113. Land or interests in land needed to fill voids, seal abandoned tunnels, shafts, and entry ways or reclaim surface impacts of underground or surface mines may be acquired by the Division if the Board finds that acquisition is necessary under R643-874-120 or R643-875-120.

114. The Division will acquire only such interests in the land as are necessary for the reclamation work planned or the post-reclamation use of the land. Interests in improvements on the lands, mineral rights, or associated water rights may be acquired if:

114.100. The customary practices and laws of the state will not allow severance of such interests from the surface estate; or

114.200. Such interests are necessary for the reclamation work planned or for the post-reclamation use of the land; and

114.300. Adequate written assurance cannot be obtained from the owner of the severed interest that future use of the severed interest will not be in conflict with the reclamation to be accomplished.

115. Title to all lands or interests in and acquired under R643-879 will be in the name of the state.

120. Procedures for Acquisition.

121. An appraisal of all land or interest in land to be acquired will be obtained by the Division. The appraisal will state the fair market value of the land as adversely affected by past mining and will otherwise conform to the requirements of the handbook on "Uniform Appraisal Standards for Federal Land Acquisition" (Interagency Land Acquisition Conference, 1973).

122. When practical, acquisition will be by purchase from a willing seller. The amount paid for interests acquired will reflect the fair market value of the interests as adversely affected by past mining.

123. When necessary, land or interest in land may be acquired by condemnation. Condemnation procedures will not be started until all reasonable efforts have been made to purchase the land or interests in lands from a willing seller.

124. The Division will comply, at a minimum, with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, U.S.C. 4601, et seq., and 41 CFR Parts 114-50.

130. Acceptance of Gifts of Land.

131. The Division and/or the Board, under an approved Reclamation Plan, may accept donations of title to land or interests in land.

132. Offers to make a gift of land or interest in land will be in writing and comply with state regulations for donations.

140. Management of Acquired Land.

141. Land acquired under R645-879 may be used for any lawful purpose that is consistent with the necessary reclamation activities. Procedures for collection of user charges or the waiver of such charges by the Board will be determined on the basis of the fair market value of the benefits granted to the user, charges for comparable uses within the surrounding area or the costs to the state for providing the benefit, whichever is appropriate. The fee may be waived if found in writing that such a waiver is in the public interest.

142. All use fees collected will be deposited in the Abandoned Mine Reclamation Account in accordance with R643-872.

150. Disposition of Reclaimed Land.

151. Prior to the disposition of any land acquired under R643-879, the Division will publish a notice of proposed land disposition, hold public hearings if requested, and make written findings in accordance with the authority contained in Section 40-10-27 of the Act.

152. The Division may transfer administrative responsibility for land acquired by the state to any state department or agency, with or without cost to the department or agency. The Division may transfer title for land acquired by the state to any agency or political subdivision of the state, with or without cost to that entity. The agreement under which a transfer is made will specify:

152.100. The purposes for which the land may be used, which will be consistent with the authorization under which the land was acquired; and

152.200. That the title or administrative responsibility for the land will revert to the Division if, at any time in the future, the Division finds that the land is not used for the purposes specified.

153. The Division and/or the Board may accept title for abandoned and unreclaimed land to be reclaimed and administered by the state. If the state transfers land to the United States under R643-879, the state will have a preference right to purchase such land after reclamation is completed. The price to be paid by the state will be the fair market value of the land in its reclaimed condition less any portion of the land acquisition price paid by the state.

154. The Division may sell land acquired and reclaimed under R643-879 to the local government within whose boundaries the land is located. The conditions of sale will be in accordance with the authorities contained in Section 40-10-27 of the Act.

155. Sale of Land.

155.100. The Division may sell land acquired under R643-879 by public sale if:

155.110. Such land is suitable for industrial, commercial, residential, or recreational development;

155.120. Such development is consistent with local, state, or federal land use plans for the area in which the land is located; and

155.130. If it is found that retention by the state or disposal under other paragraphs of R643-879, is not in the public interest.

155.200. Disposal procedures will be in accordance with Section 40-10-27 of the Act.

155.300. The Division may transfer title or administrative responsibility for land to cities, municipalities, or quasi-governmental bodies, provided that the Division provides for the reverter of the title or administrative responsibility if the land is no longer used for the purposes originally proposed.

156. All moneys received from disposal of land under R643-879 will be deposited in the Abandoned Mine Reclamation Account in accordance with R643-872.

KEY: mines, mining law, reclamation, water policy
June 22, 1995 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-882. Reclamation on Private Land.
R643-882-100. Scope.

The rules under R643-882 authorize reclamation on private land and establish procedures for recovery of the cost of reclamation activities conducted on privately owned land by the Division.

120. Appraisals.

121. A notarized appraisal of the fair market value of private land to be reclaimed which may be subject to a lien under R643-882-130 will be obtained from an independent appraiser.

122. A notarized appraisal of all land reclaimed which was appraised under R643-882-121 will also be obtained from an independent appraiser. The appraisal will state the market value of the land as reclaimed. Where reclamation will require more than six months to complete, the appraisal will not be started until actual completion of reclamation activities.

123. The landowner upon whose property a lien is filed is to be provided with a statement of the increase in market value, an itemized statement of reclamation expenses, and a notice that a lien is being or has been filed in accordance with R643-882-130.

130. Liens.

131. The Division has the discretionary authority to place or waive a lien against land reclaimed if the reclamation results in a significant increase in the fair market value based on the appraisals obtained under R643-882-120; however,

131.100. A lien will not be placed against the property of a surface owner who acquired title prior to May 2, 1977, and who did not consent to participate in or exercise control over the mining operation which necessitated the reclamation work.

131.200. The basis for making a determination of what constitutes a significant increase in market value or what factual situation constitutes a waiver of lien will be made by the Division.

132. The lien may be waived by the Division if the reclamation work performed on private land primarily benefits health, safety, or environmental values of the greater community or area in which the land is located, or if the reclamation is necessitated by an unforeseen occurrence and the work performed to restore that land will not result in a significant increase in the market value of the land as it existed immediately before the occurrence.

133. If a lien is to be filed, the Division will, within six months after the completion of the reclamation work, file a statement in the office of the County Recorder in which the land is located. Such statement will consist of an account of moneys expended for the reclamation work, together with notarized copies of the appraisals obtained under R643-882-120. The amount reported to be the increase in value of the property will constitute the lien to be recorded and will have priority as a lien second only to the lien of real estate taxes imposed upon the land.

134. Within 60 days after the lien is filed the landowner may petition under local law to determine the increase in market value of the land as a result of reclamation work. Any aggrieved party may appeal in the manner provided by local law.

140. Satisfaction of Liens.

141. A lien placed on private property will be satisfied, to the extent of the value of the consideration received, at the time of transfer of ownership. Any unsatisfied portion will remain as a lien on the property.

142. The Division will maintain or renew the lien from time to time as may be required under state or local law.

143. Moneys derived from the satisfaction of liens established under R643-882 will be deposited in the Abandoned Mine Reclamation Account.

KEY: mines, reclamation
June 22, 1995 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-884. State Reclamation Plan.
R643-884-100. Scope.

The rules under R643-884 establish the procedures and requirements for the preparation, submission, and approval of the Reclamation Plan.

130. Content of Proposed State Reclamation Plan. The proposed Reclamation Plan will be submitted to the Director in writing and will include the following information:

131. A designation by the Governor for the Division to administer the Reclamation Program and to receive and administer grants under 30 CFR Part 886.

132. A legal opinion from the State Attorney General that the Division has the authority under state law to conduct the program.

133. A description of the policies and procedures to be followed by the Division in conducting the reclamation program, including:

133.100. The purposes of the Reclamation Program;

133.200. The specific criteria for ranking and identifying projects to be funded;

133.300. The coordination of reclamation work among the Abandoned Mine Reclamation Program and the Rural Land Reclamation Program administered by the Soil Conservation Service and OSM's reclamation programs; and

133.400. Policies and procedures regarding land acquisition, management, and disposal under R643-879;

133.500. Policies and procedures regarding reclamation on private land under R643-882;

133.600. Policies and procedures regarding rights of entry under R643-877; and

133.700. Public participation and involvement in the preparation of the Reclamation Plan and in the Reclamation Program.

134. A description of the administrative and management structure to be used in conducting the reclamation program, including:

134.100. The organization of the Division and its relationship to other state organizations or officials that will participate in or augment the Division's reclamation capacity;

134.200. The personnel staffing policies which will govern the assignment of personnel to the Reclamation Program;

134.300. The purchasing and procurement systems to be used by the Division. Such systems will meet the requirements of Office of Management and Budget Circular No. A-102, Attachment O;

134.400. The accounting system to be used by the Division, including specific procedures for the operation of the Abandoned Mine Reclamation Account.

135. A general description, derived from available data, of the reclamation activities to be conducted under the Reclamation Plan, including the known or suspected eligible lands and waters within the state which require reclamation, including:

135.100. A map showing the general location of known or suspected eligible lands and waters;

135.200. A description of the problems occurring on these lands and waters;

135.300. How the plan proposes to address each of the problems occurring on these lands and waters;

135.400. How the land to be reclaimed relates to existing and planned uses of lands in surrounding areas.

136. A general description, derived from available data, of the conditions prevailing in the different geographic areas of the state where reclamation is planned, including:

136.100. The economic base;

136.200. Significant esthetic, historic or cultural, and recreational values; and

136.300. Endangered and threatened plant, fish, and wildlife and their habitats.

150. State Reclamation Plan Amendment. The Division may, at any time, submit to the Director a proposed amendment or revision to its approved Reclamation Plan. If the amendment or revision changes the objectives, scope, or major policies followed by the Division in the conduct of its reclamation program, the Division will include a description of the extent of public involvement in the preparation of the amendment or revision.

170. Impact Assistance. The Reclamation Plan may provide for construction of specific public facilities in communities impacted by coal development. This form of assistance is available when the Governor has certified, and the Director has concurred that:

171. All reclamation with respect to past coal mining and with respect to the mining of other minerals and materials has been accomplished;

172. The specific public facilities are required as a result of coal development; and

173. Impact funds which may be available under the Federal Mineral Leasing Act of 1920, as amended, or the act of October 20, 1978, Pub. L. 94-565 (9 Stat. 2662) are inadequate for such construction.

KEY: mines, reclamation
1987 40-10-1 et seq.
Notice of Continuation February 1, 2012

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-886. State Reclamation Grants.
R643-886-100. Scope.

The rules under R643-886 set forth procedures for grants to the Division for the reclamation of eligible lands and water and other activities necessary to carry out the plan as approved.

110. Eligibility for Grants. The Division is eligible for grants under R643-886 if it has a Reclamation Plan approved under 30 CFR Part 884.

120. Coverage and Amount of Grants.

121. The Division may use moneys granted under R643-886 to administer the approved Reclamation Program and to carry out the specific reclamation activities included in the plan and described in the annual grant agreement. The moneys may be used to cover direct costs to the Division for services and materials obtained from other state agencies or local jurisdictions.

122. Grants will be approved for reclamation of eligible lands and water, construction of public facilities, program administration, the incremental cost of filling voids and sealing tunnels with waste from mine waste piles reworked for conservation purposes, and community impact assistance. To the extent technologically and economically feasible, public facilities that are planned, constructed, or modified in whole or in part with abandoned mine land grant funds should utilize fuel other than petroleum or natural gas.

123. Acquisition of land or interests in land and any mineral or water rights associated with the land will be approved for up to 90 percent of the costs.

R643-886-200. Administrative Procedures.

The Division will follow administrative procedures governing accounting, payment, property, and related requirements contained in Office of Management and Budget Circular No. A-102.

210. Allowable Costs.

211. Reclamation project costs which will be allowed include actual costs of construction, operation and maintenance, planning and engineering, inspection, other necessary administration costs and up to 90 percent of the costs of the acquisition of land.

212. Costs must conform with any limitation, conditions, or exclusions set forth in the grant agreement.

220. Financial Management.

221. The Division will account for grant funds in accordance with the requirement of Office of Management and Budget Circular No. A-102. The Division will use generally accepted accounting principles and practices consistently applied. Accounting for grant funds must be accurate and current.

222. The Division will adequately safeguard all accounts, funds, property, and other assets and will assure that they are used solely for authorized purposes.

223. The Division will provide a comparison of actual amounts spent with budgeted amounts for each grant.

224. When advances are made by a letter-of-credit method, the Division will make drawdowns from the U.S. Treasury through its commercial bank as closely as possible to the time of making the disbursements.

225. The Division will design a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

230. Reports.

231. The Division will for each grant/cooperative agreement submit quarterly to the Office the following reports prepared according to Office of Management and Budget Circular No. A-102, Attachments H and I:

231.100. Financial Status Report, Form SF-269 for the agency's administrative grant/cooperative agreement and the Performance Report, Form OSM-51 covering the performance aspects of the grant/cooperative agreement.

231.200. Outlay Report and Request for Reimbursement for Construction Programs, Form SF-271 and the Performance Report, Form OSM-51 for each activity or project including projects previously funded or completed during the quarter.

232. The Division will for each grant/cooperative agreement submit annually to the Office the following reports prepared according to Office of Management and Budget Circular No. A-102, Attachments H and I:

232.100. A final Financial Status Report, Form SF-269 for the agency's administrative grant/cooperative agreement and a final Performance Report, Form OSM-51 covering the performance aspects of the grant/cooperative agreement.

232.200. A cumulative fourth quarter Outlay Report and Request for Reimbursement for Construction Programs, Form SF-271 and a cumulative annual Performance Report, Form OSM-51 which includes:

232.210. For each project or activity, a brief description and the type of reclamation performed, the project location, the landowner's name, the amounts of land or water reclaimed or being reclaimed and a summary of achieved or expected benefits.

232.220. For any land previously acquired but not disposed of, a statement of current or planned uses, location and size in acres, and any revenues derived from use of the land.

232.230. For any permanent facilities acquired or constructed but not disposed of, a description of the facility and a statement of current or planned uses, location, and any revenues derived from the use of the facility.

232.240. A Form OSM-76, "Abandoned Mine Land Problem Area Description," shall be submitted upon project completion to report the accomplishments achieved through the project.

240. Records.

241. The Division will maintain complete records in accordance with Office of Management and Budget Circular No. A-102, Attachment C. This includes, but is not limited to, books, documents, maps, and other evidence and accounting procedures and practices sufficient to reflect properly:

241.100. The amount and disposition by the Division of all assistance received for the program.

241.200. The total direct and indirect costs of the program for which the grant was awarded.

242. Subgrantees and contractors, including contractors for professional services, will maintain books, documents, papers, maps, and records which are pertinent to a specific grant award.

Notice of Continuation February 1, 2012

R645. Natural Resources; Oil, Gas and Mining; Coal.
R645-100. Administrative: Introduction.
R645-100-100. Scope.

110. General Overview. The rules presented herein establish the procedures through which the Utah State Division of Oil, Gas and Mining will implement those provisions of the Coal Mining Reclamation Act of 1979, (the Act) pertaining to the effects of coal mining and reclamation operations and pertaining to coal exploration.

120. R645 Rules Organization. The R645 Rules have been subdivided into the four major functional aspects of the Division's coal mining and exploration State Program.

121. The heading entitled ADMINISTRATIVE encompasses general introductory material, definitions applicable throughout the R645 Rules, procedures for the exemption of certain coal extraction activities, designating areas unsuitable for coal mining, protection of employees, and requirements for blaster certification.

122. The heading entitled COAL EXPLORATION establishes the minimum requirements for acquiring approval and identifies performance standards for coal exploration.

123. The heading entitled COAL MINE PERMITTING describes certain procedural requirements and options attendant to the coal mine permitting process. Moreover, the minimum requirements for acquiring a permit for a coal mining and reclamation operation are identified.

124. The heading entitled INSPECTION AND ENFORCEMENT delineates the authority, administrative procedures, civil penalties, and employee protection attendant to the Division's inspection and enforcement program.

130. Effective Date. The provisions of R645-100 through and including R645-402 will become effective and enforceable upon final approval by the Office of Surface Mining, U.S. Department of the Interior. Existing coal regulatory program rules, R645 Chapters I and II, will be in effect until approval of R645-100 through R645-402 by the Office of Surface Mining and will be considered repealed upon approval of R645-100 through R645-402.

R645-100-200. Definitions.

As used in the R645 Rules, the following terms have the specified meanings:

"Abandoned site" means, for the purpose of R645-400, a coal mining and reclamation operation for which the Division has found in writing that,

(a) All coal mining and reclamation operations at the site have ceased;

(b) The Division has issued at least one notice of violation or the initial program equivalent, and either:

(i) Is unable to serve the notice despite diligent efforts to do so; or

(ii) The notice was served and has progressed to a failure-to-abate cessation order or the initial program equivalent;

(c) The Division:

(i) Is taking action to ensure that the permittee and operator, and owners and controllers of the permittee and operator, will be precluded from receiving future permits while violations continue at the site; and

(ii) Is taking action pursuant to section 40-10-20(5), 40-10-20(6), 40-10-22(1)(d), or 40-10-22(2)(a) of the Act to ensure that abatement occurs or that there will not be a recurrence of the failure-to-abate, except where after evaluating the circumstances it concludes that further enforcement offers little or no likelihood of successfully compelling abatement or recovering any reclamation costs; and

(d) Where the site is, or was, permitted and bonded:

(i) The permit has either expired or been revoked; and

(ii) The Division has initiated and is diligently pursuing forfeiture of, or has forfeited any available performance bond.

(e) In lieu of the inspection frequency established in R645-400-130, the Division shall inspect each abandoned site on a set frequency commensurate with the public health and safety and environmental considerations present at each specific site, but in no case shall the inspection frequency be set at less than one complete inspection per calendar year.

(1) In selecting an alternate inspection frequency authorized under part (e) of this definition, the Division shall first conduct a complete inspection of the abandoned site and provide public notice under paragraph (2) below. Following the inspection and public notice, the Division shall prepare and maintain for public review a written finding justifying the alternative inspection frequency selected. This written finding shall justify the new inspection frequency by affirmatively addressing in detail all of the following criteria:

(i) How the site meets each of the criteria under the definition of an abandoned site and thereby qualifies for a reduction in inspection frequency;

(ii) Whether, and to what extent, there exist on the site impoundments, earthen structures or other conditions that pose, or may reasonably be expected to change into, imminent dangers to the health or safety of the public or significant environmental harms to land, air or water resources;

(iii) The extent to which existing impoundments or earthen structures were constructed and certified in accordance with prudent engineering designs approved in the permit;

(iv) The degree to which erosion and sediment control is present and functioning;

(v) The extent to which the site is located near or above urbanized areas, communities, occupied dwellings, schools and other public or commercial buildings and facilities;

(vi) The extent of reclamation completed prior to abandonment and the degree of stability of unreclaimed areas, taking into consideration the physical characteristics of the land mined and the extent of settlement or revegetation that has occurred naturally with time; and

(vii) Based on a review of the complete and partial inspection report record for the site during at least the last two consecutive years, the rate at which adverse environmental or public health and safety conditions have and can be expected to progressively deteriorate.

(2) The public notice and opportunity to comment required under part (e)(1) of this definition shall be provided as follows:

(i) The Division shall place a notice in the newspaper with the broadest circulation in the locality of the abandoned site providing the public with a 30-day period in which to submit written comments.

(ii) The public notice shall contain the permittee's name, the permit number, the precise location of the land affected, the inspection frequency proposed, the general reasons for reducing the inspection frequency, the bond status of the permit, the telephone number and address of the office where written comments on the reduced inspection frequency may be submitted, and the closing date of the comment period.

"Account" means the Abandoned Mine Reclamation Account established pursuant to Section 40-10-25 of the Act.

"Acid Drainage" means water with a pH of less than 6.0 and in which total acidity exceeds total alkalinity discharged from an active, inactive, or abandoned coal mining and reclamation operation, or from an area affected by coal mining and reclamation operations.

"Acid-Forming Materials" means earth materials that contain sulfide minerals or other materials which, if exposed to air, water, or weathering processes, form acids that may create acid drainage.

"Act" means Utah Code Annotated Section 40-10-1 et seq.

"Adjacent Area" means the area outside the permit area where a resource or resources, determined according to the

context in which adjacent area is used, are or reasonably could be expected to be adversely impacted by proposed coal mining and reclamation operations, including probable impacts from underground workings.

"Administratively Complete Application" means an application for permit approval or approval for coal exploration, where required, which the Division determines to contain information addressing each application requirement of the State Program and to contain all information necessary to initiate processing and public review.

"Affected Area" means any land or water surface area which is used to facilitate, or is physically altered by, coal mining and reclamation operations. The affected area includes the disturbed area; any area upon which coal mining and reclamation operations are conducted; any adjacent lands the use of which is incidental to coal mining and reclamation operations; all areas covered by new or existing roads used to gain access to, or for hauling coal to or from coal mining and reclamation operations, except as provided in this definition; any area covered by surface excavations, workings, impoundments, dams, ventilation shafts, entryways, refuse banks, dumps, stockpiles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, shipping areas; any areas upon which are sited structures, facilities, or other property material on the surface resulting from, or incident to, coal mining and reclamation operations; and the area located above underground workings. The affected area shall include every road used for purposes of access to, or for hauling coal to or from, coal mining and reclamation operations, unless the road (a) was designated as a public road pursuant to the laws of the jurisdiction in which it is located; (b) is maintained with public funds, and constructed, in a manner similar to other public roads of the same classification within the jurisdiction; and (c) there is substantial (more than incidental) public use. Editorial Note: The definition of "Affected area", insofar, as it excludes roads which are included in the definition of "Surface coal mining operations", was suspended at 51 FR 41960, Nov. 20, 1986. Accordingly, Utah suspends the definition of Affected Area insofar as it excludes roads which are included in the definition of "coal mining and reclamation operations."

"Agricultural Use" means the use of any tract of land for the production of animal or vegetable life. The uses include, but are not limited to, the pasturing, grazing, and watering of livestock, and the cropping, cultivation, and harvesting of plants.

"Alluvial Valley Floors" means the unconsolidated stream-laid deposits holding streams with water availability sufficient for subirrigation or flood irrigation agricultural activities, but does not include upland areas which are generally overlain by a thin veneer of colluvial deposits composed chiefly of debris from sheet erosion, deposits formed by unconcentrated runoff or slope wash, together with talus, or other mass-movement accumulations, and windblown deposits.

"Applicant" means any person seeking a permit, permit change, and permit renewal, transfer, assignment, or sale of permit rights from the Division to conduct coal mining and reclamation operations or, where required, seeking approval for coal exploration.

"Application" means the documents and other information filed with the Division under the R645 Rules for the issuance of permits; permit changes; permit renewals; and transfer, assignment, or sale of permit rights for coal mining and reclamation operations or, where required, for coal exploration.

"Approximate Original Contour" means that surface configuration achieved by backfilling and grading of the mined areas so that the reclaimed area, including any terracing or access roads, closely resembles the general surface configuration of the land prior to mining and blends into and complements the drainage pattern of the surrounding terrain with all highwalls, spoil piles, and coal refuse piles having a design approved under the R645 Rules and prepared for abandonment. Permanent water impoundments may be permitted where the Division has determined that they comply with R645-301-413.100 through R645-301-413.334, R645-301-512.240, R645-301-514.300, R645-301-515.200, R645-301-533.100 through R645-301-533.600, R645-301-542.400, R645-301-733.220 through R645-301-733.224, R645-301-743, R645-302-270 through R645-302-271.400, R645-302-271.600, R645-302-271.800, and R645-302-271.900.

"Aquifer" means a zone, stratum, or group of strata that can store and transmit water in sufficient quantities for a specific use.

"Arid and Semiarid Area" means, in the context of ALLUVIAL VALLEY FLOORS, an area where water use by native vegetation equals or exceeds that supplied by precipitation. All coalfields in Utah are in arid and semiarid areas.

"Auger Mining" means a method of mining coal at a cliff or highwall by drilling holes into an exposed coal seam from the highwall and transporting the coal along an auger bit to the surface.

"Best Technology Currently Available" means equipment, devices, systems, methods, or techniques which will (a) prevent, to the extent possible, additional contributions of suspended solids to stream flow or runoff outside the permit area, but in no event result in contributions of suspended solids in excess of requirements set by applicable state or federal laws; and (b) minimize, to the extent possible, disturbances and adverse impacts on fish, wildlife, and related environmental values, and achieve enhancement of those resources where practicable. The term includes equipment, devices, systems, methods, or techniques which are currently available anywhere as determined by the Director, even if they are not in routine use. The term includes, but is not limited to, construction practices, siting requirements, vegetation selection and planting requirements, animal stocking requirements, scheduling of activities, and design of sedimentation ponds in accordance with R645-301 and R645-302. Within the constraints of the State Program, the Division will have the discretion to determine the best technology currently available on a case-by-case basis, considering among other things the economic feasibility of the equipment, devices, systems, methods or techniques, as authorized by the Act and the R645 Rules.

"Blaster" means a person who is directly responsible for the use of explosives in connection with surface blasting operations incidental to UNDERGROUND COAL MINING AND RECLAMATION ACTIVITIES or SURFACE COAL MINING AND RECLAMATION ACTIVITIES, and who holds a valid certificate issued by the Division in accordance with the statutes and regulations administered by the Division governing training, examination, and certification of persons responsible for the use of explosives in connection with surface blasting operations incident to coal mining and reclamation operations.

"Board" means the Board of Oil, Gas and Mining for the state of Utah, or the Board's delegated representative.

"Cemetery" means any area of land where human bodies are interred.

"Coal" means combustible carbonaceous rock, classified as anthracite, bituminous, subbituminous, or lignite by ASTM Standard D388-95.

"Coal Exploration" means the field gathering of: (a) surface or subsurface geologic, physical, or chemical data by mapping, trenching, drilling, geophysical, or other techniques necessary to determine the quality and quantity of overburden and coal of an area; or (b) the gathering of environmental data to establish the conditions of an area before beginning coal mining and reclamation operations under the requirements of the R645

Rules.

"Coal Mine Waste" means coal processing waste and underground development waste.

"Coal Mining and Reclamation Operations" means (a) activities conducted on the surface of lands in connection with a surface coal mine or, subject to the requirements of Section 40-10-18 of the Act, surface coal mining and reclamation operations and surface impacts incident to an underground coal mine, the products of which enter commerce or the operations of which directly or indirectly affect interstate commerce. Such activities include all activities necessary and incidental to the reclamation of the operations, excavation for the purpose of obtaining coal, including such common methods as contour, strip, auger, mountaintop removal, box cut, open pit, and area mining; the use of explosives and blasting; in-situ distillation; or retorting, leaching, or other chemical or physical processing; and the cleaning, concentrating, or other processing or preparation of coal. Such activities also include the loading of coal for interstate commerce at or near the mine site. Provided, these activities do not include the extraction of coal incidental to the extraction of other minerals, where coal does not exceed 16-2/3 percent of the tonnage of minerals removed for purposes of commercial use or sale, or coal exploration subject to Section 40-10-8 of the Act; and, provided further, that excavation for the purpose of obtaining coal includes extraction of coal from coal refuse piles; and (b) the areas upon which the activities described under part (a) of this definition occur or where such activities disturb the natural land surface. These areas will also include any adjacent land the use of which is incidental to any such activities, all lands affected by the construction of new roads or the improvement or use of existing roads to gain access to the site of those activities and for haulage and excavation, workings, impoundments, dams, ventilation shafts, entryways, refuse banks, dumps, stockpiles, overburden piles, spoil banks, culm banks, tailings, holes or depressions, repair areas, storage areas, processing areas, shipping areas, and other areas upon which are sited structures, facilities, or other property or material on the surface, resulting from or incident to those activities.

"Coal Mining and Reclamation Operations Which Exist on the Date of Enactment" means all coal mining and reclamation operations which were being conducted on August 3, 1977.

"Coal Preparation or Coal Processing" means the chemical and physical processing and the cleaning, concentrating, or other processing or preparation of coal.

"Coal Processing Plant" means a facility where coal is subjected to chemical or physical processing or the cleaning, concentrating, or other processing or preparation. Coal processing plant includes facilities associated with coal processing activities, such as, but not limited to, the following: loading facilities; storage and stockpile facilities; sheds, shops, and other buildings; water-treatment and water-storage facilities; settling basins and impoundments; and coal processing and other waste disposal areas.

"Coal Processing Waste" means earth materials which are separated from the product coal during cleaning, concentrating, or the processing or preparation of coal.

"Collateral Bond" means an indemnity agreement in a sum certain executed by the permittee as principal which is supported by the deposit with the Division of: (a) a cash account, which will be the deposit of cash in one or more federally-insured or equivalently protected accounts, payable only to the Division upon demand, or the deposit of cash directly with the Division; (b) negotiable bonds of the United States, a State, or a municipality, endorsed to the order of, and placed in the possession of, the Division; (c) negotiable certificates of deposit, made payable or assigned to the Division and placed in its possession, or held by a federally insured bank; (d) an irrevocable letter of credit of any bank organized or authorized to transact business in the United States payable only to the Division upon presentation; (e) a perfected, first lien security interest in real property in favor of the Division; or (f) other investment grade rated securities having a rating of AAA or AA or A, or an equivalent rating issued by a nationally recognized securities rating service, endorsed to the order of, and placed in the possession of, the Division.

"Combustible Material" means organic material that is capable of burning, either by fire or through oxidation, accompanied by the evolution of heat and a significant temperature rise.

"Community or Institutional Building" means any structure, other than a public building or an occupied dwelling, which is used primarily for meetings, gatherings or functions of local civic organizations or other community groups; functions including, but not limited to educational, cultural, historic, religious, scientific, correctional, mental-health or physical-health care facility; or is used for public services, including, but not limited to, water supply, power generation, or sewage treatment.

"Compaction" means increasing the density of a material by reducing the voids between the particles, and is generally accomplished by controlled placement and mechanical effort such as from repeated application of wheel, track, or roller loads from heavy equipment.

"Complete and Accurate Application" means an application for permit approval or approval for coal exploration, where required, which the Division determines to contain all information required under the Act, the R645 Rules, and the State Program that is necessary to make a decision on permit issuance.

"Continuously Mined Areas" means land which was mined for coal by underground mining operations prior to August 3, 1977, the effective date of the Federal Act, and where mining continued after that date.

"Cooperative Agreement" means the agreement between the Governor of the State of Utah and the Secretary of the Department of the Interior as published at 30 CFR 944.30.

"Cropland" means land used for the production of adapted crops for harvest, alone or in a rotation with grasses and legumes, and includes row crops, small grain crops, hay crops, nursery crops, orchard crops, and other similar specialty crops.

"Cumulative Impact Area" means the area, including the permit area, within which impacts resulting from the proposed operation may interact with the impacts of all anticipated mining on surface and groundwater systems. Anticipated mining will include, at a minimum, the entire projected lives through bond releases of: (a) the proposed operation, (b) all existing operations, (c) any operation for which a permit application has been submitted to the Division, and (d) all operations required to meet diligent development requirements for leased federal coal for which there is actual mine development information available.

"Cumulative measurement period" means, for the purpose of R645-106, the period of time over which both cumulative production and cumulative revenue are measured.

(a) For purposes of determining the beginning of the cumulative measurement period, subject to Division approval, the operator must select and consistently use one of the following:

(i) For mining areas where coal or other minerals were extracted prior to August 3, 1977, the date extraction of coal or other minerals commenced at that mining area or August 3, 1977, or

(ii) For mining areas where extraction of coal or other minerals commenced on or after August 3, 1977, the date extraction of coal or other minerals commenced at that mining area, whichever is earlier.

(b) For annual reporting purposes pursuant to R645-106-

900, the end of the period for which cumulative production and revenue is calculated is either

(i) For mining areas where coal or other minerals were extracted prior to July 1, 1992, June 30, 1992, and every June 30 thereafter; or

(ii) For mining areas where extraction of coal or other minerals commenced on or after July 1, 1992, the last day of the calendar quarter during which coal extraction commenced, and each anniversary of that day thereafter.

"Cumulative production" means, for the purpose of R645-106, the total tonnage of coal or other minerals extracted from a mining area during the cumulative measurement period. The inclusion of stockpiled coal and other mineral tonnages in this total is governed by R645-106-700.

"Cumulative revenue" means, for the purpose of R645-106, the total revenue derived from the sale of coal or other minerals and the fair market value of coal or other minerals transferred or used, but not sold, during the cumulative measurement period.

"Current Assets" means cash or other assets or resources which are reasonably expected to be converted to cash or sold or consumed within one year or within the normal operating cycle of the business.

"Current Liabilities" means obligations which are reasonably expected to be paid or liquidated within one year or within the normal operating cycle of the business.

"Direct Financial Interest" means ownership or part ownership by an employee of lands, stocks, bonds, debentures, warrants, partnership shares, or other holdings, and also means any other arrangement where the employee may benefit from his or her holding in or salary from coal mining and reclamation operations. Direct financial interests include employment, pensions, creditor, real property, and other financial relationships.

"Director" means the Director, Utah State Division of Oil, Gas and Mining, or the Director's representative.

"Director of the Office" means the Director of the Office of Surface Mining, Reclamation and Enforcement, U.S. Department of the Interior.

"Disturbed Area" means an area where vegetation, topsoil, or overburden is removed or upon which topsoil, spoil, coal processing waste, underground development waste, or noncoal waste is placed by coal mining and reclamation operations. Those areas are classified as disturbed until reclamation is complete and the performance bond or other assurance of performance required by R645-301-800 is released. For the purposes of R645-301-356.300, R645-301-356.400, R645-301-513.200, R645-301-742.200 through R645-301-742.240, and R645-301-763, disturbed area will not include those areas (a) in which the only coal mining and reclamation operations include diversion ditches, siltation structures, or roads that are designed, constructed and maintained in accordance with R645-301 and R645-302; and (b) for which the upstream area is not otherwise disturbed by the operator.

"Diversion" means a channel, embankment, or other man-made structure constructed to divert water from one area to another.

"Division" means Utah State Division of Oil, Gas and Mining, the designated state regulatory authority.

"Downslope" means the land surface between the projected outcrop of the lowest coalbed being mined along each highwall and a valley floor.

"Edge Effect" means the positive effect created by the juxtaposition of two diverse habitats.

"Embankment" means an artificial deposit of material that is raised above the natural surface of the land and used to contain, divert, or store water, support roads or railways, or for other similar purposes.

"Employee" means any person employed by the Division who performs any function or duty under the Act, and does not mean the Board of Oil, Gas and Mining which is excluded from this definition.

"Ephemeral Stream" means a stream which flows only in direct response to precipitation in the immediate watershed, or in response to the melting of a cover of snow and ice, and which has a channel bottom that is always above the local water table.

"Essential Hydrologic Functions" means the role of an ALLUVIAL VALLEY FLOOR in collecting, storing, regulating, and making the natural flow of surface or ground water, or both, usefully available for agricultural activities by reason of the valley floor's topographic position, the landscape, and the physical properties of its underlying materials. A combination of these functions provides a water supply during extended periods of low precipitation.

"Excess Spoil" means spoil material disposed of in a location other than the mined-out area, provided that the spoil material used to achieve the approximate original contour or to blend the mined-out area with the surrounding terrain in accordance with R645-301-553.220 in nonsteep slope areas will not be considered excess spoil.

"Existing Structure" means a structure or facility used in connection with or to facilitate coal mining and reclamation operations for which construction began prior to January 21, 1981.

"Extraction of Coal as an Incidental Part" means the extraction of coal which is necessary to enable government-financed construction to be accomplished. For purposes of R645-102, only that coal extracted from within the right-of-way in the case of a road, railroad, utility line, or other such construction, or within the boundaries of the area directly affected by other types of government-financed construction, may be considered incidental to that construction. Extraction of coal outside the right-of-way or boundary of the area directly affected by the construction will be subject to the requirements of the Act and the R645 Rules.

"Federal Act" means the Surface Mining Control and Reclamation Act of 1977 (P.L. 95-87).

"Federal Lands" means any land, including mineral interests, owned by the United States without regard to how the United States acquired ownership of the lands or which agency manages the lands. It does not include Indian lands.

"Fixed Assets" means plants and equipment, but does not include land or coal in place.

"Flood Irrigation" means, with respect to ALLUVIAL VALLEY FLOORS, supplying water to plants by natural overflow or the diversion of flows, so that the irrigated surface is largely covered by a sheet of water.

"Fragile Lands" means, for the purposes of R645-103-300, geographic areas containing natural, ecologic, scientific, or aesthetic resources that could be significantly damaged or be destroyed by coal mining and reclamation operations. Examples of fragile lands include valuable habitats for fish or wildlife, critical habitats for endangered or threatened species of animals or plants, uncommon geologic formations, paleontological sites, National Natural Landmark sites, areas where mining may result in flooding, environmental corridors containing a concentration of ecologic and aesthetic features, areas of recreational value due to high environmental quality.

"Fugitive Dust" means that particulate matter not emitted from a duct or stack which becomes airborne due to the forces of wind or coal mining and reclamation operations, or both. During coal mining and reclamation operations, it may include emissions from haul roads; wind erosion of exposed surfaces, storage piles, and spoil piles; reclamation operations; and other activities in which material is either removed, stored, transported, or redistributed.

"Fund" means the Abandoned Mine Reclamation Account established pursuant to 40-10-25 of the Act.

"Government-Financed Construction" means, for the

purposes of R645-102, construction funded 50 percent or more by funds appropriated from a government-financing agency's budget or obtained from general revenue bonds, but will not mean government-financing agency guarantees, insurance, loans, funds obtained through industrial revenue bonds or their equivalent, or in-kind payments.

"Government Financing Agency" means, for the purposes of R645-102 a federal, state, county, municipal, or local unit of government, or a department, bureau, agency or office of the unit which, directly or through another unit of government, finances construction.

"Gravity Discharge" means, with respect to UNDERGROUND MINING AND RECLAMATION ACTIVITIES, mine drainage that flows freely in an open channel downgradient. Mine drainage that occurs as a result of flooding a mine, to the level of the discharge, is not gravity discharge.

"Ground Cover" means the area of ground covered by the combined aerial parts of vegetation and the litter that is produced naturally on-site, expressed as a percentage of the total area of measurement.

"Ground Water" means subsurface water that fills available openings in rock or soil materials to the extent that they are considered water saturated.

"Habitats of Unusually High Value for Fish and Wildlife" means an area defined by the state as crucial-critical use areas for wildlife.

"Half-Shrub" means a perennial plant with a woody base whose annually produced stems die back each year.

"Head-of-Hollow Fill" means a fill structure consisting of any material, other than organic material, placed in the uppermost reaches of a hollow where side slopes of the existing hollow, measured at the steepest point, are greater than 20 degrees, or the average slope of the profile of the hollow from the toe of the fill to the top of the fill, is greater than ten degrees. In head-of-hollow fills, the top surface of the fill, when completed, is at approximately the same elevation as the adjacent ridge line, and no significant area of natural drainage occurs above the fill draining into the fill area.

"Higher or Better Uses" means postmining land uses that have a higher economic value or nonmonetary benefit to the landowner, or the community, than the premining land uses.

"Highwall" means the face of exposed overburden and coal in an open cut of surface coal mining and reclamation activities or for entry to underground mining activities.

"Highwall Remnant" means that portion of highwall that remains after backfilling and grading of a REMINING permit area.

"Historic Lands" means, for the purposes of R645-103-300, areas containing historic, cultural, and scientific resources. Examples of historic lands include archeological sites, properties listed on or eligible for listing on a Utah or National Register of Historic Places, National Historic Landmarks, properties having religious or cultural significance to native Americans or religious groups, and properties for which historic designation is pending.

"Historically Used for Cropland" means (a) lands that have been used for cropland for any five years or more out of the ten years immediately preceding the acquisition, including purchase, lease, or option, of the land for the purpose of conducting or allowing through resale, lease, or option the conducting of coal mining and reclamation operations; (b) lands that the Division determines, on the basis of additional cropland history of the surrounding lands and the lands under consideration, that the permit area is clearly cropland but falls outside the specific five-years-in-ten criterion, in which case the regulations for prime farmland may be applied to include more years of cropland history only to increase the prime farmland acreage to be preserved; or (c) lands that would likely have been used as cropland for any five out of the last ten years, immediately preceding such acquisition but for the same fact of ownership or control of the land unrelated to the productivity of the land.

"Hydrologic Balance" means the relationship between the quality and quantity of water inflow to, water outflow from, and water storage in a hydrologic unit such as a drainage basin, aquifer, soil zone, lake, or reservoir. It encompasses the dynamic relationships among precipitation, runoff, evaporation, and changes in ground and surface water storage.

"Hydrologic Regime" means the entire state of water movement in a given area. It is a function of the climate and includes the phenomena by which water first occurs as atmospheric water vapor, passes into a liquid or solid form, falls as precipitation, moves along or into the ground surface and returns to the atmosphere as vapor by means of evaporation and transpiration.

"Imminent Danger to the Health and Safety of the Public" means the existence of any condition or practice, or any violation of a permit or other requirements of the Act in a coal mining and reclamation operation, which could reasonably be expected to cause substantial physical harm to persons outside the permit area before the condition, practice, or violation can be abated. A reasonable expectation of death or serious injury before abatement exists if a rational person, subjected to the same condition or practice giving rise to the peril, would avoid exposure to the danger during the time necessary for abatement.

"Impounding Structure" means a dam, embankment, or other structure used to impound water, slurry, or other liquid or semiliquid material.

"Impoundments" means all water, sediment, slurry, or other liquid or semiliquid holding structures, either naturally formed or artificially built.

"Indian Lands" means all lands, including mineral interests, within the exterior boundaries of any federal Indian reservation, notwithstanding the issuance of any patent, and including rights-of-way, and all lands including mineral interests held in trust for or supervised by an Indian tribe.

"Indirect Financial Interest" means the same financial relationships as for direct ownership, but where the employee reaps the benefits of such interests, including interests held by his or her spouse, minor child(ren) and other relatives, including in-laws, residing in the employee's home. The employee will not be deemed to have an indirect financial interest if there is no relationship between the employee's functions or duties and the coal mining and reclamation operations in which the spouse, minor child(ren), or other resident relatives hold a financial interest.

"In-Situ Processes" means activities conducted on the surface or underground in connection with in-place distillation, retorting, leaching, or other chemical or physical processing of coal. The term includes, but is not limited to, in-situ gasification, in-situ leaching, slurry mining, solution mining, borehole mining, and fluid-recovery mining.

"Intermittent Stream" means a stream, or reach of a stream, that is below the local water table for at least some part of the year and obtains its flow from both surface runoff and groundwater discharge.

"Irreparable Damage to the Environment" means any damage to the environment in violation of the Act, the State Program, or the R645 Rules that cannot be corrected by actions of the applicant.

"Knowingly" means for the purposes of R645-402, that an individual knew or had reason to know in authorizing, ordering, or carrying out an act or omission on the part of a corporate permittee that such act or omission constituted a violation, failure, or refusal.

"Land Use" means specific uses or management-related activities, rather than the vegetation or cover of the land. Land uses may be identified in combination when joint or seasonal

uses occur and may include land used for support facilities that are an integral part of the use. Changes of land use from one of the following categories to another will be considered as a change to an alternative land use which is subject to approval by the Division.

CROPLAND - Land used for the production of adapted crops for harvest, alone or in rotation with grasses and legumes, that include row crops, small grain crops, hay crops, nursery crops, orchard crops, and other similar crops.

DEVELOPED WATER RESOURCES - Land used for storing water for beneficial uses such as stock ponds, irrigation, fire protection, flood control, and water supply.

FISH AND WILDLIFE HABITAT - Land dedicated wholly or partially to the production, protection, or management of species of fish or wildlife.

FORESTRY - Land used or managed for the long-term production of wood, wood fiber, or wood-derived products.

GRAZING LAND - Land used for grasslands and forest lands where the indigenous vegetation is actively managed for grazing, browsing, or occasional hay production.

INDUSTRIAL/COMMERCIAL - Land used for (a) extraction or transformation of materials for fabrication of products, wholesaling of products, or long-term storage of products; this includes all heavy and light manufacturing facilities, or (b) retail or trade of goods or services, including hotels, motels, stores, restaurants, and other commercial establishments.

PASTURE LAND OR LAND OCCASIONALLY CUT FOR HAY - Land used primarily for the long-term production of adapted, domesticated forage plants to be grazed by livestock or occasionally cut and cured for livestock feed.

RECREATION - Land used for public or private leisure-time activities, including developed recreation facilities such as parks, camps, and amusement areas, as well as areas for less intensive uses such as hiking, canoeing, and other undeveloped recreational uses.

RESIDENTIAL - Land used for single and multiple-family housing, mobile home parks, or other residential lodgings.

UNDEVELOPED LAND OR NO CURRENT USE OR LAND MANAGEMENT - Land that is undeveloped or if previously developed, land that has been allowed to return naturally to an undeveloped state or has been allowed to return to forest through natural succession.

"Liabilities" means obligations to transfer assets or provide services to other entities in the future as a result of past transactions.

"Material Damage" for the purposes of R645-301-525, means:

(a) Any functional impairment of surface lands, features, structures or facilities;

(b) Any physical change that has a significant adverse impact on the affected land's capability to support any current or reasonably foreseeable uses or causes significant loss in production or income; or

(c) Any significant change in the condition, appearance or utility of any structure or facility from its pre-subsidence condition.

"Materially Damage the Quantity or Quality of Water" means, with respect to ALLUVIAL VALLEY FLOORS, to degrade or reduce, by coal mining and reclamation operations, the water quantity or quality supplied to the alluvial valley floor to the extent that resulting changes would significantly decrease the capability of the alluvial valley floor to support agricultural activities.

"Mining" means, for the purposes of R645-400-351, (a) extracting coal from the earth or coal waste piles and transporting it within or from the permit area; and (b) the processing, cleaning, concentrating, preparing or loading of coal where such operations occur at a place other than a mine site.

"Mining area" means, for the purpose of R645-106, an individual excavation site or pit from which coal, other minerals and overburden are removed.

"Moist Bulk Density" means the weight of soil (oven dry)per unit volume. Volume is measured when the soil is at field moisture capacity (1/3 bar moisture tension). Weight is determined after drying the soil at 105 degrees Celsius.

"NRCS" means Natural Resources Conservation Service, U.S. Department of Agriculture.

"MSHA" means the Mine Safety and Health Administration, U.S. Department of Labor.

"Mulch" means vegetation residues or other suitable materials that aid in soil stabilization and soil moisture conservation, thus providing microclimatic conditions suitable for germination and growth.

"Natural Hazard Lands" means, for the purposes of R645-103-300, geographic areas in which natural conditions exist which pose or, as a result of coal mining and reclamation operations, may pose a threat to the health, safety, or welfare of people, property or the environment, including areas subject to landslides, cave-ins, large or encroaching sand dunes, severe wind or soil erosion, frequent flooding, avalanches, and areas of unstable geology.

"Net Worth" means total assets minus total liabilities and is equivalent to owners' equity.

"Non-commercial Building" means any building, other than an occupied residential dwelling, that, at the time the subsidence occurs, is used on a regular or temporary basis as a public building or community or institutional building as those terms are defined at R645-100-200. Any building used only for commercial agricultural, industrial, retail or other commercial enterprises is excluded.

"Noxious Plants" means species that have been included on the official Utah list of noxious plants.

"Occupied Dwelling" means any building that is currently being used on a regular or temporary basis for human habitation.

"Occupied Residential Dwelling and Structures Related Thereto" means, for purposes of R645-301, any building or other structure that, at the time the subsidence occurs, is used either temporarily, occasionally, seasonally, or permanently for human habitation. This term also includes any building, structure or facility installed on, above or below, or a combination thereof, the land surface if that building, structure or facility is adjunct to or used in connection with an occupied residential dwelling. Examples of such structures include, but are not limited to, garages; storage sheds and barns; greenhouses and related buildings; utilities and cables; fences and other enclosures; retaining walls; paved or improved patios, walks and driveways; septic sewage treatment facilities; and lot drainage and lawn and garden irrigation systems. Any structure used only for commercial agricultural, industrial, retail or other commercial purposes is excluded.

"Office" means Office of Surface Mining Reclamation and Enforcement, U.S. Department of the Interior.

"Operator" means any person engaged in coal mining who removes, or intends to remove, more than 250 tons of coal from the earth or from coal refuse piles by mining within 12 consecutive calendar months in any one location.

"Other minerals" means, for the purpose of R645-106, any commercially valuable substance mined for its mineral value, excluding coal, topsoil, waste and fill material.

"Other Treatment Facilities" means, for the purposes of R645-301-356.300, R645-301-356.400, R645-301-513.200, R645-301-742.200 through R645-301-742.240, and R645-301-763, any chemical treatments, such as flocculation or neutralization, or mechanical structures, such as clarifiers or precipitators, that have a point source discharge and that are utilized to prevent additional contribution of dissolved or

suspended solids to stream flow or runoff outside the permit area or to comply with all applicable State and Federal water quality laws and regulations.

"Outslope" means the face of the spoil or embankment sloping downward from the highest elevation to the toe.

"Overburden" means material of any nature, consolidated or unconsolidated, that overlies a coal deposit, excluding topsoil.

"Owned or controlled" and "owns or controls" means any one or a combination of the relationships specified in paragraphs (a) and (b) of this definition:

(a)(1) Being a permittee of a coal mining and reclamation operation;

(2) Based on the instrument of ownership or voting securities, owning of record in excess of 50 percent of an entity; or

(3) Having any other relationship which gives one person authority directly or indirectly to determine the manner in which an applicant, an operator, or other entity conducts coal mining and reclamation operations.

(b) The following relationships are presumed to constitute ownership or control unless a person can demonstrate that the person subject to the presumption does not in fact have the authority directly or indirectly to determine the manner in which the relevant coal mining and reclamation operation is conducted:

(1) Being an officer or director of an entity;

(2) Being the operator of a coal mining and reclamation operation;

(3) Having the ability to commit the financial or real property assets or working resources of an entity;

(4) Being a general partner in a partnership;

(5) Based on the instruments of ownership or the voting securities of a corporate entity, owning of record 10 through 50 percent of the entity; or

(6) Owning or controlling coal to be mined by another person under a lease, sublease, or other contract and having the right to receive such coal after mining or having authority to determine the manner in which that person or another person conducts coal mining and reclamation operation.

"Parent Corporation" means corporation which owns or controls the applicant.

"Perennial Stream" means a stream or part of a stream that flows continuously during all of the calendar year as a result of groundwater discharge or surface runoff. The term does not include intermittent stream or ephemeral stream.

"Performance Bond" means a surety bond, collateral bond, or self-bond, or a combination thereof, by which a permittee assures faithful performance of all the requirements of the Act, the R645 Rules, the State Program, and the requirements of the permit and reclamation plan.

"Performing Any Function or Duty Under This Act" means those decisions or actions, which if performed or not performed by a board member or employee, affect the State Program under the Act.

"Permanent Diversion" means a diversion remaining after coal mining and reclamation operations are completed which has been approved for retention by the Division and other appropriate state and federal agencies.

"Permanent Impoundment" means an impoundment which is approved by the Division and, if required, by other state and federal agencies for retention as part of the postmining land use.

"Permit" means a permit to conduct coal mining and reclamation operations issued by the Division pursuant to the State Program. For purposes of the federal lands program, permit means a permit issued by the Division pursuant to the cooperative agreement with the Secretary.

"Permit Area" means the area of land, indicated on the approved map submitted by the operator with his or her application, required to be covered by the operator's performance bond under R645-301-800, and which will include the area of land upon which the operator proposes to conduct coal mining and reclamation operations under the permit, including all disturbed areas, provided that areas adequately bonded under another valid permit may be excluded from the permit area.

"Permit Change" means any coal mining and reclamation operations not previously approved by the Division in the Permit or in any previously-approved permit change under R645-303-220.

"Permittee" means a person holding, or required by the Act or the R645 Rules to hold, a permit to conduct coal mining and reclamation operations issued by the Division pursuant to the State Program or, under the cooperative agreement pursuant to Section 523 of P.L. 95-87, by the Director of the Office and the Division.

"Person" means an individual, Indian tribe when conducting coal mining and reclamation operations on non-Indian lands, partnership, association, society, joint venture, joint-stock company, firm, company, corporation, cooperative or other business organization, and any agency, unit, or instrumentality of federal, state, or local government including any publicly owned utility or publicly owned corporation of federal, state, or local governments.

"Person Having an Interest Which Is or May Be Adversely Affected or Person With a Valid Legal Interest" means any person (a) who uses any resource of economic, recreational, aesthetic, or environmental value that may be adversely affected by coal exploration or coal mining and reclamation operations or any related action of the Division, or the Board, or (b) whose property is or may be adversely affected by coal exploration or coal mining and reclamation operations or any related action of the Division or the Board.

"Precipitation Event" means a quantity of water resulting from drizzle, rain, snow, sleet, or hail in a limited period of time. It may be expressed in terms of recurrence interval. As used in the R645 Rules, precipitation event also includes that quantity of water emanating from snow cover as snowmelt in a limited period of time.

"Previously Mined Area" means land affected by coal mining and reclamation operations prior to August 3, 1977, that has not been reclaimed to the standards of Ut. Admin. R645 or 30 CFR chapter VII.

"Prime Farmland" means those lands which are defined by the Secretary of Agriculture in 7 CFR 657 (Federal Register Vol. 4 No. 21) and which have historically been used for cropland as that phrase is defined herein.

"Principal Shareholder" means any person who is the record or beneficial owner of ten percent or more of any class of voting stock.

"Prohibited Financial Interest" means any direct or indirect financial interest in any coal mining and reclamation operation.

"Property to be Mined" means both the surface estates and mineral estates within the permit area and the area covered by underground workings.

"Public Building" means any structure that is owned or leased and principally used by a government agency for public business or meetings.

"Public Office" means a facility under the direction and control of a governmental entity which is open to public access on a regular basis during reasonable business hours.

"Public Park" means an area or portion of an area dedicated or designated by any federal, state, or local agency primarily for public recreational use, whether or not such use is limited to certain times or days, including any land leased, reserved, or held open to the public because of that use.

"Public Road", for the purpose of part R645-103-200, R645-301-521.123, and R645-301-521.133 means a road (a) which has been designated as a public road pursuant to the laws

of the jurisdiction in which it is located; (b) which is maintained with public funds in a manner similar to other public roads of the same classification within the jurisdiction; (c) for which there is substantial (more than incidental) public use; and (d) which meets road construction standards for other public roads of the same classification in the local jurisdiction.

"Publicly Owned Park" means a public park that is owned by a federal, state, or local governmental entity.

"Qualified Laboratory" means, for the purposes of R645-302-290, a designated public agency, private firm, institution, or analytical laboratory which can prepare the required determination of probable hydrologic consequences, statement of results of test borings or core samplings under SOAP, or other services as specified at R645-302-299 and which meet the standards of R645-302-295.100.

"Rangeland" means land on which the natural potential (climax) plant cover is principally native grasses, forbs, and shrubs valuable for forage. This land includes natural grasslands and savannahs, such as prairies, and juniper savannahs, such as brushlands. Except for brush control, management is primarily achieved by regulating the intensity of grazing and season of use.

"Reasonably Available Spoil" means spoil and suitable coal mine waste material generated by the remining activity or other spoil or suitable coal mine waste material located in the permit area that is accessible and available for use, and that when rehandled will not cause a hazard to public safety or significant damage to the environment.

"Recharge Capacity" means the ability of the soils and underlying materials to allow precipitation and runoff to infiltrate and reach the zone of saturation.

"Reclamation" means those actions taken to restore mined land as required by the R645 Rules to a postmining land use approved by the Division.

"Recurrence Interval" means the interval of time in which a precipitation event is expected to occur once, on the average. For example, the 10-year 24-hour precipitation event would be that 24-hour precipitation event expected to occur on the average once in ten years.

"Reference Area" means a land unit maintained under appropriate management for the purpose of measuring vegetation ground cover, productivity, and plant species diversity that are produced naturally or by crop production methods approved by the Division. Reference areas must be representative of geology, soil, slope, and vegetation in the permit area.

"Refuse Pile" means a surface deposit of coal mine waste that does not impound water, slurry, or other liquid or semiliquid material.

"Remining" means conducting coal mining and reclamation operations which affect previously mined areas.

"Renewable Resource Lands" means aquifers and areas for the recharge of aquifers and other underground waters, areas for agricultural or silvicultural production of food and fiber, and grazing lands. For the purposes of R645-103, RENEWABLE RESOURCE LANDS means geographic areas which contribute significantly to the long-range productivity of water supply or of food or fiber products, such lands to include aquifers and aquifer recharge areas.

"Renewal of a Permit" means, for the purposes of R645-302-300, a decision by the Division to extend the time by which the permittee may complete mining within the boundaries of the original permit.

"Replacement of Water Supply" means, with respect to State-appropriated water supplies contaminated, diminished, or interrupted by coal mining and reclamation operations, provision of water supply on both a temporary and permanent basis equivalent to premining quantity and quality. Replacement includes provision of an equivalent water delivery system and payment of operation and maintenance costs in excess of customary and reasonable delivery costs for premining water supplies.

(a) Upon agreement by the permittee and the water supply owner, the obligation to pay such operation and maintenance costs may be satisfied by a one-time payment in an amount which covers the present worth of the increased annual operation and maintenance costs for a period agreed to by the permittee and the water supply owner.

(b) If the affected water supply was not needed for the land use in existence at the time of loss, contamination, or diminution, and if the supply is not needed to achieve the postmining land use, replacement requirements may be satisfied by demonstrating that a suitable alternative water source is available and could feasibly be developed. If the latter approach is selected, written concurrence must be obtained from the water supply owner.

"Road" means a surface right-of-way for purposes of travel by land vehicles used in coal mining and reclamation operations or coal exploration. A road consists of the entire area within the right-of-way, including the roadbed, shoulders, parking and side areas, approaches, structures, ditches, and surface. The term includes access and haul roads constructed, used, reconstructed, improved, or maintained for use in coal mining and reclamation operations or coal exploration, including use by coal hauling vehicles to and from transfer, processing, or storage areas. The term does not include ramps and routes of travel within the immediate mining area or within spoil or coal mine waste disposal areas.

"Safety Factor" means the ratio of the available shear strength to the developed shear stress, or the ratio of the sum of the resisting forces to the sum of the loading or driving forces, as determined by accepted engineering practices.

"Secretary" means the Secretary of the Department of Interior or his or her representative.

"Sedimentation Pond" means an impoundment used to remove solids from water in order to meet water quality standards or effluent limitations before the water leaves the permit area.

"Self Bond" means an indemnity agreement in a sum certain executed by the applicant or by the applicant and any corporate guarantor, and made payable to the Division with or without separate surety.

"Significant Forest Cover" means an existing plant community consisting predominantly of trees and other woody vegetation. The Secretary of Agriculture will decide on a case-by-case basis whether the forest cover is significant within those national forests in Utah.

"Significant, Imminent Environmental Harm to Land, Air, or Water Resources" means (a) the environmental harm has an adverse impact on land, air, or water resources which resources include, but are not limited to, plant and animal life; (b) an environmental harm is imminent, if a condition, practice, or violation exists which (i) is causing such harm, or (ii) may reasonably be expected to cause such harm at any time before the end of the reasonable abatement time that would be set under 40-10-22 of the Act, and (c) an environmental harm is significant if that harm is appreciable and not immediately repairable.

"Significant Recreational, Timber, Economic, or Other Values Incompatible With Coal Mining and Reclamation Operations" means those values to be evaluated for their significance which could be damaged by, and are not capable of existing together with, coal mining and reclamation operations because of the undesirable effects mining would have on those values, either on the area included in the permit application or on other affected areas. Those values to be evaluated for their importance include (a) recreation, including hiking, boating, camping, skiing, or other related outdoor activities, (b) timber

management and silviculture, (c) agriculture, aquaculture, or production of other natural, processed, or manufactured products which enter commerce, and (d) scenic, historic, archaeologic, aesthetic, fish, wildlife, plants, or cultural interests.

"Siltation Structure" means, for the purposes of R645-301-356.300, R645-301-356.400, R645-301-513.200, R645-301-742.200 through R645-301-742.240, and R645-301-763, a sedimentation pond, a series of sedimentation ponds or other treatment facilities.

"Slope" means average inclination of a surface, measured from the horizontal, generally expressed as the ratio of a unit of vertical distance to a given number of units of horizontal distance (e.g., 1v:5h). It may also be expressed as a percent or in degrees.

"SOAP" means Small Operator Assistance Program.

"Soil Horizons" means contrasting layers of soil parallel or nearly parallel to the land surface. Soil horizons are differentiated on the basis of field characteristics and laboratory data. The four major soil horizons are"

A HORIZON - The uppermost mineral layer, often called the surface soil. It is the part of the soil in which organic matter is most abundant, and leaching of soluble or suspended particles is typically the greatest.

E HORIZON - The layer commonly near the surface below an A horizon and above a B horizon. An E horizon is most commonly differentiated from an overlying A horizon by lighter color and generally has measurably less organic matter than the A horizon. An E horizon is most commonly differentiated from an underlying B horizon in the same sequum by color of higher value or lower chroma, by coarser texture, or by a combination of these properties.

B HORIZON - The layer that typically is immediately beneath the E horizon and often called the subsoil. This middle layer commonly contains more clay, iron, or aluminum than the A, E, or C horizons.

C HORIZON - The deepest layer of soil profile. It consists of loose material or weathered rock that is relatively unaffected by biologic activity.

"Soil Survey" means a field and other investigations resulting in a map showing the geographic distribution of different kinds of soils and an accompanying report that describes, classifies, and interprets such soils for use. Soil surveys must meet the standards of the National Cooperative Soil Survey as incorporated by reference in R645-302-314.100.

"Spoil" means overburden that has been removed during coal mining and reclamation operations.

"Stabilize" means to control movement of soil, spoil piles, or areas of disturbed earth by modifying the geometry of the mass, or by otherwise modifying physical or chemical properties, such as by providing a protective surface coating.

"State Program" means the program established by the state of Utah and approved by the Secretary of the Department of the Interior pursuant to the Federal Act and the Act to regulate coal mining and reclamation operations on non-Indian and non-federal lands within Utah, according to the Federal Act, the Act and the R645 Rules. Pursuant to the cooperative agreement between the state of Utah and the Office, the State Program applies to federal lands in accordance with the terms of the cooperative agreement.

"Steep Slope" means any slope of more than 20 degrees or such lesser slope as may be designated by the Division after consideration of soil, climate, and other characteristics of a region or Utah.

"Subirrigation" means, with respect to ALLUVIAL VALLEY FLOORS, the supplying of water to plants from underneath or from a semisaturated or saturated subsurface zone where water is available for use by vegetation.

"Substantial Legal and Financial Commitments in a Coal Mining and Reclamation Operation" means, for the purposes of R645-103-300, significant investments that have been made on the basis of a long-term coal contract in power plants, railroads, coal-handling, preparation, extraction or storage facilities, and other capital-intensive activities. An example would be an existing mine not actually producing coal, but in a substantial stage of development prior to production. Costs of acquiring the coal in place or the right to mine it without an existing mine, as described in the above example, alone are not sufficient to constitute substantial legal and financial commitments.

"Substantially Disturb" means, for purposes of COAL EXPLORATION, to significantly impact land or water resources by blasting; by removal of vegetation, topsoil, or overburden; by construction of roads or other access routes; by placement of excavated earth or waste material on the natural land surface or by other such activities; or to remove more than 250 tons of coal.

"Successor in Interest" means any person who succeeds to rights granted under a permit, by transfer, assignment, or sale of those rights.

"Surety Bond" means an indemnity agreement in a sum certain payable to the Division, executed by the permittee as principal and which is supported by the performance guarantee of a corporation licensed to do business as a surety in Utah.

"Surface Operations and Impacts Incident to an Underground Coal Mine" means all operations involved in or related to UNDERGROUND COAL MINING AND RECLAMATION ACTIVITIES which are either conducted on the surface of the land, produce changes in the land surface or disturb the surface, air, or water resources of the area including all activities listed in 40-10-3(20) of the Act and the definition of underground mining activities appearing herein.

"SURFACE COAL MINING AND RECLAMATION ACTIVITIES" means those coal mining and reclamation operations incident to the extraction of coal from the earth by removing the materials over a coal seam, before recovering the coal, by auger coal mining, or by recovery of coal from a deposit that is not in its original geologic location.

"Suspended Solids or Nonfilterable Residue, Expressed as Milligrams Per Liter" means organic or inorganic materials carried or held in suspension in water which are retained by a standard glass fiber filter in the procedure outlined by the Environmental Protection Agency's regulation for waste water and analyses (40 CFR Part 136).

"Tangible Net Worth" means net worth minus intangibles such as goodwill and rights to patents or royalties.

"Temporary Diversion" means a diversion of a stream, or overland flow, which is used during coal exploration or coal mining and reclamation operations and not approved by the Division to remain after reclamation as part of the approved postmining land use.

"Temporary Impoundment" means an impoundment used during coal mining and reclamation operations, but not approved by the Division to remain as part of the approved postmining land use.

"Ton" means 2,000 pounds avoirdupois (.90718 metric ton).

"Topsoil" means the A and E soil horizon layers of the four major soil horizons.

"Toxic-Forming Materials" means earth materials or wastes which, if acted upon by air, water, weathering, or microbiological processes are likely to produce chemical or physical conditions in soils or water that are detrimental to biota or uses of water.

"Toxic Mine Drainage" means water that is discharged from active or abandoned mines or other areas affected by coal exploration or coal mining and reclamation operations which contains a substance that through chemical action or physical effects is likely to kill, injure, or impair biota commonly present

in the area that might be exposed to it.

"Transfer, Assignment, or Sale of Permit Rights" means a change in ownership or other effective control over the right to conduct coal mining and reclamation operations under a permit issued by the Division.

"UNDERGROUND COAL MINING AND RECLAMATION ACTIVITIES" means coal mining and reclamation operations incident to the extraction of coal by underground methods including a combination of (a) underground extraction of coal or in situ processing, construction use, maintenance, and reclamation of roads, above-ground repair areas, storage areas, processing areas, shipping areas, areas upon which are sited support facilities including hoist and ventilating ducts, areas utilized for the disposal and storage of waste, and areas on which materials incident to underground mining operations are placed; and (b) underground operations such as underground construction, operation, and reclamation of shafts, adits, underground support facilities, in situ processing, and underground mining, hauling, storage, and blasting.

"Underground Development Waste" means waste-rock mixtures of coal, shale, claystone, siltstone, sandstone, limestone, or related materials that are excavated, moved, and disposed of from underground workings in connection with UNDERGROUND COAL MINING AND RECLAMATION ACTIVITIES.

"Undeveloped Rangeland" means, for purposes of ALLUVIAL VALLEY FLOORS, lands where the use is not specifically controlled and managed.

"Unwarranted Failure to Comply" means the failure of the permittee to prevent the occurrence of any violation of the State Program or any permit condition due to indifference, lack of diligence, or lack of reasonable care, or the failure to abate any violation of such permit of the Act due to indifference, lack of diligence, or lack of reasonable care.

"Upland Areas" means, with respect to ALLUVIAL VALLEY FLOORS, those geomorphic features located outside the floodplain and terrace complex such as isolated higher terraces, alluvial fans, pediment surfaces, landslide deposits, and surfaces covered with residuum, mud flows, or debris flows, as well as highland areas underlain by bedrock and covered by residual weathered material or debris deposited by sheetwash, rillwash, or windblown material.

"Valid Existing Rights" means a set of circumstances under which a person may, subject to regulatory authority approval, conduct coal mining and reclamation operations on lands where Subsection 40-10-24(4) of the Act and R645-103-224 would otherwise prohibit such operations. Possession of valid existing rights only confers an exception from the prohibitions of R645-103-224 and Subsection 40-10-24(4) of the Act. A person seeking to exercise valid existing rights must comply with all other pertinent requirements of the Federal Act and the State Program.

(a) Property rights demonstration. Except as provided in paragraph (c) of this definition, a person claiming valid existing rights must demonstrate that a legally binding conveyance, lease, deed, contract, or other document vests that person, or a predecessor in interest, with the right to conduct the type of coal mining and reclamation operations intended. This right must exist at the time that the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act. Applicable Utah statutory or case law will govern interpretation of documents relied upon to establish property rights, unless Federal law provides otherwise. If no applicable Utah law exists, custom and generally accepted usage at the time and place that the documents came into existence will govern their interpretation.

(b) Except as provided in paragraph (c) of this definition, a person claiming valid existing rights also must demonstrate compliance with one of the following standards:

(i) Good faith/all permits standard. All permits and other authorizations required to conduct coal mining and reclamation operations had been obtained, or a good faith effort to obtain all necessary permits and authorizations had been made, before the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act. At a minimum, an application must have been submitted for any permit required under R645-201, R645-301 or R645-302; or

(ii) Needed for and adjacent standard. The land is needed for and immediately adjacent to a coal mining and reclamation operation for which all permits and other authorizations required to conduct coal mining and reclamation operations had been obtained, or a good faith attempt to obtain all permits and authorizations had been made, before the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act. To meet this standard, a person must demonstrate that prohibiting expansion of the operation onto that land would unfairly impact the viability of the operation as originally planned before the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act. Except for operations in existence before August 3, 1977, or for which a good faith effort to obtain all necessary permits had been made before August 3, 1977, this standard does not apply to lands already under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act when the Division approved the permit for the original operation or when the good faith effort to obtain all necessary permits for the original operation was made. In evaluating whether a person meets this standard, the Division may consider factors such as:

(A) The extent to which coal supply contracts or other legal and business commitments that predate the time that the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act depends upon use of that land for coal mining and reclamation operations;

(B) The extent to which plans used to obtain financing for the operation before the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act rely upon use of that land for coal mining and reclamation operations;

(C) The extent to which investments in the operation before the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act rely upon use of that land for coal mining and reclamation operations;

(D) Whether the land lies within the area identified on the life-of-mine map submitted under R645-301-521.141 before the land came under the protection of R645-103-224.

(c) Roads. A person who claims valid existing rights to use or construct a road across the surface of lands protected by R645-103-224 or Subsection 40-10-24(4) of the Act must demonstrate that one or more of the following circumstances exist if the road is included within the definition of coal mining and reclamation operations:

(i) The road existed when the land upon which it is located came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act, and the person has a legal right to use the road for coal mining and reclamation operations;

(ii) A properly recorded right of way or easement for a road in that location existed when the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act, and, under the document creating the right of way or easement, and under subsequent conveyances, the person has a legal right to use or construct a road across the right of way or easement for coal mining and reclamation operations;

(iii) A valid permit for use or construction of a road in that location for coal mining and reclamation operations existed when the land came under the protection of R645-103-224 or Subsection 40-10-24(4) of the Act; or

(iv) Valid existing rights exist under paragraphs (a) and (b) of this definition.

"Valley Fill" means a fill structure consisting of any material, other than organic material, that is placed in a valley where side slopes of the existing valley, measured at the steepest point, are greater than 20 degrees, or where the average slope of the profile of the valley from the toe of the fill to the top of the fill is greater than ten degrees.

"Violation, Failure, or Refusal" means for the purposes of R645-402, (1) A violation of a condition of a permit issued under the State Program, or (2) A failure or refusal to comply with any order issued under UCA 40-10-22, or any order incorporated in a final decision issued under UCA 40-10-20(2) or R645-104-500.

"Water Supply", "State-appropriated Water", and "State-appropriated Water Supply" are all synonymous terms and mean, for the purposes of the R645 Rules, state appropriated water rights which are recognized by the Utah Constitution or Utah Code.

"Violation Notice" means any written notification from a governmental entity of a violation of law, whether by letter, memorandum, legal or administrative pleading, or other written communication.

"Water Table" means the upper surface of a zone of saturation where the body of ground water is not confined by an overlying impermeable zone.

"Willfully" means for the purposes of R645-402, that an individual acted (1) either intentionally, voluntarily, or consciously, and (2) with intentional disregard or plain indifference to legal requirements in authorizing, ordering, or carrying out a corporate permittee's action or omission that constituted a violation, failure, or refusal.

"Willful Violation" means an act or omission which violates the State Program or any permit condition, committed by a person who intends the result which actually occurs.

R645-100-300. Responsibility.

310. The Division is responsible for the regulation of coal mining and reclamation operations and coal exploration under the approved State Program on non-federal and non-Indian lands in accordance with the procedures in the R645 Rules.

320. The Division, through a cooperative agreement, exercises certain authority relating to the regulation of coal mining and reclamation operations on federal lands in accordance with 30 CFR Part 745.

R645-100-400. Applicability.

410. Except as provided under R645-100-420, the R645 Rules apply to all coal exploration and coal mining and reclamation operations, except:

411. The extraction of coal by a landowner for his or her own noncommercial use from land owned or leased by him or her. Noncommercial use does not include the extraction of coal by one unit of an integrated company or other business or nonprofit entity which uses the coal in its own manufacturing or power plants;

412. The extraction of 250 tons of coal or less by a person conducting coal mining and reclamation operations. A person who intends to remove more than 250 tons is not exempted;

413. The extraction of coal as an incidental part of federal, state or local government-financed highway or other construction in accordance with R645-102.

414. The extraction of coal incidental to the extraction of other minerals where coal does not exceed 16-2/3 percent of the mineral tonnage removed for commercial use or sale in accordance with R645-106; or

415. Coal exploration on lands subject to the requirements of 43 CFR Parts 3480-3487.

420. Existing Structure Exemption. Each structure used in connection with or to facilitate coal exploration or coal mining and reclamation operations will comply with the performance standards and design requirements of R645-301 and R645-302, except that:

421. An existing structure which meets the performance standards but does not meet the design requirements of R645-301 and R645-302 may be exempted from meeting those design requirements by the Division. The Division may grant this exemption only as part of the permit application process after obtaining the information required by R645-301-526.110 through R645-301-526.115.4 and after making the findings required by R645-300-130.

422. If the performance standard of the MC Rules (Interim Program Rules) is at least as stringent as the comparable performance standard of the R645 Rules, an existing structure which meets the performance standards of the MC Rules may be exempted by the Division from meeting the design requirements of the R645 Rules. The Division may grant this exemption only as part of the permit application process after obtaining the information required by R645-301-526.110 through R645-301-526.115.4 and after making the findings required by R645-300-130.

423. An existing structure which meets a performance standard of the MC Rules which is less stringent than the comparable performance standard in the R645 Rules will be modified or reconstructed to meet the design standard of the R645 Rules pursuant to a compliance plan approved by the Division only as part of the permit application as required in R645-301-526.110 through R645-301-526.115.4 and according to the findings required by R645-300-130.

424. An existing structure which does not meet the performance standards of the MC Rules and which the applicant proposes to use, in connection with or to facilitate the coal exploration or coal mining and reclamation operation, will be modified or reconstructed to meet the performance design standards of R645-301 and R645-302 prior to issuance of the permit.

430. The exemptions provided in paragraphs R645-100-421 and R645-100-422 will not apply to:

431. The requirements for existing and new coal mine waste disposal facilities; and

432. The requirements to restore the approximate original contour of the land.

440. Regulatory Determination of Exemption. The Division may, on its own initiative, and will, within a reasonable time of a request from any person who intends to conduct coal mining and reclamation operations, make a written determination whether the operation is exempt under R645-100-400. The Division will give reasonable notice of the request to interested persons. Prior to the time a determination is made, any person may submit, and the Division will consider, any written information relevant to the determination. A person requesting that an activity be declared exempt will have the burden of establishing the exemption. If a written determination of exemption is reversed through subsequent administrative or judicial action, any person who, in good faith, has made a complete and accurate request for an exemption, and relied upon the determination, will not be cited for violations which occurred prior to the date of the reversal.

450. Termination of Jurisdiction.

451. The Division may terminate its jurisdiction under the regulatory program over the reclaimed site of a completed coal mining and reclamation operation, or increment thereof, when:

451.100. The Division determines in writing that under the initial program all requirements imposed under the MC rules have been successfully completed; or

451.200. The Division determines in writing that under the permanent program all requirements imposed under the applicable regulatory program have been successfully completed or, where a performance bond was required, the Division has made a final decision in accordance with the State program to

release the performance bond fully.

452. Following a termination under R645-100-451, the Division will reassert jurisdiction under the regulatory program over a site if it is demonstrated that the bond release or written determination referred to under R645-100-451 was based upon fraud, collusion, or misrepresentation of a material fact.

R645-100-500. Petition to Initiate Rulemaking.

Persons other than the Division or Board may petition to initiate rulemaking pursuant to the R641 Rules and the Utah Administrative Rulemaking Act, U.C.A. 63G-3-101, et seq.

R645-100-600. Notice of Citizen Suits.

A person who intends to initiate a civil action in his or her own behalf under 40-10-21 of the Act will give notice of intent to do so in accordance with R645-100-600.

610. Notice will be given by certified mail to the Director, if a complaint involves or relates to Utah.

620. Notice will be given by certified mail to the alleged violator, if the complaint alleges a violation of the Act or any rule, order, or permit issued under the Act.

630. Service of notice under R645-100-600 is complete upon mailing to the last known address of the person being notified.

640. A person giving notice regarding an alleged violation will state, to the extent known:

641. Sufficient information to identify the provision of the Act, rule, order, or permit allegedly violated;

642. The act or omission alleged to constitute a violation;

643. The name, address, and telephone number of the person or persons responsible for the alleged violation;

644. The date, time, and location of the alleged violation;

645. The name, address, and telephone number of the person giving notice; and

646. The name, address, and telephone number of legal counsel, if any, of the person giving notice.

650. A person giving notice of an alleged failure by the Director to perform a mandatory act or duty under the Act will state, to the extent known:

651. The provision of the Act containing the mandatory act or duty allegedly not performed;

652. Sufficient information to identify the omission alleged to constitute the failure to perform a mandatory act or duty under the Act;

653. The name, address, and telephone number of the person giving notice; and

654. The name, address, and telephone number of legal counsel, if any, of the person giving notice.

R645-100-700. Availability of Records.

710. Records required by the Act to be made available locally to the public will be retained at the Division office closest to the area involved.

720. Other nonconfidential records or documents in the possession of the Division may be requested from the Division.

730. Information received which is required to be held confidential by the terms of the Act will not be available for public inspection.

R645-100-800. Computation of Time.

810. Except as otherwise provided, computation of time under the R645 Rules is based on calendar days.

820. In computing any period of prescribed time, the day on which the designated period of time begins is not included. The last day of the period is included unless it is a Saturday, Sunday, or a legal holiday on which the Division is not open for business, in which event the period runs until the end of the next day which is not Saturday, Sunday, or a legal holiday.

830. Intermediate Saturdays, Sundays, and legal holidays are excluded from the computation when the period or prescribed time is seven days or less.

KEY: reclamation, coal mines
July 28, 2010 40-10-1 et seq.
Notice of Continuation February 1, 2012

R645. Natural Resources; Oil, Gas and Mining; Coal.
R645-103. Areas Unsuitable for Coal Mining and Reclamation Operations.
R645-103-100. General.

110. Scope. R645-103 establishes procedures for implementing the requirements of the Act for designating lands unsuitable for all or certain types of coal mining and reclamation operations, for terminating such designations, for identifying lands on which coal mining and reclamation operations are limited or prohibited under Section 40-10-24 of the Act and for implementing those limits and prohibitions.

120. Authority. The Board and Division are authorized, under Section 40-10-24, to establish a data base and inventory system and a petition process to designate any nonfederal and non-Indian land areas of Utah as unsuitable for all or certain types of coal mining and reclamation operations.

130. Responsibility.

131. The Board and Division will integrate as closely as possible decisions to designate lands as unsuitable for coal mining and reclamation operations with present and future land use planning and regulatory processes at the state and local levels;

132. The Division will use a process that allows any person having an interest which is or may be adversely affected by coal mining and reclamation operations on nonfederal and non-Indian lands to petition the Board to have an area designated as unsuitable for all or certain types of coal mining and reclamation operations, or to have a designation terminated;

133. The Division will prohibit or limit coal mining and reclamation operations on certain lands and in certain locations designated by Section 40-10-24 of the Act.

R645-103-200. Areas Designated by Act of Congress.

210. Scope. The rules in R645-103-200 establish the procedures to be used by the Division to determine whether a proposed coal mining and reclamation operation can be authorized in light of the mandatory prohibitions set forth in the Act and Federal Act.

220. Federal Lands. The authority to make determinations of unsuitability on federal lands is reserved to the Secretary pursuant to Section 523(a) of the Federal Act.

221. Valid Existing Rights (VER). VER determinations on federal lands will be performed in a manner consistent with the terms of a cooperative agreement between the Secretary and Utah pursuant to section 523(c) of the Federal Act.

222. VER determinations on nonfederal lands which affect adjacent federal lands will be performed in a manner consistent with the terms of the cooperative agreement referenced in R645-103-221.

223. On federal lands within the boundaries of a national forest the Division will be responsible for coordination with the Secretaries of Interior and Agriculture, as appropriate, to ensure that mining is permissible under 30 CFR 761.11(b) and Section 522(e)(2) of the Federal Act.

224. Coal mining and reclamation operations may not be conducted on the following lands unless there are VER, as determined under R645-103-231.100, or qualify for the exception for existing operations under R645-103-225:

224.100. Any lands within the boundaries of the National Park System; the National Wildlife Refuge System; the National System of Trails; the National Wilderness Preservation System; the Wild and Scenic Rivers System, including study rivers designated under section 5(a) of the Wild and Scenic Rivers Act, 16 U.S.C. 1276(a), or study rivers or study river corridors established in any guidelines issued under that Act; or National Recreation Areas designated by Act of Congress;

224.200. Any Federal lands within a national forest. This prohibition does not apply if the Secretary finds that there are no significant recreational, timber, economic, or other values that may be incompatible with surface coal mining operations, and:

224.210. Any surface operations and impacts will be incident to an underground coal mine; or

224.220. With respect to lands that do not have significant forest cover within national forests west of the 100th meridian, the Secretary of Agriculture has determined that surface mining is in compliance with the Federal Act, the Multiple-Use Sustained Yield Act of 1960, 16 U.S.C. 528-531; the Federal Coal Leasing Amendments Act of 1975, 30 U.S.C. 181 et seq.; and the National Forest Management Act of 1976, 16 U.S.C. 1600 et seq;

224.300. Any lands where the operation would adversely affect any publicly owned park or any place in the National Register of Historic Places. This prohibition does not apply if, as provided in R645-103-236, the Division and the Federal, State, or local agency with jurisdiction over the park or place jointly approve the operation;

224.400. Within 100 feet, measured horizontally, of the outside right-of-way line of any public road. This prohibition does not apply:

224.410. Where a mine access or haul road joins a public road, or

224.420. When, as provided in R645-103-234, the Division (or the appropriate public road authority designated by the Division) allows the public road to be relocated or closed, or the area within the protected zone to be affected by the coal mining and reclamation operation, after:

224.421. Providing public notice and opportunity for a public hearing; and

224.422. Finding in writing that the interests of the affected public and landowners will be protected;

224.500. Within 300 feet, measured horizontally, of any occupied dwelling. This prohibition does not apply when:

224.510. The owner of the dwelling has provided a written waiver consenting to coal mining and reclamation operations within the protected zone, as provided in R645-103-235; or

224.520. The part of the operation to be located closer than 300 feet to the dwelling is an access or haul road that connects with an existing public road on the side of the public road opposite the dwelling;

224.600. Within 300 feet, measured horizontally, of any public building, school, church, community or institutional building, or public park; or

224.700. Within 100 feet, measured horizontally, of a cemetery. This prohibition does not apply if the cemetery is relocated in accordance with all applicable laws and regulations.

225. VER determinations for land are not required where an existing operation meets the requirements of 30 CFR 761.12.

230. Procedures.

231. Upon receipt of an administratively complete application for a permit to conduct coal mining and reclamation operations, or an administratively complete application for a revision of the boundaries of a permit to conduct coal mining and reclamation operations, the Division will review the application to determine whether the proposed coal mining and reclamation operation would be located on any lands protected under R645-103-224.

231.100. The Division will follow 30 CFR 761.16 for determining state/federal responsibility for determinations, establishing application requirements, evaluation procedures and decision-making criteria for VER determinations, providing for public participation and notification of affected parties, and establishing requirements for the availability of records.

232. The Division will reject any portion of the application that would locate coal mining and reclamation operations on land protected under R645-103-224 unless:

232.100. The site qualifies for the exception for existing operations under R645-103-225;

232.200. A person has VER for the land, as determined

under R645-103-231-100;

232.300. The applicant obtains a waiver or exception from the prohibitions of R645-103-224 in accordance with R645-103-237, R645-103-234, and R645-103-235; or

232.400. For lands protected by R645-103-224.300, both the Division and the agency with jurisdiction over the park or place jointly approve the proposed operation in accordance with R645-103-236.

233. If the Division is unable to determine whether the proposed activities are located within the boundaries of any of the lands listed in R645-103-224.100 or within the specified distance from a structure or feature listed in R645-103-224.600 or R645-103-224.700, the Division must request that the federal, Utah, or local governmental agency with jurisdiction over the protected land, structure, or feature verify the location. The Division will transmit a copy of the relevant portions of the permit application to the appropriate federal, Utah, or local government agency for a determination or clarification of the relevant boundaries or distances, with a notice to the appropriate agency that it has 30 days from receipt of the request in which to respond. The Division, upon request by the appropriate agency, will grant an extension to the 30-day period of an additional 30 days. However, the Division's request for location verification must specify that the Division will not necessarily consider a response received after the 30-day period or the extended period granted. If no response is received within the 30-day period, or within the extended period granted, the Division may make the necessary determination based on the information it has available.

234. Procedures for relocating or closing a public road or waiving the prohibition on coal mining and reclamation operations within the buffer zone of a public road.

234.100. This section does not apply to:

234.110. Lands for which a person has VER, as determined under R645-103-231.100;

234.120. Lands within the scope of the exception for existing operations in R645-103-225; or

234.130 Access or haul roads that join a public road, as described in R645-103-224.410.

234.200 The applicant must obtain any necessary approvals from the authority with jurisdiction over the road if the applicant proposes to:

234.210. Relocate a public road;

234.220. Close a public road; or

234.230. Conduct coal mining and reclamation operations within 100 feet, measured horizontally, of the outside right-of-way line of a public road.

234.300. Before approving an action proposed under R645-103-234.200, the Division, or a public road authority that it designates, must determine that the interests of the public and affected landowners will be protected. Before making this determination, the Division must:

234.310. Provide a public comment period and opportunity to request a public hearing in the locality of the proposed operation;

234.320. If a public hearing is requested, publish appropriate advance notice at least two weeks before the hearing in a newspaper of general circulation in the affected locality; and

234.330. Based upon information received from the public, make a written finding as to whether the interests of the public and affected landowners will be protected. If a hearing was held, the Division must make this finding within 30 days after the hearing. If no hearing was held, the Division must make this finding within 30 days after the end of the public comment period.

235. Procedures for waiving the prohibition on coal mining and reclamation operations within the buffer zone of an occupied dwelling.

235.100. This section does not apply to:

235.110. Lands for which a person has VER, as determined under R645-103-231.100;

235.120. Lands within the scope of the exception for existing operations in R645-103-225; or

235.130. Access or haul roads that connect with an existing public road on the side of the public road opposite the dwelling, as provided in R645-103-224.520.

235.200. Where the proposed coal mining and reclamation operations would be conducted within 300 feet, measured horizontally, of any occupied dwelling, the permit applicant will submit with the application a written waiver by lease, deed, or other conveyance from the owner of the dwelling, clarifying that the owner and signatory had the legal right to deny mining and knowingly waived that right. The waiver will act as consent to coal mining and reclamation operations within a closer distance of the dwelling as specified.

235.300. Where the applicant for a permit has obtained a valid waiver prior to August 3, 1977, from the owner of an occupied dwelling to conduct operations within 300 feet of such dwelling, a new waiver will not be required.

235.400. Where the applicant for a permit had obtained a valid waiver from the owner of an occupied dwelling, that waiver will remain effective against subsequent purchasers who had actual or constructive knowledge of the existing waiver at the time of purchase.

235.500. A subsequent purchaser will be deemed to have constructive knowledge if the waiver has been properly filed in public property records pursuant to Utah laws, or if coal mining and reclamation operations have entered the 300-foot zone before the date of purchase.

236. Where the Division determines that the proposed coal mining and reclamation operation will adversely affect any publicly owned park or any place included in the National Register of Historic Places, the Division will transmit to the federal, Utah, or local agency with jurisdiction over the publicly owned park or National Register place, a copy of applicable parts of the permit application, together with a request for that agency's approval or disapproval of the activity, and a notice to that agency that it has 30 days from receipt of the request within which to respond and that failure to interpose a timely objection will constitute approval. The Division, upon request by the appropriate agency, may grant an extension to the 30-day period of an additional 30 days. Failure to interpose an objection within 30 days, or the extended period granted, will constitute an approval of the proposed permit. A permit for the coal mining and reclamation operation will not be issued unless jointly approved by all agencies. The procedures for joint approval will not apply to lands for which a person has VER as determined under R645-103-231.100 and lands within the scope of the exception for existing operations in R645-103-225.

237. If the applicant intends to rely upon the exception provided in R645-103-224.200 to conduct coal mining and reclamation operations on federal lands within a national forest, the applicant must request that the Division obtain the Secretarial findings required by R645-103-224.200. The applicant may submit a request to the Division before preparing and submitting an application for a permit or boundary revision on Federal lands in national forests. The applicant must explain how the proposed operation would not damage the values listed in the definition of "significant recreational, timber, economic, or other values incompatible with surface coal mining operations" in 30 CFR 761.5. The applicant must include a map and sufficient information about the nature of the proposed operation for the Secretary to make adequately documented findings. The Division may request that the permit applicant provide additional information that the Division determines is necessary in order to make the required findings. When a proposed coal mining and reclamation operation or proposed boundary revision for an existing coal mining and reclamation

operation includes federal lands within a national forest, the Division may not issue the permit or approve the boundary revision before the Secretary makes the findings required by R645-103-224.200.

238. If the Division determines that the proposed coal mining and reclamation operation is not prohibited under Section 40-10-24 of the Act and R645-103-200, it may nevertheless, pursuant to appropriate petitions, designate such lands as unsuitable for all or certain types of coal mining and reclamation operations pursuant to R645-103-300 and R645-103-400.

239. A determination by the Division that a person holds or does not hold valid existing rights will be subject to administrative and judicial review under R645-300-200.

240. Interpretative Rule. As set forth in the interpretative rule found at 30 CFR 761.200, subsidence due to underground coal mining is not included in the definition of surface coal mining operations under Section 701(28) of the Federal Act and Subsection 40-10-3(20) of the Act and therefore is not prohibited in areas protected under Section 522(e) of the Federal Act.

R645-103-300. Utah Criteria for Designating Areas as Unsuitable for Coal Mining and Reclamation Operations.

310. Responsibility. The Division will use the criteria in R645-103-300 for the evaluation of each petition for the designation of nonfederal and non-Indian areas as unsuitable for coal mining and reclamation operations.

320. Criteria for Designating Land as Unsuitable.

321. Upon petition, an area will be designated as unsuitable for all or certain types of coal mining and reclamation operations if the Division determines that reclamation is not technologically and economically feasible under the State Program.

322. Upon petition, an area may be (but is not required to be) designated as unsuitable for certain types of coal mining and reclamation operations, if the operations will:

322.100. Be incompatible with existing state or local land use plans or programs;

322.200. Affect fragile or historic lands in which the activities could result in significant damage to important historic, cultural, scientific, or aesthetic values or natural systems;

322.300. Affect renewable resource lands in which the activities could result in a substantial loss or reduction of long-range productivity of water supply or of food or fiber products; or

322.400. Affect natural-hazard lands in which the operations could substantially endanger life and property, such lands to include areas subject to frequent flooding and areas of unstable geology.

330. Land Exempt from Designation as Unsuitable for Coal Mining and Reclamation Operations. The requirements of R645-103-300 do not apply to:

331. Lands on which coal mining and reclamation operations were being conducted on August 3, 1977;

332. Lands covered by a permit issued under the Act; or

333. Lands where substantial legal and financial commitments in coal mining and reclamation operations were in existence prior to January 4, 1977.

340. Exploration on Land Designated as Unsuitable for Coal Mining and Reclamation Operations. Designation of any area as unsuitable for all or certain types of coal mining and reclamation operations pursuant to Section 40-10-24 of the Act or Section 522 of the Federal Act and R645-103-300 does not prohibit coal exploration in the area, if conducted in accordance with applicable provisions of the State Program or under the terms of a State/Federal cooperative agreement pursuant to section 523(c) of the Federal Act. Coal exploration on any lands designated unsuitable for coal mining and reclamation operations must be approved by the Division under R645-200, to ensure that exploration does not interfere with any value for which the area has been designated unsuitable for coal mining and reclamation operations.

R645-103-400. Utah Processes for Designating Areas Unsuitable for Coal Mining and Reclamation Operations.

410. Scope and Authority.

411. R645-103-400 establishes the procedures and standards in the State Program for designating nonfederal and non-Indian lands in the state as unsuitable for all or certain types of coal mining and reclamation operations and for terminating such designations.

412. The Board has the authority to develop programs, procedures, and standards consistent with R645-103-400 to designate nonfederal and non-Indian lands unsuitable for all or certain types of coal mining and reclamation operations and for terminating such designations.

420. Petitions.

421. Right to petition. Any person having an interest which is or may be adversely affected has the right to petition the Board to have an area designated as unsuitable for coal mining and reclamation operations, or to have an existing designation terminated. For the purpose of this action, a person having an interest which is or may be adversely affected must demonstrate how he or she meets an "injury-in-fact" test by describing the injury to his or her specific affected interests and demonstrate how he or she is among the injured.

422. Designation. A petitioner will file a petition using forms provided by the Division. The only information the petitioners must provide are:

422.100. The petitioner's name, address, telephone number, and notarized signature;

422.200. The legal description (i.e., township, range, and section number) of the area covered by the petition;

422.300. A description of how coal mining and reclamation operations in the area has affected or may adversely affect people, land, air, water, or other resources, including the petitioner's interests;

422.400. An identification of the petitioner's interest which is or may be adversely affected by coal mining and reclamation operations including a statement demonstrating how the petitioner satisfies the requirements of R645-103-421; and

422.500. U.S. Geological Survey 7-1/2-minute topographic map(s) or, if unavailable, 15-minute map(s) marked to show the location and size of the area encompassed by the designated petition;

422.600. Available information regarding:

422.610. Legal owners of record of the property (surface and mineral) being petitioned;

422.620. Holders of record of any leasehold interest in the property; and

422.630. Purchasers of record to the property under a real estate contract;

422.700. Allegations of fact and supporting evidence, covering all lands in the petition area, which tend to establish that the area is unsuitable for all or certain types of surface coal mining operations, pursuant to specific criteria of R645-103-320, assuming that contemporary mining practices required under applicable regulatory programs would be followed if the area were to be mined. Each of the allegations of fact should be specific as to the mining operation, if known, and the portion(s) of the petitioned area and petitioner's interests to which the allegation applies and be supported by evidence that tends to establish the validity of the allegations for the mining operation or portion of the petitioned area.

422.800. A designation petition may contain, and the Division may request, in addition to required contents, the

following:

422.810. Information and data sources with regard to:

422.811. The potential coal resources of the area;

422.812. The demand for coal resources; or

422.813. The impact of the designation on the environment, economy, and supply for coal;

422.820. Such other information as may appropriately affect a determination on the petition;

422.900. Petitions will be mailed or delivered to: State of Utah, Division of Oil, Gas and Mining, 1594 West North Temple, Suite 1210, P.O. Box 145801, Salt Lake City, Utah 84114-5801.

423. Termination of designations. A petitioner will file a petition for termination of a designation using forms provided by the Division. The only information the petitioner must provide are those items under R645-103-423.100 through R645-103-423.400, and R645-103-423.700 below. The petitioner may provide the information in the other sections if it is available, however, failure to provide the information will not jeopardize review of the petition for termination or constitute a reason for rejection of the petition.

423.100. The petitioner's name, address, telephone number, and notarized signature;

423.200. The legal description (i.e., township, range, and section number) and ownership of the area covered by the petition;

423.300. Identification of the petitioner's interest which is or may be adversely affected by the continuation of the designation;

423.400. U.S. Geological Survey 15-minute or 7-1/2-minute topographic map(s) marked to show the location and size of the geographic area covered by the petition (if available);

423.500. Available information about how reclamation is now technologically and economically feasible, if the designation was based on criteria found in R645-103-321; or

423.510. The nature or abundance of the protected resource or condition or other basis of the designation if the designation was based on criteria found in R645-103-322; or

423.520. The resources or conditions not being affected by coal mining and reclamation operations, or in the case of land use plans, not being incompatible with coal mining and reclamation operations during and after mining, if the designation was based on the criteria found in R645-103-322;

423.600. Available information regarding: legal owners of record of the property (surface and mineral) being petitioned; holders of record of any leasehold interest in the property; and purchasers of record of the property under a real estate contract;

423.700. Allegations of facts covering all lands for which the termination is proposed. Each of the allegations of fact shall be specific as to the mining operation, if any, and to portions of the petitioned area and petitioner's interests to which the allegation applies. The allegations shall be supported by evidence, not contained in the record of the designation proceeding, that tends to establish the validity of the allegations for the mining operation or portion of the petitioned area, assuming that contemporary mining practices required under applicable regulatory programs would be followed were the area to be mined. For areas previously and unsuccessfully proposed for termination, significant new allegations of facts and supporting evidence must be presented in the petition. Allegations and supporting evidence should also be specific to the basis for which the designation was made and tend to establish that the designation should be terminated on the following bases:

423.710. Reclamation now being technologically and economically feasible, if the designation was based on criteria found in R645-103-321; or

423.720. The nature or abundance of the protected resource or condition or other basis of the designation if the designation was based on criteria found in R645-103-322; or

423.730. The resources or conditions not being affected by coal mining and reclamation operations, or in the case of land use plans, not being incompatible with coal mining and reclamation operations, if the designation was based on the criteria found in R645-103-322;

423.800. Petitions for termination of designations will be mailed or delivered to: State of Utah, Division of Oil, Gas and Mining, 1594 West North Temple, Suite 1210, P.O. Box 145801, Salt Lake City, Utah 84114-5801.

430. Initial Processing, Record Keeping and Notification Requirements.

431. Initial Processing.

431.100. Unless a hearing or period of written comments is provided for under R645-103-432.200, the Division will, within 30 days of receipt of a petition, notify the petitioner by certified mail whether or not the petition is complete under R645-103-422 or R645-103-423. Complete, for a designation or termination petition, means that the information required under R645-103-422 and R645-103-423 has been provided.

431.200. The Division will determine whether any identified coal resources exist in the area covered by the petition, without requiring any showing from the petitioner. If the Division finds that there are not any identified coal resources in that area, it will return the petition to the petitioner with a statement of the findings.

431.300. If the Division determines that the petition is incomplete, frivolous, or that the petitioner does not meet the requirements of R645-103-421, it will return the petition to the petitioner with a written statement of the reasons for the determination and the categories of information needed to make the petition complete. A frivolous petition is one in which the allegations of harm lack serious merit.

431.400. When considering a petition for an area which was previously and unsuccessfully proposed for designation, the Division will determine if the new petition presents significant new allegations of fact with evidence which tends to establish the allegations. If the petition does not contain such material, the Division may choose not to consider the petition and may return the petition to the petitioner, with a statement of its findings and a reference to the record of the previous designation proceedings where the facts were considered.

431.500. The Division will notify the person who submits a petition of any application for a permit received which includes any area covered by the petition.

431.600. The Division may determine not to process any petition received insofar as it pertains to lands for which an administratively complete permit application has been filed and the first newspaper notice has been published. Based on such a determination, the Division may issue a decision on a complete and accurate permit application and will inform the petitioner why the Division cannot consider the part of the petition pertaining to the proposed permit area.

432. Notification.

432.100. Within 15 days of receipt of a petition, the Division will notify the general public of the receipt of the petition by a newspaper advertisement placed in the locale of the area covered by the petition and in the newspaper providing broadest circulation in the region of the petitioned area. The Division will make copies of the petition available to the public and will provide copies of the petition to other interested governmental agencies, intervenors, persons with an ownership interest of record in the property, and other persons known to the Division to have an interest in the property. Proper notice to persons with an ownership interest of record in the property will comply with the requirements of applicable state law.

432.200. The Division may provide for a hearing or a period of written comments on completeness of petitions. If a hearing or comment period on completeness is provided, the

Division will inform interested governmental agencies, intervenors, persons with an ownership interest of record in the property, and other persons known to the Division to have an interest in the property of the opportunity to request to participate in such a hearing or provide written comments. Proper notice to persons with an ownership interest of record in the property will comply with the requirements of applicable Utah law. Notice of such a hearing will be made by a newspaper advertisement placed in the locale of the area covered by the petition and in the newspaper providing broadest circulation in the region of the petitioned area. The Division will, within 30 days of a hearing or close of period of written comments, notify the petitioner of such a hearing by certified mail. On the basis of Division review, as well as consideration of all comments, the Division will, within 30 days of the hearing or close of written comments, determine whether the petition is complete.

432.300. Within 15 days of the petition being determined complete, the Division will request submissions from the general public of relevant information by a newspaper advertisement placed once a week for two consecutive weeks in the locale of the area covered by the petition and in the newspaper providing broadest circulation in the region of the petitioned area.

432.400. Until three days before the Division holds a hearing under R645-103-440, any person may intervene in the proceeding by filing allegations of fact describing how the designation determination directly affects the intervenor, supporting evidence, a short statement identifying the petition to which the allegations pertain, and the intervenor's name, address, and telephone number.

433. Record keeping.

433.100. Beginning from the date a petition is filed, the Division will compile and maintain a record consisting of all relevant portions of the data base and all documents relating to the petition filed with or prepared by the Division.

433.200. The Division will make the record available to the public for inspection free of charge and for copying at reasonable cost during all normal hours at the main office of the Division.

433.300. The Division will also maintain information at or near the area in which the petitioned land is located and make this information available to the public for inspection free of charge and for copying at reasonable cost during all normal business hours. At a minimum, this information will include a copy of the petition.

440. Hearing Requirements.

441. Within ten months after receipt of a complete petition, the Board shall hold a public hearing unless petitioners and intervenors agree otherwise. If all petitioners and intervenors agree that a public hearing is not needed, the hearing need not be held. All hearings held under this paragraph will be held in the locality of the area covered by the petition. The Board may subpoena witnesses as necessary. The hearing may be conducted with cross-examination of expert witnesses only. A record of the hearing shall be made and preserved according to R641 Rules. No person shall bear the burden of proof or persuasion. All relevant parts of the data base and inventory system and all public comments received during the public comment period shall be included in the record and considered by the Board in its decision on the petition.

442. The Division will give notice of the date, time, and location of the hearing to:

442.100. Local, state, and federal agencies which may have an interest in the decision on the petition;

442.200. The petitioner and the intervenors; and

442.300. Any person with an ownership or other interest known to the Division in the areas covered by the petition.

443. Notice of the hearing will be sent by certified mail and postmarked not less than 30 days before the scheduled date of the hearing.

444. The Division will notify the general public of the date, time, and location of the hearing by placing a newspaper advertisement once a week for two consecutive weeks in the locale of the area covered by the petition and once during the week prior to the scheduled date of the public hearing. The consecutive weekly advertisement will begin between four to five weeks before the scheduled date of the public hearing.

445. The Board may consolidate in a single hearing the hearings required for each of several petitions which relate to areas in the same locale.

446. In the event that all petitioners and intervenors stipulate agreement prior to the hearing, the petition may be withdrawn from consideration.

450. Decision.

451. Prior to designating any land areas unsuitable for coal mining and reclamation operations, the Division will prepare a detailed statement, using existing and available information on the potential coal resources of the area, the demand for coal resources, and the impact of such designation on the environment, the economy, and the supply of coal.

452. The cost-benefit analysis, required by Section 40-10-24(1)(c) of the Act, is a part of the assessment of the impact of such designation on the economy required in the detailed statement. The analysis will not dictate the decision of the Board.

453. In reaching its decision, the Board will use:

453.100. The information contained in the data base and inventory system;

453.200. Information provided by other governmental agencies;

453.300. The detailed statement prepared under R645-103-451; and

453.400. Any other relevant information submitted during the comment period.

454. A final written decision will be issued by the Board, including a statement of reasons, within 60 days of completion of the public hearing, or, if no public hearing is held, then within 12 months after receipt of the complete petition. The Division will simultaneously send the decision by certified mail to the petitioner, every other party to the proceeding, and to the Office of Surface Mining.

455. The decision of the Board with respect to a petition, or the failure of the Division to act within the time limits set forth in R645-103-400, will be subject to judicial review by a court of competent jurisdiction in accordance with Section 40-10-30 of the Act.

460. Data Base and Inventory System Requirements.

461. The Division will develop a data base and inventory system which will permit evaluation of whether reclamation is feasible in areas covered by petitions.

462. The Division will include in the system information relevant to the criteria in R645-103-320 including, but not limited to, information received from the United States Fish and Wildlife Service, the State Historic Preservation Officer, and the Department of Environmental Quality - Division of Air Quality.

463. The Division will add to the data base and inventory system information:

463.100. On potential coal resources of Utah, demand for those resources, the environment, the economy, and the supply of coal sufficient to enable the Division to prepare the statements required by R645-103-451; and

463.200. That becomes available from petitions, publications, experiments, permit applications, coal mining and reclamation operations, and other sources.

470. Public Information. The Division will:

471. Make the information in the data base and inventory system developed under R645-103-460 available to the public

for inspection free of charge and for copying at reasonable cost, except that specific information relating to location of properties proposed to be nominated to, or listed in, the National Register of Historic Places need not be disclosed if the Division determines that the disclosure of such information would create a risk of destruction or harm to such properties.

472. Provide information to the public on the petition procedures necessary to have an area designated as unsuitable for all or certain types of coal mining and reclamation operations, or to have designations terminated and describe how the inventory and data base system can be used.

480. Division Responsibility for Implementation.

481. The Division will not issue permits which are inconsistent with designations made pursuant to R645-103-200, R645-103-300, or R645-103-400.

482. The Division will maintain a map, or other unified and cumulative record, of areas designated unsuitable for all or certain types of coal mining and reclamation operations.

483. The Division will make available to any person any information, within its control, regarding designations including mineral or elemental content which is potentially toxic in the environment but excepting proprietary information on the chemical and physical properties of the coal.

KEY: reclamation, coal mines
July 28, 2010 40-10-1 et seq.
Notice of Continuation February 1, 2012

R645. Natural Resources; Oil, Gas and Mining; Coal.
R645-200. Coal Exploration: Introduction.
R645-200-100. Scope.

110. The coal exploration rules, R645-200 through R645-203, apply to the Division and to any person who conducts or seeks to conduct coal exploration.

120. Coal Exploration Categories.

121. Coal Exploration Which is Subject to 43 CFR Parts 3480-3487. This category of coal exploration is conducted according to the procedures set forth in 43 CFR Parts 3480-3487.

122. Minor Coal Exploration. Coal exploration during which 250 tons or less of coal will be removed will require Division review of a Notice of Intention to Conduct Minor Coal Exploration under the requirements of R645-201-200. Exploration during which 250 tons or less of coal will be removed on lands designated as unsuitable for surface coal mining operations under R645-103 will be subject to the requirements of R645-201-300.

123. Major Coal Exploration. Coal exploration during which more than 250 tons of coal will be removed or which takes place on lands which are designated as unsuitable for surface coal mining operations under R645-103 will require Division approval and issuance of a Major Coal Exploration Permit under the requirements of R645-201-300.

R645-200-200. Responsibilities.

210. It is the responsibility of any person seeking to conduct coal exploration under the State Program to comply with the requirements of R645-200 through R645-203.

220. It is the responsibility of the Division to receive and review Notices of Intention to Conduct Minor Coal Exploration, to enforce the terms of each Notice, and to receive, review and approve or disapprove applications for Major Coal Exploration Permits. The Division will issue, condition, suspend, revoke and enforce Major Coal Exploration Permits under the State Program. The Division will review and respond to Notices of Intention to Conduct Minor Coal Exploration and initial applications for Major Coal Exploration Permits within 15 days of receipt.

230. The Division will coordinate review of Notices of intention to conduct Minor Coal Exploration and review, approval or disapproval of Major Coal Exploration Permit applications with other government agencies, as appropriate.

KEY: reclamation, coal mines
1994 40-10-1 et seq.
Notice of Continuation February 1, 2012

R645. Natural Resources; Oil, Gas and Mining; Coal.
R645-201. Coal Exploration: Requirements for Exploration Approval.
R645-201-100. Responsibilities for Coal Exploration Plan Review.

110. Coal exploration plan review on lands which are not subject to 43 CFR Parts 3480 -3487 will be the responsibility of the Division.

120. On lands where the requirements of 43 CFR 3480-3487 apply, the review of coal exploration plans will be guided by the direction provided in these parts of the 43 CFR.

130. The Division will coordinate as appropriate its activities in reviewing coal exploration projects with other agencies with the objective of reducing duplication of agency and operator effort and at the same time, maximizing the effect of its protection of the state from the environmental effects of coal exploration activities.

R645-201-200. Notices of Intention to Conduct Minor Coal Exploration.

210. Notices of Intention to Conduct Minor Coal Exploration when 250 tons or less of coal will be removed will require Division review prior to conducting exploration except where exploration is planned to be conducted on lands designated unsuitable for surface coal mining operations under R645-103; exploration on these lands designated as unsuitable will be subject to the requirements of R645-201-300.

220. Notices of Intention to Conduct Minor Coal Exploration will include:

221. The name, address and telephone number of the applicant seeking to explore;

222. The name, address and telephone number of the applicant's representative who will be present at, and responsible for conducting the exploration operations;

223. A narrative and map describing the exploration area and indicating where exploration will occur;

224. A statement of the period of intended exploration; and

225. A description of the method of exploration to be used, the amount of coal to be removed and the practices that will be followed to protect the area from adverse impacts of the exploration activities and to reclaim the area in accordance with the applicable requirements of R645-202.

R645-201-300. Major Coal Exploration Permits.

310. Any person who intends to conduct coal exploration in which more than 250 tons of coal will be removed in the area to be explored or which will take place on lands designated as unsuitable for coal mining and reclamation operations under R645-103, will, prior to conducting the exploration, submit an application for a Major Coal Exploration Permit and obtain written approval from the Division.

320. Contents of Major Coal Exploration Permit Applications. Each application for a Major Coal Exploration Permit approval will contain, at a minimum, the following information:

321. The name, address, and telephone number of the applicant;

322. The name, address, and telephone number of the representative of the applicant who will be present at and be responsible for conducting the exploration; and

323. An exploration and reclamation operations plan, including:

323.100. A narrative description of the proposed exploration area, cross-referenced to the map required under R645-201-325, including information on surface topography; geology, surface water, and other physical features; vegetative cover; the distribution and important habitats of fish, wildlife, and plants, including, but not limited to, any endangered or threatened species listed pursuant to the Endangered Species Act of 1973 (16 U.S.C. Sec. 1531 et seq.); districts, sites, buildings, structures or objects listed on or eligible for listing on the National Register of Historic Places; known archeological resources located within the proposed exploration area; and other information which the Division may require regarding known or unknown historic or archeological resources;

323.200. A narrative description of the methods to be used to conduct coal exploration and reclamation, including, but not limited to, the types and uses of equipment, drilling, blasting, road or other access route construction, and excavated earth and other debris disposal activities;

323.300. An estimated timetable for conducting and completing each phase of the exploration and reclamation;

323.400. A description of the measures to be used to comply with the applicable requirements of R645-202;

323.500. The estimated amount of coal to be removed and a description of the methods to be used to determine the amount removed; and

323.600. A statement of why more than 250 tons of coal are necessary for exploration.

324. The name and address of the owner(s) of record of the surface land and of the subsurface mineral estate of the area to be explored;

325. A map at a scale of 1:24,000 or larger, showing the areas of land to be substantially disturbed by the proposed exploration and reclamation. The map will specifically show existing underground openings, roads, occupied dwellings, and pipelines; proposed location of trenches, roads, and other access routes and structures to be constructed; the location of land excavations to be conducted; water or coal exploratory holes and wells to be drilled or altered; earth or debris disposal areas; existing bodies of surface water; historic, cultural, topographic, and drainage features; and habitats of any endangered or threatened species listed pursuant to the Endangered Species Act of 1973 (16 U.S.C. 1531 et seq.);

326. If the surface is owned by a person other than the applicant, a description of the basis upon which the applicant claims the right to enter that land for the purpose of conducting exploration and reclamation; and

327. A detailed estimate of the cost of reclamation for the proposed exploration, with supporting calculations for the estimate. Estimates should be based on rates given in acceptable "cost, performance and escalation index" handbooks. The exploration reclamation estimate should include appropriate calculations and costs for:

327.100. Demolition;
327.200. Structural removal;
327.300. Backfilling and/or regrading;
327.400. Recontouring;
327.500. Seedbed preparation;
327.600. Seeding;
327.700. Mulching and/or fertilizing;
327.800. Contingency factor; and
327.900. Escalation factor.

328. For any lands listed in R645-103-224, a demonstration that, to the extent technologically and economically feasible, the proposed exploration activities have been designed to minimize interference with the values for which those lands were designated as unsuitable for coal mining and reclamation operations. The application must include documentation of consultation with the owner of the feature causing the land to come under the protection of R645-103-224, and, when applicable, with the agency with primary jurisdiction over the feature with respect to the values that caused the land to come under the protection of R645-103-224.

330. Public Notice and Comment for an application for a Major Coal Exploration Permit.

331. Completeness Determination. Within 30 days of

receipt of an application, excluding applicant response time, the Division will determine whether an application is administratively complete. The division will notify the applicant, in writing, upon determining the application to be administratively complete.

332. Public notice of the application will be provided as follows:

332.100. The applicant will publish once a week for four consecutive weeks, subsequent to the Division's completeness determination, a public notice of the filing of an administratively complete application with the Division in a newspaper of general circulation in the county of the proposed exploration area; and

332.200. The public notice will state the name and business address of the person seeking approval, the date of filing of the application, the Division address where written comments on the application may be submitted, the closing date of the comment period, and a description of the general area of exploration.

333. Public Comment. Any person with an interest which is or may be adversely affected will have the right to file written comments with the Division on the application within 30 days after the last date of publication.

340. Approval or Disapproval of an Application for a Major Coal Exploration Permit.

341. The Division will act upon an administratively complete application for a Major Coal Exploration Permit and any written comments within 60 days, weather permitting. The approval of a Major Coal Exploration Permit may be based only on a complete and accurate application.

342. The Division will approve a complete and accurate application for a Major Coal Exploration Permit filed in accordance with R645-201-300 if it finds, in writing, that the exploration and reclamation described in the application will:

342.100. Be conducted in accordance with R645-201-300, R645-202, and any other applicable provisions of the State Program;

342.200. Not jeopardize the continued existence of an endangered or threatened species listed pursuant to Section 4 of the Endangered Species Act of 1973 (16 U.S.C. 1533) or result in the destruction or adverse modification of critical habitat of those species;

342.300. Not adversely affect any cultural or historical resources listed on the National Register of Historic Places, pursuant to the National Historic Preservation Act, (16 U.S.C. Sec. 470 et seq.), unless the proposed exploration has been approved by both the Division and the agency with jurisdiction over the resources to be affected;

342.400. Terms of approval issued by the Division will contain conditions necessary to ensure that the exploration and reclamation will be conducted in compliance with the Act, R645-201-300, R645-202, and any other applicable provisions of the State Program; and

342.500. With respect to exploration activities on any lands protected under R645-103-224, minimize interference, to the extent technologically and economically feasible, with the values for which those lands were designated as unsuitable for coal mining and reclamation operations. Before making this finding, the Division must provide reasonable opportunity to the owner of the feature causing the land to come under the protection of R645-103-224, and, when applicable, to the agency with primary jurisdiction over the feature with respect to the values that caused the land to come under the protection of R645-103-224, to comment on whether the finding is appropriate.

350. Notice and Hearing on an Application for a Major Coal Exploration Permit.

351. The Division will notify the applicant and the appropriate local government officials, and other commenters, in writing, of its decision to approve or disapprove the application. If the application is disapproved, the notice to the applicant will include a statement of the reason, for disapproval. The Division will provide public notice of approval or disapproval of each application, by publication in a newspaper of general circulation in the general vicinity of the proposed operations.

352. Any person with interests which are or may be adversely affected by a decision of the Division pursuant to R645-201-351, will have the opportunity for administrative and judicial review as are set forth in R645-300-200.

R645-201-400. Requirements for Commercial Sale.

Any person who extracts coal for commercial sale or commercial use during any coal exploration will obtain a coal mining and reclamation operations permit for those operations from the Division under R645-300 through R645-303 unless that coal extraction is exempted by R645-100-400.

410. With the prior written approval of the Division, no permit to conduct coal mining and reclamation operations is required for the sale or commercial use of coal extracted during exploration operations if such sale or commercial use is for coal testing purposes only. An application will be filed with the Division to obtain this written approval.

420. The application referred to under R645-201-410 is required to demonstrate that the coal testing is needed for the development of the coal mining and reclamation operation which will be the subject of a permit application to be submitted in the near future, and that the proposed commercial use or sale of coal extracted during exploration operations is solely for the purpose of testing the coal.

430. The application to mine coal for testing purposes will contain:

431. The name of the testing firm and the locations at which the coal will be tested.

432. If the coal will be sold directly to, or commercially used directly by, the intended end user, a statement from the intended end user, or if the coal is sold indirectly to the intended end user through an agent or broker, a statement from the agent or broker. The statement shall include:

432.100. The specific reason for the test, including why the coal may differ from the intended user's other coal supplies so as to require testing;

432.200. The amount of coal necessary for the test(s) and why a smaller amount will not suffice; and

432.300. A description of the specific tests that will be conducted.

433. Evidence that sufficient reserves of coal are available to the person conducting exploration or its principals for future commercial use or sale to the intended end user, or agent or broker of such user identified above, to demonstrate that the amount of coal to be removed is not the total reserve, but is a sampling of a larger reserve.

434. An explanation as to why other means of exploration, such as core drilling are not adequate to determine the quality of the coal and/or the feasibility of developing a coal mining and reclamation operation.

KEY: reclamation, coal mines
July 28, 2010 40-10-1 et seq.
Notice of Continuation February 1, 2012

R652. Natural Resources; Forestry, Fire and State Lands.
R652-140. Utah Forest Practices Act.
R652-140-100. Authority and Purpose.

This rule is adopted pursuant to the authority of Subsection 65A-1-4(2), which requires the Division to promulgate rules, and by Section 65A-8a-101 et seq., to clarify the procedure through which operators must register with the Division and notify the Division of the intent to conduct forest practices.

R652-140-200. Exceptions to Forest Practice.

For purposes of Section 65A-8a-101 et seq., and this rule, the term "Forest practice" does not include the control of invasive or exotic species, removal of Pinyon-Juniper woodlands, or cutting trees for posts, poles or firewood.

R652-140-300. Procedures for Registration of Operators.

(1) To register, operators shall complete and submit a printed or electronic version of a registration form provided by the Division, which includes information required under Subsection 65A-8a-103(2).

(2) The registration form shall be submitted to the Division's headquarter office or one of the Division's six administrative area offices. Offices are located in the following areas:

(a) Headquarter Office, 1594 West North Temple, Suite 3520, PO Box 145703, Salt Lake City, UT 84114-5703.

(b) Bear River Area Office, 1780 North Research Parkway, Suite 104, North Logan, UT 84341-1940.

(c) Wasatch Front Area Office, 1594 West North Temple, Suite 3520, PO Box 145703, Salt Lake City, UT 84114-5703.

(d) Central Area Office, 1139 N. Centennial Park Drive, Richfield, UT 84701-1860.

(e) Northeastern Area Office, 2210 South Highway 40 Suite B, Heber City, UT 84032.

(f) Southwestern Area Office, 585 North Main Street, Cedar City, UT 84720.

(g) Southeastern Area Office, 1165 South Highway 191, Suite 6, Moab, UT 84532.

(3) Upon receipt of the registration form, the Division will acknowledge receipt by providing the operator a registration number and date of expiration and returning a copy of the registration form to the operator.

(4) Registration shall be valid for a period of five years from the date of receipt. At the end of the five-year period, the operator must renew the registration with the Division.

R652-140-400. Procedures for Notification of Intent to Conduct Forest Practices.

(1) At least 30 days prior to the commencement of a forest practice, the operator shall submit written notification of intent to conduct forest practices to the Division as required by Subsection 65A-8a-104(1). The 30 days shall commence on the date of postmark, if mailed, or on the date received if hand delivered or electronically submitted.

(2) Notifications shall be submitted to the Division's headquarter's office or one of the Division's six administrative area offices listed in Subsection R652-140-300(2).

(3) Operators shall submit a written notification on a form provided by the Division, a copy thereof or its electronic version, and include the information required under Subsection 65A-8a-104(2).

(4) Notifications submitted to the Division shall be acknowledged within ten days of receipt by the Division. The acknowledgment shall include information identified in Subsection 65A-8a-104(3).

R652-140-500. Procedures for Application, Approval, Implementation, and Monitoring of Forest Stewardship Plans.

This rule is adopted pursuant to the authority of Subsection 65A-8a-106(3), which requires the Division to promulgate rules, to clarify the procedure for application, approval, implementation, and monitoring of Forest Stewardship Plans.

(1) Forest Stewardship Plans shall include the federal components provided in the "Forest Stewardship Program National Standards and Guidelines"

(2) Forest Stewardship Plans shall be monitored consistent with federal guidelines, located in the "Forest Stewardship Program National Standards and Guidelines", and utilizing the Forest Stewardship Plan-Implementation Monitoring form.

(3) A forest landowner is required to implement those portions of a Forest Stewardship Plan that relate to the Farmland Assessment Act Section 59-2-503, which include:

(a) Timber stand improvement
(b) stream or riparian restoration
(c) rangeland improvement

KEY: registration, notification, forest practices
February 7, 2011 65A-8a-103
Notice of Continuation January 19, 2012 65A-8a-104

R657. Natural Resources, Wildlife Resources.
R657-13. Taking Fish and Crayfish.
R657-13-1. Purpose and Authority.

(1) Under authority of Sections 23-14-18 and 23-14-19 of the Utah Code, the Wildlife Board has established this rule for taking fish and crayfish.

(2) Specific dates, areas, methods of take, requirements and other administrative details which may change annually and are pertinent are published in the proclamation of the Wildlife Board for taking fish and crayfish.

R657-13-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2.

(2) In addition:

(a) "Aggregate" means the combined total of two or more species of fish or two or more size classes of fish which are covered by a limit distinction.

(b) "Angling" means fishing with a rod, pole, tipup, handline, or trollboard that has a single line with legal hooks, baits, or lures attached to it, and is held in the hands of, or within sight (not to exceed 100 feet) of, the person fishing.

(c)(i) "Artificial fly" means a fly made by the method known as fly tying.

(ii) "Artificial fly" does not mean a weighted jig, lure, spinner, attractor blade, or bait.

(d) "Artificial lure" means a device made of rubber, wood, metal, glass, fiber, feathers, hair, or plastic with a hook or hooks attached. Artificial lures, including artificial flies, do not include fish eggs or other chemically treated or processed natural baits or any natural or human-made food, or any lures that have been treated with a natural or artificial fish attractant or feeding stimulant.

(e) "Bag limit" means the maximum limit, in number or amount, of protected wildlife that one person may legally take during one day.

(f) "Bait" means a digestible substance, including worms, cheese, salmon eggs, marshmallows, or manufactured baits including human-made items that are chemically treated with food stuffs, chemical fish attractants or feeding stimulants.

(g) "Camp" means, for the purposes of this rule, any place providing temporary overnight accommodation for anglers including a camper, campground, tent, trailer, cabin, houseboat, boat, or hotel.

(h) "Chumming" means dislodging or depositing in the water any substance not attached to a hook, line, or trap, which may attract fish.

(i) "Commercially prepared and chemically treated baitfish" means any fish species or fish parts which have been processed using a chemical or physical preservation technique other than freezing including irradiation, salting, cooking, or oiling and are marketed, sold or traded for financial gain as bait.

(j) "Dipnet" means a small bag net with a handle that is used to scoop fish or crayfish from the water.

(k) "Filleting" means the processing of fish for human consumption typically done by cutting away flesh from bones, skin, and body.

(l) "Fishing contest" means any organized event or gathering where anglers are awarded prizes, points or money for their catch.

(m) "Float tube" means an inflatable floating device less than 48 inches in any dimension, capable of supporting one person.

(n) "Free Shafting" means to release a pointed shaft that is not tethered or attached by physical means to the diver in an attempt to take fish while engaged in underwater spearfishing.

(o) "Gaff" means a spear or hook, with or without a handle, used for holding or lifting fish.

(p) "Game fish" means Bonneville cisco; bluegill; bullhead; channel catfish; crappie; green sunfish; largemouth bass; northern pike; Sacramento perch; smallmouth bass; striped bass, trout (rainbow, albino, cutthroat, brown, golden, brook, lake/mackinaw, kokanee salmon, and grayling or any hybrid of the foregoing); tiger muskellunge; walleye; white bass; whitefish; wiper; and yellow perch.

(q) "Handline" means a piece of line held in the hand and not attached to a pole used for taking fish or crayfish.

(r) "Immediately Released" means that the fish should be quickly unhooked and released back into the water where caught. Fish that must be immediately released cannot be held on a stringer, or in a live well or any other container or restraining device.

(s) "Lake" means the standing water level existing at any time within a lake basin. Unless posted otherwise, a stream flowing inside or within the high water mark is not considered part of the lake.

(t) "Length measurement" means the greatest length between the tip of the head or snout and the tip of the caudal (tail) fin when the fin rays are squeezed together. Measurement is taken in a straight line and not over the curve of the body.

(u) "Liftnet" means a small net that is drawn vertically through the water column to take fish or crayfish.

(v) "Motor" means an electric or internal combustion engine.

(w) "Nongame fish" means species of fish not listed as game fish.

(x) "Possession limit" means, for purposes of this rule only, one bag limit, including fish at home, in a cooler, camper, tent, freezer, livewell or any other place of storage.

(y) "Protected aquatic wildlife" means, for purposes of this rule only, all species of fish, crustaceans, or amphibians.

(z) "Reservoir" means the standing water level existing at any time within a reservoir basin. Unless posted otherwise, a stream flowing inside or within the high water mark is not considered part of the reservoir.

(aa) "Second pole" means fishing with one additional rod, pole, tipup, handline, or trollboard that has a single line with legal hooks, bait, or lures attached to it and is held in the hands of, or within sight of the person fishing.

(bb) "Seine" means a small mesh net with a weighted line on the bottom and float line on the top that is drawn through the water. This type of net is used to enclose fish when its ends are brought together.

(cc) "Setline" means a line anchored to a non-moving object and not attached to a fishing pole.

(dd) "Single hook" means a hook or multiple hooks having a common shank.

(ee) "Snagging" or "gaffing" means to take a fish in a manner that the fish does not take the hook voluntarily into its mouth.

(ff) "Spear" means a long-shafted, sharply pointed, hand held instrument with or without barbs used to spear fish from above the surface of the water.

(gg) "Spearfishing (underwater)" means fishing by a person swimming, snorkeling, or diving and using a mechanical device held in the hand, which uses a rubber band, spring, pneumatic power, or other devise to propel a pointed shaft to take fish from under the surface of the water.

(hh) "Tributary" means a stream flowing into a larger stream, lake, or reservoir.

(ii)(i) "Trout" means species of the family Salmonidae, including rainbow, albino, cutthroat, brown, golden, brook, tiger, lake (mackinaw), splake, kokanee salmon, and grayling or any hybrid of the foregoing.

(ii) "Trout" does not include whitefish or Bonneville cisco.

R657-13-3. Fishing License Requirements and Free Fishing Day.

(1) A license is not required on free fishing day, a

Saturday in June, annually. All other laws and rules apply.

(2) A person 12 years of age or older shall purchase a fishing license before engaging in any regulated fishing activity pursuant to Section 23-19-18.

(3) A person under 12 years of age may fish without a license and take a full bag and possession limit.

R657-13-4. Fishing Contests.

(1) All fishing contests shall be held pursuant to R657-58 Fishing Contests and Clinics.

R657-13-5. Interstate Waters And Reciprocal Fishing Permits.

(1) Bear Lake

(a) The holder of a valid Utah or Idaho fishing or combination license may fish within both the Utah and Idaho boundaries of Bear Lake with one fishing pole. With the purchase of a valid Utah fishing or combination license and a Utah second pole permit, or a valid Idaho fishing or combination license and an Idaho two-pole permit, an angler may fish with two poles anywhere on Bear Lake that is open to fishing. A second pole or two-pole permit must be purchased from the state of original license purchase.

(b) Only one bag limit may be taken and held in possession even if licensed in both states.

(2) Reciprocal Fishing Permits

(a) The purchase of a reciprocal fishing permit allows a person to fish across state boundaries of interstate waters.

(b) Reciprocal fishing permits are offered for Lake Powell and Flaming Gorge Reservoir (See Subsections (3) and (4).)

(c) Utah residents may obtain reciprocal fishing permits by contacting the state of Arizona for Lake Powell and the state of Wyoming for Flaming Gorge.

(d) Nonresidents may obtain reciprocal fishing permits through the division's web site, from online license agents and division offices.

(e) The reciprocal fishing permit must be:

(i) used in conjunction with a valid unexpired fishing or combination license from a reciprocating state; and

(ii) signed by the holder as the holder's name appears on the valid unexpired fishing or combination license from the reciprocating state.

(f) Reciprocal fishing permits are valid for 365 days from the date of purchase.

(g) Anglers are subject to the laws and rules of the state in which they are fishing.

(h) Only one bag limit may be taken and held in possession even if licensed in both states.

(3) Lake Powell Reservoir

(a) Any person qualifying as an Arizona resident and having in their possession a valid resident Arizona fishing license and a Utah reciprocal fishing permit for Lake Powell can fish within the Utah boundaries of Lake Powell.

(b) Any person who is not a resident of Utah or Arizona must purchase the appropriate nonresident licenses for Utah and Arizona to fish both sides of Lake Powell.

(c) Only Utah and Arizona residents are allowed to purchase reciprocal permits to fish both sides of Lake Powell.

(4) Flaming Gorge Reservoir

Any person possessing a valid Wyoming fishing license and a Utah reciprocal fishing permit for Flaming Gorge is permitted to fish within the Utah waters of Flaming Gorge Reservoir.

R657-13-6. Angling.

(1) While angling, the angler shall be within sight (not to exceed 100 feet) of the equipment being used at all times, except setlines.

(2) Angling with more than one line is unlawful, except:

(a) when using a valid second pole permit in conjunction with an unexpired Utah one day, seven day or annual fishing or combination license;

(b) while fishing for crayfish without the use of fish hooks;

(c) while fishing through the ice at Flaming Gorge Reservoir. A second pole permit is not required when fishing through the ice at Flaming Gorge Reservoir, or when fishing for crayfish with lines without hooks.

(3) No artificial lure may have more than three hooks.

(4) No line may have attached to it more than two baited hooks, two artificial flies, or two artificial lures, except for a setline or while fishing at Flaming Gorge Reservoir or Lake Powell.

(5) When angling through the ice, the hole may not exceed 12 inches across at the widest point, except at Bear Lake, Flaming Gorge Reservoir, and Fish Lake where specific limitations apply.

R657-13-7. Fishing With More than One Pole (Second Pole Permits).

(1) A person may use a second pole to take fish on all waters open to fishing provided they have an unexpired fishing or combination license and a valid second pole permit, except as provided in Subsection (5) below.

(2)(a) A second pole permit may be obtained through the division's web site, from license agents and division offices.

(b)(i) A second pole permit is a 365 day permit valid only when used in conjunction with an unexpired Utah one day, seven day or annual fishing or combination license.

(ii) A second pole permit does not allow an angler to take more than one daily bag or possession limit.

(3) Anglers under 12 years of age must purchase a valid fishing or combination license and second pole permit in order to use a second pole.

(4) A second pole permit shall only be used by the person to whom the second pole permit was issued.

(5) A person may use up to six lines without a second pole permit when fishing at Flaming Gorge Reservoir through the ice. When using more than two lines at Flaming Gorge Reservoir, the angler's name shall be attached to each line, pole, or tip-up, and the angler shall check only their lines.

R657-13-8. Setline Fishing.

(1) A person may use a setline to take fish only in the Bear River proper downstream from the Idaho state line, including Cutler Reservoir and outlet canals; Little Bear River below Valley View Highway (SR-30); Malad River; and Utah Lake.

(2)(a) Angling with one pole is permitted while setline fishing, except as provided in Subsection (b).

(b) A person who obtains a second pole permit may fish with two poles while setline fishing.

(3) No more than one setline per angler may be used and it may not contain more than 15 hooks.

(4)(a) A setline permit may be obtained through the division's web site, from license agents and division offices.

(b) A setline permit is required in addition to a valid Utah one day, seven day or annual fishing or combination license.

(c) A setline permit is a 365 day permit valid only when used in conjunction with an unexpired Utah one day, seven day or annual fishing or combination license.

(5) When fishing with a setline, the angler shall be within 100 yards of the surface or bank of the water being fished.

(6) A setline shall have one end attached to a nonmoving object, not attached to a fishing pole, and shall have attached a legible tag with the name, address, and setline permit number of the angler.

(7) Anglers under 12 years of age must purchase a valid Utah one day, seven day or annual fishing or combination license and setline permit in order to use a setline.

R657-13-9. Underwater Spearfishing.

(1) Underwater spearfishing is permitted from official sunrise to official sunset only, except as provided in Subsection (6).

(2) Use of artificial light is unlawful while engaged in underwater spearfishing, except as provided in Subsection (6).

(3) Free shafting is prohibited while engaged in underwater spearfishing.

(4) Causey Reservoir, Deer Creek Reservoir, Flaming Gorge Reservoir, Jordanelle Reservoir, Ken's Lake, Lake Powell, Lost Creek Reservoir, Pineview Reservoir (with the exception of tiger muskie), Red Fleet Reservoir, Steinaker Reservoir, Starvation Reservoir, Willard Bay Reservoir and Yuba Reservoir are open to taking game and nongame fish by means of underwater spearfishing from 6:00 a.m. on the first Saturday of June through November 30, except as specified in subsections 5 and 6 below. Fish Lake is open to taking game and nongame fish by means of underwater spearfishing from 6:00 a.m. on the first Saturday of June through September 15.

(5) Lake Powell is open to taking carp and striped bass by means of underwater spearfishing from January 1 through December 31.

(6) Flaming Gorge is open to taking burbot by means of underwater spearfishing from January 1 through December 31, 24 hours each day. Artificial light is permitted while engaged in underwater spearfishing for burbot at Flaming gorge. Artificial light may not be used at other waters nor may it be used when pursuing other fish species in Flaming Gorge. No other species of fish may be taken with underwater spearfishing techniques at Flaming Gorge between official sunset and official sunrise.

(7) The bag and possession limit for underwater spearfishing is the same as the bag and possession limit applied to anglers using other techniques in the waters listed in Subsection (4) above and as identified in the annual Utah Fishing Proclamation issued by the Utah Wildlife Board.

(8) Nongame fish may be taken by underwater spearfishing only in the waters listed in Subsection (4) above and as provided in Section R657-13-14.

(9) The waters listed above in subsection 4 are the only waters open to underwater spearfishing except that carp may be taken by means of underwater spearfishing from any water open to angling during the open angling season set for a given body of water.

R657-13-10. Dipnetting.

(1) Hand-held dipnets may be used to land game fish legally taken by angling. However, they may not be used as a primary method to take game fish from Utah waters except at Bear Lake where they are permitted for Bonneville Cisco.

(2) The opening of the dipnet may not exceed 18 inches.

(3) When dipnetting through the ice, the size of the hole is unrestricted.

(4) Hand held dipnets may also be used to take crayfish and nongame fish, except prohibited fish.

R657-13-11. Restrictions on Taking Fish and Crayfish.

(1) Artificial light is permitted while angling, except when underwater spearfishing. However artificial light is permitted while underwater spearfishing for burbot in Flaming Gorge.

(2) A person may not obstruct a waterway, use a chemical, explosive, electricity, poison, crossbow, firearm, pellet gun, or archery equipment to take fish or crayfish, except as provided in Subsection R657-13-14(1)(c) and Section R657-13-20.

(3) A person may not take protected aquatic wildlife by snagging or gaffing, except at Lake Powell where a gaff may be used to land striped bass. It is unlawful to possess a gaff at waters, except at Lake Powell.

(4) Chumming is prohibited on all waters, except as provided in Section R657-13-20.

(5) The use of a float tube or a boat, with or without a motor, to take protected aquatic wildlife is permitted on many public waters. However, boaters should be aware that other agencies may have additional restrictions on the use of float tubes, boats, or boats with motors on some waters.

(6) Nongame fish and crayfish may be taken only as provided in Sections R657-13-14 and R657-13-15.

R657-13-12. Bait.

(1) Use or possession of corn, hominy, or live baitfish while fishing is unlawful.

(2) Use or possession of tiger salamanders (live or dead) while fishing is unlawful.

(3) Use or possession of any bait while fishing on waters designated artificial fly and lure only is unlawful.

(4) Use or possession of artificial baits which are commercially imbedded or covered with fish or fish parts while fishing is unlawful.

(5) Use or possession of bait in the form of fresh or frozen fish or fish parts while fishing is unlawful, except as provided below and in Subsections (7) and (8).

(a) Dead Bonneville cisco may be used as bait only in Bear Lake.

(b) Dead yellow perch may be used as bait only in: Deer Creek, Echo, Fish Lake, Gunnison, Hyrum, Johnson, Jordanelle, Mantua, Mill Meadow, Newton, Pineview, Rockport, Starvation, Utah Lake, Willard Bay and Yuba reservoirs.

(c) Dead white bass may be used as bait only in Utah Lake and the Jordan River.

(d) Dead shad, from Lake Powell, may be used as bait only in Lake Powell. Dead shad must not be removed from the Glen Canyon National Recreation Area.

(e) Dead fresh or frozen salt water species including sardines and anchovies may be used as bait in any water where bait is permitted.

(f) Dead mountain sucker, white sucker, Utah sucker, redside shiner, speckled dace, mottled sculpin, fat head minnow, Utah chub, and common carp may be used as bait in any water where bait is permitted.

(6) Commercially prepared and chemically treated baitfish or their parts may be used as bait in any water where bait is permitted.

(7) The eggs of any species of fish caught in Utah, except prohibited fish, may be used in any water where bait is permitted. However, eggs may not be taken or used from fish that are being released.

(8) Use of live crayfish for bait is legal only on the water where the crayfish is captured. It is unlawful to transport live crayfish away from the water where captured.

(9) Manufactured, human-made items that may not be digestible, that are chemically treated with food stuffs, chemical fish attractants, or feeding stimulants may not be used on waters where bait is prohibited.

(10) On any water declared infested by the Wildlife Board with an aquatic invasive species, or that is subject to a closure order or control plan under R657-60, it shall be unlawful to transport any species of baitfish (live or dead) from the infested water for use as bait in any other water of the State. Baitfish are defined as those species listed in sections (5)(b),(5)(c),(5)(f) and (8).

R657-13-13. Prohibited Fish.

(1) The following species of fish are classified as prohibited and may not be taken or held in possession:

(a) Bonytail (Gila elegans);

(b) Bluehead sucker (Catostomus discobolus);

(c) Colorado pikeminnow (Ptychocheilus lucius);

(d) Flannelmouth sucker (Catostomus latipinnis);

(e) Gizzard shad (Dorosoma cepedianum);
(f) Grass carp (Ctenopharyngodon idella);
(g) Humpback chub (Gila cypha);
(h) June sucker (Chasmistes liorus);
(i) Least chub (Iotichthys phlegethontis);
(j) Leatherside chub (Snyderichthys copei);
(k) Razorback sucker (Xyrauchen texanus);
(l) Roundtail chub (Gila robusta);
(m) Virgin River chub (Gila seminuda);
(n) Virgin spinedace (Lepidomeda mollispinis); and
(o) Woundfin (Plagopterus argentissimus).
(2) Any of these species taken while attempting to take other legal species shall be immediately released.

R657-13-14. Taking Nongame Fish.

(1)(a) Except as provided in Subsections (b) and (c), a person possessing a valid Utah fishing or combination license may take nongame fish for personal, noncommercial purposes during the open fishing season set for the given body of water.
(b) A person may not take any species of fish designated as prohibited in Section R657-13-13.
(c) Nongame fish may not be taken in the following waters, except carp may be taken by angling, archery, spear, or underwater spearfishing:
(i) San Juan River;
(ii) Colorado River;
(iii) Green River (from confluence with Colorado River upstream to Colorado state line in Dinosaur National Monument);
(iv) Green River (from Colorado state line in Brown's Park upstream to Flaming Gorge Dam, including Gorge Creek, a tributary entering the Green River at Little Hole);
(v) White River (Uintah County);
(vi) Duchesne River (from Myton to confluence with Green River);
(vii) Virgin River (Main stem, North, and East Forks).
(viii) Ash Creek;
(ix) Beaver Dam Wash;
(x) Fort Pierce Wash;
(xi) La Verkin Creek;
(xii) Santa Clara River (Pine Valley Reservoir downstream to the confluence with the Virgin River);
(xiii) Diamond Fork;
(xiv) Thistle Creek;
(xv) Main Canyon Creek (tributary to Wallsburg Creek);
(xvi) Provo River (below Deer Creek Dam);
(xvii) Spanish Fork River;
(xviii) Hobble Creek (Utah County); and
(xix) Snake Valley waters (west and north of US-6 and that part of US-6 and US-50 in Millard and Juab counties).
(2) Nongame fish, except those species listed in Section R657-13-13, may be taken by angling, traps, bow and arrow, liftnets, dipnets, cast nets, seine, spear or underwater spearfishing in the waters specified in Subsection R657-13-9(4).
(3) Seines shall not exceed 10 feet in length or width.
(4) Cast nets must not exceed 10 feet in diameter.
(5) Lawfully taken nongame fish shall be either released or killed immediately upon removing them from the water, however, they may not be left or abandoned on the shoreline.

R657-13-15. Taking Crayfish.

(1) A person possessing a valid Utah fishing or combination license may take crayfish for personal, noncommercial purposes during the open fishing season set for the given body of water.
(2) Crayfish may be taken by hand or with a trap, pole, liftnet, dipnet, handline, or seine, provided that:
(a) game fish or their parts, or any substance unlawful for angling, is not used for bait;
(b) seines shall not exceed 10 feet in length or width;
(c) no more than five lines are used, and no more than one line may have hooks attached, - except when an angler possesses a valid second pole permit in which case two hooked lines may be used. On unhooked lines, bait is tied to the line so that the crayfish grasps the bait with its claw; and
(d) live crayfish are not transported from the body of water where taken.

R657-13-16. Possession and Transportation of Dead Fish and Crayfish.

(1)(a) At all waters except Strawberry Reservoir, Scofield Reservoir, Panguitch Lake, Jordanelle Reservoir and Lake Powell, game fish may be dressed, filleted, have heads and/or tails removed, or otherwise be physically altered after completing the act of fishing or reaching a fish cleaning station, camp, or principal means of land transportation. It is unlawful to possess fish while engaged in the act of fishing that have been dressed or filleted. This shall not apply to fish that are processed for immediate consumption or to fish held from a previous day's catch.
(b) Trout and/or salmon taken at Strawberry Reservoir, Scofield Reservoir and Panguitch Lake, and smallmouth bass taken at Jordanelle may not be filleted and the heads or tails may not be removed in the field or in transit.
(c) Fish may be filleted at any time and anglers may possess filleted fish at any time at Lake Powell.
(2) A legal limit of game fish or crayfish may accompany the holder of a valid fishing or combination license within Utah or when leaving Utah.
(3) A person may possess or transport a legal limit of game fish or crayfish for another person when accompanied by a donation letter.
(4) A person may not take more than one bag limit in any one day or possess more than one bag limit of each species or species aggregate regardless of the number of days spent fishing.
(5) A person may possess or transport dead fish on a receipt from a registered commercial fee fishing installation, a private pond owner, or a short-term fishing event. This receipt shall specify:
(a) the number and species of fish;
(b) date caught;
(c) the certificate of registration number of the installation, pond, or short-term fishing event; and
(d) the name, address, telephone number of the seller.

R657-13-17. Possession of Live Fish and Crayfish.

(1) A person may not possess or transport live protected aquatic wildlife except as provided by the Wildlife Code or the rules and proclamation of the Wildlife Board.
(2) For purposes of this rule, a person may not transport live fish or crayfish away from the water where taken.
(3) This does not preclude the use of live fish stringers, live wells, or hold type cages as part of normal angling procedures while on the same water in which the fish or crayfish are taken.

R657-13-18. Release of Tagged or Marked Fish.

Without prior authorization from the division, a person may not:
(1) tag, mark, or fin-clip fish for the purpose of offering a prize or reward as part of a contest;
(2) introduce a tagged, marked, or fin-clipped fish into the water; or
(3) tag, mark, or fin-clip a fish and return it to the water.

R657-13-19. Season Dates and Bag and Possession Limits.

(1) All waters of state fish rearing and spawning facilities

are closed to fishing.

(2) State waterfowl management areas are closed to fishing except as specified in the proclamation of the Wildlife Board for taking fish and crayfish.

(3) The season for taking fish and crayfish is January 1 through December 31, 24 hours each day. Exceptions are specified in the proclamation of the Wildlife Board for taking fish and crayfish.

(4)(a) Bag and possession limits are specified in the proclamation of the Wildlife Board for taking fish and crayfish and apply statewide unless otherwise specified.

(b)(i) A person may not fish in waters that have a specific bag or size limit while possessing fish in violation of that limit.

(ii) Fish not meeting the size, bag, or species provisions on specified waters shall be returned to the water immediately.

(c)(i) Trout, salmon and grayling that are not immediately released and are held in possession, dead or alive, are included in the person's bag and possession limit.

(ii) Once a trout, salmon or grayling is held in or on a stringer, fish basket, livewell, or by any other device, a trout, salmon or grayling may not be released.

(5) A person may not take more than one bag limit in any one day or have in possession more than one bag limit of each species or species aggregate regardless of the number of days spent on fishing.

R657-13-20. Variations to General Provisions.

Variations to season dates, times, bag and possession limits, methods of take, use of a float tube or a boat for fishing, and exceptions to closed areas are specified in the proclamation of the Wildlife Board for taking fish and crayfish.

R657. Natural Resources, Wildlife Resources.
R657-17. Lifetime Hunting and Fishing License.
R657-17-1. Purpose and Authority.

(1) Under authority of Section 23-19-17.5, this rule provides the requirements and procedures applicable to lifetime hunting and fishing licenses.

(2) In addition to the provisions of this rule, a lifetime licensee is subject to:

(a) the provisions set forth in Title 23, Wildlife Resources Code of Utah; and

(b) the rules and proclamations of the Wildlife Board, including all requirements for hunting permits and fishing licenses.

(3) Unless specifically stated otherwise, lifetime licensees shall be subject to any amendment to this rule or any amendment to Section 23-19-17.5.

R657-17-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2 and Rule R657-5.

(2) In addition:

(a) "Lifetime Questionnaire" means a list of questions, accessible by a lifetime licensee at the division's website, used to identify the lifetime licensee's preferred choice of a general season deer permit unit and hunt type.

(b) "Recent Lifetime Licensee Record" means the most recent general deer permit issued within the immediately preceding 3 years.

(c) "Application Deadline" means the close of the annual Big Game application period, as established in the guidebook of the Wildlife Board for taking big game.

R657-17-3. Lifetime License Entitlement.

(1)(a) A permanent lifetime license card shall be issued to lifetime licensees in lieu of an annual hunting, and fishing license.

(b) The issuance of a permanent lifetime license card does not authorize a lifetime licensee to all hunting privileges. The lifetime licensee is subject to the requirements in Subsection R657-17-1(2).

(2)(a) Each year, a lifetime licensee who is eligible to hunt big game may receive without charge, a permit for the unit of their choice for one of the following general deer hunts:

(i) archery buck deer;

(ii) any weapon buck deer; or

(iii) muzzleloader buck deer.

(b) Effective January 1, 2012 all lifetime license holders must initially select a general season hunting unit during the Big Game application period as established in the guidebook of the Wildlife Board for taking big game.

(3) Sales of lifetime hunting and fishing licenses may not be refunded, except as provided in Section 23-19-38.

(4) Lifetime hunting and fishing licenses are not transferable.

(5) Lifetime hunting and fishing licenses are no longer for sale as of March 1, 1994.

(6)(a) Lifetime license holders may participate in the Dedicated Hunter Program.

(b) Upon entering the Dedicated Hunter Program, the lifetime license holder agrees to forego any rights to receive a buck deer permit for the general archery, general any weapon or general muzzleloader deer hunts as provided in Section 23-19-17.5 during enrollment in the Dedicated Hunter Program.

R657-17-4. General Deer Permits.

(1) The Division will issue a general buck deer permit to each lifetime licensee prior to the big game general hunting season, provided:

(a) a current Lifetime Questionnaire has been completed prior to the application deadline, identifying the lifetime licensee's general season unit and hunt type choice, or according to the recent lifetime licensee record; and

(b) provided the lifetime licensee does not apply for a general deer permit in the big game drawing.

(2) A lifetime licensee may change their previous year's unit choice, prior to the application deadline by completing the online Lifetime Questionnaire through the division's website.

(3) Lifetime licensees must notify the division of any change in mailing address, email address, residency, address, telephone number, physical description, or driver's license number.

(4) If a general buck deer permit is not issued to a lifetime licensee during the preceding 3 years, the lifetime licensee must complete and submit the Lifetime Questionnaire on the division's website prior to the application deadline.

(i) Effective January 1, 2012 all lifetime license holders must initially select a general season hunting unit during the Big Game application period as established in the guidebook of the Wildlife Board for taking big game.

(5) If a lifetime licensee fails to submit a current year Lifetime Questionnaire and does not have a recent lifetime licensee record by the application deadline, the lifetime licensee may only obtain a remaining general deer permit when remaining drawing permits are made available to the public over-the-counter. If no general deer permits are remaining after the drawing, the lifetime licensee shall not be issued a permit.

(6)(a) Lifetime licensees may apply for any general deer permit in the big game drawing.

(b) Drawing applications are subject to the established application fee.

(c) A lifetime licensee that applies for a general deer permit in the drawing waives the opportunity to be issued a general deer permit according to the recent lifetime licensee record or the current Lifetime Questionnaire excluding applications for dedicated hunter deer permits. Lifetime licensees may apply for dedicated hunter deer permits pursuant to R657-17-5(5).

(7) Lifetime licensees may apply for general deer preference points through the big game general buck deer drawing as provided in Rule R657-62 and the guidebooks of the Wildlife Board for taking big game, provided the lifetime licensee waives their opportunity to be issued a general buck deer permit that year according to the recent lifetime licensee record or the current Lifetime Questionnaire.

R657-17-5. Applying for Big Game Permits.

(1) A lifetime licensee may apply for a limited entry permit offered through the big game drawing using a bucks, bulls and once-in-a-lifetime application.

(2) Limited entry permit species and application procedures are provided in Rule R657-62 and the guidebook of the Wildlife Board for taking big game.

(3)(a) If the lifetime licensee applies for and is successful in obtaining a premium limited entry, limited entry, or cooperative wildlife management unit buck deer permit in the big game drawing, a general deer permit will not be issued.

(b) If the lifetime licensee does not draw a premium limited entry, limited entry, or cooperative wildlife management unit buck deer permit in the big game drawing, the general deer permit requested on the Lifetime Questionnaire or the recent lifetime licensee record shall be issued.

(4) Applying for or obtaining an antlerless deer, antlerless elk, or doe pronghorn permit does not affect eligibility for obtaining a general buck deer permit.

(5)(a) A lifetime licensee may apply for a dedicated hunter deer permit through the big game drawing.

(b) If the lifetime licensee applies for and is successful in obtaining a dedicated hunter deer permit in the big game

drawing, a general deer permit will not be issued.

(c) If the lifetime licensee does not draw a dedicated hunter deer permit in the big game drawing, the general deer permit requested on the Lifetime Questionnaire or the recent lifetime licensee record shall be issued.

(6) All rules established by the Wildlife Board regarding the availability of big game permits in relation to obtaining general deer permits shall apply to lifetime licensees.

R657-17-6. Hunter Education Requirements -- Minimum Age for Hunting.

(1) The division shall issue a lifetime licensee only those licenses, permits, and tags for which that person qualifies according to the hunter education requirements, age restrictions specified in this Section and Title 23, Wildlife Resources Code of Utah, and suspension orders of a division hearing officer.

(2)(a) Lifetime licensees born after December 31, 1965, must be certified under Section 23-19-11 to engage in hunting.

(b) Proof of hunter education must be provided to the division by the lifetime licensee.

(3) Age requirements to engage in hunting are as follows:

(a) A lifetime licensee must have completed a valid hunter education course to hunt.

(b) A lifetime licensee must be 12 years of age or older to hunt big game.

R657-17-7. Change of Residency.

(1) A lifetime hunting and fishing license shall remain valid if the licensee changes residency to another state or country.

(2)(a) A lifetime licensee who no longer qualifies as a resident under Section 23-13-2 shall notify the division within 60 days of leaving the state.

(b) The division shall issue the lifetime licensee a new lifetime hunting and fishing license with the change of address after the lifetime licensee surrenders the lifetime hunting and fishing license with the previous address.

(3) A lifetime licensee who does not qualify as a resident shall purchase the required nonresident permits or tags required for hunting, except as provided in Subsection R657-17-3(2).

R657-17-8. Lost or Stolen Lifetime Hunting and Fishing License.

(1) If a lifetime hunting and fishing license is lost or stolen, a duplicate may be obtained from any division office by:

(a) providing verification of identity; and

(b) paying a lifetime hunting and fishing license duplication fee.

R657. Natural Resources, Wildlife Resources.
R657-38. Dedicated Hunter Program.
R657-38-1. Purpose and Authority.

(1) Under the authority of Section 23-14-18, this rule provides the standards and requirements for qualified deer hunters to participate in the Dedicated Hunter Program by obtaining a certificate of registration.

(2) The Dedicated Hunter Program provides the opportunity for participants to:

(a) increase the opportunity for recreational general deer hunting, while the division regulates harvest;

(b) increase participation in wildlife conservation projects that are beneficial to wildlife conservation and the division; and

(c) complete the wildlife conservation and ethics course to learn about hunter ethics, public input processes and wildlife conservation philosophies and strategies.

R657-38-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2.

(2) In addition:

(a) "Dedicated Hunter Program orientation course" means a course of instruction provided by the division outlining the organization, structure and requirements of the Dedicated Hunter Program.

(b) "Dedicated Hunter Permit" means a general buck deer permit issued to a participant in the Dedicated Hunter Program, which authorizes the participant to hunt general archery, general muzzleloader and general any weapon in the unit specified on the permit.

(c) "Hunt area" means an area prescribed by the Wildlife Board where general archery, general muzzleloader and general any weapon deer hunting is open to permit holders for taking deer.

(d) "Participant" means a person who has remitted the appropriate fee and has been issued a certificate of registration for the Dedicated Hunter Program.

(e) "Program" means the Dedicated Hunter Program, a program administered by the division as provided in this rule.

(f) "Program harvest" means tagging a deer with a Dedicated Hunter permit or failing to return the Dedicated Hunter permit with the attached, unused tag, while enrolled in the program.

(g) "Program requirements" mean the Dedicated Hunter Program orientation course as provided in Section R657-38-9, the wildlife conservation and ethics course as provided in Section R657-38-10, wildlife conservation projects as provided in Section R657-38-11, and returning an unused Dedicated Hunter permit and attached tag as provided in Subsection R657-38-13(1).

(h) "Wildlife Conservation and Ethics course" means a course of instruction provided by the division on hunter ethics, public input processes and wildlife conservation philosophies and strategies.

(i) "Wildlife conservation project" means a project designed by the division, or any other individual or entity and pre-approved by the division, that provides wildlife habitat protection or enhancement, improves hunting or fishing access, or other conservation projects or activities that benefit wildlife or directly benefits the division.

(j) "Wildlife conservation project manager" means an employee of the division, or person approved by the division, responsible for supervising a wildlife conservation project and participating volunteers, and maintaining and reporting records of service hours to the division.

R657-38-3. Certificate of Registration Required.

(1)(a) To participate in the program a person must apply for, obtain and sign a certificate of registration issued by the division through the Big Game Application as prescribed in the guidebook of the Wildlife Board for taking big game.

(b) Each unit may not exceed the specified percentage of certificates of registration for the program at any given time. The percentages shall be prescribed by the Wildlife Board in the guidebook for taking big game.

(c) Certificates of registration are issued through a division drawing.

(d) Each prospective participant must submit an online application provided by the division after completing the Dedicated Hunter Program orientation course before the division may issue the certificate of registration for the program.

(e) A certificate of registration to participate in the program shall only be issued during the application period as prescribed in the guidebook of the Wildlife Board for taking big game.

(2) The division may deny issuing a Dedicated Hunter certificate of registration to a person for any of the following reasons:

(a) The application is incomplete or contains false information.

(b) The person, at the time of application, is under a judicial or administrative order suspending any wildlife hunting or fishing privilege within Utah or elsewhere;

(c) The person has violated the terms of any certificate of registration issued by the division or an associated agreement.

(d) The person has ever had a Dedicated Hunter certificate of registration suspended by the division.

(3) Prospective participants who have been under any wildlife suspension may not apply for the program until their suspension period has ended.

(4) Each certificate of registration is valid for three consecutive general deer hunting seasons, except as provided in subsections (13) and (14).

(5)(a) Any person who is 12 years of age or older may obtain a certificate of registration. A person 11 years of age may obtain a certificate of registration if the date of that person's 12th birthday falls in the calendar year the certificate of registration is issued. A person may not use a permit to hunt big game before their 12th birthday.

(b) Any person who is 17 years of age or younger before the beginning date of the annual general archery deer hunt shall pay the youth participant fees.

(c) Any person who is 18 years of age or older on or before the beginning date of the annual general archery deer hunt shall pay the adult participant fees.

(6) A certificate of registration authorizes the participant an opportunity to receive annually a Dedicated Hunter permit to hunt during the general archery, general muzzleloader and general any weapon deer hunts. The Dedicated Hunter permit may be used during the dates and within the hunt area boundaries established by the Wildlife Board.

(7)(a) Except as provided in Subsections (b), R657-38-12(3)(a), and R657-38-12(6), a participant using a Dedicated Hunter permit may take two deer within three years of enrollment, and only one deer in any one year as provided in Rule R657-5.

(b) Participants entering or re-entering the Dedicated Hunter Program shall be subject to any changes subsequently made in this rule during the three-year term of enrollment, unless a variance is authorized by the division.

(c) The harvest of an antlerless deer using a Dedicated Hunter permit, as authorized under specific hunt choice areas during the general archery deer hunt, shall be considered a program harvest.

(8) The certificate of registration must be signed by the participant. The certificate of registration is not valid without the required signature.

(9) The participant and holder of the certificate of registration must have a valid Dedicated Hunter permit in

possession while hunting. A participant is not required to have the Dedicated Hunter certificate of registration in possession while hunting.

(10) The division may issue a duplicate Dedicated Hunter certificate of registration pursuant to Section 23-19-10.

(11) Certificates of registration are not transferable and shall expire at the end of a participant's third consecutive general deer hunting season.

(12)(a) The program requirements set forth in Sections R657-38-10, and R657-38-11 may be waived annually if the participant provides evidence of leaving the state for a minimum period of one year during the enrollment period for religious or educational purposes.

(b) If the participant requests that the program requirements be waived in accordance with Subsection (a), and the request is granted, the participant shall not receive a Dedicated Hunter permit for the year in which the program requirements were waived.

(13)(a) A participant who is a member of the United States Armed Forces or public health or public safety organization and who is mobilized or deployed on order in the interest of national defense or emergency may request that their enrollment in the program be suspended for the period of their mobilization or deployment.

(14)(a) A participant who is a member of the United States Armed Forces or public health or public safety organization and who is mobilized or deployed on order in the interest of national defense or emergency may request that the requirements set forth in Sections R657-38-10, R657-38-11, be extended or satisfied as provided in Subsections (b) through (d).

(b) The program requirement set forth in Section R657-38-10 may be extended to the second or third year of their program enrollment.

(i) extended to the third year in the program if the participant is currently in the second year of the program; and

(ii) waived in the third year of the program if the participant remains mobilized or deployed and is unable to reasonably meet the requirement.

(c) The program requirement set forth in Section R657-38-11 may be considered satisfied by a participant that is prevented from completing the requirement due to the mobilization or deployment.

(d) A participant must provide evidence of the mobilization or deployment.

(15) A refund for the Dedicated Hunter certificate of registration may not be issued, except as provided in Section 23-19-38.2. Any refund will be issued pro rata based on the number of hunting seasons actually participated in during the three-year enrollment period.

R657-38-4. Dedicated Hunter Drawing.

(1) Applications are available through the division's Internet site.

(2) A person may not submit more than one application in the Dedicated Hunter drawing in any one year.

(3)(a) Applications must be submitted online by the date prescribed in the guidebook of the Wildlife Board for taking big game.

(b) If an error is found on an application, the applicant may be contacted for correction.

(4) Only a resident may apply for or obtain a resident certificate of registration and only a nonresident may apply for or obtain a nonresident certificate of registration.

(5) To apply for a resident certificate of registration, a person must establish residency at the time of purchase.

(6) The posting date of the drawing shall be considered the purchase date of a certificate of registration.

(7) Applicants shall be notified by email of drawing results by the date published in the guidebook of the Wildlife Board for taking big game.

(8) Group applications are accepted. Up to four applicants may apply as a group.

(9)(a) An applicant may withdraw their application for the Dedicated Hunter Program drawing by the date published in the guidebook of the Wildlife Board for taking big game.

(b) Handling fees will not be refunded.

(10) An applicant may withdraw and resubmit their application for the Dedicated Hunter Program certificate of registration drawing by the date published in the guidebook of the Wildlife Board for taking big game.

(11)(a) Effective January 1, 2012 all current Dedicated Hunter Program participants must select a general season hunting unit prior to the Big Game application period as established by the Wildlife Board in the guidebook for taking big game.

(b) Any current Dedicated Hunter Program participant who fails to select a general season hunting unit prior to the Big Game application period as established by the Wildlife Board in the guidebook for taking big game will be assigned a unit in the participants region of choice from the previous year.

(i) The division shall make every reasonable attempt to contact each current Dedicated Hunter Program participant for the purpose of selecting a general season hunting unit.

R657-38-5. Dedicated Hunter Application Fees.

The handling fees and certificate of registration fees must be paid pursuant to Rule R657-42-8(5).

R657-38-6. Dedicated Hunter Application Refunds.

(1) The handling fees are nonrefundable.

(2) Unsuccessful applicants will not be charged for a certificate of registration.

R657-38-7. Dedicated Hunter Preference Point System.

(1) Preference points are used in the Dedicated Hunter certificate of registration drawing to ensure that applicants who are unsuccessful in the drawing will have first preference in the next year's drawing.

(2) A preference point is awarded for:

(a) each valid unsuccessful application;

(b) each valid application when applying only for a preference point in the dedicated hunter drawing.

(3)(a) A person may not apply in the drawing for both a preference point and a certificate of registration.

(b) A person may not apply for a preference point if that person is ineligible to apply for a certificate of registration.

(4) Preference points are forfeited if a person obtains a certificate of registration through the drawing.

(5)(a) Preference points are not transferable.

(b) Preference points shall only be applied to the Dedicated Hunter drawing.

(c) A person may accumulate preference points.

(6) Preference points are averaged and rounded down to the nearest whole point when two or more applicants apply together on a group application.

(7)(a) Preference points are tracked using social security numbers or division-issued customer identification numbers.

(b) The division shall retain copies of electronic applications from 2011 to the current applicable drawing for the purpose of researching preference point records.

(c) Any requests for researching an applicant's preference point records must be requested within the time frames provided in Subsection (b).

(d) Any preference points on the division's records shall not be researched beyond the time frames provided in Subsection (b).

(e) The division may eliminate any preference points earned that are obtained by fraud, deceit or misrepresentation.

R657-38-8. Dedicated Hunter Permits.

(1)(a) Participants may hunt during the general archery, general muzzleloader and general any weapon deer hunts within the hunt area and during the season dates prescribed in the guidebook of the Wildlife Board for taking big game.

(b) The division may exclude multiple season opportunities on specific deer management units due to extenuating circumstances on that specific unit.

(2)(a) Participants must designate a unit hunt choice during the Dedicated Hunter application period.

(b) The unit hunt choice shall remain in effect for the duration of the Dedicated Hunter certificate of registration.

(3)(a) Participants must notify the division of any change of mailing address in order to receive a Dedicated Hunter permit by mail.

(b) A participant who enters the program as a resident and becomes a nonresident, or claims residency outside of Utah shall be issued a nonresident permit at no additional charge for the remainder of the three-year enrollment period.

(c) A participant who enters the program as a nonresident and becomes a resident, or claims residency in Utah, shall be issued a resident permit with no reimbursement of the higher nonresident fee for the remainder of the three-year enrollment period.

(4)(a) Dedicated Hunter permits may be issued through the mail prior to the beginning of the general archery deer hunt, and only upon evidence that the participant has completed all program requirements and possesses a Utah hunting or combination license. For the purposes of meeting the requirement of 23-19-24(2) the application period for a Dedicated Hunter deer permit will be considered to be the application period for the big game permits. Any Dedicated Hunter who does not have a valid hunting license during this application period must obtain one before a Dedicated Hunter deer permit will be issued.

(b) Participants completing program requirements may obtain their Dedicated Hunter permit over-the-counter from any division office after the remaining general season deer permits become available to the public as listed in the guidebook of the Wildlife Board for taking big game.

(5) A Dedicated Hunter permit may not be issued to any participant who:

(a) does not complete the program requirements;

(b) violates the terms of this rule or the Dedicated Hunter certificate of registration;

(c) does not possess a current and or valid Utah hunting or combination license.

(6)(a) The division may issue a duplicate Dedicated Hunter permit pursuant to Section 23-19-10.

(b) If a participant's unused Dedicated Hunter permit and tag is destroyed, lost, or stolen a participant may complete an affidavit verifying the permit was destroyed, lost, or stolen in order to obtain a duplicate. A fee to duplicate the permit and tag may apply.

(c) A duplicate Dedicated Hunter permit shall not be issued after the closing date of the general any weapon buck deer hunt. However, a participant may complete an affidavit and submit the affidavit for program reporting purposes as required in Section R657-38-13(1).

(7)(a) A participant may surrender a Dedicated Hunter permit in accordance with Rule R657-42.

(b) A participant may not surrender a Dedicated Hunter permit once the general archery deer hunt has begun, unless the Division can verify that the permit was never in the participant's possession.

(8)(a) Lifetime license holders may participate in the program.

(b) The lifetime license holder agrees to forego any rights to receive a lifetime license buck deer permit for the general archery, general muzzleloader or general any weapon deer hunts as provided in Section 23-19-17.5.

(c) A refund or credit is not issued for the lifetime license general archery, general muzzleloader or general any weapon permit.

R657-38-9. Dedicated Hunter Program Orientation Course.

(1)(a) The division shall provide an annual Dedicated Hunter Program orientation course.

(b) Prior to applying for the program, and obtaining a certificate of registration, a prospective participant must complete the Dedicated Hunter Program orientation course.

(2) The Dedicated Hunter Program orientation course shall explain the program to give a prospective participant a reasonable understanding of the program.

(3) The Dedicated Hunter Program orientation course is available through the division's Internet site.

(4)(a) Evidence of completion of the Dedicated Hunter Program orientation course shall be provided to the prospective participant upon completion of the Dedicated Hunter Program orientation course.

(b) Certificates of registration shall not be issued without the prospective participant having completed the Dedicated Hunter Program orientation course.

(c) The division shall keep a record of all participants who complete the Dedicated Hunter Program orientation course.

R657-38-10. Wildlife Conservation and Ethics Course.

(1) Prior to obtaining the first Dedicated Hunter permit while in the program, a participant must complete the wildlife conservation and ethics course.

(2) The wildlife conservation and ethics course shall explain hunter ethics, public input processes, and wildlife conservation philosophies and strategies.

(3) The wildlife conservation and ethics course is available through the division's Internet site.

(4) The division shall keep a record of all participants who complete the wildlife conservation and ethics course.

R657-38-11. Wildlife Conservation Projects.

(1) Each participant in the program shall provide a total of 32 hours of service as a volunteer on a wildlife conservation project as provided in Subsections (a) and (b), or pay the approved fee for each hour not completed as provided in Subsection (c).

(a) A participant must provide no fewer than eight hours of service before obtaining the first Dedicated Hunter Permit.

(b) A participant must provide an additional sixteen hours of service prior to receiving the second Dedicated Hunter Permit.

(c) A participant must provide the remaining balance of hours of service prior to November 1 of the third-year in the program.

(d) If a participant fails to complete all third year required service hours by November 1 after having been issued permits in years one and two, the value of the final hours must be paid in full prior to applying in any division drawings.

(e) Residents may not purchase more than 24 of the 32 total required service hours. Nonresidents may purchase all of the 32 total required service hours.

(f) Goods or services may be provided to the division in lieu of hours of service.

(g) Goods or services provided to the division for wildlife conservation projects by a participant may be, at the discretion of the division, substituted for service hours based upon current market values for the goods or services, and using the approved hourly service buyout rate when applying the credit.

(2) Wildlife conservation projects shall be designed by the division, or any other individual or entity and shall be pre-

approved by the division.

(3)(a) Wildlife conservation projects may occur anytime during the year as determined by the division.

(b) The division shall publicize the dates, times, locations and description of approved wildlife conservation projects and activities on the division's Internet site.

(4)(a) Service hours completed in any given year may be carried over to the following years, however excess service hours shall not be carried over to any year outside of the three-year enrollment period.

(b) Dedicated Hunter permits issued to participants within three weeks prior to the opening date of the general archery deer hunt annually, shall be issued over-the-counter at division offices.

(5) A participant may request a receipt from the wildlife conservation project manager showing service hours worked on the wildlife conservation project.

(6)(a) If a participant fails to fulfill the wildlife conservation project requirement in any year of participation, as required under Subsection (4), the participant shall not be issued a Dedicated Hunter permit for that year.

(b) The participant may obtain a Dedicated Hunter Permit for subsequent years upon completion of the wildlife conservation project program requirements due or payment of the fee in lieu thereof.

(7) The Volunteer Service Program Coordinator shall keep a record of all participants who attend wildlife conservation projects and the number of service hours worked.

R657-38-12. Obtaining Other Permits.

(1) Participants may not apply for or obtain general buck deer permits or preference points issued by the division through the big game drawing, license agents, over-the-counter sales, or the Internet during the three-year period of enrollment in the program. Any general deer permit obtained in addition to the Dedicated Hunter permit becomes invalid and must be surrendered prior to the beginning date of the general archery deer hunt. A refund may not be issued pursuant to Section 23-19-38.

(2) Participants may not apply for or obtain general landowner buck deer permits as provided under Rule R657-43.

(3)(a) Participants may apply for or obtain any other non general season buck deer permit as provided in Rule R657-5 and the guidebook of the Wildlife Board for taking big game.

(i) harvest of a deer with a permit obtained pursuant to Subsection (a) shall not be considered a program harvest.

(ii) participants are not required to complete program requirements prior to obtaining a permit pursuant to Subsection (a).

(b) If the participant obtains any other buck deer permit, the Dedicated Hunter permit becomes invalid and the participant must surrender the Dedicated Hunter permit prior to the opening day of the general archery deer hunt. A refund may not be issued pursuant to Section 23-19-38.

(c) If the participant obtains any other buck deer permit the participant may use the permit only in the prescribed area during the season dates listed on the permit.

(d) Participants who obtain a cooperative wildlife management unit deer permit may hunt only within those areas identified on the permit and only during the dates determined by the cooperative wildlife management unit landowner or operator.

(4) Participants must have a valid permit in their possession while hunting.

(5) Obtaining any other buck deer permit does not authorize a participant to take an additional deer.

(6)(a) Participants may apply for or obtain antlerless deer permits as provided in Rule R657-5 and the guidebook of the Wildlife Board for taking big game.

(b) Antlerless permits do not count against the number of permits issued pursuant to this program.

(c) Harvest of an antlerless deer as provided in the guidebook of the Wildlife Board for taking big game shall not be considered a program harvest.

R657-38-13. Reporting Requirements.

(1)(a) A participant must return the unused Dedicated Hunter permit and attached tag, or an affidavit as provided in Section R657-38-8(6)(c), to a division office by March 15 annually.

(b) The division shall credit a program harvest to any participant who fails to return the unused Dedicated Hunter permit and attached tag, or an affidavit as provided in Section R657-38-8(6)(c).

(i) An unused Dedicated Hunter permit and attached tag, or an affidavit as provided in Subsection R657-38-8(6)(c) will be accepted and the credited program harvest removed.

(ii) A participant who returns an unused Dedicated Hunter permit after March 15, and who is credited with a second program harvest, is only eligible to obtain a Dedicated Hunter permit for an available unit if permits remain after the big game drawing and must obtain the Dedicated Hunter permit over-the-counter at a division office.

(iii) If there are no permits remaining after the big game drawing, additional Dedicated Hunter permits shall not be issued.

(2)(a) The division may contact participants to gather annual harvest information and hunting activity information.

(b) Participants are expected to provide harvest information and hunting activity information if contacted by the division.

R657-38-14. Certificate of Registration Surrender.

(1) A participant who has obtained a Dedicated Hunter certificate of registration may surrender the certificate of registration to a division office provided the participant does not have two program harvests and the participant has not been issued a permit in years one and two.

(2) The division may not issue a refund, except as provided in Section 23-19-38 and Section R657-38-3(15).

R657-38-15. Certificate of Registration Suspension.

(1) The division may suspend a Dedicated Hunter certificate of registration pursuant to Section 23-19-9 and R657-26.

(2) A certificate of registration may be suspended if the participant fraudulently:

(a) submits a time sheet for service hours; or

(b) completes a wildlife conservation and ethics course.

(3) A certificate of registration may be suspended if the participant is under a judicial or administrative suspension order suspending any wildlife hunting or fishing privilege within Utah or elsewhere.

(4) A certificate of registration is invalid if the participant's big game hunting privileges are suspended in any jurisdiction during the participant's enrollment in the program.

(5) A Dedicated Hunter permit is invalid if a participant's certificate of registration is suspended.

KEY: wildlife, hunting, recreation, wildlife conservation
January 10, 2012 23-14-18
Notice of Continuation November 1, 2010

R657. Natural Resources, Wildlife Resources.
R657-42. Fees, Exchanges, Surrenders, Refunds and Reallocation of Wildlife Documents.
R657-42-1. Purpose and Authority.

(1) Under the authority of Sections 23-19-1 and 23-19-38 the division may issue wildlife documents in accordance with the rules of the Wildlife Board.

(2) This rule provides the standards and procedures for the:

(a) exchange of permits;
(b) surrender of wildlife documents;
(c) refund of wildlife documents;
(d) reallocation of permits; and
(e) assessment of late fees.

R657-42-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2 and the applicable rules and guidebooks of the Wildlife Board.

(2) In addition:

(a) "Alternate drawing lists" means a list of persons who have not already drawn a permit and would have been the next person in line to draw a permit.

(b) "CWMU" means cooperative wildlife management unit.

(c) "Deployed or mobilized" means that a person provides military or emergency services in the interest of national defense or national emergency pursuant to the demand, request or order of their employer.

(d) "General season permit" means any:

(i) bull elk, buck deer, or turkey permit identified in the guidebooks of the Wildlife Board as a general season permit;

(ii) antlerless permit for elk, deer, or pronghorn antelope; or

(iii) harvest objective cougar permit.

(e) "Landowner association operator" for purposes of this rule, means:

(i) a landowner association or any of its members eligible to receive limited entry landowner permits as provided in Rule R657-43; or

(ii) CWMU - landowner association or its designated operator as provided in Rule R657-37.

(f) "Limited entry permit" means any permit, including a CWMU, conservation, convention, sportsman, or limited entry landowner permit, identified in the guidebooks of the Wildlife Board as limited entry or premium limited entry for the following;

(i) bull elk, buck deer, buck pronghorn, bear, cougar, or turkey; and

(ii) antlerless moose.

(g) "Once-in-a-lifetime permit" means any permit, including a CWMU, conservation, convention, sportsman, or limited entry landowner permit, identified in the guidebooks of the Wildlife Board as once-in-a-lifetime for the following:

(i) bison, bull moose, Rocky Mountain goat, desert bighorn sheep, and Rocky Mountain bighorn sheep.

(h) "Wildlife document" means any license, permit, tag, or certificate of registration issued by the division.

R657-42-3. Exchanges.

(1)(a) Any person who has obtained a general buck deer or a general bull elk permit may exchange that permit for any other available general permit if both permits are for the same species and sex.

(b) A person must make general buck deer and general bull elk permit exchanges at any division office prior to the season opening date of the permit to be exchanged.

(2) Any person who has obtained a cougar harvest objective unit permit may exchange that permit for any other available cougar harvest objective unit permit as provided in Rule R657-10.

(3) Any person who has obtained a limited entry bear any weapon or limited entry bear archery permit may exchange that permit for a limited entry bear archery or limited entry bear any weapon permit, respectively.

(4) The division may charge a handling fee for the exchange of a permit.

R657-42-4. Surrenders.

(1) Any person who has obtained a wildlife document and decides not to use it, may surrender the wildlife document to any division office.

(2) Any person who has obtained a wildlife document may surrender the wildlife document prior to the season opening date of the wildlife document for the purpose of:

(a) waiving the waiting period normally assessed and reinstating the number of bonus points, including a bonus point for the current year as if a permit had not been drawn, if applicable;

(b) reinstating the number of preference points, including a preference point for the current year as if a permit had not been drawn, if applicable;

(c) purchasing a reallocated permit or any other permit available for which the person is eligible; or

(d) receiving a refund as provided in R657-42-5.

(3) A CWMU permit must be surrendered prior to the applicable season opening date provided by the CWMU operator, except as provided in Section R657-42-11.

(4) Dedicated hunter participants must surrender their permits prior to the general archery deer season, except as provided in Section R657-38-6.

(5) A person may surrender a limited-entry, or once-in-a-lifetime permit received through a group application in the Big Game drawing and have their bonus points for that permit species reinstated, provided;

(a) all group members surrender their permits; and

(b) all permits are surrendered to the division more than 30 days before the start of the season for which the permit is valid.

(6) A person may surrender a general season permit received through a group application in the Big Game drawing and have their preference points reinstated, provided;

(a) all members of the group surrender their permits to the division prior to the start of the season for which the permit is valid.

(7) Notwithstanding Subsections (5)(b) and (6)(a), a person who obtains a permit through a group application in the Big Game drawing may surrender that permit after the opening date of the applicable hunting season and have the bonus points for the permit species restored, provided the person;

(a) is a member of United States Armed Forces or public health or public safety organization and is deployed or mobilized in the interest of national defense or national emergency;

(b) surrenders the permit to the division, with the tag attached and intact, or signs an affidavit verifying the permit is no longer in their possession within one year of the end of hunting season authorized by the permit; and

(c) satisfies the requirements for receiving a refund in R657-42-5(3)(c) and (d).

(8) The division may not issue a refund, except as provided in Sections 23-19-38, 23-19-38.2, and R657-42-5.

R657-42-5. Refunds.

(1) The refund of a license, certificate of registration or permit shall be made in accordance with:

(a) Section 23-19-38 and Rule R657-50;
(b) Section 23-19-38.2 and Subsection (3); or
(c) Section 23-19-38 and this section.

(2)(a) An application for a refund may be obtained from

any division office.

(b) All refunds must be processed through the Salt Lake Division office.

(3) A person may receive a refund for a wildlife document if that person was deployed or mobilized on or after September 11, 2001, in the interest of national defense or national emergency and is thereby completely precluded from participating in the hunting or fishing activity authorized by the wildlife document, provided:

(a) the refund request is made to the division within one year of the end of the hunting or fishing season authorized by the wildlife document;

(b) the person surrenders the wildlife document to the division, or signs an affidavit stating the wildlife document is no longer in the person's possession; and

(c) the person verifies that the deployment or mobilization completely precluded them from participating in the activity authorized by the wildlife document ; and

(d) the person provides military orders, or a letter from an employment supervisor on official public health or public safety organization letterhead stating:

(i) the branch of the United States Armed Forces, or name of the public health organization or public safety organization from which they were deployed or mobilized; and

(ii) the nature and length of their duty while deployed or mobilized.

(4) The division may issue a refund for a wildlife document if the person to whom it was issued dies prior to participating in the hunting or fishing activity authorized by the wildlife document, provided:

(a) The person legally entitled to administer the decedent's estate provides the division with:

(i) picture identification;

(ii) letters testamentary, letters of administration, or such other evidence establishing the person is legally entitled to administer the affairs of the decedent's estate;

(iii) a photocopy of the decedent's certified death certificate; and

(iv) the wildlife document for which a refund is requested.

(5)(a)(i) A person may receive a refund for a once-in-a-lifetime or limited-entry permit provided the permit is surrendered to the division no less than 30 days prior to the season opening date identified on the permit

(ii) A person may receive a refund for a general season permit that must be surrendered in order to accept a reallocated limited entry permit for the same species.

(b)(i) The established wildlife document refund fee shall be deducted from all refunds under subsection (5)(a).

(ii) A refund will not be issued where the wildlife document purchase price is equal to or less than the wildlife document refund fee.

(6) The director may determine that a person did not have the opportunity to participate in an activity authorized by the wildlife document.

(7) The division may reinstate a bonus point or preference point, whichever is applicable, and waive waiting periods, if applicable, when issuing a refund in accordance with this Section.

R657-42-6. Reallocation of Permits.

(1)(a) The division may reallocate surrendered limited entry and once-in-a-lifetime permits.

(b) The division shall not reallocate general season permits for big game and turkey, but the number of permits surrendered may be added to the appropriate permit quota the following year.

(2) Permits shall be reallocated through the Salt Lake Division office.

(3)(a) Any limited entry, once-in-a-lifetime or public CWMU permit surrendered to the division shall be reallocated through the drawing process by contacting the next person listed on the alternate drawing list or as provided in Subsection (b).

(b) A person who is denied a permit due to an error in issuing permits may be placed on the alternate drawing list to address the error, if applicable, in accordance with the Rule R657-50.

(c) The alternate drawing lists are classified as private and therefore, protected under the Government Records Access Management Act.

(d) The division shall make a reasonable effort to contact the next person on the alternate list by telephone or mail.

(e) If the next person, who would have drawn the limited entry, once-in-a-lifetime or public CWMU permit, does not accept the permit or the division is unable to contact that person, the reallocation process will continue until the division has reallocated the permit or the season closes for that permit.

(4) If the next person, who would have drawn the limited entry, once-in-a-lifetime or public CWMU permit has obtained a permit, that person may be required to surrender the previously obtained permit in accordance with Section R657-42-4(2) and any other applicable rules and guidebooks of the Wildlife Board.

(5) Any private CWMU permit surrendered to the division will be reallocated by the landowner through a voucher, issued to the landowner by the division in accordance with Rule R657-37.

R657-42-7. Reallocated Permit Cost.

(1) Any person who accepts the offered reallocated permit must pay the applicable permit fee.

(2) The division may not issue a refund, except as provided in Section R657-42-5.

R657-42-8. Accepted Payment of Fees.

(1) Personal checks, business checks, money orders, cashier's checks, and credit or debit cards are accepted for payment of wildlife documents.

(2) Personal or business checks drawn on an out-of-state account are not accepted.

(3) Third-party checks are not accepted.

(4) All payments must be made payable to the Utah Division of Wildlife Resources.

(5)(a) Credit or debit cards must be valid at least 30 days after any drawing results are posted.

(b) Checks, and credit or debit cards will not be accepted as combined payment on single or group applications.

(c) If applicants are applying as a group, all fees for all applicants in that group charged to a credit or debit card must be charged to a single card.

(d) Handling fees and donations are charged to the credit or debit card when the application is processed.

(e) Application amendment fees must be paid by credit or debit card.

(f) Permit fees may be charged to the credit or debit card prior to the posting date of the drawings, if successful.

(g) The division shall not be held responsible for bank charges incurred for the use of credit or debit cards.

(6)(a) An application is voidable if the check is returned unpaid from the bank or the credit or debit card is invalid or refused.

(b) The division charges a returned check collection fee for any check returned unpaid.

(7)(a) A license or permit is voidable if the check is returned unpaid from the bank or the credit or debit card is invalid or refused.

(b) The Division may make attempt to contact the successful applicant by phone or mail to collect payment prior to voiding the license or permit.

(8)(a) A license or permit received by a person shall be deemed invalid if payment for that license or permit is not received, or a check is returned unpaid from the bank, or the credit or debit card is invalid or refused.

(b) A person must notify the division of any change of credit or debit card numbers if the credit or debit card is invalid or refused.

(9) Hunting with a permit where payment has not been received for that permit constitutes a violation of hunting without a valid permit.

(10) The division may require a money order or cashier's check to correct payment for a license, permit, or certificate of registration.

(11) Any person who fails to pay the required fee for any wildlife document, shall be ineligible to obtain any other wildlife document until the delinquent fees and associated collection costs are paid.

(12) The Division may take any of the following actions when a wildlife document is voided for nonpayment or remains unissued and unpaid;

(a) reissue the wildlife document using the alternate drawing list for that document;

(b) reissue the wildlife document over-the-counter; or

(c) elect to withhold the wildlife document from reissuance.

(13) The Division may reinstate the applicant's bonus points or preference points and waive waiting periods, where applicable, when:

(a) voiding a permit in accordance with this section and the permit is reallocated;

(b) withholding a wildlife document from a successful applicant for nonpayment and the permit is reallocated; or

(c) full payment is received by the successful applicant on a voided or withheld wildlife document that is not reallocated.

R657-42-9. Assessment of Late Fees.

(1) Any wildlife application submitted under the Utah Administrative Code Rules provided in Subsection (a) through (e), within 30 days of the applicable application deadline established in such rules, in the guidebooks of the Wildlife Board, or by the division may be processed only upon payment of a late fee as provided by the approved fee schedule.

(a) R657-52, Commercial Harvesting of Brine Shrimp and Brine Shrimp Eggs;

(b) R657-21, Cooperative Wildlife Management Units for Small Game;

(c) R657-22, Commercial Hunting Areas;

(d) R657-37, Cooperative Wildlife Management Units for Big Game; or

(e) R657-43, Landowner Permits.

(2) Any person who fails to report their Big Game hunt information pursuant to R657-5 Taking Big Game, within 30 calendar days of the ending season date for their once-in-a-lifetime, premium limited entry, limited entry, or cooperative wildlife management unit hunt may apply for a Big Game permit or bonus point in the following year provided:

(a) the survey is completed and submitted to the division at least 5 days prior to the close of the Big Game application period established in the guidebook of the Wildlife Board for taking big game.

(b) the late fee established in the approved fee schedule is paid to the Division through the 1-800 number listed in the guidebooks of the Wildlife Board for taking big game.

(c) The accepted method of payment of fee is only a credit or debit card.

(3) Any person who fails to report their Swan hunt information pursuant to R657-9-7, within 30 calendar days of the ending season date for their Swan hunt may apply for a Swan permit in the following year provided:

(a) the survey is completed and submitted to the division at least 5 days prior to the close of the Swan application period established in the guidebook of the Wildlife Board for taking waterfowl.

(b) the late fee established in the approved fee schedule is paid to the Division through the 1-800 number listed in the guidebook of the Wildlife Board for taking waterfowl or through the division website.

(c) The accepted method of payment of fee is only a credit or debit card.

R657-42-10. Duplicates.

(1) If an unexpired wildlife document is destroyed, lost or stolen, a person may obtain a duplicate from a division office or online license agent, for a duplicate fee as provided in the fee schedule.

(2) The division may waive the fee for a duplicate unexpired wildlife document provided the person did not receive the original wildlife document.

(3) To obtain the duplicate wildlife document, the applicant may be required to complete an affidavit testifying to such loss, destruction or theft.

R657-42-11. Surrender of Cooperative Wildlife Management Unit or Limited Entry Landowner Permits.

(1) A person who has obtained a CWMU or limited entry landowner permit may surrender the permit after the deadline provided in Subsection R657-42-4(3) for CWMU permits and after the season opening date for limited entry landowner permits for the purpose of:

(a) death in accordance with Section 23-19-38, Subsection (2) and Section R657-42-5(4);

(b) injury or illness in accordance with Section 23-19-38 and Subsection (2);

(c) deployment or mobilization in the interest of national defense or national emergency in accordance with Section 23-19-38.2 and Subsection (2); or

(d) an error occurring in issuing the permit in accordance with Subsection (2) and Rule R657-50.

(2)(a) The permittee and the landowner association operator must sign an affidavit stating that the permittee has not participated in any hunting activity.

(b) The permittee and landowner association operator signatures must be notarized.

(c) The affidavit and unused permit must be submitted to the division.

(3)(a) The division may reissue a voucher to a landowner association operator, or reallocate a surrendered permit in accordance with Section 23-19-38 and as provided in Subsections (b) and (c).

(b) The division may reallocate a surrendered permit:

(i) originally issued by the division through the big game drawing process in accordance with Section R657-42-6; or

(ii) originally issued by the division through a voucher redemption in the form of a new voucher issued to the landowner association operator.

(c) Reissuance of vouchers or reallocation of permits under this section may only occur in the year in which the surrendered permit was valid.

KEY: wildlife, permits

January 10, 2012	**23-19-1**
Notice of Continuation May 8, 2008	**23-19-38**
	23-19-38.2

R657. Natural Resources, Wildlife Resources.
R657-43. Landowner Permits.
R657-43-1. Purpose and Authority.

(1) Under authority of Sections 23-14-18 and 23-14-19, this rule provides the standards and procedures for private landowners to obtain landowner permits for:

(a) taking buck deer within the general unit hunt boundary area where the landowner's property is located during the general deer hunt only; and

(b) taking bull elk, buck deer or buck pronghorn within a limited entry unit.

(2) In addition to this rule, any person who receives a landowner permit must abide by Rule R657-5 and the guidebook of the Wildlife Board for taking big game.

(3) The intent of the general landowner buck deer permit is to provide an opportunity for landowners, lessees, or their immediate family, whose property provides habitat for deer, to purchase a general deer permit for the general unit hunt boundary area where the landowner's property is located.

(4) The intent of the limited entry landowner permit is to provide an opportunity for landowners, whose property provides habitat for deer, elk, or pronghorn, to be allocated a restricted number of permits for a limited entry bull elk, buck deer, or buck pronghorn unit, where the landowner's property is located. Allowing landowners a restricted number of permits:

(a) encourages landowners to manage their land for wildlife;

(b) compensates the landowner for providing private land as habitat for wildlife; and

(c) allows the division to increase big game numbers on specific units.

R657-43-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2.

(2) In addition:

(a) "Eligible property" means:

(i) private land that provides habitat for deer, elk or pronghorn as determined by the division of Wildlife Resources;

(ii) private land that is not used in the operation of a Cooperative Wildlife Management Unit;

(iii) private land that is not used in the operation of an elk farm or elk hunting park;

(iv) land in agricultural use as provided in Section 59-2-502 and eligible for agricultural use valuation as provided in Sections 59-2-503 and 59-2-504; and

(v) for the purpose of receiving general buck deer permits, a minimum of 640 acres of private land owned or leased by one landowner within the general unit hunt boundary; or

(vi) private land, including crop land owned by members of a landowner association for limited entry permits.

(b) "Immediate family" means the landowner's or lessee's spouse, children, son-in-law, daughter-in-law, father, mother, father-in-law, mother-in-law, brother, sister, brother-in-law, sister-in-law, stepchildren, and grandchildren.

(c) "Landowner" means any person, partnership, or corporation who owns property in Utah and whose name appears on a deed as the owner of eligible property or whose name appears as the purchaser on a contract for sale of eligible property.

(d) "Landowner association" means an organization of private landowners who own property within a limited entry unit, organized for the purpose of working with the division.

(e) "Lessee" means any person, partnership, or corporation whose name appears as the Lessee on a written lease, for at least a one-year period, for eligible property used for farming or ranching purposes, and who is in actual physical control of the eligible property.

(f) "Limited entry unit" means a specified geographical area that is closed to hunting deer, elk or pronghorn to any person who has not obtained a valid permit to hunt in that unit.

(g) "Voucher" means a document issued by the division to a landowner, landowner association, or Cooperative Wildlife Management Unit operator, allowing a landowner, landowner association, or Cooperative Wildlife Management Unit operator to designate who may purchase a landowner big game hunting permit from a division office.

R657-43-3. Qualifications for General Landowner Buck Deer Permits.

(1) The director, upon approval of the Wildlife Board, may establish a number of general landowner buck deer permits within each region to be offered to eligible landowners or lessees for the general deer hunting season only.

(2) Only private lands will be considered in qualifying for general landowner buck deer permits. Public or state lands are not eligible.

(3) Crop lands will be considered in qualifying for general landowner buck deer permits if the crop lands provide habitat for deer and contribute to meeting unit management plan objectives.

(4) General landowner buck deer permits are limited to resident or nonresident landownersor lessees, and members of their immediate family.

R657-43-4. Qualifications for Limited Entry Permits.

(1) The Director, upon approval of the Wildlife Board, may establish a number of bull elk, buck deer and buck pronghorn limited entry permits to be offered to an eligible landowner association.

(2) Limited entry landowner permits are available for taking buck deer, bull elk or buck pronghorn, and may only be used on designated limited entry units.

(3) Only private lands that do not qualify for Cooperative Wildlife Management Units will be considered for limited entry landowner permits. Public or state lands are not eligible.

(4) Only private lands that qualify as eligible property will be considered for limited entry landowner permits.

(5) Applications for limited entry landowner permits will be received from landowner associations only.

(6) Only one landowner association, per species, may be formed for each limited entry unit as follows:

(a) A landowner association may be formed only if a simple majority of landowners, representing 51 percent of the eligible private lands within the herd unit, enter into a written agreement to form the association.

(b) The association may not unreasonably restrict membership to other qualified landowners in the unit.

(c) Each landowner association must elect a chairperson to represent the landowner association.

(d) The landowner association chairperson shall act as liaison with the division and the Wildlife Board.

(e) A landowner or landowner association may not restrict legal established passage through private land to access public lands for the purpose of hunting.

R657-43-5. Application for General Landowner Buck Deer Permits.

(1) Applications for general landowner buck deer permits are available from division offices.

(2) Only one eligible landowner or lessee may submit an application for the same parcel of land within the respective general unit hunt boundary area.

(3) In cases where more than one application is received for the same parcel of land, all applications will be rejected.

(4) Applications must include:

(a) total acres owned within the respective general unit hunt boundary area;

(b) signature of the landowner; and

(c) location of the private lands, acres owned, county and region.

(5) In cases where the landowner's or lessee's land is in more than one general unit hunt boundary area, the landowner or lessee may select one of those units from which to receive the permit.

(6) a non-refundable handling fee must accompany each application.

(7) a landowner may not apply for or obtain a general landowner buck deer permit without possessing a Utah hunting or combination license.

(8) Applications will be available by January 7.

(9) Applications must be completed and returned to the regional division office.

(10) The signature on the application will serve as an affidavit certifying ownership.

R657-43-6. Application for Limited Entry Permits.

(1) Applications for limited entry landowner permits are available from division offices and from division wildlife biologists.

(2) Applications to receive limited entry landowner permits must be submitted by a landowner association for lands within the limited entry hunt unit where the private lands are located.

(3) Applications must include:

(a) total acres owned by the association within the limited entry hunting unit and a map indicating the privately owned big game habitat;

(b) signature of each of the landowners within the association including acres owned, with said signature serving as an affidavit certifying ownership;

(c) a distribution plan for the allocation of limited entry permits by the association;

(d) a copy of the association by-laws; and

(e) a non-refundable handling fee.

(4) The division shall, upon request of the applicant, provide assistance in preparing the application.

(5) Applications must be completed and returned to the appropriate division office by September 1 annually.

(6) The division shall forward the application and other documentation to the Regional Wildlife Advisory Councils for public review.

(7) Recommendations by the Councils will then be forwarded to the Wildlife Board for review and action.

(8) Upon approval by the Wildlife Board, a Certificate of Registration will be issued to the landowner association.

R657-43-7. General Permits and Season Dates.

(1) The following number of general landowner buck deer permits may be available to a landowner or lessee:

(a) one general landowner buck deer permit may be issued for eligible property of 640 acres; and

(b) one additional general landowner buck deer permit may be issued for each additional 640 acres of eligible property.

(c) If an individual has both owned and leased eligible property, the acreage may be combined in determining the number of permits to be issued.

(2) Permittees may select only one general landowner buck deer permit (archery, rifle or muzzleloader) as provided in the guidebook of the Wildlife Board for taking big game.

(3)(a) General landowner buck deer permits are for personal use only and may not be transferred to any other person.

(b) If the landowner or lessee is a corporation, the person eligible for the permit must be a shareholder, or immediate family member of a shareholder, designated by the corporation.

(4) Any person who is issued a general landowner buck deer permit under this rule is subject to all season dates, weapon restrictions and any other regulations as provided in the guidebook of the Wildlife Board for taking big game.

(5) The fee for a general landowner buck deer permit is the same as the fee for a general season, general archery or general muzzleloader buck deer permit.

(6) Nothing in this rule shall be construed to allow any person to obtain more than one general buck deer permit from any source or take more than one buck deer during any one year.

(7) Permits will be issued beginning in June, in the order that applications are received, and permits will continue to be issued until all permits for each region have been issued.

(8) To receive a general landowner buck deer permit, the eligible person must possess or obtain a Utah hunting or combination license.

R657-43-8. Limited Entry Permits and Season Dates.

(1) Only bull elk, buck deer or buck pronghorn limited entry permits may be applied for by the landowner association.

(2)(a) The division and landowner chairperson shall jointly recommend the number of permits to be issued to the landowner association.

(b) When consensus between the landowner chairperson and the division is not reached, applications shall include justification for permit numbers for review by the Wildlife Regional Advisory Councils and the Wildlife Board.

(3) Permit numbers shall fall within the herd unit management guidelines. Permit numbers will be based on:

(a) the percent of private land big game habitat within the unit that is used by wildlife; or

(b) the percentage of use by wildlife on the private lands.

(4) Landowners receiving vouchers may personally use the vouchers or reassign the vouchers to any legal hunter.

(5) All landowners who receive vouchers, and transfer the vouchers to other hunters must:

(a) allow those hunters receiving the vouchers access to their private lands for hunting; and

(b) allow the same number of public hunters with valid permits, equal to the number of vouchers transferred, to access the landowner association's private land for hunting during the appropriate limited entry bull elk, buck deer or buck pronghorn hunting season, except as provided in Subsection (6).

(6)(a) Landowners who transfer vouchers to other hunters may deny public hunters access to the landowner association's private land for hunting by requesting, through the landowner association, a variance to Subsection (5)(b) from the Wildlife Board.

(b) The requested variance must be provided by the landowner association in writing to the division 30 days prior to the appropriate Regional Advisory Council meeting scheduled to review Rule R657-5 and the guidebook of the Wildlife Board for taking big game.

(c) The variance request must be presented by the landowner association to the appropriate local Regional Wildlife Advisory Council. The local Regional Wildlife Advisory Council shall forward a recommendation to the Wildlife Board for consideration and action.

(7)(a) Any person who is issued a limited entry landowner permit must follow the season dates, weapon restrictions and any other regulations governing the taking of big game as specified in Rule R657-5 and the guidebook of the Wildlife Board for taking big game.

(b) to receive a limited entry landowner permit, the person designated on the voucher must possess or obtain a Utah hunting or combination license.

(8) A limited entry landowner permit authorizes the permittee to hunt within the limited entry unit where the eligible property is located.

(9) Nothing in this rule shall be construed to allow any person, including a landowner, to take more than one buck deer,

one bull elk or one buck pronghorn during any one year.

R657-43-9. Limited Entry Permit Allocation and Fees.

(1) Upon approval of the Wildlife Board, the division shall issue vouchers to landowner associations that may be used to purchase limited entry permits from division offices.

(2) The fee for any limited entry landowner permit is the same as the cost of similar limited entry buck deer, bull elk or buck pronghorn limited entry permits.

R657-43-10. Limited Entry Permit Conflict Resolution.

(1)(a) If landowners representing a simple majority of the private land within a landowner association are not able to resolve any dispute or conflict arising from the distribution of permits or other disagreement within its discretion and arising from the operation of the landowner association, the permits allocated to the landowner association shall be made available to the general public by the division.

(b) Landowner associations may be eligible to receive landowner permits in subsequent years if the landowner association resolves the conflict or dispute by a simple majority of the landowners.

(2) The division shall not issue landowner permits to a landowner association that has not complied with the provisions of this rule.

KEY: wildlife, landowner permits, big game seasons
January 10, 2012 23-14-18
Notice of Continuation March 13, 2007 23-14-19

R657. Natural Resources, Wildlife Resources.
R657-58. Fishing Contests and Clinics.
R657-58-1. Purpose and Authority.

(1) Under authority of Sections 23-14-18 and 23-14-19 of the Utah Code, the Wildlife Board has established this rule to provide the standards and procedures for fishing contests and events including:

a) Type I fishing contests;
b) Type II fishing contests;
c) tagged fish contests; and
d) fishing clinics.

(2) Any violation of, or failure to comply with, any provision of this rule or any specific requirements in a Certificate of Registration issued pursuant to this rule may be grounds for revocation or suspension of the Certificate of Registration, as determined by the division.

R657-58-2. Definitions.

(1) Terms used in this rule are defined in Sections 23-13-2 and R657-13-2.

(2) In addition:

(a) "Certificate of Registration (COR)" means a license or permit issued by the division that authorizes a contest organizer to conduct a contest and spells out any special provisions and conditions that must be followed.

(b) "cold water fish species" means: mountain whitefish, Bonneville whitefish, Bear Lake whitefish, Bonneville cisco, Bear Lake cutthroat, Bonneville cutthroat, Colorado River cutthroat, Yellowstone cutthroat, rainbow trout, lake trout, brook trout, arctic grayling, brown trout, and kokanee salmon.

(c) "cull" or "high-grade" means to release alive and in good condition, a fish that has been held as part of a possession limit for the purpose of including larger fish in the possession limit.

(d) "fishing clinic" means an organized gathering of anglers for non-competitive, educational purposes that does not offer cash, awards or prizes for their individual or team catches.

(e) "live weigh" or "live weigh-in" means that fish are held in possession by contest participants and transported live to a specified location to be weighed.

(f) "possession" means active or constructive possession.

(g) "tagged fish contest" means any fishing contest where prizes are awarded for the capture of fish previously tagged or marked specifically for that contest.

(h) "Type I fishing contest" means a competitive event for warm or cold water fish species, other than a tagged fish contest, that meets any of the following criteria:

i) involves 50 or more participants or 25 or more boats;

ii) includes cash and/or prizes awarded individually or cumulatively per year at $2,000 or more for a contest or a series of contests; or

iii) utilizes a live weigh-in.

(i) "Type II fishing contest" means a competitive event for warm or cold water fish species, other than a tagged fish contest, that meets all of the following criteria:

(a) involves fewer than 50 contestants or fewer than 25 boats;

(b) includes cash and/or prizes awarded individually or cumulatively per year at less than $2,000 for a contest or a series of contests; and

(c) does not utilize a live weigh-in.

(j) "warmwater fish species" means: walleye, yellow perch, striped bass, largemouth bass, white bass, smallmouth bass, bullhead, channel catfish, black crappie, northern pike, green sunfish, wipers, bluegill, tiger muskellunge, common carp, and burbot.

R657-58-3. Certificate of Registration (COR) and General.

(1) Regardless of the size or type of contest, all boat operators must complete the Mussel Aware Boater Program online training provided at https://dwrapps.utah.gov/wex/dbconnection.jsp?examnbr=504688, and display the completed "decontamination certification form" on the dashboard of the boat transport vehicle for the duration of the fishing contest.

(2) Regardless of the size or type of contest, the contest sponsor shall verify and confirm that all boat operators participating in the fishing contest possess a completed Mussel Aware Boater Program "decontamination certification form".

(3) A COR is required for all Type I fishing contests and all tagged fish contests. The requirements are listed in sections R657-58-4 through R657-58-6.

(4) A COR is not required for Type II fishing contests and fishing clinics.

(5) A COR is valid for only one fishing tournament/tagged fish contest on one water.

(6) The division may request public comment before issuing a COR if, in the opinion of the division, the proposed contest has potential impacts to the public or could substantially impact a public fishery.

(7)(a) A COR may be denied for:

(i) failure to comply with the fishing proclamation and rule;

(ii) potential for resource damage;

(iii) location;

(iv) occurrence on a legal holiday or Free Fishing Day;

(v) public safety issues;

(vi) conflicts with the public;

(vii) failure to adequately protect state waters from invasive species;

(viii) problems with the applicants prior performance record; and

(ix) failure to comply with other state laws, including those applying to raffles and lotteries in Utah.

(b) The reason for denial will be identified and reported to the applicant in a timely manner. The division may impose conditions on the issuance of the Certification of Registration in order to achieve a management objective or adequately protect a fishery. Any conditions will be listed on the COR.

(8) All COR applications submitted for Type I fishing contests must include a written protocol for participants to disinfect boats and equipment to prevent the spread of aquatic nuisance species. The protocol must be consistent with division policy and rule.

(9)(a) COR applications are available at all division offices and online at the division's website.

(b) Applications must be received by the division at least 45 days prior to the contest. In some cases a public comment process may alter the 45-day COR review period.

(c) Variances to the COR review period may only be granted by the director.

(10) A COR application must include:

(a) a copy of proposed rules for the contest, and

(b) a complete schedule of entry fees, cash awards and prize values.

(11) Anyone conducting a Type I fishing contest or tagged fish contest must complete a post-contest report and that report must be received by the division within 30 days after the event is completed.

(12) Anyone conducting a Type I fishing contest or tagged fish contest who fails to obtain a COR or to follow the rules set by the division may be prohibited from conducting any fishing contests, and may be subject to other penalties.

R657-58-4. Requirements for Type I Fishing Contests for Warm Water Fish Species.

(1) A COR from the Division of Wildlife Resources is required for any Type I fishing contest for any warm water fish

species.

(2) All participants' boats must be readily identifiable as such at a distance of 100 yards.

(3) Contestants may not possess fish species, numbers of fish, or sizes of fish that are in violation of the proclamation approved by the Utah Wildlife Board.

R657-58-5. Requirements for Type I Fishing Contests for Cold Water Fish Species.

(1) A COR from the division is required for all Type I fishing contests for cold water fish species.

(2) Type I fishing contests for cold water fish may not:

(a) involve more than 200 participants.

(b) offer more than $2,000 in total prizes.

(c) utilize live weigh-ins.

(3) Type I fishing contests for cold water fish species are prohibited on waters where the Wildlife Board has imposed more restrictive special harvest rules for targeted cold water fish species including tackle restrictions, size restrictions, and other exceptions to the general fishing regulations, except at Scofield Reservoir where Type 1 fishing contests are allowed for rainbow trout only.

(4) There is no limit to the number of participants or total prizes at Flaming Gorge and Echo Reservoirs.

(5) Type I fishing contests for cold water fish species may not be held

(a) on Free Fishing Day except at Echo Reservoir.

(6) Fish taken in Type I cold water fishing contests may not be culled.

R657-58-6. Requirements for Tagged Fish Contests.

(1) A COR from the Division of Wildlife Resources is required to conduct any tagged fish contest, regardless of number of contestants or value of prizes or awards.

(2) If more than one application is received for a water in a year then a drawing will be held to select the applicant to receive the COR.

(3) Only one tagged fish contest per year may be held on any water.

(4) Tagged fish contests must have the start date and end date identified on the COR Application.

(5) Tagging of fish for tagged fish contests must be conducted only by division personnel, or by designated representatives working under the direct supervision of the division.

(6) Without prior authorization from the division, it is prohibited to:

(a) tag, fin-clip or mark fish in any way, or

(b) introduce tagged, fin-clipped or marked fish into a water.

(7) The organizer of a tagged fish contest will assume all responsibility for the contest and the purchase of tags and tagging equipment.

KEY: fish, fishing, wildlife, wildlife law
January 10, 2012 23-14-18
23-14-19
23-19-1
23-22-3

R657. Natural Resources, Wildlife Resources.
R657-59. Private Fish Ponds.
R657-59-1. Purpose and Authority.

(1) Under the authority of Sections 23-15-9 and 23-15-10 of the Utah Code, this rule provides the standards and procedures for private fish ponds.

(2) This rule does not regulate fee fishing or private aquaculture as provided in Title 4, Chapter 37 of the Utah Code, and Department of Agriculture Rule R58-17.

(3) Any violation of, or failure to comply with, any provision of Title 23 of the Utah Code, this rule, or any specific requirement contained in a certificate of registration or exemption certificate issued pursuant to this rule may be grounds for suspension of the certificate or denial of future certificates, as determined by the division

R657-59-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2.

(2) In addition:

(a) "Aquaculture" means the husbandry, production, harvest, and use of aquatic organisms under controlled, artificial conditions.

(b) "Aquaculture facility" means any facility used for propagating, rearing, or producing aquatic wildlife or aquaculture products. Facilities that are separated by more than 1/2 mile, or facilities that drain to, or are modified to drain to, different drainages are considered to be separate aquaculture facilities, regardless of ownership.

(c)(i) "Aquaculture product" means privately purchased aquatic wildlife, or their eggs or gametes.

(ii) "Aquaculture product" does not include aquatic wildlife obtained from the wild.

(d) "Certified sterile salmonid" means any salmonid fish or gamete that originates from a health certified source and is incapable of reproduction due to triploidy or hybridization.

(i) Triploid salmonids accepted as sterile under this subsection shall originate from a source that is certified as incapable of reproduction using the following protocols:

(A) fish samples shall be collected, prepared, and submitted to a certified laboratory by an independent veterinarian, certified fish health professional, or other professional approved by the division;

(B) certified laboratories shall be limited to independent, professional laboratories capable of reliably testing fish sterility and approved by the division; and

(C) sterility shall be determined by sampling and testing 60 fish from each egg lot with procedures generally accepted in the scientific community as reliable for verifying tripoidy with a 95% or greater success rate.

(ii) An aquaculture facility that receives certified sterile salmonid aquaculture product is not required to conduct additional sterility testing prior to stocking the aquaculture product in a private fish pond, provided the sterile salmonids are kept segregated from other fertile salmonids.

(iii) Hybrid salmonid fish species accepted as sterile under this subsection are limited to splake trout (lake trout/brook trout cross) and tiger trout (brown trout/brook trout cross).

(e) "Exemption certificate" means a document issued by the division pursuant to R657-59-7 that exempts a designated private fish pond from the requirement of obtaining a certificate of registration to stock aquaculture product in the pond.

(f)(i) "HUC" or "Hyrologic Unit Code" means a cataloging system developed by the US Geological Survey and the Natural Resource Conservation Service to identify watersheds in the United States. HUCs are typically reported at the large river basin (6-digit HUC) or smaller watershed (11-digit and 14-digit HUC) scale.

(ii) HUC maps and other associated information are available at http://water.usgs.gov/wsc/sub/1602.html.

(g) "Ornamental fish" means fish that are raised or held for their beauty rather than use, or that arouse interest for their uncommon or exotic characteristics, including tropical fish, goldfish, and koi, but not including those species listed as prohibited or controlled in Rule R657-3-23.

(h) "Private fish pond" means a pond, reservoir, or other body of water, or any fish culture system which is contained on privately owned land and used for holding or rearing fish for a private, noncommercial purpose.

(i) "Purchase" means to buy, or otherwise acquire or obtain through barter, exchange, or trade for pecuniary consideration or advantage.

(j) "Salmonid" means any fish belonging to the trout/salmon family.

R657-59-3. Certificate of Registration Not Required.

(1) A certificate of registration is not required to receive and stock an aquaculture product in a private fish pond, provided the following conditions are satisfied:

(a) the pond is not located on a natural lake, natural flowing stream, or reservoir constructed on a natural stream channel;

(b) the pond is properly screened consistent with the requirements in R657-59-15 to prevent the movement of aquatic wildlife into the pond or the movement of any aquaculture product out of the pond;

(c) the aquaculture product is delivered to the pond by a licensed aquaculture facility as defined in Section 4-37-103;

(d) the owner, lessee, or operator of the pond obtains from the aquaculture facility delivering the aquaculture product a valid health approval number issued by the Utah Department of Agriculture and Food pursuant to Section 4-37-501 authorizing the aquaculture facility to culture and transport the species of aquaculture product received at the pond;

(e) the species, strain, and reproductive capability of the aquaculture product received is authorized for stocking in the area where the pond is located consistent with the requirements in R657-59-16;

(f) the aquaculture product received is of sufficient size to be incapable of escaping the pond through or around the screen;

(g) the owner or operator of the private fish pond provides the aquaculture facility a signed written statement that the pond and aquaculture product received are in compliance with this section; and

(h) the owner, lessee, or operator of a private fish pond or an invitee has not previously been found in violation of any provision of Title 4, Chapter 37 or Title 23 of the Utah Code, or this rule.

R657-59-4. Aquaculture Facility Reporting Requirements.

(1) A person who owns or operates an aquaculture facility shall file an annual report with the division documenting each sale or transfer of live aquaculture product made pursuant to R657-59-3 and R657-59-7 to a private fish pond owner, lessee, or operator.

(2) The report shall contain:

(a) the name, address, and Utah health approval number of the person;

(b) the name, address, and phone number of the private fish pond's owner, lessee, or operator;

(c) the number and weight of aquaculture product by:

(i) species;

(ii) strain; and

(iii) reproductive capability;

(d) date of sale or transfer;

(e) description of the private fish pond location, including UTM coordinates; and

(f) written verification for each live sale or transfer that the private fish pond was inspected and is in compliance with the

requirements of Sections 23-15-10(2) and (3) (c) and this rule.

(3) The report required in this Subsection shall be submitted to and received by the division no later than December 31.

R657-59-5. Certificate of Registration Required.

(1) A certificate of registration must be obtained from the division to receive, stock, or possess an aquaculture product in a private fish pond where:

(a) the aquaculture product is classified under R657-59-16 as an unauthorized species, strain, or reproductive capability for the area where the pond is located;

(b) the aquaculture facility does not deliver the aquaculture product directly to the private fish pond; or

(c) the owner, lessee, or operator of a private fish pond or an invitee is found in violation of any provision of Title 4, Chapter 37 or Title 23 of the Utah Code, or this rule.

(2) A separate certificate of registration is required for each private fish pond as defined under "aquaculture facility" in R657-59-2.

R657-59-6. Application for a Certificate of Registration.

(1) A person may apply to receive a certificate of registration for a private fish pond by submitting an application with the required handling and inspection fee to the Wildlife Registration Office, Utah Division of Wildlife Resources, 1594 West North Temple, Salt Lake City, Utah 84114.

(a) Application forms are available at all division offices and at the division's internet address.

(2) A certificate of registration may be issued after a division representative inspects the private fish pond and confirms that the pond and the aquaculture products requested for stocking in the pond meet all requirements in this rule and Title 23 of the Utah Code.

(3) The application may require up to 30 days for processing.

(4) The division may deny a private fish pond application where:

(a) the application is incomplete, filled out incorrectly, or submitted without the appropriate fee;

(b) the pond is located on a natural lake, natural flowing stream, or a reservoir constructed on a natural stream channel;

(c) the pond is not screened consistent with the requirements in R657-59-15;

(d) the source of the aquaculture product is not an authorized aquaculture facility with a health approval number issued pursuant to Section 4-37-501;

(e) the applicant or its agents or invitees have previously violated of any provision of Title 4, Chapter 37 of the Utah Code, Title 23 of the Utah Code, or this rule;

(f) receiving or stocking the aquaculture product in the pond may:

(i) violate any federal, state or local law or any agreement between the state and another party;

(ii) negatively impact native wildlife species listed by the division as sensitive or by the federal government as threatened or endangered;

(iii) pose an identifiable adverse threat to other wildlife species or their habitat; or

(iv) pose an identifiable adverse impact to the division's game fish stocking regimes or wildlife management objectives;

(g) the aquaculture product received is sufficiently small to be capable of escaping the pond through or around the screen; or

(h) non-salmonid aquaculture product will be stocked in a pond within the 100 year flood plain (below 6500 feet in elevation) in the Green River and Colorado River drainages and the pond does not meet FEMA standards on construction and screening.

(5) An application for private fish pond certificate of registration may not be denied without the review and consent of the division director or a designee.

(6) A private fish pond certificate of registration shall remain effective for 5 years from the date of issuance, unless:

(a) amended by the division at the request of private fish pond owner, lessee, or operator;

(b) terminated or modified by the division pursuant to R657-59-17; or

(c) suspended by the division or a court pursuant to Section 23-19-9.

(7) Certificates of registration are renewable on or before the expiration date identified on the certificate of registration and upon payment of the prescribed handling, and inspection fees.

R657-59-7. Exemption Certificate.

(1) Upon application for a private fish pond certificate of registration and a risk assessment of the pond by the division under R657-59-6, the Division may issue an exemption certificate in lieu of a certificate of registration where the following conditions exist:

(a) The pond is eligible to receive a certificate of registration under the requirements of this chapter;

(b) The pond and species, strain and reproductive capability of aquaculture product requested present no risk to native aquatic wildlife species because:

(i) the location and configuration of the pond physically eliminate the possibility of aquaculture product escaping into the surface waters of the state;

(ii) the pond has no inflow or outflow connection with the surface waters of the state;

(iii) the pond is located in an area where escapement of aquaculture product will cause no ecological damage to native aquatic wildlife species; or

(iv) the pond is located in an area where no Tier I or II aquatic wildlife species on the division's sensitive species list or threatened or endangered species listed under the Endangered Species Act will be threatened by the risk of escapement; and

(c) the aquaculture product is delivered directly to the pond by the aquaculture facility.

(2) The exemption certificate shall have the legal effect of a certificate of registration for purposes of stocking the pond with the species, strain and reproductive capability of aquaculture product authorized in the exemption certificate.

(3) Aquaculture facilities supplying aquaculture product to private fish ponds operating under an exemption certificate shall comply with:

(a) the written terms of the exemption certificate; and

(b) the inspection and reporting requirements in R657-59-4.

(4) The exemption certificate will:

(a) designate the species, strain and reproductive capability of aquaculture product that may be stocked in the pond;

(b) identify any restrictions or conditions relative to stocking and maintaining aquaculture product in the pond;

(c) identify the owner, lessee, or operator of the private fish pond; and

(d) describe the private fish pond's location, including UTM coordinates.

(5) The private fish pond exemption certificate shall remain effective, without the requirement of renewal, for the useful life of the pond, provided:

(a) the ownership of the pond does not change;

(b) the pond, screen, and inflow and outflow structures remain in the same state that existed when inspected;

(c) the species, strain, and reproductive capability of aquaculture product stocked and maintained in the pond remains

consistent with the that authorized in the exemption certificate; and

(d) the exemption certificate is not modified, terminated, or suspended by the division pursuant to Section 23-19-9, R657-59-1(3), or R657-59-17 or a court of competent jurisdiction.

(6) Any private fish pond operating under authority of an exemption certificate which is modified, terminated, or suspended pursuant to Section 23-19-9, R657-59-1(3), or R657-59-17 shall be subject to the aquaculture product depopulation requirements in R657-59-8.

R657-59-8. Failure to Renew Certificates of Registration.

(1) If an owner, lessee, or operator of a private fish pond fails to renew the certificate of registration upon expiration, or the division suspends or terminates the certificate of registration, all live aquaculture products permitted under the certificate of registration shall be disposed of as follows:

(a) Unless the Wildlife Board orders otherwise, all aquaculture products must be removed within 30 days of suspension or the expiration date of the certificate of registration, or within 30 days after ice-free conditions on the water; or

(b) At the discretion of the division, aquaculture products may remain in the waters at the facility, but shall only be taken as prescribed within Rule R657-13 for Taking Fish and Crayfish.

(2) Aquaculture products in a private fish pond may not be moved alive unless the pond has received disease testing and is issued a health approval number from the Department of Agriculture and Food pursuant to Section 4-37-501.

(3) Aquaculture products from a private fish pond infected with any pathogen specified in the Department of Agriculture Rule R58-17 must be disposed of as directed by the division to prevent further spread of such pathogen.

R657-59-9. Reporting Requirements for Private Fish Ponds Authorized by Certificate of Registration.

(1) Any person that possesses a certificate of registration for a private fish pond must submit to the division an annual report of all live aquaculture products purchased or acquired during the year. This report must contain the following information:

(a) the name, address, and phone number of the private fish pond's owner, lessee, or operator;

(b) name, address, and certificate of registration number of the seller or supplier;

(c) the number and weight of aquaculture product by:

(i) species;

(ii) strain; and

(iii) reproductive capability;

(d) date of sale or transfer;

(2) A form for this information is provided by the division.

(3) The annual report must be received by the division no later than January 30.

R657-59-10. Importation.

(1)(a) The species, strains, and reproductive capabilities of live aquaculture products that may be imported and stocked in a private fish pond without a certificate of registration are provided in R657-59-16;

(b) A certificate of registration or exemption certificate is required to import and stock all species, strains and reproductive capabilities of live aquaculture products not specifically exempted from licensure in R657-59-16.

(2) Applications to import aquaculture products are available from all division offices and must be submitted to the division's Wildlife Registration Office in Salt Lake City. Applications may require up to 30 days for action.

R657-59-11. Acquiring and Transferring Aquaculture Products.

(1) Live aquaculture products, other than ornamental fish, may be:

(a) purchased or acquired only from sources that have a valid certificate of registration from the Utah Department of Agriculture and Food to sell such products or from a person located outside Utah if that person is approved by the Utah Department of Agriculture and Food to import the particular aquaculture product; and

(b) acquired, purchased or transferred only from sources which have been health approved by the Utah Department of Agriculture and Food and assigned a fish health approval number as provided in Section 4-37-501. This also applies to separate facilities owned by the same entity since each facility is treated separately, regardless of ownership.

(2)(a) Any person who has been issued a valid certificate of registration may transport live aquaculture products as specified on the certificate of registration to the private fish pond.

(b) All transfers or shipments of live aquaculture products must be accompanied by documentation of the source and destination of the product, including:

(i) name, address, certificate of registration number, and fish health approval number of the source;

(ii) number and weight being shipped, by species; and

(iii) name, address, and certificate of registration number, if applicable, of the destination.

R657-59-12. Inspection of Records and Facilities.

(1) The following records and information must be maintained for a period of two years and must be available for inspection by a division representative during reasonable hours:

(a) records of purchase and acquisition of aquaculture products, including records maintained in connection with the reporting requirements in R657-59-9;

(b) certificates of registration; and

(c) valid identification of stocks.

(2) The division and its authorized representatives may inspect a private fish pond at any time to verify compliance with the requirements of Title 23 of the Utah Code and this rule, and to conduct pathological testing.

R657-59-13. Prohibited Activities.

(1) A private fish pond may not be developed on a natural lake; natural flowing stream; or reservoir constructed on a natural stream channel.

(2) Live aquatic wildlife may not be collected from the wild and placed in a private fish pond.

(3) Any aquaculture product received or held in a private fish pond may not be released from the pond or transported live to another location.

(4) A private fish pond owner, lessee, or operator may not sell, donate, or transfer from the pond live aquaculture product, including gametes and eggs.

R657-59-14. Fishing License and Transportation of Dead Aquaculture Product.

(1) A fishing license is not required to take fish from a legally recognized private fish pond.

(2) A fishing license is not required to transport dead aquaculture product from a private fish pond, provided the person possesses a receipt with the following information:

(a) species and number of fish;

(b) date caught;

(c) certificate of registration number or exemption certificate number of the private fish pond, where applicable; and

(d) name, address, and telephone number of the owner,

lessee, or operator of the private fish pond.

(3) Any person that has a valid fishing license may transport up to a legal limit of dead aquaculture product from a private fish pond without further documentation.

R657-59-15. Screen Requirements.

(1) All inlets and outlets of a private fish pond must be screened as follows to prevent the movement of aquatic wildlife into the pond or the escapement of any aquaculture product from the pond:

(a) the screen shall be constructed of durable materials that are capable of maintaining integrity in a water and air environment for an extended period of time;

(b) the screen shall have no openings, seams or mesh width greater than the width of the fish being stocked;

(c) screen construction and placement shall eliminate any movement of aquaculture product into or out of the pond;

(d) screen dimensions shall be based on precluding escapement of the size of the fish being stocked;

(e) all water entering or leaving the pond, including run off and other high water events, shall flow through a screen consistent with the requirements of this subsection; and

(f) the screen shall be maintained and in place at all times while any aquaculture product remains in the pond.

(2) Ponds with no inlet or outlet to the surface waters of the state are not required to have a screen or device to restrict movement of aquaculture product.

R657-59-16. Species, Strains, and Reproductive Capabilities of Aquaculture Product Authorized by Area for Stocking in Private Fish Ponds Without a Certificate of Registration or Exemption Certificate.

(1) A certificate of registration or exemption certificate must be obtained from the division pursuant to R657-59-6 and R657-59-7 prior to stocking in any private fish pond:

(a) non-salmonid aquaculture product; or

(b) any other species or reproductive capability of aquaculture product not specifically authorized in this Section.

(2)(a) The following subsections designate areas closed to stocking aquaculture product in private fish ponds using a general area identifier such canyon, creek, spring, or location and then followed by a specific area identifier in the form of hydrologic unit code (HUC) or township and range.

(b) The general area identifier is included for purposes of reference only and may include all or part of the associated drainage.

(c) The HUC or township and range designations constitute the legal descriptions of the actual closed areas.

(3) Certified sterile salmonid aquaculture product may be stocked without a certificate of registration or exemption certificate in any private fish pond within the state consistent with R657-59-3, except for ponds located within the following areas:

(a) Washington County - stocking is prohibited in the following areas:

(i) Ash Creek - HUC 150100080405;
(ii) Beaver Dam Wash - HUC 15010010;
(iii) Laverkin Creek - HUC 150100080302;
(iv) Leeds Creek - HUC 150100080906;
(v) Baker Dam Reservoir/Santa Clara River - HUC 150100080704;
(vi) Tobin Wash - HUC 150100080802;
(vii) Sand Cove Wash - HUC 150100080801;
(viii) Manganese Wash/Santa Clara River - HUC 150100080804;
(ix) Wittwer Canyon/Santa Clara River - HUC 150100080808;
(x) Cove Wash/Santa Clara River - HUC 150100080809;
(xi) Moody Wash - HUC 150100080603;
(xii) Upper Moody Wash - HUC 150100080602;
(xiii) Magotsu Creek - HUC 150100080704;
(xiv) South Ash Creek - HUC 150100080405);
(xv) Water Canyon - HUC 150100080701);
(xvi) Chinatown Wash/Virgin River - HUC 150100080508;
(xvii) Lower Gould Wash - HUC 150100080508;
(xviii) Grapevine Wash/Virgin River - HUC 150100080903;
(xix) Cottonwood Wash/Virgin River - HUC 150100080909;
(xx) Middleton Wash/Virgin River - HUC 150100080910;
(xxi) Lower Fort Pierce Wash - HUC 150100080605;
(xxii) Atkinville Wash - HUC 150100080303;
(xxiii) Lizard Wash - HUC 150100080302;
(xxiv) Val Wash/Virgin River - HUC 150100080307;
(xxv) Bulldog Canyon - HUC 150100080310; and
(xxvi) Fort Pierce Wash - HUC 15010009.

() Fertile rainbow trout may be stocked without a certificate of registration or exemption certificate in any private fish pond within the state consistent with R657-59-3, except for ponds located within the following areas and elevations:

Beaver County - stocking is prohibited in the following:

(i) North Creek - HUCs 160300070203, 160300070208; and
(ii) Pine Creek (near Sulphurdale) - HUC 160300070501.

(b) Box Elder County - stocking is prohibited in the following:

(i) Morison Creek - HUC 16020308;
(ii) Bettridge Creek - HUC 16020308;
(iii) Death Creek - HUC 16020308;
(iv) Camp Creek - HUC 16020308;
(v) Goose Creek - HUC 17040211;
(vi) Raft River - HUC 17040210;
(vii) Fat Whorled Pond Snail Springs - Township 10 North, Ranges 4 and 5 West; and
(viii) Mantua Reservoir - HUC 16010204.

(c) Cache County - stocking is prohibited in the following:

(i) Logan River - HUC 16010203;
(ii) Blacksmith Fork - HUC 16010203;
(iii) East Fork Little Bear River - HUC 16010203; and
(iv) Little Bear River - HUC 16010203.

(d) Carbon County - stocking is prohibited in any private fish pond above 7000 feet in elevation.

(e) Daggett County - stocking is prohibited in any private fish pond above 7000 feet in elevation.

(f) Davis County - no areas closed to stocking fertile rainbow trout.

(g) Duchesne County - stocking is prohibited in any private fish pond above 7000 feet in elevation.

(h) Emery County - stocking is prohibited in any private fish pond above 7000 feet in elevation.

(i) Garfield County - stocking is prohibited in the following areas:

(i) Birch Creek/Main Canyon - HUC 140700050102;
(ii) Center Creek (tributary to East Fork Sevier R) HUC 160300020412;
(iii) Cottonwood Creek - HUC 160300020406;
(iv) East Fork of Boulder Creek/ West Fork Boulder Creek - HUC 140700050206; and
(v) Ranch Creek (East Fork Sevier River drainage) - HUC 160300020405.

(j) Grand County - stocking is prohibited in any private fish pond above 7000 feet in elevation.

(k) Iron County - no areas closed to stocking fertile rainbow trout.

(l) Juab County - stocking is prohibited in the following areas:

(i) Sulphur Wash - HUC 160203011303;

(ii) Middle Pleasant Valley Draw - HUC 160203011402;
(iii) Lower Pleasant Valley Draw - HUC 160203011403;
(iv) Cookscomb Ridge - HUC 160203011501;
(v) Outlet Salt Marsh Lake - HUC 160203011502;
(vi) Deep Creek Range - HUC 160203011503;
(vii) Snake Valley - HUC 160203011504;
(viii) Little Red Cedar Wash - HUC 160203011505;
(ix) Trout Creek - HUC 160203060101;
(x) Smelter Knolls - HUC 160203060104;
(xi) Toms Creek - HUC 160203060201;
(xii) Goshute Canyon - HUC 160203060202;
(xiii) Indian Farm Creek - HUC 160203060204;
(xiv) Spring Creek - HUC 160203060803;
(xv) Fifteenmile Creek - HUC 160203060804;
(xvi) East Creek/East Deep Creek - HUC 160203060805;
(xvii) East Creek/East Deep Creek - HUC 160203060806;
(xviii) West Deep Creek - HUC 160203060808;
(xix) Horse Valley - HUC 160203060304;
(xx) Starvation Canyon - HUC 160203060305;
(xxi) Cane Springs - HUC 160203060307;
(xxii) Fish Springs Range - HUC 160203060308;
(xxiii) Middle Fish Springs Wash - HUC 160203060309;
(xxiv) Lower Fish Springs Wash - HUC 160203060403;
(xxv) Fish Springs - HUC 160203060405;
(xxvi) Wilson Health Springs - HUC 160203060407;
(xxvii) Vernon Creek - HUC 160203040102;
(xxviii) Outlet Chicken Creek - HUC 160300050206;
(xxix) Little Valley/Sevier River - HUC 160300050403;
(xxx) Pole Creek/Salt Creek - HUC 160202010104; and
(xxxi) West Creek/Current Creek - HUC160202010107.
(m) Kane County - no areas closed to stocking fertile rainbow trout.
(n) Millard County - stocking is prohibited in the following areas:
(i) Outlet Salt Marsh Lake - HUC 160203011502;
(ii) Sulphur Wash - HUC160203011303;
(iii) Cockscomb Ridge - HUC 160203011501;
(iv) Tungstonia Wash - HUC 160203011302;
(v) Salt Marsh Lake - HUC 160203011304;
(vi) Indian George Wash - HUC 160203011301
(vii) Outlet Bishop Springs - HUC 160203011203;
(viii) Warm Creek - HUC 160203011204;
(ix) Headwaters Bishop Springs - HUC 160203011202;
(x) Indian Pass - HUC 160203011107;
(xi) Chevron Ridge - HUC 160203011110;
(xii) Petes Knoll - HUC 160203011109;
(xiii) Red Gulch - HUC 160203011102;
(xiv) Horse Canyon - HUC 160203011106;
(xv) Hampton Creek - HUC 160203011105;
(xvi) Knoll Springs - HUC 160203011103;
(xvii) Browns Wash - HUC 160203011101;
(xviii) Outlet Baker Creek - HUC 160203011004;
(xix) Outlet Old Mans Canyon - HUC 160203011003;
(xx) Hendrys Creek - HUC 160203011104;
(xxi) Headwaters Old Mans Canyon - HUC 160203011002;
(xxii) Rock Canyon - HUC 160203011001
(xxiii) Silver Creek - Baker Creek - HUC 160203010806;
(xxiv) Outlet Weaver Creek - HUC 160203010804;
(xxv) Conger Spring - HUC 160203010702; and
(xxvi) Sheepmens Little Valley - HUC 160203010607.
(o) Morgan County - stocking is prohibited in the following areas:
(i) Weber River - HUC 16020102;
(ii) East Canyon Creek - HUC 16020102; and
(iii) Lost Creek - HUC 16020101.
(p) Piute County - stocking is prohibited in the following areas:
(i) Birch Creek HUC 160300010603;
(ii) Clear Creek HUC 1603000301;
(iii) Manning Creek - HUC 160300030203;
(iv) Tenmile Creek HUC 160300030204.
(q) Rich County - stocking is prohibited in the following areas:
(i) Bear Lake including all its tributaries - HUC 16010201;
(ii) Big Creek - HUC 16010101;
(iii) Birch Creek from Birch Creek Reservoir upstream and tributaries HUC 16010101;
(iv) Little Creek from Little Creek Reservoir upstream and tributaries HUC 16010101;
(v) Otter Creek and its tributaries HUC 16010101;
(vi) Woodruff Creek - HUC 16010101; and
(vii) Home Canyon and Meachum Canyon (Deseret Ranch) - HUC 16010101.
(r) Salt Lake County - stocking is prohibited in the following areas:
(i) Big Cottonwood Canyon Creek - HUC 160202040201;
(ii) Little Cottonwood Canyon Creek - HUC 160202040202;
(iii) Mill Creek - HUC 160202040301;
(iv) Parleys Creek - HUC 160202040302;
(v) Emigration Creek - HUC 160202040303;
(vi) City Creek - HUC 160202040304; and
(vii) Red Butte Creek/Emigration Creek - HUC 160202040306.
(s) San Juan County - stocking is prohibited in any private fish pond above 7000 feet in elevation.
(t) Sanpete County:
(i) stocking is prohibited in the following areas west of the Manti Mountain Range divide:
(A) Dry Creek/San Pitch River - HUC 160300040201;
(B) Oak Creek/San Pitch River - HUC 160300040202;
(C) Cottonwood Canyon/San Pitch River - HUC 160300040203;
(D) Birch Creek/San Pitch River - HUC 160300040204;
(E) Pleasant Creek - HUC 160300040205;
(F) Dublin Wash/San Pitch River - HUC 160300040206;
(G) Cedar Creek - HUC 160300040207;
(H) Spring Hollow/San Pitch River - HUC 160300040208;
(I) Upper Oak Creek - HUC 160300040302;
(J) Petes Canyon/San Pitch River - HUC 160300040306;
(K) Uinta Gulch - HUC 160202020201;
(L) Upper Thistle Creek - HUC 160202020202;
(M) Nebo Creek - HUC 160202020203;
(N) Middle Thistle Creek - HUC 160202020204;
(O) Dry Canyon/San Pitch River - HUC 160300040308;
(P) Maple Canyon/San Pitch River - HUC 160300040309;
(Q) Gunnison Reservoir/San Pitch River - HUC 160300040503;
(R) Outlet San Pitch River - HUC 160300040505;
(S) Beaver Creek - HUC 140700020201;
(T) Box Canyon/Muddy Creek - HUC 140700020203;
(U) Skumpah Creek-Salina Creek - HUC 160300030402; and
(V) Headwaters Twelvemile Creek - HUC 160300040402.
(ii) stocking is prohibited in any private fish pond above 7000 feet in elevation east of the Manti Mountain Range divided.
(u) Sevier County - stocking is prohibited in the following areas:
(i) Clear Creek HUC 1603000301;
(ii) Salina Creek - HUC 160300030402; and
(iii) U M Creek - HUC 140700030101.
(v) Summit County - stocking is prohibited in the following areas:
(i) Bear River and all tributaries - HUC 16010101;
(ii) Mill Creek and all tributaries - HUC 16010101;

(iii) Muddy Creek and Van Tassel Creek - HUC 14040108;
(iv) Little West Fork/Blacks Fork - HUC 14040107;
(v) Black Fork - HUC 14040107;
(vi) Archie Creek - HUC 14040107;
(vii) West Fork Smiths Fork - HUC 14040107;
(viii) Gilbert Creek - HUC 14040107;
(ix) East Fork Smiths Fork - HUC 14040107;
(x) Dahalgreen Creek - HUC 14040106;
(xi) Henrys Fork - HUC 14040106;
(xii) Spring Creek and Poison Creek - HUC 14040106;
(xiii) West Fork Beaver Creek - HUC 14040106;
(xiv) Middle Fork Beaver Creek - HUC 14040106;
(xv) Echo Creek - HUC 16020101;
(xvi) Chalk Creek - HUC 16020101;
(xvii) Silver Creek - HUC 16020101;
(xviii) Weber River - HUC 16020101;
(xix) Beaver Creek - HUC 16020101;
(xx) Provo River - HUC 16020101;
(xxi) Kimball Creek - HUC 160201020101;
(xxii) Big Dutch Hollow/East Canyon Creek - HUC 160201020103;
(xxiii) Silver Creek - HUC 160201010403; and
(xxiv) Toll Canyon/East Canyon Creek - HUC 160201020102.
(w) Tooele County - stocking is prohibited in the following areas:
(i) Toms Creek - HUC 160203060201;
(ii) Goshute Canyon - HUC 160203060202;
(iii) Eightmile Wash - HUC 160203060203;
(iv) Indian Farm Creek - HUC 160203060204;
(v) Willow Spring Wash HUC 160203060205;
(vi) Willow Canyon - HUC 160203080104;
(vii) Bettridge Creek - HUC 160203080106;

(xxv) Bulldog Canyon - HUC 150100080310; and
(xxvi) Fort Pierce Wash - HUC 15010009.
(bb) Wayne County - no areas closed to stocking fertile rainbow trout.
(cc) Weber County - stocking is prohibited in the following areas:
(i) North Fork Ogden River - HUC 16020102;
(ii) Middle Fork Ogden River and Gertsen Creek - HUC 16020102; and
(iii) South Fork Ogden River and Gertsen Creek - HUC 16020102.

R657-59-17. Division Authority to Restrict Private Fish Ponds.

(1)(a) Stocking and maintaining aquaculture products in private fish ponds pursuant to this rule is a conditional privilege that is subject to unilateral modification or termination by the division or other competent legal authority.
(b) Those who establish and maintain private fish ponds under this rule do so with the understanding that the laws and regulations governing private fish ponds are subject to change and that such changes may require:
(i) discontinuation of stocking particular species, strains, or reproductive capabilities of aquaculture product in the pond;
(ii) partial or complete depopulation of the aquaculture product in the pond;
(iii) modifications in screen requirements and other structural elements associated with the pond; or
(iv) new restrictions and requirements in connection with operating the pond and maintaining the aquaculture product within it.
(2) The division may unilaterally restrict a private fish pond operating with or without a certificate of registration or exemption certificate from receiving or possessing particular species, strains and reproductive capabilities of aquaculture product previously authorized when stocking or continued possession of the product in the pond:
(a) violates any federal, state or local law or any agreement between the state and another party;
(b) negatively impacts native wildlife species listed by the division as sensitive or by the federal government as threatened or endangered;
(c) poses an identifiable adverse threat to other wildlife species or their habitat; or
(d) poses an identifiable adverse impact to the division's game fish stocking regimes or wildlife management objectives.
(3) Any costs or losses incurred as the result of future modifications to this rule or the operational status of a private fish pond made pursuant to this section, including terminations and depopulations, shall be borne exclusively by the owner, lessee or operator of the private fish pond.

R657. Natural Resources, Wildlife Resources.
R657-62. Drawing Application Procedures.
R657-62-1. Purpose and Authority.

(1) Under authority of Sections 23-14-18 and 23-14-19, the Wildlife Board has established this rule for drawing applications and procedures.

(2) Specific season dates, bag and possession limits, areas open, number of permits and other administrative details that may change annually are published in the respective guidebooks of the Wildlife Board.

R657-62-2. Definitions.

(1) Terms used in this rule are defined in Section 23-13-2.

(2) In addition:

(a) "Application" means a form required by the Division which must be completed by a person and submitted to the Division in order to apply for a hunting permit.

(b) "Landowner" means any individual, family or corporation who owns property in Utah and whose name appears on the deed as the owner of eligible property or whose name appears as the purchaser on an executed contract for sale of eligible property.

(c) "Limited entry hunt" means any hunt listed in the hunt tables published by the Wildlife Board and is identified as a premium limited entry hunt or limited entry hunt. "Limited entry hunt" does not include cougar pursuit or bear pursuit.

(d) "Limited entry permit" means any permit obtained for a limited entry hunt,

including conservation permits, convention permits and sportsman permits.

(e)(i) "Valid application" means an application:

(A) for a permit to take a species for which the applicant is eligible to possess;

(B) for a permit to take a species regardless of estimated permit numbers;

(C) for a certificate of registration; and

(D) containing sufficient information, as determined by the division, to process the application, including personal information, hunt information, and sufficient payment.

(ii) Applications missing any of the items in Subsection (i) may be considered valid if the application is timely corrected through the application correction process.

(f) "Waiting period" means a specified period of time that a person who has obtained a permit must wait before applying for the same permit type.

(g) "Once-in-a-lifetime hunt" means any hunt listed in the hunt tables published by the Wildlife Board and is identified as once-in-a-lifetime, and does not include general or limited entry hunts.

(h) "Once-in-a-lifetime permit" means any permit obtained for a once-in-a-lifetime hunt by any means, including conservation permits, sportsman permits, cooperative wildlife management unit permits and limited entry landowner permits.

R657-62-3. Scope of Rule.

(1) This rule sets forth the procedures and requirements for completing and filing applications to receive the following hunting permits and/or certificates of registrations:

(a) Dedicated Hunter certificate of registrations;
(b) limited-entry deer;
(c) limited-entry elk;
(d) limited-entry pronghorn;
(e) once-in-a-lifetime;
(f) public cooperative wildlife management unit;
(g) general season deer and youth elk;
(h) bear;
(i) bear pursuit;
(j) antlerless big game;
(k) sandhill crane;
(l) sharp-tail and sage grouse;
(m) swan
(n) cougar;
(o) sportsman; and
(p) turkey.

R657-62-4. Residency Restrictions.

(1) Only a resident may apply for or obtain a resident permit or resident certificate of registration and only a nonresident may apply for or obtain a nonresident permit or nonresident certificate of registration.

(2)(a) To apply for a resident permit or certificate of registration, a person must be a resident at the time of purchase.

(b) The posting date of the drawing shall be considered the purchase date of a permit or certificate of registration issued through a drawing.

R657-62-5. Hunting on Private Lands.

(1) Any person who applies for a hunt that occurs on private land is responsible for obtaining written permission from the landowner to access the property. The division does not guarantee access and cannot restore lost opportunity, bonus points, or permit fees when access is denied. Hunters should contact private landowners for permission to access their land prior to applying for a permit. The Division does not have the names of landowners where hunts occur.

R657-62-6. Applications.

(1)(a) Applications are available at the division's internet address, and must be completed and submitted online by the date prescribed in the respective guidebook of the Wildlife Board.

(b) The permit fees and handling fees must be paid with a valid debit or credit card.

(c) Any license, permit or certificate of registration issued to a person is invalid where full payment is not remitted to and received by the division.

(d) A person who applies for or obtains a permit or certificate of registration must notify the division of any change in mailing address, residency, telephone number, email address, and physical description.

R657-62-7. Group Applications.

(1) When applying as a group all applicants in the group with valid applications and who are eligible to possess the permit or certificate of registration applied for shall receive a permit or certificate of registration where the group is successful in the drawing.

(2) Group members must apply for the same hunt choices.

(3) When applying as a group, if the available permit or certificate of registration quota is not large enough to accommodate the group size, the group application will not be considered.

R657-62-8. Bonus Points.

(1) Bonus points are used to improve odds for drawing permits.

(2)(a) A bonus point is awarded for:

(i) each valid unsuccessful application when applying for limited-entry permits; or

(ii) each valid application when applying for bonus points.

(b) Bonus points are awarded by species for;

(i) limited-entry deer including cooperative wildlife management unit buck deer and management buck deer;

(ii) limited-entry elk including cooperative wildlife management unit bull elk and management bull elk;

(iii) limited-entry pronghorn including cooperative wildlife management unit buck pronghorn;

(iv) once-in-a-lifetime species including cooperative

wildlife management units;

(v) bear;

(vi) antlerless moose;

(vii) cougar; and

(viii) turkey

(3)(a) A person may not apply in the drawing for both a permit and a bonus point for the same species.

(b) A person may not apply for a bonus point if that person is ineligible to apply for a permit for the respective species.

(c) Group applications will not be accepted when applying for bonus points.

(d) A person may apply for bonus points only during the applicable drawing application for each species.

(4)(a) Fifty percent of the permits for each hunt unit will be reserved for applicants with the greatest number of bonus points.

(b) Based on the applicant's first choice, the reserved permits will be designated by a random drawing number to eligible applicants with the greatest number of bonus points for each species.

(c) If reserved permits remain, the reserved permits will be designated by a random number to eligible applicants with the next greatest number of bonus points for each species.

(d) The procedure in Subsection (c) will continue until all reserved permits are issued or no applications for that species remain.

(e) Any reserved permits remaining and any applicants who are not selected for reserved permits will be returned to the applicable drawing.

(5)(a) Each applicant receives a random drawing number for:

(i) each species applied for; and

(ii) each bonus point for that species.

(6) Bonus points are forfeited if a person obtains a permit through the drawing for that bonus point species including any permit obtained after the drawing.

(7) Bonus points are not forfeited if:

(a) a person is successful in obtaining a conservation permit, convention permit or sportsman permit;

(b) a person obtains a landowner or a cooperative wildlife management unit permit from a landowner; or

(c) a person obtains a poaching-reported reward permit.

(8) Bonus points are not transferable.

(9) Bonus points are averaged and rounded down when two or more applicants apply together on a group application.

(10)(a) Bonus points are tracked using social security numbers or division-issued customer identification numbers.

(b) The division shall retain electronic copies of applications from 1996 to the current drawings for the purpose of researching bonus point records.

(c) Any requests for researching an applicant's bonus point records must be submitted within the time frames provided in Subsection (b).

(d) Any bonus points on the division's records shall not be researched beyond the time frames provided in Subsection (b).

(e) The division may void or otherwise eliminate any bonus point obtained by fraud, deceit, misrepresentation, or in violation of law.

R657-62-9. Bonus Point Forfeiture.

(1) All bonus points accumulated for big game species shall be automatically forfeited upon failing to apply in three consecutive years for any big game permit or bonus point for which the applicant is eligible to receive.

(a) "Big game permit" means for purpose of this subsection any big game hunting permit that a bonus point may be awarded upon unsuccessful application or in lieu of a permit.

(b) Forfeiture may be imposed no sooner than March 1, 2012 after three consecutive years of failing to apply for a big game permit or bonus point.

R657-62-10. Preference Points.

(1) Preference points are used in the applicable drawings to ensure that applicants who are unsuccessful in the drawing will have first preference in the next year's drawing.

(2)(a) A preference point is awarded for:

(i) each valid, unsuccessful application of the first-choice hunt when applying for a general buck deer permit; or

(ii) each valid unsuccessful application when applying for an antlerless deer, antlerless elk, doe pronghorn, Sandhill Crane, Sharp-tailed grouse, sage grouse or Swan permit; or

(iii) each valid application when applying only for a preference point in the applicable drawings.

(b) Preference points are awarded by species for:

(i) general buck deer;

(ii) antlerless deer;

(iii) antlerless elk;

(iv) doe pronghorn;

(v) Sandhill Crane;

(vi) Sharp-tailed Grouse;

(vii) sage grouse; and

(viii) Swan.

(3)(a) A person may not apply in the drawing for both a preference point and a permit for the species listed in (2)(b).

(b) A person may not apply for a preference point if that person is ineligible to apply for a permit.

(c) Preference points shall not be used when obtaining remaining permits.

(4) Preference points are forfeited if:

(a) a person obtains a first-choice hunt general buck deer permit through the drawing;

(b) a person obtains an antlerless deer, antlerless elk, doe pronghorn, Sandhill Crane, Sharp-tailed grouse, sage grouse or Swan permit through the drawing;

(5) Preference points are not transferable.

(6) Preference points are averaged and rounded down when two or more applicants apply together on a group application.

(7)(a) Preference points are tracked using social security numbers or division-issued customer identification numbers.

(b) The division shall retain copies of electronic applications from 2000 to the current applicable drawings for the purpose of researching preference point records.

(c) Any requests for researching an applicant's preference point records must be submitted within the time frames provided in Subsection (b).

(d) Any preference points on the division's records shall not be researched beyond the time frames provided in Subsection (b).

(e) The division may eliminate any preference point obtained by fraud, deceit, misrepresentation, or in violation of law.

R657-62-11. Dedicated Hunter Preference Points.

(1) Preference points are used in the dedicated hunter certificate of registration drawing to ensure that applicants who are unsuccessful in the drawing will have first preference in the next year's drawing.

(2) A preference point is awarded for:

(a) each valid unsuccessful application;

(b) each valid application when applying only for a preference point in the dedicated hunter drawing.

(3)(a) A person may not apply in the drawing for both a preference point and a certificate of registration.

(b) A person may not apply for a preference point if that person is ineligible to apply for a certificate of registration.

(4) Preference points are forfeited if a person obtains a certificate of registration through the drawing.

(5)(a) Preference points are not transferable.

(b) Preference points shall only be applied to the Dedicated Hunter drawing.

(6) Preference points are averaged and rounded down to the nearest whole point when two or more applicants apply together on a group application.

(7)(a) Preference points are tracked using social security numbers or division-issued customer identification numbers.

(b) The division shall retain copies of electronic applications from 2011 to the current applicable drawing for the purpose of researching preference point records.

(c) Any requests for researching an applicant's preference point records must be requested within the time frames provided in Subsection (b).

(d) Any preference points on the division's records shall not be researched beyond the time frames provided in Subsection (b).

(e) The division may eliminate any preference points earned that are obtained by fraud, deceit or misrepresentation.

R657-62-12. Corrections, Withdrawals and Resubmitting Applications.

(1)(a) If an error is found on the application, the applicant may be contacted for correction.

(b) The division reserves the right to correct or reject applications.

(2)(a) An applicant may withdraw their application from the permit or certificate of registration drawing by the date published in the respective guidebook of the Wildlife Board.

(b) An applicant may resubmit their application, after withdrawing a previous application, for the permit or certificate of registration drawing by the date published in the respective guidebook of the Wildlife Board.

(c) Handling fees, hunting or combination license fees and donations will not be refunded. Resubmitted applications will incur a handling fee.

(3) To withdraw an entire group application, all applicants must withdraw their individual applications.

R657-62-13. Drawing Results.

Drawing results will be made available by the date prescribed in the respective guidebook of the Wildlife Board.

R657-62-14. License, Permit, Certificate of Registration and Handling Fees.

(1) Unsuccessful applicants will not be charged for a permit or certificate of registration.

(2) The handling fees and hunting or combination license fees are nonrefundable.

(3) All license, permit, certificate of registration and handling fees must be paid with a valid debit or credit card.

R657-62-15. Permits Remaining After the Drawing.

(1) Any permits remaining after the drawing are available on the date published in the respective guidebook of the Wildlife Board on a first-come, first-served basis from division offices, participating license agents and through the division's internet site.

R657-62-16. Waiting Periods for Permits Obtained After the Drawing.

(1) Waiting periods do not apply to the purchase of remaining permits sold over the counter except as provided in Section 2.

(2) Waiting periods are incurred as a result of purchasing remaining permits after the drawing. If a remaining permit is purchased in the current year, waiting periods will be in effect when applying in the drawing in following years.

R657-62-17. Dedicated Hunter Certificates of Registration.

(1)(a) Applicants for a dedicated hunter certificate of registration must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Rule R657-38.

(b) Each prospective participant must complete Dedicated Hunter program orientation course annually before submitting an application.

(2) Group applications are accepted. Up to four applicants may apply as a group.

R657-62-18. Lifetime License Permits.

(1) Lifetime License permits shall be issued pursuant to Rule R657-17.

R657-62-19. Big Game.

(1) Permit Applications

(a) Limited entry, Cooperative Wildlife Management Unit, Once-in-a-Lifetime, Management Bull Elk, Management Buck Deer, General Buck Deer, and Youth General Any Bull Elk permit applications.

(i) A person must possess or obtain a valid hunting or combination license to apply for or obtain a big game permit.

(ii) Applicants must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Rule R657-5.

(iii) A person may obtain only one permit per species of big game, including limited entry, cooperative wildlife management unit, once-in-a-lifetime, conservation, landowner and general permits, except antlerless permits as provided in the Antlerless Addendum and permits as provided in Rule R657-42.

(b) A resident may apply in the big game drawing for the following permits:

(i) only one of the following:

(A) buck deer - limited entry and cooperative wildlife management unit;

(B) bull elk - limited entry and cooperative wildlife management unit; or

(C) buck pronghorn - limited entry and cooperative wildlife management unit; and

(ii) only one once-in-a-lifetime permit, including once-in-a-lifetime cooperative wildlife management unit permits.

(c) A nonresident may apply in the big game drawing for the following permits:

(i) all of the following:

(A) buck deer -limited entry;

(B) bull elk - limited entry;

(C) buck pronghorn - limited entry; and

(D) all once-in-a-lifetime species.

(ii) Nonresidents may not apply for cooperative management units through the big game drawing.

(d) A resident or nonresident may apply in the big game drawing by unit for:

(i) a statewide general archery buck deer permit; or

(ii) for general any weapon buck deer; or

(iii) for general muzzleloader buck deer; or

(iv) a dedicated hunter certificate of registration.

(2) Youth

(a) For purposes of this section "youth" means any person 18 years of age or younger on the opening day of the general archery buck deer season.

(b) Youth applicants who apply for a general buck deer permit

(i) will automatically be considered in the youth drawing based upon their birth date.

(ii) 20% of general buck deer permits in each unit are reserved for youth hunters.

(iii) Up to four youth may apply together for youth general deer permits.

(iv) Preference points shall be used when applying.

(c) Any reserved permits remaining and any youth applicants who were not selected for reserved permits shall be returned to the general buck deer drawing.

(3) Drawing Order

(a) Permits for the big game drawing shall be drawn in the following order:

(i) limited entry, cooperative wildlife management unit and management buck deer;

(ii) limited entry, cooperative wildlife management unit and management bull elk;

(iii) limited entry and cooperative wildlife management unit buck pronghorn;

(iv) once-in-a-lifetime;

(v) dedicated hunter certificate of registration;

(vi) youth general buck deer;

(vii) general buck deer and general buck/bull combo;

(viii) youth general any bull elk.

(b) Any person who draws one of the following permits is not eligible to draw a once-in-a-lifetime permit:

(i) limited entry, Cooperative Wildlife Management unit or management buck deer;

(ii) limited entry, Cooperative Wildlife Management unit or management bull elk; or

(iii) a limited entry or Cooperative Wildlife Management unit buck pronghorn.

(c) If any permits listed in Subsection (a)(i) through (a)(iii) remain after the big game drawing after all choices have been evaluated separately for residents and nonresidents, a second evaluation will be done allowing cross-over usage of remaining resident and nonresident permit quotas.

(4) Groups

(a) Limited Entry

(i) Up to four people may apply together for limited entry deer, elk or pronghorn; or resident cooperative wildlife management unit permits.

(b) Group applications are not accepted for management buck deer or bull elk permits.

(c) Group applications are not accepted for Once-in-a-lifetime permits.

(d) General season

(i) Up to four people may apply together for general deer permits.

(ii) Up to two youth may apply together for youth general any bull elk permits.

(iii) Up to four youth may apply together for youth general deer permits.

(5) Waiting Periods

(a) Deer waiting period.

(i) Any person who draws or obtains a limited entry, management or cooperative wildlife management unit buck deer permit through the big game drawing process may not apply for or receive any of these permits again for a period of two seasons.

(ii) A waiting period does not apply to:

(A) general archery, general any weapon, general muzzleloader, conservation, sportsman, poaching-reported reward permits; or

(B) cooperative wildlife management unit or limited entry landowner buck deer permits obtained through the landowner.

(b) Elk waiting period.

(i) Any person who draws or obtains a limited entry, management or cooperative wildlife management unit bull elk permit through the big game drawing process may not apply for or receive any of these permits for a period of five seasons.

(ii) A waiting period does not apply to:

(A) general archery, general any weapon, general muzzleloader, conservation, sportsman, poaching-reported reward permits; or

(B) cooperative wildlife management unit or limited entry landowner bull elk permits obtained through the landowner.

(c) Pronghorn waiting period.

(i) Any person who draws or obtains a buck pronghorn or cooperative wildlife management unit buck pronghorn permit through the big game drawing may not apply for or receive any of these permits thereafter for a period of two seasons.

(ii) A waiting period does not apply to:

(A) conservation, sportsman, poaching-reported reward permits; or

(B) cooperative wildlife management unit or limited entry landowner buck pronghorn permits obtained through the landowner.

(d) Once-in-a-lifetime species waiting period.

(i) Any person who draws or obtains a permit for any bull moose, bison, Rocky Mountain bighorn sheep, desert bighorn sheep or Rocky Mountain goat may not apply for or receive an once-in-a-lifetime permit for the same species in the big game drawing or sportsman permit drawing.

(ii) A person who has been convicted of unlawfully taking a once-in-a-lifetime species may not apply for or obtain a permit for that species.

(e) Cooperative Wildlife Management Unit and landowner permits.

(i) Waiting periods and once-in-a-lifetime restrictions do not apply to purchasing limited entry landowner or cooperative wildlife management unit permits obtained through a landowner, except as provided in Subsection (ii).

(ii) Waiting periods are incurred and applied for the purpose of applying in the big game drawing as a result of obtaining a cooperative wildlife management unit bull moose permit through a landowner.

R657-62-20. Black Bear.

(1) Permit and Pursuit Applications.

(a) A person must possess or obtain a valid hunting or combination license in order to apply for or obtain a limited entry bear permit or bear pursuit permit.

(b) A person may not apply for or obtain more than one bear permit within the same calendar year, except as provided in Subsection R657-33-26(4).

(c) Limited entry bear permits are valid only for the hunt unit and for the specified

season designated on the permit.

(d)(i) Applicants may select up to three hunt unit choices when applying for limited entry bear permits. Hunt unit choices must be listed in order of preference.

(ii) Applicants must specify in the application whether they want a limited entry bear permit or a limited entry bear archery permit and/or bear pursuit permit.

(e) Any person obtaining a limited entry bear archery permit must also obtain a certificate of registration if intending to use bait as provided in Section R657-33-14.

(f) Applicants must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Sections 23-19-22.5, 23-19-11 and 23-20-20.

(2) Group applications are not accepted.

(3) Waiting periods.

(a) Any person who draws or purchases a limited entry bear permit valid for the current year, may not apply for a permit thereafter for a period of two years.

R657-62-21. Antlerless Species.

(1) Permit Applications.

(a) A person must possess or obtain a valid hunting or combination license in order to apply for or obtain an antlerless permit.

(b) Applicants must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Rule R657-5.

(c) A person may apply in the drawing for and draw the following permits, except as provided in Subsection (d):
(i) antlerless deer;
(ii) antlerless elk;
(iii) doe pronghorn; and
(iv) antlerless moose, if available.
(d) Any person who has obtained a buck pronghorn permit or a bull moose permit may not apply in the same year for a doe pronghorn permit or antlerless moose permit, respectively, except for permits remaining after the drawing as provided in R657-62-15.
(e) Applicants may select up to five hunt choices when applying for antlerless deer, antlerless elk and antlerless pronghorn.
(f) Applicants may select up to two hunt choices when applying for antlerless moose.
(g) Hunt unit choices must be listed in order of preference.
(h) A person may not submit more than one application in the antlerless drawing per species.
(2) Youth applications.
(a) For purposes of this section, "youth" means any person 18 years of age or younger on the opening day of the general archery buck deer season.
(b) Twenty percent of the antlerless deer, elk and doe pronghorn permits are reserved for youth hunters.
(c) Youth applicants who apply for an antlerless deer, elk, or doe pronghorn permit as provided in this Subsection, will automatically be considered in the youth drawing based upon their birth date.
(3) Drawing Order
(a) Permits are drawn in the order listed in the guidebook of the Wildlife Board for taking big game.
(b) Any reserved permits remaining and any youth applicants who were not selected for reserved permits shall be returned to the antlerless drawing.
(c) If permits remain after all choices have been evaluated separately for residents and nonresidents, a second evaluation will be done allowing cross-over usage of remaining resident and nonresident permit quotas.
(4) Group Applications
(a) Up to four hunters can apply together for antlerless deer, antlerless elk and doe pronghorn
(b) Group applications are not accepted for antlerless moose.
(c) Youth hunters who wish to participate in the youth drawing must not apply as a group.
(5) Waiting Periods
(a) Antlerless moose waiting period.
(i) Any person who draws or obtains an antlerless moose permit or a cooperative wildlife management unit antlerless moose permit through the antlerless drawing process, may not apply for or receive an antlerless moose permit thereafter for a period of five seasons.
(ii) A waiting period does not apply to cooperative wildlife management unit antlerless moose permits obtained through the landowner.

R657-62-22. Sandhill Crane, Sharp-Tailed and Sage Grouse.
(1) Permit applications.
(a) A person may obtain only one Sandhill Crane permit each year.
(b) A hunting or combination license is required when taking Sandhill Crane, Sharp-Tailed and Sage Grouse and may be purchased when applying for the permit.
(c) Applicants must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Utah Code 23-19-24, 23-19-11 and 23-20-20.
(d) Applicants may select up to four hunt choices. Hunt unit choices must be listed in order of preference.
(2) Youth applications.
(a) For purposes of this section, "youth" means any person 15 years of age or younger on the opening day of a particular upland game hunt as posted in the guidebook of the Wildlife Board for taking upland game and turkey.
(b) Fifteen percent of the Sandhill Crane, Sharp-tailed grouse and sage grouse permits are reserved for youth hunters.
(c) Youth applicants who apply for a Sandhill Crane, Sharp-tailed grouse or sage grouse permit as provided in this Subsection, will automatically be considered in the youth drawing based upon their birth date.
(3) Group applications.
(a) Up to four people may apply together.
(b) Youth hunters who wish to participate in the youth drawing must not apply as a group.
(4) Waiting Periods do not apply.

R657-62-23. Swan.
(1) Permit applications.
(a) A person may obtain only one swan permit each year.
(i) A person may not apply more than once annually.
(b) A Utah hunting or combination license is required when hunting Swan and may be purchased when applying for the permit.
(c) The division shall issue no more than the number of swan permits authorized by the U.S. Fish and Wildlife Service each year.
(i) The division may withhold up to 1% of the authorized number of swan permits each year to correct division errors, which may occur during the drawing process.
(ii) Division errors may be corrected using the withheld swan permits in accordance with the Division Error Remedy Rule R657-50.
(iii) Withheld swan permits shall be used to correct division errors reported to or discovered by the division on or before the fifth day preceding the opening day of the swan hunt.
(iv) Withheld swan permits remaining after correcting any division errors shall be issued prior to the opening day of the swan hunt to the next person on the alternate drawing list.
(d) A person must complete a one-time orientation course before applying for a swan permit, except as provided under Subsection R657-9-6(3)(b).
(i) Remaining swan permits available for sale shall be issued only to persons having previously completed the orientation course.
(e) Applicants must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Utah Code 23-19-24, 23-19-11 and 23-20-20.
(2) Youth applications.
(a) For purposes of this section, "youth" means any person 15 years of age or younger on the opening day of the swan hunt as posted in the guidebook of the Wildlife Board for taking waterfowl.
(b) Fifteen percent of the Swan permits are reserved for youth hunters.
(c) Youth who apply for a turkey permit will automatically be considered in the youth permit drawing based on their birth date.
(3) Group applications.
(a) Up to four people may apply together in a Group Application.
(b) Youth hunters who wish to participate in the youth drawing must not apply as a group.
(4) Waiting period does not apply.

R657-62-24. Cougar.
(1) Permit Applications
(a) A person must possess or obtain a valid hunting or combination license to apply for or obtain a cougar limited entry

permit.

(b) A person may not apply for or obtain more than one cougar permit for the same year.

(c) Limited entry cougar permits are valid only for the limited entry management unit and for the specified season provided in the hunt tables of the proclamation of the Wildlife Board for taking cougar.

(d) Applicants may select up to three management unit choices when applying for limited entry cougar permits. Management unit choices must be listed in order of preference.

(e) If permits remain after all choices have been evaluated separately for residents and nonresidents, a second evaluation shall be done allowing cross-over usage of remaining resident and nonresident permit quotas.

(f) Any limited entry cougar permit purchased after the season opens is not valid until seven days after the date of purchase.

(g) Applicants must meet all age requirements, proof of hunter education requirements and youth restrictions as provided in Utah Code 23-19-22.5, 23-19-11 and 23-20-20.

(2) Group applications are not accepted.

(3) Waiting periods.

(a) Any person who draws or purchases a limited entry cougar permit valid for the current season may not apply for a permit thereafter for a period of three seasons.

(b) Waiting periods are not incurred as a result of purchasing cougar harvest objective permits.

R657-62-25. Sportsman.

(1) Permit applications.

(a) One sportsman permit is offered to residents for each of the following species:

(i) desert bighorn (ram);

(ii) bison (hunter's choice);

(iii) buck deer;

(iv) bull elk;

(v) Rocky Mountain bighorn (ram);

(vi) Rocky Mountain goat (hunter's choice);

(vii) bull moose;

(viii) buck pronghorn;

(ix) black bear;

(x) cougar; and

(xi) wild turkey.

(b) Bonus points shall not be awarded or utilized when applying for or obtaining sportsman permits.

(2) Group applications are not accepted.

(3) Waiting Periods.

(a) Any person who applies for or obtains a Sportsman Permit is subject to all waiting periods and exceptions as applicable to the species pursuant to Rule R657-41.

(b) Once-in-lifetime waiting periods.

(i) If you have obtained a once-in-a-lifetime permit through the sportsman drawing you are ineligible to apply for that once-in-a-lifetime species through the big game drawing.

(ii) If you have obtained a once-in-a-lifetime permit through the big game drawing you are ineligible to apply for that once-in-a-lifetime species through the sportsman drawing.

(c) Limited Entry waiting periods.

(i) Waiting periods do not apply to Sportsman deer, elk, pronghorn, bear or cougar.

(ii) Waiting period will not be incurred for receipt of a Sportsman deer, elk, pronghorn, bear or cougar.

R657-62-26. Turkey.

(1) Permit applications.

(a) A person must possess a valid hunting or combination license in order to apply for or obtain a wild turkey permit.

(b) A person may obtain only one wild turkey permit each year, except a person may obtain wild turkey conservation permits in addition to obtaining one limited entry or remaining wild turkey permit.

(c) Applicants may select up to five hunt choices when applying for limited entry turkey permits. Hunt unit choices must be listed in order of preference.

(d) A turkey permit allows a person, using any legal weapon as provided in Section R657-54-7, to take one bearded turkey within the area and season specified on the permit.

(2) Group Applications are not accepted.

(3) Waiting period does not apply.

(4) Youth permits

(a) Up to 15 percent of the limited entry permits are available to youth hunters.

(b) For purposes of this section "youth" means any person who is 15 years of age or younger on the posting date of the wild turkey drawing.

(c) Youth who apply for a turkey permit will automatically be considered in the youth permit drawing based on their birth date.

(d) Bonus points shall be used when applying for youth turkey permits.

(5) Landowner turkey permits shall be issued pursuant to rule R657-54.

R671. Pardons (Board of), Administration.
R671-101. Rules.
R671-101-1. Rules.

Board of Pardons rules shall be processed according to state rulemaking procedures. The Board shall determine if the rule is to be submitted through the regular rulemaking or emergency rulemaking procedure. Rules shall then be distributed as necessary.

Any error, defect, irregularity or variance in the application of these rules which does not affect the substantial rights of a party may be disregarded. Rules are to be interpreted with the interests of public safety in mind so long as the rights of a party are not substantially affected.

KEY: pardons
February 18, 1998 77-27-9
Notice of Continuation January 26, 2012 63G-3

R671. Pardons (Board of), Administration.
R671-102. Americans with Disabilities Act Complaint Procedures.
R671-102-1. Authority and Purpose.

(1) This rule is made under authority of Utah Code Ann. Subection 63G-3-201(3). The Board of Pardons and Parole (Board) adopts, defines, and publishes within this rule the grievance procedures for the prompt and equitable resolution of complaints alleging any action prohibited by Title II of the Americans with Disabilities Act, as amended.

(2) The purpose of this rule is to implement the provisions of Title II of the Americans with Disabilities Act, which provides that no individual shall be excluded from participation in or be denied the benefits of the services, programs, or activities of a public entity, or be subjected to discrimination by the Board because of a disability.

R671-102-2. Definitions.

(1) "ADA Coordinator" means the Board's Administrative Coordinator, assigned by the Board's Chairperson to investigate and facilitate the prompt and equitable resolution of complaints filed by qualified persons with disabilities. The ADA Coordinator may also be a representative of the Department of Human Resource Management assigned to the Board.

(2) "Board" means the Board of Pardons and Parole created by Utah Const. Art. 7, Section 12(1), and Utah Code Ann. Section 77-27-2(1).

(3) "Chairperson" as provided in Utah Code Ann. Subsection 77-27-4(1), means the Board's Chairperson.

(4) "Designee" meansan individual appointed by the Board's Chairperson, or the Board's Vice-Chairperson, to investigate allegations of ADA non-compliance in the event the ADA Coordinator is unable or unwilling to conduct an investigation for any reason, including a conflict of interest. A designee does not have to be an employee of the Board; however, the designee must have a working knowledge of the responsibilities and obligations required of employers and employees by the ADA.

(5) "Disability" means, with respect to an individual, a physical or mental impairment that substantially limits one or more of the major life activities of such individual; a record of such an impairment; or being regarded as having such an impairment.

(6) "Major life activities" include caring for oneself, performing manual tasks, seeing, hearing, eating, sleeping, walking, standing, lifting, bending, speaking, breathing, learning, reading, concentrating, thinking, and working. A major life activity also includes the operation of major bodily function, such as functions of the immune system, normal cell growth, digestive, bowel, bladder, neurological, brain, respiratory, circulatory, endocrine, and reproductive functions.

(7) "Qualified Individual" means an individual who meets the essential eligibility requirements for the receipt of services or the participation in programs or activities provided by the Board. A "qualified individual" is also one who, with or without reasonable accommodation, can perform the essential functions of the employment position that individual holds or desires.

(8) "Vice-Chairperson," as provided in Utah Code Ann. Subsection 77-27-4(2), means the Board's Vice-Chairperson.

R671-102-3. Filing of Complaints.

(1) Any qualified individual may file a compliant alleging non-compliance with Title II of the Americans with Disabilities Act, as amended, or the federal regulations promulgated thereunder.

(2) Qualified individuals shall file their complaints with the Board's ADA Coordinator, unless the complaint alleges that the ADA Coordinator was non-compliant, in which case qualified individuals shall file their complaints with the Board's designee.

(3) Qualified individuals shall file their complaints within 90 days after the date of the alleged non-compliance to facilitate the prompt and effective consideration of pertinent facts and appropriate remedies; however, the Board's Chairperson has the discretion to direct that the grievance process be utilized to address legitimate complaints filed more than 90 days after alleged non-compliance.

(4) Each complaint shall:

(a) include the complainant's name and address;

(b) include the nature and extent of the individual's disability;

(c) describe the Board's alleged discriminatory action in sufficient detail to inform the Board of the nature and date of the alleged violation;

(d) describe the action and accommodation desired; and

(e) be signed by the complainant or by his legal representative.

(5) Complaints filed on behalf of classes or third parties shall describe or identify by name, if possible, the alleged victims of discrimination.

(6) If the complaint is not in writing, the ADA Coordinator or designee shall transcribe or otherwise reduce the complaint to writing upon receipt of the complaint.

(7) By filing a complaint or a subsequent appeal, the complainant authorizes necessary parties to conduct a confidential review of all relevant information, including records classified as private or controlled under the Government Records Access and Management Act, Utah Code Ann. Subsection 63G-2-302(1)(b) and Section 63G-2-304, consistent with 42 U.S.C. 12112(d)(4)(A), (B), and (C) and 42 U.S.C. 2112(d)(3)(B) and (C), and relevant information otherwise protected by statute, rule, regulation, or other law.

R671-102-4. Investigation of Complaints.

(1) The ADA Coordinator or designee shall investigate complaints to the extent necessary to assure all relevant facts are collected and documented. This may include gathering all information listed in Subsections R671-102-3(4) and (7) of this rule if it is not made available by the complainant.

(2) The ADA Coordinator or designee may seek assistance from the Attorney General's staff, and the Board's human resource and budget staff in determining what action, if any, should be taken on the complaint. The ADA Coordinator or designee may also consult with the Vice-Chairperson in making a recommendation.

(3) The ADA Coordinator or designee shall consult with representatives from other state agencies that may be affected by the decision, including the Office of Planning and Budget, the Department of Human Resource Management, the Division of Risk Management, the Division of Facilities Construction Management, and the Office of the Attorney General before making any recommendation that would:

(a) involve an expenditure of funds beyond what is reasonably able to be accommodated within the applicable line item so that it would require a separate appropriation;

(b) require facility modifications; or

(c) require reassignment to a different position.

R671-102-5. Recommendation and Decision.

(1) Within 15 working days after receiving the complaint, the ADA Coordinator or designee shall recommend to the Board's Vice-Chairperson what action, if any, should be taken on the complaint. The recommendation shall be in writing or in another accessible format suitable to the complainant.

(2) If the ADA Coordinator or designee is unable to make a recommendation within the 15 working day period, the complainant shall be notified in writing or in another accessible

format suitable to the complainant stating why the recommendation is delayed and what additional time is needed.

(3) The Board's Vice-Chairperson may confer with the ADA Coordinator or designee and the complainant and may accept or modify the recommendation to resolve the complaint. The Board's Vice-Chairperson shall render a decision within 15 working days after the Board's Vice- Chairperson's receipt of the recommendation from the ADA Coordinator or designee. The Board's Vice-Chairperson shall take all reasonable steps to implement the decision. The Board's Vice-Chairperson's decision shall be in writing, or in another accessible format suitable to the complainant, and shall be promptly delivered to the complainant.

R671-102-6. Appeals.

(1) The complainant may appeal the Board's Vice-Chairperson's decision to the Board's Chairperson within ten working days after the complainant's receipt of the Vice Chairperson's decision.

(2) The appeal shall be in writing or in another accessible format reasonably suited to the complainant's ability.

(3) The Board's Chairperson may name a designee to assist on the appeal. The ADA coordinator or his designee may not also be the Board's Chairperson's designee for the appeal.

(4) In the appeal, the complainant shall describe in sufficient detail why the decision does not effectively address the complainant's needs.

(5) The Board's Chairperson or his designee shall review the ADA Coordinator's or his designee's recommendation, the Board's Vice-Chairperson's decision, and the points raised on appeal prior to reaching a decision. The Board's Chairperson may direct additional investigation as necessary. The Board's Chairperson shall consult with representatives from other state agencies that would be affected by the decision, including the Office of Planning and Budget, the Department of Human Resource Management, the Division of Risk Management, the Division of Facilities Construction Management, and the Office of the Attorney General before making any decision that would:

(a) involve an expenditure of funds beyond what is reasonably able to be accommodated within the applicable line item so that it would require a separate appropriation;

(b) require facility modifications; or

(c) require reassignment to a different position.

(6) The Board's Chairperson shall issue a final decision within 15 working days after receiving the complainant's appeal. The decision shall be in writing, or in another accessible format suitable to the complainant, and shall be promptly delivered to the complainant.

(7) If the Board's Chairperson is unable to reach a final decision within the 15 working day period, the complainant shall be notified in writing, or by another accessible format suitable to the complainant, why the final decision is being delayed and the additional time needed to reach a final decision.

R671-102-7. Record Classification.

(1) Records created in administering this rule are classified as "protected" under Utah Code Ann. Subsections 63G-2-305(9), (22), (24), and (25).

(2) After issuing a decision under Section R671-102-5, or a final decision upon appeal under Section R671-102-6, portions of the record pertaining to the complainant's medical condition shall be classified as "private" under Utah Code Ann. Subsection 63G-2-302(1)(b), or "controlled" under Utah Code Ann. Section 63G-2-304, consistent with 42 U.S.C. 12112(d)(4)(A), and (C) and 42 U.S.C. 12112(d)(3)(B) and (C), at the option of the ADA coordinator.

(a) The written decision of the Board's Vice-Chairperson or the Board's Chairperson shall be classified as "public," and all other records, except controlled records under Subsection R671-102-7(2), classified as "private."

R671-102-8. Relationship to Other Laws.

This rule does not prohibit or limit the use of remedies available to individuals under:

(a) the state Anti-Discrimination Complaint Procedures, Utah Code Ann. Section 34A-5-107 and Utah Code Ann. Section 67-19-32;

(b) the Federal ADA Complaint Procedures, 28 CFR 35.170 through 28 CFR 35.178; or

(c) any other Utah State or federal law that provides equal or greater protection for the rights of individuals with disabilities.

KEY: disabilities
July 26, 2011 67-19-32
Notice of Continuation January 26, 2012 63G-2

R671. Pardons (Board of), Administration.
R671-201. Original Parole Grant Hearing Schedule and Notice.
R671-201-1. Schedule and Notice.

Within six months of an offender's commitment to prison the Board will give notice of the month and year in which the inmate's original hearing will be conducted. A minimum of one week (7 calendar days) prior notice should be given regarding the specific day and approximate time of such hearing.

All felonies, where a life has been taken, will be routed to the Board as soon as practicable for the determination of the month and year for their original hearing date. The Board will only consider information available to the court at the time of sentencing.

All first degree felonies, where death is not involved, and where the most severe sentence imposed and being served is a sentence of greater than fifteen (15) years to life, excluding enhancements, will be eligible for a hearing after the service of fifteen years.

All first degree felonies, where death is not involved, and where the most severe sentence imposed and being served is a sentence of ten(10) years to life, or fifteen (15) years to life, excluding enhancements, will be eligible for a hearing after the service of seven years.

All other first degree felonies, where death is not involved, will be eligible for a hearing after the service of three years.

All second degree felonies, where death is not involved, will be eligible for a hearing after the service of six months unless the second degree is a sex offense and in those cases will be eligible for a hearing after the service of eighteen months.

All third degree felonies, where a death is not involved, and all class A misdemeanors, will be eligible for a hearing after the service of three months unless the third degree felony is a sex offense and in those cases will be eligible for a hearing after the service of twelve months.

Excluded from the above provisions are inmates who are sentenced to death or life without parole.

An inmate may petition the Board to calendar him/her at a time other than the usual times designated above or the Board may do so on its own motion. A petition by the inmate shall set out the special reasons which give rise to the request. The Board will notify the petitioner of its decision in writing as soon as possible.

KEY: parole, inmates
February 25, 2009 77-27-7
Notice of Continuation January 26, 2012

R671. Pardons (Board of), Administration.
R671-202. Notification of Hearings.
R671-202-1. Notification.

An offender will be notified of the date, time and place of the hearing at least seven calendar days in advance of any hearing where personal appearance is involved, except in extraordinary circumstances, and will be specifically advised as to the purpose of the hearing.

In extraordinary circumstances, the hearing may be conducted without the seven day notification, or the offender may waive this notice requirement.

Public notice of hearings will also be posted one week in advance at the Board's offices.

Open public hearings are regularly scheduled by the Board at the various correctional facilities throughout the state.

KEY: parole, inmates
October 10, 2007 77-27-7
Notice of Continuation January 31, 2012 77-27-9

R671. Pardons (Board of), Administration.
R671-203. Victim Input and Notification.
R671-203-1. General Provisions.

Pursuant to statute, the Department of Corrections shall provide the Board of Pardons with all available information concerning the impact a crime may have had upon the victim or victim's family. Pursuant to statute, the prosecutor of the case, and upon request of the Board, any other law enforcement official responsible for offender's arrest, conviction, and sentence, shall forward to the Board a victim impact statement referring to physical, mental or economic loss suffered by the victim or victim's family.

If a victim does not wish to give testimony or is unable to do so, a victim representative may be appointed by the victim, or if the victim is a minor, by the victim's parent(s) or lawful guardian or custodian, to speak on the victim's behalf. A family member of the victim may also testify if the victim is deceased as a result of the offense or if the victim is a child.

"Victim" for purposes of this Rule means:

A. any person, of any age, against whom an offender committed a felony or class A misdemeanor offense either personally or as a party to the offense, for which a prison sentence was imposed or for which the hearing is being held;

B. in the discretion of the Board, any person, of any age, against whom a related crime or act is alleged to have been perpetrated or attempted;

C. any victim originally named in an allegation of criminal conduct who is not a victim of the offense to which the defendant entered a negotiated plea of guilty; and

D. any victim representative and family member as provided herein.

"Victim Representative" means a person who is designated by the victim or designated by the Board, who represents the victim in the best interests of the victim.

A victim or victim representative, who is appearing at a hearing where photographic equipment is being used by the media, will not be photographed without the approval of the victim and the individual presiding at the hearing.

Victims may contact the Board of Pardons, after any parole hearing, for information concerning the outcome of that hearing. Victims are advised that they may also contact the Utah State Prison Records Unit Supervisor for information on offender releases.

All persons attending hearings must comply with the security and clearance regulations of the facility where the hearing is held. These regulations include a picture identification, appropriate dress, and no contraband. Visitors should arrive at the facility 15 to 20 minutes prior to the scheduled hearing to allow adequate time for the security clearance.

R671-203-2. Notification.

A. Notice of an offender's original parole hearing shall be timely sent to the victim at his most recent address of record with the board. The notice shall include:

(1) the date, time, and location of the hearing;

(2) a clear statement of the reason for the hearing, including all offenses involved;

(3) the statutes and rules applicable to the victim's participation in the hearing;

(4) the address and telephone number of an office or person the victim may contact for further explanation of the procedure regarding victim participation in the hearing;

(5) specific information about how, when, and where the victim may obtain the results of the hearing; and

(6) notification that the victim must maintain current contact information with the Board in order to receive future notifications of hearings affecting the offender's incarceration or parole.

B. If the victim is dead, or the Board is otherwise unable to contact the victim, the Board shall make reasonable efforts to notify the victim's immediate family of the hearing.

C. Following the notice of the original hearing, a victim may elect to receive notice of any future parole grant hearing, parole revocation hearing or re-hearing. In order to do so, the victim shall notify the Board of the desire to receive future notices, and shall thereafter maintain current contact information with the Board.

D. For victims who elect to receive future notices, the Board will mail such notice to the victim's last current address of record or most recent contact information as provided to the Board.

R671-203-3. Right to Attend; Right to Testify.

As used in this section, "hearing" means a hearing for a parole grant or revocation, or a rehearing of either of these if the offender is present.

A victim may attend any hearing regarding the offender. A victim may testify during any hearing regarding the impact of the offense(s) upon the victim, and may present his views concerning any decision to be made regarding the offender.

The victim may request a re-scheduling or continuance of the hearing if travel or other significant conflict prohibits their attendance at the hearing.

R671-203-4. Victim Statements and Testimony.

A. A victim, victim representative or victim's family member (if the victim is a child, deceased or unable to attend due to physical incapacity), may testify regarding the impact of the offense(s) upon the victim, and may present his views concerning any decision to be made regarding the offender.

B. The testimony may be presented as a written statement, which may also be read aloud, if the presenter desires; or as oral testimony.

C. Oral testimony at hearings will be limited to five minutes in length per victim or representative. If a family member testifies, testimony should be limited to one family representative from the marital family (i.e. spouse or children) and/or one family representative from the nuclear/extended family (i.e. parent, sibling or grandparent). Under exceptional or extraordinary circumstances a victim may formally petition the Board to request additional testimony.

D. The victim may present testimony during the hearing outside the presence of the offender. The offender will be excused from the hearing room so that the victim can give testimony. The victim's testimony will be recorded or otherwise made available to the offender. At the conclusion of the testimony, the offender will be returned to the hearing room, and the Board will allow the offender to respond. A separate hearing will not be scheduled to allow for testimony outside the presence of the offender.

E. Victims who desire to testify at hearings shall notify the Board as far in advance of the hearing as possible so that appropriate arrangements can be made and adequate time allocated.

F. Victims or representatives should bring a written copy of their remarks to the hearing or send a copy to the Victim Coordinator for the Board file.

G. In cases where multiple victims desire to testify, the Board may reschedule the hearing to accommodate the extra time required to hear all victims. If Board business is not concluded by 5:00 p.m. on a hearing day, all remaining hearings may be rescheduled and visitors required to return.

R671-203-5. Victim Impact Hearings.

A. In any case where an offender's original parole hearing is set by Board administrative determination more than three years from the offender's commitment to prison, the victim, as

defined by R671-203-1, may request that the Board conduct a victim impact hearing, in order to preserve victim impact testimony and victim statements for future use and reference by the Board.

B. The sole purpose of a victim impact hearing is to afford an opportunity for victim impact testimony and victim statements to be made in cases where an offender's original hearing is scheduled more than three years following commitment to prison, so that the victim is not denied an opportunity to participate in the offender's original hearing, simply because of the passage of time between the offender's commitment to prison and original hearing. A victim impact hearing is not a substitute for an original hearing. A victim impact hearing will not result in a review, re-scheduling or re-determination of an original hearing date.

C. Victims who request, and for whom victim impact hearings are conducted, retain all rights afforded pursuant to constitutional provision, statute or Board rule, including: the right to notice of the original hearing and any future hearings, as provided by R671-203-1 and R671-203-2; the right to attend any hearing for the offender, as provided by R671-203-1 and R671-203-3; and the right to testify and make future statements to the Board at ant hearing for the offender, as provided by R671-203-1 and R671-203-4.

D. Upon such a request from a victim, the Board shall schedule and conduct a victim impact hearing. In scheduling and conducting a victim impact hearing:

(1) All notice provisions of R671-202-1 and R671-203 et seq. shall apply.

(2) All victim appearance, testimony and statement provisions of R671-203 shall apply.

(3) The offender shall be present, pursuant to the provisions of R671-301, and shall be afforded an opportunity to respond to the victim's testimony or statement.

(4) The victim impact hearing shall be recorded, pursuant to the provisions of R671-304.

R671. Pardons (Board of), Administration.
R671-205. Credit for Time Served.
R671-205-1. Policy.

(1) Credit for time served will be granted against the expiration date on a crime of commitment when:

(a) a conviction is set aside and there is a subsequent commitment for the same criminal conduct;

(b) a commitment is made to the Utah State Hospital pursuant to a "guilty and mentally ill" conviction;

(c) time is spent in custody outside the State of Utah based solely on the Utah warrant;

(d) the Board deems such credit just under the circumstances; or

(e) credit is otherwise required by law.

(2) No credit will be given for time spent in custody at the Utah State Hospital or comparable non-prison, psychiatric facility while the offender is judicially-declared incompetent.

(3) If no record of official detention time is found in the Board file, the Board will presume that none was served. In cases where the offender desires credit, the burden is on the offender to request it and to provide copies of records supporting the claim of time spent in custody.

R671. Pardons (Board of), Administration.
R671-206. Competency of Offenders.
R671-206-1. General.

If the hearing official presiding at a hearing has reason to believe that an offender may be mentally incompetent as defined in UCA 77-15-2, all proceedings shall be stayed pending a decision by the Board. The Board may request a mental health evaluation from the Department of Corrections or from a private mental health expert to assist in determining whether the offender is competent, or is likely to become competent while housed in the custody of the Department of Corrections.

If there is reason to believe that the inmate or parolee is incompetent, the Board may request the Department of Corrections file a petition with the district court for a competency hearing pursuant to UCA 77-15-3(b).

If the district court determines the offender is mentally competent, the Board shall proceed with scheduled hearings or other actions.

R671. Pardons (Board of), Administration.
R671-207. Mentally Ill and Deteriorated Offender Custody Transfer.
R671-207-1. Transfer From the Prison to the Hospital of an Offender Whose Mental Health Has Deteriorated.

The Department of Corrections will notify the Board whenever a mentally ill offender is transferred from the Hospital to the Prison pursuant to 77-16a-204 (5).The custody transfer of an inmate, who has not been adjudicated as mentally-ill by the Court and who is housed at the Prison, whose mental health has deteriorated to the point that admission to the State Hospital is necessary to ensure adequate mental health treatment, will occur when the Prison and the Hospital agree to a transfer. The Department of Corrections will notify the Board's Mental Health Advisor whenever an offender is transferred from the Prison to the Hospital and the Board will stay any hearing until the offender is transferred from the Hospital back to the Prison pursuant to the requirements of 77-16a-204, Utah Code, and the provisions of rule R207-2, Utah Administrative Code.

If the Prison and the Hospital cannot agree upon the transfer, the Board will make the decision as to whether the transfer should occur pursuant to 62A-15-605. Upon notification by the Department of Corrections to the Board's Mental Health Advisor that the agencies cannot agree, the Mental Health Advisor will conduct an administrative hearing. Both agencies will provide written reports and recommendations to the Advisor prior to the hearing and the Advisor will take testimony at the hearing. The Mental Health Advisor will then make a recommendation pursuant to the requirement of 62A-15-605.5 to the Board. The Board will issue its decision within 30 days of the Administrative Hearing.

R671-207-2. Mentally-Ill Offender Custody Transfer.

Custody transfer of a mentally-ill offender, under the jurisdiction of the Board of Pardons and Parole, and placed by the Court at the Utah State Hospital, will occur when the Hospital and the Prison agree that the Prison can provide the mentally-ill offender with the level of care necessary to maintain the offender's current mental condition and status. The Department of Corrections will notify the Board whenever a mentally-ill offender is transferred from the Hospital to the Prison and the Board will set a date for a parole hearing.

If the Hospital and the Prison cannot agree upon the transfer, the Board will make the decision as to whether the offender should be transferred to the Prison. Upon notification from the Division of Human Services to the Board's Mental Health Advisor that the agencies cannot agree upon the transfer, the Advisor will conduct an Administrative hearing. Both agencies will provide written reports and recommendations to the Advisor prior to the hearing and the Advisor will take testimony at the hearing. The Mental Health Advisor will then make a recommendation, pursuant to the requirements of 77-16a-204, to the Board as to the transfer. The Board will issue its decision within 30 days of the Administrative Hearing.

R671-207-3. Retransfer From the Department of Corrections to the Utah State Hospital.

Custody transfer of a mentally-ill offender, under the jurisdiction of the Board, whose custody was transferred from the Utah State Hospital to the Utah State Prison may be transferred back to the Utah State Hospital when the Prison and the Hospital agree that the offender's mental condition has deteriorated or the offender has become mentally unstable to the point that admission to the State Hospital is necessary to ensure adequate mental health treatment. The Department of Corrections will notify the Board's Mental Health Advisor whenever a mentally-ill offender is transferred back to the State Hospital from the Prison. The Board will stay any hearing until the offender's mental health has been stabilized and the offender has been transferred back to the prison, in accordance with Rule R207-1, Utah Administrative Code and Section 77-16a-204, Utah Code.

If the Prison and the Hospital cannot agree upon the transfer, the Board will make the decision as to whether the offender should be transferred back to the Hospital. Upon notification form the Department of Corrections that the Prison and the Hospital cannot agree upon a transfer, the Mental Health Advisor will conduct an administrative hearing. Both agencies will provide written reports and recommendations to the Advisor prior to the hearing and the Advisor will take testimony at the hearing. The Advisor will then make a recommendation to the Board as to the transfer pursuant to the requirements of 77-16a-204. The Board will issue its decision within 30 days of the administrative hearing.

A mentally-ill offender who has been readmitted to the Utah State Hospital pursuant to these rules may be transferred back to the Department of Corrections in accordance with Rule R207-1, Utah Administrative Code and the requirements of Section 77-16a-204, Utah Code.

December 4, 2002 77-16a-204
Notice of Continuation January 31, 2012

R671. Pardons (Board of), Administration.
R671-301. Personal Appearance.
R671-301-1. Personal Appearance.

By statute, the Board or its designee is required to convene at least one public hearing for all offenders except those serving life without parole or death. In rehearings, the offender is afforded all the rights and considerations afforded in the initial hearing except as provided by other Board rules because the setting of a parole date is still at issue.

An offender has the right to be present at a parole grant, rehearing, or parole violation hearing if in the state (UCA 77-27-7). The offender may speak present documents, ask, and answer questions. In the event an offender waives this right, or refuses to personally attend the hearing the Board may proceed with the hearing and issuance of a decision.

If an offender is housed out of state the Board may elect one of the following procedures:

1. The offender may waive the right to be present.
2. Request the Warden to return the offender to the state for the hearing.
3. A courtesy hearing may be conducted by the appropriate paroling authority of the custodial state. A request along with a complete copy of Utah's record shall be forwarded for the hearing. All reports, a record of the hearing, and a recommendation shall be returned to the Utah Board for final action.
4. An individual Board member or designee may travel to the custodial facility and conduct the hearing, record the proceeding, and make a recommendation for the Board's final decision.
5. A hearing may be conducted by way of conference telephone call.

Notice of Continuation January 31, 2012 **77-27-7**
77-27-9
77-27-29

R671. Pardons (Board of), Administration.
R671-302. News Media and Public Access to Hearings.
R671-302-1. Open Hearings.

According to state law and subject to fairness and security requirements, Board hearings shall be open to the public, including representatives of the news media.

R671-302-2. Limited Seating.

When the number of people wishing to attend a hearing exceeds the seating capacity of the room where the hearing will be conducted, priority shall be given to:

1. Individuals involved in the hearing
2. Victim(s) of record.
3. Up to five people selected by the victim(s) of record.
4. Up to five people selected by the offender
5. Up to five members of the news media as allocated by the Board or its designee (see RESERVED MEDIA SEATING)
6. Members of the public and media on a first-come, first served basis.

R671-302-3. Security and Conduct.

All attendees are subject to prison security requirements and must conduct themselves in a manner which does not interfere with the orderly conduct of the hearing. Any individual causing a disturbance or engaging in behavior deemed by the Board to be disruptive of the proceeding may be ordered to leave and security personnel may be requested to escort the individual from the premises. All persons granted admission to a hearing must have a picture Identification and subject themselves to the security regulations of the custodial facility.

R671-302-4. Executive Session.

Executive sessions are closed sessions with no access. No filming, recording or transmitting of executive session portions of any hearing will be allowed.

R671-302-5. News Media Equipment.

Subject to prior approval by the Board or its designee (see APPROVING EQUIPMENT), the news agency representatives will be permitted to operate photographic, recording or transmitting equipment during the public portions of any hearing. When more than one news agency requests permission to use photographic, recording or transmitting equipment, a pooling arrangement may be required.

When it is determined by the Board or its designee, that any such equipment or operators of that equipment have the potential to cause a disturbance or interfere with the holding of a fair and impartial hearing, or are causing a disturbance or interfering with the holding of a fair and impartial hearing, restrictions may be imposed to eliminate those problems.

Photographing, recording and/or transmitting the image of a victim testifying before the Board will be prohibited unless approved by the victim and the individual presiding over the hearing.

R671-302-6. Prior Approval.

News media representatives wishing to use photographic, recording or transmitting equipment or to be considered for one of the five reserved media seats shall submit a request in writing to the Board or its designee. Such requests must be submitted in compliance with the policy and procedures of the Department of Corrections. If requesting the use of equipment, the request must specify by type, all the pieces of equipment to be used.

R671-302-7. Approving Equipment.

If the request is to use photographic, recording or transmitting equipment, at least 48 hours prior to a regularly scheduled hearing and 96 hours prior to a Commutation Hearing, it will be the responsibility of a representative of the news agency making the request to confer with the designated staff member of the Board to work out the details. If the designated staff member is unfamiliar with the equipment proposed to be used, he may require that a demonstration be performed to determine if it is likely to be intrusive, cause a disturbance or will inhibit the holding of a fair and impartial hearing in any way. Any equipment causing a disturbance or distraction will be removed from the premises.

Video tape or "on air" type cameras and still cameras shall be deemed to be approved equipment.

If the equipment is approved for use at a hearing, its location and mode of operation shall be approved in advance by the Board's designated staff member and it will remain in a stationary position during the entire hearing and will be operated as unobtrusively as possible.

There will be no artificial light used.

If there are multiple request for the same type of equipment, the news agencies will be required to make pool arrangements, as no more than one piece of the same type of equipment will be allowed. If no agreement can be reached on who the pool representative will be, the Board, or its designee, will draw a name at random. All those wishing to be a pool representative must make their request known in advance, identifying the specific hearing and agree to fully cooperate with all pool arrangements.

R671-302-8. Reserved Media Seating.

If there are five or fewer requests received prior to the deadline, the request will be approved. If more than five requests are made, the Board's designee will allocate the seating based on a pool arrangement. Each category will select its own representative(s). If no agreement can be reached on who the representative(s) will be, the Board's designee will draw names at random. All those wishing to be a pool representative must agree in advance to fully cooperate with all pool arrangements.

One seat will be allocated to each of the following categories:

1. Local daily newspapers with statewide circulation
2. Major wire services with local bureaus
3. Local television stations with regularly scheduled daily newscasts
4. Local radio stations with regularly scheduled daily newscasts
5. Daily, weekly or monthly publications (in that order) with priority given to the area where the offense occurred.
6. If the requests submitted do not fill all of the above categories, a seat will be allocated to a representative of a major wire service with no local bureau or a national publication (in that order).

If seats remain unfilled, one additional seat will be allocated to the categories in the above order until all seats are filled. No news agency will have more than one individual assigned to reserved media seating unless all other requests have been satisfied.

R671-302-9. Violations.

Any news agency found to be in violation of this policy may have its representatives restricted in or banned from covering future Board hearings.

Notice of Continuation January 31, 2012

R671. Pardons (Board of), Administration.
R671-303. Information Received, Maintained or Used by the Board.
R671-303-1. Information Received, Maintained or Used by the Board.

(1) Offender Access to Information

Absent a security or safety concern, as determined by the Board, an offender will be provided access to the information being considered by the Board and given an opportunity to respond to such information, whenever the Board sets or extends the offender's parole or release date. If the Board determines offender access to information presents a security or safety concern, the offender will be provided a written summary of the material information being considered.

The Board, upon request or upon it's own motion, may continue a hearing to allow submission of additional documentation or information. The Board will consider any relevant facts obtained at the hearing or later submitted by the offender, provided such later submitted information is received within five (5) days following the hearing.

The Board will also provide an offender with a copy of the records contained in the offender's file at least three days prior to any personal appearance hearing in which a parole or release date may be fixed or extended by the Board. Any additional information obtained by the Board after this initial disclosure will be provided to the offender at the beginning of the hearing. In such event, the offender will be given an opportunity to review the supplemental information before proceeding. If no additional time is requested by the offender, the hearing will proceed as scheduled.

For administrative routings to fix an original hearing date, the Board will only consider information available to the court at the time of sentencing. This information will not be disclosed to the offender until the time of his/her original hearing, as it has already been disclosed in court.

(2) Submission of Information

Other than concise and brief letters, or statements by the offender, all other materials, briefs or written memoranda or argument submitted by or on behalf of any person, in preparation for a hearing (excluding commutation hearings governed by Rule R671-312), shall be limited to no more than five (5) pages in length.

Submissions by legal counsel for or on behalf of an offender must be received by the Board no later than seven (7) days prior to any scheduled hearing.

The Board reserves the right to strike from the offender's file, and to refuse to accept or consider any material or submissions which are irrelevant, defamatory, or which do not otherwise conform to this rule.

R671. Pardons (Board of), Administration.
R671-308. Offender Hearing Assistance.
R671-308-1. Offender Hearing Assistance.

Offenders who are deemed by the Board or a Hearing Official to be unable to effectively represent themselves at a hearing may be allowed to have any assistance the Board determines is necessary to conduct an orderly hearing. This may include a Board-appointed representative.

R671-308-2. Offender Legal Counsel Hearings.

(a) At parole violation hearings including evidentiary hearings, where there are no new criminal convictions, an attorney may be assigned to represent parolees at State expense.

(b) An alleged parole violator may choose instead to have private attorney representation at the parolee's own expense. In each case, an offender's attorney must be admitted and licensed to practice law within the state of Utah, as defined by Utah Code Ann. Section 78A-9-103 (1953, as amended) and must comply with the Board's Administrative Rules, including Rule R671-103, Attorneys.

R671-308-3. Offender Legal Counsel -- Pardon and Commutation Hearings.

(a) In pardon or commutation proceedings, an offender or petitioner has no right, requirement or entitlement to legal representation or appointed counsel before the Board.

(b) A pardon or commutation petitioner may hire their own attorney, at their own expense, to appear or represent the petitioner before the Board. Any person representing a petitioner must meet the requirements of Subsection R671-308-2(b) and must comply with the Board's Administrative Rules.

78A-9-103

R671. Pardons (Board of), Administration.
R671-309. Impartial Hearings.
R671-309-1. Impartial Hearings.

Offenders are entitled to an impartial hearing before the Board. The Board discourages any direct outside contact with individual Board Members regarding specific cases. This also applies to Hearing Officers designated to conduct the hearing. Any such contact should be made with the Board's designated staff member.

All contacts by offenders, victims of crime, their family members or any other person outside the staff of the Board regarding a specific case shall be referred, whenever possible, to the staff member designated by the Board who may not be directly involved in hearing the case. If circumstances dictate, the designated Board staff member shall prepare a memorandum for the file containing the substance of the contact. If the contact is by a victim wishing to make a statement for the Board's consideration, the Board's rule on Victim Input and Notification shall apply.

If a contact, or prior knowledge of a case or individuals involved, is such that it may affect the ability of a Board Member or designated Hearing Officer to make a fair and impartial decision in a case, the Board Member or designated Hearing Officer shall decide whether to participate in the hearing. Should the offender request that a board member or hearing officer not participate, such a request is not binding in any way, but shall be weighed along with all other factors in making a final decision regarding participation in the hearing.

This rule shall not preclude contact regarding procedural matters so long as such contact is not for the purpose of influencing the decision of an individual Board Member on any particular case or hearing.

R671. Pardons (Board of), Administration.
R671-310. Rescission Hearings.
R671-310-1. Rescission Hearings.

Any prior Board decision may be reviewed and rescinded by the Board at any time until an offender's actual release from custody.

If the rescission of a release or rehearing date is being requested by an outside party, information shall be provided to the Board establishing the basis for the request. Upon receipt of such information, the offender may be scheduled for a rescission hearing. The Board may also review and rescind an offender's release or rehearing date on its own initiative. Except under extraordinary circumstances, the offender should be notified of all allegations and the date of the scheduled hearing at least seven calendar days in advance of the hearing. The offender may waive this period.

In the event of an escape, the Board will rescind the inmate's date upon official notification of escape from custody and continue the hearing until the inmate is available for appearance, charges have been resolved and appropriate information regarding the escape has been provided.

The hearing officer will conduct the hearing and make an interim decision to be reviewed, along with a summary report of the hearing, by the Board members.

77-27-11

R671. Pardons (Board of), Administration.
R671-311. Special Attention Hearings and Reviews.
R671-311-1. General.

In exceptional circumstances the board may adjust its prior decisions through a special attention review or hearing. This type of review or hearing may be used to adjust parole conditions, review board decisions, and grant relief when exceptional circumstances exist, or upon board initiative action. This process is initiated by the receipt of a written request explaining the special circumstances for which relief may be warranted. Exceptional circumstances may include, but are not limited to, illness of the offender requiring extensive medical attention, exceptional performance or progress in the institution, exceptional family circumstances, verified opportunity for employment and information that was not previously considered by the Board. The board may request the Department of Corrections to review and make a recommendation on requests not submitted by the Department.

Special Attention requests that are considered to be repetitive, frivolous or lacking in substantial merit may be placed in the offenders file without formal action or response.

R671-311-2. Special Attention Hearing.

A Special Attention Hearing will be convened or conducted when, in the opinion of the Board, a personal appearance is in the best interest to resolve the issue. Special Attention Hearings are open to the public, are hearings of record and the offender should receive 7 days notice of the purpose, place, date and time of the hearing.

R671-311-3. Special Attention Review.

A Special Attention Review will be processed administratively based on written reports supplied to the Board without the personal appearance of the offender.

R671. Pardons (Board of), Administration.
R671-315. Pardons.
R671-315-1. Pardons.

A. The Board may consider a petition for a pardon from an individual whose sentence(s) were under the board's jurisdiction and have been terminated or expired for at least five years. The board's designee shall obtain and provide relevant information that shall include but not be limited to, all inmate files, a recent BCI report, employment history, restitution report if applicable, and verification that the applicant completed therapy programs ordered by the board. The board designee shall summarize this information and upon review the board may request additional information. The board designee shall provide this information to the board within 60 days from the date the petition was received. The Board shall consider the petition and all available information relevant to it and vote to grant or deny a hearing. If a pardon hearing is granted the hearing shall be held within 60 days of the board's decision to hold the hearing. The Board may publish the petition in the legal notices section of a newspaper of general circulation and invite comment from the public.

B. When the petition involves cases that were not under the board's jurisdiction, the applicant shall provide all relevant information including, but not limited to, a current BCI, police report(s) of the crime(s) for which the applicant is seeking a pardon, court order(s) for said crime(s) and if applicable verification that all restitution has been paid in full. The Board's designee shall review and summarize the applicant's submission of information. Upon review of this information, the board may request additional information from the applicant or in the alternative it may direct its designee to verify and gather additional information. The Board shall consider the petition and all available information relevant to it and vote to grant or deny a hearing. If a pardon hearing is granted the hearing shall be held within 60 days of the board's decision to hold the hearing.

C. The Board may deny a pardon by majority vote without a hearing. If the Board decides to consider the granting of a pardon, a hearing will be scheduled with appropriate notice given to victim(s) of record if they can be located, the chief law enforcement officer of the arresting agency, the presiding judge where the conviction was entered, and the County, District or City Attorney where the case was prosecuted. Notice may also be posted in a public place in the jurisdiction where the conviction occurred. The Board may grant a conditional pardon or an unconditional pardon. The petitioner will be notified in writing of the results as soon as practicable.

D. The Board may dispense with any requirement created by this policy if good cause exists.

R671. Pardons (Board of), Administration.
R671-316. Redetermination.
R671-316-1. Redetermination Review.

Offenders are eligible to apply for redetermination at five-year intervals from the last time-related decision. A time-related decision is defined as a personal appearance hearing or redetermination review dealing with release or rehearing dates. Offenders who have been given a decision of natural life in prison will be eligible for redetermination at ten year intervals.

When applying for redetermination, the offender waives personal appearance and accepts that the Board may reduce the time served, request psychological or other assessment, change conditions of release, make no change or increase the time to be served.

Applications for redetermination must originate with and be signed by the offender. Applications may be routed directly to the Board or preferably be submitted through the offender's caseworker. In either event, the Board will request a written progress report to include rationale and recommendation based on the Department of Corrections' assessment. The Department of Corrections should provide these materials to the Board in a timely manner.

R671. Pardons (Board of), Administration.
R671-402. Special Conditions of Parole.
R671-402-1. General.

The Board will order special conditions as part of a parole agreement on an individual basis and only if such conditions can be reasonably related to rehabilitation of the offender, the protection of society, or compensation of the victim. The offender will be given an opportunity to respond to proposed special conditions.

At any time, the Board may review an offender at its own initiative or upon recommendation by the Department of Corrections or others and add any special conditions it deems appropriate. The offender shall be afforded a personal appearance before the Board or a Board Hearing Officer to discuss the proposed condition(s) unless that appearance is waived.

R671. Pardons (Board of), Administration.
R671-405. Parole Termination.
R671-405-1. Termination of Parole.

The Board may consider terminating an offender's parole when petitioned to do so by the Department of Corrections, other interested parties or on its own initiative. When considering termination, the Board will toll any parole time when a parolee is an absconder. The toll time will be from the date a Board warrant was issued to the date the warrant was executed.

When a termination is approved by the Board, written notification of the Board's action will be provided to the parolee through the Department of Corrections.

Depending on the crime, statutory periods of parole without violation are three, ten years, the unexpired length of the sentence, or life.

Upon receipt of written notification of the service of the statutory maximum period on parole and verification of that information, the Board of Pardons will then order the closing of the file.

R708. Public Safety, Driver License.
R708-2. Commercial Driver Training Schools.
R708-2-1. Authority.

This rule is authorized by Section 53-3-505.

R708-2-2. Purpose.

Sections 53-3-501 through 509 require the Driver License Division to administer the Commercial Driver Training Schools Act by licensing and regulating commercial driver training schools and instructors of these schools. Rule R708-2 assists the division in implementing these sections.

R708-2-3. Definitions.

(1) "Crime of moral turpitude" means an offense under the statutes of this state or any other jurisdiction, which under the rules of evidence may be used to impeach a witness or includes:

(a) theft;
(b) tax evasion;
(c) issuing bad checks;
(d) deceptive business practices;
(e) perjury;
(f) extortion;
(g) falsifying government records;
(h) receiving stolen property;
(i) sex offenses;
(j) driving under the influence and alcohol related reckless driving;
(k) assault; and
(l) domestic violence offenses.

R708-2-4. Testing Only School Limitations.

(1) A testing only school may conduct behind-the-wheel or observation instruction, or both, upon approval by the division.

(2) A testing only school may not engage in education or training of persons, either practically or theoretically, to drive motor vehicles except under one of the following circumstances:

(a) when counseling the driver following a test in reference to errors made during the administration of the test; or

(b) when conducting behind-the-wheel or observation instruction as approved by the division.

(3) A tester may not test an individual who has completed any behind the wheel or observation instruction through the testing only school with which the tester is employed.

R708-2-5. Licensing Requirement for a Commercial Driver Training School.

(1) Every corporation, partnership or person who owns a commercial driver training school shall obtain a license from the division. Commercial driver training school license applications may be obtained from the Driver License Division at 4501 South 2700 West, Salt Lake City, Utah. Applicants are also responsible for obtaining any business licenses required by the municipality or county in which they are located. Commercial driver training School and business licenses must be conspicuously displayed in the licensee's principal place of business and branch offices. Each commercial driver training school shall be inspected by a division representative before it can be licensed.

(2) A license expires one year from the date of issued. The fee for an original license is $100. The annual fee for a renewal license is $100. The annual fee for each branch license is $30. Fees shall be payable to the Department of Public Safety. When a license is revoked, refused issuance, or reinstatement, no part of the fee will be refunded.

(3) Licenses are not transferable.

(4) When a license is lost or destroyed, a duplicate shall be issued upon payment of a fee of $10. A notarized affidavit setting forth the date the license was lost or destroyed and the surrounding circumstances shall be submitted to the division.

(5) When any commercial driver training school or branch office is discontinued, the commercial driver training school or branch office license shall be surrendered to the division within five days. The licensee shall state in writing the reason for the surrender.

(6) Any branch office or classroom facility in a location other than the commercial driver training school's principal place of business shall be separately licensed. A branch office shall meet the same requirements as the commercial driver training school's principal place of business and shall be similarly equipped and perform substantially the same services. Application for a branch office license shall be made on an application form provided by the division. Branch offices shall be inspected by a division representative before they may be licensed.

(7) Before becoming licensed, each commercial driver training school shall employ a licensed operator to operate the commercial driver training school and each branch office. The current licensed operator shall be identified on the application maintained by the division for each commercial driver training school or branch office. A single operator may operate multiple branch offices of the same school. When the operator discontinues employment with the commercial driver training school, a new operator shall be employed before continuation of operations and the operations of any branch offices for which the individual has been identified as the operator.

(a) An individual may not be employed with more than one commercial driver training school or testing only school at a time.

(8) Unless one school has been designated by the division as a testing only school, two or more schools owned by separate individuals and owned under different school names may not operate from the same facility or office space. A clear separation of the schools shall be identified, and each school shall comply with standards set forth in Rule R708-2.

(9) Each school or classroom facility shall post signs to identify the school by name as the school is listed on the school certification.

R708-2-6. Licensing Requirement for a Testing Only School.

(1) Every corporation, partnership or person who owns a testing only school shall obtain a school license from the division. School license applications may be obtained from the Driver License Division at 4501 South 2700 West, Salt Lake City, Utah. Applicants are also responsible for obtaining any business licenses required by the municipality or county in which they are located. School and business licenses must be conspicuously displayed in the licensee's principal place of business and branch offices. Each school shall be inspected by a division representative before it may be licensed.

(2) A license expires one year from the date of issue. The fee for an original license is $100. The annual fee for a renewal license is $100. The annual fee for each branch license is $30. Fees shall be payable to the Department of Public Safety. If a license is revoked, refused issuance, or reinstatement, no part of the fee will be refunded.

(3) Licenses are not transferable.

(4) When a license is lost or destroyed, a duplicate shall be issued upon payment of a fee of $10. A notarized affidavit setting forth the date the license was lost or destroyed and the surrounding circumstances shall be submitted to the division.

(5) When any school or branch office is discontinued, the school or branch office shall surrender its license to the division within five days. The licensee shall state in writing the reason for surrender.

(6) Any branch office in a location other than the school's principal place of business shall be separately licensed. A branch office shall meet the same requirements as the school's

principal place of business and shall be similarly equipped and perform substantially the same services. Application for a branch office license shall be made on an application form provided by the division. A division representative shall inspect branch offices before they may be licensed.

(7) An individual may not be employed with more than one commercial driver training school or testing only school at a time.

(8) Unless one school has been designated by the division as a testing only school, two schools owned by separate individuals and owned under different school names may not operate from the same facility or office space. A clear separation of the schools shall be identified, and each school shall comply with standards set forth in Rule R708-2.

(9) Each school or classroom facility shall post signs to identify the school by name as the school is listed on the school certification

(10) It is not required that a testing only school maintain a classroom facility in the school or branch office location. A testing only school location and branch office shall have a designated area in which to maintain required files and records.

R708-2-7. Application for a Commercial Driver Training School License or a Testing Only School License.

(1) Application for an original or renewal commercial driver training school license or a testing only school license shall be made on forms provided by the division, signed by the applicant, and notarized. In the case of a partnership, the application shall be signed by each partner.

(2) In the case of a corporation, the application shall be signed by an officer of the corporation. Applications must be submitted at least 60 days prior to licensing. An appointment shall be made when the application is filed to have the school inspected by a division representative.

(3) Every application shall be accompanied by the following supplementary documents:

(a) samples of each form, receipt, and curriculum to be used by the school;

(b) a schedule of fees for each services to be performed by the school;

(c) a fingerprint card for each applicant, partner or corporate officer. A Bureau of Criminal Identification check shall be done by the division on each applicant, partner, and corporate officer. Applicants are responsible for paying the cost associated with the criminal history check. Fingerprints may be taken by any law enforcement agency. The division may require renewal applicants to submit new fingerprint cards and pay the cost associated with the criminal history check;

(d) a certificate of insurance for each vehicle used for driver training or testing purposes;

(e) a copy of each test and criterion, with answers, that the school requires in order for a student to satisfactorily complete the driver training course which are subject to approval of the division; including copies of translations;

(f) evidence that a surety bond has been obtained by the school in compliance with Section R708-2-8; and

(g) a certified copy of a certificate of incorporation as required in a case of a corporation.

(4) The division may require that a credit check be performed for each applicant. Based on the results of the credit check, the division may deny certification.

R708-2-8. Surety Bond Requirements.

(1) The amount of the surety bond shall be determined by the division with the use of a formula that incorporates the number of students that the school is capable of instructing over a period of three months based on its facility, equipment, personnel, and the tuition that would be collected from each student, with a minimum requirement of $5,000 coverage and a maximum requirement of $60,000 coverage.

(2) When, at any time, there is a change in the number of instructors, the number of vehicles, or the size of the classroom facility, the division shall reevaluate the amount of the required surety bond and adjust it accordingly.

(3) Cancellation of the surety bond is grounds for revocation, probation, or refusal to issue or renew the school license. A school designated by the Department of Public Safety as a testing only school may not be required to obtain a surety bond unless it has been authorized by the division to conduct behind-the-wheel training.

(4) A school that does not charge tuition for driver education is not required to maintain a surety bond.

R708-2-9. Application Requirements for a Commercial Driver Training School Instructor License.

(1) Every person who serves as an instructor in a commercial driver training school, including the owner, operator, partner or corporate officer of the licensee, substitute or part-time instructor, shall obtain an instructor's license from the division. This license shall be valid only for the specific driver training school listed on the license.

(2) A license expires one year from issue date. The fee for an original license is $30. The annual fee for a renewal license is $20. Fees shall be payable to the Department of Public Safety. If a license is revoked, refused issuance, or refused renewal, no part of the fee shall be refunded.

(3) Licenses are not transferable.

(4) When an instructor license is lost or destroyed, a duplicate shall be issued upon payment of a fee of $6. A notarized affidavit setting forth the date the license was lost or destroyed and the surrounding circumstances shall be submitted to the division.

R708-2-10. Application Requirements for a Commercial Driver Training School Operator License.

(1) Every person who serves as an operator of a commercial driver training school, including the owner, operator, partner or corporate officer of the licensee, substitute or part-time instructor, shall obtain an operator license from the division. This license shall be valid only for the specific driver training school listed on the license.

(2) A school operator license is not valid unless accompanied by a valid instructor license.

(a) Requirements for licensure as a school operator include:

(i) six college semester credit hours;

(ii) eight college quarter credit hours in business related courses through an accredited college or university;

(iii) two years experience operating a business; or

(iv) any combination thereof.

(b) An applicant for operator shall submit evidence by form of transcripts or resume as proof of this requirement.

(c) Each potential school operator shall submit to the division a business plan. The plan shall contain written acknowledgement of reading, understanding, and a willingness to comply with Rule R708-2. The plan shall also describe how the school will meet the requirements of R708-2. The division shall approve the business plan prior to licensure.

(d) Individuals functioning in the capacity of a commercial driver training school operator prior to January 1, 2003, shall not be required to comply with Subsection R708-2-10(2)(c).

(3) An expired license expires one year from the date issued.

(4) Licenses are non-transferable.

(5) When an operator license is lost or destroyed, a duplicate shall be issued upon request. A notarized affidavit setting forth the date the license was lost or destroyed and the surrounding circumstances shall be submitted to the division.

R708-2-11. Additional Requirements for Commercial Driver Training School Instructors.

(1) In addition to obtaining a license, a commercial driver training school instructor shall:

(a) have a valid Utah driver license;

(b) be at least twenty one years of age;

(c) have at least three years of driving experience in the United States, Canada, or a country with which the state of Utah has established a license reciprocity agreement;

(d) have a driving record free:

(i) of a conviction for a moving violation; or

(ii) of a chargeable accident resulting in suspension or revocation of the driver license during the two year period immediately prior to application and during employment;

(e) be checked to determine if there is an unsatisfactory driving record in any state;

(f) be in acceptable physical condition as required by Section 12;

(g) complete specialized professional preparation in driver safety education consisting of at least 21 quarter hours, or 14 semester hours of credit as approved by the division. Of the 21 quarter hours or 14 semester hours, one class shall be in teaching methodology and another class shall include basic driver training instruction or organization and administration of driver training instruction;

(h) pass a written test given by the division which may cover the following:

(i) commercial driver training school rules;

(ii) traffic laws;

(iii) safe driving practices;

(iv) motor vehicle operation;

(v) teaching methods and techniques;

(vi) statutes pertaining to commercial driver training schools;

(vii) business ethics;

(viii) office procedures and record keeping;

(ix) financial responsibility;

(x) no fault insurance;

(xi) procedures involved in suspension or revocation of an individual's driving privilege;

(xii) material contained in the "Utah Driver Handbook"; and

(xiii) traffic safety education programs;

(i) pass a practical driving test;

(j) pass the same standard eye test that is given to applicants who apply for a Utah operator or commercial driver license; and

(k) submit a fingerprint card for a criminal history check and pay the cost associated with the criminal history check.

(2) Commercial driver training schools shall be responsible for sponsoring, controlling, and supervising the actions of instructors.

(a) No school may knowingly employ any instructor if the instructor has been convicted of or there are reasonable grounds to believe that the instructor has committed a felony or a crime of moral turpitude.

(3) The instructor's license must be in the possession of the instructor at all times while providing behind-the-wheel or classroom instruction.

R708-2-12. Application and Medical Requirements for a Commercial Driver Training School Instructor License.

(1) Application for an original or renewal instructor's license shall be made on forms provided by the division, signed by the applicant and notarized. Applications shall be submitted at least 60 days prior to licensing.

(2) The original and each yearly renewal application shall be accompanied by a medical profile form provided by the division and completed by a health care professional as defined in Subsection 53-3-302(2).

(3) The medical profile form shall indicate any physical or mental impairments that may preclude service as a commercial driver training school instructor. The physical examinations shall take place no earlier than three months prior to application.

(4) The commercial driver training school desiring to employ the applicant as an instructor shall sign the application verifying that the applicant is employed by the school.

(5) When deemed necessary by the division, an applicant seeking to renew an instructor's license may be required to take a driving skills test.

(6) When deemed necessary by the division, an applicant seeking to renew an instructor license may be required to resubmit a fingerprint card for a criminal history check and pay the cost associated with the criminal history check.

R708-2-13. Additional Training Requirements.

All holders of school licenses, operator licenses, and instructor licenses may at the discretion of the division be required to attend training by the division regarding new statutes or rules.

R708-2-14. Classroom and Behind-The-Wheel Instruction.

(1) Classroom instruction for students shall meet or exceed 18 hours and shall be conducted in not less than nine separate class sessions on nine separate days of two hours per class. Each classroom session shall be numbered to be identified on the student record. Classroom curriculum may not be repeated in any of the nine sessions provided to a student except in the form of a review of materials covered in a previous classroom session.

(a) The time frame allotted for review is not to exceed 10 ten minutes per classroom session. Not more than five of the classroom hours may be devoted to showing slides or films. Instructors shall not use or do anything that may distract their attention away from the classroom instruction,. For example, use of phones or other electronic devices, reading, sleeping, or helping walk-in customers while conducting any classroom training.

(b) Classroom instruction shall cover the following areas:

(i) attitudes and physical characteristics of drivers;

(ii) driving laws with special emphasis on Utah law;

(iii) driving in urban, suburban, and rural areas;

(iv) driving on freeways;

(v) basic maintenance of the motor vehicle;

(vi) affect of drugs and alcohol on driving;

(vii) motorcycles, bicycles, trucks, and pedestrian's in traffic;

(viii) driving skills;

(ix) Utah's motor vehicle laws regarding financial responsibility and no fault insurance, and a driver's responsibility when involved in an accident; and

(x) suspension or revocation of a driver license.

(2) Behind-the-wheel includes instruction a student receives while driving a commercial driver training vehicle or while operating a driving simulator. Instruction shall include a minimum of six hours of instruction in a dual-control vehicle with a licensed instructor. Each student shall be limited to a maximum of two hours of behind-the-wheel instruction per day. An instructor may not conduct more than ten hours of behind-the-wheel instruction within a period of 24 hours and must have at least eight consecutive hours of off-duty time between each ten hour shift.

(a) The instructor and no more than one student shall occupy the front seat of the vehicle. Under no circumstances shall there be more than five individuals in the vehicle. Instructors shall not use or do anything that may distract their attention away from the student driver. Instructors may not use cellular phones or other electronic devices, read, sleep, or

engage in other similar distracting behaviors while conducting behind-the-wheel training.

(b) behind-the-wheel instruction shall include student practice in using vehicle controls to start, shift gears, make right and left turns, stop, backup, and park. This instruction shall begin under relatively simple conditions and progress until the student has acquired reasonable skill in operating the vehicle under varying traffic conditions;

(c) students shall receive experience in driving on urban streets, open highways, or freeways. Behind-the-wheel instruction shall include the experience of driving under variable conditions which may be used by the instructor at different times of the day and year. Special emphasis should be given to teaching students to show courtesy to other drivers and pedestrians;

(d) students may receive behind-the-wheel training in a driving simulator. If the simulator is fully interactive the student will receive behind-the-wheel training in the ratio of two hours driving the simulator and receive one hour of behind-the-wheel driving. If the simulator is non-fully interactive the student will receive behind-the-wheel training in the ratio of four hours driving the simulators and receive one hour of behind-the-wheel driving. An instructor shall be present at all times during all simulator training. The division shall approve all simulators prior to training.

(e) each student will be limited to a maximum of either two hours of behind-the-wheel instruction or two hours of simulation instruction per day;

(f) students shall receive a minimum of six hours of observation time to observe the instructor, other student drivers and other road users. This instruction may include instructor demonstrations, for which hour for hour credit will be given, and may not exceed two hours per day. Students observing from the rear seat, as well as the student driver, should benefit from time in the vehicle. The instructor's role is not merely to provide driving experience for the student behind-the-wheel, but to make the vehicle a practical classroom on wheels where all students may learn about the problems which face a driver and the appropriate solution to such problems;

(g) behind-the-wheel instruction may not be conducted for a student unless the student has been issued a learner permit by the division or the student is in possession of a valid Utah driver license, a temporary permit issued by the division, or a valid out of state or out of country driver license; and

(h) while conducting behind-the-wheel instruction, students and instructors shall adhere to any driving restrictions listed on the learner permit.

(3) All classroom and behind-the-wheel instruction shall be conducted by an individual who is licensed as a commercial driver training school instructor as specified in Rule R708-2.

(a) Unless the division grants approval to a commercial driver training school to provide classroom instruction from an unlicensed expert, such as a police officer on a limited basis, the school may not conduct classroom or behind-the-wheel instruction or allow another individual to conduct classroom or behind-the-wheel instruction without an instructors license.

(4) Commercial driver training schools shall provide each student a copy of the current Utah Driver Handbook. The handbook may not be used as the sole text of the course, but as an essential aid when Utah traffic laws are studied. Handbooks may be obtained by the commercial driver training schools from the division.

R708-2-15. Extended Learning Course.

(1) A commercial driver training school may offer an extended learning course of instruction as a substitute for the classroom instruction set forth in Section R708-2-11 provided an institution of higher learning and the division approve the course.

(2) An institution of higher learning shall direct any operations of an extended learning course. The institution of higher learning shall notify the division in writing when it has approved a commercial driver training school's extended learning course. The institution of higher learning will monitor any approved extended learning course to ensure the course runs as originally planned.

(a) The institution of higher learning shall notify the division of any substantive changes in the course as well as any approval of changes. The institution of higher learning may approve the extended learning course of more than one commercial driver training school.

(3) An extended learning course shall consist, at a minimum, of:

(a) a text;

(b) a workbook; and

(c) a 50 question competency test that addresses the subjects described in Subsection R708-2-11.

(4) All materials, including texts, workbooks, and tests, used in the course shall be submitted by the commercial driver training school to the division for approval.

(5) The average study time required to complete the workbook exercises shall meet or exceed 30 hours.

(6) An extended learning student must complete all workbook exercises.

(7) An extended learning student shall pass the 50 question written competency test with a score of 80% or higher.

(8) Testing shall occur under the following conditions:

(a) the extended learning student shall take the test at the commercial driver training school or proctored testing facility approved by the division;

(b) the identity of the extended learning student shall be verified by the licensed instructor prior to testing;

(c) the extended learning student shall complete the test without any outside help;

(d) the commercial driver training school shall maintain, at least, three separate 50- question competency tests created from a test pool of at least 200 questions;

(e) the extended learning student shall be given a minimum of three opportunities to pass the test. After each failure, the commercial driver training school or approved proctored testing facility shall provide the student with additional instruction to assist the student to pass the next test;

(f) the original fees for the course shall include the three opportunities to pass the test and any additional instruction required;

(g) an extended learning student shall pass the test in order to complete driver training; and

(h) the commercial driver training school shall maintain for four years records of all tests administered. Test records shall include the results of all tests taken by every student.

R708-2-16. Completion Certificates.

(1) Upon completion of the requirements of the driver training course, the commercial driver training school shall release to the student a form consisting of a certificate of training and a certificate of completion that shall be signed by the instructor.

(2) The student shall present the certificate of completion to the division when the student makes application for a driver license.

(3) Duplicate certificates of completion may be obtained for $5.

(4) After the division has provided notice to a commercial driver training school of intent for agency action to occur, it is a violation of Rule R708-2 for the commercial driver training school to allow students to enroll in a driver training course to accept money from students.

(5) In the event the division revokes or refuses licensure

renewal to the commercial driver training school, access to the division record keeping program will be denied immediately.

R708-2-17. Commercial Driver Training Vehicles.

(1) Commercial driver training vehicles used for behind-the-wheel instruction shall be properly registered, maintained in safe mechanical condition, and equipped with the following:

(a) functioning dual control brakes;

(b) outside and inside mirrors for the driver for the purpose of observing rearward;

(c) inside mirror for the instructor, for the purpose of observing rearward;

(d) a separate seat belt for each occupant;

(e) functioning heaters and defrosters; and

(f) a functioning fire extinguisher, first aid kit, safety flares and reflectors.

(2) Students shall receive instruction in either standard shift or automatic transmission vehicles. The commercial driver training school shall have the option of choosing the type of transmission.

(3) If instruction is given in snow or on icy road surfaces, tire chains or snow tires shall be used in compliance with local police or highway patrol recommendations.

(4) Vehicles shall be capable of passing a state safety inspection at all times during their instructional use. Failure to maintain a vehicle in safe operating condition is grounds for the revocation of the license of the commercial driver training school operating the vehicle. The division may require additional safety testing of the vehicle in addition to the state safety inspection. The commercial driver training school will be responsible for any additional costs that may be assessed.

(5) Vehicles unable to meet safety standards shall be replaced by the commercial driver training school.

(6) It is the responsibility of the commercial driver training school to notify the division of any vehicle added to or deleted from their fleet. No vehicle may be used for driver training until it passes inspection by the division.

(7) Each vehicle used by a commercial driver training school for driver training shall be properly identified to safeguard against accidents. A vehicle is properly identified when the words "STUDENT DRIVER" are displayed on the front and rear and on both the left and right sides of the vehicle. The letters shall be at least three inches in height.

(8) Advertising or other markings on the vehicle for identifying or advertising the commercial driver training school shall be approved by the division and should not distract from the words "STUDENT DRIVER".

R708-2-18. Notification of Accident.

If any driver training vehicle is involved in an accident during the course of instruction, the commercial driver training school shall notify the division in writing within five working days of the date of the accident and submit to the division a copy of the investigating law enforcement officer's accident report as soon as it is available.

R708-2-19. Insurance.

(1) Each commercial driver training school or testing only school must file with the division evidence of the minimum required insurance with an insurance company authorized to do business in Utah. Each commercial driver training school or testing only school shall maintain suitable insurance coverage on each vehicle used in the driver training program sufficient to protect the instructor, students, and the public. The minimum insurance coverage is that required by the Utah Insurance Code, in Title 31A, Chapter 22, Part 3.

(2) The insurance company supplying the policy shall furnish to the division a certificate of insurance and shall notify the division immediately upon cancellation of the insurance. Operation of a vehicle without the required minimum insurance coverage shall be grounds for revocation of the license.

R708-2-20. Contracts.

(1) A student shall not be given lessons, lectures, tutoring or any other service relating to instruction in driver training, unless a written contract approved by the division has been executed by the commercial driver training school and the student.

(a) Both the student and a representative of the commercial driver training school authorized to enter into a contract and listed on the application shall sign the contract. When the student is under 18 years of age, the contract shall also be signed by a parent or legal guardian prior to any instruction.

(2) A copy of the contract shall be given to the student and the original retained by the commercial driver training school.

(3) The commercial driver training school shall provide the student with a receipt upon payment. The commercial driver training school shall maintain a copy of all receipts.

R708-2-21. Records.

(1) Each commercial driver training school shall use the division's record keeping computer program to maintain the following:

(a) records for all students showing name, date of birth, type of training, date, exact time of day for the beginning and ending of all training administered;

(b) names of the instructors giving lessons or instruction; and

(c) identification of the vehicle license plate number or simulator in which any behind-the-wheel and observation instruction is given.

(2) Records shall be updated within 24 hours of instruction for each student.

(a) maintain original copies of the student contracts and receipts, current vehicle insurance information, and surety bond information;

(3) Each commercial driver training school:

(a) shall maintain accurate and current records;

(b) shall review the records of all schools at least annually; and

(c) may observe the instruction given both in the classroom and behind the wheel.

(4) The division shall review the operation of the commercial driver training school when the division deems necessary.

(5) The loss or destruction of any record that a commercial driver training school is required to maintain shall be immediately reported by affidavit stating:

(a) the date the record was lost or destroyed; and

(b) the circumstances involving the loss or destruction.

(6) The commercial driver training school shall retain all records for four years.

(7) When deemed necessary by the division, the commercial driver training school shall make the records available for the purpose of conducting an audit.

(a) When making the records available for audit purposes, the division shall provide a receipt to the commercial driver training school operator which will include:

(i) the name and location of the commercial driver training school;

(ii) the date of removal of records;

(iii) information that specifies all records removed;

(iv) the signature of the operator; and

(v) the signature of a division representative.

(8) Upon return of the records, the receipt shall be updated to reflect the date the records were returned, the signature of the operator, and the signature of the division representative

returning the records.

(9) The division shall hold the records for the minimum amount of time necessary so an audit may occur without creating an unnecessary hardship or inconvenience.

(a) Each commercial driver training school shall provide all records to the division immediately upon request for the purpose of an audit or review. When a hearing occurs subsequent to an audit, records not provided by the commercial driver training school at the time of the audit may not be considered as evidence during the hearing.

R708-2-22. Advertising and School Location.

(1) Commercial driver training schools and testing only schools may not imply or expressly guarantee that a driver license is assured. The display of a sign such as "Driver License Secured Here" is prohibited.

(2) A commercial driver training school or testing only school may display on its premises a sign reading, "This School is Licensed by the State of Utah."

(3) No commercial driver training school or testing only school may solicit business directly or indirectly or display or distribute any advertising material within 1500 feet of a building in which vehicle registrations or driver licenses are issued to the public.

(4) In municipalities having a population of 50,000 or more, no license will be issued for a commercial driver training school or testing only school if the school's place of business is located within 1500 feet of a facility in which vehicle registrations or driver licenses are issued to the public. When either school is established in a location prior to the origination of a facility located within 1500 feet of the school in which vehicle registrations or driver licenses are issued to the public, the school may continue operation. However, the school's location may not be transferred to another corporation, partnership, or owner, under the same school name or a different school name.

(5) No commercial driver training school or testing only school may change its place of business or location without prior approval from the division.

(6) Each commercial driver training school shall provide classroom space, either in its own building or in any other building approved by the division. The classroom shall have seating for all students, access to sanitary facilities, and appropriate training aids, including blackboards, charts, and projectors. Classroom facilities and buildings shall comply with federal, state, and local building, fire, safety and health codes.

(7) No commercial driver training school or testing only school may use any Department of Public Safety, Driver License Division logos, letterhead, or license recreations as part of their advertising.

R708-2-23. Change of Address, Employees, and Officers.

(1) A commercial driver training school or testing only school shall immediately notify the division in writing when there is any change in residence or business address of owner operator, partner, officer, or employee of the school.

(2) The commercial driver training testing only school shall immediately notify the division in writing when there is any change in the owner or the operator and shall provide the same information that would be required on an original application by the corporation.

(3) Failure to notify the division of any change of address, of the owner or the operator is grounds for revocation of the school license.

(4) The commercial driver training school or testing only school shall immediately notify the division in writing of any employee no longer employed by the school. Failure to notify the division of change is grounds for revocation.

R708-2-24. Change in Ownership.

(1) When any ownership change occurs in the commercial driver training school or testing only school, the school shall immediately notify the division in writing by the new owner and a new application shall be submitted.

(a) An application shall be considered a renewal when one or more of the original licensees remain part owner of the school. When the change in ownership involves a new applicant not named in the application for the last current license or renewal license of the school, the license shall be considered a new application.

(2) The division may permit continuance of the commercial driving training school or testing only school by the current licensee, pending processing of the application made by the new applicant to whom ownership of the school is to be transferred.

(3) Upon issuance of the new license, the prior license shall be immediately surrendered to the division. Refund of any part of the license fee is not permitted.

R708-2-25. Grounds for Revocation, Probation or Refusal to Issue or Renew Instructor License, Operator License, or School License.

(1) Following a hearing, the division may revoke, place on probation, or refuse to renew a license for either an instructor or operator of a commercial driver training school or a testing only school.

(a) The division may also refuse to issue a license for an instructor, operator, commercial driver training school or a testing only school.

(b) A license may be revoked, placed on probation or refused for renewal for any of the following reasons:

(i) failure to comply with any of the provisions of Title 53, Chapter 3, Part 5 Commercial Driver Training Schools Act;

(ii) failure to comply with any of the provisions of Rule 708-2;

(iii) cancellation of surety bond as required in Subsection R708-2-8;

(iv) providing false information in an application or form required by the division;

(v) violation of Subsection R708-2-11 pertaining to moving violations or an accident that results in a suspension or revocation of a driver license;

(vi) failure to permit the division or its representatives to inspect any school classroom, record, or vehicle used in instruction;

(c) conviction of a felony, or conviction of or reasonable grounds to believe an instructor has committed, a crime of moral turpitude;

(d) conviction of a felony, or conviction of or reasonable grounds to believe any licensee has committed a crime of moral turpitude; and

(i) failure to appear for a hearing on any of the above charges.

(2) Any proceeding to revoke, place on probation, or refuse to issue or renew an instructor license, operator license, commercial driver training school license or a testing only school license is an informal adjudicative proceeding under the Utah Administrative Procedures Act, Section 63G-4-202.

(3) Any licensee who has had a license revoked shall not be eligible to reapply for a license until six months have elapsed since the date of the revocation. The applicant shall complete an application for an original license and meet all applicable requirements for an original license. In addition to the other fees provided in Subsection R708-2-5, the licensee shall be required to pay a $75 reinstatement fee for each license revoked to the division upon application for reinstatement.

(a) Upon receipt of a completed application for an instructor license, operator license, commercial driver training

school license or a testing only school, and applicable documentation and fees, the division shall conduct a review process as established by the division director in order to determine eligibility for reinstatement or re-licensure.

(b) Notice of final decision shall be in writing by the division within twenty days of receipt of evidence that all requirements have been met for reinstatement or re-licensure.

(c) When a request for reinstatement is denied, the applicant shall have an opportunity to request a hearing in writing within five days of receipt of the final decision of the division.

R708-2-26. Procedures Governing Informal Adjudicative Proceedings.

(1) The following procedures will govern informal adjudicative proceedings:

(a) the division shall commence an action to revoke, place on probation, or refuse to issue or renew a license by the issuance of notice of agency action. The notice of agency action shall comply with the provisions of Subsection 63G-4-201;

(b) no response is required to the notice of agency action;

(c) an opportunity for a hearing shall be granted on a revocation, probation or refusal to issue or renew a license when the division receives in writing a proper request for a hearing;

(d) the division will send written notice of a hearing to the licensee or applicant at least ten days prior to the date of the hearing;

(e) no discovery, either compulsory or voluntary, shall be permitted prior to the hearing except that all parties shall have access to information in the division's files, and to investigator information and materials not restricted by law;

(f) the division shall designate an individual or panel to conduct the hearing; and

(g) within twenty days after the date of the close of the hearing or after the failure of a party to appear for the hearing, the individual or panel conducting the hearing shall issue a written decision which shall constitute final agency action. The decision shall state the decision, the reason for the decision, notice of right to request reconsideration under Subsection 63G-4-302, notice of right of judicial review under Subsection 63G-4-402, and the time limits for filing an appeal to the appropriate district court.

(2) A commercial driver training school, after being notified of the division's intent to take action, may not transfer any contracts, records, properties, training activities, obligations, or licenses to another party.

(3) If a commercial driver training school license is revoked, placed on probation or refused renewal, the existing classroom, behind-the-wheel, and observation training hours may not be transferred to another school for completion.

(4) If a commercial driver training school license is revoked or refused renewal under the emergency provisions of the school shall not be authorized to conduct business unless otherwise determined at a hearing.

(5) If an instructor license is revoked, placed on probation, or refused renewal under the emergency provisions of Section 63G-4-502, and the school license is valid, the school may continue operation provided that an instructor employed by the school with a valid instructor license ensures operation does not compromise public safety.

(6) If an operator license is revoked, placed on probation, or refused renewal under the emergency provisions of Section 63G-4-502, and the school license is valid, the school may continue operation provided that an operator employed by the school with a valid operator license ensures operation does not compromise public safety.

(7) An instructor license, operator license, commercial driver training school license or a testing only school license may be placed on probation upon approval of the director of the division or designee.

(a) Any licensee placed on probation shall be subject to a period of close supervised probation conditions to be determined by the division. During a period of probation, provided that the terms of the probation agreement are adhered to by the probationer licensee. The instructor license, operator license, commercial driver training school license or a testing only school license shall remain intact and the instructor, operator, or school will be allowed to continue operation.

KEY: driver education, schools, rules and procedures
August 8, 2008 53-3-505
Notice of Continuation January 20, 2012

R708. Public Safety, Driver License.

R708-3. Driver License Point System Administration.

R708-3-1. Purpose.

The purpose of this rule is to establish procedures for the administration of a point system for drivers age 21 and older as mandated by Subsection 53-3-221(4) and a point system for drivers age 20 and younger as mandated by Subsection 53-3-209(2).

R708-3-2. Authority.

This rule is authorized by Subsections 53-3-209(2), 53-3-221(4), and 63G-4-203(1).

R708-3-3. Definitions.

(1) "Defensive driving course" means a course sponsored and conducted by a certified designee of the National Safety Council which allows the division to grant a 50 point reduction from the driving records of drivers who successfully complete the course.

(2) "Division" means the Driver License Division of the Utah Department of Public Safety.

(3) "License" means the privilege to drive a motor vehicle.

(4) "Probation" means a division sanction whereby a driver is permitted to drive by complying with certain terms and conditions established by the division.

(5) "Provisional license" means a driving privilege issued by the division to a person younger than 21 years of age.

R708-3-4. Point Assignment.

(1) In compliance with Subsection 53-3-221(4), the division shall determine a number of points to be assigned to each moving traffic violation as a measure of the violation's seriousness.

(2) In compliance with Subsection 53-3-221(4)(c), the driving record of the driver will be assessed 35 points for minimum speeding violations, 55 points for intermediate speeding violations, and 75 points for maximum speeding violations. Since excessive speed has been demonstrated by the National Safety Council and the Department of Public Safety's Utah Traffic Accident Summary to be a leading contributing factor in causing vehicular accidents, the division has determined that the assessing of no points for minimum speeding violations would be detrimental to public safety.

(3) The Driver License Division, Utah Department of Public Safety, shall make available for public review and inspection at the division office, reception desk, 4501 South 2700 West, Salt Lake City, Utah 84130-0560 a listing of the number of points assigned to moving traffic violations and the length of time that the violations remain on the record.

(4) Moving traffic violations which require mandatory sanction by law or rule are assigned 0 points.

R708-3-5. Point Increase or Decrease.

(1) Total points accumulated will be increased or decreased by the following means:

(a) a 10% increase or decrease in points assigned to any moving violation, except speed violations in accordance with Subsection 53-3-221(4)(b);

(b) a 50 point decrease once in a three year period after successfully completing a defensive driving course as defined in this rule;

(c) a 50% point decrease after one year of violation free driving in accordance with Subsection 53-3-221(4)(d); and

(d) a 100% point decrease after two years of violation free driving in accordance with Subsection 53-3-221(4)(d).

(2) The assigned points for any moving traffic violation will be dropped three years after the violation occurred in accordance with Subsection 53-3-221(4)(d).

(3) The point total after a sanction for drivers under age 21 will decrease to 35 points except when the point total is already below 35.

(4) The point total after a sanction for drivers age 21 and older will decrease to 125 points except when the point total is already below 125 in accordance with this rule.

R708-3-6. Point System Thresholds for Drivers Age 21 and Older.

(1) Upon receiving notice of a court conviction of a moving traffic violation, the division will post the violation to the driving record of the individual convicted, along with the points assigned to the violation, as designated in the code violation table.

(2) The division will use the following point thresholds to determine the severity of the sanction to be levied against the driver:

(a) 150 to 199 points: driver is sent a warning letter;

(b) 200 points: driver must appear for a hearing;

(c) 200 to 299 points: driver may be placed on probation or suspended for three months;

(d) 300 to 399 points: driver is suspended for 3 months;

(e) 400 to 599 points: driver is suspended for 6 months; and

(f) 600 or more points: driver is suspended for 1 year.

(3) A driver who is within a designated threshold may be considered for action at a lower threshold if completion of the defensive driving course has lowered the point total to that lower threshold.

(4) The suspension time is doubled, up to a maximum of one year, for a second or subsequent suspension within a three year period.

R708-3-7. Separate Point System for Provisional Licensed Drivers.

(1) In compliance with Subsection 53-3-209(2), a separate point system is established to facilitate behavioral influence upon drivers age 20 and younger. The point thresholds are designed to take remedial action earlier than is provided for drivers who are age 21 and older.

(2) In compliance with Subsection 53-3-209(2), and in conjunction with the consideration of point totals, the division may counsel a driver with regards to the development of safe driving attitudes, habits, and skills.

R708-3-8. Point System Thresholds for Provisional Licensed Drivers.

(1) Upon receiving notice of a court conviction of a moving traffic violation, the division will post the violation to the driving record of the individual convicted, along with the points assigned to the violation, as designated in the code violation table.

(2) The division will use the following point thresholds to determine the severity of the sanction to be levied against the driver:

(a) 35 to 69 points: driver is sent a warning letter;

(b) 70 points: driver must appear for a hearing;

(c) 70 to 139 points: driver may be placed on probation or denied for 30 days;

(d) 140 to 199 points, or violation of probation for the first time in a three year period: driver may be denied for 30 days;

(e) 140 to 199 points for a second time in a three year period or a second probation violation in a three year period: driver may be denied for 60 days;

(f) 140 to 199 points for a third time in a three year period or a third probation violation in a three year period: driver may be suspended for 90 days;

(g) 200 to 249 points: driver is suspended for 60 days;

(h) 250 to 349 points: driver is suspended for 90 days;

(i) 350 to 449 points: driver is suspended for 6 months;

and

(j) 450 or more: driver is suspended for 1 year.

(3) A driver who is within a designated threshold may be considered for action at a lower threshold if completion of the defensive driving course has lowered the point total to that lower threshold.

(4) In accordance with Subsection 53-3-209(2)(b)(iii), the first two sanctions within a three year period will deny a driving privilege unless the point total is 200 or more. A third or additional sanction within a three year period will result in a suspension at the next highest threshold, which doubles in length for each succeeding sanction within the three year period up to a maximum of one year.

R708-3-9. Hearing.

Drivers who are sanctioned under the provisions of this point system rule are entitled to a hearing in accordance with Subsection 53-3-221(5)(a)(i) and R708-35.

KEY: traffic violations, point-system
August 17, 2004 53-3-209(2)
Notice of Continuation January 9, 2012 53-3-221(4)

R708. Public Safety, Driver License.

R708-7. Functional Ability in Driving: Guidelines for Physicians.

R708-7-1. Purpose.

The purpose of this rule is to establish standards and guidelines to assist health care professionals in determining who may be impaired, the responsibilities of the health care professionals, and the driver's responsibilities regarding their health as it relates to highway safety.

R708-7-2. Authority.

This rule is authorized by Sections 53-3-224, 53-3-303, 53-3-304, and 49 CFR 391.43.

R708-7-3. Definitions.

(1) "Board" means the Driver License Medical Advisory Board created in Section 53-3-303.

(2) "Division" means the Driver License Division.

(3) "Health care professional" means a physician or surgeon licensed to practice medicine in the state, or when recommended by the Medical Advisory Board, may include other health care professionals licensed to conduct physical examinations in this state.

(4) "Impaired person" means a person who has a mental, emotional, or nonstable physical disability or disease that may impair the person's ability to exercise reasonable and ordinary control at all times over a motor vehicle while driving on the highway. It does not include a person having a nonprogressive or stable physical impairment that is objectively observable and that may be evaluated by a functional driving examination.

R708-7-4. Health and Driving.

(1) Every driver operating a vehicle is individually responsible for their health when driving. Each applicant for a Utah driver license shall be required to answer personal health questions related to driving safety in accordance with recommendations made by the Driver License Medical Advisory Board pursuant to the provisions of Section 53-3-303(8). If the applicant experiences a significant health problem, the applicant is required to take a medical report form furnished by the division to a health care professional who provides all requested information, including a functional ability profile that reflects the applicant's medical condition.

(2) The health care professional will be expected to discuss the applicant's health as it may affect driving abilities and to make special recommendations in unusual circumstances. Based upon a completed functional profile, the division may deny driving privileges or issue a license with or without limitations in accordance with the standards described in this rule and lists, tables, and charts incorporated herein. Health care professionals have a responsibility to help reduce unsafe highway driving conditions by carefully applying these guidelines and standards, and by counseling with their patients about driving under medical constraints.

R708-7-5. Driver's Responsibilities.

(1) The 1979 Utah State Legislature has defined driver operating responsibilities in Section 53-3-303, related to physical, mental or emotional impairments of drivers. Drivers are:

(a) responsible to refrain from driving if there is uncertainty caused from having a physical, mental or emotional impairment which may affect driving safety;

(b) expected to seek competent medical evaluation and advice about the significance of any impairment that relates to driving vehicles safely; and

(c) responsible for reporting a "physical, mental or emotional impairment which may affect driving safety" to the Driver License Division in a timely manner.

R708-7-6. Health Care Professional's Responsibilities.

(1) Pursuant to Section 53-3-303, health care professionals shall:

(a) make reports to the division respecting impairments which may affect driving safety when requested by their patients. Nevertheless, the final responsibility for issuing a driver license remains with the director of the division;

(b) counsel their patients about how their condition affects safe driving. For example, if medication is prescribed for a patient which may cause changes in alertness or coordination, the health care professional shall advise the patient about how the medication can affect safe driving, and when it would be safe to operate a vehicle. Or, if a patient's visual acuity drops, the patient should similarly be advised, at least until corrective action has been taken to improve vision; and

(c) in accordance with Section 53-3-303(14)(b), be responsible for making available to their patients without reservation, their recommendations and appropriate information related to driving safety and responsibilities, whether defined by published guidelines or not.

R708-7-7. Driver License Medical Advisory Board.

(1) The Driver License Medical Advisory Board, as per Section 53-3-303, shall advise the director of the division and recommend written functional ability profile guidelines and standards for determining the physical, mental and emotional capabilities of applicants for licenses, appropriate to various driving abilities.

(2) In case of uncertainty of interpretation of these guidelines and standards, or in special circumstances, applicants may request a review of any division decision by a panel of board members. All of the actions of the director and board are subject to judicial review.

(3) In accordance with Section 53-3-303(8),the board shall administer the functional ability profile guidelines, which are intended to minimize such conflicts as the individual's desire to drive and the community's desire for highway safety.

R708-7-8. Persons Authorized to Complete Functional Ability Evaluation Medical Report Form.

(1) Physicians and surgeons licensed to practice medicine may complete the entire Functional Ability Evaluation Medical Report form.

(2) Nurse practitioners and physician assistants, and in accordance with 49 CFR 391.43, physician assistants, advanced practice nurses, doctors of chiropractic and other health care professionals, may perform physical examinations and report their findings on the Functional Ability Evaluation Medical Report form provided that:

(a) they are licensed by the state as health care professionals;

(b) the physical examination does not require advanced or complex diagnosis or treatment; and

(c) in the event that advanced or complex medical diagnostic analysis is required, the licensed health care professional, consistent with sound medical practices, will be expected to promptly refer the patient to the appropriate physician, surgeon or doctor of osteopathy for further evaluation and for completion of the functional ability evaluations certifications report in those categories.

R708-7-9. Functional Ability Profile Categories.

Functional ability of a driver to operate a vehicle safely may be affected by a wide range of physical, mental or emotional impairments. To simplify reporting and to make possible a comparison of relative risks and limitations, the Medical Advisory Board has adopted physical, emotional and behavioral functional ability profiles as defined in 12 separate categories, with multiple levels under each category.

R708-7-10. Use of the Functional Ability Profile.

(1) Health care professionals who evaluate their patients' health status for purposes of the patient obtaining a Utah driver license, shall report functional ability profiles on forms provided by the division.

(2) In assessing patient health and completing these report forms, health care professionals shall apply the standards and related information contained in the following lists, charts, and tables, which standards and guidelines are adopted and incorporated within this rule by reference, and are referred to in a booklet entitled, "Functional Ability in Driving: Guidelines And Standards for Health Care Professionals", (November 2006 ed.). Specific categories are:

(a) "Category A" - diabetes and other metabolic conditions; narrative listing and table;

(b) "Category B" - cardiovascular; narrative listing and table;

(c) "Category C" - pulmonary; narrative listing and table;

(d) "Category D" - neurologic; narrative listing and table;

(e) "Category E" - epilepsy and other episodic conditions; narrative listing and table;

(f) "Category F" - learning, memory and communications; narrative listing and table;

(g) "Category G" - psychiatric or emotional conditions; narrative listing and table;

(h) "Category H" - alcohol and other drugs; narrative listing and table;

(i) "Category I" - visual acuity; narrative listing and table;

(j) "Category J" - musculoskeletal abnormality or chronic medical debility; narrative listing and table;

(k) "Category K" - alertness or sleep disorders; narrative listing and table; and

(L) "Category L" - hearing and balance; narrative listing and table.

(3) Copies of these guidelines are printed in a booklet and distributed by the division. These booklets may be obtained at no cost for health care professionals or $5 per booklet for all other individuals. Copies may be obtained in person or by written request to the Driver License Division Medical Section at P.O. Box 144501, Salt Lake City, Utah 84114-4501.

(4) Report forms completed by a health care professional and received by the division are to be used as a screening tool in assessing an individual's ability to safely operate a motor vehicle.

(a) Some profile levels as identified in the "Functional Ability in Driving: Guidelines And Standards for Health Care Professionals", may result in the division requesting an individual to complete a driving skills test in order to demonstrate the ability to safely operate a motor vehicle before determining whether the individual will maintain the privilege to drive. In some cases when a privilege to drive is granted, driving restrictions may be required in order to ensure public safety.

(b) A health care professional may also request that the division evaluate an individual's driving skill level at the health care professional's discretion.

(5) The division shall notify an individual that their privilege to drive is denied upon receipt of the following:

(a) a medical report that is completed in the categories A, B, C, D, E, F, G, H, J, K, or L, that is profiled at a level "8" in accordance with the "Functional Ability in Driving: Guidelines And Standards for Health Care Professionals", or other documentation which indicates that the health care professional recommends that the individual does not drive; or

(b) a medical report that is completed in the category I that is profiled at a level "10" in accordance with the "Functional Ability in Driving: Guidelines And Standards for Health Care Professionals", or other documentation which indicates that the health care professional recommends that the individual does not drive.

(6) Upon receipt of a notice of denial of the privilege to drive, an individual may request a review of the division's decision by a panel of board members. All of the actions of the director and board are subject to judicial review.

KEY: administrative procedures, health care professionals, physicians

February 19, 2009 **53-3-224**
Notice of Continuation January 9, 2012 **53-3-303**
53-3-304
49 CFR 391.43

R708. Public Safety, Driver License.

R708-8. Review Process: Driver License Medical Section.

R708-8-1. Step One.

When competent evidence is received by the Department that a driver license applicant or licensee has physical, mental or emotional conditions which may impair his ability to safely operate a motor vehicle, the department may act to restrict or deny the applicant or licensee's driving privilege by applying the Driver License Medical Advisory Board's Physician's Guidelines.

The decision to limit or deny privileges may also be based, in part, upon informal consultation between the department and one or more members of the Medical Advisory Board.

R708-8-2. Step Two.

53-3-303 requires the aggrieved applicant or licensee to notify this department of their desire for a medical review of the above action in writing within ten (10) days after the receipt of notice of such action.

R708-8-3. Step Three.

The Department (Driver License - Medical Section) upon receipt of a written request for review, will contact the Driver License Medical Advisory Board chairperson for his recommendation regarding which board members should be contacted to constitute a panel. These members will then be contacted by the department and will be given a time, date and location within sixty (60) days after receipt of the request at which to meet in order to review the medical evidence. The Driver License Division Director or his designate shall also attend the review meeting. Unless otherwise agreed upon, such meetings will be held after regular office hours. The applicant or licensee will be notified by the department of the date on which their case will be reviewed and may submit any type of written, photographic or otherwise documented medical evidence in their behalf to the department for the panel's consideration. The applicant may be requested by the Driver License Medical Advisory Board to appear in person during the review in order to answer questions regarding their medical condition.

The panel shall review the matters and make written findings and conclusions pursuant to which the department shall affirm or modify its previous action. It shall be the policy of the department to adhere as closely as possible to the panel's recommendations regarding licensure of the applicant. The applicant or licensee shall be notified in writing at their last known address of the Department's decision to uphold or modify its original action as soon as possible following the review.

R708-8-4. Step Four.

If new, relevant and heretofore undisclosed medical evidence which is germane to the applicant or licensee's case should develop following the panel's findings and conclusions, such evidence may be presented to the department and the applicant or licensee's case will be reviewed by the department in light of this evidence.

R708-8-5. Step Five.

If the applicant is further aggrieved by the department's decision following the above review process, they may appeal to the courts for judicial review as provided for by Section 53-3-224.

KEY: administrative procedure, legislative procedure
1992 **53-3-303**
Notice of Continuation January 9, 2012 **53-3-224**

R708. Public Safety, Driver License.

R708-14. Adjudicative Proceedings For Driver License Actions Involving Alcohol and Drugs.

R708-14-1. Purpose.

The purpose of this rule is to establish procedures to be used by the Utah Driver License Division for alcohol/drug adjudicative proceedings.

R708-14-2. Authority.

This rule is authorized by Section 53-3-104 and Subsection 63G-4-203(1).

R708-14-3. Definitions.

(1) "Adjudicative proceeding" means any meeting, conference, session or hearing, in person or otherwise, between a person and a presiding officer or designee of the division, that is intended to resolve a dispute.

(2) "Division" means the Driver License Division of the Utah Department of Public Safety.

(3) "Division record" means the entire division file, including written reports received or generated by the division. It also includes, but is not limited to, minutes, written comments, presiding officer's written statements and summaries, testimony, evidence, findings of fact, conclusions of law, recommendations, and orders.

(4) "Hearing" means an alcohol/drug adjudicative proceeding where evidence is considered to determine an issue of fact and to adjudicate a legal right or privilege.

(5) "Presiding officer" means a division employee with authority to conduct alcohol/drug adjudicative proceedings.

(6) "Recording" means documenting, by electronic or other means, the testimony or information presented at an alcohol/drug adjudicative proceeding.

R708-14-4. Designations.

(1) In compliance with Section 63G-4-202, all division alcohol/drug adjudicative proceedings are designated as informal proceedings, unless converted to formal proceedings by a presiding officer or division supervisor.

(2) An informal proceeding may be converted to a formal proceeding only if approved by a division supervisor and only if the conversion will promote efficiency, public safety, and not unreasonably increase cost.

R708-14-5. Authority for Conducting Adjudicative Proceedings.

Alcohol/drug adjudicative proceedings will be conducted in accordance with Sections 41-6a-521, 53-3-223, 53-3-231, 53-3-418, 63G-4-203, and this rule.

R708-14-6. Commencement of Adjudicative Proceedings.

(1) In accordance with Subsection 63G-4-201, alcohol/drug adjudicative proceedings may be commenced by:

(a) a notice of division action, if the proceedings are commenced by the division; or

(b) a request for division action, if the proceedings are commenced by a person other than the division.

(2) A notice of division action and request for division action shall include the information set forth in Subsections 63G-4-201(2)(a) and (3)(a) respectively. In addition, a request for division action shall include the petitioner's full name, date of birth, and the date of arrest or occurrence which prompted the request for division action. A request for division action that is not made timely, in accordance with Subsections 53-3-223(6)(a), 53-3-231(7)(a)(ii), and 53-3-418(9)(b), will not be granted except for good cause as determined by the division.

R708-14-7. Alcohol/Drug Adjudicative Proceedings.

The alcohol/drug adjudicative proceedings deal with the following types of hearings:

(a) driving under the influence of alcohol/drugs (per-se), Section 53-3-223;

(b) implied consent (refusal), Section 41-6a-520;

(c) measurable metabolite in body, Section 41-6a-517;

(d) consumption by a minor (not a drop), Section 53-3-231; and

(e) CDL (.04), Section 53-3-418.

R708-14-8. Hearing Procedures.

(1) Time and place. Alcohol/drug adjudicative proceedings will be held in the county of arrest or a county which is adjacent to the county in which the offense occurred, at a time and place designated by the division, or agreed upon by the parties.

(2) Notice. Notice shall be given as provided in Subsection 53-3-216(4) unless otherwise agreed upon by the parties. Notice shall be given on a form approved by the division and is deemed to be signed by the presiding officer. The notice need only inform the parties as to the date, time, place, and basic purpose of the proceeding. The parties are deemed to have knowledge of the law.

(3) Default. If the driver fails to respond timely to a division request or notice, a default may be entered in accordance with Section 63G-4-209.

(4) Evidence. The parties and witnesses may testify under oath, present evidence, and comment on pertinent issues. The presiding officer may exclude irrelevant, repetitious, immaterial, or privileged information or evidence. The presiding officer may consider hearsay evidence and receive documentary evidence, including copies or excerpts.

(5) Information. The driver shall have access to information in the division file to the extent permitted by law.

(6) Subpoenas. Discovery is prohibited, but the division may issue subpoenas or other orders to compel production of necessary evidence. Subpoenas may be issued by the division at the request of the driver if the costs of the subpoenas are paid by the driver and will not delay the proceeding.

(7) Administrative notice. The presiding officer has discretion to take administrative notice of records, procedures, rules, policies, technical scientific facts within the presiding officer's specialized knowledge or experience, or of any other facts that could be judicially noticed.

(8) Presiding officer. The presiding officer may:

(a) administer oaths;

(b) issue subpoenas;

(c) conduct prehearing conferences by telephone or in person to clarify issues, dispose of procedural questions, and expedite the hearing;

(d) tape record or take notes of the hearing at his/her discretion;

(e) take appropriate measures to preserve the integrity of the hearing; and

(f) conduct hearings in accordance with division policy III-A-3, III-A-4, and III-A-5.

R708-14-9. Findings, Conclusions, Recommendations and Orders.

(1) Within a reasonable period of time after the close of the hearing, the presiding officer will issue a written decision that may include findings of fact, conclusions of law, and a recommendation.

(2) Statements reflecting findings of fact, conclusions of law, and recommendation may be written on forms that utilize a system of check boxes and fill in blanks. The completed form will be transmitted to the presiding officer's supervisor as soon as possible for the preparation of an order that complies with Subsection 63G-4-203(1)(i).

(3) As provided in Subsection 53-3-216(4), the order will

be mailed to the last known address of the driver.

(4) The order shall advise the driver of his/her right to seek a copy of written findings, conclusions, and recommendation of the presiding officer, and these will be made available to the driver only upon written request.

R708-14-10. Reconsideration.

In accordance with Section 63G-4-302 a driver may file a request for reconsideration of the order within 20 days after receiving it. If the division does not issue an amended order within 20 days after receiving the request for reconsideration, the request for reconsideration shall be considered denied, and the driver may seek judicial review in accordance with Section 63G-4-402.

July 6, 2009 53-3-104
Notice of Continuation January 9, 2012 63G-4-203(1)

R708. Public Safety, Driver License.
R708-21. Third-Party Testing.
R708-21-1. Definitions.

"Agreement" means a written agreement between the state and a third-party tester agreeing to conditions contained therein.

"Department" means the Department of Public Safety.

"Division" means the Driver License Division.

"Third-party tester" means a person, an agency of this or another state, an employer, a private driver training facility or other private institution, or a department, agency, or entity of local government with whom the state has an agreement to administer skills tests to commercial drivers.

R708-21-2. Authority and Purpose.

A. This rule is authorized by Sections 53-3-213 and 53-3-407, and 49 Part 383.75 of the Code of Federal Regulations.

B. The purpose of this rule is to establish standards and procedures for third-party testers who enter into an agreement with the state to administer skills tests to commercial drivers.

R708-21-3. Standards and Procedures.

A. Application for third-party tester certification.

1. Application for an original or renewal certification shall be made on a form furnished by the division, and shall include the following:

a. Name of third-party tester.

b. Address of third-party tester.

c. Names of all third-party examiners.

d. Addresses of all testing sites.

e. Third-party agreement.

2. Upon receipt of the application, the division shall schedule an inspection of the third-party tester to determine eligibility, establish test routes, schedule instruction and provide forms.

3. When certified, the third-party tester and all authorized examiners shall be placed on a list which is provided to all state commercial driver license examining stations. A formal letter of certification will be mailed to the third-party tester containing an assigned number to be used on official documents and the expiration date of the certification.

4. Certification shall be for a period of one year. No later than one month prior to expiration of certification, the third-party tester may submit a renewal application to the division which is the same process as applying for an original certification.

B. Agreement - The third-party tester is required to enter into a written agreement with the state to conduct skills tests as required by Federal regulation established in 49 C.F.R. part 383. The agreement must contain provisions that:

1. Allow the Federal Highway Administration or its representative, and/or the division to conduct random examinations, inspections, and audits without prior notice during normal business hours.

2. Allow the division to conduct on-site inspections annually or when deemed necessary by the division.

3. Require that all third-party examiners receive training approved by the division that will allow them to conduct skills tests that are in compliance with Federal minimum standards.

4. Require, at least on an annual basis, that check rides be made by division representatives.

5. The tests given by the third party are the same as those which would otherwise be given by the state.

C. Requirements for third-party testers.

1. To be certified, a third-party tester shall:

a. Make application to and enter into an agreement with the division as provided in Section B of these rules.

b. Maintain a place of business with at least one permanent regularly occupied structure within the state.

c. Ensure place of business is safe and meets all requirements of state law and local ordinances.

d. Have at least one qualified and approved third-party examiner in their employ.

e. Not engage the service of an employee of the division as an examiner, agent, or employee.

D. Inspection and audit process.

1. During inspections a person designated by the third-party tester shall cooperate with the division or Federal representative in performing on-site inspections. On-site inspections shall at a minimum consist of:

a. Verifying third-party examiner requirements as prescribed in section G of this rule.

b. Examination of commercial driver records.

(1) The third-party tester must maintain accurate driver testing records and must be able to furnish them upon request.

(2) These records must be kept for at least four years. All record forms used by the third-party tester shall be approved or furnished by the division.

c. Verifying test routes and procedures for skills testing compliance.

d. Reviewing any other items the division deems necessary to assure that requirements of certification are met.

2. Check rides may be made by any designated division representative to verify compliance with state and Federal minimum testing standards. Check rides by the division may consist of:

a. A division employee taking the skills test as administered by the third-party tester as if such employee was a test applicant.

b. The division administering the skills test to a sample of drivers who were previously examined by the third-party tester to determine if the check ride results are consistent with the third-party tester results.

c. The division administering the skills tests to a third-party testing examiner to verify examiner skills and compliance with state and Federal minimum testing standards.

3. A division representative shall prepare a written report of all inspections, check rides and audits. A copy shall be submitted to the third-party tester and a copy retained by the division.

E. Skill test administration.

1. Skills tests shall be conducted strictly in accordance with the provisions of these requirements and with current test instructions provided by the division. Such instructions may include information on skill test content, route selection/revision, test forms, examiner procedures, and administrative procedures and/or changes.

2. Tests shall be conducted:

a. On test routes approved by the division.

b. In a vehicle that is representative of the class and type of vehicle for which the CDL applicant seeks to be licensed and for which the third-party examiner is qualified to test.

c. Using division approved content, forms and scoring procedures.

F. Certificate of Driver Competency.

1. The division shall supply an official Certificate of Driver Competency form to authorized third-party testers for their use when verifying driving competency and successful skills test completion as required by state and Federal minimum standards.

2. The division upon receipt of the Certificate of Driver Competency form from an approved third-party tester shall waive the skills portion of the application.

3. The certificate shall include the following information:

a. Applicant's name.

b. Applicant's social security number.

c. Description of vehicle in which test was taken.

d. Class of license, restriction and/or endorsement tested for.

e. Authorized third-party examiner signature.

f. Authorized third-party tester name and assigned number.

4. All authorized third-party examiners shall be required to sign a signature card which shall be kept on file by the division for signature verification.

5. Drivers shall submit the Certificate of Driver Competency form to the division within 90 days of the date of the skills test.

G. Third-party examiner requirements.

1. Third-party examiners who are authorized by the division to administer skills test shall:

a. Receive training approved by the division. Third-party examiners need to be aware that any training they receive from private or other organizations may require a training fee. Upon completion of training, third-party examiners shall be issued a certificate of completion.

b. Test and certify only those commercial driver license classes, endorsements, and restrictions that have been approved by the division.

c. Hold a valid driver license with no suspensions, revocations, cancellations or disqualifications within one year prior to application.

d. Conduct skills tests on behalf of only one third-party tester at any given time.

H. Denial, suspension, or cancellation of certification.

1. The division shall deny any application for a third-party tester or examiner certification, if the applicant does not qualify for the certification under provisions of these rules. Misstatements or misrepresentation may be grounds for denying a certification.

2. The division shall cancel the certification of any third-party tester or examiner upon the following grounds.

a. Failure to comply with or satisfy any of the provisions of these rules, the division's instructions or the third-party tester agreement.

b. Falsification of any records or information relating to the third-party testing program.

c. Commission of any act which compromises the integrity of the third-party testing program.

d. Failure to notify the division within ten days of any changes in examining personnel or testing locations.

e. A third-party examiner whose driver license is suspended, revoked, canceled, or disqualified.

3. A cancellation of a third-party tester or examiner certification shall be for the following lengths of time:

a. First infraction shall result in a warning from the division and an indefinite suspension of certification until the division is satisfied that the third-party tester will meet the requirements of this rule.

b. Second infraction of this rule arising from separate incidents shall result in a one year cancellation of certification.

c. Third infraction of this rule arising from separate incidents shall result in a five year cancellation of certification.

4. When a certification is canceled, the third-party may request a hearing before a designated department representative. The hearing shall consist of a finding of whether the alleged infraction(s) occurred and based upon these findings, whether the cancellation of certification should be rescinded or affirmed.

5. Reinstatement following cancellation shall consist of the third-party tester providing proof of compliance and making application for new certification.

I. Advertising.

1. No advertisement shall indicate in any way that a program can issue or guarantee the issuance of a commercial driver's license, or imply that the program can in any way influence the division in the issuance of commercial driver's license or imply that preferential or advantageous treatment from the department can be obtained.

2. No examiner, employee, or agent of a third-party tester shall be permitted to advertise or solicit business or cause business to be solicited in its behalf or display or distribute any advertising material within 1500 feet of a location rented, leased, or owned by the department.

KEY: training programs, driver education
1992 53-3-213
Notice of Continuation January 20, 2012 53-3-407

R708. Public Safety, Driver License.
R708-25. Commercial Driver License Applicant Fitness Certification.
R708-25-1. Authority.

This rule is authorized by Subsection 53-3-407.

R708-25-2. Fitness Certification Requirements.

(1) Every Commercial Driver License (CDL) applicant must either certify compliance with federal fitness standards contained in 49 CFR 391.41, 43, and 45 or certify that he/she is not subject to such standards. Each applicant who is subject to fitness standards contained in Part 391 (49 CFR), shall be required to show proof that he/she complies with the standards.

(2) Certain commercial drivers are, in accordance with Parts 390.3 and 391.2 of 49 CFR, required to have Commercial Driver Licenses, but are exempted from the federal fitness standards. Exempted are drivers who are employees of Federal, State or Local governments, drivers performing the private transportation of passengers, drivers transporting corpses or sick or injured people, drivers occasionally transporting personal property not for compensation nor in the furtherance of a commercial enterprise, drivers of vehicles used in farm custom harvesting operations, and drivers for apiarian industries.

(3) The Federal Motor Carrier Safety Administration (FMCSA) makes allowances for specific classes of drivers who cannot meet the federal fitness standards for interstate commerce to drive commercially in intrastate commerce, which allowances are articulated in federal rules granting express consent to states involved in approved pilot projects for the FMCSA. Under these conditions, the division may issue commercial Driver Licenses restricted to intrastate commerce with other appropriate restrictions when applicable, provided the applicant meets state medical standards which are consistent with the statutory provisions of Sections 53-3-302, 53-3-303, 53-3-304, and R708-7 and R708-8 of the Utah Administrative Code.

(4) Each Commercial Driver License applicant who is not exempted from the requirements of Part 391 (49 CFR) shall provide to the division, an official Department of Transportation fitness certificate or equivalent, in order to verify:

(a) That the applicant meets the U.S. Department of Transportation medical standards, and;

(b) That the fitness certificate or equivalent was issued pursuant to a current medical examination.

(5) If the division determines that the applicant's driving ability has been impaired physically or mentally, or if the applicant's condition does not otherwise comply with the certification requirements of the fitness certificate or equivalent, the division may refuse to process the application until the applicant meets the fitness standards.

1994 53-3-407(1)(c)
Notice of Continuation January 20, 2012

R708. Public Safety, Driver License.

R708-27. Certification of Driver Education Teachers in the Public Schools to Administer Knowledge and Driving Skills Tests.

R708-27-1. Authority and Purpose.

This rule establishes standards and procedures to certify teachers of driver education classes in the public schools to administer knowledge and driving skills tests as required by Section 53A-13-208.

R708-27-2. Definitions.

"Cancellation" means the certification is void.

"Certification" means the process by which public education teachers of driver education are certified by the Driver License Division to administer knowledge and driving skills tests.

"Division" means the Driver License Division of the Utah Department of Public Safety.

"Suspension" means that a teacher's certification is currently void but may be reinstated whenever the teacher follows a division-approved plan and complies with reinstatement procedures.

"Teacher" means a teacher of driver education classes in the public schools of the State of Utah.

"Test" means a division approved knowledge test or driving skills test as approved by the division.

"USOE" means the Utah State Office of Education.

R708-27-3. Standards and Procedures.

(1) A teacher shall become certified by making application and by meeting the requirements of this rule. Application shall be made on a form furnished by the division and shall include the following information:

(a) The name of the teacher who is applying for certification;

(b) The addresses of locations where the teacher will be conducting driver education tests; and

(c) A verification that the teacher has completed division approved training for knowledge and driving skills testing.

(2) The division will offer training to teachers concerning minimum standards which must be met in the administration and scoring of tests.

(3) The division may authorize and train personnel within the public schools to provide the above training to teachers desiring to be certified to administer driver license knowledge and driving skills tests.

(4) When testing students for driver licenses, certified teachers shall use only such driver training tests which are developed and used as a standard by the division for first time driver license applicants.

(5) Knowledge test questions shall be kept in a secure place and shall be accessible only to school officials and to the division. Copies of the tests shall not be retained by students.

(6) The driving skills test shall be conducted on streets, highways and off-road courses only. No simulator testing shall be substituted as part of the final test.

(7) The test results will be valid for driver licensing purposes only if administered in conjunction with approved public driver education courses and by teachers meeting the requirements of these rules.

(8) Records of all student test results shall be retained by the school for a four year period. The records shall be accessible to the division upon request during normal school hours.

(9) Investigations and resolution of complaints relating to testing under this program shall be the responsibility of the USOE.

(10) The USOE shall provide annually, on or before September 30, to the division, a list of all active certified driver education teachers.

R708-27-4. Submittal of Evidence of Student Test Completion.

(1) The following procedures shall be followed by the teacher and the student in submitting evidence of satisfactory completion of knowledge and driving skills testing.

(2) As evidence of satisfactory completion of knowledge testing, the school shall furnish a certificate of knowledge test completion to the student. The certificate shall be a form approved by the division and shall contain:

(a) the student's full legal name;

(b) the student's date of birth;

(c) the name of the school district;

(d) the name of the school;

(e) the school ID number;

(f) results of the knowledge test;

(g) the date the test was passed; and

(h) the signature of the certified teacher who administered the test.

(3) To apply for a Class D learner permit, a student must successfully pass the written knowledge test given by the division, or submit the certificate of knowledge test completion given him by the school.

(4) As evidence of satisfactory completion of driving skills testing and course completion, the school shall furnish a certificate to the student. The certificate shall be a form approved by the division and shall contain the following:

(a) the student's name as it appears on the Utah Lerner permit;

(b) the student date of birth;

(c) the student's date of birth,

(d) original issue date of completion certificate;

(e) results of the driving skills test;

(f) the signature of the certified teacher who administered the test;

(g) the date the test was completed;

(h) the date the driver education course was completed;

(i) the school ID number;

(j) the name of the school district; and

(k) the name of the school.

(5) To apply for a Class D driver license, a student may submit the completed certificate of testing and the certificate of completion of driver training course, as issued to him/her by the school, to a division testing station.

(6) When a student applies for a Class D driver license, the Division may waive it's normally administered knowledge and driving skills tests for students presenting valid certificates of testing.

R708-27-5. Refusal to Certify, Grounds for Cancellation and Suspension of Certification.

(1) The division may refuse to certify teacher applicants who do not meet the standards for training or who submit an application that contains false or incomplete information.

(2) The certification of a teacher shall be effective until cancelled or suspended by the division. The USOE may initiate suspension or cancellation of a certification by providing the division with a written request.

(3) Certification once granted may be cancelled or suspended for non-compliance with these rules.

(4) When the division determines that a need exists to cancel or suspend a teacher's certification, it shall determine an appropriate course of action from the following options:

(a) suspension, pending a plan for remediation leading to reinstatement, or

(b) cancellation of certification.

(5) Reinstatement following cancellation of certification shall consist of completing an approved training plan following

cancellation of certification and making application for a new certification.

(6) Certification shall be cancelled when teachers no longer are employed as licensed public school teachers. Teachers who discontinue employment with the USOE and then return to teach driver education must make a new application with the division for a new certification and complete approved training following cancellation of certification.

KEY: driver education, teacher certification
August 8, 2006 53A-13-208
Notice of Continuation January 20, 2012

R708. Public Safety, Driver License.
R708-34. Medical Waivers for Intrastate Commercial Driving Privileges.
R708-34-1. Purpose.

A person who desires to obtain an interstate commercial driver license must meet the minimum federal fitness standards dealing with physical, mental, and emotional health set forth in Part 391 of the Federal Motor Carrier Safety Regulations. As authorized by Section 53-3-303.5, compliance with those standards can be waived for a person who (a) desires to obtain commercial driving privileges for intrastate driving only, and (b) meets minimum state fitness standards. This rule sets forth the procedure whereby a person may apply for a waiver, and also for the Driver License Division to respond to waiver requests.

R708-34-2. Authority.

This rule is authorized by Subsection 63G-3-201(2) and Section 53-3-303.5.

R708-34-3. Definitions.

(1) "Board" means the Driver License Medical Advisory Board.

(2) "Commercial driving privileges" means the privilege given to any licensed operator of a motor vehicle who must be in compliance with Federal Fitness Standards for the purpose of transporting commerce in vehicles with a gross vehicle weight of at least 10,000 to 26,000 pounds or over, with or without a commercial driver license.

(3) "Department" means the Utah Department of Public Safety.

(4) "Division" means the Driver License Division.

(5) "Fitness standards" means standards set forth by the board for determining the physical, mental and emotional capabilities appropriate for issuance of intrastate commercial driver licenses.

(6) "Waiver" means approval granted by the division allowing a driver to drive commercial vehicles intrastate even though the driver does not meet the minimum federal fitness standards to drive commercial vehicles interstate.

(7) "Medical Waiver Card" means a card issued by the Driver License Division to verify the driver has met minimum state fitness standards to qualify for intrastate commercial driving privileges.

R708-34-4. Requesting a Waiver.

Drivers desiring an intrastate commercial driving privilege waiver shall:

(a) request a waiver application from the Driver License Division, Medical Waiver Program Coordinator, P.O. Box 144501, Salt Lake City, UT 84114-4501;

(b) submit to the division for approval a waiver application with a current Functional Ability Evaluation Medical Certificate Report and Certificate of Visual Examination, as required, and a non-refundable check or money order payable to the Utah Department of Public Safety for the waiver processing fee;

(c) take a letter received from the division granting the waiver to any commercial driver license office and apply for an intrastate commercial driving privilege with appropriate endorsements and/or restrictions; and

(d) pay applicable waiver fees, and when necessary, take appropriate written and skills tests to obtain the desired driving privilege.

R708-34-5. Obligation of Drivers Possessing Waivers.

Drivers possessing waivers must comply with division instructions requesting periodic updated medical information including submission of a Functional Ability Evaluation Medical Report, a Certificate of Visual Examination, and a non-refundable check or money order payable to the Department. Non-compliance with division instructions may result in the denial of commercial driving privileges.

R708-34-6. Driver License Medical Advisory Board Responsibilities.

The board shall:

(a) establish fitness standards for issuing intrastate commercial driver licenses under Title 53, Chapter 3, Part 4, Uniform Commercial Driver License Act; and

(b) review waiver applications when necessary and make recommendations to the division director.

R708-34-7. Driver License Division Responsibilities.

(1) The division shall provide information and guidance to waiver applicants and shall process all waiver applications.

(2) The division shall coordinate with and provide information to the board concerning waiver applications and shall issue a letter approving or disapproving a waiver after consideration of the board's recommendation.

(3) The division shall issue a medical waiver card which the applicant must carry while driving intrastate.

R708-34-8. Adjudicative Proceedings.

(1) In accordance with Subsection 63G-4-202(1) all adjudicative proceedings herein shall be conducted informally.

(2) A driver whose waiver application is denied, or whose waiver application is granted with restrictions that are unacceptable to the driver, may make a request for administrative review in accordance with Subsection 53-3-303(10) and for judicial review in accordance with Subsection 53-3-303(11).

KEY: intrastate driver license waivers
December 4, 2001 63G-3-201(2)
Notice of Continuation January 9, 2012 53-3-303.5

R708. Public Safety, Driver License.

R708-35. Adjudicative Proceedings For Driver License Offenses Not Involving Alcohol or Drug Actions.

R708-35-1. Purpose.

The purpose of this rule is to establish procedures to be used by the Utah Driver License Division for non-alcohol/drug adjudicative proceedings.

R708-35-2. Authority.

This rule is authorized by Section 53-3-104 and Subsection 63G-4-203(1).

R708-35-3. Definitions.

(1) "Adjudicative proceeding" means any meeting, conference, session or hearing, in person or otherwise, between a person and a presiding officer or designee of the division, that is intended to resolve a dispute.

(2) "Division" means the Driver License Division of the Utah Department of Public Safety.

(3) "Division record" means the entire division file, including written reports received or generated by the division. It also includes, but is not limited to, minutes, written comments, presiding officer's written statements and summaries, testimony, evidence, findings of fact, conclusions of law, recommendations, and orders.

(4) "Hearing" means a non-alcohol/drug adjudicative proceeding where evidence is considered to determine an issue of fact and to adjudicate a legal right or privilege.

(5) "Presiding officer" means a division employee with authority to conduct non-alcohol/drug adjudicative proceedings.

(6) "Recording" means documenting, by electronic or other means, the testimony or information presented at a non-alcohol/drug adjudicative proceeding.

(7) "Serious violation" means a single violation determined by the division to require immediate remedial action.

R708-35-4. Designations.

(1) In compliance with Section 63G-4-202, all division non-alcohol/drug adjudicative proceedings are designated as informal proceedings, unless converted to formal proceedings by a presiding officer or division supervisor.

(2) An informal proceeding may be converted to a formal proceeding only if approved by a division supervisor and only if the conversion will promote efficiency, public safety, and not unreasonably increase cost.

R708-35-5. Authority for Conducting Adjudicative Proceedings.

Non-alcohol/drug adjudicative proceedings will be conducted in accordance with Sections 53-3-221, 63G-4-203, and this rule.

R708-35-6. Commencement of Adjudicative Proceedings.

(1) In accordance with Subsection 63G-4-201(1), non-alcohol/drug adjudicative proceedings may be commenced by:

(a) a notice of division action, if the proceedings are commenced by the division; or

(b) a request for division action, if the proceedings are commenced by a person other than the division.

(2) A notice of division action and request for division action shall include the information set forth in Subsections 63G-4-201(2)(a) and (3)(a) respectively.

R708-35-7. Non-Alcohol/Drug Adjudicative Proceedings.

The non-alcohol/drug adjudicative proceedings deal with the following types of hearings:

(a) point system, Sections 53-3-209 and 53-3-221;

(b) financial responsibility, Sections 41-12a-303.2, 41-12a-503, 41-12a-511, and 53-3-221;

(c) contributing to a fatality, Section 53-3-221;

(d) serious violation, Section 53-3-221;

(e) unlawful use of a license, Section 53-3-229;

(f) fraudulent application, Section 53-3-229;

(g) failure to appear or comply, Section 53-3-221;

(h) review examination request, Subsection 53-3-221(11);

(i) driving during denial, suspension, revocation, or disqualification, Subsection 53-3-220(2);

(j) leaving the scene of an accident, Section 53-3-221 (serious violation); and

(k) limited license, Subsection 53-3-220 (4)(a).

R708-35-8. Hearing Procedures.

(1) Time and place. Non-alcohol/drug adjudicative proceedings will be held at a time and place agreed upon by the parties.

(2) Notice. Notice shall be given as provided in Subsection 53-3-216(3) unless otherwise agreed upon by the parties. Notice shall be given on a form approved by the division and is deemed to be signed by the presiding officer. The parties are deemed to have knowledge of the law.

(3) Default. If the driver fails to respond timely to a division request or notice, a default may be entered in accordance with Section 63G-4-209.

(4) Evidence. The parties and witnesses may testify under oath, present evidence, and comment on pertinent issues. The presiding officer may exclude irrelevant, repetitious, immaterial, or privileged information or evidence. The presiding officer may consider hearsay evidence and receive documentary evidence, including copies or excerpts.

(5) Information. The driver shall have access to information in the division file to the extent permitted by law.

(6) Subpoenas. Discovery is prohibited, but the division may issue subpoenas or other orders to compel production of necessary evidence. Subpoenas may be issued by the division at the request of the driver if the costs of the subpoenas are paid by the driver and will not delay the proceeding.

(7) Administrative notice. The presiding officer has discretion to take administrative notice of records, procedures, rules, policies, technical scientific facts within the presiding officer's specialized knowledge or experience, or of any other facts that could be judicially noticed.

(8) Presiding officer. The presiding officer may:

(a) administer oaths;

(b) issue subpoenas;

(c) conduct prehearing conferences by telephone or in person to clarify issues, dispose of procedural questions, and expedite the hearing;

(d) tape record or take notes of the hearing at his/her discretion; and

(e) take appropriate measures to preserve the integrity of the hearing.

R708-35-9. Findings, Conclusions, Recommendations and Orders.

(1) Within a reasonable period of time after the close of the hearing, the presiding officer will issue a written decision that may include findings of fact, conclusions of law, and a recommendation.

(2) Statements reflecting findings of fact, conclusions of law, and recommendation may be written on a form that is approved by the division. The completed form will be transmitted to the central office of the division as soon as possible for the preparation of an order that complies with Subsection 63G-4-203(1).

(3) As provided in Subsection 53-3-216(3), the order will be mailed to the last known address of the driver.

(4) The order shall advise the driver of his/her right to seek a copy of written findings, conclusions, and recommendation of

the presiding officer, and these will be made available to the driver only upon written request.

R708-35-10. Reconsideration.

In accordance with Section 63G-4-302 a driver may file a request for reconsideration of the order within 20 days after receiving it. If the division does not issue an amended order within 20 days after receiving the request for reconsideration, the request for reconsideration shall be considered denied, and the driver may seek judicial review in accordance with Section 63G-4-402.

Notice of Continuation January 9, 2012 63G-4-203(1)

R722. Public Safety, Criminal Investigations and Technical Services, Criminal Identification.
R722-350. Certificate of Eligibility.
R722-350-1. Purpose.

The purpose of these rules is to establish procedures by which a petitioner may seek a certificate of eligibility pursuant to Title 77 Chapter 40.

R722-350-2. Authority.

Section 77-40-111 authorizes the department to promulgate rules to implement procedures for the application and issuance of certificates of eligibility.

R722-350-2. Definitions.

Terms used in this rule are defined in Section 77-40-102.

R722-350-3. Application for a Certificate of Eligibility.

(1)(a) An application for a certificate of eligibility must be made in writing to the bureau by filing out the application form established by the bureau.

(b) An application form must be accompanied by a payment of $25.00 in the form of cash, check, money order, or credit card.

(2)(a) Upon receipt of a completed application form and payment of the application fee, the bureau shall review each criminal episode contained on the petitioner's criminal history, in its entirety, to determine whether the petitioner meets the requirements for a certificate of eligibility found in Sections 77-40-104 and 77-40-105.

(b) In making its determination, the bureau shall also review all federal, state and local criminal records, to which it has access.

(3) If the bureau has insufficient information to determine if the petitioner meets the requirements for a certificate of eligibility, the bureau may request that the petitioner submit additional information.

(4) If the bureau is unable to obtain disposition information regarding the petitioner's criminal history or cannot determine whether the petitioner meets the requirements for a certificate of eligibility found in Sections 77-40-104 and 77-40-105, the bureau shall send a letter to the petitioner, at the address indicated on the application form, indicating that the petitioner may obtain a special certificate for each criminal episode upon the payment of $56.00, per special certificate.

(5) If the bureau determines that the petitioner meets the requirements for the issuance of a certificate of eligibility found in Section 77-40-104, the bureau shall send the certificate of eligibility to the petitioner, at the address indicated on the application form, unless the charges were dismissed pursuant to a plea in abeyance agreement under Title 77, Chapter 2a, Pleas in Abeyance, or a diversion agreement under Title 77, Chapter 2, Prosecution, Screening, and Diversion.

(6) If the bureau determines that the petitioner meets the requirements for the issuance of a certificate of eligibility under any other circumstances, the bureau shall send a letter to the petitioner, at the address indicated on the application form, indicating that the petitioner must pay $56.00 for each certificate of eligibility.

(7) If the bureau determines that the petitioner does not meet the criteria for the issuance of a certificate of eligibility, the bureau shall send a letter to the petitioner, at the address indicated on the application form, which describes the reasons why the petitioner's application was denied and notifies the petitioner that the petitioner may seek agency review of the bureau's decision by following the procedures outlined in R722-350-4.

R722-350-4. Agency Review of a Decision to Deny an Application for a Certificate of Eligibility.

(1) A petitioner may seek review of the denial of an application for a certificate of eligibility, as provided by Section 63G-4-301, by mailing a written request for review to the bureau within 30 days from the date the denial letter is issued.

(2) The request for review must:

(a) be signed by the petitioner;

(b) state the specific grounds upon which relief is requested;

(c) state the date upon which it was mailed; and

(d) include documentation which supports the petitioner's request for review.

(3) An employee of the bureau shall be designated to review the petitioner's written request, any accompanying documents supplied by the petitioner, and the materials contained in the application file to determine whether the petitioner meets the requirements for the issuance of a certificate found in Section 77-40-104 and 77-40-105.

(4)(a) Within a reasonable time after receiving the request for review, the bureau shall issue a final written order on review, which shall be mailed to the petitioner at the address indicated on the application.

(b) If upon further review the bureau is unable to determine whether the petitioner meets the requirements for a certificate of eligibility found in Sections 77-40-104 and 77-40-105, the bureau shall send a letter to the petitioner, at the address indicated on the application form, indicating that the petitioner may obtain a special certificate for each criminal episode upon the payment of $56.00, per special certificate.

(c) If further review indicates that the petitioner meets the requirements for the issuance of a certificate of eligibility found in Section 77-40-104, the bureau shall send a certificate of eligibility to the petitioner, unless the charges were dismissed pursuant to a plea in abeyance agreement under Title 77, Chapter 2a, Pleas in Abeyance, or a diversion agreement under Title 77, Chapter 2, Prosecution, Screening, and Diversion.

(d) If further review indicates that the petitioner meets the requirements for the issuance of a certificate of eligibility under any other circumstances, the order shall indicate that the petitioner must pay $56.00 for each certificate of eligibility.

(e) If further review indicates that the petitioner does not meet the requirements for the issuance of a certificate, the order shall describe the reasons why the bureau's decision was upheld and notify the petitioner that the petitioner's opportunity to review the bureau's decision is limited to review by the district court as described in R722-350-5.

R722-350-5. Judicial Review.

A petitioner may seek judicial review of the bureau's final written order on review denying an application for a certificate of eligibility, as provided by Section 63G-4-402, by filing a complaint in the district court within 30 days from the date that the bureau's final written order is issued.

January 24, 2012 77-40

R728. Public Safety, Peace Officer Standards and Training.
R728-411. Guidelines Regarding Administrative Action Taken Against Individuals Functioning As Peace Officers Without Peace Officer Certification Or Powers.
R728-411-0.

If an individual is found to be performing the duties and functions of a peace officer without certification or authority as required by Title 53, Chapter 13 Utah Code Annotated, the following procedures will be initiated by the Division of Peace Officer Standards and Training.

1. A letter will be sent to the individual and the individual's employing agency administrator indicating that the individual does not have the statutory authority to act as a peace officer in the State of Utah. The letter will state that the individual should cease any and all activities as a peace officer. The letter will indicate the appropriate option(s) for the individual and employing agency to follow in order for the individual to acquire peace officer authority. Eight days will be given for the individual to respond to the notification before any of the following procedures will be taken by POST.

2. POST will notify those persons or agencies which could be held liable through civil action due to the individual's pretended peace officer authority, notification is to include the subject of the notification, the chief law enforcement administrator of the employing agency, the chief administrator of the jurisdiction, the city prosecutor, county attorney, and/or the Attorney General of the State of Utah, the Sheriff of the county, and any other persons deemed accessible through civil action.

3. If Subsection (a) and (b) have not been acted upon by the individual or the individual's employing agency, the issuance of a writ from the Attorney General's Office to cease and desist from acting as a peace officer in the State of Utah may be made and directed to the individual and the individual's employing agency.

4. If Subsection (a), (b), or (c) have not been acted upon by the individual or the individual's employing agency, criminal charges may be sought against the individual for a violation of Section 76-8-512 U.C.A.

5. The procedures in this Section may also be applied towards any peace officer who has been found to be deficient in the statutory 40-hour yearly training requirement, as per Section 53-6-202 U.C.A., and who continues to perform the duties and functions of a peace officer without having said peace officer powers restored by the Division of Peace Officer Standards and Training, or to any person who attempts to avoid the statutory peace officer certification process.

6. At any time in the above procedures, the Division of Peace Officer Standards and Training may, if cause exists, seek an administrative action against the individual for a violation of Section 53-6-211, if the individual is acting as a peace officer without statutory peace officer authority.

Notice of Continuation January 6, 2012

R746. Public Service Commission, Administration.
R746-348. Interconnection.
R746-348-1. Applicability.

These rules apply to each certified telecommunications corporation that provides local exchange service in Utah.

R746-348-2. Definitions.

A. The meaning of terms used in these rules shall be consistent with their general usage in the telecommunications industry unless specifically defined in Section 54-8b-2 or these rules. As used in these rules, unless context states otherwise, the following definitions shall apply:

1. "Collocation" --

a. Physical collocation is an offering by an incumbent local exchange carrier that enables a requesting telecommunications corporation to:

i. place its own equipment to be used for interconnection or access to unbundled network elements within or upon an incumbent local exchange carrier's premises;

ii. use the equipment to interconnect with an incumbent local exchange carrier's network facilities for the transmission and routing of telephone exchange service, exchange access service, or both, or to gain access to an incumbent local exchange carrier's unbundled network elements for the provision of a telecommunications service;

iii. enter those premises, subject to reasonable terms and conditions, to install, maintain and repair equipment necessary for interconnection or access to unbundled elements; and

iv. obtain reasonable amounts of space in an incumbent local exchange carrier's premises, for the equipment necessary for interconnection or access to unbundled elements, allocated on a first-come, first-served basis entrants who are ready and able to use the entire space they receive within a reasonable time.

b. Virtual collocation is an offering by an incumbent local exchange carrier that enables a requesting telecommunications corporation to:

i. Designate or specify equipment to be used for interconnection or access to unbundled network elements to be located within or upon an incumbent local exchange carrier's premises, and dedicated to that telecommunications carrier's use;

ii. use that equipment to interconnect with an incumbent local exchange carrier's network facilities for the transmission and routing of telephone exchange service, exchange access service, or both, or for access to an incumbent local exchange carrier's unbundled network elements for the provision of a telecommunications service; and

iii. Electronically monitor and control its communications channels terminating in that equipment.

2. "Common Transport Links" -- means shared transmission facilities between two switching systems where traffic originating with or terminating to multiple telecommunication service providers is comingled. These facilities normally exist between end offices and a tandem switch.

3. "Dedicated Transport Links" -- means transmission facilities between two switching systems where traffic originates with or terminates to the same or another public telecommunications service provider.

4. "Incumbent Local Exchange Carrier" -- means the local exchange carrier that on February 8, 1996, provided telephone exchange service in a defined geographic service territory, and on that date was a member of the Exchange Carrier Association pursuant to 47 CFR 69.601(b), or is a person that became a successor or assign of a member of the Exchange Carrier Association.

5. "Interconnection" -- means the linking of two networks for the mutual exchange of traffic. It does not include the transport and termination of traffic.

6. "Local Number Portability" -- means the ability of users of telecommunications services to retain, at the same location, existing telecommunications numbers without unreasonable impairment of quality, reliability, or convenience when switching from one telecommunications corporation to another.

7. "Loop Concentration" -- means the function performed by electronic equipment that provides for the multiplexing or demultiplexing of a quantity of loops into a different number of digital or optical communication channels that connect to another network element.

8. "Loop Distribution" -- means transmission facilities from the termination of the feeder or loop concentration facility to the customer's network interface.

9. "Loop Feeder" -- means transmission facilities between a central office and the distribution cable or a loop concentration facility.

10. "Network Elements" -- means the features, functions, and capabilities of network facilities and equipment used to transmit, route, bill or otherwise provide public telecommunications services.

11. "Network Interface Device" -- means the cross connect device used to connect loop facilities to intra-premises cabling or inside wiring.

12. "Operator Systems" -- means systems used to provide live or mechanized operator functions to assist end users with call completion, call assistance, and directory assistance.

13. "Operational Support" -- means the processing of local exchange customer service and repair orders, and the electronic exchange of billing, customer account, service provisioning and service administration data among local exchange service providers.

14. "Premises" -- shall carry the same definition as prescribed in 47 CFR 51.5.

15. "Service Control Point" -- means a database in the signaling network where queries for call processing instructions are directed.

16. "Signaling Links" -- means transmission facilities in a signaling network which carry any out-of-band signaling channels from and between the various elements of a signaling network.

17. "Signal Transfer Point" -- means a packet switch that acts as a routing hub for a signaling network and transfers messages between various points in and among signaling networks.

18. "Switch" -- means a facility required to connect lines or trunks to a communications transmission path.

19. "Tandem Switch" -- means a facility that connects trunks to trunks in order to complete inter-switch calls.

20. "Unbundling" means the disaggregation of facilities and functions into multiple network elements and services that can be individually purchased by a competing public telecommunications service provider.

R746-348-3. Terms and Conditions of Facilities Interconnection.

A. Points of Interconnection -- Incumbent local exchange carriers shall allow any other public telecommunication service provider to interconnect its network at any technically feasible point, to provide transmission and routing of public telecommunication services.

1. A local exchange service provider requesting interconnection with an incumbent local exchange carrier shall identify a desired point of interconnection.

B. Joint Facilities Construction and Use -- In furtherance of efficient interconnection contemplated by Sections 54-4-8 and 54-4-12, public telecommunication service providers may jointly construct interconnection facilities and apportion the cost and expense between any joint users of the facility.

1. The incumbent local exchange carrier and the requesting

local exchange service provider shall negotiate meet points for interconnection. Each party shall be responsible for the costs of constructing its facilities to the meet point, and neither party may impose a meet point that would require that one party incur significantly greater construction costs to build to the meet point than the other party.

C. Types of Line Connection -- The requesting local exchange provider shall choose either DS-3, DS-1, or DS-0 connections or other technically feasible interconnection interfaces and protocols including loops conditioned to provide digital subscriber line services.

D. Collocation Rate Elements -- Physical and virtual collocation shall be offered under terms and conditions that are just, reasonable, and nondiscriminatory.

R746-348-4. Reciprocity.

A. Compliance -- Interconnection of the facilities of public telecommunications service providers shall be fully reciprocal, shall not be unreasonably delayed or withheld and shall fully comply with Subsection 54-8b-2.2(1)(b) and 47 USC Sections 224, 251, 252, 256 and Subsection 271(c).

B. Written Acknowledgment -- Each local exchange service provider shall provide written acknowledgment, within five business days, of receipt of a written request by another local exchange service provider for interconnection facilities and services.

C. Time Limit -- Incumbent local exchange carriers and other terminating local exchange service providers shall provide interconnection facilities and services within 60 days following receipt of a written request unless the Commission extends the time.

R746-348-5. Construction and Maintenance.

A. Responsibility -- Each local exchange service provider shall be responsible for construction and maintenance of facilities on its side of the point of interconnection, unless two or more providers mutually agree to another arrangement.

B. Standards -- Each local exchange service provider shall construct and maintain its facilities at the point of interconnection in accordance with accepted engineering standards and practices in the exchange carrier industry.

1. Each terminating provider will make available to each originating provider any documents and technical references issued by industry standards bodies or equipment manufacturers which define the engineering specifications necessary for the originating provider's equipment to interface with the terminating provider's essential interconnection facilities.

2. No local exchange service provider shall construct or maintain facilities on its side of the point of interconnection in a manner contrary to 47 USC Section 256, or in a manner that is lower in quality than that which it provides itself, its affiliates, or another local exchange service provider.

R746-348-6. Ancillary Features and Functions.

A. Compliance -- Incumbent local exchange carriers shall make available to other local exchange service providers the following network features and functions pursuant to 47 USC Section 251 and Subsection 54-8b-2.2.

1. Access to signaling protocols and elements of signaling protocols used to route local and interexchange traffic, including access to signaling links, signal transfer points, and service control points through the incumbent local exchange carrier's signal transfer point.

2. Answer and disconnect supervision as well as the information necessary for customer billing.

a. Telecommunications corporations shall protect customer proprietary network information in compliance with 47 USC Section 222 and applicable federal and state rules.

b. Telecommunications corporations shall enter into billing and collection agreements to permit exchange of telephone line number information, use of non-proprietary calling cards, and collect billing of third-party calls to a number served by another provider.

3. Local exchange service providers shall provide the capability for operators on interconnected networks to perform functions such as completing collect calls, third party calls, busy line verification calls, and busy line interrupt.

4. Local exchange service providers shall develop and implement repair service referral procedures to direct trouble reports to the correct provider.

5. Pursuant to contract or tariff, each local exchange service provider shall offer electronic interfaces to operational support systems to enable other certified local exchange service providers to provide service quality equal to that required by the Commission for incumbent local exchange carriers. These contracts or tariffs shall be approved by the Commission and available for public review.

6. Local exchange service providers shall provide nondiscriminatory access to subscriber information, such as that contained in published "White Pages" telephone directories.

a. Customers of local exchange service providers shall receive directories as part of basic local exchange service.

b. An incumbent local exchange service provider, or its affiliate, shall make available to a new local exchange service provider adequate space in the Customer Guide pages of the directory to allow a new local exchange service provider to provide its customers and prospective customers with information reasonably similar to that provided by an incumbent local exchange service provider for its customers.

B. Emergency Call Networks -- Each local exchange service provider will cooperate to insure the seamless operation of emergency call networks, including 911, E-911 and 0- calls.

1. Incumbent local exchange carriers will permit other local exchange service providers to interconnect at its E-911 tandem so that each local exchange service provider's customers may place calls to public safety answering points by dialing 911.

2. Local exchange service providers shall not charge each other for any service, activity or facility associated with provision of 911 or E-911 services other than call transport and termination charges.

R746-348-7. Essential Facilities and Services.

A. Designation -- At a minimum, the following are considered to be essential facilities or services pursuant to 54-8b-2. 2.:

1. Unbundled local loops including 2-wire, 4-wire and digital subscriber line facilities;

2. Loop concentration, loop distribution and loop feeder facilities;

3. Network interface devices;

4. Switching capability including line-side facilities, trunk-side facilities and tandem facilities;

5. 911 and E911 emergency call networks;

6. Access to numbering resources;

7. Local telephone number portability;

8. Inter-office transmission facilities;

9. Signaling networks and call-related databases including signaling links, signaling transfer points and databases used for billing and collection, and transmission and routing of public telecommunications services;

10. Operations support systems used to pre-order, order, provision, maintain and repair unbundled network elements, or services purchased for resale from an incumbent local exchange carrier by another telecommunications corporation;

11. Billing functions;

12. Operator services and directory assistance;

13. Physical and virtual collocation and,

14. Intra-premises cabling and inside wiring owned or

controlled by an incumbent local exchange carrier.

B. Determination of Essential Nature -- A telecommunications corporation may request any essential network facility or service from another telecommunications corporation and that telecommunications corporation shall timely provide the network facility or service in accordance R746-348-4 unless it demonstrates that providing that facility or service is technically infeasible.

1. A person may petition the Commission for a finding that a facility or service is essential or should no longer be deemed essential.

54-4-12
54-8b-2

R850. School and Institutional Trust Lands, Administration.
R850-90. Land Exchanges.
R850-90-100. Authorities.

This rule implements Sections 6, 8, 10, and 12 of the Utah Enabling Act, Articles X and XX of the Utah Constitution, and Sections 53C-1-302(1)(a)(ii) and 53C-4-101(1) which authorize the Director of the School and Institutional Trust Lands Administration to specify application procedures and review criteria for the exchange of trust lands.

R850-90-150. Planning.

Pursuant to Section 53C-2-201(1)(a), the Trust Lands Administration shall also undertake to complete the following planning obligations, in addition to the rule-based analysis and approval processes that are prescribed by this rule:

1. To the extent required by the Memorandum of Understanding between the State Planning Coordinator and the School and Institutional Trust Lands Administration, submit the proposal for review by the Resource Development Coordinating Committee (RDCC);

2. Evaluation of and response to comments received through the RDCC process; and

3. Evaluation of and response to any comments received through the solicitation process conducted pursuant to R850-90-400(1).

R850-90-200. Exchange Criteria.

1. The agency may exchange trust land for land or other assets of equal or greater value. The criteria by which an exchange proposal will be considered follows.

(a) Asset is herein defined as personal property, including cash, which has a readily determined market value.

(b) The percentage of cash which may be included in an exchange transaction shall not exceed 25% of the value.

2. Exchanges must clearly be in the best interest of the appropriate trust as documented in a record of decision by the agency. The record of decision shall address:

(a) the appraised value of affected lands or other assets;

(b) the degree to which there is reasonable assurance that the acquired land or other asset may provide income in excess of that being generated from existing trust land;

(c) the likelihood of greater revenue flowing to the appropriate trust from sale of fee or leasehold estates in existing trust land; and

(d) management costs and opportunities.

3. The record of decision shall verify that the exchange will not result in an unmanageable and uneconomical parcel of trust land, nor eliminate access to a remnant holding, without appropriate remuneration or compensation.

R850-90-300. Application Requirements.

This section does not apply to exchange proposals initiated by the agency.

1. Preapplication review: In order to avoid unnecessary expenses, persons requesting an exchange shall be afforded the opportunity to discuss the concept of the exchange with the agency prior to submitting a formal application.

2. A completed application form must be received pursuant to R850-3.

R850-90-400. Competitive Offering.

1. Upon receipt of an exchange application, the agency shall solicit competing exchange proposals, lease applications and sale applications. Competing applications will be solicited through publication at least once a week for three consecutive weeks in one or more newspapers of general circulation in the county in which the trust land is located. At least 30 days prior to consummation of an exchange, sale or lease, certified notification will be sent to permittees of record, adjoining permittees/lessees and adjoining landowners. Notices will also be posted in the local governmental administrative building or courthouse. Lease applications shall be processed in accordance with R850-30-500(2). Sale applications shall be reviewed pursuant to R850-80-500.

2. In addition to the advertising requirements of R850-90-400(1), the agency may advertise for competing applications for exchange, lease, or sale to the extent which the director has determined may reasonably increase the potential for additional competing applications.

3. The agency shall allow all applicants at least 20 days from the date of mailing of notice, as evidenced by the certified mail posting receipt (Postal Service form 3800), within which to submit a sealed bid containing their proposal for the subject parcel. Competing bids will be evaluated using the criteria found in R850-30-500(2)(g), R850-80-500, and R850-90-200.

R850-90-500. Determination for the Exchange of Trust Lands.

1. The agency shall choose the successful applicant by conducting a market analysis pursuant to R850-80-500(2) on each option for which an application has been received. The determination as to which application will be approved shall be based on R850-80-500(3) and R850-90-200(2).

2. The successful applicant shall be charged an amount equal to all appraisal and advertisement costs. All monies, except application fees, tendered by unsuccessful applicants will be refunded.

3. The director may approve the exchange when the criteria specified in R850-90-200 have been satisfied.

4. Applicants desiring reconsideration of agency action relative to exchange determinations may petition for review pursuant to agency rule.

R850-90-600. Land Exchange Appraisals.

1. The agency shall contract for appraisals of properties proposed for exchange utilizing the deposit paid by the applicant. Appraisals to determine values of trust land shall be provided protected records status pursuant to Subsection 63G-2-305(7).

2. Appraisals for land exchanges with the federal government shall be, whenever possible, completed jointly and be subject to review and approval of both parties and to agreements undertaken pursuant to the Federal Land Exchange Facilitation Act, 43 U.S.C. 1716.

R850-90-700. Private Exchange Procedures.

1. Political subdivisions of the state and agencies of the federal government shall be eligible for private exchange.

2. In order to determine that a private exchange is in the best interests of the trust beneficiaries, advertising to provide notice of this action shall be required pursuant to Section 53C-4-102(3). The cost of this advertising shall be negotiated.

3. All agency rules governing land exchanges shall apply to private exchanges except R850-90-400 and R850-90-500. R850-90-300(2), R850-90-500(2), and R850-90-900(4) may be waived when the agency is a co-applicant.

R850-90-800. Existing Improvements.

Any exchange of trust land upon which authorized improvements have been made shall be subject to the reimbursement of the depreciated value of the improvements to the owner of the improvements by the person receiving the land in the exchange.

R850-90-900. Mineral Estates and Leases.

1. Trust Lands Administration mineral interests may be exchanged in accordance with Section 53C-2-401(2).

2. Mineral estate exchanges must clearly be in the best

interest of the applicable trust as documented by a record of decision. The record of decision shall address those criteria listed in R850-90-200.

3. In exchanges with persons other than the federal government, all mineral estates are reserved to the Trust Lands Administration unless exceptional circumstances justify the exchange of the mineral estate.

4. Upon the exchange of Trust Lands Administration mineral estate, Trust Lands Administration mineral leases shall continue to be administered by the agency until the termination, relinquishment or expiration of the lease. Upon termination of the mineral lease the administration of the mineral estate transfers to the acquiring party.

5. Acquired mineral estates shall be managed in accordance with Sections 53C-2-407(3), 53C-2-412 and 53C-2-413.

R850-90-1000. Existing Rights on Acquired Lands.

Valid existing rights on lands acquired from the federal government will be managed in accordance with Sections 53C-5-102(2) and 53C-4-301(2).

R850-90-1100. Existing Leases and Permits.

Prior to completion of exchanges, Trust Lands Administration lessees and permittees shall be notified and leases and permits cancelled or amended in accordance with the terms of the lease or permit.

R850-120. Beneficiary Use of Institutional Trust Land.
R850-120-100. Authorities.

This rule implements the Utah Enabling Act to allow use of land granted under Sections 7, 8 and 12 of that Act by its beneficiary institution as a direct economic benefit to the institution and specifies application procedures and review criteria under authority of Sections 53C-1-302(1)(a)(ii) and 53C-4-101(1).

R850-120-150. Planning.

Pursuant to Section 53C-2-201(1)(a),the Trust Lands Administration shall also undertake to complete the following planning obligations, in addition to the rule-based analysis and approval processes that are prescribed by this rule:

1. To the extent required by the Memorandum of Understanding between the State Planning Coordinator and the School and Institutional Trust Lands Administration, submit the proposal for review by the Resource Development Coordinating Committee (RDCC); and

2. Evaluation of and response to comments received through the RDCC process.

R850-120-200. Scope.

This rule applies to applications by those institutions named in Sections 7, 8 and 12 of the Utah Enabling Act for in-kind use of their respective institutional trust lands administered by the agency.

R850-120-300. Application Requirements.

1. A letter of application must be received with a non-refundable application fee. The application fee will be established separately for each application based upon the cost of processing the application. The letter of application must include:

(a) the name and address of contact authority;

(b) a legal description of the land involved;

(c) a statement of the intended in-kind use;

(d) documentation that describes the manner in which the intended in-kind use is consistent with plans and programs approved or under development by the institution, and the institution's statutory mandates.

2. Upon receipt of a letter of application, the agency shall review it for completeness. Institutions submitting deficient letters of application shall be allowed 120 days to provide the required information.

R850-120-400. Review Criteria.

The agency may enter into agreements for in-kind use of institutional trust land by its beneficiary. The criteria by which an application will be considered are:

1. The applicant must be the beneficiary of the land under application.

2. The agreed use must be a prudent use of the property, taking into account related plans and programs approved by the institution, the opportunity cost of the in-kind use and the effect of that use on the management of other institutional trust lands.

3. The in-kind use must not result in net derogation of trust asset value.

4. The in-kind use must be consistent with the institution's constitutional and statutory mandate.

R850-120-500. Determination for Beneficiary Use.

1. The director may approve the in-kind use when the criteria specified in R850-120-400 are satisfied.

2. Applicants desiring reconsideration of agency action relative to in-kind use determinations may petition for review pursuant to R850-9.

3. An in-kind use agreement may, in the discretion of the agency, contain stipulations including, but not limited to, the following:

(a) Provisions for periodic monitoring of the in-kind use to assure compliance with the purposes of the use agreement;

(b) Provisions allowing for the collection of compensation to the agency for frequent or extensive monitoring; and

(c) Provisions which will allow for cancellation or amendment of leases in order to comply with statutory changes.

4. Beneficiary institutions shall, at early stages of in-kind use proposal development, contact the agency regarding the feasibility of in-kind use. Beneficiary institutions may not use or otherwise occupy the property until a formal in-kind use agreement has been fully executed.

R861. Tax Commission, Administration.
R861-1A. Administrative Procedures.
R861-1A-2. Rulemaking Power Pursuant to Utah Code Ann. Section 59-1-210 and 63-46a-4.

A. Policy and Scope. In accordance with the responsibility placed upon it by law, the Commission shall enact appropriate rules. These rules shall prescribe practices and procedures for the Commission and other state and county officials and agencies over which the Commission has supervisory power and shall interpret laws the Commission is charged with administering when such interpretation is deemed necessary and in the public interest.

B. Preparation. In the preparation of rules the Commission may refer to appropriate materials and consult such parties as it deems advisable, whether or not such persons are employees of the Commission. Drafts of proposed rules may be submitted to the Office of the Attorney General for examination as to legality and form.

C. Notice and Hearing. The Commission may publish, by means of local communication, notice of its intent to exercise its rulemaking power in a particular area. Notice therein will be given of a scheduled hearing or hearings not sooner than 15 days after such notice, at which hearing or hearings any party who would be substantially affected by such exercise may present argument in support thereof or in objection thereto. Such notice and hearing or hearings will be instituted when the Commission deems them to be of substantial value and in the public interest or in accordance with Utah Code Ann. Section 63-46a-5. Such notice and hearing or hearings shall not be a prerequisite to the validity of any rule.

D. Adoption. Rules will be adopted by the Commission at formal meetings with a quorum present. Adopted rules will be written and entered into the official minutes of the Commission, which minutes are a public record available for examination by interested members of the public at the Commission offices. This proceeding and no other will be necessary for validity, unless otherwise required by the rulemaking procedures.

E. Effective Date. In accordance with Utah Code Ann. Section 63-46a-4.

F. Publication. Copies of adopted rules will be prepared and made available to interested parties requesting the same. Such rules may also be published periodically in booklets and bulletins. It shall be the policy of the Commission to provide for publication of all new rules at the time of each compilation of rules in the particular area. No rule, however, shall be deemed invalid by failure to prepare copies for distribution or to provide for publication in the manner herein described.

G. Petitions for Exercise of Rulemaking Power. The Commission may be petitioned to exercise its power to adopt a rule of general application. Such petition shall be submitted in writing by any party who would be substantially and directly affected by such rule. The Commission will have wide discretion in this area and will exercise this rulemaking power upon petition only when it deems that such exercise would be of substantial value to the citizens of Utah. If the Commission accepts such a petition, it may adopt such rule as it deems appropriate; however, the petitioning party may submit a proposed rule for the consideration of the Commission. If the Commission acts favorably upon such a petition, it will adopt and publish the rule in the manner hereinabove described, and in addition notify the petitioner of such adoption by mail at his last known address. If the Commission declines to act on such petition, it will so notify the petitioning party in the same manner.

H. Repeal and Amendment. The procedure above described for the enactment of rules shall also be followed for the amendment or repeal of existing rules.

R861-1A-3. Division Conferences Pursuant to Utah Code Ann. Sections 59-1-210 and 63G-4-102.

Any party directly affected by a commission action or contemplated action may request a conference with the supervisor or designated officer of the division involved in that action.

(1) A request may be oral or written.

(2) A conference will be conducted in an informal manner in an effort to clarify and narrow the issues and problems involved.

(3) The party requesting a conference will be notified of the result:

(a) orally or in writing;

(b) in person or through counsel; and

(c) at the conclusion of the conference or within a reasonable time thereafter.

(4) A conference may be held at any time prior to a hearing, whether or not a petition for hearing, appeal, or other commencement of an adjudicative proceeding has been filed.

R861-1A-9. Tax Commission as Board of Equalization Pursuant to Utah Code Ann. Sections 59-2-212, 59-2-1004, and 59-2-1006.

A. Equalization Responsibilities. The Commission will sit as the State Board of Equalization in discharge of the equalization responsibilities given it by law. The Commission may sit on its own initiative to correct the valuation of property that has been overassessed, underassessed, or nonassessed as described in Section 59-2-212, and as a board of appeal from the various county boards of equalization described in Section 59-2-1004.

B. Proceedings. In all cases, appeals to the Commission shall be scheduled for hearing pursuant to Commission rules.

C. Appeals from county boards of equalization.

1. A notice of appeal filed by the taxpayer with the auditor pursuant to Section 59-2-1006 shall be presumed to have been timely filed unless the county provides convincing evidence to the contrary. In the absence of evidence of the date of mailing of the county board of equalization decision by the county auditor to the taxpayer, it shall be presumed that the decision was mailed three days after the meeting of the county board of equalization at which the decision was made.

2. If the county has not formally adopted board of equalization rules and procedures under Section 59-2-1001 that have been approved by the Commission, the procedures contained in this rule must be followed.

3. An appeal from a decision of a county board must be presented upon the same issues as were submitted to the county board in the first instance. The Commission shall consider, but is not limited to, the facts and evidence submitted to the county board.

4. The county board of equalization or county hearing officer shall prepare minutes of hearings held before them on property tax appeals. The minutes shall constitute the record on appeal.

a) For appeals concerning property value, the record shall include:

(1) the name and address of the property owner;

(2) the identification number, location, and description of the property;

(3) the value placed on the property by the assessor;

(4) the basis stated in the taxpayer's appeal;

(5) facts and issues raised in the hearing before the county board that are not clearly evident from the assessor's records; and

(6) the decision of the county board of equalization and the reasons for the decision.

b) Exempt Property. With respect to a decision affecting the exempt status of a property, the county board of equalization shall prepare its decision in writing, stating the reasons and

statutory basis for the decision.

5. Appeals from dismissal by the county boards of equalization.

a) Decisions by the county board of equalization are final orders on the merits, and appeals to the Commission shall be on the merits except for the following:

(1) dismissal for lack of jurisdiction;

(2) dismissal for lack of timeliness;

(3) dismissal for lack of evidence to support a claim for relief.

b) On an appeal from a dismissal by a county board for the exceptions under C.5.a), the only matter that will be reviewed by the Commission is the dismissal itself, not the merits of the appeal.

c) An appeal may be dismissed for lack of jurisdiction when the claimant limits arguments to issues not under the jurisdiction of the county board of equalization.

6. An appeal filed with the Commission may be remanded to the county board of equalization for further proceedings if the Commission determines that:

a) dismissal under C.5.a)(1) or (3) was improper;

b) the taxpayer failed to exhaust all administrative remedies at the county level; or

c) in the interest of administrative efficiency, the matter can best be resolved by the county board.

7. An appeal filed with the Commission shall be remanded to the county board of equalization for further proceedings if the Commission determines that dismissal under C.5.a)(2) is improper under R884-24P-66.

8. To achieve standing with the county board of equalization and have a decision rendered on the merits of the case, the taxpayer shall provide the following minimum information to the county board of equalization:

a) the name and address of the property owner;

b) the identification number, location, and description of the property;

c) the value placed on the property by the assessor;

d) the taxpayer's estimate of the fair market value of the property; and

e) a signed statement providing evidence or documentation that supports the taxpayer's claim for relief.

9. If no signed statement is attached, the county will notify the taxpayer of the defect in the claim and permit at least ten calendar days to cure the defect before dismissing the matter for lack of sufficient evidence to support the claim for relief.

10. If the taxpayer appears before the county board of equalization and fails to produce the evidence or documentation under C.8.e), the county shall send the taxpayer a notice of intent to dismiss, and permit the taxpayer at least 20 calendar days to supply the evidence or documentation. If the taxpayer fails to provide the evidence or documentation within 20 days, the county board of equalization may dismiss the matter for lack of evidence to support a claim for relief.

11. If the minimum information required under C.8. is supplied and the taxpayer produces the evidence or documentation described in the taxpayer's signed statement under C.8.e), the county board of equalization shall render a decision on the merits of the case.

R861-1A-10. Miscellaneous Provisions Pursuant to Utah Code Ann. Section 59-1-210.

A. Rights of Parties. Nothing herein shall be construed to remove or diminish any right of any party under the Constitution of the United States, the Constitution of the state of Utah, or any existing law.

B. Effect of Partial Invalidation. If any part of these rules be declared unconstitutional or in conflict with existing statutory law by a court of competent jurisdiction, the remainder shall not be affected thereby and shall continue in full force and effect.

C. Enactment of Inconsistent Legislation. Any statute passed by the Utah Legislature inconsistent with these rules or any part thereof will effect a repeal of that part of these rules with which it is inconsistent, but of no other part.

D. Presumption of Familiarity. It will be presumed that parties dealing with the Commission are familiar with:

1. these rules and the provisions thereof,

2. the revenue laws of the state of Utah, and

3. all rules enacted by the Commission in its administration thereof.

R861-1A-11. Appeal of Corrective Action Order Pursuant to Utah Code Ann. Section 59-2-704.

A. Appeal of Corrective Action Order. Any county appealing a corrective action order issued pursuant to Section 59-2-704, shall, within 10 days of the mailing of the order, request in writing a hearing before the Commission. The Commission shall immediately set the time and place of the hearing, which shall be held no later than June 30 of the tax year to which the corrective action order applies.

B. Hearings. Hearings on corrective action order appeals shall be conducted as formal hearings and shall be governed by the procedures contained in these rules. If the parties are able to stipulate to a modification of the corrective action order, and it is evident that there is a reasonable basis for modifying the corrective action order, an amended corrective action order may be executed by the Commission. One or more commissioners may preside at a hearing under this rule with the same force and effect as if a quorum of the Commission were present. However, a decision must be made and an order signed by a quorum of the Commission.

C. Decisions and Orders. The Commission shall render its decision and order no later than July 10 of the tax year to which the corrective action order applies. Upon reaching a decision, the Commission shall immediately notify the clerk of the county board of equalization and the county assessor of that decision.

D. Sales Information. Access to Commission property sales information shall be available by written agreement with the Commission to any clerk of the county board of equalization and county assessor appealing under this rule. All other reasonable and necessary information shall be available upon request, according to Commission guidelines.

E. Conflict with Other Rules. This rule supersedes all other rules that may otherwise govern these proceedings before the Commission.

R861-1A-12. Policies and Procedures Regarding Public Disclosure Pursuant to Utah Code Ann. Section 59-1-210.

This rule outlines the policies and procedures of the Commission regarding the public disclosure of and access to documents, workpapers, decisions, and other information prepared by the Commission under provisions of Utah Code Ann. Section 59-1-210.

A. Property Tax Orders. Property tax orders signed by the Commission will be mailed to the appropriately named parties in accordance with the Commission's rules of procedure. Property tax orders may also be made available to persons other than the named parties upon written request to the Commission. Nonparty requests will be subject to the following limitations.

1. If, upon consultation with the taxpayer, the Commission determines that a particular property tax order contains information which, if disclosed, would constitute a significant competitive disadvantage to the taxpayer, the Commission may either prohibit the disclosure of the order or require that applicable information be removed from the order prior to it being made publicly available.

2. The limitation in subsection 1. does not apply if the taxpayer affirmatively waives protection against disclosure of the information.

B. Other Tax Orders. Written orders signed by the Commission relating to all tax appeals other than property tax matters will also be mailed to the appropriately named parties in accordance with the Commission rules of procedure. Copies of these orders or information about them will not be provided to any person other than the named parties except for the following circumstances:

1. if the Commission determines that the parties have affirmatively waived any claims to confidentiality; or

2. if the Commission determines that the orders may be effectively sanitized through the deletion of references to the parties, specific tax amounts, or any other information attributable to a return filed with the Commission.

C. Imposition and Waiver of Penalty and Interest.

1. All facts surrounding the imposition of penalty and interest charges as well as requests for waiver of penalty and interest charges are considered confidential and will not be disclosed to any persons other than the parties specifically involved. These facts include the names of the involved parties, the amount of penalty and interest, type of tax involved, amount of the tax owed, reasons for the imposition of the penalty and interest, and any other information relating to imposition of the penalty and interest, except as follows:

(a) if the Commission affirmatively determines that a finding of fraud is involved and seeks the imposition of the appropriate fraud penalties, the Commission may make all pertinent facts available to the public once legal action against the parties has been commenced; or

(b) if the Commission determines that the parties have affirmatively waived their rights to confidentiality, the Commission will make all pertinent facts available to the public.

D. Commission Notes and Workpapers.

1. All workpapers, notes, and other material prepared by the commissioners, as well as staff and employees of the Commission, are to be considered confidential, and access to the specific material is restricted to employees of the Commission and its legal counsel only. Examples of this restricted material include audit workpapers and notes, ad valorem appraisal worksheets, and notes taken during hearings and deliberations. In the case of information prepared as part of an audit, the auditing division will, upon request, provide summary information of the findings to the taxpayer. These items will not be available to any person or party by discovery carried out pursuant to these rules or the Utah Rules of Civil Procedure.

2. Relevant workpapers of the property tax division prepared in connection with the assessment of property by the Commission, pursuant to the provisions of Utah Code Ann. Section 59-2-217, shall be provided to the owner of the property to which the assessment relates, at the owner's request.

E. Reciprocal Agreements. Pursuant to Utah Code Ann. Sections 59-7-537, 59-10-545 and 59-12-109, the Commission may enter into individual reciprocal agreements to share specific tax information with authorized representatives of the United States Internal Revenue Service, tax officials of other states, and representatives of local governments within the state of Utah; provided, however, that no information will be provided to any governmental entity if providing such information would violate any statute or any agreement with the Internal Revenue Service.

F. Other Agreements. Pursuant to Utah Code Ann. Section 59-12-109, the Commission may provide departments and political subdivisions of the state of Utah with copies of returns and other information required by Chapter 12 of Title 59. This information is available only in official matters and must be requested in writing by the head of the department or political subdivision. The request must specifically indicate the information being sought and how the information will be used. The Commission will respond in writing to the request and shall impose conditions of confidentiality on the use of the information disclosed.

G. Multistate Tax Commission. The Commission is authorized to share specific tax information for audit purposes with the Multistate Tax Commission.

H. Statistical Information. The Commission authorizes the preparation and publication of statistical information regarding the payment and collection of state taxes. The information will be prepared by the various divisions of the Commission and made available after review and approval of the Commission.

I. Public Record Information. Pursuant to Utah Code Ann. 59-1-403(3)(c), the Commission may publicize the name and other appropriate information, as contained in the public record, concerning delinquent taxpayers, including their addresses, the amount of money owed by tax type, as well as any legal action taken by the Commission, including charges filed, property seized, etc. No information will be released which is not part of the existing public record.

R861-1A-13. Requests for Accommodation and Grievance Procedures Pursuant to Utah Code Ann. Section 63G-3-201, 28 CFR 35.107 1992 edition, and 42 USC 12201.

(1) Individuals with a disability may request reasonable accommodations to services, programs, or activities, or a job or work environment in the following manner.

(a) Requests shall be directed to:

Accommodations Coordinator
Utah State Tax Commission
210 North 1950 West
Salt Lake City, Utah 84134
Telephone: 801-297-3811 TDD: 801-297-3819 or relay at 711

(b) Requests shall be made at least three working days prior to any deadline by which the accommodation is needed.

(c) Requests shall include the following information:

(i) the individual's name and address;

(ii) a notation that the request is made in accordance with the Americans with Disabilities Act;

(iii) a description of the nature and extent of the individual's disability;

(iv) a description of the service, program, activity, or job or work environment for which an accommodation is requested; and

(v) a description of the requested accommodation if an accommodation has been identified.

(2) The accommodations coordinator shall review all requests for accommodation with the applicable division director and shall issue a reply within two working days.

(a) The reply shall advise the individual that:

(i) the requested accommodation is being supplied; or

(ii) the requested accommodation is not being supplied because it would cause an undue hardship, and shall suggest alternative accommodations. Alternative accommodations must be described; or

(iii) the request for accommodation is denied. A reason for the denial must be included; or

(iv) additional time is necessary to review the request. A projected response date must be included.

(b) All denials of requests under Subsections (2)(a)(ii) and (2)(a)(iii) shall be approved by the executive director or designee.

(c) All replies shall be made in a suitable format. If the suitable format is a format other than writing, the reply shall also be made in writing.

(3) Individuals with a disability who are dissatisfied with the reply to their request for accommodation may file a request for review with the executive director in the following manner.

(a) Requests for review shall be directed to:

Executive Director
Utah State Tax Commission
210 North 1950 West

Salt Lake City, Utah 84134
Telephone: 801-297-3841 TDD: 801-297-3819 or relay at 711

(b) A request for review must be filed within 180 days of the accommodations coordinator's reply.

(c) The request for review shall include:

(i) the individual's name and address;

(ii) the nature and extent of the individual's disability;

(iii) a copy of the accommodation coordinator's reply;

(iv) a statement explaining why the reply to the individual's request for accommodation was unsatisfactory;

(v) a description of the accommodation desired; and

(vi) the signature of the individual or the individual's legal representative.

(4) The executive director shall review all requests for review and shall issue a reply within 15 working days after receipt of the request for review.

(a) If unable to reach a decision within the 15 working day period, the executive director shall notify the individual with a disability that the decision is being delayed and the amount of additional time necessary to reach a decision.

(b) All replies shall be made in a suitable format. If the suitable format is a format other than writing, the reply shall also be made in writing.

(5) The record of each request for review, and all written records produced or received as part of each request for review, shall be classified as protected under Section 63G-2-305 until the executive director issues a decision.

(6) Once the executive director issues a decision, any portions of the record that pertain to the individual's medical condition shall remain classified as private under Section 63G-2-302 or controlled under Section 63G-2-304, whichever is appropriate. All other information gathered as part of the appeal shall be classified as private information. Only the written decision of the executive director shall be classified as public information.

(7) Individuals with a disability who are dissatisfied with the executive director's decision may appeal that decision to the commission in the manner provided in Sections 63G-4-102 through 63G-4-105.

R861-1A-15. Requirement of Social Security and Federal Identification Numbers Pursuant to Utah Code Ann. Section 59-1-210.

A. Taxpayers shall provide the Tax Commission with their social security number or federal identification number, as required by the Tax Commission.

B. Sole proprietor and partnership applicants shall provide the Tax Commission with the following information for every owner or partner of the applying entity:

1. name;
2. home address;
3. social security number and federal identification number, as required by the Tax Commission.

C. Corporation and limited liability applicants shall provide the Tax Commission with the following information for every officer or managing member of the applying entity:

1. name;
2. home address; and
3. social security number and federal identification number, as required by the Tax Commission.

D. Business trust applicants shall provide the Tax Commission with the following information for the responsible trustees:

1. name;
2. home address; and
3. social security number and federal identification number, as required by the Tax Commission.

R861-1A-16. Utah State Tax Commission Management Plan Pursuant to Utah Code Ann. Section 59-1-207.

(1) The executive director reports to the commission. The executive director shall meet with the commission periodically to report on the status and progress of this agreement, update the commission on the affairs of the agency and seek policy guidance. The chairman of the commission shall designate a liaison of the commission to coordinate with the executive director in the execution of this agreement.

(2) The structure of the agency is as follows:

(a) The Office of the Commission, including the commissioners and the following units that report to the commission:

(i) Internal Audit;

(ii) Appeals;

(iii) Economic and Statistical; and

(iv) Public Information.

(b) The Office of the Executive Director, including the executive director's staff and the following divisions that report to the executive director:

(i) Administration;

(ii) Taxpayer Services;

(iii) Motor Vehicle;

(iv) Auditing;

(v) Property Tax;

(vi) Processing; and

(vii) Motor Vehicle Enforcement.

(3) The Executive Director shall oversee service agreements from other departments, including the Department of Human Resources and the Department of Technology Services.

(4) The commission hereby delegates full authority for the following functions to the executive director:

(a) general supervision and management of the day to day management of the operations and business of the agency conducted through the Office of the Executive Director and through the divisions set out in Subsection (2)(b);

(b) management of the day to day relationships with the customers of the agency;

(c) all original assessments, including adjustments to audit, assessment, and collection actions, except as provided in Subsections (4)(d) and (5);

(d) waivers of penalty and interest or offers in compromise agreements in amounts under $10,000, in conformance with standards established by the commission;

(e) except as provided in Subsection (5)(g), voluntary disclosure agreements with companies, including multilevel marketers;

(f) determination of whether a county or taxing entity has satisfied its statutory obligations with respect to taxes and fees administered by the commission;

(g) human resource management functions, including employee relations, final agency action on employee grievances, and development of internal policies and procedures; and

(h) administration of Title 63G, Chapter 2, Government Records Access and Management Act.

(5) The executive director shall prepare and, upon approval by the commission, implement the following actions, agreements, and documents:

(a) the agency budget;

(b) the strategic plan of the agency;

(c) administrative rules and bulletins;

(d) waivers of penalty and interest in amounts of $10,000 or more as per the waiver of penalty and interest policy;

(e) offer in compromise agreements that abate tax, penalty and interest over $10,000 as per the offer in compromise policy;

(f) stipulated or negotiated agreements that dispose of matters on appeal; and

(g) voluntary disclosure agreements that meet the

following criteria:

(i) the company participating in the agreement is not licensed in Utah and does not collect or remit Utah sales or corporate income tax; and

(ii) the agreement forgives a known past tax liability of $10,000 or more.

(6) The commission shall retain authority for the following functions:

(a) rulemaking;

(b) adjudicative proceedings;

(c) private letter rulings issued in response to requests from individual taxpayers for guidance on specific facts and circumstances;

(d) internal audit processes;

(e) liaison with the governor's office;

(i) Correspondence received from the governor's office relating to tax policy will be directed to the Office of the Commission for response. Correspondence received from the governor's office that relates to operating issues of the agency will be directed to the Office of the Executive Director for research and appropriate action. The executive director shall prepare a timely response for the governor with notice to the commission as appropriate.

(ii) The executive director and staff may have other contact with the governor's office upon appropriate notice to the commission; and

(f) liaison with the Legislature.

(i) The commission will set legislative priorities and communicate those priorities to the executive director.

(ii) Under the direction of the executive director, staff may be assigned to assist the commission and the executive director in monitoring legislative meetings and assisting legislators with policy issues relating to the agency.

(7) Correspondence that has been directed to the commission or individual commissioners that relates to matters delegated to the executive director shall be forwarded to a staff member of the Office of the Executive Director for research and appropriate action. A log shall be maintained of all correspondence and periodically the executive director will review with the commission the volume, nature, and resolution of all correspondence from all sources.

(8) The executive director's staff may occasionally act as support staff to the commission for purposes of conducting research or making recommendations on tax issues.

(a) Official communications or assignments from the commission or individual commissioners to the staff reporting to the executive director shall be made through the executive director.

(b) The commissioners and the Office of the Commission staff reserve the right to contact agency staff directly to facilitate a collegial working environment and maintain communications within the agency. These contacts will exclude direct commands, specific policy implementation guidance, or human resource administration.

(9) The commission shall meet with the executive director periodically for the purpose of exchanging information and coordinating operations.

(a) The commission shall discuss with the executive director all policy decisions, appeal decisions or other commission actions that affect the day to day operations of the agency.

(b) The executive director shall keep the commission apprised of significant actions or issues arising in the course of the daily operation of the agency.

(c) When confronted with circumstances that are not covered by established policy or by instances of real or potential conflicts of interest, the executive director shall refer the matter to the commission.

R861-1A-18. Allocations of Remittances Pursuant to Utah Code Ann. Sections 59-1-210 and 59-1-705.

A. Remittances received by the commission shall be applied first to penalty, then interest, and then to tax for the filing period and account designated by the taxpayer.

B. If no designation for period is made, the commission shall allocate the remittance so as to satisfy all penalty, interest, and tax for the oldest period before applying any excess to other periods.

C. Fees associated with Tax Commission collection activities shall be allocated from remittances in the manner designated by statute. If a statute does not provide for the manner of allocating those fees from remittances, the commission shall apply the remittance first to the collection activity fees, then to penalty, then interest, and then to tax for the filing period.

R861-1A-20. Time of Appeal Pursuant to Utah Code Ann. Sections 59-1-301, 59-1-501, 59-2-1007, 59-7-517, 59-10-532, 59-10-533, 59-10-535, 59-12-114, 59-13-210, 63G-4-201, 63G-4-401, 68-3-7, and 68-3-8.5.

(1) A request for a hearing to correct a centrally assessed property tax assessment pursuant to Section 59-2-1007 must be in writing. The request is deemed to be timely if:

(a) it is received in the commission offices on or before the close of business of the last day of the time frame provided by statute; or

(b) the date of the postmark on the envelope or cover indicates that the request was mailed on or before June 1.

(2) Except as provided in Subsection (3), a petition for redetermination of a deficiency must be received in the commission offices no later than 30 days from the date of a notice that creates the right to appeal. The petition is deemed to be timely if:

(a) in the case of mailed or hand-delivered documents:

(i) the petition is received in the commission offices on or before the close of business of the last day of the 30-day period; or

(ii) the date of the postmark on the envelope or cover indicates that the request was mailed on or before the last day of the 30-day period; or

(b) in the case of electronically-filed documents, the petition is received no later than midnight of the last day of the 30-day period.

(3) A petition for redetermination of a claim for refund filed in accordance with Sections 59-10-532 or 59-10-533 is deemed to be timely if:

(a) in the case of mailed or hand-delivered documents:

(i) the petition is received in the commission offices on or before the close of business of the last day of the time frame provided by statute; or

(ii) the date of the postmark on the envelope or cover indicates that the request was mailed on or before the last day of the time frame provided by statute; or

(b) in the case of electronically-filed documents, the petition is received no later than midnight of the last day of the time frame provided by statute.

(4) Any party adversely affected by an order of the commission may seek judicial review within the time frame provided by statute. Copies of the appeal shall be served upon the commission and upon the Office of the Attorney General.

R861-1A-22. Petitions for Commencement of Adjudicative Proceedings Pursuant to Utah Code Ann. Sections 59-1-501, and 63G-4-201.

(1) Time for Petition. Unless otherwise provided by Utah statute, petitions for adjudicative actions shall be filed within the time frames specified in R861-1A-20. If the last day of the 30-day period falls on a Saturday, Sunday, or legal holiday, the

period shall run until the end of the next Tax Commission business day.

(2) Contents. A petition for adjudicative action need not be in any particular form, but shall be in writing and, in addition to the requirements of 63G-4-201, shall contain the following:

(a) name and street address and, if available, a fax number or e-mail address of petitioner or the petitioner's representative;

(b) a telephone number where the petitioning party or that party's representative can be reached during regular business hours;

(c) petitioner's tax identification, social security number or other relevant identification number, such as real property parcel number or vehicle identification number;

(d) particular tax or issue involved, period of alleged liability, amount of tax in dispute, and, in the case of a property tax issue, the lien date;

(e) if the petition results from a letter or notice, the petition will include the date of the letter or notice and the originating division or officer; and

(f) in the case of property tax cases, the assessed value sought.

(3) Effect of Nonconformance. The commission will not reject a petition because of nonconformance in form or content, but may require an amended or substitute petition meeting the requirements of this section when such defects are present. An amended or substitute petition must be filed within 15 days after notice of the defect from the commission.

R861-1A-23. Designation of Adjudicative Proceedings Pursuant to Utah Code Ann. Section 63G-4-202.

(1) All matters shall be designated as formal proceedings and set for an initial hearing, a status conference, or a scheduling conference pursuant to R861-1A-26.

(2) A matter may be diverted to a mediation process pursuant to R861-1A-32 upon agreement of the parties and the presiding officer.

R861-1A-24. Formal Adjudicative Proceedings Pursuant to Utah Code Ann. Sections 59-1-502.5, 63G-4-206, and 63G-4-208.

(1) The following may preside at a formal proceeding:

(a) a commissioner;

(b) an administrative law judge appointed by the commission; or

(c) in the case of a formal proceeding that relates to a matter that is not a tax, fee, or charge as defined under Section 59-1-1402:

(i) a commissioner;

(ii) an administrative law judge appointed by the commission; or

(iii) a hearing officer appointed by the commission.

(2) Assignment of a presiding officer to a case will be made pursuant to agency procedures and not at the request of any party to the appeal.

(a) A party may request that one or more commissioners be present at any hearing. However, the decision of whether the request is granted rests with the commission.

(b) If more than one commissioner, administrative law judge, or hearing officer is present at any hearing, the hearing will be conducted by the presiding officer assigned to the appeal, unless otherwise determined by the commission.

(3) A formal proceeding includes an initial hearing pursuant to Section 59-1-502.5, unless it is waived upon agreement of all parties, and a formal hearing on the record, if the initial hearing is waived or if a party appeals the initial hearing decision.

(a) Initial Hearing.

(i) An initial hearing pursuant to Section 59-1-502.5 shall be in the form of a conference.

(ii) In accordance with Section 59-1-502.5, the commission shall make no record of an initial hearing.

(iii) Any issue may be settled in the initial hearing, but any party has a right to a formal hearing on matters that remain in dispute after the initial hearing decision is issued.

(iv) Any party dissatisfied with the result of the initial hearing must file a timely request for a formal hearing before pursuing judicial review of unsettled matters.

(b) Formal Hearing.

(i) The commission shall make a record of all formal hearings, which may include a written record or an audio recording of the proceeding.

(ii) Evidence presented at the initial hearing will not be included in the record of the formal hearing, unless specifically requested by a party and admitted by the presiding officer.

R861-1A-26. Procedures for Formal Adjudicative Proceedings Pursuant to Utah Code Ann. Sections 59-1-501 and 63G-4-204 through 63G-4-209.

(1) A scheduling or status conference may be held.

(a) At the conference, the parties and the presiding officer may:

(i) establish deadlines and procedures for discovery;

(ii) discuss scheduling;

(iii) clarify other issues;

(iv) determine whether to refer the action to a mediation process; and

(v) determine whether the initial hearing will be waived.

(b) The scheduling or status conference may be converted to an initial hearing upon agreement of the parties.

(2) Notice of Hearing. At least ten days prior to a hearing date, the Commission shall notify the petitioning party or the petitioning party's representative by mail, e-mail, or facsimile of the date, time and place of any hearing or proceeding.

(3) Proceedings Conducted by Telephone. Any proceeding may be held with one or more of the parties on the telephone if the presiding officer determines that it will be more convenient or expeditious for one or more of the parties and does not unfairly prejudice the rights of any party. Each party to the proceeding is responsible for notifying the presiding officer of the telephone number where contact can be made for purposes of conducting the hearing.

(4) Representation.

(a) A party may pursue an appeal before the commission without assistance of legal counsel or other representation. However, a party may be represented by legal counsel or other representation at every stage of adjudication. Failure to obtain legal representation shall not be grounds for complaint at a later stage in the adjudicative proceeding or for relief on appeal from an order of the commission.

(i) For appeals concerning Utah corporate franchise and income taxes or Utah individual income taxes, legal counsel must file a power of attorney or the taxpayer must submit a signed petition for redetermination (Tax Commission form TC-738) on which the taxpayer has authorized legal counsel to represent him or her in the appeal. For all other appeals, legal counsel may, as an alternative, submit an entry of appearance.

(ii) Any representative other than legal counsel must submit a signed power of attorney authorizing the representative to act on the party's behalf and binding the party by the representative's action, unless the taxpayer submits a signed petition for redetermination (Tax Commission form TC-738) on which the taxpayer has authorized the representative to represent him or her in the appeal.

(iii) If a party is represented by legal counsel or other representation, all documents will be directed to the party's representative. Documents will be mailed to the representative's street or other address as shown in documents submitted by the representative. Documents may also be transmitted by facsimile

number, e-mail address or other electronic means. A request by a party that documents be transmitted by e-mail shall constitute a waiver of confidentiality of any confidential information disclosed in that e-mail.

(b) Any division of the commission named as party to the proceeding may be represented by the Attorney General's Office upon an attorney of that office submitting an entry of appearance.

(5) Subpoena Power.

(a) Issuance. Subpoenas may be issued to secure the attendance of witnesses or the production of evidence.

(i) If all parties are represented by counsel, an attorney admitted to practice law in Utah may issue and sign the subpoena.

(ii) In all other cases, the party requesting the subpoena must prepare it and submit it to the presiding officer for review and, if appropriate, signature. The presiding officer may inform a party of its rights under the Utah Rules of Civil Procedure.

(b) Service. Service of the subpoena shall be made by the party requesting it in a manner consistent with the Utah Rules of Civil Procedure.

(6) Motions.

(a) Consolidation. The presiding officer has discretion to consolidate cases when the same tax assessment, series of assessments, or issues are involved in each, or where the fact situations and the legal questions presented are virtually identical.

(b) Continuance. A continuance may be granted at the discretion of the presiding officer.

(i) In the absence of a scheduling order:

(A) Each party to an appeal may receive one continuance, upon request, prior to the initial hearing.

(B) If the initial hearing is waived or a formal hearing is timely requested after an initial hearing decision is issued, each party may receive one continuance, upon request, prior to the formal hearing.

(C) A request must be submitted no later than ten days prior to the proceeding for which the continuance is requested and may be denied if a party is prejudiced by the continuance.

(ii) If a scheduling order has been issued or the requesting party has already been granted a continuance, a continuance request must be submitted in writing to the presiding officer. The request must set forth specific reasons for the continuance. After reviewing the request with one or more commissioners, the presiding officer shall grant the request only if the presiding officer determines that adequate cause has been shown and that no other party or parties will be unduly prejudiced.

(c) Default. The presiding officer may enter an order of default against a party in accordance with Section 63G-4-209.

(i) The default order shall include a statement of the grounds for default and shall be delivered to all parties.

(ii) A defaulted party may seek to have the default set aside according to procedures set forth in the Utah Rules of Civil Procedure.

(d) Ruling on Motions. Motions may be made during the hearing or by written motion.

(i) Each motion shall include the grounds upon which it is based and the relief or order sought. Copies of written motions shall be served upon all other parties to the proceeding.

(ii) Upon the filing of any motion, the presiding officer may:

(A) grant or deny the motion; or

(B) set the matter for briefing, hearing, or further proceedings.

(iii) If a hearing on a motion is held that may dispose of all or a portion of the appeal or any claim or defense in the appeal, the commission shall make a record of the proceeding, which may include a written record or an audio recording of the proceeding.

(e) Requests to Withdraw Locally-Assessed Property Tax Appeals.

(i) A party who appeals a county board of equalization decision to the commission may unilaterally withdraw its appeal if:

(A) it submits a written request to withdraw the appeal 20 or more days prior to:

(I) the initial hearing; or

(II) the formal hearing, if the parties waived the initial hearing or participated in a mediation conference in lieu of the initial hearing; and

(B) no other party has filed a timely appeal of the county board of equalization decision.

(ii) A party who appeals an initial hearing decision issued by the commission may unilaterally withdraw its appeal if:

(A) it submits a written request to withdraw 20 or more days prior to the formal hearing, regardless of whether the party who appealed the initial hearing order is also the party who appealed the county board of equalization decision; and

(B) no other party has filed a timely appeal of the initial hearing decision.

R861-1A-27. Discovery Pursuant to Utah Code Ann. Section 63G-4-205.

(1) Discovery procedures in formal proceedings shall be established during the scheduling, and status conference in accordance with the Utah Rules of Civil Procedure and other applicable statutory authority.

(2) The party requesting information or documents may be required to pay in advance the costs of obtaining or reproducing such information or documents.

R861-1A-28. Evidence in Adjudicative Proceedings Pursuant to Utah Code Ann. Sections 59-1-210, 63G-4-206, 76-8-502, and 76-8-503.

(1) Except as otherwise stated in this rule, formal proceedings shall be conducted in accordance with the Utah Rules of Evidence, and the degree of proof in a hearing before the commission shall be the same as in a judicial proceeding in the state courts of Utah.

(2) Every party to an adjudicative proceeding has the right to introduce evidence. The evidence may be oral or written, real or demonstrative, direct or circumstantial.

(a) The presiding officer may admit any reliable evidence possessing probative value which would be accepted by a reasonably prudent person in the conduct of his affairs.

(b) The presiding officer may admit hearsay evidence. However, no decision of the commission will be based solely on hearsay evidence.

(c) If a party attempts to introduce evidence into a hearing, and that evidence is excluded, the party may proffer the excluded testimony or evidence to allow the reviewing judicial authority to pass on the correctness of the ruling of exclusion on appeal.

(3) At the discretion of the presiding officer or upon stipulation of the parties, the parties may be required to reduce their testimony to writing and to prefile the testimony.

(a) Prefiled testimony may be placed on the record without being read into the record if the opposing parties have had reasonable access to the testimony before it is presented. Except upon finding of good cause, reasonable access shall be not less than ten working days.

(b) Prefiled testimony shall have line numbers inserted at the left margin and shall be authenticated by affidavit of the witness.

(c) The presiding officer may require the witness to present a summary of the prefiled testimony. In that case, the witness shall reduce the summary to writing and either file it with the prefiled testimony or serve it on all parties within 10

days after filing the testimony.

(d) If an opposing party intends to cross-examine the witness on prefiled testimony or the summary of prefiled testimony, that party must file a notice of intent to cross-examine at least 10 days prior to the date of the hearing so that witness can be scheduled to appear or within a time frame agreed upon by the parties.

(4) The presiding officer shall rule and sign orders on matters concerning the evidentiary and procedural conduct of the proceeding.

(5) Oral testimony at a formal hearing will be sworn. The oath will be administered by the presiding officer or a person designated by him. Anyone testifying falsely under oath may be subject to prosecution for perjury in accordance with the provisions of Sections 76-8-502 and 76-8-503.

(6) Any party appearing in an adjudicative proceeding may submit a memorandum of authorities. The presiding officer may request a memorandum from any party if deemed necessary for a full and informed consideration of the issues.

R861-1A-29. Decisions, Orders, and Reconsideration Pursuant to Utah Code Ann. Sections 59-1-205 and 63G-4-302.

(1) "Taxpayer" for purposes of the requirement under Section 59-1-205 that in a tie vote of the commission the position of the taxpayer is considered to have prevailed, includes:

(a) a person that has received a license issued by the commission; or

(b) an applicant for a license issued by the commission.

(2) Decisions and Orders.

(a) Initial hearing decisions, formal hearing decisions, and other dispositive orders.

(i) A quorum of the commission shall deliberate all hearing decisions and other orders that could dispose of all or a portion of an appeal or any claim or defense in the appeal.

(ii) A quorum of the commission shall sign all hearing decisions and other orders that dispose of all or a portion of an appeal or any claim or defense in the appeal.

(iii) An administrative law judge, if he or she was the presiding officer for an appeal, may elect not to sign the commission's hearing decisions and other orders that dispose of all or a portion of an appeal or any claim or defense in the appeal.

(iv) An initial hearing decision shall become final upon the expiration of 30 days after the date of its issuance, except in any case where a party has earlier requested a formal hearing in writing. The date a party requests a formal hearing is the earlier of the date the envelope containing the request is postmarked or the date the request is received at the commission.

(b) Orders that are not dispositive.

(i) A quorum of the commission is not required to participate in an order that does not dispose of a portion of an appeal or any claim or defense in the appeal.

(ii) The presiding officer is authorized to sign all orders that do not dispose of a portion of an appeal or any claim or defense in the appeal.

(iii) The commission may, at its option, sign any order that does not dispose of a portion of an appeal or any claim or defense in the appeal.

(3) Reconsideration. Within 20 days after the date that an order that is dispositive of a portion or all of an appeal or any claim or defense in the appeal is issued, any party may file a written request for reconsideration alleging mistake of law or fact, or discovery of new evidence.

(a) The commission shall respond to the petition within 20 days after the date that it was received in the appeals unit to notify the petitioner whether the reconsideration is granted or denied, or is under review.

(i) If no notice is issued within the 20-day period, the commission's lack of action on the request shall be deemed to be a denial and a final order.

(ii) For purposes of calculating the 30-day limitation period for pursuing judicial review, the date of the commission's order on the reconsideration or the order of denial is the date of the final agency action.

(b) If no petition for reconsideration is made, the 30-day limitation period for pursuing judicial review begins to run from the date of the final agency action.

R861-1A-30. Ex Parte Communications Pursuant to Utah Code Ann. Sections 63G-4-203 and 63G-4-206.

(1) No commissioner or administrative law judge shall make or knowingly cause to be made to any party to an appeal any communication relevant to the merits of a matter under appeal unless notice and an opportunity to be heard are afforded to all parties.

(2) No party shall make or knowingly cause to be made to any commissioner or administrative law judge an ex parte communication relevant to the merits of a matter under appeal for the purpose of influencing the outcome of the appeal. Discussion of procedural matters are not considered ex parte communication relevant to the merits of the appeal.

(3) A presiding officer may receive aid from staff assistants if:

(a) the assistants do not receive ex parte communications of a type that the presiding officer is prohibited from receiving, and,

(b) in an instance where assistants present information which augments the evidence in the record, all parties shall have reasonable notice and opportunity to respond to that information.

(4) Any commissioner or administrative law judge who receives an ex parte communication relevant to the merits of a matter under appeal shall place the communication into the case file and afford all parties an opportunity to comment on the information.

R861-1A-31. Declaratory Orders Pursuant to Utah Code Ann. Section 63G-4-503.

(1) A party has standing to bring a declaratory action if that party is directly and adversely affected or aggrieved by an agency action within the meaning of the relevant statute.

(2) A party with standing may petition for a declaratory order to challenge:

(a) the commission's interpretation of statutory language as stated in an administrative rule; or

(b) the commission's grant of authority under a statute.

(3) The commission shall not accept a petition for declaratory order on matters pending before the commission in an audit assessment, refund request, collections action or other agency action, or on matters pending before the court on judicial review of a commission decision.

(4) The commission may refuse to render a declaratory order if the order will not completely resolve the controversy giving rise to the proceeding or if the petitioner has other remedies through the administrative appeals processes. The commission's decision to accept or reject a petition for declaratory order rests in part on the petitioner's standing to raise the issue and on a determination that the petitioner has not already incurred tax liability under the statutes or rules challenged.

(5) A declaratory order that invalidates all or part of an administrative rule shall trigger the rulemaking process to amend the rule.

R861-1A-32. Mediation Process Pursuant to Utah Code Section 63G-4-102.

(1) Except as otherwise precluded by law, a resolution to any matter of dispute may be pursued through mediation.

(a) The parties may agree to pursue mediation any time before the formal hearing on the record.

(b) The choice of mediator and the apportionment of costs shall be determined by agreement of the parties.

(2) If mediation produces a settlement agreement, the agreement shall be submitted to the presiding officer pursuant to R861-1A-33.

(a) The settlement agreement shall be prepared by the parties or by the mediator, and promptly filed with the presiding officer.

(b) The settlement agreement shall be adopted by the commission if it is not contrary to law.

(c) If the mediation does not resolve all of the issues, the parties shall prepare a stipulation that identifies the issues resolved and the issues that remain in dispute.

(d) If any issues remain unresolved, the appeal will be scheduled for a formal hearing pursuant to R861-1A-23.

R861-1A-33. Settlement Agreements Pursuant to Utah Code Sections 59-1-210 and 59-1- 502.5.

A. "Settlement agreement" means a stipulation, consent decree, settlement agreement or any other legally binding document or representation that resolves a dispute or issue between the parties.

B. Procedure:

1. Parties with an interest in a matter pending before a division of the Tax Commission may submit a settlement agreement for review and approval, whether or not a petition for hearing has been filed.

2. Parties to an appeal pending before the commission may submit a settlement agreement to the presiding officer for review and approval.

3. Each settlement agreement shall be in writing and executed by each party or each party's legal representative, if any, and shall contain:

a) the nature of the claim being settled and any claims remaining in dispute;

b) a proposed order for commission approval; and

c) a statement that each party has been notified of, and allowed to participate in settlement negotiations.

4. A settlement agreement terminates the administrative action on the issues settled before all administrative remedies are exhausted, and, therefore, precludes judicial review of the issues. Each settlement agreement shall contain a statement that the agreement is binding and constitutes full resolution of all issues agreed upon in the settlement agreement.

5. The signed agreement shall stay further proceedings on the issues agreed upon in the settlement until the agreement is accepted or rejected by the commission or the commission's designee.

a) If approved, the settlement agreement shall take effect by its own terms.

b) If rejected, action on the claim shall proceed as if no settlement agreement had been reached. Offers made during the negotiation process will not be used as an admission against that party in further adjudicative proceedings.

R861-1A-34. Private Letter Rulings Pursuant to Utah Code Ann. Section 59-1-210.

A. Private letter rulings are written, informational statements of the commission's interpretation of statutes or administrative rules, or informational statements concerning the application of statutes and rules to specific facts and circumstances.

1. Private letter rulings address questions that have not otherwise been addressed in statutes, rules, or decisions issued by the commission.

2. The commission shall not knowingly issue a private letter ruling on a matter pending before the commission in an audit assessment, refund request, or other agency action, or regarding matters that are pending before the court on judicial review of a commission decision. Any private letter ruling inadvertently issued on a matter pending agency or judicial action shall be set aside until the conclusion of that action.

3. Requests for private letter rulings must be addressed to the commission in writing. If the requesting party is dissatisfied with the ruling, that party may resubmit the request along with new facts or information for commission review.

B. The weight afforded a private letter ruling in a subsequent audit or administrative appeal depends upon the degree to which the underlying facts addressed in the ruling were adequate to allow thorough consideration of the issues and interests involved.

C. A private letter ruling is not a final agency action. Petitioner must use the designated appeal process to address judiciable controversies arising from the issuance of a private letter ruling.

1. If the private letter ruling leads to a denial of a claim, an audit assessment, or some other agency action at a divisional level, the taxpayer must use the appeals procedures to challenge that action within 30 days of the final division decision.

2. If the only matter at issue in the private letter ruling is a challenge to the commission's interpretation of statutory language or a challenge to the commission's authority under a statute, the matter may come before the commission as a petition for declaratory order submitted within 30 days of the date of the ruling challenged.

R861-1A-35. Manner of Retaining Records Pursuant to Utah Code Ann. Sections 59-1-210, 59-5-104, 59-5-204, 59-6-104, 59-7-506, 59-8-105, 59-8a-105, 59-10-501, 59-12-111, 59-13-211, 59-13-312, 59-13-403, 59-14-303, and 59-15-105.

A. Definitions.

1. "Database Management System" means a software system that controls, relates, retrieves, and provides accessibility to data stored in a database.

2. "Electronic data interchange" or "EDI technology" means the computer-to-computer exchange of business transactions in a standardized, structured electronic format.

3. "Hard copy" means any documents, records, reports, or other data printed on paper.

4. "Machine-sensible record" means a collection of related information in an electronic format. Machine-sensible records do not include hard-copy records that are created or recorded on paper or stored in or by an imaging system such as microfilm, microfiche, or storage-only imaging systems.

5. "Storage-only imaging system" means a system of computer hardware and software that provides for the storage, retention, and retrieval of documents originally created on paper. It does not include any system, or part of a system, that manipulates or processes any information or data contained on the document in any manner other than to reproduce the document in hard copy or as an optical image.

6. "Taxpayer" means the person required, under Title 59 or other statutes administered by the Tax Commission, to collect, remit, or pay the tax or fee to the Tax Commission.

B. If a taxpayer retains records in both machine-sensible and hard-copy formats, the taxpayer shall make the records available to the commission in machine-sensible format upon request by the commission.

C. Nothing in this rule shall be construed to prohibit a taxpayer from demonstrating tax compliance with traditional hard-copy documents or reproductions thereof, in whole or in part, whether or not the taxpayer also has retained or has the capability to retain records on electronic or other storage media in accordance with this rule. However, this does not relieve the

taxpayer of the obligation to comply with B.

D. Recordkeeping requirements for machine-sensible records.

1. Machine-sensible records used to establish tax compliance shall contain sufficient transaction-level detail information so that the details underlying the machine-sensible records can be identified and made available to the commission upon request. A taxpayer has discretion to discard duplicated records and redundant information provided its responsibilities under this rule are met.

2. At the time of an examination, the retained records must be capable of being retrieved and converted to a standard record format.

3. Taxpayers are not required to construct machine-sensible records other than those created in the ordinary course of business. A taxpayer who does not create the electronic equivalent of a traditional paper document in the ordinary course of business is not required to construct such a record for tax purposes.

4. Electronic Data Interchange Requirements.

a) Where a taxpayer uses electronic data interchange processes and technology, the level of record detail, in combination with other records related to the transactions, must be equivalent to that contained in an acceptable paper record.

b) For example, the retained records should contain such information as vendor name, invoice date, product description, quantity purchased, price, amount of tax, indication of tax status, and shipping detail. Codes may be used to identify some or all of the data elements, provided that the taxpayer provides a method that allows the commission to interpret the coded information.

c) The taxpayer may capture the information necessary to satisfy D.4.b) at any level within the accounting system and need not retain the original EDI transaction records provided the audit trail, authenticity, and integrity of the retained records can be established. For example, a taxpayer using electronic data interchange technology receives electronic invoices from its suppliers. The taxpayer decides to retain the invoice data from completed and verified EDI transactions in its accounts payable system rather than to retain the EDI transactions themselves. Since neither the EDI transaction nor the accounts payable system captures information from the invoice pertaining to product description and vendor name, i.e., they contain only codes for that information, the taxpayer also retains other records, such as its vendor master file and product code description lists and makes them available to the commission. In this example, the taxpayer need not retain its EDI transaction for tax purposes.

5. Electronic data processing systems requirements.

a) The requirements for an electronic data processing accounting system should be similar to that of a manual accounting system, in that an adequately designed accounting system should incorporate methods and records that will satisfy the requirements of this rule.

6. Business process information.

a) Upon the request of the commission, the taxpayer shall provide a description of the business process that created the retained records. The description shall include the relationship between the records and the tax documents prepared by the taxpayer, and the measures employed to ensure the integrity of the records.

b) The taxpayer shall be capable of demonstrating:

(1) the functions being performed as they relate to the flow of data through the system;

(2) the internal controls used to ensure accurate and reliable processing; and

(3) the internal controls used to prevent unauthorized addition, alteration, or deletion of retained records.

c) The following specific documentation is required for machine-sensible records retained pursuant to this rule:

(1) record formats or layouts;

(2) field definitions, including the meaning of all codes used to represent information;

(3) file descriptions, e.g., data set name; and

(4) detailed charts of accounts and account descriptions.

E. Records maintenance requirements.

1. The commission recommends but does not require that taxpayers refer to the National Archives and Record Administration's (NARA) standards for guidance on the maintenance and storage of electronic records, such as labeling of records, the location and security of the storage environment, the creation of back-up copies, and the use of periodic testing to confirm the continued integrity of the records. The NARA standards may be found at 36 C.F.R., Section 1234,(1995).

2. The taxpayer's computer hardware or software shall accommodate the extraction and conversion of retained machine-sensible records.

F. Access to machine-sensible records.

1. The manner in which the commission is provided access to machine-sensible records as required in B. may be satisfied through a variety of means that shall take into account a taxpayer's facts and circumstances through consultation with the taxpayer.

2. Access will be provided in one or more of the following manners:

a) The taxpayer may arrange to provide the commission with the hardware, software, and personnel resources necessary to access the machine-sensible records.

b) The taxpayer may arrange for a third party to provide the hardware, software, and personnel resources necessary to access the machine-sensible records.

c) The taxpayer may convert the machine-sensible records to a standard record format specified by the commission, including copies of files, on a magnetic medium that is agreed to by the commission.

d) The taxpayer and the commission may agree on other means of providing access to the machine-sensible records.

G. Taxpayer responsibility and discretionary authority.

1. In conjunction with meeting the requirements of D., a taxpayer may create files solely for the use of the commission. For example, if a data base management system is used, it is consistent with this rule for the taxpayer to create and retain a file that contains the transaction-level detail from the data base management system and meets the requirements of D. The taxpayer should document the process that created the separate file to show the relationship between that file and the original records.

2. A taxpayer may contract with a third party to provide custodial or management services of the records. The contract shall not relieve the taxpayer of its responsibilities under this rule.

H. Alternative storage media.

1. For purposes of storage and retention, taxpayers may convert hard-copy documents received or produced in the normal course of business and required to be retained under this rule to microfilm, microfiche or other storage-only imaging systems and may discard the original hard-copy documents, provided the conditions of this section are met. Documents that may be stored on these media include general books of account, journals, voucher registers, general and subsidiary ledgers, and supporting records of details, such as sales invoices, purchase invoices, exemption certificates, and credit memoranda.

2. Microfilm, microfiche and other storage-only imaging systems shall meet the following requirements:

a) Documentation establishing the procedures for converting the hard-copy documents to microfilm, microfiche, or other storage-only imaging system must be maintained and made available on request. This documentation shall, at a

minimum, contain a sufficient description to allow an original document to be followed through the conversion system as well as internal procedures established for inspection and quality assurance.

b) Procedures must be established for the effective identification, processing, storage, and preservation of the stored documents and for making them available for the period they are required to be retained.

c) Upon request by the commission, a taxpayer must provide facilities and equipment for reading, locating, and reproducing any documents maintained on microfilm, microfiche, or other storage-only imaging system.

d) When displayed on equipment or reproduced on paper, the documents must exhibit a high degree of legibility and readability. For this purpose, legibility is defined as the quality of a letter or numeral that enables the observer to identify it positively and quickly to the exclusion of all other letters or numerals. Readability is defined as the quality of a group of letters or numerals being recognizable as words or complete numbers.

e) All data stored on microfilm, microfiche, or other storage-only imaging systems must be maintained and arranged in a manner that permits the location of any particular record.

f) There is no substantial evidence that the microfilm, microfiche or other storage-only imaging system lacks authenticity or integrity.

I. Effect on hard-copy recordkeeping requirements.

1. Except as otherwise provided in this section, the provisions of this rule do not relieve taxpayers of the responsibility to retain hard-copy records that are created or received in the ordinary course of business as required by existing law and regulations. Hard-copy records may be retained on a recordkeeping medium as provided in H.

2. Hard-copy records not produced or received in the ordinary course of transacting business, e.g., when the taxpayer uses electronic data interchange technology, need not be created.

3. Hard-copy records generated at the time of a transaction using a credit or debit card must be retained unless all the details necessary to determine correct tax liability relating to the transaction are subsequently received and retained by the taxpayer in accordance with this rule. These details include those listed in D.4.a) and D.4.b).

4. Computer printouts that are created for validation, control, or other temporary purposes need not be retained.

5. Nothing in this section shall prevent the commission from requesting hard-copy printouts in lieu of retained machine-sensible records at the time of examination.

R861-1A-36. Signatures Defined Pursuant to Utah Code Ann. Sections 41-1a-209, 59-7-505, 59-10-512, 59-12-107, 59-13-206, and 59-13-307.

(1) Individuals who submit an application to renew their vehicle registration on the Internet web site authorized by the Tax Commission shall use the Tax Commission assigned personal identification number included with their registration renewal information as their signature for the renewal application submitted over the Internet.

(2) Taxpayers who use the Tax Commission authorized Internet web site to file tax return information for tax types that may be filed on that web site shall use the personal identification number provided by the Tax Commission as their signature for the tax return information filed on that web site.

(3) Taxpayers who file a tax return under Title 59, Chapter 10, Individual Income Tax Act, electronically and who meet the signature requirement of the Internal Revenue Service shall be deemed to meet the signature requirement of Section 59-10-512.

(4) Taxpayers who file a corporate franchise and income tax return electronically and who meet the signature requirement of the Internal Revenue Service shall be deemed to meet the signature requirement of Section 59-7-505.

R861-1A-37. Provisions Relating to Disclosure of Commercial Information Pursuant to Utah Code Ann. Section 59-1-404.

(1) The provisions of this rule apply to the disclosure of commercial information under Section 59-1-404. For disclosure of information other than commercial information, see rule R861-1A-12.

(2) For purposes of Section 59-1-404, "assessed value of the property" includes any value proposed for a property.

(3) For purposes of Subsection 59-1-404(2), "disclosure" does not include the issuance by the commission of a decision, order, or private letter ruling containing commercial information to a:

(a) named party of a decision or order;

(b) party requesting a private letter ruling; or

(c) designated representative of a party described in (3)(a) or (3)(b).

(4) For purposes of Subsection 59-1-404(6), "published decision" does not include the issuance by the commission of a decision, order, or private letter ruling containing commercial information to a:

(a) named party of a decision or order;

(b) party requesting a private letter ruling; or

(c) designated representative of a party described in (4)(a) or (4)(b).

(5) Information that may be disclosed under Section 59-1-404(3) includes:

(a) the following information related to the property's tax exempt status:

(i) information provided on the application for property tax exempt status;

(ii) information used in the determination of whether a property tax exemption should be granted or revoked; and

(iii) any other information related to a property's property tax exemption;

(b) the following information related to penalty or interest relating to property taxes that the commission or county legislative body determines should be abated:

(i) the amount of penalty or interest that is abated;

(ii) information provided on an application or request for abatement of penalty or interest;

(iii) information used in the determination of the abatement of penalty or interest; and

(iv) any other information related to the amount of penalty or interest that is abated; and

(c) the following information related to the amount of property tax due on property:

(i) the amount of taxes refunded or deducted as an erroneous or illegal assessment under Section 59-2-1321;

(ii) information provided on an application or request that property has been erroneously or illegally assessed under Section 59-2-1321; and

(iii) any other information related to the amount of taxes refunded or deducted under (5)(c)(i).

(6)(a) Except as provided in (6)(b), commercial information disclosed during an action or proceeding may not be disclosed outside the action or proceeding by any person conducting or participating in the action or proceeding.

(b) Notwithstanding (6)(a), commercial information contained in a decision issued by the commission may be disclosed outside the action or proceeding if all of the parties named in the decision agree in writing to the disclosure.

(7) The commission may disclose commercial information in a published decision as follows.

(a) If the property taxpayer that provided the commercial information does not respond in writing to the commission within 30 days of the decision's issuance, requesting that the

commercial information not be published and identifying the specific commercial information the taxpayer wants protected, the commission may publish the entire decision.

(b) If the property taxpayer that provided the commercial information indicates to the commission in writing the specific commercial information that the taxpayer wants protected, the commission may publish a version of the decision that contains commercial information not identified by the taxpayer under (7)(a).

(8) The commission may share commercial information gathered from returns and other written statements with the federal government, any other state, any of the political subdivisions of another state, or any political subdivision of this state, if these political subdivisions, or the federal government grant substantially similar privileges to this state.

R861-1A-38. Class Actions Pursuant to Utah Code Ann. Section 59-1-304.

A. Unless the limitations of Section 59-1-304(2) apply, the commission may expedite the exhaustion of administrative remedies required by individuals desiring to be included as a member of the class.

B. In expediting exhaustion of administrative remedies, the commission may take any of the following actions:

1. publish sample claim forms that provide the information necessary to process a claim in a form that will reduce the burden on members of the putative class and expedite processing by the commission;

2. provide for waiver of initial hearings where requested by any party;

3. provide for expedited rulings on motions for summary judgment where the facts are not contested and the legal issues have been previously determined by the commission in ruling on the case brought by class representatives. The parties may waive oral hearing and have final orders issued based upon information submitted in the claims and division responses;

4. consolidate the cases for hearing at the commission, where a group of claims presents identical legal issues and it is agreed by the parties that the resolution of the legal issues would be dispositive of the claims;

5. designate a claim as a test or sample claim with any rulings on that test or sample claim to be applicable to all other similar claims, upon agreement of the claiming parties; or

6. any other action not listed in this rule if that action is not contrary to procedures required by statute.

R861-1A-39. Penalty for Failure to File a Return Pursuant to Utah Code Ann. Sections 10-1-405, 59-1-401, 59-12-118, and 69-2-5.

(1)(a) Subject to Subsection (1)(b), "failure to file a tax return," for purposes of the penalty for failure to file a tax return under Subsection 59-1-401(1) includes a tax return that does not contain information necessary for the commission to make a correct distribution of tax revenues to counties, cities, and towns.

(b) Subsection (1)(a) applies to a tax return filed under:

(i) Chapter 12, Sales and Use Tax Act;

(ii) Title 10, Chapter 1, Part 4, Municipal Telecommunications License Tax Act; or

(iii) Title 69, Chapter 2, Emergency Telephone Service Law.

(2)(a) "Unpaid tax," for purposes of the penalty for failure to file a tax return under Subsection 59-1-401(1) includes tax remitted to the commission under Subsection (2)(b) that is:

(i) not accompanied by a tax return; or

(ii) accompanied by a tax return that is subject to the penalty for failure to file a tax return.

(b) Subsection (2)(a) applies to a tax remitted under:

(i) Chapter 12, Sales and Use Tax Act;

(ii) Title 10, Chapter 1, Part 4, Municipal Telecommunications License Tax Act; or

(iii) Title 69, Chapter 2, Emergency Telephone Service Law.

R861-1A-40. Waiver of Requirement to Post Security Prior to Judicial Review Pursuant to Utah Code Ann. Section 59-1-611.

(1) "Post security" is as defined in Section 59-1-611.

(2)(a) A taxpayer that seeks judicial review of a final commission determination of a deficiency may apply for a waiver of the requirement to post security with the commission by:

(i) submitting a letter requesting the waiver;

(ii) providing financial information requested by the commission; and

(iii) providing a copy of the financial information to the attorney general that is representing the commission in the judicial review.

(b) The financial information described in Subsection (2)(a) shall be signed by the taxpayer under penalties of perjury.

(3) Upon review of the financial information described in Subsection (2), the commission shall:

(a) determine whether the taxpayer qualifies for a waiver of the requirement to post security with the commission; or

(b) if unable to make the determination under Subsection (3)(a) from the financial information, request additional information from the taxpayer as necessary to make that determination.

R861-1A-42. Waiver of Penalty and Interest for Reasonable Cause Pursuant to Utah Code Ann. Section 59-1-401.

(1) Procedure.

(a) A taxpayer may request a waiver of penalties or interest for reasonable cause under Section 59-1-401 if the following conditions are met:

(i) the taxpayer provides a signed statement, with appropriate supporting documentation, requesting a waiver;

(ii) the total tax owed for the period has been paid;

(iii) the tax liability is based on a return the taxpayer filed with the commission, and not on an estimate provided by the taxpayer or the commission;

(iv) the taxpayer has not previously received a waiver review for the same period; and

(v) the taxpayer demonstrates that there is reasonable cause for waiver of the penalty or interest.

(b) Upon receipt of a waiver request, the commission shall:

(i) review the request;

(ii) notify the taxpayer if additional documentation is needed to consider the waiver request; and

(iii) review the account history for prior waiver requests, taxpayer deficiencies, and historical support for the reason given.

(c) Each request for waiver is judged on its individual merits.

(d) If the request for waiver of penalty or interest is denied, the taxpayer has a right to appeal. Procedures for filing appeals are found in Title 63G, Chapter 4, Administrative Procedures Act, and commission rules.

(2) Reasonable Cause for Waiver of Interest. Grounds for waiving interest are more stringent than for penalty. To be granted a waiver of interest, the taxpayer must prove that the commission gave the taxpayer erroneous information or took inappropriate action that contributed to the error.

(3) Reasonable Cause for Waiver of Penalty. The following clearly documented circumstances may constitute reasonable cause for a waiver of penalty:

(a) Timely Mailing:

(i) The taxpayer mailed the return with payment to the commission by the due date and it was not timely delivered by the post office through no fault of the taxpayer.

(ii) In cases where the taxpayer cannot document a post office error, the penalties may be waived if the taxpayer:

(A) has an excellent history of compliance;

(B) proves that sufficient funds were in the bank as of the date of payment, and the check was written in numerical order; and

(C) presents documentation showing that the return or payment was mailed timely.

(b) Wrong Filing Place: The return or payment was filed on time, but was delivered to the wrong office or agency.

(c) Death or Serious Illness:

(i) The death or serious illness of a taxpayer or a member of the taxpayer's immediate family caused the delay.

(ii) With respect to a business, trust or estate, the death or illness must have been of the individual, or the immediate family of the individual, who had sole authority to file the return.

(iii) The death or illness must have occurred on or immediately prior to the due date of the return.

(d) Unavoidable Absence: The person having sole responsibility to file the return was absent from the state due to circumstances beyond his or her control.

(e) Disaster Relief:

(i) A delay in reporting, filing, or paying was due either to a federal or state declared disaster or to a natural disaster, such as fire or accident, that results in the destruction of records or disruption of business.

(ii) If delinquency or delay is due to a federally declared disaster, federal relief guidelines shall be followed.

(iii) In the absence of federal guidelines, and for other listed disasters, the taxpayer must demonstrate the matter was corrected within a reasonable time, given the circumstances.

(f) Reliance on Erroneous Tax Commission Information:

(i) Underpayments and late filings or payments were attributable to incorrect advice obtained from the commission, unless the taxpayer gave the commission inaccurate or insufficient information.

(ii) Proof of erroneous information may be based on written communication provided by the commission or, if the taxpayer clearly documents, verbal communication. Clear documentation of verbal communication should include the dates, times, and names of commission employees who provided the erroneous information.

(iii) A failure to comply will also be excused if it is demonstrated that the taxpayer requested the necessary tax forms and instructions timely, and the commission failed to timely provide the forms and instructions requested.

(g) Tax Commission Office Visit: The taxpayer proves that before expiration of the time for filing the return or making the payment, the taxpayer visited a commission office for information or help in preparing the return and a commission employee was not available for consultation.

(h) Unobtainable Records: For reasons beyond the taxpayer's control, the taxpayer was unable to obtain records to determine the amount of tax due.

(i) Reliance on Competent Tax Advisor:

(i) The taxpayer fails to file a return after furnishing all necessary and relevant information to a competent tax advisor, who incorrectly advised the taxpayer that a return was not required.

(ii) The taxpayer is required, and has an obligation, to file the return. Reliance on a tax advisor to prepare a return does not automatically constitute reasonable cause for failure to file or pay. The taxpayer must demonstrate that ordinary business care, prudence, and diligence were exercised in determining whether to seek further advice.

(j) First Time Filer:

(i) It is the first return required to be filed and the taxes were filed and paid within a reasonable time after the due date.

(ii) The commission may also consider waiving penalties on the first return after a filing period change if the return is filed and tax is paid within a reasonable time after the due date.

(k) Bank Error:

(i) The taxpayer's bank has made an error in returning a check, making a deposit or transferring money.

(ii) A letter from the bank verifying its error is required.

(l) Compliance History:

(i) The commission will consider the taxpayer's recent history for payment, filing, and delinquencies in determining whether a penalty may be waived.

(ii) The commission will also consider whether other tax returns or reports are overdue at the time the waiver is requested.

(m) Employee Embezzlement: The taxpayer shows that failure to pay was due to employee embezzlement of the tax funds and the taxpayer was unable to obtain replacement funds from any other source.

(n) Recent Tax Law Change: The taxpayer's failure to file and pay was due to a recent change in tax law that the taxpayer could not reasonably be expected to be aware of.

(4) Other Considerations for Determining Reasonable Cause.

(a) The commission allows for equitable considerations in determining whether reasonable cause exists to waive a penalty. Equitable considerations include:

(i) whether the commission had to take legal means to collect the taxes;

(ii) if the error is caught and corrected by the taxpayer;

(iii) the length of time between the event cited and the filing date;

(iv) typographical or other written errors; and

(v) other factors the commission deems appropriate.

(b) Other clearly supported extraordinary and unanticipated reasons for late filing or payment, which demonstrate reasonable cause and the inability to comply, may justify a waiver of the penalty.

(c) In most cases, ignorance of the law, carelessness, or forgetfulness does not constitute reasonable cause for waiver. Nonetheless, other supporting circumstances may indicate that reasonable cause for waiver exists.

(d) Intentional disregard, evasion, or fraud does not constitute reasonable cause for waiver under any circumstance.

R861-1A-43. Electronic Meetings Pursuant to Utah Code Ann. Section 52-4-207.

(1) A commissioner may participate electronically in a meeting open to the public under Section 52-4-207 if:

(a) two commissioners are present at a single anchor location; or

(b) one commissioner is present at the anchor location.

(2) If Subsection (1)(b) applies, the commissioner at the anchor location shall conduct the meeting.

(3)(a) The commission shall indicate in a public notice if the public may participate electronically in a meeting open to the public under Section 52-4-207.

(b) A notice provided under Subsection (3)(a) shall direct the public on how to participate electronically in the meeting.

R861-1A-44. Definition of Delivery Service Pursuant to Utah Code Ann. Section 59-1-1404.

For purposes of determining the date on which a document has been mailed under Section 59-1-1404, "delivery service" means the following delivery services the Internal Revenue Service has determined to be a designated delivery service under Section 7502, Internal Revenue Code:

(1) DHL Express (DHL):

(a) DHL Same Day Service;
(b) DHL Next Day 10:30 a.m.;
(c) DHL Next Day 12:00 p.m.;
(d) DHL DHL Next Day 3:00 p.m.; and
(e) DHL 2nd Day Service;
(2) Federal Express (FedEx):
(a) FedEx Priority Overnight;
(b) FedEx Standard Overnight;
(c) FedEx 2 Day;
(d) FedEx International Priority; and
(e) FedEx International First; and
(3) United Parcel Service (UPS):
(a) UPS Next Day Air;
(b) UPS Next Day Air Saver;
(c) UPS 2nd Day Air;
(c) UPS 2nd Day Air A.M.;
(d) UPS Worldwide Express Plus; and
(e) UPS Worldwide Express.

R861-1A-45. Procedures for Commission Meetings Not Open to the Public Pursuant to Utah Code Ann. Section 59-1-405.

(1) When the commission holds a meeting that is not open to the public pursuant to Section 59-1-405, the commission shall:
(a) follow the procedures set forth in commission rules:
(i) R861-1A-9, Tax Commission as Board of Equalization;
(ii) R861-1A-11, Appeal of Corrective Action;
(iii) R861-1A-20, Time of Appeal;
(iv) R861-1A-22, Petitions for Commencement of Adjudicative Proceedings;
(v) R861-1A-23, Designation of Adjudicative Proceedings;
(vi) R861-1A-24, Formal Adjudicative Proceedings;
(vii) R861-1A-26, Procedures for Formal Adjudicative Proceedings;
(viii) R861-1A-27, Discovery;
(ix) R861-1A-28, Evidence in Adjudicative Proceedings;
(x) R861-1A-29, Decision, Orders, and Reconsideration;
(xi) R861-1A-30, Ex Parte Communications;
(xii) R861-1A-31, Declaratory Orders;
(xiii) R861-1A-32, Mediation Process;
(xiv) R861-1A-33, Settlement Agreements;
(xv) R861-1A-34, Private Letter Rulings;
(xvi) R861-1A-38, Class Actions;
(xvii) R861-1A-40, Waiver of Requirement to Post Security Prior to Judicial Review; and
(xviii) R861-1A-42, Waiver of Penalty and Interest for Reasonable Cause; and
(b) for all meetings other than initial hearings, or the deliberating and issuing of an order relating to adjudicative proceedings, keep confidential written minutes and a confidential recording of the meeting.
(2) Written minutes of a meeting under Subsection (1)(b) shall include:
(a) the date, time, and place of the meeting;
(b) the names of each person present at the meeting;
(c) the substance of all matters proposed, discussed, or decided by the commission, which may include a summary of comments made by the commissioners;
(d) a record, by commissioner, of each vote taken by the commission;
(e) a summary of comments made by a person, other than a commissioner, present at the meeting; and
(f) any other information that is a record of the proceedings of the meeting that any commissioner requests be entered in the minutes or recording.
(3) Recorded minutes of a meeting under Subsection (1)(b) shall be:
(a) properly labeled or identified with the date, time, and place of the meeting; and
(b) a complete and unedited record of the meeting.

R865. Tax Commission, Auditing.
R865-3C. Corporation Income Tax.
R865-3C-1. Allocation of Net Income Pursuant to Utah Code Ann. Section 59-7-204.

(1) In general, the provisions of Section R865-6F-8 shall be applied to determine net income attributable to Utah for corporation income tax purposes.

(2) If a corporation derives income from sources within this state, but does not maintain an office within this state from which sales are negotiated or effected, the gross receipts attributable to Utah shall include all receipts of the corporation for the:

(a) performance of a service if the purchaser of the service receives a greater benefit of the service in this state than in any other state; and

(b) sale of goods delivered to this state or shipped to a purchaser within this state, regardless of the F.O.B. point or other conditions of the sale.

October 13, 2011 59-7-204
Notice of Continuation January 3, 2012

R865. Tax Commission, Auditing.
R865-4D. Special Fuel Tax.
R865-4D-1. Utah Special Fuel Tax Regulation Pursuant to Utah Code Ann. Section 59-13-102.

A. Motor vehicle means and includes every self-propelled vehicle operated or suitable for operation on the highways of the state which is designed for carrying passengers or cargo; but does not include vehicles operating on stationary rails or tracks, or implements of husbandry not operating on the highways.

B. User means any person using special fuel for the propulsion of a motor vehicle on the highways of the state, including:

1. interstate operators of trucks and buses,
2. intrastate operators of trucks and buses, and
3. contractors using special fuel in self-propelled vehicles for carrying of passengers or cargo.

R865-4D-2. Refund Procedures for Special Fuel Used Off-Highway or to Operate a Power Take-Off Unit, and Sales Tax Liability Pursuant to Utah Code Ann. Section 59-13-301.

(1)(a) "Off-highway," for purposes of determining whether special fuel is used in a vehicle off-highway, means every way or place, of whatever nature, that is not generally open to the use of the public for the purpose of vehicular travel.

(b) "Off-highway" does not include:

(i) a parking lot that the public may use; or

(ii) the curbside of a highway.

(2) Fuel used in a vehicle off-highway is calculated by taking off-highway miles divided by the average number of miles per gallon. Any other method of calculating special fuel used off-highway must be supported by on-board computer information or other information that shows the number of gallons used off-highway with accuracy equal or comparable to on-board computers.

(3) Where a power take-off unit is driven by the main engine of the vehicle and used to operate auxiliary equipment, a quantity, as enumerated below, of the total special fuel delivered into the service tank of the vehicle shall be deemed to be used to operate the power take-off unit. The allowances for power take-off units are as follows:

(a) concrete mixer trucks - 20 percent;

(b) garbage trucks with trash compactor - 20 percent;

(c) vehicles with powered pumps, conveyors or other loading or unloading devices may be individually negotiated but shall not exceed:

(i) 3/4 gallon per 1000 gallons pumped; or

(ii) 3/4 gallon per 6000 pounds of commodities, such as coal, grain, and potatoes, loaded or unloaded.

(d) Any other method of calculating the amount of special fuel used to operate a power take-off unit must be supported by documentation and records, including on-board computer printouts or other logs showing daily power take-off activity, that establish the actual amount of power take-off activity and fuel consumption.

(4) Allowances provided for in Subsections (2) and (3) will be recognized only if adequate records are maintained to support the amount claimed.

(5) In the case of users filing form TC-922, Fuel Tax Return For International Fuel Tax Agreement (IFTA) And Special Fuel User Tax, or form TC-922C, Refund of Tax Paid on Exempt Fuel for Non-Utah Based Carriers, the allowance provided for in Subsection will be refunded to the extent total gallons allocated to Utah through IFTA exceed the actual taxable gallons used in Utah, except that in no case will refunds be allowed for power take-off use that does not occur in Utah.

(6) Special fuel used on-highway for the purpose of idling a vehicle does not qualify for a refund on special fuel tax paid since the fuel is used in the operation of a motor vehicle.

(7) The following documentation must accompany a refund request for special fuel tax paid on special fuel used in a vehicle off-highway:

(a) evidence that clearly indicates that the special fuel was used in a vehicle off-highway;

(b)(i) the specific address of the off-highway use with a description that is adequate to verify that the location is off-highway; or

(ii) if a specific address is not available, a description of the off-highway location that is adequate to verify that the location is off-highway;

(c) a description of how the vehicle was used off-highway;

(d)(i) the date of the off-highway use; and

(ii) if the claimed use is idling while off-highway, the amount of time the vehicle was idling at that location;

(e) the amount of fuel the vehicle used off-highway; and

(f) the make and model, weight, and miles per gallon of the vehicle used off-highway.

(8) Special fuel that is purchased exempt from the special fuel tax or for which the special fuel tax has been refunded is subject to sales and use tax, unless specifically exempted under the sales and use tax statutes.

R865-4D-6. Invoices Pursuant to Utah Code Ann. Sections 59-13-301 and 59-13-313.

A. If requested, a retail dealer must issue to a purchaser of special fuel an invoice that indicates the fuel taxes that have been included in the price of purchased fuel. This invoice shall serve as evidence that the special fuel tax has been paid.

B. Invoices must be numbered consecutively, made in duplicate, and contain the following information:

1. name and address of seller;
2. place of sale;
3. date of sale;
4. name and address of purchaser;
5. fuel type;
6. number of gallons sold;
7. unit number or other vehicle identification if delivered into a motor vehicle;
8. type of container delivered into if not a motor vehicle;
9. invoice number; and
10. amount and type of state tax paid on the special fuel, if any.

C. A retail dealer must charge sales tax on diesel fuel that is exempt from special fuel tax unless the retail dealer has received and retains on file a properly completed sales and use tax exemption certificate indicating that the transaction is exempt from sales tax.

D. A retail dealer that sells propane exempt from special fuel tax, but subject to sales tax, must at the time of each sale and delivery keep a record of the exempt sale. This record shall be in the form of an invoice or a log, and shall serve as evidence that the sale is exempt from special fuel tax.

1. If the record is in the form of an invoice, it shall contain the information required under B.
2. If the record is in the form of a log, it shall contain the following information:

a) name and address of the retail dealer;
b) date of sale;
c) amount of propane sold; and
d) purchaser's name.

E. A retail dealer that sells propane or electricity exempt from sales tax shall retain the following information for each exempt sale:

1. the make, year, and license number of the vehicle;
2. the name and address of the purchaser; and
3. the quantity (e.g., number of gallons) sold.

F. A retail dealer is not required to obtain an exemption certificate from a purchaser of dyed diesel fuel indicating that

the dyed diesel fuel will be used for purposes other than to operate a motor vehicle upon the highways of the state if the retail dealer complies with the notice requirement under 26 C.F.R. Section 48.4082-2.

G. A retail dealer may not sell dyed diesel fuel exempt from special fuel tax if the retail dealer knows that the fuel will be used to operate a motor vehicle upon the highways of the state.

R865-4D-18. Maintenance of Records Pursuant to Utah Code Ann. Sections 59-13-305(1) and 59-13-312.

A. The records and documents maintained pursuant to Section 59-13-312 must substantiate the amount of fuel purchased and the amount of fuel used in the state and claimed on the special fuel report required by Section 59-13-305(1).

B. Every user must maintain detailed mileage records and summaries for fleets traveling in Utah, detailed fuel purchase records, and bulk disbursement records. From this information, an accurate average miles per gallon (mpg) figure can be determined for use in computing fuel tax due. No fuel entering the fuel supply tank of a motor vehicle may be excluded from the mpg computation. Refer to Tax Commission rule R865-4D-2.

C. Individual vehicle mileage records (IVMRs) separating Utah miles from non-Utah miles must be maintained. Utah miles must be separated further into taxable Utah miles and nontaxable Utah miles. An adequate IVMR will contain the following information:

1. starting and ending dates of trip;
2. trip origin and destination;
3. route of travel, beginning and ending odometer or hubometer reading, or both;
4. total trip miles;
5. Utah miles;
6. fuel purchased or drawn from bulk storage for the vehicle; and
7. other appropriate information that identifies the record, such as unit number, fleet number, record number, driver's name, and name of the user or operator of the vehicle.

D. If the user fails to maintain or provide adequate records from which the user's true liability can be determined, the Tax Commission shall, upon giving written notice, estimate the amount of liability due. Such estimate shall take into consideration any or all of the following:

1. any available records maintained and provided by the user;
2. historical filing information;
3. industry data;
4. a flat or standard average mpg figure.

a) The standard average mpg normally applied is four mpg for qualified motor vehicles and six miles per gallon for nonqualified motor vehicles.

E. Section 59-13-312(2) requires that the user be able to support credits claimed for tax-paid fuel with documents showing payment of the Utah special fuel tax. If documents and records showing payment of the Utah special fuel tax are not maintained or are not provided upon request, the credits will be disallowed.

R865-4D-19. Refund of Special Fuel Taxes Paid by Government Entities Pursuant to Utah Code Ann. Section 59-13-301.

(1) Governmental entities entitled to a refund for special fuel taxes paid shall submit a completed Utah Application for Fuel Tax Refund, form TC-116, to the commission.

(2) A governmental entity shall retain the following records for each purchase of special fuel for which a refund of taxes paid is claimed:

(a) name of the government entity making the purchase;
(b) license plate number of the government vehicle for which the special fuel is purchased;
(c) invoice date;
(d) invoice number;
(e) vendor;
(f) vendor location;
(g) product description;
(h) number of gallons purchased; and
(i) amount of state special fuel tax paid.

(3) Original records supporting the refund claim must be maintained by the government entity for three years following the year of refund.

R865-4D-20. Exemption or Refund for Exported Undyed Diesel Fuel Pursuant to Utah Code Ann. Section 59-13-301.

A. If untaxed undyed diesel fuel is sold by a supplier directly out-of-state or is sold by a supplier to a purchaser that will deliver the fuel directly out-of-state, the fuel may be sold by the supplier exempt from the special fuel tax.

B. If untaxed undyed diesel fuel is sold tax exempt under A., the supplier shall report the fuel sold tax exempt on the export schedule of its special fuel supplier return.

C. If special fuel tax has been paid on undyed diesel fuel that is exported, the exporter may apply to the Tax Commission, on a monthly basis and on the export refund request form provided by the Tax Commission, for a refund of special fuel taxes paid.

D. Original records supporting the exemption or refund claim must be maintained by the entity claiming the exemption or refund for three years following the year of exemption or refund.

R865-4D-21. Consistent Basis for Diesel Fuel Reporting Pursuant to Utah Code Ann. Sections 59-13-301 and 59-13-307.

A. Definitions.

1. "Gross gallon" means the United States volumetric gallon with a liquid capacity of 231 cubic inches.
2. "Net gallon" means the gross metered gallon with temperature correction in volume to 60 degrees Fahrenheit.

B. All Utah licensed special fuel suppliers shall elect to calculate the tax liability on the Utah Special Fuel Supplier Tax Return on a consistent and strict gross gallon or net gallon basis. The election must be declared in writing and must be sent to the Tax Commission. The declared basis must be the exclusive basis used for 12 consecutive months. Any supplier failing to make an election will default to the gross gallon basis and must then report and pay the excise tax on that basis. Request for changes in the reporting basis must be submitted in writing and approved by the Tax Commission prior to any change in the reporting basis. Changes in basis may occur only on January 1 and must remain in effect 12 consecutive months.

C. All invoices, bills of lading, and special fuel tax returns must include both the gross and net gallon amounts. Conversion from gross to net must conform to the ASTM-API-IP Petroleum Measurement Tables.

D. All transactions, such as purchases, sales, or deductions, reported on the Special Fuel Supplier Tax Return must be reported on a consistent and exclusive basis. The taxpayer shall not alternate the two methods on any return or during any 12-month period.

E. This rule shall take effect July 1, 1997.

R865-4D-22. Reduction in Special Fuel Tax for Suppliers Subject to Navajo Nation Fuel Tax Pursuant to Utah Code Ann. Section 59-13-301.

A. The purpose of this rule is to provide procedures for administering the reduction of special fuel tax authorized under Section 59-13-301.

B. The reduction shall be in the form of a refund.

C. The refund shall be available only for special fuel:

1. delivered to a retailer or consumer on the Utah portion of the Navajo Nation; and

2. for which Utah special fuel tax has been paid.

D. The refund shall be available to a special fuel supplier that is licensed as a distributor with the Office of the Navajo Tax Commission.

E. The refund application may be filed on a monthly basis.

F. A completed copy of the Navajo Tax Commission Monthly Fuel Distributor Tax Return, form 900, along with schedules and manifests, must be included with the Utah State Tax Commission Application for Navajo Nation Fuel Tax Refund, form TC-126.

G. Original records supporting the refund claim must be maintained by the supplier for three years following the year of refund. These records include:

1. proof of payment of Utah special fuel tax;

2. proof of payment of Navajo Nation fuel tax; and

3. documentation that the special fuel was delivered to a retailer or consumer on the Utah portion of the Navajo Nation.

R865-4D-23. State Participation in the International Fuel Tax Agreement Pursuant to Utah Code Ann. Section 59-13-501.

A. Pursuant to Section 59-13-501, the commission entered into the International Fuel Tax Agreement ("IFTA") effective January 1, 1990.

B. Participation in IFTA is intended to comply with 49 U.S.C. 31705.

C. This rule incorporates by reference the 2003 edition of the IFTA:

1. Articles of Agreement;

2. Procedures Manual; and

3. Audit Manual.

R865-4D-24. Special Fuel Tax License Pursuant to Utah Code Ann. Section 59-13-302.

(1) The holder of a license issued under Section 59-13-302 shall notify the commission:

(a) of any change of address of the business;

(b) of a change of character of the business; or

(c) if the license holder ceases to do business.

(2) The commission may determine that a person has ceased to do business or has changed that person's business address if:

(a) mail is returned as undeliverable as addressed and unable to forward;

(b) the person fails to file four consecutive special fuel tax returns;

(c) the person fails to renew its annual business license with the Department of Commerce; or

(d) the person fails to renew its local business license.

(3) If the requirements of Subsection (2) are met, the commission shall notify the license holder that the license will be considered invalid unless the license holder provides evidence within 15 days that the license should remain valid.

(4) A person may request the commission to reopen a special fuel tax license that has been determined invalid under Subsection (3).

(5) The holder of a license issued under Section 59-13-302 shall be responsible for any special fuel tax, interest, and penalties incurred under that license whether those taxes and fees are incurred during the time the license is valid or invalid.

R865. Tax Commission, Auditing.
R865-6F. Franchise Tax.
R865-6F-1. Corporation Franchise Privilege - Right to Do Business - Nature of Liability and How Terminated Pursuant to Utah Code Ann. Sections 16-10a-1501 through 16-10a-1533.

A. The Utah franchise tax is imposed upon corporations qualified or incorporated under the laws of Utah, whether or not they do business therein, and also upon corporations doing business in Utah, whether or not they are qualified or incorporated under the laws of Utah.

1. An unqualified foreign corporation doing business in this state is liable for Utah corporation franchise tax in the same amount as if it had duly applied for and received a certificate of authority to transact business in this state pursuant to Section 16-10a-1501.

2. An unqualified foreign corporation deriving income from this state, but not doing business in this state within the contemplation of the Utah corporation franchise tax law is subject to the Utah corporation income tax on income derived from this state under the provisions of Sections 59-7-201 to 59-7-207.

B. If a corporation received its corporate authority to do business in Utah prior to January 1, 1973, and is a member of an affiliated group filing a combined report under Section 59-7-402 or 59-7-403, and legally terminates its corporate authority, it must include its activity during the final year in the combined report of the group. The tax is imposed upon the income of the group rather than the income of the individual corporations.

C. A corporation that was incorporated, qualified, or that reinstated its corporate authority to do business in Utah after January 1, 1973 must file a corporation franchise tax return and pay the tax due with the return for the year in which it legally terminates its right to do business in this state. The Tax Commission shall not issue a tax clearance certificate until the final return has been filed and the amounts due for the final year are paid.

D. For Utah corporation franchise tax purposes, a foreign corporation terminates its corporate existence or the privileges for which the franchise tax is levied (unless it continues to do business) on the date on which:

1. a certificate of withdrawal is issued under the provisions of Section 16-10a-1520;

2. its corporate existence is legally terminated in its home state, provided authoritative evidence of that termination is filed;

3. a certificate of revocation of its authority to transact business in this state is issued under the provisions of Sections 16-10a-1530 and 16-10a-1531; or

4. the corporate powers, rights, and privileges are forfeited under the provisions of Section 59-7-534.

E. For Utah corporation franchise tax purposes, a corporation that is incorporated under the laws of this state terminates its corporate existence or the privilege of exercising its corporate franchise for which the franchise tax is levied on the date on which:

1. a certificate of dissolution is issued pursuant to a voluntary dissolution under the provisions of Section 16-10a-1401 or Sections 16-10a-1402 through 16-10a-1403;

2. a decree of dissolution is entered by the court pursuant to the provisions of Sections 16-10a-1430 through 16-10a-1433;

3. a certificate of merger or of consolidation (which effects the termination of the separate corporate existence of the Utah corporation) is issued pursuant to the provisions of Sections 16-10a-1101 through 16-10a-1107; or

4. the corporate rights and privileges are suspended under the provisions of Section 59-7-534.

F. If the corporation continues to do business in this state subsequent to any of the above dates, it is liable for franchise tax, even though doing business is not authorized, or may even be prohibited, by law. A corporation cannot avoid the franchise tax by doing business without authority which, if legally done, would subject the corporation to the tax.

R865-6F-2. Establishment of Taxable Year and Filing the First Return Pursuant to Utah Code Ann. Sections 59-7-501 and 59-7-505.

A. The period for which a corporation must file its returns for corporation franchise tax purposes is the same period under which its income is computed pursuant to Section 59-7-501.

B. The first return may cover a period of less than 12-calendar months, but may not exceed 12-calendar months. The period must end on the last day of a calendar month, except that the Tax Commission will accept returns being made using the 52-53 week method of reporting under Section 441(f), Internal Revenue Code.

C. If a corporation elects for federal purposes to end its filing period on a date that does not fall on the last day of a calendar month, the filing period for the purposes of effective dates of Utah laws ends on the last day of the month nearest to the federal year end. The Utah net income is computed based on the filing period for federal purposes, notwithstanding the Utah filing period ends on the last day of the month.

D. Except as provided in Section 59-7-505(8)(a), in the case of a domestic corporation, the first return period begins with the date of incorporation. Activity prior to date of incorporation must be reported on individual income or partnership returns or of such other entity as may be appropriate.

E. Except as provided in Section 59-7-505(8)(a), in the case of a foreign corporation, the first return period begins with the date the corporation is qualified to do business in Utah under Title 16, Chapter 10a, Part 15, or the date business within the state is commenced, whichever is the earlier.

R865-6F-6. Application of Corporation Franchise or Income Tax Acts to Qualified Corporations and to Nonqualified Foreign Corporations Pursuant to Utah Code Ann. Section 59-7-104.

A. Definitions.

1. "Ancillary activities" means those activities that serve no independent business function for the seller apart from their connection to the solicitation of orders.

2. "De minimis activities" means those activities that, when taken together, establish only a trivial connection with the taxing state. An activity conducted within Utah on a regular or systematic basis or pursuant to a company policy, whether or not in writing, shall not normally be considered trivial.

3. "In-home office" means an office or place of business located within the residence of the employee or representative of a company that satisfies the following conditions:

a) The office may not be publicly attributed to the company, or to the employee or representative of the company in an employee or representative capacity.

b) The use of the office shall be limited to soliciting and receiving orders from customers; transmitting orders outside the state for acceptance or rejection by the company; or for other activities that are protected under Public Law 86-272, 15 U.S.C. 381-384 (hereafter P.L. 86-272) and this rule.

c) Neither the company nor the employee or representative shall maintain a telephone listing or other public listing for the company within the state, nor use advertising or business literature indicating that the company or its employee or representative can be contacted at a specific address within the state. However, the normal distribution and use of business cards and stationery identifying the employee's or representative's name, address, telephone, and fax numbers and affiliation with the company shall not, by itself, be considered

as advertising or otherwise publicly attributing an office to the company or its employee or representative.

4. "Solicitation" means:

a) speech or conduct that explicitly or implicitly invites an order; and

b) activities that neither explicitly nor implicitly invite an order, but are entirely ancillary to requests for an order.

B. Every corporation doing business in Utah whether qualified or not, and every corporation incorporated or qualified in Utah whether or not doing business therein is subject to the Utah corporation franchise tax, unless exempted under the provisions of Section 59-7-102. If liability for the tax exists, the tax must be computed under the provisions of Section 59-7-104, at the rate provided by statute, but in no case shall the tax be less than the minimum tax prescribed.

C. Foreign corporations not qualified in Utah which ship goods to customers in this state from points outside this state, pursuant to orders solicited but not accepted by agents or employees in this state, and which are not doing business in Utah are not taxable under the Utah Corporation Franchise Tax Act if:

1. they maintain no office nor stocks of goods in Utah, and

2. they engage in no other activities in Utah.

D. Foreign corporations not qualified in Utah that make deliveries from stocks of goods located in this state are doing business in this state and are taxable under the Corporation Franchise Tax Act, even though they have no office or regular place of business in this state.

E. Foreign corporations not qualified in Utah are subject to the franchise tax if performing the necessary duties to fulfill contracts or subcontracts in Utah, whether through their own employees or by furnishing of supervisory personnel.

F. Corporations that own real property within this state and rent or lease such properties to others are subject to the franchise tax whether or not qualified under the laws of this state. This also applies to corporations deriving royalty, lease, or rental income from properties located within this state, whether or not such properties are owned by the corporation.

G. Foreign corporations not qualified in Utah are subject to the franchise or income tax if they derive income from revenue-producing properties located in Utah or moving through Utah or from services performed by personnel in this state. This includes, but is not limited to, freight and transportation operations, sales of real property having a Utah situs, leasing or sales of franchises, sporting or entertaining events, etc.

H. Corporations that participate in joint ventures or working and operating agreements which are performed in this state are subject to the franchise tax whether qualified or not.

I. Foreign corporations qualified in Utah are subject to the franchise tax even though engaged solely in interstate commerce.

J. P.L. 86-272 restricts a state from imposing a net income tax on income derived within its borders from interstate commerce if the only business activity of the company within the state consists of the solicitation of orders for sales of tangible personal property, which orders are sent outside the state for acceptance or rejection, and, if accepted, are filled by shipment or delivery from a point outside the state. The term "net income tax" includes a franchise tax measured by net income. If any sales of tangible personal property are made from Utah into a state which is precluded by P.L. 86-272 from taxing the income of the seller, such sales remain subject to throwback to Utah pursuant to Section 59-7-318(2). Similarly, a sale into Utah from another state would not subject a corporation to the Utah tax if the corporation's activities do not exceed those allowed under P.L. 86-272.

1. Only the solicitation to sell personal property is afforded immunity under P.L. 86-272; therefore, the leasing, renting licensing or other disposition of tangible personal property, or transactions involving intangibles such as franchises, patents, copyrights, trade marks, service marks and the like, or any other type of property are not protected activities under P. L. 86-272. The sale or delivery and the solicitation for the sale or delivery of any type of service that is not either (1) ancillary to solicitation, or (2) otherwise set forth as a protected activity below is also not protected under P.L. 86-272 or this rule.

2. For the in-state activity to be a protected activity under P.L. 86-272, it must be limited solely to solicitation, except for de minimis activities and activities conducted by independent contractors as described below.

K. The following in-state activities, assuming they are not of a de minimis level, will constitute doing business in Utah under P.L. 86-272 and will subject the corporation to the Utah corporation franchise tax:

1. making repairs or providing maintenance or service to the property sold or to be sold;

2. collecting current or delinquent accounts, whether directly or by third parties, through assignment or otherwise;

3. investigating credit worthiness;

4. installation or supervision of installation at or after shipment or delivery;

5. conducting training courses, seminars, or lectures for personnel other than personnel involved only in solicitation;

6. providing any kind of technical assistance or service including engineering assistance or design service, when one of the purposes thereof is other than the facilitation of the solicitation of orders;

7. investigating, handling, or otherwise assisting in resolving customer complaints, other than mediating direct customer complaints when the sole purpose of such mediation is to ingratiate the sales personnel with the customer;

8. approving or accepting orders;

9. repossessing property;

10. securing deposits on sales;

11. picking up or replacing damaged or returned property;

12. hiring, training, or supervising personnel, other than personnel involved only in solicitation;

13. using agency stock checks or any other instrument or process by which sales are made within this state by sales personnel;

14. maintaining a sample or display room in excess of two weeks (14 days) at any one location within the state during the tax year;

15. carrying samples for sale, exchange or distribution in any manner for consideration or other value;

16. owning, leasing, using, or maintaining any of the following facilities or property in-state:

(a) repair shop;

(b) parts department;

(c) any kind of office other than an in-home office;

(d) warehouse;

(e) meeting place for directors, officers, or employees;

(f) stock of goods other than samples for sales personnel or that are used entirely ancillary to solicitation;

(g) telephone answering service that is publicly attributed to the company or to employees or agents of the company in their representative status;

(h) mobile stores, i.e., vehicles with drivers who are sales personnel making sales from the vehicles;

(i) real property or fixtures to real property of any kind.

17. consigning stocks of goods or other tangible personal property to any person, including an independent contractor, for sale;

18. maintaining, by either an in-state or an out-of-state resident employee, an office or place of business (in-home or otherwise) of any kind other than an in-home office;

(b) The maintenance of any office or other place of business in this state that does not strictly qualify as an in-home

office under this subsection shall, by itself cause the loss of protection under this rule.

(c) For purposes of this subsection it is not relevant whether the company pays directly, indirectly, or not at all for the cost of maintaining the in-home office.

19. entering into franchising of licensing agreements; selling or otherwise disposing of franchises and licenses; or selling or otherwise transferring tangible personal property pursuant to such franchise or license by the franchisor or licensor to its franchisee or licensee within the state;

20. shipping or delivering of goods into this state by means of private vehicle, rail, water, air or other carrier, irrespective of whether a shipment of delivery fee or other charge is imposed, directly or indirectly, upon the purchaser;

21. conducting any activity not listed as a protected activity below which is not entirely ancillary to requests for orders, even if such activity helps to increase purchases.

L. The following in-state activities will not cause the loss of protection for otherwise protected sales;

1. soliciting orders for sales by any type of advertising;

2. soliciting of orders by an in-state resident employee or representative of the company, so long as such person does not maintain or use any office or other place of business in the state other than an in-home office;

3. carrying samples and promotional materials only for display or distribution without charge or other consideration;

4. furnishing and setting up display racks and advising customers on the display of the company's products without charge or other consideration;

5. providing automobiles to sales personnel for their use in conducting protected activities;

6. passing orders, inquiries and complaints on to the home office;

7. missionary sales activities, i.e. the solicitation of indirect customers for the company's goods. For example, a manufacturer's solicitation of retailers to buy the manufacturer's goods from the manufacturer's wholesale customers would be protected if such solicitation activities are otherwise immune;

8. coordinating shipment or delivery without payment or other consideration and providing information relating thereto either prior or subsequent to the placement of an order;

9. checking of customer's inventories without a charge therefore if performed for reorder, but not for other purposes such as a quality control;

10. maintaining a sample or display room for two weeks (14 days) or less at any one location within the state during the tax year;

11. recruiting, training or evaluating sales personnel, including occasionally using homes, hotels or similar places for meetings with sales personnel;

12. mediating direct customer complaints when the purpose thereof is solely for ingratiating the sales personnel with the customer and facilitating requests for orders;

13. owning, leasing, using or maintaining personal property for use in the employee or representative's in-home office or automobile that is solely limited to the conducting of protected activities. Therefore, the use of personal property such as a cellular telephone, facsimile machine, duplicating equipment, personal computer and computer software that is limited to the carrying on of protected solicitation and activity entirely ancillary to such solicitation or permitted by the provisions of this rule shall not, by itself, remove the protection of P.L. 86-272.

M. P.L. 86-272 provides protection to certain in-state activities if conducted by an independent contractor that would not be afforded if performed by the company or its employees or other representatives.

1. Independent contractors may engage in the following limited activities in the state without the company's loss of immunity;

a) soliciting sales;

b) making sales;

c) maintaining an office.

2. Sales representatives who represent a single principal are not considered to be independent contractors and are subject to the same limitations as those provided under P.L. 86-272 and this rule.

3. Maintenance of stock of goods in the state by the independent contractor under consignment or any other type of arrangement with the company, except for purposes of display and solicitation, shall remove the protection.

N. The Tax Commission will apply the provisions of P.L. 86-272 and of this rule to business activities conducted in foreign commerce. Therefore, whether business activities are conducted by (i) a foreign or domestic company selling tangible personal property into a county outside of the United States from a point within this state or by (ii) either company selling such property into this state from a point outside of the United States, the principles under this rule apply equally to determine whether the sales transactions are protected and the company immune from taxation in either this state or in the foreign county, as the case might be, and whether, if applicable, the throwback provisions of Section 59-7-318(2) will apply.

O. The protection afforded by P.L. 86-272 and the provisions of this rule do not apply to any corporation that is incorporated or domiciled in this state.

P. A company that registers or otherwise formally qualifies to do business within this state does not, by that fact alone, lose its protection under P.L. 86-272. Where, separate from or ancillary to such registration or qualification, the company receives and seeks to use or protect any additional benefit or protection from this state through activity not otherwise protected under P.L. 86-272 or this rule, such protection shall be removed.

Q. The protection afforded under P.L. 86-272 and the provisions of this rule shall be determined on a year by year tax basis. Therefore, if at any time during a tax year the company conducts activities that are not protected under P.L. 86-272 or this rule, no sales in this state or income earned by the company attributed to this state during any part of said tax year shall be protected from taxation for purposes of the corporate franchise tax.

R865-6F-8. Allocation and Apportionment of Net Income (Uniform Division of Income for Tax Purposes Act) Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions.

(a) "Allocation" means the assignment of nonbusiness income to a particular state.

(b) "Apportionment" means the division of business income between states by the use of a formula containing apportionment factors.

(c) "Base of operations" means the place of more or less permanent nature from which the employee starts work and to which the employee customarily returns in order to receive instructions from the taxpayer or communications from customers or other persons, or to replenish stock or other materials, repair equipment, or perform any other function necessary to the exercise of his trade or profession at some other point or points.

(d) "Business activity" refers to the transactions and activities occurring in the regular course of a particular trade or business of a taxpayer, or to the acquisition, management, and disposition of property that constitute integral parts of the taxpayer's regular trade or business operations.

(e) "Business income" means income of any type or class, and from any activity, that meets the relationship described in Subsection (2)(b), the transactional test, or Subsection (2)(c),

the functional test. The classification of income by the labels occasionally used, such as manufacturing income, compensation for services, sales income, interest, dividends, rents, royalties, gains, operating income, and nonoperating income is of no aid in determining whether income is business or nonbusiness income.

(f) "Compensation" means wages, salaries, commissions, and any other form of remuneration paid to employees for personal services.

(g) "Employee" means an:

(i) officer of a corporation; or

(ii) individual who, under the usual common law rules applicable in determining the employer-employee relationship, has the status of an employee.

(h) "Gross receipts" are the gross amounts realized (the sum of money and the fair market value of other property or services received) on the sale or exchange of property, the performance of services, or the use of property or capital (including rents, royalties, interest and dividends) in a transaction that produces business income, in which the income or loss is recognized (or would be recognized if the transaction were in the United States) under the Internal Revenue Code. Amounts realized on the sale or exchange or property are not reduced for the cost of goods sold or the basis of property sold.

(i) Gross receipts, even if business income, do not include such items as, for example:

(A) repayment, maturity, or redemption of the principal of a loan, bond, or mutual fund or certificate of deposit or similar marketable instrument;

(B) the principal amount received under a repurchase agreement or other transaction properly characterized as a loan;

(C) proceeds from issuance of the taxpayer's own stock or from sale of treasury stock;

(D) damages and other amounts received as the result of litigation;

(E) property acquired by an agent on behalf of another;

(F) tax refunds and other tax benefit recoveries;

(G) pension reversions;

(H) contributions to capital (except for sales of securities by securities dealers);

(I) income from forgiveness of indebtedness; or

(J) amounts realized from exchanges of inventory that are not recognized by the Internal Revenue Code.

(ii) Exclusion of an item from the definition of "gross receipts" is not determinative of its character as business or nonbusiness income. Nothing in this definition shall be construed to modify, impair or supersede any provision of Subsection (11).

(i) "Nonbusiness income" means all income other than business income.

(j) "Place from which the service is directed or controlled" means the place from which the power to direct or control is exercised by the taxpayer.

(k) "Taxpayer" means a corporation as defined in Section 59-7-101.

(l) "To contribute materially" includes being used operationally in the taxpayer's trade or business. Whether property contributes materially is not determined by reference to the property's value or percentage of use. If an item of property contributes materially to the taxpayer's trade or business, the attributes, rights, or components of that property are also operationally used in that business. However, property that is held for mere financial betterment is not operationally used in the taxpayer's trade or business.

(m) "Trade or business" means the unitary business of the taxpayer, part of which is conducted within Utah.

(2) Business and Nonbusiness Income.

(a) Apportionment and Allocation. Section 59-7-303 requires that every item of income be classified as either business income or nonbusiness income. Income for purposes of classification as business or nonbusiness includes gains and losses. Business income is apportioned among jurisdictions by use of a formula. Nonbusiness income is specifically assigned or allocated to one or more specific jurisdictions pursuant to express rules. An item of income is classified as business income if it falls within the definition of business income. An item of income is nonbusiness income only if it does not meet the definitional requirements for being classified as business income.

(b) Transactional Test. Business income includes income arising from transactions and activity in the regular course of the taxpayer's trade or business.

(i) If the transaction or activity is in the regular course of the taxpayer's trade or business, part of which trade or business is conducted within the state, the resulting income of the transaction or activity is business income for Utah purposes. Income may be business income even though the actual transaction or activity that gives rise to the income does not occur in this state.

(ii) For a transaction or activity to be in the regular course of the taxpayer's trade or business, the transaction or activity need not be one that frequently occurs in the trade or business. Most, but not all, frequently occurring transactions or activities will be in the regular course of that trade or business and will, therefore, satisfy the transactional test. It is sufficient to classify a transaction or activity as being in the regular course of a trade or business if it is reasonable to conclude transactions of that type are customary in the kind of trade or business being conducted, or are within the scope of what that kind of trade or business does. However, even if a taxpayer frequently or customarily engages in investment activities, if those activities are for the taxpayer's mere financial betterment rather than for the operations of the trade or business, those activities do not satisfy the transactional test. The transactional test includes income from sales of inventory, property held for sale to customers, and services commonly sold by the trade or business. The transactional test also includes income from the sale of property used in the production of business income of a kind that is sold and replaced with some regularity, even if replaced less frequently than once a year.

(c) Functional Test. Business income also includes income from tangible and intangible property if the acquisition, management, and disposition of the property constitute integral parts of the taxpayer's regular trade or business operations.

(i) The following definitions apply to this Subsection (2)(c).

(A) "Acquisition" means the act of obtaining an interest in property.

(B) "Disposition" means the act, or the power, of relinquishing or transferring an interest in or control over property to another, either in whole or in part.

(C) "Integral part" means property that constitutes a part of the composite whole of the trade or business, each part of which gives value to every other part, in a manner that materially contributes to the production of business income.

(D) "Management" means the oversight, direction, or control, whether directly or by delegation, of the property for the use or benefit of the trade or business.

(E) "Property" includes an interest in, control over, or use of property, whether the interest is held directly, beneficially, by contract, or otherwise, that materially contributes to the production of business income.

(ii) Under the functional test, business income need not be derived from transactions or activities that are in the regular course of the taxpayer's own particular trade or business. It is sufficient, if the property from which the income is derived is or was an integral, functional, or operative component used in the taxpayer's trade or business operations, or otherwise materially

contributed to the production of business income of the trade or business, part of which trade or business is or was conducted within the state. Property that has been converted to nonbusiness use through the passage of a sufficiently lengthy period of time, generally five years, or that has been removed as an operational asset and is instead held by the taxpayer's trade or business exclusively for investment purposes, has lost its character as a business asset and is not subject to this subsection. Property that was an integral part of the trade or business is not considered converted to investment purposes merely because it is placed for sale.

(iii) Income that is derived from isolated sales, leases, assignments, licenses, and other infrequently occurring dispositions, transfers, or transactions involving property, including transactions made in liquidation or the winding-up of business, is business income if the property is or was used in the taxpayer's trade or business operations.

(A) Property that has been converted to nonbusiness use has lost its character as a business asset and is not subject to Subsection (2)(c)(iii).

(B) Income from the licensing of an intangible asset, such as a patent, copyright, trademark, service mark, know-how, trade secrets, or the like, that was developed or acquired for use by the taxpayer in its trade or business operations, constitutes business income whether or not the licensing itself constituted the operation of a trade or business, and whether or not the taxpayer remains in the same trade or business from or for which the intangible asset was developed or acquired.

(iv) Under the functional test, income from intangible property is business income when the intangible property serves an operational function as opposed to solely an investment function. The relevant inquiry focuses on whether the property is or was held in furtherance of the taxpayer's trade or business, that is, on the objective characteristics of the intangible property's use or acquisition and its relation to the taxpayer and the taxpayer's activities. The functional test is not satisfied where the holding of the property is limited to solely an investment function as is the case where the holding of the property is limited to mere financial betterment of the taxpayer in general.

(v) If the property is or was held in furtherance of the taxpayer's trade or business beyond mere financial betterment, income from that property may be business income even though the actual transaction or activity involving the property that gives rise to the income does not occur in this state.

(vi) If with respect to an item of property a taxpayer takes a deduction from business income that is apportioned to this state, or includes the original cost in the property factor, it is presumed that the item of property is or was integral to the taxpayer's trade or business operations. No presumption arises from the absence of any of these actions.

(vii) Application of the functional test is generally unaffected by the form of the property, whether tangible or intangible, real or personal. Income arising from an intangible interest, for example, corporate stock or other intangible interest in a business or a group of assets, is business income when the intangible itself or the property underlying or associated with the intangible is or was an integral, functional, or operative component of the taxpayer's trade or business operations.

(A) Property that has been converted to nonbusiness use has lost its character as a business asset and is not subject to this Subsection (2)(c)(vii).

(B) While apportionment of income derived from transactions involving intangible property as business income may be supported by a finding that the issuer of the intangible property and the taxpayer are engaged in the same trade or business, that is, the same unitary business, establishment of that relationship is not the exclusive basis for concluding that the income is subject to apportionment.

(C) It is sufficient to support the finding of apportionable income if the holding of the intangible interest served an operational rather than an investment function of mere financial betterment.

(d) Relationship of Transactional Test and Functional Tests to the United States Constitution.

(i) The due process clause and the commerce clause of the United States Constitution restrict states from apportioning income as business income that has no rational relationship with the taxing state. The protection against extra-territorial state taxation afforded by these clauses is often described as the unitary business principle. The unitary business principle requires apportionable income to be derived from the same unitary business that is being conducted as least in part in the state.

(ii) The unitary business conducted in this state includes both a unitary business that the taxpayer alone may be conducting and a unitary business the taxpayer may conduct with any other person. Satisfaction of either the transactional test or the functional test complies with the unitary business principle, because each test requires that the transaction or activity, in the case of the transactional test, or the property, in the case of the functional test, to be tied to the same trade or business that is conducted within the state. Determination of the scope of the unitary business conducted in the state is without regard to the extent to which this state requires or permits combined reporting.

(e) Business and Nonbusiness Income Application of Definitions.

(i) Rents From Real and Tangible Personal Property. Rental income from real and tangible property is business income if the property with respect to which the rental income was received is or was used in the taxpayer's trade or business and therefore is includable in the property factor under Subsection (8)(a)(i). Property that has been converted to nonbusiness use has lost its character as a business asset and is not subject to this subsection.

(ii) Gains or Losses From Sales of Assets. Gain or loss from the sale, exchange, or other disposition of real property or of tangible or intangible personal property constitutes business income if the property while owned by the taxpayer was used in, or was otherwise included in the property factor of the taxpayer's trade or business. However, if the property was utilized for the production of nonbusiness income or it was previously included in the property factor and later removed from the property factor before its sale, exchange, or other disposition, the gain or loss constitutes nonbusiness income. See Subsection (8)(a)(ii).

(iii) Interest. Interest income is business income where the intangible with respect to which the interest was received arises out of or was created in the regular course of the taxpayer's trade or business operations, or where the purpose for acquiring and holding the intangible is an integral, functional, or operative component of the taxpayer's trade or business operations, or otherwise materially contributes to the production of business income of the trade or business operations.

(iv) Dividends. Dividends are business income where the stock with respect to which the dividends were received arose out of or was acquired in the regular course of the taxpayer's trade or business operations or where the acquiring and holding of the stock is an integral, functional, or operative component of the taxpayer's trade or business operations, or otherwise materially contributes to the production of business income of the trade or business operations.

(v) Patent and Copyright Royalties. Patent and copyright royalties are business income where the patent or copyright with respect to which the royalties were received arose out of or was created in the regular course of the taxpayer's trade or business operations or where the acquiring and holding of the patent or

copyright is an integral, functional, or operational component of the taxpayer's trade or business operations, or otherwise materially contributes to the production of business income of the trade or business operations.

(vi) Proration of Deductions. In most cases, an allowable deduction of a taxpayer will be applicable only to the business income arising from a particular trade or business or to a particular item of nonbusiness income. In some cases, an allowable deduction may be applicable to the business incomes of more than one trade or business or several items of nonbusiness income. In those cases, the deduction shall be prorated among those trades or businesses and those items of nonbusiness income in a manner that fairly distributes the deduction among the classes of income to which it is applicable.

(f)(i) A schedule must be submitted with the return showing the:

(A) gross income from each class of income being allocated;

(B) amount of each class of applicable expenses, together with explanation or computations showing how amounts were arrived at;

(C) total amount of the applicable expenses for each income class; and

(D) net income of each income class.

(ii) The schedule shall indicate items of income and expenses allocated both to the state and outside the state.

(g) Year to Year Consistency. In filing returns with the state, if the taxpayer departs from or modifies the manner of prorating any deduction used in returns for prior years in a material way, the taxpayer shall disclose in the return for the current year the nature and extent of the modification.

(h) State to State Consistency. If the returns or reports filed by a taxpayer with all states to which the taxpayer reports under the Uniform Division of Income for Tax Purposes Act are not uniform in the application or proration of any deduction, the taxpayer shall disclose in its return to this state the nature and extent of any material variance.

(3) Unitary Business.

(a) Unitary Business Principle.

(i) The Concept of a Unitary Business. A unitary business is a single economic enterprise that is made up of either separate parts of a single business entity or a group of business entities related through common ownership that are sufficiently interdependent, integrated and interrelated through their activities so as to provide a synergy and mutual benefit that produces a sharing or exchange of value among them and a significant flow of value to the separate parts. This flow of value to a business entity located in this state that comes from being part of a unitary business conducted both within and without the state is what provides the constitutional due process definite link and minimum connection necessary for the state to apportion business income of the unitary business, even if that income arises in part from activities conducted outside the state. The business income of the unitary business is then apportioned to this state using an apportionment percentage provided by Section 59-7-311. This sharing or exchange of value may also be described as requiring that the operation of one part of the business be dependent upon, or contribute to, the operation of another part of the business. Phrased in the disjunctive, the foregoing means that if the activities of one business either contribute to the activities of another business or are dependent upon the activities of another business, those businesses are part of a unitary business.

(ii) Constitutional Requirement for a Unitary Business. The sharing or exchange of value described in Subsection (3)(a)(i) that defines the scope of a unitary business requires more than the mere flow of funds arising out of a passive investment or from the financial strength contributed by a distinct business undertaking that has no operational relationship to the unitary business. In this state, the unitary business principle shall be applied to the fullest extent allowed by the United States Constitution. The unitary business principle shall not be applied to result in the combination of business activities or entities under circumstances where, if it were adverse to the taxpayer, the combination of those activities or entities would not be allowed by the United States Constitution.

(iii) Separate Trades or Businesses Conducted Within a Single Entity. A single entity may have more than one unitary business. In those cases, it is necessary to determine the business, or apportionable, income attributable to each separate unitary business as well as its nonbusiness income, which is specifically allocated. The business income of each unitary business is then apportioned by a formula that takes into consideration the in-state and out-of-state factors that relate to the respective unitary business whose income is being apportioned.

(iv) Unitary Business Unaffected by Formal Business Organization. A unitary business may exist within a single business entity or among a group of business entities related through common ownership, as defined in Section 59-7-101.

(b) Determination of a Unitary Business.

(i) A unitary business is characterized by significant flows of value evidenced by factors such as those described in Mobil Oil Corp. v. Vermont, 445 US 425 (1980): functional integration, centralization of management, and economies of scale. These factors provide evidence of whether the business activities operate as an integrated whole or exhibit substantial mutual interdependence. Facts suggesting the presence of the factors mentioned above should be analyzed in combination for their cumulative effect and not in isolation. A particular characteristic of a business operation may be suggestive of one or more of the factors mentioned above.

(ii) Description and Illustration of Functional Integration, Centralization of Management, and Economies of Scale.

(A) Functional Integration. Functional integration refers to transfers between, or pooling among, business activities that significantly affect the operation of the business activities. Functional integration includes transfers or pooling with respect to the unitary business's products or services, technical information, marketing information, distribution systems, purchasing, and intangibles such as patents, trademarks, service marks, copyrights, trade secrets, know-how, formulas, and processes. There is no specific type of functional integration that must be present. The following is a list of examples of business operations that support the finding of functional integration. The order of the list does not establish a hierarchy of importance.

(I) Sales, Exchanges, or Transfers. Sales, exchanges, or transfers (collectively "sales") of products, services, and intangibles between business activities provide evidence of functional integration. The significance of the intercompany sales to the finding of functional integration will be affected by the character of what is sold and the percentage of total sales or purchases represented by the intercompany sales. For example, sales among business entities that are part of a vertically integrated unitary business are indicative of functional integration. Functional integration is not negated by the use of a readily determinable market price to affect the intercompany sales, because those sales can represent an assured market for the seller or an assured source of supply for the purchaser.

(II) Common Marketing. The sharing of common marketing features among business entities is an indication of functional integration when the marketing results in significant mutual advantage. Common marketing exists when a substantial portion of the business entities' products, services, or intangibles are distributed or sold to a common customer, when the business entities use a common trade name or other common

identification, or when the business entities seek to identify themselves to their customers as a member of the same enterprise. The use of a common advertising agency or a commonly owned or controlled in-house advertising office does not by itself establish common marketing that is suggestive of functional integration. That activity, however, is relevant to determining the existence of economies of scale and centralization of management.

(III) Transfer or Pooling of Technical Information or Intellectual Property. Transfers or pooling of technical information or intellectual property, such as patents, copyrights, trademarks and service marks, trade secrets, processes or formulas, know-how, research, or development provide evidence of functional integration when the matter transferred is significant to the businesses' operations.

(IV) Common Distribution System. Use of a common distribution system by the business entities, under which inventory control and accounting, storage, trafficking, or transportation are controlled through a common network provides evidence of functional integration.

(V) Common Purchasing. Common purchasing of substantial quantities of products, services, or intangibles from the same source by the business entities, particularly where the purchasing results in significant cost savings and is significant to each entity's operations or sales, provides evidence of functional integration.

(VI) Common or Intercompany Financing. Significant common or intercompany financing, including the guarantee by, or the pledging of the credit of, one or more business entities for the benefit of another business entity or entities provides evidence of functional integration, if the financing activity serves an operational purpose of both borrower and lender. Lending that serves an investment purpose of the lender does not necessarily provide evidence of functional integration.

(B) Centralization of Management. Centralization of management exists when directors, officers, and other management employees jointly participate in the management decisions that affect the respective business activities and that may also operate to the benefit of the entire economic enterprise. Centralization of management can exist whether the centralization is effected from a parent entity to a subsidiary entity, from a subsidiary entity to a parent entity, from one subsidiary entity to another, from one division within a single business entity to another division within a business entity, or from any combination of the foregoing. Centralization of management may exist even when day-to-day management responsibility and accountability has been decentralized, so long as the management has an ongoing operational role with respect to the business activities. An operational role may be effected through mandates, consensus building, or an overall operational strategy of the business, or any other mechanism that establishes joint management.

(I) Facts Providing Evidence of Centralization of Management. Evidence of centralization of management is provided when common officers participate in the decisions relating to the business operations of the different segments. Centralization of management may exist when management shares or applies knowledge and expertise among the parts of the business. Existence of common officers and directors, while relevant to a showing of centralization of management, does not alone provide evidence of centralization of management. Common officers are more likely to provide evidence of centralization of management than are common directors.

(II) Stewardship Distinguished. Centralized efforts to fulfill stewardship oversight are not evidence of centralization of management. Stewardship oversight consists of those activities that any owner would take to review the performance of or safeguard an investment. Stewardship oversight is distinguished from those activities that an owner may take to enhance value by integrating one or more significant operating aspects of one business activity with the other business activities of the owner. For example, implementing reporting requirements or mere approval of capital expenditures may evidence only stewardship oversight.

(C) Economies of Scale. Economies of scale refers to a relation among and between business activities resulting in a significant decrease in the average per unit cost of operational or administrative functions due to the increase in operational size. Economies of scale may exist from the inherent cost savings that arise from the presence of functional integration or centralization of management. The following are examples of business operations that support the finding of economies of scale. The order of the list does not establish a hierarchy of importance.

(I) Centralized Purchasing. Centralized purchasing designed to achieve savings due to the volume of purchases, the timing of purchases, or the interchangeability of purchased items among the parts of the business engaging in the purchasing provides evidence of economies of scale.

(II) Centralized Administrative Functions. The performance of traditional corporate administrative functions, such as legal services, payroll services, pension and other employee benefit administration, in common among the parts of the business may result in some degree of economies of scale. A business entity that secures savings in the performance of corporate administrative services due to its affiliation with other business entities that it would not otherwise reasonably be able to secure on its own because of its size, financial resources, or available market provides evidence of economies of scale.

(c) Indicators of a Unitary Business.

(i) Business activities that are in the same general line of business generally constitute a single unitary business, as for example, a multistate grocery chain.

(ii) Business activities that are part of different steps in a vertically structured business almost always constitute a single unitary business. For example, a business engaged in the exploration, development, extraction, and processing of a natural resource and the subsequent sale of a product based upon the extracted natural resource, is engaged in a single unitary business, regardless of the fact that the various steps in the process are operated substantially independently of each other with only general supervision from the business's executive offices.

(iii) Business activities that might otherwise be considered as part of more than one unitary business may constitute one unitary business when the factors outlined in Subsection (3)(b) are present. For example, some businesses conducting diverse lines of business may properly be considered as engaged in only one unitary business when the central executive officers are actively involved in the operations of the various business activities and there are centralized offices that perform for the business the normal matters a truly independent business would perform for itself, such as personnel, purchasing, advertising, or financing.

(4) Apportionment and Allocation.

(a)(i) If the business activity with respect to the trade or business of a taxpayer occurs both within and without this state, and if by reason of that business activity the taxpayer is taxable in another state, the portion of the net income (or net loss) arising from the trade or business derived from sources within this state shall be determined by apportionment in accordance with Sections 59-7-311 to 59-7-319.

(ii) For purposes of determining the fraction by which business income shall be apportioned to this state under Section 59-7-311:

(A) If a taxpayer makes an election to calculate its apportionment fraction under Subsection 59-7-311(2)(c) and one or more of the factors listed in Subsection 59-7-311(2)(c)(i)

is missing, the fraction by which business income shall be apportioned to the state shall be determined by adding the factors present and dividing that sum by the number of factors present.

(B) If a taxpayer makes an election to double weight the sales factor under Subsection 59-7-311(2)(d) and one or more of the factors listed in Subsection 59-7-311(2)(d)(i) is missing, the fraction by which business income shall be apportioned to the state shall be determined by adding the factors as provided in subsection 59-7-311(2)(d)(i), and dividing that sum by the denominator indicated in Subsection 59-7-311(2)(d)(ii), reduced by the sum of one if the property factor is missing, one if the payroll factor is missing, and two if the sales factor is missing.

(C) For a taxable year that begins on or after January 1, 2011, but begins on or before December 31, 2011, in the case of a sales factor weighted taxpayer, if one or more of the factors listed in Subsection 59-7-311(3)(a)(i) is missing and if the sales factor is present, the fraction by which business income shall be apportioned to the state shall be determined by adding the factors as provided in Subsection 59-7-311(3)(a)(i), and dividing that sum by the denominator, indicated in Subsection 59-7-311(3)(a)(ii), reduced by the number of missing factors.

(D) For a taxable year that begins on or after January 1, 2012, but begins on or before December 31, 2012, in the case of a sales factor weighted taxpayer, if one or more of the factors listed in Subsection 59-7-311(3)(b)(i) is missing and if the sales factor is present, the fraction by which business income shall be apportioned to the state shall be determined by adding the factors as provided in Subsection 59-7-311(3)(b)(i), and dividing that sum by the denominator, indicated in Subsection 59-7-311(3)(b)(ii), reduced by the number of missing factors.

(b) Allocation. Any taxpayer subject to the taxing jurisdiction of this state shall allocate all of its nonbusiness income or loss within or without this state in accordance with Sections 59-7-306 to 59-7-310.

(5) Consistency and Uniformity in Reporting. In filing returns with this state, if the taxpayer departs from or modifies the manner in which income has been classified as business income or nonbusiness income in returns for prior years, the taxpayer shall disclose in the return for the current year the nature and extent of the modification. If the returns or reports filed by a taxpayer for all states to which the taxpayer reports under UDITPA are not uniform in the classification of income as business or nonbusiness income, the taxpayer shall disclose in its return to this state the nature and extent of the variance.

(6) Taxable in Another State.

(a) In General. Under Section 59-7-303 the taxpayer is subject to the allocation and apportionment provisions of UDITPA if it has income from business activity that is taxable both within and without this state. A taxpayer's income from business activity is taxable without this state if the taxpayer, by reason of business activity (i.e., the transactions and activity occurring in the regular course of the trade or business), is taxable in another state within the meaning of Section 59-7-305. A taxpayer is taxable within another state if it meets either one of two tests:

(i) if by reason of business activity in another state the taxpayer is subject to one of the types of taxes specified in Section 59-7-305(1), namely: a net income tax, a franchise tax measured by net income, a franchise tax for the privilege of doing business, or a corporate stock tax; or

(ii) if by reason of business activity another state has jurisdiction to subject the taxpayer to a net income tax, regardless of whether the state imposes that tax on the taxpayer. A taxpayer is not taxable in another state with respect to the trade or business merely because the taxpayer conducts activities in that state pertaining to the production of nonbusiness income or business activities relating to a separate trade or business.

(b) When a Taxpayer Is Subject to a Tax Under Section 59-7-305. A taxpayer is subject to one of the taxes specified in Section 59-7-305(1) if it carries on business activity in a state and that state imposes such a tax thereon. Any taxpayer that asserts that it is subject to one of the taxes specified in Section 59-7-305(1) in another state shall furnish to the Tax Commission, upon its request, evidence to support that assertion. The Tax Commission may request that the evidence include proof that the taxpayer has filed the requisite tax return in the other state and has paid any taxes imposed under the law of the other state. The taxpayer's failure to produce that proof may be taken into account in determining whether the taxpayer is subject to one of the taxes specified in Section 59-7-305(1) in the other state. If the taxpayer voluntarily files and pays one or more taxes when not required to do so by the laws of that state or pays a minimal fee for qualification, organization, or for the privilege of doing business in that state, but

(i) does not actually engage in business activity in that state, or

(ii) does actually engage in some business activity, not sufficient for nexus, and the minimum tax bears no relation to the taxpayer's business activity within that state, the taxpayer is not subject to one of the taxes specified within the meaning of Section 59-7-305(1).

(c) When a State Has Jurisdiction to Subject a Taxpayer to a Net Income Tax. The second test, that of Section 59-7-305(2), applies if the taxpayer's business activity is sufficient to give the state jurisdiction to impose a net income tax by reason of business activity under the Constitution and statutes of the United States. Jurisdiction to tax is not present where the state is prohibited from imposing the tax by reason of the provisions of Public Law 86-272, 15 U. S. C. A. Sec. 381-385 (P.L. 86-272). In the case of any state as defined in Section 59-7-302, other than a state of the United States or political subdivision of a state, the determination of whether a state has jurisdiction to subject the taxpayer to a net income tax shall be made as though the jurisdictional standards applicable to a state of the United States applied in that state. If jurisdiction is otherwise present, the state is not considered as without jurisdiction by reason of the provisions of a treaty between that state and the United States.

(7) Apportionment Formula. All business income of the taxpayer shall be apportioned to this state by use of the apportionment formula set forth in Section 59-7-311. The elements of the apportionment formula are the property factor, see Subsection (8), the payroll factor, see Subsection (9), and the sales factor, see Subsection (10) of the trade or business of the taxpayer. For exceptions see Subsection (11).

(8) Property Factor.

(a) In General.

(i) The property factor of the apportionment formula shall include all real and tangible personal property owned or rented by the taxpayer and used during the tax period in the regular course of its trade or business. Real and tangible personal property includes land, buildings, machinery, stocks of goods, equipment, and other real and tangible personal property but does not include coin or currency.

(ii) Property used in connection with the production of nonbusiness income shall be excluded from the property factor. Property used both in the regular course of the taxpayer's trade or business and in the production of nonbusiness income shall be included in the factor only to the extent the property is used in the regular course of the taxpayer's trade or business. The method of determining the portion of the value to be included in the factor will depend upon the facts of each case.

(iii) The property factor shall reflect the average value of property includable in the factor. Refer to Subsection (8)(g).

(b) Property Used for the Production of Business Income. Property shall be included in the property factor if it is actually used or is available for or capable of being used during the tax

period in the regular course of the trade or business of the taxpayer. Property held as reserves or standby facilities or property held as a reserve source of materials shall be included in the factor. For example, a plant temporarily idle or raw material reserves not currently being processed are includable in the factor. Property or equipment under construction during the tax period, except inventoriable goods in process, shall be excluded from the factor until the property is actually used in the regular course of the trade or business of the taxpayer. If the property is partially used in the regular course of the trade or business of the taxpayer while under construction, the value of the property to the extent used shall be included in the property factor. Property used in the regular course of the trade or business of the taxpayer shall remain in the property factor until its permanent withdrawal is established by an identifiable event such as its conversion to the production of nonbusiness income, its sale, or the lapse of an extended period of time, normally five years, during which the property is no longer held for use in the trade or business.

(c) Consistency in Reporting. In filing returns with this state, if the taxpayer departs from or modifies the manner of valuing property, or of excluding or including property in the property factor, used in returns for prior years, the taxpayer shall disclose in the return for the current year the nature and extent of the modification. If the returns or reports filed by the taxpayer with all states to which the taxpayer reports under UDITPA are not uniform in the valuation of property and in the exclusion or inclusion of property in the property factor, the taxpayer shall disclose in its return to this state the nature and extent of the variance.

(d) Property Factor Numerator. The numerator of the property factor shall include the average value of the real and tangible personal property owned or rented by the taxpayer and used in this state during the tax period in the regular course of the trade or business of the taxpayer. Property in transit between locations of the taxpayer to which it belongs shall be considered to be at the destination for purposes of the property factor. Property in transit between a buyer and seller that is included by a taxpayer in the denominator of its property factor in accordance with its regular accounting practices shall be included in the numerator according to the state of destination. The value of mobile or movable property such as construction equipment, trucks, or leased electronic equipment that are located within and without this state during the tax period shall be determined for purposes of the numerator of the factor on the basis of total time within the state during the tax period. An automobile assigned to a traveling employee shall be included in the numerator of the factor of the state to which the employee's compensation is assigned under the payroll factor or in the numerator of the state in which the automobile is licensed.

(e) Valuation of Owned Property.

(i) Property owned by the taxpayer shall be valued at its original cost. As a general rule original cost is deemed to be the basis of the property for state franchise or income tax purposes (prior to any adjustments) at the time of acquisition by the taxpayer and adjusted by subsequent capital additions or improvements thereto and partial disposition thereof, by reasons including sale, exchange, and abandonment. However, capitalized intangible drilling and development costs shall be included in the property factor whether or not they have been expensed for either federal or state tax purposes.

(ii) Inventory of stock of goods shall be included in the factor in accordance with the valuation method used for state tax purposes.

(iii) Property acquired by gift or inheritance shall be included in the factor at its basis for determining depreciation.

(f) Valuation of Rented Property.

(i) Property rented by the taxpayer is valued at eight times its net annual rental rate. The net annual rental rate for any item of rented property is the annual rental rate paid by the taxpayer for the property, less the aggregate annual subrental rates paid by subtenants of the taxpayer. See Subsection (11)(b) for special rules where the use of the net annual rental rate produces a negative or clearly inaccurate value or where property is used by the taxpayer at no charge or rented at a nominal rental rate.

(ii) Subrents are not deducted when the subrents constitute business income because the property that produces the subrents is used in the regular course of the trade or business of the taxpayer when it is producing the income. Accordingly there is no reduction in its value.

(iii) Annual rental rate is the amount paid as rental for property for a 12-month period; i.e., the amount of the annual rent. Where property is rented for less than a 12-month period, the rent paid for the actual period of rental shall constitute the annual rental rate for the tax period. However, where a taxpayer has rented property for a term of 12 or more months and the current tax period covers a period of less than 12 months (due, for example, to a reorganization or change of accounting period), the rent paid for the short tax period shall be annualized. If the rental term is for less than 12 months, the rent shall not be annualized beyond its term. Rent shall not be annualized because of the uncertain duration when the rental term is on a month to month basis.

(iv) Annual rent is the actual sum of money or other consideration payable, directly or indirectly, by the taxpayer or for its benefit for the use of the property and includes:

(A) Any amount payable for the use of real or tangible personal property, or any part thereof, whether designated as a fixed sum of money or as a percentage of sales, profits or otherwise.

(B) Any amount payable as additional rent or in lieu of rents, such as interest, taxes, insurance, repairs or any other items that are required to be paid by the terms of the lease or other arrangement, not including amounts paid as service charges, such as utilities, and janitor services. If a payment includes rent and other charges unsegregated, the amount of rent shall be determined by consideration of the relative values of the rent and other items.

(v) Annual rent does not include:

(A) incidental day-to-day expenses such as hotel or motel accommodations, or daily rental of automobiles;

(B) royalties based on extraction of natural resources, whether represented by delivery or purchase. For this purpose, a royalty includes any consideration conveyed or credited to a holder of an interest in property that constitutes a sharing of current or future production of natural resources from that property, irrespective of the method of payment or how that consideration may be characterized, whether as a royalty, advance royalty, rental, or otherwise.

(vi) Leasehold improvements shall, for the purposes of the property factor, be treated as property owned by the taxpayer regardless of whether the taxpayer is entitled to remove the improvements or the improvements revert to the lessor upon expiration of the lease. Hence, the original cost of leasehold improvements shall be included in the factor.

(g) Averaging Property Values. As a general rule, the average value of property owned by the taxpayer shall be determined by averaging the values at the beginning and end of the tax period. However, the Tax Commission may require or allow averaging by monthly values if that method of averaging is required to properly reflect the average value of the taxpayer's property for the tax period.

(i) Averaging by monthly values will generally be applied if substantial fluctuations in the values of the property exist during the tax period or where property is acquired after the beginning of the tax period or disposed of before the end of the tax period.

(ii) Example: The monthly value of the taxpayer's property

was as follows:

TABLE

January	$2,000
February	2,000
March	3,000
April	3,500
May	4,500
June	10,000
July	15,000
August	17,000
September	23,000
October	25,000
November	13,000
December	2,000
Total	$120,000

The average value of the taxpayer's property includable in the property factor for the income year is determined as follows:

$120,000 / 12 = $10,000

(iii) Averaging with respect to rented property is achieved automatically by the method of determining the net annual rental rate of the property as set forth in Subsection (8)(g).

(9) Payroll Factor.

(a) The payroll factor of the apportionment formula shall include the total amount paid by the taxpayer in the regular course of its trade or business for compensation during the tax period.

(b) The total amount paid to employees is determined upon the basis of the taxpayer's accounting method. If the taxpayer has adopted the accrual method of accounting, all compensation properly accrued shall be deemed to have been paid. Notwithstanding the taxpayer's method of accounting, at the election of the taxpayer, compensation paid to employees may be included in the payroll factor by use of the cash method if the taxpayer is required to report compensation under that method for unemployment compensation purposes. The compensation of any employee on account of activities that are connected with the production of nonbusiness income shall be excluded from the factor.

(c) Payments made to an independent contractor or any other person not properly classifiable as an employee are excluded from the payroll factor. Only amounts paid directly to employees are included in the payroll factor. Amounts considered paid directly include the value of board, rent, housing, lodging, and other benefits or services furnished to employees by the taxpayer in return for personal services.

(d) Generally, a person will be considered to be an employee if he is included by the taxpayer as an employee for purposes of the payroll taxes imposed by the Federal Insurance Contributions Act. However, since certain individuals are included within the term employees in the Federal Insurance Contributions Act who would not be employees under the usual common law rules, it may be established that a person who is included as an employee for purposes of the Federal Insurance Contributions Act is not an employee for purposes of this rule.

(e)(A) In filing returns with this state, if the taxpayer departs from or modifies the treatment of compensation paid used in returns for prior years, the taxpayer shall disclose in the return for the current year the nature and extent of the modification.

(B) If the returns or reports filed by the taxpayer with all states to which the taxpayer reports under UDITPA are not uniform in the treatment of compensation paid, the taxpayer shall disclose in its return to this state the nature and extent of the variance.

(f) Denominator. The denominator of the payroll factor is the total compensation paid everywhere during the tax period. Accordingly, compensation paid to employees whose services are performed entirely in a state where the taxpayer is immune from taxation, for example, by P.L. 86-272, are included in the denominator of the payroll factor.

(g) Numerator. The numerator of the payroll factor is the total amount paid in this state during the tax period by the taxpayer for compensation. The tests in Section 59-7-316 to be applied in determining whether compensation is paid in this state are derived from the Model Unemployment Compensation Act. Accordingly, if compensation paid to employees is included in the payroll factor by use of the cash method of accounting or if the taxpayer is required to report compensation under that method for unemployment compensation purposes, it shall be presumed that the total wages reported by the taxpayer to this state for unemployment compensation purposes constitute compensation paid in this state except for compensation excluded under this Subsection (9). The presumption may be overcome by satisfactory evidence that an employee's compensation is not properly reportable to this state for unemployment compensation purposes.

(h) Compensation Paid in this State. Compensation is paid in this state if any one of the following tests applied consecutively are met:

(i) The employee's service is performed entirely within the state.

(ii) The employee's service is performed both within and without the state, but the service performed without the state is incidental to the employee's service within the state. The word incidental means any service that is temporary or transitory in nature, or that is rendered in connection with an isolated transaction.

(iii) If the employee's services are performed both within and without this state, the employee's compensation will be attributed to this state:

(A) if the employee's base of operations is in this state; or

(B) if there is no base of operations in any state in which some part of the service is performed, but the place from which the service is directed or controlled is in this state; or

(C) if the base of operations or the place from which the service is directed or controlled is not in any state in which some part of the service is performed but the employee's residence is in this state.

(10) Sales Factor. In General.

(a) Section 59-7-302 defines the term "sales" to mean all gross receipts of the taxpayer not allocated under Section 59-7-306 through 59-7-310. Thus, for purposes of the sales factor of the apportionment formula for the trade or business of the taxpayer, the term sales means all gross receipts derived by the taxpayer from transactions and activity in the regular course of the trade or business. The following are rules determining sales in various situations.

(i) In the case of a taxpayer engaged in manufacturing and selling or purchasing and reselling goods or products, sales includes all gross receipts from the sales of goods or products (or other property of a kind that would properly be included in the inventory of the taxpayer if on hand at the close of the tax period) held by the taxpayer primarily for sale to customers in the ordinary course of its trade or business. Gross receipts for this purpose means gross sales, less returns and allowances and includes all interest income, service charges, carrying charges, or time-price differential charges incidental to sales. Federal and state excise taxes (including sales taxes) shall be included as part of receipts if taxes are passed on to the buyer or included as part of the selling price of the product.

(ii) In the case of cost plus fixed fee contracts, such as the operation of a government-owned plant for a fee, sales includes the entire reimbursed cost, plus the fee.

(iii) In the case of a taxpayer engaged in providing services, such as the operation of an advertising agency, or the performance of equipment service contracts, or research and development contracts, sales includes the gross receipts from the performance of services including fees, commissions, and similar items.

(iv) In the case of a taxpayer engaged in renting real or tangible property, sales includes the gross receipts from the rental, lease or licensing of the use of the property.

(v) In the case of a taxpayer engaged in the sale, assignment, or licensing of intangible personal property such as patents and copyrights, sales includes the gross receipts therefrom.

(vi) If a taxpayer derives receipts from the sale of equipment used in its business, those receipts constitute sales. For example, a truck express company owns a fleet of trucks and sells its trucks under a regular replacement program. The gross receipts from the sales of the trucks are included in the sales factor.

(vii) In some cases certain gross receipts should be disregarded in determining the sales factor in order that the apportionment formula will operate fairly to apportion to this state the income of the taxpayer's trade or business. See Subsection (11)(c).

(viii) In filing returns with this state, if the taxpayer departs from or modifies the basis for excluding or including gross receipts in the sales factor used in returns for prior years, the taxpayer shall disclose in the return for the current year the nature and extent of the modification.

(ix) If the returns or reports filed by the taxpayer with all states to which the taxpayer reports under UDITPA are not uniform in the inclusion or exclusion of gross receipts, the taxpayer shall disclose in its return to this state the nature and extent of the variance.

(b) Denominator. The denominator of the sales factor shall include the total gross receipts derived by the taxpayer from transactions and activity in the regular course of its trade or business, except receipts excluded under Subsection (11)(d).

(c) Numerator. The numerator of the sales factor shall include gross receipts attributable to this state and derived by the taxpayer from transactions and activity in the regular course of its trade or business. All interest income, service charges, carrying charges, or time-price differential charges incidental to gross receipts shall be included regardless of the place where the accounting records are maintained or the location of the contract or other evidence of indebtedness.

(d) Sales of Tangible Personal Property in this State.

(i) Gross receipts from the sales of tangible personal property (except sales to the United States government; see Subsection (10)(e) are in this state:

(A) if the property is delivered or shipped to a purchaser within this state regardless of the f.o.b. point or other conditions of sale; or

(B) if the property is shipped from an office, store, warehouse, factory, or other place of storage in this state and the taxpayer is not taxable in the state of the purchaser.

(ii) Property shall be deemed to be delivered or shipped to a purchaser within this state if the recipient is located in this state, even though the property is ordered from outside this state.

(iii) Property is delivered or shipped to a purchaser within this state if the shipment terminates in this state, even though the property is subsequently transferred by the purchaser to another state.

(iv) The term "purchaser within this state" shall include the ultimate recipient of the property if the taxpayer in this state, at the designation of the purchaser, delivers to or has the property shipped to the ultimate recipient within this state.

(v) When property being shipped by a seller from the state of origin to a consignee in another state is diverted while en route to a purchaser in this state, the sales are in this state.

(vi) If the taxpayer is not taxable in the state of the purchaser, the sale is attributed to this state if the property is shipped from an office, store, warehouse, factory, or other place of storage in this state.

(vii) If a taxpayer whose salesman operates from an office located in this state makes a sale to a purchaser in another state in which the taxpayer is not taxable and the property is shipped directly by a third party to the purchaser, the following rules apply:

(A) If the taxpayer is taxable in the state from which the third party ships the property, then the sale is in that state.

(B) If the taxpayer is not taxable in the state from which the property is shipped, the sale is in this state.

(e)(i) Sales of Tangible Personal Property to United States Government in this state.

(ii) Gross receipts from the sales of tangible personal property to the United States government are in this state if the property is shipped from an office, store, warehouse, factory, or other place of storage in this state. For purposes of this rule, only sales for which the United States government makes direct payment to the seller pursuant to the terms of a contract constitute sales to the United States government. Thus, as a general rule, sales by a subcontractor to the prime contractor, the party to the contract with the United States government, do not constitute sales to the United States government.

(f)(i) Sales Other than Sales of Tangible Personal Property in this State.

(ii) In general, Subsections 59-7-319(2) through (7) provide for the inclusion in the numerator of the sales factor of gross receipts from transactions other than sales of tangible personal property (including transactions with the United States government).

(g) Receipts from the Performance of Services.

(i) Under Subsection 59-7-319(3), gross receipts from the performance of a service are considered to be in this state if the purchaser of the service receives a greater benefit of the service in this state than in any other state. In general, the "benefit of the service" approach under the statute reflects a market based approach, and the greater benefit of the service is typically received in the state in which the market for the service exists and where the purchaser is located.

(ii) For businesses engaged in certain industries, specific sourcing rules and guidelines that address the attribution of gross receipts from the performance of a service have been adopted. See Subsection (11)(b).

(iii) The benefit from performance of a service is in this state if any of the following conditions are met:

(A) The service relates to tangible personal property and is performed at a purchaser's location in this state.

(B) The service relates to tangible personal property that the service provider delivers directly or indirectly to a purchaser in this state after the service is performed.

(C) The service is provided to an individual who is physically present in this state at the time the service is received.

(D) The service is provided to a purchaser exclusively engaged in a trade or business in this state and relates to that purchaser's business in this state.

(E) The service is provided to a purchaser that is present in this state and the service relates to that purchaser's activities in this state.

(iv) If the benefit of the service is received in more than one state, the gross receipts from the service are to be sourced using reasonable and consistent methods of analysis to determine in which state the greater benefit of the service is received. Such methods must be supported by the service provider's business records at the time the service was provided. If the benefit of a service is received in Utah and one or more other states and the state where the greater benefit of the service is received cannot otherwise be readily determined through the provisions of this rule, the following sourcing rules are applied in sequential order:

(A) The receipt is sourced to this state if the office from which the purchaser placed the order for the service is in this state.

(B) If the office from which the order was placed cannot be determined, the receipt is sourced to this state if the purchaser's billing address is in this state.

(C) If the state of the purchaser's billing address cannot be determined, the receipt shall be included in the sales factor in this state.

(v) The term, "gross receipt from the performance of a service" applies to each individual sales transaction, and each sales transaction is considered a discrete transaction for purposes of determining whether the purchaser of the service receives a greater benefit of the service in this state than in any other state.

(vi) In determining whether the greater benefit from the performance of a service is received in this state, the benefit of the service in this state must be compared to the benefit of the service received in each individual state in which any benefit of the service is received, i.e., the benefit of the service received in Utah is not compared to the benefit of the service received in all other states combined.

(vii) In the context of a combined report, the sale of services between members of a unitary group included in a combined report shall be excluded from the combined report sales factor.

(viii) The following examples are provided to illustrate the application of Utah law in regard to receipts from the performance of a service:

(A) A company headquartered and primarily conducting business in Utah contracts for general accounting services with an accounting firm located in another state. The receipts for the accounting service are sourced to Utah regardless of where the services are performed, since the greater benefit of the services is received in this state.

(B) A Utah retailer hires a California agency to develop an advertising campaign targeting its Utah customers. The receipts for the advertising services are sourced to Utah regardless of where the services are actually performed.

(C) A multistate company hires a Colorado firm to perform an appraisal of its business properties in Utah and Colorado. The company has several locations in Utah. However, the headquarters of the company is in Colorado and the value of its properties located in Colorado exceed the value of its properties in Utah. The appraisal fee is not broken down by location of the assets or properties of the company. Use of the property values for each state to determine where the greater benefit of the appraisal services occurred is a reasonable method to determine where the appraisal service fees should be sourced and the service would be sourced to Colorado. However, if the appraisal fees are broken out separately for Colorado and Utah properties or the billing information by state is known, the appraisal fees pertaining to the Utah properties are sourced to Utah and the appraisal fees pertaining to the Colorado properties are sourced to Colorado.

(D) An Internet/cable television service provider provides services to purchasers in Utah as well as other surrounding states. As all of the benefit from the services provided to Utah purchasers is received at residences or business locations in Utah, the receipts from the services provided to Utah purchasers are sourced to Utah.

(E) Data processing services are performed for a company conducting interstate business. The services relate to computer systems that are mainly located in Utah although a few terminals are spread over several other states. Since the data processing services relate to the computer systems that are mainly located in Utah, the greater benefit of the service is considered to be received in Utah and the receipts from the services are sourced to Utah regardless of where the services are actually performed. The location of data processing equipment associated with the data processing services is a reasonable method of sourcing receipts from those services.

(F) Engineering services are performed in connection with a property being constructed in Utah. Since all of the benefit of the service is received in Utah where the construction takes place, the receipts from the engineering services are sourced to Utah regardless of where the actual engineering services are performed.

(G) A California law firm is retained to represent multiple plaintiffs in a class action lawsuit filed against a Utah corporation in a Utah court. Receipts received by the firm for the legal services are sourced to Utah notwithstanding the fact that some of the services were performed outside Utah. The greater benefit of the services is received in Utah since the lawsuit was filed against a Utah corporation in a Utah court.

(H) A moving company performs a moving service for an individual that has been transferred from New Jersey to Utah. The charges for services in connection with the move and unpacking services are sourced to Utah because the greater benefit of the moving services is received by the purchaser in the state to which the property is moved. However, any charges for specific services such as storage or packing that are performed outside of Utah, and that are separately stated, are not sourced to Utah.

(I) A car rental agency rents a vehicle that is picked up from and returned to one of its business locations in Utah. The receipts from the rental are sourced to Utah regardless of whether the vehicle leaves this state for the duration of the rental period.

(11) Special Rules:

(a) Section 59-7-320 provides that if the allocation and apportionment provisions of UDITPA do not fairly represent the extent of the taxpayer's business activity in this state, the taxpayer may petition for, or the tax administrator may require, in respect to all or any part of the taxpayer's business activity, if reasonable:

(i) separate accounting;

(ii) the exclusion of any one or more of the factors;

(iii) the inclusion of one or more additional factors that will fairly represent the taxpayer's business activity in this state; or

(iv) the employment of any other method to effectuate an equitable allocation and apportionment of the taxpayer's income.

(b) For businesses engaged in one or more of the following industries, specific statutes, rules, and guidelines have been adopted:

(i) airlines see Sections 59-7-312, 59-7-315, and 59-7-317;

(ii) financial institutions see rule R865-6F-32;

(iii) long term construction contractors see rule R865-6F-16;

(iv) publishing companies see rule R865-6F-31;

(v) railroads see rule R865-6F-29;

(vi) registered securities or commodities brokers and dealers see rule R865-6F-36;

(vii) telecommunications companies see rule R865-6F-33; and

(viii) trucking companies see rule R865-6F-19;and

(ix) businesses or affiliates of businesses providing services to a regulated investment company see Section 59-7-319.

(c) Property Factor.

The following special rules are established in respect to the property factor of the apportionment formula:

(i) If the subrents taken into account in determining the net annual rental rate under Subsection (8)(f)(i) produce a negative or clearly inaccurate value for any item of property, another method that will properly reflect the value of rented property may be required by the Tax Commission or requested by the taxpayer. In no case however, shall the value be less than an amount that bears the same ratio to the annual rental rate paid by

the taxpayer for property as the fair market value of that portion of property used by the taxpayer bears to the total fair market value of the rented property.

(ii) If property owned by others is used by the taxpayer at no charge or rented by the taxpayer for a nominal rate, the net annual rental rate for the property shall be determined on the basis of a reasonable market rental rate for that property.

(d) Sales Factors.

The following special rules are established in respect to the sales factor of the apportionment formula:

(i) Where substantial amounts of gross receipts arise from an incidental or occasional sale of a fixed asset used in the regular course of the taxpayer's trade or business, those gross receipts shall be excluded from the sales factor. For example, gross receipts from the sale of a factory or plant will be excluded.

(ii) Insubstantial amounts of gross receipts arising from incidental or occasional transactions or activities may be excluded from the sales factor unless exclusion would materially affect the amount of income apportioned to this state. For example, the taxpayer ordinarily may include or exclude from the sales factor gross receipts from such transactions as the sale of office furniture, and business automobiles.

(iii) Where intangible property generates business income and the state in which that intangible property is being used can be determined, that income is included in the denominator of the sales factor and, if and to the extent that property is used in this state, in the numerator of the sales factor as well. For example, usually the state in which the intangible property is being used can be readily identified in respect to interest income received on deferred payments on sales of tangible property, see Subsection (10)(a)(i), and income from the sale, licensing or other use of intangible personal property.

(A) Where intangible property generates business income and the state in which that intangible property is being used cannot be determined, the income cannot be assigned to the numerator of the sales factor for any state and shall be excluded from the denominator of the sales factor. For example, where business income in the form of dividends received on stock, royalties received on patents or copyrights, or interest received on bonds, debentures or government securities results from the mere holding of the intangible personal property by the taxpayer, such dividends and interest shall be excluded from the denominator of the sales factor.

(B) Exclude from the denominator of the sales factor, receipts from the sales of securities unless the taxpayer is a dealer therein.

(iv) Where gains and losses on the sale of liquid assets are not excluded from the sales factor by other provisions under Subsections (11)(d)(i) through (iii), such gains or losses shall be treated as provided in this Subsection (11)(d)(iv). This Subsection (11)(d)(iv) does not provide rules relating to the treatment of other receipts produced from holding or managing such assets.

(A) If a taxpayer holds liquid assets in connection with one or more treasury functions of the taxpayer, and the liquid assets produce business income when sold, exchanged or otherwise disposed, the overall net gain from those transactions for each treasury function for the tax period is included in the sales factor. For purposes of this Subsection (11)(d)(iv), each treasury function will be considered separately.

(B) For purposes of this Subsection (11)(d)(iv), a liquid asset is an asset (other than functional currency or funds held in bank accounts) held to provide a relatively immediate source of funds to satisfy the liquidity needs of the trade or business. Liquid assets include:

(I) foreign currency (and trading positions therein) other than functional currency used in the regular course of the taxpayer's trade or business;

(II) marketable instruments (including stocks, bonds, debentures, options, warrants, futures contracts, etc.); and

(III) mutual funds which hold such liquid assets.

(C) An instrument is considered marketable if it is traded in an established stock or securities market and is regularly quoted by brokers or dealers in making a market. Stock in a corporation which is unitary with the taxpayer, or which has a substantial business relationship with the taxpayer, is not considered marketable stock.

(D) For purposes of this Subsection (11)(d)(iv)(D), a treasury function is the pooling and management of liquid assets for the purpose of satisfying the cash flow needs of the trade or business, such as providing liquidity for a taxpayer's business cycle, providing a reserve for business contingencies, business acquisitions, etc. A taxpayer principally engaged in the trade or business of purchasing and selling instruments or other items included in the definition of liquid assets set forth herein is not performing a treasury function with respect to income so produced.

(E) Overall net gain refers to the total net gain from all transactions incurred at each treasury function for the entire tax period, not the net gain from a specific transaction.

(e) Domestic International Sales Corporation (DISC). In any case in which a corporation, subject to the income tax jurisdiction of Utah, owns 50 percent or more of the voting power of the stock of a corporation classified as a DISC under the provisions of Sec. 992 Internal Revenue Code, a combined filing with the DISC corporation is required.

(f) Partnership or Joint Venture Income. Income or loss from partnership or joint venture interests shall be included in income and apportioned to Utah through application of the three-factor formula consisting of property, payroll and sales. For apportionment purposes, the portion of partnership or joint venture property, payroll and sales to be included in the corporation's property, payroll and sales factors shall be computed on the basis of the corporation's ownership interest in the partnership or joint venture, and otherwise in accordance with other applicable provisions of this rule.

R865-6F-14. Extent to Which Federal Income Tax Provisions Are Followed for Corporation Franchise Tax Purposes Pursuant to Utah Code Ann. Sections 59-7-106, 59-7-108, 59-7-501, and 59-7-502.

(1) It is the policy of the commission, in matters involving the determination of income for Utah corporation franchise tax purposes, to follow as closely as possible federal requirements with respect to the same matters. In some instances the federal and state statutes differ, and as a result the federal rulings, regulations, and decisions may not be followed. Furthermore, in some instances, the commission may disagree with the federal determinations and does not consider them controlling for Utah corporation franchise tax purposes.

(2) The items of major importance ordinarily allowed in conformity with federal requirements are:

(a) depreciation,

(b) depletion,

(c) exploration and development expenses,

(d) intangible drilling costs,

(e) accounting methods and periods, and

(f) Subpart F income.

(3) The following are the major items that require different treatment under the state and federal statutes:

(a) combined reporting,

(b) consolidated returns,

(c) dividends received deduction,

(d) municipal bond interest,

(e) capital loss deduction,

(f) loss carry-overs and carry-backs, and

(g) gross-up on foreign dividends.

R865-6F-15. Installment Basis of Reporting Income in Year of Termination Pursuant to Utah Code Ann. Section 59-7-112.

A. The Corporation Franchise Tax Act allows a corporation, under certain conditions and under rules prescribed by the Tax Commission, to report income arising from the sale or other disposition of property on a deferred or so-called installment basis. Thus, a gain technically realized at the time the sale is made may, at the election of the taxpayer, be reported on a deferred basis in accordance with the law and the following sections of this rule. The rule allowing deferment of reporting such income is only one of postponement of the tax, and not one of exemption from a tax otherwise lawfully due. Thus, the privilege of deferment is terminated if the taxpayer ceases to be subject to tax prior to the reporting of the entire amount of installment income. When a taxpayer elects to report income arising from the sale or other disposition of property as provided in Section 59-7-112, and the entire income therefrom has not been reported prior to the year that the taxpayer ceases to be subject to the tax imposed under the Utah Corporation Income and Franchise Tax Acts, the unreported income is included in the return for the last year in which the taxpayer is subject to the tax. This rule applies to all corporations which elect to report on the installment basis. If a corporation on this basis desires to dissolve or to withdraw, it must comply with the provisions hereof prior to issuance of the tax clearance certificate.

B. Income reported under the provisions of Section 59-7-112 and this rule shall be subject to the same treatment in the allocation of income; i.e., specific allocation or apportionment, as would have been accorded the original income from the sale under the provisions of the Uniform Division of Income for Tax Purposes Act. In case such income is subject to apportionment, the apportionment fraction for the year in which the income is reported applies rather than the year in which the sale was made.

R865-6F-16. Apportionment of Income of Long-Term Construction Contractors Pursuant to Utah Code Ann. Sections 59-7-302 through 321.

(1) When a taxpayer elects to use the percentage-of-completion method of accounting, or the completed contract method of accounting for long-term contracts, and has income from sources both within and without this state, the amount of business income derived from such long- term contracts from sources within this state is determined pursuant to this rule.

(2) Business income is apportioned to this state by a three-factor formula consisting of property, payroll, and sales--regardless of the method of accounting for long-term contracts elected by the taxpayer. The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as modified by this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9), and the sales factor in accordance with R865-6F-8(10).

(a) Percentage-of-completion method. Under this method of accounting for long-term contracts, the amount included each year as business income from each contract is the amount by which the gross contract price (which corresponds to the percentage of the entire contract completed during the income years) exceeds all expenditures made during the income year in connection with the contract. Beginning and ending material and supplies inventories must be appropriately accounted for in reporting expenditures.

(b) Completed-contract method. Under this method of accounting, business income derived from long-term contracts is reported for the income year in which the contract is completed. A special computation is required to compute the amount of business income attributable to this state from each completed contract. All receipts and expenditures applicable to the contracts, whether complete or incomplete at the end of the income year, are excluded from other business income, which are apportioned by the regular three-factor formula of property, payroll, and sales.

(3) Property factor. In general, the numerator and denominator of the property factor is determined as set forth in Sections 59-7-312, 59-7-313, and 59-7-314 and the rules thereunder. However, the following special rules are also applicable:

(a) The average value of the taxpayer's cost (including materials and labor) of construction in progress, to the extent these costs exceed progress billings, are included in the denominator of the property factor. The value of those construction costs attributable to construction projects in this state are included in the numerator of the property factor. It may be necessary to use monthly averages if yearly averages do not properly reflect the average value of the taxpayer's equity.

(b) Rent paid for the use of equipment directly attributable to a particular construction project is included in the property factor at eight times the net annual rental rate, even though the rental expense may be capitalized into the cost of construction.

(c) The property factor is computed in the same manner for all long-term-contract methods of accounting and is computed for each income year, even though under the completed-contract method of accounting business income is computed separately.

(4) Payroll factor. In general, the numerator and denominator of the payroll factor are determined as set forth in Sections 59-7-315 and 59-7-316 and the rules thereunder. However, the following special rules are also applicable.

(a) Compensation paid to employees attributable to a particular construction project is included in the payroll factor even though capitalized into the cost of construction.

(b) Compensation paid to employees who, in the aggregate, perform most of their services in a state to which their employer does not report them for unemployment tax purposes, is attributed to the state where the services are performed. For example, a taxpayer engaged in a long-term contract in State X sends several key employees to that state to supervise the project. The taxpayer, for unemployment tax purposes reports these employees to State Y where the main office is maintained and where the employees reside. For payroll factor purposes and in accordance with Section 59-7-316 and the rule thereunder, the compensation is assigned to the numerator of State X.

(c) The payroll factor is computed in the same manner for all long-term-contract methods of accounting and is computed for each income year, even though under the completed contract method of accounting, business income is computed separately.

(5) Sales Factor. In general, the numerator and denominator of the sales factor shall be determined as set forth in Sections 59-7-317, 59-7-318, and 59-7-319 and the rules thereunder. However, the following special rules are also applicable.

(a) Gross receipts derived from the performance of a contract are attributable to this state if the construction project is located in this state. If the construction project is located partly within and partly without this state, the gross receipts attributable to this state are based upon the ratio which construction costs for the project in this state incurred during the coming year bears to the total of such construction costs for the entire project during the income year. Progress billings are ordinarily used to reflect gross receipts and must be shown in both the numerator and denominator of the sales factor.

(b) If the percentage-of-completion method is used, the sales factor includes only that portion of the gross contract price which corresponds to the percentage of the entire contract which was completed during the income year. For example, a construction contractor which had elected the percentage-of-

completion method of accounting entered into a $9,000,000 long-term construction contract. At the end of its current income year (the second since starting the project) it estimated that the project was 30 percent completed. The amount of gross receipts included in the sales factor for the current income year is $2,700,000 (30 percent of $9,000,000), regardless of whether the taxpayer uses the accrual method or the cash method of accounting for receipts and disbursements.

(c) If the completed-contract method of accounting is used, the sales factor includes the portion of the gross receipts (progress billings) received under the cash basis or accrued, whichever is applicable, during the income year attributable to each contract. For example, a construction contractor which elected the completed-contract method of accounting entered into a long-term construction contract. At the end of its current income year (the second since starting the project) it had billed, and accrued on its books a total of $5,000,000 of which $2,000,000 had accrued in the first year the contract was undertaken, and $3,000,000 in the current (second) year. The amount of gross receipts included in the sales factor for the current income year is $3,000,000. If the taxpayer keeps its books on the cash basis, and as of the end of its current income year has received only $2,500,000 of the $3,000,000 billed during the current year, the amount of gross receipts to be included in the sales factor for the current year is $2,500,000.

(d) The sales factor, except as noted above in Subsections (5)(b) and (c), is computed in the same manner for all long-term contract methods of accounting and is computed for each income year--even though under the completed-contract method of accounting, business income is computed separately.

(6) The completed-contract method of accounting provides that the reporting of income (or loss) is deferred until the year the construction project is completed. In order to determine the amount of income which is attributable to sources within this state, a separate computation is made for each contract completed during the income year, regardless of whether the project is located within or without this state. The amount of income from each contract completed during the income year apportioned to this state is added to other business income apportioned to this state by the regular three-factor formula, and that total together with all nonbusiness income allocated to this state becomes the measure of tax for the income year. The amount of income (or loss) from each contract which is derived from sources within this state using the completed-contract method of accounting is computed as follows.

(a) In the income year the contract is completed, the income (or loss) therefrom is determined.

(b) The income (or loss) determined at Subsection (6)(a) is apportioned to this state by the following method:

(i) a fraction is determined for each year the contract was in progress (the numerator of which is the amount of construction costs paid or accrued each year the contract was in progress, and the denominator of which is the total of all construction costs for the project);

(ii) each fraction determined in Subsection (6)(b)(i) is multiplied by the apportionment formula percentage for that particular year;

(iii) these factors are totaled; and

(iv) the total income is multiplied by this combined percentage, and the resulting income (or loss) is the amount of contract business income assigned to this state.

(c) A corporation using the completed-contract method of accounting is required to include income derived from sources within this state from contracts within or without this state or income from incomplete contracts in progress outside this state in the year of withdrawal, dissolution, or cessation of business pursuant to Subsection (6)(d).

(d) The amount of income (or loss) from each such contract apportioned to this state is determined as if the percentage-of-completion method of accounting were used for all such contracts on the date of withdrawal, dissolution, or cessation of business. The amount of business income (or loss) for each such contract is the amount by which the gross contract price from each such contract from the commencement thereof to the date of withdrawal, dissolution, or cessation of business exceeds all expenditures made during such period in connection with each such contract. Beginning and ending material and supplies inventories must be appropriately accounted for in reporting expenditures in connection with each contract.

R865-6F-18. Exemptions from Corporate Franchise and Income Tax Pursuant to Utah Code Ann. Sections 59-7-101 and 59-7-102.

A. The following definitions apply to the exemption for corporate franchise and income tax for a farmers' cooperative.

1. "Member" means a person who shares in the profits of a cooperative association and is entitled to participate in the management of the association.

2. "Producer" means a person who, as owner or tenant, bears the risk of production and receives income based on farm production rather than fixed compensation.

B. In order to claim an exemption from corporate franchise and income tax provided for by Section 59-7-102, a corporation must submit to the Tax Commission form TC-161, Utah Registration for Exemption from Corporate Franchise or Income Tax, along with any information that form requires, for the Tax Commission's determination that the corporation satisfies the requirements of Section 59-7-102.

C. A corporation shall notify the Tax Commission of any change that affects its tax exempt status under Section 59-7-102.

D. For purposes of the Section 59-7-102 exemption for a farmers' cooperative, an association, corporation, or other organization similar to an association, corporation, or other organization of farmers or fruit growers includes establishments primarily engaged in growing crops, raising animals, harvesting timber, and harvesting fish and other animals from a farm, ranch, or their natural habitat.

R865-6F-19. Taxation of Trucking Companies Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions:

(a) "Average value" of property means the amount determined by averaging the values of real and personal property at the beginning and end of the income tax year. The Tax Commission may require the averaging of monthly values during the income year or other averaging as necessary to reflect properly the average value of the trucking company's property.

(b) "Business and nonbusiness income" are as defined in R865-6F-8(1).

(c) "Mobile property" means all motor vehicles, including trailers, engaged directly in the movement of tangible personal property.

(d) "Mobile property mile" means the movement of a unit of mobile property a distance of one mile, whether loaded or unloaded.

(e) "Original cost" means the basis of the property for federal income tax purposes (prior to any federal income tax adjustments, except for subsequent capital additions, improvements thereto, or partial dispositions); or if the property has no such basis, or if the valuation of the property is unascertainable under the foregoing valuation standards, the property is included in the property factor at its fair market value as of the date of acquisition by the taxpayer.

(f) "Property used during the course of the income year" means property that is available for use in the taxpayer's trade or business during the income year.

(g) "Trucking company" means a corporation engaged in or transacting the business of transporting freight, merchandise,

or other property for hire.

(h) "Value of owned real and tangible personal property" means the original cost of owned real and tangible personal property.

(i) "Value of rented real and tangible personal property" means the product of eight times the net annual rental rate of rented real and tangible personal property.

(2) When a trucking company has income from sources both within and without this state, the amount of business income from sources within this state shall be determined pursuant to this rule. In those cases, the first step is to determine what portion of the trucking company's income constitutes business income and what portion constitutes nonbusiness income. Nonbusiness income is directly allocable to specific states and business income is apportioned among the states in which the business is conducted and pursuant to the property, payroll, and sales apportionment factors set forth in this rule. The sum of the items of nonbusiness income directly allocated to this state, plus the amount of business income apportioned to this state, constitutes the amount of the taxpayer's entire net income subject to tax in this state.

(3) The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as modified by this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9), and the sales factor in accordance with R865-6F-8(10).

(4) The denominator of the property factor shall be the average value of the total of the taxpayer's real and tangible personal property owned or rented and used within and without this state during the income year. The numerator of the property factor shall be the average value of the taxpayer's real and tangible personal property owned or rented and used, or available for use, within this state during the income year.

(a) In the determination of the numerator of the property factor, all property, except mobile property, shall be included in the numerator of the property factor.

(b) Mobile property located within and without this state during the income year shall be included in the numerator of the property factor in the ratio that the mobile property's miles within this state bear to the total miles of mobile property within and without this state.

(5) The denominator of the payroll factor is the compensation paid within and without this state by the taxpayer during the income year for the production of business income. The numerator of the payroll factor is the compensation paid within this state during the income year by the taxpayer for the production of business income.

(a) With respect to all personnel, except those performing services within and without this state, compensation shall be included in the numerator as provided in R865-6F-8(9).

(b) With respect to personnel performing services within and without this state, compensation shall be included in the numerator of the payroll factor in the ratio that their services performed within this state bear to their services performed within and without this state.

(6) In general, all revenue derived from transactions and activities in the regular course of the taxpayer's trade or business that produce business income shall be included in the denominator of the revenue factor. The numerator of the revenue factor is the total revenue of the taxpayer in this state during the income year.

(a) The total state revenue of the taxpayer, other than revenue from hauling freight, mail, and express, shall be attributable to this state in accordance with R865-6F-8(10).

(b) The total revenue of the taxpayer attributable to this state during the income year from hauling freight, mail, and express shall be:

(i) Intrastate: all receipts from any shipment that both originates and terminates within this state; and

(ii) Interstate: that portion of the receipts from movements or shipments passing through, into, or out of this state as determined by the ratio that the mobile property miles traveled by the movements or shipments within this state bear to the total mobile property miles traveled by the movements or shipments within and without this state.

(7) The taxpayer shall maintain the records necessary to identify mobile property and to enumerate by state the mobile property miles traveled by mobile property. These records are subject to review by the commission or its agents.

(8) This rule requires apportionment of income to this state if during the course of the income tax year, the trucking company:

(a) owned or rented any real or personal property in this state;

(b) made any pickups or deliveries within this state;

(c) traveled more than 25,000 mobile property miles within this state, provided that the total mobile property miles traveled within this state during the income tax year exceeded three percent of the total mobile property miles traveled in all states by the trucking company during the period; or

(d) made more than 12 trips into this state.

R865-6F-22. Treatment of Loss Carrybacks and Carryforwards Spanning a Change in Reporting Methods Pursuant to Utah Code Ann. Sections 59-7-402 and 59-7-403.

A. For purposes of this rule, "worldwide year" means a year in which a corporation filed a worldwide combined report as set forth in Sections 59-7-101(34) and 59-7-403.

B. For purposes of this rule, "water's edge year" means a year in which a corporation filed a combined report as set forth in Sections 59-7-101(33) and 59-7-402.

C. A corporation that receives permission from the Tax Commission to change its filing method to the water's edge method after having elected the worldwide method will be required to forfeit any unused loss carryovers that were generated in any worldwide year as a condition precedent to making that change. Any losses generated in a subsequent water's edge year may not be carried back against income earned in any year prior to the change to the water's edge method, but must be carried to a post-change water's edge year.

D. A corporation that elects the worldwide filing method subsequent to adoption of this rule will be required to forfeit any unused loss carryovers that were generated in any water's edge year. Any losses generated in a subsequent worldwide year may not be carried back against income earned in any year prior to the change to the worldwide election method, but must be carried to a post-change worldwide year.

R865-6F-24. Attribution of Sales of Tangible Property to the Sales Factor for Apportionment of Business Income Pursuant to Utah Code Ann. Section 59-7-317.

A. For purposes of 15 U.S.C. Section 381, the phrase "activities within such state by or on behalf of such person" means the activities of any member of a unitary business as that term is defined in Section 59-7-302.

B. If the activity in this state of any member of a unitary business exceeds the activity protected by 15 U.S.C. Section 381, sales of tangible property into this state, from an out-of-state location by any member of the unitary business shall be included in this state's sales factor numerator under Section 59-7-317.

C. If any member of a unitary business is taxable in another state under Section 59-7-305, sales of tangible property from a Utah location, into that state by any member of the unitary business shall not be thrown back to this state as ordinarily provided under Section 59-7-318.

D. This rule is effective for taxable years beginning after

December 31, 1992.

R865-6F-26. Historic Preservation Tax Credits Pursuant to Utah Code Ann. Section 59-7-609.

A. Definitions:

1. "Qualified rehabilitation expenditures" includes architectural, engineering, and permit fees.

2. "Qualified rehabilitation expenditures" does not include movable furnishings.

3. "Residential" as used in Section 59-7-609 applies only to the use of the building after the project is completed.

B. Taxpayers shall file an application for approval of all proposed rehabilitation work with the Division of State History prior to the completion of restoration or rehabilitation work on the project. The application shall be on a form provided by the Division of State History.

C. Rehabilitation work must receive a unique certification number from the State Historic Preservation Office in order to be eligible for the tax credit.

D. In order to receive final certification and be issued a unique certification number for the project, the following conditions must be satisfied:

1. The project approved under B. must be completed.

2. Upon completion of the project, taxpayers shall notify the State Historic Preservation Office and provide that office an opportunity to review, examine, and audit the project. In order to be certified, a project shall be completed in accordance with the approved plan and the Secretary of the Interior's Standards for Rehabilitation.

3. Taxpayers restoring buildings not already listed on the National Register of Historic Places shall submit a complete National Register Nomination Form. If the nomination meets National Register criteria, the State Historic Preservation Office shall approve the nomination.

4. Projects must be completed, and the $10,000 expenditure threshold required by Section 59-7-609 must be met, within 36 months of the approval received pursuant to B.

5. During the course of the project and for three years thereafter, all work done on the building shall comply with the Secretary of the Interior's Standards for Rehabilitation.

E. Proof of State Historic Preservation Office certification shall be made by:

1. receiving an authorization form from the State Historic Preservation Office containing the certification number;

2. attaching that authorization form to the tax return for the year in which the credit is claimed.

F. Credit amounts shall be applied against Utah corporate franchise tax due in the tax year in which the project receives final certification under D.

G. Credit amounts greater than the amount of Utah corporate franchise tax due in a tax year shall be carried forward to the extent provided by Section 59-7-609.

H. Carryforward historic preservation tax credits shall be applied against Utah franchise tax due before the application of any historic preservation credits earned in the current year and on a first-earned, first-used basis.

I. Original records supporting the credit claimed must be maintained for three years following the date the return was filed claiming the credit.

R865-6F-27. Order of Credits Applied Against Utah Corporate Franchise Tax Due Pursuant to Utah Code Ann. Sections 59-6-102, 59-13-202, and 59-13-301, and Title 59, Chapter 7, and Title 63M, Chapter 1.

Taxpayers shall deduct credits authorized by Section 59-6-102, Section 59-13-202, Section 59-13-301, Title 59, Chapter 7, and Title 63M, Chapter 1 against Utah corporate franchise tax due in the following order:

(1) nonrefundable credits;

(2) nonrefundable credits with a carryforward;

(3) refundable credits.

R865-6F-28. Enterprise Zone Corporate Franchise Tax Credits Pursuant to Utah Code Ann. Sections 63M-1-401 through 63M-1-416.

(1) Definitions:

(a) "Based" means exclusively stored or maintained at a facility owned by the taxpayer:

(i) that is designed, constructed, and used to store or maintain equipment:

(A) that is transported outside of the enterprise zone; and

(B) for which the credit is taken;

(ii) where the equipment is located when it is not being used at facilities outside the enterprise zone, as evidenced by invoices, equipment logs, photographs, or similar documentation; and

(iii) from where the use of the equipment is directed or managed.

(b) "Business engaged in retail trade" means a business that makes a retail sale as defined in Section 59-12-102.

(c) "Construction work" does not include facility maintenance or repair work.

(d) "Employee" means a person who qualifies as an employee under Internal Revenue Service Regulation 26 CFR 31.3401(c)(1).

(e) "Public utilities business" means a public utility under Section 54-2-1.

(f) "Qualifying investment" does not include an investment made by a member of a unitary group in plant, equipment, or other depreciable property of another member of that unitary group.

(g) "Taxpayer" means the person claiming the tax credits in section 63M-1-413.

(h) "Transfer" pursuant to Section 63M-1-411, means the relocation of assets and operations of a business, including personnel, plant, property, and equipment.

(i) "Unitary group" is as defined in Section 59-7-101.

(2) For purposes of the investment tax credit, an investment is a qualifying investment if the plant, equipment, or other depreciable property for which the credit is taken is:

(a)(i) located within the boundaries of the enterprise zone; and

(ii) used exclusively in business operations conducted within the enterprise zone; or

(b) in the case of equipment or other depreciable property, based in the enterprise zone.

(3) The following examples relate to the investment tax credit.

(a) A furniture manufacturer operates a manufacturing facility that is located in an enterprise zone. The manufacturer purchases two trucks that are used exclusively at the facility and used to pick up raw materials from suppliers, some or all of whom may be outside the enterprise zone, and to deliver finished product to final customers, some or all of whom may be outside the enterprise zone. The trucks qualify for the investment tax credit because they are used exclusively in a business operation, the furniture manufacturing facility, that is located within the enterprise zone, even if they are stored or maintained at a facility located outside of the enterprise zone.

(b) If the same manufacturer described in Subsection (3)(a) had two facilities, one located within the enterprise zone, and one located outside the enterprise zone, and used the same two trucks for the same purposes for both facilities. The trucks are not based at a facility in the enterprise zone. The trucks would not qualify for the investment tax credit because they are not used exclusively at the facility located within the enterprise zone, and are not based in the enterprise zone.

(c) A business consists of a mine office located in an

enterprise zone and a mine located outside the enterprise zone. Mining equipment is used exclusively at the mine and is not based in the enterprise zone. The business may claim the investment tax credit for plant, equipment, or other depreciable property located in the mine office, but not for plant, equipment, or other depreciable property used in the mine outside the enterprise zone.

(d) A business purchases equipment such as an oil rig, which is transported outside the enterprise zone to service facilities such as oil fields. If the use of the equipment is directed or managed from the enterprise zone and the equipment returns to a facility, within the enterprise zone, that is owned by the business for regular maintenance or storage, the equipment is based in the enterprise zone and therefore qualifies for the investment tax credit.

(e) The same business described in Subsection (3)(d) purchases equipment that is primarily stored or maintained at facilities that are located outside of the enterprise zone, but which may be occasionally stored or maintained in the enterprise zone. This equipment would not be based in the enterprise zone, and would not qualify for the investment tax credit, even if the business has other facilities in the enterprise zone.

(4) A business entity that conducts non-retail operations and is engaged in retail trade is primarily engaged in retail trade if the retail trade operations constitute more than 50% of the business entity's total operations.

(5) An employee whose duties include both non-construction work and construction work does not perform a construction job if the construction work performed by the employee constitutes a de minimis portion of the employee's total duties.

(6) Corporate franchise tax credits may not be used to offset or reduce the $100 minimum tax per corporation.

(7) Records and supporting documentation shall be maintained for three years after the date any returns are filed to support the credits taken. For example: If credits are originally taken in 1988 and unused portions are carried forward to 1992, records to support the original credits taken in 1988 must be maintained for three years after the date the 1992 return is filed.

(8) If an enterprise zone designation is revoked prior to the expiration of the period for which it was designated, only tax credits earned prior to the loss of that designation will be allowed.

R865-6F-29. Taxation of Railroads Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions.

(a) "Average value" of property means the amount determined by averaging the values of real and personal property at the beginning and ending of the income tax year. The commission may require the averaging of monthly values during the income year or other averaging as necessary to reflect properly the average value of the railroad's property.

(b) "Business and nonbusiness income" are as defined in R865-6F-8(1).

(c) "Car-mile" means a movement of a unit of car equipment a distance of one mile.

(d) "Locomotive" means a self-propelled unit of equipment designed solely for moving other equipment.

(e) "Locomotive-mile" means the movement of a locomotive a distance of one mile under its own power.

(f) "Net annual rental rate" means the annual rental rate paid by the taxpayer less any annual rental rate received by the taxpayer from subrentals.

(g) "Original cost" means the basis of the property for federal income tax purposes (prior to any federal income tax adjustments except for subsequent capital additions, improvements thereto or partial dispositions). If the original cost of property is unascertainable under the foregoing valuation standards, the property is included in the property factor at its fair market value as of the date of acquisition by the taxpayer.

(h) "Property used during the income year" means property that is available for use in the taxpayer's trade or business during the income year.

(i) "Rent" does not include the per diem and mileage charges paid by the taxpayer for the temporary use of railroad cars owned or operated by another railroad.

(j) "Value of owned real and tangible personal property" means the original cost of owned real and tangible personal property.

(k) "Value of rented real and tangible personal property" means the product of eight times the net annual rental rate of rented real and tangible personal property.

(2) When a railroad has income from sources both within and without this state, the amount of business income from sources within this state shall be determined pursuant to this rule. In those cases, the first step is to determine what portion of the railroad's income constitutes business income and what portion constitutes nonbusiness income. Nonbusiness income is directly allocable to specific states and business income is apportioned among the states in which the business is conducted and pursuant to the property, payroll, and sales apportionment factors set forth in this rule. The sum of the items of nonbusiness income directly allocated to this state, plus the amount of business income apportioned to this state, constitutes the amount of the taxpayer's entire net income subject to tax in this state.

(3) The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as modified by this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9),and the sales factor in accordance with R865-6F-8(10).

(4) The denominator of the property factor shall be the average value of the total of the taxpayer's real and tangible personal property owned or rented and used within and without this state during the income year. The numerator of the property factor shall be the average value of the taxpayer's real and tangible personal property owned or rented and used within this state during the income year.

(a) In determining the numerator of the property factor, all property except mobile or movable property such as passenger cars, freight cars, locomotives and freight containers located within and without this state during the income year shall be included in the numerator of the property factor.

(b) Mobile or movable property such as passenger cars, freight cars, locomotives and freight containers located within and without this state during the income year shall be included in the numerator of the property factor in the ratio that locomotive-miles and car-miles in the state bear to the total of locomotive-miles and car-miles both within and without this state.

(5) The denominator of the payroll factor is the total compensation paid within and without this state by the taxpayer during the income year for the production of business income. The numerator of the payroll factor is the amount of compensation paid within this state during the income year for the production of business income.

(a) With respect to all personnel except engine men and trainmen performing services on interstate trains, compensation shall be included in the numerator as provided in R865-6F-8(9).

(b) With respect to engine men and trainmen performing services on interstate trains, compensation shall be included in the numerator of the payroll factor in the ratio that their services performed in this state bear to their services performed within and without this state.

(c) Compensation for services performed in this state shall

be deemed to be the compensation reported or required to be reported by employees for determination of their income tax liability to this state.

(6) In general, all revenue derived from transactions and activities in the regular course of the taxpayer's trade or business within and without this state that produce business income, except per diem and mileage charges that are calculated by the taxpayer, shall be included in the denominator of the revenue factor. The numerator of the revenue factor is the total revenue of the taxpayer within this state during the income year.

(a) The total revenue of the taxpayer in this state during the income year, other than revenue from hauling freight, passengers, mail and express, shall be attributable to this state in accordance with R865-6F-8(10).

(b) The total revenue of the taxpayer attributable to this state during the income year for the numerator of the revenue factor from hauling freight, mail and express shall be attributable to this state as follows:

(i) Intrastate: all receipts from shipments that both originate and terminate within this state; and

(ii) Interstate: that portion of the receipts from each movement or shipment passing through, into, or out of this state is determined by the ratio that the miles traveled by the movement or shipment in this state bears to the total miles traveled by the movement or shipment from point of origin to destination.

(c) The total revenue of the taxpayer attributable to this state during the income year for the numerator of the revenue factor from hauling passengers shall be attributable to this state as follows:

(i) Intrastate: all receipts from the transportation of passengers, including mail and express handled in passenger service, that both originate and terminate within this state; and

(ii) Interstate: that portion of the receipts from the transportation of interstate passengers, including mail and express handled in passenger service, determined by the ratio that passenger miles in this state bear to the total of passenger miles within and without this state.

(7) The taxpayer shall maintain the records necessary to identify mobile property and to enumerate by state the mobile property miles traveled by mobile property. These records are subject to review by the commission or its agents.

R865-6F-30. Higher Education Savings Incentive Program Tax Deduction Pursuant to Utah Code Ann. Sections 53B-8a-112, 59-7-105, and 59-7-106.

(1) "Trust" means the Utah Educational Savings Plan Trust created pursuant to Section 53B-8a-103.

(2) The trustee of the trust shall file a form TC-675H, Statement of Account with the Utah Educational Savings Plan Trust, with the commission, for each trust account owner. The TC-675H shall contain the following information for the calendar year:

(a) the amount contributed to the trust by the account owner; and

(b) the amount disbursed to the account owner pursuant to Section 53B-8a-109.

(3) The trustee of the trust shall file form TC-675H with the commission on or before January 31 of the year following the calendar year on which the forms are based.

(4) The trustee of the trust shall provide each trust account owner with a copy of the form TC-675H on or before January 31 of the year following the calendar year on which the TC-675H is based.

(5) The trustee of the trust shall maintain original records supporting the amounts listed on the TC-675H for the current year filing and the three previous year filings.

R865-6F-31. Taxation of Publishing Companies Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions.

(a) "Outer-jurisdictional property" means certain types of tangible personal property, such as orbiting satellites, undersea transmission cables and the like, that are owned or rented by the taxpayer and used in the business of publishing, licensing, selling or otherwise distributing printed material, but that are not physically located in any particular state.

(b) "Print" or "printed material" means the physical embodiment or printed version of any thought or expression, including a play, story, article, column or other literary, commercial, educational, artistic or other written or printed work. The determination of whether an item is or consists of print or printed material shall be made without regard to its content. Printed material may take the form of a book, newspaper, magazine, periodical, trade journal, or any other form of printed matter and may be contained on any medium or property.

(c) "Purchaser" and "subscriber" mean the individual, residence, business or other outlet that is the ultimate or final recipient of the print or printed material. Neither term shall mean or include a wholesaler or other distributor of print or printed material.

(d) "Terrestrial facility" shall include any telephone line, cable, fiber optic, microwave, earth station, satellite dish, antennae, or other relay system or device that is used to receive, transmit, relay or carry any data, voice, image or other information that is transmitted from or by any outer-jurisdictional property to the ultimate recipient thereof.

(2) When a taxpayer in the business of publishing, selling, licensing or distributing books, newspapers, magazines, periodicals, trade journals, or other printed material has income from sources both within and without this state, the amount of business income from sources within this state shall be determined pursuant to this rule. In those cases, the first step is to determine what portion of the taxpayer's income constitutes business income and what portion constitutes nonbusiness income. Nonbusiness income is directly allocable to specific states and business income is apportioned among the states in which the business is conducted and pursuant to the property, payroll, and sales apportionment factors set forth in this rule. The sum of the items of nonbusiness income directly allocated to this state, plus the amount of business income apportioned to this state, constitutes the amount of the taxpayer's entire net income subject to tax in this state.

(3) The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as modified by this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9), and the sales factor in accordance with R865-6F-8(10).

(4) All real and tangible personal property, including outer-jurisdictional property, whether owned or rented, that is used in the business shall be included in the denominator of the property factor.

(5)(a) All real and tangible personal property owned or rented by the taxpayer and used within this state during the tax period shall be included in the numerator of the property factor.

(b) Outer-jurisdictional property owned or rented by the taxpayer and used in this state during the tax period shall be included in the numerator of the property factor in the ratio that the value of the property attributable to its use by the taxpayer in business activities within this state bears to the value of the property attributable to its use in the taxpayer's business activities within and without this state.

(i) The value of outer-jurisdictional property attributed to the numerator of the property factor of this state shall be determined by the ratio that the number of uplinks and downlinks, or half-circuits, used during the tax period to

transmit from this state and to receive in this state any data, voice, image or other information bears to the number of uplinks and downlinks or half-circuits used for transmissions within and without this state.

(ii) If information regarding uplink and downlink or half-circuit usage is not available or if measurement of activity is not applicable to the type of outer-jurisdictional property used by the taxpayer, the value of that property attributed to the numerator of the property factor of this state shall be determined by the ratio that the amount of time, in terms of hours and minutes of use, or other measurement of use of outer-jurisdictional property that was used during the tax period to transmit from this state and to receive within this state any data, voice, image or other information bears to the total amount of time or other measurement of use that was used for transmissions within and without this state.

(iii) Outer-jurisdictional property shall be considered to have been used by the taxpayer in its business activities within this state when that property, wherever located, has been employed by the taxpayer in any manner in the publishing, sale, licensing or other distribution of books, newspapers, magazines or other printed material, and any data, voice, image or other information is transmitted to or from this state either through an earth station or terrestrial facility located within this state.

(A) One example of the use of outer-jurisdictional property is when the taxpayer owns its own communications satellite or leases the use of uplinks, downlinks or circuits or time on a communications satellite for the purpose of sending messages to its newspaper printing facilities or employees. The states in which any printing facility that receives the satellite communications are located and the state from which the communications were sent would, under this rule, apportion the cost of the owned or rented satellite to their respective property factors based upon the ratio of the in-state use of the satellite to its usage within and without the state.

(B) Assume that ABC Newspaper Co. owns a total of $400,000,000 of property and, in addition, owns and operates a communication satellite for the purpose of sending news articles to its printing plant in this state, as well as for communicating with its printing plants and facilities or news bureaus, employees and agents located in other states and throughout the world. Also assume that the total value of its real and tangible personal property that was permanently located in this state for the entire income year was valued at $3,000,000. Assume also that the original cost of the satellite is $100,000,000 for the tax period and that of the 10,000 uplinks and downlinks or half-circuits of satellite transmissions used by the taxpayer during the tax period, 200 or 2% are attributable to its satellite communications received in and sent from this state. Assume further that the company's mobile property that was used partially within this state, consisting of 40 delivery trucks, was determined to have an original cost of $4,000,000 and was used in this state for 95 days. The total value of property attributed to this state is determined as follows:

TABLE

```
Value of property permanently in state =         $3,000,000

Value of mobile property:
95/365 or (.260274) x $4,000,000 =               $1,041,096

Value of leased satellite property used in-state:
(.02) x $100,000,000 =                           $2,000,000

Total value of property attributable to state = $6,041,096

Total property factor percentage:
$6,041,096/$500,000,000 =                          1.2082%
```

(6) The payroll factor shall be determined in accordance with Sections 59-7-315 and 59-7-316.

(7) The denominator of the sales factor shall include the total gross receipts derived by the taxpayer from transactions and activity in the regular course of its trade or business, except receipts that may be excluded under R865-6F-8(11)(c).

(8) The numerator of the sales factor shall include all gross receipts of the taxpayer from sources within this state, including the following:

(a) Gross receipts derived from the sale of tangible personal property, including printed materials, delivered or shipped to a purchaser or a subscriber in this state; and

(b) Except as provided in Subsection (8)(b)(ii), gross receipts derived from advertising and the sale, rental, or other use of the taxpayer's customer lists or any portion thereof shall be attributed to this state as determined by the taxpayer's circulation factor during the tax period. The circulation factor shall be determined for each publication of printed material containing advertising and shall be equal to the ratio that the taxpayer's in-state circulation to purchasers and subscribers of its printed material bears to its circulation to purchasers and subscribers within and without the state.

(i) The circulation factor for an individual publication shall be determined by reference to the rating statistics as reflected in such sources as Audit Bureau of Circulations or other comparable sources, provided that the source selected is consistently used from year to year for that purpose. If none of the foregoing sources are available, or, if available, not in form or content sufficient for these purposes, the circulation factor shall be determined from the taxpayer's books and records.

(ii) When specific items of advertisements can be shown, upon clear and convincing evidence, to have been distributed solely to a limited regional or local geographic area in which this state is located, the taxpayer may petition, or the commission may require, that a portion of those receipts be attributed to the sales factor numerator of this state on the basis of a regional or local geographic area circulation factor and not upon the basis of the circulation factor provided by Subsection (8)(b)(i). This attribution shall be based upon the ratio that the taxpayer's circulation to purchasers and subscribers located in this state of the printed material containing specific items of advertising bears to its total circulation of printed material to purchasers and subscribers located within the regional or local geographic area. This alternative attribution method shall be permitted only upon the condition that receipts are not double counted or otherwise included in the numerator of any other state.

(iii) If the purchaser or subscriber is the United States government or if the taxpayer is not taxable in a state, the gross receipts from all sources, including the receipts from the sale of printed material, from advertising, and from the sale, rental or other use of the taxpayer's customer lists, or any portion thereof that would have been attributed by the circulation factor to the numerator of the sales factor for that state, shall be included in the numerator of the sales factor of this state if the printed material or other property is shipped from an office, store, warehouse, factory, or other place of storage or business in this state.

R865-6F-32. Taxation of Financial Institutions Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions.

(a) "Billing address" means the location indicated in the books and records of the taxpayer on the first day of the taxable year, or on the later date in the taxable year when the customer relationship began, where any notice, statement or bill relating to a customer's account is mailed.

(b) "Borrower or credit card holder located in this state" means:

(i) a borrower, other than a credit card holder, that is engaged in a trade or business that maintains its commercial

domicile in this state; or

(ii) a borrower that is not engaged in a trade or business, or a credit card holder, whose billing address is in this state.

(c) "Commercial domicile" means:

(i) the place from which the trade or business is principally managed and directed; or

(ii) if a taxpayer is organized under the laws of a foreign country, or of the Commonwealth of Puerto Rico, or any territory or possession of the United States, that taxpayer's commercial domicile shall be deemed for the purposes of this rule to be the state of the United States or the District of Columbia from which that taxpayer's trade or business in the United States is principally managed and directed. It shall be presumed, subject to rebuttal, that the location from which the taxpayer's trade or business is principally managed and directed is the state of the United States or the District of Columbia to which the greatest number of employees are regularly connected or out of which they are working, irrespective of where the services of those employees are performed, as of the last day of the taxable year.

(d) "Compensation" means wages, salaries, commissions, and any other form of remuneration paid to employees for personal services that are included in the employee's gross income under the federal Internal Revenue Code. In the case of employees not subject to the federal Internal Revenue Code, the determination of whether payments constitute gross income under the federal Internal Revenue Code shall be made as though those employees were subject to the federal Internal Revenue Code.

(e) "Credit card" means a credit, travel, or entertainment card.

(f) "Credit card issuer's reimbursement fee" means the fee a taxpayer receives from a merchant's bank because one of the persons to whom the taxpayer has issued a credit card has charged merchandise or services to the credit card.

(g) "Employee" means, with respect to a particular taxpayer, any individual who, under the usual common law rules applicable in determining the employer-employee relationship, has the status of an employee of that taxpayer.

(h) "Financial institution" means:

(i) any corporation or other business entity registered under state law as a bank holding company or registered under the Federal Bank Holding Company Act of 1956, as amended, or registered as a savings and loan holding company under the Federal National Housing Act, as amended;

(ii) a national bank organized and existing as a national bank association pursuant to the provisions of the National Bank Act, 12 U.S.C. Sections 21 et seq.;

(iii) a savings association or federal savings bank as defined in the Federal Deposit Insurance Act, 12 U.S.C. Section 1813(b)(1);

(iv) any bank, industrial loan corporation, or thrift institution incorporated or organized under the laws of any state;

(v) any corporation organized under the provisions of 12 U.S.C. Sections611 through 631.

(vi) any agency or branch of a foreign depository as defined in 12 U.S.C. Section 3101;

(vii) a production credit association organized under the Federal Farm Credit Act of 1933, all of whose stock held by the Federal Production Credit Corporation has been retired;

(viii) any corporation whose voting stock is more than 50 percent owned, directly or indirectly, by any person or business entity described in Subsections (1)(h)(i) through (vii), other than an insurance company taxable under Title 59, Chapter 9, Taxation of Admitted Insurers;

(ix) a corporation or other business entity that derives more than 50 percent of its total gross income for financial accounting purposes from finance leases. For purposes of this subsection, a "finance lease" shall mean any lease transaction that is the functional equivalent of an extension of credit and that transfers substantially all of the benefits and risks incident to the ownership of property. The phrase shall include any direct financing lease or leverage lease that meets the criteria of Financial Accounting Standards Board Statement No. 13, Accounting for Leases, or any other lease that is accounted for as a financing lease by a lessor under generally accepted accounting principles. For this classification to apply:

(A) the average of the gross income in the current tax year and immediately preceding two tax years must satisfy the more than 50 percent requirement; and

(B) gross income from incidental or occasional transactions shall be disregarded;

(x) any other person or business entity, other than an insurance company, a credit union exempt from the corporation franchise tax under Section 59-7-102, a real estate broker, or a securities dealer, that derives more than 50 percent of its gross income from activities that a person described in Subsections (1)(h)(ii) through(vii) and (1)(h)(ix) is authorized to transact.

(A) For purposes of this subsection, the computation of gross income shall not include income from non-recurring, extraordinary items; and

(B) The commission is authorized to exclude any person from the application of Subsection (1)(h)(x) upon receipt of proof, by clear and convincing evidence, that the income-producing activity of that person is not in substantial competition with those persons described in Subsections (1)(h)(ii) through (vii) and (1)(h)(ix).

(i) "Gross rents" means the actual sum of money or other consideration payable for the use or possession of property.

(i) Gross rents includes:

(A) any amount payable for the use or possession of real property or tangible property whether designated as a fixed sum of money or as a percentage of receipts, profits or otherwise;

(B) any amount payable as additional rent or in lieu of rent, such as interest, taxes, insurance, repairs or any other amount required to be paid by the terms of a lease or other arrangement; and

(C) a proportionate part of the cost of any improvement to real property, made by or on behalf of the taxpayer, that reverts to the owner or lessor upon termination of a lease or other arrangement. The amount included in gross rents is the amount of amortization or depreciation allowed in computing the taxable income base for the taxable year. However, where a building is erected on leased land by or on behalf of the taxpayer, the value of the land is determined by multiplying the gross rent by eight and the value of the building is determined in the same manner as if owned by the taxpayer.

(ii) Gross rents does not include:

(A) reasonable amounts payable as separate charges for water and electric service furnished by the lessor;

(B) reasonable amounts payable as service charges for janitorial services furnished by the lessor;

(C) reasonable amounts payable for storage, provided those amounts are payable for space not designated and not under the control of the taxpayer; and

(D) that portion of any rental payment applicable to the space subleased from the taxpayer and not used by the taxpayer.

(j) "Loan" means any extension of credit resulting from direct negotiations between the taxpayer and the taxpayer's customer, or the purchase, in whole or in part, of an extension of credit from another.

(i) Loan includes participations, syndications, and leases treated as loans for federal income tax purposes.

(ii) Loan does not include properties treated as loans under Section 595 of the federal Internal Revenue Code, futures or forward contracts, options, notional principal contracts such as swaps, credit card receivables, including purchased credit card relationships, non-interest bearing balances due from depository

institutions, cash items in the process of collection, federal funds sold, securities purchased under agreements to resell, assets held in a trading account, securities, interests in a real estate mortgage investment conduit as defined in Section 860D of the Internal Revenue Code, or other mortgage-backed or asset-backed security, and other similar items.

(k) "Loans secured by real property" means that fifty percent or more of the aggregate value of the collateral used to secure a loan or other obligation, when valued at fair market value as of the time the original loan or obligation was incurred, was real property.

(l) "Merchant discount" means the fee, or negotiated discount, charged to a merchant by the taxpayer for the privilege of participating in a program whereby a credit card is accepted in payment for merchandise or services sold to the card holder.

(m) "Participation" means an extension of credit in which an undivided ownership interest is held on a pro rata basis in a single loan or pool of loans and related collateral. In a loan participation, the credit originator initially makes the loan and then subsequently resells all or a portion of it to other lenders. The participation may or may not be known to the borrower.

(n) "Person" means an individual, estate, trust, partnership, corporation, and any other business entity.

(o) "Principal base of operations" means:

(i) with respect to transportation property, the place of more or less permanent nature from which that property is regularly directed or controlled; and

(ii) with respect to an employee, the place of more or less permanent nature from which the employee regularly:

(A) starts his work and to which he customarily returns in order to receive instructions from his employer;

(B) communicates with his customers or other persons; or

(C) performs any other functions necessary to the exercise of his trade or profession at some other point or points.

(p)(i) "Real property owned" and "tangible personal property owned" mean real and tangible personal property, respectively:

(A) on which the taxpayer may claim depreciation for federal income tax purposes; or

(B) property to which the taxpayer holds legal title and on which no other person may claim depreciation for federal income tax purposes, or could claim depreciation if subject to federal income tax.

(ii) Real and tangible personal property do not include coin, currency, or property acquired in lieu of or pursuant to a foreclosure.

(q) "Regular place of business" means an office at which the taxpayer carries on business in a regular and systematic manner and is continuously maintained, occupied, and used by employees of the taxpayer.

(r) "State" means a state of the United States, the District of Columbia, the Commonwealth of Puerto Rico, any territory or possession of the United States, or any foreign country.

(s) "Syndication" means an extension of credit in which two or more persons fund and each person is at risk only up to a specified percentage of the total extension of credit or up to a specified dollar amount.

(t) "Taxable" means:

(i) a taxpayer is subject in another state to a net income tax, a franchise tax measured by net income, a franchise tax for the privilege of doing business, a corporate stock tax, including a bank shares tax, a single business tax, an earned surplus tax, or any tax imposed upon or measured by net income; or

(ii) another state has jurisdiction to subject the taxpayer to taxes regardless of whether that state actually imposes those taxes.

(u) "Transportation property" means vehicles and vessels capable of moving under their own power, such as aircraft, trains, water vessels and motor vehicles, as well as any equipment or containers attached to that property, such as rolling stock, barges, and trailers.

(2) Apportionment and Allocation.

(a) A financial institution whose business activity is taxable both within and without this state, or a financial institution whose business activity is taxable within this state and is a member of a unitary group that includes one or more financial institutions where any member of the group is taxable without this state, shall allocate and apportion its net income as provided in this rule. All items of nonbusiness income shall be allocated pursuant to the provisions of Section 59-7-306. A financial institution organized under the laws of a foreign country, the Commonwealth of Puerto Rico, or a territory or possession of the United States, whose effectively connected income, as defined under the federal Internal Revenue Code, is taxable both within this state and within another state, other than the state in which it is organized, shall allocate and apportion its net income as provided in this rule.

(b) The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as modified by this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9), and the sales factor in accordance with R865-6F-8(10).

(c) Each factor shall be computed according to the cash or accrual method of accounting as used by the taxpayer for the taxable year.

(d) If a unitary group of corporations filing a combined report includes one or more corporations meeting the definition of financial institution and one or more corporations that do not meet that definition, the provisions of this rule regarding the calculation of the property, payroll, and receipts factors of the apportionment fraction shall apply only to those corporations meeting the definition of financial institution. Those corporations not meeting the definition of financial institution shall compute their apportionment data based on rule R865-6F-8 or such other industry apportionment rule adopted by the commission that may be applicable. The apportionment data of all members of the unitary group shall be included in calculating a single apportionment fraction for the unitary group. The numerators and denominators of the property, payroll, and receipts factors of the financial institutions shall be added to the numerators and denominators, respectively, of the property, payroll, and sales factors of the nonfinancial institutions to determine the property, payroll, and sales factors of the unitary group.

(3) Receipts Factor.

(a) In general. The receipts factor is a fraction, the numerator of which is the receipts of the taxpayer in this state during the taxable year and the denominator of which is the receipts of the taxpayer within and without this state during the taxable year. The method of calculating receipts for purposes of the denominator is the same as the method used in determining receipts for purposes of the numerator. The receipts factor shall include only those receipts that constitute business income and are included in the computation of the apportionable income base for the taxable year.

(b) Receipts from the lease of real property. The numerator of the receipts factor includes receipts from the lease or rental of real property owned by the taxpayer and receipts from the sublease of real property, if the property is located within this state.

(c) Receipts from the lease of tangible personal property.

(i) Except as described in Subsection (3)(d), the numerator of the receipts factor includes receipts from the lease or rental of tangible personal property owned by the taxpayer if the property is located within this state when it is first placed in service by the lessee.

(ii) Receipts from the lease or rental of transportation

property owned by the taxpayer are included in the numerator of the receipts factor to the extent that the property is used in this state.

(A) The extent an aircraft will be deemed to be used in this state and the amount of receipts that shall be included in the numerator of this state's receipts factor are determined by multiplying all the receipts from the lease or rental of the aircraft by a fraction, the numerator of which is the number of landings of the aircraft in this state and the denominator of which is the total number of landings of the aircraft.

(B) If the extent of the use of any transportation property within this state cannot be determined, that property will be deemed to be used wholly in the state in which the property has its principal base of operations.

(C) A motor vehicle will be deemed to be used wholly in the state in which it is registered.

(d) Interest from loans secured by real property.

(i) The numerator of the receipts factor includes interest and fees or penalties in the nature of interest from loans secured by real property if the property is located within this state. If the property is located both within this state and one or more other states, the receipts described in this subsection are included in the numerator of the receipts factor if more than fifty percent of the fair market value of the real property is located within this state. If more than fifty percent of the fair market value of the real property is not located within any one state, the receipts described in this subsection shall be included in the numerator of the receipts factor if the borrower is located in this state.

(ii) The determination of whether the real property securing a loan is located within this state shall be made as of the time the original agreement was made, and any and all subsequent substitutions of collateral shall be disregarded.

(e) Interest from loans not secured by real property. The numerator of the receipts factor includes interest and fees or penalties in the nature of interest from loans not secured by real property if the borrower is located in this state.

(f) Net gains from the sale of loans. The numerator of the receipts factor includes net gains from the sale of loans. Net gains from the sale of loans includes income recorded under the coupon stripping rules of Section 1286 of the Internal Revenue Code.

(i) The amount of net gains, but not less than zero, from the sale of loans secured by real property included in the numerator is determined by multiplying the net gains by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to Subsection (3)(d), and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans secured by real property.

(ii) The amount of net gains, but not less than zero, from the sale of loans not secured by real property included in the numerator is determined by multiplying the net gains by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to Subsection (3)(e), and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans not secured by real property.

(g) Receipts from credit card receivables. The numerator of the receipts factor includes interest and fees or penalties in the nature of interest from credit card receivables and receipts from fees charged to card holders, such as annual fees, if the billing address of the card holder is in this state.

(h) Net gains from the sale of credit card receivables. The numerator of the receipts factor includes net gains, but not less than zero, from the sale of credit card receivables multiplied by a fraction, the numerator of which is the amount included in the numerator of the receipts factor pursuant to Subsection (3)(g), and the denominator of which is the taxpayer's total amount of interest and fees or penalties in the nature of interest from credit card receivables and fees charged to card holders.

(i) Credit card issuer's reimbursement fees. The numerator of the receipts factor includes all credit card issuer's reimbursement fees multiplied by a fraction, the numerator of which is the amount included in the numerator of the receipts factor pursuant to Subsection (3)(g), and the denominator of which is the taxpayer's total amount of interest and fees or penalties in the nature of interest from credit card receivables and fees charged to card holders.

(j) Receipts from merchant discount. The numerator of the receipts factor includes receipts from merchant discount if the commercial domicile of the merchant is in this state. The receipts shall be computed net of any cardholder charge backs, but shall not be reduced by any interchange transaction fees or by any issuer's reimbursement fees paid to another for charges made by its card holders.

(k) Loan servicing fees.

(i) The numerator of the receipts factor includes loan servicing fees derived from loans secured by real property multiplied by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to Subsection (3)(d), and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans secured by real property.

(ii) The numerator of the receipts factor includes loan servicing fees derived from loans not secured by real property multiplied by a fraction the numerator of which is the amount included in the numerator of the receipts factor pursuant to Subsection (3)(e), and the denominator of which is the total amount of interest and fees or penalties in the nature of interest from loans not secured by real property.

(iii) In circumstances in which the taxpayer receives loan servicing fees for servicing either the secured or the unsecured loans of another, the numerator of the receipts factor shall include those fees if the borrower is located in this state.

(l) Receipts from services. The numerator of the receipts factor includes receipts from services not otherwise apportioned under this section if the purchaser of the services receives a greater benefit of the service in this state than in any other state.

(m) Receipts from investment assets and activities and trading assets and activities.

(i) Interest, dividends, net gains, but not less than zero, and other income from investment assets and activities and from trading assets and activities shall be included in the receipts factor.

(ii) Investment assets and activities and trading assets and activities include investments securities, trading account assets, federal funds, securities purchased and sold under agreements to resell or repurchase, options, futures contracts, forward contracts, notional principal contracts such as swaps, equities, and foreign currency transactions.

(iii) The receipts factor shall include the following investment and trading assets and activities:

(A) The receipts factor shall include the amount by which interest from federal funds sold and securities purchased under resale agreements exceeds interest expense on federal funds purchased and securities sold under repurchase agreements.

(B) The receipts factor shall include the amount by which interest, dividends, gains and other income from trading assets and activities, including assets and activities in the matched book and arbitrage book, and foreign currency transactions, exceed amounts paid in lieu of interest, amounts paid in lieu of dividends, and losses from those assets and activities.

(iv) The numerator of the receipts factor includes interest, dividends, net gains, but not less than zero, and other income from investment assets and activities and from trading assets and activities described in Subsection (3)(m) that are attributable to this state.

(A) The amount of interest, dividends, net gains, but not

less than zero, and other income from investment assets and activities in the investment accounts attributed to this state and included in the numerator is determined by multiplying all such income from assets and activities by a fraction, the numerator of which is the average value of the assets properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the average value of all those assets.

(B) The amount of interest from federal funds sold and purchased and from securities purchased under resale agreements and securities sold under repurchase agreements attributable to this state and included in the numerator is determined by multiplying the amount of those funds and securities described in Subsection (3)(m)(iii)(A) by a fraction, the numerator of which is the average value of federal funds sold and securities purchased under agreements to resell that are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the average value of all those funds and securities.

(C) The amount of interest, dividends, gains, and other income from trading assets and activities, including assets and activities in the matched book and arbitrage book and foreign currency transactions, but excluding amounts described in Subsections (3)(m)(iv)(A) and (3)(m)(iv)(B), attributable to this state and included in the numerator is determined by multiplying the amount described in Subsection (3)(m)(iii)(B) by a fraction, the numerator of which is the average value of those trading assets that are properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the average value of all those assets.

(D) For purposes of this subsection, average value shall be determined using the rules for determining the average value of tangible personal property set forth in Subsections (4)(c) and (d).

(v) In lieu of using the method set forth in Subsection (3)(m)(iv), the taxpayer may elect, or the commission may require in order to fairly represent the business activity of the taxpayer in this state, the use of the method set forth in this subsection.

(A) The amount of interest, dividends, net gains, but not less than zero, and other income from investment assets and activities in the investment account attributed to this state and included in the numerator is determined by multiplying all income from those assets and activities by a fraction, the numerator of which is the gross income from those assets and activities properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the gross income from all those assets and activities.

(B) The amount of interest from federal funds sold and purchased and from securities purchased under resale agreements and securities sold under repurchase agreements attributable to this state and included in the numerator is determined by multiplying the amount of those funds and securities described in Subsection (3)(m)(iii)(A) by a fraction, the numerator of which is the gross income from those funds and securities properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the gross income from all those funds and securities.

(C) The amount of interest, dividends, gains and other income from trading assets and activities, including assets and activities in the matched book and arbitrage book and foreign currency transactions, but excluding amounts described in Subsections (3)(m)(v)(A) or (B), attributable to this state and included in the numerator is determined by multiplying the amount described in Subsection (3)(m)(iii)(B) by a fraction, the numerator of which is the gross income from those trading assets and activities properly assigned to a regular place of business of the taxpayer within this state and the denominator of which is the gross income from all those assets and activities.

(vi) If the taxpayer elects or is required by the commission to use the method set forth in Subsection (3)(m)(v), the taxpayer shall use this method on all subsequent returns unless the taxpayer receives prior permission from the commission to use, or the commission requires, a different method.

(vii) The taxpayer shall have the burden of proving that an investment asset or activity or trading asset or activity was properly assigned to a regular place of business outside of this state by demonstrating that the day-to-day decisions regarding the asset or activity occurred at a regular place of business outside this state. Where the day-to-day decisions regarding an investment asset or activity or trading asset or activity occur at more than one regular place of business and one regular place of business is in this state and one regular place of business is outside this state, that asset or activity shall be considered to be located at the regular place of business of the taxpayer where the investment or trading policies or guidelines with respect to the asset or activity are established. Unless the taxpayer demonstrates to the contrary, policies and guidelines shall be presumed to be established at the commercial domicile of the taxpayer.

(n) All other receipts. The numerator of the receipts factor includes all other receipts pursuant to the rules set forth in Rule R865-6F-8(10) and (11).

(o) Attribution of certain receipts to commercial domicile.

(i) Except as provided in Subsection (3)(o)(ii), all receipts that would be assigned under this section to a state in which the taxpayer is not taxable shall be included in the numerator of the receipts factor if the taxpayer's commercial domicile is in this state.

(ii)(A) If a unitary group includes one or more financial institutions, and if any member of the unitary group is subject to the taxing jurisdiction of this state, the receipts of each financial institution in the unitary group shall be included in the numerator of this state's receipts factor as provided in Subsections (3)(a) through (n) rather than being attributed to the commercial domicile of the financial institution as provided in Subsection (3)(o)(i).

(B) If a unitary group includes one or more financial institutions whose commercial domicile is in this state, and if any member of the unitary group is taxable in another state under section 59-7-305, the receipts of each financial institution in the unitary group that would be included in the numerator of the other state's receipts factor under Subsections (3)(a) through (n) may not be included in the numerator of this state's receipts factor.

(4) Property Factor.

(a) In General.

(i) For taxpayers that do not elect to include the property described in Subsections (4)(g) through (i) within the property factor, the property factor is a fraction, the numerator of which is the average value of real property and tangible personal property owned by or rented to the taxpayer that is located or used within this state during the taxable year, and the denominator of which is the average value of all that property located or used within and without this state during the taxable year.

(ii) For taxpayers that elect to include the property described in Subsections (4)(g) through (i) within the property factor, the property factor is a fraction, the numerator of which is the average value of real property and tangible personal property owned by or rented to the taxpayer that is located or used within this state during the taxable year, and the average value of the taxpayer's loans and credit card receivables that are located within this state during the taxable year, and the denominator of which is the average value of all that property located or used within and without this state during the taxable year.

(b) Property included. The property factor shall include only property the income or expenses of which are included, or

would have been included if not fully depreciated or expensed, or depreciated or expensed to a nominal amount, in the computation of the apportionable income base for the taxable year.

(c) Value of property owned by the taxpayer.

(i) For taxpayers that do not elect to include the property described in Subsections (4)(g) through (i) within the property factor, the value of real property and tangible personal property owned by the taxpayer is the original cost or other basis of that property for federal income tax purposes without regard to depletion, depreciation or amortization.

(ii) For taxpayers that elect to include the property described in Subsections (4)(g) through (i) within the property factor:

(A) The value of real property and tangible personal property owned by the taxpayer is the original cost or other basis of that property for federal income tax purposes without regard to depletion, depreciation or amortization.

(B) Loans are valued at their outstanding principal balance, without regard to any reserve for bad debts. If a loan is charged-off in whole or in part for federal income tax purposes, the portion of the loan charged off is not outstanding. A specifically allocated reserve established pursuant to regulatory or financial accounting guidelines that is treated as charged-off for federal income tax purposes shall be treated as charged-off for purposes of this rule.

(C) Credit card receivables are valued at their outstanding principal balance, without regard to any reserve for bad debts. If a credit card receivable is charged-off in whole or in part for federal income tax purposes, the portion of the receivable charged-off is not outstanding.

(d) Average value of property owned by the taxpayer. The average value of property owned by the taxpayer is computed on an annual basis by adding the value of the property on the first day of the taxable year and the value on the last day of the taxable year and dividing the sum by two.

(i) If averaging on this basis does not properly reflect average value, the commission may require averaging on a more frequent basis, or the taxpayer may elect to average on a more frequent basis.

(ii) When averaging on a more frequent basis is required by the commission or is elected by the taxpayer, the same method of valuation must be used consistently by the taxpayer with respect to property within and without this state and on all subsequent returns unless the taxpayer receives prior permission from the commission to use a different method, or the commission requires a different method of determining average value.

(e) Average value of real property and tangible personal property rented to the taxpayer.

(i) The average value of real property and tangible personal property that the taxpayer has rented from another and are not treated as property owned by the taxpayer for federal income tax purposes, shall be determined annually by multiplying the gross rents payable during the taxable year by eight.

(ii) If the use of the general method described in this subsection results in inaccurate valuations of rented property, any other method that properly reflects the value may be adopted by the commission or by the taxpayer when approved in writing by the commission. Once approved, that other method of valuation must be used on all subsequent returns unless the taxpayer receives prior approval from the commission to use a different method, or the commission requires a different method of valuation.

(f) Location of real property and tangible personal property owned or rented to the taxpayer.

(i) Except as described in Subsection (4)(f)(ii), real property and tangible personal property owned by or rented to the taxpayer are considered located within this state if they are physically located, situated, or used within this state.

(ii) Transportation property is included in the numerator of the property factor to the extent that the property is used in this state.

(A) The extent an aircraft will be deemed to be used in this state and the amount of value that shall be included in the numerator of this state's property factor is determined by multiplying the average value of the aircraft by a fraction, the numerator of which is the number of landings of the aircraft in this state and the denominator of which is the total number of landings of the aircraft everywhere.

(B) If the extent of the use of any transportation property within this state cannot be determined, the property will be deemed to be used wholly in the state in which the property has its principal base of operations.

(C) A motor vehicle will be deemed to be used wholly in the state in which it is registered.

(g) Location of Loans.

(i) A loan is considered located within this state if it is properly assigned to a regular place of business of the taxpayer within this state.

(ii) A loan is properly assigned to the regular place of business with which it has a preponderance of substantive contacts. A loan assigned by the taxpayer to a regular place of business without the state shall be presumed to have been properly assigned if:

(A) the taxpayer has assigned, in the regular course of its business, the loan on its records to a regular place of business consistent with federal or state regulatory requirements;

(B) the assignment on its records is based upon substantive contacts of the loan to the regular course of business; and

(C) the taxpayer uses the records reflecting assignment of loans for the filing of all state and local tax returns for which an assignment of loans to a regular place of business is required.

(iii) The presumption of proper assignment of a loan provided in Subsection (4)(g)(ii) may be rebutted upon a showing by the commission, supported by a preponderance of the evidence, that the preponderance of substantive contacts regarding the loan did not occur at the regular place of business to which it was assigned on the taxpayer's records. When the presumption has been rebutted, the loan shall then be located within this state if:

(A) the taxpayer had a regular place of business within this state at the time the loan was made; and

(B) the taxpayer fails to show, by a preponderance of the evidence, that the preponderance of substantive contacts regarding the loan did not occur within this state.

(iv) In the case of a loan assigned by the taxpayer to a place without this state that is not a regular place of business, it shall be presumed, subject to rebuttal by the taxpayer on a showing supported by the preponderance of the evidence, that the preponderance of substantive contacts regarding the loan occurred within this state if, at the time the loan was made the taxpayer's commercial domicile, as defined in this rule, was within this state.

(v) To determine the state in which the preponderance of substantive contacts relating to a loan have occurred, the facts and circumstances regarding the loan at issue shall be reviewed on a case-by-case basis, and consideration shall be given to activities such as the solicitation, investigation, negotiation, approval, and administration of the loan.

(A) Solicitation. Solicitation is either active or passive.

(I) Active solicitation occurs when an employee of the taxpayer initiates the contact with the customer. The activity is located at the regular place of business at which the taxpayer's employee is regularly connected or working out of, regardless of where the services of the employee were actually performed.

(II) Passive solicitation occurs when the customer initiates the contact with the taxpayer. If the customer's initial contact was not at a regular place of business of the taxpayer, the regular place of business, if any, where the passive solicitation occurred is determined by the facts in each case.

(B) Investigation. Investigation is the procedure whereby employees of the taxpayer determine the credit-worthiness of the customer as well as the degree of risk involved in making a particular agreement. The activity is located at the regular place of business at which the taxpayer's employees are regularly connected or working out of, regardless of where the services of those employees were actually performed.

(C) Negotiation. Negotiation is the procedure whereby employees of the taxpayer and its customer determine the terms of the agreement, such as amount, duration, interest rate, frequency of repayment, currency denomination, and security required. The activity is located at the regular place of business at which the taxpayer's employees are regularly connected or working out of, regardless of where the services of those employees were actually performed.

(D) Approval. Approval is the procedure whereby employees or the board of directors of the taxpayer make the final determination whether to enter into the agreement.

(I) The activity is located at the regular place of business at which the taxpayer's employees are regularly connected or working out of, regardless of where the services of those employees were actually performed.

(II) If the board of directors makes the final determination, the activity is located at the commercial domicile of the taxpayer.

(E) Administration. Administration is the process of managing the account.

(I) Administration includes bookkeeping, collecting the payments, corresponding with the customer, reporting to management regarding the status of the agreement and proceeding against the borrower or the security interest if the borrower is in default.

(II) The activity is located at the regular place of business that oversees this activity.

(h) Location of credit card receivables. For purposes of determining the location of credit card receivables, credit card receivables shall be treated as loans and shall be subject to the provisions of Subsection (4)(g).

(i) Period for which properly assigned loan remains assigned. A loan that has been properly assigned to a state shall, absent any change of material fact, remain assigned to that state for the length of the original term of the loan. Thereafter, the loan may be properly assigned to another state if the loan has a preponderance of substantive contact to a regular place of business in that state.

(j) Each taxpayer shall make an initial election on whether to include the property described in Subsections (4)(g) through (i) within the property factor. The initial election is the election made or the filing position taken on the first return filed after the effective date of this rule. This election is irrevocable for a period of three years from the time the initial election is made, except in the case where a substantial ownership change occurs and commission approval is obtained to change the election. After the initial three-year period, the election may be revocable only with the prior approval of the commission and shall require the showing of a significant change in circumstance.

(5) Payroll factor.

(a) In general. The payroll factor is a fraction, the numerator of which is the total amount paid in this state during the taxable year by the taxpayer for compensation and the denominator of which is the total compensation paid by the taxpayer both within and without this state during the taxable year. The payroll factor shall include only that compensation included in the computation of the apportionable income tax base for the taxable year.

(b) Compensation relating to nonbusiness income and independent contractors. The compensation of any employee for services or activities connected with the production of nonbusiness income, and payments made to any independent contractor or any other person not properly classifiable as an employee, shall be excluded from both the numerator and denominator of this factor.

(c) When compensation paid in this state. Compensation is paid in this state if any one of the following tests, applied consecutively, is met:

(i) The employee's services are performed entirely within this state.

(ii) The employee's services are performed both within and without the state, but the service performed without the state is incidental to the employee's service within the state. The term "incidental"means any service that is temporary or transitory in nature, or that is rendered in connection with an isolated transaction.

(iii) If the employee's services are performed both within and without this state, the employee's compensation will be attributed to this state:

(A) if the employee's principal base of operations is within this state;

(B) if there is no principal base of operations in any state in which some part of the services are performed, but the place from which the services are directed or controlled is in this state; or

(C) if the principal base of operations and the place from which the services are directed or controlled are not in any state in which some part of the service is performed but the employee's residence is in this state.

(6) This rule is effective for taxable years beginning after December 31, 1997.

R865-6F-33. Taxation of Telecommunications Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions.

(a) "Call" means a specific telecommunications transmission as described in Subsection (1)(f).

(b) "Channel termination point" means the point at which information can enter or leave the telecommunications network.

(c) "Communications channel" means a communications path, which can be one-way or two-way, depending on the channel, between two or more points. The path may be designed for the transmission of signals representing human speech, digital or analog data, facsimile, or images.

(d) "Outerjurisdictional property" means tangible personal property, such as orbiting satellites, undersea transmission cables and the like, that are owned or rented by the taxpayer and used in a telecommunications business, but that are not physically located in any particular state.

(e) "Private telecommunications service" means a dedicated telephone service that entitles the subscriber to the exclusive or priority use of a communications channel or groups of communications channels from one or more channel termination points to another channel termination point.

(f) "Telecommunications" means the electronic transmission of voice, data, image, and other information through the use of any medium such as wires, cables, electromagnetic waves, light waves, or any combination of those or similar media now in existence or that might be devised, but telecommunications does not include the information content of any such transmission.

(g) "Telecommunications service" means providing telecommunications, including services provided by telecommunication service resellers, for a charge and includes telephone service, telegraph service, paging service, personal communication services and mobile or cellular telephone

service, but does not include electronic information service or Internet access service.

(2) Apportionment and Allocation.

(a) A corporation engaged in the business of telecommunications that is taxable both within and without this state, shall allocate and apportion its net income as provided in this rule. All items of nonbusiness income shall be allocated pursuant to the provisions of Section 59-7-306.

(b) The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as otherwise provided in this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9) and the sales factor in accordance with R865-6F-8(10).

(3)(a) Property Factor.

(b) Outerjurisdictional property that is used by a taxpayer in providing a telecommunications service shall be attributed to this state based on the ratio of property within this state used in providing that service, to property everywhere used in providing the service, exclusive of property not located in any state. The term "property" as used herein refers to property includable in the property factor of the Utah apportionment fraction as defined in commission rule R865-6F-8(8).

(4) Sales Factor Numerator.

(a) The following sales and receipts from telecommunications service other than interstate or international private telecommunications service, shall be included in the Utah sales and receipts numerator:

(i) receipts derived from charges for providing telephone "access" from a location within Utah. "Access" means that a call can be made or received from a point within this state. An example of this type of receipt is a monthly subscriber fee billed with reference to equipment located in Utah;

(ii) receipts derived from charges for unlimited calling privileges, if the charges are billed by reference to equipment located in Utah;

(iii) receipts derived from charges for individual toll calls that originate and terminate in Utah;

(iv) receipts derived from charges for individual toll calls that either originate or terminate in Utah and are billed by reference to a customer or equipment located in Utah;

(v) receipts derived from any other charges if the charges are not includable in another state's sales factor numerator under that state's law, and the customer's billing address is in Utah.

(b) Gross receipts derived from providing interstate and international private telecommunications services shall be determined as follows:

(i) If the segment of the interstate or international channel between each termination point is separately billed, 100 percent of the charge imposed at each termination point in this state and for service in this state between those points is includable in the Utah sales factor. In addition, 50 percent of the charge imposed for service between a channel termination point outside this state and a point inside the state shall be included in the Utah sales factor. For purposes of this paragraph, termination points shall be measured by the nearest termination point inside the state to the first termination point outside the state.

(ii) If each segment of the interstate or international channel is not separately billed, the Utah sales shall be the same portion of the interstate or international channel charge that the number of channel termination points within this state bears to the total number of channel termination points within and without this state.

R865-6F-36. Taxation of Registered Securities or Commodities Broker or Dealer Pursuant to Utah Code Ann. Sections 59-7-302 through 59-7-321.

(1) Definitions.

(a) "Brokerage commission income" means income earned by a registered securities or commodities broker or dealer from the purchase and sale of securities or commodities by the broker or dealer:

(i) for which the broker or dealer does not take title; and

(ii) as an agent for a customer's account.

(b) "Commodity" is as defined in Section 475(e)(2), Internal Revenue Code.

(c) "Principal transaction" means a transaction where the registered securities or commodities broker or dealer acts as a principal or underwriter for the broker or dealer's own account, rather than as an agent for the customer.

(d) "Registered securities or commodities broker or dealer" means a corporation registered as a broker or dealer with the Securities and Exchange Commission or the Commodities Futures Trading Commission.

(e) "Security" is as defined in Section 475(c)(2), Internal Revenue Code.

(f) "Securities or commodities used to produce income" means securities or commodities that are purchased and held by a registered securities or commodities broker or dealer as a principal or underwriter for resale to its customers.

(2) Apportionment and allocation.

(a) A registered securities or commodities broker or dealer whose business activity is taxable both within and without this state shall allocate and apportion its net income as provided in this rule. All items of nonbusiness income shall be allocated pursuant to the provisions of Section 59-7-306.

(b) The fraction by which business income shall be apportioned to the state shall be determined in accordance with rule R865-6F-8(4) and (7). Except as otherwise provided in this rule, the property factor shall be determined in accordance with R865-6F-8(8), the payroll factor in accordance with R865-6F-8(9), and the sales factor in accordance with R865-6F-8(10).

(3) Property factor.

(a) The property factor is a fraction, the numerator of which is the average value of the taxpayer's real and tangible personal property owned or rented and used, or available for use, within this state during the taxable year, plus the average value of securities or commodities used to produce income during the taxable year that are held for resale exclusively through a branch, office, or other place of business in this state. The denominator is the average value of the total of the taxpayer's real and tangible personal property owned or rented and used within and without this state during the taxable year, plus the average value of all securities or commodities used to produce income during the taxable year.

(b) Securities or commodities used to produce income shall be valued at original cost.

(4) Sales factor.

(a) The sales factor is a fraction, the numerator of which is the total revenue that is derived from transactions and activities in the regular course of the taxpayer's trade or business within this state during the taxable year. The denominator is the total revenue that is derived from transactions and activities in the regular course of the taxpayer's trade or business within and without this state during the taxable year.

(b) Brokerage commission income shall be included in the denominator of the sales factor. Brokerage commission income shall be included in the numerator of the sales factor if the customer that is paying the commission is located in Utah. A customer is located in Utah if the mailing address of the customer as it appears in the broker or dealer's records is in Utah.

(c) Gross receipts from principal transactions shall be included in the denominator of the sales factor. Gross receipts from principal transactions shall be included in the numerator of the sales factor if the sale is made through a branch, office, or other place of business in Utah. Gross receipts from principal transactions shall be determined after the deduction of any cost

incurred by the taxpayer to acquire the securities or commodities.

(d) Other gross receipts such as margin interest on brokerage accounts and account maintenance fees shall be included in the denominator of the sales factor, and, if the customer that is paying the amounts or fees is located in Utah based on the customer address as it appears in the broker or dealer's records, in the numerator of the sales factor.

R865-6F-37. Disclosure of Reportable Transactions and Material Advisor List Pursuant to Utah Code Ann. Sections 59-1-1301 through 59-1-1309.

(1) A taxpayer shall disclose a reportable transaction to the commission by:

(a) marking the box on the taxpayer's corporate franchise or income tax return indicating that the taxpayer has filed federal form 8886, or successor form, with the Internal Revenue Service; and

(b) providing the commission a copy of the form described in Subsection (1)(a) upon the request of the commission.

(2)(a) A material advisor shall disclose a reportable transaction to the commission by attaching a copy of the federal form 8264, or successor form, and any additional information that the material advisor submitted to the Internal Revenue Service, to the form prescribed by the commission.

(b) A material advisor shall provide the commission the information described in Subsection (2)(a) within 60 days after the form 8264, or successor form, was required to be filed with the Internal Revenue Service.

(3)(a) The list of persons a material advisor is required to maintain under 26 C.F.R. Sec. 301.6112-1 shall satisfy the requirement for the list of persons a material advisor is required to maintain under Section 59-1-1307.

(b) If more than one material advisor is required to maintain a list of persons in accordance with Section 59-1-1307, the material advisor that maintained the list required by 26 C.F.R. Sec. 301.6112-1 shall maintain the list required by Section 59-1-1307.

R865-6F-38. Renewable Energy Credit Amount Pursuant to Utah Code Ann. Section 59-7-614.

An amount certified by the Utah State Energy Program under rule R638-2, Renewable Energy Systems Tax Credit, as qualifying for the tax credit under Section 59-7-614 shall, in the absence of fraud or misrepresentation, be the amount allowed by the commission as a credit under that section.

R865-6F-39. Definitions Related to Captive Real Estate Investment Trust and Foreign Real Estate Investment Trust Pursuant to Utah Code Ann. Section 59-7-101.

The following definitions apply to the definitions of captive real estate investment trust and foreign real estate investment trust in Section 59-7-101.

(1) "Cash or cash equivalents" means currency and coins, bank balances, negotiable money orders, checks, and highly liquid investments that can easily be converted into cash, such as treasury bills, certificates of deposit, marketable securities, and negotiable financial instruments.

(2) "Established securities market" is defined as that phrase is defined in Treas. Reg. Section 1.884-5 (d)(2) (2007), which is adopted and incorporated by reference.

(3) "Listed Australian property trust" means:

(a) an Australian unit trust registered as a managed investment scheme under the Australian Corporations Act in which the principal class of units is listed on a recognized stock exchange in Australia and is regularly traded on an established securities market; and

(b) an entity organized as a trust, provided that an entity listed in Subsection (3)(a) owns or controls, directly or indirectly, 75 percent or more of the voting power or value of the beneficial interests or shares of that trust.

(4) "Regularly traded" is defined as that phrase is defined in Treas. Reg. Section 1.884-5 (d)(4) (2007), which is adopted and incorporated by reference.

R865-6F-40. Foreign Operating Company Subtraction from Unadjusted Income Pursuant to Utah Code Ann. Sections 59-7-101 and 59-7-106.

(1) The activities of a partnership interest are taken into account in determining whether a corporation qualifies as a foreign operating company and calculating any adjustment for which the corporate partner that is a foreign operating company is eligible.

(a) Partnership activities are attributed to the corporation to the extent of the corporation's ownership interest in the partnership.

(b) The character of each class or type of partnership income passes through to the corporate partner. Accordingly, a corporate partner that is a foreign operating company may not make a subtraction from unadjusted income as a foreign operating company for partnership income generated from intangible property and assets held for investment and not from a regular business trading activity.

(2) Prior to determining the foreign operating company subtraction, a foreign operating company that is a member of a unitary group shall eliminate a transaction between the foreign operating company and a partnership held directly or indirectly by a member of the same unitary group to the extent of the interest the foreign operating company holds in the partnership.

R865. Tax Commission, Auditing.
R865-9I. Income Tax.
R865-9I-2. Determination of Utah Resident Individual Status Pursuant to Utah Code Ann. Sections 59-10-103 and 59-10-136.

(1) For purposes of determining whether an individual spends in the aggregate 183 or more days of the taxable year in this state, a "day" means a day in which the individual spends more time in this state than in any other state.

(2) Determination of resident individual status for military servicepersons.

(a) The status of a military serviceperson as a resident individual or a nonresident individual is determined as follows.

(i) A resident individual in active military service does not lose his status as a resident individual if the resident individual's absence from the state is a result of military orders.

(ii) A nonresident individual in active military service who is stationed in Utah does not become a resident individual for income tax purposes if the nonresident individual's presence in Utah is due solely to military orders.

(b) Subject to federal law, an individual in active military service may change from a resident individual to a nonresident individual or from a nonresident individual to a resident individual if he establishes that he satisfies the conditions of Section 59-10-136.

(c) A nonresident individual serviceperson is exempt from Utah income tax only on his active service pay. All other Utah source income received by the nonresident individual serviceperson is subject to Utah income tax as provided by Section 59-10-116.

R865-9I-3. Credit for Income Tax Paid by an Individual to Another State Pursuant to Utah Code Ann. Section 59-10-1003.

(1) A Utah resident taxpayer is required to report his entire state taxable income pursuant to Section 59-10-1003 even though part of the income may be from sources outside this state.

(2) Except to the extent allowed in Subsection (4), a resident taxpayer may claim the credit provided in Section 59-10-1003 by:

(a) filing a resident Utah return showing the computation of tax based on total income before any credit for taxes in another state;

(b) completing form TC-40A, Credit For Income Tax Paid To Another State, for each state for which a credit is claimed; and

(c) attaching any schedule completed under Subsection (2)(b) to the individual income tax return.

(3) A part-year resident taxpayer may claim credit on that portion of income subject to both Utah tax and tax in another state. The credit is claimed in the same manner as claimed by a full-year resident, but only for that portion of the year that the nonresident taxpayer was living in Utah. Form TC-40A, Credit For Income Tax Paid To Another State, must be completed and attached to the individual income tax return for each state for which a credit is claimed.

(4) For only those states in which a resident professional athlete has participated in his team's composite return or simplified withholding, a resident professional athlete may claim the credit provided in Section 59-10-1003 by:

(a) filing a resident Utah return showing the computation of tax based on total income before any credit for taxes in another state; and

(b) attaching a summary, prepared by the team or the team's authorized representative, indicating both the amount of the athlete's income allocated to all other states in which the athlete has participated in his team's composite return or simplified withholding, and the amount of income tax paid by the athlete to those states.

(5) The credit allowable on the Utah return for taxes paid to any other state shall be the smaller of the following:

(a) the amount of tax paid to the other state; or

(b) a percentage of the total Utah tax. This percentage is determined by dividing the total federal adjusted gross income into the amount of the federal adjusted gross income taxed in the other state.

(6) A taxpayer claiming a credit under Section 59-10-1003 shall retain records to support the credit claimed.

R865-9I-6. Returns by Husband and Wife When One is a Resident and the Other is a Nonresident Pursuant to Utah Code Ann. Section 59-10-119.

(1) Except as provided in Subsection (2), a husband and wife, one being a nonresident and the other a resident, who file a joint federal income tax return, but separate state income tax returns shall determine their separate:

(a) state taxable income as follows:

(i) Determine the amount of the total federal adjusted gross income ("FAGI") pertaining to each spouse. Any adjustments that apply to both spouses shall be divided between the spouses in proportion to the respective incomes of the spouses.

(ii) Allocate a portion of each deduction and add back item described in Section 59-10-114 to each spouse by:

(A) dividing each spouse's FAGI by the combined FAGI of both spouses, and rounding the resulting percentage to four decimal places; and

(B) multiplying the resulting percentage by any deductions and add back items described in Section 59-10-114; and

(b)(i) shares of the taxpayer tax credit authorized in Section 59-10-1018 by multiplying the percentage calculated under Subsection (1)(a)(ii)(A) by the:

(A) itemized or standard deduction; and

(B) state exemption for dependents.

(ii) For purposes of Subsection (1)(b)(i), each spouse shall claim his or her full state personal exemption.

(2) A husband and wife, one being a nonresident and the other a resident, may use an alternate method of calculating their separate state taxable incomes than the method provided in Subsection (1) if they can demonstrate to the satisfaction of the commission that the alternate method more accurately reflects their separate state taxable incomes.

R865-9I-7. Change of Status As Resident or Nonresident Pursuant to Utah Code Ann. Section 59-10-120.

(1) Definitions.

(a) "AGI" means adjusted gross income, as defined by Section 59-10-103.

(b) "Part-year resident" means an individual that changes status during the taxable year from resident to nonresident or from nonresident to resident.

(2) The state taxable income of a part-year resident shall be a percentage of the amount that would have been state taxable income if the taxpayer had been a full-year resident as defined under Section 59-10-103. This percentage is the Utah portion of AGI divided by the total AGI, not to exceed 100 percent.

(3) The Utah portion of a part-year resident's AGI shall be determined as follows:

(a) Income from wages, salaries, tips and other compensation earned or received while in a resident status and included in the total AGI shall be included in the Utah portion of the AGI.

(b) Dividends actually or constructively received while in resident status shall be included in the Utah portion of AGI. Any dividend exclusion shall be deducted from the Utah portion of AGI using the percentage of excludable dividends received

while in resident status, compared to the total excludable dividends.

(c) All interest actually or constructively received while in resident status shall be included in the Utah portion of the AGI.

(d) All AGI derived from Utah sources while in a nonresident status, as determined under Section 59-10-117, shall be included in the Utah portion of AGI.

(4)(a) Income or loss from businesses, rents, royalties, partnerships, estates or trusts, small business corporations as defined by Internal Revenue Code Section 1371(b), and farming shall be included in the Utah portion of AGI:

(i) if the activities involved were concluded, or the taxpayer's connection with them terminated before or at the time of change from resident to nonresident status; or

(ii) if the activities were commenced or the taxpayer joined them at the time or after the change from nonresident to resident status.

(b) Income or loss that does not meet Subsection (4)(a) shall be included in the Utah portion of AGI only to the extent the income or loss is derived from Utah sources as determined under Section 59-10-117.

(5) Moving expenses deducted on the federal return may be deducted from the Utah portion of AGI only to the extent that they are for moving into Utah and within Utah.

(6) Employee business expenses may be deducted from the Utah portion of AGI only to the extent that they pertain to the production of income included in the Utah portion of AGI.

(7) Payments by a self-employed person to a retirement plan that reduce the total AGI may be deducted from the Utah portion of AGI in the same proportion that the related self-employment income is included in the Utah portion of FAGI.

(8) Other income, losses or adjustments applicable in determining total AGI may be allowed or included in the Utah portion of AGI only when the allowance or inclusion is fair, equitable, and would be consistent with other requirements of Title 59, Chapter 10, Individual Income Tax Act, or these rules as determined by the commission.

R865-9I-8. Proration When Two Returns Are Required Pursuant to Utah Code Ann. Section 59-10-121.

A. Two returns are not required when an individual changes status as resident or nonresident. Ordinarily, the total of the taxable income that would be reported on two returns will be included in one return.

B. Only in unusual circumstances as determined by the Tax Commission will the preparation of two returns be allowed or required. In this event, the returns shall be prepared in a fair and equitable manner as approved or prescribed by the Tax Commission consistent with Utah Code Ann. Section 59-10-121 and other pertinent provisions.

R865-9I-9. Taxable Year Pursuant to Utah Code Ann. Section 59-10-122.

A. If a taxpayer's taxable year is changed to a taxable period of less than 12 months as required by Utah Code Ann. Section 59-10-122 and if he is required to convert his income for the period to an annual basis for federal income tax purposes, the taxpayer shall convert his income for the period of less than a year to an annual basis for computing his state income tax.

B. Unless the Tax Commission determines a different method consistent with requirements of the act is necessary or appropriate, the income tax of the taxpayer for the period of less than 12 months shall be computed as follows:

1. determine the state taxable income applicable to the fractional part of the year and multiply this amount by 12;

2. divide the product by the number of months in the period to arrive at the state taxable income on an annualized basis;

3. compute the tax applicable to the state taxable income as annualized;

4. divide the tax as computed on the annualized state taxable income by 12; and

5. multiply the result by the number of months in the period involved.

R865-9I-10. Adjustments Between Taxable Years After Change in Accounting Methods Pursuant to Utah Code Ann. Section 59-10-124.

A. If a taxpayer's state taxable income for any taxable year is computed under a method of accounting different from the method under which such income was computed for the previous year, the taxpayer shall attach a statement to his return setting forth all differences. This statement shall specify the amounts duplicated or omitted in full or in part as a result of such change. The Tax Commission shall make or allow any necessary adjustments to prevent double inclusion or exclusion of an item of gross income, or double allowance or disallowance of an item of deduction or credit.

R865-9I-13. Pass-Through Entity Withholding Pursuant to Utah Code Ann. Sections 59-10-116, 59-10-117, 59-10-118, 59-10-1403.2, and 59-10-1405.

(1) A pass-through entity must withhold and pay over to the state a tax on:

(a) the business income of the pass-through entity to the extent the business income is derived from Utah sources in accordance with Section 59-10-116; and

(b) the nonbusiness income of the pass-through entity derived from or connected with Utah sources.

(i) "Nonbusiness income of the pass-through entity derived from or connected with Utah sources" does not include portfolio income if the income would not be reportable to Utah on the pass-through entity taxpayer's Utah state tax return or the Utah state tax return of any downstream pass-through entity taxpayer.

(ii) "Downstream pass-through entity taxpayer" means a pass-through entity taxpayer that is a pass-through entity taxpayer of any entity that is itself a pass-through entity taxpayer.

(2) A schedule shall be included with the return listing all of the following information for each nonresident pass-through entity taxpayer:

(a) name;

(b) address;

(c) social security number;

(d) percentage of ownership in pass-through entity;

(e) Utah income attributable to that pass-through entity taxpayer; and

(f) amount of Utah tax withheld on behalf of that pass-through entity taxpayer.

(3) The income of a pass-through entity that is an S corporation shall be calculated by:

(a) adding back to the line on the federal Schedule K labeled "Income/loss reconciliation" the amount included on that schedule for:

(i) charitable contributions;

(ii) total foreign taxes paid or accrued; and

(iii) recapture of a benefit derived from a deduction under Section 179, Internal Revenue Code; or

(b) if the pass-through entity that is an S corporation was not required to complete the line labeled "Income/loss reconciliation" on the federal Schedule K, a pro forma calculation of the amounts for charitable contributions and foreign taxes paid or accrued, and of the amount that would have been entered on the Income/loss reconciliation" line shall be used for purposes of this rule.

(4) A pass-through entity shall calculate the tax it is

required to withhold on behalf of pass-through entity taxpayers by:

(a) multiplying the income of the pass-through entity computed in Subsection (1) by the tax rate in effect under Section 59-10-104; and

(b) subtracting from the amount calculated in Subsection (4)(a) any amounts withheld from the pass-through entity under Section 59-6-102 that are attributable to pass-through entity taxpayers for whom the pass-through entity is required to withhold.

(5)(a) A pass-through entity is not required to withhold a tax on behalf of a pass-through entity taxpayer of that pass-through entity if the pass-through entity taxpayer is:

(i) exempt from taxation under Section 59-7-102 and the income from the pass-through entity is not unrelated business income to the pass-through entity taxpayer;

(ii) an individual retirement account as defined under Section 408(a), Internal Revenue Code and the income from the pass-through entity is not unrelated business income to the pass-through entity taxpayer;

(iii) a real estate investment trust if all of the earnings of the real estate investment trust are distributed to the owners of the real estate investment trust; or

(iv) a person exempt from state income tax under Section 59-10-104.1.

(6)(a) Subject to Subsection (6)(b), and for purposes of Subsection 59-10-1403.2(5), a pass-through entity shall apply to the commission for a waiver of penalty or interest, on an amount the pass-through entity fails to pay or withhold and for which the pass-through entity taxpayer files and pays in a timely manner, by checking the box on the tax return requesting the waiver for required withholding.

(b) The provisions of Subsection (6)(a) shall be effective for taxable years beginning on or after January 1, 2010.

(7) An entity that is disregarded for federal tax purposes is disregarded for purposes of pass-through entity withholding.

(8) The pass-through entity's federal identification number shall be used on the form TC-65 in place of a social security number.

(9) Examples.

(a) Partnership A has two partners, both of whom are nonresident individuals exempt from state income tax under Section 59-10-104.1. Partnership A is not required to withhold Utah tax for these partners.

(b) For tax year 2010, Partnership C has two partners, Partnerships D and E. Partnership D has two partners, both Utah resident individuals. Partnership E has three nonresident partners, all of whom are subject to Utah state tax. Partnership C's responsibility for withholding is based on Partnerships D and E, not the partners of Partnerships D and E. Accordingly, Partnership C must withhold tax on behalf of Partnerships D and E. If, however, both Partnership D and the partners of Partnership D file returns and pay any tax due by the filing due date for Partnership C, including extensions, Partnership C may elect to not withhold those amounts and may apply to the Tax Commission, by checking the box on the tax return requesting the waiver for required withholding, for a waiver of tax, penalty, and interest on amounts Partnership C should have collected and remitted for Partnership D, but did not.

R865-9I-14. Requirement of Withholding Pursuant to Utah Code Ann. Sections 59-10-401, 59-10-402, and 59-10-403.

A. Except as otherwise provided in statute or this rule, every employer shall withhold Utah income taxes from all wages paid:

1. to a nonresident employee for services performed within Utah,

2. to a resident employee for all services performed, even though such services may be performed partially or wholly without the state.

B. If the services performed by a resident employee are performed in another state of the United States, the District of Columbia, or a possession of the United States that requires withholding on wages earned, the withholding tax for Utah shall be the Utah tax required to be withheld less the tax required to be withheld under the laws, rules, and regulations of that other state, District of Columbia, or possession of the United States.

C. If the duties of a nonresident employee involve work both within and without the state, tax is withheld from that portion of the total wages that is properly allocable to Utah. The method of allocation is subject to review by the Tax Commission and may be subject to change if it is determined to be improper.

D. Income tax treatment of rail carrier and motor carrier employees is governed by 49 U.S.C. Section 14503.

E. Withholding required under Section 59-10-402 is required for all wages that are:

1. subject to withholding for federal income tax purposes;

2. paid to individuals who are deemed employees as determined by the Tax Commission, using Internal Revenue Service guidelines.

F. The number of exemptions claimed for federal withholding shall be the number of exemptions claimed for state withholding purposes.

G. Employers should use Utah income tax withholding schedules or tables published by the Tax Commission in computing the amount of state income tax withheld from their employees.

R865-9I-15. Employees Incurring No Income Tax Liability Pursuant to Utah Code Ann. Section 59-10-403.

A. With reference to Utah Code Ann. Section 59-10-403, an employer shall not be required to deduct and withhold Utah income taxes from wages paid to an employee who has filed a Federal Withholding Certificate, Form W-4E.

R865-9I-16. Collection and Payment of Withholding Pursuant to Utah Code Ann. Section 59-10-406.

A. Legible copies of the federal Form W-2 must contain the following information:

1. the name and address of the employee and employer;

2. the employer's Utah withholding tax account number;

3. the amount of compensation;

4. the amounts of federal and Utah state income tax withheld;

5. the social security number of the employee;

6. the word "Utah" either printed or stamped thereon in such a way as to clearly indicate the tax withheld was for Utah in accordance with Utah law, as distinguished from any other state or jurisdiction; and

7. other information required by the commission.

B. Sufficient copies of the W-2 form must be furnished to each employee to enable attachment of a legible copy to the state income tax return.

C. If a tax required under Section 59-10-402 is not withheld by an employer, but is later paid by the employee:

1. the tax required to be withheld under Section 59-10-402 shall not be collected from the employer; and

2. the employer shall remain subject to penalties and interest on the total amount of taxes that the employer should have withheld under Section 59-10-402.

R865-9I-17. Time for Filing Withholding Tax Returns and Payment of Withholding Taxes Pursuant to Utah Code Ann. Sections 59-10-406 and 59-10-407.

(1) This rule provides exceptions to the statutory requirement that an employer shall file withholding tax returns and pay withholding taxes quarterly.

(2) An employer may file withholding tax returns and pay withholding taxes on an annual basis for a calendar year in which the employer files:

(a) a federal Schedule H; or

(b) a Form 944, Employer's ANNUAL Federal Tax Return, with the Internal Revenue Service.

(3) The annual withholding return and payment under Subsection (2) are due by January 31 of the year succeeding the year for which the payment and return apply.

(4) An employer withholding an average of $1,000 or more per month shall prepay withholding taxes on a monthly basis in the manner prescribed in Section 59-10-407.

R865-9I-18. Taxpayer Records, Statements, and Special Returns Pursuant to Utah Code Ann. Section 59-1-1406.

(1) Every taxpayer shall keep adequate records for income tax purposes of a type which clearly reflect income and expense, gain or loss, and all transactions necessary in the conduct of business activities.

(2) Records of all transactions affecting income or expense, or gain or loss, and of all transactions for which deductions may be claimed, should be preserved by the taxpayer to enable preparation of returns correctly and to substantiate claims. All records shall be made available to an authorized agent of the commission when requested, for review or audit.

R865-9I-19. Returns By Husband and Wife Pursuant to Utah Code Ann. Section 59-10-503.

A. In the year a married person dies, the surviving spouse may file a joint Utah return if a joint federal return was filed except in cases where one spouse was a resident and the other a nonresident. In these cases, separate returns may be required (see Section 59-10-503(1)(b) and Rule R865-9I-6).

R865-9I-20. Returns Made By Fiduciaries and Receivers Pursuant to Utah Code Ann. Section 59-10-504.

A. Returns by fiduciaries and receivers shall be made in accordance with forms and instructions provided by the Tax Commission. The fiduciary of any resident estate or trust or of any nonresident estate or trust having income derived from Utah sources and who is required to make a return for federal income tax purposes shall make and file a corresponding return for state income tax purposes.

1. Each return shall include a listing of the beneficiaries and their distributable shares of the state taxable income.

2. In the case of a nonresident estate or trust, the return shall include detailed information showing how the amount of income derived from or connected with Utah sources was determined.

B. The fiduciary is required to pay the taxes on the income taxable to the estate or trust. Liability for payment of the tax attaches to the executor or administrator up to his discharge. If the executor or administrator failed to file a return as required by law or failed to exercise due diligence in determining and satisfying the tax liability, the liability is not extinguished until the return is filed and paid.

C. Liability for the tax also follows the estate itself. If by reason of the distribution of the estate and the discharge of the executor or administrator, it appears that collection of tax cannot be made from the executor or administrator, each legatee or distributee must account for his proportionate share of the tax due and unpaid to the extent of the distributive share received by him.

R865-9I-21. Return By Partnership Pursuant to Utah Code Ann. Sections 59-10-507 and 59-10-514.

(1) Every partnership having a nonresident partner and income derived from sources in this state shall file a return in accordance with forms and instructions provided by the Tax Commission.

(2) If the partnership has income derived from or connected with sources both inside and outside Utah and if any partner was not a resident of Utah, the portion derived from or connected with sources in this state must be determined and shown on the Utah forms TC-65 Schedule K and Schedule K-1.

(3) A partnership may satisfy the requirement to file a return with the commission by maintaining records that show each partner's share of income, losses, credits, and other distributive items, and making those records available for audit if:

(a) all of the partnership's partners are resident individuals; and

(b) the partnership is not a pass-through entity taxpayer.

R865-9I-22. Signing of Returns and Other Documents Pursuant to Utah Code Ann. Section 59-10-512.

A. Any return, statement, or other document shall be signed as required by specific provisions of the act or as prescribed by forms or instructions furnished by the Tax Commission.

B. All returns filed with the Tax Commission must be signed by the taxpayer or his duly authorized agent as provided by law. Unsigned returns are not valid returns for income tax purposes and if unsigned, the benefits of proper filing may be denied the taxpayer.

C. Returns may be filed on forms prescribed and furnished by the Tax Commission, or in lieu thereof, on reproduced or facsimile copies, provided that the same information required on the printed form for the same year is provided and the paper used for such substitute return is equal in durability and weight to 20 lb. bond. Paper more brittle or lighter in weight than that specified is not acceptable as a replacement for the regular reporting forms. The use of paper of lesser quality for supporting schedules is permitted, providing the schedules are clear and legible.

R865-9I-23. Extension of Time to File Returns Pursuant to Utah Code Ann. Section 59-10-516.

A. A completed form TC-546, Prepayment of Income Tax, must accompany the prepayment amount required by Section 59-10-516, if the prepayment is not in the form of withholding, payments applied from previous year refunds, or credit carryforwards.

B. Interest shall be charged on any additional tax due shown on the return in accordance with Section 59-1-402. Interest is calculated from the original due date of the return to the date the tax is paid and applies even when an extension of time to file the return exists.

C. Utah residents in military service, stationed outside the United States, shall be granted an extension of time to file to the 15th day of the fourth month after their return to the United States, or their discharge date, whichever is earlier.

R865-9I-24. Timely Mailing Treated As Timely Filing Pursuant to Utah Code Ann. Section 59-10-517.

A. With reference to Section 59-10-517(3)(b), the provisions of that statute that apply to registered mail shall also apply in ordinary circumstances to certified mail.

R865-9I-30. Limitations on Assessment and Collection Pursuant to Utah Code Ann. Section 59-10-536.

A. If a taxpayer elects to defer a determination as to applicability of the presumption that the activity is being engaged in for profit as set forth in I.R.C. Section 183(d), he shall notify the Tax Commission in writing of such election. He must also consent to assessment of tax pertaining to such activity at any time within the five- or seven-year period plus a reasonable additional period.

1. In addition, the taxpayer shall immediately furnish to the Tax Commission a copy of every waiver of the running of the statute of limitations that he may give to the Internal Revenue Service, and he shall at the same time give his consent in writing that the waiver shall also apply to the time allowed for assessment of tax by the Tax Commission.

2. The taxpayer must notify the Tax Commission of any audit actions or determinations made by the Internal Revenue Service with respect to such activity.

R865-9I-33. Reporting Miscellaneous Income Pursuant to Utah Code Ann. Section 59-10-501.

A. Legible copies of the federal Form 1099 or other special forms for reporting rents, royalties, interest, remuneration, etc., from Utah sources not subject to federal withholding must be open to inspection and gathering of information by authorized representatives of the Tax Commission or submitted to the Tax Commission upon request. These forms must show the name, address, social security number, and other pertinent information pertaining to each taxpayer, resident or nonresident of Utah, the amount and purpose of the distribution clearly shown.

R865-9I-34. Property Tax Relief For Individuals Pursuant to Utah Code Ann. Sections 59-2-1201 through 59-2-1220.

A. "Household" is determined as follows:

1. For purposes of the homeowner's credit under Section 59-2-1208, household shall be determined as of January 1 of the year in which the claim under that section is filed.

2. For purposes of the renter's credit under Section 59-2-1209, household shall be determined as of January 1 of the year for which the claim is filed under that section.

B. "Nontaxable income" includes:

1. the amount of a federal child tax credit received under Section 24 of the Internal Revenue Code that exceeded the taxpayer's federal tax liability; and

2. the amount of a federal earned income credit received under Section 32 of the Internal Revenue Code that exceeded the taxpayer's federal tax liability.

C. "Nontaxable income" does not include:

1. federal tax refunds;

2. the amount of a federal child tax credit received under Internal Revenue Code Section 24 that did not exceed the taxpayer's federal tax liability;

3. the amount of a federal earned income credit received under Internal Revenue Code Section 32 that did not exceed the taxpayer's federal tax liability;

4. payments received under a reverse mortgage;

5. payments or reimbursements to senior program volunteers under United States Code Title 42, Section 5058; and

6. gifts and bequests.

D. "Property taxes accrued" does not mean that taxes can be accumulated for two or more years and then claimed in one year.

E. A claimant who pays property taxes on a mobile home and pays rent on the land on which the mobile home is situated shall be eligible for a homeowner's credit for the property tax paid on the mobile home and a renter's credit for the rent paid on the land.

F. State welfare assistance is not considered as public funds for the payment of rent, and will not preclude a rebate. However, assistance payments must be included in income.

G. Where housing assistance payments are involved under the Housing and Community Development Act, Title II, Section 8:

1. only that portion of the rent paid by the tenant may be claimed under the terms of the Circuit Breaker Act; and

2. that portion of the rent paid by the federal government to the landlord will not be considered as part of the household income since it is not subject to a claim for rebate.

H. Persons claiming a property tax exemption under Title 59, Chapter 2, Part 11 are not precluded from claiming a homeowner's or renter's credit.

R865-9I-37. Enterprise Zone Individual Income Tax Credits Pursuant to Utah Code Ann. Sections 63M-1-401 through 63M-1-414.

(1) Definitions:

(a) "Based" means exclusively stored or maintained at a facility owned by the taxpayer:

(i) that is designed, constructed, and used to store or maintain equipment:

(A) that is transported outside of the enterprise zone; and

(B) for which the credit is taken;

(ii) where the equipment is located when it is not being used at facilities outside the enterprise zone, as evidenced by invoices, equipment logs, photographs, or similar documentation; and

(iii) from where the use of the equipment is directed or managed.

(b) "Business engaged in retail trade" means a business that makes a retail sale as defined in Section 59-12-102.

(c) "Construction work" does not include facility maintenance or repair work.

(d) "Employee" means a person who qualifies as an employee under Internal Revenue Service Regulation 26 CFR 31.3401(c)(1).

(e) "Public utilities business" means a public utility under Section 54-2-1.

(f) "Taxpayer" means the person claiming the tax credits in section 63M-1-413.

(g) "Transfer" pursuant to Section 63M-1-411, means the relocation of assets and operations of a business, including personnel, plant, property, and equipment.

(2) For purposes of the investment tax credit, an investment is a qualifying investment if the plant, equipment, or other depreciable property for which the credit is taken is:

(a)(i) located within the boundaries of the enterprise zone; and

(ii) used exclusively in business operations conducted within the enterprise zone or

(b) in the case of equipment or other depreciable property, based in the enterprise zone.

(3) The following examples relate to the investment tax credit.

(a) A furniture manufacturer operates a manufacturing facility that is located in an enterprise zone. The manufacturer purchases two trucks that are used exclusively at the facility and used to pick up raw materials from suppliers, some or all of whom may be outside the enterprise zone, and to deliver finished product to final customers, some or all of whom may be outside the enterprise zone. The trucks qualify for the investment tax credit because they are used exclusively in a business operation, the furniture manufacturing facility, that is located within the enterprise zone, even if they are stored or maintained at a facility located outside of the enterprise zone.

(b) If the same manufacturer described in Subsection (3)(a) had two facilities, one located within the enterprise zone, and one located outside the enterprise zone, and used the same two trucks for the same purposes for both facilities. The trucks are not based at a facility in the enterprise zone. The trucks would not qualify for the investment tax credit because they are not used exclusively at the facility located within the enterprise zone, and are not based in the enterprise zone.

(c) A business consists of a mine office located in an enterprise zone and a mine located outside the enterprise zone. Mining equipment is used exclusively at the mine and is not based in the enterprise zone. The business may claim the

investment tax credit for plant, equipment, or other depreciable property located in the mine office, but not for plant, equipment, or other depreciable property used in the mine outside the enterprise zone.

(d) A business purchases equipment such as an oil rig, which is transported outside the enterprise zone to service facilities such as oil fields. If the use of the equipment is directed or managed from the enterprise zone and the equipment returns to a facility, within the enterprise zone, that is owned by the business for regular maintenance or storage, the equipment is based in the enterprise zone and therefore qualifies for the investment tax credit.

(e) The same business described in Subsection (3)(d) purchases equipment that is primarily stored or maintained at facilities that are located outside of the enterprise zone, but which may be occasionally stored or maintained in the enterprise zone. This equipment would not be based in the enterprise zone, and would not qualify for the investment tax credit, even if the business has other facilities in the enterprise zone.

(4) A business entity that conducts non-retail operations and is engaged in retail trade is primarily engaged in retail trade if the retail trade operations constitute more than 50% of the business entity's total operations.

(5) An employee whose duties include both non-construction work and construction work does not perform a construction job if the construction work performed by the employee constitutes a de minimis portion of the employee's total duties.

(6) Records and supporting documentation shall be maintained for three years after the date any returns are filed to support the credits taken. For example: If credits are originally taken in 1988 and unused portions are carried forward to 1992, records to support the original credits taken in 1988 must be maintained for three years after the date the 1992 return is filed.

(7) If an enterprise zone designation is revoked prior to the expiration of the period for which it was designated, only tax credits earned prior to the loss of that designation will be allowed.

R865-9I-41. Historic Preservation Tax Credits Pursuant to Utah Code Ann. Section 59-10-1006.

(1) Definitions

(a) "Qualified rehabilitation expenditures" includes architectural, engineering, and permit fees.

(b) "Qualified rehabilitation expenditures" does not include movable furnishings.

(c) "Residential" as used in Section 59-10-1006 applies only to the use of the building after the project is completed.

(2) Taxpayers shall file an application for approval of all proposed rehabilitation work with the Division of State History prior to the completion of restoration or rehabilitation work on the project. The application shall be on a form provided by the Division of State History.

(3) Rehabilitation work must receive a unique certification number from the State Historic Preservation Office in order to be eligible for the tax credit.

(4) In order to receive final certification and be issued a unique certification number for the project, the following conditions must be satisfied:

(a) The project approved under Subsection (2) must be completed.

(b) Upon completion of the project, taxpayers shall notify the State Historic Preservation Office and provide that office an opportunity to review, examine, and audit the project. In order to be certified, a project shall be completed in accordance with the approved plan and the Secretary of the Interior's Standards for Rehabilitation.

(c) Taxpayers restoring buildings not already listed on the National Register of Historic Places shall submit a complete National Register Nomination Form. If the nomination meets National Register criteria, the State Historic Preservation Office shall approve the nomination.

(d) Projects must be completed, and the $10,000 expenditure threshold required by Section 59-10-1006 must be met, within 36 months of the approval received pursuant to Subsection (2).

(e) During the course of the project and for three years thereafter, all work done on the building shall comply with the Secretary of the Interior's standards for Rehabilitation.

(5) Upon issuing a certification number under Subsection (4), the State Historic Preservation Office shall provide the taxpayer an authorization form containing that certification number.

(6) Credit amounts shall be applied against Utah individual income tax due in the tax year in which the project receives final certification under Subsection (4).

(7) Credit amounts greater than the amount of Utah individual income tax due in a tax year shall be carried forward to the extent provided by Section 59-10-1006.

(8) Carryforward historic preservation tax credits shall be applied against Utah individual income tax due before the application of any historic preservation credits earned in the current year and on a first-earned, first-used basis.

(9) Original records supporting the credit claimed must be maintained for three years following the date the return was filed claiming the credit.

R865-9I-42. Order of Credits Applied Against Utah Individual Income Tax Due Pursuant to Utah Code Ann. Sections 59-6-102, 59-13-202, and 59-13-301, and Title 59, Chapter 10, and Title 63M, Chapter 1.

Taxpayers shall deduct credits authorized by Section 59-6-102, Section 59-13-202, Section 59-13-301, Title 59, Chapter 10, and Title 63M, Chapter 1 against Utah individual income tax due in the following order:

(1) nonrefundable credits;

(2) nonrefundable credits with a carryforward;

(3) refundable credits.

R865-9I-44. Mandatory Withholding of Income for Nonresident Professional Athletes Pursuant to Utah Code Ann. Sections 59-10-116, 59-10-117, and 59-10-118.

(1) Definitions.

(a) "Duty days" means all days during the taxable year from the beginning of the professional athletic team's official preseason training period through the last game in which the team competes or is scheduled to compete.

(i) Duty days includes:

(A) days on which a member of a professional athletic team renders a service for a team on a date that does not fall within the period described in Subsection (1)(a), for example, participation in instructional leagues, the Pro Bowl, or promotional caravans. Rendering a service includes conducting training and rehabilitation activities, but only if conducted at the facilities of the team; and

(B) game days, practice days, days spent at team meetings, promotional caravans, and preseason training camps, and days served with the team through all postseason games in which the team competes or is scheduled to compete.

(ii) Duty days for any person who joins a team during the season shall begin on the day that person joins the team, and for a person who leaves a team shall end on the day that person leaves the team. If a person switches teams during a taxable year, a separate duty day calculation shall be made for the period that person was with each team.

(iii) Days for which a member of a professional athletic team is not compensated and is not rendering services for the

team in any manner, including days when the member of a professional athletic team has been suspended without pay and prohibited from performing any services for the team, shall not be treated as duty days.

(iv) Days for which a member of a professional athletic team is on the disabled list shall be presumed not to be duty days spent in the state. They shall, however, be included in total duty days spent within and without the state.

(v) Travel days that do not involve either a game, practice, team meeting, promotional caravan or other similar team event are not considered duty days spent in the state, but shall be considered duty days spent within and without the state.

(b) "Member of a professional athletic team" shall include those employees who are active players, players on the disabled list, and any other persons required to travel and who do travel with and perform services on behalf of a professional athletic team on a regular basis. This includes coaches, managers, and trainers.

(c) "Professional athletic team" includes any professional baseball, basketball, football, soccer, or hockey team that is not incorporated or organized under the laws of this state.

(d) "Total compensation" includes salaries, wages, bonuses, and any other type of compensation paid during the taxable year to a member of a professional athletic team for services performed in that year.

(i) Total compensation does not include strike benefits, severance pay, termination pay, contract or option-year buyout payments, expansion or relocation payments, or any other payments not related to services rendered to the team.

(ii) For purposes of this rule, "bonuses" subject to the allocation procedures described in Subsection (5) are:

(A) bonuses earned as a result of play during the season, including performance bonuses, bonuses paid for championship, playoff or bowl games played by a team, or for selection to all-star league or other honorary positions; and

(B) bonuses paid for signing a contract, unless all of the following conditions are met:

(I) the payment of the signing bonus is not conditional upon the signee playing any games for the team, or performing any subsequent services for the team, or even making the team;

(II) the signing bonus is payable separately from the salary and any other compensation; and

(III) the signing bonus is nonrefundable.

(e) "Total compensation for services rendered as a member of a professional athletic team" means the total compensation received during the taxable year for services rendered:

(i) from the beginning of the official preseason training period through the last game in which the team competes or is scheduled to compete during that taxable year; and

(ii) during the taxable year on a date that does not fall within the period in Subsection (1)(e)(i), for example, participation in instructional leagues, the Pro Bowl, or promotional caravans.

(2) The purpose of this rule is to apportion to the state, in a fair and equitable manner, a nonresident member of a professional athletic team's total compensation for services rendered as a member of a professional athletic team. It is presumed that application of the provisions of this rule will result in a fair and equitable apportionment of that compensation. Where it is demonstrated that the method provided under this rule does not fairly and equitably apportion that compensation, the commission may require the member of a professional athletic team to apportion that compensation under a method the commission prescribes, as long as the prescribed method results in a fair and equitable apportionment.

(3) If a nonresident member of a professional athletic team demonstrates that the method provided under this rule does not fairly and equitably apportion compensation, that member may submit a proposal for an alternative method to apportion compensation. If approved, the proposed method must be fully explained in the nonresident member of a professional athletic team's nonresident personal income tax return for the state.

(4) A professional athletic team:

(a) is an employer for purposes of Title 59, Chapter 10, Part 4, Withholding of Tax; and

(b) may not be relieved from the requirements imposed on an employer under Title 59, Chapter 10, Part 4, Withholding of Tax.

(5) Nonresident professional athletes shall keep adequate records to substantiate their determination or to permit a determination by the commission of the part of their adjusted gross income that was derived from or connected with sources in this state.

(6) The Utah source income of a nonresident individual who is a member of a professional athletic team includes that portion of the individual's total compensation for services rendered as a member of a professional athletic team during the taxable year which, the number of duty days spent within the state rendering services for the team in any manner during the taxable year, bears to the total number of duty days spent both within and without the state during the taxable year.

(7)(a) Professional athletic teams shall withhold and remit tax on behalf of nonresident professional athletes on a form prescribed by the commission.

(b) A schedule shall be included with the return, listing all of the following information for each nonresident member of a professional athletic team:

(i) name;

(ii) address;

(iii) social security number;

(iv) income attributable to Utah for the nonresident member of a professional athletic team;

(v) total compensation paid to the nonresident member of a professional athletic team by the professional athletic team;

(vi) the nonresident member of a professional athletic team's duty days both within and without the state;

(vii) the nonresident member of a professional athletic team's duty days within the state;

(viii) Utah tax deducted and withheld; and

(ix) federal income tax deducted and withheld.

(8) A nonresident member of a professional athletic team is not required to file an individual income tax return if:

(a) the professional athletic team deducts and withholds a tax on behalf of the nonresident member of a professional athletic team;

(b) the nonresident member of a professional athletic team does not seek to claim a tax credit under Title 59, Chapter 10, Individual Income Tax Act; and

(c) the nonresident member of a professional athletic team does not have adjusted gross income derived from or connected with Utah sources other than the income the member of a professional athletic team receives from the professional athletic team.

R865-9I-46. Medical Savings Account Administration Pursuant to Utah Code Ann. Sections 31A-32a-106, 59-10-114, and 59-10-1021.

(1) Account administrators required to withhold penalties from withdrawals pursuant to Section 31A-32a-105 shall hold those penalties in trust for the state and shall submit those withheld penalties to the commission along with form TC-97M, Utah Medical Savings Account Reconciliation.

(2) In addition to the requirements of A., account administrators shall file a form TC- 675M, Statement of Withholding for Medical Savings Account, with the commission, for each account holder. The TC-675M shall contain the following information for the calendar year:

(a) the beginning balance in the account;

(b) the amount contributed to the account;
(c) the account's earnings;
(d) distributions for qualified medical expenses;
(e) distributions for non-medical expenses not subject to penalty;
(f) distributions for non-medical expenses subject to penalty;
(g) the amount of penalty required to be withheld and remitted to the state;
(h) the account administrator's administrative fee charged to the account; and
(i) the ending balance in the account.

(3) The account administrator shall file forms TC-97M and TC-675M with the commission on or before January 31 of the year following the calendar year on which the forms are based.

(4) The account administrator shall provide each account holder with a copy of the form TC-675M on or before January 31 of the year following the calendar year on which the TC-675M is based.

(5) The account administrator shall maintain original records supporting the amounts listed on the TC-675M for the current year filing and the three previous year filings.

R865-9I-47. Withholding and Payment of Income Tax for Members of the Armed Services Receiving Combat Pay Pursuant to Utah Code Ann. Sections 59-10-408 and 59-10-522.

A. Income excluded from federal adjusted gross income as combat pay shall be exempt from the withholding requirements of Sections 59-10-401 through 59-10-407.

B. Utah residents receiving combat pay qualify for an extension of time to pay income taxes for a period not to exceed the extension for filing returns provided in Tax Commission rule R865-9I-23(C).

R865-9I-49. Higher Education Savings Incentive Program Administration Pursuant to Utah Code Ann. Sections 53B-8a-112, 59-10-114, and 59-10-1017.

(1) "Trust" means the Utah Educational Savings Plan Trust created pursuant to Section 53B-8a-103.

(2) The trustee of the trust shall file a form TC-675H, Statement of Account with the Utah Educational Savings Plan Trust, with the commission, for each trust account owner. The TC-675H shall contain the following information for the calendar year:
(a) the amount contributed to the trust by the account owner; and
(b) the amount disbursed to the account owner pursuant to Section 53B-8a-109.

(3) The trustee of the trust shall file form TC-675H with the commission on or before January 31 of the year following the calendar year on which the forms are based.

(4) The trustee of the trust shall provide each trust account owner with a copy of the form TC-675H on or before January 31 of the year following the calendar year on which the TC-675H is based.

(5) The trustee of the trust shall maintain original records supporting the amounts listed on the TC-675H for the current year filing and the three previous year filings.

R865-9I-50. Addition to Adjusted Gross Income for Interest Earned on Bonds, Notes, and Other Evidences of Indebtedness Pursuant to Utah Code Ann. Section 59-10-114.

The addition to adjusted gross income required under Section 59-10-114 for interest earned on bonds, notes, and other evidences of indebtedness acquired on or after January 1, 2003 applies to:

(1) interest on individual bonds, notes, or other evidences of indebtedness purchased by a resident or nonresident individual on or after January 1, 2003; and

(2) for bonds, notes, and other evidences of indebtedness held in a bond fund owned by a resident or nonresident individual, the portion of interest attributable to individual bonds, notes, and other evidences of indebtedness purchased by the bond fund on or after January 1, 2003.

R865-9I-51. Withholding Tax License Pursuant to Utah Code Ann. Section 59-10-405.5.

(1) The holder of a license issued under Section 59-10-405.5 shall notify the commission:
(a) of any change of address of the business;
(b) of a change of character of the business, or
(c) if the license holder ceases to do business.

(2) The commission may determine that a person has ceased to do business or has changed that person's business address if:
(a) mail is returned as undeliverable as addressed and unable to forward;
(b) the person fails to file four consecutive monthly or quarterly withholding tax returns, or two consecutive annual withholding tax returns;
(c) the person fails to renew its annual business license with the Department of Commerce; or
(d) the person fails to renew its local business license.

(3) If the requirements of Subsection (2) are met, the commission shall notify the license holder that the license will be considered invalid unless the license holder provides evidence within 15 days that the license should remain valid.

(4) A person may request the commission to reopen a withholding tax license that has been determined invalid under Subsection (3).

(5) The holder of a license issued under Section 59-10-405.5 shall be responsible for any withholding tax, interest, and penalties incurred under that license whether those taxes and fees are incurred during the time the license is valid or invalid.

R865-9I-52. Credit For Health Benefit Plan Insurance Pursuant to Utah Code Ann. Section 59-10-1023.

A credit for health benefit plan insurance under Section 59-10-1023 shall be determined in the manner that provides the greatest possible credit.

R865-9I-53. Disclosure of Reportable Transactions and Material Advisor List Pursuant to Utah Code Ann. Sections 59-1-1301 through 59-1-1309.

(1) A taxpayer shall disclose a reportable transaction to the commission by:
(a) marking the box on the taxpayer's individual income tax return indicating that the taxpayer has filed federal form 8886, or successor form, with the Internal Revenue Service; and
(b) providing the commission a copy of the form described in Subsection (1)(a) upon the request of the commission.

(2)(a) A material advisor shall disclose a reportable transaction to the commission by attaching a copy of the federal form 8264, or successor form, and any additional information that the material advisor submitted to the Internal Revenue Service, to the form prescribed by the commission.

(b) A material advisor shall provide the commission the information described in Subsection (2)(a) within 60 days after the form 8264, or successor form, was required to be filed with the Internal Revenue Service.

(3)(a) The list of persons a material advisor is required to maintain under 26 C.F.R. Sec. 301.6112-1 shall satisfy the requirement for the list of persons a material advisor is required to maintain under Section 59-1-1307.

(b) If more than one material advisor is required to maintain a list of persons in accordance with Section 59-1-1307, the material advisor that maintained the list required by 26

C.F.R. Sec. 301.6112-1 shall maintain the list required by Section 59-1-1307.

R865-9I-54. Renewable Energy Credit Amount Pursuant to Utah Code Ann. Sections 59-10-1014 and 59-10-1106.

An amount certified by the Utah State Energy Program under rule R638-2, Renewable Energy Systems Tax Credit, as qualifying for the tax credit under Sections 59-10-1014 or 59-10-1106 shall, in the absence of fraud or misrepresentation, be the amount allowed by the commission as a credit under those sections.

R865-9I-55. Qualified Subchapter S Subsidiaries Pursuant to Utah Code Ann. Section 59-10-1403.

(1) "Qualified subchapter S subsidiary" is as defined in Section 1361(b), Internal Revenue Code.

(2) For purposes of Title 59, Chapter 10, Part 14, a pass-through entity that is a qualified subchapter S subsidiary shall be treated in the same manner as it is treated for federal tax purposes under Section 1361(b), Internal Revenue Code.

(3) A pass-through entity that is an S corporation that owns one or more qualified subchapter S subsidiaries must take into account the activities of each qualified subchapter S subsidiary in determining whether the S corporation parent is doing business in Utah. For purposes of this determination, all of a subsidiary's activities will be attributed to the S corporation parent.

(4) For purposes of Title 59, Chapter 10, Part 14:

(a) the Utah property, payroll, and sales of each qualified subchapter S subsidiary shall be added, respectively, to the Utah property, payroll, and sales of the S corporation parent to determine the numerators of the property, payroll, and sales factors; and

(b) the total property, payroll, and sales of each qualified subchapter S subsidiary shall be added, respectively, to the total property, payroll, and sales of the S corporation parent to determine the denominators of the property, payroll, and sales factors.

(5) Except as provided in Subsection (4), the apportionment fraction for a pass-through entity that is an S corporation shall be calculated based on Sections 59-7-311 through 59-7-321 and as provided in Tax Commission rule R865-6F-8.

R865. Tax Commission, Auditing.
R865-11Q. Self-Insured Employer Assessment.
R865-11Q-1. Time Period Within Which an Employer Must Obtain an Experience Modification Factor Pursuant to Utah Code Ann. Section 34A-2-202.

A. An employer shall have until the due date of each annual return to obtain the experience modification factor.

B. The experience modification factor for a taxable year shall be the experience modification factor in effect on January 1 of the taxable year.

C. An employer that fails to obtain the annual experience modification factor within the period established in A. shall be required to use an experience modification factor of 2.0 and a safety factor of 2.0 to calculate the total calculated premium.

R865. Tax Commission, Auditing.
R865-12L. Local Sales and Use Tax.
R865-12L-1. Local Sales and Use Tax Rules Pursuant to Utah Code Ann. Section 59-12-205.

A. All rules made pursuant to Title 59, Chapter 12, Part 1, state sales and use taxes, shall apply to the local sales and use tax.

R865-12L-3. Tax Collection Schedule Pursuant to Utah Code Ann. Section 59-12-204.

A. A vendor responsible for collecting local sales or use tax in addition to the state tax may use a schedule furnished by the Tax Commission to determine the amount of tax to be collected.

B. For amounts not shown on the schedule, tax may be computed to the nearest cent.

C. The bracket schedule is designed to under collect the tax on some sales within a given bracket and over collect the tax on other sales, in order that the vendor can be reimbursed for the approximate amount of tax that is required to be remitted to the Tax Commission.

R865-12L-4. Filing of Returns Pursuant to Utah Code Ann. Section 59-12-204.

A. Every person responsible for the collection of local sales and use tax is required to make a combined state and local sales and use tax return to the Tax Commission.

B. All provisions pertaining to filing returns for state sales and use tax also apply to filing returns for local sales and use tax.

R865-12L-11. Isolated or Occasional Sale of a Vehicle Pursuant to Utah Code Ann. Section 59-12-204.

A. The sale of any vehicle subject to the registration laws of this state by anyone other than a licensed dealer shall be subject to the local sales or use tax if the purchaser's address is within any county or municipality which has in effect a local sales and use tax law. The purchaser shall be liable for payment of state and local taxes at the time of registration of the vehicle.

B. The foregoing provision in no way applies to sales of vehicles made by licensed dealers in Utah. All sales of vehicles made by dealers shall be subject to the same laws as sales by any other retailers.

R865-12L-14. Local Sales and Use Tax Distributions and Redistributions Pursuant to Utah Code Ann. Sections 59-12-210 and 59-12-210.1.

(1) For purposes of making a redistribution of sales and use tax revenues under Section 59-12-210.1:

(a) "de minimis" means less than $1,000; and

(b) "extraordinary circumstances" means the following circumstances that the commission becomes aware of:

(i) an error in the commission's tax systems or procedures that increases or decreases the overall distribution of sales and use tax revenues to a county, city, or town by $10,000 or more; or

(ii) an error in the calculation, collection, or reporting of a locally imposed sales and use tax by a significant segment of an industry if the error increases or decreases the overall distribution of sales and use tax revenues to a county, city, or town by $10,000 or more.

(2) The commission shall, on a monthly basis, furnish each county, city, and town with the listings of local sales and use taxes remitted for transactions located within the county, city, or town.

(a) After receiving each listing, the county, city, or town shall advise the commission within 90 days:

(i) if the listing is incorrect; and

(ii) make corrections regarding firms omitted from the list or firms listed but not doing business in their taxing jurisdiction.

(b) The commission shall make subsequent distributions based on the notification the commission receives from a county, city, or town under Subsection (2)(a).

(3) If a redistribution is required by Section 59-12-210.1, the commission shall provide the notice of redistribution described in Subsection 59-12-210.1(2) to each original and secondary recipient political subdivision that is impacted by the redistribution in an amount that exceeds the de minimis amount.

R865-12L-17. Procedures for Administration of the Tourism, Recreation, Cultural, and Convention Facilities Tax Pursuant to Utah Code Ann. Sections 59-12-602 and 59-12-603.

(1) Definitions

(a) "Primary business" means the source of more than 50 percent of the revenues of the retail establishment. In the case of a retail establishment with more than two lines of business, primary business means the line of business which generates the highest revenues when compared with the other lines of business.

(b) "Retail establishment" means a single outlet, whether or not at a fixed location, operated by a seller. Retail establishment includes the preparation facilities of caterers, outlets that deliver the alcoholic beverages, food and food ingredients, and prepared food that they prepare, and other similar sellers. A single seller engaged in multiple lines of business at one location may be deemed to be operating multiple retail establishments if the lines of business are not commonly regarded as a single retail establishment or if there are other factors indicating that the lines of business should be treated separately. The operation of concession stands by stadium owners, performers, promoters, or others with a financial interest in ticket sales or admission charges to any event shall be considered a separate line of business constituting a retail establishment.

(c) "Theater" means an indoor or outdoor location for the presentation of movies, plays, or musicals.

(2) If an establishment that is a restaurant under Section 59-12-602 sells prepackaged foods as incidental items with the sale of alcoholic beverages, food and food ingredients, or prepared foods, a tax imposed under Section 59-12-603(1)(b) applies to the prepackaged food as well.

(3) For purposes of collecting the tax imposed on the sale of alcoholic beverages, food and food ingredients, and prepared foods and beverages, the tax will attach in the county in which the food or beverage is served.

(4) A seller that sells foods or beverages prepared for immediate consumption and is uncertain whether it is a restaurant shall make application, in letter form, for exemption with the Tax Commission indicating the circumstances that may qualify it for an exemption. A single application may be filed by a seller for multiple retail establishments if the operations of all of the retail establishments are similar.

R865-12L-18. Participation of Counties, Cities, and Towns in Determination, Administration, Operation, and Enforcement of Local Option Sales and Use Tax Pursuant to Utah Code Ann. Sections 59-1-403, 59-12-202, 59-12-204, and 59-12-205.

A. The Tax Commission has exclusive authority, subject to the provisions of B. to determine taxpayer liability for the local option sales and use tax, and to administer, operate, and enforce the provisions of Title 59, Chapter 12, Utah Code Ann., including the provisions of Section 59-12-201, et seq. The Tax Commission shall:

1. ascertain, assess, and collect any sales and use tax imposed pursuant to Title 59, Chapter 12;

2. determine taxpayer liability for the sales and use tax;

3. represent the counties', cities', and towns' interests in all administrative proceedings commenced pursuant to Title 63, Chapter 46b, or otherwise, involving the state or local option sales and use tax;

4. adjudicate all administrative proceedings commenced pursuant to Title 63, Chapter 46b, or otherwise, involving the state or local option sales and use tax.

B. Counties, cities, and towns shall have access to records and information on file with the Tax Commission, and have notice and such rights to intervene in or to appeal from a proposed final agency action of the Tax Commission as follows:

1. In any case in which the Tax Commission, following a formal adjudicative proceeding commenced pursuant to Title 63, Chapter 46b, Utah Code Ann., takes final agency action that would reduce the amount of sales and use tax liability alleged in the notice of deficiency, the Tax Commission will provide notice of a proposed agency action to all qualified counties, cities, and towns.

a) A county, city, or town is a qualified county, city, or town for purposes of B.1. above if the proposed final agency action reduces the local option sales and use tax distributable to that individual county, city, or town by more than $10,000 below the amount of that tax that would have been distributable to that county, city, or town had the notice of deficiency not been reduced.

2. Upon notification from the Tax Commission of proposed final agency action, the authorized representative of the qualified county, city, or town has the right to review the record of the formal hearing and all Tax Commission records relating to the proposed final agency action in accordance with the provisions of Part F of this rule.

3. Within ten days following receipt of notice of a proposed final agency action, a qualified county, city, or town may intervene in the Tax Commission proceeding by filing a notice of intervention with the Tax Commission.

4. Within 20 days after filing a notice of intervention, if a qualified county, city, or town objects to the proposed final agency action in whole or in part, it will file with the Tax Commission a petition for reconsideration setting out all facts, arguments and authorities in support of its contention that the proposed final agency action is erroneous and shall serve copies of the petition on the taxpayer and the appropriate Tax Commission division.

5. The taxpayer and the appropriate Tax Commission division may each file a response to the petition for reconsideration filed by a qualified county, city, or town within 20 days of receipt of the petition for reconsideration.

6. After consideration of the petition for reconsideration and any response, and any further proceedings it deems appropriate, the Tax Commission may affirm, modify, or amend its proposed final agency action. The taxpayer and any qualified county, city, or town that has filed a petition for reconsideration may appeal the final agency action in accordance with applicable statutes and rules.

C. Counties, cities, and towns shall only have such notice of and such rights to intervene in or to appeal from a proposed final agency action of the Tax Commission in sales and use tax cases as are provided herein.

D. Counties, cities, and towns are subject to the confidentiality provisions of Section 59-1-403(1) and (5) and standards as set forth in Section 59-2-206 concerning all Tax Commission taxpayer sales and use tax records to which they are granted access.

E. Counties, cities, and towns shall be provided such information regarding sales and use tax collections as is necessary to verify that the local sales and use tax revenues collected by the Tax Commission are distributed to each county, city, and town in accordance with Sections 59-12-205 and 59-12-206, including access to the Tax Commission's reports of vendor sales, sales tax distribution reports and breakdown of local revenues.

F. When a county, city, or town objects to a proposed final agency action of the Tax Commission pursuant to the provisions of Part A, of this rule, the authorized representative of a county, city, or town shall, subject to the confidentiality provisions of Part D, have access to such Tax Commission sales and use tax records as is necessary for the county, city, or town to contest the Tax Commission's final agency action.

R865. Tax Commission, Auditing.
R865-13G. Motor Fuel Tax.
R865-13G-1. Carrier's Reports of Motor Fuel Deliveries Pursuant to Utah Code Ann. Section 59-13-208.

A. Carrier means every individual, firm, partnership, group, or corporation importing or transporting motor fuels into the state of Utah by means of conveyance, whether gratuitously, for hire, or otherwise. It includes both common and private carriers, as those terms are commonly used.

B. Every carrier delivering motor fuels, as defined in Utah Code Ann. Section 59-13-102, within this state must submit written reports of all deliveries from outside Utah. The Tax Commission will furnish forms and the forms must be submitted on or before the last day of each month to cover fuel imported during the previous month.

R865-13G-3. Export Sales Pursuant to Utah Code Ann. Section 59-13-201.

A. Sales and deliveries of motor fuel, by a Utah licensed distributor are exempt, provided one of the following requirements is met:

1. delivery is made to a point outside this state by a common or contract carrier to a Utah licensed distributor;

2. delivery is made to a point outside this state in a vehicle owned and operated by a Utah licensed distributor;

3. delivery is made at a point in or outside this state to a distributor or importer licensed in another state for use or sale in that state; or

4. delivery is made, in a drum or similar container, at a point in the state of Utah to a person for use in another state.

B. Each export sale must be supported by records that disclose the following information.

1. If sold to a licensed distributor, records shall show the date exported, the consignee or purchaser, and the destination of the motor fuel.

2. If the exporter is not a licensed distributor, credit must be claimed through a licensed distributor and the following requirements must be met:

(a) the exporter must furnish a licensed distributor with a completed Form TC-112 Proof of Exportation -- Motor Fuel, showing the date, the purchaser or consignee, and the destination of the motor fuel;

(b) the licensed distributor shall make note of the date this information is furnished and make claim for credit due on the motor fuel return for the same period in which the Form TC-112 was received;

(c) claims for credit or refund must be made within 180 days from date of export, whether the claim is made through a licensed distributor or directly to the Tax Commission; all persons authorized to do so must file a claim directly with the Tax Commission; and

C. motor fuel delivered into the fuel tank or auxiliary fuel tank of any vehicle owned or operated by a resident or a nonresident of this state is taxable.

R865-13G-5. Sales to Licensed Distributors Pursuant to Utah Code Ann. Sections 59-13-203.1 and 59-13-204.

(1)(a) A motor fuel dealer engaged in the business of selling motor fuel for resale in wholesale quantities may elect to become a licensed distributor under the provisions of Sections 59-13-203.1 and 59-13-204.

(b) License and bond requirements contained in Section 59-13-203.1 must be fulfilled when a dealer makes this election.

(2) A licensed distributor wishing to purchase motor fuel without payment of tax at the time of purchase must furnish each of the distributor's suppliers with a signed letter containing the following information:

(a) a statement advising that the purchaser is the holder of a valid motor fuel tax license;

(b) the number of the license; and

(c) a statement that the purchaser will assume the responsibility and liability for the payment of motor fuel tax on all future purchases of motor fuel.

(3) The letter from the purchaser must be retained by the seller as part of the seller's permanent records.

R865-13G-6. Product Considered Exempt Pursuant to Utah Code Ann. Section 59-13-210.

A. Volatile or inflammable liquids which qualify as motor fuels under Utah laws but which in their present state are not usable in internal combustion engines and in fact are not used as motor fuels in internal combustion engines are exempt if sold in bulk quantities of not less than 1,000 gallons at each delivery.

B. The licensed motor fuel importer, refiner, or licensed distributor shall submit specifications and other related data to the Tax Commission. If the Tax Commission agrees that the product is not a taxable motor fuel in its current state, it may be sold exempt provided it is determined that all of the product sold will be used for other than use in an internal combustion engine.

C. The Tax Commission may set reporting and verification requirements for nontaxable products if additional sales are made to the same purchaser for identical use. Failure to submit reports, verification, or specifications upon request by the Tax Commission will result in the product losing its exempt status.

D. Sellers and purchasers of the exempt product must maintain records to show the use of the product together with laboratory specifications to indicate its quality. These records must be available for audit by the Tax Commission.

E. Any exempt products subsequently sold in their original state for use as a motor fuel, or to be blended with other products to be used as a motor fuel, will be subject to the motor fuel tax at the time of sale.

R865-13G-8. Nonhighway Agricultural Use Pursuant to Utah Code Ann. Section 59-13-202.

A. Every person who purchases motor fuel within this state for the operation of farm engines, including self-propelled farm machinery, used solely for nonhighway agricultural purposes, is entitled to a refund of the Utah Motor Fuel Tax paid thereon.

1. Agricultural purposes relate to the cultivation of the soil for the production of crops, including: vegetables, sod crops, grains, feed crops, trees, fruits, nursery floral and ornamental stock, and other such products of the soil. The term also includes raising livestock and animals useful to man.

2. Refunds are limited to the person raising agricultural products for resale or performing custom agricultural work using nonhighway farm equipment. It is further limited to persons engaged in commercial farming activities rather than those engaged in a hobby or farming for personal use.

3. Fuel used in the spraying of crops by airplanes does not ordinarily qualify for refund since aviation fuel tax rather than motor fuel tax normally applies to the sale of this fuel.

R865-13G-9. Solid Hydrocarbon Motor Fuel Exemptions Pursuant to Utah Code Ann. Section 59-13-201.

A. Motor fuels refined in Utah from solid hydrocarbons located in Utah are exempt from the motor fuel tax. If any exempt product is blended into gasoline refined from oil or into gasohol produced by blending gasoline and alcohol, the resulting product will be exempt only to the extent of the exempt hydrocarbon fuel included in the final blended product.

1. For example, if the motor fuel produced from solid hydrocarbons is blended with product containing 90 percent motor fuel produced from oil, 10 percent of the total product will be exempt from the motor fuel tax. To the extent possible, the solid hydrocarbon exemption should be claimed by the

person refining or distilling the exempt product.

B. If the resulting blended motor fuel is exported from Utah or sold to a tax-exempt government agency, the exemption claimed as a result of the export or government sales must be reduced by the amount of exemption claimed for the motor fuel produced from solid hydrocarbons in Utah.

C. In order for this adjustment to be made in cases where the export or exempt sale is made by someone other than the refiner or blender, the invoice covering the sale of the fuel must designate the amount of exempt product included in the motor fuel sold. This must be shown whether sold to a licensed distributor or to an unlicensed distributor.

1. If the exempt, or partially exempt product is sold to a licensed distributor, the distributor must make the adjustment on the form used to claim credit for the government sale or the export.

2. If sold to an unlicensed distributor, the export form or government sale form submitted to a licensed distributor for a claim must contain a statement disclosing the amount of exempt motor fuel included.

3. If the records are insufficient to disclose the identity of the exempt purchaser on a direct basis, an adjustment shall be made multiplying the exempt product by a percentage factor representing the government and export sales portion of total motor fuel sales for the same period.

R865-13G-10. Exemption For Purchase of Motor Fuels by State and Local Government Agencies Pursuant to Utah Code Ann. Section 59-13-201.

(1) Sales to an Indian tribe for its exclusive use, acting in its tribal capacity, are exempt from taxation. Sales to individual tribal members, to Indian businesses operating on or off tribal territory, or to other nontribal organizations for personal use, retail sales purposes, or distribution to third parties do not qualify for the exemption for sales to Indian tribes.

(2) Licensed distributors may claim the exemption on sales to government agencies by taking the deduction on their motor fuel tax return for the month in which the sales occurred.

(a) Nonlicensed distributors making qualifying sales to government agencies must obtain credit for the exemption through the return of the licensed distributor supplying them with the fuel for the sales.

(b) A licensed distributor shall support each sale claimed as a deduction by retaining a copy of the sales invoice. The sales invoice must be in proper form and must contain sufficient information to substantiate the exemption status of the sale according to this rule.

(3) The fuel tax exemption for motor fuel sold to the United States, this state, or a political subdivision of this state shall be administered in the form of a refund if the government entity purchases the motor fuel after the tax imposed by Title 59, Chapter 13, Part 2 was paid. For refund procedures, see rule R865-13G-13.

R865-13G-11. Consistent Basis for Motor Fuel Reporting Pursuant to Utah Code Ann. Section 59-13-204.

A. Definitions:

1. "Gross gallon" means the United States volumetric gallon with a liquid capacity of 231 cubic inches.

2. "Net gallon" means the gross metered gallon with temperature correction in volume to 60 degrees Fahrenheit.

B. All Utah licensed distributors shall elect to calculate the tax liability on the Utah Motor Fuel Tax Returns on a consistent and strict gross gallon or net gallon basis. The election must be declared in writing and must be sent to the Tax Commission. The declared basis must be the exclusive basis used for 12 consecutive months. Any licensed distributor failing to make an election will default to the gross gallon basis and must then report and pay the excise tax on that basis. Requests for changes in the reporting basis must be submitted in writing and approved by the Tax Commission prior to any change in the reporting basis. Changes in basis may occur only on January 1 and must remain in effect 12 consecutive months.

C. If the election is made to purchase under the net gallon basis, all invoices, bills of lading, and motor fuel tax returns must include both the gross and net gallon amounts. Conversion from gross to net must conform to the ASTM-API-IP Petroleum Measurement Tables.

D. All transactions such as purchases, sales, or deductions, reported on the Motor Fuel Tax Return must be reported on a consistent and exclusive basis. The taxpayer shall not alternate the two methods on any return or during any 12-month period.

E. This rule shall take effect January 1, 1992.

R865-13G-13. Refund of Motor Fuel Taxes Paid Pursuant to Utah Code Ann. Section 59-13-201.

(1) Governmental entities entitled to a refund for motor fuel taxes paid shall submit a completed Utah Application for Fuel Tax Refund, form TC-116, to the commission.

(2) A government entity shall retain the following records for each purchase of motor fuel for which a refund of taxes paid is claimed:

(a) name of the government entity making the purchase;

(b) license plate number of vehicle for which the motor fuel is purchased;

(c) invoice date;

(d) invoice number;

(e) supplier;

(f) vendor location;

(g) fuel type purchased;

(h) number of gallons purchased; and

(i) amount of state motor fuel tax paid.

(3) Original records supporting the refund claim must be maintained by the governmental entity for three years following the year of refund.

R865-13G-15. Reduction in Motor Fuel Tax for Distributors Subject to Navajo Nation Fuel Tax Pursuant to Utah Code Ann. Section 59-13-201.

(1) The purpose of this rule is to provide procedures for administering the reduction of motor fuel tax authorized under Section 59-13-201.

(2) The reduction shall be in the form of a refund.

(3) The refund shall be available only for motor fuel:

(a) delivered to a retailer or consumer on the Utah portion of the Navajo Nation; and

(b) for which Utah motor fuel tax has been paid.

(4) The refund shall be available to a motor fuel distributor that is licensed as a distributor with the Office of the Navajo Tax Commission.

(5) The refund application may be filed on a monthly basis on the Utah Application for Fuel Tax Refund, form TC-116.

(6) Original records supporting the refund claim must be maintained by the distributor for three years following the year of refund. These records include:

(a) proof of payment of Utah motor fuel tax;

(b) proof of payment of Navajo Nation fuel tax;

(c) documentation that the motor fuel was delivered to a retailer or consumer on the Utah portion of the Navajo Nation; and

(d) a completed copy of the Navajo Tax Commission Monthly Fuel Distributor Tax Return, form 900, along with the required schedules and manifests.

R865-13G-17. Motor Fuel Tax License Pursuant to Utah Code Ann. Section 59-13-203.1.

(1) The holder of a license issued under Section 59-13-203.1 shall notify the commission:

(a) of any change of address of the business;
(b) of a change of character of the business; or
(c) if the license holder ceases to do business.

(2) The commission may determine that a person has ceased to do business or has changed that person's business address if:

(a) mail is returned as undeliverable as addressed and unable to forward;
(b) the person fails to file four consecutive motor fuel tax returns;
(c) the person fails to renew its annual business license with the Department of Commerce; or
(d) the person fails to renew its local business license.

(3) If the requirements of Subsection (2) are met, the commission shall notify the license holder that the license will be considered invalid unless the license holder provides evidence within 15 days that the license should remain valid.

(4) A person may request the commission to reopen a motor fuel tax license that has been determined invalid under Subsection (3).

(5) The holder of a license issued under Section 59-13-203.1 shall be responsible for any motor fuel tax, interest, and penalties incurred under that license whether those taxes and fees are incurred during the time the license is valid or invalid.

R865. Tax Commission, Auditing.
R865-14W. Mineral Producers' Withholding Tax.
R865-14W-1. Mineral Production Tax Withholding Pursuant to Utah Code Ann. Sections 59-6-101 through 59-6-104.

(1) Definitions.

(a) "Working interest owner" means any person who is the owner of an interest in oil, gas, other hydrocarbon substances, or all other metalliferous and nonmetalliferous minerals who is burdened with a share of the expense of developing and operating the property.

(b) "First purchaser" means the first person to pay for production after it is extracted from deposits in this state.

(c) "Person" means any natural person, company, corporation, association, partnership, joint venture, cooperative, estate, trust, receiver, or any other party or entity that has a working interest, royalty interest, overriding royalty interest, production payment, production payment including in-kind exchanges, or any other ownership interest entitled to production proceeds from deposits in this state.

(d) "Producer" as defined in Section 59-6-101 includes any non-operating working interest owner that makes payments to persons having an interest in minerals produced or extracted from deposits in this state.

(2) Advance mineral production payments that relate to, refer to, or concern production are subject to the mineral production tax withholding requirements.

(3) Each producer who disburses funds that are owed to any person owning a working interest, a royalty interest, overriding royalty interest, production payment or any other interest in minerals produced in this state, is subject to the withholding requirement of Section 59-6-102.

(4) Withholding requirements on further distributions are as follows:

(a) Unless otherwise provided by statute, each producer who disburses funds to any producer, working interest owner or any other interest owner must withhold five percent of the gross payment due if that producer or any other interest owner does not make further distributions. For producers or any other interest owners making further distributions, the procedures outlined in Subsection (4)(b) must be followed.

(b) The working interest owner or producer who makes further distributions must be licensed to withhold on the disbursements and is responsible for remitting the tax withheld each quarter. Upon approval by the Auditing Division of the Tax Commission, a working interest owner or producer who makes further distributions of the mineral production proceeds may furnish an exemption certificate approved by the Tax Commission to the producer or first purchaser.

(c) If an exemption certificate approved by the Auditing Division of the Tax Commission is not received, withholding is required.

(5) If a mineral is taken in kind by an interest owner of a mineral production property, the initial withholding responsibility rests with the first purchaser who receives the mineral. A person taking a mineral under an exchange agreement with the interest owner is considered to be the first purchaser and is subject to the requirement of withholding and remitting the tax on any payments made to the interest owner.

(6) Claiming credit for the tax withheld shall be accomplished as follows:

(a) Credit must be claimed for the tax withheld on a Utah individual income tax return or a Utah corporation franchise tax return.

(b) Taxpayers who are shareholders in a corporation taxed under Subchapter S of the Internal Revenue Code and are Utah residents, members of a Utah limited liability company, or members of a partnership doing business in this state may claim credit for the amount shown on the federal schedule K-1 or the Utah schedule K-1 as their percentage share of the tax withheld from Utah mineral production payments by the corporation, limited liability company, or partnership.

(c) An estate or trust is entitled to credit for the tax withheld in proportion to its share of federal distributable net income. The remaining credit must be passed through to the beneficiaries in proportion to their respective shares of federal distributable net income of the estate or trust. The beneficiaries may claim credit for the amount shown by the fiduciary on the federal schedule K-1 or the Utah schedule K-1 as their percentage share of the tax withheld from Utah mineral production payments.

(d) A corporation or individual taxpayer filing on a fiscal year ending other than December 31, must claim a credit for the withholding tax shown on Form TC-675R on the corporation franchise or individual income tax return required to be filed during the year following the December closing period of the Form TC-675R.

(7) The return prescribed by the Tax Commission for reporting the information specified in Section 59-6-103 may be obtained from the Tax Commission.

(8) If the producer, operator, or first purchaser fails to withhold the tax required under Section 59-6-102, and thereafter, the income subject to withholding is reported, and the resulting tax is paid by the recipient, any tax required to be withheld shall not be collected from the producer, operator, or first purchaser. However, the producer, operator, or first purchaser shall remain subject to penalties and interest on the total amount of taxes that should have been withheld.

59-6-104

R865. Tax Commission, Auditing.
R865-15O. Oil and Gas Tax.
R865-15O-1. Oil and Gas Severance Tax Pursuant to Utah Code Ann. Sections 59-5-102 and 59-5-104.

(1) Definitions

(a) "Person" means any individual, partnership, company, joint stock company, association, receiver, trustee, executor, administrator, guardian, fiduciary agent or other representative of any kind.

(b) "Operator" means any person engaged in the business of operating oil or gas wells, whether as a working interest owner, an independent contractor, or otherwise. An operator who is also a working interest owner shall be referred to as a producer.

(2) For purposes of filing the statement required under Section 59-5-104, if working interest owners engage in a unitization agreement or other business arrangement in which someone other than themselves are conducting the operations of an oil or gas lease,:

(a) Each working interest owner who receives a share of production in kind must file the statement required in Section 59-5-104. The operator of the well must inform the commission, on forms provided by the commission, of any party taking production in kind.

(b) A working interest owner may enter into an agreement with the lease operator requiring the lease operator to distribute the proceeds from the purchase or sale of oil and gas production to the working interest owners and any other parties claiming an interest through them.

(c) Working interest owners who are parties to the unitization agreement or other business arrangement may designate the operator as the person who shall file the statement on behalf of all working interest owners. For these arrangements to be recognized by this state, the designated operator must also be empowered to deduct, from the share of each interest owner, the tax imposed under Title 59, Chapter 5, Part 1.

(d) If a designated operator fails to file the tax return, or files a false, fraudulent, or otherwise inaccurate statement, or fails to pay the full amount of the tax due, the primary and ultimate liability for the statement and the tax shall rest solely upon the producers or interest owners.

(i) If the designated operator fails to file and pay the tax due, the state shall hold a hearing and is no longer bound by any arrangement between the parties.

(ii) Nothing in Subsections (2)(b) through (d) shall deprive the commission of the authority to require each working interest owner to file the required statement where the commission determines that a jeopardy situation exists.

(3) A person entering into an agreement during the taxable year shall file a return covering independent production prior to entering the agreement.

R865-15O-2. Stripper Well Exemption Pursuant to Utah Code Ann. Sections 59-5-101 and 59-5-102.

A. The annual stripper well exemption applies to producing oil wells and producing gas wells. The exemption cannot be applied to one product but not to another on the same well.

1. If a well is classified as an oil well and has associated gas production, the stripper classification is measured on the basis of oil production only.

2. If an oil well does not qualify as a stripper well on the basis of oil production, all production is taxable regardless of the amount of associated gas produced.

B. For purposes of applying the stripper exemption to oil wells, the twelve consecutive month period need not fall within a calendar year. For example, a well may produce above stripper production up until March of a year and then fall to stripper production beginning in April of the same year. Using April 1 as the beginning measuring point for average daily production, the well may qualify as a stripper from April 1 of the first year to March 31 of the following year. This means that for the first year, January through March production would be subject to the tax, and the next nine months of production would be exempt. The remaining three months of the exempt period falls within the second year.

C. The average daily production, for purposes of determining if an oil well is a stripper well, is based on the maximum rate of flow for the days the well actually produces. Days for which the well is shut in, or not otherwise producing, may not be included in determining the average daily production.

D. The average daily production, for purposes of determining if a gas well is a stripper well, shall be based on the maximum efficient rate of flow for the days the well actually produces. Days for which the well is shut in, or not otherwise producing, may not be included in determining average daily production.

1. If a gas well qualifies as a stripper well, the exemption begins on the first day of the 90-day measuring period and continues for the next 12 months. The annual exemption applies regardless of daily production following the 90-day measuring period.

R865. Tax Commission, Auditing.
R865-19S. Sales and Use Tax.
R865-19S-1. Sales and Use Taxes Distinguished Pursuant to Utah Code Ann. Section 59-12-103.

A. The tax imposed on amounts paid or charged for transactions under Title 59, Chapter 12 is a:

1. sales tax, if the tax is collected and remitted by a seller on the seller's in-state or out-of-state sales; or

2. use tax, if the tax is remitted by a purchaser.

B. The two taxes are compensating taxes, one supplementing the other, but both cannot be applicable to the same transaction. The rate of tax is the same.

R865-19S-2. Nature of Tax Pursuant to Utah Code Ann. Section 59-12-103.

A. The sales and use taxes are transaction taxes imposed upon certain retail sales and leases of tangible personal property, as well as upon certain services.

B. The tax is not upon the articles sold or furnished, but upon the transaction, and the purchaser is the actual taxpayer. The vendor is charged with the duty of collecting the tax from the purchaser and of paying the tax to the state.

R865-19S-4. Collection of Tax Pursuant to Utah Code Ann. Section 59-12-107.

(1) For purposes of this rule, "item" includes:

(a) an admission;

(b) a product transferred electronically;

(c) a service; and

(d) tangible personal property.

(2)(a) An invoice or receipt issued by a seller shall separately state the sales tax collected on the invoice or receipt.

(b) If an invoice or receipt issued by a seller does not show the sales tax collected as required in Subsection (2)(a), sales tax will be assessed on the seller or purchaser based on the amount of the invoice or receipt.

(3) Unless otherwise provided by statute, if a purchase consists of items that are exempt from sales tax and items that are subject to sales tax, the entire purchase is subject to sales tax unless the seller, at the time of the transaction:

(a) separately states the tax exempt items on the invoice; or

(b) is able to identify by reasonable and identifiable standards, from the books and records the seller keeps in the seller's regular course of business, the items exempt from sales tax.

(4) Unless otherwise provided by statute, if a purchase consists of two or more items that are subject to sales tax at different rates, the entire purchase is subject to sales tax at the higher tax rate unless the seller, at the time of the transaction:

(a) separately states on the invoice the items subject to sales tax at each of the different sales tax rates; or

(b) is able to identify by reasonable and identifiable standards, from the books and records the seller keeps in the seller's regular course of business, the items subject to sales tax at the lower tax rate.

(5) A seller that collects an excess amount of sales or use tax must either refund the excess to the purchasers from whom the seller collected the excess or remit the excess to the commission.

(a) A seller may offset an undercollection of tax on sales against any excess tax collected in the same reporting period.

(b) A seller may not offset an underpayment of tax on the seller's purchases against an excess of tax collected.

R865-19S-7. Sales Tax License Pursuant to Utah Code Ann. Section 59-12-106.

A.1. A separate sales and use tax license must be obtained for each place of business, but where more than one place of business is operated by the same person, one application may be filed giving the required information about each place of business.

2. Each license must be posted in a conspicuous place in the place of business for which it is issued.

B. The holder of a license issued under Section 59-12-106 shall notify the commission:

1. of any change of address of the business;

2. of a change of character of the business, or

3. if the license holder ceases to do business.

C. The commission may determine that a person has ceased to do business or has changed that person's business address if:

1. mail is returned as undeliverable as addressed and unable to forward;

2. the person fails to file four consecutive monthly or quarterly sales tax returns, or two consecutive annual sales tax returns;

3. the person fails to renew its annual business license with the Department of Commerce; or

4. the person fails to renew its local business license.

D. If the requirements of C. are met, the commission shall notify the license holder that the license will be considered invalid unless the license holder provides evidence within 15 days that the license should remain valid.

E. A person may request the commission to reopen a sales and use tax license that has been determined invalid under D.

F. The holder of a license issued under Section 59-12-106 shall be responsible for any sales and use tax, interest, and penalties incurred under that license whether those taxes and fees are incurred during the time the license is valid or invalid.

R865-19S-12. Filing of Returns Pursuant to Utah Code Ann. Sections 59-12-107 and 59-12-118.

(1)(a) Every person responsible for the collection of the tax under the act shall file a return with the Tax Commission whether or not sales tax is due.

(b) The return filed by a remote seller under Section 59-12-107(4) shall be the return the seller would have filed if the seller were not a remote seller.

(2) If the due date for a return falls on a Saturday, Sunday, or legal holiday, the return will be considered timely filed if it is received on the next business day.

(3) If a return is transmitted through the United States mail, a legible cancellation mark on the envelope, or the date of registration of certification thereof by a United States post office, is considered the date the return is filed.

(4) Sales and use tax returns shall be filed and paid monthly or quarterly with the following exceptions:

(a) New businesses that expect annual sales and use tax liability less than $1,000, shall be assigned an annual filing status unless quarterly filing status is requested.

(b)(i) Businesses currently assigned a quarterly filing status, in good standing and reporting less than $1,000 in tax for the preceding calendar year may be changed to annual filing status.

(ii) The Tax Commission will notify businesses, in writing, if their filing status is changed to annual.

(c)(i) Businesses assigned an annual filing status reporting in excess of $1,000 for a calendar year, will be changed to quarterly filing status.

(ii) The Tax Commission will notify businesses, in writing, if their filing status is changed to quarterly.

(5) Annual returns are due on January 31 following the calendar year end. The Tax Commission may revoke the annual filing status if sales tax collections are in excess of $1,000 or as a result of delinquent payment history.

R865-19S-13. Confidential Nature of Returns Pursuant to

Utah Code Ann. Section 59-12-109.

A. The returns filed are confidential and the information contained therein will not be divulged by the Tax Commission, its agents, clerks, or employees except in accordance with judicial order or upon proper application of a federal, state, or local agency. The returns will not be produced in any court proceeding except where such proceeding directly involves provisions of the sales tax act.

B. However, any person or his duly authorized representative who files returns under this act may obtain copies of the same upon proper application and presentation of proper picture identification.

R865-19S-16. Failure to Remit Excess Tax Collection Pursuant to Utah Code Ann. Section 59-12-107.

A. The amount paid by any vendor to the Tax Commission with each return is the greater of:

1. the actual tax collections for the reporting period, or
2. the amount computed at the rates imposed by law against the total taxable sales for that period.

B. Space is available on the return forms for inserting figures and the words "excess collections," if needed.

R865-19S-20. Basis for Reporting Tax Pursuant to Utah Code Ann. Section 59-12-107.

A. "Total sales" means the total amount of all cash, credit, installment, and conditional sales made during the period covered by the return.

B. Amounts shown on returns must include the total sales made during the period of the returns, and the tax must be reported and paid upon that basis.

C. Adjustments may be made and credit allowed for cash discounts, returned goods, and bad debts that result from sales upon which the tax has been reported and paid in full by a seller to the Tax Commission.

1. Adjustments and credits will be allowed only if the seller has not been reimbursed in the full amount of the tax except as noted in C.6.a) and can establish that fact by records, receipts or other means.
2. In no case shall the credit be greater than the sales tax on that portion of the purchase price remaining unpaid at the time the goods are returned, the account is charged off.
3. Any refund or credit given to the purchaser must include the related sales tax.

D. Tax is based upon the original price unless adjustments were made prior to the close of the reporting period in which the tax upon the sale is due. If the price upon which the tax is computed and paid is subsequently adjusted, credit may be taken against the tax due on a subsequent return.

E. If a sales tax rate change takes place prior to the reporting period when the seller claims the credit, the seller must adjust the taxable amount so that the amount of tax credited corresponds proportionally to the amount of tax originally collected.

F. Commissions to agents are not deductible under any conditions for purposes of tax computation.

R865-19S-22. Sales and Use Tax Records Pursuant to Utah Code Ann. Section 59-12-111.

A. Every retailer, lessor, lessee, and person doing business in this state or storing, using, or otherwise consuming in this state tangible personal property purchased from a retailer, shall keep and preserve complete and adequate records as may be necessary to determine the amount of sales and use tax for which such person or entity is liable. Unless the Tax Commission authorizes in writing an alternative method of record keeping, these records shall:

1. show gross receipts from sales, or rental payments from leases, of tangible personal property or services performed in connection with tangible personal property made in this state, irrespective of whether the retailer regards the receipts to be taxable or nontaxable;
2. show all deductions allowed by law and claimed in filing returns;
3. show bills, invoices or similar evidence of all tangible personal property purchased for sale, consumption, or lease in this state; and
4. include the normal books of account maintained by an ordinarily prudent business person engaged in such business, together with supporting documents of original entry such as: bills, receipts, invoices, and cash register tapes. All schedules or working papers used in connection with the preparation of tax returns must also be maintained.

B. Records may be microfilmed or microfiched. However, microfilm reproductions of general books of account--such as cash books, journals, voucher registers, ledgers, and like documents--are not acceptable as original records. Where microfilm or microfiche reproductions of supporting records are maintained--such as sales invoices, purchase invoices, credit memoranda and like documents--the following conditions must be met:

1. appropriate facilities must be provided for preservation of the films or fiche for the periods required and open to examination,
2. microfilm rolls and microfiche must be systematically filed, indexed, cross referenced, and labeled to show beginning and ending numbers and to show beginning and ending alphabetical listing of documents included,
3. upon request of the Tax Commission, the taxpayer shall provide transcriptions of any information contained on microfilm or microfiche which may be required for verification of tax liability,
4. proper facilities must be provided for the ready inspection and location of the particular records, including machines for viewing and copying the records,
5. a posting reference must appear on each invoice. Credit memoranda must carry a reference to the document evidencing the original transaction. Documents necessary to support exemptions from tax liability, such as bills of lading and purchase orders, must be maintained in such order so as to relate to exempt transactions claimed.

C. Any automated data processing (ADP) tax accounting system must be capable of producing visible and legible records for verification of taxpayer's tax liability.

1. ADP records shall provide an opportunity to trace any transaction back to the original source or forward to a final total. If detailed printouts are not made of transactions at the time they are processed, the systems must have the ability to reconstruct these transactions.
2. A general ledger with source references should be prepared to coincide with financial reports for tax reporting periods. In cases where subsidiary ledgers are used to support the general ledger accounts, the subsidiary ledgers should also be prepared periodically.
3. The audit trail should be designed so that the details underlying the summary accounting data may be identified and made available to the Tax Commission upon request. The system should be so designed that supporting documents--such as sales invoices, purchase invoices, credit memoranda, and like documents--are readily available.
4. A description of the ADP portion of the accounting system shall be made available. The statements and illustrations as to the scope of operations shall be sufficiently detailed to indicate:

(a) the application being performed;

(b) the procedures employed in each application (which, for example, might be supported by flow charts, block diagrams or other satisfactory description of the input or output

procedures); and

(c) the controls used to insure accurate and reliable processing and important changes, together with their effective dates, in order to preserve an accurate chronological record.

D. All records pertaining to transactions involving sales or use tax liability shall be preserved for a period of not less than three years.

E. All of the foregoing records shall be made available for examination on request by the Tax Commission or its authorized representatives.

F. Upon failure of the taxpayer, without reasonable cause, to substantially comply with the requirements of this rule, the Tax Commission may:

1. Prohibit the taxpayer from introducing in any protest or refund claim proceeding those microfilm, microfiche, ADP, or any records which have not been prepared and maintained in substantial compliance with the requirements of this rule.

2. Dismiss any protest or refund claim proceeding in which the taxpayer bases its claim upon any microfilm, microfiche, ADP, or any records which have not been prepared and maintained in substantial compliance with the requirements of this rule.

3. Enter such other order necessary to obtain compliance with this rule in the future.

4. Revoke taxpayer's license upon evidence of continued failure to comply with the requirements of this rule.

R865-19S-23. Exemption Certificates Pursuant to Utah Code Ann. Sections 59-12-106 and 59-12-104.

A. Taxpayers selling tangible personal property or services to customers exempt from sales tax are required to keep records verifying the nontaxable status of those sales.

B. The Tax Commission will furnish samples of acceptable exemption certificate forms on request. Stock quantities are not furnished, but taxpayers may reproduce samples as needed in whole or in part.

C. A seller may retain a copy of a purchase order, check, or voucher in place of the exemption certificate as evidence of exemption for a federal, state, or local government entity, including public schools.

D. If a purchaser is unable to segregate tangible personal property or services purchased for resale from tangible personal property or services purchased for the purchaser's own consumption, everything should be purchased tax-free. The purchaser must then report and pay the tax on the cost of goods or services purchased tax-free for resale that the purchaser uses or consumes.

E. A seller may provide evidence of a sales and use tax exemption electronically if the seller uses the standard sales and use tax exemption form adopted by the governing board of the agreement.

F. A seller shall obtain the same information for proof of a claimed exemption regardless of the medium in which the transaction occurs.

R865-19S-25. Sale of Business Pursuant to Utah Code Ann. Section 59-12-112.

A. Every sales tax license holder who discontinues business, is required to notify the Tax Commission immediately and return the sales tax license for cancellation.

B. Every person discontinuing business shall retain records for a period of three years unless a release from such provision is obtained from the Tax Commission.

R865-19S-30. Sale of a Vehicle or Vessel by a Person Not Regularly Engaged in Business Pursuant to Utah Code Ann. Section 59-12-104.

A. This rule provides guidance on the sale of a vehicle or vessel by a person not regularly engaged in business for purposes of Subsections 59-12-104(13) and (18).

B. For purposes of calculating sales and use tax on the sale of a vehicle where no trade in was involved, the bill of sale or other written evidence of value shall contain the names and addresses of the purchaser and the seller, and the sales price and vehicle identification number of the vehicle.

C. For purposes of calculating sales and use tax on the sale of a vehicle when the seller has received a trade-in vehicle as payment or partial payment, the bill of sale or other written evidence of value shall contain all of the following:

1. the names and addresses of the buyer and the seller;
2. the purchase price of the vehicle;
3. the value allowed for the trade-in vehicle;
4. the net difference between the vehicle traded and the vehicle purchased;
5. the signature of the seller; and
6. the vehicle identification numbers of the vehicle traded in and the vehicle purchased.

D. In the absence of a bill of sale or other written evidence of value, the fair market value of the vehicle or vessel shall be determined by industry accepted vehicle pricing guides.

R865-19S-31. Time and Place of Sale Pursuant to Utah Code Ann. Section 59-12-102.

A. Ordinarily, the time and place of a sale are determined by the contract of sale between the seller and buyer. The intent of the parties is the governing factor in determining both time and place of sale subject to the general law of contracts. If the contract of sale requires the seller to deliver or ship goods to a buyer, title to the property passes upon delivery to the place agreed upon unless the contract of sale provides otherwise.

R865-19S-32. Leases and Rentals Pursuant to Utah Code Ann. Section 59-12-103.

(1) The lessor shall compute sales or use tax on all amounts received or charged in connection with a lease or rental of tangible personal property.

(2) When a lessee has the right to possession, operation, or use of tangible personal property, the tax applies to the amount paid pursuant to the lease agreement, regardless of the duration of the agreement.

(3) Lessors of tangible personal property shall furnish an exemption certificate when purchasing tangible personal property subject to the sales or use tax on rental receipts. Costs of repairs and renovations to tangible personal property are exempt if paid for by the lessor since it is assumed that those costs are recovered by the lessor in his rental receipts.

(4) A person that furnishes tangible personal property along with an operator, as described in the definition of lease or rental in Section 59-12-102, provides a service and shall:

(a) pay sales and use tax at the time that person purchases the tangible personal property that is furnished under this Subsection (4); and

(b) collect sales and use tax at the time that person provides the service if the service is subject to sales and use tax.

R865-19S-33. Admissions and User Fees Pursuant to Utah Code Ann. Sections 59-12-102 and 59-12-103.

(1)(a) "Admission" means the right or privilege to enter into a place. Admission includes the amount paid for the right to use a reserved seat or any seat in an auditorium, theater, circus, stadium, schoolhouse, meeting house, or gymnasium to view any type of entertainment. Admission also includes the right to use a table at a night club, hotel, or roof garden whether such charge is designated as a cover charge, minimum charge, or any such similar charge.

(b) This applies whether the charge made for the use of the seat, table, or similar accommodation is combined with an admission charge to form a single charge, or is separate and

distinct from an admission charge, or is the sole charge.

(2) "Annual membership dues paid to a private organization" includes only those dues paid by members who, directly or indirectly, establish the level of the dues.

(3) "Season passes" include amounts paid to participate in specific activities, once annual membership dues have been paid.

(4) If the original admission charge carries the right to remain in a place, or to use a seat or table, or other similar accommodation for a limited time only, and an additional charge is made for an extension of such time, the extra charge is paid for admission within the meaning of the law. Where a person or organization acquires the sole right to use any place or the right to dispose of all of the admissions to any place for one or more occasions, the amount paid is not subject to the tax on admissions. Such a transaction constitutes a rental of the entire place and if the person or organization in turn sells admissions, sales tax applies to amounts paid for such admissions.

(5) Annual membership dues may be paid in installments during the year.

(6) Amounts paid for the following activities are not admissions or user fees:

(a) lessons, public or private;

(b) sign up for amateur athletics if the activity is sponsored by a state governmental entity, or a nonprofit corporation or organization, the primary purpose of which, as stated in the corporation's or organization's articles or bylaws, is the sponsoring, promoting, and encouraging of amateur athletics;

(c) sign up for participation in school activities. Sign up for participation in school activities excludes attendance as a spectator at school activities.

R865-19S-34. Admission to Places of Amusement Pursuant to Utah Code Ann. Section 59-12-103.

(1)(a) The amount paid for admission is subject to sales and use tax, even though that amount includes the right of the purchaser to participate in some activity.

(b) For example, the sale of a ticket for a ride upon a mechanical device is an admission to a place of amusement.

(2)(a) Additional charges for the rental of tangible personal property are subject to sales and use tax as the sale of tangible personal property.

(b) For example:

(i) towel rentals and swimming suit rentals at a swimming pool are subject to sales and use tax;

(ii) locker rental fees at a swimming pool are subject to sales tax if the lockers are tangible personal property.

R865-19S-35. Residential or Commercial Use of Gas, Electricity, Heat, Coal, Fuel Oils or Other Fuels Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

A. "Residential use" is as defined in Section 59-12-102, and includes use in nursing homes or other similar establishments that serve as the permanent residence for a majority of the patients because they are unable to live independently.

B. Explosives or material used as active ingredients in explosive devices are not fuels.

C. If a firm has activities that are commercial and industrial and all fuels are furnished at given locations through single meters, the predominant use of the fuels shall determine taxable status of the fuels.

D. Fuel oil and other fuels must be used in a combustion process in order to qualify for the exemption from sales tax for industrial use of fuels pursuant to Section 59-12-104.

R865-19S-37. Exempt Sales of Commercials, Audio Tapes, and Video Tapes by or to Motion Pictures Exhibitors and Distributors Pursuant to Utah Code Ann. Section 59-12-104.

A. The purpose of this rule is to clarify the sales tax exemption for sales of commercials, motion picture films, prerecorded audio program tapes or records, and prerecorded video tapes by a producer, distributor, or studio to a motion picture exhibitor, distributor, or commercial television or radio broadcaster.

B. Definitions.

1. "Commercials," "audio tapes," and "video tapes" mean tapes, films, or discs used by television or radio stations in regular broadcasting activities but do not include blank tapes purchased for newscasts or other similar uses by radio and television stations.

2. "Motion picture exhibitor" means any person engaged in the business of operating a theater or establishment in which motion pictures are regularly exhibited to the public for a charge.

3. "Distributor" means any person who purchases or sells motion picture films and video tapes that are used by a commercial television broadcaster or a motion picture exhibitor.

C. The sales tax exemption will be administered according to the provisions of Section 59-12-104 and this rule.

R865-19S-38. Isolated or Occasional Sales and Use Tax Exemption Pursuant to Utah Code Ann. Section 59-12-104.

(1) "Isolated or occasional sales and use tax exemption" means a sale that qualifies for the sales and use tax exemption for the sale of tangible personal property by a person:

(a) regardless of the number of sales of that tangible personal property by that person; and

(b) not regularly engaged in the business of selling that type of property.

(2)(a) Except as provided in Subsection (2)(b), sales made by officers of a court, pursuant to court orders, qualify for the isolated or occasional sales and use tax exemption.

(b) Sales made by trustees, receivers, or assignees in connection with the liquidation or conduct of a regularly established place of business do not qualify for the isolated or occasional sales and use tax exemption.

(c) Examples of sales made by officers of a court pursuant to court order, that qualify for the isolated or occasional sales and use tax exemption are sales made by sheriffs in foreclosing proceedings and sales of confiscated property.

(3) If a business regularly sells a type of property, sales of that type of property do not qualify for the isolated or occasional sales and use tax exemption, even if the primary purpose of the business is not the sale of that type of property. For example, the sale of repossessed radios or refrigerators by a finance company do not qualify for the isolated or occasional sales and use tax exemption.

(4)(a) Except as provided in Subsection (4)(b), sales of vehicles required to be titled or registered under the laws of this state do not qualify for the isolated or occasional sales and use tax exemption.

(b) The transfer of a vehicle where the ownership of the vehicle before and after the transfer is at least 80 percent the same qualifies for the isolated or occasional sales and use tax exemption.

(5) Sales that qualify for the isolated or occasional sales and use tax exemption include sales that occur as part of:

(a) the reorganization, sale, or liquidation of a business so long as those sales do not include items purchased exempt from sales tax as a sale for resale;

(b) a garage sale if:

(i) the person selling the items at the garage sale is not regularly engaged in selling that type of property; and

(ii) the items sold at the garage sale were not purchased exempt from sales tax as a sale for resale; and

(c) the sale of business assets that are:

(i) not purchased sales tax exempt by the business as a sale

for resale; and

(ii) a type of property not regularly sold by the business.

(6) An example of a sale that qualifies for the sales and use tax exemption under Subsection (5)(a) is a sale, even if it is one of a series of sales, to liquidate the fixtures and equipment of a manufacturing company.

(7) Examples of sales that qualify for the sales and use tax exemption under Subsection (5)(c) include the sale by a:

(a) grocery store of its cash registers, shelves, and fixtures;

(b) law firm of its furniture; and

(c) manufacturer of its used manufacturing equipment.

(8) Sales of items at public auctions generally do not qualify for the isolated or occasional sales and use tax exemption.

R865-19S-40. Exchange of Agricultural Produce For Processed Agricultural Products Pursuant to Utah Code Ann. Section 59-12-102.

A. When a raiser or grower of agricultural products exchanges his produce for a more finished product capable of being made from the produce exchanged with the processor, the more finished product is not subject to the tax within limitations of the value of the raised produce exchanged.

R865-19S-41. Sales to The United States Government and Its Instrumentalities Pursuant to Utah Code Ann. Sections 59-12-104 and 59-12-106.

A. Sales to the United States government are exempt if federal law or the United States Constitution prohibits the collection of sales or use tax.

B. If the United States government pays for merchandise or services with funds held in trust for nonexempt individuals or organizations, sales tax must be charged.

C. Sales made directly to the United States government or any authorized instrumentality thereof are not taxable, provided the sale is paid for directly by the federal government. If an employee of the federal government pays for the purchase with his own funds and is reimbursed by the federal government, that sale is not made to the federal government and does not qualify for the exemption.

D. Vendors making exempt sales to the federal government are subject to the recordkeeping requirements of Tax Commission rule R865-19S-23.

R865-19S-42. Purchases by the State of Utah, Its Institutions, and Its Political Subdivisions Pursuant to Utah Code Ann. Sections 59-12-104 and 59-12-104.6.

(1) "Lodging related purchase" is as defined in Section 59-12-104.6.

(2) A purchase made by the state, its institutions, or its political subdivisions such as counties, municipalities, school districts, drainage districts, irrigation districts, and metropolitan water districts is exempt from tax if the purchase is for use in the exercise of an essential governmental function.

(3) A purchase is considered made by the state, its institutions, or its political subdivisions if the purchase is paid for directly by the purchasing state or local entity. If an employee of a state or local entity pays for a purchase with the employee's own funds and is reimbursed by the state or local entity, that purchase is not made by the state or local entity and does not qualify for the exemption.

(4) An entity that qualifies under Subsections (2) and (3) for an exemption from sales and sales-related tax on a lodging related purchase:

(a) may not receive that exemption at the point of sale; and

(b) may apply for a refund of tax paid on forms provided by the commission.

(5) An entity that applies for a refund of sales and sales-related tax paid under Subsection (4)(b) shall:

(a) retain a copy of a receipt or invoice indicating:

(i) the amount of sales and sales-related tax paid for each purchase for which a refund of tax paid is claimed; and

(ii) the purchase was paid for directly by the entity; and

(b) maintain original records supporting the refund request for three years following the date of the refund and provide those records to the commission upon request.

R865-19S-43. Sales to or by Religious and Charitable Institutions Pursuant to Utah Code Ann. Section 59-12-104.

A. In order to qualify for an exemption from sales tax as a religious or charitable institution, an organization must be recognized by the Internal Revenue Service as exempt from tax under Section 501(c)(3) of the Internal Revenue Code.

B. Religious and charitable institutions must collect sales tax on any sales income arising from unrelated trades or businesses and report that sales tax to the Tax Commission unless the sales are otherwise exempted by law.

1. The definition of the phrase "unrelated trades or businesses" shall be the definition of that phrase in 26 U.S.C.A. Section 513 (West Supp. 1993), which is adopted and incorporated by reference.

C. Every institution claiming exemption from sales tax under this rule must submit form TC-160, Application for Sales Tax Exemption Number for Religious or Charitable Institutions, along with any other information that form requires, to the Tax Commission for its determination. Vendors making sales to institutions exempt from sales tax are subject to the requirements of Rule R865-19S-23.

R865-19S-44. Sales In Interstate Commerce Pursuant to Utah Code Ann. Section 59-12-104.

A. Sales made in interstate commerce are not subject to the sales tax imposed. However, the mere fact that commodities purchased in Utah are transported beyond its boundaries is not enough to constitute the transaction of a sale in interstate commerce. When the commodity is delivered to the buyer in this state, even though the buyer is not a resident of the state and intends to transport the property to a point outside the state, the sale is not in interstate commerce and is subject to tax.

B. Before a sale qualifies as a sale made in interstate commerce, the following must be complied with:

1. the transaction must involve actual and physical movement of the property sold across the state line;

2. such movement must be an essential and not an incidental part of the sale;

3. the seller must be obligated by the express or unavoidable implied terms of the sale, or contract to sell, to make physical delivery of the property across a state boundary line to the buyer;

C. Where delivery is made by the seller to a common carrier for transportation to the buyer outside the state of Utah, the common carrier is deemed to be the agent of the vendor for the purposes of this section regardless of who is responsible for the payment of the freight charges.

D. If property is ordered for delivery in Utah from a person or corporation doing business in Utah, the sale is taxable even though the merchandise is shipped from outside the state to the seller or directly to the buyer.

R865-19S-48. Sales Tax Exemption For Coverings and Containers Pursuant to Utah Code Ann. Section 59-12-104.

A. Sales of containers, labels, bags, shipping cases, and casings are taxable when:

1. sold to the final user or consumer;

2. sold to a manufacturer, processor, wholesaler, or retailer for use as a returnable container that is ordinarily returned to and reused by the manufacturer, processor, wholesaler, or retailer for storing or transporting their product; or

3. sold for internal transportation or accounting control purposes.

B. Returnable containers may include water bottles, carboys, drums, beer kegs for draft beer, dairy product containers, and gas cylinders.

1. Labels used for accounting, pricing, or other control purposes are also subject to tax.

C. For the purpose of this rule, soft drink bottles and similar containers that are ultimately destroyed or retained by the final user or consumer are not considered returnable and are exempt from the tax when purchased by the processor.

D. When tangible personal property sold in containers, for example soft drinks, is assessed a deposit or other container charge, that charge is subject to the tax. Upon refund of this charge, the retailer may take credit on a sales tax return if the tax is refunded to the customer.

R865-19S-49. Sales to and by Farmers and Other Agricultural Producers Pursuant to Utah Code Ann. Section 59-12-104.

(1)(a) For purposes of the sales and use tax exemption for tangible personal property used or consumed primarily and directly in farming operations, a person is engaged in "farming operations" if that person may deduct farm related expenses under Sections 162 or 212, Internal Revenue Code.

(b) To determine whether a person may deduct farm related expenses under Sections 162 or 212 of the Internal Revenue Code, the commission shall consider Treas. Reg. Sections 1.183-1 and 1.183-2.

(2) The purchase of feed, medicine, and veterinary supplies by a farmer or other agricultural producer qualify for the sales and use tax exemption for tangible personal property used or consumed primarily and directly in farming operations if the feed, medicine, or veterinary supplies are used:

(a) to produce or care for agricultural products that are for sale;

(b) to feed or care for working dogs and working horses in agricultural use;

(c) to feed or care for animals that are marketed.

(3) Fur-bearing animals that are kept for breeding or for their products are agricultural products.

(4) A vendor making sales to a farmer or other agricultural producer is liable for the tax unless that vendor obtains from the purchaser a certificate as set forth in Rule R865-19S-23.

(5) Poultry, eggs, and dairy products are not seasonal products for purposes of the sales and use tax exemption for the exclusive sale of seasonal crops, seedling plants, or garden, farm, or other agricultural produce sold during the harvest season.

R865-19S-50. Florists Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

A. Flowers, trees, bouquets, plants, and other similar items of tangible personal property are agricultural products and are, therefore, subject to the rules concerning the sale of those products as set forth in Rule R865-19S-49.

B. Where florists conduct transactions through a florist telegraphic delivery association, the following rules apply in computation of tax liability:

1. the florist must collect tax from the customer if the flower order is telegraphed to a second florist in Utah;

2. if a Utah florist receives an order pursuant to which he gives telegraphic instructions outside Utah, the Utah florist must collect tax from his customer upon the total charges;

3. if a Utah florist receives telegraphic instructions from a florist either within or outside of Utah for the delivery of flowers, the receiving vendor is not liable for the tax. In this instance, if the order originated in Utah, the tax is due from and payable by the Utah florist who first received the order.

R865-19S-51. Fabrication Labor in Connection With Retail Sales of Tangible Personal Property Pursuant to Utah Code Ann. Section 59-12-103.

A. The amount charged for fabrication that is part of the process of creating a finished article of tangible personal property must be included in the amount upon which tax is collected. This type of labor and service charge may not be deducted from the selling price used for taxation purposes even though billed separately to the consumer and regardless of whether the articles are commonly carried in stock or made up on special order.

B. Casting, forging, cutting, drilling, heat treating, surfacing, machining, constructing, and assembling are examples of steps in the process resulting in the creation or production of a finished article.

C. Sale of tangible personal property that is attached to real property, but remains personal property, is subject to sales tax on the retail selling price of the personal property, unless the tangible personal property attached to the real property is exempt from sales and use tax under Section 59-12-104.

D. This rule primarily covers manufacturing and assembling labor. Other rules deal with other types of labor and should be referred to whenever necessary.

R865-19S-53. Sale by Finance Companies Pursuant to Utah Code Ann. Section 59-12-102.

A. Sales of tangible personal property acquired by repossession or foreclosure are subject to tax. Persons making such sales must secure a license and collect and remit tax on the sales made.

R865-19S-54. Governmental Exemption Pursuant to Utah Code Ann. Section 59-12-104.

A. Tax does not apply to sales to the state of Utah, or to any political subdivision of the state, where such property is for use in the exercise of an essential governmental function. Also, certain sales are not taxed because of federal law or the United States Constitution.

B. Sales to the following state and federal agencies, institutions, and instrumentalities are exempt:

1. federal agencies and instrumentalities
2. state institutions and departments
3. counties
4. municipalities
5. school districts, public schools
6. special taxing districts
7. federal land banks
8. federal reserve banks
9. activity funds within the armed services
10. post exchanges
11. Federally chartered credit unions

C. The following are taxable:

1. national banks
2. federal building and loan associations
3. joint stock land banks
4. state banks (whether or not members of the Federal Reserve System)
5. state building and loan associations
6. private irrigation companies
7. rural electrification projects
8. sales to officers or employees of exempt instrumentalities

D. No sales tax immunity exists solely by virtue of the fact that the sale was made on federal property.

E. Sales made by governmental units are subject to sales tax.

R865-19S-56. Sales by Employers to Employees Pursuant to Utah Code Ann. Section 59-12-102.

A. Sales to employees are subject to tax on the amount charged for goods and taxable services. If tangible personal property is given to employees with no charge, the employer is deemed to be the consumer and must pay tax on his cost of the merchandise. Examples of this type of transaction are meals furnished to waitresses and other employees, contest prizes given to salesmen, merchandise bonuses given to clerks, and similar items given away.

R865-19S-57. Ice Pursuant to Utah Code Ann. Sections 59-12-102 and 59-12-103.

A. In general, sales of ice to be used by the purchaser for refrigeration or cooling purposes are taxable. Sales to restaurants, taverns, or the like to be placed in drinks consumed by customers at the place of business are sales for resale and are not taxable.

B. Where ice is sold in fulfillment of a contract for icing or reicing property in transit by railroads or other freight lines, the entire amount of the sale is taxable, and no deduction for services is allowed.

R865-19S-58. Materials and Supplies Sold to Owners, Contractors and Repairmen of Real Property Pursuant to Utah Code Ann. Sections 59-12-102 and 59-12-103.

(1) Sales of construction materials and other items of tangible personal property to real property contractors and repairmen of real property are generally subject to tax if the contractor or repairman converts the materials or items to real property.

(a) "Construction materials" include items of tangible personal property such as lumber, bricks, nails and cement that are used to construct buildings, structures or improvements on the land and typically lose their separate identity as personal property once incorporated into the real property.

(b) Fixtures or other items of tangible personal property such as furnaces, built-in air conditioning systems, or other items that are appurtenant to or incorporated into real property and that become an integral part of a real property improvement are treated as construction materials for purposes of this rule.

(2) The sale of real property is not subject to sales tax, nor is the labor performed on real property. For example, the sale of a completed home or building is not subject to the tax, but sales of materials and supplies to contractors for use in building the home or building are taxable transactions as sales to final consumers.

(a) The contractor or repairman who converts the personal property to real property is the consumer of tangible personal property regardless of the type of contract entered into--whether it is a lump sum, time and material, or a cost-plus contract.

(b) Except as otherwise provided in Subsection (2)(d), the contractor or repairman who converts the construction materials, fixtures or other items to real property is the consumer of the personal property whether the contract is performed for an individual, a religious or charitable institution, or a government entity.

(c) Sales of construction materials or fixtures made to religious or charitable institutions are exempt only if the items are sold as tangible personal property.

(d) Sales of materials are considered made to religious or charitable institutions and, therefore, exempt from sales tax, if:

(i) the religious or charitable institution makes payment for the materials directly to the vendor; or

(ii)(A) the materials are purchased on behalf of the religious or charitable institution.

(B) Materials are purchased on behalf of the religious or charitable institution if the materials are clearly identified and segregated and installed or converted to real property owned by the religious or charitable institution.

(e) Purchases not made pursuant to Subsection (2)(d) are assumed to have been made by the contractor and are subject to sales tax.

(3) If the contractor or repairman purchases all materials and supplies from vendors who collect the Utah tax, no sales tax license is required unless the contractor makes direct sales of tangible personal property in addition to the work on real property.

(a) If direct sales are made, the contractor shall obtain a sales tax license and collect tax on all sales of tangible personal property to final consumers.

(b) The contractor must accrue and remit tax on all merchandise bought tax-free and converted to real property. Books and records must be kept to account for both material sold and material consumed.

(4) This rule does not apply to contracts where the retailer sells and installs personal property that does not become part of the real property. Examples of items that remain tangible personal property even when attached to real property are:

(a) moveable items that are attached to real property merely for stability or for an obvious temporary purpose;

(b) manufacturing equipment and machinery and essential accessories appurtenant to the manufacturing equipment and machinery;

(c) items installed for the benefit of the trade or business conducted on the property that are affixed in a manner that facilitates removal without substantial damage to the real property or to the item itself and

(d) telephone or communications equipment and associated wire and lines if the equipment, wire, and lines:

(i) are provided as part of a single transaction;

(ii) that are part of real property are an incidental portion of the transaction;

(iii) are primarily used for the operation of a telephone system or a communications system;

(iv) are installed for the benefit of the trade or business conducted on the property; and

(v) are attached to real property in a manner such that their removal from the real property does not cause substantial damage to the equipment, wire, or lines or to the real property to which they are attached.

R865-19S-59. Sales of Materials and Services to Repairmen Pursuant to Utah Code Ann. Section 59-12-103.

A. Sales of tangible personal property and services to persons engaged in repairing or renovating tangible personal property are for resale, provided the tangible personal property or service becomes a component part of the repair or renovation sold. For example, paint sold to a body and fender shop and used to paint an automobile is exempt from sales tax since it becomes a component part of the repair work.

1. Sandpaper, masking tape, and similar supplies are subject to sales tax when sold to a repairman since these items are consumed by the repairman rather than being sold to his customer as an ingredient part of the repair job. These items shall be taxed at the time of sale if it is known that they are to be consumed. However, if this is not determinable at the time of sale, these items should be purchased tax free, as set forth in Rule R865-19S-23 and sales tax reported on the repairman's sales tax return covering the period during which consumption takes place.

R865-19S-60. Sales of Machinery, Fixtures and Supplies to Manufacturers, Businessmen and Others Pursuant to Utah Code Ann. Section 59-12-103.

A. Unless specifically exempted by statute, sales of machinery, tools, equipment, and supplies to a manufacturer or producer are taxable.

B. Sales of furniture, supplies, stationery, equipment, appliances, tools, and instruments to stores, shops, businesses,

establishments, offices, and professional people for use in carrying on their business and professional activities are taxable.

C. Sales of trade fixtures to a business owner are taxable as sales of tangible personal property even if the fixtures are temporarily attached to real property.

1. Trade fixtures are items of tangible personal property used for the benefit of the business conducted on the property.

2. Trade fixtures tend to be transient in nature in that the fixtures installed in a commercial building may vary from one tenant to the next without substantial alteration of the building, and the building itself is readily adaptable to multiple uses.

3. Examples of trade fixtures include cases, shelves and racks used to store or display merchandise.

D. Sales described in A. through C. of this rule are sales to final buyers or ultimate consumers and therefore not sales for resale.

R865-19S-61. Meals Furnished Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

A. The following definitions apply to the sales and use tax exemption authorized under Section 59-12-104 for inpatient meals provided at a medical facility or nursing facility.

1. "Medical facility" means a facility:

a) described in SIC codes 8062 through 8069 of the 1987 Standard Industrial Classification Manual of the federal Executive Office of the President, Office of Management and Budget; and

b) licensed under Section 26-21-8.

2. "Nursing facility" means a facility:

a) described in SIC codes 8051 through 8059 of the 1987 Standard Industrial Classification Manual of the federal Executive Office of the President, Office of Management and Budget; and

b) licensed under Section 26-21-8.

B. The following definition applies to the sales and use tax exemption authorized under Section 59-12-104 for sales of meals served by an institution of higher education.

1. "Student meal plan" means an arrangement:

a) between an institution of higher education and a student;

b) available only to a student;

c) whose duration is the entire term, semester, or similar unit of study;

d) paid in advance of the term, semester, or similar unit of study; and

e) providing for specified meals at eating facilities of the institution of higher education.

C. Except as provided in Section 59-12-104, sales and use tax is imposed upon the amount paid for meals furnished by any restaurant, cafeteria, eating house, hotel, drug store, diner, private club, boarding house, or other place, regardless of whether meals are regularly served to the public.

D. Ingredients that become a component part of meals subject to tax are construed to be purchased for resale, and as such the purchase of those ingredients is exempt from sales and use tax.

E. Where a meal is given away on a complementary basis, the provider of the meal is considered to be the consumer of the items used in preparing the meal.

F. Meals served by religious or charitable institutions and institutions of higher education are not available to the general public if:

1. access to the restaurant, cafeteria, or other facility is restricted to:

a) in the case of a religious or charitable institution:

(1) employees of the institution;

(2) volunteers of the institution;

(3) guests of the institution; and

(4) other individuals that constitute a limited class of people; or

b) in the case of an institution of higher education:

(1) students of the institution;

(2) employees of the institution;

(3) guests of the institution; and

(4) other individuals that constitute a limited class of people; and

2. the restricted access is enforced.

G. Sales of meals at occasional church or charity bazaars or fund raisers, and other similar functions are considered isolated and occasional sales and therefore exempt from sales and use tax.

R865-19S-62. Meal Tickets, Coupon Books, and Merchandise Cards Pursuant to Utah Code Ann. Section 59-12-103.

A. Meal tickets, coupon books, or merchandise cards sold by persons engaged in selling taxable commodities or services are taxable, and the tax shall be billed or collected on the selling price at the time the tickets, books, or cards are sold. Tax is to be added at the subsequent selection and delivery of the merchandise or services if an additional charge is made.

R865-19S-63. Sales of Memorial Markers Pursuant to Utah Code Ann. Section 59-12-103.

A. Sales of tombstones and grave markers, which are embedded in sod or a concrete foundation, are considered to be improvements to real property. If the seller furnishes and installs the marker, tax applies to his cost of the marker and to his cost of installation material. If the seller does not install the marker, the transaction is a sale of tangible personal property and the seller must collect tax on the full selling price, including cutting, shaping, lettering, and polishing.

R865-19S-65. Newspapers Pursuant to Utah Code Ann. Section 59-12-103.

A. "Newspaper" means a publication that appears to be a newspaper in the general or common sense. In addition, the publication:

1. must be published at short intervals, daily, or weekly;

2. must not, when its successive issues are put together, constitute a book;

3. must be intended for circulation among the general public; and

4. must contain matters of general interest and report on current events.

B. Purchases of tangible personal property by a newspaper publisher are subject to sales and use tax if the property will be used or consumed in the printing or distribution of the newspaper.

C. A newspaper publisher may purchase tax free for resale any tangible personal property that becomes a component part of the newspaper.

1. Examples of tangible personal property that becomes a component part of the newspaper include newsprint, ink, staples, plastic or paper protective coverings, and rubber bands distributed with the newspaper.

D. Purchases of advertising inserts that will be distributed with a newspaper are exempt from sales and use tax if the inserts are identified with the name and date of distribution of the newspaper. The identification may include a multiple listing of all newspapers that will carry the insert and the corresponding distribution dates.

1. Advertising inserts that are not identified as provided in D. are exempt from sales and use tax if the newspaper maintains a log at its place of business that lists by date and name the inserts included in each publication. The log may reflect all inserts or only the inserts not otherwise identified with the newspaper in accordance with D.

R865-19S-66. Optometrists, Opticians, and Ophthalmologists Pursuant to Utah Code Ann. Section 59-12-103.

A. Optometrists and ophthalmologists are deemed to be persons engaged primarily in rendering personal services. These services consist of the examination and treatment of eyes. Glasses, contact lenses, or other tangible personal property such as sunglasses, or cleaning solutions sold by optometrists and ophthalmologists are taxable and tax must be collected from the patient or buyer. Invoices or receipts must show the charges for personal services separate from the charges for tangible personal property and the sales tax thereon. If an optometrist or ophthalmologist does not provide separate charges for personal services and sales of tangible personal property, sales tax shall be charged on the entire amount.

B. All sales of tangible personal property to optometrists or ophthalmologists for use or consumption in connection with their services are subject to sales or use tax.

C. Opticians are makers of or dealers in optical items and instruments and fill prescriptions written by optometrists and ophthalmologists. Opticians are engaged in the business of selling tangible personal property and personal services rendered by them are considered as merely incidental thereto. Opticians are required to collect the sales tax on all their sales of tangible personal property.

R865-19S-68. Premiums, Gifts, Rebates, and Coupons Pursuant to Utah Code Ann. Sections 59-12-102 and 59-12-103.

A. Donors that give away items of tangible personal property as premiums or otherwise are regarded as the users or consumers of those items and the sale to the donor is a taxable sale. Exceptions to this treatment are items of tangible personal property donated to or provided for use by exempt organizations that would qualify for exemption under R865-19S-43 or R865-19S-54 if a sale of such items were made to them. An item given away as a sales incentive is exempt to the donor if the sale of that item would have been exempt. An example is prescribed medicine given away by a drug manufacturer.

B. When a retailer making a retail sale of tangible personal property that is subject to tax gives a premium together with the tangible personal property sold, the transaction is regarded as a sale of both articles to the purchaser, provided the delivery of the premium is certain and does not depend upon chance.

C. Where a retailer is engaged in selling tangible personal property that is not subject to tax and furnishes a premium with the property sold, the retailer is the consumer of the premium furnished.

D. If a retailer accepts a coupon for part or total payment for a taxable product and is reimbursed by a manufacturer or another party, the total sales value, including the coupon amount, is subject to sales tax.

E. A coupon for which no reimbursement is received is considered to be a discount and the taxable amount is the net amount paid by the customer after deducting the value of the coupon.

F. If a retailer agrees to furnish a free item in conjunction with the sale of an item, the sales tax applies only to the net amount due. If sales tax is computed on both items and only the sales value of the free item is deducted from the bill, excess collection of sales tax results. The vendor is then required to follow the procedure outlined in R865-19S-16 and remit any excess sales tax collected.

G. Any coupon with a fixed price limit must be deducted from the total bill and sales tax computed on the difference. For example, if a coupon is redeemed for two $6 meals, but the value of the free meal is limited to $5, the $12 is rung up and the $5 deducted, resulting in a taxable sale of $7.

R865-19S-70. Sales Incidental To The Rendition of Services Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

A. Persons engaged in occupations and professions that primarily involve the rendition of services upon the client's person and incidentally dispense items of tangible personal property are regarded as the consumers of the tangible personal property dispensed with the services.

B. Physicians, dentists, beauticians, and barbers are examples of persons described in A.

R865-19S-72. Trade-ins and Exchanges Pursuant to Utah Code Ann. Section 59-12-102.

A. An even exchange of tangible personal property for tangible personal property is exempt from tax. When a person takes tangible personal property as part payment on a sale of tangible personal property, sales or use tax applies only to any consideration valued in money which changes hands.

B. For example, if a car is sold for $8,500 and a credit of $6,500 is allowed for a used car taken in trade, the sales or use tax applies to the difference, or $2,000 in this example. Subsequently, when the used car is sold, tax applies to the selling price less any trade-in at that time.

C. An actual exchange of tangible personal properties between two persons must be made before the exemption applies. For example, there is no exchange if a person sells his car to a dealer and the dealer holds the credit to apply on a purchase at a later date; there are two separate transactions, and tax applies to the full amount of the subsequent purchase if and when it takes place.

R865-19S-73. Trustees, Receivers, Executors, Administrators, Etc. Pursuant to Utah Code Ann. Section 59-12-103.

A. Trustees, receivers, assignees, executors, and administrators, who -- by virtue of their appointment -- operate, manage, or control a business making taxable sales or leases of tangible personal property, or performing taxable services, must collect and remit sales tax on the total taxable sales even though such sales are made in liquidation.

R865-19S-74. Vending Machines Pursuant to Utah Code Ann. Section 59-12-104.

A. Persons operating vending machines are deemed to be retailers and selling articles of tangible personal property. The total sales from vending machine operations are considered the total selling price of the tangible personal property distributed in connection with their operations and must be reported as the amount of sales subject to tax.

B. Persons operating vending machines selling food, beverages, and dairy products in which the proceeds of each sale do not exceed $1, and who do not report an amount equal to 150% of the cost of items as goods consumed, are subject to the requirements of A.

C. For purposes of the 150% of cost formula in Section 59-12-104(3), "cost" is defined as follows.

1. In the case of retailers, cost is the total purchase price paid for products, including any packaging and incoming freight.

2. In the case of a manufacturer, cost includes the following items:

a) acquisition costs of materials and packaging, including freight;

b) direct manufacturing labor; and

c) utility expenses, if a sales tax exemption has been granted on utility purchases.

D. Operators of vending machines, if they so desire, may divide the tax out and sell items at fractional parts of a cent, providing their records so indicate.

E. Where machines vending taxable items are owned by persons other than the proprietor of a place of business in which the machine is placed and the person owning the machine has control over the sales made by the machine, evidenced by collection of the money, the owner is required to secure a sales tax license. One license is sufficient for all such machines. A statement in substantially the following form must be conspicuously affixed upon each vending machine:

"This machine is operated under Utah Sales Tax License No. "

R865-19S-75. Sales by Photographers, Photo Finishers, and Photostat Producers and Engravers Pursuant to Utah Code Ann. Section 59-12-103.

A. Photographers, photofinishers, and photostat producers are engaged in selling tangible personal property and rendering services such as developing, retouching, tinting, or coloring photographs belonging to others.

1. Persons described in this rule must collect tax on all of the above services and on all sales of tangible personal property, such as films, frames, cameras, prints, etc.

B. Sales of tangible personal property by photoengravers, electrotypers, and wood engravers to printers, advertisers, or other persons who do not resell such property but use or consume it in the process of producing printed matter are taxable sales. The value or worth of the services or processing which go into their production is of no moment, and it is immaterial that each sale is upon a special order for a particular customer.

1. Electrotypes and engravings are manufactured articles of merchandise and are sold as such and not as a service. No deduction is allowed on account of the cost of the property sold, labor, service, or any other expense.

R865-19S-76. Painters, Polishers, and Car Washers Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

(1) Sales of paint, wax, or other material to persons engaged in the business of painting and polishing of tangible personal property are exempt as sales for resale if the paint, wax, or other material becomes a part of the customer's tangible personal property. However, the vendor of these items must be given a resale certificate as provided for in Rule R865-19S-23.

(2) Sales of soap, washing mitts, polishing cloths, spray equipment, sand paper, and similar items to painters, polishers, and car washes are sales to the final consumer and are subject to tax.

R865-19S-78. Service Plan Charges for Labor and Repair Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

(1) "Service plan" includes an extended warranty agreement or other prepaid arrangement.

(2)(a) Service plan charges for a future taxable repair are subject to sales tax.

(b) Sales tax must also be collected on any deductible charged to a customer for the customer's share of the repair done under the service plan.

(3)(a) Service plan charges for items of tangible personal property that are converted to real property are not taxable.

(b) Service plan charges for items of tangible personal property that are permanently attached to real property are treated as follows:

(i) service plan charges for labor are not taxable; and

(ii) service plan charges for parts are taxable unless those parts are exempt under Title 59, Chapter 12, Part 1, Tax Collection.

(4) Rule R865-19S-58 outlines the sales tax responsibility of a person that converts tangible personal property to real property.

R865-19S-79. Tourist Home, Hotel, Motel, or Trailer Court Accommodations and Services Defined Pursuant to Utah Code Ann. Sections 59-12-103, 59-12-301, 59-12-352, and 59-12-353.

A. The following definitions shall be used for purposes of administering the sales tax on accommodations and transient room taxes provided for in Sections 59-12-103, 59-12-301, 59-12-352, and 59-12-353.

1. "Tourist home," "hotel," or "motel" means any place having rooms, apartments, or units to rent by the day, week, or month.

2. "Trailer court" means any place having trailers or space to park a trailer for rent by the day, week, or month.

3. "Trailer" means house trailer, travel trailer, and tent trailer.

4. "Accommodations and services charges" means any charge made for the room, apartment, unit, trailer, or space to park a trailer, and includes charges made for local telephone, electricity, propane gas, or similar services.

R865-19S-80. Printers' Purchases and Sales Pursuant to Utah Code Ann. Section 59-12-103.

(1) Definitions.

(a)(i) "Pre-press materials" means materials that:

(B) are reusable;

(C) are used in the production of printed matter;

(D) do not become part of the final printed matter; and

(E) are sold to the customer.

(ii) Pre-press materials include film, magnetic media, compact disks, typesetting paper, and printing plates.

(b)(i) "Printer" means a person that reproduces multiple copies of images, regardless of the process employed or the name by which that person is designated.

(ii) A printer includes a person that employs the processes of letterpress, offset, lithography, gravure, engraving, duplicating, silk screen, bindery, or lettership.

(2) Purchases by a printer.

(a)(i) Purchases of tangible personal property by a printer are subject to sales and use tax if the property will be used or consumed by the printer.

(ii) Examples of tangible personal property used or consumed by the printer include conditioners, solvents, developers, and cleaning agents.

(b)(i) A printer may purchase tax free for resale any tangible personal property that becomes a component part of the finished goods for resale.

(ii) Examples of tangible personal property that becomes a component part of the finished goods for resale include glue, stitcher wire, paper, and ink.

(c) A printer may purchase pre-press materials tax free if the printer's invoice, or other written material provided to the purchaser, states that reusable pre-press materials are included with the purchase. A description and the quantity of the actual items used in the order is not necessary. The statement must not restrict the customer from taking physical possession of the pre-press materials.

(d) The tax treatment of a printer's purchase of graphic design services shall be determined in accordance with rule R865-19S-111.

(3) Sales by a printer.

(a) Except as provided in this Subsection (3), a printer shall collect sales and use tax on the following:

(i) charges for printed material, even though the paper may be furnished by the customer;

(ii) charges for envelopes;

(iii) charges for services performed in connection with the printing or the sale of printed matter, such as cutting, folding,

and binding;

(iv) charges for pre-press materials purchased tax exempt by the printer; and

(v) charges for reprints and proofs.

(b) Charges for postage are not subject to sales and use tax.

(c) Sales by a printer are exempt from sales and use tax if:

(i) the sale qualifies for exemption under Section 59-12-104; and

(ii) the printer obtains from the purchaser a certificate as set forth in rule R865-19S-23.

(d) If the printer's customer is purchasing printed material for resale, but will not resell the pre-press materials, the printer must collect sales and use tax on the pre-press materials.

(e) If printed material is shipped outside of the state, charges for pre-press materials are exempt from sales tax as a sale of goods sold in interstate commerce only if the pre-press materials are physically shipped out of state with the printed material. If pre-press materials are retained in the state by the printer for any reason, the pre-press materials do not qualify for the sales tax exemption for goods sold in interstate commerce, and as such, the printer must collect sales tax on the part of the transaction relating to the pre-press materials.

R865-19S-81. Sale of Art Pursuant to Utah Code Ann. Section 59-12-103.

A. Art dealers and artists selling paintings, drawings, etchings, statues, figurines, etc., to final consumers must collect tax, whether an object is sold from an inventory or is created upon special order. The value or worth of the services to produce the art object are an integral part of the value of the tangible personal property upon completion and no deduction for such services may be made in determining the amount which is subject to tax.

B. Paints, canvases, frames, sculpture ingredients, and items becoming part of the finished product may be purchased tax-free if used in a painting or other work of art for resale.

1. Brushes, easels, tools, and similar items are consumed by the artist, and tax must be paid on the purchase of these items.

R865-19S-82. Demonstration, Display, and Trial Pursuant to Utah Code Ann. Section 59-12-104.

A. Tangible personal property purchased by a wholesaler or a retailer and held for display, demonstration or trial in the regular course of business is not subject to tax.

Examples of this are a desk bought by an office supply firm and placed in a window display, or an automobile purchased by an auto dealer and assigned to a salesman as a demonstrator. Sales tax applies to any rental charges made to the salesman for use of a demonstrator.

B. Sales tax applies to these charges even though all or part of the charge may be waived if such waiver is dependent upon the salesman performing certain services or reaching a certain sales quota or some similar contingency.

C. Sales tax applies to items purchased primarily for company or personal use and only casually used for demonstration purposes.

1. For example, wreckers or service trucks used by a parts department, are subject to tax even though they are demonstrated occasionally. Also, automobiles assigned to nonsales personnel such as a service manager, an office manager, an accountant, an officer's spouse, or a lawyer are subject to tax.

a. For motor vehicle dealers using certain vehicles withdrawn from inventory for periods not exceeding one year, the tax liability is deemed satisfied if the dealer remits sales or use tax on each such vehicle based on its lease value while so used.

(1) Only motor vehicles provided or assigned to company personnel or to exempt entities qualify for this treatment. For vehicles donated to religious, charitable, or government institutions, see Rule R865-19S-68.

(2) The monthly lease value is the manufacturer's invoice price to the dealer, divided by 60.

(3) Records must be maintained to show when each vehicle is placed in use, to whom assigned or provided, lease value computation, tax remitted, when removed from service and when returned to inventory for resale.

(4) Vehicles used for periods exceeding one year are subject to tax on the dealer's acquisition cost.

2. An exception is an item held for resale in the regular course of business and used for demonstration a substantial amount of time. Records must be maintained to show the manner of demonstration involved if exemption is claimed.

D. Normally, vehicles will not be allowed as demonstrators if they are used beyond the new model year by a new-car dealer or if used for more than six months by a used-car dealer.

1. Tax will apply if these conditions are not met, unless it is shown that these guidelines are not applicable in a given instance. In this case consideration will be given to the circumstances surrounding the need for a demonstrator for a longer period of time.

R865-19S-83. Pollution Control Facilities Pursuant to Utah Code Ann. Section 59-12-104.

A. Since certification of a pollution control facility may not occur until a firm contract has been entered into or construction has begun, tax should be paid on all purchases of tangible personal property or taxable services that become part of a pollution control facility until the facility is certified, and invoices and records should be retained to show the amount of tax paid. Upon verification of the amount of tax paid for pollution control facilities and verification that a certificate has been obtained, the Tax Commission will refund the taxes paid on these purchases.

1. Claims for refund of tax paid prior to certification must be filed within 180 days after certification of a facility. Refund claims filed within this time period will have interest added at the rate prescribed in Section 59-1-402 from the date of the overpayment.

2. If claims for refund are not filed within 180 days after certification of a facility, it is assumed the delay was for investment purposes, and interest shall be added at the rate prescribed in Section 59-1-402 however, interest will not begin to accrue until 30 days after receipt of the refund request.

B. After the facility is certified, qualifying purchases should be made without paying tax by providing an exemption certificate to the vendor.

1. If sales tax is paid on qualifying purchases for certified pollution control facilities, it will be deemed that the overpayment was made for the purpose of investment. Accordingly, interest, at the rate prescribed in Section 59-1-402, will not begin to accrue until 30 days after receipt of the refund request.

C. In the event part of the pollution control facility is constructed under a real property contract by someone other than the owner, the owner should obtain a statement from the contractor certifying the amount of Utah sales and use tax paid by the contractor and the location of the vendors to whom tax was paid, and the owner will then be entitled to a refund of the tax paid and included in the contract.

D. The owner shall apply to the Tax Commission for a refund using forms furnished by the Tax Commission. The claim for refund must contain sufficient information to support the amount claimed for credit and show that the tax has in fact been paid.

E. The owner shall retain records to support the claim that the project is qualified for the exemption.

R865-19S-85. Sales and Use Tax Exemptions for Certain Purchases by a Manufacturing Facility Pursuant to Utah Code Ann. Section 59-12-104.

(1) Definitions:

(a) "Establishment" means an economic unit of operations, that is generally at a single physical location in Utah, where qualifying manufacturing processes are performed. If a business operates in more than one location (e.g., branch or satellite offices), each physical location is considered separately from any other locations operated by the same business.

(b) "Machinery and equipment" means:

(i) electronic or mechanical devices incorporated into a manufacturing process from the initial stage where actual processing begins, through the completion of the finished end product, and including final processing, finishing, or packaging of articles sold as tangible personal property. This definition includes automated material handling and storage devices when those devices are part of the integrated continuous production cycle; and

(ii) any accessory that is essential to a continuous manufacturing process. Accessories essential to a continuous manufacturing process include:

(A) bits, jigs, molds, or devices that control the operation of machinery and equipment; and

(B) gas, water, electricity, or other similar supply lines installed for the operation of the manufacturing equipment, but only if the primary use of the supply line is for the operation of the manufacturing equipment.

(c) "Manufacturer" means a person who functions within a manufacturing facility.

(2) The sales and use tax exemption for the purchase or lease of machinery and equipment by a manufacturing facility applies only to purchases or leases of tangible personal property used in the actual manufacturing process.

(a) The exemptions do not apply to purchases of items of tangible personal property that become part of the real property in which the manufacturing operation is conducted.

(b) Purchases of qualifying machinery and equipment are treated as purchases of tangible personal property under R865-19S-58, even if the item is affixed to real property upon installation.

(3) Machinery and equipment used for a nonmanufacturing activity qualify for the exemption if the machinery and equipment are primarily used in manufacturing activities. Examples of nonmanufacturing activities include:

(a) research and development;

(b) refrigerated or other storage of raw materials, component parts, or finished product; or

(c) shipment of the finished product.

(4) Where manufacturing activities and nonmanufacturing activities are performed at a single physical location, machinery and equipment purchased for use in the manufacturing operation are eligible for the sales and use tax exemption if the manufacturing operation constitutes a separate and distinct manufacturing establishment.

(a) Each activity is treated as a separate and distinct establishment if:

(i) no single SIC code includes those activities combined; or

(ii) each activity comprises a separate legal entity.

(b) Machinery and equipment used in both manufacturing activities and nonmanufacturing activities qualify for the exemption only if the machinery and equipment are primarily used in manufacturing activities.

(5) The manufacturer shall retain records to support the claim that the machinery and equipment are qualified for exemption from sales and use tax under the provisions of this rule and Section 59-12-104.

R865-19S-86. Monthly Payment of Sales Taxes Pursuant to Utah Code Ann. Section 59-12-108.

A. Definitions:

1. "Cash equivalent" means either:

a) cash;

b) wire transfer; or

c) cashier's check drawn on the bank in which the Tax Commission deposits sales tax receipts.

2. "Fiscal year" means the year commencing on July 1 and ending the following June 30.

3. "Mandatory filer" means a seller that meets the threshold requirements for monthly filing and remittance of sales taxes or for electronic funds transfer (EFT) remittance of sales taxes.

4. For purposes of the monthly filing and the electronic remittance of sales taxes, the term "tax liability for the previous year" means the tax liability for the previous calendar year.

B. The determination that a seller is a mandatory filer shall be made by the Tax Commission at the end of each calendar year and shall be effective for the fiscal year.

C. A seller that meets the qualifications for a mandatory filer but does not receive notification from the Tax Commission to that effect, is not excused from the requirements of monthly filing and remittance or EFT remittance.

D. Mandatory filers shall also file and remit any waste tire fees and transient room, resort communities, and tourism, recreation, cultural, and convention facilities taxes to the commission on a monthly basis or by EFT, respectively.

E. Sellers that are not mandatory filers may elect to file and remit their sales taxes to the commission on a monthly basis, or remit sales taxes by EFT, or both.

1. The election to file and remit sales taxes on a monthly basis or to remit sales taxes by EFT is effective for the immediate fiscal year and every fiscal year thereafter unless the Tax Commission receives written notification prior to the commencement of a fiscal year that the seller no longer elects to file and remit sales taxes on a monthly basis, or to remit sales taxes by EFT, respectively.

2. Sellers that elect to file and remit sales taxes on a monthly basis, or to remit sales taxes by EFT, are subject to the same requirements and penalties as mandatory filers.

F. Sellers that are mandatory filers may request deletion of their mandatory filer designation if they do not expect to accumulate a $50,000 sales tax liability for the current calendar year.

1. The request must be accompanied by documentation clearly evidencing that the business that led to the $50,000 tax liability for the previous year will not recur.

2. The request must be made prior to the commencement of a fiscal year.

3. If a seller's request is approved and the seller does accumulate a $50,000 sales tax liability, a similar request by that seller the following year shall be denied.

G. Sellers that are required to remit sales tax by EFT may, following approval by the Tax Commission, remit a cash equivalent in lieu of the EFT.

1. Approval for remittance by cash equivalent shall be limited to those sellers that are able to establish that remittance by EFT would cause a hardship to their organization.

2. Requests for approval shall be directed to the Deputy Executive Director of the Tax Commission.

3. Sellers that receive approval to remit their sales taxes by cash equivalent shall ensure that the cash equivalent is received at the Tax Commission's main office no later than three working days prior to the due date of the sales tax.

H. Sellers that are required to remit sales taxes by EFT,

but remit these taxes by some means other than EFT or a Tax Commission approved cash equivalent, are not entitled to reimbursement for the cost of collecting and remitting sales taxes and are subject to penalties.

I. Prior to remittance of sales taxes by EFT, a vendor shall complete an EFT agreement with the Tax Commission. The EFT Agreement shall indicate that all EFT payments shall be made in one of the following manners.

1. Except as provided in I.2., sellers shall remit their EFT payment by an ACH-debit transaction through the National Automated Clearing House Association (NACHA) system CCD application.

2. If an organization's bylaws prohibit third party access to its bank account or extenuating circumstances exist, a seller may remit its EFT payment by an ACH-credit with tax payment addendum transaction through the NACHA system CCD Plus application.

J. In unusual circumstances, a particular EFT payment may be accomplished in a manner other than that specified in I. Use of any manner of remittance other than that specified in I. must be approved by the Tax Commission prior to its use.

K. If a seller that is required to remit sales taxes by EFT is unable to remit a payment of sales taxes by EFT because the system for remitting payments by EFT fails, the seller may remit its sales taxes by cash equivalent. A seller shall notify the Waivers Unit of the Tax Commission if this condition arises.

R865-19S-87. Government-Owned Tooling and Equipment Exemption Pursuant to Utah Code Ann. Section 59-12-104.

The following definitions apply to the sales and use tax exemption for sales of certain tooling, special tooling, support equipment, and special test equipment.

(1) "Tooling" means jigs, dies, fixtures, molds, patterns, taps, gauges, test equipment, other equipment, and other similar manufacturing aids generally available as stock items.

(2) "Special Tooling" means jigs, dies, fixtures, molds, patterns, taps, gauges, other equipment and manufacturing aids, and all components of these items that are of such a specialized nature that without substantial modification or alteration their use is limited to the development or production of particular supplies or parts thereof or performing particular services.

(3) "Support equipment" means implements or devices that are required to inspect, test, service, adjust, calibrate, appraise, transport, safeguard, record, gauge, measure, repair, overhaul, assemble, disassemble, handle, store, actuate or otherwise maintain the intended functional operation status of an aerospace electronic system.

(4) "Special test equipment" means either single or multipurpose integrated test units engineered, designed, fabricated, or modified to accomplish special purpose testing in performing a contract. These testing units may be electrical, electronic, hydraulic, pneumatic, or mechanical. Or they may be items or assemblies of equipment that are mechanically, electrically, or electronically interconnected so as to become a new functional entity, causing the individual item or items to become interdependent and essential in performing special purpose testing in the development or production of peculiar supplies or services.

R865-19S-90. Telecommunications Service Pursuant to Utah Code Ann. Section 59-12-103.

(1) Taxable telecommunications service charges include subscriber access fees.

(2) Nontaxable telecommunications charges include:

(a) refundable subscriber deposits, interest, and late payment penalties;

(b) charges for interstate calls;

(c) telecommunications answering services received or relayed by a human operator;

(d) charges to repair subscriber equipment that is regarded as real property; and

(e) charges levied on subscribers to fund or subsidize special telecommunications services, including 911 service, special communications services for the deaf, and special telecommunications service for low income subscribers.

R865-19S-91. Sales of Tangible Personal Property to Government Project Managers and Supply Contractors Pursuant to Utah Code Ann. Sections 59-12-102, 59-12-103, and 59-12-104.

A. Sales of tangible personal property or services as defined in Sections 59-12-102 and 59-12-103 to federal, state, or municipal government facilities managers or supply contractors, who are not employees or agents of that government entity, are subject to sales or use tax if the manager or contractor uses or consumes the property. Tax is due even though a contract vests title in the government.

B. A person qualifies as an agent for purchasing on behalf of a government entity if the person and the government entity enter into a contract that includes the following conditions:

1. The person is officially designated as the government entity's purchasing agent by resolution of the government entity;

2. The person identifies himself as a purchasing agent for the government entity;

3. The purchase is made on purchase orders that indicate the purchase is made by or on behalf of the government entity and the government entity is responsible for the purchase price;

4. The transaction is approved by the government entity; and

5. Title passes directly to the government entity upon purchase.

C. If the government entity makes a direct payment to the vendor for the tangible personal property or services, the sale is made to the government entity and not to the facilities manager or the supply contractor. In that case, the sale is not subject to sales tax.

D. Certain purchases made by aerospace or electronic industry contractors dealing with the United States are exempted by Section 59-12-104(15) and further covered by R865-19S-87. Therefore, these industry purchases are not covered by this rule.

R865-19S-92. Computer Software and Other Related Transactions Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-211.

(1) "Computer-generated output" means the microfiche, microfilm, paper, discs, tapes, molds, or other tangible personal property generated by a computer.

(2) The sale, rental or lease of custom computer software constitutes a sale of personal services and is exempt from the sales or use tax, regardless of the form in which the software is purchased or transferred. Charges for services such as software maintenance, consultation in connection with a sale or lease, enhancements, or upgrading of custom software are not taxable.

(3) The sale of computer generated output is subject to the sales or use tax if the primary object of the sale is the output and not the services rendered in producing the output.

(4)(a) The provisions for determining the location of a transaction under Subsection (4)(b) apply if:

(i) a purchaser uses computer software;

(ii) there is not a transfer of a copy of the computer software to the purchaser; and

(iii) the purchaser uses the computer software at more than one location.

(b) The location of a transaction described in Subsection (4)(a) is:

(i) if the seller is required to collect and remit tax to the commission for the purchase, and the purchaser provides the seller at the time of purchase a reasonable and consistent

method for allocating the purchase to multiple locations, the location determined by applying that reasonable and consistent method of allocation; or

(ii) if the seller is required to collect and remit tax to the commission for the purchase , and the seller does not receive information described in Subsection (4)(b)(i) from the purchaser at the time of the purchase, the location determined in accordance with Subsections 59-12-211(4) and (5); or

(iii) if the purchaser accrues and remits sales tax to the commission for the purchase, the location determined:

(A) by applying a reasonable and consistent method of allocation; or

(B) in accordance with Subsections 59-12-211(4) and (5).

R865-19S-93. Waste Tire Recycling Fee Pursuant to Utah Code Ann. Section 19-6-808.

A. The waste tire recycling fee shall be paid by the retailer to the State Tax Commission at the same time and in the same manner as sales and use tax returns are filed. The sales tax account number will also be the recycling fee account number. A separate return form will be provided.

1. The tire recycling fee will be imposed at the same time the sales tax is imposed. For example, if tires are purchased for resale either as part of a vehicle sale or to be sold separately by a vehicle dealer, the recycling fee and the sales tax would be collected by the dealer at the time the vehicle is sold. If sales tax is paid to a tire retailer by a vehicle dealer when tires are purchased, the recycling fee will also be paid by the vehicle dealer to the tire retailer.

2. Where tires are sold to entities exempt from sales tax, the exempt entity must still pay the recycling fee.

B. The recycling fee is not considered part of the sales price of the tire and is not subject to sales or use tax.

C. Wholesalers purchasing tires for resale are not subject to the fee.

D. Tires sold and delivered out of state are not subject to the fee.

E. Tires purchased from out of state vendors are subject to the fee. The fee must be reported and paid directly to the Tax Commission in conjunction with the use tax.

R865-19S-94. Tips, Gratuities, and Cover Charges Pursuant to Utah Code Ann. Section 59-12-103.

(1) Restaurants, cafes, clubs, private clubs, and similar businesses must collect sales tax on tips or gratuities included on a patron's bill that are required to be paid.

(a) Tax on the required gratuity is due from a private club, even though the club is not open to the public.

(b) Voluntary tips left on the table or added to a credit card charge slip are not subject to sales tax.

(2) Cover charges to enter a restaurant, tavern, club or similar facility are taxable as an admission to a place of recreation, amusement or entertainment.

R865-19S-96. Transient Room Tax Collection Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-301.

A. Utah Code Ann. Section 59-12-301 authorizes any board of county commissioners to impose a transient room tax. The transient room tax shall be charged in addition to sales tax authorized in 59-12-103(1)(i).

B. The transient room tax shall be charged on the rental price of any motor court, motel, hotel, inn, tourist home, campground, mobile home park, recreational vehicle park or similar business where the rental period is less than 30 consecutive days.

C. The transient room tax is not subject to sales tax.

R865-19S-98. Sales and Use Tax Exemption for Vehicles, Off-highway Vehicles, and Boats Required to be Registered, and Boat Trailers and Outboard Motors Pursuant to Utah Code Ann. Section 59-12-104.

(1) "Use" means mooring, slipping, and dry storage as well as the actual operation of vehicles.

(2) An owner of a vehicle described in Subsections 59-12-104(9) or (31) may continue to qualify for the exemption provided by that section if use of the vehicle in this state is infrequent, occasional, and nonbusiness in nature.

(3) A vehicle is deemed not used in this state beyond the necessity of transporting it to the borders of this state if the vehicle is:

(a) inspected in this state; or

(b) tested for functionality in this state.

R865-19S-99. Sales and Use Taxes on Vehicles Purchased in Another State Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

No sales or use tax is due on vehicles purchased in another state by a resident of that state and transferred into this state if all sales or use taxes required by the prior state for the purchase of the vehicle have been paid. A valid, nontemporary registration card shall serve as evidence of payment.

R865-19S-100. Procedures for Exemption from and Refund of Sales and Use Taxes Paid by Religious and Charitable Institutions Pursuant to Utah Code Ann. Section 59-12-104.1.

A. For purposes of Section 59-12-104.1(2)(b)(iii), "contract" does not include a purchase order.

B. Religious and charitable institutions may apply to the Tax Commission for a refund of Utah sales and use taxes paid no more often than on a monthly basis. Refund applications should be returned to the Tax Commission by the tenth day of the month for a timely refund.

C. Applications for refund of sales and use taxes shall be made on forms provided by the Tax Commission.

D. Religious and charitable institutions shall substantiate requests for refunds of sales and use taxes paid by retaining a copy of a receipt or invoice indicating the amount of sales or use taxes paid for each purchase for which a refund of taxes paid is claimed.

E. All supporting receipts required by D. must be provided to the Tax Commission upon request.

F. Original records supporting the refund claim must be maintained for three years following the date of refund.

G. Failure to pay any penalties and interest assessed by the Tax Commission may subject the institution to a deduction from future refunds of amounts owed, or revocation of the institution's exempt status as a religious or charitable institution, or both.

R865-19S-101. Application of Sales Tax to Fees Assessed in Conjunction with the Retail Sale of a Motor Vehicle Pursuant to Utah Code Ann. Section 59-12-103.

State-mandated fees and taxes assessed in conjunction with the retail sale of a motor vehicle are not subject to the sales tax and must be separately identified and segregated on the invoice as required by Tax Commission rule R877-23V-14.

R865-19S-102. Calculation of Qualifying Exempt Electricity Sales to Ski Resorts Pursuant to Utah Code Ann. Section 59-12-104.

A. When the sale of exempt electricity to a ski resort is not separately metered and accounted for in utility billings, the ski resort shall identify a methodology for the calculation of exempt electricity purchases, and shall submit that methodology to Internal Customer Support, Customer Service Division, of the Tax Commission for approval prior to its use.

B. When exempt electricity is not separately metered and

accounted for in utility billings, a ski resort shall pay sales tax on all electricity at the time of purchase. The ski resort may then take a credit on its sales tax return for taxes paid on electricity that is determined to be exempt under this rule.

C. The provisions of this rule shall be retrospective to July 1, 1996.

R865-19S-103. Municipal Energy Sales and Use Tax Pursuant to Utah Code Ann. Sections 10-1-303, 10-1-306, and 10-1-307.

(1) Definitions.

(a) "Gas" means natural gas in which those hydrocarbons, other than oil and natural gas liquids separated from natural gas, that occur naturally in the gaseous phase in the reservoir are produced and removed at the wellhead in gaseous form.

(b) "Supplying taxable energy" means the selling of taxable energy to the user of the taxable energy.

(2) Except as provided in Subsection (3), the delivered value of taxable energy for purposes of Title 10, Chapter 1, Part 3, shall be the arm's length sales price for that taxable energy.

(3) If the arm's length sales price does not include all components of delivered value, any component of the delivered value that is not included in the sales price shall be determined with reference to the most applicable tariffed price of the gas corporation or electrical corporation in closest proximity to the taxpayer.

(4) The point of sale or use of the taxable energy shall normally be the location of the taxpayer's meter unless the taxpayer demonstrates that the use is not in a municipality imposing the municipal energy sales and use tax.

(5) An energy supplier shall collect the municipal energy sales and use tax on all component parts of the delivered value of the taxable energy for which the energy supplier bills the user of the taxable energy.

(6) A user of taxable energy is liable for the municipal energy sales and use tax on any component of the delivered value of the taxable energy for which the energy supplier does not collect the municipal energy sales and use tax.

(7) A user of taxable energy who is required to pay the municipal energy sales and use tax on any component of the delivered value of taxable energy shall remit that tax to the commission:

(a) on forms provided by the commission, and

(b) at the time and in the manner sales and use tax is remitted to the commission.

(8) A person that delivers taxable energy to the point of sale or use of the taxable energy shall provide the following information to the commission for each user for whom the person does not supply taxable energy, but provides only the transportation component of the taxable energy's delivered value:

(a) the name and address of the user of the taxable energy;

(b) the volume of taxable energy delivered to the user; and

(c) the entity from which the taxable energy was purchased.

(9) The information required under Subsection (8) shall be provided to the commission:

(a) for each user for whom, during the preceding calendar quarter, the person did not supply taxable energy, but provided only the transportation component of the taxable energy's delivered value; and

(b)(i) except as provided in Subsection (9)(b)(ii), at the time the person delivering the taxable energy files sales and use tax returns with the commission; or

(ii) if the person delivering the taxable energy files an annual information return under Subsection 10-1-307(5), at the time that annual information return is filed with the commission.

R865-19S-104. County Option Sales Tax Distribution Pursuant to Utah Code Ann. Section 59-12-1102.

A. The $75,000 minimum annual distribution required under Section 59-12-1102 shall be based on sales tax amounts collected by the counties from January 1 through December 31.

B. Any adjustments made to ensure the required minimum distribution shall be reflected in the February distribution immediately following the end of the calendar year.

R865-19S-108. User Fee Defined Pursuant to Utah Code Ann. Section 59-12-103.

A. For purposes of administering the sales or use tax on admission or user fees provided for in Section 59-12-103, "user fees" includes charges imposed on an individual for access to the following, if that access occurs at any location other than the individual's residence:

1. video or video game;
2. television program; or
3. cable or satellite broadcast.

B. The provisions of this rule are effective for transactions occurring on or after October 1, 1999.

R865-19S-109. Sales Tax Nature of Veterinarians' Purchases and Sales Pursuant to Utah Code Ann. Sections 59-12-103 and 59-12-104.

(1)(a) Purchases of tangible personal property by a veterinarian are exempt from sales and use tax if the property will be resold by the veterinarian.

(b) Except as provided in Subsection (5), a veterinarian must collect sales tax on tangible personal property that the veterinarian resells.

(2) Purchases of tangible personal property by a veterinarian are subject to sales and use tax if the property will be used or consumed in the veterinarian's practice.

(3) The determination of whether a veterinarian's purchase of food, medicine, or vitamins is a sale for resale or a purchase that will be used or consumed in the veterinarian's practice shall be made by the veterinarian.

(a) For food, medicine, or vitamins that the veterinarian will resell, the veterinarian shall comply with Subsection (1).

(b) For food, medicine, or vitamins that the veterinarian will use or consume in the veterinarian's practice, the veterinarian shall comply with Subsection (2).

(4) A veterinarian is not required to collect sales and use tax on:

(a) medical services;

(b) boarding services; or

(c) grooming services required in connection with a medical procedure.

(5) Sales of tangible personal property by a veterinarian are exempt from sales and use tax if:

(a) the sales are exempt from sales and use tax under Section 59-12-104; and

(b) the veterinarian obtains from the purchaser a certificate as set forth in rule R865-19S-23.

R865-19S-110. Advertisers' Purchases and Sales Pursuant to Utah Code Ann. Section 59-12-103.

A. "Advertiser" means a person that places advertisements in a publication, broadcast, or electronic medium, regardless of the name by which that person is designated.

1. A person is an advertiser only with respect to items actually placed in a publication, broadcast, or electronic medium.

B. All purchases of tangible personal property by an advertiser are subject to sales and use tax as property used or consumed by the advertiser.

C. The tax treatment of an advertiser's purchase of graphic design services shall be determined in accordance with rule R865-19S-111.

D. An advertiser's charges for placement of advertisements are not subject to sales and use tax.

R865-19S-111. Graphic Design Services Pursuant to Utah Code Ann. Section 59-12-103.

(1) Graphic design services are not subject to sales and use tax:

(a) if the graphic design is the object of the transaction; and

(b) even though a representation of the design is incorporated into a sample or template that is itself tangible personal property.

(2) Except as provided in Subsection (3), if a vendor provides both graphic design services and tangible personal property that incorporates the graphic design:

(a) there is a rebuttable presumption that the tangible personal property is the object of the transaction; and

(b) the vendor must collect sales and use tax on the graphic design services and the tangible personal property.

(3) A vendor that provides both graphic design services and tangible personal property that incorporates the graphic design is not required to collect sales tax on the graphic design services if the vendor subcontracts the production of the tangible personal property to an independent third party.

R865-19S-113. Sales Tax Obligations of Aircraft and Boat Tour Operators, and Other Sellers Providing Similar Services Pursuant to Utah Code Ann. Section 59-12-103.

(1) "Federal airway" shall be identical to the definition of Class E airspace in 14 C.F.R. 71.71 (2006), which is incorporated by reference.

(2) Amounts paid or charged for helicopter, airplane, or other aircraft tours that enter into airspace designated by the Federal Aviation Administration as a federal airway during the tour are exempt from the sales and use tax.

(a) The exemption described in Subsection (2) does not apply if the only time the aircraft enters a federal airway is prior to the commencement of the tour or after the tour ends.

(b) A tour is deemed to occur from the time a paying customer is picked up to the time the paying customer is dropped off at the final destination point.

(3) Amounts paid or charged for boat tours, scenic cruises, or other similar activities on the waters of the state are exempt from sales and use tax if the waters on which the tour, cruise, or other similar activity operates are used, by themselves or in connection with other waters, as highways for interstate commerce.

R865-19S-114. Items that Constitute Clothing Pursuant to Utah Code Ann. Section 59-12-102.

A. "Clothing" includes:
1. aprons for use in a household or shop;
2. athletic supporters;
3. baby receiving blankets;
4. bathing suits and caps;
5. beach capes and coats;
6. belts and suspenders;
7. boots;
8. coats and jackets;
9. costumes;
10. diapers, including disposable diapers, for children and adults;
11. ear muffs;
12. footlets;
13. formal wear;
14. garters and garter belts;
15. girdles;
16. gloves and mittens for general use;
17. hats and caps;
18. hosiery;
19. insoles for shoes;
20. lab coats;
21. neckties;
22. overshoes;
23. pantyhose;
24. rainwear;
25. rubber pants;
26. sandals;
27. scarves;
28. shoes and shoe laces;
29. slippers;
30. sneakers;
31. socks and stockings;
32. steel toed shoes;
33. underwear;
34. uniforms, both athletic and non-athletic; and
35. wearing apparel.

B. "Clothing" does not include:
1. belt buckles sold separately;
2. costume masks sold separately;
3. patches and emblems sold separately;
4. sewing equipment and supplies, including:
a) knitting needles;
b) patterns;
c) pins;
d) scissors;
e) sewing machines;
f) sewing needles;
g) tape measures; and
h) thimbles; and
5. sewing materials that become part of clothing, including:
a) buttons;
b) fabric;
c) lace;
d) thread;
e) yarn; and
f) zippers.

R865-19S-115. Items that Constitute Protective Equipment Pursuant to Utah Code Ann. Section 59-12-102.

"Protective equipment" includes:
A. breathing masks;
B. clean room apparel and equipment;
C. ear and hearing protectors;
D. face shields;
E. hard hats;
F. helmets;
G. paint or dust respirators;
H. protective gloves;
I. safety glasses and goggles;
J. safety belts;
K. tool belts; and
L. welders gloves and masks.

R865-19S-116. Items that Constitute Sports or Recreational Equipment Pursuant to Utah Code Ann. Section 59-12-102.

"Sports or recreational equipment" includes:
A. ballet and tap shoes;
B. cleated or spiked athletic shoes;
C. gloves, including:
(i) baseball gloves;
(ii) bowling gloves;
(iii) boxing gloves;
(iv) hockey gloves; and
(v) golf gloves;
D. goggles;
E. hand and elbow guards;

F. life preservers and vests;
G. mouth guards;
H. roller skates and ice skates;
I. shin guards;
J. shoulder pads;
K. ski boots;
L. waders; and
M. wetsuits and fins.

R865-19S-117. Use of Rounding in Determining Sales and Use Tax Liability Pursuant to Utah Code Ann. Section 59-12-118.

A. The computation of sales and use tax must be:
1. carried to the third place; and
2. rounded to a whole cent pursuant to B.
B. The tax shall be rounded up to the next cent whenever the third decimal place of the tax liability calculated under A. is greater than four.
C. Sellers may compute the tax due on a transaction on an:
1. item basis; or
2. invoice basis.
D. The rounding required under this rule may be applied to aggregated state and local taxes.

R865-19S-118. Collection of Municipal Telecommunications License Tax Pursuant to Utah Code Ann. Section 10-1-405.

A. The commission shall transmit monies collected under Title 10, Chapter 1, Part 4, Municipal Telecommunications License Tax Act:
1. monthly; and
2. by electronic funds transfer to the municipality that imposes the tax.
B. The commission shall conduct audits of the municipal telecommunications license tax with the same frequency and diligence as it does with the state sales and use tax.
C. The commission shall charge a municipality for the commission's services in an amount:
1. sufficient to reimburse the commission for the commission's cost of administering, collecting, and enforcing the municipal telecommunications license tax; and
2. not to exceed an amount equal to 1.5 percent of the municipal telecommunications license tax imposed by the ordinance of the municipality.
D. The commission shall collect, enforce, and administer the municipal telecommunications license tax pursuant to the same procedures used in the administration, collection, and enforcement of the state sales and use tax as provided in Subsection 10-1-405(1)(a).

R865-19S-120. Sales and Use Tax Exemption Relating to Film, Television, and Video Pursuant to Utah Code Ann. Section 59-12-104.

(1) The provisions of this rule apply to the sales and use tax exemption authorized under Section 59-12-104 for the purchase, lease, or rental of machinery or equipment by certain establishments related to film, television, and video if those purchases, leases, or rentals are primarily used in the production or postproduction of film, television, video, or similar media for commercial distribution.
(2) "Machinery or equipment" means tangible personal property eligible for capitalization under accounting standards.
(3)(a) "Tangible personal property eligible for capitalization under accounting standards" means tangible personal property with an economic life greater than one year.
(b) "Tangible personal property eligible for capitalization under accounting standards" does not include tangible personal property with an economic life of one year or less, even if that property is capitalized on the establishment's financial records.
(c) There is a rebuttable presumption that an item of tangible personal property is not eligible for capitalization if that property is not shown as a capitalized asset on the financial records of the establishment.
(4) Transactions that do not qualify for the sales tax exemption referred to in Subsection (1) include purchases, leases, or rentals of:
(a) land;
(b) buildings;
(c) raw materials;
(d) supplies;
(e) film;
(f) services;
(g) transportation;
(h) gas, electricity, and other fuels;
(i) admissions or user fees; and
(j) accommodations.
(5) If a transaction is composed of machinery or equipment and items that are not machinery or equipment, the items that are not machinery or equipment are exempt from sales and use tax if the items are:
(a) an incidental component of a transaction that is a purchase, lease, or rental of machinery or equipment; and
(b) not billed as a separate component of the transaction.
(6)(a) Except as provided in Subsection (6)(b), an item used for administrative purposes does not qualify for the exemption.
(b) Notwithstanding Subsection (6)(a), if an item is used both in the production or postproduction process and for administrative purposes, the item qualifies for the exemption if the primary use of the item is in the production or postproduction process.

R865-19S-121. Sales and Use Tax Exemptions for Certain Purchases by a Mining Facility Pursuant to Utah Code Ann. Section 59-12-104.

(1) Definitions.
(a) "Establishment" means a unit of operations, that is generally at a single physical location in Utah, where qualifying activities are performed. If a business operates in more than one location (e.g., branch or satellite offices), each physical location is considered separately from any other locations operated by the same business.
(b) "Machinery and equipment" means electronic or mechanical devices having an economic life of three or more years including any accessory that controls the operation of the machinery and equipment.
(2) The exemptions do not apply to purchases of items of tangible personal property that become part of the real property.
(3) Purchases of qualifying machinery and equipment are treated as purchases of tangible personal property under R865-19S-58, even if the item is affixed to real property upon installation.
(4) Machinery and equipment used for non-qualifying activities are eligible for the exemption if the machinery and equipment are primarily used in qualifying activities.
(5) The entity claiming the exemption shall retain records to support the claim that the machinery and equipment are qualified for exemption from sales and use tax under the provisions of this rule and Section 59-12-104.

R865-19S-122. Sales and Use Tax Exemptions for Certain Purchases by a Web Search Portal Establishment Pursuant to Utah Code Ann. Section 59-12-104.

(1) Definitions.
(a) "Establishment" means a unit of operations, that is generally at a single physical location in Utah, where qualifying activities are performed. If a business operates in more than one location (e.g., branch or satellite offices), each physical location is considered separately from any other locations operated by

the same business.

(b) "Machinery and equipment" means electronic or mechanical devices having an economic life of three or more years including any accessory that controls the operation of the machinery and equipment.

(c) "New or expanding establishment" means:

(i)(A) the creation of a new web search portal establishment in this state; or

(B) the expansion of an existing Utah web search portal establishment if the expanded establishment increases services or is substantially different in nature, character, or purpose from the existing Utah web search portal establishment.

(ii) The operator of a web search portal establishment who closes operations at one location in this state and reopens the same establishment at a new location does not qualify as a new or expanding establishment without demonstrating that the move meets the conditions set forth in Subsection (1)(c)(i).

(2) The exemption for certain purchases by a web search portal establishment does not apply to purchases of items of tangible personal property that become part of the real property.

(3) Purchases of qualifying machinery and equipment are treated as purchases of tangible personal property under R865-19S-58, even if the item is affixed to real property upon installation.

(4) Machinery and equipment used for non-qualifying activities are eligible for the exemption if the machinery and equipment are primarily used in qualifying activities.

(5) The entity claiming the exemption shall retain records to support the claim that the machinery and equipment are qualified for exemption from sales and use tax under the provisions of this rule and Section 59-12-104.

R865. Tax Commission, Auditing.
R865-20T. Tobacco Tax.
R865-20T-1. Assessment of Cigarette and Tobacco Products Tax Pursuant to Utah Code Ann. Sections 59-14-204 and 59-14-302.

A. The cigarette tax is a tax on the first purchase, use, storage, or consumption of cigarettes by a manufacturer, jobber, wholesaler, distributor, retailer, user, or consumer within the state.

B. If cigarettes are purchased outside the state for use, storage, or consumption within the state, the tax must be paid by the user, storer, or consumer.

C. The tobacco products tax is a tax on the first purchase, use, storage, or consumption of tobacco products by a manufacturer, wholesaler, jobber, distributor, retailer, user, storer, or consumer within the state.

D. No tax is due from nonresidents or tourists who import cigarettes or tobacco products for their own use while in the state.

R865-20T-3. Licensing of Cigarette and Tobacco-Products Dealers Pursuant to Utah Code Ann. Sections 59-14-202 and 59-14-301.

A. Each cigarette vending machine shall be licensed as a separate place of business, provided that only one machine needs to be licensed at any place of business where the licensee has more than one machine in operation.

1. The license shall be posted in a conspicuous place on the vending machine.
2. If a licensee operates more than one place of business, the application shall contain the required information about each place of business.
3. The application must be accompanied by the required fee for each place of business.

B. If a licensee's place of business changes, the licensee shall forward the license to the Tax Commission with a request for notation of the change in location.

C. A license under which business has been transacted has no redeemable value when the licensee ceases to transact business.

R865-20T-5. Bonding Requirements For Cigarette and Tobacco Products Dealers Pursuant to Utah Code Ann. Sections 59-14-210 and 59-14-301.

(1) Dealers who only sell tobacco products upon which the taxes imposed by this act have been paid by a previous seller are not required to post a bond.

(2) Subject to Subsections (3) and (4), the commission shall calculate the amount of a bond required under Title 59, Chapter 14, Cigarette and Tobacco Tax and Licensing ("Chapter 14"), on the basis of:

(a) for an applicant:

(i) commission estimates of the applicant's tax liability under Chapter 14; and

(ii) the amount of a tax owed under Chapter 14 by any of the following:

(A) the applicant;

(B) a fiduciary of the applicant; and

(C) a person for which the applicant is required to collect, truthfully account for, and pay over a tax under Chapter 14; and

(b) for a licensee:

(i) commission estimates of the licensee's tax liability under Chapter 14; and

(ii) the amount of a tax owed under Chapter 14 by any of the following:

(A) the licensee;

(B) a fiduciary of the licensee; and

(C) a person for which the licensee is required to collect, truthfully account for, and pay over a tax under Chapter 14.

(3) If the commission determines it is necessary to ensure compliance with Chapter 14, the commission may require a licensee to increase the amount of a bond filed with the commission.

(4) A licensee that does not purchase cigarette stamps on credit may not make any single purchase of cigarette stamps that exceeds 90% of the amount of the bond the licensee has filed with the commission.

R865-20T-7. Export Sales of Cigarette and Tobacco Products Pursuant to Utah Code Ann. Sections 59-14-205 and 59-14-401.

A. Sales of cigarettes and tobacco products to jobbers dealers outside the state are not subject to the taxes imposed by this act provided that physical delivery of the goods is made outside the state.

B. All export sales for which an exemption or refund is claimed must be supported by invoices and delivery tickets or bills of lading showing all of the following:

1. date of sale;
2. name and address of customer;
3. address to which delivered;
4. quantity and type of product sold.

R865-20T-8. Records Pertaining To Cigarette and Tobacco-Product Sales Pursuant to Utah Code Ann. Section 59-14-404.

A. It is the duty of manufacturers, jobbers, distributors, wholesalers, retailers, users, or consumers of cigarettes or tobacco products to keep records necessary to determine the amount of tax due on the sale, purchase, or consumption of those products.

B. All pertinent records must be preserved for a period of three years.

C. The records shall be available for inspection by the Tax Commission or its authorized agents at all times during normal business hours or at other times determined by mutual agreement.

R865-20T-9. Cigarette-Manufacturer Inventory Requirements Pursuant to Utah Code Ann. Section 59-14-205.

A. Inventories of cigarettes held by manufacturers in warehouses located in Utah may be delivered to wholesalers or jobbers without being stamped. A record of those deliveries must be kept by the manufacturer at its place of business in this state or at the warehouse. The record shall contain all of the following:

1. date of delivery;
2. the person to whom the cigarettes were delivered;
3. place of delivery;
4. quantity delivered.

B. The record must be available for inspection by the Tax Commission or its agents at any reasonable time.

C. If the merchandise is sold to retailers, consumers or persons other than wholesalers or jobbers, the manufacturer must qualify as a licensed dealer.

R865-20T-10. Procedures for the Revocation, Renewal, and Reinstatement of Licenses Issued Pursuant to Utah Code Ann. Sections 59-14-202, 59-14-203.5, and 59-14-301.5.

A. In order to renew a license issued under Sections 59-14-202 and 59-14-301, a licensee shall file form TC-38B, Cigarette and Tobacco Products License Renewal Application, with the Tax Commission on or before the last day of the month prior to the month in which the license expires.

1. The form shall be accompanied by the statutory renewal fee.

B. A license revoked pursuant to Section 26-42-103 shall

be revoked for a period of one year commencing on the date the commission receives notification to revoke by the enforcing agency.

C. In order to reinstate a license revoked or suspended, or allowed to expire, a licensee shall file form TC-69, Utah State Business and Tax Registration, with the Tax Commission.

1. The form shall be accompanied by the statutory reinstatement fee.

D. A revoked or suspended license may not be reinstated prior to the expiration of the revocation or suspension period.

R865-20T-11. Reporting of Imported Cigarettes Pursuant to Utah Code Ann. Section 59-14-212.

A. A manufacturer, distributor, wholesaler, or retail dealer required by Section 59-14-212 to provide the Tax Commission, on a quarterly basis, a copy of the importer's federal import permit and the customs form showing the tax information required by federal law:

1. is not required to enclose that information with the quarterly report;

2. shall retain that information in its records; and

3. at the request of the Tax Commission, provide copies of that information to the Tax Commission.

R865-20T-12. Definition of Counterfeit Tax Stamp Pursuant to Utah Code Ann. Section 59-14-102.

"Counterfeit tax stamp," for purposes of the definition of a counterfeit cigarette in Section 59-14-102, includes a cigarette stamp that has previously been affixed to another pack of cigarettes.

R865-20T-13. Calculation of Tax on Moist Snuff Pursuant to Utah Code Ann. Section 59-14-302.

(1) Moisture content, for purposes of ascertaining whether a tobacco product meets the definition of moist snuff, shall be the moisture content annually reported by the manufacturer to the United States Department of Health and Human Services.

(2)(a) Tax on moist snuff shall be calculated by multiplying the net weight as listed by the manufacturer, in ounces, of the taxable moist snuff by the tax rate for moist snuff required under Section 59-14-302.

(b) If the net weight includes a fractional part of an ounce, that fractional part of an ounce shall be included in the calculation.

(3) The calculation described in Subsection (2) shall be carried to three decimal places and rounded up to the nearest cent whenever the third decimal place of the calculation in Subsection (2) is greater than 4.

R865-20T-14. Directory of Cigarettes Approved for Stamping Pursuant to Utah Code Ann. Sections 59-14-603 and 59-14-607.

(1) The commission shall update the directory of cigarettes approved for stamping required under Section 59-14-603 on the first business day of each month.

(2) Additions or modifications of brand families shall be by supplemental certification delivered to the commission by the manufacturer no later than 30 days before the next scheduled monthly update of the directory.

(3) Approved brand family additions or modifications shall be made to the directory on the next scheduled monthly update only if the manufacturer submitted a complete and accurate supplemental certification with requested additions or modifications 30 days prior to the scheduled monthly directory update.

(4) If the manufacturer does not submit a complete and accurate supplemental certification to the commission within 30 days of the next scheduled monthly update, approved brand family additions or modifications will not be made to the directory until the following monthly update.

(5) Directory updates between the regularly scheduled monthly updates are generally only permitted to correct errors or omissions in the directory made by the commission.

R873. Tax Commission, Motor Vehicle.
R873-22M. Motor Vehicle.
R873-22M-2. Documentation Required and Procedures to Follow to Register or Title Certain Vehicles Pursuant to Utah Code Ann. Sections 41-1a-104 and 41-1a-108.

A. To title or register a vehicle previously registered in a nontitle state, an applicant must submit both of the following:

1. the last certificate of registration;

2. a lien search from the recording jurisdiction or an "Affidavit of Ownership" in lieu of the lien search.

B. To title or register a repossessed vehicle, an applicant must submit both of the following:

1. the outstanding certificate of title, with the lien recorded in favor of the repossessor;

2. an approved affidavit of repossession, signed by the lien holder recorded on the certificate of title.

C. To title or register a vehicle previously owned by the U.S. Government, an applicant must submit a Certificate of Release of a Motor Vehicle, Standard Form No. 97.

D. To title or register a vehicle foreclosed by advertisement, an applicant must submit each of the following:

1. a certificate of sale bearing the notarized signature of the person who conducted the sale. The certificate must contain the following information:

a. date of sale;

b. name of person to whom the vehicle was sold;

c. complete description of the vehicle;

d. amount due on the contract;

e. date that the amount due became delinquent; and

f. amount received from the sale of the vehicle.

2. a copy of the notice sent to the owner and lien holder of record;

3. proof that notice was published two consecutive weeks prior to sale. If the notice was not published in a newspaper, an affidavit of posting of notices must be furnished. Posting must be at least ten days prior to sale.

E. To title or register a vehicle transferred by divorce decree an applicant must submit each of the following:

1. a certified copy of the divorce decree;

2. the outstanding certificate of title;

3. the last registration certificate.

F. To title or register a vehicle when the current owner is declared incompetent, an applicant must submit each of the following:

1. the outstanding certificate of title, endorsed for transfer by the guardian;

2. the last registration certificate;

3. a certified copy of the court order appointing the guardian.

G. To title or register a vehicle purchased at impound auction, an applicant must submit a certificate of sale that contains the following information:

1. legal basis under which the vehicle was impounded and sold:

2. a complete description of the vehicle;

3. name of the purchaser;

4. the notarized signature of the state, city, or county official who conducted the sale.

H. To title or register a vehicle transferred pursuant to a power of attorney, an applicant must submit the properly notarized power of attorney to the Tax Commission.

I. To title or register a vehicle transferred from a deceased owner when a survivorship affidavit is not applicable, the applicant must submit the outstanding certificate of title and the last registration card. In addition, the applicant must submit one of the following:

1. a certified copy of the final decree of distribution;

2. an order from the court confirming sale;

3. an endorsement on the title by the administrator, executor, or personal representative with a certified copy of letters of administration, letters testamentary, or letters appointing a personal representative attached.

a. When the title is issued in joint ownership where the owners names are connected with "and" or a "/" the survivor may transfer ownership by endorsement only and by furnishing proof of death of the other joint owner.

J. The Tax Commission may issue a title or a dismantle permit upon receipt of a court order or upon receipt of an affidavit and surety bond when satisfactory documentary evidence of ownership is lacking and the applicant has exhausted all normal means of obtaining evidence of ownership.

1. The affidavit must contain each of the following:

a) a complete recital of facts explaining the absence of a negotiable title or current registration for nontitle states;

b) an explanation of how the vehicle was obtained and from whom;

c) a statement indicating any outstanding liens or encumbrances on the vehicle;

d) a statement indicating where the vehicle was last titled or registered;

e) a description of the vehicle;

f) any other items pertinent to the acquisition or possession of the vehicle.

2. The Tax Commission may issue a title or a dismantle permit upon receipt of an affidavit and an indemnification agreement holding the Tax Commission and its employees harmless from any and all liability resulting from the issuance of the title or dismantle permit if the vehicle satisfies each of the following conditions:

a) the vehicle is not a motorcycle;

b) the vehicle has a value of $1,000 or less at the time of application;

c) the vehicle is six model years old or older.

3. If the vehicle has a value of $1,000 or less at the time of application, and the vehicle is not more than six model years old, or the vehicle is a motorcycle, a title or dismantle permit may not be issued until the vehicle is physically examined by a qualified investigator appointed by the Tax Commission.

4. If the vehicle has a value in excess of $1,000, the Tax Commission may require a surety bond in addition to the affidavit. The amount of the surety bond may not exceed twice the fair market value of the vehicle as determined by the Tax Commission.

K. To title or register a specially constructed or rebuilt vehicle, an applicant shall furnish an affidavit of construction, explaining the acquisition of essential parts and the date construction was completed. The affidavit must be supported by bills of sale or invoices for the parts.

1. An application for an identification number must be completed. The assigned number shall be affixed to the vehicle and inspected by a peace officer or an authorized agent of the Tax Commission.

2. The vehicle make shall be designated as "SPCN" (specially constructed), and the year model shall be determined according to the date the construction was completed.

3. If satisfactory evidence of ownership is lacking, the procedure outlined in J. shall be followed.

4. In the case of a dune buggy or similar type vehicle where the complete running gear and chassis of another vehicle is used, the identification number of the vehicle used as the primary base of the rebuilt vehicle shall be used for identification and must correspond to the identification number on the surrendered certificate of title.

5. The rebuilt vehicle shall retain the manufacturer's name as it appeared on the surrendered title. However, the word "rebuilt" shall be placed on the application and on the face of the title issued by the Tax Commission. The type of body and vehicle model may be changed to more accurately describe the

vehicle. If a new body is used, the year model shall be determined by the date the rebuilding is complete. If only the body style has been altered or changed, the vehicle shall retain the year model stated on the surrendered title.

R873-22M-7. Transfer of License Plates and Registration for an Increase of Gross Laden Weight Pursuant to Utah Code Ann. Section 41-1a-701.

A. License plates and registration may not be transferred under any of the following conditions:

1. The license plates are lifetime trailer plates issued pursuant to Section 41-1a-228.

2. The newly acquired vehicle requires a different registration period from that of the vehicle previously owned.

B. License plates may be transferred only if the application for transfer is made in the name of the original registered owner, unless the owner's name has been changed by marriage, divorce, or court order.

C. Transferred license plates may not be displayed upon the newly acquired vehicle until the registration has been completed and a new registration card has been issued.

D. The expiration date on the new registration card shall be the same as that appearing on the original registration.

E. If registration is based on gross laden weight and the gross laden weight of a vehicle is increased during the registration year, additional registration fees shall be collected based on the following computations:

1. Subtract the registration fee for the current year from the registration fee for the increased weight.

2. Multiply that difference by the percentage of the year for which the vehicle will be registered at the increased weight.

F. The holder of a three-month registration who seeks to increase the gross laden weight of a vehicle shall pay the full three-month registration fee for the increased weight.

R873-22M-8. Expiration of Registration Pursuant to Utah Code Ann. Sections 41-1a-211 and 41-1a-215.

A. Registration issued for a period of three calendar months, six calendar months, or nine calendar months, shall expire at midnight on the last day of the third, sixth, or ninth calendar month from the date issued.

B. If an unexpired registration issued for three calendar months, six calendar months, or nine calendar months is being renewed, the expiration date shall be three calendar months, six calendar months or nine calendar months from the month the previous registration would have expired.

C. When a temporary permit is issued as authorized under Section 41-1a-211, the registration period shall begin on the first day of the calendar month in which the first temporary permit was issued.

R873-22M-11. Copies of Registration Cards Pursuant to Utah Code Ann. Section 41-1a- 214.

A. In lieu of an original registration card, a copy of a registration card may be carried in an intrastate commercial vehicle or a vehicle owned or leased by this state or any of its political subdivisions. Both the front and back of the registration card must be copied.

R873-22M-14. License Plates and Decals Pursuant to Utah Code Ann. Sections 41-1a-215, 41-1a-401, and 41-1a-402.

A. Except as provided under Section 41-1a-215(1), license plates shall be renewed on a yearly basis until new license plates are issued.

B. For all license plates, except vintage vehicle license plates, a month decal and year decal shall be issued upon the first registration of the vehicle. Upon each subsequent registration, the vehicle owner shall receive only a year decal to validate renewal. The registration decals shall be applied as follows:

1. Decals displayed on license plates with black lettering on a white background shall be applied to the lower left hand corner of the rear license plate.

2. Decals displayed on centennial license plates and regular issue license plates with blue lettering on a white background shall be applied to the upper left hand corner of the rear license plate.

3. Decals displayed on special group license plates shall be applied to the upper right hand corner of the rear license plate unless there is a plate indentation on the upper left hand corner of the license plate.

4. All registration decals issued for truck tractors shall be applied to the front license plate in the position described in either Subsection B.1. or B.2.

5. All registration decals issued for motorcycles shall be applied to the upper corner of the license plate opposite the word "Utah".

C. The month decal shall be displayed on the license plate in the left position, and the year decal in the right position.

D. The current year decal shall be placed over the previous year decal.

E. Whenever any license plate, month decal, or year decal is lost or destroyed, a replacement shall be issued upon application and payment of the established fees.

R873-22M-15. Assigned and Replacement Vehicle Identification Number System Pursuant to Utah Code Ann. Section 41-1a-801.

A. The Tax Commission provides a standard Vehicle Identification Number (VIN) plate for vehicles, snowmobiles, trailers, and outboard boat motors that have never had a distinguishing number or if the original VIN has been altered, removed, or defaced.

B. The owner of the unit will make application to the Tax Commission on form TC-162 for an assigned or replacement VIN. In the event the applicant has no title to the unit, the Motor Vehicle Division follows the procedure in Rule R873-22M-2, to determine ownership.

C. The vehicle may be subject to inspection and investigation. Upon determination of the validity of the application, a vehicle identification plate is issued.

1. In cases involving vehicles where the original plate has been removed or obliterated but the original factory number can be verified, a VIN plate is issued with the original VIN entered by means of an approved procedure.

2. In all other instances a prestamped VIN plate is issued bearing an official Utah assigned VIN.

3. The VIN plate must, under the supervision of the Tax Commission, be attached to the unit as follows:

a) passenger and commercial vehicles:

(1) primary location is on a portion of the left front door lock post;

(2) secondary location is on a portion of the firewall, either left or right side, whichever is most advantageous; (This location is to be selected only when the VIN plate cannot be attached to the lock posts.)

b) motorcycles, snowmobiles, and outboard motors:

(1) as near as possible to the original number location; (If an original number, the VIN plate shall be affixed to the headstock.)

c) trailers:

(1) primary location is on a portion of the right side of the tongue or drawbar near the body;

(2) secondary location is on a portion of the metal frame near the front right corner;

d) on units where it is not practical to install rivets, the VIN plate may be attached by adhesive only.

D. The Motor Vehicle Division is responsible for the

control, security, and distribution of the VIN plates and will keep the necessary records and require regular reports from designated branch offices.

E. Following are the specifications of the official Utah assigned identification plate and attachment accessories.

1. Size will be 1 inch x 3 inches x .003 inch deep etched to .002 inch with 1/8 inch radius corners.

2. Material will be color anodized aluminum foil.

3. Color will be blue background with silver lettering.

4. Backing will be laminated with permanent pressure sensitive adhesive.

5. Control numbers will be serialized with 1/8 inch permanent embossed or anodized numbers.

6. The state seal will be in the left center, with appropriate rivet areas designated.

7. The assigned number will be prestamped using the prefix of "UT." The number series to include one letter and five digits with the letter to identify the unit type as follows:

TABLE

a)	Passenger and Commercial	P00001
b)	Motorcycles	M00001
c)	Trailers	T00001
d)	Reconstructed vehicle	R00001
e)	Outboard Motors	E00001
f)	Snowmobiles	S00001

R873-22M-16. Authorization to Issue a Certificate of Title Pursuant to Utah Code Ann. Section 41-1a-104.

A. A lienholder who lawfully repossesses a vehicle may apply for a certificate of title by paying the title fee and filing all of the following documents:

1. the outstanding Utah certificate of title showing the lien recorded;

2. a notarized affidavit of repossession, signed by the lienholder of record;

3. an application for title, properly signed and notarized.

B. If the purpose of the certificate of title is to record a new lien, or to rerecord a lien, and there is no change in the registered owner, all of the following are required:

1. the outstanding Utah certificate of title showing a release of all prior liens;

2. an application for title, properly signed and notarized;

3. the title fee.

C. In order to issue a new certificate of title showing the assignee as the lienholder, an applicant shall submit all of the following:

1. the outstanding Utah certificate of title with the lien recorded;

2. an application for title showing the registered owner and the new lienholder;

3. the title fee.

D. In lieu of the required owner's signature under Subsection C.2., the application may be stamped "Assignment of Lien Pursuant to Section 41-1a-607."

R873-22M-17. Standards for State Impound Lots Pursuant to Utah Code Ann. Section 41-1a-1101.

A. An impound yard may be used by the Motor Vehicle Division and peace officers only if all of the following requirements are satisfied:

1. The yard must be identified by a conspicuously placed, well-maintained sign that:

a) is at least 24 square feet in size;

b) includes the business name, address, phone number, and hours of business; and

c) displays the impound yard identification number issued by the Motor Vehicle Division in characters at least four inches high.

2. The yard shall maintain a hard-surfaced storage area of concrete, black top, gravel, road base, or other similar material.

3. The yard must have adequate lighting.

4. A six-foot chain link or other similar fence that is topped with three strands of barbed wire or razor security wire must surround the yard.

5. Spacing between vehicles must be adequate to allow opening of vehicle doors without interfering with other vehicles or objects.

6. An office shall be located on the premises of the yard.

a) The yard office shall be staffed and open for public business during normal business hours, Monday through Friday, except for designated state and federal holidays.

b) If the yard maintains multiple storage areas, authorization may be requested from the Motor Vehicle Division to maintain a central office facility in a location not to exceed a 10 mile radius from any of its storage areas.

c) If a central office is approved under Subsection 6.b) above, the signs of all storage areas must provide the location of the office.

7. The yard shall provide compressed air and battery boosting capabilities at no additional cost.

B. Persons who can demonstrate an ownership interest in a car held at a state impound yard are allowed to enter the vehicle during normal business hours and remove personal property not attached to the vehicle upon signing a receipt for the property with the yard.

1. An individual has ownership interest in the vehicle if he:

a) is listed as a registered owner or lessee of the vehicle; or

b) has possession of the vehicle title.

2. An individual must show picture identification as evidence of his ownership interest.

3. The storage yard shall maintain a log of individuals who have been given access to vehicles for the purpose of removing personal property.

C. Impound yards holding five or less vehicles in a month may be required to tow those vehicles to another yard for the purpose of centralizing sales of vehicles or, at the discretion of the Motor Vehicle Division, be required to hold the vehicles until additional impounded vehicles may be included.

D. Operators of impound yards shall remove license plates from impounded vehicles prior to the time of sale and turn them over to the Tax Commission at the time the vehicles are sold.

E. The Motor Vehicle Division has the authority to review the qualifications of state impound yards to assure compliance with the requirements set forth in this rule. Any yard not in compliance shall be notified in writing and given 30 days from that notice to rectify any noncompliance. If no action or insufficient action is taken by the impound yard, the Motor Vehicle Division may order it to be suspended as a state impound yard. Any yard contesting suspension, or any yard directly and adversely affected by the Motor Vehicle Division's refusal to designate it a state impound yard, has the right to appeal that suspension to the Tax Commission.

R873-22M-20. Aircraft Registration Pursuant to Utah Code Ann. Sections 72-10-102, 72-10-109 through 72-10-112.

(1) The registration period for aircraft is from January 1 through December 31.

(2) The average wholesale value of an aircraft is obtained from the "average wholesale" column listed in the fall edition of the Aircraft Bluebook Price Digest in the year preceding the year of registration for all aircraft listed in that publication.

(3) The database maintained by the Division of Aeronautics shall include the following information for each aircraft:

(a) the name and address of the owner of the aircraft;

(b) the airport where the aircraft is hangered;
(c) the FAA number of the aircraft;
(d) the aircraft manufacturer or builder;
(e) the year of manufacture or the year the aircraft was completed and certified for air worthiness by the FAA;
(f) the aircraft model as identified by the manufacturer or builder; and
(g) the aircraft serial number.
(4) Aircraft not legally registered are subject to seizure and impound under the provisions of Section 72-10-112.
(5) The registration certificate shall be surrendered upon the sale of an aircraft or at the time of registration renewal. A duplicate certificate may be obtained for a fee.
(6) The Utah decal shall be displayed on the registered aircraft in accordance with instructions given with the decal. Decals must be applied and maintained in a manner that permits identification of the calendar-year expiration date and the registration number. In the event of loss or damage, a decal replacement shall be obtained for a fee.

R873-22M-22. Salvage Certificate and Branded Title Pursuant to Utah Code Ann. Sections 41-1a-522, 41-1a-1001, 41-1a-1004, and 41-1a-1009 through 41-1a-1011.

A. If a vehicle with an out-of-state branded title is roadworthy, a comparably branded Utah certificate of title may be issued upon proper application and payment of applicable fees.
B. The Utah registration of a vehicle qualifying for any of the following designations expires effective with that qualification or declaration and the title to that vehicle is restricted from that time:
1. salvage vehicle,
2. dismantled vehicle,
3. any vehicle for which a dismantling permit has been issued in accordance with Section 41-1a-1010;
4. any vehicle for which a certificate of abandoned and inoperable vehicle has been issued in accordance with Section 41-1a-1009; and
5. manufacturer buyback nonconforming vehicle.
C. For purposes of Section 41-1a-1001, the cost to repair or restore a vehicle for safe operation is the total cost shown on a certified and notarized repair order or estimate from an authorized representative of an insurance adjusting firm, or a bonded Utah automobile dealer or body shop. The repair order or estimate must be current at the time of application and must show all costs, including a detailed list of all parts, materials, and labor, required to repair the vehicle.

R873-22M-24. Salvage Vehicle Definitions Pursuant to Utah Code Ann. Sections 41-1a-1001 and 41-1a-1002.

A. "Cosmetic repairs" means repairs that are not necessary to promote the structural soundness or safety of the vehicle or to prevent accelerated wear or deterioration.
1. Cosmetic repairs include:
a) cracks or chips in windows if the vehicle will pass a safety inspection;
b) paint chips or scratches that do not extend below the rust preventive primer coating;
c) decals or decorative paint;
d) decorative molding and trim made from plastic, light metal, or other similar material;
e) hood ornaments;
f) wheel covers;
g) final coats of paint applied over any rust preventive primer, primer surfacer, or primer sealer;
h) vinyl roof covers or imitation convertible tops;
i) rubber inserts in bumpers or bumper guards; and
j) minor damage to seats, dashboard, door panels, carpet, headliner, or other interior components if the damage does not affect the comfort of the driver or passengers, or the safe operation of the vehicle.
2. Cosmetic repairs do not include:
a) primer coats or sealer necessary to prevent deterioration of any structural body component, such as fenders, doors, hood, or roof;
b) repair or replacement of any sheet metal;
c) repair or replacement of exterior or interior body panels;
d) repair or replacement of mounting or attachment brackets and all other components and attaching hardware associated with the body of the vehicle; and
e) cracks or chips in windows if the vehicle will not pass a safety inspection.
3. The determination of whether a specific repair is cosmetic shall be made by the Administrator of the Motor Vehicle Enforcement Division.
B. "Collision estimating guide recognized by the Motor Vehicle Enforcement Division" means the current edition of the:
1. Mitchell Collision Estimating Guide;
2. Motor Estimating Guide;
3. Delmar Auto Series Complete Automotive Estimating;
4. CCC Autobody Systems EZEst Software;
5. ADP Collision Estimating Services; or
6. an equivalent estimating guide recognized by the industry.
C. For purposes of Section 41-1a-1002, the determination of whether a vehicle is seven years old or older is made by subtracting the model year of the vehicle from the current calendar year.

R873-22M-25. Written Notification of a Salvage Certificate or Branded Title Pursuant to Utah Code Ann. Section 41-1a-1004.

A. The Motor Vehicle Division shall brand a vehicle's title if, at the time of initial registration or transfer of ownership, evidence exists that the vehicle is a salvage vehicle.
B. Written notification that a vehicle has been issued a salvage certificate or branded title shall be made to a prospective purchaser on a form approved by the Administrator of the Motor Vehicle Enforcement Division.
C. The form must clearly and conspicuously disclose that the vehicle has been issued a salvage certificate or branded title.
D. The form must be presented to and signed by the prospective purchaser and the prospective lienholder, if any, prior to the sale of the vehicle.
E. If the seller of the vehicle is a dealer, the form must be prominently displayed in the lower passenger-side corner of the windshield for the period of time the vehicle is on display for sale.
F. The original disclosure form shall be given to the purchaser and a copy shall be given to the new lienholder, if any. A copy shall be kept on file by the seller for a period of three years from the date of sale if the seller is a dealer.

R873-22M-26. Interim Inspections and Repair Standards Pursuant to Utah Code Ann. Section 41-1a-1002.

A. Each certified vehicle inspector shall independently determine:
1. if one or more interim inspections are required; and
2. when any required interim inspection shall be made.
B. A vehicle that is repaired beyond the point of a required interim inspection prior to that interim inspection may not receive an unbranded title.
C. A vehicle is repaired in accordance with Motor Vehicle Enforcement Division standards if it meets or exceeds the standards established by the Inter-Industry Conference on Auto Collision Repair ("I-CAR").
1. Repairs must be performed in licensed body shops.
2. All repairs must be certified by an individual who:

a) owns or is employed by that body shop;
b) has repaired the vehicle or supervised any repairs he did not make;
c) is certified with I-CAR for structural repair and has either five years experience in repairing structural collision damage in a licensed body shop, or three years experience in repairing structural collision damage in a licensed body shop and an associate degree in the structural repair of an automobile from an accredited institution; and
d) completes ten hours of division approved continuing training in repair of structural collision damage every three years.

D. Individuals certifying repairs under Subsection (C) must be certified with I-CAR by January 1, 1994.

E. A person who repairs or replaces major damage identified by a certified vehicle inspector shall keep records of the repairs made, and the time required to make those repairs, for a period of three years from the date of repair.

R873-22M-27. Issuance of Special Group License Plates Pursuant to Utah Code Ann. Sections 41-1a-418, 41-1a-419, 41-1a-420, and 41-1a-421.

(1) Except as otherwise provided, a special group license plate shall consist of a symbol affixed to the left-hand side of the plate, followed by a total of five characters and numerals.

(2)(a) Legislature special group license plates shall carry the letter combination SEN or REP with the number of the district from which the legislator was elected or appointed.

(b) A state legislator may register a maximum of two vehicles with Legislature special group license plates.

(c) Upon leaving office, a legislator may not display the Legislature special group license plates on any motor vehicle. Legislators not reelected to office may not display the Legislature special group license plates after December 31 of the election year.

(3)(a) United States Congress special group license plates shall carry, in the case of representatives, the letter combination HR, followed by the number of the district from which the representative was elected or appointed, or, in the case of senators, USS 1 or USS 2, signifying the senior and junior senators.

(b) Upon leaving office, a member of Congress may not display United States Congress special group license plates on any motor vehicle. A member of Congress not reelected to office may not display United States Congress special group license plates after December 31 of the election year.

(4) Survivor of the Japanese attack on Pearl Harbor special group license plates may be issued to qualified U.S. military veterans who:

(a) provide a copy of their discharge papers, notice of separation, or other government issued document acceptable to the division verifying dates and locations of active service; or

(b) present evidence of membership in the Pearl Harbor Survivors Association.

(5) Former prisoner of war special group license plates shall be issued to qualified U.S. military veterans who provide a copy of their discharge papers, notice of separation, or other government issued document acceptable to the division indicating that the veteran was classified as a prisoner of war.

(6) Recipient of a purple heart special group license plates shall be issued to qualified U.S. military veterans who:

(a) provide a copy of their discharge papers, notice of separation, or other government issued document acceptable to the division indicating the veteran was awarded the purple heart; or

(b) present evidence of current membership in the Military Order of the Purple Heart.

(7) An applicant for a National Guard special group license plate must present a current military identification card that shows active membership in the Utah National Guard.

(8) The issuance, renewal, surrender, and design of disability special group license plates and windshield placards shall be subject to the provisions of the federal Uniform System for Parking for Persons with Disabilities, 23 C.F.R. Ch. 11, Subch. B, Pt. 1235.2 (1991), which is adopted and incorporated by reference.

(9)(a) An applicant for a licensed amateur radio operator special group license plate shall present a current Federal Communication Commission (FCC) license.

(b) The license plate number for a licensed amateur radio operator special group license plate shall be the same combination of alpha and numeric characters that comprise the FCC assigned radio call letters of the licensed operator.

(c) Only one set of licensed amateur radio operator special group license plates may be issued per FCC license.

(10) A farm truck special group license plate may be issued for a vehicle that is qualified to register as a farm truck under Section 41-1a-1206.

(11)(a) To qualify for a firefighter special group license plate, an applicant must present one of the following:

(i) evidence indicating the applicant has a current membership in the Utah Firefighters' Association;

(ii) an official identification card issued by the firefighting entity identifying the applicant as an employee or volunteer of that firefighting entity;

(iii) a letter on letterhead of the firefighting entity, or the municipality or county in which the firefighting entity is located, identifying the applicant as an employee or volunteer of that firefighting entity; or

(iv) a letter on letterhead from a firefighting entity, or the municipality or county in which the firefighting entity is located, identifying the applicant as a retired firefighter, whether employed or volunteer, of that firefighting entity.

(b) The division shall revoke a firefighter special group license plate issued under Section 41-1a-418 upon receipt of written notification from the head of a firefighting entity indicating:

(i) the name of the individual whose license plate is revoked;

(ii) the license plate number that is revoked;

(iii) the reason the license plate is revoked; and

(iv) that the firefighting entity has provided the individual described in Subsection (11)(b)(i) at least 30 days notice that the license plate will be revoked.

(12)(a) To qualify for a search and rescue special group license plate, an applicant must present one of the following:

(i) an official identification card issued by a county sheriff's office identifying the applicant as an employee or volunteer of that county's search and rescue team; or

(ii) a letter on letterhead of the county sheriff's office of the county in which the search and rescue team is located, identifying the applicant as an employee or volunteer of that county's search and rescue team.

(b) The division shall revoke a search and rescue special group license plate issued under Section 41-1a-418 upon receipt of written notification from the county sheriff's office of the county in which the search and rescue team is located, indicating:

(i) the name of the individual whose license plate is revoked;

(ii) the license plate number that is revoked;

(iii) the reason the license plate is revoked; and

(iv) that the search and rescue team has provided the individual described in Subsection (12)(b)(i) at least 30 days notice that the license plate will be revoked.

(13) An individual who no longer qualifies for the particular special group license plate may not display that special group license plate on any motor vehicle and must

reregister the vehicle and obtain new license plates.

R873-22M-28. Option to Exchange Horseless Carriage License Plates Issued Prior to July 1, 1992, Pursuant to Utah Code Ann. Section 41-1a-419.

The registered owner of a vehicle that is forty years old or older and for which a horseless carriage license plate was issued prior to July 1, 1992, may exchange that plate at no charge for a vintage vehicle special group license plate issued after July 1, 1992.

R873-22M-29. Removable Windshield Placards Pursuant to Utah Code Ann. Section 41-1a-420.

(1) A removable windshield placard is a two-sided placard, renewable on an annual basis, which includes on each side:

(a) the International Symbol of Access, the wheelchair symbol adopted by Rehabilitation International in 1969, which is at least three inches in height, is centered on the placard, and is white on a blue background;

(b) an identification number;

(c) a date of expiration which is one year from the later of the initial issuance of the placard or the most recent renewal of the placard; and

(d) a facsimile of the Great Seal of the State of Utah.

(2) Upon application, a removable windshield placard shall be issued to a person with a disability which limits or impairs ability to walk or for a vehicle that is used by an organization primarily to transport persons with disabilities that limit or impair their ability to walk.

(a) The definition of the phrase "persons with disabilities which limit or impair the ability to walk" shall be identical to the definition of that phrase in Uniform System for Handicapped Parking, 58 Fed. Reg. 10328, 10329 (1991).

(b) An applicant for a removable windshield placard shall present a licensed physician's certification upon initial application, stating that the applicant has a permanent disability which limits or impairs ability to walk, or sign an affidavit attesting that the vehicle is used by an organization primarily for the transportation of persons with disabilities that limit or impair their ability to walk.

(c) A physician's certification is not required for renewal of a removable windshield placard.

(d) The Tax Commission may, on a case by case basis, issue a removable windshield placard to persons with disabilities other than disabilities which limit or impair the ability to walk.

(e) The original and one additional removable windshield placard shall be issued free of charge. Replacement placards, for placards that are lost or destroyed, shall be issued for a fee.

(3) A temporary removable windshield placard is a two-sided placard, issued on a temporary basis, which includes on each side:

(a) the International Symbol of Access, the wheelchair symbol adopted by Rehabilitation International in 1969, which is at least three inches in height, is centered on the placard, and is white on a red background;

(b) an identification number;

(c) a date of expiration not to exceed six months from the date of issuance; and

(d) a facsimile of the Great Seal of the State of Utah.

(4) Upon application, a temporary removable windshield placard shall be issued.

(a) The application must be accompanied by the certification of a licensed physician that the applicant meets the definition of a person with a disability which limits or impairs ability to walk. The certification shall include the period of time that the physician determines the applicant will have the disability, not to exceed six months.

(b) Applications for renewal of a temporary removable windshield placard shall be supported by a licensed physician's certification of the applicant's disability dated within the previous three months.

(c) The Tax Commission may, on a case by case basis, issue a temporary removable windshield placard to persons with disabilities other than disabilities which limit or impair the ability to walk.

(d) The original and one additional temporary removable windshield placard shall be issued free of charge. Replacement placards, for placards that are lost or destroyed, shall be issued for a fee.

(5) Any placard, whether permanent or temporary, shall be hung from the rearview mirror so that it may be viewed from the front and rear of any vehicle utilizing a parking space reserved for persons with disabilities. If there is no rearview mirror, the placard shall be clearly displayed on the dashboard of the vehicle. The placard shall not be displayed when the vehicle is moving.

R873-22M-30. Standards for Issuance of Original Issue License Plates Pursuant to Utah Code Ann. Section 41-1a-416.

A. "Series" means the general alpha-numeric sequence from which plate numbers are assigned.

B. An original issue license plate is unique and does not conflict with existing plate series in the state if the particular plate number is not currently registered or displayed on the motor vehicle master file record.

R873-22M-32. Rescinding Dismantling Permit Pursuant to Utah Code Ann. Section 41-1a-1010.

A. For purposes of Section 41-1a-1010, a Utah certificate of title does not include a salvage certificate, an Affidavit of Facts, or Tax Commission form TC-839, Certificate of Sale.

B. An applicant with a vehicle eligible for retitling under Section 41-1a-1010 shall receive a title consistent with the title of the vehicle at the time of application for a permit to dismantle.

R873-22M-33. Private Institution of Higher Education Pursuant to Utah Code Ann. Section 41-1a-422.

(1) "Private institution of higher education" means a private institution that is accredited pursuant to Section 41-1a-422 and that issues a standard collegiate degree.

(2) "Standard collegiate degree" means an associate, bachelor's, master's, or doctorate degree.

R873-22M-34. Rule for Denial of Personalized Plate Requests Pursuant to Utah Code Ann. Sections 41-1a-104 and 41-1a-411.

(1) The personalized plate is a non-public forum. Nothing in the issuance of a personalized plate creates a designated or limited public forum. The presence of a personalized plate on a vehicle does not make the plate a traditional public forum.

(2) Pursuant to Section 41-1a-411(2), the division may not issue personalized license plates in the following formats:

(a) Combination of letters, words, or numbers with any connotation that is vulgar, derogatory, profane, or obscene.

(b) Combinations of letters, words, or numbers that connote breasts, genitalia, pubic area, buttocks, or relate to sexual and eliminatory functions. Additionally, "69" formats are prohibited unless used in a combination with the vehicle make, model, style, type, or commonly used or readily understood abbreviations of those terms, for example, "69 CHEV."

(c) Combinations of letters, words, or numbers that connote:

(i) any intoxicant or any illicit narcotic or drug;

(ii) the sale, use, seller, purveyor, or user of any intoxicant or any illicit narcotic or drug; or

(iii) the physiological or mental state produced by any

intoxicant or any illicit narcotic or drug.

(d) Combinations of letters, words, or numbers that express contempt, ridicule, or superiority of a race, religion, deity, ethnic heritage, gender, or political affiliation.

(e)(i) Combinations of letters, words, or numbers that express affiliations or actions that may be construed to suggest endangerment to the public welfare.

(ii) Examples of letters, words, or numbers described in Subsection (2)(e)(i) include words, signs, or symbols that represent:

(A) illegal activity;

(B) organized crime associations; or

(C) gang or gang terminology.

(iii) The division shall consult with local, state, and national law enforcement agencies to establish criteria to determine whether a combination of letters, words, or numbers express affiliations or actions that may be construed to suggest endangerment to the public welfare.

(3) If the division denies a requested combination, the applicant may request a review of the denial, in writing, within 15 days from the date of notification. The request must be directed to the Director of the Motor Vehicle Division and should include a detailed statement of the reasons why the applicant believes the requested license plates are not offensive or misleading.

(4) The director shall review the format for connotations that may reasonably be detected through linguistic, numerical, or phonetic modes of communication. The review may include:

(a) translation from foreign languages;

(b) an upside down or reverse reading of the requested format; and

(c) the use of references such as dictionaries or glossaries of slang, foreign language, or drug terms.

(5) The director shall consider the applicant's declared definition of the format, if provided.

(6) If the requested format is rejected by the director, the division shall notify the applicant in writing of the right to appeal the decision through the appeals process outlined in Tax Commission rule R861-1A-22.

(7) If, after issuance of a personalized license plate, the commission becomes aware through written complaint that the format may be prohibited under Subsection R873-22M-34(1), the division shall again review the format.

(8) If the division determines pursuant to Subsection R873-22M-34 (2) that the issued format is prohibited, the holder of the plates shall be notified in writing and directed to surrender the plates. This determination is subject to the review and appeal procedures outlined in Subsections (3) through (7).

(9) A holder required to surrender license plates shall be issued a refund for the amount of the personalized license plate application fee and for the prorated amount of the personalized license plate annual renewal fee, or shall be allowed to apply for replacement personalized license plates at no additional cost.

(10) If the holder of plates found to be prohibited fails to voluntarily surrender the plates within 30 days after the mailing of the notice of the division's final decision that the format is prohibited, the division shall cancel the personalized license plates and suspend the vehicle registration.

R873-22M-35. Reissuance of Personalized License Plates Pursuant to Utah Code Ann. Sections 41-1a-413 and 41-1a-1211.

A. If a person who has been issued personalized license plates fails to renew the personalized license plates within six months of the plates' expiration, the license plates shall be deemed to be surrendered to the division and the division may reissue the personalized license plates to a new requestor.

R873-22M-36. Access to Protected Motor Vehicle Records Pursuant to Utah Code Ann. Section 41-1a-116.

A. "Advisory notice" means:

1. notices from vehicle manufacturers, the manufacturers' authorized representative, or government entities regarding information that is pertinent to the safety of vehicle owners or occupants; and

2. statutory notices required by Sections 38-2-4 and 72-9-603 or by other state or federal law directing a party to mail a notice to a vehicle owner at the owner's last known address as shown on Motor Vehicle Division records.

B. Telephone accounts.

1. Public records may be released by phone to any person who has established a telephone account pursuant to Section 41-1a-116 (7).

2. A person who is authorized to access protected records must submit a written request in person, by mail, or by facsimile to the Motor Vehicle Division. Protected records may be released by phone to a person who has established a telephone account only under the following conditions:

a) The applicant for a telephone account must complete an application form prescribed by the Commission annually.

b) Protected records may be released by phone to private investigators, tow truck operators or vehicle mechanics who are licensed to conduct business in that capacity by the appropriate state or local authority.

c) Towers and mechanics are entitled to access protected records only for the purpose of making statutory notification of the owner at the last known address according to motor vehicle records. Prior to release of the information, the tower or mechanic must deliver or fax to the Motor Vehicle Division a copy of the work order or other evidence of a possessory lien on the vehicle. The lien claim must arise under a statute that requires notification of the vehicle owner at the owner's last known address according to state motor vehicle records.

C. An authorized agent of an individual allowed access to protected records under Section 41-1a-116 must evidence a signed statement indicating that he is acting as an authorized representative and the extent of that representative authority.

D. Utah law governs only the release of Utah motor vehicle records. The Motor Vehicle Division shall not release out-of-state motor vehicle registration information.

R873-22M-40. Age of Vehicle for Purposes of Safety Inspection Pursuant to Utah Code Ann. Section 53-8-205.

A. The age of a vehicle, for purposes of determining the frequency of the safety inspection required under Section 53-8-205, shall be determined by subtracting the vehicle model year from the current calendar year.

R873-22M-41. Issuance of Salvage Certificate in Certain Circumstances Pursuant to Utah Code Ann. Section 41-1a-1005.

(1) Subject to Subsection (3), an insurance company shall receive a salvage certificate in the insurance company's name if the insurance company provides the commission:

(a) evidence that the insurance company has declared a particular vehicle a salvage vehicle;

(b) a copy of the check issued to the registered owner of the vehicle; and

(c) a copy of at least two letters the insurance company has mailed to the registered owner of the vehicle and any lien holder of that vehicle requesting:

(i) in the case of an insurance company that has not received a certificate of title from the registered owner of the vehicle, a copy of the certificate of title or other evidence of ownership; or

(ii) in the case of an insurance company that has received an improperly endorsed certificate of title from the registered owner of the vehicle, correction of the improperly endorsed

certificate of title.

(2) The information described in Subsection (1) shall accompany the Application for Utah Title.

(3) If the requirements of Subsections (1) and (2) are satisfied, the Motor Vehicle Division shall issue a salvage certificate to an insurance company:

(a) in the case of an insurance company that has not received a certificate of title from the registered owner of the vehicle, no sooner than 30 days from the settlement of the loss; or

(b) in the case of an insurance company that has received an improperly endorsed certificate of title from the registered owner of the vehicle, no sooner than 30 days from the insurance company's receipt of an improperly endorsed certificate of title.

R877. Tax Commission, Motor Vehicle Enforcement.
R877-23V. Motor Vehicle Enforcement.
R877-23V-3. Salesperson Licensed For One Dealer Only Pursuant to Utah Code Ann. Section 41-3-202.

A. The holder of a dealer's license may not hold an additional license to engage in the activities of a salesperson for another dealer.

B. The requirement that a salesperson may be licensed with only one dealer at a time does not preclude dealership owners from being no-fee salespersons for their own dealerships.

R877-23V-5. Temporary Motor Vehicle Registration Permits and Extension Permits Issued by Dealers Pursuant to Utah Code Ann. Section 41-3-302.

(1) Every dealer desiring to issue temporary permits for the operation of motor vehicles shall make application to the Motor Vehicle Enforcement Division. If the privilege is extended, the dealer will receive a series of permits, consecutively numbered. The numbers shall be recorded by the division and charged to the dealer.

(2) If a vehicle purchaser requests a temporary permit, the dealer shall issue no more than one temporary registration permit, in numerical sequence, for each motor vehicle sold.

(3) The expiration date on the original permit shall be legible from a distance of 30 feet.

(4) The permit shall be displayed at the rear of the motor vehicle, in a place where the printed information on the permit and the expiration date may be easily seen.

(5) Temporary permits must not be placed in rear windows or permit holders with less than seventy percent light transparency.

(a) If a permit holder is used, it must not cover any of the printed information on the permit, including the expiration date.

(b) If a license plate frame is used in conjunction with a permit holder, it must not cover any printed information or expiration date on the permit.

(c) Temporary permits must be protected from exposure to the weather and conditions that would render them illegible.

(6) If a temporary permit is filled out incorrectly, the sale of the vehicle is rescinded, or for some other reason the permit is unusable, the dealer must return the permit to the Motor Vehicle Enforcement Division, together with the stub, and it will not be considered issued. If the permit is placed on a vehicle and the sale has not been rescinded, the permit will be considered issued and the dealer is liable for the registration fee for the vehicle together with any applicable penalties.

(7) A dealer's temporary permits may be audited at any time and the dealer required to pay for all outstanding permits. The registration fee charged will be for a passenger car unless the dealer is licensed to sell only motorcycles or small trailers.

(a) If the dealer's records indicate that the permit was issued for a vehicle other than that for which the dealer was billed, the dealer must submit the proper fee and penalty.

(b) If the records disclose that the permit was cleared properly, the dealer must furnish the license number of the vehicle for which the permit was issued and the date of issue.

(c) A dealer shall resolve any outstanding permit billings by payment of fees and penalties or by reconciling the permits before any additional permits will be issued to the dealer. This action will not be construed to be a cancellation of a dealer's privilege of issuing temporary permits, but merely a function of the division's routine audit and billing procedure.

(8) The dealer shall keep a written record in numerical sequence of every temporary registration permit issued. This record shall include all of the following information:

(a) the name and address of the person or firm to whom the permit is issued;

(b) a description of the motor vehicle for which it was issued, including year, make, model, and identification number;

(c) date of issue;

(d) license number;

(e) in the case of a commercial vehicle, the gross laden weight for which it was issued.

(9) In exceptional circumstances a dealer as agent for the division may issue an additional temporary permit for a vehicle by following the procedures outlined below:

(a) The dealer must contact the division and request an extension permit for a particular vehicle. If the request is denied, no extension permit will be issued.

(b) If the extension permit is approved, the division shall issue the dealer an approval number. This number must be recorded by the dealer in its temporary permit record and on the permit and stub in the space provided for the license number. The space provided on the permit and stub for the dealer name must be completed with the words "State Tax Commission" and the dealer's license number. The remainder of the permit and stub will be completed as usual.

(c) The dealer must return the permit stub to the division within 45 days from the date it is issued.

(d) A dealer may not issue an extension permit if it is determined that the dealer has been granted extensions for more than 2% of the permits issued to the dealership during the past three months. This percentage is calculated by dividing the number of extensions granted the dealer during the past three months by the permits issued by the dealer during the past three months.

(10) All extension permits issued by dealers under this rule are considered issued by the division.

(11) When a motor vehicle is sold for registration in another state, the stub portion of the temporary permit shall be filed with the division within ten days from the date of issue, accompanied by the required fee. The sale must be reported in the dealer's monthly report of sale required by Section 41-3-301(2)(b). If the permit stub and the required fee are not postmarked or received by the division within 45 days, a penalty equal to the required fee shall be collected pursuant to Section 41-3-302.

(12) The temporary registration card, attached to the temporary permit, must be detached and given to the customer at the time the temporary permit is issued. This temporary registration card must be kept in the vehicle while the temporary permit is displayed.

R877-23V-6. Issuance of In-Transit Permits Pursuant to Utah Code Ann. Section 41-3-305.

(1)(a) Transported semitractors are piggy-backed when all of the semitractors being transported are touching the ground.

(b) Each piggy-backed vehicle must have a separate in-transit permit or be properly registered for operation in Utah.

(2) In-transit permits may not be issued for loaded motor vehicles over 12,000 pounds gross laden weight.

(3) A semitractor hauling unlicensed trailers must obtain an in-transit permit for any trailer in contact with the ground.

(4) Subject to Subsections (5) and (6), the following entities may issue in-transit permits:

(a) a licensed dealer that is primarily engaged in the business of auctioning consigned motor vehicles to other dealers or the public; and

(b) a state or local government agency that is engaged in the business of auctioning motor vehicles to dealers or the public.

(5) An entity issuing an in-transit permit under Subsection (4) shall maintain records of all in-transit permits obtained from the division. These records shall include:

(a) vehicle purchaser information;

(b) vehicle identification number; and

(c) evidence that the purchaser has met the requirements

for issuance of the in-transit permit.

(6) An entity described in Subsection (4) that fails to maintain the records required under Subsection (5) may be prohibited from issuing in-transit permits.

R877-23V-7. Misleading Advertising Pursuant to Utah Code Ann. Section 41-3-210.

(1)(a) "Advertisement" means any oral, written, graphic, or pictorial statement made that concerns the offering of a motor vehicle for sale or lease.

(b) "Advertisement" includes any statement or representation:

(i) made in a newspaper, magazine, electronic medium, or other publication;

(ii) made on radio or television;

(iii) appearing in any notice, handbill, sign, billboard, banner, poster, display, circular, pamphlet, letter, or other printed material;

(iv) contained in any window sticker or price tag; and

(v) in any oral statement.

(c) "Advertisement" includes the terms "advertise" and "advertising".

(d) "Advertisement" does not include:

(i) a statement made solely for the purpose of obtaining vehicle financing or a vehicle title; or

(ii) hand written negotiation sheets between a dealer and a customer of the dealer.

(2) Violation of any of the following standards of practice for the advertising and selling of motor vehicles is a violation of Section 41-3-210.

(a) Accuracy. Any advertised statements and offers about a vehicle as to year, make, model, type, condition, equipment, price, trade-in-allowance, terms, and so forth, shall be clearly set forth and based upon facts.

(b) Bait. Bait advertising and selling practices may not be used. A vehicle advertised at a specific price shall be in the possession of the advertiser at the address given. It shall be willingly shown, demonstrated and sold. If sold, the advertiser shall, upon request of any prospective purchaser, peace officer, or employee of the division, show sales records of the advertised vehicle.

(c)(i)(A) Price. When the price or payment of a vehicle is quoted, the vehicle shall be clearly identified as to make, year, model and if new or used. Except as provided in Subsection (c)(i)(B), the advertised price must include charges that the customer must pay for the vehicle, including freight or destination charges, dealer preparation, and dealer handling.

(B) The following fees are not required to be included in the advertised price that the customer must pay for the vehicle:

(I) dealer document fees;

(II) if optional, undercoating or rustproofing fees; and

(III) taxes or fees required by the state or a county, including sales tax, titling and registration fees, safety and emission fees, and waste tire recycling fees.

(ii) In addition to other advertisements, this pertains to price statements such as "$..... Buys".

(iii) When "list", "sticker", or words of similar import are used in an advertisement, they may refer only to the manufacturer's suggested retail price. If a supplementary price sticker is used, the advertised price must include all items listed on the supplementary sticker.

(iv) If the customer requests and receives a temporary permit, the temporary permit fee need not be included in the advertised price.

(d) Savings and Discount Claims. Because the intrinsic value of a used vehicle is difficult to establish, specific claims of savings may not be used in an advertisement. This includes statements such as, "Was priced at $....., now priced at $......

(i) The word "wholesale" may not be used in retail automobile advertising.

(ii) When an automotive advertisement contains an offer of a discount on a new vehicle, the amount of the discount must be stated by reference to the manufacturer's suggested retail price of the vehicle.

(e) Down Payments. The amount of the down payment may not be stated in a manner that suggests that it is the selling price of the vehicle. If an advertisement states "You can buy with no money down", or terms of similar import, the customer must be able to leave the dealership with the vehicle without making any outlay of money.

(f) Trade-in Allowance. Statements representing that no other dealer grants greater allowances for trade-ins may not be used. A specific trade-in amount or range of trade-in amounts may not be used in advertising.

(g)(i)(A) Finance. The phrases, "no finance charge", "no carrying charge", or similar expressions may not be used when there is a charge for placing the transaction on a time payment basis. Statements representing or implying that no prospective credit purchaser will be rejected because of inability to qualify for credit, such as "we accept all credit applications", may not be used.

(B) If the amount of the advertised payment changes during the term of the loan, both the payments and the terms of the loan must be disclosed together.

(ii) The phrase "we will pay off your trade no matter what you owe" may not be used.

(h) Unpaid Balance and Repossessions. The term "repossessed" may be used only to describe vehicles that have actually been repossessed from a purchaser. Advertisers offering repossessed vehicles for sale may be required to offer proof of those repossessions. The unpaid balance shall be the full selling price unless otherwise stated.

(i) Current Used. When a used motor vehicle, as defined by Section 41-3-102, of a current series is advertised, the first line of the advertisement must contain the word "used", "pre-owned", "certified used", "certified pre-owned", or other similar term used to designate a used vehicle, or the text must clearly indicate that the vehicle offered is used.

(j) Demonstrators, Executives' and Officials' Cars.

(i) "Demonstrator" means a vehicle that has never been sold or leased to a member of the public.

(ii) Demonstrator vehicles include vehicles used by new vehicle dealers or their personnel for demonstrating performance ability but not vehicles purchased or leased by dealers or their personnel and used as their personal vehicles.

(iii) A demonstrator vehicle may be advertised for sale only by a dealer franchised for the sale of that make of new vehicle.

(iv) An executive's or official's vehicle shall have been used exclusively by an executive of the dealer's franchising manufacturer or distributor, or by an executive of the franchised dealership. These vehicles may not have been sold or leased to a member of the public prior to the appearance of the advertisement.

(v) Demonstrator's, executive's and official's vehicles shall be clearly and prominently advertised as such. Advertisements shall include the year, make, and model of the vehicle offered for sale.

(k) Taxi-cabs, Police, Sheriff, and Highway Patrol Vehicles. Taxi-cabs, police, sheriff, and highway patrol vehicles shall be so identified. These vehicles may not be described by an ambiguous term such as "commercial".

(l) Mileage Statements. When an advertisement quotes the number of miles or a range of miles a vehicle has been driven, the dealer must have written evidence that the vehicle has not been operated in excess of the advertised mileage.

(i) The evidence required by this section shall be the properly completed odometer statement required by Section 41-

1a-902.

(ii) If a dealer chooses to advertise specific mileage or a range of miles a vehicle has been driven, the dealer shall upon request of any prospective purchaser, peace officer, or employee of the division produce all documents in its possession pertaining to that vehicle so that the mileage can be readily verified.

(m) Underselling Claims. Unsupported underselling claims may not be used. Underselling claims include the following: "our prices are guaranteed lower than elsewhere", "money refunded if you can duplicate our values", "we guarantee to sell for less", "we sell for less", "we purchase vehicles for less so we can sell them for less", "highest trade-in allowance", "we give $300 more in trade than any other dealers". Evidence of supported underselling claims must be contained in the advertisement and shall be produced upon request of a prospective purchaser, peace officer, or employee of the division.

(n) Free. "Free" may be used in advertising only when the advertiser is offering a gift that is not conditional on the purchase of any property or service.

(o) Driving Trial. A free driving trial means that the purchaser may drive the vehicle during the trial period and return it to the dealer within the specified period and obtain a refund of all moneys, signed agreements, or other considerations deposited and a return of any vehicle traded in. The exact terms and conditions of the free driving trial shall be set forth in writing and a copy given to the purchaser at the time of the sale.

(p) Guaranteed. When words such as "guarantee", "warranty", or other terms implying protection are used in advertising, an explanation of the time and coverage of the guarantee or warranty shall be given in clear and concise language. The purchaser shall be provided with a written document stating the specific terms and coverage.

(q) Name Your Own Deal. Statements such as "write your own deal", "name your own price", "name your own monthly payments", "appraise your own vehicle", and phrases of similar import may not be used.

(r) Disclosure of Material Facts. Disclosures of material facts that are contained in advertisements and that involve types of vehicles and transactions shall be made in a clear and conspicuous manner.

(i) Fine print, and mouse print are not acceptable methods of disclosing material facts.

(ii) The disclosure must be made in a typeface and point size comparable to the smallest typeface and point size of the text used throughout the body of the advertisement.

(iii) An asterisk may be used to give additional information about a word or term, however, asterisks or other reference symbols may not be used as a means of contradicting or substantially changing the meaning of any advertising statements.

(s) Lease. When an advertisement relates to a lease, the advertisement must make it readily apparent that the transaction advertised is a lease.

(i) The word "lease" must appear in a prominent position in the advertisement in a typeface and point size comparable to the largest text used to directly advertise the vehicle.

(ii) Statements that do not use the term "lease" do not constitute adequate disclosure of a lease.

(iii) Lease advertisements may not contain the phrase "no down payment" or words of similar import if an outlay of money is required to lease the vehicle.

(iv) Lease terms that are not available to the general public may not be included in advertisements directed at the general public.

(v) Limitations and qualifications applicable to the lease terms advertised shall be clearly and conspicuously disclosed.

(t) Electronic Medium Disclosures. A disclosure appearing in any electronic advertising medium must clearly and conspicuously feature all necessary information in a manner that can be read and understood if type is used, or that can be heard and understood if audio is used.

(u) Invoice or Cost. The terms "invoice" or "factory invoice" may be used as long as the dealer is willing to show the factory invoice to the prospective buyer. The term "cost" may not be used.

(v) Rebate Offers. "Rebate", "cash rebate", or similar terms may be used only when it is clearly and conspicuously stated who is offering the rebate.

(w) Buy-down Interest Rates. No buy-down interest rate may be advertised unless the dealer discloses the amount of dealer contribution and states that the contribution by the dealership may increase the negotiated price of the vehicle.

(x) Special Status of Dealership. An automotive advertisement may not falsely imply that the dealer has a special sponsorship, approval status, affiliation, or connection with the manufacturer that is greater or more direct than any other like dealer.

(y) Price Equaling. An advertisement that expresses a policy of matching or bettering competitor's prices shall fully disclose any conditions that apply and specify the evidence a consumer must present to take advantage of the offer. The evidence requirement may not place an unreasonable burden on the consumer; however, for example requiring the consumer to bring a written offer made to that consumer by an authorized representative of a dealership on a substantially similar vehicle would be considered reasonable.

(z) Auction. "Auction" or "auction special" and other terms of similar import may be used only in connection with vehicles offered or sold at a bona fide auction.

(aa) Layout and Type Size. The layout, headlines, illustrations, or type size of a printed advertisement and the broadcast words or pictures of radio, television, or electronic medium advertisements may not convey or permit an erroneous or misleading impression as to which vehicle or vehicles are offered at featured prices.

(i) When an advertisement contains a picture of a vehicle along with a quoted price, the vehicle pictured must be a similar model with similar options and accessories as the vehicle advertised.

(ii) No advertised offer, expression, or display of price, terms, down payment, trade-in allowances, cash difference, savings, or other material terms may be misleading and any necessary qualifications shall be clearly, conspicuously, and accurately set forth to prevent misunderstanding.

(iii) Qualifying terms and phrases shall be clearly, conspicuously, and accurately set forth as follows:

(A) in bold print and in type of a size that is capable of being read without unreasonable extra effort;

(B) in terms that are understandable to the buying public; and

(C) in close proximity to the qualified representation and not separated or buried by asterisk in some other part of the advertisement.

(bb) An advertisement must disclose a salvage or branded title as prominently as the description of the advertised vehicle.

R877-23V-8. Signs and Identification Pursuant to Utah Code Ann. Section 41-3-105.

(1) Every dealer, dismantler, manufacturer, remanufacturer, transporter, crusher, body shop, and distributor must post a sign at its principal place of business.

(2) The sign required under Subsection (1) shall:

(a) plainly display in a permanent manner the name under which the business is licensed;

(b) be at least 24 square feet in size, unless required otherwise, in writing, by a government entity; and

(c) be painted on the building, attached to the building with nails or bolts, or affixed to posts that have been securely anchored in the ground.

(3) A similar sign must be conspicuously posted at each additional place of business and must show, in addition, the address of the principal place of business. All signs must remain posted at each place of business and on the office. If the office is not located at the site on which the motor vehicles are displayed or offered for sale or exchange, the bonded dealer number, dismantler number, or manufacturer number must also be conspicuously displayed either on the sign or on the building.

(4) If the additional place of business is an auto show or similar business that will conduct business for ten days or less, the sign need only show the licensee's name as licensed by the division and be of a size that reasonably identifies the licensee.

(5) No place of business may be operated under a name other than that by which the licensee is licensed by the division. No sign may be posted at a place of business that shows a business name other than the one licensed by the division or gives the impression that the business is other than the one licensed by the division. However, a sign containing a variation of the licensee's name, if a variation of the licensee's name is required by a manufacturer in writing, may be posted as long as the sign containing the licensed name is more prominent.

(6) Documents submitted by a licensee to a government entity shall be identified only by the name under which the licensee is licensed by the division. All documents used by the licensee to promote or transact a sale or lease of a vehicle shall identify that licensee only by the name under which the licensee is licensed with the division.

R877-23V-10. Uniform Vehicle Identification Numbering System for Licensed Manufacturers Pursuant to Utah Code Ann. Section 41-3-202.

A. Except as provided in subsection (B), all manufacturers of motor vehicles licensed under Section 41-3-202 shall comply with the National Highway Traffic and Safety Administration's Standard No. 115, 49 C.F.R. Section 571.115 (1992), regarding 17-character vehicle identification number (VIN) requirements.

B. Manufacturers involved only in the second stage of a multi-stage vehicle are not required to comply with subsection (A) if the manufacturer of the first stage has complied with subsection (A).

R877-23V-11. License Information Update Pursuant to Utah Code Ann. Section 41-3-201.

A. Every person licensed under Section 41-3-202 shall notify the Motor Vehicle Enforcement Division (division) immediately of any change in ownership, address, or circumstance relating to its fitness to be licensed.

B. The division may request the licensee to review information contained in the division's files and notify the division of any corrections that must be made.

R877-23V-12. Documents Required Prior to Issue of a License Pursuant to Utah Code Ann. Section 41-3-105.

The following items must be properly completed and presented to the division before a license is issued.

(1) New motor vehicle dealer or new motorcycle and small trailer dealer license:

(a) application for license;

(b) dealer bond in the amount prescribed by Section 41-3-205;

(c) evidence that a Utah sales tax license has been issued to the dealership;

(d) franchise verification from the manufacturer of each make of new motor vehicle to be offered for sale;

(e) pictures of the dealership, clearly showing the office, display space, and required sign;

(f) pictures of the owner, partners, or corporate officers who will act as no-fee salespersons;

(g) the fee required by Section 41-3-601;

(h) evidence that the place of business has been inspected by an authorized division employee or agent;

(i) fingerprints of the owner, partners, or corporate officers who will act as no-fee salespersons, and the fees and waiver required by the Department of Public Safety for the processing of fingerprints.

(2) Used motor vehicle dealer or used motorcycle and small trailer dealer license:

(a) application for license;

(b) dealer bond in the amount prescribed by Section 41-3-205;

(c) evidence that a Utah sales tax license has been issued to the dealership;

(d) pictures of the dealership, clearly showing the office, display space, and required sign;

(e) pictures of the owner, partners, or corporate officers who will act as no-fee salespersons;

(f) the fee required by law;

(g) evidence that the place of business has been inspected by an authorized division employee or agent;

(h) fingerprints of the owner, partners, or corporate officers who will act as no-fee salespersons, and the fees and waiver required by the Department of Public Safety for the processing of fingerprints.

(3) Manufacturer or remanufacturer license:

(a) application for license;

(b) evidence that the applicant has complied with the National Highway Traffic and Safety Administration's Motor Vehicle Safety Standard No. 115, regarding 17 character vehicle identification number (VIN) requirements;

(c) pictures of the principal place of business and required sign;

(d) the fee required by Section 41-3-601;

(e) evidence that a Utah sales tax license has been issued to the manufacturer or remanufacturer;

(f) evidence that the place of business has been inspected by an authorized division employee or agent.

(4) Transporter license:

(a) application for license;

(b) pictures of the principal place of business and required sign;

(c) the fee required by Section 41-3-601;

(d) if applicable, evidence that a Utah sales tax license has been issued to the transporter;

(e) evidence that the place of business has been inspected by an authorized division employee or agent.

(5) Dismantler license:

(a) application for license;

(b) evidence that a Utah sales tax license has been issued for the dismantler;

(c) pictures of the principal place of business, clearly showing the office and required sign;

(d) the fee required by Section 41-3-601;

(e) evidence that the place of business has been inspected by an authorized division employee or agent.

(6) Crusher license:

(a) application for license;

(b) crusher bond as prescribed in Section 41-3-205;

(c) pictures of the principal place of business, clearly showing the office and required sign;

(d) the fee required by Section 41-3-601;

(e) evidence that a Utah sales tax license has been issued for the crusher;

(f) evidence that the place of business has been inspected by an authorized division employee or agent.

(7) Salesperson license:

(a) application for license;
(b) picture of the applicant;
(c) fingerprints of the applicant and the fees and waiver required by the Department of Public Safety for the processing of fingerprints;
(d) the fee required by Section 41-3-601.
(8) Distributor, factory branch, distributor branch, or representative license:
(a) application for license;
(b) the fee required by Section 41-3-601;
(c) pictures of the principal place of business, clearly identifying the office and required sign;
(d) evidence that a Utah sales tax license has been issued for the distributor;
(e) evidence that the place of business has been inspected by a authorized division employee or agent.
(9) Body shop license:
(a) application for license;
(b) body shop bond as prescribed in Section 41-3-205;
(c) pictures of the principal place of business, clearly showing the office and required sign;
(d) the fee required by Section 41-3-601;
(e) evidence that a Utah sales tax license has been issued for the body shop;
(f) evidence that the place of business has been inspected by an authorized division employee or agent.
(10) New applicants may also be required to attend an orientation class on motor vehicle laws and motor vehicle business laws before their license is issued.

R877-23V-14. Dealer Identification of Fees Associated with Issuance of Temporary Permits Pursuant to Utah Code Ann. Sections 41-3-301 and 41-3-302.

(1) Only fees required by Title 41, Chapter 1a, may be identified as state-mandated fees.
(2) A dealer that charges the purchaser or lessee of a motor vehicle a fee for preparing or processing any state-mandated documents or services ("dealer documentary service fees") must, in addition to the requirements set forth in Subsection (1), prominently display a sign on the dealer premises in a location that is readily discernable by all purchasers and lessees. The sign shall contain the language set forth in Subsection (2)(a).
(a) The (dealer documentary service fee) (   ) as set forth in your contract represents costs and profit to the dealer for preparing and processing documents and other services related to the sale or lease of your vehicle. These fees are not set or state mandated by state statute or rule.
(b) The blank in Subsection (2)(a) may be wording selected by the dealer to describe the fee charged for document preparation and processing and other services, but must be, in all cases, the actual wording used in the dealer's contract of sale or lease agreement.

R877-23V-16. Replacement or Renewal of Lost or Stolen Special Plates Pursuant to Utah Code Ann. Section 41-3-507.

A. A lost or stolen dealer, dismantler, manufacturer, remanufacturer, or transporter plate may be replaced only after it has expired.
B. The replaced special plate shall be included in the calculation of special plates a dealer may be issued under Section 41-3-503.

R877-23V-18. Qualifications for a Salvage Vehicle Buyer License Pursuant to Utah Code Ann. Section 41-3-202.

A. An applicant for a salvage vehicle buyer license shall provide to the division:
1. evidence that the applicant is licensed in any state as a motor vehicle dealer, dismantler, or body shop;
2. a list of any previous motor vehicle related businesses in which the applicant was involved;
3. evidence that the applicant has business experience in buying, selling, or otherwise working with salvage vehicles;
4. evidence that the applicant understands and complies with statutes and rules relating to the handling and disposal of environmental hazardous materials associated with salvage vehicles under Title 19, Chapter 6, Hazardous Substances; and
5. evidence that the applicant has complied with the provisions of Title 41, Chapter 3, Motor Vehicle Business Regulation Act, or similar laws of another state.

R884. Tax Commission, Property Tax.
R884-24P. Property Tax.
R884-24P-5. Abatement or Deferral of Property Taxes of Indigent Persons Pursuant to Utah Code Ann. Sections 59-2-1107 through 59-2-1109 and 59-2-1202(5).

A. "Household income" includes net rents, interest, retirement income, welfare, social security, and all other sources of cash income.

B. Absence from the residence due to vacation, confinement to hospital, or other similar temporary situation shall not be deducted from the ten-month residency requirement of Section 59-2-1109(3)(a)(ii).

C. Written notification shall be given to any applicant whose application for abatement or deferral is denied.

R884-24P-7. Assessment of Mining Properties Pursuant to Utah Code Ann. Section 59-2-201.

A. Definitions.

1. "Allowable costs" means those costs reasonably and necessarily incurred to own and operate a productive mining property and bring the minerals or finished product to the customary or implied point of sale.

a) Allowable costs include: salaries and wages, payroll taxes, employee benefits, workers compensation insurance, parts and supplies, maintenance and repairs, equipment rental, tools, power, fuels, utilities, water, freight, engineering, drilling, sampling and assaying, accounting and legal, management, insurance, taxes (including severance, property, sales/use, and federal and state income taxes), exempt royalties, waste disposal, actual or accrued environmental cleanup, reclamation and remediation, changes in working capital (other than those caused by increases or decreases in product inventory or other nontaxable items), and other miscellaneous costs.

b) For purposes of the discounted cash flow method, allowable costs shall include expected future capital expenditures in addition to those items outlined in A.1.a).

c) For purposes of the capitalized net revenue method, allowable costs shall include straight- line depreciation of capital expenditures in addition to those items outlined in A.1.a).

d) Allowable costs does not include interest, depletion, depreciation other than allowed in A.1.c), amortization, corporate overhead other than allowed in A.1.a), or any expenses not related to the ownership or operation of the mining property being valued.

e) To determine applicable federal and state income taxes, straight line depreciation, cost depletion, and amortization shall be used.

2. "Asset value" means the value arrived at using generally accepted cost approaches to value.

3. "Capital expenditure" means the cost of acquiring property, plant, and equipment used in the productive mining property operation and includes:

a) purchase price of an asset and its components;
b) transportation costs;
c) installation charges and construction costs; and
d) sales tax.

4. "Constant or real dollar basis" means cash flows or net revenues used in the discounted cash flow or capitalized net revenue methods, respectively, prepared on a basis where inflation or deflation are adjusted back to the lien date. For this purpose, inflation or deflation shall be determined using the gross domestic product deflator produced by the Congressional Budget Office, or long-term inflation forecasts produced by reputable analysts, other similar sources, or any combination thereof.

5. "Discount rate" means the rate that reflects the current yield requirements of investors purchasing comparable properties in the mining industry, taking into account the industry's current and projected market, financial, and economic conditions.

6. "Economic production" means the ability of the mining property to profitably produce and sell product, even if that ability is not being utilized.

7. "Exempt royalties" means royalties paid to this state or its political subdivisions, an agency of the federal government, or an Indian tribe.

8. "Expected annual production" means the economic production from a mine for each future year as estimated by an analysis of the life-of-mine mining plan for the property.

9. "Fair market value" is as defined in Section 59-2-102.

10. "Federal and state income taxes" mean regular taxes based on income computed using the marginal federal and state income tax rates for each applicable year.

11. "Implied point of sale" means the point where the minerals or finished product change hands in the normal course of business.

12. "Net cash flow" for the discounted cash flow method means, for each future year, the expected product price multiplied by the expected annual production that is anticipated to be sold or self-consumed, plus related revenue cash flows, minus allowable costs.

13. "Net revenue" for the capitalized net revenue method means, for any of the immediately preceding five years, the actual receipts from the sale of minerals (or if self - consumed, the value of the self-consumed minerals), plus actual related revenue cash flows, minus allowable costs.

14. "Non-operating mining property" means a mine that has not produced in the previous calendar year and is not currently capable of economic production, or land held under a mineral lease not reasonably necessary in the actual mining and extraction process in the current mine plan.

15. "Productive mining property" means the property of a mine that is either actively producing or currently capable of having economic production. Productive mining property includes all taxable interests in real property, improvements and tangible personal property upon or appurtenant to a mine that are used for that mine in exploration, development, engineering, mining, crushing or concentrating, processing, smelting, refining, reducing, leaching, roasting, other processes used in the separation or extraction of the product from the ore or minerals and the processing thereof, loading for shipment, marketing and sales, environmental clean-up, reclamation and remediation, general and administrative operations, or transporting the finished product or minerals to the customary point of sale or to the implied point of sale in the case of self-consumed minerals.

16. "Product price" for each mineral means the price that is most representative of the price expected to be received for the mineral in future periods.

a) Product price is determined using one or more of the following approaches:

(1) an analysis of average actual sales prices per unit of production for the minerals sold by the taxpayer for up to five years preceding the lien date; or,

(2) an analysis of the average posted prices for the minerals, if valid posted prices exist, for up to five calendar years preceding the lien date; or,

(3) the average annual forecast prices for each of up to five years succeeding the lien date for the minerals sold by the taxpayer and one average forecast price for all years thereafter for those same minerals, obtained from reputable forecasters, mutually agreed upon between the Property Tax Division and the taxpayer.

b) If self-consumed, the product price will be determined by one of the following two methods:

(1) Representative unit sales price of like minerals. The representative unit sales price is determined from:

(a) actual sales of like mineral by the taxpayer;
(b) actual sales of like mineral by other taxpayers; or
(c) posted prices of like mineral; or
(2) If a representative unit sales price of like minerals is unavailable, an imputed product price for the self-consumed minerals may be developed by dividing the total allowable costs by one minus the taxpayer's discount rate to adjust to a cost that includes profit, and dividing the resulting figure by the number of units mined.

17. "Related revenue cash flows" mean non-product related cash flows related to the ownership or operation of the mining property being valued. Examples of related revenue cash flows include royalties and proceeds from the sale of mining equipment.

18. "Self consumed minerals" means the minerals produced from the mining property that the mining entity consumes or utilizes for the manufacture or construction of other goods and services.

19. "Straight line depreciation" means depreciation computed using the straight line method applicable in calculating the regular federal tax. For this purpose, the applicable recovery period shall be seven years for depreciable tangible personal mining property and depreciable tangible personal property appurtenant to a mine, and 39 years for depreciable real mining property and depreciable real property appurtenant to a mine.

B. Valuation.

1. The discounted cash flow method is the preferred method of valuing productive mining properties. Under this method the taxable value of the mine shall be determined by:

a) discounting the future net cash flows for the remaining life of the mine to their present value as of the lien date; and

b) subtracting from that present value the fair market value, as of the lien date, of licensed vehicles and nontaxable items.

2. The mining company shall provide to the Property Tax Division an estimate of future cash flows for the remaining life of the mine. These future cash flows shall be prepared on a constant or real dollar basis and shall be based on factors including the life-of-mine mining plan for proven and probable reserves, existing plant in place, capital projects underway, capital projects approved by the mining company board of directors, and capital necessary for sustaining operations. All factors included in the future cash flows, or which should be included in the future cash flows, shall be subject to verification and review for reasonableness by the Property Tax Division.

3. If the taxpayer does not furnish the information necessary to determine a value using the discounted cash flow method, the Property Tax Division may use the capitalized net revenue method. This method is outlined as follows:

a) Determine annual net revenue, both net losses and net gains, from the productive mining property for each of the immediate past five years, or years in operation, if less than five years. Each year's net revenue shall be adjusted to a constant or real dollar basis.

b) Determine the average annual net revenue by summing the values obtained in B.3.a) and dividing by the number of operative years, five or less.

c) Divide the average annual net revenue by the discount rate to determine the fair market value of the entire productive mining property.

d) Subtract from the fair market value of the entire productive mining property the fair market value, as of the lien date, of licensed vehicles and nontaxable items, to determine the taxable value of the productive mining property.

4. The discount rate shall be determined by the Property Tax Division.

a) The discount rate shall be determined using the weighted average cost of capital method, a survey of reputable mining industry analysts, any other accepted methodology, or any combination thereof.

b) If using the weighted average cost of capital method, the Property Tax Division shall include an after-tax cost of debt and of equity. The cost of debt will consider market yields. The cost of equity shall be determined by the capital asset pricing model, arbitrage pricing model, risk premium model, discounted cash flow model, a survey of reputable mining industry analysts, any other accepted methodology, or a combination thereof.

5. Where the discount rate is derived through the use of publicly available information of other companies, the Property Tax Division shall select companies that are comparable to the productive mining property. In making this selection and in determining the discount rate, the Property Tax Division shall consider criteria that includes size, profitability, risk, diversification, or growth opportunities.

6. A non-operating mine will be valued at fair market value consistent with other taxable property.

7. If, in the opinion of the Property Tax Division, these methods are not reasonable to determine the fair market value, the Property Tax Division may use other valuation methods to estimate the fair market value of a mining property.

8. The fair market value of a productive mining property may not be less than the fair market value of the land, improvements, and tangible personal property upon or appurtenant to the mining property. The mine value shall include all equipment, improvements and real estate upon or appurtenant to the mine. All other tangible property not appurtenant to the mining property will be separately valued at fair market value.

9. Where the fair market value of assets upon or appurtenant to the mining property is determined under the cost method, the Property Tax Division shall use the replacement cost new less depreciation approach. This approach shall consider the cost to acquire or build an asset with like utility at current prices using modern design and materials, adjusted for loss in value due to physical deterioration or obsolescence for technical, functional and economic factors.

C. When the fair market value of a productive mining property in more than one tax area exceeds the asset value, the fair market value will be divided into two components and apportioned as follows:

1. Asset value that includes machinery and equipment, improvements, and land surface values will be apportioned to the tax areas where the assets are located.

2. The fair market value less the asset value will give an income increment of value. The income increment will be apportioned as follows:

a) Divide the asset value by the fair market value to determine a quotient. Multiply the quotient by the income increment of value. This value will be apportioned to each tax area based on the percentage of the total asset value in that tax area.

b) The remainder of the income increment will be apportioned to the tax areas based on the percentage of the known mineral reserves according to the mine plan.

D. The provisions of this rule shall be implemented and become binding on taxpayers beginning January 1, 1998.

R884-24P-10. Taxation of Underground Rights in Land That Contains Deposits of Oil or Gas Pursuant to Utah Code Ann. Sections 59-2-201 and 59-2-210.

A. Definitions.

1. "Person" is as defined in Section 68-3-12.

2. "Working interest owner" means the owner of an interest in oil, gas, or other hydrocarbon substances burdened with a share of the expenses of developing and operating the property.

3. "Unit operator" means a person who operates all producing wells in a unit.

4. "Independent operator" means a person operating an oil or gas producing property not in a unit.

5. One person can, at the same time, be a unit operator, a working interest owner, and an independent operator and must comply with all requirements of this rule based upon the person's status in the respective situations.

6. "Expected annual production" means the future economic production of an oil and gas property as estimated by the Property Tax Division using decline curve analysis. Expected annual production does not include production used on the same well, lease, or unit for the purpose of repressuring or pressure maintenance.

7. "Product price" means:

a) Oil: The weighted average posted price for the calendar year preceding January 1, specific for the field in which the well is operating as designated by the Division of Oil, Gas, and Mining. The weighted average posted price is determined by weighing each individual posted price based on the number of days it was posted during the year, adjusting for gravity, transportation, escalation, or deescalation.

b) Gas:

(1) If sold under contract, the price shall be the stated price as of January 1, adjusted for escalation and deescalation.

(2) If sold on the spot market or to a direct end-user, the price shall be the average price received for the 12-month period immediately preceding January 1, adjusted for escalation and deescalation.

8. "Future net revenue" means annual revenues less costs of the working interests and royalty interest.

9. "Revenue" means expected annual gross revenue, calculated by multiplying the product price by expected annual production for the remaining economic life of the property.

10. "Costs" means expected annual allowable costs applied against revenue of cost-bearing interests:

a) Examples of allowable costs include management salaries; labor; payroll taxes and benefits; workers' compensation insurance; general insurance; taxes (excluding income and property taxes); supplies and tools; power; maintenance and repairs; office; accounting; engineering; treatment; legal fees; transportation; miscellaneous; capital expenditures; and the imputed cost of self consumed product.

b) Interest, depreciation, or any expense not directly related to the unit will shall not be included as allowable costs.

11. "Production asset" means any asset located at the well site that is used to bring oil or gas products to a point of sale or transfer of ownership.

B. The discount rate shall be determined by the Property Tax Division using methods such as the weighted cost of capital method.

1. The cost of debt shall consider market yields. The cost of equity shall be determined by the capital asset pricing model, risk premium model, discounted cash flow model, a combination thereof, or any other accepted methodology.

2. The discount rate shall reflect the current yield requirements of investors purchasing similar properties, taking into consideration income, income taxes, risk, expenses, inflation, and physical and locational characteristics.

3. The discount rate shall contain the same elements as the expected income stream.

C. Assessment Procedures.

1. Underground rights in lands containing deposits of oil or gas and the related tangible property shall be assessed by the Property Tax Division in the name of the unit operator, the independent operator, or other person as the facts may warrant.

2. The taxable value of underground oil and gas rights shall be determined by discounting future net revenues to their present value as of the lien date of the assessment year and then subtracting the value of applicable exempt federal, state, and Indian royalty interests.

3. The reasonable taxable value of productive underground oil and gas rights shall be determined by the methods described in C.2. of this rule or such other valuation method that the Tax Commission believes to be reasonably determinative of the property's fair market value.

4. The value of the production assets shall be considered in the value of the oil and gas reserves as determined in C.2. above. Any other tangible property shall be separately valued at fair market value by the Property Tax Division.

5. The minimum value of the property shall be the value of the production assets.

D. Collection by Operator.

1. The unit operator may request the Property Tax Division to separately list the value of the working interest, and the value of the royalty interest on the Assessment Record. When such a request is made, the unit operator is responsible to provide the Property Tax Division with the necessary information needed to compile this list. The unit operator may make a reasonable estimate of the ad valorem tax liability for a given period and may withhold funds from amounts due to royalty. Withheld funds shall be sufficient to ensure payment of the ad valorem tax on each fractional interest according to the estimate made.

a) If a unit operating agreement exists between the unit operator and the fractional working interest owners, the unit operator may withhold or collect the tax according to the terms of that agreement.

b) In any case, the unit operator and the fractional interest owner may make agreements or arrangements for withholding or otherwise collecting this tax. This may be done whether or not that practice is consistent with the preceding paragraphs so long as all requirements of the law are met. When a fractional interest owner has had funds withheld to cover the estimated ad valorem tax liability and the operator fails to remit such taxes to the county when due, the fractional interest owner shall be indemnified from any further ad valorem tax liability to the extent of the withholding.

c) The unit operator shall compare the amount withheld to the taxes actually due, and return any excess amount to the fractional interest owner within 60 days after the delinquent date of the tax. At the request of the fractional interest owner the excess may be retained by the unit operator and applied toward the fractional interest owner's tax liability for the subsequent year.

2. The penalty provided for in Section 59-2-210 is intended to ensure collection by the county of the entire tax due. Any unit operator who has paid this county imposed penalty, and thereafter collects from the fractional interest holders any part of their tax due, may retain those funds as reimbursement against the penalty paid.

3. Interest on delinquent taxes shall be assessed as set forth in Section 59-2-1331.

4. Each unit operator may be required to submit to the Property Tax Division a listing of all fractional interest owners and their interests upon specific request of the Property Tax Division. Working interest owners, upon request, shall be required to submit similar information to unit operators.

R884-24P-14. Valuation of Real Property Encumbered by Preservation Easements Pursuant to Utah Code Ann. Section 59-2-303.

(1) The assessor shall take into consideration any preservation easements attached to historically significant real property and structures when determining the property's value.

(2) After the preservation easement has been recorded with the county recorder, the property owner of record shall submit to the county assessor a notice of the preservation easement containing the following information:

(a) the property owner's name;

(b) the address of the property; and

(c) the serial number of the property.

(3) The county assessor shall review the property and incorporate any value change due to the preservation easement in the following year's assessment roll.

R884-24P-16. Assessment of Interlocal Cooperation Act Project Entity Properties Pursuant to Utah Code Ann. Section 11-13-302.

(1) Definitions:

(a) "Utah fair market value" means the fair market value of that portion of the property of a project entity located within Utah upon which the fee in lieu of ad valorem property tax may be calculated.

(b) "Fee" means the annual fee in lieu of ad valorem property tax payable by a project entity pursuant to Section 11-13-302.

(c) "Energy supplier" means an entity that purchases any capacity, service or other benefit of a project to provide electrical service.

(d) "Exempt energy supplier" means an energy supplier whose tangible property is exempted by Article XIII, Sec. 3 of the Constitution of Utah from the payment of ad valorem property tax.

(e) "Optimum operating capacity" means the capacity at which a project is capable of operating on a sustained basis taking into account its design, actual operating history, maintenance requirements, and similar information from comparable projects, if any. The determination of the projected and actual optimum operating capacities of a project shall recognize that projects are not normally operated on a sustained basis at 100 percent of their designed or actual capacities and that the optimum level for operating a project on a sustained basis may vary from project to project.

(f) "Property" means any electric generating facilities, transmission facilities, distribution facilities, fuel facilities, fuel transportation facilities, water facilities, land, water or other existing facilities or tangible property owned by a project entity and required for the project which, if owned by an entity required to pay ad valorem property taxes, would be subject to assessment for ad valorem tax purposes.

(g) "Sold," for the purpose of interpreting Subsection (4), means the first sale of the capacity, service, or other benefit produced by the project without regard to any subsequent sale, resale, or lay-off of that capacity, service, or other benefit.

(h) "Taxing jurisdiction" means a political subdivision of this state in which any portion of the project is located.

(i) All definitions contained in Section 11-13-103 apply to this rule.

(2) The Tax Commission shall determine the fair market value of the property of each project entity. Fair market value shall be based upon standard appraisal theory and shall be determined by correlating estimates derived from the income and cost approaches to value described below.

(a) The income approach to value requires the imputation of an income stream and a capitalization rate. The income stream may be based on recognized indicators such as average income, weighted income, trended income, present value of future income streams, performance ratios, and discounted cash flows. The imputation of income stream and capitalization rate shall be derived from the data of other similarly situated companies. Similarity shall be based on factors such as location, fuel mix, customer mix, size and bond ratings. Estimates may also be imputed from industry data generally. Income data from similarly situated companies will be adjusted to reflect differences in governmental regulatory and tax policies.

(b) The cost approach to value shall consist of the total of the property's net book value of the project's property. This total shall then be adjusted for obsolescence if any.

(c) In addition to, and not in lieu of, any adjustments for obsolescence made pursuant to Subsection (2)(b), a phase-in adjustment shall be made to the assessed valuation of any new project or expansion of an existing project on which construction commenced by a project entity after January 1, 1989 as follows:

(i) During the period the new project or expansion is valued as construction work in process, its assessed valuation shall be multiplied by the percentage calculated by dividing its projected production as of the projected date of completion of construction by its projected optimum operating capacity as of that date.

(ii) Once the new project or expansion ceases to be valued as construction work in progress, its assessed valuation shall be multiplied by the percentage calculated by dividing its actual production by its actual optimum operating capacity. After the new project or expansion has sustained actual production at its optimum operating capacity during any tax year, this percentage shall be deemed to be 100 percent for the remainder of its useful life.

(3) If portions of the property of the project entity are located in states in addition to Utah and those states do not apply a unit valuation approach to that property, the fair market value of the property allocable to Utah shall be determined by computing the cost approach to value on the basis of the net book value of the property located in Utah and imputing an estimated income stream based solely on the value of the Utah property as computed under the cost approach. The correlated value so determined shall be the Utah fair market value of the property.

(4) Before fixing and apportioning the Utah fair market value of the property to the respective taxing jurisdictions in which the property, or a portion thereof is located, the Utah fair market value of the property shall be reduced by the percentage of the capacity, service, or other benefit sold by the project entity to exempt energy suppliers.

(5) For purposes of calculating the amount of the fee payable under Section 11-13-302(3), the percentage of the project that is used to produce the capacity, service or other benefit sold shall be deemed to be 100 percent, subject to adjustments provided by this rule, from the date the project is determined to be commercially operational.

(6) In computing its tax rate pursuant to the formula specified in Section 59-2-924(2), each taxing jurisdiction in which the project property is located shall add to the amount of its budgeted property tax revenues the amount of any credit due to the project entity that year under Section 11-13-302(3), and shall divide the result by the sum of the taxable value of all property taxed, including the value of the project property apportioned to the jurisdiction, and further adjusted pursuant to the requirements of Section 59-2-924.

(7) Subsections (2)(a) and (2)(b) are retroactive to the lien date of January 1, 1984. Subsection (2)(c) is effective as of the lien date of January 1, 1989. The remainder of this rule is retroactive to the lien date of January 1, 1988.

R884-24P-19. Appraiser Designation Program Pursuant to Utah Code Ann. Sections 59-2-701 and 59-2-702.

(1) "State certified general appraiser," "state certified residential appraiser," "state licensed appraiser," and trainee are as defined in Section 61-2b-2.

(2) The ad valorem training and designation program consists of several courses and practica.

(a) Certain courses must be sanctioned by either the Appraiser Qualification Board of the Appraisal Foundation (AQB) or the Western States Association of Tax Administrators (WSATA).

(b) The courses comprising the basic designation program

are:

(i) Course 101 - Basic Appraisal Principles;

(ii) Course 103 - Uniform Standards of Professional Appraisal Practice (AQB);

(iii) Course 501 - Assessment Practice in Utah;

(iv) Course 502 - Mass Appraisal of Land;

(v) Course 503 - Development and Use of Personal Property Schedules;

(vi) Course 504 - Appraisal of Public Utilities and Railroads (WSATA); and

(vii) Course 505 - Income Approach Application.

(3) Candidates must attend 90 percent of the classes in each course and pass the final examination for each course with a grade of 70 percent or more to be successful.

(4) There are four recognized ad valorem designations: ad valorem residential appraiser, ad valorem general real property appraiser, ad valorem personal property auditor/appraiser, and ad valorem centrally assessed valuation analyst.

(a) These designations are granted only to individuals employed in a county assessor office or the Property Tax Division, working as appraisers, review appraisers, valuation auditors, or analysts/administrators providing oversight and direction to appraisers and auditors.

(b) An assessor, county employee, or state employee must hold the appropriate designation to value property for ad valorem taxation purposes.

(5) Ad valorem residential appraiser.

(a) To qualify for this designation, an individual must:

(i) successfully complete courses 501 and 502;

(ii) successfully complete a comprehensive residential field practicum; and

(iii) attain and maintain state licensed or state certified appraiser status.

(b) Upon designation, the appraiser may value residential, vacant, and agricultural property for ad valorem taxation purposes.

(6) Ad valorem general real property appraiser.

(a) In order to qualify for this designation, an individual must:

(i) successfully completecourses 501, 502, and 505;

(ii) successfully complete a comprehensive field practicum including residential and commercial properties; and

(iii) attain and maintain state certified appraiser status.

(b) Upon designation, the appraiser may value all types of locally assessed real property for ad valorem taxation purposes.

(7) Ad valorem personal property auditor/appraiser.

(a) To qualify for this designation, an individual must:

(i) successfully complete courses 101, 103, 501, and 503; and

(ii) successfully complete a comprehensive auditing practicum.

(b) Upon designation, the auditor/appraiser may value locally assessed personal property for ad valorem taxation purposes.

(8) Ad valorem centrally assessed valuation analyst.

(a) In order to qualify for this designation, an individual must:

(i) successfully completecourses 501 and 504;

(ii) successfully complete a comprehensive valuation practicum; and

(iii) attain and maintain state licensed or state certified appraiser status.

(b) Upon designation, the analyst may value centrally assessed property for ad valorem taxation purposes.

(9) If a candidate fails to receive a passing grade on a final examination, two re-examinations are allowed. If the re-examinations are not successful, the individual must retake the failed course. The cost to retake the failed course will not be borne by the Tax Commission.

(10) A practicum involves the appraisal or audit of selected properties. The candidate's supervisor must formally request that the Property Tax Division administer a practicum.

(a) Emphasis is placed on those types of properties the candidate will most likely encounter on the job.

(b) The practicum will be administered by a designated appraiser assigned from the Property Tax Division.

(11) An appraiser trainee referred to in Section 59-2-701 shall be designated an ad valorem associate if the appraiser trainee:

(a) has completed all education and practicum requirements for designation under Subsections (5), (6), or (8); and

(b) has not completed the non-education requirements for licensure or certification under Title 61, Chapter 2b, Real Estate Appraiser Licensing and Certification.

(12) An individual holding a specified designation can qualify for other designations by meeting the additional requirements under Subsections (5), (6), (7), or (8).

(13)(a) Maintaining designated status for individuals designated under Subsection (7) requires completion of 14 hours of Tax Commission approved classroom work every two years.

(b) Maintaining designated status for individuals designated under Subsections (5), (6), and (8) requires maintaining their appraisal license or certification under Title 61, Chapter 2b, Real Estate Appraiser Licensing and Certification.

(14) Upon termination of employment from any Utah assessment jurisdiction, or if the individual no longer works primarily as an appraiser, review appraiser, valuation auditor, or analyst/administrator in appraisal matters, designation is automatically revoked.

(a) Ad valorem designation status may be reinstated if the individual secures employment in any Utah assessment jurisdiction within four years from the prior termination.

(b) If more than four years elapse between termination and rehire, and:

(i) the individual has been employed in a closely allied field, then the individual may challenge the course examinations. Upon successfully challenging all required course examinations, the prior designation status will be reinstated; or

(ii) if the individual has not been employed in real estate valuation or a closely allied field, the individual must retake all required courses and pass the final examinations with a score of 70 percent or more.

(15) All appraisal work performed by Tax Commission designated appraisers shall meet the standards set forth in section 61-2b-27.

(16) If appropriate Tax Commission designations are not held by assessor's office personnel, the appraisal work must be contracted out to qualified private appraisers. An assessor's office may elect to contract out appraisal work to qualified private appraisers even if personnel with the appropriate designation are available in the office. If appraisal work is contracted out, the following requirements must be met:

(a) The private sector appraisers performing the contracted work must hold the state certified residential appraiser or state certified general appraiser license issued by the Division of Real Estate of the Utah Department of Commerce. Only state certified general appraisers may appraise nonresidential properties.

(b) All appraisal work shall meet the standards set forth in Section 61-2b-27.

(17) The completion and delivery of the assessment roll required under Section 59-2-311 is an administrative function of the elected assessor.

(a) There are no specific licensure, certification, or educational requirements related to this function.

(b) An elected assessor may complete and deliver the assessment roll as long as the valuations and appraisals included in the assessment roll were completed by persons having the required designations.

R884-24P-20. Construction Work in Progress Pursuant to Utah Constitution Art. XIII, Section 2 and Utah Code Ann. Sections 59-2-201 and 59-2-301.

A. For purposes of this rule:

1. Construction work in progress means improvements as defined in Section 59-2-102, and personal property as defined in Section 59-2-102, not functionally complete as defined in A.6.

2. Project means any undertaking involving construction, expansion or modernization.

3. "Construction" means:

a) creation of a new facility;

b) acquisition of personal property; or

c) any alteration to the real property of an existing facility other than normal repairs or maintenance.

4. Expansion means an increase in production or capacity as a result of the project.

5. Modernization means a change or contrast in character or quality resulting from the introduction of improved techniques, methods or products.

6. Functionally complete means capable of providing economic benefit to the owner through fulfillment of the purpose for which it was constructed. In the case of a cost-regulated utility, a project shall be deemed to be functionally complete when the operating property associated with the project has been capitalized on the books and is part of the rate base of that utility.

7. Allocable preconstruction costs means expenditures associated with the planning and preparation for the construction of a project. To be classified as an allocable preconstruction cost, an expenditure must be capitalized.

8. Cost regulated utility means a power company, oil and gas pipeline company, gas distribution company or telecommunication company whose earnings are determined by a rate of return applied to rate base. Rate of return and rate base are set and approved by a state or federal regulatory commission.

9. Residential means single-family residences and duplex apartments.

10. Unit method of appraisal means valuation of the various physical components of an integrated enterprise as a single going concern. The unit method may employ one or more of the following approaches to value: the income approach, the cost approach, and the stock and debt approach.

B. All construction work in progress shall be valued at "full cash value" as described in this rule.

C. Discount Rates

For purposes of this rule, discount rates used in valuing all projects shall be determined by the Tax Commission, and shall be consistent with market, financial and economic conditions.

D. Appraisal of Allocable Preconstruction Costs.

1. If requested by the taxpayer, preconstruction costs associated with properties, other than residential properties, may be allocated to the value of the project in relation to the relative amount of total expenditures made on the project by the lien date. Allocation will be allowed only if the following conditions are satisfied by January 30 of the tax year for which the request is sought:

a) a detailed list of preconstruction cost data is supplied to the responsible agency;

b) the percent of completion of the project and the preconstruction cost data are certified by the taxpayer as to their accuracy.

2. The preconstruction costs allocated pursuant to D.1. of this rule shall be discounted using the appropriate rate determined in C. The discounted allocated value shall either be added to the values of properties other than residential properties determined under E.1. or shall be added to the values determined under the various approaches used in the unit method of valuation determined under F.

3. The preconstruction costs allocated under D. are subject to audit for four years. If adjustments are necessary after examination of the records, those adjustments will be classified as property escaping assessment.

E. Appraisal of Properties not Valued under the Unit Method.

1. The full cash value, projected upon completion, of all properties valued under this section, with the exception of residential properties, shall be reduced by the value of the allocable preconstruction costs determined D. This reduced full cash value shall be referred to as the "adjusted full cash value."

2. On or before January 1 of each tax year, each county assessor and the Tax Commission shall determine, for projects not valued by the unit method and which fall under their respective areas of appraisal responsibility, the following:

a) The full cash value of the project expected upon completion.

b) The expected date of functional completion of the project currently under construction.

(1) The expected date of functional completion shall be determined by the county assessor for locally assessed properties and by the Tax Commission for centrally-assessed properties.

c) The percent of the project completed as of the lien date.

(1) Determination of percent of completion for residential properties shall be based on the following percentage of completion:

(a) 10 - Excavation-foundation

(b) 30 - Rough lumber, rough labor

(c) 50 - Roofing, rough plumbing, rough electrical, heating

(d) 65 - Insulation, drywall, exterior finish

(e) 75 - Finish lumber, finish labor, painting

(f) 90 - Cabinets, cabinet tops, tile, finish plumbing, finish electrical

(g) 100 - Floor covering, appliances, exterior concrete, misc.

(2) In the case of all other projects under construction and valued under this section the percent of completion shall be determined by the county assessor for locally assessed properties and by the Tax Commission for centrally-assessed properties.

3. Upon determination of the adjusted full cash value for nonresidential projects under construction or the full cash value expected upon completion of residential projects under construction, the expected date of completion, and the percent of the project completed, the assessor shall do the following:

a) multiply the percent of the residential project completed by the total full cash value of the residential project expected upon completion; or in the case of nonresidential projects,

b) multiply the percent of the nonresidential project completed by the adjusted full cash value of the nonresidential project;

c) adjust the resulting product of E.3.a) or E.3.b) for the expected time of completion using the discount rate determined under C.

F. Appraisal of Properties Valued Under the Unit Method of Appraisal.

1. No adjustments under this rule shall be made to the income indicator of value for a project under construction that is owned by a cost-regulated utility when the project is allowed in rate base.

2. The full cash value of a project under construction as of January 1 of the tax year, shall be determined by adjusting the

cost and income approaches as follows:

a) Adjustments to reflect the time value of money in appraising construction work in progress valued under the cost and income approaches shall be made for each approach as follows:

(1) Each company shall report the expected completion dates and costs of the projects. A project expected to be completed during the tax year for which the valuation is being determined shall be considered completed on January 1 or July 1, whichever is closest to the expected completion date. The Tax Commission shall determine the expected completion date for any project whose completion is scheduled during a tax year subsequent to the tax year for which the valuation is being made.

(2) If requested by the company, the value of allocable preconstruction costs determined in D. shall then be subtracted from the total cost of each project. The resulting sum shall be referred to as the adjusted cost value of the project.

(3) The adjusted cost value for each of the future years prior to functional completion shall be discounted to reflect the present value of the project under construction. The discount rate shall be determined under C.

(4) The discounted adjusted cost value shall then be added to the values determined under the income approach and cost approach.

b) No adjustment will be made to reflect the time value of money for a project valued under the stock and debt approach to value.

G. This rule shall take effect for the tax year 1985.

R884-24P-24. Form for Notice of Property Valuation and Tax Changes Pursuant to Utah Code Ann. Sections 59-2-918.5 through 59-2-924.

(1) The county auditor must notify all real property owners of property valuation and tax changes on the Notice of Property Valuation and Tax Changes form.

(a) If a county desires to use a modified version of the Notice of Property Valuation and Tax Changes, a copy of the proposed modification must be submitted for approval to the Property Tax Division of the Tax Commission no later than March 1.

(i) Within 15 days of receipt, the Property Tax Division will issue a written decision, including justifications, on the use of the modified Notice of Property Valuation and Tax Changes.

(ii) If a county is not satisfied with the decision, it may petition for a hearing before the Tax Commission as provided in R861-1A-22.

(b) The Notice of Property Valuation and Tax Changes, however modified, must contain the same information as the unmodified version. A property description may be included at the option of the county.

(2) The Notice of Property Valuation and Tax Changes must be completed by the county auditor in its entirety, except in the following circumstances:

(a) New property is created by a new legal description; or

(b) The status of the improvements on the property has changed.

(c) In instances where partial completion is allowed, the term nonapplicable will be entered in the appropriate sections of the Notice of Property Valuation and Tax Changes.

(d) If the county auditor determines that conditions other than those outlined in this section merit deletion, the auditor may enter the term "nonapplicable" in appropriate sections of the Notice of Property Valuation and Tax Changes only after receiving approval from the Property Tax Division in the manner described in Subsection (1).

(3) Real estate assessed under the Farmland Assessment Act of 1969 must be reported at full market value, with the value based upon Farmland Assessment Act rates shown parenthetically.

(4)(a) All completion dates specified for the disclosure of property tax information must be strictly observed.

(b) Requests for deviation from the statutory completion dates must be submitted in writing on or before June 1, and receive the approval of the Property Tax Division in the manner described in Subsection (1).

(5) If the proposed rate exceeds the certified rate, jurisdictions in which the fiscal year is the calendar year are required to hold public hearings even if budget hearings have already been held for that fiscal year.

(6) If the cost of public notice required under Section 59-2-919 is greater than one percent of the property tax revenues to be received, an entity may combine its advertisement with other entities, or use direct mail notification.

(7) Calculation of the amount and percentage increase in property tax revenues required by Section 59-2-919 shall be computed by comparing property taxes levied for the current year with property taxes collected the prior year, without adjusting for revenues attributable to new growth.

(8) If a taxing district has not completed the tax rate setting process as prescribed in Sections 59-2-919 and 59-2-920 by August 17, the county auditor must seek approval from the Tax Commission to use the certified rate in calculating taxes levied.

(9) The value of property subject to the uniform fee under Sections 59-2-405 through 59-2-405.3 is excluded from taxable value for purposes of calculating new growth, the certified tax rate, and the proposed tax rate.

(10) The value and taxes of property subject to the uniform fee under Sections 59-2-405 through 59-2-405.3, as well as tax increment distributions and related taxable values of redevelopment renewal agencies, are excluded when calculating the percentage of property taxes collected as provided in Section 59-2-913.

(11) The following formulas and definitions shall be used in determining new growth:

(a) Actual new growth shall be computed as follows:

(i) the taxable value of property assessed by the commission and locally assessed real property for the current year adjusted for redevelopment minus year-end taxable value of property assessed by the commission and locally assessed real property for the previous year adjusted for redevelopment; then

(ii) plus or minus the difference between the taxable value of locally assessed personal property for the prior year adjusted for redevelopment and the year-end taxable value of locally assessed personal property for the year that is two years prior to the current year adjusted for redevelopment; then

(iii) plus or minus changes in value as a result of factoring; then

(iv) plus or minus changes in value as a result of reappraisal; then

(v) plus or minus any change in value resulting from a legislative mandate or court order.

(b) Net annexation value is the taxable value for the current year adjusted for redevelopment of all properties annexed into an entity during the previous calendar year minus the taxable value for the previous year adjusted for redevelopment for all properties annexed out of the entity during the previous calendar year.

(c) New growth is equal to zero for an entity with:

(i) an actual new growth value less than zero; and

(ii) a net annexation value greater than or equal to zero.

(d) New growth is equal to actual new growth for:

(i) an entity with an actual new growth value greater than or equal to zero; or

(ii) an entity with:

(A) an actual new growth value less than zero; and

(B) the actual new growth value is greater than or equal to

the net annexation value.

(e) New growth is equal to the net annexation value for an entity with:

(i) a net annexation value less than zero; and

(ii) the actual new growth value is less than the net annexation value.

(f) Adjusted new growth equals new growth multiplied by the mean collection rate for the previous five years.

(12)(a) For purposes of determining the certified tax rate, ad valorem property tax revenues budgeted by a taxing entity for the prior year are calculated by:

(i) increasing or decreasing the adjustable taxable value from the prior year Report 697 by the average of the percentage net change in the value of taxable property for the equalization period for the three calendar years immediately preceding the current calendar year; and

(ii) multiplying the result obtained in Subsection (12)(a)(i) by:

(A) the percentage of property taxes collected for the five calendar years immediately preceding the current calendar year; and

(B) the prior year approved tax rate.

(b) If a taxing entity levied the prior year approved tax rate, the budgeted revenues determined under Subsection (12)(a) are reflected in the budgeted revenue column of the prior year Report 693.

(13) Entities required to set levies for more than one fund must compute an aggregate certified rate. The aggregate certified rate is the sum of the certified rates for individual funds for which separate levies are required by law. The aggregate certified rate computation applies where:

(a) the valuation bases for the funds are contained within identical geographic boundaries; and

(b) the funds are under the levy and budget setting authority of the same governmental entity.

(14) For purposes of determining the certified tax rate of a municipality incorporated on or after July 1, 1996, the levy imposed for municipal-type services or general county purposes shall be the certified tax rate for municipal-type services or general county purposes, as applicable.

(15) No new entity, including a new city, may have a certified tax rate or levy a tax for any particular year unless that entity existed on the first day of that calendar year.

R884-24P-27. Standards for Assessment Level and Uniformity of Performance Pursuant to Utah Code Ann. Sections 59-2-704 and 59-2-704.5.

(1) Definitions.

(a) "Coefficient of dispersion (COD)" means the average deviation of a group of assessment ratios taken around the median and expressed as a percent of that measure.

(b) "Coefficient of variation (COV)" means the standard deviation expressed as a percentage of the mean.

(c) "Division" means the Property Tax Division of the commission.

(d) "Nonparametric" means data samples that are not normally distributed.

(e) "Parametric" means data samples that are normally distributed.

(f) "Urban counties" means counties classified as first or second class counties pursuant to Section 17-50-501.

(2) The commission adopts the following standards of assessment performance.

(a) For assessment level in each property class, subclass, and geographical area in each county, the measure of central tendency shall meet one of the following measures.

(i) The measure of central tendency shall be within 10 percent of the legal level of assessment.

(ii) The 95 percent confidence interval of the measure of central tendency shall contain the legal level of assessment.

(b) For uniformity of the property assessments in each class of property for which a detailed review is conducted during the current year, the measure of dispersion shall be within the following limits.

(i) In urban counties:

(A) a COD of 15 percent or less for primary residential property, and 20 percent or less for commercial property, vacant land, and secondary residential property; and

(B) a COV of 19 percent or less for primary residential property, and 25 percent or less for commercial property, vacant land, and secondary residential property.

(ii) In rural counties:

(A) a COD of 20 percent or less for primary residential property, and 25 percent or less for commercial property, vacant land, and secondary residential property; and

(B) a COV of 25 percent or less for primary residential property, and 31 percent or less for commercial property, vacant land, and secondary residential property.

(iii) For a rural or small jurisdiction with limited development, or for a jurisdiction with a depressed market, the county assessor may petition the division for a five percentage point increase in the COD or COV for one year only. After sufficient examination, the division may determine that a one-year expansion of the COD or COV is appropriate.

(c) Statistical measures.

(i) The measure of central tendency shall be the mean for parametric samples and the median for nonparametric samples.

(ii) The measure of dispersion shall be the COV for parametric samples and the COD for nonparametric samples.

(iii) To achieve statistical accuracy in determining assessment level under Subsection (2)(a) and uniformity under Subsection (2)(b) for any property class, subclass, or geographical area, the minimum sample size shall consist of 10 or more ratios.

(3) Each year the division shall conduct and publish an assessment-to-sale ratio study to determine if each county complies with the standards in Subsection (2).

(a) To meet the minimum sample size, the study period may be extended.

(b) A smaller sample size may be used if:

(i) that sample size is at least 10 percent of the class or subclass population; or

(ii) both the division and the county agree that the sample may produce statistics that imply corrective action appropriate to the class or subclass of property.

(c) If the division, after consultation with the counties, determines that the sample size does not produce reliable statistical data, an alternate performance evaluation may be conducted, which may result in corrective action. The alternate performance evaluation shall include review and analysis of the following:

(i) the county's procedures for collection and use of market data, including sales, income, rental, expense, vacancy rates, and capitalization rates;

(ii) the county-wide land, residential, and commercial valuation guidelines and their associated procedures for maintaining current market values;

(iii) the accuracy and uniformity of the county's individual property data through a field audit of randomly selected properties; and

(iv) the county's level of personnel training, ratio of appraisers to parcels, level of funding, and other workload and resource considerations.

(d) All input to the sample used to measure performance shall be completed by March 31 of each study year.

(e) The division shall conduct a preliminary annual assessment-to-sale ratio study by April 30 of the study year, allowing counties to apply adjustments to their tax roll prior to

the May 22 deadline.

(f) The division shall complete the final study immediately following the closing of the tax roll on May 22.

(4) The division shall order corrective action if the results of the final study do not meet the standards set forth in Subsection (2).

(a) Assessment level adjustments, or factor orders, shall be calculated by dividing the legal level of assessment by one of the following:

(i) the measure of central tendency, if the uniformity of the ratios meets the standards outlined in Subsection (2)(b); or

(ii) the 95 percent confidence interval limit nearest the legal level of assessment, if the uniformity of the ratios does not meet the standards outlined in Subsection (2)(b).

(b) Uniformity adjustmentsor other corrective action shall be ordered if the property fails to meet the standards outlined in Subsection (2)(b).(c) A corrective action order may contain language requiring a county to create, modify, or follow its five-year plan for a detailed review of property characteristics.

(d) All corrective action orders shall be issued by June 10 of the study year, or within five working days after the completion of the final study, whichever is later.

(5) The commission adopts the following procedures to insure compliance and facilitate implementation of ordered corrective action.

(a) Prior to the filing of an appeal, the division shall retain authority to correct errors and, with agreement of the affected county, issue amended orders or stipulate with the affected county to any appropriate alternative action without commission approval. Any stipulation by the division subsequent to an appeal is subject to commission approval.

(b) A county receiving a corrective action order resulting from this rule may file and appeal with the commission pursuant to rule R861-1A-11.

(c) A corrective action order will become the final commission order if the county does not appeal in a timely manner, or does not prevail in the appeals process.

(d) The division may assist local jurisdictions to ensure implementation of any corrective action orders by the following deadlines.

(i) Factor orders shall be implemented in the current study year prior to the mailing of valuation notices.

(ii) Other corrective action shall be implemented prior to May 22 of the year following the study year.

(e) The division shall complete audits to determine compliance with corrective action orders as soon after the deadlines set forth in Subsection (5)(d) as practical. The division shall review the results of the compliance audit with the county and make any necessary adjustments to the compliance audit within 15 days of initiating the audit. These adjustments shall be limited to the analysis performed during the compliance audit and may not include review of the data used to arrive at the underlying factor order. After any adjustments, the compliance audit will then be given to the commission for any necessary action.

(f) The county shall be informed of any adjustment required as a result of the compliance audit.

R884-24P-28. Reporting Requirements For Leased or Rented Personal Property Pursuant to Utah Code Ann. Section 59-2-306.

(1) The procedure set forth herein is required in reporting heavy equipment leased or rented during the tax year.

(2) The owner of leased or rented heavy equipment shall file annual reports with the commission, either on forms provided by the commission or electronically, for the periods January 1 through June 30, and July 1 through December 31 of each year. The reports shall contain the following information:

(a) a description of the leased or rented equipment;

(b) the year of manufacture and acquisition cost;

(c) a listing, by month, of the counties where the equipment has situs; and

(d) any other information required.

(3) For purposes of this rule, situs is established when leased or rented equipment is kept in an area for thirty days. Once situs is established, any portion of thirty days during which that equipment stays in that area shall be counted as a full month of situs. In no case may situs exceed twelve months for any year.

(4)(a) The completed report shall be submitted to the Property Tax Division of the commission within thirty days after each reporting period.

(b) Noncompliance will require accelerated reporting.

R884-24P-29. Taxable Household Furnishings Pursuant to Utah Code Ann. Section 59-2-1113.

A. Household furnishings, furniture, and equipment are subject to property taxation if:

1. the owner of the abode commonly receives legal consideration for its use, whether in the form of rent, exchange, or lease payments; or

2. the abode is held out as available for the rent, lease, or use by others.

R884-24P-32. Leasehold Improvements Pursuant to Utah Code Ann. Section 59-2-303.

A. The value of leasehold improvements shall be included in the value of the underlying real property and assessed to the owner of the underlying real property.

B. The combined valuation of leasehold improvements and underlying real property required in A. shall satisfy the requirements of Section 59-2-103(1).

C. The provisions of this rule shall not apply if the underlying real property is owned by an entity exempt from tax under Section 59-2-1101.

D. The provisions of this rule shall be implemented and become binding on taxpayers beginning January 1, 2000.

R884-24P-33. 2012 Personal Property Valuation Guides and Schedules Pursuant to Utah Code Ann. Section 59-2-301.

(1) Definitions.

(a)(i) "Acquisition cost" does not include indirect costs such as debugging, licensing fees and permits, insurance, or security.

(ii) Acquisition cost may correspond to the cost new for new property, or cost used for used property.

(b)(i) "Actual cost" includes the value of components necessary to complete the vehicle, such as tanks, mixers, special containers, passenger compartments, special axles, installation, engineering, erection, or assembly costs.

(ii) Actual cost does not include sales or excise taxes, maintenance contracts, registration and license fees, dealer charges, tire tax, freight, or shipping costs.

(c) "Cost new" means the actual cost of the property when purchased new.

(i) Except as otherwise provided in this rule, the Tax Commission and assessors shall rely on the following sources to determine cost new:

(A) documented actual cost of the new or used vehicle; or

(B) recognized publications that provide a method for approximating cost new for new or used vehicles.

(ii) For the following property purchased used, the taxing authority may determine cost new by dividing the property's actual cost by the percent good factor for that class:

(A) class 6 heavy and medium duty trucks;

(B) class 13 heavy equipment;

(C) class 14 motor homes;

(D) class 17 vessels equal to or greater than 31 feet in

length; and

(E) class 21 commercial trailers.

(d) For purposes of Sections 59-2-108 and 59-2-1115, "item of taxable tangible personal property" means a piece of equipment, machinery, furniture, or other piece of tangible personal property that is functioning at its highest and best use for the purpose it was designed and constructed and is generally capable of performing that function without being combined with other items of personal property. An item of taxable tangible personal property is not an individual component part of a piece of machinery or equipment, but the piece of machinery or equipment. For example, a fully functioning computer is an item of taxable tangible personal property, but the motherboard, hard drive, tower, or sound card are not.

(e) "Percent good" means an estimate of value, expressed as a percentage, based on a property's acquisition cost or cost new, adjusted for depreciation and appreciation of all kinds.

(i) The percent good factor is applied against the acquisition cost or the cost new to derive taxable value for the property.

(ii) Percent good schedules are derived from an analysis of the Internal Revenue Service Class Life, the Marshall and Swift Cost index, other data sources or research, and vehicle valuation guides such as Penton Price Digests.

(2) Each year the Property Tax Division shall update and publish percent good schedules for use in computing personal property valuation.

(a) Proposed schedules shall be transmitted to county assessors and interested parties for comment before adoption.

(b) A public comment period will be scheduled each year and a public hearing will be scheduled if requested by ten or more interested parties or at the discretion of the Commission.

(c) County assessors may deviate from the schedules when warranted by specific conditions affecting an item of personal property. When a deviation will affect an entire class or type of personal property, a written report, substantiating the changes with verifiable data, must be presented to the Commission. Alternative schedules may not be used without prior written approval of the Commission.

(d) A party may request a deviation from the value established by the schedule for a specific item of property if the use of the schedule does not result in the fair market value for the property at the retail level of trade on the lien date, including any relevant installation and assemblage value.

(3) The provisions of this rule do not apply to:

(a) a vehicle subject to the age-based uniform fee under Section 59-2-405.1;

(b) the following personal property subject to the age-based uniform fee under Section 59-2-405.2:

(i) an all-terrain vehicle;

(ii) a camper;

(iii) an other motorcycle;

(iv) an other trailer;

(v) a personal watercraft;

(vi) a small motor vehicle;

(vii) a snowmobile;

(viii) a street motorcycle;

(ix) a tent trailer;

(x) a travel trailer; and

(xi) a vessel, including an outboard motor of the vessel, that is less than 31 feet in length and

(c) an aircraft subject to the uniform statewide fee under Section 59-2-404.

(4) Other taxable personal property that is not included in the listed classes includes:

(a) Supplies on hand as of January 1 at 12:00 noon, including office supplies, shipping supplies, maintenance supplies, replacement parts, lubricating oils, fuel and consumable items not held for sale in the ordinary course of business. Supplies are assessed at total cost, including freight-in.

(b) Equipment leased or rented from inventory is subject to ad valorem tax. Refer to the appropriate property class schedule to determine taxable value.

(c) Property held for rent or lease is taxable, and is not exempt as inventory. For entities primarily engaged in rent-to-own, inventory on hand at January 1 is exempt and property out on rent-to-own contracts is taxable.

(5) Personal property valuation schedules may not be appealed to, or amended by, county boards of equalization.

(6) All taxable personal property, other than personal property subject to an age-based uniform fee under Section 59-2-405.1 or 59-2-405.2, or a uniform statewide fee under Section 59-2-404, is classified by expected economic life as follows:

(a) Class 1 - Short Life Property. Property in this class has a typical life of more than one year and less than four years. It is fungible in that it is difficult to determine the age of an item retired from service.

(i) Examples of property in the class include:

(A) barricades/warning signs;

(B) library materials;

(C) patterns, jigs and dies;

(D) pots, pans, and utensils;

(E) canned computer software;

(F) hotel linen;

(G) wood and pallets;

(H) video tapes, compact discs, and DVDs; and

(I) uniforms.

(ii) With the exception of video tapes, compact discs, and DVDs, taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(iii) A licensee of canned computer software shall use one of the following substitutes for acquisition cost of canned computer software if no acquisition cost for the canned computer software is stated:

(A) retail price of the canned computer software;

(B) if a retail price is unavailable, and the license is a nonrenewable single year license agreement, the total sum of expected payments during that 12-month period; or

(C) if the licensing agreement is a renewable agreement or is a multiple year agreement, the present value of all expected licensing fees paid pursuant to the agreement.

(iv) Video tapes, compact discs, and DVDs are valued at $15.00 per tape or disc for the first year and $3.00 per tape or disc thereafter.

(b) Class 2 - Computer Integrated Machinery.

(i) Machinery shall be classified as computer integrated machinery if all of the following conditions are met:

(A) The equipment is sold as a single unit. If the invoice breaks out the computer separately from the machine, the computer must be valued as Class 12 property and the machine as Class 8 property.

(B) The machine cannot operate without the computer and the computer cannot perform functions outside the machine.

(C) The machine can perform multiple functions and is controlled by a programmable central processing unit.

(D) The total cost of the machine and computer combined is depreciated as a unit for income tax purposes.

(E) The capabilities of the machine cannot be expanded by substituting a more complex computer for the original.

(ii) Examples of property in this class include:
(A) CNC mills;
(B) CNC lathes;
(C) high-tech medical and dental equipment such as MRI equipment, CAT scanners, and mammography units.
(iii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(c) Class 3 - Short Life Trade Fixtures. Property in this class generally consists of electronic types of equipment and includes property subject to rapid functional and economic obsolescence or severe wear and tear.
(i) Examples of property in this class include:
(A) office machines;
(B) alarm systems;
(C) shopping carts;
(D) ATM machines;
(E) small equipment rentals;
(F) rent-to-own merchandise;
(G) telephone equipment and systems;
(H) music systems;
(I) vending machines;
(J) video game machines; and
(K) cash registers and point of sale equipment.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(d) Class 4 Short Life Expensed Property.
(i) Property shall be classified as short life expensed property if all of the following conditions are met:
(A) the property is an item of taxable tangible personal property with an acquisition cost of $1,000 or less;
(B) the property is the same type as the following personal property:
(I) short life property;
(II) short life trade fixtures; or
(III) computer hardware; and
(C) the owner of the property elects to have the property assessed as short life expensed property.
(ii) Examples of property in this class include:
(A) short life property defined in Class 1;
(B) short life trade fixtures defined in Class 3 ; and
(C) computer hardware defined in Class 12.
(iii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(e) Class 5 - Long Life Trade Fixtures. Class 5 property is subject to functional obsolescence in the form of style changes.
(i) Examples of property in this class include:
(A) furniture;
(B) bars and sinks:
(C) booths, tables and chairs;
(D) beauty and barber shop fixtures;
(E) cabinets and shelves;
(F) displays, cases and racks;
(G) office furniture;
(H) theater seats;
(I) water slides; and
(J) signs, mechanical and electrical.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(f) Class 6 - Heavy and Medium Duty Trucks.
(i) Examples of property in this class include:
(A) heavy duty trucks;
(B) medium duty trucks;
(C) crane trucks;
(D) concrete pump trucks; and
(E) trucks with well-boring rigs.
(ii) Taxable value is calculated by applying the percent good factor against the cost new.
(iii) Cost new of vehicles in this class is defined as follows:
(A) the documented actual cost of the vehicle for new vehicles; or
(B) 75 percent of the manufacturer's suggested retail price.
(iv) For state assessed vehicles, cost new shall include the value of attached equipment.
(v) The 2012 percent good applies to 2012 models purchased in 2011.
(vi) Trucks weighing two tons or more have a residual taxable value of $1,750.

(g) Class 7 - Medical and Dental Equipment. Class 7 property is subject to a high degree of technological development by the health industry.
(i) Examples of property in this class include:
(A) medical and dental equipment and instruments;
(B) exam tables and chairs;
(C) microscopes; and
(D) optical equipment.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(h) Class 8 - Machinery and Equipment. Property in this class is subject to considerable functional and economic obsolescence created by competition as technologically advanced and more efficient equipment becomes available.
(i) Examples of property in this class include:
(A) manufacturing machinery;
(B) amusement rides;
(C) bakery equipment;
(D) distillery equipment;
(E) refrigeration equipment;
(F) laundry and dry cleaning equipment;
(G) machine shop equipment;
(H) processing equipment;
(I) auto service and repair equipment;
(J) mining equipment;
(K) ski lift machinery;
(L) printing equipment;
(M) bottling or cannery equipment;
(N) packaging equipment; and
(O) pollution control equipment.
(ii) Except as provided in Subsection (6)(g)(iii), taxable value is calculated by applying the percent good factor against the acquisition cost of the property.
(iii) (A) Notwithstanding Subsection (6)(g)(ii), the taxable value of the following oil refinery pollution control equipment required by the federal Clean Air Act shall be calculated pursuant to Subsection (6)(g)(iii)(B):
(I) VGO (Vacuum Gas Oil) reactor;
(II) HDS (Diesel Hydrotreater) reactor;
(III) VGO compressor;
(IV) VGO furnace;
(V) VGO and HDS high pressure exchangers;
(VI) VGO, SRU (Sulfur Recovery Unit), SWS (Sour Water Stripper), and TGU; (Tail Gas Unit) low pressure exchangers;
(VII) VGO, amine, SWS, and HDS separators and drums;
(VIII) VGO and tank pumps;
(IX) TGU modules; and
(X) VGO tank and air coolers.
(B) The taxable value of the oil refinery pollution control equipment described in Subsection (6)(g)(iii)(A) shall be calculated by:
(I) applying the percent good factor in Table 8 against the acquisition cost of the property; and
(II) multiplying the product described in Subsection (6)(g)(iii)(B)(I) by 50%.

(i) Class 9 - Off-Highway Vehicles.
(i) Because Section 59-2-405.2 subjects off-highway vehicles to an age-based uniform fee, a percent good schedule is not necessary.
(j) Class 10 - Railroad Cars. The Class 10 schedule was developed to value the property of railroad car companies. Functional and economic obsolescence is recognized in the developing technology of the shipping industry. Heavy wear and tear is also a factor in valuing this class of property.
(i) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(k) Class 11 - Street Motorcycles.
(i) Because Section 59-2-405.2 subjects street motorcycles to an age-based uniform fee, a percent good schedule is not necessary.
(l) Class 12 - Computer Hardware.
(i) Examples of property in this class include:
(A) data processing equipment;
(B) personal computers;
(C) main frame computers;
(D) computer equipment peripherals;
(E) cad/cam systems; and
(F) copiers.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(o) Class 15 - Semiconductor Manufacturing Equipment. Class 15 applies only to equipment used in the production of semiconductor products. Equipment used in the semiconductor manufacturing industry is subject to significant economic and functional obsolescence due to rapidly changing technology and economic conditions.
(i) Examples of property in this class include:
(A) crystal growing equipment;
(B) die assembly equipment;
(C) wire bonding equipment;
(D) encapsulation equipment;
(E) semiconductor test equipment;
(F) clean room equipment;
(G) chemical and gas systems related to semiconductor manufacturing;
(H) deionized water systems;
(I) electrical systems; and
(J) photo mask and wafer manufacturing dedicated to semiconductor production.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(p) Class 16 - Long-Life Property. Class 16 property has a long physical life with little obsolescence.
(i) Examples of property in this class include:
(A) billboards;
(B) sign towers;
(C) radio towers;
(D) ski lift and tram towers;
(E) non-farm grain elevators; and
(F) bulk storage tanks.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(q) Class 17 - Vessels Equal to or Greater Than 31 Feet in Length.
(i) Examples of property in this class include:
(A) houseboats equal to or greater than 31 feet in length;
(B) sailboats equal to or greater than 31 feet in length; and
(C) yachts equal to or greater than 31 feet in length.
(ii) A vessel, including an outboard motor of the vessel, under 31 feet in length:
(A) is not included in Class 17;
(B) may not be valued using Table 17; and
(C) is subject to an age-based uniform fee under Section 59-2-405.2.
(iii) Taxable value is calculated by applying the percent good factor against the cost new of the property.
(iv) The Tax Commission and assessors shall rely on the following sources to determine cost new for property in this class:
(A) the following publications or valuation methods:
(I) the manufacturer's suggested retail price listed in the ABOS Marine Blue Book;
(II) for property not listed in the ABOS Marine Blue Book but listed in the NADA Marine Appraisal Guide, the NADA average value for the property divided by the percent good factor; or
(III) for property not listed in the ABOS Marine Blue

Book or the NADA Appraisal Guide:
(aa) the manufacturer's suggested retail price for comparable property; or
(bb) the cost new established for that property by a documented valuation source; or
(B) the documented actual cost of new or used property in this class.
(v) The 2012 percent good applies to 2012 models purchased in 2011.
(vi) Property in this class has a residual taxable value of $1,000.

(r) Class 17a - Vessels Less Than 31 Feet in Length
(i) Because Section 59-2-405.2 subjects vessels less than 31 feet in length to an age-based uniform fee, a percent good schedule is not necessary.
(s) Class 18 - Travel Trailers and Class 18a - Tent Trailers/Truck Campers.
(i) Because Section 59-2-405.2 subjects travel trailers and tent trailers/truck campers to an age-based uniform fee, a percent good schedule is not necessary.
(t) Class 20 - Petroleum and Natural Gas Exploration and Production Equipment. Class 20 property is subject to significant functional and economic obsolescence due to the volatile nature of the petroleum industry.
(i) Examples of property in this class include:
(A) oil and gas exploration equipment;
(B) distillation equipment;
(C) wellhead assemblies;
(D) holding and storage facilities;
(E) drill rigs;
(F) reinjection equipment;
(G) metering devices;
(H) cracking equipment;
(I) well-site generators, transformers, and power lines;
(J) equipment sheds;
(K) pumps;
(L) radio telemetry units; and
(M) support and control equipment.
(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(u) Class 21 - Commercial Trailers.
(i) Examples of property in this class include:
(A) dry freight van trailers;
(B) refrigerated van trailers;
(C) flat bed trailers;
(D) dump trailers;
(E) livestock trailers; and
(F) tank trailers.
(ii) Taxable value is calculated by applying the percent good factor against the cost new of the property. For state assessed vehicles, cost new shall include the value of attached equipment.
(iii) The 2012 percent good applies to 2012 models purchased in 2011.
(iv) Commercial trailers have a residual taxable value of $1,000.

(v) Class 21a - Other Trailers (Non-Commercial).
(i) Because Section 59-2-405.2 subjects this class of trailers to an age-based uniform fee, a percent good schedule is not necessary.
(w) Class 22 - Passenger Cars, Light Trucks/Utility Vehicles, and Vans.
(i) Class 22 vehicles fall within four subcategories: domestic passenger cars, foreign passenger cars, light trucks, including utility vehicles, and vans.
(ii) Because Section 59-2-405.1 subjects Class 22 property to an age-based uniform fee, a percent good schedule is not necessary.
(x) Class 22a - Small Motor Vehicles.
(i) Because Section 59-2-405.2 subjects small motor vehicles to an age-based uniform fee, a percent good schedule is not necessary.
(y) Class 23 - Aircraft Required to be Registered With the State.
(i) Because Section 59-2-404 subjects aircraft required to be registered with the state to a statewide uniform fee, a percent good schedule is not necessary.
(z) Class 24 - Leasehold Improvements on Exempt Real Property.
(i) The Class 24 schedule is to be used only for those leasehold improvements where the underlying real property is

owned by an entity exempt from property tax under Section 59-2-1101. See Tax Commission rule R884-24P-32. Leasehold improvements include:

(A) walls and partitions;
(B) plumbing and roughed-in fixtures;
(C) floor coverings other than carpet;
(D) store fronts;
(E) decoration;
(F) wiring;
(G) suspended or acoustical ceilings;
(H) heating and cooling systems; and
(I) iron or millwork trim.

(ii) Taxable value is calculated by applying the percent good factor against the cost of acquisition, including installation.

(iii) The Class 3 schedule is used to value short life leasehold improvements.

TABLE 24

(aa) Class 25 - Aircraft Parts Manufacturing Tools and Dies. Property in this class is generally subject to rapid physical, functional, and economic obsolescence due to rapid technological and economic shifts in the airline parts manufacturing industry. Heavy wear and tear is also a factor in valuing this class of property.

(i) Examples of property in this class include:
(A) aircraft parts manufacturing jigs and dies;
(B) aircraft parts manufacturing molds;
(C) aircraft parts manufacturing patterns;
(D) aircraft parts manufacturing taps and gauges;
(E) aircraft parts manufacturing test equipment; and
(F) aircraft parts manufacturing fixtures.

(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

(bb) Class 26 - Personal Watercraft.

(i) Because Section 59-2-405.2 subjects personal watercraft to an age-based uniform fee, a percent good schedule is not necessary.

(cc) Class 27 - Electrical Power Generating Equipment and Fixtures

(i) Examples of property in this class include:
(A) electrical power generators; and
(B) control equipment.

(ii) Taxable value is calculated by applying the percent good factor against the acquisition cost of the property.

The provisions of this rule shall be implemented and become binding on taxpayers beginning January 1, 2012.

R884-24P-35. Annual Statement for Certain Exempt Uses of Property Pursuant to Utah Code Ann. Section 59-2-1102.

(1) The purpose of this rule is to provide guidance to property owners required to file an annual statement under Section 59-2-1102 in order to claim a property tax exemption under Subsection 59-2-1101(3)(a)(iv) or (v).

(2) The annual statement filed pursuant to Section 59-2-1102 shall contain the following information for the specific property for which an exemption is sought:

(a) the owner of record of the property;
(b) the property parcel, account, or serial number;
(c) the location of the property;
(d) the tax year in which the exemption was originally granted;
(e) a description of any change in the use of the real or personal property since January 1 of the prior year;
(f) the name and address of any person or organization conducting a business for profit on the property;
(g) the name and address of any organization that uses the real or personal property and pays a fee for that use that is greater than the cost of maintenance and utilities associated with the property;
(h) a description of any personal property leased by the owner of record for which an exemption is claimed;
(i) the name and address of the lessor of property described in Subsection (2)(h);
(j) the signature of the owner of record or the owner's authorized representative; and
(k) any other information the county may require.

(3) The annual statement shall be filed:
(a) with the county legislative body in the county in which the property is located;
(b) on or before March 1; and
(c) using:

(i) Tax Commission form PT-21, Annual Statement for Continued Property Tax Exemption; or

(ii) a form that contains the information required under Subsection (2).

R884-24P-36. Contents of Real Property Tax Notice Pursuant to Utah Code Ann. Section 59-2-1317.

A. In addition to the information required by Section 59-2-1317, the tax notice for real property shall specify the following:

1. the property identification number;

2. the appraised value of the property and, if applicable, any adjustment for residential exemptions expressed in terms of taxable value;

3. if applicable, tax relief for taxpayers eligible for blind, veteran, or poor abatement or the circuit breaker, which shall be shown as credits to total taxes levied; and

4. itemized tax rate information for each taxing entity and total tax rate.

R884-24P-37. Separate Values of Land and Improvements Pursuant to Utah Code Ann. Sections 59-2-301 and 59-2-305.

A. The county assessor shall maintain an appraisal record of all real property subject to assessment by the county. The record shall include the following information:

1. owner of the property;

2. property identification number;

3. description and location of the property; and

4. full market value of the property.

B. Real property appraisal records shall show separately the value of the land and the value of any improvements.

R884-24P-38. Nonoperating Railroad Properties Pursuant to Utah Code Ann. Section 59-2-201.

(1)(a) "Railroad right of way" (RR-ROW) means a strip of land upon which a railroad company constructs the road bed.

(b) RR-ROW within incorporated towns and cities shall consist of 50 feet on each side of the main line main track, branch line main track or main spur track. Variations to the 50-foot standard shall be approved on an individual basis.

(c) RR-ROW outside incorporated towns and cities shall consist of the actual right-of-way owned if not in excess of 100 feet on each side of the center line of the main line main track, branch line main track, or main spur track. In cases where unusual conditions exist, such as mountain cuts, fills, etc., and more than 100 feet on either side of the main track is required for ROW and where small parcels of land are otherwise required for ROW purposes, the necessary additional area shall be reported as RR-ROW.

(2) Assessment of nonoperating railroad properties. Railroad property formerly assessed by the unitary method that has been determined to be nonoperating, and that is not necessary to the conduct of the business, shall be assessed separately by the local county assessor.

(3) Assessment procedures.

(a) Properties charged to nonoperating accounts are reviewed by the Property Tax Division, and if taxable, are assessed and placed on the local county assessment rolls separately from the operating properties.

(b) RR-ROW is considered operating and necessary to the conduct and contributing to the income of the business. Any revenue derived from leasing of property within the RR-ROW is considered railroad operating revenues.

(c) Real property outside of the RR-ROW that is necessary to the conduct of the railroad operation is considered part of the unitary value. Some examples are:

(i) company homes occupied by superintendents and other employees on 24-hour call;

(ii) storage facilities for railroad operations;

(iii) communication facilities; and

(iv) spur tracks outside of RR-ROW.

(d) Abandoned RR-ROW is considered nonoperating and shall be reported as such by the railroad companies.

(e) Real property outside of the RR-ROW that is not necessary to the conduct of the railroad operations is classified as nonoperating and therefore assessed by the local county assessor. Some examples are:

(i) land leased to service station operations;

(ii) grocery stores;

(iii) apartments;

(iv) residences; and

(v) agricultural uses.

(f) RR-ROW obtained by government grant or act of Congress is deemed operating property.

(4) Notice of Determination. It is the responsibility of the Property Tax Division to provide a notice of determination to the owner of the railroad property and the assessor of the county where the railroad property is located immediately after such determination of operating or nonoperating status has been made. If there is no appeal to the notice of determination, the Property Tax Division shall notify the assessor of the county where the property is located so that the property may be placed on the roll for local assessment.

(5) Appeals. Any interested party who wishes to contest the determination of operating or nonoperating property may do so by filing a request for agency action within ten days of the notice of determination of operating or nonoperating properties. Request for agency action may be made pursuant to Title 63G, Chapter 4.

R884-24P-40. Exemption of Parsonages, Rectories, Monasteries, Homes and Residences Pursuant to Utah Code Annotated 59-2-1101(d) and Article XIII, Section 2 of the Utah Constitution.

A. Parsonages, rectories, monasteries, homes and residences if used exclusively for religious purposes, are exempt from property taxes if they meet all of the following requirements:

1. The land and building are owned by a religious organization which has qualified with the Internal Revenue Service as a Section 501(c)(3) organization and which organization continues to meet the requirements of that section.

2. The building is occupied only by persons whose full time efforts are devoted to the religious organization and the immediate families of such persons.

3. The religious organization, and not the individuals who occupy the premises, pay all payments, utilities, insurance, repairs, and all other costs and expenses related to the care and maintenance of the premises and facilities.

B. The exemption for one person and the family of such person is limited to the real estate that is reasonable for the residence of the family and which remains actively devoted exclusively to the religious purposes. The exemption for more than one person, such as a monastery, is limited to that amount of real estate actually devoted exclusively to religious purposes.

C. Vacant land which is not actively used by the religious organization, is not deemed to be devoted exclusively to religious purposes, and is therefore not exempt from property taxes.

1. Vacant land which is held for future development or utilization by the religious organization is not deemed to be devoted exclusively to religious purposes and therefore not tax exempt.

2. Vacant land is tax exempt after construction commences or a building permit is issued for construction of a structure or other improvements used exclusively for religious purposes.

R884-24P-42. Farmland Assessment Audits and Personal Property Audits Pursuant to Utah Code Ann. Subsection 59-

2-508, and Section 59-2-705.

(1) Upon completion of commission audits of personal property accounts or land subject to the Farmland Assessment Act, the following procedures shall be implemented:

(a) If an audit reveals an incorrect assignment of property, or an increase or decrease in value, the county assessor shall correct the assessment on the assessment roll and the tax roll.

(b) A revised Notice of Property Valuation and Tax Changes or tax notice or both shall be mailed to the taxpayer for the current year and any previous years affected.

(c) The appropriate tax rate for each year shall be applied when computing taxes due for previous years.

(2) Assessors shall not alter results of an audit without first submitting the changes to the commission for review and approval.

(3) The commission shall review assessor compliance with this rule. Noncompliance may result in an order for corrective action.

R884-24P-44. Farm Machinery and Equipment Exemption Pursuant to Utah Code Ann. Sections 59-2-102 and 59-2-1101.

A. The use of the machinery and equipment, whether by the claimant or a lessee, shall determine the exemption.

1. For purposes of this rule, the term owner includes a purchaser under an installment purchase contract or capitalized lease where ownership passes to the purchaser at the end of the contract without the exercise of an option on behalf of the purchaser or seller.

B. Farm machinery and equipment is used primarily for agricultural purposes if it is used primarily for the production or harvesting of agricultural products.

C. The following machinery and equipment is used primarily for the production or harvesting of agricultural products:

1. Machinery and equipment used on the farm for storage, cooling, or freezing of fruits or vegetables;

2. Except as provided in C.3., machinery and equipment used in fruit or vegetable growing operations if the machinery and equipment does not physically alter the fruit or vegetables; and

3. Machinery and equipment that physically alters the form of fruits or vegetables if the operations performed by the machinery or equipment are reasonable and necessary in the preparation of the fruit or vegetables for wholesale marketing.

D. Machinery and equipment used for processing of agricultural products are not exempt.

R884-24P-49. Calculating the Utah Apportioned Value of a Rail Car Fleet Pursuant to Utah Code Ann. Section 59-2-201.

A. Definitions.

1. "Average market value per rail car" means the fleet rail car market value divided by the number of rail cars in the fleet.

2. "Fleet rail car market value" means the sum of:

a)(1) the yearly acquisition costs of the fleet's rail cars;

(2) multiplied by the appropriate percent good factors contained in Class 10 of R884-24P- 33, Personal Property Valuation Guides and Schedules; and

b) the sum of betterments by year.

(1) Except as provided in A.2.b)(2), the sum of betterments by year shall be depreciated on a 14-year straight line method.

(2) Notwithstanding the provisions of A.2.b)(1), betterments shall have a residual value of two percent.

3. "In-service rail cars" means the number of rail cars in the fleet, adjusted for out-of- service rail cars.

4. a) "Out-of-service rail cars" means rail cars:

(1) out-of-service for a period of more than ten consecutive hours; or

(2) in storage.

b) Rail cars cease to be out-of-service once repaired or removed from storage.

c) Out-of-service rail cars do not include rail cars idled for less than ten consecutive hours due to light repairs or routine maintenance.

5. "System car miles" means both loaded and empty miles accumulated in the U.S., Canada, and Mexico during the prior calendar year by all rail cars in the fleet.

6. "Utah car miles" mean both loaded and empty miles accumulated within Utah during the prior calendar year by all rail cars in the fleet.

7. "Utah percent of system factor" means the Utah car miles divided by the system car miles.

B. The provisions of this rule apply only to private rail car companies.

C. To receive an adjustment for out-of-service rail cars, the rail car company must report the number of out-of-service days to the commission for each of the company's rail car fleets.

D. The out-of-service adjustment is calculated as follows.

1. Divide the out-of-service days by 365 to obtain the out-of-service rail car equivalent.

2. Subtract the out-of-service rail car equivalent calculated in D.1. from the number of rail cars in the fleet.

E. The taxable value for each rail car fleet apportioned to Utah, for which the Utah percent of system factor is more than 50 percent, shall be determined by multiplying the Utah percent of system factor by the fleet rail car market value.

F. The taxable value for each rail car company apportioned to Utah, for which the Utah percent of system factor is less than or equal to 50 percent, shall be determined in the following manner.

1. Calculate the number of fleet rail cars allocated to Utah under the Utah percent of system factor. The steps for this calculation are as follows.

a) Multiply the Utah percent of system factor by the in-service rail cars in the fleet.

b) Multiply the product obtained in F.1.a) by 50 percent.

2. Calculate the number of fleet rail cars allocated to Utah under the time speed factor. The steps for this calculation are as follows.

a) Divide the fleet's Utah car miles by the average rail car miles traveled in Utah per year. The Commission has determined that the average rail car miles traveled in Utah per year shall equal 200,000 miles.

b) Multiply the quotient obtained in F.2.a) by the percent of in-service rail cars in the fleet.

c) Multiply the product obtained in F.2.b) by 50 percent.

3. Add the number of fleet rail cars allocated to Utah under the Utah percent of system factor, calculated in F.1.b), and the number of fleet rail cars allocated to Utah under the time speed factor, calculated in F.2.c), and multiply that sum by the average market value per rail car.

R884-24P-50. Apportioning the Utah Proportion of Commercial Aircraft Valuations Pursuant to Utah Code Ann. Section 59-2-201.

A. Definitions.

1. "Commercial air carrier" means any air charter service, air contract service or airline as defined by Section 59-2-102.

2. "Ground time" means the time period beginning at the time an aircraft lands and ending at the time an aircraft takes off.

B. The commission shall apportion to a tax area the assessment of the mobile flight equipment owned by a commercial air carrier in the proportion that the ground time in the tax area bears to the total ground time in the state.

C. The provisions of this rule shall be implemented and become binding on taxpayers beginning with the 1999 calendar year.

R884-24P-52. Criteria for Determining Primary Residence Pursuant to Utah Code Ann. Sections 59-2-102, 59-2-103, and 59-2-103.5.

(1) "Household" is as defined in Section 59-2-102.

(2) "Primary residence" means the location where domicile has been established.

(3) Except as provided in Subsections (4) and (6)(c) and (f), the residential exemption provided under Section 59-2- 103 is limited to one primary residence per household.

(4) An owner of multiple properties may receive the residential exemption on all properties for which the property is the primary residence of the tenant.

(5) Factors or objective evidence determinative of domicile include:

(a) whether or not the individual voted in the place he claims to be domiciled;

(b) the length of any continuous residency in the location claimed as domicile;

(c) the nature and quality of the living accommodations that an individual has in the location claimed as domicile as opposed to any other location;

(d) the presence of family members in a given location;

(e) the place of residency of the individual's spouse or the state of any divorce of the individual and his spouse;

(f) the physical location of the individual's place of business or sources of income;

(g) the use of local bank facilities or foreign bank institutions;

(h) the location of registration of vehicles, boats, and RVs;

(i) membership in clubs, churches, and other social organizations;

(j) the addresses used by the individual on such things as:

(i) telephone listings;

(ii) mail;

(iii) state and federal tax returns;

(iv) listings in official government publications or other correspondence;

(v) driver's license;

(vi) voter registration; and

(vii) tax rolls;

(k) location of public schools attended by the individual or the individual's dependents;

(l) the nature and payment of taxes in other states;

(m) declarations of the individual:

(i) communicated to third parties;

(ii) contained in deeds;

(iii) contained in insurance policies;

(iv) contained in wills;

(v) contained in letters;

(vi) contained in registers;

(vii) contained in mortgages; and

(viii) contained in leases.

(n) the exercise of civil or political rights in a given location;

(o) any failure to obtain permits and licenses normally required of a resident;

(p) the purchase of a burial plot in a particular location;

(q) the acquisition of a new residence in a different location.

(6) Administration of the Residential Exemption.

(a) Except as provided in Subsections (6)(b), (d), and (e), the first one acre of land per residential unit shall receive the residential exemption.

(b) If a parcel has high density multiple residential units, such as an apartment complex or a mobile home park, the amount of land, up to the first one acre per residential unit, eligible to receive the residential exemption shall be determined by the use of the land. Land actively used for residential purposes qualifies for the exemption.

(c) If the county assessor determines that a property under construction will qualify as a primary residence upon completion, the property shall qualify for the residential exemption while under construction.

(d) A property assessed under the Farmland Assessment Act shall receive the residential exemption only for the homesite.

(e) A property with multiple uses, such as residential and commercial, shall receive the residential exemption only for the percentage of the property that is used as a primary residence.

(f) If the county assessor determines that an unoccupied property will qualify as a primary residence when it is occupied, the property shall qualify for the residential exemption while unoccupied.

(g)(i) An application for the residential exemption required by an ordinance enacted under Section 59-2-103.5 shall contain the following information for the specific property for which the exemption is requested:

(A) the owner of record of the property;

(B) the property parcel number;

(C) the location of the property;

(D) the basis of the owner's knowledge of the use of the property;

(E) a description of the use of the property;

(F) evidence of the domicile of the inhabitants of the property; and

(G) the signature of all owners of the property certifying that the property is residential property.

(ii) The application under Subsection (6)(g)(i) shall be:

(A) on a form provided by the county; or

(B) in a writing that contains all of the information listed in Subsection (6)(g)(i).

R884-24P-53. 2012 Valuation Guides for Valuation of Land Subject to the Farmland Assessment Act Pursuant to Utah Code Ann. Section 59-2-515.

(1) Each year the Property Tax Division shall update and publish schedules to determine the taxable value for land subject to the Farmland Assessment Act on a per acre basis.

(a) The schedules shall be based on the productivity of the various types of agricultural land as determined through crop budgets and net rents.

(b) Proposed schedules shall be transmitted by the Property Tax Division to county assessors for comment before adoption.

(c) County assessors may not deviate from the schedules.

(d) Not all types of agricultural land exist in every county. If no taxable value is shown for a particular county in one of the tables, that classification of agricultural land does not exist in that county.

(2) All property qualifying for agricultural use assessment pursuant to Section 59-2-503 shall be assessed on a per acre basis as follows:

(a) Irrigated farmland shall be assessed under the following classifications.

(i) Irrigated I. The following counties shall assess Irrigated I property based upon the per acre values listed below:

TABLE 1
Irrigated I

1)	Box Elder	852
2)	Cache	740
3)	Carbon	552
4)	Davis	893
5)	Emery	530
6)	Iron	848
7)	Kane	444
8)	Millard	840
9)	Salt Lake	742
10)	Utah	782
11)	Washington	695

12)	Weber	843

(ii) Irrigated II. The following counties shall assess Irrigated II property based upon the per acre values listed below:

TABLE 2
Irrigated II

1)	Box Elder	748
2)	Cache	632
3)	Carbon	440
4)	Davis	784
5)	Duchesne	514
6)	Emery	427
7)	Grand	410
8)	Iron	744
9)	Juab	468
10)	Kane	341
11)	Millard	737
12)	Salt Lake	638
13)	Sanpete	569
14)	Sevier	593

(f) Land classified as nonproductive shall be assessed as follows on a per acre basis:

TABLE 13
Nonproductive Land

Nonproductive Land	
1) All Counties	5

R884-24P-55. Counties to Establish Ordinance for Tax Sale Procedures Pursuant to Utah Code Ann. Section 59-2-1351.1.

A. "Collusive bidding" means any agreement or understanding reached by two or more parties that in any way alters the bids the parties would otherwise offer absent the agreement or understanding.

B. Each county shall establish a written ordinance for real property tax sale procedures.

C. The written ordinance required under B. shall be displayed in a public place and shall be available to all interested parties.

D. The tax sale ordinance shall address, as a minimum, the following issues:

1. bidder registration procedures;
2. redemption rights and procedures;
3. prohibition of collusive bidding;
4. conflict of interest prohibitions and disclosure requirements;
5. criteria for accepting or rejecting bids;
6. sale ratification procedures;
7. criteria for granting bidder preference;
8. procedures for recording tax deeds;
9. payments methods and procedures;
10. procedures for contesting bids and sales;
11. criteria for striking properties to the county;
12. procedures for disclosing properties withdrawn from the sale for reasons other than redemption; and
13. disclaimers by the county with respect to sale procedures and actions.

R884-24P-56. Assessment, Collection, and Apportionment of Property Tax on Commercial Transportation Property Pursuant to Utah Code Ann. Sections 41-1a-301 and 59-2-801.

A. For purposes of Section 59-2-801, the previous year's statewide rate shall be calculated as follows:

1. Each county's overall tax rate is multiplied by the county's percent of total lane miles of principal routes.

2. The values obtained in A.1. for each county are summed to arrive at the statewide rate.

B. The assessment of vehicles apportioned under Section 41-1a-301 shall be apportioned at the same percentage ratio that has been filed with the Motor Vehicle Division of the State Tax Commission for determining the proration of registration fees.

C. For purposes of Section 59-2-801(2), principal route means lane miles of interstate highways and clover leafs, U.S. highways, and state highways extending through each county as determined by the Commission from current state Geographic Information System databases.

R884-24P-57. Judgment Levies Pursuant to Utah Code Ann. Sections 59-2-918.5, 59-2-924, 59-2-1328, and 59-2-1330.

(1) Definitions.

(a) "Issued" means the date on which the judgment is signed.

(b) "2.5% of the total ad valorem property taxes collected by the taxing entity in the previous fiscal year" includes any revenues collected by a judgment levy imposed in the prior year.

(2) A taxing entity's share of a judgment or order shall include the taxing entity's share of any interest that must be paid with the judgment or order.

(3) The judgment levy public hearing required by Section 59- 2-918.5 shall be held as follows:

(a) For taxing entities operating under a July 1 through June 30 fiscal year, the public hearing shall be held at least 10 days after the Notice of Property Valuation and Tax Changes is mailed.

(b) For taxing entities operating under a January 1 through December 31 fiscal year:

(i) for judgments issued from the prior June 1 through December 15, the public hearing shall be held at the same time as the hearing at which the annual budget is adopted;

(ii) for judgments issued from the prior December 16 through May 31, the public hearing shall be held at least 10 days after the Notice of Property Valuation and Tax Changes is mailed.

(c) If the taxing entity is required to hold a hearing under Section 59-2-919, the judgment levy hearing required by Subsections (3)(a) and (3)(b)(ii) shall be held at the same time as the hearing required under Section 59-2-919.

(4) If the Section 59-2-918.5 advertisement is combined with the Section 59-2-919 advertisement, the combined advertisement shall aggregate the general tax increase and judgment levy information.

(5) In the case of taxing entities operating under a January 1 through December 31 fiscal year, the advertisement for judgments issued from the previous December 16 through May 31 shall include any judgments issued from the previous June 1 through December 15 that the taxing entity advertised and budgeted for at its December budget hearing.

(6) All taxing entities imposing a judgment levy shall file with the commission a signed statement certifying that all judgments for which the judgment levy is imposed have met the statutory requirements for imposition of a judgment levy.

(a) The signed statement shall contain the following information for each judgment included in the judgment levy:

(i) the name of the taxpayer awarded the judgment;

(ii) the appeal number of the judgment; and

(iii) the taxing entity's pro rata share of the judgment.

(b) Along with the signed statement, the taxing entity must provide the commission the following:

(i) a copy of all judgment levy newspaper advertisements

required;

(ii) the dates all required judgment levy advertisements were published in the newspaper;

(iii) a copy of the final resolution imposing the judgment levy;

(iv) a copy of the Notice of Property Valuation and Tax Changes, if required; and

(v) any other information required by the commission.

(7) The provisions of House Bill 268, Truth in Taxation - Judgment Levy (1999 General Session), do not apply to judgments issued prior to January 1, 1999.

R884-24P-58. One-Time Decrease in Certified Rate Based on Estimated County Option Sales Tax Pursuant to Utah Code Ann. Section 59-2-924.

A. The estimated sales tax revenue to be distributed to a county under Section 59-12-1102 shall be determined based on the following formula:

1. sharedown of the commission's sales tax econometric model based on historic patterns, weighted 40 percent;

2. time series models, weighted 40 percent; and

3. growth rate of actual taxable sales occurring from January 1 through March 31 of the year a tax is initially imposed under Title 59, Chapter 12, Part 11, County Option Sales and Use Tax, weighted 20 percent.

R884-24P-59. One-Time Decrease in Certified Rate Based on Estimated Additional Resort Communities Sales Tax Pursuant to Utah Code Ann. Section 59-2-924.

A. The estimated additional resort communities sales tax revenue to be distributed to a municipality under Section 59-12-402 shall be determined based on the following formula:

1. time series model, econometric model, or simple average, based upon the availability of and variation in the data, weighted 75 percent; and

2. growth rate of actual taxable sales occurring from January 1 through March 31 of the year a tax is initially imposed under Section 59-12-402, weighted 25 percent.

R884-24P-60. Age-Based Uniform Fee on Tangible Personal Property Required to be Registered with the State Pursuant to Utah Code Ann. Section 59-2-405.1.

A. For purposes of Section 59-2-405.1, "motor vehicle" is as defined in Section 41-1a-102, except that motor vehicle does not include motorcycles as defined in Section 41-1a-102.

B. The uniform fee established in Section 59-2-405.1 is levied against motor vehicles and state-assessed commercial vehicles classified under Class 22 - Passenger Cars, Light Trucks/Utility Vehicles, and Vans, in Tax Commission rule R884-24P- 33.

C. Personal property subject to the uniform fee imposed in Section 59-2-405 is not subject to the Section 59-2-405.1 uniform fee.

D. The following classes of personal property are not subject to the Section 59-2-405.1 uniform fee, but remain subject to the ad valorem property tax:

1. vintage vehicles;

2. state-assessed commercial vehicles not classified under Class 22 - Passenger Cars, Light Trucks/Utility Vehicles, and Vans;

3. any personal property that is neither required to be registered nor exempt from the ad valorem property tax;

4. mobile and manufactured homes;

5. machinery or equipment that can function only when attached to or used in conjunction with motor vehicles or state-assessed commercial vehicles.

E. The age of a motor vehicle or state-assessed commercial vehicle, for purposes of Section 59-2-405.1, shall be determined by subtracting the vehicle model year from the current calendar year.

F. The only Section 59-2-405.1 uniform fee due upon registration or renewal of registration is the uniform fee calculated based on the age of the vehicle under E. on the first day of the registration period for which the registrant:

1. in the case of an original registration, registers the vehicle; or

2. in the case of a renewal of registration, renews the registration of the vehicle in accordance with Section 41-1a-216.

G. Centrally assessed taxpayers shall use the following formula to determine the value of locally assessed motor vehicles that may be deducted from the allocated unit valuation:

1. Divide the system value by the book value to determine the market to book ratio.

2. Multiply the market to book ratio by the book value of motor vehicles registered in Utah and subject to Section 59-2-405.1 to determine the value of motor vehicles that may be subtracted from the allocated unit value.

H. The motor vehicle of a nonresident member of the armed forces stationed in Utah may be registered in Utah without payment of the Section 59-2-405.1 uniform fee.

I. A motor vehicle belonging to a Utah resident member of the armed forces stationed in another state is not subject to the Section 59-2-405.1 uniform fee at the time of registration or renewal of registration as long as the motor vehicle is kept in the other state.

J. The situs of a motor vehicle or state-assessed commercial vehicle subject to the Section 59-2-405.1 uniform fee is determined in accordance with Section 59-2-104. Situs of purchased motor vehicles or state-assessed commercial vehicles shall be the tax area of the purchaser's domicile, unless the motor vehicle or state-assessed commercial vehicle will be kept in a tax area other than the tax area of the purchaser's domicile for more than six months of the year.

1. If an assessor discovers a motor vehicle or state-assessed commercial vehicle that is kept in the assessor's county but registered in another, the assessor may submit an affidavit along with evidence that the vehicle is kept in that county to the assessor of the county in which the vehicle is registered. Upon agreement, the assessor of the county of registration shall forward the fee collected to the county of situs within 30 working days.

2. If the owner of a motor vehicle or state-assessed commercial vehicle registered in Utah is domiciled outside of Utah, the taxable situs of the vehicle is presumed to be the county in which the uniform fee was paid, unless an assessor's affidavit establishes otherwise.

3. The Tax Commission shall, on an annual basis, provide each county assessor information indicating all motor vehicles and state-assessed commercial vehicles subject to state registration and their corresponding taxable situs.

4. Section 59-2-405.1 uniform fees received by a county that require distribution to a purchaser's domicile outside of that county shall be deposited into an account established by the Commission, pursuant to procedures prescribed by the Commission.

5. Section 59-2-405.1 uniform fees received by the Commission pursuant to J.4. shall be distributed to the appropriate county at least monthly.

K. The blind exemption provided in Section 59-2-1106 is applicable to the Section 59-2-405.1 uniform fee.

L. The veteran's exemption provided in Section 59-2-1104 is applicable to the Section 59-2-405.1 uniform fee.

M. The value of motor vehicles and state-assessed commercial vehicles to be considered part of the tax base for purposes of determining debt limitations pursuant to Article XIII, Section 14 of the Utah Constitution, shall be determined by dividing the Section 59-2-405.1 uniform fee collected by

.015.

N. The provisions of this rule shall be implemented and become binding on taxpayers beginning January 1, 1999.

R884-24P-61. 1.5 Percent Uniform Fee on Tangible Personal Property Required to be Registered with the State Pursuant to Utah Code Ann. Section 59-2-405.

A. Definitions.

1. For purposes of Section 59-2-405, "motor vehicle" is as defined in Section 41-1a-102, except that motor vehicle does not include motorcycles as defined in Section 41-1a-102.

2. "Recreational vehicle" means a vehicular unit other than a mobile home, primarily designed as a temporary dwelling for travel, recreational, or vacation use, which is either self-propelled or pulled by another vehicle.

a) Recreational vehicle includes a travel trailer, a camping trailer, a motor home, and a fifth wheel trailer.

b) Recreational vehicle does not include a van unless specifically designed or modified for use as a temporary dwelling.

B. The uniform fee established in Section 59-2-405 is levied against the following types of personal property, unless specifically excluded by Section 59-2-405:

1. motor vehicles that are not classified under Class 22 - Passenger Cars, Light Trucks/Utility Vehicles, and Vans, in Tax Commission rule R884-24P-33;

2. watercraft required to be registered with the state;

3. recreational vehicles required to be registered with the state; and

4. all other tangible personal property required to be registered with the state before it is used on a public highway, on a public waterway, on public land, or in the air.

C. The following classes of personal property are not subject to the Section 59-2-405 uniform fee, but remain subject to the ad valorem property tax:

1. vintage vehicles;

2. state-assessed commercial vehicles not classified under Class 22 - Passenger Cars, Light Trucks/Utility Vehicles, and Vans;

3. any personal property that is neither required to be registered nor exempt from the ad valorem property tax;

4. machinery or equipment that can function only when attached to or used in conjunction with motor vehicles.

D. The fair market value of tangible personal property subject to the Section 59-2-405 uniform fee is based on depreciated cost new as established in Tax Commission rule R884-24P-33, "Personal Property Valuation Guides and Schedules," published annually by the Tax Commission.

E. Centrally assessed taxpayers shall use the following formula to determine the value of locally assessed personal property that may be deducted from the allocated unit valuation:

1. Divide the system value by the book value to determine the market to book ratio.

2. Multiply the market to book ratio by the book value of personal property registered in Utah and subject to Section 59-2- 405 to determine the value of personal property that may be subtracted from the allocated unit value.

F. If a property's valuation is appealed to the county board of equalization under Section 59-2-1005, the property shall become subject to a total revaluation. All adjustments are made on the basis of their effect on the property's average retail value as of the January 1 lien date and according to Tax Commission rule R884-24P-33.

G. The county assessor may change the fair market value of any individual item of personal property in his jurisdiction for any of the following reasons:

1. The manufacturer's suggested retail price ("MSRP") or the cost new was not included on the state printout, computer tape, or registration card;

2. The MSRP or cost new listed on the state records was inaccurate; or

3. In the assessor's judgment, an MSRP or cost new adjustment made as a result of a property owner's informal request will continue year to year on a percentage basis.

H. If the personal property is of a type subject to annual registration, the Section 59-2-405 uniform fee is due at the time the registration is due. If the personal property is not registered during the year, the owner remains liable for payment of the Section 59-2-405 uniform fee to the county assessor.

1. No additional uniform fee may be levied upon personal property transferred during a calendar year if the Section 59-2-405 uniform fee has been paid for that calendar year.

2. If the personal property is of a type registered for periods in excess of one year, the Section 59-2-405 uniform fee shall be due annually.

3. The personal property of a nonresident member of the armed forces stationed in Utah may be registered in Utah without payment of the Section 59-2-405 uniform fee.

4. Personal property belonging to a Utah resident member of the armed forces stationed in another state is not subject to the Section 59-2-405 uniform fee as long as the personal property is kept in another state.

5. Noncommercial trailers weighing 750 pounds or less are not subject to the Section 59-2-405 uniform fee or ad valorem property tax but may be registered at the request of the owner.

I. If the personal property is of a type subject to annual registration, registration of that personal property may not be completed unless the Section 59-2-405 uniform fee has been paid, even if the taxpayer is appealing the uniform fee valuation. Delinquent fees may be assessed in accordance with Sections 59-2- 217 and 59-2-309 as a condition precedent to registration.

J. The situs of personal property subject to the Section 59-2-405 uniform fee is determined in accordance with Section 59-2- 104. Situs of purchased personal property shall be the tax area of the purchaser's domicile, unless the personal property will be kept in a tax area other than the tax area of the purchaser's domicile for more than six months of the year.

1. If an assessor discovers personal property that is kept in the assessor's county but registered in another, the assessor may submit an affidavit along with evidence that the property is kept in that county to the assessor of the county in which the personal property is registered. Upon agreement, the assessor of the county of registration shall forward the fee collected to the county of situs within 30 working days.

2. If the owner of personal property registered in Utah is domiciled outside of Utah, the taxable situs of the property is presumed to be the county in which the uniform fee was paid, unless an assessor's affidavit establishes otherwise.

3. The Tax Commission shall, on an annual basis, provide each county assessor information indicating all personal property subject to state registration and its corresponding taxable situs.

4. Section 59-2-405 uniform fees received by a county that require distribution to a purchaser's domicile outside of that county shall be deposited into an account established by the Commission, pursuant to procedures prescribed by the Commission.

5. Section 59-2-405 uniform fees received by the Commission pursuant to J.4. shall be distributed to the appropriate county at least monthly.

K. The blind exemption provided in Section 59-2-1106 is applicable to the Section 59-2-405 uniform fee.

L. The veteran's exemption provided in Section 59-2-1104 is applicable to the Section 59-2-405 uniform fee.

M. The provisions of this rule shall be implemented and become binding on taxpayers beginning January 1, 1999.

R884-24P-62. Valuation of State Assessed Unitary

Properties Pursuant to Utah Code Ann. Section 59-2-201.

(1) Purpose. The purpose of this rule is to:

(a) specify consistent mass appraisal methodologies to be used by the Property Tax Division (Division) in the valuation of tangible property assessable by the Commission; and

(b) identify preferred valuation methodologies to be considered by any party making an appraisal of an individual unitary property.

(2) Definitions:

(a) "Cost regulated utility" means any public utility assessable by the Commission whose allowed revenues are determined by a rate of return applied to a rate base set by a state or federal regulatory commission.

(b) "Fair market value" means the amount at which property would change hands between a willing buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of the relevant facts. Fair market value reflects the value of property at its highest and best use, subject to regulatory constraints.

(c) "Rate base" means the aggregate account balances reported as such by the cost regulated utility to the applicable state or federal regulatory commission.

(d) "Unitary property" means operating property that is assessed by the Commission pursuant to Section 59-2-201(1)(a) through (c).

(i) Unitary properties include:

(A) all property that operates as a unit across county lines, if the values must be apportioned among more than one county or state; and

(B) all property of public utilities as defined in Section 59-2-102.

(ii) These properties, some of which may be cost regulated utilities, are defined under one of the following categories.

(A) "Telecommunication properties" include the operating property of local exchange carriers, local access providers, long distance carriers, cellular telephone or personal communication service (PCS) providers and pagers, and other similar properties.

(B) "Energy properties" include the operating property of natural gas pipelines, natural gas distribution companies, liquid petroleum products pipelines, and electric corporations, including electric generation, transmission, and distribution companies, and other similar entities.

(C) "Transportation properties" include the operating property of all airlines, air charter services, air contract services, including major and small passenger carriers and major and small air freighters, long haul and short line railroads, and other similar properties.

(3) All tangible operating property owned, leased, or used by unitary companies is subject to assessment and taxation according to its fair market value as of January 1, and as provided in Utah Constitution Article XIII, Section 2. Intangible property as defined under Section 59-2-102 is not subject to assessment and taxation.

(4) General Valuation Principles. Unitary properties shall be assessed at fair market value based on generally accepted appraisal theory as provided under this rule.

(a) The assemblage or enhanced value attributable to the tangible property should be included in the assessed value. See Beaver County v. WilTel, Inc., 995 P.2d 602 (Utah 2000). The value attributable to intangible property must, when possible, be identified and removed from value when using any valuation method and before that value is used in the reconciliation process.

(b) The preferred methods to determine fair market value are the cost approach and a yield capitalization income indicator as set forth in Subsection (5).

(i) Other generally accepted appraisal methods may also be used when it can be demonstrated that such methods are necessary to more accurately estimate fair market value.

(ii) Direct capitalization and the stock and debt method typically capture the value of intangible property at higher levels than other methods. To the extent intangible property cannot be identified and removed, relatively less weight shall be given to such methods in the reconciliation process, as set forth in Subsection (5)(d).

(iii) Preferred valuation methods as set forth in this rule are, unless otherwise stated, rebuttable presumptions, established for purposes of consistency in mass appraisal. Any party challenging a preferred valuation method must demonstrate, by a preponderance of evidence, that the proposed alternative establishes a more accurate estimate of fair market value.

(c) Non-operating Property. Property that is not necessary to the operation of unitary properties and is assessed by a local county assessor, and property separately assessed by the Division, such as registered motor vehicles, shall be removed from the correlated unit value or from the state allocated value.

(5) Appraisal Methodologies.

(a) Cost Approach. Cost is relevant to value under the principle of substitution, which states that no prudent investor would pay more for a property than the cost to construct a substitute property of equal desirability and utility without undue delay. A cost indicator may be developed under one or more of the following methods: replacement cost new less depreciation (RCNLD), reproduction cost less depreciation (reproduction cost), and historic cost less depreciation (HCLD).

(i) "Depreciation" is the loss in value from any cause. Different professions recognize two distinct definitions or types of depreciation.

(A) Accounting. Depreciation, often called "book" or "accumulated" depreciation, is calculated according to generally accepted accounting principles or regulatory guidelines. It is the amount of capital investment written off on a firm's accounting records in order to allocate the original or historic cost of an asset over its life. Book depreciation is typically applied to historic cost to derive HCLD.

(B) Appraisal. Depreciation, sometimes referred to as "accrued" depreciation, is the difference between the market value of an improvement and its cost new. Depreciation is typically applied to replacement or reproduction cost, but should be applied to historic cost if market conditions so indicate. There are three types of depreciation:

(I) Physical deterioration results from regular use and normal aging, which includes wear and tear, decay, and the impact of the elements.

(II) Functional obsolescence is caused by internal property characteristics or flaws in the structure, design, or materials that diminish the utility of an improvement.

(III) External, or economic, obsolescence is an impairment of an improvement due to negative influences from outside the boundaries of the property, and is generally incurable. These influences usually cannot be controlled by the property owner or user.

(ii) Replacement cost is the estimated cost to construct, at current prices, a property with utility equivalent to that being appraised, using modern materials, current technology and current standards, design, and layout. The use of replacement cost instead of reproduction cost eliminates the need to estimate some forms of functional obsolescence.

(iii) Reproduction cost is the estimated cost to construct, at current prices, an exact duplicate or replica of the property being assessed, using the same materials, construction standards, design, layout and quality of workmanship, and embodying any functional obsolescence.

(iv) Historic cost is the original construction or acquisition cost as recorded on a firm's accounting records. Depending upon the industry, it may be appropriate to trend HCLD to current costs. Only trending indexes commonly recognized by

the specific industry may be used to adjust HCLD.

(v) RCNLD may be impractical to implement; therefore the preferred cost indicator of value in a mass appraisal environment for unitary property is HCLD. A party may challenge the use of HCLD by proposing a different cost indicator that establishes a more accurate cost estimate of value.

(b) Income Capitalization Approach. Under the principle of anticipation, benefits from income in the future may be capitalized into an estimate of present value.

(i) Yield Capitalization. The yield capitalization formula is CF/(k-g), where "CF" is a single year's normalized cash flow, "k" is the nominal, risk adjusted discount or yield rate, and "g" is the expected growth rate of the cash flow.

(A) Cash flow is restricted to the operating property in existence on the lien date, together with any replacements intended to maintain, but not expand or modify, existing capacity or function. Cash flow is calculated as net operating income (NOI) plus non-cash charges (e.g., depreciation and deferred income taxes), less capital expenditures and additions to working capital necessary to achieve the expected growth "g". Information necessary for the Division to calculate the cash flow shall be summarized and submitted to the Division by March 1 on a form provided by the Division.

(I) NOI is defined as net income plus interest.

(II) Capital expenditures should include only those necessary to replace or maintain existing plant and should not include any expenditure intended primarily for expansion or productivity and capacity enhancements.

(III) Cash flow is to be projected for the year immediately following the lien date, and may be estimated by reviewing historic cash flows, forecasting future cash flows, or a combination of both.

(Aa) If cash flows for a subsidiary company are not available or are not allocated on the parent company's cash flow statements, a method of allocating total cash flows must be developed based on sales, fixed assets, or other reasonable criteria. The subsidiary's total is divided by the parent's total to derive the allocation percentage to estimate the subsidiary's cash flow.

(Bb) If the subject company does not provide the Commission with its most recent cash flow statements by March 1 of the assessment year, the Division may estimate cash flow using the best information available.

(B) The discount rate (k) shall be based upon a weighted average cost of capital (WACC) considering current market debt rates and equity yields. WACC should reflect a typical capital structure for comparable companies within the industry.

(I) The cost of debt should reflect the current market rate (yield to maturity) of debt with the same credit rating as the subject company.

(II) The cost of equity is estimated using standard methods such as the capital asset pricing model (CAPM), the Risk Premium and Dividend Growth models, or other recognized models.

(Aa) The CAPM is the preferred method to estimate the cost of equity. More than one method may be used to correlate a cost of equity, but only if the CAPM method is weighted at least 50% in the correlation.

(Bb) The CAPM formula is k(e) = R(f) + (Beta x Risk Premium), where k(e) is the cost of equity and R(f) is the risk free rate.

(Cc) The risk free rate shall be the current market rate on 20-year Treasury bonds.

(Dd) The beta should reflect an average or value-weighted average of comparable companies and should be drawn consistently from Value Line or an equivalent source. The beta of the specific assessed property should also be considered.

(Ee) The risk premium shall be the arithmetic average of the spread between the return on stocks and the income return on long term bonds for the entire historical period contained in the Ibbotson Yearbook published immediately following the lien date.

(C) The growth rate "g" is the expected future growth of the cash flow attributable to assets in place on the lien date, and any future replacement assets.

(I) If insufficient information is available to the Division, either from public sources or from the taxpayer, to determine a rate, "g" will be the expected inflationary rate in the Gross Domestic Product Price Deflator obtained in Value Line. The growth rate and the methodology used to produce it shall be disclosed in a capitalization rate study published by the Commission by February 15 of the assessment year.

(ii) A discounted cash flow (DCF) method may be impractical to implement in a mass appraisal environment, but may be used when reliable cash flow estimates can be established.

(A) A DCF model should incorporate for the terminal year, and to the extent possible for the holding period, growth and discount rate assumptions that would be used in the yield capitalization method defined under Subsection (5)(b)(i).

(B) Forecasted growth may be used where unusual income patterns are attributed to

(I) unused capacity;

(II) economic conditions; or

(III) similar circumstances.

(C) Growth may not be attributed to assets not in place as of the lien date.

(iii) Direct Capitalization is an income technique that converts an estimate of a single year's income expectancy into an indication of value in one direct step, either by dividing the normalized income estimate by a capitalization rate or by multiplying the normalized income estimate by an income factor.

(c) Market or Sales Comparison Approach. The market value of property is directly related to the prices of comparable, competitive properties. The market approach is estimated by comparing the subject property to similar properties that have recently sold.

(I) Sales of comparable property must, to the extent possible, be adjusted for elements of comparison, including market conditions, financing, location, physical characteristics, and economic characteristics. When considering the sales of stock, business enterprises, or other properties that include intangible assets, adjustments must be made for those intangibles.

(II) Because sales of unitary properties are infrequent, a stock and debt indicator may be viewed as a surrogate for the market approach. The stock and debt method is based on the accounting principle which holds that the market value of assets equal the market value of liabilities plus shareholder's equity.

(d) Reconciliation. When reconciling value indicators into a final estimate of value, the appraiser shall take into consideration the availability, quantity, and quality of data, as well as the strength and weaknesses of each value indicator. Weighting percentages used to correlate the value approaches will generally vary by industry, and may vary by company if evidence exists to support a different weighting. The Division must disclose in writing the weighting percentages used in the reconciliation for the final assessment. Any departure from the prior year's weighting must be explained in writing.

(6) Property Specific Considerations. Because of unique characteristics of properties and industries, modifications or alternatives to the general value indicators may be required for specific industries.

(a) Cost Regulated Utilities.

(i) HCLD is the preferred cost indicator of value for cost regulated utilities because it represents an approximation of the basis upon which the investor can earn a return. HCLD is

calculated by taking the historic cost less depreciation as reflected in the utility's net plant accounts, and then:

(A) subtracting intangible property;

(B) subtracting any items not included in the utility's rate base (e.g., deferred income taxes and, if appropriate, acquisition adjustments); and

(C) adding any taxable items not included in the utility's net plant account or rate base.

(ii) Deferred Income Taxes, also referred to as DFIT, is an accounting entry that reflects the difference between the use of accelerated depreciation for income tax purposes and the use of straight-line depreciation for financial statements. For traditional rate base regulated companies, regulators generally exclude deferred income taxes from rate base, recognizing it as ratepayer contributed capital. Where rate base is reduced by deferred income taxes for rate base regulated companies, they shall be removed from HCLD.

(iii) Items excluded from rate base under Subsections (6)(a)(i)(A) or (B) should not be subtracted from HCLD to the extent it can be shown that regulators would likely permit the rate base of a potential purchaser to include a premium over existing rate base.

(b)(i) Railroads.

(ii) The cost indicator should generally be given little or no weight because there is no observable relationship between cost and fair market value.

(c) Airlines, air charter services, and air contract services.

(i) For purposes of this Subsection (6)(c):

(A) "aircraft valuation manual" means a nationally recognized airline price guide containing value estimates for individual commercial aircraft in average condition and identified by year, make and model;

(B) "airline" means an:

(I) airline under Section 59-2-102;

(II) air charter service under Section 59-2-102; and

(III) air contract service under Section 59-2-102; and

(C) "airline market indicator" means an estimate of value based on an aircraft valuation manual.

(ii) In situations where the use of preferred methods for determining fair market value under Subsection (5) does not produce a reasonable estimate of the fair market value of the property of an airline operating as a unit, an airline market indicator published in an aircraft valuation manual, and adjusted as provided in Subsections (6)(c)(ii)(A) and (6)(c)(ii)(B), may be used to estimate the fair market value of the airline property.

(A)(I) In order to reflect the value of a fleet of aircraft as part of an operating unit, an aircraft market indicator shall include a fleet adjustment or equivalent valuation for a fleet.

(II) If a fleet adjustment is provided in an aircraft valuation manual, the adjustment under Subsection (6)(c)(ii)(A)(I) shall follow the directions in that manual. If no fleet adjustment is provided in an aircraft valuation manual, the standard adjustment under Subsection (6)(c)(ii)(A)(I) shall be 20 percent from a wholesale value or equivalent level of value as published in the manual.

(B) Non-mobile flight equipment shall be valued using the cost approach under Subsection (5)(a) or the market or sales comparison approach under Subsection (5)(c), and added to the value of the fleet.

(iii) An income capitalization approach under Subsection (5)(b) shall incorporate the information available to make an estimate of future cash flows.

(iv)(A) When an aircraft market indicator under Subsection (6)(c)(ii) is used to estimate the fair market value of an airline, the Division shall:

(I) calculate the fair market value of the airline using the preferred methods under Subsection (5);

(II) retain the calculations under Subsection (6)(c)(iv)(A)(I) in the work files maintained by the Division; and

(III) include the amounts calculated under Subsection (6)(c)(iv)(A)(I) in any appraisal report that is produced in association with an assessment issued by the Division.

(B) When an aircraft market indicator under Subsection (6)(c)(ii) is used, the Division shall justify in any appraisal report issued with an assessment why the preferred methods under Subsection (5) were not used.

(v)(A) When the preferred methods under Subsection (5) are used to estimate the fair market value of an airline, the Division shall:

(I) calculate an aircraft market indicator under Subsection (6)(c)(ii);

(II) retain the calculations under Subsection (6)(c)(v)(A)(I) in the work files maintained by the Division; and

(III) include the amounts calculated under Subsection (6)(c)(v)(A)(I) in any appraisal report that is produced in association with an assessment issued by the Division.

(B) Value estimates from an aircraft valuation manual under Subsection (6)(c)(i)(A) along with the valuation of non-mobile flight equipment under Subsection (6)(c)(ii)(B) may also be included in an assessment or appraisal report for purposes of comparison.

R884-24P-63. Performance Standards and Training Requirements Pursuant to Utah Code Ann. Section 59-2-406.

A. The party contracting to perform services shall develop a written customer service performance plan within 60 days after the contract for performance of services is signed.

1. The customer service performance plan shall address:

a) procedures the contracting party will follow to minimize the time a customer waits in line; and

b) the manner in which the contracting party will promote alternative methods of registration.

2. The party contracting to perform services shall provide a copy of its customer service performance plan to the party for whom it provides services.

3. The party for whom the services are provided may, no more often than semiannually, audit the contracting party's performance based on its customer service performance plan, and may report the results of the audit to the county commission or the state tax commissioners, as applicable.

B. Each county office contracting to perform services shall conduct initial training of its new employees.

C. The Tax Commission shall provide regularly scheduled training for all county offices contracting to perform motor vehicle functions.

R884-24P-64. Determination and Application of Taxable Value for Purposes of the Property Tax Exemptions for Veterans With a Disability and the Blind Pursuant to Utah Code Ann. Sections 59-2-1104 and 59-2-1106.

For purposes of Sections 59-2-1104 and 59-2-1106, the taxable value of tangible personal property subject to a uniform fee under Sections 59-2-405.1 or 59-2-405.2 shall be calculated by dividing the uniform fee the tangible personal property is subject to by .015.

R884-24P-65. Assessment of Transitory Personal Property Pursuant to Utah Code Ann. Section 59-2-402.

A. "Transitory personal property"means tangible personal property that is used or operated primarily at a location other than a fixed place of business of the property owner or lessee.

B. Transitory personal property in the state on January 1 shall be assessed at 100 percent of fair market value.

C. Transitory personal property that is not in the state on January 1 is subject to a proportional assessment when it has been in the state for 90 consecutive days in a calendar year.

1. The determination of whether transitory personal property has been in the state for 90 consecutive days shall

include the days the property is outside the state if, within 10 days of its removal from the state, the property is:

a) brought back into the state; or

b) substituted with transitory personal property that performs the same function.

D. Once transitory personal property satisfies the conditions under C., tax shall be proportionally assessed for the period:

1. beginning on the first day of the month in which the property was brought into Utah; and

2. for the number of months remaining in the calendar year.

E. An owner of taxable transitory personal property who removes the property from the state prior to December and who qualifies for a refund of taxes assessed and paid, shall receive a refund based on the number of months remaining in the calendar year at the time the property is removed from the state and for which the tax has been paid.

1. The refund provisions of this subsection apply to transitory personal property taxes assessed under B. and C.

2. For purposes of determining the refund under this subsection, any portion of a month remaining shall be counted as a full month.

F. If tax has been paid for transitory personal property and that property is subsequently moved to another county in Utah:

1. No additional assessment may be imposed by any county to which the property is subsequently moved; and

2. No portion of the assessed tax may be transferred to the subsequent county.

R884-24P-66. Appeal to County Board of Equalization Pursuant to Utah Code Ann. Section 59-2-1004.

(1)(a) "Factual error" means an error that is:

(i) objectively verifiable without the exercise of discretion, opinion, or judgment, and

(ii) demonstrated by clear and convincing evidence.

(b) Factual error includes:

(i) a mistake in the description of the size, use, or ownership of a property;

(ii) a clerical or typographical error in reporting or entering the data used to establish valuation or equalization;

(iii) an error in the classification of a property that is eligible for a property tax exemption under:

(A) Section 59-2-103; or

(B) Title 59, Chapter 2, Part 11;

(iv) valuation of a property that is not in existence on the lien date; and

(v) a valuation of a property assessed more than once, or by the wrong assessing authority.

(2) Except as provided in Subsection (4), a county board of equalization shall accept an application to appeal the valuation or equalization of a property owner's real property that is filed after the time period prescribed by Section 59-2-1004(2)(a) if any of the following conditions apply:

(a) During the period prescribed by Section 59-2-1004(2)(a), the property owner was incapable of filing an appeal as a result of a medical emergency to the property owner or an immediate family member of the property owner, and no co-owner of the property was capable of filing an appeal.

(b) During the period prescribed by Section 59-2-1004(2)(a), the property owner or an immediate family member of the property owner died, and no co-owner of the property was capable of filing an appeal.

(c) The county did not comply with the notification requirements of Section 59-2-919.1.

(d) A factual error is discovered in the county records pertaining to the subject property.

(e) The property owner was unable to file an appeal within the time period prescribed by Section 59-2-1004(2)(a) because of extraordinary and unanticipated circumstances that occurred during the period prescribed by Section 59-2-1004(2)(a), and no co-owner of the property was capable of filing an appeal.

(3) Appeals accepted under Subsection (2)(d) shall be limited to correction of the factual error and any resulting changes to the property's valuation.

(4) The provisions of Subsection (2) apply only to appeals filed for a tax year for which the treasurer has not made a final annual settlement under Section 59-2-1365.

(5) The provisions of this rule apply only to appeals to the county board of equalization. For information regarding appeals of county board of equalization decisions to the Commission, please see Section 59-2-1006 and R861-1A-9.

R884-24P-67. Information Required for Valuation of Low-Income Housing Pursuant to Utah Code Ann. Sections 59-2-102 and 59-2-301.3.

A. The purpose of this rule is to provide an annual reporting mechanism to assist county assessors in gathering data necessary for accurate valuation of low-income housing projects.

B. The Utah Housing Corporation shall provide the following information that it has obtained from the owner of a low-income housing project to the commission:

1. for each low-income housing project in the state that is eligible for a low-income housing tax credit:

a) the Utah Housing Corporation project identification number;

b) the project name;

c) the project address;

d) the city in which the project is located;

e) the county in which the project is located;

f) the building identification number assigned by the Internal Revenue Service for each building included in the project;

g) the building address for each building included in the project;

h) the total apartment units included in the project;

i) the total apartment units in the project that are eligible for low-income housing tax credits;

j) the period of time for which the project is subject to rent restrictions under an agreement described in B.2.;

k) whether the project is:

(1) the rehabilitation of an existing building; or

(2) new construction;

l) the date on which the project was placed in service;

m) the total square feet of the buildings included in the project;

n) the maximum annual federal low-income housing tax credits for which the project is eligible;

o) the maximum annual state low-income housing tax credits for which the project is eligible; and

p) for each apartment unit included in the project:

(1) the number of bedrooms in the apartment unit;

(2) the size of the apartment unit in square feet; and

(3) any rent limitation to which the apartment unit is subject; and

2. a recorded copy of the agreement entered into by the Utah Housing Corporation and the property owner for the low-income housing project; and

3. construction cost certifications for the project received from the low-income housing project owner.

C. The Utah Housing Corporation shall provide the commission the information under B. by January 31 of the year following the year in which a project is placed into service.

D. 1. Except as provided in D.2., by April 30 of each year, the owner of a low-income housing project shall provide the county assessor of the county in which the project is located the following project information for the prior year:

a) operating statement;
b) rent rolls; and
c) federal and commercial financing terms and agreements.
2. Notwithstanding D.1., the information a low-income project housing owner shall provide by April 30, 2004 to a county assessor shall include a 3-year history of the information required under D.1.
E. A county assessor shall assess and list the property described in this rule using the best information obtainable if the property owner fails to provide the information required under D.

R884-24P-68. Property Tax Exemption for Taxable Tangible Personal Property With a Total Aggregate Fair Market Value of $3,500 or Less Pursuant to Utah Code Ann. Section 59-2-1115.

(1) The purpose of this rule is to provide for the administration of the property tax exemption for a taxpayer whose taxable tangible personal property has a total aggregate fair market value of $3,500 or less.
(a) Total aggregate fair market value is determined by aggregating the fair market value of all taxable tangible personal property owned by a taxpayer within a county.
(b) If taxable tangible personal property is required to be apportioned among counties, the determination of whether taxable tangible personal property has a total aggregate fair market value of $3,500 or less shall be made after apportionment.
(2) A taxpayer shall apply for the exemption provided under Section 59-2-1115:
(a) if the county assessor has requested a signed statement from the taxpayer under Section 59-2-306, within the time frame set forth under Section 59-2-306 for filing the signed statement; or
(b) if the county assessor has not requested a signed statement from the taxpayer under Section 59-2-306, within 30 days from the day the taxpayer is requested to indicate whether the taxpayer has $3,500 or less of taxable tangible personal property in the county.

R884-24P-70. Real Property Appraisal Requirements for County Assessors Pursuant to Utah Code Ann. Sections 59-2-303.1 and 59-2-919.1.

(1) Definitions.
(a) "Accepted valuation methodologies" means those methodologies approved or endorsed in the Standard on Mass Appraisal of Real Property and the Standard on Automated Valuation Models published by the International Association of Assessing Officers (IAAO).
(b) "Database," as referenced in Section 59-2-303.1(6), means an electronic storage of data using computer hardware and software that is relational, secure and archival, and adheres to generally accepted information technology standards of practice.
(2) County mass appraisal systems, as defined in Section 59-2-303.1, shall use accepted valuation methodologies to perform the annual update of all residential parcels.
(3)(a) A detailed review of property characteristics shall include a sufficient inspection to determine any changes to real property due to:
(i) new construction, additions, remodels, demolitions, land segregations, changes in use, or other changes of a similar nature; and
(ii) a change in condition or effective age.
(b)(i) A detailed review of property characteristics shall be made in accordance with the IAAO Standard on Mass Appraisal of Real Property.
(ii) When using aerial photography, including oblique aerial photography, the date of the photographic flight is the property review date for purposes of Section 59-2-303.1.
(4) The last property review date to be included in the county's computer system shall include the actual day, month, and year that the last detailed review of a property's characteristics was conducted.
(5) The last property review date to be included on the notice shall include at least the actual year or tax year that the last detailed review of a property's characteristics was conducted. The month and day of the review may also be included on the notice at the discretion of the county assessor and auditor.
(6)(a) The five-year plan shall detail the current year plus four subsequent years into the future. The plan shall define the properties being reviewed for each of the five years by one or more of the following:
(i) class;
(ii) property type;
(iii) geographic location; and
(iv) age.
(b) The five-year plan shall also include parcel counts for each defined property group.

R884-24P-71. Agreements with Commercial or Industrial Taxpayers for Equal Property Tax Payments Pursuant to Utah Code Ann. Section 59-2-1308.5.

(1) An agreement with a commercial or industrial taxpayer for equal property tax payments under Section 59-2-1308.5 is effective:
(a) the current calendar year, if the agreement is agreed to by all parties on or before May 31; or
(b) the subsequent calendar year, if the agreement is agreed to by all parties after May 31.
(2) An agreement under Subsection (1) affects only those taxing entities that are a party to the agreement.
(3) The commission shall ensure that an agreement under Subsection (1) does not affect the calculation of the certified tax rate by adjusting the formula under Section 59-2-924 so that the collection ratio for each taxpayer that is a party to the agreement is based on the amount that would have been collected according to the same valuation and assessment methodologies that would have been applied in the absence of the agreement.

R884-24P-72. State Farmland Evaluation Advisory Committee Procedures Pursuant to Utah Code Ann. Section 59-2-514.

(1) "Committee" means the State Farmland Evaluation Advisory Committee established in Section 59-2-514.
(2) The committee is subject to Title 52, Chapter 4, Open and Public Meetings Act.
(3) A committee member may participate electronically in a meeting open to the public under Section 52-4-207 if:
(a) the agenda posted for the meeting establishes one or more anchor locations for the meeting where the public may attend;
(b) at least one committee member is at an anchor location; and
(c) all of the committee members may be heard by any person attending an anchor location.

R909. Transportation, Motor Carrier.
R909-1. Safety Regulations for Motor Carriers.
R909-1-1. Authority and Purpose.

This Rule is enacted under the authority of Section 72-9-103 to enable the department to enforce the Federal Motor Carrier Safety Regulations as contained in Title 49, Code of Federal Regulations related to the operation of a motor carrier within the state, as required by Section 72-9-301.

R909-1-2. Adoption of Federal Regulations.

(1) Safety Regulations for Motor Carriers, 49 CFR Parts 350 through 384, Parts 386 through 399, and Part 40, (October 1, 2010), as amended by the Federal Register through June 6, 2011 are incorporated by reference, except for Parts 391.11(b)(1) and 391.49 as it applies to intrastate drivers only. These requirements apply to all motor carrier(s) as defined in 49 CFR Part 390.5, excluding commercial motor vehicles which are designed or used to transport more than 8 and less than 15 passengers (including the driver) for compensation and Section 72-9-102(2) engaged in intrastate commerce.

(2) Intrastate trucking operations in which the carriers operate double trailer combinations only are not required to comply with 49 CFR Part 380.203(a)(2).

(3) Exceptions to Part 391.41, Physical Qualification may be granted under the rules of Department of Public Safety, Driver's License Division, Section 53-3-303.5 for intrastate drivers under R708-34.

(4) Drivers involved wholly in intrastate commerce shall be at least 18 years old. However, if they are transporting placarded amounts of hazardous materials or carrying 16 or more passengers, including the driver, they must be 21 years old.

R909-1-3. Insurance for Private Intrastate/Interstate Motor Carriers.

(1) "Private Motor Carrier" means a person who provides transportation of property or passengers by commercial motor vehicle and is not a for-hire motor carrier.

(2) All intrastate private motor carriers shall have a minimum amount of $750,000 liability.

(3) All intrastate for-hire and private motor carriers transporting any quantities of oil listed in 49 CFR 172.101; hazardous waste, hazardous material and hazardous substances defined in 49 CFR 171.101, shall have $1,000,000 minimum level of financial responsibility and a MCS-90 endorsement maintained at the principal place of business.

R909-1-4. Implements of Husbandry.

"Implements of Husbandry" is defined in Section 41-1a-102(23) and must be in compliance with all provisions of Chapter 6, Title 41, Utah Code Annotated. Vehicles meeting this definition are exempt from 49 CFR Part 393 - Parts and Accessories Necessary for Safe Operations.

R909-1-5. Cease and Desist Order - Registration Sanctions.

As authorized by Section 72-9-303, the department may issue cease and desist orders to any motor carrier that fails or neglects to comply with State and Federal Motor Carrier Safety Regulations or any part of this rule.

R909-1-6. Penalties and Fines.

Any motor carrier that fails or neglects to comply with State or Federal Motor Carrier Safety Regulations or any part of this rule is subject to a civil penalty as authorized by Sections 72-9-701 and 72-9-703.

R909-1-7. Motor Carriers Delinquent in Paying Civil Penalties; Prohibition on Transportation.

Pursuant to Section 72-9-303, a motor carrier that has failed to pay civil penalties imposed by the department, or has failed to abide by a payment plan, may be prohibited from operating commercial motor vehicles in intrastate or interstate commerce.

R909. Transportation, Motor Carrier.
R909-75. Safety Regulations for Motor Carriers Transporting Hazardous Materials and/or Hazardous Wastes.
R909-75-1. Purpose and Authority.

The purpose of this rule is to adopt regulations that are applicable to the offering, acceptance and transportation of hazardous materials related to the operation of a motor carrier within the State of Utah. This rule is authorized by Sections 72-9-103, 72-9-104 and 72-9-301.

R909-75-2. Adoption of Federal Regulations.

Safety Regulations for Motor Carriers Transporting Hazardous Materials and/or Hazardous Wastes, 49 CFR, Sub-Chapter C, Parts 107, 171, 172, 177, 178, 179, and 180 (October 1, 2010), as amended by the Federal Register through February 28, 2011 are incorporated by reference. These changes apply to all private, common, and contract carriers by highway in commerce.

R933. Transportation, Preconstruction, Right of Way Acquisition.
R933-1. Right of Way Acquisition.
R933-1-1. Purpose and Authority.

This rule provides the department's procedures for right of way acquisition and the purchase, sale, and exchange of real property. This rule is required by Section 72-5-117 and is enacted under the authority of Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

R933-1-2. Incorporation of Federal Regulations for Federal Financial Assistance Projects.

The State of Utah incorporates by reference 49 CFR 24 as amended in the Federal Register, on January 4, 2005, as its administrative rules on the acquisition of rights of way for projects receiving federal financial assistance.

R933-1-3. Partial Incorporation of Federal Regulations for State Projects Funded Without Federal Financial Assistance.

The State of Utah incorporates by reference 49 CFR 24 as amended in the Federal Register on January 4, 2005, as its administrative rules on the acquisition of rights of way for projects that do not receive federal financial assistance, except that 49 CFR 24.107 is not incorporated and shall not be the basis for recovery of attorney fees or other litigation expenses specified therein. Attorney fees and other litigation expenses shall only be recoverable for projects that do not receive federal financial assistance to the extent expressly provided for by state law.

R933-1-4. Requirements for Purchase, Sale, or Exchange of Real Property.

(1) When purchasing, selling, or exchanging real property, the department may obtain and review the following documents and authorities as the department deems it necessary or appropriate to ensure that the value of the real property is congruent with the proposed price and other terms of purchase, sale, or exchange:

(a) title insurance commitment;
(b) an environmental assessment;
(c) an engineering assessment;
(d) applicable regulatory codes;
(e) an appraisal;
(f) an analysis of past maintenance and operational expenses, when available;
(g) the situs, zoning, and planning information;
(h) a land survey; and
(i) other requirements determined necessary by the department.

(2) This rule shall apply to all purchases, sales, and exchanges of the department, except as otherwise allowed, required or governed by state or federal law. For projects not receiving federal financial assistance, the requirements of this rule do not apply to the purchase, sale, or exchange of property, or to an interest in real property that is under a contract or other written agreement prior to May 5, 2008, or with a value of less than $100,000, as estimated by the department.

R986. Workforce Services, Employment Development.
R986-200. Family Employment Program.
R986-200-201. Authority for Family Employment Program (FEP) and Family Employment Program Two Parent (FEPTP) and Other Applicable Rules.

(1) The Department provides services to eligible families under FEP and FEPTP under the authority granted in the Employment Support Act, UCA 35A-3-301 et seq. Funding is provided by the federal government through Temporary Aid to Needy Families (TANF) as authorized by PRWORA.

(2) Rule R986-100 applies to FEP and FEPTP unless expressly noted otherwise.

R986-200-202. Family Employment Program (FEP).

(1) The goal of FEP is to increase family income through employment, and where appropriate, child support and/or disability payments.

(2) FEP is for families with no more than one able bodied parent in the household. If the family has two able bodied parents in the household, the family is not eligible for FEP but may be eligible for FEPTP. Able bodied means capable of earning at least $500 per month in the Utah labor market.

(3) If a household has at least one incapacitated parent, the parent claiming incapacity must verify that incapacity in one of the following ways:

(a) receipt of disability benefits from SSA;

(b) 100% disabled by VA; or

(c) by submitting a written statement from:

(i) a licensed medical doctor;

(ii) a doctor of osteopathy;

(iii) a licensed Mental Health Therapist as defined in UCA 58-60-102;

(iv) a licensed Advanced Practice Registered Nurse; or

(v) a licensed Physician's Assistant.

(d) the written statement in paragraph (c) of this subsection must be based on a current physical examination of the parent, not just a review of parent's medical records.

(4) Incapacity means not capable of earning $500 per month. The incapacity must be expected to last 30 days or longer.

(5) An applicant or parent must cooperate in the obtaining of a second opinion regarding incapacity if requested by the Department. Only the costs associated with a second opinion requested by the Department will be paid for by the Department. The Department will not pay the costs associated with obtaining a second opinion if the parent requests the second opinion.

(6) An incapacitated parent is included in the FEP household assistance unit and the parent's income and assets are counted toward establishing eligibility unless the parent is a SSI recipient. If the parent is a SSI recipient, that parent is not included in the household and none of the income or assets of the SSI recipient is counted.

(7) An incapacitated parent who is included in the household must still negotiate, sign and agree to participate in an employment plan. If the incapacity is such that employment is not feasible now or in the future, participation may be limited to cooperating with ORS and filing for any assistance or benefits to which the parent may be entitled. If it is believed the incapacity might not be permanent, the parent will also be required to seek assistance in overcoming the incapacity.

R986-200-203. Citizenship and Alienage Requirements.

(1) All persons in the household assistance unit who are included in the financial assistance payment, including children, must be a citizen of the United States or meet alienage criteria.

(2) An alien is not eligible for financial assistance unless the alien meets the definition of qualified alien. A qualified alien is an alien:

(a) who is paroled into the United States under section 212(d)(5) of the INA for at least one year;

(b) who is admitted as a refugee under section 207 of the INA;

(c) who is granted asylum under section 208 of the INA;

(d) who is a Cuban or Haitian entrant in accordance with the requirements of 45 CFR Part 401;

(e) who is an Amerasian from Vietnam and was admitted to the United States as an immigrant pursuant to Public Law 100-202 and Public Law 100-461;

(f) whose deportation is being withheld under sections 243(h) or 241(b)(3) of the INA;

(g) who is lawfully admitted for permanent residence under the INA,

(h) who is granted conditional entry pursuant to section 203(a)(7) of the INA;

(i) who meets the definition of certain battered aliens under Section 8 U.S.C. 1641(c); or

(j) who is a certified victim of trafficking.

(3) All aliens granted lawful temporary or permanent resident status under Sections 210, 302, or 303 of the Immigration Reform and Control Act of 1986, are disqualified from receiving financial assistance for a period of five years from the date lawful temporary resident status is granted.

(4) Aliens are required to provide proof, in the form of documentation issued by the United States Citizenship and Immigration Services (USCIS), of immigration status. Victims of trafficking can provide proof from the Office of Refugee Resettlement.

R986-200-204. Eligibility Requirements.

(1) To be eligible for financial assistance under the FEP or FEPTP a household assistance unit must include:

(a) a pregnant woman when it has been medically verified that she is in the third calendar month prior to the expected month of delivery, or later, and who, if the child were born and living with her in the month of payment, would be eligible. The unborn child is not included in the financial assistance payment; or

(b) at least one minor dependent child who is a citizen or meets the alienage criteria. All minor children age 6 to 16 must attend school, or be exempt under 53A-11-102, to be included in the household assistance unit for a financial assistance payment for that child.

(i) A minor child is defined as being under the age of 18 years and not emancipated by marriage or by court order; or

(ii) an unemancipated child, at least 18 years old but under 19 years old, with no high school diploma or its equivalent, who is a full-time student in a secondary school, or in the equivalent level of vocational or technical training, and the school has verified a reasonable expectation the 18 year old will complete the program before reaching age 19.

(2) Households must meet other eligibility requirements of income, assets, and participation in addition to the eligibility requirements found in R986-100.

(3) Persons who are fleeing to avoid prosecution of a felony are ineligible for financial assistance.

(4) All clients who are required to complete a negotiated employment plan as provided in R986-200-206 must attend a FEP orientation meeting, sign a FEP Agreement, and negotiate and sign an employment plan within 30 days of submitting his or her application for assistance. Attendance at the orientation meeting can only be excused for reasonable cause as defined in R986-200-212(8). The application for assistance will not be complete until the client has attended the meeting.

(5) If a parent in the financial assistance household received TANF funded financial assistance benefits from another state or from a tribe, the entire household is ineligible to receive TANF funded financial assistance in Utah the same month. This is true even if household composition has changed.

If a child in the household has received TANF funded financial assistance in another household, in this or any other state, the child will be excluded from the household determination in the same month according to the provisions of R986-200-205(2)(d). TANF funded financial assistance in Utah is FEP, FEP-TP, Emergency Assistance and AA.

R986-200-205. How to Determine Who Is Included in the Household Assistance Unit.

The amount of financial assistance for an eligible household is based on the size of the household assistance unit and the income and assets of all people in the household assistance unit.

(1) The income and assets of the following individuals living in the same household must be counted in determining eligibility of the household assistance unit:

(a) all natural parents, adoptive parents, parents listed on the birth certificate and stepparents, unless expressly excluded in this section, who are related to and residing in the same household as an eligible dependent child. Natural parentage is determined as follows:

(i) A woman is the natural parent if her name appears on the birth record of the child.

(ii) For a man to be determined to be the natural parent, that relationship must be established or acknowledged or his name must appear on the birth record. If the parents have a solemnized marriage at the time of birth, relationship is established and can only be rebutted by a DNA test;

(b) household members who would otherwise be included but who are absent solely by reason of employment, school or training, or who will return home to live within 30 days;

(c) all minor siblings, half-siblings, and adopted siblings living in the same household as an eligible dependent child; and

(d) all spouses living in the household.

(2) The following individuals in the household are not counted in determining the household size for determining payment amount nor are the assets or income of the individuals counted in determining household eligibility:

(a) a recipient of SSI benefits. If the SSI recipient is the parent and is receiving FEP assistance for the child(ren) residing in the household, the SSI parent must cooperate with establishing paternity and child support enforcement for the household to be eligible. If the only dependent child is a SSI recipient, the parent or specified relative may receive a FEP assistance payment which does not include that child, provided the parent or specified relative is not on SSI and can meet all other requirements;

(b) a child during any month in which a foster care maintenance payment is being provided to meet the child's needs. If the only dependent child in the household is receiving a foster care maintenance payment, the parent or specified relative may still receive a FEP assistance payment which does not include the child, provided all other eligibility, income and asset requirements are met;

(c) an absent household member who is expected to be gone from the household for 180 days or more unless the absence is due to employment, school or training. If the absence is due to employment, school or training the household member must be included.

(d) a child who was counted as a dependent in a household that received TANF funded financial assistance or in a specified relative household in the same month. A child cannot be counted as a dependent in two households that receive TANF funded financial assistance or specific relative assistance in the same month.

(3) The household assistance unit can choose whether to include or exclude the following individuals living in the household. If included, all income and assets of that person are counted:

(a) all absent household members who are expected to be temporarily absent from the home for more than 30 but not more than 180 consecutive days unless the absence is due to employment, school or training. If the absence is due to employment, school or training the household member must be included;

(b) Native American children, or deaf or blind children, who are temporarily absent while in boarding school, even if the temporary absence is expected to last more than 180 days;

(c) an adopted child who receives a federal, state or local government special needs adoption payment. If the adopted child receiving this type of payment is the only dependent child in the household and excluded, the parent(s) or specified relative may still receive a FEP or FEPTP assistance payment which does not include the child, provided all other eligibility requirements are met. If the household chooses to include the adopted child in the household assistance unit under this paragraph, the special needs adoption payment is counted as income;

(d) former stepchildren who have no blood relationship to a dependent child in the household;

(e) a specified relative. If a household requests that a specified relative be included in the household assistance unit, only one specified relative can be included in the financial assistance payment regardless of how many specified relatives are living in the household. The income and assets of all household members are counted according to the provisions of R986-200-241.

(4) In situations where there are children in the home for which there is court order regarding custody of the children, the Department will determine if the children should be included in the household assistance unit based on the actual living arrangements of the children and not on the custody order. If the child lives in the home 50% or more of the time, the child must be included in the household assistance unit and duty of support completed. It is not an option to exclude the child. This is true even if the court awarded custody to the other parent or the court ordered joint custody. If the child lives in the household less than 50% of the time, the child cannot be included in the household. It is not an option to include the child. This is true even if the parent applying for financial assistance has been awarded custody by the court or the court ordered joint custody. If financial assistance is allowed, a joint custody order might be modified by the court under the provisions of 30-3-10.2(4) and 30-3-10.4.

(5) The income and assets of the following individuals are counted in determining eligibility even though the individual is not included in the assistance payment:

(a) a household member who has been disqualified from the receipt of assistance because of an IPV, (fraud determination);

(b) a household member who does not meet the citizenship and alienage requirements; or

(c) a minor child who is not in school full time or participating in self sufficiency activities.

R986-200-206. Participation Requirements.

(1) Payment of any and all financial assistance is contingent upon all parents in the household, including adoptive and stepparents, participating, to the maximum extent possible, in:

(a) assessment and evaluation;

(b) the completion of a negotiated employment plan; and

(c) assisting ORS in good faith to:

(i) establish the paternity of all minor children; and

(ii) establish and enforce child support obligations.

(d) obtaining any and all other sources of income. If any household member is or appears to be eligible for unemployment, SSA, Workers Compensation, VA, or any other

benefits or forms of assistance, the Department will refer the individual to the appropriate agency and the individual must apply for and pursue obtaining those benefits. If an individual refuses to apply for and pursue these benefits or assistance, the individual is ineligible for financial assistance. Pursuing these benefits includes cooperating fully and providing all the necessary documentation to insure receipt of benefits. If the individual is already receiving assistance from the Department and it is found he or she is not cooperating fully to obtain benefits from another source, the individual will be considered to not be participating in his or her employment plan. If the individual is otherwise eligible for FEP or FEPTP, financial assistance will be provided until eligibility for other benefits or assistance has been determined. If an individual's application for SSA benefits is denied, the individual must fully cooperate in prosecuting an appeal of that SSA denial at least to the Social Security ALJ level.

(2) Parents who have been determined to be ineligible to be included in the financial assistance payment are still required to participate.

(3) Children at least 16 years old but under 18 years old, unless they are in school full-time or in school part-time and working less than 100 hours per month are required to participate.

R986-200-207. Participation in Child Support Enforcement.

(1) Receipt of child support is an important element in increasing a family's income.

(2) Every natural, legal or adoptive parent has a duty to support his or her children and stepchildren even if the children do not live in the parental home.

(3) A parent's duty to support continues until the child:

(a) reaches age 18;

(b) is 18 years old and enrolled in high school during the normal and expected year of graduation;

(c) is emancipated by marriage or court order;

(d) is a member of the armed forces of the United States; or

(e) is self supporting.

(4) A client receiving financial assistance automatically assigns to the state any and all rights to child support for all children who are included in the household assistance unit while receiving financial assistance. The assignment of rights occurs even if the client claims or establishes "good cause or other exception" for refusal to cooperate. The assignment of rights to support, cooperation in establishing paternity, and establishing and enforcing child support is a condition of eligibility for the receipt of financial assistance.

(5) For each child included in the financial assistance payment, the client must also assign any and all rights to alimony or spousal support from the noncustodial parent while the client receives public assistance.

(6) The client must cooperate with the Department and ORS in establishing and enforcing the spousal and child support obligation from any and all natural, legal, or adoptive non-custodial parents.

(7) If a parent is absent from the home, the client must identify and help locate the non-custodial parent.

(8) If a child is conceived or born during a marriage, the husband is considered the legal father, even if the wife states he is not the natural father.

(9) If the child is born out of wedlock, the client must also cooperate in the establishment of paternity.

(10) ORS is solely responsible for determining if the client is cooperating in identifying the noncustodial parent and with child support establishment and enforcement efforts for the purposes of receipt of financial assistance. The Department cannot review, modify, or reject a decision made by ORS.

(11) Unless good cause is shown, financial assistance will terminate if a parent or specified relative does not cooperate with ORS in establishing paternity or enforcing child support obligations.

(12) Upon notification from ORS that the client is not cooperating, the Department will commence reconciliation procedures as outlined in R986-200-212. If the client continues to refuse to cooperate with ORS at the end of the reconciliation process, financial assistance will be terminated.

(13) Termination of financial assistance for non cooperation is immediate, without a reduction period outlined in R986-200-212, if:

(a) the client is a specified relative who is not included in the household assistance unit;

(b) the client is a parent receiving SSI benefits; or

(c) the client is participating in FEPTP.

(14) Once the financial assistance has been terminated due to the client's failure to cooperate with child support enforcement, the client must then reapply for financial assistance. This time, the client must cooperate with child support collection prior to receiving any financial assistance.

(15) A specified relative, illegal alien, SSI recipient, or disqualified parent in a household receiving FEP assistance must assign rights to support of any kind and cooperate with all establishment and enforcement efforts even if the parent or relative is not included in the financial assistance payment.

R986-200-208. Good Cause for Not Cooperating With ORS.

(1) The Department is responsible for determining if the client has good cause or other exception for not cooperating with ORS.

(2) To establish good cause for not cooperating, the client must file a written request for a good cause determination and provide proof of good cause within 20 days of the request.

(3) A client has the right to request a good cause determination at any time, even if ORS or court proceedings have begun.

(4) Good cause for not cooperating with ORS can be shown if one of following circumstances exists:

(a) The child, for whom support is sought, was conceived as a result of incest or rape. To prove good cause under this paragraph, the client must provide:

(i) birth certificates;

(ii) medical records;

(iii) Department records;

(iv) records from another state or federal agency;

(v) court records; or

(vi) law enforcement records.

(b) Legal proceedings for the adoption of the child are pending before a court. Proof is established if the client provides copies of documents filed in a court of competent jurisdiction.

(c) A public or licensed private social agency is helping the client resolve the issue of whether to keep or relinquish the child for adoption and the discussions between the agency and client have not gone on for more than three months. The client is required to provide written notice from the agency concerned.

(d) The client's cooperation in establishing paternity or securing support is reasonably expected to result in physical or emotional harm to the child or to the parent or specified relative. If harm to the parent or specified relative is claimed, it must be significant enough to reduce that individual's capacity to adequately care for the child.

(i) Physical or emotional harm is considered to exist when it results in, or is likely to result in, an impairment that has a substantial effect on the individual's ability to perform daily life activities.

(ii) The source of physical or emotional harm may be from individuals other than the noncustodial parent.

(iii) The client must provide proof that the individual is

likely to inflict such harm or has done so in the past. Proof must be from an independent source such as:

(A) medical records or written statements from a mental health professional evidencing a history of abuse or current health concern. The record or statement must contain a diagnosis and prognosis where appropriate;

(B) court records;

(C) records from the Department or other state or federal agency; or

(D) law enforcement records.

(5) If a claim of good cause is denied because the client is unable to provide proof as required under Subsection (4) (a) or (d) the client can request a hearing and present other evidence of good cause at the hearing. If the ALJ finds that evidence credible and convincing, the ALJ can make a finding of good cause under Subsections (4) (a) or (d) based on the evidence presented by the client at the hearing. A finding of good cause by the ALJ can be based solely on the sworn testimony of the client.

(6) When the claim of good cause for not cooperating is based in whole or in part on anticipated physical or emotional harm, the Department must consider:

(a) the client's present emotional health and history;

(b) the intensity and probable duration of the resulting impairment;

(c) the degree of cooperation required; and

(d) the extent of involvement of the child in the action to be taken by ORS.

(7) The Department recognizes no other exceptions, apart from those recognized by ORS, to the requirement that a client cooperate in good faith with ORS in the establishment of paternity and establishment and enforcement of child support.

(8) If the client has exercised his or her right to an agency review or adjudicative proceeding under Utah Administrative Procedures Act on the question of non-cooperation as determined by ORS, the Department will not review, modify, or reverse the decision of ORS on the question of non-cooperation. If the client did not have an opportunity for a review with ORS, the Department will refer the request for review to ORS for determination.

(9) Once a request for a good cause determination has been made, all collection efforts by ORS will be suspended until the Department has made a decision on good cause.

(10) A client has the right to appeal a Department decision on good cause to an ALJ by following the procedures for appeal found in R986-100.

(11) If a parent requests a hearing on the basis of good cause for not cooperating, the resulting decision cannot change or modify the determination made by ORS on the question of good faith.

(12) Even if the client establishes good cause not to cooperate with ORS, if the Department supervisor determines that support enforcement can safely proceed without the client's cooperation, ORS may elect to do so. Before proceeding without the client's cooperation, ORS will give the client advance notice that it intends to commence enforcement proceedings and give the client an opportunity to object. The client must file his or her objections with ORS within 10 days.

(13) A determination that a client has good cause for non-cooperation may be reviewed and reversed by the Department upon a finding of new, or newly discovered evidence, or a change in circumstances.

R986-200-209. Participation in Obtaining an Assessment.

(1) Within 20 business days of the date the application for financial assistance has been completed and approved, the client will be assigned to an employment counselor and must complete an assessment.

(2) The assessment evaluates a client's needs and is used to develop an employment plan.

(3) Completion of the assessment requires that the client provide information about:

(a) family circumstances including health, needs of the children, support systems, and relationships;

(b) personal needs or potential barriers to employment;

(c) education;

(d) work history;

(e) skills;

(f) financial resources and needs; and

(g) any other information relevant to the client's ability to become self-sufficient.

(4) The client may be required to participate in testing or completion of other assessment tools and may be referred to another person within the Department, another agency, or to a company or individual under contract with the Department to complete testing, assessment, and evaluation.

R986-200-210. Requirements of an Employment Plan.

(1) Within 15 business days of completion of the assessment, the following individuals in the household assistance unit are required to sign and make a good faith effort to participate to the maximum extent possible in a negotiated employment plan:

(a) All parents, including parents whose income and assets are included in determining eligibility of the household but have been determined to be ineligible or disqualified from being included in the financial assistance payment.

(b) Dependent minor children who are at least 16 years old, who are not parents, unless they are full-time students or are employed an average of 30 hours a week or more.

(2) The goal of the employment plan is obtaining marketable employment and it must contain the soonest possible target date for entry into employment consistent with the employability of the individual.

(3) An employment plan consists of activities designed to help an individual become employed. For each activity there will be:

(a) an expected outcome;

(b) an anticipated completion date;

(c) the number of participation hours agreed upon per week; and

(d) a definition of what will constitute satisfactory progress for the activity.

(4) Each activity must be directed toward the goal of increasing the household's income.

(5) Activities may require that the client:

(a) obtain immediate employment. If so, the parent client shall:

(i) promptly register for work and commence a search for employment for a specified number of hours each week; and

(ii) regularly submit a report to the Department on:

(A) how much time was spent in job search activities;

(B) the number of job applications completed;

(C) the interviews attended;

(D) the offers of employment extended; and

(E) other related information required by the Department.

(b) participate in an educational program to obtain a high school diploma or its equivalent, if the parent client does not have a high school diploma;

(c) obtain education or training necessary to obtain employment;

(d) obtain medical, mental health, or substance abuse treatment;

(e) resolve transportation and child care needs;

(f) relocate from a rural area which would require a round trip commute in excess of two hours in order to find employment;

(g) resolve any other barriers identified as preventing or

limiting the ability of the client to obtain employment, and/or

(h) participate in rehabilitative services as prescribed by the State Office of Rehabilitation.

(6) The client must meet the performance expectations of, and provide verification for, each eligible activity in the employment plan in order to stay eligible for financial assistance. A list of what will be considered acceptable documentation is available at each employment center.

(7) The client must cooperate with the Department's efforts to monitor and evaluate the client's activities and progress under the employment plan, which includes providing the Department with a release of information, if necessary to facilitate the Department's monitoring of compliance.

(8) Where available, supportive services will be provided as needed for each activity.

(9) The client agrees, as part of the employment plan, to cooperate with other agencies, or with individuals or companies under contract with the Department, as outlined in the employment plan.

(10) An employment plan may, at the discretion of the Department, be amended to reflect new information or changed circumstances.

(11) The number of hours of participation in subsection (3)(c) of this section will not be lower than 30 hours per week. All 30 hours must be in eligible activities. 20 of those 30 hours must be in priority activities. A list of approved priority and eligible activities is available at each employment center. If the client has a child in the household under the age of six, the number of hours of participation in subsection (3)(c) of this section is a minimum of 20 hours per week and all of those 20 hours must be in priority activities.

(12) In the event a client has barriers which prevent the client from 30 hours of participation per week, or 20 hours in priority activities, a lower number of hours of participation can be approved if:

(a) the Department identifies and documents the barriers which prevent the client from full participation; and

(b) the client agrees to participate to the maximum extent possible to resolve the barriers which prevent the client from participating.

R986-200-211. Education and Training As Part of an Employment Plan.

(1) A parent client's participation in education or training beyond that required to obtain a high school diploma or its equivalent is limited to the lesser of:

(a) 24 months which need not be continuous; or

(b) the completion of the education and training requirements of the employment plan.

(2) Post high school education or training will only be approved if all of the following are met:

(a) The client can demonstrate that the education or training would substantially increase the income level that the client would be able to achieve without the education and training, and would offset the loss of income the household incurs while the education or training is being completed.

(b) The client does not already have a degree or skills training certificate in a currently marketable occupation.

(c) An assessment specific to the client's education and training aptitude has been completed showing the client has the ability to be successful in the education or training.

(d) The mental and physical health of the client indicates the education or training could be completed successfully and the client could perform the job once the schooling is completed.

(e) The specific employment goal that requires the education or training is marketable in the area where the client resides or the client has agreed to relocate for the purpose of employment once the education/training is completed.

(f) The client, when determined appropriate, is willing to complete the education/training as quickly as possible, such as attending school full time which may include attending school during the summer.

(g) The client can realistically complete the requirements of the education or training program within the required time frames or time limits of the financial assistance program, including the 36-month lifetime limit for FEP and FEPTP, for which the client is eligible.

(3) A parent client may participate in education or training for up to six months beyond the 24-month limit if:

(a) the parent client is employed for 80 or more hours per month during each month of the extension;

(b) circumstances beyond the control of the client prevented completion within 24 months; and

(c) the Department director or designee determines that extending the 24-month limit is prudent because other employment, education, or training options do not enable the family to meet the objective of the program.

(4) A parent client with a high school diploma or equivalent who has received 24 months of education or training while receiving financial assistance must participate a minimum of 30 hours per week in eligible activities. Twenty of those 30 hours must be in priority activities. A list of approved priority and eligible activities is available at each employment center. If the client has a child in the household under the age of six, the minimum number of hours of participation under this this subsection is 20 hours per week and all of those 20 hours must be in priority activities.

(5) Graduate work can never be approved or supported as part of an employment plan.

R986-200-212. Reconciling Disputes and Termination of Financial Assistance for Failure to Comply.

If a client who is required to participate in an employment plan consistently fails, without reasonable cause, to show good faith in complying with the employment plan, the Department will terminate all or part of the financial assistance. This will apply if the Department is notified that the client has failed to cooperate with ORS as provided in R986-200-207. A termination for the reasons mentioned in this paragraph will occur only after the Department attempts reconciliation through the following process:

(1) When an employment counselor discovers that a client is not complying with his or her employment plan, the employment counselor will attempt to discuss compliance with the client and explore solutions. The employment counselor will also send written notice of the failure to comply to the client. The notice will specify a date certain by which the client must comply and the consequences of not complying by that date.

(2) If compliance is not resolved by the date specified in the notice sent under subsection (1) of this section, the employment counselor will send a second written notice and initiate termination of the household financial assistance. This second notice will advise the client that the financial assistance will terminate at the end of that month unless the client resolves the problem, as provided in paragraph (2)(a) of this section. This second notice will also provide a date certain by which the compliance problems must be resolved for benefits to continue.

(a) If the client establishes reasonable cause for not complying with the employment plan or provides required documentation by the date specified in the first or second notice, financial assistance will continue or be restored.

(b) If the compliance problem is not resolved as provided in subparagraph (a) of this subsection, the household will be ineligible for financial assistance for one full month. The client must then reapply for financial benefits and successfully complete a two week trial participation period before financial

assistance will be approved.

(3) A client must demonstrate a genuine willingness to comply with the employment plan during the two week trial period.

(4) The two week trial period may be waived only if the client has cured all previous compliance issues prior to re-application.

(5) The provisions of this section apply to clients who are eligible for and receiving financial assistance during an extension period as provided in R986-200-218.

(6) A child age 16-18 who is not a parent and who is not participating will be removed from the financial assistance grant. The financial assistance will continue for other household members provided they are participating. If the child successfully completes a two week trial period, the child will be added back on to the financial assistance grant.

(7) Reasonable cause under this section means the client was prevented from participating through no fault of his or her own or failed to participate for reasons that are reasonable and compelling.

(8) Reasonable cause can also be established, as provided in 45 CFR 261.56, by a client who is a single custodial parent caring for a child under age six who refuses to engage in required work because he or she is unable to obtain needed child care because appropriate and affordable child care arrangements are not available within a reasonable distance from the home or work site.

(9) If a client is also receiving food stamps and the client is disqualified for non-participation under this section, the client will also be subject to the food stamp sanctions found in 7CFR 273.7(f)(2) unless the client meets an exemption under food stamp regulations.

R986-200-213. Financial Assistance for a Minor Parent.

(1) Financial assistance may be provided to a single minor parent who resides in a place of residence maintained by a parent, legal guardian, or other adult relative of the single minor parent, unless the minor parent is exempt.

(2) The single minor parent may be exempt when:

(a) The minor parent has no living parent or legal guardian whose whereabouts is known;

(b) No living parent or legal guardian of the minor parent allows the minor parent to live in his or her home;

(c) The minor parent lived apart from his or her own parent or legal guardian for a period of at least one year before either the birth of the dependent child or the parent's having made application for FEP and the minor parent was self supporting during this same period of time; or

(d) The physical or emotional health or safety of the minor parent or dependent child would be jeopardized if they resided in the same residence with the minor parent's parent or legal guardian. A referral will be made to DCFS if allegations are made under this paragraph.

(3) Prior to authorizing financial assistance, the Department must approve the living arrangement of all single minor parents exempt under section (2) above. Approval of the living arrangement is not a certification or guarantee of the safety, quality, or condition of the living arrangements of the single minor parent.

(4) All minor parents regardless of the living arrangement must participate in education for parenting and life skills in infant and child wellness programs operated by the Department of Health and, for not less than 20 hours per week:

(a) attend high school or an alternative to high school, if the minor parent does not have a high school diploma;

(b) participate in education and training; and/or

(c) participate in employment.

(5) If a single minor parent resides with a parent, the Department shall include the income of the parent of the single minor parent in determining the single minor parent's eligibility for financial assistance.

(6) If a single minor parent resides with a parent who is receiving financial assistance, the single minor parent is included in the parent's household assistance unit.

(7) If a single minor parent receives financial assistance but does not reside with a parent, the Department shall seek an order requiring that the parent of the single minor parent financially support the single minor parent.

R986-200-214. Assistance for Specified Relatives.

(1) Specified relatives include:

(a) grandparents;

(b) brothers and sisters;

(c) stepbrothers and stepsisters;

(d) aunts and uncles;

(e) first cousins;

(f) first cousins once removed;

(g) nephews and nieces;

(h) people of prior generations as designated by the prefix grand, great, great-great, or great- great-great;

(i) brothers and sisters by legal adoption;

(j) the spouse of any person listed above;

(k) the former spouse of any person listed above;

(l) individuals who can prove they met one of the above mentioned relationships via a blood relationship even though the legal relationship has been terminated; and

(m) former stepparents.

(2) The Department shall require compliance with Section 30-1-4.5

(3) A specified relative may apply for financial assistance for the child. If the child is otherwise eligible, the FEP rules apply with the following exceptions:

(a) The child must have a blood or a legal relationship to the specified relative even if the legal relationship has been terminated or have a blood relationship to a dependent child who in the home and who is included in the household for assistance purposes;

(b) Both parents must be absent from the home where the child lives. This is true even for a parent who has had his or her parental rights terminated;

(c) The child must be currently living with, and not just visiting, the specified relative;

(d) The parents' obligation to financially support their child will be enforced and the specified relative must cooperate with child support enforcement; and

(e) If the parent(s) state they are willing to support the child if the child would return to live with the parent(s), the child is ineligible unless there is a court order removing the child from the parent(s)' home.

(4) If the specified relative is currently receiving FEP or FEPTP, the child must be included in that household assistance unit.

(5) The income and resources of the specified relative are not counted unless the specified relative requests inclusion in the household assistance unit.

(6) If the specified relative is not currently receiving FEP or FEPTP, and the specified relative does not want to be included in the financial assistance payment, the specified relative shall be paid, on behalf of the child, the full standard financial assistance payment for one person. The size of the financial assistance payment shall be increased accordingly for each additional eligible child in the household assistance unit excluding the dependent child(ren) of the specified relative. Since the specified relative is not included in the household assistance unit, the income and assets of the specified relative, or the relative's spouse, are not counted.

(7) The specified relative may request to be included in the household assistance unit. If the specified relative is included in

the household assistance unit, the household must meet all FEP eligibility requirements including participation requirements and asset limits.

(8) Income eligibility for a specified relative who wants to be included in the household assistance unit is calculated according to R986-200-241.

R986-200-215. Family Employment Program Two Parent Household (FEPTP).

(1) FEPTP is for households otherwise eligible for FEP but with two able-bodied parents in the household. Eligible refugee households with two able-bodied parents and at least one dependent child, must first exhaust RRP benefits before considering eligibility for FEPTP.

(2) Families may only participate in this program for seven months out of any 13-month period. Months of participation count toward the 36-month time limit in Sections 35A-3-306 and R986-200-217.

(3) Both parents must participate in eligible activities for a combined total of 60 hours per week, as defined in the employment plan. At least 50 of those hours must be in priority activities. A list of approved priority and eligible activities is available at each employment center. Refugee families may participate in any combination of eligible and priority activities for a combined total of 60 hours per week, as provided in the employment plan.

(4) Both parents are required to participate every week as defined in the employment plan, unless the parent can establish reasonable cause for not participating. Reasonable cause is defined in rule R986-200-212(8),

(5) Payment is made twice per month and only after proof of participation. Payment is based on the number of hours of participation by both parents. The amount of assistance is equal to the FEP payment for the household size prorated based on the number of hours which the parents participated up to a maximum of 60 hours of participation per week. In no event can the financial assistance payment per month for a FEPTP household be more than for the same size household participating in FEP.

(6) If it is determinated by the employment counselor that either one of the parents has failed to participate to the maximum extent possible assistance for the entire household unit will terminate immediately.

(7) Because payment is made after performance, advance notice is not required to terminate or reduce assistance payments for households participating in FEPTP.

(8) The parents must meet all other requirements of FEP including but not limited to, income and asset limits, cooperation with ORS if there are legally responsible persons outside of the household assistance unit, signing a participation agreement and employment plan and applying for all other assistance or benefits to which they might be entitled.

R986-200-216. Diversion.

(1) Diversion is a one-time financial assistance payment provided to help a client avoid receiving extended cash assistance.

(2) In determining whether a client should receive diversion assistance, the Department will consider the following:

(a) the applicant's employment history;

(b) the likelihood that the applicant will obtain immediate full-time employment;

(c) the applicant's housing stability; and

(d) the applicant's child care needs, if applicable.

(3) To be eligible for diversion the applicant must;

(a) have a need for financial assistance to pay for housing or substantial and unforseen expenses or work related expenses which cannot be met with current or anticipated resources;

(b) show that within the diversion period, the applicant will be employed or have other specific means of self support, and

(c) meet all eligibility criteria for a FEP financial assistance payment except the applicant does not need to cooperate with ORS in obtaining support. If the client is applying for other assistance such as medical or child care, the client will have to follow the eligibility rules for that type of assistance which may require cooperation with ORS.

(4) If the Department and the client agree diversion is appropriate, the client must sign a diversion agreement listing conditions, expectations and participation requirements.

(5) The diversion payment will equal three times the monthly financial assistance payment for the household size. All income expected to be received during the three-month period including wages and child support must be considered when negotiating the appropriate diversion payment amount.

(6) Child support will belong to the client during the three-month period, whether received by the client directly or collected by ORS. ORS will not use the child support to offset or reimburse the diversion payment.

(7) The client must agree to have the financial assistance portion of the application for assistance denied.

(8) If a diversion payment is made, the client is ineligible for FEP for the three months covered by the diversion payment and must reapply at the end of the three month period.

(9) Diversion assistance is not available to clients participating in FEPTP. This is because FEPTP is based on performance and payment can only be made after performance.

(10) A household can only receive one diversion assistance payment in a 12 month period.

R986-200-217. Time Limits.

(1) Except as provided in R986-200-218 and in Section 35A-3-306, a family cannot receive financial assistance under the FEP or FEPTP for more than 36 months.

(2) The following months count toward the 36-month time limit regardless of whether the financial assistance payment was made in this or any other state:

(a) each month when a parent client received financial assistance beginning with the month of January, 1997;

(b) each month beginning with January, 1997, where a parent resided in the household, the parent's income and assets were counted in determining the household's eligibility, but the parent was disqualified from being included in the financial payment. Disqualification occurs when a parent has been determined to have committed fraud in the receipt of public assistance or when the parent is an ineligible alien; and

(c) each month when financial assistance was reduced or a partial financial assistance payment was received beginning with the month of January, 1997.

(3) Months which do not count toward the 36 month time limit are:

(a) months where both parents were absent from the home and dependent children were cared for by a specified relative who elected to be excluded from the household unit;

(b) months where the client received financial assistance as a minor child and was not the head of a household or married to the head of a household;

(c) months during which the parent lived in Indian country, as defined in Title 18, Section 1151, United States Code 1999, or an Alaskan Native village, if the most reliable data available with respect to the month, or a period including the month, indicate that at least 50% of the adults living in Indian country or in the village were not employed;

(d) months when a parent resided in the home but were excluded from the household assistance unit. A parent is excluded when they receive SSI benefits;

(e) the first diversion period in any 12 month period of

time is not counted toward the 36 month time limit. A second and all subsequent diversion periods within 12 months will count as one month toward the 36 month time limit. If a client has already used 36 months of financial assistance, the client is not eligible for diversion assistance unless the client meets one of the extension criteria in R986-200-218 in addition to all other eligibility criteria of diversion assistance; or

(f) months when a parent client received transitional assistance.

R986-200-218. Exceptions to the Time Limit.

Exceptions to the time limit may be allowed for up to 20% of the average monthly number of families receiving financial assistance from FEP and FEPTP during the previous Federal fiscal year for the following reasons:

(1) A hardship under Section 35A-3-306 is determined to exist when a parent:

(a) is determined to be medically unable to work. The client must provide proof of inability to work in one of the following ways:

(i) receipt of disability benefits from SSA;

(ii) receipt of VA Disability benefits based on the parent being 100% disabled;

(iii) placement on the Division of Services to People with Disabilities' waiting list. Being on the waiting list indicates the person has met the criteria for a disability; or

(iv) is currently receiving Temporary Total or Permanent Total disability Workers' Compensation benefits;

(v) a medical statement completed by a medical doctor, a licensed Advanced Practice Registered Nurse, a licensed Physician's Assistant, or a doctor of osteopathy, stating the parent has a medical condition supported by medical evidence, which prevents the parent from engaging in work activities capable of generating income of at least $500 a month. The statement must be completed by a professional skilled in both the diagnosis and treatment of the condition; or

(vi) a statement completed by a licensed clinical social worker, licensed psychologist, licensed Mental Health Therapist as defined in UCA Section 58-60-102, or psychiatrist stating that the parent has been diagnosed with a mental health condition that prevents the parent from engaging in work activities capable of generating income of at least $500 a month. Substance abuse is considered the same as mental health condition;

(b) is under age 19 through the month of their nineteenth birthday;

(c) is currently engaged in an approved full-time job preparation, educational or training activity which the parent was expected to complete within the 36 month time limit but completion within the 36 months was not possible through no fault of the parent. Additionally, if the parent has previously received, beginning with the month of January 1997, 24 months of financial assistance while attending educational or training activities, good cause for additional months must be shown and approved;

(d) was without fault and a delay in the delivery of services provided by the Department occurred. The delay must have had an adverse effect on the parent causing a hardship and preventing the parent from obtaining employment. An extension under this section cannot be granted for more than the length of the delay;

(e) moved to Utah after exhausting 36 months of assistance in another state or states and the parent did not receive supportive services in that state or states as required under the provisions of PRWORA. To be eligible for an extension under this section, the failure to receive supportive services must have occurred through no fault of the parent and must contribute to the parent's inability to work. An extension under this section can never be for longer than the delay in services;

(f) completed an educational or training program at the 36th month and needs additional time to obtain employment;

(g) is unable to work because the parent is required in the home to meet the medical needs of a dependent. Dependent for the purposes of this paragraph means a person who the parent claims as a dependent on his or her income tax filing. Proof, consisting of a medical statement from a health care professional listed in subparagraph (1)(a)(v) or (vi) of this section is required unless the dependent is on the Travis C medicaid waiver program. The medical statement must include all of the following:

(i) the diagnosis of the dependent's condition,

(ii) the recommended treatment needed or being received for the condition,

(iii) the length of time the parent will be required in the home to care for the dependent, and

(iv) whether the parent is required to be in the home full-time or part-time; or

(h) is currently receiving assistance under one of the exceptions in this section and needs additional time to obtain employment. A client can only receive assistance for one month under this subparagraph. If the Department determines that granting an exception under this subparagraph adversely impacts its federally mandated participation rate requirements or might otherwise jeopardize its funding, the one month exception will not be granted or

(i) is no longer employed due to a verified reduction in force (layoff) and needs additional time to find work. Participation in eligible activities is required for an exception under this subparagraph. This exception is only available for parents who were laid off on or after January 1, 2008. This exception will not be available after December 31, 2011.

(2) Additional months of financial assistance may be provided if the family includes an individual who has been battered or subjected to extreme cruelty which is a barrier to employment and the implementation of the time limit would make it more difficult to escape the situation. Battered or subjected to extreme cruelty means:

(a) physical acts which resulted in, or threatened to result in, physical injury to the individual;

(b) sexual abuse;

(c) sexual activity involving a dependent child;

(d) threats of, or attempts at, physical or sexual abuse;

(e) mental abuse which includes stalking and harassment; or

(f) neglect or deprivation of medical care.

(3) Employment extension. An exception to the time limit can be granted for a maximum of an additional 24 months if during the previous two months, the parent client was employed for no less than 20 hours per week. The employment can consist of self-employment if the parent's net income from that self-employment is at or above minimum wage.

(a) If, at the end of the 24-month extension, the parent client qualifies for an extension under subsections (1) or (2) of this section, an additional extension can be granted under the provisions of those sections.

(b) A family cannot receive financial assistance for more than a total of 60 months unless an extension can be granted under subsections (1) and (2) of this section.

(4) All clients receiving an extension must continue to participate, to the maximum extent possible, in an employment plan. This includes cooperating with ORS in the collection, establishment, and enforcement of child support and the establishment of paternity, if necessary.

(5) If a household filing unit contains more than one parent, and one parent has received at least 36 months of assistance as a parent, then the entire filing unit is ineligible unless both parents meet one of the exceptions listed above. Both parents need not meet the same exception.

(6) A family in which the only parent or both parents are ineligible aliens cannot be granted an extension under Section (3) above or for any of the reasons in Subsections (1)(c), (d), (e) or (f). This is because ineligible aliens are not legally able to work and supportive services for work, education and training purposes are inappropriate.

(7) A client who is no longer eligible for financial assistance may be eligible for other kinds of public assistance including food stamps, Child Care Assistance and medical coverage. The client must follow the appropriate application process to determine eligibility for assistance from those other programs.

(8) Exceptions are subject to a review at least once every six months.

R986-200-219. Emergency Assistance (EA) for Needy Families With Dependent Children.

(1) EA is provided in an effort to prevent homelessness. It is a payment which is limited to use for utilities and rent or mortgage.

(2) To be eligible for EA the family must meet all other FEP requirements except:

(a) the client need only meet the "gross income" test. Gross income which is available to the client must be equal to or less than 185% of the standard needs budget for the client's filing unit; and

(b) the client is not required to enter into an employment plan or cooperate with ORS in obtaining support.

(3) The client must be homeless, in danger of becoming homeless or having the utilities at the home cut off due to a crisis situation beyond the client's control. The client must show that:

(a) The family is facing eviction or foreclosure because of past due rent or mortgage payments or unpaid utility bills which result from the crisis;

(b) A one-time EA payment will enable the family to obtain or maintain housing or prevent the utility shut off while they overcome the temporary crisis;

(c) Assistance with one month's rent or mortgage payment is enough to prevent the eviction, foreclosure or termination of utilities;

(d) The client has the ability to resolve past due payments and pay future months' rent or mortgage payments and utility bills after resolution of the crisis; and

(e) The client has exhausted all other resources.

(4) Emergency assistance is available for only 30 consecutive days during a year to any client or that client's household. If, for example, a client receives an EA payment of $450 for rent on April 1 and requests an additional EA payment of $300 for utilities on or before April 30 of that same year, the request for an EA payment for utilities will be considered. If the request for an additional payment for utilities is made after April 30, it cannot be considered for payment. The client will not be eligible for another EA payment until April 1 of the following year. A year is defined as 365 days following the initial date of payment of EA.

(5) Payments will not exceed $450 per family for one month's rent payment or $700 per family for one month's mortgage payment, and $300 for one month's utilities payment.

R986-200-220. Mentors.

(1) The Department will recruit and train volunteers to serve as mentors for parent clients. The Department may elect to contract for the recruitment and training of the volunteers.

(2) A mentor may advocate on behalf of a parent client and help a parent client:

(a) develop life skills;

(b) implement an employment plan; or

(c) obtain services and support from:

(i) the volunteer mentor;

(ii) the Department; or

(iii) civic organizations.

R986-200-230. Assets Counted in Determining Eligibility.

(1) All available assets, unless exempt, are counted in determining eligibility. An asset is available when the applicant or client owns it and has the ability and the legal right to sell it or dispose of it. An item is never counted as both income and an asset in the same month.

(2) The value of an asset is determined by its equity value. Equity value is the current market value less any debts still owing on the asset. Current market value is the asset's selling price on the open market as set by current standards of appraisal.

(3) Both real and personal property are considered assets. Real property is an item that is fixed, permanent, or immovable. This includes land, houses, buildings, mobile homes and trailer homes. Personal property is any item other than real property.

(4) If an asset is potentially available, but a legal impediment to making it available exists, it is exempt until it can be made available. The applicant or client must take appropriate steps to make the asset available unless:

(a) Reasonable action would not be successful in making the asset available; or

(b) The probable cost of making the asset available exceeds its value.

(5) The value of countable real and personal property cannot exceed $2,000.

(6) If the household assets are below the limits on the first day of the month the household is eligible for the remainder of the month.

R986-200-231. Assets That Are Not Counted (Exempt) for Eligibility Purposes.

The following are not counted as an asset when determining eligibility for financial assistance:

(1) the home in which the family lives, and its contents, unless any single item of personal property has a value over $1,000, then only that item is counted toward the $2,000 limit. If the family owns more than one home, only the primary residence is exempt and the equity value of the other home is counted;

(2) the value of the lot on which the home stands is exempt if it does not exceed the average size of residential lots for the community in which it is located. The value of the property in excess of an average size lot is counted if marketable;

(3) water rights attached to the home property are exempt;

(4) motorized vehicles;

(5) with the exception of real property, the value of income producing property necessary for employment;

(6) the value of any reasonable assistance received for post-secondary education;

(7) bona fide loans, including reverse equity loans;

(8) per capita payments or any asset purchased with per capita payments made to tribal members by the Secretary of the Interior or the tribe. Any asset purchased with profit distributions or income to tribal members derived from tribal owned casinos and privately owned land is countable;

(9) maintenance items essential to day-to-day living;

(10) life estates;

(11) an irrevocable trust where neither the corpus nor income can be used for basic living expenses;

(12) for refugees, as defined under R986-300-303(1), assets that remain in the refugee's country of origin are not counted;

(13) one burial plot per member of the household. A burial plot is a burial space and any item related to repositories

used for the remains of the deceased. This includes caskets, concrete vaults, urns, crypts, grave markers, etc. If the individual owns a grave site, the value of which includes opening and closing, the opening and closing is also exempt;

(14) a burial/funeral fund up to a maximum of $1,500 per member of the household;

(a) The value of any irrevocable burial trust is subtracted from the $1,500 burial/funeral fund exemption. If the irrevocable burial trust is valued at $1,500 or more, it reduces the burial/funeral fund exemption to zero.

(b) After deducting any irrevocable burial trust, if there is still a balance in the burial/funeral fund exemption amount, the remaining exemption is reduced by the cash value of any burial contract, funeral plan, or funds set aside for burial up to a maximum of $1,500. Any amount over $1,500 is considered an asset;

(15) any interest which is accrued on an exempt burial contract, funeral plan, or funds set aside for burial is exempt as income or assets. If an individual removes the principal or interest and uses the money for a purpose other than the individual's burial expenses, the amount withdrawn is countable income; and

(16) any other property exempt under federal law.

R986-200-232. Considerations in Evaluating Real Property.

(1) Any nonexempt real property that an applicant or client is making a bona fide effort to sell is exempt for a nine-month period provided the applicant or client agrees to repay, from the proceeds of the sale, the amount of financial and/or child care assistance received. Bona fide effort to sell means placing the property up for sale at a price no greater than the current market value. Additionally, to qualify for this exemption, the applicant or client must assign, to the state of Utah, a lien against the real property under consideration. If the property is not sold during the period of time the client was receiving financial and/or child care assistance or if the client loses eligibility for any reason during the nine-month period, the lien will not be released until repayment of all financial and/or child care assistance is made.

(2) Payments received on a sales contract for the sale of an exempt home are not counted if the entire proceeds are committed to replacement of the property sold within 30 days of receipt and the purchase is completed within 90 days. If more than 90 days is needed to complete the actual purchase, one 90-day extension may be granted. Proceeds are defined as all payments made on the principal of the contract. Proceeds do not include interest earned on the principal which is counted as income.

R986-200-233. Considerations in Evaluating Household Assets.

(1) The assets of a disqualified household member are counted.

(2) The assets of a ward that are controlled by a legal guardian are considered available to the ward.

(3) The assets of an ineligible child are exempt.

(4) When an ineligible alien is a parent, the assets of that alien parent are counted in determining eligibility for other family members.

(5) Certain aliens who have been legally admitted to the United States for permanent residence must have the income and assets of their sponsors considered in determining eligibility for financial assistance under applicable federal authority in accordance with R986-200-243.

R986-200-234. Income Counted in Determining Eligibility.

(1) The amount of financial assistance is based on the household's monthly income and size.

(2) Household income means the payment or receipt of countable income from any source to any member counted in the household assistance unit including:

(a) children; and

(b) people who are disqualified from being counted because of a prior determination of fraud (IPV) or because they are an ineligible alien.

(3) The income of SSI recipients is not counted.

(4) Countable income is gross income, whether earned or unearned, less allowable exclusions listed in section R986-200-239.

(5) Money is not counted as income and an asset in the same month.

(6) If an individual has elected to have a voluntary reduction or deduction taken from an entitlement to earned or unearned income, the voluntary reduction or deduction is counted as gross income. Voluntary reductions include insurance premiums, savings, and garnishments to pay an owed obligation.

R986-200-235. Unearned Income.

(1) Unearned income is income received by an individual for which the individual performs no service.

(2) Countable unearned income includes:

(a) pensions and annuities such as Railroad Retirement, Social Security, VA, Civil Service;

(b) disability benefits such as sick pay and workers' compensation payments unless considered as earned income;

(c) unemployment insurance, except, starting March 1, 2009 and continuing as long as it is authorized by Congress and not counted for food stamps, the $25 supplemental weekly Unemployment Compensation payment authorized by the American Recovery and Reinvestment Act of 2009 (ARRA) will not be countable unearned income;

(d) strike or union benefits;

(e) VA allotment;

(f) income from the GI Bill;

(g) assigned support retained in violation of statute is counted when a request to do so has been generated by ORS;

(h) payments received from trusts made for basic living expenses;

(i) payments of interest from stocks, bonds, savings, loans, insurance, a sales contract, or mortgage. This applies even if the payments are from the sale of an exempt home. Payments made for the down payment or principal are counted as assets;

(j) inheritances;

(k) life insurance benefits;

(l) payments from an insurance company or other source for personal injury, interest, or destroyed, lost or stolen property unless the money is used to replace that property;

(m) cash contributions from any source including family, a church or other charitable organization;

(n) rental income if the rental property is managed by another individual or company for the owner. Income from rental property managed by someone in the household assistance unit is considered earned income;

(o) financial assistance payments received from another state or the Department from another type of financial assistance program including a diversion payment; and

(p) payments from Job Corps and Americorps living allowances.

(3) Unearned income which is not counted (exempt):

(a) cash gifts for special occasions which do not exceed $30 per quarter for each person in the household assistance unit. The gift can be divided equally among all members of the household assistance unit;

(b) bona fide loans, including reverse equity loans on an exempt property. A bona fide loan means a loan which has been contracted in good faith without fraud or deceit and genuinely endorsed in writing for repayment;

(c) the value of food stamps, food donated from any

source, and the value of vouchers issued under the Women Infants and Children program;

(d) any per capita payments made to individual tribal members by either the secretary of interior or the tribe are excluded. Profit distributions or income to tribal members derived from tribal owned casinos and privately owned land are countable income;

(e) any payments made to household members that are declared exempt under federal law;

(f) the value of governmental rent and housing subsidies, federal relocation assistance, or EA issued by the Department;

(g) money from a trust fund to provide for or reimburse the household for a specific item NOT related to basic living expenses. This includes medical expenses and educational expenses. Money from a trust fund to provide for or reimburse a household member for basic living expenses is counted;

(h) travel and training allowances and reimbursements if they are directly related to training, education, work, or volunteer activities;

(i) all unearned income in-kind. In-kind means something, such as goods or commodities, other than money;

(j) thirty dollars of the income received from rental income unless greater expenses can be proven. Expenses in excess of $30 can be allowed for:

(i) taxes;

(ii) attorney fees expended to make the rental income available;

(iii) upkeep and repair costs necessary to maintain the current value of the property; and

(iv) interest paid on a loan or mortgage made for upkeep or repair. Payment on the principal of the loan or mortgage cannot be excluded;

(k) if meals are provided to a roomer/boarder, the value of a one-person food stamp allotment for each roomer/boarder;

(l) payments for energy assistance including H.E.A.T payments, assistance given by a supplier of home energy, and in-kind assistance given by a private non-profit agency;

(m) federal and state income tax refunds and earned income tax credit payments;

(n) payments made by the Department to reimburse the client for education or work expenses, or a CC subsidy;

(o) income of an SSI recipient. Neither the payment from SSI nor any other income, including earned income, of an SSI recipient is included;

(p) payments from a person living in the household who is not included in the household assistance unit, as defined in R986-200-205, when the payment is intended and used for that person's share of the living expenses;

(q) educational assistance and college work study except Veterans Education Assistance intended for family members of the student, living stipends and money earned from an assistantship program is counted as income; and

(r) for a refugee, as defined in R986-300-303(1), any grant or assistance, whether cash or in-kind, received directly or indirectly under the Reception and Placement Programs of Department of State or Department of Justice.

R986-200-236. Earned Income.

(1) All earned income is counted when it is received even if it is an advance on wages, salaries or commissions.

(2) Countable earned income includes:

(a) wages, except Americorps*Vista living allowances are not counted;

(b) salaries;

(c) commissions;

(d) tips;

(e) sick pay which is paid by the employer;

(f) temporary disability insurance or temporary workers' compensation payments which are employer funded and made to an individual who remains employed during recuperation from a temporary illness or injury pending the employee's return to the job;

(g) rental income only if managerial duties are performed by the owner to receive the income. The number of hours spent performing those duties is not a factor. If the property is managed by someone other than the individual, the income is counted as unearned income;

(h) net income from self-employment less allowable expenses, including income over a period of time for which settlement is made at one given time. The periodic payment is annualized prospectively. Examples include the sale of farm crops, livestock, and poultry. A client may deduct actual, allowable expenses, or may opt to deduct 40% of the gross income from self-employment to determine net income;

(i) training incentive payments and work allowances; and

(j) earned income of dependent children.

(3) Income that is not counted as earned income:

(a) income for an SSI recipient;

(b) reimbursements from an employer for any bona fide work expense;

(c) allowances from an employer for travel and training if the allowance is directly related to the travel or training and identifiable and separate from other countable income; or

(d) Earned Income Tax Credit (EITC) payments.

R986-200-237. Lump Sum Payments.

(1) Lump sum payments are one-time windfalls or retroactive payments of earned or unearned income. Lump sums include but are not limited to, inheritances, insurance settlements, awards, winnings, gifts, and severance pay, including when a client cashes out vacation, holiday, and sick pay. They also include lump sum payments from Social Security, VA, UI, Worker's Compensation, and other one-time payments. Payments from SSA that are paid out in installments are not considered lump sum payments but as income, even if paid less often than monthly.

(2) The following lump sum payments are not counted as income or assets:

(a) any kind of lump sum payment of excluded earned or unearned income. If the income would have been excluded, the lump sum payment is also excluded. This includes SSI payments and any EITC; and

(b) insurance settlements for destroyed exempt property when used to replace that property.

(3) The net lump sum payment is counted as income for the month it is received. Any amount remaining after the end of that month is considered an asset.

(4) The net lump sum is the portion of the lump sum that is remaining after deducting:

(a) legal fees expended in the effort to make the lump sum available;

(b) payments for past medical bills if the lump sum was intended to cover those expenses; and

(c) funeral or burial expenses, if the lump sum was intended to cover funeral or burial expenses.

(5) A lump sum paid to an SSI recipient is not counted as income or an asset except for those recipients receiving financial assistance from GA or WTE.

R986-200-238. How to Calculate Income.

(1) To determine if a client is eligible for, and the amount of, a financial assistance payment, the Department estimates the anticipated income, assets and household size for each month in the certification period.

(2) The methods used for estimating income are:

(a) income averaging or annualizing which means using a history of past income that is representative of future income and averaging it to determine anticipated future monthly

income. It may be necessary to evaluate the history of past income for a full year or more; and

(b) income anticipating which means using current facts such as rate of pay and hourly wage to anticipate future monthly income when no reliable history is available.

(3) Monthly income is calculated by multiplying the average weekly income by 4.3 weeks. If a client is paid every two weeks, the income for those two weeks is multiplied by 2.15 weeks to determine monthly income.

(4) The Department's estimate of income, when based on the best available information at the time it was made, will be determined to be an accurate reflection of the client's income. If it is later determined the actual income was different than the estimate, no adjustment will be made. If the client notifies the Department of a change in circumstances affecting income, the estimated income can be adjusted prospectively but not retrospectively.

R986-200-239. How to Determine the Amount of the Financial Assistance Payment.

(1) Once the household's size and income have been determined, the gross countable income must be less than or equal to 185% of the Standard Needs Budget (SNB) for the size of the household. This is referred to as the "gross test".

(2) If the gross countable income is less than or equal to 185% of the SNB, the following deductions are allowed:

(a) a work expense allowance of $100 for each person in the household unit who is employed;

(b) fifty percent of the remaining earned income after deducting the work expense allowance as provided in paragraph (a) of this subsection, if the individual has received a financial assistance payment from the Department for one or more of the immediately preceding four months; and

(c) after deducting the amounts in paragraphs (a) and (b) of this subsection, if appropriate, the following deductions can be made:

(i) a dependent care deduction as described in subsection (3) of this section; and

(ii) child support paid by a household member if legally owed to someone not included in the household.

(3) The amount of the dependant care deduction is set by the Department and based on the number of hours worked by the parent and the age of the dependant needing care. It can only be deducted if the dependant care:

(a) is paid for the care of a child or adult member of the household assistance unit, or a child or adult who would be a member of the household assistance unit except that this person receives SSI. An adult's need for care must be verified by a doctor; and

(b) is not subsidized, in whole or in part, by a CC payment from the Department; and

(c) is not paid to an individual who is in the household assistance unit.

(4) After deducting the amounts allowed under paragraph (2) above, the resulting net income must be less than 100% of SNB for size of the household assistance unit. If the net income is equal to or greater than the SNB, the household is not eligible.

(5) If the net income is less than 100% of the SNB the following amounts are deducted:

(a) Fifty percent of earned countable income for all employed household assistance unit members if the household was not eligible for the 50% deduction under paragraph (2)(b) above; and/or

(b) All of the earned income of all children in the household assistance unit, if not previously deducted, who are:

(i) in school or training full-time, or

(ii) in part-time education or training if they are employed less than 100 hours per month. "Part-time education or training" means enrolled for at least one-half the number of hours or periods considered by the institution to be customary to complete the course of study within the minimum time period. If no schedule is set by the school, the course of study must be no less than an average of two class periods or two hours per day, whichever is less.

(6) The resulting net countable income is compared to the full financial assistance payment for the household size. If the net countable income is more than the financial assistance payment, the household is not eligible. If it is less, the net countable income is deducted from the financial assistance payment and the household is paid the difference.

(7) The amount of the standard financial assistance payment is set by the Department. The current amount is in the table that follows:

TABLE

Household Size	Payment Amount
1	$288
2	$399
3	$498
4	$583
5	$663
6	$731
7	$765
8	$801

Amounts for household sizes larger than 8 are available at all Department offices.

R986-200-240. Additional Payments Available Under Certain Circumstances.

(1) Each parent eligible for financial assistance in the FEP or FEPTP programs who takes part in at least one enhanced participation activity may be eligible to receive $60 each month in addition to the standard financial assistance payment. Enhanced participation activities are limited to:

(a) work experience sites of at least 20 hours a week and other eligible activities that together total 30 hours per week;

(b) full-time attendance in an education or employment training program; or

(c) employment of 20 hours or more a week and other eligible activities that together total 30 hours per week.

(2) An additional payment of $15 per month for a pregnant woman in the third month prior to the expected month of delivery. Eligibility for the allowance begins in the month the woman provides medical proof that she is in the third month prior to the expected month of delivery. The pregnancy allowance ends at the end of the month the pregnancy ends.

(3) A limited number of funds are available to individuals for work and training expenses. The funds can only be used to alleviate circumstances which impede the individual's ability to begin or continue employment, job search, training, or education. The payment of these funds is completely discretionary by the Department. The individual does not need to meet any eligibility requirements to request or receive these funds.

(4) Limited funds are available, up to a maximum of $300, to pay for burial costs if the individual is not entitled to a burial paid for by the county.

(5) A Department Regional Director or designee may approve assistance, as funding allows, for the emergency needs of a non-resident who is transient, temporarily stranded in Utah, and who does not intend to stay in Utah.

(6) A limited number of funds are available for enhanced payments to parents who are eligible for financial assistance in the FEP program or who are eligible for TANF non-FEP training under R986-200-245 and who participate in the HS/GED Pilot Program. The payment of these funds is completely discretionary by the Department and may differ from region to region. The payments may continue until the client

completes the HS/GED Pilot Program even if the client is no longer receiving FEP.

R986-200-241. Income Eligibility Calculation for a Specified Relative Who Wants to be Included in the Assistance Payment.

(1) The income calculation for a specified relative who wants to be included in the financial assistance payment is as follows:

(a) All earned and unearned countable income is counted, as determined by FEP rules, for the specified relative and his or her spouse, less the following allowable deductions:

(i) one hundred dollars for each employed person in the household. This deduction is only allowed for the specified relative and/or spouse and not anyone else in the household even if working; and

(ii) the child care expenses paid by the specified relative and necessary for employment up to the maximum allowable deduction as set by the Department.

(2) The household size is determined by counting the specified relative, his or her spouse if living in the home, and their dependent children living in the home who are not in the household assistance unit.

(3) If the income less deductions exceeds 100% of the SNB for a household of that size, the specified relative cannot be included in the financial assistance payment. If the income is less than 100% of the SNB, the total household income is divided by the household size calculated under subsection (2) of this section. This amount is deemed available to the specified relative as countable unearned income. If that amount is less than the maximum financial assistance payment for the household assistance unit size, the specified relative may be included in the financial assistance payment.

R986-200-242. Income Calculation for a Minor Parent Living with His or Her Parent or Stepparent.

(1) All earned and unearned countable income of all parents, including stepparents living in the home, is counted when determining the eligibility of a minor parent residing in the home of the parent(s).

(2) From that income, the following deductions are allowed:

(a) one hundred dollars from income earned by each parent or stepparent living in the home, and

(b) an amount equal to 100% of the SNB for a group with the following members:

(i) the parents or stepparents living in the home;

(ii) any other person in the home who is not included in the financial assistance payment of the minor parent and who is a dependent of the parents or stepparents;

(c) amounts paid by the parents or stepparents living in the home to individuals not living at home but who could be claimed as dependents for Federal income tax purposes; and

(d) alimony and child support paid to someone outside the home by the parents or stepparents living in the home.

(3) The resulting amount is counted as unearned income to the minor parent.

(4) If a minor parent lives in a household already receiving financial assistance, the child of the minor parent is included in the larger household assistance unit.

R986-200-243. Counting the Income of Sponsors of Eligible Aliens.

(1) Certain aliens who have been legally admitted into the United States for permanent residence must have a portion of the earned and unearned countable income of their sponsors counted as unearned income in determining eligibility and financial assistance payment amounts for the alien.

(2) The following aliens are not subject to having the income of their sponsor counted:

(a) paroled or admitted into the United States as a refugee or asylee;

(b) granted political asylum;

(c) admitted as a Cuban or Haitian entrant;

(d) other conditional or paroled entrants;

(e) not sponsored or who have sponsors that are organizations or institutions;

(f) sponsored by persons who receive public assistance or SSI;

(g) permanent resident aliens who were admitted as refugees and have been in the United States for eight months or less.

(3) Except as provided in subsection (7) of this section, the income of the sponsor of an alien who applies for financial assistance after April 1, 1983 and who has been legally admitted into the United States for permanent residence must be counted for five years after the entry date into the United States. The entry date is the date the alien was admitted for permanent residence. The time spent, if any, in the United States other than as a permanent resident is not considered as part of the five year period.

(4) The amount of income deemed available for the alien is calculated by:

(a) deducting 20% from the total earned income of the sponsor and the sponsor's spouse up to a maximum of $175 per month; then,

(b) adding to that figure all of the monthly unearned countable income of the sponsor and the sponsor's spouse; then the following deductions are allowed:

(i) an amount equal to 100% of the SNB amount for the number of people living in the sponsor's household who are or could be claimed as dependents under federal income tax policy; then,

(ii) actual payments made to people not living in the sponsor's household whom the sponsor claims or could claim as dependents under federal income tax policy; then,

(iii) actual payments of alimony and/or child support the sponsor makes to individuals not living in the sponsor's household.

(c) The remaining amount is counted as unearned income against the alien whether or not the income is actually made available to the alien.

(5) Actual payments by the sponsor to aliens will be counted as income only to the extent that the payment amount exceeds the amount of the sponsor's income already determined as countable.

(6) A sponsor can be held liable for an overpayment made to a sponsored alien if the sponsor was responsible for, or signed the documents which contained, the misinformation that resulted in the overpayment. The sponsor is not held liable for an overpayment if the alien fails to give accurate information to the Department or the sponsor is deceased, in prison, or can prove the request for information was incomplete or vague.

(7) In the case where the alien entered the United States after December 19, 1997, the sponsor's income does not count if:

(a) the alien becomes a United States citizen through naturalization;

(b) the alien has worked 40 qualifying quarters as determined by Social Security Administration; or

(c) the alien or the sponsor dies.

R986-200-244. TANF Needy Family (TNF).

(1) TNF is not a program but describes a population that can be served using TANF Surplus Funds.

(2) Eligible families must have a dependent child under the age of 18 residing in the home, and the total household income must not exceed 300% of the Federal poverty level.

Income is determined as gross income without allowance for disregards.

(3) Services available vary throughout the state. Information on what is available in each region is available at each Employment Center. The Department may elect to contract out services.

(4) If TANF funded payments are made for basic needs such as housing, food, clothing, shelter, or utilities, each month a payment is received under TNF, counts as one month of assistance toward the 36 month lifetime limit. Basic needs also include transportation and child care if all adults in the household are unemployed and will count toward the 36 month lifetime limit.

(5) If a member of the household has used all 36 months of FEP assistance the household is not eligible for basic needs assistance under TNF but may be eligible for other TANF funded services.

(6) Assets are not counted when determining eligibility for TNF services.

R986-200-245. TANF Non-FEP Training (TNT).

(1) TNT is to provide skills and training to parents to help them become suitably employed and self-sufficient.

(2) The client must be unable to achieve self-sufficiency without training.

(3) Eligible families must have a dependent child under the age of 18 residing in the home and the total household income must not exceed 200% of the Federal poverty level. If the only dependent child is 18 and expected to graduate from High School before their 19th birthday the family is eligible up through the month of graduation. Income is counted and calculated the same as for WIA as found in rule R986-600.

(4) Assets are not counted when determining eligibility for TNT services.

(5) The client must show need and appropriateness of training.

(6) The client must negotiate an employment plan with the Department and participate to the maximum extent possible.

(7) The Department will not pay for supportive services such as child care, transportation or living expenses under TNT. The Department can pay for books, tools, work clothes and other needs associated with training.

R986-200-246. Transitional Cash Assistance.

(1) Transitional Cash Assistance, (TCA) is offered to help FEP and FEPTP customers stabilize employment and reduce recidivism.

(2) To be eligible for TCA a client must;

(a) have been eligible for and have received FEP or FEPTP during the month immediately preceding the month during which TCA is requested or granted. The FEP or FEPTP assistance must have been terminated due to earned or earned and unearned income and not for nonparticipation under R986-200-212. If the immediately preceding month was during a diversion period, or the client has a termination pending due to non participation as provided in R986-200-212, the client is not eligible for TCA,

(b) be employed and

(i) have income greater than the FEP or FEP TP income guideline

(ii) the FEP or FEP TP assistance was terminated because of that income, and

(iii) the earned income exceeds the unearned income at the time the FEP or FEP TP was terminated, and

(c) continue to cooperate with the Office of Recovery Services, Child Support Enforcement.

(3) TCA is only available if the customer verifies income at the minimum required in subparagraph (2)(b) of this section.

(4) The TCA benefit is available for a maximum of three months in a 12 month period. The three months do not need to be consecutive.

(a) The assistance payment for the first two months of TCA is based on household size. All household income, earned and unearned, is disregarded.

(b) Payment for the third month is one half of the payment available in (4)(a) of this section.

(5) To receive the second and third month of the TCA benefit, the client must remain employed or have had an open FEP case that closed during the prior month due to income described in (2)(b) of this section.

(6) If initial verification is provided and a client is paid one month of TCA but the client is unable to provide documentation to support that initial verification, no further payments will be made under TCA but the one month payment will not result in an overpayment.

(7) TCA does not count toward the 36 month time limit found in R986-200-217.

R986-200-247. Utah Back to Work Pilot Program (BWP).

(1) BWP is a voluntary program providing short term subsidized employment for a maximum of three months to an eligible unemployment insurance (UI) claimant. To be eligible, a UI claimant must:

(a) be currently receiving UI benefits and have received at least one week of paid UI benefit. The waiting week is not considered a "paid" benefit for the purposes of this section;

(b) be legally eligible to work in the U.S. and be a U.S. citizen or meet the alienage requirements of R986-200-203;

(c) have at least 1 week of UI benefits remaining on his or her claim. The week can be Extended Benefits under 35A-4-402 or Emergency Unemployment Compensation (EUC) benefits as defined by the UI division;

(d) be the parent of at least one minor dependent child and be contributing to the financial support of that child or children;

(e) have not worked for the employer where the claimant is to be hired under this program more than 40 hours in the 60 days immediately preceding the date of hire under the BWP program;

(f) have not previously participated in the BWP or BWY program; and

(g) sign a "statement of facts" agreement.

(2) The Utah Back to Work Youth Program (BWY) provides short term subsidized employment for a maximum of three months to unemployed youth 18-24 years of age. BWY youth must be legally eligible to work in the U.S. and be unemployed but do not need to be receiving or eligible to receive UI benefits. BWY youth do not need to be a parent but must meet the requirements of subsections (1)(e) through (g) of this section. Eligible Utah Back to Work Youth who are also eligible UI claimants are not required to have a minor dependent child.

(3) An employer eligible for a subsidy under this section is an employer that:

(a) is registered with the Department's UI division as an active employer in "good standing". For the purposes of this section, "good standing" means the employer has no delinquent UI contributions or reports, or has no outstanding balance owed the BWP program;

(b) is a "qualified employer" which "means any employer other than the United States, any State, or any political subdivision" or instrumentality thereof. A public institution of higher education is considered a "qualified employer" for purposes of this section. The employer cannot be a Temporary Help Company as defined in R994-202-102 or a Professional Employer Organization as defined in R994-202-106;

(c) pays a wage of at least $9 per hour. Commission only jobs may qualify if the employer guarantees $9 per hour or more, employees who receive gratuities plus wages may qualify

if the employer reports $9 per hour or more to the UI Contributions division;

(d) has not displaced or partially displaced existing workers by participating in this program;

(e) has at least one other employee;

(f) will provide the claimant with at least 35 hours work per week;

(g) does not hire the claimant for temporary or seasonal work and

(h) has signed a participation agreement with the department. The agreement must be signed no later than seven calendar days after the "date of hire" of the qualified unemployed individual. A qualified unemployed individual is one who has enrolled in, and is eligible for, the BWP. The date of hire means the date services for remuneration were first performed by the employee.

(4) Once it has been verified that a claimant has been hired, a qualified employer will be paid a $500 subsidy and an additional $1,500 subsidy at the conclusion of the third month of employment provided the required DWS invoices have been provided.

(5) If any employer has received any subsidy payment from DWS that the department determines was not entitled to,

(a) the employer shall repay the sum, or shall, at the discretion of the department, have the sum deducted from any future subsidy payment payable to the employer;

(b) the sum the employer is determined liable for shall be collectible in the same manner as provided for in Section 35A-3-601 et seq.

(6) A review of a decision or determination involving BWP subsidy payment liability shall be made in accordance with the provisions of Section 35A-3-605(2) and Department rules R986-100-123 et seq.

(7) BWP and BWY will continue for as long as funding is available.

R986-200-248. Wasatch Front North Service Area Pilot: FEP Subsidized Employment (FEP SE).

(1) FEP SE is a voluntary program providing short term subsidized employment for a maximum of three months to an eligible FEP recipient. FEP SE is a pilot program for Wasatch Front North Service Area but may be expanded to other service areas if funding permits. To be eligible, a FEP recipient must:

(a) be currently receiving FEP benefits and have received at least one FEP payment;

(b) have a current employment plan. If the client is working less than 30 hours per week, the employment plan must provide additional activities,

(c) be legally eligible to work in the U.S. and be a U.S. citizen or meet the alienage requirements of R986-200-203;

(d) have not worked for the employer where the client is to be hired under this program more than 40 hours in the 60 days immediately preceding the date of hire under the FEP SE program; and

(e) have not previously participated in the FEP SE program.

(2) An employer eligible for a subsidy under this section is an employer that:

(a) is registered with the Department's UI division as an active employer in "good standing". For the purposes of this section, "good standing" means the employer has no delinquent UI contributions or reports;

(b) is a "qualified employer" which is defined as any employer other than the United States, any State, or any political subdivision or instrumentality thereof. A public institution of higher education is considered a "qualified employer" for purposes of this section. The employer cannot be a Temporary Help Company as defined in R994-202-102 or a Professional Employer Organization as defined in R994-202-106;

(c) pays a wage of at least $8 per hour. Commission only jobs may qualify if the employer guarantees $8 per hour or more;

(d) has not displaced or partially displaced existing workers by participating in this program;

(e) has at least one other employee;

(f) will provide the client with at least 20 hours work per week; and

(g) does not hire the client for temporary or seasonal work.

(3) Once it has been verified that a FEP recipient has been hired, a qualified employer will be paid a $500 subsidy and an additional $1,500 subsidy at the conclusion of the third month of employment provided the required DWS invoices have been provided.

(4) FEP SE will continue for as long as funding is available.

R986-200-250. Basic Education Training Provider.

(1) Basic education funds can only be provided to training providers approved by the Department.

(2) This section applies to basic education providers receiving funds from the Department including WIA funds under R986-600.

R986-200-251. Types of Basic Education Training Providers and Approval Requirements.

(1) Public schools governed by the Utah State Office of Education (USOE) must complete and submit Application "A" to the Department.

(2) Individuals offering youth tutoring personally, and not as an employee of another business or school, must be over 18 years of age, submit Application "B" and provide all of the following;

(a) a birth certificate,

(b) a current BCI background check results for Utah, from the Utah Department of Public Safety, paid for by the individual. The BCI report cannot contain:

(i) any matters involving an alleged sexual offense;

(ii) any matters involving an alleged felony or class A misdemeanor drug offense; or

(iii) any matters involving an alleged offense against the person under Utah State Code Title 76 Chapter 5, Offenses Against the Person.

(c) a resume with tutoring-related work history or subject matter knowledge,

(d) three letters of recommendation addressing suitability as a tutor, and

(e) an approved grievance procedure for clients to use in making complaints.

(3) All other providers must submit Application "C" and;

(a) have been in business in Utah for at least one year;

(b) meet all state and local licensing requirements;

(c) have a satisfactory record with the Better Business Bureau;

(d) submit evidence of financial stability prepared by a certified public accountant (CPA) using generally accepted accounting principles. The evidence must include at least one of the following:

(i) balance sheet, income statement and a statement of changes in financial position;

(ii) copy of the most recent annual business audit; or

(iii) copies of each owner's most recent personal income tax return.

(e) submit a current Utah Business License showing at least one year in business, and

(f) submit an approved grievance procedure for clients to use in making complaints.

(g) ESL training providers must also submit documentation of registration as a Postsecondary Proprietary

School with the Utah Division of Consumer Protection or show an exemption from such registration.

(h) Providers offering high school credit must also provide documentation of accreditation through Utah State Office of Education and Northwest Association of Accredited Schools.

(4) Training providers submitting Application "B" or "C" must provide the following information for each training program for which the provider is seeking approval:

(a) program completion rates for all individuals enrolled;

(b) the type of certification students completing the program will obtain;

(c) the percentage rate of certification attained by program graduates; and

(d) program costs including tuition, fees and refund policy.

(5) A training provider approved under R986-600-652 can be approved for its basic education curriculum upon submission and approval of the information required in subsection (4) of this section. However, public schools governed by Title IV of the Higher Education Act of 1965 (20 USCA 1070 et seq.) or the Utah State Office of Education (USOE) approved as providers under R986-600-652 do not need to submit the information required in subsection (4) of this section.

R986-200-252. Renewal and Revocation of Approval for Training Providers.

(1) Once a provider has been approved, the Department will establish a review date for that provider and notify the provider of the review date. The Department will determine at the time of the review if the provider is still eligible for approved provider status and notify the provider of that determination. At the time of review, the provider is required to provide any and all information requested by the Department which the Department has determined is necessary to allow the provider to continue to be an approved provider. This may include completing necessary forms, providing documentation and verification, and returning the Department's telephone calls. The requests for information must be completed within the time frame specified by the Department. If the Department determines as a result of the review that the provider is no longer eligible for approved provider status, the provider will be removed from the approved provider list.

(2) Providers must retain participant program records for three years from the date the participant completes the program.

(3) A provider who is not on the Department's approved provider list is not eligible for receipt of Department funds. A provider will be removed from the eligible provider list if the provider:

(a) does not meet the performance levels established by the Department including providing training services in a professional and timely manner;

(b) has committed fraud or violated applicable state or federal law, rule, or regulation;

(c) intentionally supplies inaccurate student or program performance information;

(d) fails to complete the review process; or

(e) has lost approval, accreditation, licensing, or certification from any of the following:

(i) Utah Division of Consumer Protection,

(ii) USOE,

(iii) Northwest Association of Accredited Schools, or

(iv) any other required approval, accrediting, licensing, or certification body.

(4) Some providers who have been removed from the eligible provider list may be eligible to be placed back on the list as follows:

(a) a provider who was removed for failure to meet performance levels may reapply for approval if the provider can prove it can meet performance levels;

(b) there is a lifetime ban for a provider who has committed fraud as a provider;

(c) providers removed for other violations of state or federal law will be suspended:

(i) until the provider can prove it is no longer in violation of the law for minor violations;

(ii) for a period of two years for serious violations or supplying inaccurate student or program performance information; or

(iii) for the lifetime of the provider for egregious violations. The seriousness of the violation will be determined by the Department.

R986-200-253. Training Provider's Right to Appeal a Denial or Revocation of Approval.

(1) Training providers will be notified in writing of a decision to deny an application for approval as a basic education training provider or a decision to revoke prior approval. The notice will inform the provider of its right to file a written appeal, where the appeal should be sent, and the deadline for filing an appeal.

(2) A hearing on the appeal will be held by the Department's Appeals Unit following the procedure in R986-100.

KEY: family employment program
February 1, 2012 35A-3-301 et seq.
Notice of Continuation September 8, 2010

R994. Workforce Services, Unemployment Insurance.
R994-403. Claim for Benefits.
R994-403-101a. Filing a New Claim.

(1) A new claim for unemployment benefits is made by filing with the Department of Workforce Services Claims Center. A new claim can be filed by telephone, completing an application at the Department's web site, or as otherwise instructed by the Department.

(2) The effective date of a new claim for benefits is the Sunday immediately preceding the date the claim is filed, provided the claimant did not work full-time during that week, or is not entitled to earnings equal to or in excess of the WBA for that week. A claim for benefits can only be made effective for a prior week if the claimant can establish good cause for late filing in accordance with R994-403-106a.

(3) When a claimant files a new claim during the last week of a quarter and has worked less than full-time for that week, the Department will make the claim effective that week if it is advantageous to the claimant, even if the claimant has earnings for that week that are equal to or in excess of the WBA.

(4) Wages used to establish eligibility for a claim cannot be used on a subsequent claim.

R994-403-102a. Cancellation of Claim.

(1) Once a weekly claim has been filed and the claimant has been deemed monetarily eligible, the claim is considered to have been established, even if no payment has been made or waiting week credit granted. The claim then remains established for 52 weeks during which time another regular claim may not be filed against the state of Utah unless the claim is canceled.

(2) A claim may be canceled if the claimant requests that the claim be canceled and one of the following circumstances can be shown:

(a) no weekly claims have been filed;

(b) cancellation is requested prior to the issuance of the monetary determination;

(c) the request is made within the same time period permitted for an appeal of the monetary determination and the claimant returns any benefits that have been paid;

(d) the claimant had earnings, severance, or vacation payments equal to or greater than the WBA applicable to all weeks for which claims were filed;

(e) the claimant meets the eligibility requirements for filing a new claim following a disqualification due to a strike in accordance with the requalifying provisions of Subsection 35A-4-405(4)(c);

(f) the claimant meets the requirements for cancellation established under the provisions for combined wage claims in R994-106-107; or

(g) the claimant has filed an unemployment compensation for ex-military (UCX) claim, and it is determined the claimant does not have wage credits under Title 5, chapter 85, U.S. Code.

(3) If a claimant is disqualified from the receipt of unemployment benefits because he or she was discharged for a crime in connection with work under R994-405-210, whether the claimant was deemed monetarily eligible or not, the claim will be established for 52 weeks and cannot be canceled even if the requirements of subsection (2) have been satisfied.

R994-403-103a. Reopening a Claim.

(1) A claim for benefits is considered "closed" when a claimant reports four consecutive weeks of earnings equal to or in excess of the WBA or does not file a weekly claim within 27 days from the last week filed. In those circumstances, the claimant must reopen the claim before benefits can be paid.

(2) A claimant may reopen the claim any time during the 52-week period after first filing by contacting the Claims Center. The effective date of the reopened claim will be the Sunday immediately preceding the date the claimant requests reopening unless good cause is established for failure to request reopening during a prior week in accordance with R994-403-106a.

R994-403-104g. Using Unused Wages for a Subsequent Claim.

(1) A claimant may have sufficient wage credits to monetarily qualify for a subsequent claim without intervening employment.

(2) Before payment can be made on a subsequent claim using those unused wages, each of the following elements must be satisfied:

(a) the claimant must have performed work in covered employment after the effective date of the original claim, but not necessarily during the benefit year of the original claim;

(b) actual services must have been performed. Vacation, severance pay, or a bonus cannot be used to requalify;

(c) the claimant must have earnings from covered employment, as defined in R994-201-101(9), equal to at least six times the WBA of the original or subsequent claim, whichever is lower;

(d) the claimant must have actually received benefits during the preceding benefit year; and

(e) benefits will not be paid under Subsection 35A-4-403(1)(g) from the effective date of the claim and continuing until the week the claimant provides proof of covered employment equal to at least six times the WBA.

R994-403-105a. Filing Weekly Claims.

(1) Claims must be filed on a weekly basis. For unemployment benefit purposes, the week begins at 12:01 a.m. on Sunday and ends at midnight on Saturday. The claimant is the only person who is authorized to file weekly claims. The responsibility for filing weekly claims cannot be delegated to another person.

(2) Each weekly claim should be filed as soon as possible after the Saturday week ending date. If the claim has not been closed, the Department will allow 20 days after the week ending date to file a timely claim. A weekly claim filed 21 or more calendar days after the week ending date will be denied unless good cause for late filing is established in accordance with R994-403-106a.

R994-403-106a. Good Cause for Late Filing.

(1) Claims must be filed timely to insure prompt, accurate payment of benefits. Untimely claims are susceptible to errors and deprive the Department of its responsibility to monitor eligibility. Benefits may be paid if it is determined that the claimant had good cause for not filing in a timely manner.

(2) The claimant has the burden to establish good cause by competent evidence. Good cause is limited to circumstances where it is shown that the reasons for the delay in filing were due to circumstances beyond the claimant's control or were compelling and reasonable. Some reasons for good cause for late filing may raise other eligibility issues. Some examples that may establish good cause for late filing are:

(a) a crisis of several days duration that interrupts the normal routine during the time the claim should be filed;

(b) hospitalization or incarceration; or

(c) coercion or intimidation exercised by the employer to prevent the prompt filing of a claim.

(3) The Department is the only acceptable source of information about unemployment benefits. Relying on inaccurate advice from friends, relatives, other claimants or similar sources does not constitute good cause.

(4) Good cause for late filing cannot extend beyond 65 weeks from the filing date of the initial claim.

R994-403-107b. Registration, Workshops, Deferrals - General Definition.

(1) A claimant must register for work with the Department, unless, at the discretion of the Department, registration is waived or deferred.

(2) The Department may require attendance at workshops designed to assist claimants in obtaining employment.

(3) Failure, without good cause, to comply with the requirements of Subsections (1) and (2) of this section may result in a denial of benefits. The claimant has the burden to establish good cause through competent evidence. Good cause is limited to circumstances where it is shown that the failure to comply was due to circumstances beyond the control of the claimant or which were compelling and reasonable. The proof of inability to register or report may raise an able or available issue.

(4) The denial of benefits begins with the week the claimant failed to comply and ends with the week the claimant contacts the Department and complies by either registering for work, reporting as required, or scheduling an appointment to attend the next available workshop or conference. The denial can be waived if the Department determines the claimant complied within a reasonable amount of time.

R994-403-108b. Deferral of Work Registration and Work Search.

(1) The Department may elect to defer the work registration and work search requirements. A claimant placed in a deferred status is not required to actively seek work but must meet all other availability requirements of the act. Deferrals are generally limited to the following circumstances:

(a) Labor Disputes.

A claimant who is unemployed due to a labor dispute may be deferred while an eligibility determination under Subsection 35A-4-405(4) is pending. If benefits are allowed, the claimant must register for work immediately.

(b) Union Attachment.

A claimant who is a union member in good standing, is on the out-of-work list, or is otherwise eligible for a job referral by the union, and has earned at least half of his or her base period earnings through the union, may be eligible for a deferral. If a deferral is granted to a union member, it shall not be extended beyond the mid-point of the claim unless the claimant can demonstrate a reasonable expectation of obtaining employment through the union.

(c) Employer Attachment.

A claimant who has an attachment to a prior employer and a date of recall to full-time employment within ten weeks of filing or reopening a claim may have the work registration requirement deferred to the expected date of recall. The deferral should not extend longer than ten weeks.

(d) Three Week Deferral.

A claimant who accepts a definite offer of full-time work to begin within three weeks, shall be deferred for that period.

(e) Seasonal.

A claimant may be deferred when, due to seasonal factors, work is not available in the claimant's primary base period occupation and other suitable work is not available in the area.

(2) Deferrals cannot be granted if prohibited by state or federal law for certain benefit programs.

R994-403-109b. Profiled Claimants.

(1) The Department will identify individuals who are likely to exhaust unemployment benefits through a profiling system and require that they participate in reemployment services. These services may include job search workshops, job placement services, counseling, testing, and assessment.

(2) In order to avoid disqualification for failure to participate in reemployment services, the claimant must show good cause for nonparticipation. Good cause for nonparticipation is established if the claimant can show:

(a) completion of equivalent services within the 12 month period immediately preceding the date the claimant is scheduled for reemployment services; or

(b) that the failure to participate was reasonable or beyond the claimant's control.

(3) Failure to participate in reemployment services without good cause will result in a denial of benefits beginning with the week the claimant refuses or fails to attend scheduled services and continuing until the week the claimant contacts the Employment Center to arrange participation in the required reemployment service.

(4) Some reasons for good cause for nonparticipation may raise other eligibility issues.

R994-403-110c. Able and Available - General Definition.

(1) The primary obligation of the claimant is to become reemployed. A claimant may meet all of the other eligibility criteria but, if the claimant cannot demonstrate ability, availability, and an active good faith effort to obtain work, benefits cannot be allowed.

(2) A claimant must be attached to the labor force, which means the claimant can have no encumbrances to the immediate acceptance of full-time work. The claimant must:

(a) be actively engaged in a good faith effort to obtain employment; and

(b) have the necessary means to become employed including tools, transportation, licenses, and childcare if necessary.

(3) The continued unemployment must be due to the lack of suitable job opportunities.

(4) The only exception to the requirement that a claimant actively seek work is if the Department has approved schooling under Section 35A-4-403(2) and the claimant meets the requirements of R994-403-107b.

(5) The only exception to the requirements that the claimant be able to work and actively seeking full-time work are that the claimant meets the requirements of R994-403-111c(6).

R994-403-111c. Able.

(1) The claimant must have no physical or mental health limitation which would preclude immediate acceptance of full-time work. A recent history of employment is one indication of a claimant's ability to work. If there has been a change in the claimant's physical or mental capacity since his or her last employment, there is a presumption of inability to work which the claimant must overcome by competent evidence. The claimant must show that there is a reasonable likelihood that jobs exist which the claimant is capable of performing before unemployment insurance benefits can be allowed. Pregnancy is treated the same as other physical limitations.

(2) For purposes of determining weekly eligibility for benefits, it is presumed a claimant who is not able to work more than one-half the normal workweek will be considered not able to perform full-time work. The normal workweek means the normal workweek in the claimant's occupation. A claimant will be denied under this section for any week in which the claimant refuses suitable work due to an inability to work, regardless of the length of time the claimant is unable to work.

(a) Past Work History.

Benefits will not be denied solely on the basis of a physical or mental health limitation if the claimant earned base period wages while working with the limitation and is:

(i) willing to accept any work within his or her ability;

(ii) actively seeking work consistent with the limitation; and

(iii) otherwise eligible.

Under these circumstances, the unemployment is considered to be due to a lack of employment opportunities and not due to an inability to work.

(b) Medical Verification.

When an individual has a physical or mental health limitation, medical information from a competent health care provider is one form of evidence used to determine the claimant's ability to work. The provider's opinion is presumed to be an accurate reflection of the claimant's ability to work, however, the provider's opinion may be overcome by other competent evidence. The Department will determine if medical verification is required.

(3) Temporary Disability.

(a) Employer Attached.

A claimant is not eligible for benefits if the claimant is not able to work at his or her regular job due to a temporary disability and the employer has agreed to allow the claimant to return to the job when he or she is able to work. In this case, the claimant's unemployment is due to an inability to work rather than lack of available work. The claimant is not eligible for benefits even if there is other work the claimant is capable of performing with the disability. If a claimant is precluded from working due to Federal Aviation Administration regulations because of pregnancy, and the employer has agreed to allow the claimant to return to the job, the claimant is considered to be on a medical leave of absence and is not eligible for benefits.

(b) No Employer Attachment.

If the claimant has been separated from employment with no expectation of being allowed to return when he or she is again able to work, or the temporary disability occurred after becoming unemployed, benefits may be allowed even though the claimant cannot work in his or her regular occupation if the claimant can show there is work the claimant is capable of performing and for which the claimant reasonably could be hired. The claimant must also meet other eligibility requirements including making an active work search.

(4) Hospitalization.

A claimant is unable to work if hospitalized unless the hospitalization is on an out-patient basis or the claimant is in a rehabilitation center or care facility and there is independent verification that the claimant is not restricted from immediately working full-time. Immediately following hospitalization, a rebuttable presumption of physical inability continues to exist for the period of time needed for recuperation.

(5) Workers' Compensation.

(a) Compensation for Lost Wages.

A claimant is not eligible for unemployment benefits while receiving temporary total disability workers' compensation benefits.

(b) Subsequent Awards.

The Department may require that a claimant who is receiving permanent partial disability benefits from workers' compensation show that he or she is able and available for full-time work and can reasonably expect to obtain full-time work even with the disability.

(c) Workers' compensation disability payments are not reportable as wages.

(6) Physical or Mental Health Limitation.

(a) A claimant who is not able to work full-time due to a physical or mental health limitation, may be considered eligible under this rule if:

(i) the claimant's base period employment was limited to part-time because of the claimant's physical or mental health limitations;

(ii) the claimant's prior part-time work was substantial. Substantial is defined as at least 50 percent of the hours customarily worked in the claimant's occupation;

(iii) the claimant is able to work at least as many hours as he or she worked prior to becoming unemployed;

(iv) there is work available which the claimant is capable of performing; and

(v) the claimant is making an active work search.

(b) The Department may require that the claimant establish ability by competent evidence.

R994-403-112c. Available.

(1) General Requirement.

The claimant must be available for full-time work. Any restrictions on availability, such as lack of transportation, domestic problems, school attendance, military obligations, church or civic activities, whether self-imposed or beyond the control of the claimant, lessen the claimant's opportunities to obtain suitable full-time work.

(2) Activities Which Affect Availability.

It is not the intent of the act to subsidize activities which interfere with immediate reemployment. A claimant is not considered available for work if the claimant is involved in any activity which cannot be immediately abandoned or interrupted so that the claimant can seek and accept full-time work.

(a) Activities Which May Result in a Denial of Benefits.

For purposes of establishing weekly eligibility for benefits, a claimant who is engaged in an activity for more than half the normal workweek that would prevent the claimant from working, is presumed to be unavailable and therefore ineligible for benefits. The normal workweek means the normal workweek in the claimant's occupation. This presumption can be overcome by a showing that the activity did not preclude the immediate acceptance of full-time work, referrals to work, contacts from the Department, or an active search for work. When a claimant is away from his or her residence but has made arrangements to be contacted and can return quickly enough to respond to any opportunity for work, the presumption of unavailability may be overcome. The conclusion of unavailability can also be overcome in the following circumstances:

(i) Travel Which is Necessary to Seek Work.

(A) Benefits will not be denied if the claimant is required to travel to seek, apply for, or accept work within the United States or in a foreign country where the claimant has authorization to work and where there is a reciprocal agreement. The trip itself must be for the purpose of obtaining work. There is a rebuttable presumption that the claimant is not available for work when the trip is extended to accommodate the claimant's personal needs or interests, and the extension is for more than one-half of the workweek.

(B) Unemployment benefits cannot be paid to a claimant located in a foreign country unless the claimant has authorization to work there and there is a reciprocal agreement concerning the payment of unemployment benefits with that foreign country.

(C) Unemployment benefits are intended, in part, to stimulate the economy of Utah and the United States and thus are expected to be spent in this country. A claimant who travels to a foreign country must report to the Department that he or she is out of the country, even if it is for a temporary purpose and regardless of whether the claimant intends to return to the United States if work becomes available. Failure to inform the Department will result in a fraud overpayment for the weeks benefits were paid while the claimant was in a foreign country. The claimant may be eligible if the travel is to Canada but must notify the Department of that travel. Canada is the only country with which Utah has a reciprocal agreement. If the claimant travels to, but is not eligible to work in, Canada and fails to notify the Department of the travel, it will result in a fraud overpayment for the weeks benefits were paid while the claimant was in Canada.

(ii) Definite Offer of Work or Recall.

If the claimant has accepted a definite offer of full-time employment or has a date of recall to begin within three weeks, the claimant does not have to demonstrate further availability except as provided in subparagraphs (B) and (C) of this section

and is not required to seek other work. Because the statute requires that a claimant be able to work, if a claimant is unable to work for more than one-half of any week due to illness or hospitalization, benefits will be denied.

(iii) Jury Duty or Court Attendance.

Jury duty or court attendance is a public duty required by law and a claimant will not be denied benefits if he or she is unavailable because of a lawfully issued summons to appear as a witness or to serve on a jury unless the claimant:

(A) is a party to the action;

(B) had employment which he or she was unable to continue or accept because of the court service; or

(C) refused or delayed an offer of suitable employment because of the court service.

The time spent in court service is not a personal service performed under a contract of hire and therefore is not considered employment.

(b) Activities Which Will Result in a Denial of Benefits.

(i) Refusal of Work.

When a claimant refuses any suitable work, the claimant is considered unavailable. Even though the claimant had valid reasons for not accepting the work, benefits will not be allowed for the week or weeks in which the work was available. Benefits are also denied when a claimant fails to be available for job referrals or a call to return to work under reasonable conditions consistent with a previously established work relationship. This includes referral attempts from a temporary employment service, a school district for substitute teaching, or any other employer for which work is "on-call."

(ii) Failure to Perform All Work During the Week of Separation.

(A) Benefits will be denied for the week in which separation from employment occurs if the claimant's unemployment was caused because the claimant was not able or available to do his or her work. In this circumstance, there is a presumption of continued inability or unavailability and an indefinite disqualification will be assessed until there is proof of a change in the conditions or circumstances.

(B) If the claimant was absent from work during the last week of employment and the claimant was not paid for the day or days of absence, benefits will be denied for that week. The claimant will be denied benefits under this section regardless of the length of the absence.

(3) Hours of Availability.

(a) Full-Time.

Except as provided in R994-403-111c(5), in order to meet the availability requirement, a claimant must be ready and willing to immediately accept full-time work. Full-time work generally means 40 hours a week but may vary due to customary practices in an occupation. If the claimant was last employed less than full-time, there is a rebuttable presumption that the claimant continues to be available for only part-time work.

(b) Other Than Normal Work Hours.

If the claimant worked other than normal work hours and the work schedule was adjusted to accommodate the claimant, the claimant cannot continue to limit his or her hours of availability even if the claimant was working 40 hours or more. The claimant must be available for full-time work during normal work hours as is customary for the industry.

(4) Wage Restrictions.

(a) No claimant will be expected, as a condition of eligibility, to accept a wage that is less than the state or federal minimum wage, whichever is applicable, or a wage that is substantially less favorable to the claimant than prevailing wages for similar work in the locality. Benefits cannot be allowed if the claimant is restricting himself or herself to a wage that is not available.

(b) A claimant must be given a reasonable time to seek work that will preserve his or her earning potential. At the time of filing an initial claim, or at the time of reopening a claim following a period of employment, the claimant may restrict his or her wage requirement to the highest wage earned during or subsequent to the base period and prior to filing the claim or the highest wage available in the locality for the claimant's occupation, whichever is lower, but only if there is a reasonable expectation that work can be obtained at that wage.

(i) After a claimant has received1/3 of the maximum benefit amount (MBA) for his or her regular claim, the claimant must accept any wage that is equal to or greater than the lowest wage earned during the base period, as long as that wage is consistent with the prevailing wage standard.

(ii) After a claimant has received 2/3 of the MBA for his or her regular claim, the claimant must be willing to accept the prevailing wage in the locality for work in any base period occupation.

(c) Exception for Deferred Claimants.

The provisions of this section do not apply to those claimants who qualify for deferrals under Subsection 35A-4-403(1)(b) and R994-403-202 during the period of deferral.

(5) Type of Work.

(a) One of the purposes of the unemployment insurance program is to help a claimant preserve his or her highest skill by providing unemployment benefits so the claimant can find work similar to what the claimant had prior to becoming unemployed. A skill is defined as a marketable ability developed over an extended period of time by training or experience which could be lost if not used. It is not the intent of the program to subsidize individuals who are limiting their availability because of a desire to improve their employment status.

(i) At the time of filing an initial claim or reopening a claim following a period of employment, a claimant may restrict availability to the highest skilled employment performed during or subsequent to the base period provided the claimant has a reasonable expectation of obtaining that type of work. A claimant who is not willing to accept employment consistent with work performed during or subsequent to the base period must show a compelling reason for that restriction in order to be considered available for work.

(ii) After the claimant has received 1/3 of the MBA for his or her regular claim, the claimant must be willing to accept work in any of the occupations in which the claimant worked during the base period.

(iii) After the claimant has received 2/3 of the MBA for his or her regular claim, the claimant must be willing to accept any work that he or she can reasonably perform consistent with the claimant's past experience, training, and skills.

(b) Contract Obligation.

If a claimant is restricted due to a contractual obligation from competing with a former employer or accepting employment in the claimant's regular occupation, the claimant is not eligible for benefits unless the claimant can show that he or she:

(i) is actively seeking work outside the restrictions of the noncompete contract;

(ii) has the skills and/or training necessary to obtain that work; and

(iii) can reasonably expect to obtain that employment.

(6) Employer/Occupational Requirements.

If the claimant does not have the license or special equipment required for the type of work the claimant wants to obtain, the claimant cannot be considered available for work unless the claimant is actively seeking other types of work and has a reasonable expectation of obtaining that work.

(7) Temporary Availability.

When an individual is limited to temporary work because of anticipated military service, school attendance, travel, church service, relocation, a reasonable expectation of recall to a former employer for which the claimant is not in deferral status, or any

other anticipated restriction on the claimant's future availability, availability is only established if the claimant is willing to accept and is actively seeking temporary work. The claimant must also show there is a realistic expectation that there is temporary work in the claimant's occupation, otherwise the claimant may be required to accept temporary work in another occupation. Evidence of a genuine desire to obtain temporary work may be shown by registration with and willingness to accept work with temporary employment services.

(8) Distance to Work.

(a) Customary Commuting Patterns.

A claimant must show reasonable access to public or private transportation, and a willingness to commute within customary commuting patterns for the occupation and community.

(b) Removal to a Locality of Limited Work Opportunities.

A claimant who moves from an area where there are substantial work opportunities to an area of limited work opportunities must demonstrate that the new locale has work for which the claimant is qualified and which the claimant is willing to perform. If the work is so limited in the new locale that there is little expectation the claimant will become reemployed, the continued unemployment is the result of the move and not the failure of the labor market to provide employment opportunities. In that case, the claimant is considered to have removed himself or herself from the labor market and is no longer eligible for benefits.

(9) School.

(a) A claimant attending school who has not been granted Department approval for a deferral must still meet all requirements of being able and available for work and be actively seeking work. Areas that need to be examined when making an eligibility determination with respect to a student include reviewing a claimant's work history while attending school, coupled with his or her efforts to secure full-time work. If the hours of school attendance conflict with the claimant's established work schedule or with the customary work schedule for the occupation in which the claimant is seeking work, a rebuttable presumption is established that the claimant is not available for full-time work and benefits will generally be denied. An announced willingness on the part of a claimant to discontinue school attendance or change his or her school schedule, if necessary, to accept work must be weighed against the time already spent in school as well as the financial loss the claimant may incur if he or she were to withdraw.

(b) A presumption of unavailability may also be raised if a claimant moves, for the purpose of attending school, from an area with substantial labor market to a labor market with more limited opportunities. In order to overcome this presumption, the claimant must demonstrate there is full-time work available in the new area which the claimant could reasonably expect to obtain.

(10) Employment of Youth.

Title 34, Chapter 23 of the Utah Code imposes limitations on the number of hours youth under the age of 16 may work. The following limitations do not apply if the individual has received a high school diploma or is married. Claimants under the age of 16 who do not provide proof of meeting one of these exceptions are under the following limitations whether or not in student status because they have a legal obligation to attend school. Youth under the age of 16 may not work:

(a) during school hours except as authorized by the proper school authorities;

(b) before or after school in excess of 4 hours a day;

(c) before 5:00 a.m. or after 9:30 p.m. on days preceding school days;

(d) in excess of 8 hours in any 24-hour period; or

(e) more than 40 hours in any week.

(11) Domestic Obligations.

When a claimant has an obligation to care for children or other dependents, the claimant must show that arrangements for the care of those individuals have been made for all hours that are normally worked in the claimant's occupation and must show a good faith, active work search effort.

R994-403-113c. Work Search.

(1) General Requirements.

A claimant must make an active, good faith effort to secure employment each and every week for which benefits are claimed. Efforts to find work must be judged by the standards of the occupation and the community.

(2) Active.

An active effort to look for work is generally interpreted to mean that each week a claimant should contact a minimum of four employers not previously contacted unless the claimant is otherwise directed by the Department. Those contacts should be made with employers that hire people in the claimant's occupation or occupations for which the claimant has work experience or would otherwise be qualified and willing to accept employment. Failure of a claimant to make at least the minimum number of contacts creates a rebuttable presumption that the claimant is not making an active work search. The claimant may overcome this presumption by showing that he or she has pursued a job development plan likely to result in employment. A claimant's job development activities for a specific week should be considered in relation to the claimant's overall work search efforts and the length of the claimant's unemployment. Creating a job development plan and/or writing resumes may be reasonable and acceptable activities during the first few weeks of a claim, but may be insufficient after the claimant has been unemployed for several weeks.

(3) Good Faith.

Good faith efforts are defined as those methods which a reasonable person, anxious to return to work, would make if desirous of obtaining employment. A good faith effort is not necessarily established simply by making a specific number of contacts to satisfy the Department requirement.

(4) Union Attachment.

(a) Union attachment is sufficient to meet the requirements of an active work search if the claimant is eligible for a deferral as established under Subsection 35A-4-403(1)(b).

(b) If the claimant is not in deferred status because the claimant did not earn at least 50 percent of his or her base period wage credits in employment as a union member, or the deferral has ended, the claimant must meet the requirements of an active, good faith work search by contacting employers in addition to contacts with the union. This work search is required even though unions may have regulations and rules which penalize members for making independent contacts to try to find work or for accepting nonunion employment.

R994-403-114c. Claimant's Obligation to Prove Weekly Eligibility.

The claimant:

(1) has the burden of proving that he or she is able, available, and actively seeking full-time work:

(2) must report any information that might affect eligibility;

(3) must provide any information requested by the Department which is required to establish eligibility;

(4) must keep a detailed record of the employers contacted, as well as other activities that are likely to result in employment for each week benefits are claimed; and

(5) must immediately notify the Department if the claimant is incarcerated.

R994-403-115c. Period of Ineligibility.

(1) Eligibility for benefits is established on a weekly basis.

If the Department has determined that the claimant is not able or available for work, and it appears the circumstances will likely continue, an indefinite disqualification will be assessed, and the claimant must requalify by showing that he or she is able and available for work.

(2) If the Department has reason to believe a claimant has not made a good faith effort to seek work, or the Department is performing a routine audit of a claim, the Department can only require that the claimant provide proof of work search activities for the four weeks immediately preceding the Department's request. However, if the claimant admits he or she did not complete the work search activities required under this rule, the Department can disqualify a claimant for more than four weeks.

(3) The claimant will be disqualified for all weeks in which it is discovered that the claimant was not able or available to accept work without regard to the four-week limitation.

R994-403-116e. Eligibility Determinations: Obligation to Provide Information.

(1) The Department cannot make proper determinations regarding eligibility unless the claimant and the employer provide correct information in a timely manner. Claimants and employers therefore have a continuing obligation to provide any and all information and verification which may affect eligibility.

(2) Providing incomplete or incorrect information will be treated the same as a failure to provide information if the incorrect or insufficient information results in an improper decision with regard to the claimant's eligibility.

R994-403-117e. Claimant's Responsibility.

(1) The claimant must provide all of the following:

(a) his or her correct name, social security number, citizenship or alien status, address and date of birth;

(b) the correct business name and address for each base period employer and for each employer subsequent to the base period;

(c) information necessary to determine eligibility or continuing eligibility as requested on the initial claim form, or on any other Department form including work search information. This includes information requested through the use of an interactive voice response system or the Internet;

(d) the reasons for the job separation from base period and subsequent employers when filing a new claim, requalifying for a claim, or any time the claimant is separated from employment during the benefit year. The Department may require a complete statement of the circumstances precipitating the separation; and

(e) any other information requested by the Department. This includes requests for documentary evidence, written statements, or oral requests. Claimants are required to return telephone calls when requested to do so by Department employees.

(2) Claimants are also required to report, at the time and place designated, for an in-person interview with a Department representative if so requested.

(3) By filing a claim for benefits, the claimant has given consent to the employer to release to the Department all information necessary to determine eligibility even if the information is confidential.

R994-403-118e. Disqualification Periods if a Claimant Fails to Provide Information.

(1) A claimant is not eligible for benefits if the Department does not have sufficient information to determine eligibility. Except as provided in subsection (6) of this section, a claimant who fails to provide necessary information without good cause is disqualified from the receipt of unemployment benefits until the information is received by the Department.

(2) If insufficient or incorrect information is provided when the initial claim is filed, the disqualification will begin with the effective date of the claim.

(3) If a potentially disqualifying issue is identified as part of the weekly certification process and the claimant fails to provide the information requested by the Department, the disqualification will begin with the Sunday of the week for which eligibility could not be determined.

(4) If insufficient or incorrect information is provided as part of a review of payments already made, the disqualification will begin with the week in which the response to the Department's request for information is due.

(5) The disqualification will continue through the Saturday prior to the week in which the claimant provides the information.

(6) If the disqualification results from the claimant's failure to complete, sign, and return the Direct Deposit or Eppicard Authorization Form, the disqualification will be reversed once the completed and signed form is received by the Department. The claimant does not need to show good cause for his or her failure to provide the Direct Deposit or Eppicard Authorization Form in a timely manner.

R994-403-119e. Overpayments Resulting from a Failure to Provide Information.

(1) Any overpayment resulting from the claimant's failure to provide information, or based on incorrect information provided by the claimant, will be assessed as a fault overpayment in accordance with Subsection 35A-4-406(4) or as a fraud overpayment in accordance with Subsection 35A-4-405(5).

(2) Any overpayment resulting from the employer's failure to provide information will be assessed as a nonfault overpayment in accordance with Subsection 35A-4-406(5).

(3) If more than one party was at fault in the creation of an overpayment, the overpayment will be assessed as:

(a) a fraud or fault overpayment if the claimant was more at fault than the other parties; or

(b) a nonfault overpayment if the employer and/or the Department was more at fault, or if the parties were equally at fault.

R994-403-120e. Employer's Responsibility.

Employers must provide wage, employment, and separation information and complete all forms and reports as requested by the Department. The employer also must return telephone calls from Department employees in a timely manner and answer all questions regarding wages, employment, and separations.

R994-403-121e. Penalty for the Employer's Failure to Comply.

(1) A claimant has the right to have a claim for benefits resolved quickly and accurately. An employer's failure to provide information in a timely manner results in additional expense and unnecessary delay.

(2) If an employer fails to provide information in a timely manner without good cause, the ALJ will determine on appeal that the employer has relinquished its rights with regard to the affected claim and is no longer a party in interest. The employer's appeal will be dismissed and the employer is liable for benefits paid.

(3) The ALJ may, in his or her discretion, choose to exercise continuing jurisdiction with respect to the case and subpoena or call the employer and claimant as witnesses to determine the claimant's eligibility. If, after reaching the merits, the ALJ determines to reverse the initial decision and deny benefits, the employer is not eligible for relief of charges resulting from benefits overpaid to the claimant prior to the date of the ALJ's decision.

(4) In determining whether to exercise discretion and

reach the merits, the ALJ may take into consideration:

(a) the flagrancy of the refusal or failure to provide complete and accurate information. An employer's refusal to provide information at the time of the initial Department determination on the grounds that it wants to wait and present its case before an ALJ, for instance, will be subject to the most severe penalty;

(b) whether or not the employer has failed to provide complete and accurate information in the past or on more than one case; and

(c) whether the employer is represented by counsel or a professional representative. Counsel and professional representatives are responsible for knowing Department rules and are therefore held to a higher standard.

R994-403-122e. Good Cause for Failure to Comply.

If the employer or claimant has good cause for failing to provide the information in the time frame requested, no disqualification or penalty will be assessed. Good cause, as it applies to this section of the rule, may be established if the claimant or employer:

(1) made reasonable attempts to provide the information within the time frame requested, or

(2) was prevented from complying due to circumstances which were compelling or beyond their control.

R994-403-123. Obligation of Department Employees.

Employees of the Department are obligated, regardless of when the information is discovered, to bring to the attention of the proper Department representatives any information that may affect a claimant's eligibility for unemployment insurance benefits or information affecting the employer's contributions.

R994-403-201. Department Approval for School Attendance - General Definition.

(1) Unemployment insurance is not intended to subsidize schooling. However, it is recognized that training may be a practical way to reduce chronic and persistent unemployment due to a lack of work skills, job obsolescence or foreign competition. Even though the claimant is granted Department approval, the claimant must still be able to work. With Department approval, a claimant meets the availability requirement based on his or her school attendance and successful performance. With the exception of very short-term training, Department approval is intended for classroom training as opposed to on-the-job training. Department approval is to be used selectively and judiciously. It is not to be used as a substitute for selective placement, job development, on-the-job training, or other available programs.

(2) If a claimant is ineligible under 35A-4-403(1)(c) due to school attendance, Department approval will be considered.

(3) Department approval will be granted when required by state or federal law for specific training programs.

R994-403-202. Qualifying Elements for Approval of Training.

All of the following nine elements must be satisfied for a claimant to qualify for Department approval of training. Some of these elements will be waived or modified when required by state or federal law for specific training programs.

(1) The claimant's unemployment is chronic or persistent, or likely to be chronic or persistent, due to any one of the following three circumstances:

(a) A lack of basic work skills. A lack of basic work skills may not be established unless a claimant:

(i)(A) has a history of repeated unemployment attributable to lack of skills and has no recent history of employment earning a wage substantially above the federal minimum wage or

(B) qualifies for Department sponsored training because the claimant meets the eligibility requirements for public assistance;

(ii) has had no formal training in occupational skills;

(iii) does not have skills developed over an extended period of time by training or experience; and

(iv) does not have a marketable degree from an institution of higher learning; or

(b) a change in the marketability of the claimant's skills has resulted due to new technology, or major reductions within an industry; or

(c) inability to continue working in occupations using the claimant's skills due to a verifiable, permanent physical or emotional disability,

(2) a claimant must have a reasonable expectation for success as demonstrated by:

(a) an aptitude for and interest in the work the claimant is being trained to perform, or course of study the claimant is pursuing; and

(b) sufficient time and financial resources to complete the training.

(3) The training is provided by an institution approved by the Department.

(4) The training is not available except in school. For example, on-the-job training is not available to the claimant.

(5) The length of time required to complete the training should generally not extend beyond 18 months.

(6) The training should generally be vocationally oriented unless the claimant has no more than two terms, quarters, semesters, or similar periods of academic training necessary to obtain a degree.

(7) There is a reasonable expectation of employment following completion of the training. Reasonable expectation means the claimant will find a job using the skills and education acquired while in training pursuant to a fair and objective projection of job market conditions expected to exist at the time of completion of the training.

(8) A claimant did not leave work to attend school even if the employer required the training for advancement or as a condition of continuing employment.

(9) The schooling is full-time, as defined by the training facility.

R994-403-203. Extensions of Department Approval.

Initial approval shall be granted, for the school term beginning with the week in which the attendance began, or the effective date of the claim, whichever is later. The Department may extend the approval if the claimant establishes proof of:

(1) satisfactory attendance;

(2) passing grades;

(3) continuance of the same course of study and classes originally approved; and

(4) compliance with all other qualifying elements.

R994-403-204. Availability Requirements When Approval is Granted.

(1) If Department approval is granted, the claimant will be placed in deferred status once the training begins and will not be required to register for work or to seek and accept work. The deferral also applies to break periods between successive terms as long as the break period is four weeks or less. A claimant must make a work search prior to the onset of training, even if the claimant has been advised that the training has been approved. Benefits will not be denied when work is refused as satisfactory attendance and progress in school serves as a substitute for the availability requirements of the act.

(2) Absences from school will not necessarily result in a denial of benefits during those weeks the claimant can demonstrate he or she is making up any missed school work and is still making satisfactory progress in school. Satisfactory

progress is defined as passing all classes with a grade level sufficient to qualify for graduation, licensing, or certification, as appropriate.

(3) A disqualification will be effective with the week the claimant knew or should have known he or she was not going to receive a passing grade in any of his or her classes or was otherwise not making satisfactory progress in school. It is the claimant's responsibility to immediately report any information that may indicate a failure to maintain satisfactory progress.

(4) The claimant must attend school full-time as defined by the educational institution. If a claimant discontinues school attendance, drops or changes any classes before the end of the term, Department approval may be terminated immediately. However, discontinuing a class that does not reduce the school credits below full-time status will not result in the termination of Department approval. Department approval may be reinstated during any week a claimant demonstrates, through appropriate verification, the claimant is again attending class regularly and making satisfactory progress.

(5) Notwithstanding any other provisions of this section, if the claimant was absent from school for more than one-half of the workweek due to illness or hospitalization, the claimant is considered to be unable to work and unemployment benefits will be denied for that week. A claimant has the responsibility to report any sickness, injury, or other circumstances that prevented him or her from attending school.

(6) A claimant is ineligible for Department approval if the claimant is retaking a class that was originally taken while receiving benefits under Department approval. However, if Department approval was denied during the time the course was originally in progress, approval may be reinstated to cover that portion of the course not previously subsidized if the claimant can demonstrate satisfactory progress.

R994-403-205. Short-Term Training.

Department approval may be granted even though a claimant has marketable skills and does not meet the requirements for Department approval as defined in R994-403-202 if the entire course of training is no longer than eight weeks and will enhance the claimant's employment prospects. A claimant will not be granted a waiver for training that is longer than eight weeks even if the claimant needs only eight weeks or less to complete the training. This is intended as a one-time approval per benefit year and may not be extended beyond eight weeks.

R994-403-301. Requirements for Special Benefits.

Some benefit programs, including Extended Benefits, have different availability and work search requirements. The rule governing work search for Extended Benefits is R994-402. Other special programs are governed by the act or federal law.

KEY: filing deadlines, registration, student eligibility, unemployment compensation

Notice of Continuation June 26, 2007

R994. Workforce Services, Unemployment Insurance.
R994-508. Appeal Procedures.
R994-508-101. Right to Appeal an Initial Department Determination.

(1) An interested party has the right to appeal an initial Department determination on unemployment benefits or unemployment tax liability (contributions) by filing an appeal with the Appeals Unit or at any DWS Employment Center.

(2) The appeal must be in writing and either sent through the U.S. Mail, faxed, or delivered to the Appeals Unit, or submitted electronically through the Department's website.

(3) The appeal must be signed by an interested party unless it can be shown that the interested party has conveyed, in writing, the authority to another person or is physically or mentally incapable of acting on his or her own behalf. Providing the correct Personal Identification Number (PIN) when filing an appeal through the Department's website will be considered a signed appeal.

(4) The appeal should give the date of the determination being appealed, the social security number of any claimant involved, the employer number, a statement of the reason for the appeal, and any and all information which supports the appeal. The failure of an appellant to provide the information in this subsection will not preclude the acceptance of an appeal.

(5) The scope of the appeal is not limited to the issues stated in the appeal.

(6) If the claimant is receiving benefits at the time the appeal is filed, payments will continue pending the written decision of the ALJ even if the claimant is willing to waive payment. If benefits are denied as a result of the appeal, an overpayment will be established.

R994-508-102. Time Limits for Filing an Appeal from an Initial Department Determination.

(1) If the initial Department determination was delivered to the party, the time permitted for an appeal is ten calendar days. "Delivered to the party" means personally handed, faxed, or sent electronically to the party. If the determination was sent through the U.S. Mail, an additional five calendar days will be added to the time allowed for an appeal from the initial Department determination. Therefore, the amount of time permitted for filing an appeal from any initial Department determination sent through the U.S. Mail is fifteen calendar days unless otherwise specified on the decision.

(2) In computing the period of time allowed for filing an appeal, the date as it appears in the determination is not included. The last day of the appeal period is included in the computation unless it is a Saturday, Sunday, or legal holiday when Department offices are closed. If the last day permitted for filing an appeal falls on a Saturday, Sunday, or legal holiday, the time permitted for filing a timely appeal will be extended to the next day when Department offices are open.

(3) An appeal sent through the U.S. Mail is considered filed on the date shown by the postmark. If the postmark date cannot be established because it is illegible, erroneous, or omitted, the appeal will be considered filed on the date it was mailed if the sender can establish that date by competent evidence and can show that it was mailed prior to the date of actual receipt. If the date of mailing cannot be established by competent evidence, the appeal will be considered filed on the date it is actually received by the Appeals Unit as shown by the Appeals Unit's date stamp on the document or other credible evidence such as a written notation of the date of receipt. "Mailed" in this subsection means taken to the post office or placed in a receptacle which is designated for pick up by an employee who has the responsibility of delivering it to the post office.

R994-508-103. Untimely Appeal.

If it appears that an appeal was not filed in a timely manner, the appellant will be notified and given an opportunity to show that the appeal was timely or that it was delayed for good cause. If it is found that the appeal was not timely and the delay was without good cause, the ALJ or the Board will not have jurisdiction to consider the merits unless jurisdiction is established in accordance with provisions of Subsection 35A-4-406(2). Any decision with regard to jurisdictional issues will be issued in writing and delivered or mailed to all interested parties with a clear statement of the right of further appeal or judicial review.

R994-508-104. Good Cause for Not Filing Within Time Limitations.

A late appeal may be considered on its merits if it is determined that the appeal was delayed for good cause. Good cause is limited to circumstances where it is shown that:

(1) the appellant received the decision after the expiration of the time limit for filing the appeal, the appeal was filed within ten days of actual receipt of the decision and the delay was not the result of willful neglect;

(2) the delay in filing the appeal was due to circumstances beyond the appellant's control; or

(3) the appellant delayed filing the appeal for circumstances which were compelling and reasonable.

R994-508-105. Response to an Appeal.

A respondent is not required to file a written response to an appeal. A respondent may file a response if it does not delay the proceedings.

R994-508-106. Notice of the Hearing.

(1) All interested parties will be notified by mail, at least seven days prior to the hearing, of:

(a) the time and place of the hearing;
(b) the right to be represented at the hearing;
(c) the legal issues to be considered at the hearing;
(d) the procedure for submitting written documents;
(e) the consequences of not participating;
(f) the procedures and limitations for requesting a continuance or rescheduling; and
(g) the procedure for requesting an interpreter for the hearing, if necessary.

(2) When a new issue arises during the hearing, advance written notice may be waived by the parties after a full explanation by the ALJ of the issues and potential consequences.

(3) It is the responsibility of a party to notify and make arrangements for the participation of the party's representative and/or witnesses, if any.

(4) If a party has designated a person or professional organization as its agent, notice will be sent to the agent which will satisfy the requirement to give notice to the party.

R994-508-107. Department to Provide Documents.

The Appeals Unit will obtain the information which the Department used to make its initial determination and the reasoning upon which that decision was based and will send all of the Department's relevant documentary information to the parties with the notice of hearing.

R994-508-108. Discovery.

(1) Discovery is a legal process to obtain information which is necessary to prepare for a hearing. In most unemployment insurance hearings, informal methods of discovery are sufficient. Informal discovery is the voluntary exchange of information regarding evidence to be presented at the hearing, and witnesses who will testify at the hearing. Usually a telephone call to the other party requesting the needed

information is adequate. Parties are encouraged to cooperate in providing information. If this information is not provided voluntarily, the party requesting the information may request that the ALJ compel a party to produce the information through a verbal or written order or issuance of a subpoena. In considering the requests, the ALJ will balance the need for the information with the burden the requests place upon the opposing party and the need to promptly decide the appeal.

(2) The use of formal discovery procedures in unemployment insurance appeals proceedings are rarely necessary and tend to increase costs while delaying decisions. Formal discovery may be allowed for unemployment insurance hearings only if so directed by the ALJ and when each of the following elements is present:

(a) informal discovery is inadequate to obtain the information required;

(b) there is no other available alternative that would be less costly or less intimidating;

(c) it is not unduly burdensome;

(d) it is necessary for the parties to properly prepare for the hearing; and

(e) it does not cause unreasonable delays.

(3) Formal discovery includes requests for admissions, interrogatories, and other methods of discovery as provided by the Utah Rules of Civil Procedure.

R994-508-109. Hearing Procedure.

(1) All hearings will be conducted before an ALJ in such manner as to provide due process and protect the rights of the parties.

(2) The hearing will be recorded.

(3) The ALJ will regulate the course of the hearing to obtain full disclosure of relevant facts and to afford the parties a reasonable opportunity to present their positions.

(4) The decision of the ALJ will be based solely on the testimony and evidence presented at the hearing.

(5) All testimony of the parties and witnesses will be given under oath or affirmation.

(6) All parties will be given the opportunity to provide testimony, present relevant evidence which has probative value, cross-examine any other party and/or other party's witnesses, examine or be provided with a copy of all exhibits, respond, argue, submit rebuttal evidence and/or provide statements orally or in writing, and/or comment on the issues.

(7) The evidentiary standard for ALJ decisions, except in cases of fraud, is a preponderance of the evidence. Preponderance means evidence which is of greater weight or more convincing than the evidence which is offered in opposition to it; that is, evidence which as a whole shows that the fact sought to be proved is more probable than not. The evidentiary standard for determining claimant fraud is clear and convincing evidence. Clear and convincing is a higher standard than preponderance of the evidence and means that the allegations of fraud are highly probable.

(8) The ALJ will direct the order of testimony and rule on the admissibility of evidence. The ALJ may, on the ALJ's own motion or the motion of a party, exclude evidence that is irrelevant, immaterial, or unduly repetitious.

(9) Oral or written evidence of any nature, whether or not conforming to the rules of evidence, may be accepted and will be given its proper weight. A party has the responsibility to present all relevant evidence in its possession. When a party is in possession of evidence but fails to introduce the evidence, an inference may be drawn that the evidence does not support the party's position.

(10) Official Department records, including reports submitted in connection with the administration of the Employment Security Act, may be considered at any time in the appeals process including after the hearing.

(11) Parties may introduce relevant documents into evidence. Parties must mail, fax, or deliver copies of those documents to the ALJ assigned to hear the case and all other interested parties so that the documents are received three days prior to the hearing. Failure to prefile documents may result in a delay of the proceedings. If a party has good cause for not submitting the documents three days prior to the hearing or if a party does not receive the documents sent by the Appeals Unit or another party prior to the hearing, the documents will be admitted after provisions are made to insure due process is satisfied. At his or her discretion, the ALJ can either:

(a) reschedule the hearing to another time;

(b) allow the parties time to review the documents at an in-person hearing;

(c) request that the documents be faxed during the hearing, if possible, or read the material into the record in case of telephone hearing; or

(d) leave the record of the hearing open, send the documents to the party or parties who did not receive them, and give the party or parties an opportunity to submit additional evidence after they are received and reviewed.

(12) The ALJ may, on his or her own motion, take additional evidence as is deemed necessary.

(13) With the consent of the ALJ, the parties to an appeal may stipulate to the facts involved. The ALJ may decide the appeal on the basis of those facts, or may set the matter for hearing and take further evidence as deemed necessary to decide the appeal.

(14) The ALJ may require portions of the testimony be transcribed as necessary for rendering a decision.

(15) All initial determinations made by the Department are exempt from the provisions of the Utah Administrative Procedures Act (UAPA). Appeals from initial determinations will be conducted as formal adjudicative proceedings under UAPA.

R994-508-110. Telephone Hearings.

(1) Hearings are scheduled as telephonic hearings. Every party wishing to participate in the telephone hearing must call the Appeals Unit before the hearing and provide a telephone number where the party can be reached at the time of the hearing. If the party that filed the appeal fails to call in advance as required by the notice of hearing, the appeal will be dismissed and an order of default will be issued.

(2) If a party requires an in-person hearing, the party must contact an ALJ and request that the hearing be scheduled as an in-person hearing. The request should be made sufficiently in advance of the hearing so that all other parties may be given notice of the change in hearing type and the opportunity to appear in person also. Requests will only be granted if the party can show that an in-person hearing is necessary to accommodate a special need or if the ALJ deems an in-person hearing is necessary to ensure an orderly and fair hearing which meets due process requirements. If the ALJ grants the request, all parties will be informed that the hearing will be conducted in person. Even if the hearing is scheduled as an in-person hearing, a party may elect to participate by telephone. In-person hearings are held in the office of the Appeals Unit unless the ALJ determines that another location is more appropriate. The Department is not responsible for any travel costs incurred by attending an in-person hearing.

(3) The Appeals Unit will permit collect calls from parties and their witnesses participating in telephone hearings; however, professional representatives not at the physical location of their client must pay their own telephone charges.

R994-508-111. Evidence, Including Hearsay Evidence.

(1) The failure of one party to provide information either to the Department initially or at the appeals hearing severely

limits the facts available upon which to base a good decision. Therefore, it is necessary for all parties to actively participate in the hearing by providing accurate and complete information in a timely manner to assure the protection of the interests of each party and preserve the integrity of the unemployment insurance system.

(2) Hearsay, which is information provided by a source whose credibility cannot be tested through cross-examination, has inherent infirmities which make it unreliable.

(3) Evidence will not be excluded solely because it is hearsay. Hearsay, including information provided to the Department through telephone conversations and written statements will be considered, but greater weight will be given to credible sworn testimony from a party or a witness with personal knowledge of the facts.

(4) Findings of fact cannot be based exclusively on hearsay evidence unless that evidence is admissible under the Utah Rules of Evidence. All findings must be supported by a residuum of legal evidence competent in a court of law.

R994-508-112. Procedure For Use of an Interpreter at the Hearing.

(1) If a party notifies the Appeals Unit that an interpreter is needed, the Unit will arrange for an interpreter at no cost to the party.

(2) The ALJ must be assured that the interpreter understands the English language and understands the language of the person for whom the interpreter will interpret.

(3) The ALJ will instruct the interpreter to interpret, word for word, and not summarize, add, change, or delete any of the testimony or questions.

(4) The interpreter will be sworn to truthfully and accurately translate all statements made, all questions asked, and all answers given.

R994-508-113. Department a Party to Proceedings.

As a party to the hearing, the Department or its representatives have the same rights and responsibilities as other interested parties to present evidence, bring witnesses, cross-examine witnesses, give rebuttal evidence, and appeal decisions. The ALJ cannot act as the agent for the Department and therefore is limited to including in the record only that relevant evidence which is in the Department files, including electronically kept records or records submitted by Department representatives. The ALJ will, on his or her own motion, call witnesses for the Department when the testimony is necessary and the need for such witnesses or evidence could not have been reasonably anticipated by the Department prior to the hearing. If the witness is not available, the ALJ will, on his or her own motion, continue the hearing until the witness is available.

R994-508-114. Ex Parte Communications.

Parties are not permitted to discuss the merits or facts of any pending case with the ALJ assigned to that case or with a member of the Board prior to the issuance of the decision, unless all other parties to the case have been given notice and opportunity to be present. Any ex parte discussions between a party and the ALJ or a Board member will be reported to the parties at the time of the hearing and made a part of the record. Discussions with Department employees who are not designated to represent the Department on the issue and are not expected to participate in the hearing of the case are not ex parte communications and do not need to be made a part of the record.

R994-508-115. Requests for Removal of an ALJ from a Case.

A party may request that an ALJ be removed from a case on the basis of partiality, interest, or prejudice. The request for removal must be made to the ALJ assigned to hear the case. The request must be made prior to the hearing unless the reason for the request was not, or could not have been known prior to the hearing. The request must state specific facts which are alleged to establish cause for removal. If the ALJ agrees to the removal, the case will be assigned to a different ALJ. If the ALJ finds no legitimate grounds for the removal, the request will be denied and the ALJ will explain the reasons for the denial during the hearing. Appeals pertaining to the partiality, interest, or prejudice of the ALJ may be filed consistent with the time limitations for appealing any other decision.

R994-508-116. Rescheduling or Continuance of Hearing.

(1) The ALJ may adjourn, reschedule, continue, or reopen a hearing on the ALJ's own motion or on the motion of a party.

(2) If a party knows in advance of the hearing that they will be unable to proceed with or participate in the hearing on the date or time scheduled, the party must request that the hearing be rescheduled or continued to another day or time.

(a) The request must be received prior to the hearing.

(b) The request must be made orally or in writing to the ALJ who is scheduled to hear the case. If the request is not received prior to the hearing, the party must show cause for failing to make a timely request.

(c) The party making the request must provide evidence of cause for the request.

(3) Unless compelling reasons exist, a party will not normally be granted more than one request for a continuance.

R994-508-117. Failure to Participate in the Hearing and Reopening the Hearing After the Hearing Has Been Concluded.

(1) If a party fails to appear for or participate in the hearing, either personally or through a representative, the ALJ may take evidence from participating parties and will issue a decision based on the best available evidence.

(2) Any party failing to participate, personally or through a representative, may request that the hearing be reopened.

(3) The request must be in writing, must set forth the reason for the request, and must be mailed, faxed, or delivered to the Appeals Unit within ten days of the issuance of the decision issued under Subsection (1). Intermediate Saturdays, Sundays and legal holidays are excluded from the computation of the ten days in accordance with Rule 6 of the Utah Rules of Civil Procedure. If the request is made after the expiration of the ten-day time limit, but within 30 days, the party requesting reopening must show cause for not making the request within ten days. If no decision has yet been issued, the request should be made without unnecessary delay. If the request is received more than 30 days after the decision is issued, the Department will have lost jurisdiction and the party requesting reopening must show good cause for not making a timely request.

(4) If a request to reopen is not granted, the ALJ will issue a decision denying the request. A party may appeal a denial of the request to reopen to the Board within 30 days of the date of issuance of the decision. The appeal must be in writing and set forth the reason or reasons for the appeal. The appeal can only contest the denial of the request to set aside the default and not the underlying merits of the case except as provided in R994-508-118(2)(f).

(5) The ALJ may reopen a hearing on his or her own motion if it appears necessary to take continuing jurisdiction or if the failure to reopen would be an affront to fairness.

(6) If the request to reopen is made more than 30 days after the issuance of the ALJ's decision, the ALJ may consider the request or refer it to the Board to be treated as an appeal to the Board.

R994-508-118. What Constitutes Grounds to Reopen a

Hearing.

(1) The request to reopen will be granted if the party was prevented from appearing at the hearing due to circumstances beyond the party's control.

(2) The request may be granted upon such terms as are just for any of the following reasons: mistake, inadvertence, surprise, excusable neglect, or any other reason justifying relief from the operation of the decision. The determination of what sorts of neglect will be considered excusable is an equitable one, taking into account all of the relevant circumstances including:

(a) the danger that the party not requesting reopening will be harmed by reopening;

(b) the length of the delay caused by the party's failure to participate including the length of time to request reopening;

(c) the reason for the request including whether it was within the reasonable control of the party requesting reopening;

(d) whether the party requesting reopening acted in good faith;

(e) whether the party was represented at the time of the hearing. Attorneys and professional representatives are expected to have greater knowledge of Department procedures and rules and are therefore held to a higher standard; and

(f) whether based on the evidence of record and the parties' arguments or statements, taking additional evidence might affect the outcome of the case.

(3) Requests to reopen are remedial in nature and thus must be liberally construed in favor of providing parties with an opportunity to be heard and present their case. Any doubt must be resolved in favor of granting reopening.

(4) Excusable neglect is not limited to cases where the failure to act was due to circumstances beyond the party's control.

(5) The ALJ has the discretion to schedule a hearing to determine if a party requesting reopening satisfied the requirements of this rule or may, after giving the other parties an opportunity to respond to the request, grant or deny the request on the basis of the record in the case.

R994-508-119. Withdrawal of Appeal.

A party who has filed an appeal with the Appeals Unit may request that the appeal be withdrawn. The request must explain the reasons for the withdrawal and be made to the ALJ assigned to hear the case, or the supervising ALJ if no ALJ has yet been assigned. The ALJ may deny the request if the withdrawal of the appeal would jeopardize the due process rights of any party. If the ALJ grants the request, the ALJ will issue a decision dismissing the appeal and the initial Department determination will remain in effect. The decision will inform the parties of the right to reinstate the appeal and the procedure for reinstating the appeal. A request to reinstate an appeal must be made within ten calendar days of the decision dismissing the appeal, must be in writing, and must show cause for the request. A request to reinstate made more than ten days after the dismissal will be treated as a late appeal.

R994-508-120. Prompt Notification of Decision.

Any decision by an ALJ or the Board which affects the rights of any party with regard to benefits, tax liability, or jurisdictional issues will be mailed to the last known address of the parties or delivered in person. Each decision issued will be in writing with a complete statement of the findings of fact, reasoning and conclusions of law, and will include or be accompanied by a notice specifying the further appeal rights of the parties. The notice of appeal rights shall state clearly the place and manner for filing an appeal from the decision and the period within which a timely appeal may be filed.

R994-508-122. Finality of Decision.

The ALJ's decision is binding on all parties and is the final decision of the Department unless appealed within 30 days of date the decision was issued.

R994-508-201. Attorney Fees.

(1) An attorney or other authorized representative may not charge or receive a fee for representing a claimant in an action before the Department without prior approval by an ALJ or the Board. The Department is not responsible for the payment of the fee, only the regulation and approval of the fee. The Department does not regulate fees charged to employers.

(2) Fees will not be approved in excess of 25 percent of the claimant's maximum potential regular benefit entitlement unless such a limitation would preclude the claimant from pursuing an appeal to the Court of Appeals and/or the Supreme Court or would deprive the client of the right to representation.

R994-508-202. Petition for Approval of Fee.

(1) If a fee is to be charged, a written petition for approval must be submitted by the claimant's representative to the ALJ before whom the representative appeared, or to the supervising ALJ if no hearing was scheduled. An approval form can be obtained through the Appeals Unit. Prior to approving the fee, a copy of the petition will be sent to the claimant and the claimant will be allowed ten days from the date of mailing to object to the fee. At the discretion of the ALJ, the fee may be approved as requested, adjusted to a lower amount, or disallowed in its entirety.

(2) If the case is appealed to the Board level, the claimant's representative must file a new petition with the Board if additional fees are requested.

R994-508-203. Criteria for Evaluation of Fee Petition.

The appropriateness of the fee will be determined using the following criteria:

(1) the complexity of the issues involved;

(2) the amount of time actually spent in;

(a) preparation of the case;

(b) attending the hearing;

(c) preparation of a brief, if required. Unless an appeal is taken to the Court of Appeals, fees charged for preparation of briefs or memoranda will not ordinarily be approved unless the ALJ requested or preapproved the filing of the brief or memoranda; and

(d) further appeal to the Board, the Court of Appeals, and/or the Supreme Court.

(3) The quality of service rendered including:

(a) preparedness of the representative;

(b) organization and presentation of the case;

(c) avoidance of undue delays. An attorney or representative should make every effort to go forward with the hearing when it is originally scheduled to avoid leaving the claimant without income or an unnecessary overpayment; and,

(d) the necessity of representation. If the ALJ or the Board determines that the claimant was not in need of representation because of the simplicity of the case or the lack of preparation on the part of the representative, only a minimal fee may be approved or, in unusual circumstances, a fee may be disallowed.

(4) The prevailing fee in the community. The prevailing fee is the rate charged by peers for the same type of service. In determining the prevailing fee for the service rendered, the Department may consider information obtained from the Utah State Bar Association, Lawyer's Referral Service, or other similar organizations as well as similar cases before the Appeals Unit.

R994-508-204. Appeal of Attorney's Fee.

The claimant or the authorized representative may appeal the fee award to the Board within 30 days of the date of issuance of the ALJ's decision. The appeal must be in writing and set

forth the reason or reasons for the appeal.

R994-508-301. Appeal From a Decision of an ALJ.

If the ALJ's decision did not affirm the initial Department determination, the Board will accept a timely appeal from that decision if filed by an interested party. If the decision of the ALJ affirmed the initial Department determination, the Board has the discretion to refuse to accept the appeal or request a review of the record by an individual designated by the Board. If the Board refuses to accept the appeal or requests a review of the record as provided in statute, the Board will issue a written decision declining the appeal and containing appeal rights.

R994-508-302. Time Limit for Filing an Appeal to the Board.

(1) The appeal from a decision of an ALJ must be filed within 30 calendar days from the date the decision was issued by the ALJ. This time limit applies regardless of whether the decision of the ALJ was sent through the U.S. Mail or personally delivered to the party. "Delivered to the party" means personally handed, faxed, or sent electronically to the party. No additional time for mailing is allowed.

(2) In computing the period of time allowed for filing a timely appeal, the date as it appears in the ALJ's decision is not included. The last day of the appeal period is included in the computation unless it is a Saturday, Sunday, or legal holiday when the offices of the Department are closed. If the last day permitted for filing an appeal falls on a Saturday, Sunday, or legal holiday, the time permitted for filing a timely appeal will be extended to the next day when the Department offices are open.

(3) The date of receipt of an appeal to the Board is the date the appeal is actually received by the Board, as shown by the Department's date stamp on the document or other credible evidence such as a written or electronic notation of the date of receipt, and not the post mark date from the post office. If the appeal is faxed to the Board, the date of receipt is the date recorded on the fax.

(4) Appeals to the Board which appear to be untimely will be handled in the same way as untimely appeals to the ALJ in rules R994-508-103 and R994-508-104.

R994-508-303. Procedure for Filing an Appeal to the Board.

(1) An appeal to the Board from a decision of an ALJ must be in writing and include:

(a) the name and signature of the party filing the appeal. Accessing the Department's website for the purpose of filing an appeal and providing a correct PIN will be considered a signed appeal;

(b) the name and social security number of the claimant in cases involving claims for unemployment benefits;

(c) the grounds for appeal; and

(d) the date when the appeal was mailed or sent to the Board.

(2) The appeal must be mailed, faxed, delivered to, or filed electronically with the Board.

(3) An appeal which does not state adequate grounds, or specify alleged errors in the decision of the ALJ, may be summarily dismissed.

R994-508-304. Response to an Appeal to the Board.

Interested parties will receive notice that an appeal has been filed and a copy of the appeal and will be given 15 days from the date the appeal was mailed to the party to file a response. Parties are not required to file a response. A party filing a response should mail a copy to all other parties and the Board.

R994-508-305. Decisions of the Board.

(1) The Board has the discretion to consider and render a decision on any issue in the case even if it was not presented at the hearing or raised by the parties on appeal.

(2) Absent a showing of unusual or extraordinary circumstances, the Board will not consider new evidence on appeal if the evidence was reasonably available and accessible at the time of the hearing before the ALJ.

(3) The Board has the authority to request additional information or evidence, if necessary.

(4) The Board my remand the case to the Department or the ALJ when appropriate.

(5) A copy of the decision of the Board, including an explanation of the right to judicial review, will be delivered or mailed to the interested parties.

R994-508-307. Withdrawal of Appeal to the Board.

A party who has filed an appeal from a decision of an ALJ may request that the appeal be withdrawn. The request must explain the reasons for the withdrawal by making a written statement to the Board explaining the reasons for the withdrawal. The Board may deny such a request if the withdrawal of the appeal jeopardizes the due process rights of any party. If the Board grants the request, a decision dismissing the appeal will be issued and the underlying decision will remain in effect. The decision will inform the party of the right to reinstate the appeal and the procedure for reinstating the appeal. A request to reinstate an appeal under this subsection must be made within 30 days of the decision dismissing the appeal, must be in writing, and must show cause for the request. A request to reinstate made more than ten days after the dismissal will be treated as a late appeal.

R994-508-401. Jurisdiction and Reconsideration of Decisions.

(1) An initial Department determination or a decision of an ALJ or the Board is not final until the time permitted for the filing of an appeal has elapsed. There are no limitations on the review of decisions until the appeal time has elapsed.

(2) After a determination or decision has become final, the Department may, on its own initiative or upon the request of any interested party, review a determination or decision and issue a new decision or determination, if appropriate, if there has been a change of conditions or a mistake as to facts. The reconsideration must be made at, or with the approval of, the level where the last decision on the case was made or is currently pending.

(a) A change in conditions may include a change in the law which would make reconsideration necessary in fairness to the parties who were adversely affected by the law change. A change in conditions may also include an unforeseeable change in the personal circumstances of the claimant or employer which would have made it reasonable not to file a timely appeal.

(b) A mistake as to facts is limited to material information which was the basis for the decision. A mistake as to facts may include information which is misunderstood or misinterpreted, but does not include an error in the application of the act or the rules provided the decision is made under the correct section of the act. A mistake as to facts can only be found if it was inadvertent. If the party alleging the mistake intentionally provided the wrong information or intentionally withheld information, the Department will not exercise jurisdiction under this paragraph.

(3) The Department is not required to take jurisdiction in all cases where there is a change in conditions or a mistake as to facts. The Department will weigh the administrative burden of making a redetermination against the requirements of fairness and the opportunities of the parties affected to file an appeal. The Department may decline to take jurisdiction if the redetermination would have little or no effect.

(4) Any time a decision or determination is reconsidered, all interested parties will be notified of the new information and provided with an opportunity to participate in the hearing, if any, held in conjunction with the review. All interested parties will receive notification of the redetermination and be given the right to appeal.

(5) A review cannot be made after one year from the date of the original determination except in cases of fraud or claimant fault. In cases of fault or fraud, the Department has continuing jurisdiction as to overpayments. In cases of fraud, the Department only has jurisdiction to assess the penalty provided in Utah Code Subsection 35A-4-405(5) for a period of one year after the discovery of the fraud.
