1. This firm is the owner or operator of the following facilities for which financial assurance for closure or post-closure care is demonstrated through the financial test specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference. The current closure and/or post-closure cost estimates covered by the test are shown for each facility: ____.

2. This firm guarantees, through the guarantee specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference, the closure or post-closure care of the following facilities owned or operated by the guaranteed party. The current cost estimates for the closure or post-closure care so guaranteed are shown for each facility: ____. The firm identified above is (insert one or more: (1) The direct or higher-tier parent corporation of the owner or operator; (2) owned by the same parent corporation as the parent corporation of the owner or operator, and receiving the following value in consideration of this guarantee ____; or (3) engaged in the following substantial business relationship with the owner or operator ____, and receiving the following value in consideration of this guarantee ____). (Attach a written description of the business relationship or a copy of the contract establishing such relationship to this letter).

3. In other jurisdictions, and states where the Director is not authorized to administer the financial requirements of R315-264-140 through 151 or 40 CFR 265.140 through 148, which are adopted by reference, this firm, as owner or operator or guarantor, is demonstrating financial assurance for the closure or post-closure care of the following facilities through the use of a test equivalent or substantially equivalent to the financial test specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference. The current closure and/or post-closure cost estimates covered by such a test are shown for each facility: ____.

4. This firm is the owner or operator of the following hazardous waste management facilities for which financial assurance for closure or, if a disposal facility, post-closure care, is not demonstrated either to EPA or a State through the financial test or any other financial assurance mechanism specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference, or equivalent or substantially equivalent State mechanisms. The current closure and/or post-closure cost estimates not covered by such financial assurance are shown for each facility: ____.

5. This firm is the owner or operator of the following UIC facilities for which financial assurance for plugging and abandonment is required under 40 CFR 144. The current closure cost estimates as required by 40 CFR 144.62 are shown for each facility: ____.

This firm (insert "is required" or "is not required") to file a Form 10K with the Securities and Exchange Commission (SEC) for the latest fiscal year.

The fiscal year of this firm ends on (month, day). The figures for the following items marked with an asterisk are derived from this firm's independently audited, year-end financial statements for the latest completed fiscal year, ended (date).

(Fill in Alternative I if the criteria of Subsection R315-264-143(f)(1)(i) or Subsection R315-264-145(f)(1)(i), or 40 CFR 265.143(e)(1)(i) or 145(e)(1)(i), which are adopted by reference, are used. Fill in Alternative II if the criteria of Subsection R315-264-143(f)(1)(ii) or 40 CFR 265.143(e)(1)(ii) or 145(e)(1)(ii) or 145(f)(1)(ii), which are adopted by reference, are used.)

Alternative I

1. Sum of current closure and post-closure cost estimate (total of all cost estimates shown in the five paragraphs above) $____

*2. Total liabilities (if any portion of the closure or post-closure cost estimates is included in total liabilities, you may deduct the amount of that portion from this line and add that amount to lines 3 and 4)$____

*3. Tangible net worth $____

*4. Net worth $____

*5. Current assets $____

*6. Current liabilities $____

7. Net working capital (line 5 minus line 6) $____

*8. The sum of net income plus depreciation, depletion, and amortization $____

*9. Total assets in U.S. (required only if less than 90% of firm's assets are located in the U.S.) $____

10. Is line 3 at least $10 million? (Yes/No) ____

11. Is line 3 at least 6 times line 1? (Yes/No) ____

12. Is line 7 at least 6 times line 1? (Yes/No) ____

*13. Are at least 90% of firm's assets located in the U.S.? If not, complete line 14 (Yes/No)____

14. Is line 9 at least 6 times line 1? (Yes/No) ____

15. Is line 2 divided by line 4 less than 2.0? (Yes/No) ____

16. Is line 8 divided by line 2 greater than 0.1? (Yes/No) ____

17. Is line 5 divided by line 6 greater than 1.5? (Yes/No) ____

Alternative II

1. Sum of current closure and post-closure cost estimates (total of all cost estimates shown in the five paragraphs above) $____

2. Current bond rating of most recent issuance of this firm and name of rating service ____

3. Date of issuance of bond ____

4. Date of maturity of bond ____

*5. Tangible net worth (if any portion of the closure and

post-closure cost estimates is included in "total liabilities" on your firm's financial statements, you may add the amount of that portion to this line) $____

*6. Total assets in U.S. (required only if less than 90% of firm's assets are located in the U.S.) $____

7. Is line 5 at least $10 million ? (Yes/No) ____

8. Is line 5 at least 6 times line 1? (Yes/No) ____

*9. Are at least 90% of firm's assets located in the U.S.? If not, complete line 10 (Yes/No) ____

10. Is line 6 at least 6 times line 1? (Yes/No) ____

I hereby certify that the wording of this letter is identical to the wording specified in Subsection R315-264-151(f) as such regulations were constituted on the date shown immediately below.

(g) A letter from the chief financial officer, as specified in Subsection R315-264-147(f) or 40 CFR 265.147(f), which is adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted.

Letter From Chief Financial Officer

Director, Utah Division of Waste Management and Radiation Control.

195 North 1950 West

P.O. Box 144880

Salt Lake City, UT 84114-4880

I am the chief financial officer of (firm's name and address). This letter is in support of the use of the financial test to demonstrate financial responsibility for liability coverage (insert "and closure and/or post-closure care" if applicable) as specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference.

(Fill out the following paragraphs regarding facilities and liability coverage. If there are no facilities that belong in a particular paragraph, write "None" in the space indicated. For each facility, include its EPA Identification Number, name, and address).

The firm identified above is the owner or operator of the following facilities for which liability coverage for (insert "sudden" or "nonsudden" or "both sudden and nonsudden") accidental occurrences is being demonstrated through the financial test specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference:____

The firm identified above guarantees, through the guarantee specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference, liability coverage for (insert "sudden" or "nonsudden" or "both sudden and nonsudden") accidental occurrences at the following facilities owned or operated by the following: ____. The firm identified above is (insert one or more: (1) The direct or higher-tier parent corporation of the owner or operator; (2) owned by the same parent corporation as the parent corporation of the owner or operator, and receiving the following value in consideration of this guarantee ____; or (3) engaged in the following substantial business relationship with the owner or operator ____, and receiving the following value in consideration of this guarantee ____). (Attach a written description of the business relationship or a copy of the contract establishing such relationship to this letter.)

(If you are using the financial test to demonstrate coverage of both liability and closure and post-closure care, fill in the following five paragraphs regarding facilities and associated closure and post-closure cost estimates. If there are no facilities that belong in a particular paragraph, write "None" in the space indicated. For each facility, include its EPA identification number, name, address, and current closure and/or post-closure cost estimates. Identify each cost estimate as to whether it is for closure or post-closure care.)

1. The firm identified above owns or operates the following facilities for which financial assurance for closure or post-closure care or liability coverage is demonstrated through the financial test specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference. The current closure and/or post-closure cost estimate covered by the test are shown for each facility: ____.

2. The firm identified above guarantees, through the guarantee specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference, the closure and post-closure care or liability coverage of the following facilities owned or operated by the guaranteed party. The current cost estimates for closure or post-closure care so guaranteed are shown for each facility: ____.

3. In other jurisdictions, and states where the Director is not authorized to administer the financial requirements of R315-264-140 through 151 or 40 CFR 265.140 through 148, which are adopted by reference, this firm is demonstrating financial assurance for the closure or post-closure care of the following facilities through the use of a test equivalent or substantially equivalent to the financial test specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference. The current closure or post-closure cost estimates covered by such a test are shown for each facility: ____.

4. The firm identified above owns or operates the following hazardous waste management facilities for which financial assurance for closure or, if a disposal facility, post-closure care, is not demonstrated either to EPA or a State through the financial test or any other financial assurance mechanisms specified in Sections R315-264-140 through 148 and 40 CFR 265.140 through 148, which are adopted by reference, or equivalent or substantially equivalent State mechanisms. The current closure and/or post-closure cost estimates not covered by such financial assurance are shown for each facility: ____.

5. This firm is the owner or operator or guarantor of the following UIC facilities for which financial assurance for plugging and abandonment is required under 40 CFR 144 and is assured through a financial test. The current closure cost estimates as required by 40 CFR 144.62 are shown for each facility:____.

This firm (insert "is required" or "is not required") to file a Form 10K with the Securities and Exchange Commission (SEC) for the latest fiscal year.

The fiscal year of this firm ends on (month, day). The figures for the following items marked with an asterisk are derived from this firm's independently audited, year-end financial statements for the latest completed fiscal year, ended (date).

Part A. Liability Coverage for Accidental Occurrences

(Fill in Alternative I if the criteria of Subsection R315-264-147(f)(1)(i) or 40 CFR 265.147(f)(1)(i), which is adopted by reference, are used. Fill in Alternative II if the criteria of Subsection R315-264-147(f)(1)(ii) or 40 CFR 265.147(f)(1)(ii), which is adopted by reference, are used.)

Alternative I

1. Amount of annual aggregate liability coverage to be demonstrated $____.

*2. Current assets $____.

*3. Current liabilities $____.

4. Net working capital (line 2 minus line 3) $____.

*5. Tangible net worth $____.

*6. If less than 90% of assets are located in the U.S., give total U.S. assets $____.

7. Is line 5 at least $10 million? (Yes/No) ____.

8. Is line 4 at least 6 times line 1? (Yes/No) ____.

9. Is line 5 at least 6 times line 1? (Yes/No) ____.

*10. Are at least 90% of assets located in the U.S.? (Yes/No) ____. If not, complete line 11.

11. Is line 6 at least 6 times line 1? (Yes/No) ____.

Alternative II

1. Amount of annual aggregate liability coverage to be demonstrated $____.

2. Current bond rating of most recent issuance and name of rating service ____ ____.

3. Date of issuance of bond _____.

4. Date of maturity of bond _____.

*5. Tangible net worth $____.

*6. Total assets in U.S. (required only if less than 90% of assets are located in the U.S.) $____.

7. Is line 5 at least $10 million? (Yes/No) ____.

8. Is line 5 at least 6 times line 1? ____.

9. Are at least 90% of assets located in the U.S.? If not, complete line 10. (Yes/No) ____.

10. Is line 6 at least 6 times line 1? ____.

(Fill in part B if you are using the financial test to demonstrate assurance of both liability coverage and closure or post-closure care.)

Part B. Closure or Post-Closure Care and Liability Coverage

(Fill in Alternative I if the criteria of Subsection R315-264-143(f)(1)(i) or Subsection R315-264-145(f)(1)(i) and of Subsection R315-264-147(f)(1)(i) are used or if the criteria of 40 CFR 265.143(e)(1)(i) or 145(e)(1)(i), which are adopted by reference, and of 40 CFR 265.147(f)(1)(i), which is adopted by reference, are used. Fill in Alternative II if the criteria of Subsection R315-264-143(f)(1)(ii) or Subsection R315-264-145(f)(1)(ii) and of Subsection R315-264-147(f)(1)(ii) are used or if the criteria of 40 CFR 265.143(e)(1)(i) or 145(e)(1)(i), which are adopted by reference, and of 40 CFR 265.147(f)(1)(ii), which is adopted by reference, are used.)

Alternative I

1. Sum of current closure and post-closure cost estimates (total of all cost estimates listed above) $____

2. Amount of annual aggregate liability coverage to be demonstrated $____

3. Sum of lines 1 and 2 $____

*4. Total liabilities (if any portion of your closure or post-closure cost estimates is included in your total liabilities, you may deduct that portion from this line and add that amount to lines 5 and 6) $____

*5. Tangible net worth $____

*6. Net worth $____

*7. Current assets $____

*8. Current liabilities $____

9. Net working capital (line 7 minus line 8) $____

*10. The sum of net income plus depreciation, depletion, and amortization $____

*11. Total assets in U.S. (required only if less than 90% of assets are located in the U.S.) $____

12. Is line 5 at least $10 million? (Yes/No)

13. Is line 5 at least 6 times line 3? (Yes/No)

14. Is line 9 at least 6 times line 3? (Yes/No)

*15. Are at least 90% of assets located in the U.S.? (Yes/No) If not, complete line 16.

16. Is line 11 at least 6 times line 3? (Yes/No)

17. Is line 4 divided by line 6 less than 2.0? (Yes/No)

18. Is line 10 divided by line 4 greater than 0.1? (Yes/No)

19. Is line 7 divided by line 8 greater than 1.5? (Yes/No)

Alternative II

1. Sum of current closure and post-closure cost estimates (total of all cost estimates listed above) $____

2. Amount of annual aggregate liability coverage to be demonstrated $____

3. Sum of lines 1 and 2 $____

4. Current bond rating of most recent issuance and name of rating service ____ ____

5. Date of issuance of bond _____

6. Date of maturity of bond _____

*7. Tangible net worth (if any portion of the closure or post-closure cost estimates is included in "total liabilities" on your financial statements you may add that portion to this line) $____

*8. Total assets in the U.S. (required only if less than 90% of assets are located in the U.S.) $____

9. Is line 7 at least $10 million? (Yes/No)

10. Is line 7 at least 6 times line 3? (Yes/No)

*11. Are at least 90% of assets located in the U.S.? (Yes/No) If not complete line 12.

12. Is line 8 at least 6 times line 3? (Yes/No)

I hereby certify that the wording of this letter is identical to the wording specified in Subsection R315-264-151(g) as such regulations were constituted on the date shown immediately below.

(h)(1) A corporate guarantee, as specified in Subsection R315-264-143(f) or 145(f), or 40 CFR 265.143(e) or 145(e), which are adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Corporate Guarantee for Closure or Post-Closure Care

Guarantee made this (date) by (name of guaranteeing entity), a business corporation organized under the laws of the State of (insert name of State), herein referred to as guarantor. This guarantee is made on behalf of the (owner or operator) of (business address), which is (one of the following: "our subsidiary"; "a subsidiary of (name and address of common parent corporation), of which guarantor is a subsidiary"; or "an entity with which guarantor has a substantial business relationship, as defined in (either Subsection R315-264-141(h) or 40 CFR 265.141(h), which is adopted by reference,)" to the Director of the Utah Division of Waste Management and Radiation Control (Director).

Recitals

1. Guarantor meets or exceeds the financial test criteria and agrees to comply with the reporting requirements for guarantors as specified in Subsections R315-264-143(f) and 145(f) or 40 CFR 265.143(e) and 145(e), which are adopted by reference.

2. (Owner or operator) owns or operates the following hazardous waste management facility(ies) covered by this guarantee: (List for each facility: EPA Identification Number, name, and address. Indicate for each whether guarantee is for closure, post-closure care, or both.)

3. "Closure plans" and "post-closure plans" as used below refer to the plans maintained as required by Sections R315-264-110 through 120 and 40 CFR 265.110 through 120, which are adopted by reference, for the closure and post-closure care of facilities as identified above.

4. For value received from (owner or operator), guarantor guarantees to the Director that in the event that (owner or operator) fails to perform (insert "closure," "post-closure care" or "closure and post-closure care") of the above

facility(ies) in accordance with the closure or post-closure plans and other permit or interim status requirements whenever required to do so, the guarantor shall do so or establish a trust fund as specified in Sections R315-264-140 through 148 or 40 CFR 265.140 through 148, which are adopted by reference, as applicable, in the name of (owner or operator) in the amount of the current closure or post-closure cost estimates as specified in Sections R315-264-140 through 148 or 40 CFR 265.140 through 148, which are adopted by reference.

5. Guarantor agrees that if, at the end of any fiscal year before termination of this guarantee, the guarantor fails to meet the financial test criteria, guarantor shall send within 90 days, by certified mail, notice to the Director and to (owner or operator) that he intends to provide alternate financial assurance as specified in Sections R315-264-140 through 148 or 40 CFR 265.140 through 148, which are adopted by reference, as applicable, in the name of (owner or operator). Within 120 days after the end of such fiscal year, the guarantor shall establish such financial assurance unless (owner or operator) has done so.

6. The guarantor agrees to notify the Director and the appropriate Regional Administrator by certified mail, of a voluntary or involuntary proceeding under Title 11, Bankruptcy, U.S. Code, naming guarantor as debtor, within 10 days after commencement of the proceeding.

7. Guarantor agrees that within 30 days after being notified by the Director of a determination that guarantor no longer meets the financial test criteria or that he is disallowed from continuing as a guarantor of closure or post-closure care, he shall establish alternate financial assurance as specified in Sections R315-264-140 through 148 or 40 CFR 265.140 through 148, which are adopted by reference, as applicable, in the name of (owner or operator) unless (owner or operator) has done so.

8. Guarantor agrees to remain bound under this guarantee notwithstanding any or all of the following: amendment or modification of the closure or post-closure plan, amendment or modification of the permit, the extension or reduction of the time of performance of closure or post-closure, or any other modification or alteration of an obligation of the owner or operator pursuant to Rules R315-264 or 265.

9. Guarantor agrees to remain bound under this guarantee for as long as (owner or operator) shall comply with the applicable financial assurance requirements of Sections R315-264-140 through 148 or 40 CFR 265.140 through 148, which are adopted by reference, for the above-listed facilities, except as provided in paragraph 10 of this agreement.

10. (Insert the following language if the guarantor is (a) a direct or higher-tier corporate parent, or (b) a firm whose parent corporation is also the parent corporation of the owner or operator):

Guarantor may terminate this guarantee by sending notice by certified mail to the Director and to (owner or operator)and to the appropriate Regional Administrator, provided that this guarantee may not be terminated unless and until (the owner or operator) obtains, and the Director approves, alternate closure and/or post-closure care coverage complying with Sections R315-264-143 and/or 264-145, or 40 CFR 265.143, and/or 145, which are adopted by reference.

(Insert the following language if the guarantor is a firm qualifying as a guarantor due to its "substantial business relationship" with its owner or operator)

Guarantor may terminate this guarantee 120 days following the receipt of notification, through certified mail, by the Director and by (the owner or operator).

11. Guarantor agrees that if (owner or operator) fails to provide alternate financial assurance as specified in Sections R315-264-140 through 148 or 40 CFR 265.140 through 148, which are adopted by reference, as applicable, and obtain written approval of such assurance from the Director within 90 days after a notice of cancellation by the guarantor is received by the Director from guarantor, guarantor shall provide such alternate financial assurance in the name of (owner or operator).

12. Guarantor expressly waives notice of acceptance of this guarantee by the Director or by (owner or operator). Guarantor also expressly waives notice of amendments or modifications of the closure and/or post-closure plan and of amendments or modifications of the facility permit(s).

I hereby certify that the wording of this guarantee is identical to the wording specified in Subsection R315-264-151(h) as such regulations were constituted on the date first above written.

Effective date:

(Name of guarantor)

(Authorized signature for guarantor)

(2) A guarantee, as specified in Subsection R315-264-147(g) or 40 CFR 265.147(g), which is adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Guarantee for Liability Coverage

Guarantee made this (date) by (name of guaranteeing entity), a business corporation organized under the laws of (if incorporated within the United States insert "the State of ____" and insert name of State; if incorporated outside the United States insert the name of the country in which incorporated, the principal place of business within the United States, and the name and address of the registered agent in the State of the principal place of business), herein referred to as guarantor. This guarantee is made on behalf of (owner or operator) of (business address), which is one of the following: "our subsidiary;" "a subsidiary of (name and address of common parent corporation), of which guarantor is a subsidiary;" or "an entity with which guarantor has a substantial business relationship, as defined in (either Subsection R315-264-141(h) or 40 CFR 265.141(h), which is adopted by reference,)", to any and all third parties who have sustained or may sustain bodily injury or property damage caused by (sudden and/or nonsudden) accidental occurrences arising from operation of the facility(ies) covered by this guarantee.

Recitals

1. Guarantor meets or exceeds the financial test criteria and agrees to comply with the reporting requirements for guarantors as specified in Subsection R315-264-147(g) and 40 CFR 265.147(g), which is adopted by reference.

2. (Owner or operator) owns or operates the following hazardous waste management facility(ies) covered by this guarantee: (List for each facility: EPA identification number, name, and address; and if guarantor is incorporated outside the United States list the name and address of the guarantor's registered agent in each State.) This corporate guarantee satisfies the third-party liability requirements for (insert "sudden" or "nonsudden" or "both sudden and nonsudden") accidental occurrences in above-named owner or operator facilities for coverage in the amount of (insert dollar amount) for each occurrence and (insert dollar amount) annual aggregate.

3. For value received from (owner or operator), guarantor guarantees to any and all third parties who have sustained or may sustain bodily injury or property damage caused by (sudden and/or nonsudden) accidental occurrences

arising from operations of the facility(ies) covered by this guarantee that in the event that (owner or operator) fails to satisfy a judgment or award based on a determination of liability for bodily injury or property damage to third parties caused by (sudden and/or nonsudden) accidental occurrences, arising from the operation of the above-named facilities, or fails to pay an amount agreed to in settlement of a claim arising from or alleged to arise from such injury or damage, the guarantor shall satisfy such judgment(s), award(s) or settlement agreement(s) up to the limits of coverage identified above.

4. Such obligation does not apply to any of the following:

(a) Bodily injury or property damage for which (insert owner or operator) is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages that (insert owner or operator) would be obligated to pay in the absence of the contract or agreement.

(b) Any obligation of (insert owner or operator) under a workers' compensation, disability benefits, or unemployment compensation law or any similar law.

(c) Bodily injury to:

(1) An employee of (insert owner or operator) arising from, and in the course of, employment by (insert owner or operator); or

(2) The spouse, child, parent, brother, or sister of that employee as a consequence of, or arising from, and in the course of employment by (insert owner or operator). This exclusion applies:

(A) Whether (insert owner or operator) may be liable as an employer or in any other capacity; and

(B) To any obligation to share damages with or repay another person who shall pay damages because of the injury to persons identified in paragraphs (1) and (2).

(d) Bodily injury or property damage arising out of the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft.

(e) Property damage to:

(1) Any property owned, rented, or occupied by (insert owner or operator);

(2) Premises that are sold, given away or abandoned by (insert owner or operator) if the property damage arises out of any part of those premises;

(3) Property loaned to (insert owner or operator);

(4) Personal property in the care, custody or control of (insert owner or operator);

(5) That particular part of real property on which (insert owner or operator) or any contractors or subcontractors working directly or indirectly on behalf of (insert owner or operator) are performing operations, if the property damage arises out of these operations.

5. Guarantor agrees that if, at the end of any fiscal year before termination of this guarantee, the guarantor fails to meet the financial test criteria, guarantor shall send within 90 days, by certified mail, notice to the Director and to (owner or operator) and to the appropriate Regional Administrator that he intends to provide alternate liability coverage as specified in Section R315-264-147 and 40 CFR 265.147, which is adopted by reference, as applicable, in the name of (owner or operator). Within 120 days after the end of such fiscal year, the guarantor shall establish such liability coverage unless (owner or operator) has done so.

6. The guarantor agrees to notify the Director and the appropriate Regional Administrator by certified mail of a voluntary or involuntary proceeding under title 11, Bankruptcy, U.S. Code, naming guarantor as debtor, within 10 days after commencement of the proceeding.

7. Guarantor agrees that within 30 days after being notified by the Director of a determination that guarantor no longer meets the financial test criteria or that he is disallowed from continuing as a guarantor, he shall establish alternate liability coverage as specified in Section R315-264-147 or 40 CFR 265.147, which is adopted by reference, in the name of (owner or operator), unless (owner or operator) has done so.

8. Guarantor reserves the right to modify this agreement to take into account amendment or modification of the liability requirements set by Section R315-264-147 and 40 CFR 265.147, which is adopted by reference, provided that such modification shall become effective only if the Director does not disapprove the modification within 30 days of receipt of notification of the modification.

9. Guarantor agrees to remain bound under this guarantee for so long as (owner or operator) shall comply with the applicable requirements of Sections R315-264-147 and 40 CFR 265.147, which is adopted by reference, for the above-listed facility(ies), except as provided in paragraph 10 of this agreement.

10. (Insert the following language if the guarantor is (a) a direct or higher-tier corporate parent, or (b) a firm whose parent corporation is also the parent corporation of the owner or operator):

Guarantor may terminate this guarantee by sending notice by certified mail to the Director and to (owner or operator) and to the appropriate Regional Administrator, provided that this guarantee may not be terminated unless and until (the owner or operator) obtains, and the Director approves, alternate liability coverage complying with Sections R315-264-147 and/or 40 CFR 265.147, which is adopted by reference.

(Insert the following language if the guarantor is a firm qualifying as a guarantor due to its "substantial business relationship" with the owner or operator):

Guarantor may terminate this guarantee 120 days following receipt of notification, through certified mail, by the Director and by (the owner or operator).

11. Guarantor hereby expressly waives notice of acceptance of this guarantee by any party.

12. Guarantor agrees that this guarantee is in addition to and does not affect any other responsibility or liability of the guarantor with respect to the covered facilities.

13. The Guarantor shall satisfy a third-party liability claim only on receipt of one of the following documents:

(a) Certification from the Principal and the third-party claimant(s) that the liability claim should be paid. The certification shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Certification of Valid Claim

The undersigned, as parties (insert Principal) and (insert name and address of third-party claimant(s)), hereby certify that the claim of bodily injury and/or property damage caused by a (sudden or nonsudden) accidental occurrence arising from operating (Principal's) hazardous waste treatment, storage, or disposal facility should be paid in the amount of $.

(Signatures)
Principal
(Notary) Date
(Signatures)
Claimant(s)
(Notary) Date

(b) A valid final court order establishing a judgment against the Principal for bodily injury or property damage caused by sudden or nonsudden accidental occurrences arising from the operation of the Principal's facility or group of facilities.

14. In the event of combination of this guarantee with

another mechanism to meet liability requirements, this guarantee shall be considered (insert "primary" or "excess") coverage.

I hereby certify that the wording of the guarantee is identical to the wording specified in Subsection R315-264-151(h)(2) as such regulations were constituted on the date shown immediately below.

Effective date:

(Name of guarantor)

(Authorized signature for guarantor)

(Name of person signing)

(Title of person signing)

Signature of witness or notary:

(i) A hazardous waste facility liability endorsement as required in Section R315-264-147 or 40 CFR 265.147, which is adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Hazardous Waste Facility Liability Endorsement

1. This endorsement certifies that the policy to which the endorsement is attached provides liability insurance covering bodily injury and property damage in connection with the insured's obligation to demonstrate financial responsibility under Sections R315-264-147 or 40 CFR 265.147, which is adopted by reference. The coverage applies at (list EPA Identification Number, name, and address for each facility) for (insert "sudden accidental occurrences," "nonsudden accidental occurrences," or "sudden and nonsudden accidental occurrences"; if coverage is for multiple facilities and the coverage is different for different facilities, indicate which facilities are insured for sudden accidental occurrences, which are insured for nonsudden accidental occurrences, and which are insured for both). The limits of liability are (insert the dollar amount of the "each occurrence" and "annual aggregate" limits of the Insurer's liability), exclusive of legal defense costs.

2. The insurance afforded with respect to such occurrences is subject to all of the terms and conditions of the policy; provided, however, that any provisions of the policy inconsistent with subsections (a) through (e) of this Paragraph 2 are hereby amended to conform with subsections (a) through (e):

(a) Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy to which this endorsement is attached.

(b) The Insurer is liable for the payment of amounts within any deductible applicable to the policy, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision does not apply with respect to that amount of any deductible for which coverage is demonstrated as specified in Subsections R315-264-147(f) or 40 CFR 265.147(f), which is adopted by reference.

(c) Whenever requested by the Director of the Utah Division of Waste Management and Radiation Control (Director), the Insurer agrees to furnish to the Director a signed duplicate original of the policy and all endorsements.

(d) Cancellation of this endorsement, whether by the Insurer, the insured, a parent corporation providing insurance coverage for its subsidiary, or by a firm having an insurable interest in and obtaining liability insurance on behalf of the owner or operator of the hazardous waste management facility, shall be effective only upon written notice and only after the expiration of 60 days after a copy of such written notice is received by the Director and by the appropriate Regional Administrator.

(e) Any other termination of this endorsement shall be effective only upon written notice and only after the expiration of thirty (30) days after a copy of such written notice is received by the Director.

Attached to and forming part of policy No. ___ issued by (name of Insurer), herein called the Insurer, of (address of Insurer) to (name of insured) of (address) this _____ day of _____, 19__. The effective date of said policy is _____ day of _____, 19__.

I hereby certify that the wording of this endorsement is identical to the wording specified in Subsection R315-264-151(i) as such regulation was constituted on the date first above written, and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States.

(Signature of Authorized Representative of Insurer)

(Type name)

(Title), Authorized Representative of (name of Insurer)

(Address of Representative)

(j) A certificate of liability insurance as required in Section R315-264-147 or 40 CFR 265.147, which is adopted by reference, shall be worded as follows, except that the instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Hazardous Waste Facility Certificate of Liability Insurance

1. (Name of Insurer), (the "Insurer"), of (address of Insurer) hereby certifies that it has issued liability insurance covering bodily injury and property damage to (name of insured), (the "insured"), of (address of insured) in connection with the insured's obligation to demonstrate financial responsibility under Sections R315-264-147 or 40 CFR 265.147, which is adopted by reference. The coverage applies at (list EPA Identification Number, name, and address for each facility) for (insert "sudden accidental occurrences," "nonsudden accidental occurrences," or "sudden and nonsudden accidental occurrences"; if coverage is for multiple facilities and the coverage is different for different facilities, indicate which facilities are insured for sudden accidental occurrences, which are insured for nonsudden accidental occurrences, and which are insured for both). The limits of liability are (insert the dollar amount of the "each occurrence" and "annual aggregate" limits of the Insurer's liability), exclusive of legal defense costs. The coverage is provided under policy number ___, issued on (date). The effective date of said policy is (date).

2. The Insurer further certifies the following with respect to the insurance described in Paragraph 1:

(a) Bankruptcy or insolvency of the insured shall not relieve the Insurer of its obligations under the policy.

(b) The Insurer is liable for the payment of amounts within any deductible applicable to the policy, with a right of reimbursement by the insured for any such payment made by the Insurer. This provision does not apply with respect to that amount of any deductible for which coverage is demonstrated as specified in Subsection R315-264-147(f) or 40 CFR 265.147(f), which is adopted by reference.

(c) Whenever requested by the Director of the Utah Division of Waste Management and Radiation Control, the Insurer agrees to furnish to the Director a signed duplicate original of the policy and all endorsements.

(d) Cancellation of the insurance, whether by the insurer, the insured, a parent corporation providing insurance coverage for its subsidiary, or by a firm having an insurable interest in and obtaining liability insurance on behalf of the owner or operator of the hazardous waste management facility, shall be effective only upon written notice and only after the expiration of 60 days after a copy of such written notice is received by the Director and by the appropriate Regional Administrator.

(e) Any other termination of the insurance shall be effective only upon written notice and only after the expiration of thirty (30) days after a copy of such written

notice is received by the Director.

I hereby certify that the wording of this instrument is identical to the wording specified in Subsection R315-264-151(j) as such regulation was constituted on the date first above written, and that the Insurer is licensed to transact the business of insurance, or eligible to provide insurance as an excess or surplus lines insurer, in one or more States.

(k) A letter of credit, as specified in Subsection R315-264-147(h) or 40 CFR 265.147(h), which is adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Irrevocable Standby Letter of Credit

Director, Utah Division of Waste Management and Radiation Control

195 North 1950 West

P.O. Box 144880

Salt Lake City, UT 84114-4880

Dear Sir or Madam: We hereby establish our Irrevocable Standby Letter of Credit No. _____ in the favor of ("any and all third-party liability claimants" or insert name of trustee of the standby trust fund), at the request and for the account of (owner or operator's name and address) for third-party liability awards or settlements up to (in words) U.S. dollars $_____ per occurrence and the annual aggregate amount of (in words) U.S. dollars $_____, for sudden accidental occurrences and/or for third-party liability awards or settlements up to the amount of (in words) U.S. dollars $_____ per occurrence, and the annual aggregate amount of (in words) U.S. dollars $_____, for nonsudden accidental occurrences available upon presentation of a sight draft bearing reference to this letter of credit No. _____, and (insert the following language if the letter of credit is being used without a standby trust fund: (1) a signed certificate reading as follows:

Certificate of Valid Claim

The undersigned, as parties (insert principal) and (insert name and address of third party claimant(s)), hereby certify that the claim of bodily injury and/or property damage caused by a (sudden or nonsudden) accidental occurrence arising from operations of (principal's) hazardous waste treatment, storage, or disposal facility should be paid in the amount of $( ). We hereby certify that the claim does not apply to any of the following:

(a) Bodily injury or property damage for which (insert principal) is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages that (insert principal) would be obligated to pay in the absence of the contract or agreement.

(b) Any obligation of (insert principal) under a workers' compensation, disability benefits, or unemployment compensation law or any similar law.

(c) Bodily injury to:

(1) An employee of (insert principal) arising from, and in the course of, employment by (insert principal); or

(2) The spouse, child, parent, brother or sister of that employee as a consequence of, or arising from, and in the course of employment by (insert principal).

This exclusion applies:

(A) Whether (insert principal) may be liable as an employer or in any other capacity; and

(B) To any obligation to share damages with or repay another person who shall pay damages because of the injury to persons identified in paragraphs (1) and (2).

(d) Bodily injury or property damage arising out of the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft.

(e) Property damage to:

(1) Any property owned, rented, or occupied by (insert principal);

(2) Premises that are sold, given away or abandoned by (insert principal) if the property damage arises out of any part of those premises;

(3) Property loaned to (insert principal);

(4) Personal property in the care, custody or control of (insert principal);

(5) That particular part of real property on which (insert principal) or any contractors or subcontractors working directly or indirectly on behalf of (insert principal) are performing operations, if the property damage arises out of these operations.

(Signatures)

Grantor

(Signatures)

Claimant(s) or

(2) a valid final court order establishing a judgment against the Grantor for bodily injury or property damage caused by sudden or nonsudden accidental occurrences arising from the operation of the Grantor's facility or group of facilities.)

This letter of credit is effective as of (date) and shall expire on (date at least one year later), but such expiration date shall be automatically extended for a period of (at least one year) on (date and on each successive expiration date, unless, at least 120 days before the current expiration date, we notify you, the Director of the Utah Division of Waste Management and Radiation Control, and (owner's or operator's name) and the appropriate Regional Administrator by certified mail that we have decided not to extend this letter of credit beyond the current expiration date.

Whenever this letter of credit is drawn on under and in compliance with the terms of this credit, we shall duly honor such draft upon presentation to us.

(Insert the following language if a standby trust fund is not being used: "In the event that this letter of credit is used in combination with another mechanism for liability coverage, this letter of credit shall be considered (insert "primary" or "excess" coverage)."

We certify that the wording of this letter of credit is identical to the wording specified in Subsection R315-264-151(k) as such regulations were constituted on the date shown immediately below. (Signature(s) and title(s) of official(s) of issuing institution) (Date).

This credit is subject to (insert "the most recent edition of the Uniform Customs and Practice for Documentary Credits, published and copyrighted by the International Chamber of Commerce," or "the Uniform Commercial Code").

(l) A surety bond, as specified in Subsection R315-264-147(i) or 40 CFR 265.147(i), which is adopted by reference, shall be worded as follows: except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Payment Bond

Surety Bond No. (Insert number)

Parties (Insert name and address of owner or operator), Principal, incorporated in (Insert State of incorporation) of (Insert city and State of principal place of business) and (Insert name and address of surety company(ies)), Surety Company(ies), of (Insert surety(ies) place of business).

EPA Identification Number, name, and address for each facility guaranteed by this bond: ____

Table

	Sudden accidental occurrences	Nonsudden accidental occurrences
Penal Sum Per Occurrence	(insert amount)	(insert amount)
Annual Aggregate	(insert amount)	(insert amount)

Purpose: This is an agreement between the Surety(ies) and the Principal under which the Surety(ies), its(their) successors and assignees, agree to be responsible for the payment of claims against the Principal for bodily injury and/or property damage to third parties caused by ("sudden" and/or "nonsudden") accidental occurrences arising from operations of the facility or group of facilities in the sums prescribed herein; subject to the governing provisions and the following conditions.

Governing Provisions:

(1) Section 3004 of the Resource Conservation and Recovery Act of 1976, as amended.

(2) Rules adopted by the Utah Waste Management and Radiation Control Board under the Utah Solid and Hazardous Waste Act, particularly ("Subsection R315-264-147" or "40 CFR 265.147, which is adopted by reference,") (if applicable).

Conditions:

(1) The Principal is subject to the applicable governing provisions that require the Principal to have and maintain liability coverage for bodily injury and property damage to third parties caused by ("sudden" and/or "nonsudden") accidental occurrences arising from operations of the facility or group of facilities. Such obligation does not apply to any of the following:

(a) Bodily injury or property damage for which (insert principal) is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages that (insert principal) would be obligated to pay in the absence of the contract or agreement.

(b) Any obligation of (insert principal) under a workers' compensation, disability benefits, or unemployment compensation law or similar law.

(c) Bodily injury to:

(1) An employee of (insert principal) arising from, and in the course of, employment by (insert principal); or

(2) The spouse, child, parent, brother or sister of that employee as a consequence of, or arising from, and in the course of employment by (insert principal). This exclusion applies:

(A) Whether (insert principal) may be liable as an employer or in any other capacity; and

(B) To any obligation to share damages with or repay another person who shall pay damages because of the injury to persons identified in paragraphs (1) and (2).

(d) Bodily injury or property damage arising out of the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft.

(e) Property damage to:

(1) Any property owned, rented, or occupied by (insert principal);

(2) Premises that are sold, given away or abandoned by (insert principal) if the property damage arises out of any part of those premises;

(3) Property loaned to (insert principal);

(4) Personal property in the care, custody or control of (insert principal);

(5) That particular part of real property on which (insert principal) or any contractors or subcontractors working directly or indirectly on behalf of (insert principal) are performing operations, if the property damage arises out of these operations.

(2) This bond assures that the Principal shall satisfy valid third party liability claims, as described in condition 1.

(3) If the Principal fails to satisfy a valid third party liability claim, as described above, the Surety(ies) becomes liable on this bond obligation.

(4) The Surety(ies) shall satisfy a third party liability claim only upon the receipt of one of the following documents:

(a) Certification from the Principal and the third party claimant(s) that the liability claim should be paid. The certification shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Certification of Valid Claim

The undersigned, as parties (insert name of Principal) and (insert name and address of third party claimant(s)), hereby certify that the claim of bodily injury and/or property damage caused by a (sudden or nonsudden) accidental occurrence arising from operating (Principal's) hazardous waste treatment, storage, or disposal facility should be paid in the amount of $( ).

(Signature)

Principal

(Signature(s))

Claimant(s)

(Notary) Date

or (b) A valid final court order establishing a judgment against the Principal for bodily injury or property damage caused by sudden or nonsudden accidental occurrences arising from the operation of the Principal's facility or group of facilities.

(5) In the event of combination of this bond with another mechanism for liability coverage, this bond shall be considered (insert "primary" or "excess") coverage.

(6) The liability of the Surety(ies) shall not be discharged by any payment or succession of payments hereunder, unless and until such payment or payments shall amount in the aggregate to the penal sum of the bond. In no event shall the obligation of the Surety(ies) hereunder exceed the amount of said annual aggregate penal sum, provided that the Surety(ies) furnish(es) notice to the Director forthwith of all claims filed and payments made by the Surety(ies) under this bond.

(7) The Surety(ies) may cancel the bond by sending notice of cancellation by certified mail to the Principal and the Director and the appropriate Regional Administrator, provided, however, that cancellation shall not occur during the 120 days beginning on the date of receipt of the notice of cancellation by the Principal and the Director, as evidenced by the return receipt.

(8) The Principal may terminate this bond by sending written notice to the Surety(ies) and to the Director.

(9) The Surety(ies) hereby waive(s) notification of amendments to applicable laws, statutes, rules and regulations and agree(s) that no such amendment shall in any way alleviate its (their) obligation on this bond.

(10) This bond is effective from (insert date) (12:01 a.m., standard time, at the address of the Principal as stated herein) and shall continue in force until terminated as described above.

In Witness Whereof, the Principal and Surety(ies) have executed this Bond and have affixed their seals on the date set forth above.

The persons whose signatures appear below hereby certify that they are authorized to execute this surety bond on behalf of the Principal and Surety(ies) and that the wording of this surety bond is identical to the wording specified in

Subsection R315-264-151(1), as such regulations were constituted on the date this bond was executed.

(m)(1) A trust agreement, as specified in Subsection R315-264-147(j) or 40 CFR 265.147(j), which is adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Trust Agreement

Trust Agreement, the "Agreement," entered into as of (date) by and between (name of the owner or operator) a (name of State) (insert "corporation," "partnership," "association," or "proprietorship"), the "Grantor," and (name of corporate trustee), (insert, "incorporated in the State of ____" or "a national bank"), the "trustee."

Whereas, the Utah Waste Management and Radiation Control Board, has established certain regulations applicable to the Grantor, requiring that an owner or operator of a hazardous waste management facility or group of facilities shall demonstrate financial responsibility for bodily injury and property damage to third parties caused by sudden accidental and/or nonsudden accidental occurrences arising from operations of the facility or group of facilities.

Whereas, the Grantor has elected to establish a trust to assure all or part of such financial responsibility for the facilities identified herein.

Whereas, the Grantor, acting through its duly authorized officers, has selected the Trustee to be the trustee under this agreement, and the Trustee is willing to act as trustee.

Now, therefore, the Grantor and the Trustee agree as follows:

Section 1. Definitions. As used in this Agreement:

(a) The term "Board", "Waste Management and Radiation Control Board" created pursuant to Utah Code Annotated 19-1-106.

(b) The term "Director" means the Director,of the Division of Waste Management and Radiation Control his successors, designees, and any subsequent entity of the State of Utah upon whom the duties of regulation and enforcement of regulations governing hazardous waste.

(c) The term "Grantor" means the owner or operator who enters into this Agreement and any successors or assigns of the Grantor.

(d) The term "Trustee" means the Trustee who enters into this Agreement and any successor Trustee.

Section 2. Identification of Facilities. This agreement pertains to the facilities identified on attached schedule A (on schedule A, for each facility list the EPA Identification Number, name, and address of the facility(ies) and the amount of liability coverage, or portions thereof, if more than one instrument affords combined coverage as demonstrated by this Agreement).

Section 3. Establishment of Fund. The Grantor and the Trustee hereby establish a trust fund, hereinafter the "Fund," for the benefit of any and all third parties injured or damaged by (sudden and/or nonsudden) accidental occurrences arising from operation of the facility(ies) covered by this guarantee, in the amounts of _____ (up to $1 million) per occurrence and _____ (up to $2 million) annual aggregate for sudden accidental occurrences and _____ (up to $3 million) per occurrence and _____ (up to $6 million) annual aggregate for nonsudden occurrences, except that the Fund is not established for the benefit of third parties for the following:

(a) Bodily injury or property damage for which (insert Grantor) is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages that (insert Grantor) would be obligated to pay in the absence of the contract or agreement.

(b) Any obligation of (insert Grantor) under a workers' compensation, disability benefits, or unemployment compensation law or any similar law.

(c) Bodily injury to:

(1) An employee of (insert Grantor) arising from, and in the course of, employment by (insert Grantor); or

(2) The spouse, child, parent, brother or sister of that employee as a consequence of, or arising from, and in the course of employment by (insert Grantor).

This exclusion applies:

(A) Whether (insert Grantor) may be liable as an employer or in any other capacity; and

(B) To any obligation to share damages with or repay another person who shall pay damages because of the injury to persons identified in paragraphs (1) and (2).

(d) Bodily injury or property damage arising out of the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft.

(e) Property damage to:

(1) Any property owned, rented, or occupied by (insert Grantor);

(2) Premises that are sold, given away or abandoned by (insert Grantor) if the property damage arises out of any part of those premises;

(3) Property loaned to (insert Grantor);

(4) Personal property in the care, custody or control of (insert Grantor);

(5) That particular part of real property on which (insert Grantor) or any contractors or subcontractors working directly or indirectly on behalf of (insert Grantor) are performing operations, if the property damage arises out of these operations.

In the event of combination with another mechanism for liability coverage, the fund shall be considered (insert "primary" or "excess") coverage.

The Fund is established initially as consisting of the property, which is acceptable to the Trustee, described in Schedule B attached hereto. Such property and any other property subsequently transferred to the Trustee is referred to as the Fund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Fund shall be held by the Trustee, IN TRUST, as hereinafter provided. The Trustee shall not be responsible nor shall it undertake any responsibility for the amount or adequacy of, nor any duty to collect from the Grantor, any payments necessary to discharge any liabilities of the Grantor established by Director.

Section 4. Payment for Bodily Injury or Property Damage. The Trustee shall satisfy a third party liability claim by making payments from the Fund only upon receipt of one of the following documents;

(a) Certification from the Grantor and the third party claimant(s) that the liability claim should be paid. The certification shall be worded as follows, except that

instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Certification of Valid Claim

The undersigned, as parties (insert Grantor) and (insert name and address of third party claimant(s)), hereby certify that the claim of bodily injury and/or property damage caused by a (sudden or nonsudden) accidental occurrence arising from operating (Grantor's) hazardous waste treatment, storage, or disposal facility should be paid in the amount of $( ).

(Signatures)

Grantor

(Signatures)

Claimant(s)

(b) A valid final court order establishing a judgment against the Grantor for bodily injury or property damage caused by sudden or nonsudden accidental occurrences arising from the operation of the Grantor's facility or group of facilities.

Section 5. Payments Comprising the Fund. Payments made to the Trustee for the Fund shall consist of cash or securities acceptable to the Trustee.

Section 6. Trustee Management. The Trustee shall invest and reinvest the principal and income, in accordance with general investment policies and guidelines which the Grantor may communicate in writing to the Trustee from time to time, subject, however, to the provisions Section R315-264-151. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiary and with the care, skill, prudence, and diligence under the circumstance then prevailing which persons of prudence, acting in a like capacity and familiar with such matters, would use in the conduct of an enterprise of a like character and with like aims; except that:

(i) Securities or other obligations of the Grantor, or any other owner or operator of the facilities, or any of their affiliates as defined in the Investment Company Act of 1940, as amended, 15 U.S.C. 80a-2.(a), shall not be acquired or held unless they are securities or other obligations of the Federal or a State government;

(ii) The Trustee is authorized to invest the Fund in time or demand deposits of the Trustee, to the extent insured by an agency of the Federal or State government; and

(iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest thereon.

Section 7. Commingling and Investment. The Trustee is expressly authorized in its discretion:

(a) To transfer from time to time any or all of the assets of the Fund to any common commingled, or collective trust fund created by the Trustee in which the fund is eligible to participate, subject to all of the provisions thereof, to be commingled with the assets of other trusts participating therein; and

(b) To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 81a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion.

Section 8. Express Powers of Trustee. Without in any way limiting the powers and discretions conferred upon the Trustee by the other provisions of this Agreement or by law, the Trustee is expressly authorized and empowered:

(a) To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;

(b) To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other instruments that may be necessary or appropriate to carry out the powers herein granted;

(c) To register any securities held in the Fund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certificates representing such securities with certificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depository even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depository with other securities deposited therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Federal Reserve bank, but the books and records of the Trustee shall at all times show that all such securities are part of the Fund;

(d) To deposit any cash in the Fund in interest-bearing accounts maintained or savings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee, to the extent insured by an agency of the Federal or State government; and

(e) To compromise or otherwise adjust all claims in favor of or against the Fund.

Section 9. Taxes and Expenses. All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trustee to the extent not paid directly by the Grantor, and all other proper charges and disbursements of the Trustee shall be paid from the Fund.

Section 10. Annual Valuations. The Trustee shall annually, at least 30 days prior to the anniversary date of establishment of the Fund, furnish to the Grantor and to the Director a statement confirming the value of the Trust. Any securities in the Fund shall be valued at market value as of no more than 60 days prior to the anniversary date of establishment of the Fund. The failure of the Grantor to object in writing to the Trustee within 90 days after the statement has been furnished to the Grantor and the Director shall constitute a conclusively binding assent by the Grantor barring the Grantor from asserting any claim or liability against the Trustee with respect to matters disclosed in the statement.

Section 11. Advice of Counsel. The Trustee may from time to time consult with counsel, who may be counsel to the Grantor with respect to any question arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counsel.

Section 12. Trustee Compensation. The Trustee shall be entitled to reasonable compensation for its services as agreed upon in writing from time to time with the Grantor.

Section 13. Successor Trustee. The Trustee may resign or the Grantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment, the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the

appointment of a successor trustee or for instructions. The successor trustee shall specify the date on which it assumes administration of the trust in a writing sent to the Grantor, the Director, and the present Trustee by certified mail 10 days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this section shall be paid as provided in Section 9.

Section 14. Instructions to the Trustee. All orders, requests, and instructions by the Grantor to the Trustee shall be in writing, signed by such persons as are designated in the attached Exhibit A or such other designees as the Grantor may designate by amendments to Exhibit A. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. All orders, requests, and instructions by the Director to the Trustee shall be in writing, signed by the Director and the Trustee shall act and shall be fully protected in acting in accordance with such orders, requests, and instructions. The Trustee shall have the right to assume, in the absence of written notice to the contrary, that no event constituting a change or a termination of the authority of any person to act on behalf of the Grantor or the Director hereunder has occurred. The Trustee shall have no duty to act in the absence of such orders, requests, and instructions from the Grantor and/or the Director, except as provided for herein.

Section 15. Notice of Nonpayment. If a payment for bodily injury or property damage is made under Section 4 of this trust, the Trustee shall notify the Grantor of such payment and the amount(s) thereof within five (5) working days. The Grantor shall, on or before the anniversary date of the establishment of the Fund following such notice, either make payments to the Trustee in amounts sufficient to cause the trust to return to its value immediately prior to the payment of claims under Section 4, or shall provide written proof to the Trustee that other financial assurance for liability coverage has been obtained equalling the amount necessary to return the trust to its value prior to the payment of claims. If the Grantor does not either make payments to the Trustee or provide the Trustee with such proof, the Trustee shall within 10 working days after the anniversary date of the establishment of the Fund provide a written notice of nonpayment to the Director and to the appropriate Regional Administrator.

Section 16. Amendment of Agreement. This Agreement may be amended by an instrument in writing executed by the Grantor, the Trustee, and the Director, or by the Trustee and the Director if the Grantor ceases to exist.

Section 17. Irrevocability and Termination. Subject to the right of the parties to amend this Agreement as provided in Section 16, this Trust shall be irrevocable and shall continue until terminated at the written agreement of the Grantor, the Trustee, and the Director, or by the Trustee and the Director, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administration expenses, shall be delivered to the Grantor.

The Director shall agree to termination of the Trust when the owner or operator substitutes alternate financial assurance as specified in this section.

Section 18. Immunity and Indemnification. The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor or the Director issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor or from the Trust Fund, or both, from and against any personal liability to which the Trustee may be subjected by reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

Section 19. Choice of Law. This Agreement shall be administered, construed, and enforced according to the laws of the State of Utah.

Section 20. Interpretation. As used in this Agreement, words in the singular include the plural and words in the plural include the singular. The descriptive headings for each section of this Agreement shall not affect the interpretation or the legal efficacy of this Agreement.

In Witness Whereof the parties have caused this Agreement to be executed by their respective officers duly authorized and their corporate seals to be hereunto affixed and attested as of the date first above written. The parties below certify that the wording of this Agreement is identical to the wording specified in Subsection R315-264-151(m) as such regulations were constituted on the date first above written.

(2) The following is an example of the certification of acknowledgement which shall accompany the trust agreement for a trust fund as specified in Subsection R315-264-147(j) or 40 CFR 265.147(j), which is adopted by reference.

State of

County of

On this (date), before me personally came (owner or operator) to me known, who, being by me duly sworn, did depose and say that she/he resides at (address), that she/he is (title) of (corporation), the corporation described in and which executed the above instrument; that she/he knows the seal of said corporation; that the seal affixed to such instrument is such corporate seal; that it was so affixed by order of the Board of Directors of said corporation, and that she/he signed her/his name thereto by like order.

(Signature of Notary Public)

(n)(1) A standby trust agreement, as specified in Subsection R315-264-147(h) or 40 CFR 265.147(h), which is adopted by reference, shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Standby Trust Agreement

Trust Agreement, the "Agreement," entered into as of (date) by and between (name of the owner or operator) a (name of a State) (insert "corporation," "partnership," "association," or "proprietorship"), the "Grantor," and (name of corporate trustee), (insert, "incorporated in the State of _____" or "a national bank"), the "trustee."

Whereas the Utah Waste Management and Radiation Control Board, in accordance with the Utah Solid and Hazardous Waste Act, has established certain regulations applicable to the Grantor, requiring that an owner or operator of a hazardous waste management facility or group of facilities shall demonstrate financial responsibility for bodily injury and property damage to third parties caused by sudden accidental and/or nonsudden accidental occurrences arising from operations of the facility or group of facilities.

Whereas, the Grantor has elected to establish a standby trust into which the proceeds from a letter of credit may be deposited to assure all or part of such financial responsibility for the facilities identified herein.

Whereas, the Grantor, acting through its duly authorized officers, has selected the Trustee to be the trustee under this

agreement, and the Trustee is willing to act as trustee.

Now, therefore, the Grantor and the Trustee agree as follows:

Section 1. Definitions. As used in this Agreement:

(a) The term "Board", "Waste Management and Radiation Control Board" created pursuant to Utah Code Annotated 19-1-106.

(b) The term "Director" means the Director,of the Division of Waste Management and Radiation Control his successors, designees, and any subsequent entity of the State of Utah upon whom the duties of regulation and enforcement of regulations governing hazardous waste.

(c) The term Grantor means the owner or operator who enters into this Agreement and any successors or assigns of the Grantor.

(d) The term Trustee means the Trustee who enters into this Agreement and any successor Trustee.

Section 2. Identification of Facilities. This agreement pertains to the facilities identified on attached schedule A (on schedule A, for each facility list the EPA Identification Number, name, and address of the facility(ies) and the amount of liability coverage, or portions thereof, if more than one instrument affords combined coverage as demonstrated by this Agreement).

Section 3. Establishment of Fund. The Grantor and the Trustee hereby establish a standby trust fund, hereafter the "Fund," for the benefit of any and all third parties injured or damaged by (sudden and/or nonsudden) accidental occurrences arising from operation of the facility(ies) covered by this guarantee, in the amounts of _____ (up to $1 million) per occurrence and _____ (up to $2 million) annual aggregate for sudden accidental occurrences and _____ (up to $3 million) per occurrence and _____ (up to $6 million) annual aggregate for nonsudden occurrences, except that the Fund is not established for the benefit of third parties for the following:

(a) Bodily injury or property damage for which (insert Grantor) is obligated to pay damages by reason of the assumption of liability in a contract or agreement. This exclusion does not apply to liability for damages that (insert Grantor) would be obligated to pay in the absence of the contract or agreement.

(b) Any obligation of (insert Grantor) under a workers' compensation, disability benefits, or unemployment compensation law or any similar law.

(c) Bodily injury to:

(1) An employee of (insert Grantor) arising from , and in the course of, employment by (insert Grantor); or

(2) The spouse, child, parent, brother or sister of that employee as a consequence of, or arising from, and in the course of employment by (insert Grantor).

This exclusion applies:

(A) Whether (insert Grantor) may be liable as an employer or in any other capacity; and

(B) To any obligation to share damages with or repay another person who shall pay damages because of the injury to persons identified in paragraphs (1) and (2).

(d) Bodily injury or property damage arising out of the ownership, maintenance, use, or entrustment to others of any aircraft, motor vehicle or watercraft.

(e) Property damage to:

(1) Any property owned, rented, or occupied by (insert Grantor);

(2) Premises that are sold, given away or abandoned by (insert Grantor) if the property damage arises out of any part of those premises;

(3) Property loaned by (insert Grantor);

(4) Personal property in the care, custody or control of (insert Grantor);

(5) That particular part of real property on which (insert Grantor) or any contractors or subcontractors working directly or indirectly on behalf of (insert Grantor) are performing operations, if the property damage arises out of these operations.

In the event of combination with another mechanism for liability coverage, the fund shall be considered (insert "primary" or "excess") coverage.

The Fund is established initially as consisting of the proceeds of the letter of credit deposited into the Fund. Such proceeds and any other property subsequently transferred to the Trustee is referred to as the Fund, together with all earnings and profits thereon, less any payments or distributions made by the Trustee pursuant to this Agreement. The Fund shall be held by the Trustee, IN TRUST, as hereinafter provided. The Trustee shall not be responsible nor shall it undertake any responsibility for the amount or adequacy of, nor any duty to collect from the Grantor, any payments necessary to discharge any liabilities of the Grantor established by the Director of the Utah Division of Waste Management and Radiation Control.

Section 4. Payment for Bodily Injury or Property Damage. The Trustee shall satisfy a third party liability claim by drawing on the letter of credit described in Schedule B and by making payments from the Fund only upon receipt of one of the following documents:

(a) Certification from the Grantor and the third party claimant(s) that the liability claim should be paid. The certification shall be worded as follows, except that instructions in parentheses, (), are to be replaced with the relevant information and the parentheses deleted:

Certification of Valid Claim

The undersigned, as parties (insert Grantor) and (insert name and address of third party claimant(s)), hereby certify that the claim of bodily injury and/or property damage caused by a (sudden or nonsudden) accidental occurrence arising from operating (Grantor's) hazardous waste treatment, storage, or disposal facility should be paid in the amount of $( ).

(Signature)

Grantor

(Signatures)

Claimant(s)

(b) A valid final court order establishing a judgment against the Grantor for bodily injury or property damage caused by sudden or nonsudden accidental occurrences arising from the operation of the Grantor's facility or group of facilities.

Section 5. Payments Comprising the Fund. Payments made to the Trustee for the Fund shall consist of the proceeds from the letter of credit drawn upon by the Trustee in accordance with the requirements of Subsection R315-264-151(k) and Section 4 of this Agreement.

Section 6. Trustee Management. The Trustee shall invest and reinvest the principal and income, in accordance with general investment policies and guidelines which the Grantor may communicate in writing to the Trustee from time to time, subject, however, to the provisions Section R315-264-151. In investing, reinvesting, exchanging, selling, and managing the Fund, the Trustee shall discharge his duties with respect to the trust fund solely in the interest of the beneficiary and with the care, skill, prudence, and diligence under the circumstances then prevailing which persons of prudence, acting in a like capacity and familiar with such matters, would use in the conduct of an enterprise of a like character and with like aims; except that:

(i) Securities or other obligations of the Grantor, or any other owner or operator of the facilities, or any of their affiliates as defined in the Investment Company Act of 1940,

as amended, 15 U.S.C. 80a-2(a), shall not be acquired or held, unless they are securities or other obligations of the Federal or a State government;

(ii) The Trustee is authorized to invest the Fund in time or demand deposits of the Trustee, to the extent insured by an agency of the Federal or a State government; and

(iii) The Trustee is authorized to hold cash awaiting investment or distribution uninvested for a reasonable time and without liability for the payment of interest thereon.

Section 7. Commingling and Investment. The Trustee is expressly authorized in its discretion:

(a) To transfer from time to time any or all of the assets of the Fund to any common, commingled, or collective trust fund created by the Trustee in which the Fund is eligible to participate, subject to all of the provisions thereof, to be commingled with the assets of other trusts participating therein; and

(b) To purchase shares in any investment company registered under the Investment Company Act of 1940, 15 U.S.C. 80a-1 et seq., including one which may be created, managed, underwritten, or to which investment advice is rendered or the shares of which are sold by the Trustee. The Trustee may vote such shares in its discretion.

Section 8. Express Powers of Trustee. Without in any way limiting the powers and discretions conferred upon the Trustee by the other provisions of this Agreement or by law, the Trustee is expressly authorized and empowered:

(a) To sell, exchange, convey, transfer, or otherwise dispose of any property held by it, by public or private sale. No person dealing with the Trustee shall be bound to see to the application of the purchase money or to inquire into the validity or expediency of any such sale or other disposition;

(b) To make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any and all other instruments that may be necessary or appropriate to carry out the powers herein granted;

(c) To register any securities held in the Fund in its own name or in the name of a nominee and to hold any security in bearer form or in book entry, or to combine certificates representing such securities with certificates of the same issue held by the Trustee in other fiduciary capacities, or to deposit or arrange for the deposit of such securities in a qualified central depositary even though, when so deposited, such securities may be merged and held in bulk in the name of the nominee of such depositary with other securities deposited therein by another person, or to deposit or arrange for the deposit of any securities issued by the United States Government, or any agency or instrumentality thereof, with a Federal Reserve Bank, but the books and records of the Trustee shall at all times show that all such securities are part of the Fund;

(d) To deposit any cash in the Fund in interest-bearing accounts maintained or savings certificates issued by the Trustee, in its separate corporate capacity, or in any other banking institution affiliated with the Trustee, to the extent insured by an agency of the Federal or State government; and

(e) To compromise or otherwise adjust all claims in favor of or against the Fund.

Section 9. Taxes and Expenses. All taxes of any kind that may be assessed or levied against or in respect of the Fund and all brokerage commissions incurred by the Fund shall be paid from the Fund. All other expenses incurred by the Trustee in connection with the administration of this Trust, including fees for legal services rendered to the Trustee, the compensation of the Trustee to the extent not paid directly by the Grantor, and all other proper charges and disbursements to the Trustee shall be paid from the Fund.

Section 10. Advice of Counsel. The Trustee may from time to time consult with counsel, who may be counsel to the Grantor, with respect to any question arising as to the construction of this Agreement or any action to be taken hereunder. The Trustee shall be fully protected, to the extent permitted by law, in acting upon the advice of counsel.

Section 11. Trustee Compensation. The Trustee shall be entitled to reasonable compensation for its services as agreed upon in writing from time to time with the Grantor.

Section 12. Successor Trustee. The Trustee may resign or the Grantor may replace the Trustee, but such resignation or replacement shall not be effective until the Grantor has appointed a successor trustee and this successor accepts the appointment. The successor trustee shall have the same powers and duties as those conferred upon the Trustee hereunder. Upon the successor trustee's acceptance of the appointment, the Trustee shall assign, transfer, and pay over to the successor trustee the funds and properties then constituting the Fund. If for any reason the Grantor cannot or does not act in the event of the resignation of the Trustee, the Trustee may apply to a court of competent jurisdiction for the appointment of a successor trustee or for instructions. The successor trustee shall specify the date on which it assumes administration of the trust in a writing sent to the Grantor, the Director and the present Trustee by certified mail 10 days before such change becomes effective. Any expenses incurred by the Trustee as a result of any of the acts contemplated by this Section shall be paid as provided in Section 9.

Section 13. Instructions to the Trustee. All orders, requests, certifications of valid claims, and instructions to the Trustee shall be in writing, signed by such persons as are designated in the attached Exhibit A or such other designees as the Grantor may designate by amendments to Exhibit A. The Trustee shall be fully protected in acting without inquiry in accordance with the Grantor's orders, requests, and instructions. The Trustee shall have the right to assume, in the absence of written notice to the contrary, that no event constituting a change or a termination of the authority of any person to act on behalf of the Grantor or the Director hereunder has occurred. The Trustee shall have no duty to act in the absence of such orders, requests, and instructions from the Grantor and/or the Director, except as provided for herein.

Section 14. Amendment of Agreement. This Agreement may be amended by an instrument in writing executed by the Grantor, the Trustee, and the Director, or by the Trustee and the Director if the Grantor ceases to exist.

Section 15. Irrevocability and Termination. Subject to the right of the parties to amend this Agreement as provided in Section 14, this Trust shall be irrevocable and shall continue until terminated at the written agreement of the Grantor, the Trustee, and the Director, or by the Trustee and the Director, if the Grantor ceases to exist. Upon termination of the Trust, all remaining trust property, less final trust administration expenses, shall be paid to the Grantor.

The Director shall agree to termination of the Trust when the owner or operator substitutes alternative financial assurance as specified in this section.

Section 16. Immunity and indemnification. The Trustee shall not incur personal liability of any nature in connection with any act or omission, made in good faith, in the administration of this Trust, or in carrying out any directions by the Grantor and the Director issued in accordance with this Agreement. The Trustee shall be indemnified and saved harmless by the Grantor or from the Trust Fund, or both, from and against any personal liability to which the Trustee may be subjected by reason of any act or conduct in its official capacity, including all expenses reasonably incurred in its defense in the event the Grantor fails to provide such defense.

Section 17. Choice of Law. This Agreement shall be administered, construed, and enforced according to the laws

of the State of Utah.

Section 18. Interpretation. As used in this Agreement, words in the singular include the plural and words in the plural include the singular. The descriptive headings for each Section of this Agreement shall not affect the interpretation of the legal efficacy of this Agreement.

In Witness Whereof the parties have caused this Agreement to be executed by their respective officers duly authorized and their corporate seals to be hereunto affixed and attested as of the date first above written. The parties below certify that the wording of this Agreement is identical to the wording specified in Subsection R315-264-151(n) as such regulations were constituted on the date first above written.

On this (date), before me personally came (owner or operator) to me known, who, being by me duly sworn, did depose and say that she/he resides at (address), that she/he is (title) of (corporation), the corporation described in and which executed the above instrument; that she/he knows the seal of said corporation; that the seal affixed to such instrument is such corporate seal; that it was so affixed by order of the Board of Directors of said corporation, and that she/he signed her/his name thereto by like order.

(Signature of Notary Public)

R315-264-170. Use and Management of Containers -- Applicability.

The regulations in Sections R315-264-170 through 179 apply to owners and operators of all hazardous waste facilities that store containers of hazardous waste, except as Section R315-264-1 provides otherwise.

Under Section R315-261-7 and Subsection R315-261-33(c), if a hazardous waste is emptied from a container the residue remaining in the container is not considered a hazardous waste if the container is "empty" as defined in Section R315-261-7. In that event, management of the container is exempt from the requirements of Sections R315-264-170 through 179.

R315-264-171. Condition of Containers.

If a container holding hazardous waste is not in good condition, e.g., severe rusting, apparent structural defects, or if it begins to leak, the owner or operator shall transfer the hazardous waste from this container to a container that is in good condition or manage the waste in some other way that complies with the requirements of Rule R315-264.

R315-264-172. Compatibility of Waste with Containers.

The owner or operator shall use a container made of or lined with materials which will not react with, and are otherwise compatible with, the hazardous waste to be stored, so that the ability of the container to contain the waste is not impaired.

R315-264-173. Management of Containers.

(a) A container holding hazardous waste shall always be closed during storage, except when it is necessary to add or remove waste.

(b) A container holding hazardous waste shall not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.

Comment: Reuse of containers in transportation is governed by U.S. Department of Transportation regulations including those set forth in 49 CFR 173.28.

R315-264-174. Inspections.

At least weekly, the owner or operator shall inspect areas where containers are stored. The owner or operator shall look for leaking containers and for deterioration of containers and the containment system caused by corrosion or other factors.

See Subsection R315-264-15(c) and Section R315-264-171 for remedial action required if deterioration or leaks are detected.

R315-264-175. Containment.

(a) Container storage areas shall have a containment system that is designed and operated in accordance with Subsection R315-264-175(b), except as otherwise provided by Subsection R315-264-175(c).

(b) A containment system shall be designed and operated as follows:

(1) A base shall underlie the containers which is free of cracks or gaps and is sufficiently impervious to contain leaks, spills, and accumulated precipitation until the collected material is detected and removed;

(2) The base shall be sloped or the containment system shall be otherwise designed and operated to drain and remove liquids resulting from leaks, spills, or precipitation, unless the containers are elevated or are otherwise protected from contact with accumulated liquids;

(3) The containment system shall have sufficient capacity to contain 10% of the volume of containers or the volume of the largest container, whichever is greater. Containers that do not contain free liquids need not be considered in this determination;

(4) Run-on into the containment system shall be prevented unless the collection system has sufficient excess capacity in addition to that required in Subsection R315-264-175(b)(3) to contain any run-on which might enter the system; and

(5) Spilled or leaked waste and accumulated precipitation shall be removed from the sump or collection area in as timely a manner as is necessary to prevent overflow of the collection system.

If the collected material is a hazardous waste under Rule R315-261, it shall be managed as a hazardous waste in accordance with all applicable requirements of Rules R315-262 through 266. If the collected material is discharged through a point source to waters of the United States, it is subject to the requirements of section 402 of the Clean Water Act, as amended.

(c) Storage areas that store containers holding only wastes that do not contain free liquids need not have a containment system defined by Subsection R315-264-175(b), except as provided by Subsection R315-264-175(d) or provided that:

(1) The storage area is sloped or is otherwise designed and operated to drain and remove liquid resulting from precipitation, or

(2) The containers are elevated or are otherwise protected from contact with accumulated liquid.

(d) Storage areas that store containers holding the wastes listed below that do not contain free liquids shall have

a containment system defined by Subsection R315-264-175(b):

(1) F020, F021, F022, F023, F026 and F027.

R315-264-176. Special Requirements for Ignitable or Reactive Waste.

Containers holding ignitable or reactive waste shall be located at least 15 meters, 50 feet, from the facility's property line. See Subsection R315-264-17(a) for additional requirements.

R315-264-177. Special Requirements for Incompatible Wastes.

(a) Incompatible wastes, or incompatible wastes and materials, see appendix V of Rule R315-264 for examples, shall not be placed in the same container, unless Subsection R35-264-17(b) is complied with.

(b) Hazardous waste shall not be placed in an unwashed container that previously held an incompatible waste or material. As required by Section R315-264-13, the waste analysis plan shall include analyses needed to comply with Section R315-264-177. Also, Subsection R315-264-17(c) requires wastes analyses, trial tests or other documentation to assure compliance with Subsection R315-264-17(b). As required by Section R315-264-73, the owner or operator shall place the results of each waste analysis and trial test, and any documented information, in the operating record of the facility.

(c) A storage container holding a hazardous waste that is incompatible with any waste or other materials stored nearby in other containers, piles, open tanks, or surface impoundments shall be separated from the other materials or protected from them by means of a dike, berm, wall, or other device. The purpose of Section R315-264-177 is to prevent fires, explosions, gaseous emission, leaching, or other discharge of hazardous waste or hazardous waste constituents which could result from the mixing of incompatible wastes or materials if containers break or leak.

R315-264-178. Closure.

At closure, all hazardous waste and hazardous waste residues shall be removed from the containment system. Remaining containers, liners, bases, and soil containing or contaminated with hazardous waste or hazardous waste residues shall be decontaminated or removed. At closure, as throughout the operating period, unless the owner or operator can demonstrate in accordance with Subsection R315-261-3(d) that the solid waste removed from the containment system is not a hazardous waste, the owner or operator becomes a generator of hazardous waste and shall manage it in accordance with all applicable requirements of Rules R315-262 through 266.

R315-264-179. Air Emission Standards.

The owner or operator shall manage all hazardous waste placed in a container in accordance with the applicable requirements of Sections R315-264-1030 through 1036, 1050 through 1065, and 1080 through 1090.

R315-264-190. Tank Systems - Applicability.

The requirements of Sections R315-264-190 through 200 apply to owners and operators of facilities that use tank systems for storing or treating hazardous waste except as otherwise provided in Subsections R315-264-190(a), (b), and (c) or in Section R315-264-1.

(a) Tank systems that are used to store or treat hazardous waste which contains no free liquids and are situated inside a building with an impermeable floor are exempted from the requirements in Section R315-264-193. To demonstrate the absence or presence of free liquids in the stored/treated waste, the following test shall be used: Method 9095B, Paint Filter Liquids Test, as described in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846, as incorporated by reference in R315-260-11.

(b) Tank systems, including sumps, as defined in Section R315-260-10, that serve as part of a secondary containment system to collect or contain releases of hazardous wastes are exempted from the requirements in Subsection R315-264-193(a).

(c) Tanks, sumps, and other such collection devices or systems used in conjunction with drip pads, as defined in Section R315-260-10 and regulated under Sections R315-264-570 through 575, shall meet the requirements of Sections R315-264-190 through 200.

R315-264-191. Assessment of Existing Tank System's Integrity.

(a) For each existing tank system that does not have secondary containment meeting the requirements of Section R315-264-193, the owner or operator shall determine that the tank system is not leaking or is unfit for use. Except as provided in Subsection R315-264-191(c), the owner or operator shall obtain and keep on file at the facility a written assessment reviewed and certified by a qualified Professional Engineer, in accordance with Subsection R315-270-11(d), that attests to the tank system's integrity.

(b) This assessment shall determine that the tank system is adequately designed and has sufficient structural strength and compatibility with the waste(s) to be stored or treated, to ensure that it will not collapse, rupture, or fail. At a minimum, this assessment shall consider the following:

(1) Design standard(s), if available, according to which the tank and ancillary equipment were constructed;

(2) Hazardous characteristics of the waste(s) that have been and will be handled;

(3) Existing corrosion protection measures;

(4) Documented age of the tank system, if available (otherwise, an estimate of the age); and

(5) Results of a leak test, internal inspection, or other tank integrity examination such that:

(i) For non-enterable underground tanks, the assessment shall include a leak test that is capable of taking into account the effects of temperature variations, tank end deflection, vapor pockets, and high water table effects, and

(ii) For other than non-enterable underground tanks and for ancillary equipment, this assessment shall include either a leak test, as described above, or other integrity examination that is certified by a qualified Professional Engineer in accordance with Subsection R315-270-11(d), that addresses cracks, leaks, corrosion, and erosion.

Note: The practices described in the American Petroleum Institute (API) Publication, Guide for Inspection of Refinery Equipment, Chapter XIII, "Atmospheric and Low-Pressure Storage Tanks," 4th edition, 1981, may be used, where applicable, as guidelines in conducting other than a leak test.

(c) Tank systems that store or treat materials that become hazardous wastes subsequent to July 14, 1986, shall conduct this assessment within 12 months after the date that the waste becomes a hazardous waste.

(d) If, as a result of the assessment conducted in accordance with Subsection R315-264-191(a), a tank system is found to be leaking or unfit for use, the owner or operator shall comply with the requirements of Section R315-264-196.

R315-264-192. Design and Installation of New Tank Systems or Components.

(a) Owners or operators of new tank systems or

components shall obtain and submit to the Director, at time of submittal of part B information, a written assessment, reviewed and certified by a qualified Professional Engineer, in accordance with Subsection R315-270-11(d), attesting that the tank system has sufficient structural integrity and is acceptable for the storing and treating of hazardous waste. The assessment shall show that the foundation, structural support, seams, connections, and pressure controls, if applicable, are adequately designed and that the tank system has sufficient structural strength, compatibility with the waste(s) to be stored or treated, and corrosion protection to ensure that it will not collapse, rupture, or fail. This assessment, which shall be used by the Director to review and approve or disapprove the acceptability of the tank system design, shall include, at a minimum, the following information:

(1) Design standard(s) according to which tank(s) and/or the ancillary equipment are constructed;

(2) Hazardous characteristics of the waste(s) to be handled;

(3) For new tank systems or components in which the external shell of a metal tank or any external metal component of the tank system will be in contact with the soil or with water, a determination by a corrosion expert of:

(i) Factors affecting the potential for corrosion, including but not limited to:

(A) Soil moisture content;

(B) Soil pH;

(C) Soil sulfides level;

(D) Soil resistivity;

(E) Structure to soil potential;

(F) Influence of nearby underground metal structures, e.g., piping;

(G) Existence of stray electric current;

(H) Existing corrosion-protection measures, e.g., coating, cathodic protection, and

(ii) The type and degree of external corrosion protection that are needed to ensure the integrity of the tank system during the use of the tank system or component, consisting of one or more of the following:

(A) Corrosion-resistant materials of construction such as special alloys, fiberglass reinforced plastic, etc.;

(B) Corrosion-resistant coating, such as epoxy, fiberglass, etc., with cathodic protection, e.g., impressed current or sacrificial anodes; and

(C) Electrical isolation devices such as insulating joints, flanges, etc.

Note: The practices described in the National Association of Corrosion Engineers (NACE) standard, "Recommended Practice (RP-02-85)-Control of External Corrosion on Metallic Buried, Partially Buried, or Submerged Liquid Storage Systems," and the American Petroleum Institute (API) Publication 1632, "Cathodic Protection of Underground Petroleum Storage Tanks and Piping Systems," may be used, where applicable, as guidelines in providing corrosion protection for tank systems.

(4) For underground tank system components that are likely to be adversely affected by vehicular traffic, a determination of design or operational measures that will protect the tank system against potential damage; and

(5) Design considerations to ensure that:

(i) Tank foundations will maintain the load of a full tank;

(ii) Tank systems shall be anchored to prevent flotation or dislodgment where the tank system is placed in a saturated zone, or is located within a seismic fault zone subject to the standards of Subsection R315-264-18(a); and

(iii) Tank systems shall withstand the effects of frost heave.

(b) The owner or operator of a new tank system shall ensure that proper handling procedures are adhered to in order to prevent damage to the system during installation. Prior to covering, enclosing, or placing a new tank system or component in use, an independent, qualified, installation inspector or a qualified Professional Engineer, either of whom is trained and experienced in the proper installation of tanks systems or components, shall inspect the system for the presence of any of the following items:

(1) Weld breaks;

(2) Punctures;

(3) Scrapes of protective coatings;

(4) Cracks;

(5) Corrosion;

(6) Other structural damage or inadequate construction/installation. All discrepancies shall be remedied before the tank system is covered, enclosed, or placed in use.

(c) New tank systems or components that are placed underground and that are backfilled shall be provided with a backfill material that is a noncorrosive, porous, homogeneous substance and that is installed so that the backfill is placed completely around the tank and compacted to ensure that the tank and piping are fully and uniformly supported.

(d) All new tanks and ancillary equipment shall be tested for tightness prior to being covered, enclosed, or placed in use. If a tank system is found not to be tight, all repairs necessary to remedy the leak(s) in the system shall be performed prior to the tank system being covered, enclosed, or placed into use.

(e) Ancillary equipment shall be supported and protected against physical damage and excessive stress due to settlement, vibration, expansion, or contraction.

Note: The piping system installation procedures described in American Petroleum Institute (API) Publication 1615 (November 1979), "Installation of Underground Petroleum Storage Systems," or ANSI Standard B31.3, "Petroleum Refinery Piping," and ANSI Standard B31.4 "Liquid Petroleum Transportation Piping System," may be used, where applicable, as guidelines for proper installation of piping systems.

(f) The owner or operator shall provide the type and degree of corrosion protection recommended by an independent corrosion expert, based on the information provided under Subsection R315-264-192(a)(3), or other corrosion protection if the Director believes other corrosion protection is necessary to ensure the integrity of the tank system during use of the tank system. The installation of a corrosion protection system that is field fabricated shall be supervised by an independent corrosion expert to ensure proper installation.

(g) The owner or operator shall obtain and keep on file at the facility written statements by those persons required to certify the design of the tank system and supervise the installation of the tank system in accordance with the requirements of Subsections R315-264-192(b) through (f), that attest that the tank system was properly designed and installed and that repairs, pursuant to Subsections R315-264-192(b) and (d), were performed. These written statements shall also include the certification statement as required in Subsection R315-270-11(d).

R315-264-193. Containment and Detection of Releases.

(a) In order to prevent the release of hazardous waste or hazardous constituents to the environment, secondary containment that meets the requirements of Section R315-264-193 shall be provided, except as provided in Subsections R315-264-193(f) and (g):

(1) For all new and existing tank systems or components, prior to their being put into service.

(2) For tank systems that store or treat materials that become hazardous wastes, within two years of the hazardous waste listing, or when the tank system has reached 15 years of age, whichever comes later.

(b) Secondary containment systems shall be:

(1) Designed, installed, and operated to prevent any migration of wastes or accumulated liquid out of the system to the soil, ground water, or surface water at any time during the use of the tank system; and

(2) Capable of detecting and collecting releases and accumulated liquids until the collected material is removed.

(c) To meet the requirements of Subsection R315-264-193(b), secondary containment systems shall be at a minimum:

(1) Constructed of or lined with materials that are compatible with the wastes(s) to be placed in the tank system and shall have sufficient strength and thickness to prevent failure owing to pressure gradients, including static head and external hydrological forces, physical contact with the waste to which it is exposed, climatic conditions, and the stress of daily operation, including stresses from nearby vehicular traffic.

(2) Placed on a foundation or base capable of providing support to the secondary containment system, resistance to pressure gradients above and below the system, and capable of preventing failure due to settlement, compression, or uplift;

(3) Provided with a leak-detection system that is designed and operated so that it will detect the failure of either the primary or secondary containment structure or the presence of any release of hazardous waste or accumulated liquid in the secondary containment system within 24 hours, or at the earliest practicable time if the owner or operator can demonstrate to the Director that existing detection technologies or site conditions shall not allow detection of a release within 24 hours; and

(4) Sloped or otherwise designed or operated to drain and remove liquids resulting from leaks, spills, or precipitation. Spilled or leaked waste and accumulated precipitation shall be removed from the secondary containment system within 24 hours, or in as timely a manner as is possible to prevent harm to human health and the environment, if the owner or operator can demonstrate to the Director that removal of the released waste or accumulated precipitation cannot be accomplished within 24 hours.

Note: If the collected material is a hazardous waste under Rule R315-261, it is subject to management as a hazardous waste in accordance with all applicable requirements of Rules R315-262 through 265. If the collected material is discharged through a point source to waters of the United States, it is subject to the requirements of sections 301, 304, and 402 of the Clean Water Act, as amended. If discharged to a Publicly Owned Treatment Works (POTW), it is subject to the requirements of section 307 of the Clean Water Act, as amended. If the collected material is released to the environment, it may be subject to the reporting requirements of 40 CFR part 302.

(d) Secondary containment for tanks shall include one or more of the following devices:

(1) A liner, external to the tank;

(2) A vault;

(3) A double-walled tank; or

(4) An equivalent device as approved by the Director.

(e) In addition to the requirements of Subsections R315-264-193(b), (c), and (d), secondary containment systems shall satisfy the following requirements:

(1) External liner systems shall be:

(i) Designed or operated to contain 100 percent of the capacity of the largest tank within its boundary;

(ii) Designed or operated to prevent run-on or infiltration of precipitation into the secondary containment system unless the collection system has sufficient excess capacity to contain run-on or infiltration. Such additional capacity shall be sufficient to contain precipitation from a 25-year, 24-hour rainfall event.

(iii) Free of cracks or gaps; and

(iv) Designed and installed to surround the tank completely and to cover all surrounding earth likely to come into contact with the waste if the waste is released from the tank(s), i.e., capable of preventing lateral as well as vertical migration of the waste.

(2) Vault systems shall be:

(i) Designed or operated to contain 100 percent of the capacity of the largest tank within its boundary;

(ii) Designed or operated to prevent run-on or infiltration of precipitation into the secondary containment system unless the collection system has sufficient excess capacity to contain run-on or infiltration. Such additional capacity shall be sufficient to contain precipitation from a 25-year, 24-hour rainfall event;

(iii) Constructed with chemical-resistant water stops in place at all joints, if any;

(iv) Provided with an impermeable interior coating or lining that is compatible with the stored waste and that shall prevent migration of waste into the concrete;

(v) Provided with a means to protect against the formation of and ignition of vapors within the vault, if the waste being stored or treated:

(A) Meets the definition of ignitable waste under Section R315-261-21; or

(B) Meets the definition of reactive waste under Section R315-261-23, and may form an ignitable or explosive vapor; and

(vi) Provided with an exterior moisture barrier or be otherwise designed or operated to prevent migration of moisture into the vault if the vault is subject to hydraulic pressure.

(3) Double-walled tanks shall be:

(i) Designed as an integral structure, i.e., an inner tank completely enveloped within an outer shell, so that any release from the inner tank is contained by the outer shell;

(ii) Protected, if constructed of metal, from both corrosion of the primary tank interior and of the external surface of the outer shell; and

(iii) Provided with a built-in continuous leak detection system capable of detecting a release within 24 hours, or at the earliest practicable time, if the owner or operator can demonstrate to the Director, and the Director concludes, that the existing detection technology or site conditions would not allow detection of a release within 24 hours.

Note: The provisions outlined in the Steel Tank Institute's (STI) "Standard for Dual Wall Underground Steel Storage Tanks" may be used as guidelines for aspects of the design of underground steel double-walled tanks.

(f) Ancillary equipment shall be provided with secondary containment, e.g., trench, jacketing, double-walled piping, that meets the requirements of Subsections R315-264-193(b) and (c) except for:

(1) Aboveground piping, exclusive of flanges, joints, valves, and other connections, that are visually inspected for leaks on a daily basis;

(2) Welded flanges, welded joints, and welded connections, that are visually inspected for leaks on a daily basis;

(3) Sealless or magnetic coupling pumps and sealless valves, that are visually inspected for leaks on a daily basis; and

(4) Pressurized aboveground piping systems with automatic shut-off devices, e.g., excess flow check valves,

flow metering shutdown devices, loss of pressure actuated shut-off devices, that are visually inspected for leaks on a daily basis.

(g) The owner or operator may obtain a variance from the requirements Section R315-264-193 if the Director finds, as a result of a demonstration by the owner or operator that alternative design and operating practices, together with location characteristics, will prevent the migration of any hazardous waste or hazardous constituents into the ground water; or surface water at least as effectively as secondary containment during the active life of the tank system or that in the event of a release that does migrate to ground water or surface water, no substantial present or potential hazard will be posed to human health or the environment. New underground tank systems may not, per a demonstration in accordance with Subsection R315-264-193(g)(2), be exempted from the secondary containment requirements Section R315-264-193.

(1) In deciding whether to grant a variance based on a demonstration of equivalent protection of ground water and surface water, the Director shall consider:

(i) The nature and quantity of the wastes;

(ii) The proposed alternate design and operation;

(iii) The hydrogeologic setting of the facility, including the thickness of soils present between the tank system and ground water; and

(iv) All other factors that would influence the quality and mobility of the hazardous constituents and the potential for them to migrate to ground water or surface water.

(2) In deciding whether to grant a variance based on a demonstration of no substantial present or potential hazard, the Director shall consider:

(i) The potential adverse effects on ground water, surface water, and land quality taking into account:

(A) The physical and chemical characteristics of the waste in the tank system, including its potential for migration,

(B) The hydrogeological characteristics of the facility and surrounding land,

(C) The potential for health risks caused by human exposure to waste constituents,

(D) The potential for damage to wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents, and

(E) The persistence and permanence of the potential adverse effects;

(ii) The potential adverse effects of a release on ground-water quality, taking into account:

(A) The quantity and quality of ground water and the direction of ground-water flow,

(B) The proximity and withdrawal rates of ground-water users,

(C) The current and future uses of ground water in the area, and

(D) The existing quality of ground water, including other sources of contamination and their cumulative impact on the ground-water quality;

(iii) The potential adverse effects of a release on surface water quality, taking into account:

(A) The quantity and quality of ground water and the direction of ground-water flow,

(B) The patterns of rainfall in the region,

(C) The proximity of the tank system to surface waters,

(D) The current and future uses of surface waters in the area and any water quality standards established for those surface waters, and

(E) The existing quality of surface water, including other sources of contamination and the cumulative impact on surface-water quality; and

(iv) The potential adverse effects of a release on the land surrounding the tank system, taking into account:

(A) The patterns of rainfall in the region, and

(B) The current and future uses of the surrounding land.

(3) The owner or operator of a tank system, for which a variance from secondary containment had been granted in accordance with the requirements of Subsection R315-264-193(g)(1), at which a release of hazardous waste has occurred from the primary tank system but has not migrated beyond the zone of engineering control, as established in the variance, shall:

(i) Comply with the requirements of Section R315-264-196, except Subsection R315-264-193(d), and

(ii) Decontaminate or remove contaminated soil to the extent necessary to:

(A) Enable the tank system for which the variance was granted to resume operation with the capability for the detection of releases at least equivalent to the capability it had prior to the release; and

(B) Prevent the migration of hazardous waste or hazardous constituents to ground water or surface water; and

(iii) If contaminated soil cannot be removed or decontaminated in accordance with Subsection R315-264-193(g)(3)(ii), comply with the requirement of Subsection R315-264-197(b).

(4) The owner or operator of a tank system, for which a variance from secondary containment had been granted in accordance with the requirements of Subsection R315-264-193(g)(1), at which a release of hazardous waste has occurred from the primary tank system and has migrated beyond the zone of engineering control,as established in the variance, shall:

(i) Comply with the requirements of Subsections R315-264-196(a), (b), (c), and (d); and

(ii) Prevent the migration of hazardous waste or hazardous constituents to ground water or surface water, if possible, and decontaminate or remove contaminated soil. If contaminated soil cannot be decontaminated or removed or if ground water has been contaminated, the owner or operator shall comply with the requirements of Subsection R315-264-197(b); and

(iii) If repairing, replacing, or reinstalling the tank system, provide secondary containment in accordance with the requirements of Subsections R315-264-193(a) through (f) or reapply for a variance from secondary containment and meet the requirements for new tank systems in Section R315-264-192 if the tank system is replaced. The owner or operator shall comply with these requirements even if contaminated soil can be decontaminated or removed and ground water or surface water has not been contaminated.

(h) The following procedures shall be followed in order to request a variance from secondary containment:

(1) The Director shall be notified in writing by the owner or operator that he intends to conduct and submit a demonstration for a variance from secondary containment as allowed in Subsection R315-264-193(g) according to the following schedule:

(i) For existing tank systems, at least 24 months prior to the date that secondary containment shall be provided in accordance with Subsection R315-264-193(a).

(ii) For new tank systems, at least 30 days prior to entering into a contract for installation.

(2) As part of the notification, the owner or operator shall also submit to the Director a description of the steps necessary to conduct the demonstration and a timetable for completing each of the steps. The demonstration shall address each of the factors listed in Subsection R315-264-193(g)(1) or (g)(2);

(3) The demonstration for a variance shall be completed within 180 days after notifying the Director of an intent to

conduct the demonstration; and

(4) If a variance is granted under Subsection R315-264-193(h), the Director shall require the permittee to construct and operate the tank system in the manner that was demonstrated to meet the requirements for the variance.

(i) All tank systems, until such time as secondary containment that meets the requirements Section R315-264-193 is provided, shall comply with the following:

(1) For non-enterable underground tanks, a leak test that meets the requirements of Subsection R315-264-191(b)(5) or other tank integrity method, as approved or required by the Director, shall be conducted at least annually.

(2) For other than non-enterable underground tanks, the owner or operator shall either conduct a leak test as in Subsection R315-264-193(i)(1) or develop a schedule and procedure for an assessment of the overall condition of the tank system by a qualified Professional Engineer. The schedule and procedure shall be adequate to detect obvious cracks, leaks, and corrosion or erosion that may lead to cracks and leaks. The owner or operator shall remove the stored waste from the tank, if necessary, to allow the condition of all internal tank surfaces to be assessed. The frequency of these assessments shall be based on the material of construction of the tank and its ancillary equipment, the age of the system, the type of corrosion or erosion protection used, the rate of corrosion or erosion observed during the previous inspection, and the characteristics of the waste being stored or treated.

(3) For ancillary equipment, a leak test or other integrity assessment as approved by the Director shall be conducted at least annually.

Note: The practices described in the American Petroleum Institute (API) Publication Guide for Inspection of Refinery Equipment, Chapter XIII, "Atmospheric and Low-Pressure Storage Tanks," 4th edition, 1981, may be used, where applicable, as guidelines for assessing the overall condition of the tank system.

(4) The owner or operator shall maintain on file at the facility a record of the results of the assessments conducted in accordance with Subsections R315-264-193(i)(1) through (i)(3).

(5) If a tank system or component is found to be leaking or unfit for use as a result of the leak test or assessment in Subsections R315-264-193(i)(1) through (i)(3), the owner or operator shall comply with the requirements of Section R315-264-196.

R315-264-194. General Operating Requirements.

(a) Hazardous wastes or treatment reagents shall not be placed in a tank system if they could cause the tank, its ancillary equipment, or the containment system to rupture, leak, corrode, or otherwise fail.

(b) The owner or operator shall use appropriate controls and practices to prevent spills and overflows from tank or containment systems. These include at a minimum:

(1) Spill prevention controls, e.g., check valves, dry disconnect couplings;

(2) Overfill prevention controls, e.g., level sensing devices, high level alarms, automatic feed cutoff, or bypass to a standby tank; and

(3) Maintenance of sufficient freeboard in uncovered tanks to prevent overtopping by wave or wind action or by precipitation.

(c) The owner or operator shall comply with the requirements of Section R315-264-196 if a leak or spill occurs in the tank system.

R315-264-195. Inspections.

(a) The owner or operator shall develop and follow a schedule and procedure for inspecting overfill controls.

(b) The owner or operator shall inspect at least once each operating day data gathered from monitoring and leak detection equipment, e.g., pressure or temperature gauges, monitoring wells, to ensure that the tank system is being operated according to its design.

Note: Subsection R315-264-15(c) requires the owner or operator to remedy any deterioration or malfunction he finds. Section R315-264-196 requires the owner or operator to notify the Director within 24 hours of confirming a leak. Also, 40 CFR part 302 may require the owner or operator to notify the National Response Center of a release.

(c) In addition, except as noted under Subsection R315-264-195(d), the owner or operator shall inspect at least once each operating day:

(1) Above ground portions of the tank system, if any, to detect corrosion or releases of waste.

(2) The construction materials and the area immediately surrounding the externally accessible portion of the tank system, including the secondary containment system, e.g., dikes, to detect erosion or signs of releases of hazardous waste, e.g., wet spots, dead vegetation.

(d) Owners or operators of tank systems that either use leak detection systems to alert facility personnel to leaks, or implement established workplace practices to ensure leaks are promptly identified, shall inspect at least weekly those areas described in Subsections R315-264-195(c)(1) and (c)(2). Use of the alternate inspection schedule shall be documented in the facility's operating record. This documentation shall include a description of the established workplace practices at the facility.

(e) Reserved

(f) Ancillary equipment that is not provided with secondary containment, as described in Subsections R315-264-193(f)(1) through (4), shall be inspected at least once each operating day.

(g) The owner or operator shall inspect cathodic protection systems, if present, according to, at a minimum, the following schedule to ensure that they are functioning properly:

(1) The proper operation of the cathodic protection system shall be confirmed within six months after initial installation and annually thereafter; and

(2) All sources of impressed current shall be inspected and/or tested, as appropriate, at least bimonthly, i.e., every other month.

Note: The practices described in the National Association of Corrosion Engineers (NACE) standard, "Recommended Practice (RP-02-85)-Control of External Corrosion on Metallic Buried, Partially Buried, or Submerged Liquid Storage Systems," and the American Petroleum Institute (API) Publication 1632, "Cathodic Protection of Underground Petroleum Storage Tanks and Piping Systems," may be used, where applicable, as guidelines in maintaining and inspecting cathodic protection systems.

(h) The owner or operator shall document in the operating record of the facility an inspection of those items in Subsections R315-264-195(a) through (c).

R315-264-196. Response to Leaks or Spills and Disposition of Leaking or Unfit-for-Use Tank Systems.

A tank system or secondary containment system from which there has been a leak or spill, or which is unfit for use, shall be removed from service immediately, and the owner or operator shall satisfy the following requirements:

(a) Cessation of use; prevent flow or addition of wastes. The owner or operator shall immediately stop the flow of hazardous waste into the tank system or secondary containment system and inspect the system to determine the cause of the release.

(b) Removal of waste from tank system or secondary containment system.

(1) If the release was from the tank system, the owner/operator shall, within 24 hours after detection of the leak or, if the owner/operator demonstrates that it is not possible, at the earliest practicable time, remove as much of the waste as is necessary to prevent further release of hazardous waste to the environment and to allow inspection and repair of the tank system to be performed.

(2) If the material released was to a secondary containment system, all released materials shall be removed within 24 hours or in as timely a manner as is possible to prevent harm to human health and the environment.

(c) Containment of visible releases to the environment. The owner/operator shall immediately conduct a visual inspection of the release and, based upon that inspection:

(1) Prevent further migration of the leak or spill to soils or surface water; and

(2) Remove, and properly dispose of, any visible contamination of the soil or surface water.

(d) Notifications, reports.

(1) Any release to the environment, except as provided in Subsection R315-264-196(d)(2), shall be reported to the Director within 24 hours of its detection. If the release has been reported pursuant to 40 CFR part 302, that report shall satisfy this requirement.

(2) A leak or spill of hazardous waste is exempted from the requirements of Subsection R315-264-196(d) if it is:

(i) Less than or equal to a quantity of one (1) pound, and

(ii) Immediately contained and cleaned up.

(3) Within 30 days of detection of a release to the environment, a report containing the following information shall be submitted to the Director:

(i) Likely route of migration of the release;

(ii) Characteristics of the surrounding soil, soil composition, geology, hydrogeology, climate;

(iii) Results of any monitoring or sampling conducted in connection with the release, if available. If sampling or monitoring data relating to the release are not available within 30 days, these data shall be submitted to the Director as soon as they become available.

(iv) Proximity to downgradient drinking water, surface water, and populated areas; and

(v) Description of response actions taken or planned.

(e) Provision of secondary containment, repair, or closure.

(1) Unless the owner/operator satisfies the requirements of Subsection R315-264-196(e)(2) through (4), the tank system shall be closed in accordance with Section R315-264-197.

(2) If the cause of the release was a spill that has not damaged the integrity of the system, the owner/operator may return the system to service as soon as the released waste is removed and repairs, if necessary, are made.

(3) If the cause of the release was a leak from the primary tank system into the secondary containment system, the system shall be repaired prior to returning the tank system to service.

(4) If the source of the release was a leak to the environment from a component of a tank system without secondary containment, the owner/operator shall provide the component of the system from which the leak occurred with secondary containment that satisfies the requirements of Section R315-264-193 before it can be returned to service, unless the source of the leak is an aboveground portion of a tank system that can be inspected visually. If the source is an aboveground component that can be inspected visually, the component shall be repaired and may be returned to service without secondary containment as long as the requirements of Subsection R315-264-196(f) are satisfied. If a component is replaced to comply with the requirements of Subsection R315-264-196(e)(4), that component shall satisfy the requirements for new tank systems or components in Sections R315-264-192 and 193. Additionally, if a leak has occurred in any portion of a tank system component that is not readily accessible for visual inspection, e.g., the bottom of an inground or onground tank, the entire component shall be provided with secondary containment in accordance with Section R315-264-193 prior to being returned to use.

(f) Certification of major repairs. If the owner/operator has repaired a tank system in accordance with Subsection R315-264-196(e), and the repair has been extensive, e.g., installation of an internal liner; repair of a ruptured primary containment or secondary containment vessel, the tank system shall not be returned to service unless the owner/operator has obtained a certification by a qualified Professional Engineer in accordance with Subsection R315-270-11(d) that the repaired system is capable of handling hazardous wastes without release for the intended life of the system. This certification shall be placed in the operating record and maintained until closure of the facility.

Note: The Director may, on the basis of any information received that there is or has been a release of hazardous waste or hazardous constituents into the environment, issue an order requiring corrective action or such other response as deemed necessary to protect human health or the environment.

Note: See Subsection R315-264-15(c) for the requirements necessary to remedy a failure. Also, 40 CFR part 302 may require the owner or operator to notify the National Response Center of certain releases.

R315-264-197. Closure and Post-Closure Care.

(a) At closure of a tank system, the owner or operator shall remove or decontaminate all waste residues, contaminated containment system components, liners, etc., contaminated soils, and structures and equipment contaminated with waste, and manage them as hazardous waste, unless Subsection R315-261-3(d) applies. The closure plan, closure activities, cost estimates for closure, and financial responsibility for tank systems shall meet all of the requirements specified in Sections R315-264-110 through 120, 140 through 151.

(b) If the owner or operator demonstrates that not all contaminated soils can be practicably removed or decontaminated as required in Subsection R315-264-197(a), then the owner or operator shall close the tank system and perform post-closure care in accordance with the closure and post-closure care requirements that apply to landfills, Subsection R315-264-310. In addition, for the purposes of closure, post-closure, and financial responsibility, such a tank system is then considered to be a landfill, and the owner or operator shall meet all of the requirements for landfills specified in Sections R315-264-110 through 120, 140 through 151.

(c) If an owner or operator has a tank system that does not have secondary containment that meets the requirements of Subsections R315-264-193(b) through (f) and has not been granted a variance from the secondary containment requirements in accordance with Subsection R315-264-193(g), then:

(1) The closure plan for the tank system shall include both a plan for complying with Subsection R315-264-197(a) and a contingent plan for complying with Subsection R315-264-197(b).

(2) A contingent post-closure plan for complying with Subsection R315-264-197(b) shall be prepared and submitted as part of the permit application.

(3) The cost estimates calculated for closure and post-

closure care shall reflect the costs of complying with the contingent closure plan and the contingent post-closure plan, if those costs are greater than the costs of complying with the closure plan prepared for the expected closure under Subsection R315-264-197(a).

(4) Financial assurance shall be based on the cost estimates in Subsection R315-264-197(c)(3).

(5) For the purposes of the contingent closure and post-closure plans, such a tank system is considered to be a landfill, and the contingent plans shall meet all of the closure, post-closure, and financial responsibility requirements for landfills under Sections R315-264-110 through 120, 140 through 148, and 151.

R315-264-198. Special Requirements for Ignitable or Reactive Wastes.

(a) Ignitable or reactive waste shall not be placed in tank systems, unless:

(1) The waste is treated, rendered, or mixed before or immediately after placement in the tank system so that:

(i) The resulting waste, mixture, or dissolved material no longer meets the definition of ignitable or reactive waste under Sections R315-261-21 or 23, and

(ii) Subsection R315-264-17(b) is complied with; or

(2) The waste is stored or treated in such a way that it is protected from any material or conditions that may cause the waste to ignite or react; or

(3) The tank system is used solely for emergencies.

(b) The owner or operator of a facility where ignitable or reactive waste is stored or treated in a tank shall comply with the requirements for the maintenance of protective distances between the waste management area and any public ways, streets, alleys, or an adjoining property line that can be built upon as required in Tables 2-1 through 2-6 of the National Fire Protection Association's "Flammable and Combustible Liquids Code," (1977 or 1981), incorporated by reference, see Section R315-260-11.

R315-264-199. Special Requirements for Incompatible Wastes.

(a) Incompatible wastes, or incompatible wastes and materials, shall not be placed in the same tank system, unless Subsection R315-264-17(b) is complied with.

(b) Hazardous waste shall not be placed in a tank system that has not been decontaminated and that previously held an incompatible waste or material, unless Subsection R315-264-17(b) is complied with.

R315-264-200. Air Emission Standards.

The owner or operator shall manage all hazardous waste placed in a tank in accordance with the applicable requirements of Sections R315-264-1030 through 1036, 1050 through 1065 and 1080 through 1090.

R315-264-220. Surface Impoundments -- Applicability.

The regulations in Sections R315-264-220 through 223 and 226 through 232 apply to owners and operators of facilities that use surface impoundments to treat, store, or dispose of hazardous waste except as Section R315-264-1 provides otherwise.

R315-264-221. Design and Operating Requirements.

(a) Any surface impoundment that is not covered by Subsection R315-264-221(c) or 40 CFR 265.221, which is adopted by reference, shall have a liner for all portions of the impoundment, except for existing portions of such impoundments. The liner shall be designed, constructed, and installed to prevent any migration of wastes out of the impoundment to the adjacent subsurface soil or ground water or surface water at any time during the active life, including the closure period, of the impoundment. The liner may be constructed of materials that may allow wastes to migrate into the liner, but not into the adjacent subsurface soil or ground water or surface water, during the active life of the facility, provided that the impoundment is closed in accordance with Subsection R315-264-228(a)(1). For impoundments that will be closed in accordance with Subsection R315-264-228(a)(2), the liner shall be constructed of materials that can prevent wastes from migrating into the liner during the active life of the facility. The liner shall be:

(1) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients, including static head and external hydrogeologic forces, physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(2) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(3) Installed to cover all surrounding earth likely to be in contact with the waste or leachate.

(b) The owner or operator shall be exempted from the requirements of Subsection R315-264-221(a) if the Director finds, based on a demonstration by the owner or operator, that alternate design and operating practices, together with location characteristics, shall prevent the migration of any hazardous constituents, see Subsection R315-264-93, into the ground water or surface water at any future time. In deciding whether to grant an exemption, the Director shall consider:

(1) The nature and quantity of the wastes;

(2) The proposed alternate design and operation;

(3) The hydrogeologic setting of the facility, including the attenuative capacity and thickness of the liners and soils present between the impoundment and ground water or surface water; and

(4) All other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to ground water or surface water.

(c) The owner or operator of each new surface impoundment unit on which construction commences after January 29, 1992, each lateral expansion of a surface impoundment unit on which construction commences after July 29, 1992 and each replacement of an existing surface impoundment unit that is to commence reuse after July 29, 1992 shall install two or more liners and a leachate collection and removal system between such liners. "Construction commences" is as defined in Section R315-260-10 under "existing facility".

(1)(i) The liner system shall include:

(A) A top liner designed and constructed of materials, e.g., a geomembrane, to prevent the migration of hazardous constituents into such liner during the active life and post-closure care period; and

(B) A composite bottom liner, consisting of at least two components. The upper component shall be designed and constructed of materials, e.g., a geomembrane, to prevent the migration of hazardous constituents into this component during the active life and post-closure care period. The lower component shall be designed and constructed of materials to minimize the migration of hazardous constituents if a breach in the upper component were to occur. The lower component shall be constructed of at least 3 feet, 91 cm, of compacted soil material with a hydraulic conductivity of no more than 1×10^{-7} cm/sec.

(ii) The liners shall comply with Subsections R315-264-221(a)(1), (2), and (3).

(2) The leachate collection and removal system between the liners, and immediately above the bottom composite liner in the case of multiple leachate collection and removal systems, is also a leak detection system. This leak detection system shall be capable of detecting, collecting, and removing leaks of hazardous constituents at the earliest practicable time through all areas of the top liner likely to be exposed to waste or leachate during the active life and post-closure care period. The requirements for a leak detection system in Subsection R315-264-221(c)(2) are satisfied by installation of a system that is, at a minimum:

(i) Constructed with a bottom slope of one percent or more;

(ii) Constructed of granular drainage materials with a hydraulic conductivity of 1 x 10^{-1} cm/sec or more and a thickness of 12 inches (30.5 cm) or more; or constructed of synthetic or geonet drainage materials with a transmissivity of 3 x 10^{-4} m^2/sec or more;

(iii) Constructed of materials that are chemically resistant to the waste managed in the surface impoundment and the leachate expected to be generated, and of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying wastes and any waste cover materials or equipment used at the surface impoundment;

(iv) Designed and operated to minimize clogging during the active life and post-closure care period; and

(v) Constructed with sumps and liquid removal methods, e.g., pumps, of sufficient size to collect and remove liquids from the sump and prevent liquids from backing up into the drainage layer. Each unit shall have its own sump(s). The design of each sump and removal system shall provide a method for measuring and recording the volume of liquids present in the sump and of liquids removed.

(3) The owner or operator shall collect and remove pumpable liquids in the sumps to minimize the head on the bottom liner.

(4) The owner or operator of a leak detection system that is not located completely above the seasonal high water table shall demonstrate that the operation of the leak detection system will not be adversely affected by the presence of ground water.

(d) The Director may approve alternative design or operating practices to those specified in Subsection R315-264-221(c) if the owner or operator demonstrates to the Director that such design and operating practices, together with location characteristics:

(1) Will prevent the migration of any hazardous constituent into the ground water or surface water at least as effectively as the liners and leachate collection and removal system specified in Subsection R315-264-221(c); and

(2) Will allow detection of leaks of hazardous constituents through the top liner at least as effectively.

(e) The double liner requirement set forth in Subsection R315-264-221(c) may be waived by the Director for any monofill, if:

(1) The monofill contains only hazardous wastes from foundry furnace emission controls or metal casting molding sand, and such wastes do not contain constituents which would render the wastes hazardous for reasons other than the toxicity characteristic in Section R315-261-24; and

(2)(i)(A) The monofill has at least one liner for which there is no evidence that such liner is leaking. For the purposes of Subsection R315-264-221(e), the term "liner" means a liner designed, constructed, installed, and operated to prevent hazardous waste from passing into the liner at any time during the active life of the facility, or a liner designed, constructed, installed, and operated to prevent hazardous waste from migrating beyond the liner to adjacent subsurface soil, ground water, or surface water at any time during the active life of the facility. In the case of any surface impoundment which has been exempted from the requirements of Subsection R315-264-221(c) on the basis of a liner designed, constructed, installed, and operated to prevent hazardous waste from passing beyond the liner, at the closure of such impoundment, the owner or operator shall remove or decontaminate all waste residues, all contaminated liner material, and contaminated soil to the extent practicable. If all contaminated soil is not removed or decontaminated, the owner or operator of such impoundment will comply with appropriate post-closure requirements, including but not limited to ground-water monitoring and corrective action;

(B) The monofill is located more than one-quarter mile from an "underground source of drinking water," as that term is defined in Section R315-270-2; and

(C) The monofill is in compliance with generally applicable ground-water monitoring requirements for facilities with permits under Section 19-6-108; or

(ii) The owner or operator demonstrates that the monofill is located, designed and operated so as to assure that there will be no migration of any hazardous constituent into ground water or surface water at any future time.

(f) The owner or operator of any replacement surface impoundment unit is exempt from Subsection R315-264-221(c) if:

(1) The existing unit was constructed in compliance with the design standards of sections 3004 (o)(1)(A)(i) and (o)(5) of the Resource Conservation and Recovery Act; and

(2) There is no reason to believe that the liner is not functioning as designed.

(g) A surface impoundment shall be designed, constructed, maintained, and operated to prevent overtopping resulting from normal or abnormal operations; overfilling; wind and wave action; rainfall; run-on; malfunctions of level controllers, alarms, and other equipment; and human error.

(h) A surface impoundment shall have dikes that are designed, constructed, and maintained with sufficient structural integrity to prevent massive failure of the dikes. In ensuring structural integrity, it shall not be presumed that the liner system will function without leakage during the active life of the unit.

(i) The Director shall specify in the permit all design and operating practices that are necessary to ensure that the requirements of Section R315-264-221 are satisfied.

R315-264-222. Action Leakage Rate.

(a) The Director shall approve an action leakage rate for surface impoundment units subject to Subsections R315-264221(c) or (d). The action leakage rate is the maximum design flow rate that the leak detection system can remove without the fluid head on the bottom liner exceeding one foot. The action leakage rate shall include an adequate safety margin to allow for uncertainties in the design, e.g., slope, hydraulic conductivity, thickness of drainage material, construction, operation, and location of the leak detection system, waste and leachate characteristics, likelihood and amounts of other sources of liquids in the leak detection system, and proposed response actions, e.g., the action leakage rate shall consider decreases in the flow capacity of the system over time resulting from siltation and clogging, rib layover and creep of synthetic components of the system, overburden pressures, etc.

(b) To determine if the action leakage rate has been exceeded, the owner or operator shall convert the weekly or monthly flow rate from the monitoring data obtained under Subsection R315-264-226(d) to an average daily flow rate, gallons per acre per day, for each sump. Unless the Director approves a different calculation, the average daily flow rate for each sump shall be calculated weekly during the active life

and closure period, and if the unit is closed in accordance with Subsection R315-264-228(b), monthly during the post-closure care period when monthly monitoring is required under Subsection R315-264-226(d).

R315-264-223. Response Actions.

(a) The owner or operator of surface impoundment units subject to Subsection R315-264-221(c) or (d) shall have an approved response action plan before receipt of waste. The response action plan shall set forth the actions to be taken if the action leakage rate has been exceeded. At a minimum, the response action plan shall describe the actions specified in Subsection R315-264-223(b).

(b) If the flow rate into the leak detection system exceeds the action leakage rate for any sump, the owner or operator shall:

(1) Notify the Director in writing of the exceedance within 7 days of the determination;

(2) Submit a preliminary written assessment to the Director within 14 days of the determination, as to the amount of liquids, likely sources of liquids, possible location, size, and cause of any leaks, and short-term actions taken and planned;

(3) Determine to the extent practicable the location, size, and cause of any leak;

(4) Determine whether waste receipt should cease or be curtailed, whether any waste should be removed from the unit for inspection, repairs, or controls, and whether or not the unit should be closed;

(5) Determine any other short-term and longer-term actions to be taken to mitigate or stop any leaks; and

(6) Within 30 days after the notification that the action leakage rate has been exceeded, submit to the Director the results of the analyses specified in Subsections R315-264-223(b)(3), (4), and (5), the results of actions taken, and actions planned. Monthly thereafter, as long as the flow rate in the leak detection system exceeds the action leakage rate, the owner or operator shall submit to the Director a report summarizing the results of any remedial actions taken and actions planned.

(c) To make the leak and/or remediation determinations in Subsections R315-264-223(b)(3), (4), and (5), the owner or operator shall:

(1)(i) Assess the source of liquids and amounts of liquids by source,

(ii) Conduct a fingerprint, hazardous constituent, or other analyses of the liquids in the leak detection system to identify the source of liquids and possible location of any leaks, and the hazard and mobility of the liquid; and

(iii) Assess the seriousness of any leaks in terms of potential for escaping into the environment; or

(2) Document why such assessments are not needed.

R315-264-226. Monitoring and Inspection.

(a) During construction and installation, liners, except in the case of existing portions of surface impoundments exempt from Subsection R315-264-221(a), and cover systems, e.g., membranes, sheets, or coatings, shall be inspected for uniformity, damage, and imperfections, e.g., holes, cracks, thin spots, or foreign materials. Immediately after construction or installation:

(1) Synthetic liners and covers shall be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters; and

(2) Soil-based and admixed liners and covers shall be inspected for imperfections including lenses, cracks, channels, root holes, or other structural non-uniformities that may cause an increase in the permeability of the liner or cover.

(b) While a surface impoundment is in operation, it shall be inspected weekly and after storms to detect evidence of any of the following:

(1) Deterioration, malfunctions, or improper operation of overtopping control systems;

(2) Sudden drops in the level of the impoundment's contents; and

(3) Severe erosion or other signs of deterioration in dikes or other containment devices.

(c) Prior to the issuance of a permit, and after any extended period of time, at least six months, during which the impoundment was not in service, the owner or operator shall obtain a certification from a qualified engineer that the impoundment's dike, including that portion of any dike which provides freeboard, has structural integrity. The certification shall establish, in particular, that the dike:

(1) Will withstand the stress of the pressure exerted by the types and amounts of wastes to be placed in the impoundment; and

(2) Will not fail due to scouring or piping, without dependence on any liner system included in the surface impoundment construction.

(d)(1) An owner or operator required to have a leak detection system under Subsection R315-264-221(c) or (d) shall record the amount of liquids removed from each leak detection system sump at least once each week during the active life and closure period.

(2) After the final cover is installed, the amount of liquids removed from each leak detection system sump shall be recorded at least monthly. If the liquid level in the sump stays below the pump operating level for two consecutive months, the amount of liquids in the sumps shall be recorded at least quarterly. If the liquid level in the sump stays below the pump operating level for two consecutive quarters, the amount of liquids in the sumps shall be recorded at least semi-annually. If at any time during the post-closure care period the pump operating level is exceeded at units on quarterly or semi-annual recording schedules, the owner or operator shall return to monthly recording of amounts of liquids removed from each sump until the liquid level again stays below the pump operating level for two consecutive months.

(3) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the Director based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

R315-264-227. Emergency Repairs; Contingency Plans.

(a) A surface impoundment shall be removed from service in accordance with Subsection R315-264-227(b) when:

(1) The level of liquids in the impoundment suddenly drops and the drop is not known to be caused by changes in the flows into or out of the impoundment; or

(2) The dike leaks.

(b) When a surface impoundment shall be removed from service as required by Subsection R315-264-227(a), the owner or operator shall:

(1) Immediately shut off the flow or stop the addition of wastes into the impoundment;

(2) Immediately contain any surface leakage which has occurred or is occurring;

(3) Immediately stop the leak;

(4) Take any other necessary steps to stop or prevent catastrophic failure;

(5) If a leak cannot be stopped by any other means, empty the impoundment; and

(6) Notify the Director of the problem in writing within seven days after detecting the problem.

(c) As part of the contingency plan required in Sections R315-264-50 through 56, the owner or operator shall specify a procedure for complying with the requirements of Subsection R315-264-227(b).

(d) No surface impoundment that has been removed from service in accordance with the requirements of Section R315-264-227 may be restored to service unless the portion of the impoundment which was failing is repaired and the following steps are taken:

(1) If the impoundment was removed from service as the result of actual or imminent dike failure, the dike's structural integrity shall be recertified in accordance with Subsection R315-264-226(c).

(2) If the impoundment was removed from service as the result of a sudden drop in the liquid level, then:

(i) For any existing portion of the impoundment, a liner shall be installed in compliance with Subsection R315-264-221(a); and

(ii) For any other portion of the impoundment, the repaired liner system shall be certified by a qualified engineer as meeting the design specifications approved in the permit.

(e) A surface impoundment that has been removed from service in accordance with the requirements of Section R315-264-227 and that is not being repaired shall be closed in accordance with the provisions of Section R315-264-228.

R315-264-228. Closure and Post-Closure Care.

(a) At closure, the owner or operator shall:

(1) Remove or decontaminate all waste residues, contaminated containment system components, liners, etc., contaminated subsoils, and structures and equipment contaminated with waste and leachate, and manage them as hazardous waste unless Subsection R315-261-3(d) applies; or

(2)(i) Eliminate free liquids by removing liquid wastes or solidifying the remaining wastes and waste residues;

(ii) Stabilize remaining wastes to a bearing capacity sufficient to support final cover; and

(iii) Cover the surface impoundment with a final cover designed and constructed to:

(A) Provide long-term minimization of the migration of liquids through the closed impoundment;

(B) Function with minimum maintenance;

(C) Promote drainage and minimize erosion or abrasion of the final cover;

(D) Accommodate settling and subsidence so that the cover's integrity is maintained; and

(E) Have a permeability less than or equal to the permeability of any bottom liner system or natural subsoils present.

(b) If some waste residues or contaminated materials are left in place at final closure, the owner or operator shall comply with all post-closure requirements contained in Sections R315-264-117 through 120, including maintenance and monitoring throughout the post- closure care period, specified in the permit under Section R315-264-117. The owner or operator shall:

(1) Maintain the integrity and effectiveness of the final cover, including making repairs to the cap as necessary to correct the effects of settling, subsidence, erosion, or other events;

(2) Maintain and monitor the leak detection system in accordance with Subsections R315-264-221(c)(2)(iv) and (3) and 226(d), and comply with all other applicable leak detection system requirements of Rule R315-264;

(3) Maintain and monitor the ground-water monitoring system and comply with all other applicable requirements of Sections R315-264-90 through 101; and

(4) Prevent run-on and run-off from eroding or otherwise damaging the final cover.

(c)(1) If an owner or operator plans to close a surface impoundment in accordance with Subsection R315-264-228(a)(1), and the impoundment does not comply with the liner requirements of Subsection R315-264-221(a) and is not exempt from them in accordance with Subsection R315-264-221(b), then:

(i) The closure plan for the impoundment under Section R315-264-112 shall include both a plan for complying with Subsection R315-264-228(a)(1) and a contingent plan for complying with Subsection R315-264-228(a)(2) in case not all contaminated subsoils can be practicably removed at closure; and

(ii) The owner or operator shall prepare a contingent post-closure plan under Section R315-264-118 for complying with Subsection R315-264-228(b) in case not all contaminated subsoils can be practicably removed at closure.

(2) The cost estimates calculated under Sections R315-264-142 and 264-144 for closure and post-closure care of an impoundment subject to Subsection R315-264-228(c) shall include the cost of complying with the contingent closure plan and the contingent post-closure plan, but are not required to include the cost of expected closure under Subsection R315-264-228(a)(1).

R315-264-229. Special Requirements for Ignitable or Reactive Waste.

Ignitable or reactive waste shall not be placed in a surface impoundment, unless the waste and impoundment satisfy all applicable requirements of Rule R315-268, and:

(a) The waste is treated, rendered, or mixed before or immediately after placement in the impoundment so that:

(1) The resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste under Sections R315-261-21 or 23; and

(2) Subsection R315-264-17(b) is complied with; or

(b) The waste is managed in such a way that it is protected from any material or conditions which may cause it to ignite or react; or

(c) The surface impoundment is used solely for emergencies.

R315-264-230. Special Requirements for Incompatible Wastes.

Incompatible wastes, or incompatible wastes and materials, see appendix V of Rule R315-264 for examples, shall not be placed in the same surface impoundment, unless Subsection R315-264-17(b) is complied with.

R315-264-231. Special Requirements for Hazardous Wastes F020, F021, F022, F023, F026, and F027.

(a) Hazardous Wastes F020, F021, F022, F023, F026, and F027 shall not be placed in a surface impoundment unless the owner or operator operates the surface impoundment in accordance with a management plan for these wastes that is approved by the Director pursuant to the standards set out in Subsection R315-264-231(a), and in accord with all other applicable requirements of Rule R315-264. The factors to be considered are:

(1) The volume, physical, and chemical characteristics of the wastes, including their potential to migrate through soil or to volatilize or escape into the atmosphere;

(2) The attenuative properties of underlying and surrounding soils or other materials;

(3) The mobilizing properties of other materials co-disposed with these wastes; and

(4) The effectiveness of additional treatment, design, or monitoring techniques.

(b) The Director may determine that additional design, operating, and monitoring requirements are necessary for

surface impoundments managing hazardous wastes F020, F021, F022, F023, F026, and F027 in order to reduce the possibility of migration of these wastes to ground water, surface water, or air so as to protect human health and the environment.

R315-264-232. Air Emission Standards.

The owner or operator shall manage all hazardous waste placed in a surface impoundment in accordance with the applicable requirements of Sections R315-264-1050 through 1065 and 1080 through 1090.

R315-264-250. Waste Piles -- Applicability.

(a) The regulations in Sections R315-264-250 through 254 and 256 through 259 apply to owners and operators of facilities that store or treat hazardous waste in piles, except as Section R315-264-1 provides otherwise.

(b) The regulations in Sections R315-264-250 through 254 and 256 through 259 do not apply to owners or operators of waste piles that are closed with wastes left in place. Such waste piles are subject to regulation under Sections R315-264-300 through 304, 309 and 310, and 312 through 317, Landfills.

(c) The owner or operator of any waste pile that is inside or under a structure that provides protection from precipitation so that neither run-off nor leachate is generated is not subject to regulation under Section R315-264-251 or under Sections R315-264-90 through 101, provided that:

(1) Liquids or materials containing free liquids are not placed in the pile;

(2) The pile is protected from surface water run-on by the structure or in some other manner;

(3) The pile is designed and operated to control dispersal of the waste by wind, where necessary, by means other than wetting; and

(4) The pile will not generate leachate through decomposition or other reactions.

R315-264-251. Design and Operating Requirements.

(a) A waste pile, except for an existing portion of a waste pile, shall have:

(1) A liner that is designed, constructed, and installed to prevent any migration of wastes out of the pile into the adjacent subsurface soil or ground water or surface water at any time during the active life, including the closure period, of the waste pile. The liner may be constructed of materials that may allow waste to migrate into the liner itself, but not into the adjacent subsurface soil or ground water or surface water, during the active life of the facility. The liner shall be:

(i) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients, including static head and external hydrogeologic forces, physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(ii) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(iii) Installed to cover all surrounding earth likely to be in contact with the waste or leachate; and

(2) A leachate collection and removal system immediately above the liner that is designed, constructed, maintained, and operated to collect and remove leachate from the pile. The Director shall specify design and operating conditions in the permit to ensure that the leachate depth over the liner does not exceed 30 cm, one foot. The leachate collection and removal system shall be:

(i) Constructed of materials that are:

(A) Chemically resistant to the waste managed in the pile and the leachate expected to be generated; and

(B) Of sufficient strength and thickness to prevent collapse under the pressures exerted by overlaying wastes, waste cover materials, and by any equipment used at the pile; and

(ii) Designed and operated to function without clogging through the scheduled closure of the waste pile.

(b) The owner or operator shall be exempted from the requirements of Subsection R315-264-251(a), if the Director finds, based on a demonstration by the owner or operator, that alternate design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents, see Section R315-264-93, into the ground water or surface water at any future time. In deciding whether to grant an exemption, the Director shall consider:

(1) The nature and quantity of the wastes;

(2) The proposed alternate design and operation;

(3) The hydrogeologic setting of the facility, including attenuative capacity and thickness of the liners and soils present between the pile and ground water or surface water; and

(4) All other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to ground water or surface water.

(c) The owner or operator of each new waste pile unit, each lateral expansion of a waste pile unit, and each replacement of an existing waste pile unit shall install two or more liners and a leachate collection and removal system above and between such liners.

(1)(i) The liner system shall include:

(A) A top liner designed and constructed of materials, e.g., a geomembrane, to prevent the migration of hazardous constituents into such liner during the active life and post-closure care period; and

(B) A composite bottom liner, consisting of at least two components. The upper component shall be designed and constructed of materials, e.g., a geomembrane, to prevent the migration of hazardous constituents into this component during the active life and post-closure care period. The lower component shall be designed and constructed of materials to minimize the migration of hazardous constituents if a breach in the upper component were to occur. The lower component shall be constructed of at least 3 feet, 91 cm, of compacted soil material with a hydraulic conductivity of no more than 1 x 10^{-7} cm/sec.

(ii) The liners shall comply with Subsections R315-264-251(a)(1)(i), (ii), and (iii).

(2) The leachate collection and removal system immediately above the top liner shall be designed, constructed, operated, and maintained to collect and remove leachate from the waste pile during the active life and post-closure care period. The Director shall specify design and operating conditions in the permit to ensure that the leachate depth over the liner does not exceed 30 cm, one foot. The leachate collection and removal system shall comply with Subsections R315-264-251(c)(3)(iii) and (iv).

(3) The leachate collection and removal system between the liners, and immediately above the bottom composite liner in the case of multiple leachate collection and removal systems, is also a leak detection system. This leak detection system shall be capable of detecting, collecting, and removing leaks of hazardous constituents at the earliest practicable time through all areas of the top liner likely to be exposed to waste or leachate during the active life and post-closure care period. The requirements for a leak detection system in Subsection R315-264-251(c) are satisfied by installation of a system that is, at a minimum:

(i) Constructed with a bottom slope of one percent or more;

(ii) Constructed of granular drainage materials with a hydraulic conductivity of 1 x 10^{-2} cm/sec or more and a thickness of 12 inches, 30.5 cm, or more; or constructed of synthetic or geonet drainage materials with a transmissivity of 3 x 10^{-5} m^2/sec or more:

(iii) Constructed of materials that are chemically resistant to the waste managed in the waste pile and the leachate expected to be generated, and of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying wastes, waste cover materials, and equipment used at the waste pile;

(iv) Designed and operated to minimize clogging during the active life and post-closure care period; and

(v) Constructed with sumps and liquid removal methods, e.g., pumps, of sufficient size to collect and remove liquids from the sump and prevent liquids from backing up into the drainage layer. Each unit shall have its own sump(s). The design of each sump and removal system shall provide a method for measuring and recording the volume of liquids present in the sump and of liquids removed.

(4) The owner or operator shall collect and remove pumpable liquids in the leak detection system sumps to minimize the head on the bottom liner.

(5) The owner or operator of a leak detection system that is not located completely above the seasonal high water table shall demonstrate that the operation of the leak detection system will not be adversely affected by the presence of ground water.

(d) The Director may approve alternative design or operating practices to those specified in Subsection R315-264-251(c) if the owner or operator demonstrates to the Director that such design and operating practices, together with location characteristics:

(1) Will prevent the migration of any hazardous constituent into the ground water or surface water at least as effectively as the liners and leachate collection and removal systems specified in Subsection R315-264-251(c); and

(2) Will allow detection of leaks of hazardous constituents through the top liner at least as effectively.

(e) Subsection R315-264-251(c) does not apply to monofills that are granted a waiver by the Director in accordance with Section R315-264-221(e).

(f) The owner or operator of any replacement waste pile unit is exempt from Subsection R315-264-251(c) if:

(1) The existing unit was constructed in compliance with the design standards of section 3004(o)(1)(A)(i) and 3004(o)(5) of the Resource Conservation and Recovery Act; and

(2) There is no reason to believe that the liner is not functioning as designed.

(g) The owner or operator shall design, construct, operate, and maintain a run-on control system capable of preventing flow onto the active portion of the pile during peak discharge from at least a 25-year storm.

(h) The owner or operator shall design, construct, operate, and maintain a run-off management system to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(i) Collection and holding facilities, e.g., tanks or basins, associated with run-on and run-off control systems shall be emptied or otherwise managed expeditiously after storms to maintain design capacity of the system.

(j) If the pile contains any particulate matter which may be subject to wind dispersal, the owner or operator shall cover or otherwise manage the pile to control wind dispersal.

(k) The Director shall specify in the permit all design and operating practices that are necessary to ensure that the requirements of Section R315-264-251 are satisfied.

R315-264-252. Action Leakage Rate.

(a) The Director shall approve an action leakage rate for waste pile units subject to Subsections R315-264-251(c) or (d). The action leakage rate is the maximum design flow rate that the leak detection system can remove without the fluid head on the bottom liner exceeding one foot. The action leakage rate shall include an adequate safety margin to allow for uncertainties in the design, e.g., slope, hydraulic conductivity, thickness of drainage material, construction, operation, and location of the leak detection system, waste and leachate characteristics, likelihood and amounts of other sources of liquids in the leak detection system, and proposed response actions, e.g., the action leakage rate shall consider decreases in the flow capacity of the system over time resulting from siltation and clogging, rib layover and creep of synthetic components of the system, overburden pressures, etc.

(b) To determine if the action leakage rate has been exceeded, the owner or operator shall convert the weekly flow rate from the monitoring data obtained under Subsection R315-264-254(c) to an average daily flow rate, gallons per acre per day, for each sump. Unless the Director approves a different calculation, the average daily flow rate for each sump shall be calculated weekly during the active life and closure period.

R315-264-253. Response Actions.

(a) The owner or operator of waste pile units subject to Subsections R315-264-251(c) or (d) shall have an approved response action plan before receipt of waste. The response action plan shall set forth the actions to be taken if the action leakage rate has been exceeded. At a minimum, the response action plan shall describe the actions specified in Subsection R315-264-253(b).

(b) If the flow rate into the leak detection system exceeds the action leakage rate for any sump, the owner or operator shall:

(1) Notify the Director in writing of the exceedance within 7 days of the determination;

(2) Submit a preliminary written assessment to the Director within 14 days of the determination, as to the amount of liquids, likely sources of liquids, possible location, size, and cause of any leaks, and short-term actions taken and planned;

(3) Determine to the extent practicable the location, size, and cause of any leak;

(4) Determine whether waste receipt should cease or be curtailed, whether any waste should be removed from the unit for inspection, repairs, or controls, and whether or not the unit should be closed;

(5) Determine any other short-term and long-term actions to be taken to mitigate or stop any leaks; and

(6) Within 30 days after the notification that the action leakage rate has been exceeded, submit to the Director the results of the analyses specified in Subsections R315-264-253(b)(3), (4), and (5), the results of actions taken, and actions planned. Monthly thereafter, as long as the flow rate in the leak detection system exceeds the action leakage rate, the owner or operator shall submit to the Director a report summarizing the results of any remedial actions taken and actions planned.

(c) To make the leak and/or remediation determinations in Subsections R315-264-253(b)(3), (4), and (5), the owner or operator shall:

(1)(i) Assess the source of liquids and amounts of liquids by source,

(ii) Conduct a fingerprint, hazardous constituent, or

other analyses of the liquids in the leak detection system to identify the source of liquids and possible location of any leaks, and the hazard and mobility of the liquid; and

(iii) Assess the seriousness of any leaks in terms of potential for escaping into the environment; or

(2) Document why such assessments are not needed.

R315-264-254. Monitoring and Inspection.

(a) During construction or installation, liners, except in the case of existing portions of piles exempt from Subsection R315-264-251(a), and cover systems, e.g., membranes, sheets, or coatings, shall be inspected for uniformity, damage, and imperfections, e.g., holes, cracks, thin spots, or foreign materials. Immediately after construction or installation:

(1) Synthetic liners and covers shall be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters; and

(2) Soil-based and admixed liners and covers shall be inspected for imperfections including lenses, cracks, channels, root holes, or other structural non-uniformities that may cause an increase in the permeability of the liner or cover.

(b) While a waste pile is in operation, it shall be inspected weekly and after storms to detect evidence of any of the following:

(1) Deterioration, malfunctions, or improper operation of run-on and run-off control systems;

(2) Proper functioning of wind dispersal control systems, where present; and

(3) The presence of leachate in and proper functioning of leachate collection and removal systems, where present.

(c) An owner or operator required to have a leak detection system under Subsection R315-264-251(c) shall record the amount of liquids removed from each leak detection system sump at least once each week during the active life and closure period.

R315-264-256. Special Requirements for Ignitable or Reactive Waste.

Ignitable or reactive waste shall not be placed in a waste pile unless the waste and waste pile satisfy all applicable requirements of Rule R315-268, and:

(a) The waste is treated, rendered, or mixed before or immediately after placement in the pile so that:

(1) The resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste under Sections R315-261-21 or 23; and

(2) Subsection R315-264-17(b) is complied with; or

(b) The waste is managed in such a way that it is protected from any material or conditions which may cause it to ignite or react.

R315-264-257. Special Requirements for Incompatible Wastes.

(a) Incompatible wastes, or incompatible wastes and materials, see appendix V of Rule R315-264 for examples, shall not be placed in the same pile, unless Subsection R315-264-17(b) is complied with.

(b) A pile of hazardous waste that is incompatible with any waste or other material stored nearby in containers, other piles, open tanks, or surface impoundments shall be separated from the other materials, or protected from them by means of a dike, berm, wall, or other device.

(c) Hazardous waste shall not be piled on the same base where incompatible wastes or materials were previously piled, unless the base has been decontaminated sufficiently to ensure compliance with Subsection R315-264-17(b).

R315-264-258. Closure and Post-Closure Care.

(a) At closure, the owner or operator shall remove or decontaminate all waste residues, contaminated containment system components, liners, etc., contaminated subsoils, and structures and equipment contaminated with waste and leachate, and manage them as hazardous waste unless Subsection R315-261-3(d) applies.

(b) If, after removing or decontaminating all residues and making all reasonable efforts to effect removal or decontamination of contaminated components, subsoils, structures, and equipment as required in Subsection R315-264-258(a), the owner or operator finds that not all contaminated subsoils can be practicably removed or decontaminated, he shall close the facility and perform post-closure care in accordance with the closure and post-closure care requirements that apply to landfills, Section R315-264-310.

(c)(1) The owner or operator of a waste pile that does not comply with the liner requirements of Subsection R315-264-251(a)(1) and is not exempt from them in accordance with Subsections R315-264-250(c) or 251(b), shall:

(i) Include in the closure plan for the pile under Section R315-264-112 both a plan for complying with Subsection R315-264-258(a) and a contingent plan for complying with Subsection R315-264-258(b) in case not all contaminated subsoils can be practicably removed at closure; and

(ii) Prepare a contingent post-closure plan under Section R315-264-118 for complying with Subsection R315-264-258(b) in case not all contaminated subsoils can be practicably removed at closure.

(2) The cost estimates calculated under Sections R315-264-142 and 144 for closure and post-closure care of a pile subject to this Subsection R315-264-258(c) shall include the cost of complying with the contingent closure plan and the contingent post-closure plan, but are not required to include the cost of expected closure under Subsection R315-264-258(a).

R315-264-259. Special Requirements for Hazardous Wastes F020, F021, F022, F023, F026, and F027.

(a) Hazardous Wastes F020, F021, F022, F023, F026, and F027 shall not be placed in waste piles that are not enclosed, as defined in Subsection R315-264-250(c), unless the owner or operator operates the waste pile in accordance with a management plan for these wastes that is approved by the Director pursuant to the standards set out in Subsection R315-264-259(a), and in accord with all other applicable requirements of Rule R315-264. The factors to be considered are:

(1) The volume, physical, and chemical characteristics of the wastes, including their potential to migrate through soil or to volatilize or escape into the atmosphere;

(2) The attenuative properties of underlying and surrounding soils or other materials;

(3) The mobilizing properties of other materials co-disposed with these wastes; and

(4) The effectiveness of additional treatment, design, or monitoring techniques.

(b) The Director may determine that additional design, operating, and monitoring requirements are necessary for piles managing hazardous wastes F020, F021, F022, F023, F026, and F027 in order to reduce the possibility of migration of these wastes to ground water, surface water, or air so as to protect human health and the environment.

R315-264-270. Land Treatment -- Applicability.

The regulations in Sections R315-264-270 through 283 apply to owners and operators of facilities that treat or dispose of hazardous waste in land treatment units, except as Section R315-264-1 provides otherwise.

R315-264-271. Treatment Program.

(a) An owner or operator subject to Sections R315-264-270 through 283 shall establish a land treatment program that is designed to ensure that hazardous constituents placed in or on the treatment zone are degraded, transformed, or immobilized within the treatment zone. The Director shall specify in the facility permit the elements of the treatment program, including:

(1) The wastes that are capable of being treated at the unit based on a demonstration under Section R315-264-272;

(2) Design measures and operating practices necessary to maximize the success of degradation, transformation, and immobilization processes in the treatment zone in accordance with Subsection R315-264-273(a); and

(3) Unsaturated zone monitoring provisions meeting the requirements of Section R315-264-278.

(b) The Director shall specify in the facility permit the hazardous constituents that shall be degraded, transformed, or immobilized under Sections R315-264-270 through 283. Hazardous constituents are constituents identified in appendix VIII of Rule R315-261 that are reasonably expected to be in, or derived from, waste placed in or on the treatment zone.

(c) The Director shall specify the vertical and horizontal dimensions of the treatment zone in the facility permit. The treatment zone is the portion of the unsaturated zone below and including the land surface in which the owner or operator intends to maintain the conditions necessary for effective degradation, transformation, or immobilization of hazardous constituents. The maximum depth of the treatment zone shall be:

(1) No more than 1.5 meters, 5 feet, from the initial soil surface; and

(2) More than 1 meter, 3 feet, above the seasonal high water table.

R315-264-272. Treatment Demonstration.

(a) For each waste that will be applied to the treatment zone, the owner or operator shall demonstrate, prior to application of the waste, that hazardous constituents in the waste can be completely degraded, transformed, or immobilized in the treatment zone.

(b) In making this demonstration, the owner or operator may use field tests, laboratory analyses, available data, or, in the case of existing units, operating data. If the owner or operator intends to conduct field tests or laboratory analyses in order to make the demonstration required under Subsection R315-264-272(a), he shall obtain a treatment or disposal permit under Section R315-270-63. The Director shall specify in this permit the testing, analytical, design, and operating requirements, including the duration of the tests and analyses, and, in the case of field tests, the horizontal and vertical dimensions of the treatment zone, monitoring procedures, closure and clean-up activities, necessary to meet the requirements in Subsection R315-264-272(c).

(c) Any field test or laboratory analysis conducted in order to make a demonstration under Subsection R315-264-272(a) shall:

(1) Accurately simulate the characteristics and operating conditions for the proposed land treatment unit including:

(i) The characteristics of the waste, including the presence of appendix VIII of Rule R315-261 constituents;

(ii) The climate in the area;

(iii) The topography of the surrounding area;

(iv) The characteristics of the soil in the treatment zone, including depth; and

(v) The operating practices to be used at the unit.

(2) Be likely to show that hazardous constituents in the waste to be tested will be completely degraded, transformed, or immobilized in the treatment zone of the proposed land treatment unit; and

(3) Be conducted in a manner that protects human health and the environment considering:

(i) The characteristics of the waste to be tested;

(ii) The operating and monitoring measures taken during the course of the test;

(iii) The duration of the test;

(iv) The volume of waste used in the test;

(v) In the case of field tests, the potential for migration of hazardous constituents to ground water or surface water.

R315-264-273. Design and Operating Requirements.

The Director shall specify in the facility permit how the owner or operator will design, construct, operate, and maintain the land treatment unit in compliance with Section R315-264-273.

(a) The owner or operator shall design, construct, operate, and maintain the unit to maximize the degradation, transformation, and immobilization of hazardous constituents in the treatment zone. The owner or operator shall design, construct, operate, and maintain the unit in accord with all design and operating conditions that were used in the treatment demonstration under Section R315-264-272. At a minimum, the Director shall specify the following in the facility permit:

(1) The rate and method of waste application to the treatment zone;

(2) Measures to control soil pH;

(3) Measures to enhance microbial or chemical reactions, e.g., fertilization, tilling; and

(4) Measures to control the moisture content of the treatment zone.

(b) The owner or operator shall design, construct, operate, and maintain the treatment zone to minimize run-off of hazardous constituents during the active life of the land treatment unit.

(c) The owner or operator shall design, construct, operate, and maintain a run-on control system capable of preventing flow onto the treatment zone during peak discharge from at least a 25-year storm.

(d) The owner or operator shall design, construct, operate, and maintain a run-off management system to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(e) Collection and holding facilities, e.g., tanks or basins, associated with run-on and run-off control systems shall be emptied or otherwise managed expeditiously after storms to maintain the design capacity of the system.

(f) If the treatment zone contains particulate matter which may be subject to wind dispersal, the owner or operator shall manage the unit to control wind dispersal.

(g) The owner or operator shall inspect the unit weekly and after storms to detect evidence of:

(1) Deterioration, malfunctions, or improper operation of run-on and run-off control systems; and

(2) Improper functioning of wind dispersal control measures.

R315-264-276. Food-Chain Crops.

The Director may allow the growth of food-chain crops in or on the treatment zone only if the owner or operator satisfies the conditions of Section R315-264-276. The Director shall specify in the facility permit the specific food-chain crops which may be grown.

(a)(1) The owner or operator shall demonstrate that there is no substantial risk to human health caused by the growth of such crops in or on the treatment zone by demonstrating, prior to the planting of such crops, that hazardous constituents other than cadmium:

(i) Will not be transferred to the food or feed portions of the crop by plant uptake or direct contact, and will not otherwise be ingested by food-chain animals, e.g., by grazing; or

(ii) Will not occur in greater concentrations in or on the food or feed portions of crops grown on the treatment zone than in or on identical portions of the same crops grown on untreated soils under similar conditions in the same region.

(2) The owner or operator shall make the demonstration required under Subsection R315-264-276(a) prior to the planting of crops at the facility for all constituents identified in appendix VIII of Rule R315-261 that are reasonably expected to be in, or derived from, waste placed in or on the treatment zone.

(3) In making a demonstration under Subsection R315-264-276(a), the owner or operator may use field tests, greenhouse studies, available data, or, in the case of existing units, operating data, and shall:

(i) Base the demonstration on conditions similar to those present in the treatment zone, including soil characteristics, e.g., pH, cation exchange capacity, specific wastes, application rates, application methods, and crops to be grown; and

(ii) Describe the procedures used in conducting any tests, including the sample selection criteria, sample size, analytical methods, and statistical procedures.

(4) If the owner or operator intends to conduct field tests or greenhouse studies in order to make the demonstration required under Subsection R315-264-276(a), he shall obtain a permit for conducting such activities.

(b) The owner or operator shall comply with the following conditions if cadmium is contained in wastes applied to the treatment zone:

(1)(i) The pH of the waste and soil mixture shall be 6.5 or greater at the time of each waste application, except for waste containing cadmium at concentrations of 2 mg/kg, dry weight, or less;

(ii) The annual application of cadmium from waste shall not exceed 0.5 kilograms per hectare, kg/ha, on land used for tobacco, leafy vegetables, or root crops grown for human consumption or any other food-chain crop;

(iii) The cumulative application of cadmium from waste shall not exceed 5 kg/ha if the waste and soil mixture has a pH of less than 6.5; and

(iv) If the waste and soil mixture has a pH of 6.5 or greater or is maintained at a pH of 6.5 or greater during crop growth, the cumulative application of cadmium from waste shall not exceed: 5 kg/ha if soil cation exchange capacity (CEC) is less than 5 meq/100g; 10 kg/ha if soil CEC is 5-15 meq/100g; and 20 kg/ha if soil CEC is greater than 15 meq/100g; or

(2)(i) Animal feed shall be the only food-chain crop produced;

(ii) The pH of the waste and soil mixture shall be 6.5 or greater at the time of waste application or at the time the crop is planted, whichever occurs later, and this pH level shall be maintained whenever food-chain crops are grown;

(iii) There shall be an operating plan which demonstrates how the animal feed will be distributed to preclude ingestion by humans. The operating plan shall describe the measures to be taken to safeguard against possible health hazards from cadmium entering the food chain, which may result from alternative land uses; and

(iv) Future property owners shall be notified by a stipulation in the land record or property deed which states that the property has received waste at high cadmium application rates and that food-chain crops shall not be grown except in compliance with Subsection R315-264-276(b)(2).

R315-264-278. Unsaturated Zone Monitoring.

An owner or operator subject to Sections R315-270 through 283 shall establish an unsaturated zone monitoring program to discharge the following responsibilities:

(a) The owner or operator shall monitor the soil and soil-pore liquid to determine whether hazardous constituents migrate out of the treatment zone.

(1) The Director shall specify the hazardous constituents to be monitored in the facility permit. The hazardous constituents to be monitored are those specified under Section R315-264-271(b).

(2) The Director may require monitoring for principal hazardous constituents (PHCs) in lieu of the constituents specified under Section R315-264-271(b). PHCs are hazardous constituents contained in the wastes to be applied at the unit that are the most difficult to treat, considering the combined effects of degradation, transformation, and immobilization. The Director shall establish PHCs if he finds, based on waste analyses, treatment demonstrations, or other data, that effective degradation, transformation, or immobilization of the PHCs will assure treatment at at least equivalent levels for the other hazardous constituents in the wastes.

(b) The owner or operator shall install an unsaturated zone monitoring system that includes soil monitoring using soil cores and soil-pore liquid monitoring using devices such as lysimeters. The unsaturated zone monitoring system shall consist of a sufficient number of sampling points at appropriate locations and depths to yield samples that:

(1) Represent the quality of background soil-pore liquid quality and the chemical make-up of soil that has not been affected by leakage from the treatment zone; and

(2) Indicate the quality of soil-pore liquid and the chemical make-up of the soil below the treatment zone.

(c) The owner or operator shall establish a background value for each hazardous constituent to be monitored under Subsection R315-264-278(a). The permit shall specify the background values for each constituent or specify the procedures to be used to calculate the background values.

(1) Background soil values may be based on a one-time sampling at a background plot having characteristics similar to those of the treatment zone.

(2) Background soil-pore liquid values shall be based on at least quarterly sampling for one year at a background plot having characteristics similar to those of the treatment zone.

(3) The owner or operator shall express all background values in a form necessary for the determination of statistically significant increases under Subsection R315-264-278(f).

(4) In taking samples used in the determination of all background values, the owner or operator shall use an unsaturated zone monitoring system that complies with Subsection R315-264-278(b)(1).

(d) The owner or operator shall conduct soil monitoring and soil-pore liquid monitoring immediately below the treatment zone. The Director shall specify the frequency and timing of soil and soil-pore liquid monitoring in the facility permit after considering the frequency, timing, and rate of waste application, and the soil permeability. The owner or operator shall express the results of soil and soil-pore liquid monitoring in a form necessary for the determination of statistically significant increases under Subsection R315-264-278(f).

(e) The owner or operator shall use consistent sampling and analysis procedures that are designed to ensure sampling results that provide a reliable indication of soil-pore liquid quality and the chemical make-up of the soil below the treatment zone. At a minimum, the owner or operator shall implement procedures and techniques for:

(1) Sample collection;
(2) Sample preservation and shipment;
(3) Analytical procedures; and
(4) Chain of custody control.

(f) The owner or operator shall determine whether there is a statistically significant change over background values for any hazardous constituent to be monitored under Subsection R315-264-278(a) below the treatment zone each time he conducts soil monitoring and soil-pore liquid monitoring under Subsection R315-264-278(d).

(1) In determining whether a statistically significant increase has occurred, the owner or operator shall compare the value of each constituent, as determined under Subsection R315-264-278(d), to the background value for that constituent according to the statistical procedure specified in the facility permit under Subsection R315-264-278(e).

(2) The owner or operator shall determine whether there has been a statistically significant increase below the treatment zone within a reasonable time period after completion of sampling. The Director shall specify that time period in the facility permit after considering the complexity of the statistical test and the availability of laboratory facilities to perform the analysis of soil and soil-pore liquid samples.

(3) The owner or operator shall determine whether there is a statistically significant increase below the treatment zone using a statistical procedure that provides reasonable confidence that migration from the treatment zone will be identified. The Director shall specify a statistical procedure in the facility permit that he finds:

(i) Is appropriate for the distribution of the data used to establish background values; and

(ii) Provides a reasonable balance between the probability of falsely identifying migration from the treatment zone and the probability of failing to identify real migration from the treatment zone.

(g) If the owner or operator determines, pursuant to Subsection R315-264-278(f), that there is a statistically significant increase of hazardous constituents below the treatment zone, he shall:

(1) Notify the Director of this finding in writing within seven days. The notification shall indicate what constituents have shown statistically significant increases.

(2) Within 90 days, submit to the Director an application for a permit modification to modify the operating practices at the facility in order to maximize the success of degradation, transformation, or immobilization processes in the treatment zone.

(h) If the owner or operator determines, pursuant to Subsection R315-264-278(f), that there is a statistically significant increase of hazardous constituents below the treatment zone, he may demonstrate that a source other than regulated units caused the increase or that the increase resulted from an error in sampling, analysis, or evaluation. While the owner or operator may make a demonstration under Subsection R315-264-278(h) in addition to, or in lieu of, submitting a permit modification application under Subsection R315-264-278(g)(2), he is not relieved of the requirement to submit a permit modification application within the time specified in Subsection R315-264-278(g)(2) unless the demonstration made under Subsection R315-264-278(h) successfully shows that a source other than regulated units caused the increase or that the increase resulted from an error in sampling, analysis, or evaluation. In making a demonstration under Subsection R315-264-278(h), the owner or operator shall:

(1) Notify the Director in writing within seven days of determining a statistically significant increase below the treatment zone that he intends to make a determination under Subsection R315-264-278(h);

(2) Within 90 days, submit a report to the Director demonstrating that a source other than the regulated units caused the increase or that the increase resulted from error in sampling, analysis, or evaluation;

(3) Within 90 days, submit to the Director an application for a permit modification to make any appropriate changes to the unsaturated zone monitoring program at the facility; and

(4) Continue to monitor in accordance with the unsaturated zone monitoring program established under Section R315-264-278.

R315-264-279. Recordkeeping.

The owner or operator shall include hazardous waste application dates and rates in the operating record required under Section R315-264-73.

R315-264-280. Closure and Post-Closure Care.

(a) During the closure period the owner or operator shall:

(1) Continue all operations, including pH control, necessary to maximize degradation, transformation, or immobilization of hazardous constituents within the treatment zone as required under Subsection R315-264-273(a), except to the extent such measures are inconsistent with Subsection R315-264-280(a)(8).

(2) Continue all operations in the treatment zone to minimize run-off of hazardous constituents as required under Subsection R315-264-273(b);

(3) Maintain the run-on control system required under Subsection R315-264-273(c);

(4) Maintain the run-off management system required under Subsection R315-264-273(d);

(5) Control wind dispersal of hazardous waste if required under Subsection R315-264-273(f);

(6) Continue to comply with any prohibitions or conditions concerning growth of food-chain crops under Section R315-264-276;

(7) Continue unsaturated zone monitoring in compliance with Section R315-264-278, except that soil-pore liquid monitoring may be terminated 90 days after the last application of waste to the treatment zone; and

(8) Establish a vegetative cover on the portion of the facility being closed at such time that the cover will not substantially impede degradation, transformation, or immobilization of hazardous constituents in the treatment zone. The vegetative cover shall be capable of maintaining growth without extensive maintenance.

(b) For the purpose of complying with Section R315-264-115, when closure is completed the owner or operator may submit to the Director certification by an independent, qualified soil scientist, in lieu of a qualified Professional Engineer, that the facility has been closed in accordance with the specifications in the approved closure plan.

(c) During the post-closure care period the owner or operator shall:

(1) Continue all operations, including pH control, necessary to enhance degradation and transformation and sustain immobilization of hazardous constituents in the treatment zone to the extent that such measures are consistent with other post-closure care activities;

(2) Maintain a vegetative cover over closed portions of the facility;

(3) Maintain the run-on control system required under Subsection R315-264-273(c);

(4) Maintain the run-off management system required under Subsection R315-264-273(d);

(5) Control wind dispersal of hazardous waste if required under Subsection R315-264-273(f);

(6) Continue to comply with any prohibitions or conditions concerning growth of food-chain crops under Section R315-264-276; and

(7) Continue unsaturated zone monitoring in compliance with Section R315-264-278, excect that soil-pore liquid monitoring may be terminated 90 days after the last application of waste to the treatment zone.

(d) The owner or operator is not subject to regulation under Subsections R315-264-280(a)(8) and (c) if the Director finds that the level of hazardous constituents in the treatment zone soil does not exceed the background value of those constituents by an amount that is statistically significant when using the test specified in Subsection R315-264-280(d)(3). The owner or operator may submit such a demonstration to the Director at any time during the closure or post-closure care periods. For the purposes of Subsection R315-264-280(d):

(1) The owner or operator shall establish background soil values and determine whether there is a statistically significant increase over those values for all hazardous constituents specified in the facility permit under Subsection R315-264-271(b).

(i) Background soil values may be based on a one-time sampling of a background plot having characteristics similar to those of the treatment zone.

(ii) The owner or operator shall express background values and values for hazardous constituents in the treatment zone in a form necessary for the determination of statistically significant increases under Subsection R315-264-280(d)(3).

(2) In taking samples used in the determination of background and treatment zone values, the owner or operator shall take samples at a sufficient number of sampling points and at appropriate locations and depths to yield samples that represent the chemical make-up of soil that has not been affected by leakage from the treatment zone and the soil within the treatment zone, respectively.

(3) In determining whether a statistically significant increase has occurred, the owner or operator shall compare the value of each constituent in the treatment zone to the background value for that constituent using a statistical procedure that provides reasonable confidence that constituent presence in the treatment zone will be identified. The owner or operator shall use a statistical procedure that:

(i) Is appropriate for the distribution of the data used to establish background values; and

(ii) Provides a reasonable balance between the probability of falsely identifying hazardous constituent presence in the treatment zone and the probability of failing to identify real presence in the treatment zone.

(e) The owner or operator is not subject to regulation under Sections R315-264-90 through 101 if the Director finds that the owner or operator satisfies Subsection R315-264-280(d) and if unsaturated zone monitoring under Section R315-264-278 indicates that hazardous constituents have not migrated beyond the treatment zone during the active life of the land treatment unit.

R315-264-281. Special Requirements for Ignitable or Reactive Waste.

The owner or operator shall not apply ignitable or reactive waste to the treatment zone unless the waste and the treatment zone meet all applicable requirements of Rule R315-268, and:

(a) The waste is immediately incorporated into the soil so that:

(1) The resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste under Sections R315-261-21 or 23; and

(2) Subsection R315-264-17(b) is complied with; or

(b) The waste is managed in such a way that it is protected from any material or conditions which may cause it to ignite or react.

R315-264-282. Special Requirements for Incompatible Wastes.

The owner or operator shall not place incompatible wastes, or incompatible wastes and materials, see appendix V of Rule R315-264 for examples, in or on the same treatment zone, unless Subsection R315-264-17(b) is complied with.

R315-264-283. Special Requirements for Hazardous Wastes F020, F021, F022, F023, F026, and F027.

(a) Hazardous Wastes F020, F021, F022, F023, F026, and F027 shall not be placed in a land treatment unit unless the owner or operator operates the facility in accordance with a management plan for these wastes that is approved by the Director pursuant to the standards set out in Subsection R315-264-283(a), and in accord with all other applicable requirements of Rule R315-264. The factors to be considered are:

(1) The volume, physical, and chemical characteristics of the wastes, including their potential to migrate through soil or to volatilize or escape into the atmosphere;

(2) The attenuative properties of underlying and surrounding soils or other materials;

(3) The mobilizing properties of other materials co-disposed with these wastes; and

(4) The effectiveness of additional treatment, design, or monitoring techniques.

(b) The Director may determine that additional design, operating, and monitoring requirements are necessary for land treatment facilities managing hazardous wastes F020, F021, F022, F023, F026, and F027 in order to reduce the possibility of migration of these wastes to ground water, surface water, or air so as to protect human health and the environment.

R315-264-300. Landfills -- Applicability.

The regulations in Sections R315-264-300 through 317 apply to owners and operators of facilities that dispose of hazardous waste in landfills, except as Section R315-264-1 provides otherwise.

R315-264-301. Design and Operating Requirements.

(a) Any landfill that is not covered by Subsection R315-264-301(c) or 40 CFR 265.301(a), which is adopted by reference, shall have a liner system for all portions of the landfill, except for portions of such landfill that existed on or prior to October 10, 1984. The liner system shall have:

(1) A liner that is designed, constructed, and installed to prevent any migration of wastes out of the landfill to the adjacent subsurface soil or ground water or surface water at anytime during the active life, including the closure period, of the landfill. The liner shall be constructed of materials that prevent wastes from passing into the liner during the active life of the facility. The liner shall be:

(i) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients, including static head and external hydrogeologic forces, physical contact with the waste or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(ii) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(iii) Installed to cover all surrounding earth likely to be in contact with the waste or leachate; and

(2) A leachate collection and removal system immediately above the liner that is designed, constructed, maintained, and operated to collect and remove leachate from the landfill. The Director shall specify design and operating conditions in the permit to ensure that the leachate depth over the liner does not exceed 30 cm, one foot. The leachate collection and removal system shall be:

(i) Constructed of materials that are:

(A) Chemically resistant to the waste managed in the landfill and the leachate expected to be generated; and

(B) Of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying wastes, waste cover materials, and by any equipment used at the landfill; and

(ii) Designed and operated to function without clogging through the scheduled closure of the landfill.

(b) The owner or operator shall be exempted from the requirements of Subsection R315-264-301(a) if the Director finds, based on a demonstration by the owner or operator, that alternative design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents, see Section R315-264-93, into the ground water or surface water at any future time. In deciding whether to grant an exemption, the Director shall consider:

(1) The nature and quantity of the wastes;

(2) The proposed alternate design and operation;

(3) The hydrogeologic setting of the facility, including the attenuative capacity and thickness of the liners and soils present between the landfill and ground water or surface water; and

(4) All other factors which would influence the quality and mobility of the leachate produced and the potential for it to migrate to ground water or surface water.

(c) The owner or operator of each new landfill unit on which construction commences after January 29, 1992, each lateral expansion of a landfill unit on which construction commences after July 29, 1992, and each replacement of an existing landfill unit that is to commence reuse after July 29, 1992 shall install two or more liners and a leachate collection and removal system above and between such liners. "Construction commences" is as defined in Section R315-260-10 under "existing facility".

(1)(i) The liner system shall include:

(A) A top liner designed and constructed of materials, e.g., a geomembrane, to prevent the migration of hazardous constituents into such liner during the active life and post-closure care period; and

(B) A composite bottom liner, consisting of at least two components. The upper component shall be designed and constructed of materials, e.g., a geomembrane, to prevent the migration of hazardous constituents into this component during the active life and post-closure care period. The lower component shall be designed and constructed of materials to minimize the migration of hazardous constituents if a breach in the upper component were to occur. The lower component shall be constructed of at least 91 cm, 3 feet, of compacted soil material with a hydraulic conductivity of no more than 1 x 10−7 cm/sec.

(ii) The liners shall comply with Subsections R315-264-301(a)(1)(i), (ii), and (iii).

(2) The leachate collection and removal system immediately above the top liner shall be designed, constructed, operated, and maintained to collect and remove leachate from the landfill during the active life and post-closure care period. The Director shall specify design and operating conditions in the permit to ensure that the leachate depth over the liner does not exceed 30 cm, one foot. The leachate collection and removal system shall comply with Subsections R315-264-301(c)(3)(iii) and (iv).

(3) The leachate collection and removal system between the liners, and immediately above the bottom composite liner in the case of multiple leachate collection and removal systems, is also a leak detection system. This leak detection system shall be capable of detecting, collecting, and removing leaks of hazardous constituents at the earliest practicable time through all areas of the top liner likely to be exposed to waste or leachate during the active life and post-closure care period. The requirements for a leak detection system in Subsection R315-264-301(c) are satisfied by installation of a system that is, at a minimum:

(i) Constructed with a bottom slope of one percent or more;

(ii) Constructed of granular drainage materials with a hydraulic conductivity of 1×10^{-2} cm/sec or more and a thickness of 30.5 cm, 12 inches, or more; or constructed of synthetic or geonet drainage materials with a transmissivity of 3×10^{-5} m2/sec or more;

(iii) Constructed of materials that are chemically resistant to the waste managed in the landfill and the leachate expected to be generated, and of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying wastes, waste cover materials, and equipment used at the landfill;

(iv) Designed and operated to minimize clogging during the active life and post-closure care period; and

(v) Constructed with sumps and liquid removal methods, e.g., pumps, of sufficient size to collect and remove liquids from the sump and prevent liquids from backing up into the drainage layer. Each unit shall have its own sump(s). The design of each sump and removal system shall provide a method for measuring and recording the volume of liquids present in the sump and of liquids removed.

(4) The owner or operator shall collect and remove pumpable liquids in the leak detection system sumps to minimize the head on the bottom liner.

(5) The owner or operator of a leak detection system that is not located completely above the seasonal high water table shall demonstrate that the operation of the leak detection system will not be adversely affected by the presence of ground water.

(d) The Director may approve alternative design or operating practices to those specified in Subsection R315-264-301(c) if the owner or operator demonstrates to the Director that such design and operating practices, together with location characteristics:

(1) Will prevent the migration of any hazardous constituent into the ground water or surface water at least as effectively as the liners and leachate collection and removal systems specified in Subsection R315-264-301(c); and

(2) Will allow detection of leaks of hazardous constituents through the top liner at least as effectively.

(e) The double liner requirement set forth in Subsection R315-264-301(c) may be waived by the Director for any monofill, if:

(1) The monofill contains only hazardous wastes from foundry furnace emission controls or metal casting molding sand, and such wastes do not contain constituents which would render the wastes hazardous for reasons other than the Toxicity Characteristic in Section R315-261-24, with EPA Hazardous Waste Numbers D004 through D017; and

(2)(i)(A) The monofill has at least one liner for which there is no evidence that such liner is leaking;

(B) The monofill is located more than one-quarter mile from an "underground source of drinking water," as that term is defined in Section R315-270-2); and

(C) The monofill is in compliance with generally applicable ground-water monitoring requirements for facilities with permits under Section 19-6-108; or

(ii) The owner or operator demonstrates that the monofill is located, designed and operated so as to assure that there will be no migration of any hazardous constituent into ground water or surface water at any future time.

(f) The owner or operator of any replacement landfill unit is exempt from Subsection R315-264-301(c) if:

(1) The existing unit was constructed in compliance with the design standards of section 3004(o)(1)(A)(i) and (o)(5) of the Resource Conservation and Recovery Act; and

(2) There is no reason to believe that the liner is not functioning as designed.

(g) The owner or operator shall design, construct, operate, and maintain a run-on control system capable of preventing flow onto the active portion of the landfill during peak discharge from at least a 24-hour, 25-year storm.

(h) The owner or operator shall design, construct, operate, and maintain a run-off management system to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(i) Collection and holding facilities, e.g., tanks or basins, associated with run-on and run-off control systems shall be emptied or otherwise managed expeditiously after storms to maintain design capacity of the system.

(j) If the landfill contains any particulate matter which may be subject to wind dispersal, the owner or operator shall cover or otherwise manage the landfill to control wind dispersal.

(k) The Director shall specify in the permit all design and operating practices that are necessary to ensure that the requirements of Section R315-264-301 are satisfied.

R315-264-302. Action Leakage Rate.

(a) The Director shall approve an action leakage rate for landfill units subject to Subsections R315-264-301(c) or (d). The action leakage rate is the maximum design flow rate that the leak detection system can remove without the fluid head on the bottom liner exceeding 30.5 cm, l foot. The action leakage rate shall include an adequate safety margin to allow for uncertainties in the design, e.g., slope, hydraulic conductivity, thickness of drainage material, construction, operation, and location of the leak detection system, waste and leachate characteristics, likelihood and amounts of other sources of liquids in the leak detection system, and proposed response actions, e.g., the action leakage rate shall consider decreases in the flow capacity of the system over time resulting from siltation and clogging, rib layover and creep of synthetic components of the system, overburden pressures, etc.

(b) To determine if the action leakage rate has been exceeded, the owner or operator shall convert the weekly or monthly flow rate from the monitoring data obtained under Subsection R315-264-303(c) to an average daily flow rate, gallons per acre per day, for each sump. Unless the Director approves a different calculation, the average daily flow rate for each sump shall be calculated weekly during the active life and closure period, and monthly during the post-closure care period when monthly monitoring is required under Subsection R315-264-303(c).

R315-264-303. Monitoring and Inspection.

(a) During construction or installation, liners, except in the case of existing portions of landfills exempt from Subsection R315-264-301(a) and cover systems, e.g., membranes, sheets, or coatings, shall be inspected for uniformity, damage, and imperfections, e.g., holes, cracks, thin spots, or foreign materials. Immediately after construction or installation:

(1) Synthetic liners and covers shall be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters; and

(2) Soil-based and admixed liners and covers shall be inspected for imperfections including lenses, cracks, channels, root holes, or other structural non-uniformities that may cause an increase in the permeability of the liner or cover.

(b) While a landfill is in operation, it shall be inspected weekly and after storms to detect evidence of any of the following:

(1) Deterioration, malfunctions, or improper operation of run-on and run-off control systems;

(2) Proper functioning of wind dispersal control systems, where present; and

(3) The presence of leachate in and proper functioning of leachate collection and removal systems, where present.

(c)(1) An owner or operator required to have a leak detection system under Subsection R315-264-301(c) or (d) shall record the amount of liquids removed from each leak detection system sump at least once each week during the active life and closure period.

(2) After the final cover is installed, the amount of liquids removed from each leak detection system sump shall be recorded at least monthly. If the liquid level in the sump stays below the pump operating level for two consecutive months, the amount of liquids in the sumps shall be recorded at least quarterly. If the liquid level in the sump stays below the pump operating level for two consecutive quarters, the amount of liquids in the sumps shall be recorded at least semi-annually. If at any time during the post-closure care period the pump operating level is exceeded at units on quarterly or semi-annual recording schedules, the owner or operator shall return to monthly recording of amounts of liquids removed from each sump until the liquid level again stays below the pump operating level for two consecutive months.

(3) "Pump operating level" is a liquid level proposed by the owner or operator and approved by the Director based on pump activation level, sump dimensions, and level that avoids backup into the drainage layer and minimizes head in the sump.

R315-264-304. Response Actions.

(a) The owner or operator of landfill units subject to Subsections R315-264-301(c) or (d) shall have an approved response action plan before receipt of waste. The response action plan shall set forth the actions to be taken if the action leakage rate has been exceeded. At a minimum, the response action plan shall describe the actions specified in Subsection R315-264-304(b).

(b) If the flow rate into the leak detection system exceeds the action leakage rate for any sump, the owner or operator shall:

(1) Notify the Director in writing of the exceedance within 7 days of the determination;

(2) Submit a preliminary written assessment to the Director within 14 days of the determination, as to the amount of liquids, likely sources of liquids, possible location, size, and cause of any leaks, and short-term actions taken and planned;

(3) Determine to the extent practicable the location, size, and cause of any leak;

(4) Determine whether waste receipt should cease or be curtailed, whether any waste should be removed from the unit for inspection, repairs, or controls, and whether or not the unit should be closed;

(5) Determine any other short-term and longer-term actions to be taken to mitigate or stop any leaks; and

(6) Within 30 days after the notification that the action leakage rate has been exceeded, submit to the Director the

results of the analyses specified in Subsections R315-264-304(b)(3), (4), and (5), the results of actions taken, and actions planned. Monthly thereafter, as long as the flow rate in the leak detection system exceeds the action leakage rate, the owner or operator shall submit to the Director a report summarizing the results of any remedial actions taken and actions planned.

(c) To make the leak and/or remediation determinations in Subsections R315-264-304(b)(3), (4), and (5), the owner or operator shall:

(1)(i) Assess the source of liquids and amounts of liquids by source,

(ii) Conduct a fingerprint, hazardous constituent, or other analyses of the liquids in the leak detection system to identify the source of liquids and possible location of any leaks, and the hazard and mobility of the liquid; and

(iii) Assess the seriousness of any leaks in terms of potential for escaping into the environment; or

(2) Document why such assessments are not needed.

R315-264-309. Surveying and Recordkeeping.

The owner or operator of a landfill shall maintain the following items in the operating record required under Section R315-264-73:

(a) On a map, the exact location and dimensions, including depth, of each cell with respect to permanently surveyed benchmarks; and

(b) The contents of each cell and the approximate location of each hazardous waste type within each cell.

R315-264-310. Closure and Post-Closure Care.

(a) At final closure of the landfill or upon closure of any cell, the owner or operator shall cover the landfill or cell with a final cover designed and constructed to:

(1) Provide long-term minimization of migration of liquids through the closed landfill;

(2) Function with minimum maintenance;

(3) Promote drainage and minimize erosion or abrasion of the cover;

(4) Accommodate settling and subsidence so that the cover's integrity is maintained; and

(5) Have a permeability less than or equal to the permeability of any bottom liner system or natural subsoils present.

(b) After final closure, the owner or operator shall comply with all post-closure requirements contained in Sections R315-264-117 through 120, including maintenance and monitoring throughout the post-closure care period, specified in the permit under Section R315-264-117. The owner or operator shall:

(1) Maintain the integrity and effectiveness of the final cover, including making repairs to the cap as necessary to correct the effects of settling, subsidence, erosion, or other events;

(2) Continue to operate the leachate collection and removal system until leachate is no longer detected;

(3) Maintain and monitor the leak detection system in accordance with Subsections R315-264-301(c)(3)(iv) and (4) and R315-264-303(c), and comply with all other applicable leak detection system requirements of Rul3 R315-264;

(4) Maintain and monitor the ground-water monitoring system and comply with all other applicable requirements of Sections R315-264-90 through 101;

(5) Prevent run-on and run-off from eroding or otherwise damaging the final cover; and

(6) Protect and maintain surveyed benchmarks used in complying with Section R315-264-309.

R315-264-312. Special Requirements for Ignitable or Reactive Waste.

(a) Except as provided in Subsection R315-264-312(b), and in Section R316-264-316, ignitable or reactive waste shall not be placed in a landfill, unless the waste and landfill meet all applicable requirements of Rule R315-268, and:

(1) The resulting waste, mixture, or dissolution of material no longer meets the definition of ignitable or reactive waste under Sections R315-261-21 or 23; and

(2) Subsection R315-264-17(b) is complied with.

(b) Except for prohibited wastes which remain subject to treatment standards in Sections R315-268-40 through 49, ignitable wastes in containers may be landfilled without meeting the requirements of Subsection R315-264-312(a), provided that the wastes are disposed of in such a way that they are protected from any material or conditions which may cause them to ignite. At a minimum, ignitable wastes shall be disposed of in non-leaking containers which are carefully handled and placed so as to avoid heat, sparks, rupture, or any other condition that might cause ignition of the wastes; shall be covered daily with soil or other non-combustible material to minimize the potential for ignition of the wastes; and shall not be disposed of in cells that contain or will contain other wastes which may generate heat sufficient to cause ignition of the waste.

R315-264-313. Special Requirements for Incompatible Wastes.

Incompatible wastes, or incompatible wastes and materials, (see appendix V of Rule R315-264 for examples) shall not be placed in the same landfill cell, unless Subsection R315-264-17(b) is complied with.

R315-264-314. Special Requirements for Bulk and Containerized Liquids.

(a) The placement of bulk or non-containerized liquid hazardous waste or hazardous waste containing free liquids, whether or not sorbents have been added, in any landfill is prohibited.

(b) To demonstrate the absence or presence of free liquids in either a containerized or a bulk waste, the following test shall be used: Method 9095B, Paint Filter Liquids Test, as described in "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846, as incorporated by reference in Section R315-260-11.

(c) Containers holding free liquids shall not be placed in a landfill unless:

(1) All free-standing liquid:

(i) Has been removed by decanting, or other methods;

(ii) Has been mixed with sorbent or solidified so that free-standing liquid is no longer observed; or

(iii) Has been otherwise eliminated; or

(2) The container is very small, such as an ampule; or

(3) The container is designed to hold free liquids for use other than storage, such as a battery or capacitor; or

(4) The container is a lab pack as defined in Section R316-264-316 and is disposed of in accordance with Section R316-264-316.

(d) Sorbents used to treat free liquids to be disposed of in landfills shall be nonbiodegradable. Nonbiodegradable sorbents are: materials listed or described in Subsection R315-264-314(d)(1); materials that pass one of the tests in Subsection R315-264-314(d)(2); or materials that are determined by the Director to be nonbiodegradable through the Rule R315-260 petition process.

(1) Nonbiodegradable sorbents.

(i) Inorganic minerals, other inorganic materials, and elemental carbon, e.g., aluminosilicates, clays, smectites, Fuller's earth, bentonite, calcium bentonite, montmorillonite, calcined montmorillonite, kaolinite, micas - illite,

vermiculites, zeolites; calcium carbonate (organic free limestone; oxides/hydroxides, alumina, lime, silica - sand, diatomaceous earth; perlite - volcanic glass; expanded volcanic rock; volcanic ash; cement kiln dust; fly ash; rice hull ash; activated charcoal/activated carbon; or

(ii) High molecular weight synthetic polymers, e.g., polyethylene, high density polyethylene (HDPE), polypropylene, polystyrene, polyurethane, polyacrylate, polynorborene, polyisobutylene, ground synthetic rubber, cross-linked allylstyrene and tertiary butyl copolymers. This does not include polymers derived from biological material or polymers specifically designed to be degradable; or

(iii) Mixtures of these nonbiodegradable materials.

(2) Tests for nonbiodegradable sorbents.

(i) The sorbent material is determined to be nonbiodegradable under ASTM Method G21-70 (1984a)-Standard Practice for Determining Resistance of Synthetic Polymer Materials to Fungi; or

(ii) The sorbent material is determined to be nonbiodegradable under ASTM Method G22-76 (1984b)-Standard Practice for Determining Resistance of Plastics to Bacteria; or

(iii) The sorbent material is determined to be non-biodegradable under OECD test 301B: CO2 Evolution - Modified Sturm Test.

(e) The placement of any liquid which is not a hazardous waste in a landfill is prohibited unless the owner or operator of such landfill demonstrates to the Director, or the Director determines that:

(1) The only reasonably available alternative to the placement in such landfill is placement in a landfill or unlined surface impoundment, whether or not permitted or operating under interim status, which contains, or may reasonably be anticipated to contain, hazardous waste; and

(2) Placement in such owner or operator's landfill will not present a risk of contamination of any "underground source of drinking water," as that term is defined in Section R315-270-2.

R315-264-315. Special Requirements for Containers.

Unless they are very small, such as an ampule, containers shall be either:

(a) At least 90 percent full when placed in the landfill; or

(b) Crushed, shredded, or similarly reduced in volume to the maximum practical extent before burial in the landfill.

R315-264-316. Disposal of Small Containers of Hazardous Waste in Overpacked Drums (Lab Packs).

Small containers of hazardous waste in overpacked drums, lab packs, may be placed in a landfill if the following requirements are met:

(a) Hazardous waste shall be packaged in non-leaking inside containers. The inside containers shall be of a design and constructed of a material that will not react dangerously with, be decomposed by, or be ignited by the contained waste. Inside containers shall be tightly and securely sealed. The inside containers shall be of the size and type specified in the Department of Transportation hazardous materials regulations, 49 CFR parts 173, 178, and 179, if those regulations specify a particular inside container for the waste.

(b) The inside containers shall be overpacked in an open head Department of Transportation-specification metal shipping container, 49 CFR parts 178 and 179, of no more than 416-liter, 110 gallon, capacity and surrounded by, at a minimum, a sufficient quantity of sorbent material, determined to be nonbiodegradable in accordance with Subsection R315-264-314(d), to completely sorb all of the liquid contents of the inside containers. The metal outer container shall be full after it has been packed with inside containers and sorbent material.

(c) The sorbent material used shall not be capable of reacting dangerously with, being decomposed by, or being ignited by the contents of the inside containers, in accordance with Subsection R315-264-17(b).

(d) Incompatible wastes, as defined in Section R315-260-10, shall not be placed in the same outside container.

(e) Reactive wastes, other than cyanide- or sulfide-bearing waste as defined in Subsection R315-261-23(a)(5), shall be treated or rendered non-reactive prior to packaging in accordance with Subsections R315-264-316(a) through (d). Cyanide- and sulfide-bearing reactive waste may be packed in accordance with Subsections R315-264-316(a) through (d) without first being treated or rendered non-reactive.

(f) Such disposal is in compliance with the requirements of Rule R315-268. Persons who incinerate lab packs according to the requirements in Subsection R315-268-42(c)(1) may use fiber drums in place of metal outer containers. Such fiber drums shall meet the Department of Transportation specifications in 49 CFR 173.12 and be overpacked according to the requirements in Subsection R315-264-316(b).

R315-264-317. Special Requirements for Hazardous Wastes F020, F021, F022, F023, F026, and F027.

(a) Hazardous Wastes F020, F021, F022, F023, F026, and F027 shall not be placed in a landfill unless the owner or operator operates the landfill in accord with a management plan for these wastes that is approved by the Director pursuant to the standards set out in Section R315-264-317, and in accord with all other applicable requirements of Rule R315-264. The factors to be considered are:

(1) The volume, physical, and chemical characteristics of the wastes, including their potential to migrate through the soil or to volatilize or escape into the atmosphere;

(2) The attenuative properties of underlying and surrounding soils or other materials;

(3) The mobilizing properties of other materials co-disposed with these wastes; and

(4) The effectiveness of additional treatment, design, or monitoring requirements.

(b) The Director may determine that additional design, operating, and monitoring requirements are necessary for landfills managing hazardous wastes F020, F021, F022, F023, F026, and F027 in order to reduce the possibility of migration of these wastes to ground water, surface water, or air so as to protect human health and the environment.

R315-264-340. Incinerator -- Applicability.

(a) The regulations of Sections R315-264-340 through 351 apply to owners and operators of hazardous waste incinerators, as defined in Section R315-260-10, except as Section R315-264-1 provides otherwise.

(b) Integration of the MACT standards.

(1) Except as provided by Subsections R315-264-340(b)(2) through (b)(4), the standards of Rule R315-264 do not apply to a new hazardous waste incineration unit that becomes subject to RCRA permit requirements after October 12, 2005; or no longer apply when an owner or operator of an existing hazardous waste incineration unit demonstrates compliance with the maximum achievable control technology (MACT) requirements of Section R307-214-2 by conducting a comprehensive performance test and submitting to the Director a Notification of Compliance under Section R307-14-2 documenting compliance with the requirements of Section R307-14-2. Nevertheless, even after this demonstration of compliance with the MACT standards, RCRA permit conditions that were based on the standards of

Rule R315-264 shall continue to be in effect until they are removed from the permit or the permit is terminated or revoked, unless the permit expressly provides otherwise.

(2) The MACT standards do not replace the closure requirements of Section R315-264-351 or the applicable requirements of Sections R315-264-1 through 4, 10 though 19, 30 through 37, 50 through 56, 70 through 77, 90 through 101, 110 through 120, 140 through 151, 1050 through 1065 and 1080 through 1090.

(3) The particulate matter standard of Subsection R315-264-343(c) remains in effect for incinerators that elect to comply with the alternative to the particulate matter standard under Section R307-214-2.

(4) The following requirements remain in effect for startup, shutdown, and malfunction events if you elect to comply with Subsection R35-270-235(a)(1)(i) to minimize emissions of toxic compounds from these events:

(i) Subsection R315-264-345(a) requiring that an incinerator operate in accordance with operating requirements specified in the permit; and

(ii) Subsection R315-264-345(c) requiring compliance with the emission standards and operating requirements during startup and shutdown if hazardous waste is in the combustion chamber, except for particular hazardous wastes.

(c) After consideration of the waste analysis included with part B of the permit application, the Director, in establishing the permit conditions, shall exempt the applicant from all requirements of Sections R315-264-340 through 351 except Section R315-264-341, Waste analysis, and Section R315-264-351, Closure,

(1) If the Director finds that the waste to be burned is:

(i) Listed as a hazardous waste in Sections R315-261-30 through 35 solely because it is ignitable, Hazard Code I, corrosive, Hazard Code C, or both; or

(ii) Listed as a hazardous waste in Sections R315-261-30 through 35 solely because it is reactive, Hazard Code R, for characteristics other than those listed in Subsections R315-261-23(a)(4) and (5), and will not be burned when other hazardous wastes are present in the combustion zone; or

(iii) A hazardous waste solely because it possesses the characteristic of ignitability, corrosivity, or both, as determined by the test for characteristics of hazardous wastes under Sections R315-261-20 through 24; or

(iv) A hazardous waste solely because it possesses any of the reactivity characteristics described by Subsections R315-261-23(a)(1), (2), (3), (6), (7), and (8), and will not be burned when other hazardous wastes are present in the combustion zone; and

(2) If the waste analysis shows that the waste contains none of the hazardous constituents listed in Rule R315-261, appendix VIII, which would reasonably be expected to be in the waste.

(d) If the waste to be burned is one which is described by Subsections R315-264-340(b)(1)(i), (ii), (iii), or (iv) and contains insignificant concentrations of the hazardous constituents listed in Rule R315-261, appendix VIII, then the Director may, in establishing permit conditions, exempt the applicant from all requirements of Sections R315-264-340 through 351, except Section R315-264-341, Waste analysis, and Section R315-264-351, Closure, after consideration of the waste analysis included with part B of the permit application, unless the Director finds that the waste will pose a threat to human health and the environment when burned in an incinerator.

(e) The owner or operator of an incinerator may conduct trial burns subject only to the requirements of Section R315-270-62, Short term and incinerator permits.

R315-264-341. Waste Analysis.

(a) As a portion of the trial burn plan required by Section R315-270-62, or with part B of the permit application, the owner or operator shall have included an analysis of the waste feed sufficient to provide all information required by Subsection R315-270-62(b) or Section R315-270-19. Owners or operators of new hazardous waste incinerators shall provide the information required by Subsection R315-270-62(c) or Section R315-270-19 to the greatest extent possible.

(b) Throughout normal operation the owner or operator shall conduct sufficient waste analysis to verify that waste feed to the incinerator is within the physical and chemical composition limits specified in his permit, under Subsection R315-264-345(b).

R315-264-342. Principal Organic Hazardous Constituents.

(a) Principal organic hazardous constituents in the waste feed shall be treated to the extent required by the performance standard of Section R315-264-343.

(b)(1) One or more principal organic hazardous constituents shall be specified in the facility's permit, from among those constituents listed in appendix VIII of Rule R315-261 for each waste feed to be burned. This specification shall be based on the degree of difficulty of incineration of the organic constituents in the waste and on their concentration or mass in the waste feed, considering the results of waste analyses and trial burns or alternative data submitted with part B of the facility's permit application. Organic constituents which represent the greatest degree of difficulty of incineration will be those most likely to be designated as principal organic hazardous constituents. Constituents are more likely to be designated as principal organic hazardous constituents if they are present in large quantities or concentrations in the waste.

(2) Trial principal organic hazardous constituents shall be designated for performance of trial burns in accordance with the procedure specified in Section R315-270-62 for obtaining trial burn permits.

R315-264-343. Performance Standards.

An incinerator burning hazardous waste shall be designed, constructed, and maintained so that, when operated in accordance with operating requirements specified under Section R315-264-345, it shall meet the following performance standards:

(a)(1) Except as provided in Subsection R315-264-343(a)(2), an incinerator burning hazardous waste shall achieve a destruction and removal efficiency of 99.99% for each principal organic hazardous constituent designated, under Section R315-264-342, in its permit for each waste feed. Destruction and removal efficiency is determined for each principal organic hazardous constituent from the following equation:

Destruction and removal efficiency = ((Win-Wout)/Win)x100%

where:

Win = mass feed rate of one principal organic hazardous constituent in the waste stream feeding the incinerator

and

Wout = mass emission rate of the same principal organic hazardous constituent present in exhaust emissions prior to release to the atmosphere.

(2) An incinerator burning hazardous wastes F020, F021, F022, F023, F026, or F027 shall achieve a destruction and removal efficiency of 99.9999% for each principal organic hazardous constituent designated, under Section R315-264-342, in its permit. This performance shall be demonstrated on principal organic hazardous constituents that

are more difficult to incinerate than tetra-, penta-, and hexachlorodibenzo-p-dioxins and dibenzofurans. Destruction and removal efficiency is determined for each principal organic hazardous constituent from the equation in Subsection R315-264-343(a)(1).

(b) An incinerator burning hazardous waste and producing stack emissions of more than 1.8 kilograms per hour, 4 pounds per hour, of hydrogen chloride shall control hydrogen chloride emissions such that the rate of emission is no greater than the larger of either 1.8 kilograms per hour or 1% of the hydrogen chloride in the stack gas prior to entering any pollution control equipment.

(c) An incinerator burning hazardous waste shall not emit particulate matter in excess of 180 milligrams per dry standard cubic meter, 0.08 grains per dry standard cubic foot, when corrected for the amount of oxygen in the stack gas according to the formula:

$Pc = Pm \times (14/(21-Y))$

Where Pc is the corrected concentration of particulate matter, Pm is the measured concentration of particulate matter, and Y is the measured concentration of oxygen in the stack gas, using the Orsat method for oxygen analysis of dry flue gas, presented in 40 CFR 60, appendix A Method 3, which is adopted and incorporated by Section R307-221-3. This correction procedure is to be used by all hazardous waste incinerators except those operating under conditions of oxygen enrichment. For these facilities, the Director shall select an appropriate correction procedure, to be specified in the facility permit.

(d) For purposes of permit enforcement, compliance with the operating requirements specified in the permit, under Section R315-264-345, shall be regarded as compliance with Section R315-264-343. However, evidence that compliance with those permit conditions is insufficient to ensure compliance with the performance requirements of Section R315-264-343 may be "information" justifying modification, revocation, or reissuance of a permit under Section R315-270-41.

R315-264-344. Hazardous Waste Incinerator Permits.

(a) The owner or operator of a hazardous waste incinerator may burn only wastes specified in his permit and only under operating conditions specified for those wastes under Section R315-264-345, except:

(1) In approved trial burns under Section R315-270-62; or

(2) Under exemptions created by Section R315-264-340.

(b) Other hazardous wastes may be burned only after operating conditions have been specified in a new permit or a permit modification as applicable. Operating requirements for new wastes may be based on either trial burn results or alternative data included with part B of a permit application under Section R315-270-19.

(c) The permit for a new hazardous waste incinerator shall establish appropriate conditions for each of the applicable requirements of Sections R315-264-340 through 351, including but not limited to allowable waste feeds and operating conditions necessary to meet the requirements of Section R315-264-345, sufficient to comply with the following standards:

(1) For the period beginning with initial introduction of hazardous waste to the incinerator and ending with initiation of the trial burn, and only for the minimum time required to establish operating conditions required in Subsection R315-264-344(c)(2), not to exceed a duration of 720 hours operating time for treatment of hazardous waste, the operating requirements shall be those most likely to ensure compliance with the performance standards of Section R315-264-343, based on the Director's engineering judgment. The Director may extend the duration of this period once for up to 720 additional hours when good cause for the extension is demonstrated by the applicant.

(2) For the duration of the trial burn, the operating requirements shall be sufficient to demonstrate compliance with the performance standards of Section R315-264-343 and shall be in accordance with the approved trial burn plan;

(3) For the period immediately following completion of the trial burn, and only for the minimum period sufficient to allow sample analysis, data computation, and submission of the trial burn results by the applicant, and review of the trial burn results and modification of the facility permit by the Director, the operating requirements shall be those most likely to ensure compliance with the performance standards of Section R315-264-343, based on the Director's engineering judgment.

(4) For the remaining duration of the permit, the operating requirements shall be those demonstrated, in a trial burn or by alternative data specified in Subsection R315-270-19(c), as sufficient to ensure compliance with the performance standards of Section R315-264-343.

R315-264-345. Operating Requirements.

(a) An incinerator shall be operated in accordance with operating requirements specified in the permit. These shall be specified on a case-by-case basis as those demonstrated, in a trial burn or in alternative data as specified in Subsection R315-264-344(b) and included with part B of a facility's permit application, to be sufficient to comply with the performance standards of Section R315-264-343.

(b) Each set of operating requirements shall specify the composition of the waste feed, including acceptable variations in the physical or chemical properties of the waste feed which will not affect compliance with the performance requirement of Section R315-264-343, to which the operating requirements apply. For each such waste feed, the permit shall specify acceptable operating limits including the following conditions:

(1) Carbon monoxide level in the stack exhaust gas;

(2) Waste feed rate;

(3) Combustion temperature;

(4) An appropriate indicator of combustion gas velocity;

(5) Allowable variations in incinerator system design or operating procedures; and

(6) Such other operating requirements as are necessary to ensure that the performance standards of Section R315-264-343 are met.

(c) During start-up and shut-down of an incinerator, hazardous waste, except wastes exempted in accordance with Section R315-264-340, shall not be fed into the incinerator unless the incinerator is operating within the conditions of operation, temperature, air feed rate, etc., specified in the permit.

(d) Fugitive emissions from the combustion zone shall be controlled by:

(1) Keeping the combustion zone totally sealed against fugitive emissions; or

(2) Maintaining a combustion zone pressure lower than atmospheric pressure; or

(3) An alternate means of control demonstrated, with part B of the permit application, to provide fugitive emissions control equivalent to maintenance of combustion zone pressure lower than atmospheric pressure.

(e) An incinerator shall be operated with a functioning system to automatically cut off waste feed to the incinerator when operating conditions deviate from limits established under Subsection R315-264-345(a).

(f) An incinerator shall cease operation when changes in

waste feed, incinerator design, or operating conditions exceed limits designated in its permit.

R315-264-347. Monitoring and Inspections.

(a) The owner or operator shall conduct, as a minimum, the following monitoring while incinerating hazardous waste:

(1) Combustion temperature, waste feed rate, and the indicator of combustion gas velocity specified in the facility permit shall be monitored on a continuous basis.

(2) Carbon monoxide shall be monitored on a continuous basis at a point in the incinerator downstream of the combustion zone and prior to release to the atmosphere.

(3) Upon request by the Director, sampling and analysis of the waste and exhaust emissions shall be conducted to verify that the operating requirements established in the permit achieve the performance standards of Section R315-264-343.

(b) The incinerator and associated equipment, pumps, valves, conveyors, pipes, etc., shall be subjected to thorough visual inspection, at least daily, for leaks, spills, fugitive emissions, and signs of tampering.

(c) The emergency waste feed cutoff system and associated alarms shall be tested at least weekly to verify operability, unless the applicant demonstrates to the Director that weekly inspections will unduly restrict or upset operations and that less frequent inspection will be adequate. At a minimum, operational testing shall be conducted at least monthly.

(d) This monitoring and inspection data shall be recorded and the records shall be placed in the operating record required by Section R315-264-73 and maintained in the operating record for five years.

R315-264-351. Closure.

At closure the owner or operator shall remove all hazardous waste and hazardous waste residues, including, but not limited to, ash, scrubber waters, and scrubber sludges, from the incinerator site.

At closure, as throughout the operating period, unless the owner or operator can demonstrate, in accordance with Subsection R315-261-3(d), that the residue removed from the incinerator is not a hazardous waste, the owner or operator becomes a generator of hazardous waste and shall manage it in accordance with applicable requirements of Rules R315-262 through 266.

R315-264-550. Applicability of Corrective Action Management Unit (CAMU) Regulations.

(a) Except as provided in Subsection R315-264-550(b), CAMUs are subject to the requirements of Section R315-264-552.

(b) CAMUs that were approved before April 22, 2002, or for which substantially complete applications (or equivalents) were submitted to the Agency on or before November 20, 2000, are subject to the requirements in Section R315-264-551 for grandfathered CAMUs; CAMU waste, activities, and design shall not be subject to the standards in Section R315-264-552, so long as the waste, activities, and design remain within the general scope of the CAMU as approved.

R315-264-551. Grandfathered Corrective Action Management Units (CAMUs).

(a) To implement remedies under Section R315-264-101 or RCRA Section 3008(h), or to implement remedies at a permitted facility that is not subject to Section R315-264-101, the Director may designate an area at the facility as a corrective action management unit under the requirements in Section R315-264-551. Corrective action management unit means an area within a facility that is used only for managing remediation wastes for implementing corrective action or cleanup at the facility. A CAMU shall be located within the contiguous property under the control of the owner or operator where the wastes to be managed in the CAMU originated. One or more CAMUs may be designated at a facility.

(1) Placement of remediation wastes into or within a CAMU does not constitute land disposal of hazardous wastes.

(2) Consolidation or placement of remediation wastes into or within a CAMU does not constitute creation of a unit subject to minimum technology requirements.

(b)(1) The Director may designate a regulated unit, as defined in Subsection R315-264-90(a)(2), as a CAMU, or may incorporate a regulated unit into a CAMU, if:

(i) The regulated unit is closed or closing, meaning it has begun the closure process under Section R315-264-113 or 40 CFR 265.113, which is adopted by reference; and

(ii) Inclusion of the regulated unit will enhance implementation of effective, protective and reliable remedial actions for the facility.

(2) The requirements of Sections R315-264-90 through 101, 110 through 120, and 140 through 151 and the unit-specific requirements of Rules R315-264 or 265 that applied to that regulated unit shall continue to apply to that portion of the CAMU after incorporation into the CAMU.

(c) The Director shall designate a CAMU in accordance with the following:

(1) The CAMU shall facilitate the implementation of reliable, effective, protective, and cost-effective remedies;

(2) Waste management activities associated with the CAMU shall not create unacceptable risks to humans or to the environment resulting from exposure to hazardous wastes or hazardous constituents;

(3) The CAMU shall include uncontaminated areas of the facility, only if including such areas for the purpose of managing remediation waste is more protective than management of such wastes at contaminated areas of the facility;

(4) Areas within the CAMU, where wastes remain in place after closure of the CAMU, shall be managed and contained so as to minimize future releases, to the extent practicable;

(5) The CAMU shall expedite the timing of remedial activity implementation, when appropriate and practicable;

(6) The CAMU shall enable the use, when appropriate, of treatment technologies, including innovative technologies, to enhance the long-term effectiveness of remedial actions by reducing the toxicity, mobility, or volume of wastes that will remain in place after closure of the CAMU; and

(7) The CAMU shall, to the extent practicable, minimize the land area of the facility upon which wastes will remain in place after closure of the CAMU.

(d) The owner/operator shall provide sufficient information to enable the Director to designate a CAMU in accordance with the criteria in Section R315-264-552.

(e) The Director shall specify, in the permit or order, requirements for CAMUs to include the following:

(1) The areal configuration of the CAMU.

(2) Requirements for remediation waste management to include the specification of applicable design, operation and closure requirements.

(3) Requirements for ground water monitoring that are sufficient to:

(i) Continue to detect and to characterize the nature, extent, concentration, direction, and movement of existing releases of hazardous constituents in ground water from sources located within the CAMU; and

(ii) Detect and subsequently characterize releases of

hazardous constituents to ground water that may occur from areas of the CAMU in which wastes will remain in place after closure of the CAMU.

(4) Closure and post-closure requirements.

(i) Closure of corrective action management units shall:

(A) Minimize the need for further maintenance; and

(B) Control, minimize, or eliminate, to the extent necessary to protect human health and the environment, for areas where wastes remain in place, post-closure escape of hazardous waste, hazardous constituents, leachate, contaminated runoff, or hazardous waste decomposition products to the ground, to surface waters, or to the atmosphere.

(ii) Requirements for closure of CAMUs shall include the following, as appropriate and as deemed necessary by the Director for a given CAMU:

(A) Requirements for excavation, removal, treatment or containment of wastes;

(B) For areas in which wastes will remain after closure of the CAMU, requirements for capping of such areas; and

(C) Requirements for removal and decontamination of equipment, devices, and structures used in remediation waste management activities within the CAMU.

(iii) In establishing specific closure requirements for CAMUs under Subsection R315-264-552(e), the Director shall consider the following factors:

(A) CAMU characteristics;

(B) Volume of wastes which remain in place after closure;

(C) Potential for releases from the CAMU;

(D) Physical and chemical characteristics of the waste;

(E) Hydrological and other relevant environmental conditions at the facility which may influence the migration of any potential or actual releases; and

(F) Potential for exposure of humans and environmental receptors if releases were to occur from the CAMU.

(iv) Post-closure requirements as necessary to protect human health and the environment, to include, for areas where wastes will remain in place, monitoring and maintenance activities, and the frequency with which such activities shall be performed to ensure the integrity of any cap, final cover, or other containment system.

(f) The Director shall document the rationale for designating CAMUs and shall make such documentation available to the public.

(g) Incorporation of a CAMU into an existing permit shall be approved by the Director according to the procedures for permit modifications under Section R315-270-41, or according to the permit modification procedures of Section R315-270-42.

(h) The designation of a CAMU does not change the Director's existing authority to address clean-up levels, media-specific points of compliance to be applied to remediation at a facility, or other remedy selection decisions.

R315-264-552. Corrective Action Management Units (CAMU).

(a) To implement remedies under Subsection R315-264-101 or RCRA Section 3008(h), or to implement remedies at a permitted facility that is not subject to Subsection R315-264-101, the Director may designate an area at the facility as a corrective action management unit under the requirements in Section R315-264-552. Corrective action management unit means an area within a facility that is used only for managing CAMU-eligible wastes for implementing corrective action or cleanup at the facility. A CAMU shall be located within the contiguous property under the control of the owner or operator where the wastes to be managed in the CAMU originated. One or more CAMUs may be designated at a facility.

(1) CAMU-eligible waste means:

(i) All solid and hazardous wastes, and all media, including ground water, surface water, soils, and sediments, and debris, that are managed for implementing cleanup. As-generated wastes, either hazardous or non-hazardous, from ongoing industrial operations at a site are not CAMU-eligible wastes.

(ii) Wastes that would otherwise meet the description in Subsection R315-264-552(a)(1)(i) are not "CAMU-Eligible Wastes" where:

(A) The wastes are hazardous wastes found during cleanup in intact or substantially intact containers, tanks, or other non-land-based units found above ground, unless the wastes are first placed in the tanks, containers or non-land-based units as part of cleanup, or the containers or tanks are excavated during the course of cleanup; or

(B) The Director exercises the discretion in Subsection R315-264-552(a)(2) to prohibit the wastes from management in a CAMU.

(iii) Notwithstanding Subsection R315-264-552(a)(1)(i), where appropriate, as-generated non-hazardous waste may be placed in a CAMU where such waste is being used to facilitate treatment or the performance of the CAMU.

(2) The Director may prohibit, where appropriate, the placement of waste in a CAMU where the Director has or receives information that such wastes have not been managed in compliance with applicable land disposal treatment standards of Rule R315-268, or applicable unit design requirements of Rule R315-264, or applicable unit design requirements of Rule R315-265, or that non-compliance with other applicable requirements of Rules R315-260 through 266, 268, 270 and 273 likely contributed to the release of the waste.

(3) Prohibition against placing liquids in CAMUs.

(i) The placement of bulk or noncontainerized liquid hazardous waste or free liquids contained in hazardous waste, whether or not sorbents have been added, in any CAMU is prohibited except where placement of such wastes facilitates the remedy selected for the waste.

(ii) The requirements in Subsection R315-264-314(c) for placement of containers holding free liquids in landfills apply to placement in a CAMU except where placement facilitates the remedy selected for the waste.

(iii) The placement of any liquid which is not a hazardous waste in a CAMU is prohibited unless such placement facilitates the remedy selected for the waste or a demonstration is made pursuant to Subsection R315-264-314(e).

(iv) The absence or presence of free liquids in either a containerized or a bulk waste shall be determined in accordance with Subsection R315-264-314(b). Sorbents used to treat free liquids in CAMUs shall meet the requirements of Subsection R315-264-314(d).

(4) Placement of CAMU-eligible wastes into or within a CAMU does not constitute land disposal of hazardous wastes.

(5) Consolidation or placement of CAMU-eligible wastes into or within a CAMU does not constitute creation of a unit subject to minimum technology requirements.

(b)(1) The Director may designate a regulated unit, as defined in Subsection R315-264-90(a)(2), as a CAMU, or may incorporate a regulated unit into a CAMU, if:

(i) The regulated unit is closed or closing, meaning it has begun the closure process under Section R315-264-113 or 40 CFR 265.113, which is adopted by reference; and

(ii) Inclusion of the regulated unit will enhance implementation of effective, protective and reliable remedial actions for the facility.

(2) The requirements of Sections R315-264-90 through

101, 110 through 120, and 140 through 151 and the unit-specific requirements of Rules R315-264 or 265 that applied to the regulated unit shall continue to apply to that portion of the CAMU after incorporation into the CAMU.

(c) The Director shall designate a CAMU that will be used for storage and/or treatment only in accordance with Subsection R315-264-552(f). The Director shall designate all other CAMUs in accordance with the following:

(1) The CAMU shall facilitate the implementation of reliable, effective, protective, and cost-effective remedies;

(2) Waste management activities associated with the CAMU shall not create unacceptable risks to humans or to the environment resulting from exposure to hazardous wastes or hazardous constituents;

(3) The CAMU shall include uncontaminated areas of the facility, only if including such areas for the purpose of managing CAMU-eligible waste is more protective than management of such wastes at contaminated areas of the facility;

(4) Areas within the CAMU, where wastes remain in place after closure of the CAMU, shall be managed and contained so as to minimize future releases, to the extent practicable;

(5) The CAMU shall expedite the timing of remedial activity implementation, when appropriate and practicable;

(6) The CAMU shall enable the use, when appropriate, of treatment technologies, including innovative technologies, to enhance the long-term effectiveness of remedial actions by reducing the toxicity, mobility, or volume of wastes that will remain in place after closure of the CAMU; and

(7) The CAMU shall, to the extent practicable, minimize the land area of the facility upon which wastes will remain in place after closure of the CAMU.

(d) The owner/operator shall provide sufficient information to enable the Director to designate a CAMU in accordance with the criteria in Section R315-264-552. This shall include, unless not reasonably available, information on:

(1) The origin of the waste and how it was subsequently managed, including a description of the timing and circumstances surrounding the disposal and/or release;

(2) Whether the waste was listed or identified as hazardous at the time of disposal and/or release; and

(3) Whether the disposal and/or release of the waste occurred before or after the land disposal requirements of Rule R315-268 were in effect for the waste listing or characteristic.

(e) The Director shall specify, in the permit or order, requirements for CAMUs to include the following:

(1) The areal configuration of the CAMU.

(2) Except as provided in Subsection R315-264-552(g), requirements for CAMU-eligible waste management to include the specification of applicable design, operation, treatment and closure requirements.

(3) Minimum design requirements. CAMUs, except as provided in Subsection R315-264-552(f), into which wastes are placed shall be designed in accordance with the following:

(i) Unless the Director approves alternate requirements under Subsection R315-264-552(e)(3)(ii), CAMUs that consist of new, replacement, or laterally expanded units shall include a composite liner and a leachate collection system that is designed and constructed to maintain less than a 30-cm depth of leachate over the liner. For purposes of Section R315-264-552, composite liner means a system consisting of two components; the upper component shall consist of a minimum 30-mil flexible membrane liner (FML), and the lower component shall consist of at least a two-foot layer of compacted soil with a hydraulic conductivity of no more than 1 x 10-7 cm/sec. FML components consisting of high density polyethylene (HDPE) shall be at least 60 mil thick. The FML component shall be installed in direct and uniform contact with the compacted soil component;

(ii) Alternate requirements. The Director may approve alternate requirements if:

(A) The Director finds that alternate design and operating practices, together with location characteristics, will prevent the migration of any hazardous constituents into the ground water or surface water at least as effectively as the liner and leachate collection systems in Subsection R315-264-552(e)(3)(i); or

(B) The CAMU is to be established in an area with existing significant levels of contamination, and the Director finds that an alternative design, including a design that does not include a liner, would prevent migration from the unit that would exceed long-term remedial goals.

(4) Minimum treatment requirements: Unless the wastes will be placed in a CAMU for storage and/or treatment only in accordance with Subsection R315-264-552(f), CAMU-eligible wastes that, absent Section R315-264-552, would be subject to the treatment requirements of Rule R315-268, and that the Director determines contain principal hazardous constituents shall be treated to the standards specified in Subsection R315-264-552(e)(4)(iii).

(i) Principal hazardous constituents are those constituents that the Director determines pose a risk to human health and the environment substantially higher than the cleanup levels or goals at the site.

(A) In general, the Director shall designate as principal hazardous constituents:

(I) Carcinogens that pose a potential direct risk from ingestion or inhalation at the site at or above 10^{-3}; and

(II) Non-carcinogens that pose a potential direct risk from ingestion or inhalation at the site an order of magnitude or greater over their reference dose.

(B) The Director shall also designate constituents as principal hazardous constituents, where appropriate, when risks to human health and the environment posed by the potential migration of constituents in wastes to ground water are substantially higher than cleanup levels or goals at the site; when making such a designation, the Director may consider such factors as constituent concentrations, and fate and transport characteristics under site conditions.

(C) The Director may also designate other constituents as principal hazardous constituents that the Director determines pose a risk to human health and the environment substantially higher than the cleanup levels or goals at the site.

(ii) In determining which constituents are "principal hazardous constituents," the Director shall consider all constituents which, absent Section R315-264-552, would be subject to the treatment requirements in Rule R315-268.

(iii) Waste that the Director determines contains principal hazardous constituents shall meet treatment standards determined in accordance with Subsections R315-264-552(e)(4)(iv) or (e)(4)(v).

(iv) Treatment standards for wastes placed in CAMUs.

(A) For non-metals, treatment shall achieve 90 percent reduction in total principal hazardous constituent concentrations, except as provided by Subsection R315-264-552(e)(4)(iv)(C).

(B) For metals, treatment shall achieve 90 percent reduction in principal hazardous constituent concentrations as measured in leachate from the treated waste or media, tested according to the TCLP, or 90 percent reduction in total constituent concentrations, when a metal removal treatment technology is used, except as provided by Subsection R315-264-552(e)(4)(iv)(C).

(C) When treatment of any principal hazardous constituent to a 90 percent reduction standard would result in

a concentration less than 10 times the Universal Treatment Standard for that constituent, treatment to achieve constituent concentrations less than 10 times the Universal Treatment Standard is not required. Universal Treatment Standards are identified in Section R315-268-48 Table UTS.

(D) For waste exhibiting the hazardous characteristic of ignitability, corrosivity or reactivity, the waste shall also be treated to eliminate these characteristics.

(E) For debris, the debris shall be treated in accordance with Section R315-268-45, or by methods or to levels established under Subsections R315-264-552(e)(4)(iv)(A) through (D) or Subsection R315-264-552(e)(4)(v), whichever the Director determines is appropriate.

(F) Alternatives to TCLP. For metal bearing wastes for which metals removal treatment is not used, the Director may specify a leaching test other than the TCLP, SW846 Method 1311, Rule R315-260-11(c)(3)(v), to measure treatment effectiveness, provided the Director determines that an alternative leach testing protocol is appropriate for use, and that the alternative more accurately reflects conditions at the site that affect leaching.

(v) Adjusted standards. The Director may adjust the treatment level or method in Subsection R315-264-552(e)(4)(iv) to a higher or lower level, based on one or more of the following factors, as appropriate. The adjusted level or method shall be protective of human health and the environment:

(A) The technical impracticability of treatment to the levels or by the methods in Subsection R315-264-552(e)(4)(iv);

(B) The levels or methods in Subsection R315-264-552(e)(4)(iv) would result in concentrations of principal hazardous constituents (PHCs) that are significantly above or below cleanup standards applicable to the site, established either site-specifically, or promulgated under state or federal law;

(C) The views of the affected local community on the treatment levels or methods in Subsection R315-264-552(e)(4)(iv) as applied at the site, and, for treatment levels, the treatment methods necessary to achieve these levels;

(D) The short-term risks presented by the on-site treatment method necessary to achieve the levels or treatment methods in Subsection R315-264-552(e)(4)(iv);

(E) The long-term protection offered by the engineering design of the CAMU and related engineering controls:

(I) Where the treatment standards in Subsection R315-264-552(e)(4)(iv) are substantially met and the principal hazardous constituents in the waste or residuals are of very low mobility; or

(II) Where cost-effective treatment has been used and the CAMU meets the Subtitle C liner and leachate collection requirements for new land disposal units at Subsections R315-264-301(c) and (d); or

(III) Where, after review of appropriate treatment technologies, the Director determines that cost-effective treatment is not reasonably available, and the CAMU meets the Subtitle C liner and leachate collection requirements for new land disposal units at Subsection R315-264-301(c) and (d); or

(IV) Where cost-effective treatment has been used and the principal hazardous constituents in the treated wastes are of very low mobility; or

(V) Where, after review of appropriate treatment technologies, the Director determines that cost-effective treatment is not reasonably available, the principal hazardous constituents in the wastes are of very low mobility, and either the CAMU meets or exceeds the liner standards for new, replacement, or laterally expanded CAMUs in Subsections R315-264-552(e)(3)(i) and (ii), or the CAMU provides substantially equivalent or greater protection.

(vi) The treatment required by the treatment standards shall be completed prior to, or within a reasonable time after, placement in the CAMU.

(vii) For the purpose of determining whether wastes placed in CAMUs have met site-specific treatment standards, the Director may, as appropriate, specify a subset of the principal hazardous constituents in the waste as analytical surrogates for determining whether treatment standards have been met for other principal hazardous constituents. This specification shall be based on the degree of difficulty of treatment and analysis of constituents with similar treatment properties.

(5) Except as provided in Subsection R315-264-552(f), requirements for ground water monitoring and corrective action that are sufficient to:

(i) Continue to detect and to characterize the nature, extent, concentration, direction, and movement of existing releases of hazardous constituents in ground water from sources located within the CAMU; and

(ii) Detect and subsequently characterize releases of hazardous constituents to ground water that may occur from areas of the CAMU in which wastes will remain in place after closure of the CAMU; and

(iii) Require notification to the Director and corrective action as necessary to protect human health and the environment for releases to ground water from the CAMU.

(6) Except as provided in Subsection R315-264-552(f), closure and post-closure requirements:

(i) Closure of corrective action management units shall:

(A) Minimize the need for further maintenance; and

(B) Control, minimize, or eliminate, to the extent necessary to protect human health and the environment, for areas where wastes remain in place, post-closure escape of hazardous wastes, hazardous constituents, leachate, contaminated runoff, or hazardous waste decomposition products to the ground, to surface waters, or to the atmosphere.

(ii) Requirements for closure of CAMUs shall include the following, as appropriate and as deemed necessary by the Director for a given CAMU:

(A) Requirements for excavation, removal, treatment or containment of wastes; and

(B) Requirements for removal and decontamination of equipment, devices, and structures used in CAMU-eligible waste management activities within the CAMU.

(iii) In establishing specific closure requirements for CAMUs under Subsection R315-264-552(e), the Director shall consider the following factors:

(A) CAMU characteristics;

(B) Volume of wastes which remain in place after closure;

(C) Potential for releases from the CAMU;

(D) Physical and chemical characteristics of the waste;

(E) Hydrogeological and other relevant environmental conditions at the facility which may influence the migration of any potential or actual releases; and

(F) Potential for exposure of humans and environmental receptors if releases were to occur from the CAMU.

(iv) Cap requirements:

(A) At final closure of the CAMU, for areas in which wastes will remain after closure of the CAMU, with constituent concentrations at or above remedial levels or goals applicable to the site, the owner or operator shall cover the CAMU with a final cover designed and constructed to meet the following performance criteria, except as provided in Subsection R315-264-552(e)(6)(iv)(B):

(1) Provide long-term minimization of migration of liquids through the closed unit;

(2) Function with minimum maintenance;

(3) Promote drainage and minimize erosion or abrasion of the cover;

(4) Accommodate settling and subsidence so that the cover's integrity is maintained; and

(5) Have a permeability less than or equal to the permeability of any bottom liner system or natural subsoils present.

(B) The Director may determine that modifications to Subsection R315-264-552(e)(6)(iv)(A) are needed to facilitate treatment or the performance of the CAMU, e.g., to promote biodegradation.

(v) Post-closure requirements as necessary to protect human health and the environment, to include, for areas where wastes will remain in place, monitoring and maintenance activities, and the frequency with which such activities shall be performed to ensure the integrity of any cap, final cover, or other containment system.

(f) CAMUs used for storage and/or treatment only are CAMUs in which wastes will not remain after closure. Such CAMUs shall be designated in accordance with all of the requirements of Section R315-264-552, except as follows.

(1) CAMUs that are used for storage and/or treatment only and that operate in accordance with the time limits established in the staging pile regulations at Subsections R315-264-554(d)(1)(iii), (h), and (i) are subject to the requirements for staging piles at Subsections R315-264-554(d)(1)(i) and (ii), (d)(2), (e) and (f), (j), and (k) in lieu of the performance standards and requirements for CAMUs in Subsections R315-264-552(c) and (e)(3) through (6).

(2) CAMUs that are used for storage and/or treatment only and that do not operate in accordance with the time limits established in the staging pile regulations at Subsections R315-264-554(d)(1)(iii), (h), and (i):

(i) Shall operate in accordance with a time limit, established by the Director, that is no longer than necessary to achieve a timely remedy selected for the waste, and

(ii) Are subject to the requirements for staging piles at Subsection R315-264-554(d)(1)(i) and (ii), (d)(2), (e) and (f), (j), and (k) in lieu of the performance standards and requirements for CAMUs in Subsection R315-264-552(c) and (e)(4) and (6).

(g) CAMUs into which wastes are placed where all wastes have constituent levels at or below remedial levels or goals applicable to the site do not have to comply with the requirements for liners at Subsection R315-264-552(e)(3)(i), caps at Subsection R315-264-552(e)(6)(iv), ground water monitoring requirements at Subsection R315-264-552(e)(5) or, for treatment and/or storage-only CAMUs, the design standards at Subsection R315-264-552(f).

(h) The Director shall provide public notice and a reasonable opportunity for public comment before designating a CAMU. Such notice shall include the rationale for any proposed adjustments under Subsection R315-264-552(e)(4)(v) to the treatment standards in Subsection R315-264-552(e)(4)(iv).

(i) Notwithstanding any other provision of Section R315-264-552, the Director may impose additional requirements as necessary to protect human health and the environment.

(j) Incorporation of a CAMU into an existing permit shall be approved by the Director according to the procedures for permit modifications under Section R315-270-41, or according to the permit modification procedures of Section R315-270-42.

(k) The designation of a CAMU does not change the Director's existing authority to address clean-up levels, media-specific points of compliance to be applied to remediation at a facility, or other remedy selection decisions.

R315-264-553. Temporary Units (TU).

(a) For temporary tanks and container storage areas used to treat or store hazardous remediation wastes during remedial activities required under Section R315-264-101 or RCRA 3008(h), or at a permitted facility that is not subject to Section R315-264-101, the Director may designate a unit at the facility, as a temporary unit. A temporary unit shall be located within the contiguous property under the control of the owner/operator where the wastes to be managed in the temporary unit originated. For temporary units, the Director may replace the design, operating, or closure standard applicable to these units under Rule R315-264 or 265 with alternative requirements which protect human health and the environment.

(b) Any temporary unit to which alternative requirements are applied in accordance with Subsection R315-264-553(a) shall be:

(1) Located within the facility boundary; and

(2) Used only for treatment or storage of remediation wastes.

(c) In establishing standards to be applied to a temporary unit, the Director shall consider the following factors:

(1) Length of time such unit will be in operation;

(2) Type of unit;

(3) Volumes of wastes to be managed;

(4) Physical and chemical characteristics of the wastes to be managed in the unit;

(5) Potential for releases from the unit;

(6) Hydrogeological and other relevant environmental conditions at the facility which may influence the migration of any potential releases; and

(7) Potential for exposure of humans and environmental receptors if releases were to occur from the unit.

(d) The Director shall specify in the permit or order the length of time a temporary unit will be allowed to operate, to be no longer than a period of one year. The Director shall also specify the design, operating, and closure requirements for the unit.

(e) The Director may extend the operational period of a temporary unit once for no longer than a period of one year beyond that originally specified in the permit or order, if the Director determines that:

(1) Continued operation of the unit will not pose a threat to human health and the environment; and

(2) Continued operation of the unit is necessary to ensure timely and efficient implementation of remedial actions at the facility.

(f) Incorporation of a temporary unit or a time extension for a temporary unit into an existing permit shall be:

(1) Approved in accordance with the procedures for permit modifications under Section R315-270-41; or

(2) Requested by the owner/operator as a Class II modification according to the procedures under Section R315-270-42.

(g) The Director shall document the rationale for designating a temporary unit and for granting time extensions for temporary units and shall make such documentation available to the public.

R315-264-554. Staging Piles.

Section R315-264-554 is written in a special format to make it easier to understand the regulatory requirements. Like other regulations, this establishes enforceable legal requirements. For Section R315-264-554 "I" and "you" refer to the owner/operator.

(a) What is a staging pile? A staging pile is an accumulation of solid, non-flowing remediation waste, as defined in Section R315-260-10, that is not a containment

building and is used only during remedial operations for temporary storage at a facility. A staging pile shall be located within the contiguous property under the control of the owner/operator where the wastes to be managed in the staging pile originated. Staging piles shall be designated by the Director according to the requirements in Section R315-264-554.

(1) For the purposes of Section R315-264-554, storage includes mixing, sizing, blending, or other similar physical operations as long as they are intended to prepare the wastes for subsequent management or treatment.

(b) When may I use a staging pile? You may use a staging pile to store hazardous remediation waste, or remediation waste otherwise subject to land disposal restrictions, only if you follow the standards and design criteria the Director has designated for that staging pile. The Director shall designate the staging pile in a permit or, at an interim status facility, in a closure plan or order, consistent with Subsections R315-270-72(a)(5) and (b)(5). The Director shall establish conditions in the permit, closure plan, or order that comply with Subsection R315-264-554(d) through (k).

(c) What information shall I provide to get a staging pile designated? When seeking a staging pile designation, you shall provide:

(1) Sufficient and accurate information to enable the Director to impose standards and design criteria for your staging pile according to Section R315-264-554(d) through (k);

(2) Certification by a qualified Professional Engineer for technical data, such as design drawings and specifications, and engineering studies, unless the Director determines, based on information that you provide, that this certification is not necessary to ensure that a staging pile will protect human health and the environment; and

(3) Any additional information the Director determines is necessary to protect human health and the environment.

(d) What performance criteria shall a staging pile satisfy? The Director shall establish the standards and design criteria for the staging pile in the permit, closure plan, or order.

(1) The standards and design criteria shall comply with the following:

(i) The staging pile shall facilitate a reliable, effective and protective remedy;

(ii) The staging pile shall be designed so as to prevent or minimize releases of hazardous wastes and hazardous constituents into the environment, and minimize or adequately control cross-media transfer, as necessary to protect human health and the environment, for example, through the use of liners, covers, run-off/run-on controls, as appropriate; and

(iii) The staging pile shall not operate for more than two years, except when the Director grants an operating term extension under Subsection R315-264-554(i), entitled "May I receive an operating extension for a staging pile?". You shall measure the two-year limit, or other operating term specified by the Director in the permit, closure plan, or order, from the first time you place remediation waste into a staging pile. You shall maintain a record of the date when you first placed remediation waste into the staging pile for the life of the permit, closure plan, or order, or for three years, whichever is longer.

(2) In setting the standards and design criteria, the Director shall consider the following factors:

(i) Length of time the pile will be in operation;

(ii) Volumes of wastes you intend to store in the pile;

(iii) Physical and chemical characteristics of the wastes to be stored in the unit;

(iv) Potential for releases from the unit;

(v) Hydrogeological and other relevant environmental conditions at the facility that may influence the migration of any potential releases; and

(vi) Potential for human and environmental exposure to potential releases from the unit;

(e) May a staging pile receive ignitable or reactive remediation waste? You shall not place ignitable or reactive remediation waste in a staging pile unless:

(1) You have treated, rendered or mixed the remediation waste before you placed it in the staging pile so that:

(i) The remediation waste no longer meets the definition of ignitable or reactive under Sections R315-261-21 or 23; and

(ii) You have complied with Subsection R315-264-17(b); or

(2) You manage the remediation waste to protect it from exposure to any material or condition that may cause it to ignite or react.

(f) How do I handle incompatible remediation wastes in a staging pile? The term "incompatible waste" is defined in Section R315-260-10. You shall comply with the following requirements for incompatible wastes in staging piles:

(1) You shall not place incompatible remediation wastes in the same staging pile unless you have complied with Subsection R315-264-17(b);

(2) If remediation waste in a staging pile is incompatible with any waste or material stored nearby in containers, other piles, open tanks or land disposal units, for example, surface impoundments, you shall separate the incompatible materials, or protect them from one another by using a dike, berm, wall or other device; and

(3) You shall not pile remediation waste on the same base where incompatible wastes or materials were previously piled, unless the base has been decontaminated sufficiently to comply with Subsection R315-264-17(b).

(g) Are staging piles subject to Land Disposal Restrictions and Minimum Technological Requirements? No. Placing hazardous remediation wastes into a staging pile does not constitute land disposal of hazardous wastes or create a unit that is subject to the minimum technological requirements of RCRA 3004(o).

(h) How long may I operate a staging pile? The Director may allow a staging pile to operate for up to two years after hazardous remediation waste is first placed into the pile. You shall use a staging pile no longer than the length of time designated by the Director in the permit, closure plan, or order, the "operating term", except as provided in Subsection R315-264-554(i).

(i) May I receive an operating extension for a staging pile?

(1) The Director may grant one operating term extension of up to 180 days beyond the operating term limit contained in the permit, closure plan, or order, see Subsection R315-264-554(l) for modification procedures. To justify to the Director the need for an extension, you shall provide sufficient and accurate information to enable the Director to determine that continued operation of the staging pile:

(i) Will not pose a threat to human health and the environment; and

(ii) Is necessary to ensure timely and efficient implementation of remedial actions at the facility.

(2) The Director may, as a condition of the extension, specify further standards and design criteria in the permit, closure plan, or order, as necessary, to ensure protection of human health and the environment.

(j) What is the closure requirement for a staging pile located in a previously contaminated area?

(1) Within 180 days after the operating term of the staging pile expires, you shall close a staging pile located in a

previously contaminated area of the site by removing or decontaminating all:

(i) Remediation waste;

(ii) Contaminated containment system components; and

(iii) Structures and equipment contaminated with waste and leachate.

(2) You shall also decontaminate contaminated subsoils in a manner and according to a schedule that the Director determines will protect human health and the environment.

(3) The Director shall include the above requirements in the permit, closure plan, or order in which the staging pile is designated.

(k) What is the closure requirement for a staging pile located in an uncontaminated area?

(1) Within 180 days after the operating term of the staging pile expires, you shall close a staging pile located in an uncontaminated area of the site according to Subsections R315-264-258(a) and 264-111; or according to 40 CFR 265.258(a) and 265.111, which are adopted by reference.

(2) The Director shall include the above requirement in the permit, closure plan, or order in which the staging pile is designated.

(l) How may my existing permit, for example, Remedial Action Plan, closure plan, or order be modified to allow me to use a staging pile?

(1) To modify a permit, other than a Remedial Action Plan, to incorporate a staging pile or staging pile operating term extension, either:

(i) The Director shall approve the modification under the procedures for permit modifications in Section R315-270-41; or

(ii) You shall request a Class 2 modification under Section R315-270-42.

(2) To modify a Remedial Action Plan to incorporate a staging pile or staging pile operating term extension, you shall comply with the Remedial Action Plan modification requirements under Sections R315-270-170 and 175.

(3) To modify a closure plan to incorporate a staging pile or staging pile operating term extension, you shall follow the applicable requirements under Section R315-264-112(c) or 40 CFR 265.112(c), which is adopted by reference.

(4) To modify an order to incorporate a staging pile or staging pile operating term extension, you shall follow the terms of the order and the applicable provisions of Subsection R315-270-72(a)(5) or (b)(5).

(m) Is information about the staging pile available to the public? The Director shall document the rationale for designating a staging pile or staging pile operating term extension and make this documentation available to the public.

R315-264-555. Disposal of CAMU-Eligible Wastes in Permitted Hazardous Waste Landfills.

(a) The Director may approve placement of CAMU-eligible wastes in hazardous waste landfills not located at the site from which the waste originated, without the wastes meeting the requirements of Rule R315-268, if the conditions in Subsections R315-264-555(a)(1) through (3) are met:

(1) The waste meets the definition of CAMU-eligible waste in Subsection R315-264-552(a)(1) and (2).

(2) The Director identifies principal hazardous constitutes in such waste, in accordance with Subsection R315-264-552(e)(4)(i) and (ii), and requires that such principal hazardous constituents are treated to any of the following standards specified for CAMU-eligible wastes:

(i) The treatment standards under Subsection R315-264-552(e)(4)(iv); or

(ii) Treatment standards adjusted in accordance with Subsection R315-264-552(e)(4)(v)(A), (C), (D) or (E)(I); or

(iii) Treatment standards adjusted in accordance with Subsection R315-264-552(e)(4)(v)(E)(II), where treatment has been used and that treatment significantly reduces the toxicity or mobility of the principal hazardous constituents in the waste, minimizing the short-term and long-term threat posed by the waste, including the threat at the remediation site.

(3) The landfill receiving the CAMU-eligible waste shall have a permit issued under Section 19-6-108, meet the requirements for new landfills in Sections R315-264-300 through 317, and be authorized to accept CAMU-eligible wastes; for the purposes of this requirement, "permit" does not include interim status.

(b) The person seeking approval shall provide sufficient information to enable the Director to approve placement of CAMU-eligible waste in accordance with Subsection R315-264-555(a). Information required by Subsections R315-264-552(d)(1) through (3) for CAMU applications shall be provided, unless not reasonably available.

(c) The Director shall provide public notice and a reasonable opportunity for public comment before approving CAMU eligible waste for placement in an off-site permitted hazardous waste landfill, consistent with the requirements for CAMU approval at Subsection R315-264-552(h). The approval shall be specific to a single remediation.

(d) Applicable hazardous waste management requirements in Rule R315-264, including recordkeeping requirements to demonstrate compliance with treatment standards approved under Section R315-264-555, for CAMU-eligible waste shall be incorporated into the receiving facility permit through permit issuance or a permit modification, providing notice and an opportunity for comment and a hearing. Notwithstanding Subsection R315-270-4(a), a landfill may not receive hazardous CAMU-eligible waste under Section R315-264-555 unless its permit specifically authorizes receipt of such waste.

(e) For each remediation, CAMU-eligible waste may not be placed in an off-site landfill authorized to receive CAMU-eligible waste in accordance with Subsection R315-264-555(d) until the following additional conditions have been met:

(1) The landfill owner/operator notifies the Director and persons on the facility mailing list, maintained in accordance with Subsection R315-124-10(c)(1)(ix), of his or her intent to receive CAMU-eligible waste in accordance with Section R315-264-555; the notice shall identify the source of the remediation waste, the principal hazardous constituents in the waste, and treatment requirements.

(2) Persons on the facility mailing list may provide comments, including objections to the receipt of the CAMU-eligible waste, to the Director within 15 days of notification.

(3) The Director may object to the placement of the CAMU-eligible waste in the landfill within 30 days of notification; the Director may extend the review period an additional 30 days because of public concerns or insufficient information.

(4) CAMU-eligible wastes may not be placed in the landfill until the Director has notified the facility owner/operator that he or she does not object to its placement.

(5) If the Director objects to the placement or does not notify the facility owner/operator that he or she has chosen not to object, the facility may not receive the waste, notwithstanding Subsection R315-270-4(a), until the objection has been resolved, or the owner/operator obtains a permit modification in accordance with the procedures of Section R315-270-42 specifically authorizing receipt of the waste.

(6) As part of the permit issuance or permit modification process of Subsection R315-264-555(d), the Director may

modify, reduce, or eliminate the notification requirements of Subsection R315-264-555(e) as they apply to specific categories of CAMU-eligible waste, based on minimal risk.

(f) Generators of CAMU-eligible wastes sent off-site to a hazardous waste landfill under Section R315-264-555 shall comply with the requirements of Subsection R315-268-7(a)(4); off-site facilities treating CAMU-eligible wastes to comply with Section R315-264-555 shall comply with the requirements of Subsection R315-268-7(b)(4), except that the certification shall be with respect to the treatment requirements of Subsection R315-264-555(a)(2).

(g) For the purposes of Section R315-264-555 only, the "design of the CAMU" in Subsection R315-264-552(e)(4)(v)(E) means design of the permitted hazardous waste landfill.

R315-264-570. Drip Pads -- Applicability.

(a) The requirements of Sections R315-264-570 through 575 apply to owners and operators of facilities that use new or existing drip pads to convey treated wood drippage, precipitation, and/or surface water run-off to an associated collection system. Existing drip pads are those constructed before December 6, 1990 and those for which the owner or operator has a design and has entered into binding financial or other agreements for construction prior to December 6, 1990 for all HSWA drip pads or July 30, 1993 for all non-HSWA drip pads. All other drip pads are new drip pads. The requirement at Subsection R315-264-573(b)(3) to install a leak collection system applies only to those drip pads that are constructed after December 24, 1992 except for those constructed after December 24, 1992 for which the owner or operator has a design and has entered into binding financial or other agreements for construction prior to December 24, 1992 for all HSWA drip pads or July 30, 1993 for all non-HSWA drip pads.

(b) The owner or operator of any drip pad that is inside or under a structure that provides protection from precipitation so that neither run-off nor run-on is generated is not subject to regulation under Subsection R315-264-573(e) or Subsection R315-264-573(f), as appropriate.

(c) The requirements of Sections R315-264-570 through 575 are not applicable to the management of infrequent and incidental drippage in storage yards provided that:

(1) The owner or operator maintains and complies with a written contingency plan that describes how the owner or operator will respond immediately to the discharge of such infrequent and incidental drippage. At a minimum, the contingency plan shall describe how the owner or operator will do the following:

(i) Clean up the drippage;

(ii) Document the cleanup of the drippage;

(iii) Retain documents regarding cleanup for three years; and

(iv) Manage the contaminated media in a manner consistent with Utah regulations.

R315-264-571. Assessment of Existing Drip Pad Integrity.

(a) For each existing drip pad as defined in Subsection R315-264-570, the owner or operator shall evaluate the drip pad and determine whether it meets all of the requirements of Sections R315-264-570 through 575, except the requirements for liners and leak detection systems of Subsection R315-264-573(b). The owner or operator shall obtain and keep on file at the facility a written assessment of the drip pad, reviewed and certified by a qualified Professional Engineer that attests to the results of the evaluation. The assessment shall be reviewed, updated and re-certified annually until all upgrades, repairs, or modifications necessary to achieve compliance with all the standards of Section R315-264-573 are complete. The evaluation shall document the extent to which the drip pad meets each of the design and operating standards of Section R315-264-573, except the standards for liners and leak detection systems, specified in Subsection R315-264-573(b).

(b) The owner or operator shall develop a written plan for upgrading, repairing, and modifying the drip pad to meet the requirements of Subsection R315-264-573(b) and submit the plan to the Director no later than 2 years before the date that all repairs, upgrades, and modifications are complete. This written plan shall describe all changes to be made to the drip pad in sufficient detail to document compliance with all the requirements of Section R315-264-573. The plan shall be reviewed and certified by a qualified Professional Engineer.

(c) Upon completion of all upgrades, repairs, and modifications, the owner or operator shall submit to the Director, the as-built drawings for the drip pad together with a certification by a qualified Professional Engineer attesting that the drip pad conforms to the drawings.

(d) If the drip pad is found to be leaking or unfit for use, the owner or operator shall comply with the provisions of Subsection R315-264-573(m) or close the drip pad in accordance with Section R315-264-575.

R315-264-572. Design and Installation of New Drip Pads.

Owners and operators of new drip pads shall ensure that the pads are designed, installed, and operated in accordance with one of the following:

(a) all of the requirements of Section R315-264-573, except 573(a)(4) and Subsections R315-264-574 and 575, or

(b) all of the requirements of Sections R315-264-573, except 573(b), 574 and 575.

R315-264-573. Design and Operating Requirements.

(a) Drip pads shall:

(1) Be constructed of non-earthen materials, excluding wood and non-structurally supported asphalt;

(2) Be sloped to free-drain treated wood drippage, rain and other waters, or solutions of drippage and water or other wastes to the associated collection system;

(3) Have a curb or berm around the perimeter;

(4)(i) Have a hydraulic conductivity of less than or equal to 1×10^{-7} centimeters per second, e.g., existing concrete drip pads shall be sealed, coated, or covered with a surface material with a hydraulic conductivity of less than or equal to 1×10^{-7} centimeters per second such that the entire surface where drippage occurs or may run across is capable of containing such drippage and mixtures of drippage and precipitation, materials, or other wastes while being routed to an associated collection system. This surface material shall be maintained free of cracks and gaps that could adversely affect its hydraulic conductivity, and the material shall be chemically compatible with the preservatives that contact the drip pad. The requirements of this provision apply only to existing drip pads and those drip pads for which the owner or operator elects to comply with Subsection R315-264-572(b) instead of Subsection R315-264-572(a).

(ii) The owner or operator shall obtain and keep on file at the facility a written assessment of the drip pad, reviewed and certified by a qualified Professional Engineer that attests to the results of the evaluation. The assessment shall be reviewed, updated and recertified annually. The evaluation shall document the extent to which the drip pad meets the design and operating standards of Section R315-264-573, except for Subsection R315-264-573(b).

(5) Be of sufficient structural strength and thickness to prevent failure due to physical contact, climatic conditions, the stress of daily operations, e.g., variable and moving loads such as vehicle traffic, movement of wood, etc.

Note: The Director will generally consider applicable standards established by professional organizations generally recognized by the industry such as the American Concrete Institute or the American Society of Testing and Materials in judging the structural integrity requirement of Subsection R315-264-573(a).

(b) If an owner/operator elects to comply with Subsection R315-264-572(a) instead of Subsection R315-264-572(b), the drip pad shall have:

(1) A synthetic liner installed below the drip pad that is designed, constructed, and installed to prevent leakage from the drip pad into the adjacent subsurface soil or groundwater or surface water at any time during the active life, including the closure period, of the drip pad. The liner shall be constructed of materials that will prevent waste from being absorbed into the liner and to prevent releases into the adjacent subsurface soil or groundwater or surface water during the active life of the facility. The liner shall be:

(i) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients, including static head and external hydrogeologic forces; physical contact with the waste or drip pad leakage to which they are exposed; climatic conditions; the stress of installation; and the stress of daily operation, including stresses from vehicular traffic on the drip pad;

(ii) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression or uplift; and

(iii) Installed to cover all surrounding earth that could come in contact with the waste or leakage; and

(2) A leakage detection system immediately above the liner that is designed, constructed, maintained and operated to detect leakage from the drip pad. The leakage detection system shall be:

(i) Constructed of materials that are:

(A) Chemically resistant to the waste managed in the drip pad and the leakage that might be generated; and

(B) Of sufficient strength and thickness to prevent collapse under the pressures exerted by overlaying materials and by any equipment used at the drip pad;

(ii) Designed and operated to function without clogging through the scheduled closure of the drip pad; and

(iii) Designed so that it will detect the failure of the drip pad or the presence of a release of hazardous waste or accumulated liquid at the earliest practicable time.

(3) A leakage collection system immediately above the liner that is designed, constructed, maintained and operated to collect leakage from the drip pad such that it can be removed from below the drip pad. The date, time, and quantity of any leakage collected in this system and removed shall be documented in the operating log.

(c) Drip pads shall be maintained such that they remain free of cracks, gaps, corrosion, or other deterioration that could cause hazardous waste to be released from the drip pad.

Note: See Subsection R315-264-573(m) for remedial action required if deterioration or leakage is detected.

(d) The drip pad and associated collection system shall be designed and operated to convey, drain, and collect liquid resulting from drippage or precipitation in order to prevent run-off.

(e) Unless protected by a structure, as described in Subsection R315-264-570(b), the owner or operator shall design, construct, operate and maintain a run-on control system capable of preventing flow onto the drip pad during peak discharge from at least a 24-hour, 25-year storm, unless the system has sufficient excess capacity to contain any run-off that might enter the system.

(f) Unless protected by a structure or cover as described in Subsection R315-264-570(b), the owner or operator shall design, construct, operate and maintain a run-off management system to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(g) The drip pad shall be evaluated to determine that it meets the requirements of Subsections R315-264-573(a) through (f) and the owner or operator shall obtain a statement from a qualified Professional Engineer certifying that the drip pad design meets the requirements of Section R315-264-573.

(h) Drippage and accumulated precipitation shall be removed from the associated collection system as necessary to prevent overflow onto the drip pad.

(i) The drip pad surface shall be cleaned thoroughly in a manner and frequency such that accumulated residues of hazardous waste or other materials are removed, with residues being properly managed as hazardous waste, so as to allow weekly inspections of the entire drip pad surface without interference or hindrance from accumulated residues of hazardous waste or other materials on the drip pad. The owner or operator shall document the date and time of each cleaning and the cleaning procedure used in the facility's operating log. The owner/operator shall determine if the residues are hazardous as per Section R315-262-11 and, if so, shall manage them under Rules R315-261 through 268, 270, and section 3010 of RCRA.

(j) Drip pads shall be operated and maintained in a manner to minimize tracking of hazardous waste or hazardous waste constituents off the drip pad as a result of activities by personnel or equipment.

(k) After being removed from the treatment vessel, treated wood from pressure and non-pressure processes shall be held on the drip pad until drippage has ceased. The owner or operator shall maintain records sufficient to document that all treated wood is held on the pad following treatment in accordance with this requirement.

(l) Collection and holding units associated with run-on and run-off control systems shall be emptied or otherwise managed as soon as possible after storms to maintain design capacity of the system.

(m) Throughout the active life of the drip pad and as specified in the permit, if the owner or operator detects a condition that may have caused or has caused a release of hazardous waste, the condition shall be repaired within a reasonably prompt period of time following discovery, in accordance with the following procedures:

(1) Upon detection of a condition that may have caused or has caused a release of hazardous waste, e.g., upon detection of leakage in the leak detection system, the owner or operator shall:

(i) Enter a record of the discovery in the facility operating log;

(ii) Immediately remove the portion of the drip pad affected by the condition from service;

(iii) Determine what steps shall be taken to repair the drip pad and clean up any leakage from below the drip pad, and establish a schedule for accomplishing the repairs;

(iv) Within 24 hours after discovery of the condition, notify the Director of the condition and, within 10 working days, provide written notice to the Director with a description of the steps that will be taken to repair the drip pad and clean up any leakage, and the schedule for accomplishing this work.

(2) The Director shall review the information submitted, make a determination regarding whether the pad shall be removed from service completely or partially until repairs and cleanup are complete and notify the owner or operator of the determination and the underlying rationale in writing.

(3) Upon completing all repairs and cleanup, the owner or operator shall notify the Director in writing and provide a

certification signed by an independent, qualified registered professional engineer, that the repairs and cleanup have been completed according to the written plan submitted in accordance with Subsection R315-264-573(m)(1)(iv).

(n) Should a permit be necessary, the Director shall specify in the permit all design and operating practices that are necessary to ensure that the requirements of Section R315-264-573 are satisfied.

(o) The owner or operator shall maintain, as part of the facility operating log, documentation of past operating and waste handling practices. This shall include identification of preservative formulations used in the past, a description of drippage management practices, and a description of treated wood storage and handling practices.

R315-264-574. Inspections.

(a) During construction or installation, liners and cover systems, e.g., membranes, sheets, or coatings, shall be inspected for uniformity, damage and imperfections, e.g., holes, cracks, thin spots, or foreign materials. Immediately after construction or installation, liners shall be inspected and certified as meeting the requirements in Section R315-264-573 by a qualified Professional Engineer. This certification shall be maintained at the facility as part of the facility operating record. After installation, liners and covers shall be inspected to ensure tight seams and joints and the absence of tears, punctures, or blisters.

(b) While a drip pad is in operation, it shall be inspected weekly and after storms to detect evidence of any of the following:

(1) Deterioration, malfunctions or improper operation of run-on and run-off control systems;

(2) The presence of leakage in and proper functioning of leak detection system.

(3) Deterioration or cracking of the drip pad surface.

Note: See Section R315-264-573(m) for remedial action required if deterioration or leakage is detected.

R315-264-575. Closure.

(a) At closure, the owner or operator shall remove or decontaminate all waste residues, contaminated containment system components, pad, liners, etc., contaminated subsoils, and structures and equipment contaminated with waste and leakage, and manage them as hazardous waste.

(b) If, after removing or decontaminating all residues and making all reasonable efforts to effect removal or decontamination of contaminated components, subsoils, structures, and equipment as required in Subsection R315-264-575(a), the owner or operator finds that not all contaminated subsoils can be practicably removed or decontaminated, he shall close the facility and perform post-closure care in accordance with closure and post-closure care requirements that apply to landfills, Section R315-264-310. For permitted units, the requirement to have a permit continues throughout the post-closure period. In addition, for the purpose of closure, post-closure, and financial responsibility, such a drip pad is then considered to be landfill, and the owner or operator shall meet all of the requirements for landfills specified in Sections R315-264-110 through 120 and 140 through 151.

(c)(1) The owner or operator of an existing drip pad, as defined in Section R315-264-570, that does not comply with the liner requirements of Subsection R315-264-573(b)(1) shall:

(i) Include in the closure plan for the drip pad under Section R315-264-112 both a plan for complying with Subsection R315-264-575(a) and a contingent plan for complying with Subsection R315-264-575(b) in case not all contaminated subsoils can be practicably removed at closure; and

(ii) Prepare a contingent post-closure plan under Section R315-264-118 for complying with Subsection R315-264-575(b) in case not all contaminated subsoils can be practicably removed at closure.

(2) The cost estimates calculated under Sections R315-264-112 and 144 for closure and post-closure care of a drip pad subject to Subsection R315-264-575(c) shall include the cost of complying with the contingent closure plan and the contingent post-closure plan, but are not required to include the cost of expected closure under Subsection R315-264-575(a).

R315-264-600. Miscellaneous Units -- Applicability.

The requirements in Sections R315-264-600 through 603 apply to owners and operators of facilities that treat, store, or dispose of hazardous waste in miscellaneous units, except as Section R315-264-1 provides otherwise.

R315-264-601. Environmental Performance Standards.

A miscellaneous unit shall be located, designed, constructed, operated, maintained, and closed in a manner that will ensure protection of human health and the environment. Permits for miscellaneous units are to contain such terms and provisions as necessary to protect human health and the environment, including, but not limited to, as appropriate, design and operating requirements, detection and monitoring requirements, and requirements for responses to releases of hazardous waste or hazardous constituents from the unit. Permit terms and provisions shall include those requirements of Sections R315-264-170 through 179, 190 through 200, 220 through 232, 250 through 259, 270 through 283, 300 through 317, 340 through 351, 1030 through 1036, 1050 through 1065, 1080 through 1090, Rule 270, Subsection R307-214-2(39), and Rule R317-7 that are appropriate for the miscellaneous unit being permitted. Protection of human health and the environment includes, but is not limited to:

(a) Prevention of any releases that may have adverse effects on human health or the environment due to migration of waste constituents in the ground water or subsurface environment, considering:

(1) The volume and physical and chemical characteristics of the waste in the unit, including its potential for migration through soil, liners, or other containing structures;

(2) The hydrologic and geologic characteristics of the unit and the surrounding area;

(3) The existing quality of ground water, including other sources of contamination and their cumulative impact on the ground water;

(4) The quantity and direction of ground-water flow;

(5) The proximity to and withdrawal rates of current and potential ground-water users;

(6) The patterns of land use in the region;

(7) The potential for deposition or migration of waste constituents into subsurface physical structures, and into the root zone of food-chain crops and other vegetation;

(8) The potential for health risks caused by human exposure to waste constituents; and

(9) The potential for damage to domestic animals, wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents;

(b) Prevention of any releases that may have adverse effects on human health or the environment due to migration of waste constituents in surface water, or wetlands or on the soil surface considering:

(1) The volume and physical and chemical characteristics of the waste in the unit;

(2) The effectiveness and reliability of containing, confining, and collecting systems and structures in preventing migration;

(3) The hydrologic characteristics of the unit and the surrounding area, including the topography of the land around the unit;

(4) The patterns of precipitation in the region;

(5) The quantity, quality, and direction of ground-water flow;

(6) The proximity of the unit to surface waters;

(7) The current and potential uses of nearby surface waters and any water quality standards established for those surface waters;

(8) The existing quality of surface waters and surface soils, including other sources of contamination and their cumulative impact on surface waters and surface soils;

(9) The patterns of land use in the region;

(10) The potential for health risks caused by human exposure to waste constituents; and

(11) The potential for damage to domestic animals, wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents.

(c) Prevention of any release that may have adverse effects on human health or the environment due to migration of waste constituents in the air, considering:

(1) The volume and physical and chemical characteristics of the waste in the unit, including its potential for the emission and dispersal of gases, aerosols and particulates;

(2) The effectiveness and reliability of systems and structures to reduce or prevent emissions of hazardous constituents to the air;

(3) The operating characteristics of the unit;

(4) The atmospheric, meteorologic, and topographic characteristics of the unit and the surrounding area;

(5) The existing quality of the air, including other sources of contamination and their cumulative impact on the air;

(6) The potential for health risks caused by human exposure to waste constituents; and

(7) The potential for damage to domestic animals, wildlife, crops, vegetation, and physical structures caused by exposure to waste constituents.

R315-264-602. Monitoring, Analysis, Inspection, Response, Reporting, and Corrective Action.

Monitoring, testing, analytical data, inspections, response, and reporting procedures and frequencies shall ensure compliance with Sections R315-264-601, 15, 33, 75, 76, 77, and 101 as well as meet any additional requirements needed to protect human health and the environment as specified in the permit.

R315-264-603. Post-Closure Care.

A miscellaneous unit that is a disposal unit shall be maintained in a manner that complies with Section R315-264-601 during the post-closure care period. In addition, if a treatment or storage unit has contaminated soils or ground water that cannot be completely removed or decontaminated during closure, then that unit shall also meet the requirements of Section R315-264-601 during post-closure care. The post-closure plan under Section R315-264-118 shall specify the procedures that will be used to satisfy this requirement.

R315-264-1030. Air Emission Standards for Process Vents -- Applicability.

(a) The regulations in Sections R315-1030 through 1036 apply to owners and operators of facilities that treat, store, or dispose of hazardous wastes, except as provided in Section R315-264-1.

(b) Except for Subsections R315-264-1034(d) and (e), Sections R315-1030 through 1036 apply to process vents associated with distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations that manage hazardous wastes with organic concentrations of at least 10 ppmw, if these operations are conducted in one of the following:

(1) A unit that is subject to the permitting requirements of Rule R315-270, or

(2) A unit, including a hazardous waste recycling unit, that is not exempt from permitting under the provisions of Subsection R315-262-34(a), i.e., a hazardous waste recycling unit that is not a 90-day tank or container, and that is located at a hazardous waste management facility otherwise subject to the permitting requirements of Rule R315-270, or

(3) A unit that is exempt from permitting under the provisions of Subsection R315-262-34(a), i.e., a "90-day" tank or container, and is not a recycling unit under the provisions of Section R315-261-6.

(c) For the owner and operator of a facility subject to Sections R315-1030 through 1036 and who received a final permit under Section 19-6-108 prior to December 6, 1996, the requirements of Sections R315-1030 through 1036 shall be incorporated into the permit when the permit is reissued in accordance with the requirements of Section R315-124-15 or reviewed in accordance with the requirements of Subsection R315-270-50(d). Until such date when the owner and operator receive a final permit incorporating the requirements of Sections R315-1030 through 1036, the owner and operator are subject to the requirements of , which is adopted by reference,1030 through 1035, which is adopted by reference.

Note: The requirements of Sections R315-264-1032 through 1036 apply to process vents on hazardous waste recycling units previously exempt under Subsection R315-261-6(c)(1). Other exemptions under Section R315-261-4, and Subsection R35-264-1(g) are not affected by these requirements.

(d) The requirements of Sections R315-264-1030 through 1036 do not apply to the pharmaceutical manufacturing facility, commonly referred to as the Stonewall Plant, located at Route 340 South, Elkton, Virginia, provided that facility is operated in compliance with the requirements contained in a permit issued pursuant to the Utah Air Conservation Act. The requirements of Sections R315-264-1030 through 1036 shall apply to the facility upon termination of the permit issued pursuant to the Utah Air Conservation Act.

(e) The requirements of Sections R315-264-1030 through 1036 do not apply to the process vents at a facility where the facility owner or operator certifies that all of the process vents that would otherwise be subject to Sections R315-264-1030 through 1036 are equipped with and operating air emission controls in accordance with the process vent requirements of an applicable regulation codified under the Utah Air Conservation Act. The documentation of compliance under regulations codified under the Utah Air Conservation Act shall be kept with, or made readily available with, the facility operating record.

R315-264-1031. Definitions.

As used in Sections R315-264-1030 through 1036, all terms not defined herein shall have the meaning given them in RCRA and Rules R315-260 through 266.

(a) Air stripping operation is a desorption operation employed to transfer one or more volatile components from a liquid mixture into a gas (air) either with or without the application of heat to the liquid. Packed towers, spray towers, and bubble-cap, sieve, or valve-type plate towers are

among the process configurations used for contacting the air and a liquid.

(b) Bottoms receiver means a container or tank used to receive and collect the heavier bottoms fractions of the distillation feed stream that remain in the liquid phase.

(c) Closed-vent system means a system that is not open to the atmosphere and that is composed of piping, connections, and, if necessary, flow-inducing devices that transport gas or vapor from a piece or pieces of equipment to a control device.

(d) Condenser means a heat-transfer device that reduces a thermodynamic fluid from its vapor phase to its liquid phase.

(e) Connector means flanged, screwed, welded, or other joined fittings used to connect two pipelines or a pipeline and a piece of equipment. For the purposes of reporting and recordkeeping, connector means flanged fittings that are not covered by insulation or other materials that prevent location of the fittings.

(f) Continuous recorder means a data-recording device recording an instantaneous data value at least once every 15 minutes.

(g) Control device means an enclosed combustion device, vapor recovery system, or flare. Any device the primary function of which is the recovery or capture of solvents or other organics for use, reuse, or sale, e.g., a primary condenser on a solvent recovery unit, is not a control device.

(h) Control device shutdown means the cessation of operation of a control device for any purpose.

(i) Distillate receiver means a container or tank used to receive and collect liquid material (condensed) from the overhead condenser of a distillation unit and from which the condensed liquid is pumped to larger storage tanks or other process units.

(j) Distillation operation means an operation, either batch or continuous, separating one or more feed stream(s) into two or more exit streams, each exit stream having component concentrations different from those in the feed stream(s). The separation is achieved by the redistribution of the components between the liquid and vapor phase as they approach equilibrium within the distillation unit.

(k) Double block and bleed system means two block valves connected in series with a bleed valve or line that can vent the line between the two block valves.

(l) Equipment means each valve, pump, compressor, pressure relief device, sampling connection system, open-ended valve or line, or flange or other connector, and any control devices or systems required by Sections R315-264-1030 through 1036.

(m) Flame zone means the portion of the combustion chamber in a boiler occupied by the flame envelope.

(n) Flow indicator means a device that indicates whether gas flow is present in a vent stream.

(o) First attempt at repair means to take rapid action for the purpose of stopping or reducing leakage of organic material to the atmosphere using best practices.

(p) Fractionation operation means a distillation operation or method used to separate a mixture of several volatile components of different boiling points in successive stages, each stage removing from the mixture some proportion of one of the components.

(q) Hazardous waste management unit shutdown means a work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit. An unscheduled work practice or operational procedure that stops operation of a hazardous waste management unit or part of a hazardous waste management unit for less than 24 hours is not a hazardous waste management unit shutdown. The use of spare equipment and technically feasible bypassing of equipment without stopping operation are not hazardous waste management unit shutdowns.

(r) Hot well means a container for collecting condensate as in a steam condenser serving a vacuum-jet or steam-jet ejector.

(s) In gas/vapor service means that the piece of equipment contains or contacts a hazardous waste stream that is in the gaseous state at operating conditions.

(t) In heavy liquid service means that the piece of equipment is not in gas/vapor service or in light liquid service.

(u) In light liquid service means that the piece of equipment contains or contacts a waste stream where the vapor pressure of one or more of the organic components in the stream is greater than 0.3 kilopascals (kPa) at 20 degrees C, the total concentration of the pure organic components having a vapor pressure greater than 0.3 kilopascals (kPa) at 20 degrees C is equal to or greater than 20 percent by weight, and the fluid is a liquid at operating conditions.

(v) In situ sampling systems means nonextractive samplers or in-line samplers.

(w) In vacuum service means that equipment is operating at an internal pressure that is at least 5 kPa below ambient pressure.

(x) Malfunction means any sudden failure of a control device or a hazardous waste management unit or failure of a hazardous waste management unit to operate in a normal or usual manner, so that organic emissions are increased.

(y) Open-ended valve or line means any valve, except pressure relief valves, having one side of the valve seat in contact with hazardous waste and one side open to the atmosphere, either directly or through open piping.

(z) Pressure release means the emission of materials resulting from the system pressure being greater than the set pressure of the pressure relief device.

(aa) Process heater means a device that transfers heat liberated by burning fuel to fluids contained in tubes, including all fluids except water that are heated to produce steam.

(bb) Process vent means any open-ended pipe or stack that is vented to the atmosphere either directly, through a vacuum-producing system, or through a tank (e.g., distillate receiver, condenser, bottoms receiver, surge control tank, separator tank, or hot well) associated with hazardous waste distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations.

(cc) Repaired means that equipment is adjusted, or otherwise altered, to eliminate a leak.

(dd) Sampling connection system means an assembly of equipment within a process or waste management unit used during periods of representative operation to take samples of the process or waste fluid. Equipment used to take non-routine grab samples is not considered a sampling connection system.

(ee) Sensor means a device that measures a physical quantity or the change in a physical quantity, such as temperature, pressure, flow rate, pH, or liquid level.

(ff) Separator tank means a device used for separation of two immiscible liquids.

(gg) Solvent extraction operation means an operation or method of separation in which a solid or solution is contacted with a liquid solvent, the two being mutually insoluble, to preferentially dissolve and transfer one or more components into the solvent.

(hh) Startup means the setting in operation of a hazardous waste management unit or control device for any purpose.

(ii) Steam stripping operation means a distillation operation in which vaporization of the volatile constituents of a liquid mixture takes place by the introduction of steam directly into the charge.

(jj) Surge control tank means a large-sized pipe or storage reservoir sufficient to contain the surging liquid discharge of the process tank to which it is connected.

(kk) Thin-film evaporation operation means a distillation operation that employs a heating surface consisting of a large diameter tube that may be either straight or tapered, horizontal or vertical. Liquid is spread on the tube wall by a rotating assembly of blades that maintain a close clearance from the wall or actually ride on the film of liquid on the wall.

(ll) Vapor incinerator means any enclosed combustion device that is used for destroying organic compounds and does not extract energy in the form of steam or process heat.

(mm) Vented means discharged through an opening, typically an open-ended pipe or stack, allowing the passage of a stream of liquids, gases, or fumes into the atmosphere. The passage of liquids, gases, or fumes is caused by mechanical means such as compressors or vacuum-producing systems or by process-related means such as evaporation produced by heating and not caused by tank loading and unloading, working losses, or by natural means such as diurnal temperature changes.

R315-264-1032. Standards: Process Vents.

(a) The owner or operator of a facility with process vents associated with distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations managing hazardous wastes with organic concentrations of at least 10 ppmw shall either:

(1) Reduce total organic emissions from all affected process vents at the facility below 1.4 kg/h (3 lb/h) and 2.8 Mg/yr (3.1 tons/yr), or

(2) Reduce, by use of a control device, total organic emissions from all affected process vents at the facility by 95 weight percent.

(b) If the owner or operator installs a closed-vent system and control device to comply with the provisions of Subsection R315-264-1032(a) the closed-vent system and control device shall meet the requirements of Section R315-264-1033.

(c) Determinations of vent emissions and emission reductions or total organic compound concentrations achieved by add-on control devices may be based on engineering calculations or performance tests. If performance tests are used to determine vent emissions, emission reductions, or total organic compound concentrations achieved by add-on control devices, the performance tests shall conform with the requirements of Subsection R315-264-1034(c).

(d) When an owner or operator and the Director do not agree on determinations of vent emissions and/or emission reductions or total organic compound concentrations achieved by add-on control devices based on engineering calculations, the procedures in Subsection R315-264-1034(c) shall be used to resolve the disagreement.

R315-264-1033. Standards: Closed-Vent Systems and Control Devices.

(a)(1) Owners or operators of closed-vent systems and control devices used to comply with provisions of Sections R315-264-1030 through 1036 shall comply with the provisions of Section R315-264-1033.

(2)(i) The owner or operator of an existing facility who cannot install a closed-vent system and control device to comply with the provisions of Sections R315-264-1030 through 1036 on the effective date that the facility becomes subject to the provisions of Sections R315-264-1030 through 1036 shall prepare an implementation schedule that includes dates by which the closed-vent system and control device will be installed and in operation. The controls shall be installed as soon as possible, but the implementation schedule may allow up to 30 months after the effective date that the facility becomes subject to Sections R315-264-1030 through 1036 for installation and startup.

(ii) Any unit that begins operation after December 21, 1990, and is subject to the provisions of Sections R315-264-1030 through 1036 when operation begins, shall comply with the rules immediately, i.e., shall have control devices installed and operating on startup of the affected unit; the 30-month implementation schedule does not apply.

(iii) The owner or operator of any facility in existence on the effective date of a statutory or regulatory amendment that renders the facility subject to Sections R315-264-1030 through 1036 shall comply with all requirements of Sections R315-264-1030 through 1036 as soon as practicable but no later than 30 months after the amendment's effective date. When control equipment required by Sections R315-264-1030 through 1036 cannot be installed and begin operation by the effective date of the amendment, the facility owner or operator shall prepare an implementation schedule that includes the following information: Specific calendar dates for award of contracts or issuance of purchase orders for the control equipment, initiation of on-site installation of the control equipment, completion of the control equipment installation, and performance of any testing to demonstrate that the installed equipment meets the applicable standards of Sections R315-264-1030 through 1036. The owner or operator shall enter the implementation schedule in the operating record or in a permanent, readily available file located at the facility.

(iv) Owners and operators of facilities and units that become newly subject to the requirements of Sections R315-264-1030 through 1036 after December 8, 1997, due to an action other than those described in Subsection R315-264-1033(a)(2)(iii) shall comply with all applicable requirements immediately, i.e., shall have control devices installed and operating on the date the facility or unit becomes subject to Sections R315-264-1030 through 1036; the 30-month implementation schedule does not apply.

(b) A control device involving vapor recovery, e.g., a condenser or adsorber, shall be designed and operated to recover the organic vapors vented to it with an efficiency of 95 weight percent or greater unless the total organic emission limits of Subsection R315-264-1032(a)(1) for all affected process vents can be attained at an efficiency less than 95 weight percent.

(c) An enclosed combustion device, e.g., a vapor incinerator, boiler, or process heater, shall be designed and operated to reduce the organic emissions vented to it by 95 weight percent or greater; to achieve a total organic compound concentration of 20 ppmv, expressed as the sum of the actual compounds, not carbon equivalents, on a dry basis corrected to 3 percent oxygen; or to provide a minimum residence time of 0.50 seconds at a minimum temperature of 760 degrees C. If a boiler or process heater is used as the control device, then the vent stream shall be introduced into the flame zone of the boiler or process heater.

(d)(1) A flare shall be designed for and operated with no visible emissions as determined by the methods specified in Subsection R315-264-1033(e)(1), except for periods not to exceed a total of 5 minutes during any 2 consecutive hours.

(2) A flare shall be operated with a flame present at all times, as determined by the methods specified in Subsection R315-264-1033(f)(2)(iii).

(3) A flare shall be used only if the net heating value of

the gas being combusted is 11.2 MJ/scm (300 Btu/scf) or greater if the flare is steam-assisted or air-assisted; or if the net heating value of the gas being combusted is 7.45 MJ/scm (200 Btu/scf) or greater if the flare is nonassisted. The net heating value of the gas being combusted shall be determined by the methods specified in Subsection R315-264-1033(e)(2).

(4)(i) A steam-assisted or nonassisted flare shall be designed for and operated with an exit velocity, as determined by the methods specified in Subsection R315-264-1033(e)(3), less than 18.3 m/s (60 ft/s), except as provided in Subsections R315-264-133(d)(4)(ii) and (iii).

(ii) A steam-assisted or nonassisted flare designed for and operated with an exit velocity, as determined by the methods specified in Subsection R315-264-1033(e)(3), equal to or greater than 18.3 m/s (60 ft/s) but less than 122 m/s (400 ft/s) is allowed if the net heating value of the gas being combusted is greater than 37.3 MJ/scm (1,000 Btu/scf).

(iii) A steam-assisted or nonassisted flare designed for and operated with an exit velocity, as determined by the methods specified in Subsection R315-264-1033(e)(3), less than the velocity, Vmax, as determined by the method specified in Subsection R315-264-1033(e)(4) and less than 122 m/s (400 ft/s) is allowed.

(5) An air-assisted flare shall be designed and operated with an exit velocity less than the velocity, Vmax, as determined by the method specified in Subsection R315-264-1033(e)(5).

(6) A flare used to comply with Section R315-24-1033 shall be steam-assisted, air-assisted, or nonassisted.

(e)(1) Reference Method 22 in 40 CFR part 60 shall be used to determine the compliance of a flare with the visible emission provisions of Sections R315-264-1030 through 1036. The observation period is 2 hours and shall be used according to Method 22.

(2) The net heating value of the gas being combusted in a flare shall be calculated using the following equation:

Ht = K times the summation product of Ci and Hi from i equals 1 to n

where:

Ht = Net heating value of the sample, MJ/scm; where the net enthalpy per mole of offgas is based on combustion at 25 degrees C and 760 mm Hg, but the standard temperature for determining the volume corresponding to 1 mol is 20 degrees C;

K = Constant, 1.74×10^{-7} (1/ppm) (g mol/scm) (MJ/kcal) where standard temperature for (g mol/scm) is 20 degrees C;

Ci = Concentration of sample component i in ppm on a wet basis, as measured for organics by Reference Method 18 in 40 CFR part 60 and measured for hydrogen and carbon monoxide by ASTM D 1946-82, incorporated by reference as specified in Section R315-260-11; and

Hi = Net heat of combustion of sample component i, kcal/9 mol at 25 degrees C and 760 mm Hg. The heats of combustion may be determined using ASTM D 2382-83, incorporated by reference as specified in Section R315-260-11, if published values are not available or cannot be calculated.

(3) The actual exit velocity of a flare shall be determined by dividing the volumetric flow rate, in units of standard temperature and pressure, as determined by Reference Methods 2, 2A, 2C, or 2D in 40 CFR part 60 as appropriate, by the unobstructed (free) cross-sectional area of the flare tip.

(4) The maximum allowed velocity in m/s, Vmax, for a flare complying with Subsection R315-264-1033(d)(4)(iii) shall be determined by the following equation:

Log10(Vmax) = (HT+28.8)/31.7

where:

28.8 = Constant,

31.7 = Constant,

HT = The net heating value as determined in Subsection R315-264-1033(e)(2).

(5) The maximum allowed velocity in m/s, Vmax, for an air-assisted flare shall be determined by the following equation:

Vmax = 8.706+0.7084 (HT)

where:

8.706 = Constant,

0.7084 = Constant,

HT = The net heating value as determined in Subsection R315-264-1033(e)(2).

(f) The owner or operator shall monitor and inspect each control device required to comply with Section R315-264-1033 to ensure proper operation and maintenance of the control device by implementing the following requirements:

(1) Install, calibrate, maintain, and operate according to the manufacturer's specifications a flow indicator that provides a record of vent stream flow from each affected process vent to the control device at least once every hour. The flow indicator sensor shall be installed in the vent stream at the nearest feasible point to the control device inlet but before the point at which the vent streams are combined.

(2) Install, calibrate, maintain, and operate according to the manufacturer's specifications a device to continuously monitor control device operation as specified below:

(i) For a thermal vapor incinerator, a temperature monitoring device equipped with a continuous recorder. The device shall have an accuracy of plus or minus 1 percent of the temperature being monitored in degrees C or +/- 0.5 degrees C, whichever is greater. The temperature sensor shall be installed at a location in the combustion chamber downstream of the combustion zone.

(ii) For a catalytic vapor incinerator, a temperature monitoring device equipped with a continuous recorder. The device shall be capable of monitoring temperature at two locations and have an accuracy of plus or minus 1 percent of the temperature being monitored in degrees C or +/- 0.5 degrees C, whichever is greater. One temperature sensor shall be installed in the vent stream at the nearest feasible point to the catalyst bed inlet and a second temperature sensor shall be installed in the vent stream at the nearest feasible point to the catalyst bed outlet.

(iii) For a flare, a heat sensing monitoring device equipped with a continuous recorder that indicates the continuous ignition of the pilot flame.

(iv) For a boiler or process heater having a design heat input capacity less than 44 MW, a temperature monitoring device equipped with a continuous recorder. The device shall have an accuracy of plus or minus 1 percent of the temperature being monitored in degrees C or plus or minus 0.5 degrees C, whichever is greater. The temperature sensor shall be installed at a location in the furnace downstream of the combustion zone.

(v) For a boiler or process heater having a design heat input capacity greater than or equal to 44 MW, a monitoring device equipped with a continuous recorder to measure a parameter(s) that indicates good combustion operating practices are being used.

(vi) For a condenser, either:

(A) A monitoring device equipped with a continuous recorder to measure the concentration level of the organic compounds in the exhaust vent stream from the condenser, or

(B) A temperature monitoring device equipped with a continuous recorder. The device shall be capable of monitoring temperature with an accuracy of plus or minus 1 percent of the temperature being monitored in degrees Celsius, or plus or minus 0.5 degrees C, whichever is greater. The temperature sensor shall be installed at a location in the exhaust vent stream from the condenser exit, i.e., product

side.

(vii) For a carbon adsorption system that regenerates the carbon bed directly in the control device such as a fixed-bed carbon adsorber, either:

(A) A monitoring device equipped with a continuous recorder to measure the concentration level of the organic compounds in the exhaust vent stream from the carbon bed, or

(B) A monitoring device equipped with a continuous recorder to measure a parameter that indicates the carbon bed is regenerated on a regular, predetermined time cycle.

(3) Inspect the readings from each monitoring device required by Subsections R315-24-1033(f)(1) and (2) at least once each operating day to check control device operation and, if necessary, immediately implement the corrective measures necessary to ensure the control device operates in compliance with the requirements of Section R315-264-1033.

(g) An owner or operator using a carbon adsorption system such as a fixed-bed carbon adsorber that regenerates the carbon bed directly onsite in the control device shall replace the existing carbon in the control device with fresh carbon at a regular, predetermined time interval that is no longer than the carbon service life established as a requirement of Subsection R315-264-1035(b)(4)(iii)(F).

(h) An owner or operator using a carbon adsorption system such as a carbon canister that does not regenerate the carbon bed directly onsite in the control device shall replace the existing carbon in the control device with fresh carbon on a regular basis by using one of the following procedures:

(1) Monitor the concentration level of the organic compounds in the exhaust vent stream from the carbon adsorption system on a regular schedule, and replace the existing carbon with fresh carbon immediately when carbon breakthrough is indicated. The monitoring frequency shall be daily or at an interval no greater than 20 percent of the time required to consume the total carbon working capacity established as a requirement of Subsection R315-264-1035(b)(4)(iii)(G), whichever is longer.

(2) Replace the existing carbon with fresh carbon at a regular, predetermined time interval that is less than the design carbon replacement interval established as a requirement of Subsection R315-264-1035(b)(4)(iii)(G).

(i) An alternative operational or process parameter may be monitored if it can be demonstrated that another parameter will ensure that the control device is operated in conformance with these standards and the control device's design specifications.

(j) An owner or operator of an affected facility seeking to comply with the provisions of Rule R315-264 by using a control device other than a thermal vapor incinerator, catalytic vapor incinerator, flare, boiler, process heater, condenser, or carbon adsorption system is required to develop documentation including sufficient information to describe the control device operation and identify the process parameter or parameters that indicate proper operation and maintenance of the control device.

(k) A closed-vent system shall meet either of the following design requirements:

(1) A closed-vent system shall be designed to operate with no detectable emissions, as indicated by an instrument reading of less than 500 ppmv above background as determined by the procedure in Subsection R315-264-1034(b), and by visual inspections; or

(2) A closed-vent system shall be designed to operate at a pressure below atmospheric pressure. The system shall be equipped with at least one pressure gauge or other pressure measurement device that can be read from a readily accessible location to verify that negative pressure is being maintained in the closed-vent system when the control device is operating.

(l) The owner or operator shall monitor and inspect each closed-vent system required to comply with Section R315-264-1033 to ensure proper operation and maintenance of the closed-vent system by implementing the following requirements:

(1) Each closed-vent system that is used to comply with Subsection R315-264-1033(k)(1) shall be inspected and monitored in accordance with the following requirements:

(i) An initial leak detection monitoring of the closed-vent system shall be conducted by the owner or operator on or before the date that the system becomes subject to Section R315-264-1033. The owner or operator shall monitor the closed-vent system components and connections using the procedures specified in Subsection R315-264-1034(b) to demonstrate that the closed-vent system operates with no detectable emissions, as indicated by an instrument reading of less than 500 ppmv above background.

(ii) After initial leak detection monitoring required in Subsection R315-264-1033(l)(1)(i), the owner or operator shall inspect and monitor the closed-vent system as follows:

(A) Closed-vent system joints, seams, or other connections that are permanently or semi-permanently sealed, e.g., a welded joint between two sections of hard piping or a bolted and gasketed ducting flange, shall be visually inspected at least once per year to check for defects that could result in air pollutant emissions. The owner or operator shall monitor a component or connection using the procedures specified in Subsection R315-264-1034(b) to demonstrate that it operates with no detectable emissions following any time the component is repaired or replaced, e.g., a section of damaged hard piping is replaced with new hard piping, or the connection is unsealed, e.g., a flange is unbolted.

(B) Closed-vent system components or connections other than those specified in Subsection R315-264-1033(l)(1)(ii)(A) shall be monitored annually and at other times as requested by the Director, except as provided for in Subsection R315-264-1033(o), using the procedures specified in Subsection R315-264-1034(b) to demonstrate that the components or connections operate with no detectable emissions.

(iii) In the event that a defect or leak is detected, the owner or operator shall repair the defect or leak in accordance with the requirements of Subsection R315-264-1033(l)(3).

(iv) The owner or operator shall maintain a record of the inspection and monitoring in accordance with the requirements specified in Subsection R315-264-1035.

(2) Each closed-vent system that is used to comply with Subsection R315-264-1033(k)(2) shall be inspected and monitored in accordance with the following requirements:

(i) The closed-vent system shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects include, but are not limited to, visible cracks, holes, or gaps in ductwork or piping or loose connections.

(ii) The owner or operator shall perform an initial inspection of the closed-vent system on or before the date that the system becomes subject to Section R315-264-1033. Thereafter, the owner or operator shall perform the inspections at least once every year.

(iii) In the event that a defect or leak is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1033(l)(3).

(iv) The owner or operator shall maintain a record of the inspection and monitoring in accordance with the requirements specified in Subsection R315-264-1035.

(3) The owner or operator shall repair all detected defects as follows:

(i) Detectable emissions, as indicated by visual inspection, or by an instrument reading greater than 500 ppmv above background, shall be controlled as soon as

practicable, but not later than 15 calendar days after the emission is detected, except as provided for in Subsection R315-264-1033(l)(3)(iii).

(ii) A first attempt at repair shall be made no later than 5 calendar days after the emission is detected.

(iii) Delay of repair of a closed-vent system for which leaks have been detected is allowed if the repair is technically infeasible without a process unit shutdown, or if the owner or operator determines that emissions resulting from immediate repair would be greater than the fugitive emissions likely to result from delay of repair. Repair of such equipment shall be completed by the end of the next process unit shutdown.

(iv) The owner or operator shall maintain a record of the defect repair in accordance with the requirements specified in Section R315-264-1035.

(m) Closed-vent systems and control devices used to comply with provisions of Sections R315-264-1033 through 1036 shall be operated at all times when emissions may be vented to them.

(n) The owner or operator using a carbon adsorption system to control air pollutant emissions shall document that all carbon that is a hazardous waste and that is removed from the control device is managed in one of the following manners, regardless of the average volatile organic concentration of the carbon:

(1) Regenerated or reactivated in a thermal treatment unit that meets one of the following:

(i) The owner or operator of the unit has been issued a final permit under Rule R315-270 which implements the requirements of Sections R315-264-600 through 603; or

(ii) The unit is equipped with and operating air emission controls in accordance with the applicable requirements of Sections R315-264-1030 through 1036 and 1080 through 1090 or 40 CFR 265.1030 through 1035 and 1080 through 1090, which are adopted by reference; or

(iii) The unit is equipped with and operating air emission controls in accordance with a national emission standard for hazardous air pollutants under Section R315-307-214-1, which incorporates 40 CFR part 61 or Section R307-214-2, which incorporates 40 CFR part 63.

(2) Incinerated in a hazardous waste incinerator for which the owner or operator either:

(i) Has been issued a final permit under Rule R315-270 which implements the requirements of Sections R315-264-340 through 351; or

(ii) Has designed and operates the incinerator in accordance with the interim status requirements of 40 CFR 265.340 through 352, which are adopted by reference.

(3) Burned in a boiler or industrial furnace for which the owner or operator either:

(i) Has been issued a final permit under Rule R315-270 which implements the requirements of Sections R315-266-100 through 112; or

(ii) Has designed and operates the boiler or industrial furnace in accordance with the interim status requirements of Sections R315-266-100 through 112.

(o) Any components of a closed-vent system that are designated, as described in Subsection R315-264-1035(c)(9), as unsafe to monitor are exempt from the requirements of Subsection R315-264-1033(l)(1)(ii)(B) if:

(1) The owner or operator of the closed-vent system determines that the components of the closed-vent system are unsafe to monitor because monitoring personnel would be exposed to an immediate danger as a consequence of complying with Subsection R315-264-1033(l)(1)(ii)(B); and

(2) The owner or operator of the closed-vent system adheres to a written plan that requires monitoring the closed-vent system components using the procedure specified in Subsection R315-264-1033(l)(1)(ii)(B) as frequently as practicable during safe-to-monitor times.

R315-264-1034. Test Methods and Procedures.

(a) Each owner or operator subject to the provisions of Sections R315-264-1030 through 1036 shall comply with the test methods and procedures requirements provided in Section R315-264-1034.

(b) When a closed-vent system is tested for compliance with no detectable emissions, as required in Subsection R315-264-1033(l), the test shall comply with the following requirements:

(1) Monitoring shall comply with Reference Method 21 in 40 CFR part 60.

(2) The detection instrument shall meet the performance criteria of Reference Method 21.

(3) The instrument shall be calibrated before use on each day of its use by the procedures specified in Reference Method 21.

(4) Calibration gases shall be:

(i) Zero air, less than 10 ppm of hydrocarbon in air.

(ii) A mixture of methane or n-hexane and air at a concentration of approximately, but less than, 10,000 ppm methane or n-hexane.

(5) The background level shall be determined as set forth in Reference Method 21.

(6) The instrument probe shall be traversed around all potential leak interfaces as close to the interface as possible as described in Reference Method 21.

(7) The arithmetic difference between the maximum concentration indicated by the instrument and the background level is compared with 500 ppm for determining compliance.

(c) Performance tests to determine compliance with Subsection R315-264-1032(a) and with the total organic compound concentration limit of Subsection R315-264-1033(c) shall comply with the following:

(1) Performance tests to determine total organic compound concentrations and mass flow rates entering and exiting control devices shall be conducted and data reduced in accordance with the following reference methods and calculation procedures:

(i) Method 2 in 40 CFR part 60 for velocity and volumetric flow rate.

(ii) Method 18 or Method 25A in 40 CFR part 60, appendix A, for organic content. If Method 25A is used, the organic HAP used as the calibration gas shall be the single organic HAP representing the largest percent by volume of the emissions. The use of Method 25A is acceptable if the response from the high-level calibration gas is at least 20 times the standard deviation of the response from the zero calibration gas when the instrument is zeroed on the most sensitive scale.

(iii) Each performance test shall consist of three separate runs; each run conducted for at least 1 hour under the conditions that exist when the hazardous waste management unit is operating at the highest load or capacity level reasonably expected to occur. For the purpose of determining total organic compound concentrations and mass flow rates, the average of results of all runs shall apply. The average shall be computed on a time-weighted basis.

(iv) Total organic mass flow rates shall be determined by the following equation:

(A) For sources utilizing Method 18.

The equation found in 40 CFR 264.1034(c)(1)(iv)(A), 2015 edition, is adopted and incorporated by reference.

Where:

Eh = Total organic mass flow rate, kg/h;

Q2sd = Volumetric flow rate of gases entering or exiting control device, as determined by Method 2, dscm/h;

n = Number of organic compounds in the vent gas;

Ci = Organic concentration in ppm, dry basis, of compound i in the vent gas, as determined by Method 18;

MWi = Molecular weight of organic compound i in the vent gas, kg/kg-mol;

0.0416 = Conversion factor for molar volume, kg-mol/m3, at 293 K and 760 mm Hg;

10^{-6} = Conversion from ppm

(B) For sources utilizing Method 25A.

$Eh = (Q)(C)(MW)(0.0416)(10^{-6})$

Where:

Eh = Total organic mass flow rate, kg/h;

Q = Volumetric flow rate of gases entering or exiting control device, as determined by Method 2, dscm/h;

C = Organic concentration in ppm, dry basis, as determined by Method 25A;

MW = Molecular weight of propane, 44;

0.0416 = Conversion factor for molar volume, kg-mol/m3, at 293 K and 760 mm Hg;

10^{-6} = Conversion from ppm.

(v) The annual total organic emission rate shall be determined by the following equation:

EA = (Eh)(H)

where:

EA = Total organic mass emission rate, kg/y;

Eh = Total organic mass flow rate for the process vent, kg/h;

H = Total annual hours of operations for the affected unit, h.

(vi) Total organic emissions from all affected process vents at the facility shall be determined by summing the hourly total organic mass emission rates, Eh as determined in Subsection R315-264-1034(c)(1)(iv), and by summing the annual total organic mass emission rates, EA, as determined in Subsection R315-264-1034(c)(1)(v), for all affected process vents at the facility.

(2) The owner or operator shall record such process information as may be necessary to determine the conditions of the performance tests. Operations during periods of startup, shutdown, and malfunction shall not constitute representative conditions for the purpose of a performance test.

(3) The owner or operator of an affected facility shall provide, or cause to be provided, performance testing facilities as follows:

(i) Sampling ports adequate for the test methods specified in Subsection R315-264-1034(c)(1).

(ii) Safe sampling platform(s).

(iii) Safe access to sampling platform(s).

(iv) Utilities for sampling and testing equipment.

(4) For the purpose of making compliance determinations, the time-weighted average of the results of the three runs shall apply. In the event that a sample is accidentally lost or conditions occur in which one of the three runs shall be discontinued because of forced shutdown, failure of an irreplaceable portion of the sample train, extreme meteorological conditions, or other circumstances beyond the owner or operator's control, compliance may, upon the Director's approval, be determined using the average of the results of the two other runs.

(d) To show that a process vent associated with a hazardous waste distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operation is not subject to the requirements of Sections R315-264-1030 through 1036, the owner or operator shall make an initial determination that the time-weighted, annual average total organic concentration of the waste managed by the waste management unit is less than 10 ppmw using one of the following two methods:

(1) Direct measurement of the organic concentration of the waste using the following procedures:

(i) The owner or operator shall take a minimum of four grab samples of waste for each waste stream managed in the affected unit under process conditions expected to cause the maximum waste organic concentration.

(ii) For waste generated onsite, the grab samples shall be collected at a point before the waste is exposed to the atmosphere such as in an enclosed pipe or other closed system that is used to transfer the waste after generation to the first affected distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operation. For waste generated offsite, the grab samples shall be collected at the inlet to the first waste management unit that receives the waste provided the waste has been transferred to the facility in a closed system such as a tank truck and the waste is not diluted or mixed with other waste.

(iii) Each sample shall be analyzed and the total organic concentration of the sample shall be computed using Method 9060A, incorporated by reference under Section R315-260-11, of "Test Methods for Evaluating Solid Waste, Physical/Chemical Methods," EPA Publication SW-846, or analyzed for its individual organic constituents.

(iv) The arithmetic mean of the results of the analyses of the four samples shall apply for each waste stream managed in the unit in determining the time-weighted, annual average total organic concentration of the waste. The time-weighted average is to be calculated using the annual quantity of each waste stream processed and the mean organic concentration of each waste stream managed in the unit.

(2) Using knowledge of the waste to determine that its total organic concentration is less than 10 ppmw. Documentation of the waste determination is required. Examples of documentation that shall be used to support a determination under this provision include production process information documenting that no organic compounds are used, information that the waste is generated by a process that is identical to a process at the same or another facility that has previously been demonstrated by direct measurement to generate a waste stream having a total organic content less than 10 ppmw, or prior speciation analysis results on the same waste stream where it can also be documented that no process changes have occurred since that analysis that could affect the waste total organic concentration.

(e) The determination that distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operations manage hazardous wastes with time-weighted, annual average total organic concentrations less than 10 ppmw shall be made as follows:

(1) By the effective date that the facility becomes subject to the provisions of Sections R315-264-1030 through 1036 or by the date when the waste is first managed in a waste management unit, whichever is later, and

(2) For continuously generated waste, annually, or

(3) Whenever there is a change in the waste being managed or a change in the process that generates or treats the waste.

(f) When an owner or operator and the Director do not agree on whether a distillation, fractionation, thin-film evaporation, solvent extraction, or air or steam stripping operation manages a hazardous waste with organic concentrations of at least 10 ppmw based on knowledge of the waste, the dispute may be resolved by using direct measurement as specified at Subsection R315-264-1034(d)(1).

R315-264-1035. Recordkeeping Requirements.

(a)(1) Each owner or operator subject to the provisions of Sections R315-264-1030 through 1036 shall comply with the recordkeeping requirements of Section R315-264-1035.

(2) An owner or operator of more than one hazardous waste management unit subject to the provisions of Sections R315-264-1030 through 1036 may comply with the recordkeeping requirements for these hazardous waste management units in one recordkeeping system if the system identifies each record by each hazardous waste management unit.

(b) Owners and operators shall record the following information in the facility operating record:

(1) For facilities that comply with the provisions of Subsection R315-264-1033(a)(2), an implementation schedule that includes dates by which the closed-vent system and control device will be installed and in operation. The schedule shall also include a rationale of why the installation cannot be completed at an earlier date. The implementation schedule shall be in the facility operating record by the effective date that the facility becomes subject to the provisions of Sections R315-264-1030 through 1036.

(2) Up-to-date documentation of compliance with the process vent standards in Section R315-264-1032, including:

(i) Information and data identifying all affected process vents, annual throughput and operating hours of each affected unit, estimated emission rates for each affected vent and for the overall facility, i.e., the total emissions for all affected vents at the facility, and the approximate location within the facility of each affected unit, e.g., identify the hazardous waste management units on a facility plot plan.

(ii) Information and data supporting determinations of vent emissions and emission reductions achieved by add-on control devices based on engineering calculations or source tests. For the purpose of determining compliance, determinations of vent emissions and emission reductions shall be made using operating parameter values, e.g., temperatures, flow rates, or vent stream organic compounds and concentrations, that represent the conditions that result in maximum organic emissions, such as when the waste management unit is operating at the highest load or capacity level reasonably expected to occur. If the owner or operator takes any action, e.g., managing a waste of different composition or increasing operating hours of affected waste management units, that would result in an increase in total organic emissions from affected process vents at the facility, then a new determination is required.

(3) Where an owner or operator chooses to use test data to determine the organic removal efficiency or total organic compound concentration achieved by the control device, a performance test plan. The test plan shall include:

(i) A description of how it is determined that the planned test is going to be conducted when the hazardous waste management unit is operating at the highest load or capacity level reasonably expected to occur. This shall include the estimated or design flow rate and organic content of each vent stream and define the acceptable operating ranges of key process and control device parameters during the test program.

(ii) A detailed engineering description of the closed-vent system and control device including:

(A) Manufacturer's name and model number of control device.

(B) Type of control device.

(C) Dimensions of the control device.

(D) Capacity.

(E) Construction materials.

(iii) A detailed description of sampling and monitoring procedures, including sampling and monitoring locations in the system, the equipment to be used, sampling and monitoring frequency, and planned analytical procedures for sample analysis.

(4) Documentation of compliance with Section R315-264-1033 shall include the following information:

(i) A list of all information references and sources used in preparing the documentation.

(ii) Records, including the dates, of each compliance test required by Subsection R315-264-1033(k).

(iii) If engineering calculations are used, a design analysis, specifications, drawings, schematics, and piping and instrumentation diagrams based on the appropriate sections of "APTI Course 415: Control of Gaseous Emissions," incorporated by reference as specified in Section R315-260-11, or other engineering texts acceptable to the Director that present basic control device design information. Documentation provided by the control device manufacturer or vendor that describes the control device design in accordance with Subsections R315-264-1035(b)(4)(iii)(A) through (b)(4)(iii)(G) may be used to comply with this requirement. The design analysis shall address the vent stream characteristics and control device operation parameters as specified below.

(A) For a thermal vapor incinerator, the design analysis shall consider the vent stream composition, constituent concentrations, and flow rate. The design analysis shall also establish the design minimum and average temperature in the combustion zone and the combustion zone residence time.

(B) For a catalytic vapor incinerator, the design analysis shall consider the vent stream composition, constituent concentrations, and flow rate. The design analysis shall also establish the design minimum and average temperatures across the catalyst bed inlet and outlet.

(C) For a boiler or process heater, the design analysis shall consider the vent stream composition, constituent concentrations, and flow rate. The design analysis shall also establish the design minimum and average flame zone temperatures, combustion zone residence time, and description of method and location where the vent stream is introduced into the combustion zone.

(D) For a flare, the design analysis shall consider the vent stream composition, constituent concentrations, and flow rate. The design analysis shall also consider the requirements specified in Subsection R315-264-1033(d).

(E) For a condenser, the design analysis shall consider the vent stream composition, constituent concentrations, flow rate, relative humidity, and temperature. The design analysis shall also establish the design outlet organic compound concentration level, design average temperature of the condenser exhaust vent stream, and design average temperatures of the coolant fluid at the condenser inlet and outlet.

(F) For a carbon adsorption system such as a fixed-bed adsorber that regenerates the carbon bed directly onsite in the control device, the design analysis shall consider the vent stream composition, constituent concentrations, flow rate, relative humidity, and temperature. The design analysis shall also establish the design exhaust vent stream organic compound concentration level, number and capacity of carbon beds, type and working capacity of activated carbon used for carbon beds, design total steam flow over the period of each complete carbon bed regeneration cycle, duration of the carbon bed steaming and cooling/drying cycles, design carbon bed temperature after regeneration, design carbon bed regeneration time, and design service life of carbon.

(G) For a carbon adsorption system such as a carbon canister that does not regenerate the carbon bed directly onsite in the control device, the design analysis shall consider the vent stream composition, constituent concentrations, flow rate, relative humidity, and temperature. The design analysis shall also establish the design outlet organic concentration level, capacity of carbon bed, type and working capacity of activated carbon used for carbon bed, and design carbon

replacement interval based on the total carbon working capacity of the control device and source operating schedule.

(iv) A statement signed and dated by the owner or operator certifying that the operating parameters used in the design analysis reasonably represent the conditions that exist when the hazardous waste management unit is or would be operating at the highest load or capacity level reasonably expected to occur.

(v) A statement signed and dated by the owner or operator certifying that the control device is designed to operate at an efficiency of 95 percent or greater unless the total organic concentration limit of Subsection R315-264-1032(a) is achieved at an efficiency less than 95 weight percent or the total organic emission limits of Subsection R315-264-1032(a) for affected process vents at the facility can be attained by a control device involving vapor recovery at an efficiency less than 95 weight percent. A statement provided by the control device manufacturer or vendor certifying that the control equipment meets the design specifications may be used to comply with this requirement.

(vi) If performance tests are used to demonstrate compliance, all test results.

(c) Design documentation and monitoring, operating, and inspection information for each closed-vent system and control device required to comply with the provisions of Rule R315-264 shall be recorded and kept up-to-date in the facility operating record. The information shall include:

(1) Description and date of each modification that is made to the closed-vent system or control device design.

(2) Identification of operating parameter, description of monitoring device, and diagram of monitoring sensor location or locations used to comply with Subsections R315-264-1033(f)(1) and (f)(2).

(3) Monitoring, operating, and inspection information required by Subsections R315-264-1033(f) through (k).

(4) Date, time, and duration of each period that occurs while the control device is operating when any monitored parameter exceeds the value established in the control device design analysis as specified below:

(i) For a thermal vapor incinerator designed to operate with a minimum residence time of 0.50 second at a minimum temperature of 760 degrees C, period when the combustion temperature is below 760 degrees C.

(ii) For a thermal vapor incinerator designed to operate with an organic emission reduction efficiency of 95 weight percent or greater, period when the combustion zone temperature is more than 28 degrees C below the design average combustion zone temperature established as a requirement of Subsection R315-264-1035(b)(4)(iii)(A).

(iii) For a catalytic vapor incinerator, period when:

(A) Temperature of the vent stream at the catalyst bed inlet is more than 28 degrees C below the average temperature of the inlet vent stream established as a requirement of Subsection R315-264-1035(b)(4)(iii)(B), or

(B) Temperature difference across the catalyst bed is less than 80 percent of the design average temperature difference established as a requirement of Subsection R315-264-1035(b)(4)(iii)(B).

(iv) For a boiler or process heater, period when:

(A) Flame zone temperature is more than 28 degrees C below the design average flame zone temperature established as a requirement of Subsection R315-264-1035(b)(4)(iii)(C), or

(B) Position changes where the vent stream is introduced to the combustion zone from the location established as a requirement of Subsection R315-264-1035(b)(4)(iii)(C).

(v) For a flare, period when the pilot flame is not ignited.

(vi) For a condenser that complies with Subsection R315-264-1033(f)(2)(vi)(A), period when the organic compound concentration level or readings of organic compounds in the exhaust vent stream from the condenser are more than 20 percent greater than the design outlet organic compound concentration level established as a requirement of Subsection R315-264-1035(b)(4)(iii)(E).

(vii) For a condenser that complies with Subsection R315-264-1033(f)(2)(vi)(B), period when:

(A) Temperature of the exhaust vent stream from the condenser is more than 6 degrees C above the design average exhaust vent stream temperature established as a requirement of Subsection R315-264-1035(b)(4)(iii)(E); or

(B) Temperature of the coolant fluid exiting the condenser is more than 6 degrees C above the design average coolant fluid temperature at the condenser outlet established as a requirement of Subsection R315-264-1035(b)(4)(iii)(E).

(viii) For a carbon adsorption system such as a fixed-bed carbon adsorber that regenerates the carbon bed directly onsite in the control device and complies with Subsection R315-264-1033(f)(2)(vii)(A), period when the organic compound concentration level or readings of organic compounds in the exhaust vent stream from the carbon bed are more than 20 percent greater than the design exhaust vent stream organic compound concentration level established as a requirement of Subsection R315-264-1035(b)(4)(iii)(F).

(ix) For a carbon adsorption system such as a fixed-bed carbon adsorber that regenerates the carbon bed directly onsite in the control device and complies with Subsection R315-264-1033(f)(2)(vii)(B), period when the vent stream continues to flow through the control device beyond the predetermined carbon bed regeneration time established as a requirement of Subsection R315-264-1035(b)(4)(iii)(F).

(5) Explanation for each period recorded under Subsection R315-264-1035(4) of the cause for control device operating parameter exceeding the design value and the measures implemented to correct the control device operation.

(6) For a carbon adsorption system operated subject to requirements specified in Subsection R315-264-1033(g) or (h)(2), date when existing carbon in the control device is replaced with fresh carbon.

(7) For a carbon adsorption system operated subject to requirements specified in Subsection R315-264-1033(h)(1), a log that records:

(i) Date and time when control device is monitored for carbon breakthrough and the monitoring device reading.

(ii) Date when existing carbon in the control device is replaced with fresh carbon.

(8) Date of each control device startup and shutdown.

(9) An owner or operator designating any components of a closed-vent system as unsafe to monitor pursuant to Subsection R315-264-1033(o) shall record in a log that is kept in the facility operating record the identification of closed-vent system components that are designated as unsafe to monitor in accordance with the requirements of Subsection R315-264-1033(o), an explanation for each closed-vent system component stating why the closed-vent system component is unsafe to monitor, and the plan for monitoring each closed-vent system component.

(10) When each leak is detected as specified in Subsection R315-264-1033(l), the following information shall be recorded:

(i) The instrument identification number, the closed-vent system component identification number, and the operator name, initials, or identification number.

(ii) The date the leak was detected and the date of first attempt to repair the leak.

(iii) The date of successful repair of the leak.

(iv) Maximum instrument reading measured by Method

21 of 40 CFR part 60, appendix A after it is successfully repaired or determined to be nonrepairable.

(v) "Repair delayed" and the reason for the delay if a leak is not repaired within 15 calendar days after discovery of the leak.

(A) The owner or operator may develop a written procedure that identifies the conditions that justify a delay of repair. In such cases, reasons for delay of repair may be documented by citing the relevant sections of the written procedure.

(B) If delay of repair was caused by depletion of stocked parts, there shall be documentation that the spare parts were sufficiently stocked on-site before depletion and the reason for depletion.

(d) Records of the monitoring, operating, and inspection information required by Subsections R315-264-1035(c)(3) through (c)(10) shall be maintained by the owner or operator for at least 3 years following the date of each occurrence, measurement, maintenance, corrective action, or record.

(e) For a control device other than a thermal vapor incinerator, catalytic vapor incinerator, flare, boiler, process heater, condenser, or carbon adsorption system, the Director shall specify the appropriate recordkeeping requirements.

(f) Up-to-date information and data used to determine whether or not a process vent is subject to the requirements in Section R315-264-1032 including supporting documentation as required by Subsection R315-264-1034(d)(2) when application of the knowledge of the nature of the hazardous waste stream or the process by which it was produced is used, shall be recorded in a log that is kept in the facility operating record.

R315-264-1036. Reporting Requirements.

(a) A semiannual report shall be submitted by owners and operators subject to the requirements of Sections R315-264-1030 through 1036 to the Director by dates specified by the Director. The report shall include the following information:

(1) The Environmental Protection Agency identification number, name, and address of the facility.

(2) For each month during the semiannual reporting period, dates when the control device exceeded or operated outside of the design specifications as defined in Subsection R315-264-1035(c)(4) and as indicated by the control device monitoring required by Subsection R315-264-1033(f) and such exceedances were not corrected within 24 hours, or that a flare operated with visible emissions as defined in Subsection R315-264-1033(d) and as determined by Method 22 monitoring, the duration and cause of each exceedance or visible emissions, and any corrective measures taken.

(b) If, during the semiannual reporting period, the control device does not exceed or operate outside of the design specifications as defined in Subsection R315-264-264-1035(c)(4) for more than 24 hours or a flare does not operate with visible emissions as defined in Subsection R315-264-264-1033(d), a report to the Director is not required.

R315-264-1050. Air Emission Standards for Equipment Leaks -- Applicability.

(a) The regulations in Sections R315-264-1050 through 1065 apply to owners and operators of facilities that treat, store, or dispose of hazardous wastes, except as provided in Section R315-264-1.

(b) Except as provided in Subsection R315-264-1064(k), Sections R315-264-1050 through 1065 apply to equipment that contains or contacts hazardous wastes with organic concentrations of at least 10 percent by weight that are managed in one of the following:

(1) A unit that is subject to the permitting requirements of Rule R315-270, or

(2) A unit, including a hazardous waste recycling unit, that is not exempt from permitting under the provisions of Subsection R315-262-34(a), i.e., a hazardous waste recycling unit that is not a "90-day" tank or container, and that is located at a hazardous waste management facility otherwise subject to the permitting requirements of Rule R315-270, or

(3) A unit that is exempt from permitting under the provisions of Subsection R315-262-34(a), i.e., a "90-day" tank or container, and is not a recycling unit under the provisions of Section R315-261-6.

(c) For the owner or operator of a facility subject to Sections R315-264-1050 through 1065 and who received a final permit under RCRA section 3005 prior to December 6, 1996, the requirements of Sections R315-264-1050 through 1065 shall be incorporated into the permit when the permit is reissued in accordance with the requirements of Section R315-124-15 or reviewed in accordance with the requirements of Subsection R315-270-50(d). Until such date when the owner or operator receives a final permit incorporating the requirements of Sections R315-264-1050 through 1065, the owner or operator is subject to the requirements of 40 CFR 265.1050 through 1064, which are adopted by reference.

(d) Each piece of equipment to which Sections R315-264-1050 through 1065 applies shall be marked in such a manner that it can be distinguished readily from other pieces of equipment.

(e) Equipment that is in vacuum service is excluded from the requirements of Sections R315-264-1052 to 1060 if it is identified as required in Subsection R315-264-1064(g)(5).

(f) Equipment that contains or contacts hazardous waste with an organic concentration of at least 10 percent by weight for less than 300 hours per calendar year is excluded from the requirements of Sections R315-264-1052 through 1060 if it is identified, as required in Subsection R315-264-1064(g)(6).

(g) The requirements of Sections R315-264-1050 through 1065 do not apply to the pharmaceutical manufacturing facility, commonly referred to as the Stonewall Plant, located at Route 340 South, Elkton, Virginia, provided that facility is operated in compliance with the requirements contained in a permit issued pursuant to the Utah Air Conservation Act. The requirements of Sections R315-264-1050 through 1065 shall apply to the facility upon termination of the permit issued pursuant to the Utah Air Conservation Act.

(h) Purged coatings and solvents from surface coating operations subject to the national emission standards for hazardous air pollutants (NESHAP) for the surface coating of automobiles and light-duty trucks at R307-214-2(61), which incorporates 40 CFR part 63 subpart IIII, are not subject to the requirements of Sections R315-264-1050 through 1065.

Note: The requirements of Sections R315-264-1052 through 1065 apply to equipment associated with hazardous waste recycling units previously exempt under Subsection R315-261-6(c)(1). Other exemptions under Section R315-261-4, and Subsection R315-264-1(g) are not affected by these requirements.

R315-264-1051. Definitions.

As used in Sections R315-264-1050 through 1065, all terms shall have the meaning given them in Section R315-264-1031, RCRA, and Rules R315-260 through 266.

R315-264-1052. Standards: Pumps in Light Liquid Service.

(a)(1) Each pump in light liquid service shall be monitored monthly to detect leaks by the methods specified in

Subsection R315-264-1063(b), except as provided in Subsections R315-264-1052(d), (e), and (f).

(2) Each pump in light liquid service shall be checked by visual inspection each calendar week for indications of liquids dripping from the pump seal.

(b)(1) If an instrument reading of 10,000 ppm or greater is measured, a leak is detected.

(2) If there are indications of liquids dripping from the pump seal, a leak is detected.

(c)(1) When a leak is detected, it shall be repaired as soon as practicable, but not later than 15 calendar days after it is detected, except as provided in Section R315-264-1059.

(2) A first attempt at repair, e.g., tightening the packing gland, shall be made no later than 5 calendar days after each leak is detected.

(d) Each pump equipped with a dual mechanical seal system that includes a barrier fluid system is exempt from the requirements of Subsection R315-264-1052(a), provided the following requirements are met:

(1) Each dual mechanical seal system shall be:

(i) Operated with the barrier fluid at a pressure that is at all times greater than the pump stuffing box pressure, or

(ii) Equipped with a barrier fluid degassing reservoir that is connected by a closed-vent system to a control device that complies with the requirements of Section R315-264-1060, or

(iii) Equipped with a system that purges the barrier fluid into a hazardous waste stream with no detectable emissions to the atmosphere.

(2) The barrier fluid system shall not be a hazardous waste with organic concentrations 10 percent or greater by weight.

(3) Each barrier fluid system shall be equipped with a sensor that will detect failure of the seal system, the barrier fluid system, or both.

(4) Each pump shall be checked by visual inspection, each calendar week, for indications of liquids dripping from the pump seals.

(5)(i) Each sensor as described in Subsection R315-264-1052(d)(3) shall be checked daily or be equipped with an audible alarm that shall be checked monthly to ensure that it is functioning properly.

(ii) The owner or operator shall determine, based on design considerations and operating experience, a criterion that indicates failure of the seal system, the barrier fluid system, or both.

(6)(i) If there are indications of liquids dripping from the pump seal or the sensor indicates failure of the seal system, the barrier fluid system, or both based on the criterion determined in Subsection R315-264-1052(d)(5)(ii), a leak is detected.

(ii) When a leak is detected, it shall be repaired as soon as practicable, but not later than 15 calendar days after it is detected, except as provided in Section R315-264-1059.

(iii) A first attempt at repair, e.g., relapping the seal, shall be made no later than 5 calendar days after each leak is detected.

(e) Any pump that is designated, as described in Subsection R315-264-1064(g)(2), for no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, is exempt from the requirements of Subsections R315-264-1052(a), (c), and (d) if the pump meets the following requirements:

(1) Shall have no externally actuated shaft penetrating the pump housing.

(2) Shall operate with no detectable emissions as indicated by an instrument reading of less than 500 ppm above background as measured by the methods specified in Subsection R315-264-1063(c).

(3) Shall be tested for compliance with Subsection R315-264-1052(e)(2) initially upon designation, annually, and at other times as requested by the Director.

(f) If any pump is equipped with a closed-vent system capable of capturing and transporting any leakage from the seal or seals to a control device that complies with the requirements of Section R315-264-1060, it is exempt from the requirements of Subsections R315-264-1052(a) through (e).

R315-264-1053. Standards: Compressors.

(a) Each compressor shall be equipped with a seal system that includes a barrier fluid system and that prevents leakage of total organic emissions to the atmosphere, except as provided in Subsections R315-264-1053(h) and (i).

(b) Each compressor seal system as required in Subsection R315-264-1053(a) shall be:

(1) Operated with the barrier fluid at a pressure that is at all times greater than the compressor stuffing box pressure, or

(2) Equipped with a barrier fluid system that is connected by a closed-vent system to a control device that complies with the requirements of Section R315-264-1060, or

(3) Equipped with a system that purges the barrier fluid into a hazardous waste stream with no detectable emissions to atmosphere.

(c) The barrier fluid shall not be a hazardous waste with organic concentrations 10 percent or greater by weight.

(d) Each barrier fluid system as described in Subsections R315-264-1053(a) through (c) shall be equipped with a sensor that will detect failure of the seal system, barrier fluid system, or both.

(e)(1) Each sensor as required in Subsection R315-264-1053(d) shall be checked daily or shall be equipped with an audible alarm that shall be checked monthly to ensure that it is functioning properly unless the compressor is located within the boundary of an unmanned plant site, in which case the sensor shall be checked daily.

(2) The owner or operator shall determine, based on design considerations and operating experience, a criterion that indicates failure of the seal system, the barrier fluid system, or both.

(f) If the sensor indicates failure of the seal system, the barrier fluid system, or both based on the criterion determined under Subsection R315-264-1053(e)(2), a leak is detected.

(g)(1) When a leak is detected, it shall be repaired as soon as practicable, but not later than 15 calendar days after it is detected, except as provided in Section R315-264-1059.

(2) A first attempt at repair, e.g., tightening the packing gland, shall be made no later than 5 calendar days after each leak is detected.

(h) A compressor is exempt from the requirements of Subsections R315-264-1053(a) and (b) if it is equipped with a closed-vent system capable of capturing and transporting any leakage from the seal to a control device that complies with the requirements of Section R315-264-1060, except as provided in Subsection R315-264-1053(i).

(i) Any compressor that is designated, as described in Subsection R315-264-1064(g)(2), for no detectable emissions as indicated by an instrument reading of less than 500 ppm above background is exempt from the requirements of Subsections R315-264-1053(a) through (h) if the compressor:

(1) Is determined to be operating with no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, as measured by the method specified in Subsection R315-264-1063(c).

(2) Is tested for compliance with Subsection R315-264-1053(i)(1) initially upon designation, annually, and at other times as requested by the Director.

R315-264-1054. Standards: Pressure Relief Devices in Gas/Vapor Service.

(a) Except during pressure releases, each pressure relief device in gas/vapor service shall be operated with no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, as measured by the method specified in Subsection R315-264-1063(c).

(b)(1) After each pressure release, the pressure relief device shall be returned to a condition of no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, as soon as practicable, but no later than 5 calendar days after each pressure release, except as provided in Section R315-264-1059.

(2) No later than 5 calendar days after the pressure release, the pressure relief device shall be monitored to confirm the condition of no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, as measured by the method specified in Subsection R315-264-1063(c).

(c) Any pressure relief device that is equipped with a closed-vent system capable of capturing and transporting leakage from the pressure relief device to a control device as described in Section R315-264-264-1060 is exempt from the requirements of Subsection R315-264-1054(a) and (b).

R315-264-1055. Standards: Sampling Connection Systems.

(a) Each sampling connection system shall be equipped with a closed-purge, closed-loop, or closed-vent system. This system shall collect the sample purge for return to the process or for routing to the appropriate treatment system. Gases displaced during filling of the sample container are not required to be collected or captured.

(b) Each closed-purge, closed-loop, or closed-vent system as required in Subsection R315-264-1055(a) shall meet one of the following requirements:

(1) Return the purged process fluid directly to the process line;

(2) Collect and recycle the purged process fluid; or

(3) Be designed and operated to capture and transport all the purged process fluid to a waste management unit that complies with the applicable requirements of Sections R315-264-1084 through 1086 or a control device that complies with the requirements of Section R315-264-1060.

(c) In-situ sampling systems and sampling systems without purges are exempt from the requirements of Subsections R315-264-1055(a) and (b).

R315-264-1056. Standards: Open-Ended Valves or Lines.

(a)(1) Each open-ended valve or line shall be equipped with a cap, blind flange, plug, or a second valve.

(2) The cap, blind flange, plug, or second valve shall seal the open end at all times except during operations requiring hazardous waste stream flow through the open-ended valve or line.

(b) Each open-ended valve or line equipped with a second valve shall be operated in a manner such that the valve on the hazardous waste stream end is closed before the second valve is closed.

(c) When a double block and bleed system is being used, the bleed valve or line may remain open during operations that require venting the line between the block valves but shall comply with Subsection R315-264-1056(a) at all other times.

R315-264-1057. Standards: Valves in Gas/Vapor Service or in Light Liquid Service.

(a) Each valve in gas/vapor or light liquid service shall be monitored monthly to detect leaks by the methods specified in Subsection R315-264-1063(b) and shall comply with Subsections R315-264-1057(b) through (e), except as provided in Subsections R315-264-1057(f), (g), and (h), and Sections R315-264-1061 and 1062.

(b) If an instrument reading of 10,000 ppm or greater is measured, a leak is detected.

(c)(1) Any valve for which a leak is not detected for two successive months may be monitored the first month of every succeeding quarter, beginning with the next quarter, until a leak is detected.

(2) If a leak is detected, the valve shall be monitored monthly until a leak is not detected for two successive months,

(d)(1) When a leak is detected, it shall be repaired as soon as practicable, but no later than 15 calendar days after the leak is detected, except as provided in Section R315-264-1059.

(2) A first attempt at repair shall be made no later than 5 calendar days after each leak is detected.

(e) First attempts at repair include, but are not limited to, the following best practices where practicable:

(1) Tightening of bonnet bolts.

(2) Replacement of bonnet bolts.

(3) Tightening of packing gland nuts.

(4) Injection of lubricant into lubricated packing.

(f) Any valve that is designated, as described in Subsection R315-264-1064(g)(2), for no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, is exempt from the requirements of Subsection R315-264-1057(a) if the valve:

(1) Has no external actuating mechanism in contact with the hazardous waste stream.

(2) Is operated with emissions less than 500 ppm above background as determined by the method specified in Subsection R315-264-1063(c).

(3) Is tested for compliance with Subsection R315-264-1057(f)(2) initially upon designation, annually, and at other times as requested by the Director.

(g) Any valve that is designated, as described in Subsection R315-264-1064(h)(1), as an unsafe-to-monitor valve is exempt from the requirements of Subsection R315-264-1057(a) if:

(1) The owner or operator of the valve determines that the valve is unsafe to monitor because monitoring personnel would be exposed to an immediate danger as a consequence of complying with Subsection R315-264-1057(a).

(2) The owner or operator of the valve adheres to a written plan that requires monitoring of the valve as frequently as practicable during safe-to-monitor times.

(h) Any valve that is designated, as described in Subsection R315-264-1064(h)(2), as a difficult-to-monitor valve is exempt from the requirements of Subsection R315-264-1057(a) if:

(1) The owner or operator of the valve determines that the valve cannot be monitored without elevating the monitoring personnel more than 2 meters above a support surface.

(2) The hazardous waste management unit within which the valve is located was in operation before June 21, 1990.

(3) The owner or operator of the valve follows a written plan that requires monitoring of the valve at least once per calendar year.

R315-264-1058. Standards: Pumps and Valves in Heavy Liquid Service, Pressure Relief Devices in Light Liquid or Heavy Liquid Service, and Flanges and Other Connectors.

(a) Pumps and valves in heavy liquid service, pressure relief devices in light liquid or heavy liquid service, and flanges and other connectors shall be monitored within 5 days

by the method specified in Subsection R315-264-1063(b) if evidence of a potential leak is found by visual, audible, olfactory, or any other detection method.

(b) If an instrument reading of 10,000 ppm or greater is measured, a leak is detected.

(c)(1) When a leak is detected, it shall be repaired as soon as practicable, but not later than 15 calendar days after it is detected, except as provided in Section R315-264-1059.

(2) The first attempt at repair shall be made no later than 5 calendar days after each leak is detected.

(d) First attempts at repair include, but are not limited to, the best practices described under Subsection R315-264-1057(e).

(e) Any connector that is inaccessible or is ceramic or ceramic-lined, e.g., porcelain, glass, or glass-lined, is exempt from the monitoring requirements of Subsection R315-264-1058(a) and from the recordkeeping requirements of Section R315-264-1064.

R315-264-1059. Standards: Delay of Repair.

(a) Delay of repair of equipment for which leaks have been detected will be allowed if the repair is technically infeasible without a hazardous waste management unit shutdown. In such a case, repair of this equipment shall occur before the end of the next hazardous waste management unit shutdown.

(b) Delay of repair of equipment for which leaks have been detected will be allowed for equipment that is isolated from the hazardous waste management unit and that does not continue to contain or contact hazardous waste with organic concentrations at least 10 percent by weight.

(c) Delay of repair for valves will be allowed if:

(1) The owner or operator determines that emissions of purged material resulting from immediate repair are greater than the emissions likely to result from delay of repair.

(2) When repair procedures are effected, the purged material is collected and destroyed or recovered in a control device complying with Section R315-264-1060.

(d) Delay of repair for pumps will be allowed if:

(1) Repair requires the use of a dual mechanical seal system that includes a barrier fluid system.

(2) Repair is completed as soon as practicable, but not later than 6 months after the leak was detected.

(e) Delay of repair beyond a hazardous waste management unit shutdown will be allowed for a valve if valve assembly replacement is necessary during the hazardous waste management unit shutdown, valve assembly supplies have been depleted, and valve assembly supplies had been sufficiently stocked before the supplies were depleted. Delay of repair beyond the next hazardous waste management unit shutdown will not be allowed unless the next hazardous waste management unit shutdown occurs sooner than 6 months after the first hazardous waste management unit shutdown.

R315-264-1060. Standards: Closed-Vent Systems and Control Devices.

(a) Owners and operators of closed-vent systems and control devices subject to Sections R315-264-1050 through 1065 shall comply with the provisions of Section R315-264-1033.

(b)(1) The owner or operator of an existing facility who cannot install a closed-vent system and control device to comply with the provisions of Sections R315-264-1050 through 1065 on the effective date that the facility becomes subject to the provisions of Sections R315-264-1050 through 1065 shall prepare an implementation schedule that includes dates by which the closed-vent system and control device will be installed and in operation. The controls shall be installed as soon as possible, but the implementation schedule may allow up to 30 months after the effective date that the facility becomes subject to Sections R315-264-1050 through 1065 for installation and startup.

(2) Any unit that begins operation after December 21, 1990, and is subject to the provisions of Sections R315-264-1050 through 1065 when operation begins, shall comply with the rules immediately, i.e., shall have control devices installed and operating on startup of the affected unit; the 30-month implementation schedule does not apply.

(3) The owner or operator of any facility in existence on the effective date of a statutory or regulatory amendment that renders the facility subject to Sections R315-264-1050 through 1065 shall comply with all requirements of Sections R315-264-1050 through 1065 as soon as practicable but no later than 30 months after the amendment's effective date. When control equipment required by Sections R315-264-1050 through 1065 cannot be installed and begin operation by the effective date of the amendment, the facility owner or operator shall prepare an implementation schedule that includes the following information: Specific calendar dates for award or contracts or issuance of purchase orders for the control equipment, initiation of on-site installation of the control equipment, completion of the control equipment installation, and performance of any testing to demonstrate that the installed equipment meets the applicable standards of Sections R315-264-1050 through 1065. The owner or operator shall enter the implementation schedule in the operating record or in a permanent, readily available file located at the facility.

(4) Owners and operators of facilities and units that become newly subject to the requirements of Sections R315-264-1050 through 1065 after December 8, 1997, due to an action other than those described in Subsection R315-264-1060(b)(3) shall comply with all applicable requirements immediately, i.e., shall have control devices installed and operating on the date the facility or unit becomes subject to Sections R315-264-1050 through 1065; the 30-month implementation schedule does not apply.

R315-264-1061. Alternative Standards for Valves in Gas/Vapor Service or in Light Liquid Service: Percentage of Valves Allowed to Leak.

(a) An owner or operator subject to the requirements of Section R315-264-1057 may elect to have all valves within a hazardous waste management unit comply with an alternative standard that allows no greater than 2 percent of the valves to leak.

(b) The following requirements shall be met if an owner or operator decides to comply with the alternative standard of allowing 2 percent of valves to leak:

(1) A performance test as specified in Section R315-264-1061(c) shall be conducted initially upon designation, annually, and at other times requested by the Director.

(2) If a valve leak is detected, it shall be repaired in accordance with Subsections R315-264-1057(d) and (e).

(c) Performance tests shall be conducted in the following manner:

(1) All valves subject to the requirements in Section R315-264-1057 within the hazardous waste management unit shall be monitored within 1 week by the methods specified in Subsection R315-264-1063(b).

(2) If an instrument reading of 10,000 ppm or greater is measured, a leak is detected.

(3) The leak percentage shall be determined by dividing the number of valves subject to the requirements in Section R315-264-1057 for which leaks are detected by the total number of valves subject to the requirements in Section R315-264-1057 within the hazardous waste management unit.

R315-264-1062. Alternative Standards for Valves in Gas/Vapor Service or in Light Liquid Service: Skip Period Leak Detection and Repair.

(a) An owner or operator subject to the requirements of Section R315-264-1057 may elect for all valves within a hazardous waste management unit to comply with one of the alternative work practices specified in Subsections R315-264-1062(b)(2) and (3).

(b)(1) An owner or operator shall comply with the requirements for valves, as described in Section R315-264-1057, except as described in Subsections R315-264-1062(b)(2) and (b)(3).

(2) After two consecutive quarterly leak detection periods with the percentage of valves leaking equal to or less than 2 percent, an owner or operator may begin to skip one of the quarterly leak detection periods, i.e., monitor for leaks once every six months, for the valves subject to the requirements in Section R315-264-1057.

(3) After five consecutive quarterly leak detection periods with the percentage of valves leaking equal to or less than 2 percent, an owner or operator may begin to skip three of the quarterly leak detection periods, i.e., monitor for leaks once every year, for the valves subject to the requirements in Section R315-264-1057.

(4) If the percentage of valves leaking is greater than 2 percent, the owner or operator shall monitor monthly in compliance with the requirements in Section R315-264-1057, but may again elect to use Section R315-264-1062 after meeting the requirements of Section R315-264-1057(c)(1).

R315-264-1063. Test Methods and Procedures.

(a) Each owner or operator subject to the provisions of Rule R315-264 shall comply with the test methods and procedures requirements provided in Section R315-264-1063.

(b) Leak detection monitoring, as required in Sections R315-264-1052 through 1062, shall comply with the following requirements:

(1) Monitoring shall comply with Reference Method 21 in 40 CFR part 60.

(2) The detection instrument shall meet the performance criteria of Reference Method 21.

(3) The instrument shall be calibrated before use on each day of its use by the procedures specified in Reference Method 21.

(4) Calibration gases shall be:

(i) Zero air, less than 10 ppm of hydrocarbon in air.

(ii) A mixture of methane or n-hexane and air at a concentration of approximately, but less than, 10,000 ppm methane or n-hexane.

(5) The instrument probe shall be traversed around all potential leak interfaces as close to the interface as possible as described in Reference Method 21.

(c) When equipment is tested for compliance with no detectable emissions, as required in Subsections R315-264-1052(e), 1053(i), 1054, and 1057(f), the test shall comply with the following requirements:

(1) The requirements of Subsections R315-264-1063(b)(1) through (4) shall apply.

(2) The background level shall be determined as set forth in Reference Method 21.

(3) The instrument probe shall be traversed around all potential leak interfaces as close to the interface as possible as described in Reference Method 21.

(4) The arithmetic difference between the maximum concentration indicated by the instrument and the background level is compared with 500 ppm for determining compliance.

(d) In accordance with the waste analysis plan required by Subsection R315-264-13(b), an owner or operator of a facility shall determine, for each piece of equipment, whether the equipment contains or contacts a hazardous waste with organic concentration that equals or exceeds 10 percent by weight using the following:

(1) Methods described in ASTM Methods D 2267-88, E 169-87, E 168-88, E 260-85, incorporated by reference under Section R315-260-11);

(2) Method 9060A, incorporated by reference under Section R315-260-11, of "Test Methods for Evaluating Solid Waste," EPA Publication SW-846, for computing total organic concentration of the sample, or analyzed for its individual organic constituents; or

(3) Application of the knowledge of the nature of the hazardous waste stream or the process by which it was produced. Documentation of a waste determination by knowledge is required. Examples of documentation that shall be used to support a determination under this provision include production process information documenting that no organic compounds are used, information that the waste is generated by a process that is identical to a process at the same or another facility that has previously been demonstrated by direct measurement to have a total organic content less than 10 percent, or prior speciation analysis results on the same waste stream where it can also be documented that no process changes have occurred since that analysis that could affect the waste total organic concentration.

(e) If an owner or operator determines that a piece of equipment contains or contacts a hazardous waste with organic concentrations at least 10 percent by weight, the determination can be revised only after following the procedures in Subsections R315-264-1063(d)(1) or (d)(2).

(f) When an owner or operator and the Director do not agree on whether a piece of equipment contains or contacts a hazardous waste with organic concentrations at least 10 percent by weight, the procedures in Subsections R315-264-1063(d)(1) or (d)(2) can be used to resolve the dispute.

(g) Samples used in determining the percent organic content shall be representative of the highest total organic content hazardous waste that is expected to be contained in or contact the equipment.

(h) To determine if pumps or valves are in light liquid service, the vapor pressures of constituents may be obtained from standard reference texts or may be determined by ASTM D-2879-86, incorporated by reference under Section R315-260-11.

(i) Performance tests to determine if a control device achieves 95 weight percent organic emission reduction shall comply with the procedures of Sections R315-264-1034(c)(1) through (c)(4).

R315-264-1064. Recordkeeping Requirements.

(a)(1) Each owner or operator subject to the provisions of Sections R315-264-1050 through 1065 shall comply with the recordkeeping requirements of Section R315-264-1064.

(2) An owner or operator of more than one hazardous waste management unit subject to the provisions of Sections R315-264-1050 through 1065 may comply with the recordkeeping requirements for these hazardous waste management units in one recordkeeping system if the system identifies each record by each hazardous waste management unit.

(b) Owners and operators shall record the following information in the facility operating record:

(1) For each piece of equipment to which Sections R315-264-1050 through 1065 apply:

(i) Equipment identification number and hazardous waste management unit identification.

(ii) Approximate locations within the facility, e.g., identify the hazardous waste management unit on a facility

plot plan.

(iii) Type of equipment, e.g., a pump or pipeline valve.

(iv) Percent-by-weight total organics in the hazardous waste stream at the equipment.

(v) Hazardous waste state at the equipment, e.g., gas/vapor or liquid.

(vi) Method of compliance with the standard, e.g., "monthly leak detection and repair" or "equipped with dual mechanical seals."

(2) For facilities that comply with the provisions of Subsection R315-264-1033(a)(2), an implementation schedule as specified in Subsection R315-264-1033(a)(2).

(3) Where an owner or operator chooses to use test data to demonstrate the organic removal efficiency or total organic compound concentration achieved by the control device, a performance test plan as specified in Subsection R315-264-1035(b)(3).

(4) Documentation of compliance with Section R315-264-1060, including the detailed design documentation or performance test results specified in Subsection R315-264-1035(b)(4).

(c) When each leak is detected as specified in Sections R315-264-1052, 1053, 1057, and 1058, the following requirements apply:

(1) A weatherproof and readily visible identification, marked with the equipment identification number, the date evidence of a potential leak was found in accordance with Subsection R315-264-1058(a), and the date the leak was detected, shall be attached to the leaking equipment.

(2) The identification on equipment, except on a valve, may be removed after it has been repaired.

(3) The identification on a valve may be removed after it has been monitored for 2 successive months as specified in Subsection R315-264-1057(c) and no leak has been detected during those 2 months.

(d) When each leak is detected as specified in Subsections R315-264-1052, 1053, 1057, and 1058, the following information shall be recorded in an inspection log and shall be kept in the facility operating record:

(1) The instrument and operator identification numbers and the equipment identification number.

(2) The date evidence of a potential leak was found in accordance with Subsection R315-264-1058(a).

(3) The date the leak was detected and the dates of each attempt to repair the leak.

(4) Repair methods applied in each attempt to repair the leak.

(5) "Above 10,000" if the maximum instrument reading measured by the methods specified in Subsection R315-264-1063(b) after each repair attempt is equal to or greater than 10,000 ppm.

(6) "Repair delayed" and the reason for the delay if a leak is not repaired within 15 calendar days after discovery of the leak.

(7) Documentation supporting the delay of repair of a valve in compliance with Subsection R315-264-1059(c).

(8) The signature of the owner or operator, or designate, whose decision it was that repair could not be effected without a hazardous waste management unit shutdown.

(9) The expected date of successful repair of the leak if a leak is not repaired within 15 calendar days.

(10) The date of successful repair of the leak.

(e) Design documentation and monitoring, operating, and inspection information for each closed-vent system and control device required to comply with the provisions of Section R315-264-1060 shall be recorded and kept up-to-date in the facility operating record as specified in Subsection R315-264-1035(c). Design documentation is specified in Subsection R315-264-1035(c)(1) and (c)(2) and monitoring, operating, and inspection information in Subsection R315-264-1035(c)(3)through (c)(8).

(f) For a control device other than a thermal vapor incinerator, catalytic vapor incinerator, flare, boiler, process heater, condenser, or carbon adsorption system, the Director shall specify the appropriate recordkeeping requirements.

(g) The following information pertaining to all equipment subject to the requirements in Sections R315-264-1052 through 1060 shall be recorded in a log that is kept in the facility operating record:

(1) A list of identification numbers for equipment, except welded fittings, subject to the requirements of Sections R315-264-1050 through 1065.

(2)(i) A list of identification numbers for equipment that the owner or operator elects to designate for no detectable emissions, as indicated by an instrument reading of less than 500 ppm above background, under the provisions of Subsections R315-264-1052(e), 1053(i), and 1057(f).

(ii) The designation of this equipment as subject to the requirements of Subsections R315-264-1052(e), 1053(i), or 1057(f) shall be signed by the owner or operator.

(3) A list of equipment identification numbers for pressure relief devices required to comply with Subsection R315-264-1054(a).

(4)(i) The dates of each compliance test required in Subsections R315-264-1052(e), 1053(i), 1054, and 1057(f).

(ii) The background level measured during each compliance test.

(iii) The maximum instrument reading measured at the equipment during each compliance test.

(5) A list of identification numbers for equipment in vacuum service.

(6) Identification, either by list or location, area or group, of equipment that contains or contacts hazardous waste with an organic concentration of at least 10 percent by weight for less than 300 hours per calendar year.

(h) The following information pertaining to all valves subject to the requirements of Subsections R315-264-1057 (g) and (h) shall be recorded in a log that is kept in the facility operating record:

(1) A list of identification numbers for valves that are designated as unsafe to monitor, an explanation for each valve stating why the valve is unsafe to monitor, and the plan for monitoring each valve.

(2) A list of identification numbers for valves that are designated as difficult to monitor, an explanation for each valve stating why the valve is difficult to monitor, and the planned schedule for monitoring each valve.

(i) The following information shall be recorded in the facility operating record for valves complying with Section R315-264-1062:

(1) A schedule of monitoring.

(2) The percent of valves found leaking during each monitoring period.

(j) The following information shall be recorded in a log that is kept in the facility operating record:

(1) Criteria required in Subsections R315-264-1052(d)(5)(ii) and 1053(e)(2) and an explanation of the design criteria.

(2) Any changes to these criteria and the reasons for the changes.

(k) The following information shall be recorded in a log that is kept in the facility operating record for use in determining exemptions as provided in the applicability section of Sections R315-264-1050 through 1065 and other specific sections of Rule R315-264:

(1) An analysis determining the design capacity of the hazardous waste management unit.

(2) A statement listing the hazardous waste influent to

and effluent from each hazardous waste management unit subject to the requirements in Subsections R315-264-1052 through 1060 and an analysis determining whether these hazardous wastes are heavy liquids.

(3) An up-to-date analysis and the supporting information and data used to determine whether or not equipment is subject to the requirements in Subsections R315-264-1052 through 1060. The record shall include supporting documentation as required by Subsection R315-264-1063(d)(3) when application of the knowledge of the nature of the hazardous waste stream or the process by which it was produced is used. If the owner or operator takes any action, e.g., changing the process that produced the waste, that could result in an increase in the total organic content of the waste contained in or contacted by equipment determined not to be subject to the requirements in Sections R315-264-1052 through 1060, then a new determination is required.

(l) Records of the equipment leak information required by Subsection R315-264-1064(d) and the operating information required by Subsection R315-264-1064(e) need be kept only 3 years.

(m) The owner or operator of a facility with equipment that is subject to Sections R315-264-1050 through 1065 and to regulations at 40 CFR part 60, part 61, or part 63 may elect to determine compliance with Sections R315-264-1050 through 1065 either by documentation pursuant to Section R315-264-1064, or by documentation of compliance with the regulations at 40 CFR part 60, part 61, or part 63 pursuant to the relevant provisions of the regulations at 40 part 60, part 61, or part 63. The documentation of compliance under regulations at 40 CFR part 60, part 61, or part 63 shall be kept with or made readily available with the facility operating record.

R315-264-1065. Reporting Requirements.

(a) A semiannual report shall be submitted by owners and operators subject to the requirements of Sections R315-264-1050 through 1065 to the Director by dates specified by the Director. The report shall include the following information:

(1) The Environmental Protection Agency identification number, name, and address of the facility.

(2) For each month during the semiannual reporting period:

(i) The equipment identification number of each valve for which a leak was not repaired as required in Subsection R315-264-1057(d).

(ii) The equipment identification number of each pump for which a leak was not repaired as required in Subsections R315-264-1052(c) and (d)(6).

(iii) The equipment identification number of each compressor for which a leak was not repaired as required in Subsection R315-264-1053(g).

(3) Dates of hazardous waste management unit shutdowns that occurred within the semiannual reporting period.

(4) For each month during the semiannual reporting period, dates when the control device installed as required by Sections R315-264-1052, 1053, 1054, or 1055 exceeded or operated outside of the design specifications as defined in Subsection R315-264-1064(e) and as indicated by the control device monitoring required by Section R315-264-1060 and was not corrected within 24 hours, the duration and cause of each exceedance, and any corrective measures taken.

(b) If, during the semiannual reporting period, leaks from valves, pumps, and compressors are repaired as required in Subsections R315-264-1057(d), 1052(c) and (d)(6), and 1053(g), respectively, and the control device does not exceed or operate outside of the design specifications as defined in Subsection R315-264-1064(e) for more than 24 hours, a report to the Director is not required.

R315-264-1080. Air Emission Standards for Tanks, Surface Impoundments, and Containers -- Applicability.

(a) The requirements of Sections R315-264-1080 through 1090 apply to owners and operators of all facilities that treat, store, or dispose of hazardous waste in tanks, surface impoundments, or containers subject to either Sections R315-264-170 through 179, 190 through 200, or 220 through 232 except as Section R315-264-1 and Subsection R315-264-1080(b) provide otherwise.

(b) The requirements of Sections R315-264-1080 through 1090 do not apply to the following waste management units at the facility:

(1) A waste management unit that holds hazardous waste placed in the unit before December 6, 1996, and in which no hazardous waste is added to the unit on or after December 6, 1996.

(2) A container that has a design capacity less than or equal to 0.1 cubic meter.

(3) A tank in which an owner or operator has stopped adding hazardous waste and the owner or operator has begun implementing or completed closure pursuant to an approved closure plan.

(4) A surface impoundment in which an owner or operator has stopped adding hazardous waste, except to implement an approved closure plan, and the owner or operator has begun implementing or completed closure pursuant to an approved closure plan.

(5) A waste management unit that is used solely for on-site treatment or storage of hazardous waste that is placed in the unit as a result of implementing remedial activities required under the corrective action authorities of RCRA sections 3004(u), 3004(v), or 3008(h); CERCLA authorities; or similar Federal or Utah authorities.

(6) A waste management unit that is used solely for the management of radioactive mixed waste in accordance with all applicable regulations under the authority of the Atomic Energy Act and the Nuclear Waste Policy Act.

(7) A hazardous waste management unit that the owner or operator certifies is equipped with and operating air emission controls in accordance with the requirements of an applicable regulation codified under the Utah Air Conservation Act. For the purpose of complying with Subsection R315-264-1080(b), a tank for which the air emission control includes an enclosure, as opposed to a cover, shall be in compliance with the enclosure and control device requirements of Subsection R315-264-1084(i), except as provided in Subsection R315-264-1082(c)(5).

(8) A tank that has a process vent as defined in Section R315-264-1031.

(c) For the owner and operator of a facility subject to Sections R315-264-1080 through 1090 who received a final permit under RCRA section 3005 prior to December 6, 1996, the requirements of Sections R315-264-1080 through 1090 shall be incorporated into the permit when the permit is reissued in accordance with the requirements of Section R315-124-15 or reviewed in accordance with the requirements of Subsection R315-270-50(d). Until such date when the permit is reissued in accordance with the requirements of Section R315-124-15 or reviewed in accordance with the requirements of Subsection R315-270-50(d), the owner and operator are subject to the requirements of 40 CFR 265.1080 through 1090, which are adopted by reference.

(d) The requirements of Sections R315-264-1080 through 1090, except for the recordkeeping requirements specified in Subsection R315-264-1089(i), are

administratively stayed for a tank or a container used for the management of hazardous waste generated by organic peroxide manufacturing and its associated laboratory operations when the owner or operator of the unit meets all of the following conditions:

(1) The owner or operator identifies that the tank or container receives hazardous waste generated by an organic peroxide manufacturing process producing more than one functional family of organic peroxides or multiple organic peroxides within one functional family, that one or more of these organic peroxides could potentially undergo self-accelerating thermal decomposition at or below ambient temperatures, and that organic peroxides are the predominant products manufactured by the process. For the purpose of meeting the conditions of Section R315-264-1080, "organic peroxide" means an organic compound that contains the bivalent structure and which may be considered to be a structural derivative of hydrogen peroxide where one or both of the hydrogen atoms has been replaced by an organic radical.

(2) The owner or operator prepares documentation, in accordance with the requirements of Subsection R315-264-1089(i), explaining why an undue safety hazard would be created if air emission controls specified in Sections R315-264-1084 through 1087 are installed and operated on the tanks and containers used at the facility to manage the hazardous waste generated by the organic peroxide manufacturing process or processes meeting the conditions of Subsection R315-264-1080(d)(1).

(3) The owner or operator notifies the Director in writing that hazardous waste generated by an organic peroxide manufacturing process or processes meeting the conditions of Subsection R315-264-1080(d)(1) are managed at the facility in tanks or containers meeting the conditions of Subsection R315-264-1080(d)(2). The notification shall state the name and address of the facility, and be signed and dated by an authorized representative of the facility owner or operator.

R315-264-1081. Definitions.

As used in Sections R315-264-1080 through 1090, all terms shall have the meaning given to them in 40 CFR 265.1081, which is adopted by reference; RCRA; and Rules R315-260 through 266.

R315-264-1082. Standards: General.

(a) Section R315-264-1082 applies to the management of hazardous waste in tanks, surface impoundments, and containers subject to Sections R315-264-1080 through 1090.

(b) The owner or operator shall control air pollutant emissions from each hazardous waste management unit in accordance with standards specified in Sections R315-264-1084 through 1087, as applicable to the hazardous waste management unit, except as provided for in Subsection R315-264-1082(c).

(c) A tank, surface impoundment, or container is exempt from standards specified in Sections R315-264-1084 through 1087, as applicable, provided that the waste management unit is one of the following:

(1) A tank, surface impoundment, or container for which all hazardous waste entering the unit has an average VO concentration at the point of waste origination of less than 500 parts per million by weight (ppmw). The average VO concentration shall be determined using the procedures specified in Subsection R315-264-1083(a). The owner or operator shall review and update, as necessary, this determination at least once every 12 months following the date of the initial determination for the hazardous waste streams entering the unit.

(2) A tank, surface impoundment, or container for which the organic content of all the hazardous waste entering the waste management unit has been reduced by an organic destruction or removal process that achieves any one of the following conditions:

(i) A process that removes or destroys the organics contained in the hazardous waste to a level such that the average VO concentration of the hazardous waste at the point of waste treatment is less than the exit concentration limit (Ct) established for the process. The average VO concentration of the hazardous waste at the point of waste treatment and the exit concentration limit for the process shall be determined using the procedures specified in Subsection R315-264-1083(b).

(ii) A process that removes or destroys the organics contained in the hazardous waste to a level such that the organic reduction efficiency (R) for the process is equal to or greater than 95 percent, and the average VO concentration of the hazardous waste at the point of waste treatment is less than 100 ppmw. The organic reduction efficiency for the process and the average VO concentration of the hazardous waste at the point of waste treatment shall be determined using the procedures specified in Subsection R315-264-1083(b).

(iii) A process that removes or destroys the organics contained in the hazardous waste to a level such that the actual organic mass removal rate (MR) for the process is equal to or greater than the required organic mass removal rate (RMR) established for the process. The required organic mass removal rate and the actual organic mass removal rate for the process shall be determined using the procedures specified in Subsection R315-264-1083(b).

(iv) A biological process that destroys or degrades the organics contained in the hazardous waste, such that either of the following conditions is met:

(A) The organic reduction efficiency (R) for the process is equal to or greater than 95 percent, and the organic biodegradation efficiency (Rbio) for the process is equal to or greater than 95 percent. The organic reduction efficiency and the organic biodegradation efficiency for the process shall be determined using the procedures specified in Subsection R315-264-1083(b).

(B) The total actual organic mass biodegradation rate (MRbio) for all hazardous waste treated by the process is equal to or greater than the required organic mass removal rate (RMR). The required organic mass removal rate and the actual organic mass biodegradation rate for the process shall be determined using the procedures specified in Subsection R315-264-1083(b).

(v) A process that removes or destroys the organics contained in the hazardous waste and meets all of the following conditions:

(A) From the point of waste origination through the point where the hazardous waste enters the treatment process, the hazardous waste is managed continuously in waste management units which use air emission controls in accordance with the standards specified in Sections R315-264-1084 through 1087, as applicable to the waste management unit.

(B) From the point of waste origination through the point where the hazardous waste enters the treatment process, any transfer of the hazardous waste is accomplished through continuous hard-piping or other closed system transfer that does not allow exposure of the waste to the atmosphere. The Director considers a drain system that meets the requirements of Subsection R307-214-2(29), which incorporates 40 CFR part 63, subpart RR-National Emission Standards for Individual Drain Systems to be a closed system.

(C) The average VO concentration of the hazardous

waste at the point of waste treatment is less than the lowest average VO concentration at the point of waste origination determined for each of the individual waste streams entering the process or 500 ppmw, whichever value is lower. The average VO concentration of each individual waste stream at the point of waste origination shall be determined using the procedures specified in Subsection R315-264-1083(a). The average VO concentration of the hazardous waste at the point of waste treatment shall be determined using the procedures specified in Subsection R315-264-1083(b).

(vi) A process that removes or destroys the organics contained in the hazardous waste to a level such that the organic reduction efficiency (R) for the process is equal to or greater than 95 percent and the owner or operator certifies that the average VO concentration at the point of waste origination for each of the individual waste streams entering the process is less than 10,000 ppmw. The organic reduction efficiency for the process and the average VO concentration of the hazardous waste at the point of waste origination shall be determined using the procedures specified in Subsections R315-264-1083(b) and 1083(a), respectively.

(vii) A hazardous waste incinerator for which the owner or operator has either:

(A) Been issued a final permit under Rule R315-270 which implements the requirements of Sections R315-264-340 through 351; or

(B) Has designed and operates the incinerator in accordance with the interim status requirements of 40 CFR 265.340 through 352, which are adopted by reference.

(viii) A boiler or industrial furnace for which the owner or operator has either:

(A) Been issued a final permit under Rule R315-270 which implements the requirements of Sections R315-266-100 through 112, or

(B) Has designed and operates the boiler or industrial furnace in accordance with the interim status requirements of Sections R315-266-100 through 112.

(ix) For the purpose of determining the performance of an organic destruction or removal process in accordance with the conditions in each of Subsections R315-264-1082(c)(2)(i) through (c)(2)(vi), the owner or operator shall account for VO concentrations determined to be below the limit of detection of the analytical method by using the following VO concentration:

(A) If Method 25D in 40 CFR part 60, appendix A is used for the analysis, one-half the blank value determined in the method at section 4.4 of Method 25D in 40 CFR part 60, appendix A, or a value of 25 ppmw, whichever is less.

(B) If any other analytical method is used, one-half the sum of the limits of detection established for each organic constituent in the waste that has a Henry's law constant value at least 0.1 mole-fraction-in-the-gas-phase/mole-fraction-in-the-liquid-phase (0.1 Y/X), which can also be expressed as 1.8×10^{-6} atmospheres/gram-mole/m3, at 25 degrees Celsius.

(3) A tank or surface impoundment used for biological treatment of hazardous waste in accordance with the requirements of Subsection R315-264-1082(c)(2)(iv).

(4) A tank, surface impoundment, or container for which all hazardous waste placed in the unit either:

(i) Meets the numerical concentration limits for organic hazardous constituents, applicable to the hazardous waste, as specified in Section R315-268-40-Land Disposal Restrictions under Table "Treatment Standards for Hazardous Waste;" or

(ii) The organic hazardous constituents in the waste have been treated by the treatment technology established by the Board for the waste in Subsection R315-268-42(a), or have been removed or destroyed by an equivalent method of treatment approved by EPA pursuant to 40 CFR 268.42(b).

(5) A tank used for bulk feed of hazardous waste to a waste incinerator and all of the following conditions are met:

(i) The tank is located inside an enclosure vented to a control device that is designed and operated in accordance with all applicable requirements specified under Section R315-214-1, which incorporates 40 CFR part 61, subpart FF-National Emission Standards for Benzene Waste Operations for a facility at which the total annual benzene quantity from the facility waste is equal to or greater than 10 megagrams per year;

(ii) The enclosure and control device serving the tank were installed and began operation prior to November 25, 1996 and

(iii) The enclosure is designed and operated in accordance with the criteria for a permanent total enclosure as specified in "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" under 40 CFR 52.741, appendix B. The enclosure may have permanent or temporary openings to allow worker access; passage of material into or out of the enclosure by conveyor, vehicles, or other mechanical or electrical equipment; or to direct air flow into the enclosure. The owner or operator shall perform the verification procedure for the enclosure as specified in Section 5.0 to "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" annually.

(d) The Director may at any time perform or request that the owner or operator perform a waste determination for a hazardous waste managed in a tank, surface impoundment, or container exempted from using air emission controls under the provisions of Section R315-264-1082 as follows:

(1) The waste determination for average VO concentration of a hazardous waste at the point of waste origination shall be performed using direct measurement in accordance with the applicable requirements of Subsection R315-264-1083(a). The waste determination for a hazardous waste at the point of waste treatment shall be performed in accordance with the applicable requirements of Subsection R315-264-1083(b).

(2) In performing a waste determination pursuant to Subsection R315-264-1082(d)(1), the sample preparation and analysis shall be conducted as follows:

(i) In accordance with the method used by the owner or operator to perform the waste analysis, except in the case specified in Subsection R315-264-1082(d)(2)(ii).

(ii) If the Director determines that the method used by the owner or operator was not appropriate for the hazardous waste managed in the tank, surface impoundment, or container, then the Director may choose an appropriate method.

(3) In a case when the owner or operator is requested to perform the waste determination, the Director may elect to have an authorized representative observe the collection of the hazardous waste samples used for the analysis.

(4) In a case when the results of the waste determination performed or requested by the Director do not agree with the results of a waste determination performed by the owner or operator using knowledge of the waste, then the results of the waste determination performed in accordance with the requirements of Subsection R315-264-1082(d)(1) shall be used to establish compliance with the requirements of Sections R315-264-1080 through 1090.

(5) In a case when the owner or operator has used an averaging period greater than 1 hour for determining the average VO concentration of a hazardous waste at the point of waste origination, the Director may elect to establish compliance with Sections R315-264-1080 through 1090 by performing or requesting that the owner or operator perform a waste determination using direct measurement based on waste samples collected within a 1-hour period as follows:

(i) The average VO concentration of the hazardous

waste at the point of waste origination shall be determined by direct measurement in accordance with the requirements of Subsection R315-264-1083(a).

(ii) Results of the waste determination performed or requested by the Director showing that the average VO concentration of the hazardous waste at the point of waste origination is equal to or greater than 500 ppmw shall constitute noncompliance with Sections R315-264-1080 through 1090 except in a case as provided for in Subsection R315-264-1082(d)(5)(iii).

(iii) For the case when the average VO concentration of the hazardous waste at the point of waste origination previously has been determined by the owner or operator using an averaging period greater than 1 hour to be less than 500 ppmw but because of normal operating process variations the VO concentration of the hazardous waste determined by direct measurement for any given 1-hour period may be equal to or greater than 500 ppmw, information that was used by the owner or operator to determine the average VO concentration of the hazardous waste, e.g., test results, measurements, calculations, and other documentation, and recorded in the facility records in accordance with the requirements of Subsections R315-264-1083(a) and Section R315-264-1089 shall be considered by the Director together with the results of the waste determination performed or requested by the Director in establishing compliance with Sections R315-264-1080 through 1090.

R315-264-1083. Waste Determination Procedures.

(a) Waste determination procedure to determine average volatile organic (VO) concentration of a hazardous waste at the point of waste origination.

(1) An owner or operator shall determine the average VO concentration at the point of waste origination for each hazardous waste placed in a waste management unit exempted under the provisions of Subsection R315-264-1082(c)(1) from using air emission controls in accordance with standards specified in Sections R315-264-1084 through 1087, as applicable to the waste management unit.

(i) An initial determination of the average VO concentration of the waste stream shall be made before the first time any portion of the material in the hazardous waste stream is placed in a waste management unit exempted under the provisions of Subsection R315-264-1082(c)(1) from using air emission controls, and thereafter an initial determination of the average VO concentration of the waste stream shall be made for each averaging period that a hazardous waste is managed in the unit; and

(ii) Perform a new waste determination whenever changes to the source generating the waste stream are reasonably likely to cause the average VO concentration of the hazardous waste to increase to a level that is equal to or greater than the applicable VO concentration limits specified in Section R315-264-1082.

(2) For a waste determination that is required by Subsection R315-264-1083(a)(1), the average VO concentration of a hazardous waste at the point of waste origination shall be determined in accordance with the procedures specified in 40 CFR 265.1084(a)(2) through (a)(4), which are adopted by reference.

(b) Waste determination procedures for treated hazardous waste.

(1) An owner or operator shall perform the applicable waste determinations for each treated hazardous waste placed in waste management units exempted under the provisions of Subsections R315-264-1082(c)(2)(i) through (c)(2)(vi) from using air emission controls in accordance with standards specified in Sections R315-264-1084 through 1087, as applicable to the waste management unit.

(i) An initial determination of the average VO concentration of the waste stream shall be made before the first time any portion of the material in the treated waste stream is placed in the exempt waste management unit, and thereafter update the information used for the waste determination at least once every 12 months following the date of the initial waste determination; and

(ii) Perform a new waste determination whenever changes to the process generating or treating the waste stream are reasonably likely to cause the average VO concentration of the hazardous waste to increase to a level such that the applicable treatment conditions specified in Subsection R315-264-1082(c)(2) are not achieved.

(2) The waste determination for a treated hazardous waste shall be performed in accordance with the procedures specified in 40 CFR 265.1084(b)(2) through (b)(9), which are adopted by reference, as applicable to the treated hazardous waste.

(c) Procedure to determine the maximum organic vapor pressure of a hazardous waste in a tank.

(1) An owner or operator shall determine the maximum organic vapor pressure for each hazardous waste placed in a tank using Tank Level 1 controls in accordance with standards specified in Subsection R315-264-1084(c).

(2) The maximum organic vapor pressure of the hazardous waste may be determined in accordance with the procedures specified in 40 CFR 265.1084(c)(2) through (c)(4), which are adopted by reference.

(d) The procedure for determining no detectable organic emissions for the purpose of complying with Sections R315-264-1080 through 1090 shall be conducted in accordance with the procedures specified in 40 CFR 265.1084(d), which is adopted by reference.

R315-264-1084. Standards: Tanks.

(a) The provisions of Section R315-264-1084 apply to the control of air pollutant emissions from tanks for which Subsection R315-264-1082(b) references the use of Section R315-264-1084 for such air emission control.

(b) The owner or operator shall control air pollutant emissions from each tank subject to Section R315-264-1084 in accordance with the following requirements as applicable:

(1) For a tank that manages hazardous waste that meets all of the conditions specified in Subsections R315-264-1084(b)(1)(i) through (b)(1)(iii), the owner or operator shall control air pollutant emissions from the tank in accordance with the Tank Level 1 controls specified in Subsection R315-264-1084(c) or the Tank Level 2 controls specified in Subsection R315-264-1084(d).

(i) The hazardous waste in the tank has a maximum organic vapor pressure which is less than the maximum organic vapor pressure limit for the tank's design capacity category as follows:

(A) For a tank design capacity equal to or greater than 151 cubic meters, the maximum organic vapor pressure limit for the tank is 5.2 kPa.

(B) For a tank design capacity equal to or greater than 75 cubic meters but less than 151 cubic meters, the maximum organic vapor pressure limit for the tank is 27.6 kPa.

(C) For a tank design capacity less than 75 cubic meters, the maximum organic vapor pressure limit for the tank is 76.6 kPa.

(ii) The hazardous waste in the tank is not heated by the owner or operator to a temperature that is greater than the temperature at which the maximum organic vapor pressure of the hazardous waste is determined for the purpose of complying with Subsection R315-264-1084(b)(1)(i).

(iii) The hazardous waste in the tank is not treated by the owner or operator using a waste stabilization process, as

defined in 40 CFR 265.1081, which is adopted by reference.

(2) For a tank that manages hazardous waste that does not meet all of the conditions specified in Subsections R315-264-1084(b)(1)(i) through (b)(1)(iii), the owner or operator shall control air pollutant emissions from the tank by using Tank Level 2 controls in accordance with the requirements of Subsection R315-264-1084(d). Examples of tanks required to use Tank Level 2 controls include: A tank used for a waste stabilization process; and a tank for which the hazardous waste in the tank has a maximum organic vapor pressure that is equal to or greater than the maximum organic vapor pressure limit for the tank's design capacity category as specified in Subsection R315-264-1084(b)(1)(i).

(c) Owners and operators controlling air pollutant emissions from a tank using Tank Level 1 controls shall meet the requirements specified in Subsections R315-264-1084(c)(1) through (c)(4):

(1) The owner or operator shall determine the maximum organic vapor pressure for a hazardous waste to be managed in the tank using Tank Level 1 controls before the first time the hazardous waste is placed in the tank. The maximum organic vapor pressure shall be determined using the procedures specified in Subsection R315-264-1083(c). Thereafter, the owner or operator shall perform a new determination whenever changes to the hazardous waste managed in the tank could potentially cause the maximum organic vapor pressure to increase to a level that is equal to or greater than the maximum organic vapor pressure limit for the tank design capacity category specified in Subsection R315-264-1084(b)(1)(i), as applicable to the tank.

(2) The tank shall be equipped with a fixed roof designed to meet the following specifications:

(i) The fixed roof and its closure devices shall be designed to form a continuous barrier over the entire surface area of the hazardous waste in the tank. The fixed roof may be a separate cover installed on the tank, e.g., a removable cover mounted on an open-top tank, or may be an integral part of the tank structural design, e.g., a horizontal cylindrical tank equipped with a hatch.

(ii) The fixed roof shall be installed in a manner such that there are no visible cracks, holes, gaps, or other open spaces between roof section joints or between the interface of the roof edge and the tank wall.

(iii) Each opening in the fixed roof, and any manifold system associated with the fixed roof, shall be either:

(A) Equipped with a closure device designed to operate such that when the closure device is secured in the closed position there are no visible cracks, holes, gaps, or other open spaces in the closure device or between the perimeter of the opening and the closure device; or

(B) Connected by a closed-vent system that is vented to a control device. The control device shall remove or destroy organics in the vent stream, and shall be operating whenever hazardous waste is managed in the tank, except as provided for in Subsection R315-264-1084(c)(2)(iii)(B)(I) and (II).

(I) During periods when it is necessary to provide access to the tank for performing the activities of Subsection R315-264-1084(c)(2)(iii)(B)(II), venting of the vapor headspace underneath the fixed roof to the control device is not required, opening of closure devices is allowed, and removal of the fixed roof is allowed. Following completion of the activity, the owner or operator shall promptly secure the closure device in the closed position or reinstall the cover, as applicable, and resume operation of the control device.

(II) During periods of routine inspection, maintenance, or other activities needed for normal operations, and for removal of accumulated sludge or other residues from the bottom of the tank.

(iv) The fixed roof and its closure devices shall be made of suitable materials that will minimize exposure of the hazardous waste to the atmosphere, to the extent practical, and will maintain the integrity of the fixed roof and closure devices throughout their intended service life. Factors to be considered when selecting the materials for and designing the fixed roof and closure devices shall include: Organic vapor permeability, the effects of any contact with the hazardous waste or its vapors managed in the tank; the effects of outdoor exposure to wind, moisture, and sunlight; and the operating practices used for the tank on which the fixed roof is installed.

(3) Whenever a hazardous waste is in the tank, the fixed roof shall be installed with each closure device secured in the closed position except as follows:

(i) Opening of closure devices or removal of the fixed roof is allowed at the following times:

(A) To provide access to the tank for performing routine inspection, maintenance, or other activities needed for normal operations. Examples of such activities include those times when a worker needs to open a port to sample the liquid in the tank, or when a worker needs to open a hatch to maintain or repair equipment. Following completion of the activity, the owner or operator shall promptly secure the closure device in the closed position or reinstall the cover, as applicable, to the tank.

(B) To remove accumulated sludge or other residues from the bottom of tank.

(ii) Opening of a spring-loaded pressure-vacuum relief valve, conservation vent, or similar type of pressure relief device which vents to the atmosphere is allowed during normal operations for the purpose of maintaining the tank internal pressure in accordance with the tank design specifications. The device shall be designed to operate with no detectable organic emissions when the device is secured in the closed position. The settings at which the device opens shall be established such that the device remains in the closed position whenever the tank internal pressure is within the internal pressure operating range determined by the owner or operator based on the tank manufacturer recommendations, applicable regulations, fire protection and prevention codes, standard engineering codes and practices, or other requirements for the safe handling of flammable, ignitable, explosive, reactive, or hazardous materials. Examples of normal operating conditions that may require these devices to open are during those times when the tank internal pressure exceeds the internal pressure operating range for the tank as a result of loading operations or diurnal ambient temperature fluctuations.

(iii) Opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is allowed at any time conditions require doing so to avoid an unsafe condition.

(4) The owner or operator shall inspect the air emission control equipment in accordance with the following requirements.

(i) The fixed roof and its closure devices shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects include, but are not limited to, visible cracks, holes, or gaps in the roof sections or between the roof and the tank wall; broken, cracked, or otherwise damaged seals or gaskets on closure devices; and broken or missing hatches, access covers, caps, or other closure devices.

(ii) The owner or operator shall perform an initial inspection of the fixed roof and its closure devices on or before the date that the tank becomes subject to Section R315-264-1084. Thereafter, the owner or operator shall perform the inspections at least once every year except under the special conditions provided for in Subsection R315-264-1084(l).

(iii) In the event that a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1084(k).

(iv) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(b).

(d) Owners and operators controlling air pollutant emissions from a tank using Tank Level 2 controls shall use one of the following tanks:

(1) A fixed-roof tank equipped with an internal floating roof in accordance with the requirements specified in Subsection R315-264-1084(e);

(2) A tank equipped with an external floating roof in accordance with the requirements specified in Subsection R315-264-1084(f)

(3) A tank vented through a closed-vent system to a control device in accordance with the requirements specified in Subsection R315-264-1084(g);

(4) A pressure tank designed and operated in accordance with the requirements specified in Subsection R315-264-1084(h); or

(5) A tank located inside an enclosure that is vented through a closed-vent system to an enclosed combustion control device in accordance with the requirements specified in Subsection R315-264-1084(i).

(e) The owner or operator who controls air pollutant emissions from a tank using a fixed roof with an internal floating roof shall meet the requirements specified in Subsections R315-264-1084(e)(1) through (e)(3).

(1) The tank shall be equipped with a fixed roof and an internal floating roof in accordance with the following requirements:

(i) The internal floating roof shall be designed to float on the liquid surface except when the floating roof shall be supported by the leg supports.

(ii) The internal floating roof shall be equipped with a continuous seal between the wall of the tank and the floating roof edge that meets either of the following requirements:

(A) A single continuous seal that is either a liquid-mounted seal or a metallic shoe seal, as defined in 40 CFR 265.1081, which is adopted by reference; or

(B) Two continuous seals mounted one above the other. The lower seal may be a vapor-mounted seal.

(iii) The internal floating roof shall meet the following specifications:

(A) Each opening in a noncontact internal floating roof except for automatic bleeder vents, vacuum breaker vents, and the rim space vents is to provide a projection below the liquid surface.

(B) Each opening in the internal floating roof shall be equipped with a gasketed cover or a gasketed lid except for leg sleeves, automatic bleeder vents, rim space vents, column wells, ladder wells, sample wells, and stub drains.

(C) Each penetration of the internal floating roof for the purpose of sampling shall have a slit fabric cover that covers at least 90 percent of the opening.

(D) Each automatic bleeder vent and rim space vent shall be gasketed.

(E) Each penetration of the internal floating roof that allows for passage of a ladder shall have a gasketed sliding cover.

(F) Each penetration of the internal floating roof that allows for passage of a column supporting the fixed roof shall have a flexible fabric sleeve seal or a gasketed sliding cover.

(2) The owner or operator shall operate the tank in accordance with the following requirements:

(i) When the floating roof is resting on the leg supports, the process of filling, emptying, or refilling shall be continuous and shall be completed as soon as practical.

(ii) Automatic bleeder vents are to be set closed at all times when the roof is floating, except when the roof is being floated off or is being landed on the leg supports.

(iii) Prior to filling the tank, each cover, access hatch, gauge float well or lid on any opening in the internal floating roof shall be bolted or fastened closed, i.e., no visible gaps. Rim space vents are to be set to open only when the internal floating roof is not floating or when the pressure beneath the rim exceeds the manufacturer's recommended setting.

(3) The owner or operator shall inspect the internal floating roof in accordance with the procedures specified as follows:

(i) The floating roof and its closure devices shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects include, but are not limited to: The internal floating roof is not floating on the surface of the liquid inside the tank; liquid has accumulated on top of the internal floating roof; any portion of the roof seals have detached from the roof rim; holes, tears, or other openings are visible in the seal fabric; the gaskets no longer close off the hazardous waste surface from the atmosphere; or the slotted membrane has more than 10 percent open area.

(ii) The owner or operator shall inspect the internal floating roof components as follows except as provided in Subsection R315-264-1084(e)(3)(iii):

(A) Visually inspect the internal floating roof components through openings on the fixed-roof, e.g., manholes and roof hatches, at least once every 12 months after initial fill, and

(B) Visually inspect the internal floating roof, primary seal, secondary seal, if one is in service, gaskets, slotted membranes, and sleeve seals, if any, each time the tank is emptied and degassed and at least every 10 years.

(iii) As an alternative to performing the inspections specified in Subsection R315-264-1084(e)(3)(ii) for an internal floating roof equipped with two continuous seals mounted one above the other, the owner or operator may visually inspect the internal floating roof, primary and secondary seals, gaskets, slotted membranes, and sleeve seals, if any, each time the tank is emptied and degassed and at least every 5 years.

(iv) Prior to each inspection required by Subsections R315-264-1084(e)(3)(ii) or (e)(3)(iii), the owner or operator shall notify the Director in advance of each inspection to provide the Director with the opportunity to have an observer present during the inspection. The owner or operator shall notify the Director of the date and location of the inspection as follows:

(A) Prior to each visual inspection of an internal floating roof in a tank that has been emptied and degassed, written notification shall be prepared and sent by the owner or operator so that it is received by the Director at least 30 calendar days before refilling the tank except when an inspection is not planned as provided for in Subsection R315-264-1084(e)(3)(iv)(B).

(B) When a visual inspection is not planned and the owner or operator could not have known about the inspection 30 calendar days before refilling the tank, the owner or operator shall notify the Director as soon as possible, but no later than 7 calendar days before refilling of the tank. This notification may be made by telephone and immediately followed by a written explanation for why the inspection is unplanned. Alternatively, written notification, including the explanation for the unplanned inspection, may be sent so that it is received by the Director at least 7 calendar days before refilling the tank.

(v) In the event that a defect is detected, the owner or operator shall repair the defect in accordance with the

requirements of Subsection R315-264-1084(k).

(vi) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(b).

(4) Safety devices, as defined in 40 CFR 265.1081, which is adopted by reference, may be installed and operated as necessary on any tank complying with the requirements of Subsection R315-264-1084(e).

(f) The owner or operator who controls air pollutant emissions from a tank using an external floating roof shall meet the requirements specified in Subsections R315-264-1084(f)(1) through (f)(3).

(1) The owner or operator shall design the external floating roof in accordance with the following requirements:

(i) The external floating roof shall be designed to float on the liquid surface except when the floating roof shall be supported by the leg supports.

(ii) The floating roof shall be equipped with two continuous seals, one above the other, between the wall of the tank and the roof edge. The lower seal is referred to as the primary seal, and the upper seal is referred to as the secondary seal.

(A) The primary seal shall be a liquid-mounted seal or a metallic shoe seal, as defined in 40 CFR 265.1081, which is adopted by reference. The total area of the gaps between the tank wall and the primary seal shall not exceed 212 square centimeters per meter of tank diameter, and the width of any portion of these gaps shall not exceed 3.8 centimeters. If a metallic shoe seal is used for the primary seal, the metallic shoe seal shall be designed so that one end extends into the liquid in the tank and the other end extends a vertical distance of at least 61 centimeters above the liquid surface.

(B) The secondary seal shall be mounted above the primary seal and cover the annular space between the floating roof and the wall of the tank. The total area of the gaps between the tank wall and the secondary seal shall not exceed 21.2 square centimeters per meter of tank diameter, and the width of any portion of these gaps shall not exceed 1.3 centimeters.

(iii) The external floating roof shall meet the following specifications:

(A) Except for automatic bleeder vents, vacuum breaker vents, and rim space vents, each opening in a noncontact external floating roof shall provide a projection below the liquid surface.

(B) Except for automatic bleeder vents, rim space vents, roof drains, and leg sleeves, each opening in the roof shall be equipped with a gasketed cover, seal, or lid.

(C) Each access hatch and each gauge float well shall be equipped with a cover designed to be bolted or fastened when the cover is secured in the closed position.

(D) Each automatic bleeder vent and each rim space vent shall be equipped with a gasket.

(E) Each roof drain that empties into the liquid managed in the tank shall be equipped with a slotted membrane fabric cover that covers at least 90 percent of the area of the opening.

(F) Each unslotted and slotted guide pole well shall be equipped with a gasketed sliding cover or a flexible fabric sleeve seal.

(G) Each unslotted guide pole shall be equipped with a gasketed cap on the end of the pole.

(H) Each slotted guide pole shall be equipped with a gasketed float or other device which closes off the liquid surface from the atmosphere.

(I) Each gauge hatch and each sample well shall be equipped with a gasketed cover.

(2) The owner or operator shall operate the tank in accordance with the following requirements:

(i) When the floating roof is resting on the leg supports, the process of filling, emptying, or refilling shall be continuous and shall be completed as soon as practical.

(ii) Except for automatic bleeder vents, rim space vents, roof drains, and leg sleeves, each opening in the roof shall be secured and maintained in a closed position at all times except when the closure device shall be open for access.

(iii) Covers on each access hatch and each gauge float well shall be bolted or fastened when secured in the closed position.

(iv) Automatic bleeder vents shall be set closed at all times when the roof is floating, except when the roof is being floated off or is being landed on the leg supports.

(v) Rim space vents shall be set to open only at those times that the roof is being floated off the roof leg supports or when the pressure beneath the rim seal exceeds the manufacturer's recommended setting.

(vi) The cap on the end of each unslotted guide pole shall be secured in the closed position at all times except when measuring the level or collecting samples of the liquid in the tank.

(vii) The cover on each gauge hatch or sample well shall be secured in the closed position at all times except when the hatch or well shall be opened for access.

(viii) Both the primary seal and the secondary seal shall completely cover the annular space between the external floating roof and the wall of the tank in a continuous fashion except during inspections.

(3) The owner or operator shall inspect the external floating roof in accordance with the procedures specified as follows:

(i) The owner or operator shall measure the external floating roof seal gaps in accordance with the following requirements:

(A) The owner or operator shall perform measurements of gaps between the tank wall and the primary seal within 60 calendar days after initial operation of the tank following installation of the floating roof and, thereafter, at least once every 5 years.

(B) The owner or operator shall perform measurements of gaps between the tank wall and the secondary seal within 60 calendar days after initial operation of the tank following installation of the floating roof and, thereafter, at least once every year.

(C) If a tank ceases to hold hazardous waste for a period of 1 year or more, subsequent introduction of hazardous waste into the tank shall be considered an initial operation for the purposes of Subsections R315-264-1084(f)(3)(i)(A) and (f)(3)(i)(B).

(D) The owner or operator shall determine the total surface area of gaps in the primary seal and in the secondary seal individually using the following procedure:

(1) The seal gap measurements shall be performed at one or more floating roof levels when the roof is floating off the roof supports.

(2) Seal gaps, if any, shall be measured around the entire perimeter of the floating roof in each place where a 0.32-centimeter diameter uniform probe passes freely, without forcing or binding against the seal, between the seal and the wall of the tank and measure the circumferential distance of each such location.

(3) For a seal gap measured under Subsection R315-264-1084(f)(3), the gap surface area shall be determined by using probes of various widths to measure accurately the actual distance from the tank wall to the seal and multiplying each such width by its respective circumferential distance.

(4) The total gap area shall be calculated by adding the gap surface areas determined for each identified gap location for the primary seal and the secondary seal individually, and

then dividing the sum for each seal type by the nominal diameter of the tank. These total gap areas for the primary seal and secondary seal are then compared to the respective standards for the seal type as specified in Subsection R315-264-1084(f)(1)(ii).

(E) In the event that the seal gap measurements do not conform to the specifications in Subsection R315-264-1084(f)(1)(ii), the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1084(k).

(F) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(b).

(ii) The owner or operator shall visually inspect the external floating roof in accordance with the following requirements:

(A) The floating roof and its closure devices shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects include, but are not limited to: Holes, tears, or other openings in the rim seal or seal fabric of the floating roof; a rim seal detached from the floating roof; all or a portion of the floating roof deck being submerged below the surface of the liquid in the tank; broken, cracked, or otherwise damaged seals or gaskets on closure devices; and broken or missing hatches, access covers, caps, or other closure devices.

(B) The owner or operator shall perform an initial inspection of the external floating roof and its closure devices on or before the date that the tank becomes subject to Section R315-264-1084. Thereafter, the owner or operator shall perform the inspections at least once every year except for the special conditions provided for in Subsection R315-264-1084(l).

(C) In the event that a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1084(k).

(D) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(b).

(iii) Prior to each inspection required by Subsections R315-264-1084(f)(3)(i) or (f)(3)(ii), the owner or operator shall notify the Director in advance of each inspection to provide the Director with the opportunity to have an observer present during the inspection. The owner or operator shall notify the Director of the date and location of the inspection as follows:

(A) Prior to each inspection to measure external floating roof seal gaps as required under Subsection R315-264-1084(f)(3)(i), written notification shall be prepared and sent by the owner or operator so that it is received by the Director at least 30 calendar days before the date the measurements are scheduled to be performed.

(B) Prior to each visual inspection of an external floating roof in a tank that has been emptied and degassed, written notification shall be prepared and sent by the owner or operator so that it is received by the Director at least 30 calendar days before refilling the tank except when an inspection is not planned as provided for in Subsection R315-264-1084(f)(3)(iii)(C).

(C) When a visual inspection is not planned and the owner or operator could not have known about the inspection 30 calendar days before refilling the tank, the owner or operator shall notify the Director as soon as possible, but no later than 7 calendar days before refilling of the tank. This notification may be made by telephone and immediately followed by a written explanation for why the inspection is unplanned. Alternatively, written notification, including the explanation for the unplanned inspection, may be sent so that it is received by the Director at least 7 calendar days before refilling the tank.

(4) Safety devices, as defined in 40 CFR 265.1081, which is adopted by reference, may be installed and operated as necessary on any tank complying with the requirements of Subsection R315-264-1084(f).

(g) The owner or operator who controls air pollutant emissions from a tank by venting the tank to a control device shall meet the requirements specified in Subsections R315-264-1084(g)(1) through (g)(3).

(1) The tank shall be covered by a fixed roof and vented directly through a closed-vent system to a control device in accordance with the following requirements:

(i) The fixed roof and its closure devices shall be designed to form a continuous barrier over the entire surface area of the liquid in the tank.

(ii) Each opening in the fixed roof not vented to the control device shall be equipped with a closure device. If the pressure in the vapor headspace underneath the fixed roof is less than atmospheric pressure when the control device is operating, the closure devices shall be designed to operate such that when the closure device is secured in the closed position there are no visible cracks, holes, gaps, or other open spaces in the closure device or between the perimeter of the cover opening and the closure device. If the pressure in the vapor headspace underneath the fixed roof is equal to or greater than atmospheric pressure when the control device is operating, the closure device shall be designed to operate with no detectable organic emissions.

(iii) The fixed roof and its closure devices shall be made of suitable materials that will minimize exposure of the hazardous waste to the atmosphere, to the extent practical, and will maintain the integrity of the fixed roof and closure devices throughout their intended service life. Factors to be considered when selecting the materials for and designing the fixed roof and closure devices shall include: Organic vapor permeability, the effects of any contact with the liquid and its vapor managed in the tank; the effects of outdoor exposure to wind, moisture, and sunlight; and the operating practices used for the tank on which the fixed roof is installed.

(iv) The closed-vent system and control device shall be designed and operated in accordance with the requirements of Section R315-264-1087.

(2) Whenever a hazardous waste is in the tank, the fixed roof shall be installed with each closure device secured in the closed position and the vapor headspace underneath the fixed roof vented to the control device except as follows:

(i) Venting to the control device is not required, and opening of closure devices or removal of the fixed roof is allowed at the following times:

(A) To provide access to the tank for performing routine inspection, maintenance, or other activities needed for normal operations. Examples of such activities include those times when a worker needs to open a port to sample liquid in the tank, or when a worker needs to open a hatch to maintain or repair equipment. Following completion of the activity, the owner or operator shall promptly secure the closure device in the closed position or reinstall the cover, as applicable, to the tank.

(B) To remove accumulated sludge or other residues from the bottom of a tank.

(ii) Opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is allowed at any time conditions require doing so to avoid an unsafe condition.

(3) The owner or operator shall inspect and monitor the air emission control equipment in accordance with the following procedures:

(i) The fixed roof and its closure devices shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects

include, but are not limited to, visible cracks, holes, or gaps in the roof sections or between the roof and the tank wall; broken, cracked, or otherwise damaged seals or gaskets on closure devices; and broken or missing hatches, access covers, caps, or other closure devices.

(ii) The closed-vent system and control device shall be inspected and monitored by the owner or operator in accordance with the procedures specified in Section R315-264-1087.

(iii) The owner or operator shall perform an initial inspection of the air emission control equipment on or before the date that the tank becomes subject to Section R315-264-1084. Thereafter, the owner or operator shall perform the inspections at least once every year except for the special conditions provided for in Subsection R315-264-1084(l).

(iv) In the event that a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1084(k).

(v) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(b).

(h) The owner or operator who controls air pollutant emissions by using a pressure tank shall meet the following requirements.

(1) The tank shall be designed not to vent to the atmosphere as a result of compression of the vapor headspace in the tank during filling of the tank to its design capacity.

(2) All tank openings shall be equipped with closure devices designed to operate with no detectable organic emissions as determined using the procedure specified in Subsection R315-264-1083(d).

(3) Whenever a hazardous waste is in the tank, the tank shall be operated as a closed system that does not vent to the atmosphere except under either or the following conditions as specified in Subsections R315-264-1084(h)(3)(i) or (h)(3)(ii).

(i) At those times when opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is required to avoid an unsafe condition.

(ii) At those times when purging of inerts from the tank is required and the purge stream is routed to a closed-vent system and control device designed and operated in accordance with the requirements of Section R315-264-1087.

(i) The owner or operator who controls air pollutant emissions by using an enclosure vented through a closed-vent system to an enclosed combustion control device shall meet the requirements specified in Subsections R315-264-1084(i)(1) through (i)(4).

(1) The tank shall be located inside an enclosure. The enclosure shall be designed and operated in accordance with the criteria for a permanent total enclosure as specified in "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" under 40 CFR 52.741, appendix B. The enclosure may have permanent or temporary openings to allow worker access; passage of material into or out of the enclosure by conveyor, vehicles, or other mechanical means; entry of permanent mechanical or electrical equipment; or direct airflow into the enclosure. The owner or operator shall perform the verification procedure for the enclosure as specified in Section 5.0 to "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" initially when the enclosure is first installed and, thereafter, annually.

(2) The enclosure shall be vented through a closed-vent system to an enclosed combustion control device that is designed and operated in accordance with the standards for either a vapor incinerator, boiler, or process heater specified in Section R315-264-1087.

(3) Safety devices, as defined in 40 CFR 265.1081, which is adopted by reference, may be installed and operated as necessary on any enclosure, closed-vent system, or control device used to comply with the requirements of Subsections R315-264-1084(i)(1) and (i)(2).

(4) The owner or operator shall inspect and monitor the closed-vent system and control device as specified in Section R315-264-1087.

(j) The owner or operator shall transfer hazardous waste to a tank subject to Section R315-264-1084 in accordance with the following requirements:

(1) Transfer of hazardous waste, except as provided in Subsection R315-264-1084(j)(2), to the tank from another tank subject to Section R315-264-1084 or from a surface impoundment subject to Section R315-264-1085 shall be conducted using continuous hard-piping or another closed system that does not allow exposure of the hazardous waste to the atmosphere. For the purpose of complying with this provision, an individual drain system is considered to be a closed system when it meets the requirements of Subsection R307-214-2(29), which incorporates 40 CFR part 63, subpart RR-National Emission Standards for Individual Drain Systems.

(2) The requirements of Subsection R315-264-1084(j)(1) do not apply when transferring a hazardous waste to the tank under any of the following conditions:

(i) The hazardous waste meets the average VO concentration conditions specified in Subsection R315-264-1082(c)(1) at the point of waste origination.

(ii) The hazardous waste has been treated by an organic destruction or removal process to meet the requirements in Subsection R315-264-1082(c)(2).

(iii) The hazardous waste meets the requirements of Subsection R315-264-1082(c)(4).

(k) The owner or operator shall repair each defect detected during an inspection performed in accordance with the requirements of Subsections R315-264-1084(c)(4), (e)(3), (f)(3), or (g)(3) as follows:

(1) The owner or operator shall make first efforts at repair of the defect no later than 5 calendar days after detection, and repair shall be completed as soon as possible but no later than 45 calendar days after detection except as provided in Subsection R315-264-1084(k)(2).

(2) Repair of a defect may be delayed beyond 45 calendar days if the owner or operator determines that repair of the defect requires emptying or temporary removal from service of the tank and no alternative tank capacity is available at the site to accept the hazardous waste normally managed in the tank. In this case, the owner or operator shall repair the defect the next time the process or unit that is generating the hazardous waste managed in the tank stops operation. Repair of the defect shall be completed before the process or unit resumes operation.

(l) Following the initial inspection and monitoring of the cover as required by the applicable provisions of Sections R315-264-1080 through 1090, subsequent inspection and monitoring may be performed at intervals longer than 1 year under the following special conditions:

(1) In the case when inspecting or monitoring the cover would expose a worker to dangerous, hazardous, or other unsafe conditions, then the owner or operator may designate a cover as an "unsafe to inspect and monitor cover" and comply with all of the following requirements:

(i) Prepare a written explanation for the cover stating the reasons why the cover is unsafe to visually inspect or to monitor, if required.

(ii) Develop and implement a written plan and schedule to inspect and monitor the cover, using the procedures specified in the applicable section of Sections R315-264-1080 through 1090, as frequently as practicable during those times when a worker can safely access the cover.

(2) In the case when a tank is buried partially or entirely underground, an owner or operator is required to inspect and monitor, as required by the applicable provisions of Section R315-264-1084, only those portions of the tank cover and those connections to the tank, e.g., fill ports, access hatches, gauge wells, etc., that are located on or above the ground surface.

R315-264-1085. Standards: Surface Impoundments.

(a) The provisions of Section R315-264-1085 apply to the control of air pollutant emissions from surface impoundments for which Subsection R315-264-1082(b) references the use of Section R315-264-1085 for such air emission control.

(b) The owner or operator shall control air pollutant emissions from the surface impoundment by installing and operating either of the following:

(1) A floating membrane cover in accordance with the provisions specified in Subsection R315-264-1085(c); or

(2) A cover that is vented through a closed-vent system to a control device in accordance with the provisions specified in Subsection R315-264-1085(d).

(c) The owner or operator who controls air pollutant emissions from a surface impoundment using a floating membrane cover shall meet the requirements specified in Subsections R315-264-1085(c)(1) through (c)(3).

(1) The surface impoundment shall be equipped with a floating membrane cover designed to meet the following specifications:

(i) The floating membrane cover shall be designed to float on the liquid surface during normal operations and form a continuous barrier over the entire surface area of the liquid.

(ii) The cover shall be fabricated from a synthetic membrane material that is either:

(A) High density polyethylene (HDPE) with a thickness no less than 2.5 millimeters; or

(B) A material or a composite of different materials determined to have both organic permeability properties that are equivalent to those of the material listed in Subsection R315-264-1085(c)(1)(ii)(A) and chemical and physical properties that maintain the material integrity for the intended service life of the material.

(iii) The cover shall be installed in a manner such that there are no visible cracks, holes, gaps, or other open spaces between cover section seams or between the interface of the cover edge and its foundation mountings.

(iv) Except as provided for in Subsection R315-264-1085(c)(1)(v), each opening in the floating membrane cover shall be equipped with a closure device designed to operate such that when the closure device is secured in the closed position there are no visible cracks, holes, gaps, or other open spaces in the closure device or between the perimeter of the cover opening and the closure device.

(v) The floating membrane cover may be equipped with one or more emergency cover drains for removal of stormwater. Each emergency cover drain shall be equipped with a slotted membrane fabric cover that covers at least 90 percent of the area of the opening or a flexible fabric sleeve seal.

(vi) The closure devices shall be made of suitable materials that will minimize exposure of the hazardous waste to the atmosphere, to the extent practical, and will maintain the integrity of the closure devices throughout their intended service life. Factors to be considered when selecting the materials of construction and designing the cover and closure devices shall include: Organic vapor permeability; the effects of any contact with the liquid and its vapor managed in the surface impoundment; the effects of outdoor exposure to wind, moisture, and sunlight; and the operating practices used for the surface impoundment on which the floating membrane cover is installed.

(2) Whenever a hazardous waste is in the surface impoundment, the floating membrane cover shall float on the liquid and each closure device shall be secured in the closed position except as follows:

(i) Opening of closure devices or removal of the cover is allowed at the following times:

(A) To provide access to the surface impoundment for performing routine inspection, maintenance, or other activities needed for normal operations. Examples of such activities include those times when a worker needs to open a port to sample the liquid in the surface impoundment, or when a worker needs to open a hatch to maintain or repair equipment. Following completion of the activity, the owner or operator shall promptly replace the cover and secure the closure device in the closed position, as applicable.

(B) To remove accumulated sludge or other residues from the bottom of surface impoundment.

(ii) Opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is allowed at any time conditions require doing so to avoid an unsafe condition.

(3) The owner or operator shall inspect the floating membrane cover in accordance with the following procedures:

(i) The floating membrane cover and its closure devices shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects include, but are not limited to, visible cracks, holes, or gaps in the cover section seams or between the interface of the cover edge and its foundation mountings; broken, cracked, or otherwise damaged seals or gaskets on closure devices; and broken or missing hatches, access covers, caps, or other closure devices.

(ii) The owner or operator shall perform an initial inspection of the floating membrane cover and its closure devices on or before the date that the surface impoundment becomes subject to Section R315-264-1085. Thereafter, the owner or operator shall perform the inspections at least once every year except for the special conditions provided for in Subsection R315-264-1085(g).

(iii) In the event that a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1085(f).

(iv) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(c).

(d) The owner or operator who controls air pollutant emissions from a surface impoundment using a cover vented to a control device shall meet the requirements specified in Subsections R315-264-1085(d)(1) through (d)(3).

(1) The surface impoundment shall be covered by a cover and vented directly through a closed-vent system to a control device in accordance with the following requirements:

(i) The cover and its closure devices shall be designed to form a continuous barrier over the entire surface area of the liquid in the surface impoundment.

(ii) Each opening in the cover not vented to the control device shall be equipped with a closure device. If the pressure in the vapor headspace underneath the cover is less than atmospheric pressure when the control device is operating, the closure devices shall be designed to operate such that when the closure device is secured in the closed position there are no visible cracks, holes, gaps, or other open spaces in the closure device or between the perimeter of the cover opening and the closure device. If the pressure in the vapor headspace underneath the cover is equal to or greater than atmospheric pressure when the control device is operating, the closure device shall be designed to operate with

no detectable organic emissions using the procedure specified in Subsection R315-264-1083(d).

(iii) The cover and its closure devices shall be made of suitable materials that will minimize exposure of the hazardous waste to the atmosphere, to the extent practical, and will maintain the integrity of the cover and closure devices throughout their intended service life. Factors to be considered when selecting the materials of construction and designing the cover and closure devices shall include: Organic vapor permeability; the effects of any contact with the liquid or its vapors managed in the surface impoundment; the effects of outdoor exposure to wind, moisture, and sunlight; and the operating practices used for the surface impoundment on which the cover is installed.

(iv) The closed-vent system and control device shall be designed and operated in accordance with the requirements of Section R315-264-1087.

(2) Whenever a hazardous waste is in the surface impoundment, the cover shall be installed with each closure device secured in the closed position and the vapor headspace underneath the cover vented to the control device except as follows:

(i) Venting to the control device is not required, and opening of closure devices or removal of the cover is allowed at the following times:

(A) To provide access to the surface impoundment for performing routine inspection, maintenance, or other activities needed for normal operations. Examples of such activities include those times when a worker needs to open a port to sample liquid in the surface impoundment, or when a worker needs to open a hatch to maintain or repair equipment. Following completion of the activity, the owner or operator shall promptly secure the closure device in the closed position or reinstall the cover, as applicable, to the surface impoundment.

(B) To remove accumulated sludge or other residues from the bottom of the surface impoundment.

(ii) Opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is allowed at any time conditions require doing so to avoid an unsafe condition.

(3) The owner or operator shall inspect and monitor the air emission control equipment in accordance with the following procedures:

(i) The surface impoundment cover and its closure devices shall be visually inspected by the owner or operator to check for defects that could result in air pollutant emissions. Defects include, but are not limited to, visible cracks, holes, or gaps in the cover section seams or between the interface of the cover edge and its foundation mountings; broken, cracked, or otherwise damaged seals or gaskets on closure devices; and broken or missing hatches, access covers, caps, or other closure devices.

(ii) The closed-vent system and control device shall be inspected and monitored by the owner or operator in accordance with the procedures specified in Section R315-264-1087.

(iii) The owner or operator shall perform an initial inspection of the air emission control equipment on or before the date that the surface impoundment becomes subject to Section R315-264-1085. Thereafter, the owner or operator shall perform the inspections at least once every year except for the special conditions provided for in Subsection R315-264-1085(g).

(iv) In the event that a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1085(f).

(v) The owner or operator shall maintain a record of the inspection in accordance with the requirements specified in Subsection R315-264-1089(c).

(e) The owner or operator shall transfer hazardous waste to a surface impoundment subject to Section R315-264-1085 in accordance with the following requirements:

(1) Transfer of hazardous waste, except as provided in Subsection R315-264-1085(e)(2), to the surface impoundment from another surface impoundment subject to Section R315-264-1085 or from a tank subject to Section R315-264-1084 shall be conducted using continuous hard-piping or another closed system that does not allow exposure of the waste to the atmosphere. For the purpose of complying with this provision, an individual drain system is considered to be a closed system when it meets the requirements of Subsection R307-214-2(29), which incorporates 40 CFR part 63, subpart RR-National Emission Standards for Individual Drain Systems.

(2) The requirements of Subsection R315-264-1085(e)(1) do not apply when transferring a hazardous waste to the surface impoundment under either of the following conditions:

(i) The hazardous waste meets the average VO concentration conditions specified in Subsection R315-264-1082(c)(1) at the point of waste origination.

(ii) The hazardous waste has been treated by an organic destruction or removal process to meet the requirements in Subsection R315-264-1082(c)(2).

(iii) The hazardous waste meets the requirements of Subsection R315-264-1082(c)(4).

(f) The owner or operator shall repair each defect detected during an inspection performed in accordance with the requirements of Subsections R315-264-1085(c)(3) or (d)(3) as follows:

(1) The owner or operator shall make first efforts at repair of the defect no later than 5 calendar days after detection and repair shall be completed as soon as possible but no later than 45 calendar days after detection except as provided in Subsection R315-264-1085(f)(2).

(2) Repair of a defect may be delayed beyond 45 calendar days if the owner or operator determines that repair of the defect requires emptying or temporary removal from service of the surface impoundment and no alternative capacity is available at the site to accept the hazardous waste normally managed in the surface impoundment. In this case, the owner or operator shall repair the defect the next time the process or unit that is generating the hazardous waste managed in the surface impoundment stops operation. Repair of the defect shall be completed before the process or unit resumes operation.

(g) Following the initial inspection and monitoring of the cover as required by the applicable provisions of Sections R315-264-1080 through 1090, subsequent inspection and monitoring may be performed at intervals longer than 1 year in the case when inspecting or monitoring the cover would expose a worker to dangerous, hazardous, or other unsafe conditions. In this case, the owner or operator may designate the cover as an "unsafe to inspect and monitor cover" and comply with all of the following requirements:

(1) Prepare a written explanation for the cover stating the reasons why the cover is unsafe to visually inspect or to monitor, if required.

(2) Develop and implement a written plan and schedule to inspect and monitor the cover using the procedures specified in the applicable section of Sections R315-264-1080 through 1090 as frequently as practicable during those times when a worker can safely access the cover.

R315-264-1086. Standards: Containers.

(a) The provisions of Section R315-264-1086 apply to the control of air pollutant emissions from containers for which Subsection R315-264-1082(b) references the use of

Section R315-264-1086 for such air emission control.

(b) General requirements.

(1) The owner or operator shall control air pollutant emissions from each container subject to Section R315-264-1086 in accordance with the following requirements, as applicable to the container, except when the special provisions for waste stabilization processes specified in Subsection R315-264-1086(b)(2) apply to the container.

(i) For a container having a design capacity greater than 0.1 cubic meters and less than or equal to 0.46 cubic meters, the owner or operator shall control air pollutant emissions from the container in accordance with the Container Level 1 standards specified in Subsection R315-264-1086(c).

(ii) For a container having a design capacity greater than 0.46 cubic meters that is not in light material service, the owner or operator shall control air pollutant emissions from the container in accordance with the Container Level 1 standards specified in Subsection R315-264-1086(c).

(iii) For a container having a design capacity greater than 0.46 cubic meters that is in light material service, the owner or operator shall control air pollutant emissions from the container in accordance with the Container Level 2 standards specified in Subsection R315-264-1086(d).

(2) When a container having a design capacity greater than 0.1 cubic meters is used for treatment of a hazardous waste by a waste stabilization process, the owner or operator shall control air pollutant emissions from the container in accordance with the Container Level 3 standards specified in Subsection R315-264-1086(e) at those times during the waste stabilization process when the hazardous waste in the container is exposed to the atmosphere.

(c) Container Level 1 standards.

(1) A container using Container Level 1 controls is one of the following:

(i) A container that meets the applicable U.S. Department of Transportation (DOT) regulations on packaging hazardous materials for transportation as specified in Subsection R315-264-1086(f).

(ii) A container equipped with a cover and closure devices that form a continuous barrier over the container openings such that when the cover and closure devices are secured in the closed position there are no visible holes, gaps, or other open spaces into the interior of the container. The cover may be a separate cover installed on the container, e.g., a lid on a drum or a suitably secured tarp on a roll-off box, or may be an integral part of the container structural design, e.g., a "portable tank" or bulk cargo container equipped with a screw-type cap.

(iii) An open-top container in which an organic-vapor suppressing barrier is placed on or over the hazardous waste in the container such that no hazardous waste is exposed to the atmosphere. One example of such a barrier is application of a suitable organic-vapor suppressing foam.

(2) A container used to meet the requirements of Subsections R315-264-1086(c)(1)(ii) or (c)(1)(iii) shall be equipped with covers and closure devices, as applicable to the container, that are composed of suitable materials to minimize exposure of the hazardous waste to the atmosphere and to maintain the equipment integrity, for as long as the container is in service. Factors to be considered in selecting the materials of construction and designing the cover and closure devices shall include: Organic vapor permeability; the effects of contact with the hazardous waste or its vapor managed in the container; the effects of outdoor exposure of the closure device or cover material to wind, moisture, and sunlight; and the operating practices for which the container is intended to be used.

(3) Whenever a hazardous waste is in a container using Container Level 1 controls, the owner or operator shall install all covers and closure devices for the container, as applicable to the container, and secure and maintain each closure device in the closed position except as follows:

(i) Opening of a closure device or cover is allowed for the purpose of adding hazardous waste or other material to the container as follows:

(A) In the case when the container is filled to the intended final level in one continuous operation, the owner or operator shall promptly secure the closure devices in the closed position and install the covers, as applicable to the container, upon conclusion of the filling operation.

(B) In the case when discrete quantities or batches of material intermittently are added to the container over a period of time, the owner or operator shall promptly secure the closure devices in the closed position and install covers, as applicable to the container, upon either the container being filled to the intended final level; the completion of a batch loading after which no additional material will be added to the container within 15 minutes; the person performing the loading operation leaving the immediate vicinity of the container; or the shutdown of the process generating the material being added to the container, whichever condition occurs first.

(ii) Opening of a closure device or cover is allowed for the purpose of removing hazardous waste from the container as follows:

(A) For the purpose of meeting the requirements of Section R315-264-1086, an empty container as defined in Subsection R315-261-7(b) may be open to the atmosphere at any time, i.e., covers and closure devices are not required to be secured in the closed position on an empty container.

(B) In the case when discrete quantities or batches of material are removed from the container but the container does not meet the conditions to be an empty container as defined in Subsection R315-261-7(b), the owner or operator shall promptly secure the closure devices in the closed position and install covers, as applicable to the container, upon the completion of a batch removal after which no additional material will be removed from the container within 15 minutes or the person performing the unloading operation leaves the immediate vicinity of the container, whichever condition occurs first.

(iii) Opening of a closure device or cover is allowed when access inside the container is needed to perform routine activities other than transfer of hazardous waste. Examples of such activities include those times when a worker needs to open a port to measure the depth of or sample the material in the container, or when a worker needs to open a manhole hatch to access equipment inside the container. Following completion of the activity, the owner or operator shall promptly secure the closure device in the closed position or reinstall the cover, as applicable to the container.

(iv) Opening of a spring-loaded pressure-vacuum relief valve, conservation vent, or similar type of pressure relief device which vents to the atmosphere is allowed during normal operations for the purpose of maintaining the internal pressure of the container in accordance with the container design specifications. The device shall be designed to operate with no detectable organic emissions when the device is secured in the closed position. The settings at which the device opens shall be established such that the device remains in the closed position whenever the internal pressure of the container is within the internal pressure operating range determined by the owner or operator based on container manufacturer recommendations, applicable regulations, fire protection and prevention codes, standard engineering codes and practices, or other requirements for the safe handling of flammable, ignitable, explosive, reactive, or hazardous materials. Examples of normal operating conditions that may

require these devices to open are during those times when the internal pressure of the container exceeds the internal pressure operating range for the container as a result of loading operations or diurnal ambient temperature fluctuations.

(v) Opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is allowed at any time conditions require doing so to avoid an unsafe condition.

(4) The owner or operator of containers using Container Level 1 controls shall inspect the containers and their covers and closure devices as follows:

(i) In the case when a hazardous waste already is in the container at the time the owner or operator first accepts possession of the container at the facility and the container is not emptied within 24 hours after the container is accepted at the facility, i.e., does not meet the conditions for an empty container as specified in Subsection R315-261-7(b), the owner or operator shall visually inspect the container and its cover and closure devices to check for visible cracks, holes, gaps, or other open spaces into the interior of the container when the cover and closure devices are secured in the closed position. The container visual inspection shall be conducted on or before the date that the container is accepted at the facility, i.e., the date the container becomes subject to container standards of Sections R315-264-1080 through 1090. For purposes of this requirement, the date of acceptance is the date of signature that the facility owner or operator enters on Item 20 of the Uniform Hazardous Waste Manifest in the appendix to Rule R315-262 (EPA Forms 8700-22 and 8700-22A), as required under Section R315-264-71. If a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1086(c)(4)(iii).

(ii) In the case when a container used for managing hazardous waste remains at the facility for a period of 1 year or more, the owner or operator shall visually inspect the container and its cover and closure devices initially and thereafter, at least once every 12 months, to check for visible cracks, holes, gaps, or other open spaces into the interior of the container when the cover and closure devices are secured in the closed position. If a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1086(c)(4)(iii).

(iii) When a defect is detected for the container, cover, or closure devices, the owner or operator shall make first efforts at repair of the defect no later than 24 hours after detection and repair shall be completed as soon as possible but no later than 5 calendar days after detection. If repair of a defect cannot be completed within 5 calendar days, then the hazardous waste shall be removed from the container and the container shall not be used to manage hazardous waste until the defect is repaired.

(5) The owner or operator shall maintain at the facility a copy of the procedure used to determine that containers with capacity of 0.46 cubic meters or greater, which do not meet applicable DOT regulations as specified in Subsection R315-264-1086(f), are not managing hazardous waste in light material service.

(d) Container Level 2 standards.

(1) A container using Container Level 2 controls is one of the following:

(i) A container that meets the applicable U.S. Department of Transportation (DOT) regulations on packaging hazardous materials for transportation as specified in Subsection R315-264-1086(f).

(ii) A container that operates with no detectable organic emissions as defined in 40 CFR 265.1081, which is adopted by reference, and determined in accordance with the procedure specified in Subsection R315-264-1086(g).

(iii) A container that has been demonstrated within the preceding 12 months to be vapor-tight by using 40 CFR part 60, appendix A, Method 27 in accordance with the procedure specified in Subsection R315-264-1086(h).

(2) Transfer of hazardous waste in or out of a container using Container Level 2 controls shall be conducted in such a manner as to minimize exposure of the hazardous waste to the atmosphere, to the extent practical, considering the physical properties of the hazardous waste and good engineering and safety practices for handling flammable, ignitable, explosive, reactive, or other hazardous materials. Examples of container loading procedures that the Director considers to meet the requirements of Subsection R315-264-1086(d) include using any one of the following: A submerged-fill pipe or other submerged-fill method to load liquids into the container; a vapor-balancing system or a vapor-recovery system to collect and control the vapors displaced from the container during filling operations; or a fitted opening in the top of a container through which the hazardous waste is filled and subsequently purging the transfer line before removing it from the container opening.

(3) Whenever a hazardous waste is in a container using Container Level 2 controls, the owner or operator shall install all covers and closure devices for the container, and secure and maintain each closure device in the closed position except as follows:

(i) Opening of a closure device or cover is allowed for the purpose of adding hazardous waste or other material to the container as follows:

(A) In the case when the container is filled to the intended final level in one continuous operation, the owner or operator shall promptly secure the closure devices in the closed position and install the covers, as applicable to the container, upon conclusion of the filling operation.

(B) In the case when discrete quantities or batches of material intermittently are added to the container over a period of time, the owner or operator shall promptly secure the closure devices in the closed position and install covers, as applicable to the container, upon either the container being filled to the intended final level; the completion of a batch loading after which no additional material will be added to the container within 15 minutes; the person performing the loading operation leaving the immediate vicinity of the container; or the shutdown of the process generating the material being added to the container, whichever condition occurs first.

(ii) Opening of a closure device or cover is allowed for the purpose of removing hazardous waste from the container as follows:

(A) For the purpose of meeting the requirements of Section R315-264-1086, an empty container as defined in Subsection R315-261-7(b) may be open to the atmosphere at any time, i.e., covers and closure devices are not required to be secured in the closed position on an empty container.

(B) In the case when discrete quantities or batches of material are removed from the container but the container does not meet the conditions to be an empty container as defined in Subsection R315-261-7(b), the owner or operator shall promptly secure the closure devices in the closed position and install covers, as applicable to the container, upon the completion of a batch removal after which no additional material will be removed from the container within 15 minutes or the person performing the unloading operation leaves the immediate vicinity of the container, whichever condition occurs first.

(iii) Opening of a closure device or cover is allowed when access inside the container is needed to perform routine activities other than transfer of hazardous waste. Examples of such activities include those times when a worker needs to open a port to measure the depth of or sample the material in

the container, or when a worker needs to open a manhole hatch to access equipment inside the container. Following completion of the activity, the owner or operator shall promptly secure the closure device in the closed position or reinstall the cover, as applicable to the container.

(iv) Opening of a spring-loaded, pressure-vacuum relief valve, conservation vent, or similar type of pressure relief device which vents to the atmosphere is allowed during normal operations for the purpose of maintaining the internal pressure of the container in accordance with the container design specifications. The device shall be designed to operate with no detectable organic emission when the device is secured in the closed position. The settings at which the device opens shall be established such that the device remains in the closed position whenever the internal pressure of the container is within the internal pressure operating range determined by the owner or operator based on container manufacturer recommendations, applicable regulations, fire protection and prevention codes, standard engineering codes and practices, or other requirements for the safe handling of flammable, ignitable, explosive, reactive, or hazardous materials. Examples of normal operating conditions that may require these devices to open are during those times when the internal pressure of the container exceeds the internal pressure operating range for the container as a result of loading operations or diurnal ambient temperature fluctuations.

(v) Opening of a safety device, as defined in 40 CFR 265.1081, which is adopted by reference, is allowed at any time conditions require doing so to avoid an unsafe condition.

(4) The owner or operator of containers using Container Level 2 controls shall inspect the containers and their covers and closure devices as follows:

(i) In the case when a hazardous waste already is in the container at the time the owner or operator first accepts possession of the container at the facility and the container is not emptied within 24 hours after the container is accepted at the facility, i.e., does not meet the conditions for an empty container as specified in Subsection R35- 261-7(b), the owner or operator shall visually inspect the container and its cover and closure devices to check for visible cracks, holes, gaps, or other open spaces into the interior of the container when the cover and closure devices are secured in the closed position. The container visual inspection shall be conducted on or before the date that the container is accepted at the facility, i.e., the date the container becomes subject to the container standards of Sections R315-264-1080 through. For purposes of this requirement, the date of acceptance is the date of signature that the facility owner or operator enters on Item 20 of the Uniform Hazardous Waste Manifest in the appendix to Rule R315-262 (EPA Forms 8700-22 and 8700-22A), as required under Section R315-264-71. If a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1086(d)(4)(iii).

(ii) In the case when a container used for managing hazardous waste remains at the facility for a period of 1 year or more, the owner or operator shall visually inspect the container and its cover and closure devices initially and thereafter, at least once every 12 months, to check for visible cracks, holes, gaps, or other open spaces into the interior of the container when the cover and closure devices are secured in the closed position. If a defect is detected, the owner or operator shall repair the defect in accordance with the requirements of Subsection R315-264-1086(d)(4)(iii).

(iii) When a defect is detected for the container, cover, or closure devices, the owner or operator shall make first efforts at repair of the defect no later than 24 hours after detection, and repair shall be completed as soon as possible but no later than 5 calendar days after detection. If repair of a defect cannot be completed within 5 calendar days, then the hazardous waste shall be removed from the container and the container shall not be used to manage hazardous waste until the defect is repaired.

(e) Container Level 3 standards.

(1) A container using Container Level 3 controls is one of the following:

(i) A container that is vented directly through a closed-vent system to a control device in accordance with the requirements of Subsection R315-264-1086(e)(2)(ii).

(ii) A container that is vented inside an enclosure which is exhausted through a closed-vent system to a control device in accordance with the requirements of Subsections R315-264-1086(e)(2)(i) and (e)(2)(ii).

(2) The owner or operator shall meet the following requirements, as applicable to the type of air emission control equipment selected by the owner or operator:

(i) The container enclosure shall be designed and operated in accordance with the criteria for a permanent total enclosure as specified in "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" under 40 CFR 52.741, appendix B. The enclosure may have permanent or temporary openings to allow worker access; passage of containers through the enclosure by conveyor or other mechanical means; entry of permanent mechanical or electrical equipment; or direct airflow into the enclosure. The owner or operator shall perform the verification procedure for the enclosure as specified in Section 5.0 to "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" initially when the enclosure is first installed and, thereafter, annually.

(ii) The closed-vent system and control device shall be designed and operated in accordance with the requirements of Section R315-264-1087.

(3) Safety devices, as defined in 40 CFR 265.1081, which is adopted by reference, may be installed and operated as necessary on any container, enclosure, closed-vent system, or control device used to comply with the requirements of Subsection R315-264-1086(e)(1).

(4) Owners and operators using Container Level 3 controls in accordance with the provisions of Sections R315-264-1086 through 1090 shall inspect and monitor the closed-vent systems and control devices as specified in Subsection R315-264-1087.

(5) Owners and operators that use Container Level 3 controls in accordance with the provisions of Sections R315-264-1086 through 1090 shall prepare and maintain the records specified in Subsection R315-264-1089(d).

(6) Transfer of hazardous waste in or out of a container using Container Level 3 controls shall be conducted in such a manner as to minimize exposure of the hazardous waste to the atmosphere, to the extent practical, considering the physical properties of the hazardous waste and good engineering and safety practices for handling flammable, ignitable, explosive, reactive, or other hazardous materials. Examples of container loading procedures that the Director considers to meet the requirements of Subsection R315-264-1086(e) include using any one of the following: A submerged-fill pipe or other submerged-fill method to load liquids into the container; a vapor-balancing system or a vapor-recovery system to collect and control the vapors displaced from the container during filling operations; or a fitted opening in the top of a container through which the hazardous waste is filled and subsequently purging the transfer line before removing it from the container opening.

(f) For the purpose of compliance with Subsection R315-264-1086(c)(1)(i) or (d)(1)(i), containers shall be used that meet the applicable U.S. Department of Transportation (DOT) regulations on packaging hazardous materials for

transportation as follows:

(1) The container meets the applicable requirements specified in 49 CFR part 178-Specifications for Packaging or 49 CFR part 179-Specifications for Tank Cars.

(2) Hazardous waste is managed in the container in accordance with the applicable requirements specified in 49 CFR part 107, subpart B-Exemptions; 49 CFR part 172-Hazardous Materials Table, Special Provisions, Hazardous Materials Communications, Emergency Response Information, and Training Requirements; 49 CFR part 173-Shippers-General Requirements for Shipments and Packages; and 49 CFR part 180-Continuing Qualification and Maintenance of Packagings.

(3) For the purpose of complying with Sections R315-264-1086 through 1090, no exceptions to the 49 CFR part 178 or part 179 regulations are allowed except as provided for in Subsection R315-264-1086(f)(4).

(4) For a lab pack that is managed in accordance with the requirements of 49 CFR part 178 for the purpose of complying with Sections R315-264-1086 through 1090, an owner or operator may comply with the exceptions for combination packagings specified in 49 CFR 173.12(b).

(g) To determine compliance with the no detectable organic emissions requirement of Subsection R315-264-1086(d)(1)(ii), the procedure specified in Subsection R315-264-1083(d) shall be used.

(1) Each potential leak interface, i.e., a location where organic vapor leakage could occur, on the container, its cover, and associated closure devices, as applicable to the container, shall be checked. Potential leak interfaces that are associated with containers include, but are not limited to: The interface of the cover rim and the container wall; the periphery of any opening on the container or container cover and its associated closure device; and the sealing seat interface on a spring-loaded pressure-relief valve.

(2) The test shall be performed when the container is filled with a material having a volatile organic concentration representative of the range of volatile organic concentrations for the hazardous wastes expected to be managed in this type of container. During the test, the container cover and closure devices shall be secured in the closed position.

(h) Procedure for determining a container to be vapor-tight using Method 27 of 40 CFR part 60, appendix A for the purpose of complying with Subsection R315-264-1086(d)(1)(iii).

(1) The test shall be performed in accordance with Method 27 of 40 CFR part 60, appendix A of this chapter.

(2) A pressure measurement device shall be used that has a precision of +/- 2.5 mm water and that is capable of measuring above the pressure at which the container is to be tested for vapor tightness.

(3) If the test results determined by Method 27 indicate that the container sustains a pressure change less than or equal to 750 Pascals within 5 minutes after it is pressurized to a minimum of 4,500 Pascals, then the container is determined to be vapor-tight.

R315-264-1087. Standards: Closed-Vent Systems and Control Devices.

(a) Section R315-264-1087 applies to each closed-vent system and control device installed and operated by the owner or operator to control air emissions in accordance with standards of Sections R315-264-1080 through 1090.

(b) The closed-vent system shall meet the following requirements:

(1) The closed-vent system shall route the gases, vapors, and fumes emitted from the hazardous waste in the waste management unit to a control device that meets the requirements specified in Subsection R315-264-1087(c).

(2) The closed-vent system shall be designed and operated in accordance with the requirements specified in Subsection R315-264-1033(k).

(3) In the case when the closed-vent system includes bypass devices that could be used to divert the gas or vapor stream to the atmosphere before entering the control device, each bypass device shall be equipped with either a flow indicator as specified in Subsection R315-264-1087(b)(3)(i) or a seal or locking device as specified in Subsection R315-264-1087(b)(3)(ii). For the purpose of complying with Subsection R315-264-1087(b), low leg drains, high point bleeds, analyzer vents, open-ended valves or lines, spring loaded pressure relief valves, and other fittings used for safety purposes are not considered to be bypass devices.

(i) If a flow indicator is used to comply with Subsection R315-264-1087(b)(3), the indicator shall be installed at the inlet to the bypass line used to divert gases and vapors from the closed-vent system to the atmosphere at a point upstream of the control device inlet. For Subsection R315-264-1087(b), a flow indicator means a device which indicates the presence of either gas or vapor flow in the bypass line.

(ii) If a seal or locking device is used to comply with Subsection R315-264-1087(b)(3), the device shall be placed on the mechanism by which the bypass device position is controlled, e.g., valve handle, damper lever, when the bypass device is in the closed position such that the bypass device cannot be opened without breaking the seal or removing the lock. Examples of such devices include, but are not limited to, a car-seal or a lock-and-key configuration valve. The owner or operator shall visually inspect the seal or closure mechanism at least once every month to verify that the bypass mechanism is maintained in the closed position.

(4) The closed-vent system shall be inspected and monitored by the owner or operator in accordance with the procedure specified in Subsection R315-264-1033(l).

(c) The control device shall meet the following requirements:

(1) The control device shall be one of the following devices:

(i) A control device designed and operated to reduce the total organic content of the inlet vapor stream vented to the control device by at least 95 percent by weight;

(ii) An enclosed combustion device designed and operated in accordance with the requirements of Subsection R315-264-1033(c); or

(iii) A flare designed and operated in accordance with the requirements of Subsection R315-264-1033(d).

(2) The owner or operator who elects to use a closed-vent system and control device to comply with the requirements of Section R315-264-1087 shall comply with the requirements specified in Subsections R315-264-1087(c)(2)(i) through (c)(2)(vi).

(i) Periods of planned routine maintenance of the control device, during which the control device does not meet the specifications of Subsections R315-264-1087(c)(1)(i), (c)(1)(ii), or (c)(1)(iii), as applicable, shall not exceed 240 hours per year.

(ii) The specifications and requirements in Subsections R315-264-1087(c)(1)(i), (c)(1)(ii), and (c)(1)(iii) for control devices do not apply during periods of planned routine maintenance.

(iii) The specifications and requirements in Subsections R315-264-1087(c)(1)(i), (c)(1)(ii), and (c)(1)(iii) for control devices do not apply during a control device system malfunction.

(iv) The owner or operator shall demonstrate compliance with the requirements of Subsection R315-264-1087(c)(2)(i), i.e., planned routine maintenance of a control device, during which the control device does not meet the

specifications of Subsections R315-264-1087(c)(1)(i), (c)(1)(ii), or (c)(1)(iii), as applicable, shall not exceed 240 hours per year, by recording the information specified in Subsection R315-264-1089(e)(1)(v).

(v) The owner or operator shall correct control device system malfunctions as soon as practicable after their occurrence in order to minimize excess emissions of air pollutants.

(vi) The owner or operator shall operate the closed-vent system such that gases, vapors, or fumes are not actively vented to the control device during periods of planned maintenance or control device system malfunction, i.e., periods when the control device is not operating or not operating normally, except in cases when it is necessary to vent the gases, vapors, and/or fumes to avoid an unsafe condition or to implement malfunction corrective actions or planned maintenance actions.

(3) The owner or operator using a carbon adsorption system to comply with Subsection R315-264-1087(c)(1) shall operate and maintain the control device in accordance with the following requirements:

(i) Following the initial startup of the control device, all activated carbon in the control device shall be replaced with fresh carbon on a regular basis in accordance with the requirements of Subsections R315-264-1033(g) or 1033(h).

(ii) All carbon that is a hazardous waste and that is removed from the control device shall be managed in accordance with the requirements of Subsection R315-264-1033(n), regardless of the average volatile organic concentration of the carbon.

(4) An owner or operator using a control device other than a thermal vapor incinerator, flare, boiler, process heater, condenser, or carbon adsorption system to comply with Subsection R315-264-1087(c)(1) shall operate and maintain the control device in accordance with the requirements of Subsection R315-264-1033(j).

(5) The owner or operator shall demonstrate that a control device achieves the performance requirements of Subsection R315-264-1087(c)(1) as follows:

(i) An owner or operator shall demonstrate using either a performance test as specified in Subsection R315-264-1087(c)(5)(iii) or a design analysis as specified in Subsection R315-264-1087(c)(5)(iv) the performance of each control device except for the following:

(A) A flare;

(B) A boiler or process heater with a design heat input capacity of 44 megawatts or greater;

(C) A boiler or process heater into which the vent stream is introduced with the primary fuel;

(D) A boiler or industrial furnace burning hazardous waste for which the owner or operator has been issued a final permit under Rule R315-270 and has designed and operates the unit in accordance with the requirements of Sections R315-266-100 through 112; or

(E) A boiler or industrial furnace burning hazardous waste for which the owner or operator has designed and operates in accordance with the interim status requirements of Sections R315-266-100 through 112.

(ii) An owner or operator shall demonstrate the performance of each flare in accordance with the requirements specified in Subsection R315-264-1033(e).

(iii) For a performance test conducted to meet the requirements of Subsection R315-264-1087(c)(5)(i), the owner or operator shall use the test methods and procedures specified in Subsections R315-264-1034(c)(1) through (c)(4).

(iv) For a design analysis conducted to meet the requirements of Subsection R315-264-1087(c)(5)(i), the design analysis shall meet the requirements specified in Subsection R315-264-1035(b)(4)(iii).

(v) The owner or operator shall demonstrate that a carbon adsorption system achieves the performance requirements of Subsection R315-264-1087(c)(1) based on the total quantity of organics vented to the atmosphere from all carbon adsorption system equipment that is used for organic adsorption, organic desorption or carbon regeneration, organic recovery, and carbon disposal.

(6) If the owner or operator and the Director do not agree on a demonstration of control device performance using a design analysis then the disagreement shall be resolved using the results of a performance test performed by the owner or operator in accordance with the requirements of Subsection R315-264-1087(c)(5)(iii). The Director may choose to have an authorized representative observe the performance test.

(7) The closed-vent system and control device shall be inspected and monitored by the owner or operator in accordance with the procedures specified in Subsections R315-264-1033(f)(2) and 1033(l). The readings from each monitoring device required by Subsection R315-264-1033(f)(2) shall be inspected at least once each operating day to check control device operation. Any necessary corrective measures shall be immediately implemented to ensure the control device is operated in compliance with the requirements of Section R315-264-1087.

R315-264-1088. Inspection and Monitoring Requirements.

(a) The owner or operator shall inspect and monitor air emission control equipment used to comply with Sections R315-264-1080 through 1090 in accordance with the applicable requirements specified in Sections R315-264-1084 through 1087.

(b) The owner or operator shall develop and implement a written plan and schedule to perform the inspections and monitoring required by Subsection R315-264-1088(a). The owner or operator shall incorporate this plan and schedule into the facility inspection plan required under Section R315-264-15.

R315-264-1089. Recordkeeping Requirements.

(a) Each owner or operator of a facility subject to requirements of Sections R315-264-1080 through 1090 shall record and maintain the information specified in Subsections R315-264-1089(b) through (j), as applicable to the facility. Except for air emission control equipment design documentation and information required by Subsections R315-264-1089(i) and (j), records required by Section R315-264-1089 shall be maintained in the operating record for a minimum of 3 years. Air emission control equipment design documentation shall be maintained in the operating record until the air emission control equipment is replaced or otherwise no longer in service. Information required by Subsections R315-264-1089(i) and (j) shall be maintained in the operating record for as long as the waste management unit is not using air emission controls specified in Sections R315-264-1084 through 1087 in accordance with the conditions specified in Subsection R315-264-1080(d) or 1080(b)(7), respectively.

(b) The owner or operator of a tank using air emission controls in accordance with the requirements of Section R315-264-1084 shall prepare and maintain records for the tank that include the following information:

(1) For each tank using air emission controls in accordance with the requirements of Subsection R315-264-1084, the owner or operator shall record:

(i) A tank identification number, or other unique identification description as selected by the owner or operator.

(ii) A record for each inspection required by Section R315-264-1084 that includes the following information:

(A) Date inspection was conducted.

(B) For each defect detected during the inspection: The location of the defect, a description of the defect, the date of detection, and corrective action taken to repair the defect. In the event that repair of the defect is delayed in accordance with the requirements of Section R315-264-1084, the owner or operator shall also record the reason for the delay and the date that completion of repair of the defect is expected.

(2) In addition to the information required by Subsection R315-264-1089(b)(1), the owner or operator shall record the following information, as applicable to the tank:

(i) The owner or operator using a fixed roof to comply with the Tank Level 1 control requirements specified in Subsection R315-264-1084(c) shall prepare and maintain records for each determination for the maximum organic vapor pressure of the hazardous waste in the tank performed in accordance with the requirements of Subsection R315-264-1084(c). The records shall include the date and time the samples were collected, the analysis method used, and the analysis results.

(ii) The owner or operator using an internal floating roof to comply with the Tank Level 2 control requirements specified in Subsection R315-264-1084(e) shall prepare and maintain documentation describing the floating roof design.

(iii) Owners and operators using an external floating roof to comply with the Tank Level 2 control requirements specified in Subsection R315-264-1084(f) shall prepare and maintain the following records:

(A) Documentation describing the floating roof design and the dimensions of the tank.

(B) Records for each seal gap inspection required by Subsection R315-264-1084(f)(3) describing the results of the seal gap measurements. The records shall include the date that the measurements were performed, the raw data obtained for the measurements, and the calculations of the total gap surface area. In the event that the seal gap measurements do not conform to the specifications in Subsection R315-264-1084(f)(1), the records shall include a description of the repairs that were made, the date the repairs were made, and the date the tank was emptied, if necessary.

(iv) Each owner or operator using an enclosure to comply with the Tank Level 2 control requirements specified in Subsection R315-264-1084(i) shall prepare and maintain the following records:

(A) Records for the most recent set of calculations and measurements performed by the owner or operator to verify that the enclosure meets the criteria of a permanent total enclosure as specified in "Procedure T---Criteria for and Verification of a Permanent or Temporary Total Enclosure" under 40 CFR 52.741, appendix B.

(B) Records required for the closed-vent system and control device in accordance with the requirements of Subsection R315-264-1089(e).

(c) The owner or operator of a surface impoundment using air emission controls in accordance with the requirements of Section R315-264-1085 shall prepare and maintain records for the surface impoundment that include the following information:

(1) A surface impoundment identification number, or other unique identification description as selected by the owner or operator.

(2) Documentation describing the floating membrane cover or cover design, as applicable to the surface impoundment, that includes information prepared by the owner or operator or provided by the cover manufacturer or vendor describing the cover design, and certification by the owner or operator that the cover meets the specifications listed in Subsection R315-264-1085(c).

(3) A record for each inspection required by Section R315-264-1085 that includes the following information:

(i) Date inspection was conducted.

(ii) For each defect detected during the inspection the following information: The location of the defect, a description of the defect, the date of detection, and corrective action taken to repair the defect. In the event that repair of the defect is delayed in accordance with the provisions of Subsection R315-264-1085(f), the owner or operator shall also record the reason for the delay and the date that completion of repair of the defect is expected.

(4) For a surface impoundment equipped with a cover and vented through a closed-vent system to a control device, the owner or operator shall prepare and maintain the records specified in Subsection R315-264-1089(e).

(d) The owner or operator of containers using Container Level 3 air emission controls in accordance with the requirements of Section R315-264-1086 shall prepare and maintain records that include the following information:

(1) Records for the most recent set of calculations and measurements performed by the owner or operator to verify that the enclosure meets the criteria of a permanent total enclosure as specified in "Procedure T-Criteria for and Verification of a Permanent or Temporary Total Enclosure" under 40 CFR 52.741, appendix B.

(2) Records required for the closed-vent system and control device in accordance with the requirements of Subsection R315-264-1089(e).

(e) The owner or operator using a closed-vent system and control device in accordance with the requirements of Section R315-264-1087 shall prepare and maintain records that include the following information:

(1) Documentation for the closed-vent system and control device that includes:

(i) Certification that is signed and dated by the owner or operator stating that the control device is designed to operate at the performance level documented by a design analysis as specified in Subsection R315-264-1089(e)(1)(ii) or by performance tests as specified in Subsection R315-264-1089(e)(1)(iii) when the tank, surface impoundment, or container is or would be operating at capacity or the highest level reasonably expected to occur.

(ii) If a design analysis is used, then design documentation as specified in Subsection R315-264-1035(b)(4). The documentation shall include information prepared by the owner or operator or provided by the control device manufacturer or vendor that describes the control device design in accordance with Subsection R315-264-1035(b)(4)(iii) and certification by the owner or operator that the control equipment meets the applicable specifications.

(iii) If performance tests are used, then a performance test plan as specified in Subsection R315-264-1035(b)(3) and all test results.

(iv) Information as required by Subsection R315-264-1035(c)(1) and Subsection R315-264-1035(c)(2), as applicable.

(v) An owner or operator shall record, on a semiannual basis, the information specified in Subsections R315-264-1089(e)(1)(v)(A) and (e)(1)(v)(B) for those planned routine maintenance operations that would require the control device not to meet the requirements of Subsections R315-264-1087(c)(1)(i), (c)(1)(ii), or (c)(1)(iii), as applicable.

(A) A description of the planned routine maintenance that is anticipated to be performed for the control device during the next 6-month period. This description shall include the type of maintenance necessary, planned frequency of maintenance, and lengths of maintenance periods.

(B) A description of the planned routine maintenance

that was performed for the control device during the previous 6-month period. This description shall include the type of maintenance performed and the total number of hours during those 6 months that the control device did not meet the requirements of Subsections R315-264-1087 (c)(1)(i), (c)(1)(ii), or (c)(1)(iii), as applicable, due to planned routine maintenance.

(vi) An owner or operator shall record the information specified in Subsections R315-264-1089(e)(1)(vi)(A) through (e)(1)(vi)(C) for those unexpected control device system malfunctions that would require the control device not to meet the requirements of Subsections R315-264-1087 (c)(1)(i), (c)(1)(ii), or (c)(1)(iii), as applicable.

(A) The occurrence and duration of each malfunction of the control device system.

(B) The duration of each period during a malfunction when gases, vapors, or fumes are vented from the waste management unit through the closed-vent system to the control device while the control device is not properly functioning.

(C) Actions taken during periods of malfunction to restore a malfunctioning control device to its normal or usual manner of operation.

(vii) Records of the management of carbon removed from a carbon adsorption system conducted in accordance with Subsection R315-264-1087(c)(3)(ii).

(f) The owner or operator of a tank, surface impoundment, or container exempted from standards in accordance with the provisions of Subsection R315-264-1082(c) shall prepare and maintain the following records, as applicable:

(1) For tanks, surface impoundments, and containers exempted under the hazardous waste organic concentration conditions specified in Subsections R315-264-1082(c)(1) or 1082(c)(2)(i) through (c)(2)(vi), the owner or operator shall record the information used for each waste determination, e.g., test results, measurements, calculations, and other documentation, in the facility operating log. If analysis results for waste samples are used for the waste determination, then the owner or operator shall record the date, time, and location that each waste sample is collected in accordance with applicable requirements of Section R315-264-1083.

(2) For tanks, surface impoundments, or containers exempted under the provisions of Subsections R315-264-1082(c)(2)(vii) or (c)(2)(viii), the owner or operator shall record the identification number for the incinerator, boiler, or industrial furnace in which the hazardous waste is treated.

(g) An owner or operator designating a cover as "unsafe to inspect and monitor" pursuant to Subsections R315-264-1084(l) or 1085(g) shall record in a log that is kept in the facility operating record the following information: The identification numbers for waste management units with covers that are designated as "unsafe to inspect and monitor," the explanation for each cover stating why the cover is unsafe to inspect and monitor, and the plan and schedule for inspecting and monitoring each cover.

(h) The owner or operator of a facility that is subject to Section R315-264-1080 through 1090 and to the control device standards in 40 CFR part 60, subpart VV, or 40 CFR part 61, subpart V, may elect to demonstrate compliance with the applicable sections of Section R315-264-1080 through 1090 by documentation either pursuant to Section R315-264-1080 through 1090, or pursuant to the provisions of 40 CFR part 60, subpart VV or 40 CFR part 61, subpart V, to the extent that the documentation required by 40 CFR parts 60 or 61 duplicates the documentation required by Section R315-264-1089.

(i) For each tank or container not using air emission controls specified in Sections R315-264-1084 through 1087 in accordance with the conditions specified in Subsection R315-264-1080(d), the owner or operator shall record and maintain the following information:

(1) A list of the individual organic peroxide compounds manufactured at the facility that meet the conditions specified in Subsection R315-264-1080(d)(1).

(2) A description of how the hazardous waste containing the organic peroxide compounds identified in Subsection R315-264-1089(i)(1) are managed at the facility in tanks and containers. This description shall include:

(i) For the tanks used at the facility to manage this hazardous waste, sufficient information shall be provided to describe for each tank: A facility identification number for the tank; the purpose and placement of this tank in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste managed in the tanks.

(ii) For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to describe: A facility identification number for the container or group of containers; the purpose and placement of this container, or group of containers, in the management train of this hazardous waste; and the procedures used to ultimately dispose of the hazardous waste handled in the containers.

(3) An explanation of why managing the hazardous waste containing the organic peroxide compounds identified in Subsection R315-264-1089(i)(1) in the tanks and containers as described in Subsection R315-264-1089(i)(2) would create an undue safety hazard if the air emission controls, as required under Sections R315-264-1084 through 1087, are installed and operated on these waste management units. This explanation shall include the following information:

(i) For tanks used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: How use of the required air emission controls on the tanks would affect the tank design features and facility operating procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the tanks; and why installation of safety devices on the required air emission controls, as allowed under Section R315-264-1080 through 1090, will not address those situations in which evacuation of tanks equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

(ii) For containers used at the facility to manage these hazardous wastes, sufficient information shall be provided to explain: How use of the required air emission controls on the containers would affect the container design features and handling procedures currently used to prevent an undue safety hazard during the management of this hazardous waste in the containers; and why installation of safety devices on the required air emission controls, as allowed under Section R315-264-1080 through 1090, will not address those situations in which evacuation of containers equipped with these air emission controls is necessary and consistent with good engineering and safety practices for handling organic peroxides.

(j) For each hazardous waste management unit not using air emission controls specified in Sections R315-264-1084 through 1087 in accordance with the requirements of Subsection R315-264-1080(b)(7), the owner and operator shall record and maintain the following information:

(1) Certification that the waste management unit is equipped with and operating air emission controls in accordance with the requirements of an applicable regulation codified under the Utah Air Conservation Act.

(2) Identification of the specific requirements codified

under the Utah Air Conservation Act with which the waste management unit is in compliance.

R315-264-1090. Reporting Requirements.

(a) Each owner or operator managing hazardous waste in a tank, surface impoundment, or container exempted from using air emission controls under the provisions of Subsection R315-264-1082(c) shall report to the Director each occurrence when hazardous waste is placed in the waste management unit in noncompliance with the conditions specified in Subsection R315-264-1082(c)(1) or (c)(2), as applicable. Examples of such occurrences include placing in the waste management unit a hazardous waste having an average VO concentration equal to or greater than 500 ppmw at the point of waste origination; or placing in the waste management unit a treated hazardous waste of which the organic content has been reduced by an organic destruction or removal process that fails to achieve the applicable conditions specified in Subsections R315-264-1082(c)(2)(i) through (c)(2)(vi). The owner or operator shall submit a written report within 15 calendar days of the time that the owner or operator becomes aware of the occurrence. The written report shall contain the EPA identification number, facility name and address, a description of the noncompliance event and the cause, the dates of the noncompliance, and the actions taken to correct the noncompliance and prevent recurrence of the noncompliance. The report shall be signed and dated by an authorized representative of the owner or operator.

(b) Each owner or operator using air emission controls on a tank in accordance with the requirements Subsection R315-264-1084(c) shall report to the Director each occurrence when hazardous waste is managed in the tank in noncompliance with the conditions specified in Subsection R315-264-1084(b). The owner or operator shall submit a written report within 15 calendar days of the time that the owner or operator becomes aware of the occurrence. The written report shall contain the EPA identification number, facility name and address, a description of the noncompliance event and the cause, the dates of the noncompliance, and the actions taken to correct the noncompliance and prevent recurrence of the noncompliance. The report shall be signed and dated by an authorized representative of the owner or operator.

(c) Each owner or operator using a control device in accordance with the requirements of Section R315-264-1087 shall submit a semiannual written report to the Director excepted as provided for in Subsection R315-264-1090(d). The report shall describe each occurrence during the previous 6-month period when either:

(1) A control device is operated continuously for 24 hours or longer in noncompliance with the applicable operating values defined in Subsection R315-264-1035(c)(4); or

(2) A flare is operated with visible emissions for 5 minutes or longer in a two-hour period, as defined in Subsection R315-264-1033(d). The written report shall include the EPA identification number, facility name and address, and an explanation why the control device could not be returned to compliance within 24 hours, and actions taken to correct the noncompliance. The report shall be signed and dated by an authorized representative of the owner or operator.

(d) A report to the Director in accordance with the requirements of Subsection R315-264-1090(c) is not required for a 6-month period during which all control devices subject to Section R316-264-1080 through 1090 are operated by the owner or operator such that:

(1) During no period of 24 hours or longer did a control device operate continuously in noncompliance with the applicable operating values defined in Subsection R315-264-1035(c)(4); and

(2) No flare was operated with visible emissions for 5 minutes or longer in a two-hour period, as defined in Subsection R315-264-1033(d).

R315-264-1100. Containment Buildings -- Applicability.

The requirements of Sections R315-264-1100 through 1102 apply to owners or operators who store or treat hazardous waste in units designed and operated under Section R315-264-1101. The owner or operator is not subject to the definition of land disposal in RCRA section 3004(k) provided that the unit:

(a) Is a completely enclosed, self-supporting structure that is designed and constructed of manmade materials of sufficient strength and thickness to support themselves, the waste contents, and any personnel and heavy equipment that operate within the unit, and to prevent failure due to pressure gradients, settlement, compression, or uplift, physical contact with the hazardous wastes to which they are exposed; climatic conditions; and the stresses of daily operation, including the movement of heavy equipment within the unit and contact of such equipment with containment walls;

(b) Has a primary barrier that is designed to be sufficiently durable to withstand the movement of personnel, wastes, and handling equipment within the unit;

(c) If the unit is used to manage liquids, has:

(1) A primary barrier designed and constructed of materials to prevent migration of hazardous constituents into the barrier;

(2) A liquid collection system designed and constructed of materials to minimize the accumulation of liquid on the primary barrier; and

(3) A secondary containment system designed and constructed of materials to prevent migration of hazardous constituents into the barrier, with a leak detection and liquid collection system capable of detecting, collecting, and removing leaks of hazardous constituents at the earliest practicable time, unless the unit has been granted a variance from the secondary containment system requirements under Subsection R315-264-1101(b)(4);

(d) Has controls sufficient to prevent fugitive dust emissions to meet the no visible emission standard in Subsection R315-264-1101(c)(1)(iv); and

(e) Is designed and operated to ensure containment and prevent the tracking of materials from the unit by personnel or equipment.

R315-264-1101. Design and Operating Standards.

(a) All containment buildings shall comply with the following design standards:

(1) The containment building shall be completely enclosed with a floor, walls, and a roof to prevent exposure to the elements, e.g., precipitation, wind, run-on, and to assure containment of managed wastes.

(2) The floor and containment walls of the unit, including the secondary containment system if required under Subsection R315-264-1101(b), shall be designed and constructed of materials of sufficient strength and thickness to support themselves, the waste contents, and any personnel and heavy equipment that operate within the unit, and to prevent failure due to pressure gradients, settlement, compression, or uplift, physical contact with the hazardous wastes to which they are exposed; climatic conditions; and the stresses of daily operation, including the movement of heavy equipment within the unit and contact of such equipment with containment walls. The unit shall be designed so that it has sufficient structural strength to prevent collapse or other failure. All surfaces to be in contact with

hazardous wastes shall be chemically compatible with those wastes. the Director shall consider standards established by professional organizations generally recognized by the industry such as the American Concrete Institute (ACI) and the American Society of Testing Materials (ASTM) in judging the structural integrity requirements of Subsection R315-264-1101(a). If appropriate to the nature of the waste management operation to take place in the unit, an exception to the structural strength requirement may be made for light-weight doors and windows that meet these criteria:

(i) They provide an effective barrier against fugitive dust emissions under Subsection R315-264-1101(c)(1)(iv); and

(ii) The unit is designed and operated in a fashion that assures that wastes will not actually come in contact with these openings.

(3) Incompatible hazardous wastes or treatment reagents shall not be placed in the unit or its secondary containment system if they could cause the unit or secondary containment system to leak, corrode, or otherwise fail.

(4) A containment building shall have a primary barrier designed to withstand the movement of personnel, waste, and handling equipment in the unit during the operating life of the unit and appropriate for the physical and chemical characteristics of the waste to be managed.

(b) For a containment building used to manage hazardous wastes containing free liquids or treated with free liquids, the presence of which is determined by the paint filter test, a visual examination, or other appropriate means, the owner or operator shall include:

(1) A primary barrier designed and constructed of materials to prevent the migration of hazardous constituents into the barrier, e.g., a geomembrane covered by a concrete wear surface.

(2) A liquid collection and removal system to minimize the accumulation of liquid on the primary barrier of the containment building:

(i) The primary barrier shall be sloped to drain liquids to the associated collection system; and

(ii) Liquids and waste shall be collected and removed to minimize hydraulic head on the containment system at the earliest practicable time.

(3) A secondary containment system including a secondary barrier designed and constructed to prevent migration of hazardous constituents into the barrier, and a leak detection system that is capable of detecting failure of the primary barrier and collecting accumulated hazardous wastes and liquids at the earliest practicable time.

(i) The requirements of the leak detection component of the secondary containment system are satisfied by installation of a system that is, at a minimum:

(A) Constructed with a bottom slope of 1 percent or more; and

(B) Constructed of a granular drainage material with a hydraulic conductivity of 1×10^{-2} cm/sec or more and a thickness of 30.5 cm (12 inches) or more, or constructed of synthetic or geonet drainage materials with a transmissivity of 3×10^{-5} m2/sec or more.

(ii) If treatment is to be conducted in the building, an area in which such treatment will be conducted shall be designed to prevent the release of liquids, wet materials, or liquid aerosols to other portions of the building.

(iii) The secondary containment system shall be constructed of materials that are chemically resistant to the waste and liquids managed in the containment building and of sufficient strength and thickness to prevent collapse under the pressure exerted by overlaying materials and by any equipment used in the containment building. Containment buildings can serve as secondary containment systems for tanks placed within the building under certain conditions. A containment building can serve as an external liner system for a tank, provided it meets the requirements of Subsection R315-264-193(e)(1). In addition, the containment building shall meet the requirements of Subsections R315-264-193(b) and 193(c)(1) and (2) to be considered an acceptable secondary containment system for a tank.

(4) For existing units other than 90-day generator units, the Director may delay the secondary containment requirement for up to two years, based on a demonstration by the owner or operator that the unit substantially meets the standards of Sections R315-264-1100 and 1102. In making this demonstration, the owner or operator shall:

(i) Provide written notice to the Director of their request by November 16, 1992. This notification shall describe the unit and its operating practices with specific reference to the performance of existing containment systems, and specific plans for retrofitting the unit with secondary containment;

(ii) Respond to any comments from the Director on these plans within 30 days; and

(iii) Fulfill the terms of the revised plans, if such plans are approved by the Director.

(c) Owners or operators of all containment buildings shall:

(1) Use controls and practices to ensure containment of the hazardous waste within the unit; and, at a minimum:

(i) Maintain the primary barrier to be free of significant cracks, gaps, corrosion, or other deterioration that could cause hazardous waste to be released from the primary barrier;

(ii) Maintain the level of the stored/treated hazardous waste within the containment walls of the unit so that the height of any containment wall is not exceeded;

(iii) Take measures to prevent the tracking of hazardous waste out of the unit by personnel or by equipment used in handling the waste. An area shall be designated to decontaminate equipment and any rinsate shall be collected and properly managed; and

(iv) Take measures to control fugitive dust emissions such that any openings, doors, windows, vents, cracks, etc., exhibit no visible emissions, see 40 CFR part 60, appendix A, Method 22-Visual Determination of Fugitive Emissions from Material Sources and Smoke Emissions from Flares. In addition, all associated particulate collection devices, e.g., fabric filter, electrostatic precipitator, shall be operated and maintained with sound air pollution control practices, see 40 CFR part 60 subpart 292 for guidance. This state of no visible emissions shall be maintained effectively at all times during routine operating and maintenance conditions, including when vehicles and personnel are entering and exiting the unit.

(2) Obtain and keep on-site a certification by a qualified Professional Engineer that the containment building design meets the requirements of Subsections R315-264-1101(a), (b), and (c).

(3) Throughout the active life of the containment building, if the owner or operator detects a condition that could lead to or has caused a release of hazardous waste, the owner or operator shall repair the condition promptly, in accordance with the following procedures.

(i) Upon detection of a condition that has led to a release of hazardous waste, e.g., upon detection of leakage from the primary barrier, the owner or operator shall:

(A) Enter a record of the discovery in the facility operating record;

(B) Immediately remove the portion of the containment building affected by the condition from service;

(C) Determine what steps shall be taken to repair the containment building, remove any leakage from the secondary collection system, and establish a schedule for accomplishing the cleanup and repairs; and

(D) Within 7 days after the discovery of the condition, notify the Director of the condition, and within 14 working days, provide a written notice to the Director with a description of the steps taken to repair the containment building, and the schedule for accomplishing the work.

(ii) The Director shall review the information submitted, make a determination regarding whether the containment building shall be removed from service completely or partially until repairs and cleanup are complete, and notify the owner or operator of the determination and the underlying rationale in writing.

(iii) Upon completing all repairs and cleanup the owner or operator shall notify the Director in writing and provide a verification, signed by a qualified, registered professional engineer, that the repairs and cleanup have been completed according to the written plan submitted in accordance with Subsection R315-264-1101(c)(3)(i)(D).

(4) Inspect and record in the facility's operating record, at least once every seven days, data gathered from monitoring and leak detection equipment as well as the containment building and the area immediately surrounding the containment building to detect signs of releases of hazardous waste.

(d) For a containment building that contains both areas with and without secondary containment, the owner or operator shall:

(1) Design and operate each area in accordance with the requirements enumerated in Subsections R315-264-1101(a) through (c);

(2) Take measures to prevent the release of liquids or wet materials into areas without secondary containment; and

(3) Maintain in the facility's operating log a written description of the operating procedures used to maintain the integrity of areas without secondary containment.

(e) Notwithstanding any other provision of Subsection R315-264-1100 through 1102 the Director may waive requirements for secondary containment for a permitted containment building where the owner operator demonstrates that the only free liquids in the unit are limited amounts of dust suppression liquids required to meet occupational health and safety requirements, and where containment of managed wastes and liquids can be assured without a secondary containment system.

R315-264-1102. Closure and Post-Closure Care.

(a) At closure of a containment building, the owner or operator shall remove or decontaminate all waste residues, contaminated containment system components, liners, etc.; contaminated subsoils; and structures and equipment contaminated with waste and leachate; and manage them as hazardous waste unless Subsection R315-261-3(d) applies. The closure plan, closure activities, cost estimates for closure, and financial responsibility for containment buildings shall meet all of the requirements specified in Sections R315-264-110 through 120 and 140 through 151.

(b) If, after removing or decontaminating all residues and making all reasonable efforts to effect removal or decontamination of contaminated components, subsoils, structures, and equipment as required in Subsection R315-264-1102(a), the owner or operator finds that not all contaminated subsoils can be practicably removed or decontaminated, he shall close the facility and perform post-closure care in accordance with the closure and post-closure requirements that apply to landfills, Section R315-264-310. In addition, for the purposes of closure, post-closure, and financial responsibility, such a containment building is then considered to be a landfill, and the owner or operator shall meet all of the requirements for landfills specified in Sections R315-264-110 through 120 and 140 through 151.

R315-264-1103. Appendix I to Rule R315-264 -- Recordkeeping Instructions.

The recordkeeping provisions of Section R315-264-73 specify that an owner or operator shall keep a written operating record at his facility. This appendix provides additional instructions for keeping portions of the operating record. See Subsection R315-264-73(b) for additional recordkeeping requirements.

The following information shall be recorded, as it becomes available, and maintained in the operating record until closure of the facility in the following manner:

Records of each hazardous waste received, treated, stored, or disposed of at the facility which include the following:

(1) A description by its common name and the EPA Hazardous Waste Number(s) from Rule R315-261 which apply to the waste. The waste description also shall include the waste's physical form, i.e., liquid, sludge, solid, or contained gas. If the waste is not listed in Sections R315-261-30 through 35, the description also shall include the process that produced it, for example, solid filter cake from production of ----, EPA Hazardous Waste Number W051.

Each hazardous waste listed in Sections R315-261-30 through 35, and each hazardous waste characteristic defined in Sections R315-261-20 through 24, has a four-digit EPA Hazardous Waste Number assigned to it. This number shall be used for recordkeeping and reporting purposes. Where a hazardous waste contains more than one listed hazardous waste, or where more than one hazardous waste characteristic applies to the waste, the waste description shall include all applicable EPA Hazardous Waste Numbers.

(2) The estimated or manifest-reported weight, or volume and density, where applicable, in one of the units of measure specified in Table 1;

Table 1

Unit of measure	Code(1)
Gallons	G
Gallons per Hour	E
Gallons per Day	U
Liters	L
Liters per Hour	H
Liters per Day	V
Short Tons per Hour	D
Metric Tons per Hour	W
Short Tons per Day	N
Metric Tons per Day	S
Pounds per Hour	J
Kilograms per Hour	R
Cubic Yards	Y
Cubic Meters	C
Acres	B
Acre-feet	A
Hectares	Q
Hectare-meter	F
Btu's per Hour	I
Pounds	P
Short tons	T
Kilograms	K
Tons	M

(1) Single digit symbols are used here for data processing purposes.

(3) The method(s), by handling code(s) as specified in Table 2, and date(s) of treatment, storage, or disposal.

Table 2
Handling Codes for Treatment, Storage and Disposal Methods

Enter the handling code(s) listed below that most closely represents the technique(s) used at the facility to treat, store or dispose of each quantity of hazardous waste received.

For Storage

```
Code  Storage type
S01   Container (barrel, drum, etc.)
S02   Tank
S03   Waste Pile
S04   Surface Impoundment
S05   Drip Pad
S06   Containment Building (Storage)
S99   Other Storage (specify)

For Treatment

   (a)   Thermal Treatment-
Code  Type of Thermal Treatment
T06   Liquid injection incinerator
T07   Rotary kiln incinerator
T08   Fluidized bed incinerator
T09   Multiple hearth incinerator
T10   Infrared furnace incinerator
T11   Molten salt destructor
T12   Pyrolysis
T13   Wet air oxidation
T14   CalcinationT15   Microwave discharge
T18   Other (specify)

   (b)   Chemical Treatment-
Code  Type of Chemical Treatment
T19   Absorption mound
T20   Absorption field
T21   Chemical fixation
T22   Chemical oxidation
T23   Chemical precipitation
T24   Chemical reduction
T25   Chlorination
T26   Chlorinolysis
T27   Cyanide destruction
T28   Degradation
T29   Detoxification
T30   Ion exchange
T31   Neutralization
T32   Ozonation
T33   Photolysis
T34   Other (specify)

   (c)   Physical Treatment-
   (1) Separation of components:
Code  Type of Separation treatmen
T35   Centrifugation
T36   Clarification
T37   Coagulation
T38   Decanting
T39   Encapsulation
T40   Filtration
T41   Flocculation
T42   Flotation
T43   Foaming
T44   Sedimentation
T45   Thickening
T46   Ultrafiltration
T47   Other (specify)

   (2) Removal of Specific Components:
Code  Type of Removal Treatment
T48   Absorption-molecular sieve
T49   Activated carbon
T50   Blending
T51   Catalysis
T52   Crystallization
T53   Dialysis
T54   Distillation
T55   Electrodialysis
T56   Electrolysis
T57   Evaporation
T58   High gradient magnetic separation
T59   Leaching
T60   Liquid ion exchange
T61   Liquid-liquid extraction
T62   Reverse osmosis
T63   Solvent recovery
T64   Stripping
T65   Sand filter
T66   Other (specify)

   (d) Biological Treatment
Code  Type of Biological Treatment
T67   Activated sludge
T68   Aerobic lagoon
T69   Aerobic tank
T70   Anaerobic tank
T71   Composting
T72   Septic tank
T73   Spray irrigation
T74   Thickening filter
T75   Trickling filter
T76   Waste stabilization pond
T77   Other (specify)

   (e) Boilers and Industrial Furnaces
Code  Type of Boiler or Industrial Furnace
T80   BoilerT81   Cement Kiln
T82   Lime Kiln
T83   Aggregate Kiln
T84   Phosphate Kiln
T85   Coke Oven
T86   Blast Furnace
T87   Smelting, Melting, or Refining Furnace
T88   Titanium Dioxide Chloride Process Oxidation Reactor
T89   Methane Reforming Furnace
T90   Pulping Liquor Recovery Furnace
T91   Combustion Device Used in the Recovery of Sulfur
      Values from Spent Sulfuric Acid
T92   Halogen Acid Furnaces
T93   Other Industrial Furnaces Listed in Section R315-
      260.10 (specify)

   (f)   Other Treatment
Code  Other type of Treatment
T94   Containment Building (Treatment)

For Disposal
Code  Type of Disposal
D79   Underground Injection
D80   Landfill
D81   Land Treatment
D82   Ocean Disposal
D83   Surface Impoundment (to be closed as a landfill)
D99   Other Disposal (specify)

For Miscellaneous Sections R315-264-600 through 603 Units
Code  Unit type
X01   Open Burning/Open Detonation
X02   Mechanical Processing
X03   Thermal Unit
X04   Geologic Repository
X99   Other Sections R315-264-600 through 603 Units
      (specify)
```

R315-264-1104. Appendix IV to Rule R315-264-Cochran's Approximation to the Behrens-Fisher Students' t-test.

40 CFR 264 Appendix IV, 2015 edition, is adopted and incorporated by reference.

R315-264-1105. Appendix V to Rule R315-264 -- Examples of Potentially Incompatible Waste.

Many hazardous wastes, when mixed with other waste or materials at a hazardous waste facility, can produce effects which are harmful to human health and the environment, such as (1) heat or pressure, (2) fire or explosion, (3) violent reaction, (4) toxic dusts, mists, fumes, or gases, or (5) flammable fumes or gases.

Below are examples of potentially incompatible wastes, waste components, and materials, along with the harmful consequences which result from mixing materials in one group with materials in another group. The list is intended as a guide to owners or operators of treatment, storage, and disposal facilities, and to enforcement and permit granting officials, to indicate the need for special precautions when managing these potentially incompatible waste materials or components.

This list is not intended to be exhaustive. An owner or operator shall, as the regulations require, adequately analyze his wastes so that he can avoid creating uncontrolled substances or reactions of the type listed below, whether they are listed below or not.

It is possible for potentially incompatible wastes to be mixed in a way that precludes a reaction, e.g., adding acid to water rather than water to acid, or that neutralizes them, e.g., a strong acid mixed with a strong base, or that controls substances produced, e.g., by generating flammable gases in a

closed tank equipped so that ignition cannot occur, and burning the gases in an incinerator.

In the lists below, the mixing of a Group A material with a Group B material may have the potential consequence as noted.

Table

Group 1-A

Acetylene sludge
Alkaline caustic liquids
Alkaline cleaner
Alkaline corrosive liquids
Alkaline corrosive battery fluid
Caustic wastewater
Lime sludge and other corrosive alkalies
Lime wastewaterLime and water
Spent caustic

Group 1-B

Acid sludge
Acid and water
Battery acid
Chemical cleaners
Electrolyte, acid
Etching acid liquid or solvent
Pickling liquor and other corrosive acids
Spent acid
Spent mixed acid
Spent sulfuric acid
Potential consequences: Heat generation; violent reaction.

Group 2-A

Aluminum
Beryllium
Calcium
Lithium
Magnesium
Potassium
Sodium
Zinc powder
Other reactive metals and metal hydrides

Group 2-B

Any waste in Group 1-A or
1-B
Potential consequences: Fire or explosion; generation of flammable
hydrogen gas.

Group 3-A

Alcohols
Water

Group 3-B

Any concentrated waste in Groups 1-A or 1-B
Calcium
Lithium
Metal hydrides
Potassium
SO2 Cl2, SOCl2, PCl3, CH3 SiCl3
Other water-reactive waste
Potential consequences: Fire, explosion, or heat generation;
generation of flammable or toxic gases.

Group 4-A

Alcohols
Aldehydes
Halogenated hydrocarbons
Nitrated hydrocarbons
Unsaturated hydrocarbons
Other reactive organic compounds and solvents

Group 4-B

Concentrated Group 1-A or 1-B wastes
Group 2-A wastes
Potential consequences: Fire, explosion, or violent reaction.

Group 5-A

Spent cyanide and sulfide solutions

Group 5-B

Group 1-B wastes
Potential consequences: Generation of toxic hydrogen cyanide or
hydrogen sulfide gas.

Group 6-A

Chlorates
Chlorine
Chlorites
Chromic acid
Hypochlorites
Nitrates
Nitric acid, fuming
Perchlorates
Permanganates
Peroxides
Other strong oxidizers

Group 6-B

Acetic acid and other organic acids
Concentrated mineral acids
Group 2-A wastes
Group 4-A wastes
Other flammable and combustible wastes
Potential consequences: Fire, explosion, or violent reaction.

R315. Environmental Quality, Waste Management and Radiation Control, Waste Management.
R315-273. Standards for Universal Waste Management.
R315-273-1. Standards for Universal Waste Management -- Scope.

(a) Rule R315-273 establishes requirements for managing the following:

(1) Batteries as described in Section R315-273-2;

(2) Pesticides as described in Section R315-273-3;

(3) Mercury-containing equipment as described in Section R315-273-4;

(4) Lamps as described in Section R315-273-5;

(5) Antifreeze as described in Subsection R315-273-6(a); and

(6) Aerosol cans as described in Subsection R315-273-6(b).

(b) Rule R315-273 provides an alternative set of management standards in lieu of regulation under Rules R315-260 through 266, 268, and 270. If a waste handler chooses to manage its universal waste under the Rule R315-273, but fails to meet requirements in this rule, the waste handler remains subject to, and shall comply with, all applicable requirements of Rules R315-260 through 266, 268, 270 and 124.

Note: Only wastes that are hazardous, i.e., are listed or exhibit one or more characteristics of hazardous waste, are subject to the Rule R315-273 universal waste regulations. Compliance with the reduced set of Rule R315-273 requirements is an option that waste handlers may choose for managing their universal wastes, batteries, pesticides, mercury-containing devices, aerosol cans, lamps, and antifreeze. If universal waste handlers wish, they may instead continue to manage these hazardous wastes under the full hazardous waste regulations for generators, transporters, and treatment, storage, and disposal facilities.

R315-273-2. Standards for Universal Waste Management -- Applicability-Batteries.

(a) Batteries covered under Section R315-273.

(1) The requirements of Rule R315-273 apply to persons managing batteries, as described in Section R315-273-9, except those listed in Section R315-273-2(b).

(2) Spent lead-acid batteries which are not managed under Section R315-266-80 are subject to management under Rule R315-273.

(b) Batteries not covered under Rule R315-273. The requirements of Rule R315-273 do not apply to persons managing the following batteries:

(1) Spent lead-acid batteries that are managed under Section R315-266-80.

(2) Batteries, as described in Section R315-273-9, that are not yet wastes under Rule R315-261, including those that do not meet the criteria for waste generation in Subsection R315-273-2(c).

(3) Batteries, as described in Section R315-273-9 that are not hazardous waste. A battery is a hazardous waste if it exhibits one or more of the characteristics identified in Sections R315-261-20 through 24.

(c) Generation of waste batteries.

(1) A used battery becomes a waste on the date it is discarded, e.g., when sent for reclamation.

(2) An unused battery becomes a waste on the date the handler decides to discard it.

R315-273-3. Standards for Universal Waste Management -- Applicability-Pesticides.

(a) Pesticides covered under Rule R315-273. The requirements of Rule R315-273 apply to persons managing pesticides, as described in Section R315-273-9, meeting the following conditions, except those listed in Subsection R315-273-3(b):

(1) Recalled pesticides that are:

(i) Stocks of a suspended and canceled pesticide that are part of a voluntary or mandatory recall under FIFRA Section 19(b), including, but not limited to those owned by the registrant responsible for conducting the recall; or

(ii) Stocks of a suspended or cancelled pesticide, or a pesticide that is not in compliance with FIFRA, that are part of a voluntary recall by the registrant.

(2) Stocks of other unused pesticide products that are collected and managed as part of a waste pesticide collection program.

(b) Pesticides not covered under Rule R315-273. The requirements of Rule R315-273 do not apply to persons managing the following pesticides:

(1) Recalled pesticides described in Subsection R315-273-3(a)(1), and unused pesticide products described in Subsection R315-273-3(a)(2), that are managed by farmers in compliance with Section R315-262-70. Section R315-262-70 addresses pesticides disposed of on the farmer's own farm in a manner consistent with the disposal instructions on the pesticide label, providing the container is triple rinsed in accordance with Subsection R315-261-7(b)(3);

(2) Pesticides not meeting the conditions set forth in Subsection R315-273-3(a). These pesticides shall be managed in compliance with the hazardous waste regulations in Rules R315-260 through 266, 268, and 270;

(3) Pesticides that are not wastes under Rule R315-261, including those that do not meet the criteria for waste generation in Subsection R315-273-3(c) or those that are not wastes as described in Subsection R315-273-3(d); and

(4) Pesticides that are not hazardous waste. A pesticide is a hazardous waste if it is listed in Sections R315-261-30 through 35 or if it exhibits one or more of the characteristics identified in Sections R315-261-20 through 24.

(c) When a pesticide becomes a waste.

(1) A recalled pesticide described in Subsection R315-273-3(a)(1) becomes a waste on the first date on which both of the following conditions apply:

(i) The generator of the recalled pesticide agrees to participate in the recall; and

(ii) The person conducting the recall decides to discard, e.g., burn the pesticide for energy recovery.

(2) An unused pesticide product described in Subsection R315-273-3(a)(2) becomes a waste on the date the generator decides to discard it.

(d) Pesticides that are not wastes. The following pesticides are not wastes:

(1) Recalled pesticides described in Subsection R315-273-3(a)(1), provided that the person conducting the recall:

(i) Has not made a decision to discard, e.g., burn for energy recovery, the pesticide. Until such a decision is made, the pesticide does not meet the definition of "solid waste" under Section R315-261.2; thus the pesticide is not a hazardous waste and is not subject to hazardous waste requirements, including Rule R315-273. This pesticide remains subject to the requirements of FIFRA; or

(ii) Has made a decision to use a management option that, under Section R315-261-2, does not cause the pesticide to be a solid waste; i.e., the selected option is use, other than use constituting disposal, or reuse, other than burning for energy recovery, or reclamation. Such a pesticide is not a solid waste and therefore is not a hazardous waste, and is not subject to the hazardous waste requirements including Rule R315-273. This pesticide, including a recalled pesticide that is exported to a foreign destination for use or reuse, remains subject to the requirements of FIFRA.

(2) Unused pesticide products described in Subsection

R315-273-3(a)(2), if the generator of the unused pesticide product has not decided to discard, e.g., burn for energy recovery, them. These pesticides remain subject to the requirements of FIFRA.

R315-273-4. Standards for Universal Waste Management -- Applicability -- Mercury-Containing Equipment.

(a) Mercury-containing equipment covered under Rule R315-273. The requirements of Rule R315-273 apply to persons managing mercury-containing equipment, as described in Section R315-273-9, except those listed in Subsection R315-273-4(b).

(b) Mercury-containing equipment not covered under Rule R315-273. The requirements of Rule R315-273 do not apply to persons managing the following mercury-containing equipment:

(1) Mercury-containing equipment that is not yet a waste under Rule R315-261. Subsection R315-273-4(c) describes when mercury-containing equipment becomes a waste;

(2) Mercury-containing equipment that is not a hazardous waste. Mercury-containing equipment is a hazardous waste if it exhibits one or more of the characteristics identified in Sections R315-261-20 through 24 or is listed in Sections R315-261-30 through 35; and

(3) Equipment and devices from which the mercury-containing components have been removed.

(c) Generation of waste mercury-containing equipment.

(1) Used mercury-containing equipment becomes a waste on the date it is discarded.

(2) Unused mercury-containing equipment becomes a waste on the date the handler decides to discard it.

R315-273-5. Standards for Universal Waste Management -- Applicability-Lamps.

(a) Lamps covered under Rule R315-273. The requirements of Rule R315-273 apply to persons managing lamps as described in Section R315-273-9, except those listed in Subsection R315-273-5(b).

(b) Lamps not covered under Rule R315-273. The requirements of Rule R315-273 do not apply to persons managing the following lamps:

(1) Lamps that are not yet wastes under Rule R315-261 as provided in Subsection R315-273-5(c).

(2) Lamps that are not hazardous waste. A lamp is a hazardous waste if it exhibits one or more of the characteristics identified in Sections R315-261-20 through 24.

(c) Generation of waste lamps.

(1) A used lamp becomes a waste on the date it is discarded, e.g., sent for reclamation.

(2) An unused lamp becomes a waste on the date the handler decides to discard it.

R315-273-6. Standards for Universal Waste Management -- Applicability for Utah Specific Wastes.

(a) Antifreeze.

(1) The requirements of Rule R315-273 apply to persons managing antifreeze, as described in Section R315-273-9, except those listed in Subsection R315-273-6(a)(2).

(2) Antifreeze not covered under Rule R315-273. The requirements of Rule R315-273 do not apply to persons managing the following antifreeze:

(i) Antifreeze, as described in Section R315-273-9,that is not yet a waste under Rule R315-261, including antifreeze that does not meet the criteria for waste generation in Subsection R315-273-6(a)(4).

(ii) Antifreeze, as described in Section R315-273-9 that is not hazardous waste. Antifreeze is a hazardous waste if it exhibits one or more of the characteristics identified in Sections R315-261-20 through 24.

(4) Generation of waste antifreeze.

(i) Antifreeze becomes a waste on the date it is discarded, e.g., when sent for reclamation.

(ii) Antifreeze becomes a waste on the date the handler decides to discard it.

(b) Aerosol Cans

(1) The requirements of Rule R315-273 apply to persons managing aerosol cans, as described in Section R315-273-9, except those listed in Subsection R315-273-6(b)(2).

(2) Aerosol cans not covered under Rule R315-273. The requirements of Rule R315-273 do not apply to persons managing the following aerosol cans:

(i) Aerosol cans, as described in Section R315-273-9, that are not yet wastes under Rule R315-261, including those that do not meet the criteria for waste generation in subsection R315-273(b)(3).

(ii) Aerosol cans, as described in Section R315-273-9, that are not hazardous waste. An aerosol can shall be managed as a hazardous waste if the can or its contents exhibit one or more of the characteristics identified in Sections R315-261-20 through 24, or if its contents are listed in Sections R315-261-30 through 35.

(3) Generation of waste aerosol cans.

(i) An aerosol can becomes a waste on the date it is discarded or is no longer useable. For purposes of Rule R315-273, an aerosol can is considered to be no longer useable when:

(A) the can is as empty as proper work practices allow;

(B) the spray mechanism no longer operates as designed;

(C) the propellant is spent; or

(D) the product is no longer used.

(ii) An unused aerosol can becomes a waste on the date the handler decides to discard it.

R315-273-8. Standards for Universal Waste Management -- Applicability -- Household and Conditionally Exempt Small Quantity Generator Waste.

(a) Persons managing the wastes listed below may, at their option, manage them under the requirements of Rule R315-273:

(1) Household wastes that are exempt under Subsection R315-261-4(b)(1) and are also of the same type as the universal wastes defined at Section R315-273-9; and/or

(2) Conditionally exempt small quantity generator wastes that are exempt under Section R315-261-5 and are also of the same type as the universal wastes defined at Section R315-273-9.

(b) Persons who commingle the wastes described in Subsections R315-273-8(a)(1) and (a)(2) together with universal waste regulated under Rule R315-273 shall manage the commingled waste under the requirements of Rule R315-273.

R315-273-9. Standards for Universal Waste Management -- Definitions.

(a) "Aerosol can" means a container with a total capacity of no more than 24 ounces of gas under pressure and is used to aerate and dispense any material through a valve in the form of a spray or foam.

(b) "Ampule" means an airtight vial made of glass, plastic, metal, or any combination of these materials.

(c) "Antifreeze" means an ethylene glycol based mixture that lowers the freezing point of water and is used as an engine coolant.

(d) "Battery" means a device consisting of one or more electrically connected electrochemical cells, which is

designed to receive, store, and deliver electric energy. An electrochemical cell is a system consisting of an anode, cathode, and an electrolyte, plus such connections, electrical and mechanical, as may be needed to allow the cell to deliver or receive electrical energy. The term battery also includes an intact, unbroken battery from which the electrolyte has been removed.

(e) "Destination facility" means a facility that treats, disposes of, or recycles a particular category of universal waste, except those management activities described in Subsections R315-273-13(a) and (c) and Subsections R315-273-33(a) and (c). A facility, at which a particular category of universal waste is only accumulated, is not a destination facility for purposes of managing that category of universal waste.

(f) "Drum-top lamp crusher" means a device attached to a drum or container that mechanically reduces the size of lamps and includes a bag filter followed in series by a HEPA filter and an activated carbon filter. Drum-top crushers are the only devices that can be approved for the use of crushing lamps.

(g) "FIFRA" means the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. 136-136y).

(h) "Generator" means any person, by site, whose act or process produces hazardous waste identified or listed in Rule R315-261 or whose act first causes a hazardous waste to become subject to regulation.

(i) "Lamp," also referred to as "universal waste lamp" is defined as the bulb or tube portion of an electric lighting device. A lamp is specifically designed to produce radiant energy, most often in the ultraviolet, visible, and infra-red regions of the electromagnetic spectrum. Examples of common universal waste electric lamps include, but are not limited to, fluorescent, high intensity discharge, neon, mercury vapor, high pressure sodium, and metal halide lamps.

(j) "Large Quantity Handler of Universal Waste" means a universal waste handler, as defined in Section R315-273-9 who accumulates 5,000 kilograms or more total of universal waste; batteries, pesticides, mercury-containing equipment, lamps, or any other universal waste regulated in Rule R315-273, calculated collectively; at any time. This designation as a large quantity handler of universal waste is retained through the end of the calendar year in which the 5,000 kilogram limit is met or exceeded.

(k) "Mercury-containing equipment" means a device or part of a device, including thermostats, but excluding batteries and lamps, that contains elemental mercury integral to its function.

(l) "On-site" means the same or geographically contiguous property which may be divided by public or private right-of-way, provided that the entrance and exit between the properties is at a cross-roads intersection, and access is by crossing as opposed to going along the right of way. Non-contiguous properties owned by the same person but connected by a right-of-way which he controls and to which the public does not have access, are also considered on-site property.

(m) "Pesticide" means any substance or mixture of substances intended for preventing, destroying, repelling, or mitigating any pest, or intended for use as a plant regulator, defoliant, or desiccant, other than any article that:

(1) Is a new animal drug under FFDCA section 201(w), or

(2) Is an animal drug that has been determined by regulation of the Secretary of Health and Human Services not to be a new animal drug, or

(3) Is an animal feed under FFDCA section 201(x) that bears or contains any substances described by (1) or (2) above.

(n) "Small Quantity Handler of Universal Waste" means a universal waste handler, as defined in this Section R315-273-9 who does not accumulate 5,000 kilograms or more of universal waste at any time.

(o) "Thermostat" means a temperature control device that contains metallic mercury in an ampule attached to a bimetal sensing element, and mercury-containing ampules that have been removed from these temperature control devices in compliance with the requirements of Subsection R315-273-13(c)(2) or 33(c)(2).

(p) "Universal Waste" means any of the following hazardous wastes that are subject to the universal waste requirements of Rule R315-273:

(1) Batteries as described in Section R315-273-2;

(2) Pesticides as described in Section R315-273-3;

(3) Mercury-containing equipment as described in Section R315-273-4;

(4) Lamps as described in Section R315-273-5;

(5) Antifreeze as described in Subsection R315-273-6(a); and

(6) Aerosol cans as described in Subsection R315-273-6(b).

(q) "Universal Waste Handler:"

(1) Means:

(i) A generator, as defined in Section R315-273-9, of universal waste; or

(ii) The owner or operator of a facility, including all contiguous property, that receives universal waste from other universal waste handlers, accumulates universal waste, and sends universal waste to another universal waste handler, to a destination facility, or to a foreign destination.

(2) Does not mean:

(i) A person who treats, except under the provisions of Subsection R315-273-13(a) or (c), or 33(a) or (c), disposes of, or recycles universal waste; or

(ii) A person engaged in the off-site transportation of universal waste by air, rail, highway, or water, including a universal waste transfer facility.

(r) "Universal Waste Transfer Facility" means any transportation-related facility including loading docks, parking areas, storage areas and other similar areas where shipments of universal waste are held during the normal course of transportation for ten days or less.

(s) "Universal Waste Transporter" means a person engaged in the off-site transportation of universal waste by air, rail, highway, or water.

R315-273-10. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Applicability.

Sections R315-273-10 through 20 apply to small quantity handlers of universal waste, as defined in Section R315-273-9 except that the registration requirement of Subsection R315-273-13(d)(3) and Subsections R315-273-13(d)(6) and (7) do not apply to generators.

R315-273-11. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Prohibitions.

A small quantity handler of universal waste is:

(a) Prohibited from disposing of universal waste; and

(b) Prohibited from diluting or treating universal waste, except by responding to releases as provided in Section R315-273-17; or by managing specific wastes as provided in Section R315-273-13.

R315-273-12. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Notification.

A small quantity handler of universal waste is not required to notify the Director of universal waste handling activities except as required under Subsection R315-273-13(3).

R315-273-13. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Waste Management.

(a) Batteries. A small quantity handler of universal waste shall manage universal waste batteries in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

(1) A small quantity handler of universal waste shall contain any universal waste battery that shows evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions in a container. The container shall be closed, structurally sound, compatible with the contents of the battery, and shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(2) A small quantity handler of universal waste may conduct the following activities as long as the casing of each individual battery cell is not breached and remains intact and closed, except that cells may be opened to remove electrolyte but shall be immediately closed after removal:

(i) Sorting batteries by type;

(ii) Mixing battery types in one container;

(iii) Discharging batteries so as to remove the electric charge;

(iv) Regenerating used batteries;

(v) Disassembling batteries or battery packs into individual batteries or cells;

(vi) Removing batteries from consumer products; or

(vii) Removing electrolyte from batteries.

(3) A small quantity handler of universal waste who removes electrolyte from batteries, or who generates other solid waste, e.g., battery pack materials, discarded consumer products, as a result of the activities listed above, shall determine whether the electrolyte and/or other solid waste exhibit a characteristic of hazardous waste identified in Sections R315-261-20 through 24.

(i) If the electrolyte and/or other solid waste exhibit a characteristic of hazardous waste, it is subject to all applicable requirements of Rules R315-260 through 266, 268 and 270. The handler is considered the generator of the hazardous electrolyte and/or other waste and is subject to Rule R315-262.

(ii) If the electrolyte or other solid waste is not hazardous, the handler may manage the waste in any way that is in compliance with applicable federal, state or local solid waste regulations.

(b) Pesticides. A small quantity handler of universal waste shall manage universal waste pesticides in a way that prevents releases of any universal waste or component of a universal waste to the environment. The universal waste pesticides shall be contained in one or more of the following:

(1) A container that remains closed, structurally sound, compatible with the pesticide, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; or

(2) A container that does not meet the requirements of Subsection R315-273-13(b)(1), provided that the unacceptable container is overpacked in a container that does meet the requirements of Subsection R315-273-13(b)(1); or

(3) A tank that meets the requirements of 40 CFR 265.190 through 202, except for 40 CFR 265.197(c) and 40 CFR 265.200 and 201, 40 CFR 265 is adopted by reference in R315-265; or

(4) A transport vehicle or vessel that is closed, structurally sound, compatible with the pesticide, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(c) Mercury-containing equipment. A small quantity handler of universal waste shall manage universal waste mercury-containing equipment in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

(1) A small quantity handler of universal waste shall place in a container any universal waste mercury-containing equipment with non-contained elemental mercury or that shows evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions. The container shall be closed, structurally sound, compatible with the contents of the device, shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions, and shall be reasonably designed to prevent the escape of mercury into the environment by volatilization or any other means.

(2) A small quantity handler of universal waste may remove mercury-containing ampules from universal waste mercury-containing equipment provided the handler:

(i) Removes and manages the ampules in a manner designed to prevent breakage of the ampules;

(ii) Removes the ampules only over or in a containment device, e.g., tray or pan sufficient to collect and contain any mercury released from an ampule in case of breakage;

(iii) Ensures that a mercury clean-up system is readily available to immediately transfer any mercury resulting from spills or leaks from broken ampules from that containment device to a container that meets the requirements of Section R315-262-34;

(iv) Immediately transfers any mercury resulting from spills or leaks from broken ampules from the containment device to a container that meets the requirements of Section R315-262-34;

(v) Ensures that the area in which ampules are removed is well ventilated and monitored to ensure compliance with applicable OSHA exposure levels for mercury;

(vi) Ensures that employees removing ampules are thoroughly familiar with proper waste mercury handling and emergency procedures, including transfer of mercury from containment devices to appropriate containers;

(vii) Stores removed ampules in closed, non-leaking containers that are in good condition;

(viii) Packs removed ampules in the container with packing materials adequate to prevent breakage during storage, handling, and transportation;

(3) A small quantity handler of universal waste mercury-containing equipment that does not contain an ampule may remove the open original housing holding the mercury from universal waste mercury-containing equipment provided the handler:

(i) Immediately seals the original housing holding the mercury with an air-tight seal to prevent the release of any mercury to the environment; and

(ii) Follows all requirements for removing ampules and managing removed ampules under Subsection R315-273-13(c)(2); and

(4)(i) A small quantity handler of universal waste who removes mercury-containing ampules from mercury-containing equipment or seals mercury from mercury-containing equipment in its original housing shall determine whether the following exhibit a characteristic of hazardous waste identified in Sections R315-261-20 through 24:

(A) Mercury or clean-up residues resulting from spills or leaks; and/or

(B) Other solid waste generated as a result of the removal of mercury-containing ampules or housings, e.g., the

remaining mercury-containing device.

(ii) If the mercury, residues, and/or other solid waste exhibits a characteristic of hazardous waste, it shall be managed in compliance with all applicable requirements of Rules R315-260 through 266, 268, and 270. The handler is considered the generator of the mercury, residues, and/or other waste and shall manage it in compliance with Rule R315-262.

(iii) If the mercury, residues, and/or other solid waste is not hazardous, the handler may manage the waste in any way that is in compliance with applicable federal, state or local solid waste regulations.

(d) Lamps. A small quantity handler of universal waste shall manage lamps in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

(1) A small quantity handler of universal waste shall contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages shall remain closed and shall lack evidence of leakage, spillage or damage that could cause leakage under reasonably foreseeable conditions.

(2) A small quantity handler of universal waste shall immediately clean up and place in a container any lamp that is broken and shall place in a container any lamp that shows evidence of breakage, leakage, or damage that could cause the release of mercury or other hazardous constituents to the environment. Containers shall be closed, structurally sound, compatible with the contents of the lamps and shall lack evidence of leakage, spillage or damage that could cause leakage or releases of mercury or other hazardous constituents to the environment under reasonably foreseeable conditions.

(3) A small quantity handler of universal waste may crush universal waste lamps using a drum-top lamp crusher designed specifically for crushing lamps provided that the small quantity handler submits a drum-top lamp crusher registration application to and receives approval from the Director. The registration application shall demonstrate that the small quantity handler shall operate the drum-top lamp crusher to ensure the following:

(i) The lamps are crushed in a closed accumulation container designed specifically for crushing lamps;

(ii) The lamps are crushed in a controlled manner that prevents the release of mercury vapor or other contaminants in exceedance of the manufacturer's specifications;

(iii) The drum-top lamp crusher shall consist of a bag filter followed in series by a HEPA filter and an activated carbon filter;

(iv) The drum-top lamp crusher is installed, maintained, and operated in accordance with written procedures developed by the manufacturer of the equipment including specific instructions for the frequency of filter changes;

(v) Filters are either characterized to demonstrate that they are not a hazardous waste or managed as a hazardous waste;

(vi) A spill clean-up kit is available;

(vii) The area in which the drum-top crusher is operated is well ventilated and monitored to ensure compliance with applicable OSHA exposure levels for mercury;

(viii) An employee using the drum-top lamp crusher is trained annually on the written operating, safety, personal protection and maintenance procedures of the system;

(ix) An employee using the drum-top lamp crusher is trained annually in emergency procedures;

(x) An operating record is kept and consists of the following:

(A) the number and size of lamps crushed per calendar day, per calendar month, and per calendar year;

(B) the schedule for the change out of filters;

(C) date and time of filter change out;

(D) date, type, and time of equipment maintenance;

(E) any occurrence of equipment malfunction; and

(F) procedures for preventing equipment malfunctions.

(4) The operating record shall be maintained for at least three years.

(5) When a drum-top crusher is no longer used or is relocated, the area where the crusher was located shall be decontaminated of all mercury and other contaminants caused by the use of the drum-top lamp crusher. A report documenting the decontamination steps as well as supporting analytical data demonstrating successful remediation shall be submitted to the Director for approval within 30 days following completion of decontamination.

(6) The small quantity handler shall provide a closure plan along with a detailed written estimate, in current dollars, of the cost of disposing of the drum-top lamp crusher; decontamination of the area surrounding the drum-top lamp crusher, and any analytical costs required to show that decontamination is complete. Drum-top lamp crushers operated by the state or the federal government are exempt from the cost estimate requirement of Subsection R315-273-13(d)(6).

(7) The small quantity handler shall demonstrate financial assurance for the detailed cost estimates determined in Subsection R315-273-13(d)(6) using one of the options in Subsections R315-261-143(a) through (e). Drum-top lamp crushers operated by the state or the federal government are exempt from the financial assurance requirement of Subsection R315-273-13(d)(7).

(8) Crushed universal waste lamps may be managed as universal waste lamps under Rule R315-273 or they may be managed as hazardous waste in accordance with all applicable requirements of Rules R315-260 through 266 and 268.

(e) Antifreeze. A small quantity handler of universal waste shall manage universal waste antifreeze in a way that prevents releases of any universal waste or component of a universal waste to the environment. The universal waste antifreeze shall be contained in one or more of the following:

(1) A container that remains closed, structurally sound, compatible with the antifreeze, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; or

(2) A container that does not meet the requirements of Subsection R315-273-13(e)(1), provided that the unacceptable container is overpacked in a container that does meet the requirements of Subsection R315-273-13(e)(1); or

(3) A tank that meets the requirements of 40 CFR 265.190 through 202, except for 40 CFR 265.197(c) and 40 CFR 265.200 and 201, 40 CFR 265 is adopted by reference in R315-265; or

(4) A transport vehicle or vessel that is closed, structurally sound, compatible with the antifreeze, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(f) Aerosol cans. A small quantity handler of universal waste shall manage universal waste aerosol cans in a way that prevents release of any universal waste or component of a universal waste or accelerant to the environment as follows:

(1) A small quantity handler of universal waste shall immediately contain any universal waste aerosol can that shows evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions in a separate individual container. The individual container shall be closed, structurally sound, compatible with the contents of the universal waste aerosol can, and shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(2) A small quantity handler of universal waste may accumulate universal waste aerosol cans in a specially designated accumulation container provided it is clearly marked for such use. The accumulation container shall be closed, structurally sound, compatible with the contents of the universal waste aerosol can, and shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions. The universal waste aerosol cans shall be sorted by type and compatibility of contents to ensure that incompatible materials are segregated and managed appropriately in separate accumulation containers.

(3) A small quantity handler of universal waste may puncture universal waste aerosol cans to remove and collect the contents of the aerosol can provided the handler:

(i) Ensures that the universal waste aerosol can is punctured in a manner designed to prevent the release of any universal waste or component of universal waste or accelerant to the environment;

(ii) Ensures that the puncturing operations are performed safely by developing and implementing a written procedure detailing how to safely puncture universal waste aerosol cans. This procedure shall include:

(A) the type of equipment to be used to puncture the universal waste aerosol cans safely;

(B) operation and maintenance of the unit;

(C) segregation of incompatible wastes;

(D) proper waste management practices, i.e., ensuring that flammable wastes are stored away from heat or open flames; and

(E) waste characterization;

(iii) Ensures that a spill clean-up kit is readily available to immediately clean up spills or leaks of the contents of the universal waste aerosol can which may occur during the can-puncturing operation;

(iv) Immediately transfers the contents of the universal waste aerosol can, or puncturing device if applicable, to a container that meets the requirements of Section R315-262-34;

(v) Ensures that the area in which the universal waste aerosol cans are punctured is well ventilated; and

(vi) Ensures that employees are thoroughly familiar with the procedure for sorting and puncturing universal waste aerosol cans, and proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

(4)(i) A small quantity handler of universal waste who punctures universal waste aerosol cans to remove the contents of the aerosol can, or who generates other solid waste as a result of the activities listed above, shall determine whether the contents of the universal waste aerosol can, residues and/or other solid wastes exhibit a characteristic of hazardous waste identified in Sections R315-261-20 through 24, or are listed as a hazardous waste identified in Sections R315-261-30 through 35.

(ii) If the contents of the universal waste aerosol can, residues and/or other solid waste exhibit a characteristic of hazardous waste or are listed hazardous wastes, they shall be managed in compliance with all applicable requirements of Rules R315-260 through 266, 268, 270 and 124. The handler is considered the generator of the contents of the universal waste aerosol can, residues, and/or other waste and is subject to the requirements of Rule R315-262. In addition to the Rule R315-262 labeling requirements, the container used to accumulate, store, or transport the hazardous waste contents removed from the punctured universal waste aerosol can shall be labeled with all applicable EPA Hazardous Waste Codes found in Sections R315-261-20 through 24 and Sections R315-261-30 through 35.

(iii) If the contents of the universal waste aerosol can, residues, and/or other solid waste are not hazardous, the handler may manage the waste in a way that is in compliance with applicable federal, state or local solid waste regulations.

R315-273-14. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Labeling/Marking.

A small quantity handler of universal waste shall label or mark the universal waste to identify the type of universal waste as specified below:

(a) Universal waste batteries, i.e., each battery, or a container in which the batteries are contained, shall be labeled or marked clearly with any one of the following phrases: "Universal Waste-Battery(ies)," or "Waste Battery(ies)," or "Used Battery(ies);"

(b) A container, or multiple container package unit, tank, transport vehicle or vessel in which recalled universal waste pesticides as described in Subsection R315-273-3(a)(1) are contained shall be labeled or marked clearly with:

(1) The label that was on or accompanied the product as sold or distributed; and

(2) The words "Universal Waste-Pesticide(s)" or "Waste-Pesticide(s);"

(c) A container, tank, or transport vehicle or vessel in which unused pesticide products as described in Subsection R315-273-3(a)(2) are contained shall be labeled or marked clearly with:

(1)(i) The label that was on the product when purchased, if still legible;

(ii) If using the labels described in Subsection R315-273-14(c)(1)(i) is not feasible, the appropriate label as required under the Department of Transportation regulation 49 CFR part 172;

(iii) If using the labels described in Subsections R315-273-14(c)(1)(i) and (ii) is not feasible, another label prescribed or designated by the waste pesticide collection program administered or recognized by a state; and

(2) The words "Universal Waste-Pesticide(s)" or "Waste-Pesticide(s)."

(d)(1) Universal waste mercury-containing equipment, i.e., each device, or a container in which the equipment is contained, shall be labeled or marked clearly with any of the following phrases: "Universal Waste-Mercury Containing Equipment," "Waste Mercury-Containing Equipment," or "Used Mercury-Containing Equipment."

(2) A universal waste mercury-containing thermostat or container containing only universal waste mercury-containing thermostats may be labeled or marked clearly with any of the following phrases: "Universal Waste-Mercury Thermostat(s)," "Waste Mercury Thermostat(s)," or "Used Mercury Thermostat(s)."

(e) Each lamp or a container or package in which such lamps are contained shall be labeled or marked clearly with one of the following phrases: "Universal Waste-Lamp(s)," or "Waste Lamp(s)," or "Used Lamp(s)".

(f) A container, tank, or transport vehicle or vessel in which antifreeze is contained shall be labeled or marked clearly with the words "Universal Waste- antifreeze" or "Waste- antifreeze."

(g) Universal waste aerosol cans, i.e., each can, or a container in which the universal waste aerosol cans are contained or accumulated, shall be labeled or marked clearly with any one of the following phrases: "Universal Waste-Aerosol Can(s)", or "Waste Aerosol Can(s)".

R315-273-15. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Accumulation Time Limits.

(a) A small quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, or received from another handler, unless the requirements of Subsection R315-273-15(b) are met.

(b) A small quantity handler of universal waste may accumulate universal waste for longer than one year from the date the universal waste is generated, or received from another handler, if such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal. However, the handler bears the burden of proving that such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal.

(c) A small quantity handler of universal waste who accumulates universal waste shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received. The handler may make this demonstration by:

(1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received;

(2) Marking or labeling each individual item of universal waste with the date it became a waste or was received;

(3) Maintaining an inventory system on-site that identifies the date each universal waste became a waste or was received;

(4) Maintaining an inventory system on-site that identifies the earliest date that any universal waste in a group of universal waste items or a group of containers of universal waste became a waste or was received;

(5) Placing the universal waste in a specific accumulation area and identifying the earliest date that any universal waste in the area became a waste or was received; or

(6) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it becomes a waste or is received.

R315-273-16. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Employee Training.

A small quantity handler of universal waste shall inform all employees who handle or have responsibility for managing universal waste. The information shall describe proper handling and emergency procedures appropriate to the type(s) of universal waste handled at the facility.

R315-273-17. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Response to Releases.

(a) A small quantity handler of universal waste shall immediately contain all releases of universal wastes and other residues from universal wastes.

(b) A small quantity handler of universal waste shall determine whether any material resulting from the release is hazardous waste, and if so, shall manage the hazardous waste in compliance with all applicable requirements of Rules R315-260 through 266, 268 and 270. The handler is considered the generator of the material resulting from the release, and shall manage it in compliance with Rule R315-262.

R315-273-18. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Off-Site Shipments.

(a) A small quantity handler of universal waste is prohibited from sending or taking universal waste to a place other than another universal waste handler, a destination facility, or a foreign destination.

(b) If a small quantity handler of universal waste self-transports universal waste off-site, the handler becomes a universal waste transporter for those self-transportation activities and shall comply with the transporter requirements of Sections R315-273-50 through 56 while transporting the universal waste.

(c) If a universal waste being offered for off-site transportation meets the definition of hazardous materials under 49 CFR parts 171 through 180, a small quantity handler of universal waste shall package, label, mark and placard the shipment, and prepare the proper shipping papers in accordance with the applicable Department of Transportation regulations under 49 CFR parts 172 through 180;

(d) Prior to sending a shipment of universal waste to another universal waste handler, the originating handler shall ensure that the receiving handler agrees to receive the shipment.

(e) If a small quantity handler of universal waste sends a shipment of universal waste to another handler or to a destination facility and the shipment is rejected by the receiving handler or destination facility, the originating handler shall either:

(1) Receive the waste back when notified that the shipment has been rejected, or

(2) Agree with the receiving handler on a destination facility to which the shipment will be sent.

(f) A small quantity handler of universal waste may reject a shipment containing universal waste, or a portion of a shipment containing universal waste that he has received from another handler. If a handler rejects a shipment or a portion of a shipment, he shall contact the originating handler to notify him of the rejection and to discuss reshipment of the load. The handler shall:

(1) Send the shipment back to the originating handler, or

(2) If agreed to by both the originating and receiving handler, send the shipment to a destination facility.

(g) If a small quantity handler of universal waste receives a shipment containing hazardous waste that is not a universal waste, the handler shall immediately notify the Director of the illegal shipment, and provide the name, address, and phone number of the originating shipper. The Director shall provide instructions for managing the hazardous waste.

(h) If a small quantity handler of universal waste receives a shipment of non-hazardous, non-universal waste, the handler may manage the waste in any way that is in compliance with applicable federal, state or local solid waste regulations.

R315-273-19. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Tracking Universal Waste Shipments.

A small quantity handler of universal waste is not required to keep records of shipments of universal waste.

R315-273-20. Standards for Universal Waste Management, Standards for Small Quantity Handlers of Universal Waste -- Exports.

A small quantity handler of universal waste who sends universal waste to a foreign destination other than to those OECD countries specified in Subsection R315-262-58(a)(1), in which case the handler is subject to the requirements of Sections R315-262-80 through 89, shall:

(a) Comply with the requirements applicable to a

primary exporter in Section R315-262-53, Subsections R315-262-56(a)(1) through (4), (6), and (b) and Section R315-262-57;

(b) Export such universal waste only upon consent of the receiving country and in conformance with the EPA Acknowledgement of Consent as defined in Sections R315-262-50 through 58; and

(c) Provide a copy of the EPA Acknowledgment of Consent for the shipment to the transporter transporting the shipment for export.

R315-273-30. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Applicability.

Sections R315-273-30 through 40 apply to large quantity handlers of universal waste, as defined in Section R315-273-9 except that the registration requirement of Subsection R315-273-33(d)(3) and Subsections R315-273-33(d)(6) and (7) do not apply to generators.

R315-273-31. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Prohibitions.

A large quantity handler of universal waste is:

(a) Prohibited from disposing of universal waste; and

(b) Prohibited from diluting or treating universal waste, except by responding to releases as provided in Section R315-273-37; or by managing specific wastes as provided in Section R315-273-33.

R315-273-32. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Notification.

(a)(1) Except as provided in Subsections R315-273-32(a)(2) and (3), a large quantity handler of universal waste shall have sent written notification of universal waste management to the Director, and received an EPA Identification Number, before meeting or exceeding the 5,000 kilogram storage limit.

(2) A large quantity handler of universal waste who has already notified the Director of his hazardous waste management activities and has received an EPA Identification Number is not required to renotify under this section except as required in Subsection R315-273-33(d)(3).

(3) A large quantity handler of universal waste who manages recalled universal waste pesticides as described in Subsection R315-273-3(a)(1) and who has sent notification to EPA as required by 40 CFR part 165 is not required to notify for those recalled universal waste pesticides under this section.

(b) This notification shall include:

(1) The universal waste handler's name and mailing address;

(2) The name and business telephone number of the person at the universal waste handler's site who should be contacted regarding universal waste management activities;

(3) The address or physical location of the universal waste management activities;

(4) A list of all the types of universal waste managed by the handler; and

(5) A statement indicating that the handler is accumulating more than 5,000 kilograms of universal waste at one time.

R315-273-33. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Waste Management.

(a) Batteries. A large quantity handler of universal waste shall manage universal waste batteries in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

(1) A large quantity handler of universal waste shall contain any universal waste battery that shows evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions in a container. The container shall be closed, structurally sound, compatible with the contents of the battery, and shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(2) A large quantity handler of universal waste may conduct the following activities as long as the casing of each individual battery cell is not breached and remains intact and closed, except that cells may be opened to remove electrolyte but shall be immediately closed after removal:

(i) Sorting batteries by type;

(ii) Mixing battery types in one container;

(iii) Discharging batteries so as to remove the electric charge;

(iv) Regenerating used batteries;

(v) Disassembling batteries or battery packs into individual batteries or cells;

(vi) Removing batteries from consumer products; or

(vii) Removing electrolyte from batteries.

(3) A large quantity handler of universal waste who removes electrolyte from batteries, or who generates other solid waste, e.g., battery pack materials, discarded consumer products, as a result of the activities listed above, shall determine whether the electrolyte and/or other solid waste exhibit a characteristic of hazardous waste identified in Sections R315-261-20 through 24.

(i) If the electrolyte and/or other solid waste exhibit a characteristic of hazardous waste, it shall be managed in compliance with all applicable requirements of Rules R315-260 through 266, 268 and 270. The handler is considered the generator of the hazardous electrolyte and/or other waste and is subject to Rule R315-262.

(ii) If the electrolyte or other solid waste is not hazardous, the handler may manage the waste in any way that is in compliance with applicable federal, state or local solid waste regulations.

(b) Pesticides. A large quantity handler of universal waste shall manage universal waste pesticides in a way that prevents releases of any universal waste or component of a universal waste to the environment. The universal waste pesticides shall be contained in one or more of the following:

(1) A container that remains closed, structurally sound, compatible with the pesticide, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; or

(2) A container that does not meet the requirements of Subsection R315-273-33(b)(1), provided that the unacceptable container is overpacked in a container that does meet the requirements of Subsection R315-273-33(b)(1); or

(3) A tank that meets the requirements of 40 CFR 265.190 through 202, except for 40 CFR 265.197(c) and 40 CFR 265.200 and 201, 40 CFR 265 is adopted by reference in R315-265; or

(4) A transport vehicle or vessel that is closed, structurally sound, compatible with the pesticide, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(c) Mercury-containing equipment. A large quantity handler of universal waste shall manage universal waste mercury-containing equipment in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

(1) A large quantity handler of universal waste shall place in a container any universal waste mercury-containing

equipment with non-contained elemental mercury or that shows evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions. The container shall be closed, structurally sound, compatible with the contents of the device, shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions, and shall be reasonably designed to prevent the escape of mercury into the environment by volatilization or any other means.

(2) A large quantity handler of universal waste may remove mercury-containing ampules from universal waste mercury-containing equipment provided the handler:

(i) Removes and manages the ampules in a manner designed to prevent breakage of the ampules;

(ii) Removes the ampules only over or in a containment device, e.g., tray or pan sufficient to collect and contain any mercury released from an ampule in case of breakage;

(iii) Ensures that a mercury clean-up system is readily available to immediately transfer any mercury resulting from spills or leaks of broken ampules from that containment device to a container that meets the requirements of Section R315-262-34;

(iv) Immediately transfers any mercury resulting from spills or leaks from broken ampules from the containment device to a container that meets the requirements of Section R315-262-34;

(v) Ensures that the area in which ampules are removed is well ventilated and monitored to ensure compliance with applicable OSHA exposure levels for mercury;

(vi) Ensures that employees removing ampules are thoroughly familiar with proper waste mercury handling and emergency procedures, including transfer of mercury from containment devices to appropriate containers;

(vii) Stores removed ampules in closed, non-leaking containers that are in good condition;

(viii) Packs removed ampules in the container with packing materials adequate to prevent breakage during storage, handling, and transportation;

(3) A large quantity handler of universal waste mercury-containing equipment that does not contain an ampule may remove the open original housing holding the mercury from universal waste mercury-containing equipment provided the handler:

(i) Immediately seals the original housing holding the mercury with an air-tight seal to prevent the release of any mercury to the environment; and

(ii) Follows all requirements for removing ampules and managing removed ampules under Subsection R315-273-33(c)(2); and

(4)(i) A large quantity handler of universal waste who removes mercury-containing ampules from mercury-containing equipment or seals mercury from mercury-containing equipment in its original housing shall determine whether the following exhibit a characteristic of hazardous waste identified in Sections R315-261-20 through 24:

(A) Mercury or clean-up residues resulting from spills or leaks and/or

(B) Other solid waste generated as a result of the removal of mercury-containing ampules or housings, e.g., the remaining mercury-containing device.

(ii) If the mercury, residues, and/or other solid waste exhibits a characteristic of hazardous waste, it shall be managed in compliance with all applicable requirements of Rules R315-260 through 266, 268 and 270. The handler is considered the generator of the mercury, residues, and/or other waste and shall manage it in compliance with Rule R315-262.

(iii) If the mercury, residues, and/or other solid waste is not hazardous, the handler may manage the waste in any way that is in compliance with applicable federal, state or local solid waste regulations.

(d) Lamps. A large quantity handler of universal waste shall manage lamps in a way that prevents releases of any universal waste or component of a universal waste to the environment, as follows:

(1) A large quantity handler of universal waste shall contain any lamp in containers or packages that are structurally sound, adequate to prevent breakage, and compatible with the contents of the lamps. Such containers and packages shall remain closed and shall lack evidence of leakage, spillage or damage that could cause leakage under reasonably foreseeable conditions.

(2) A large quantity handler of universal waste shall immediately clean up and place in a container any lamp that is broken and shall place in a container any lamp that shows evidence of breakage, leakage, or damage that could cause the release of mercury or other hazardous constituents to the environment. Containers shall be closed, structurally sound, compatible with the contents of the lamps and shall lack evidence of leakage, spillage or damage that could cause leakage or releases of mercury or other hazardous constituents to the environment under reasonably foreseeable conditions.

(3) A large quantity handler of universal waste may crush universal waste lamps using a drum-top lamp crusher designed specifically for crushing lamps provided that the Large quantity handler submits a drum-top lamp crusher registration application to and receives approval from the Director. The registration application shall demonstrate that the large quantity handler shall operate the drum-top lamp crusher to ensure the following:

(i) The lamps are crushed in a closed accumulation container designed specifically for crushing lamps;

(ii) The lamps are crushed in a controlled manner that prevents the release of mercury vapor or other contaminants in exceedance of the manufacturer's specifications;

(iii) The drum-top lamp crusher shall consist of a bag filter followed in series by a HEPA filter and an activated carbon filter;

(iv) The drum-top lamp crusher is installed, maintained, and operated in accordance with written procedures developed by the manufacturer of the equipment including specific instructions for the frequency of filter changes;

(v) Filters are either characterized to demonstrate that they are not a hazardous waste or managed as a hazardous waste;

(vi) A spill clean-up kit is available;

(vii) The area in which the drum-top crusher is operated is well ventilated and monitored to ensure compliance with applicable OSHA exposure levels for mercury;

(viii) The employee using the drum-top lamp crusher is trained annually on the written operating, safety, personal protection and maintenance procedures of the system;

(ix) The employee using the drum-top lamp crusher is trained annually in emergency procedures;

(x) An operating record is kept and consists of the following:

(A) the number and size of lamps crushed per calendar day, per calendar month, and per calendar year;

(B) the schedule for the change out of filters;

(C) date and time of filter change out;

(D) date, type, and time of equipment maintenance;

(E) any occurrence of equipment malfunction; and

(F) procedures for preventing equipment malfunctions.

(4) The operating record shall be maintained for at least three years.

(5) When a drum-top crusher is no longer used or is relocated, the area where the crusher was located shall be decontaminated of all mercury and other contaminants caused

by the use of the drum-top lamp crusher. A report documenting the decontamination steps as well as supporting analytical data demonstrating successful remediation shall be submitted to the Director for approval within 30 days following completion of decontamination.

(6) The large quantity handler shall provide a closure plan along with a detailed written estimate, in current dollars, of the cost of disposing the drum-top lamp crusher; decontamination of the area surrounding the drum-top lamp crusher, and any analytical costs required to show that decontamination is complete. Drum-top lamp crushers operated by the state or the federal government are exempt from the cost estimate requirement of Subsection R315-273-33(d)(6).

(7) The large quantity handler shall demonstrate financial assurance for the detailed cost estimates determined in Subsection R315-273-33(d)(6) using one of the options in Subsections R315-261-143(a) through (e). Drum-top lamp crushers operated by the state or the federal government are exempt from the financial assurance requirement of Subsection R315-273-33(d)(7).

(8) Crushed universal waste lamps may be managed as universal waste lamps under Rule R315-273 or they may be managed as hazardous waste in accordance with all applicable requirements of Rules R315-260 through 266 and 268.

(e) Antifreeze. A large quantity handler of universal waste shall manage universal waste antifreeze in a way that prevents releases of any universal waste or component of a universal waste to the environment. The universal waste antifreeze shall be contained in one or more of the following:

(1) A container that remains closed, structurally sound, compatible with the antifreeze, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions; or

(2) A container that does not meet the requirements of Subsection R315-273-13(e)(1), provided that the unacceptable container is overpacked in a container that does meet the requirements of Subsection R315-273-13(e)(1); or

(3) A tank that meets the requirements of 40 CFR 265.190 through 202, except for 40 CFR 265.197(c) and 40 CFR 265.200 and 201, 40 CFR 265 is adopted by reference in R315-265; or

(4) A transport vehicle or vessel that is closed, structurally sound, compatible with the antifreeze, and that lacks evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(f) Aerosol cans. A large quantity handler of universal waste shall manage universal waste aerosol cans in a way that prevents release of any universal waste or component of a universal waste or accelerant to the environment as follows:

(1) A large quantity handler of universal waste shall immediately contain any universal waste aerosol can that shows evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions in a separate individual container. The individual container shall be closed, structurally sound, compatible with the contents of the universal waste aerosol can, and shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions.

(2) A large quantity handler of universal waste may accumulate universal waste aerosol cans in a specially designated accumulation container provided it is clearly marked for such use. The accumulation container shall be closed, structurally sound, compatible with the contents of the universal waste aerosol can, and shall lack evidence of leakage, spillage, or damage that could cause leakage under reasonably foreseeable conditions. The universal waste aerosol cans shall be sorted by type and compatibility of contents to ensure that incompatible materials are segregated and managed appropriately in separate accumulation containers.

(3) A large quantity handler of universal waste may puncture universal waste aerosol cans to remove and collect the contents of the aerosol can provided the handler:

(i) Ensures that the universal waste aerosol can is punctured in a manner designed to prevent the release of any universal waste or component of universal waste or accelerant to the environment;

(ii) Ensures that the puncturing operations are performed safely by developing and implementing a written procedure detailing how to safely puncture universal waste aerosol cans. This procedure shall include:

(A) the type of equipment to be used to puncture the universal waste aerosol cans safely;

(B) operation and maintenance of the unit;

(C) segregation of incompatible wastes;

(D) proper waste management practices, i.e., ensuring that flammable wastes are stored away from heat or open flames; and

(E) waste characterization;

(iii) Ensures that a spill clean-up kit is readily available to immediately clean up spills or leaks of the contents of the universal waste aerosol can which may occur during the can-puncturing operation;

(iv) Immediately transfers the contents of the universal waste aerosol can, or puncturing device if applicable, to a container that meets the requirements of Section R315-262-34;

(v) Ensures that the area in which the universal waste aerosol cans are punctured is well ventilated; and

(vi) Ensures that employees are thoroughly familiar with the procedure for sorting and puncturing universal waste aerosol cans, and proper waste handling and emergency procedures, relevant to their responsibilities during normal facility operations and emergencies.

(4)(i) A large quantity handler of universal waste who punctures universal waste aerosol cans to remove the contents of the aerosol can, or who generates other solid waste as a result of the activities listed above, shall determine whether the contents of the universal waste aerosol can, residues and/or other solid wastes exhibit a characteristic of hazardous waste identified in Sections R315-261-20 through 24, or are listed as a hazardous waste identified in Sections R315-261-30 through 35.

(ii) If the contents of the universal waste aerosol can, residues and/or other solid waste exhibit a characteristic of hazardous waste or are listed hazardous wastes, they shall be managed in compliance with all applicable requirements of Rules R315-260 through 266, 268, 270 and 124. The handler is considered the generator of the contents of the universal waste aerosol can, residues, and/or other waste and is subject to the requirements of Rule R315-262. In addition to the Rule R315-262 labeling requirements, the container used to accumulate, store, or transport the hazardous waste contents removed from the punctured universal waste aerosol can shall be labeled with all applicable EPA Hazardous Waste Codes found in Sections R315-261-20 through 24 and Sections R315-261-30 through 35.

(iii) If the contents of the universal waste aerosol can, residues, and/or other solid waste are not hazardous, the handler may manage the waste in a way that is in compliance with applicable federal, state or local solid waste regulations.

R315-273-34. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Labeling/Marking.

A large quantity handler of universal waste shall label or mark the universal waste to identify the type of universal

waste as specified below:

(a) Universal waste batteries, i.e., each battery, or a container or tank in which the batteries are contained, shall be labeled or marked clearly with any one of the following phrases: "Universal Waste-Battery(ies)," or "Waste Battery(ies)," or "Used Battery(ies);"

(b) A container, or multiple container package unit, tank, transport vehicle or vessel in which recalled universal waste pesticides as described in Subsection R315-273-3(a)(1) are contained shall be labeled or marked clearly with:

(1) The label that was on or accompanied the product as sold or distributed; and

(2) The words "Universal Waste-Pesticide(s)" or "Waste-Pesticide(s);"

(c) A container, tank, or transport vehicle or vessel in which unused pesticide products as described in Subsection R315-273-3(a)(2) are contained shall be labeled or marked clearly with:

(1)(i) The label that was on the product when purchased, if still legible;

(ii) If using the labels described in Subsection R315-273-34(c)(1)(i) is not feasible, the appropriate label as required under the Department of Transportation regulation 49 CFR part 172;

(iii) If using the labels described in Subsections R315-273-34(c)(1)(i) and (1)(ii) is not feasible, another label prescribed or designated by the pesticide collection program; and

(2) The words "Universal Waste-Pesticide(s)" or "Waste-Pesticide(s)."

(d)(1) Mercury-containing equipment, i.e., each device, or a container in which the equipment is contained, shall be labeled or marked clearly with any of the following phrases: "Universal Waste-Mercury Containing Equipment," "Waste Mercury-Containing Equipment," or "Used Mercury-Containing Equipment."

(2) A universal waste mercury-containing thermostat or container containing only universal waste mercury-containing thermostats may be labeled or marked clearly with any of the following phrases: "Universal Waste-Mercury Thermostat(s)," "Waste Mercury Thermostat(s)," or "Used Mercury Thermostat(s)."

(e) Each lamp or a container or package in which such lamps are contained shall be labeled or marked clearly with any one of the following phrases: "Universal Waste-Lamp(s)," or "Waste Lamp(s)," or "Used Lamp(s)".

(f) A container, tank, or transport vehicle or vessel in which antifreeze is contained shall be labeled or marked clearly with the words "Universal Waste- antifreeze" or "Waste- antifreeze."

(g) Universal waste aerosol cans, i.e., each can, or a container in which the universal waste aerosol cans are contained or accumulated, shall be labeled or marked clearly with any one of the following phrases: "Universal Waste-Aerosol Can(s)", or "Waste Aerosol Can(s)".

R315-273-35. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Accumulation Time Limits.

(a) A large quantity handler of universal waste may accumulate universal waste for no longer than one year from the date the universal waste is generated, or received from another handler, unless the requirements of Subsection R315-273-35(b) are met.

(b) A large quantity handler of universal waste may accumulate universal waste for longer than one year from the date the universal waste is generated, or received from another handler, if such activity is solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal. However, the handler bears the burden of proving that such activity was solely for the purpose of accumulation of such quantities of universal waste as necessary to facilitate proper recovery, treatment, or disposal.

(c) A large quantity handler of universal waste shall be able to demonstrate the length of time that the universal waste has been accumulated from the date it becomes a waste or is received. The handler may make this demonstration by:

(1) Placing the universal waste in a container and marking or labeling the container with the earliest date that any universal waste in the container became a waste or was received;

(2) Marking or labeling the individual item of universal waste, e.g., each battery or thermostat, with the date it became a waste or was received;

(3) Maintaining an inventory system on-site that identifies the date the universal waste being accumulated became a waste or was received;

(4) Maintaining an inventory system on-site that identifies the earliest date that any universal waste in a group of universal waste items or a group of containers of universal waste became a waste or was received;

(5) Placing the universal waste in a specific accumulation area and identifying the earliest date that any universal waste in the area became a waste or was received; or

(6) Any other method which clearly demonstrates the length of time that the universal waste has been accumulated from the date it becomes a waste or is received.

R315-273-36. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Employee Training.

A large quantity handler of universal waste shall ensure that all employees are thoroughly familiar with proper waste handling and emergency procedures, relative to their responsibilities during normal facility operations and emergencies.

R315-273-37. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Response To Releases.

(a) A large quantity handler of universal waste shall immediately contain all releases of universal wastes and other residues from universal wastes.

(b) A large quantity handler of universal waste shall determine whether any material resulting from the release is hazardous waste, and if so, shall manage the hazardous waste in compliance with all applicable requirements of Rules R315-260 through 266, 268 and 270. The handler is considered the generator of the material resulting from the release, and is subject to Rule R315-262.

R315-273-38. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Off-Site Shipments.

(a) A large quantity handler of universal waste is prohibited from sending or taking universal waste to a place other than another universal waste handler, a destination facility, or a foreign destination.

(b) If a large quantity handler of universal waste self-transports universal waste off-site, the handler becomes a universal waste transporter for those self-transportation activities and shall comply with the transporter requirements of Sections R315-273-50 through 56 while transporting the universal waste.

(c) If a universal waste being offered for off-site transportation meets the definition of hazardous materials under 49 CFR 171 through 180, a large quantity handler of

universal waste shall package, label, mark and placard the shipment, and prepare the proper shipping papers in accordance with the applicable Department of Transportation regulations under 49 CFR parts 172 through 180;

(d) Prior to sending a shipment of universal waste to another universal waste handler, the originating handler shall ensure that the receiving handler agrees to receive the shipment.

(e) If a large quantity handler of universal waste sends a shipment of universal waste to another handler or to a destination facility and the shipment is rejected by the receiving handler or destination facility, the originating handler shall either:

(1) Receive the waste back when notified that the shipment has been rejected, or

(2) Agree with the receiving handler on a destination facility to which the shipment will be sent.

(f) A large quantity handler of universal waste may reject a shipment containing universal waste, or a portion of a shipment containing universal waste that he has received from another handler. If a handler rejects a shipment or a portion of a shipment, he shall contact the originating handler to notify him of the rejection and to discuss reshipment of the load. The handler shall:

(1) Send the shipment back to the originating handler, or

(2) If agreed to by both the originating and receiving handler, send the shipment to a destination facility.

(g) If a large quantity handler of universal waste receives a shipment containing hazardous waste that is not a universal waste, the handler shall immediately notify the Director of the illegal shipment, and provide the name, address, and phone number of the originating shipper. The Director shall provide instructions for managing the hazardous waste.

(h) If a large quantity handler of universal waste receives a shipment of non-hazardous, non-universal waste, the handler may manage the waste in any way that is in compliance with applicable federal, state or local solid waste regulations.

R315-273-39. Standards for Universal Waste Management, Standards For Large Quantity Handlers Of Universal Waste -- Tracking Universal Waste Shipments.

(a) Receipt of shipments. A large quantity handler of universal waste shall keep a record of each shipment of universal waste received at the facility. The record may take the form of a log, invoice, manifest, bill of lading, or other shipping document. The record for each shipment of universal waste received shall include the following information:

(1) The name and address of the originating universal waste handler or foreign shipper from whom the universal waste was sent;

(2) The quantity of each type of universal waste received;

(3) The date of receipt of the shipment of universal waste.

(b) Shipments off-site. A large quantity handler of universal waste shall keep a record of each shipment of universal waste sent from the handler to other facilities. The record may take the form of a log, invoice, manifest, bill of lading or other shipping document. The record for each shipment of universal waste sent shall include the following information:

(1) The name and address of the universal waste handler, destination facility, or foreign destination to whom the universal waste was sent;

(2) The quantity of each type of universal waste sent;

(3) The date the shipment of universal waste left the facility.

(c) Record retention.

(1) A large quantity handler of universal waste shall retain the records described in Subsection R315-273-39(a) for at least three years from the date of receipt of a shipment of universal waste.

(2) A large quantity handler of universal waste shall retain the records described in Subsection R315-273-39(b) for at least three years from the date a shipment of universal waste left the facility.

R315-273-40. Standards for Universal Waste Management, Standards for Large Quantity Handlers of Universal Waste -- Exports.

A large quantity handler of universal waste who sends universal waste to a foreign destination other than to those OECD countries specified in Subsection R315-262-58(a)(1), in which case the handler is subject to the requirements of Sections R315-262-80 through 89, shall:

(a) Comply with the requirements applicable to a primary exporter in Section R315-262-53, Subsections R315-262-56(a)(1) through (4), (6), and (b) and Section R315-262-57;

(b) Export such universal waste only upon consent of the receiving country and in conformance with the EPA Acknowledgement of Consent as defined in Sections R315-262-50 through 58; and

(c) Provide a copy of the EPA Acknowledgement of Consent for the shipment to the transporter transporting the shipment for export.

R315-273-50. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Applicability.

Sections R315-273-50 through 56 apply to universal waste transporters, as defined in Section R315-273-9.

R315-273-51. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Prohibitions.

A universal waste transporter is:

(a) Prohibited from disposing of universal waste; and

(b) Prohibited from diluting or treating universal waste, except by responding to releases as provided in Section R315-273-54.

R315-273-52. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Waste Management.

(a) A universal waste transporter shall comply with all applicable U.S. Department of Transportation regulations in 49 CFR part 171 through 180 for transport of any universal waste that meets the definition of hazardous material in 49 CFR 171.8. For purposes of the Department of Transportation regulations, a material is considered a hazardous waste if it is subject to the Hazardous Waste Manifest Requirements of Rule R315-262. Because universal waste does not require a hazardous waste manifest, it is not considered hazardous waste under the Department of Transportation regulations.

(b) Some universal waste materials are regulated by the Department of Transportation as hazardous materials because they meet the criteria for one or more hazard classes specified in 49 CFR 173.2. As universal waste shipments do not require a manifest under Rule R315-262, they may not be described by the DOT proper shipping name "hazardous waste, (l) or (s), n.o.s.", nor may the hazardous material's proper shipping name be modified by adding the word "waste".

R315-273-53. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Storage Time Limits.

(a) A universal waste transporter may only store the universal waste at a universal waste transfer facility for ten days or less.

(b) If a universal waste transporter stores universal waste for more than ten days, the transporter becomes a universal waste handler and shall comply with the applicable requirements of Sections R315-273-10 through 20 and 30 through 40 while storing the universal waste.

R315-273-54. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Response to Releases.

(a) A universal waste transporter shall immediately contain all releases of universal wastes and other residues from universal wastes.

(b) A universal waste transporter shall determine whether any material resulting from the release is hazardous waste, and if so, it is subject to all applicable requirements of Rules R315-260 through 266, 268 and 270. If the waste is determined to be a hazardous waste, the transporter is subject to Rule R315-262.

R315-273-55. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Off-site Shipments.

(a) A universal waste transporter is prohibited from transporting the universal waste to a place other than a universal waste handler, a destination facility, or a foreign destination.

(b) If the universal waste being shipped off-site meets the Department of Transportation's definition of hazardous materials under 49 CFR 171.8, the shipment shall be properly described on a shipping paper in accordance with the applicable Department of Transportation regulations under 49 CFR part 172.

R315-273-56. Standards for Universal Waste Management, Standards for Universal Waste Transporters -- Exports.

A universal waste transporter transporting a shipment of universal waste to a foreign destination other than to those OECD countries specified in Subsection R315-262-58(a)(1), in which case the transporter is subject to the requirements of Sections R315-262-80 through 89, may not accept a shipment if the transporter knows the shipment does not conform to the EPA Acknowledgment of Consent. In addition the transporter shall ensure that:

(a) A copy of the EPA Acknowledgment of Consent accompanies the shipment; and

(b) The shipment is delivered to the facility designated by the person initiating the shipment.

R315-273-60. Standards for Universal Waste Management, Standards for Destination Facilities -- Applicability.

(a) The owner or operator of a destination facility, as defined in Section R315-273-9, is subject to all applicable requirements of Rules R315-264, 265, 266, 268, 270, and 124, and the notification requirement under section 3010 of RCRA.

(b) The owner or operator of a destination facility that recycles a particular universal waste without storing that universal waste before it is recycled shall comply with Subsection R315-261-6(c)(2).

R315-273-61. Standards for Universal Waste Management, Standards for Destination Facilities -- Off-site Shipments.

(a) The owner or operator of a destination facility is prohibited from sending or taking universal waste to a place other than a universal waste handler, another destination facility or foreign destination.

(b) The owner or operator of a destination facility may reject a shipment containing universal waste, or a portion of a shipment containing universal waste. If the owner or operator of the destination facility rejects a shipment or a portion of a shipment, he shall contact the shipper to notify him of the rejection and to discuss reshipment of the load. The owner or operator of the destination facility shall:

(1) Send the shipment back to the original shipper, or

(2) If agreed to by both the shipper and the owner or operator of the destination facility, send the shipment to another destination facility.

(c) If the owner or operator of a destination facility receives a shipment containing hazardous waste that is not a universal waste, the owner or operator of the destination facility shall immediately notify the Director of the illegal shipment, and provide the name, address, and phone number of the shipper. The Director shall provide instructions for managing the hazardous waste.

(d) If the owner or operator of a destination facility receives a shipment of non-hazardous, non-universal waste, the owner or operator may manage the waste in any way that is in compliance with applicable federal or state solid waste regulations.

R315-273-62. Standards for Universal Waste Management, Standards for Destination Facilities -- Tracking Universal Waste Shipments.

(a) The owner or operator of a destination facility shall keep a record of each shipment of universal waste received at the facility. The record may take the form of a log, invoice, manifest, bill of lading, or other shipping document. The record for each shipment of universal waste received shall include the following information:

(1) The name and address of the universal waste handler, destination facility, or foreign shipper from whom the universal waste was sent;

(2) The quantity of each type of universal waste received;

(3) The date of receipt of the shipment of universal waste.

(b) The owner or operator of a destination facility shall retain the records described in Subsection R315-273-62(a) for at least three years from the date of receipt of a shipment of universal waste.

R315-273-70. Standards for Universal Waste Management -- Imports.

Persons managing universal waste that is imported from a foreign country into the United States are subject to the applicable requirements of Rule R315-273, immediately after the waste enters the United States, as indicated in Subsection R315-273-70(a) through (c):

(a) A universal waste transporter is subject to the universal waste transporter requirements of Sections R315-273-50 through 56.

(b) A universal waste handler is subject to the small or large quantity handler of universal waste requirements of Sections R315-273-10 through 20 or 30 through 40, as applicable.

(c) An owner or operator of a destination facility is subject to the destination facility requirements of Sections R315-273-60 through 62.

(d) Persons managing universal waste that is imported

from an OECD country as specified in Subsection R315-262-58(a)(1) are subject to Subsections R315-273-70(a) through (c), in addition to the requirements of Sections R315-262-80 through 89.

R315-273-80. Standards for Universal Waste Management, Petitions to Include Other Wastes Under Rule R315-273 -- General.

(a) Any person seeking to add a hazardous waste or a category of hazardous waste to Rule R315-273 may petition for a regulatory amendment under Sections R315-273-80 and 81 and Sections R315-260-20 and 23.

(b) To be successful, the petitioner shall demonstrate to the satisfaction of the Board that regulation under the universal waste regulations of Rule R315-273 is: appropriate for the waste or category of waste; will improve management practices for the waste or category of waste; and will improve implementation of the hazardous waste program. The petition shall include the information required by Subsection R315-260-20(b). The petition should also address as many of the factors listed in Section R315-273-81 as are appropriate for the waste or waste category addressed in the petition.

(c) The Board shall evaluate petitions using the factors listed in Section R315-273-81. The Board shall grant or deny a petition using the factors listed in Section R315-273-81. The decision shall be based on the weight of evidence showing that regulation under Rule R315-273 is appropriate for the waste or category of waste, shall improve management practices for the waste or category of waste, and shall improve implementation of the hazardous waste program.

(d) The Board may request additional information needed to evaluate the merits of the petition.

R315-273-81. Standards for Universal Waste Management -- Factors for Petitions to Include Other Wastes Under Rule R315-273.

(a) The waste or category of waste, as generated by a wide variety of generators, is listed in Sections R315-261-30 through 3, or, if not listed, a proportion of the waste stream exhibits one or more characteristics of hazardous waste identified in Sections R315-261-20 through 24. When a characteristic waste is added to the universal waste regulations of this Rule R315-273 by using a generic name to identify the waste category, e.g., batteries, the definition of universal waste in Section R315-260-10 and Section R315-273-9 shal be amended to include only the hazardous waste portion of the waste category, e.g., hazardous waste batteries. Thus, only the portion of the waste stream that does exhibit one or more characteristics, i.e., is hazardous waste, is subject to the universal waste regulations of Rule R315-273;

(b) The waste or category of waste is not exclusive to a specific industry or group of industries, is commonly generated by a wide variety of types of establishments, including, for example, households, retail and commercial businesses, office complexes, conditionally exempt small quantity generators, small businesses, government organizations, as well as large industrial facilities;

(c) The waste or category of waste is generated by a large number of generators, e.g., more than 1,000 nationally, and is frequently generated in relatively small quantities by each generator;

(d) Systems to be used for collecting the waste or category of waste, including packaging, marking, and labeling practices, would ensure close stewardship of the waste;

(e) The risk posed by the waste or category of waste during accumulation and transport is relatively low compared to other hazardous wastes, and specific management standards proposed or referenced by the petitioner, e.g., waste management requirements appropriate to be added to Sections R315-273-13, 33, and 52; and/or applicable Department of Transportation requirements, would be protective of human health and the environment during accumulation and transport;

(f) Regulation of the waste or category of waste under Rule R315-273 will increase the likelihood that the waste will be diverted from non-hazardous waste management systems; e.g., the municipal waste stream, non-hazardous industrial or commercial waste stream, municipal sewer or stormwater systems; to recycling; treatment; or disposal in compliance with Title 19 Chapter 6.

(g) Regulation of the waste or category of waste under Rule R315-273 will improve implementation of and compliance with the hazardous waste regulatory program; and/or

(h) Such other factors as may be appropriate.

KEY: hazardous waste

19-6-106

R315. Environmental Quality, Waste Management and Radiation Control, Waste Management.
R315-319. Coal Combustion Residuals Requirements.
R315-319-1. Permit Required.

(a) All landfills disposing of coal combustion residuals and surface impoundments containing coal combustion residuals shall have a permit for a Class I, II, or V landfill in accordance with Rules R315-302 through 307 or a coal combustion residuals permit issued under Rule R315-319.

(b) An application for a permit for a coal combustion residual landfill or surface impoundment or multiple landfills and impoundments at a facility covered by one permit shall be made to the Director.

(c)(1) An application for a permit a Coal Combustion Residue (CCR) unit shall contain the information required in Sections R315-319-60 through 107. No information need be submitted for which the effective date in Sections R315-319-60 through 107 has not been reached at the time of application submittal.

(2) All information required in Sections R315-319-60 through 107 with an effective date that falls later that the application submittal required in Subsection R315-319-1(c)(1) shall be submitted within six months of the effective date of the requirement found in Sections R315-319-60 through 107.

(d) Permit application procedures shall follow the requirements of Sections R315-310-1 and 2.

(e) Permit transfers shall follow the procedures of Section R315-310-11.

(f) Permit applicants shall follow the notification requirements of Subsection R315-310-3(2).

(g) Permit approvals shall follow the requirements of Rule R315-311.

(h) The Director approvals required in Sections R315-319-60 through 107 are satisfied by the issuance of a permit by the Director.

R315-319-2. Relation to Federal Coal Combustion Residuals Rule in 40 CFR 257.

(a) The compliance dates in 40 CFR 257 Subpart D are not affected by the requirements in Rule R315-319 for director approval except as the extensions allowed by 40CFR 256.26 may be applied by the Director.

R315-319-50. Scope and Applicability.

(a) Rule R315-319 establishes criteria for purposes managing coal combustion residuals in Utah.

(b) Rule R315-319 applies, except as provided in Subsection R315-319-50(i), to owners and operators of new and existing CCR units as defined in Subsection R315-319-53(a)(15). Rule R315-319 applies to any practice that does not meet the definition of a beneficial use of coal combustion residuals.

(c) Rule R315-319 applies to inactive CCR surface impoundments that have not closed prior to the effective date of Rule R315-319.

(d) Rule R315-319 does not apply to coal combustion residual landfills that have ceased receiving coal combustion residuals prior to October 19, 2015.

(e) Rule R315-319 does not apply to electric utilities or independent power producers that have ceased producing electricity prior to October 19, 2015.

(f) Rule R315-319 does not apply to fly ash, bottom ash, boiler slag, and flue gas desulfurization materials, generated primarily from the combustion of fuels, including other fossil fuels, other than coal. Disposal of these solid wastes are covered by Rules R315-301 through 307.

(g) Rule R315-319 does not apply to practices that meet the definition of a beneficial use of coal combustion residuals.

(h) Rule R315-319 does not apply to coal combustion residual placement at active or abandoned underground or surface coal mines.

(i) Rule R315-319 does not apply to Class I or V solid waste landfills that receive coal combustion residuals.

R315-319-51. Effective Date.

The effective date of R315-319 will be based on the approval of the Waste Management and Radiation Control Board after publication in the Utah State Bulletin.

R315-319-52. Applicability of Other Regulations.

(a) Compliance with the requirements of Sections R315-319-50 through 107 does not affect the need for the owner or operator of a coal combustion residuals landfill, coal combustion residuals surface impoundment, or lateral expansion of a coal combustion residuals unit to comply with all other applicable federal, state, tribal, or local laws or other requirements.

(b) Any CCR landfill, CCR surface impoundment, or lateral expansion of a CCR unit continues to be subject to the requirements in Section R315-302-2.

R315-319-53. Definitions.

(a) The following definitions apply to Rule R315-319. Terms not defined in Section R315-319-53 have the meaning given In R315-301.

(1) "Acre foot" means the volume of one acre of surface area to a depth of one foot.

(2) "Active facility or active electric utilities or independent power producers" means any facility subject to the requirements of Sections R315-319-50 through 107 that is in operation on October 14, 2015. An electric utility or independent power producer is in operation if it is generating electricity that is provided to electric power transmission systems or to electric power distribution systems on or after October 14, 2015. An off-site disposal facility is in operation if it is accepting or managing CCR on or after October 14, 2015.

(3) "Active life or in operation" means the period of operation beginning with the initial placement of CCR in the CCR unit and ending at completion of closure activities in accordance with Section R315-319-102.

(4) "Active portion" means that part of the CCR unit that has received or is receiving CCR or non-CCR waste and that has not completed closure in accordance with Section R315-319-102.

(5) "Aquifer" means a geologic formation, group of formations, or portion of a formation capable of yielding usable quantities of groundwater to wells or springs.

(6) "Area-capacity curves" means graphic curves which readily show the reservoir water surface area, in acres, at different elevations from the bottom of the reservoir to the maximum water surface, and the capacity or volume, in acre-feet, of the water contained in the reservoir at various elevations.

(7) "Areas susceptible to mass movement means those areas of influence, i.e., areas characterized as having an active or substantial possibility of mass movement, where, because of natural or human-induced events, the movement of earthen material at, beneath, or adjacent to the CCR unit results in the downslope transport of soil and rock material by means of gravitational influence. Areas of mass movement include, but are not limited to, landslides, avalanches, debris slides and flows, soil fluctuation, block sliding, and rock fall.

(8) "Beneficial use of CCR" means the CCR meet all of the following conditions:

(i) The CCR shall provide a functional benefit;

(ii) The CCR shall substitute for the use of a virgin

material, conserving natural resources that would otherwise need to be obtained through practices, such as extraction;

(iii) The use of the CCR shall meet relevant product specifications, regulatory standards or design standards when available, and when such standards are not available, the CCR is not used in excess quantities; and

(iv) When unencapsulated use of CCR involves placement on the land of 12,400 tons or more in non-roadway applications, the user shall demonstrate and keep records, and provide such documentation upon request, that environmental releases to groundwater, surface water, soil and air are comparable to or lower than those from analogous products made without CCR, or that environmental releases to groundwater, surface water, soil and air will be at or below relevant regulatory and health-based benchmarks for human and ecological receptors during use in accordance with R315-101.

(9) "Closed" means placement of CCR in a CCR unit has ceased, and the owner or operator has completed closure of the CCR unit in accordance with Subsection R315-319-102 and has initiated post-closure care in accordance with Subsection R315-319-104.

(10) "Coal combustion residuals (CCR)" means fly ash, bottom ash, boiler slag, and flue gas desulfurization materials generated from burning coal for the purpose of generating electricity by electric utilities and independent power producers.

(11) "CCR fugitive dust" means solid airborne particulate matter that contains or is derived from CCR, emitted from any source other than a stack or chimney.

(12) "CCR landfill or landfill" means an area of land or an excavation that receives CCR and which is not a surface impoundment, an underground injection well, a salt dome formation, a salt bed formation, an underground or surface coal mine, or a cave. For purposes of Rule R315-319, a CCR landfill also includes sand and gravel pits and quarries that receive CCR, CCR piles, and any practice that does not meet the definition of a beneficial use of CCR.

(13) "CCR pile or pile" means any non-containerized accumulation of solid, non-flowing CCR that is placed on the land. CCR that is beneficially used off-site is not a CCR pile.

(14) "CCR surface impoundment or impoundment" means a natural topographic depression, man-made excavation, or diked area, which is designed to hold an accumulation of CCR and liquids, and the unit treats, stores, or disposes of CCR.

(15) "CCR unit" means any CCR landfill, CCR surface impoundment, or lateral expansion of a CCR unit, or a combination of more than one of these units, based on the context of the paragraph(s) in which it is used. This term includes both new and existing units, unless otherwise specified.

(16) "Dike" means an embankment, berm, or ridge of either natural or man-made materials used to prevent the movement of liquids, sludges, solids, or other materials.

(17) "Displacement" means the relative movement of any two sides of a fault measured in any direction.

(18) "Disposal" is defined in 19-6-102(7); disposal does not include the storage or the beneficial use of CCR.

(19) "Downstream toe" means the junction of the downstream slope or face of the CCR surface impoundment with the ground surface.

(20) "Encapsulated beneficial use" means a beneficial use of CCR that binds the CCR into a solid matrix that minimizes its mobilization into the surrounding environment.

(21) "Existing CCR landfill" means a CCR landfill that receives CCR both before and after October 14, 2015, or for which construction commenced prior to October 14, 2015 and receives CCR on or after October 14, 2015. A CCR landfill has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun prior to October 14, 2015.

(22) "Existing CCR surface impoundment" means a CCR surface impoundment that receives CCR both before and after October 14, 2015, or for which construction commenced prior to October 14, 2015 and receives CCR on or after October 14, 2015. A CCR surface impoundment has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun prior to October 14, 2015.

(23) "Facility" means all contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, disposing, or otherwise conducting solid waste management of CCR. A facility may consist of several treatment, storage, or disposal operational units, e.g., one or more landfills, surface impoundments, or combinations of them.

(24) "Factor of safety, Safety factor," means the ratio of the forces tending to resist the failure of a structure to the forces tending to cause such failure as determined by accepted engineering practice.

(25) "Fault" means a fracture or a zone of fractures in any material along which strata on one side have been displaced with respect to that on the other side.

(26) "Flood hydrograph" means a graph showing, for a given point on a stream, the discharge, height, or other characteristic of a flood as a function of time.

(27) "Freeboard" means the vertical distance between the lowest point on the crest of the impoundment dike and the surface of the waste contained therein.

(28) "Free liquids" means liquids that readily separate from the solid portion of a waste under ambient temperature and pressure.

(29) "Groundwater" means water below the land surface in a zone of saturation.

(30) "Hazard potential classification" means the possible adverse incremental consequences that result from the release of water or stored contents due to failure of the diked CCR surface impoundment or mis-operation of the diked CCR surface impoundment or its appurtenances. The hazardous potential classifications include high hazard potential CCR surface impoundment, significant hazard potential CCR surface impoundment, and low hazard potential CCR surface impoundment, which terms mean:

(i) High hazard potential CCR surface impoundment means a diked surface impoundment where failure or mis-operation will probably cause loss of human life.

(ii) Low hazard potential CCR surface impoundment means a diked surface impoundment where failure or mis-operation results in no probable loss of human life and low economic and/or environmental losses. Losses are principally limited to the surface impoundment owner's property.

(iii) Significant hazard potential CCR surface impoundment means a diked surface impoundment where failure or mis-operation results in no probable loss of human life, but can cause economic loss, environmental damage, disruption of lifeline facilities, or impact other concerns.

(31) "Height" means the vertical measurement from the downstream toe of the CCR surface impoundment at its lowest point to the lowest elevation of the crest of the CCR surface impoundment.

(32) "Holocene" means the most recent epoch of the Quaternary period, extending from the end of the Pleistocene Epoch, at 11,700 years before present, to present.

(33) "Hydraulic conductivity" means the rate at which water can move through a permeable medium, i.e., the coefficient of permeability.

(34) "Inactive CCR surface impoundment" means a CCR surface impoundment that no longer receives CCR on or after October 14, 2015 and still contains both CCR and liquids on or after October 14, 2015.

(35) "Incised CCR surface impoundment" means a CCR surface impoundment which is constructed by excavating entirely below the natural ground surface, holds an accumulation of CCR entirely below the adjacent natural ground surface, and does not consist of any constructed diked portion.

(36) "Inflow design flood" means the flood hydrograph that is used in the design or modification of the CCR surface impoundments and its appurtenant works.

(37) "In operation" means the same as active life.

(38) "Karst terrain" means an area where karst topography, with its characteristic erosional surface and subterranean features, is developed as the result of dissolution of limestone, dolomite, or other soluble rock. Characteristic physiographic features present in karst terranes include, but are not limited to, dolines, collapse shafts (sinkholes), sinking streams, caves, seeps, large springs, and blind valleys.

(39) "Lateral expansion" means a horizontal expansion of the waste boundaries of an existing CCR landfill or existing CCR surface impoundment made after October 14, 2015.

(40) "Liquefaction factor of safety" means the factor of safety, safety factor, determined using analysis under liquefaction conditions.

(41) "Lithified earth material" means all rock, including all naturally occurring and naturally formed aggregates or masses of minerals or small particles of older rock that formed by crystallization of magma or by induration of loose sediments. This term does not include man-made materials, such as fill, concrete, and asphalt, or unconsolidated earth materials, soil, or regolith lying at or near the earth surface.

(42) "Maximum horizontal acceleration in lithified earth material" means the maximum expected horizontal acceleration at the ground surface as depicted on a seismic hazard map, with a 98% or greater probability that the acceleration will not be exceeded in 50 years, or the maximum expected horizontal acceleration based on a site-specific seismic risk assessment.

(43) New CCR landfill means a CCR landfill or lateral expansion of a CCR landfill that first receives CCR or commences construction after October 14, 2015. A new CCR landfill has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun after October 14, 2015. Overfills are also considered new CCR landfills.

(44) "New CCR surface impoundment" means a CCR surface impoundment or lateral expansion of an existing or new CCR surface impoundment that first receives CCR or commences construction after October 14, 2015. A new CCR surface impoundment has commenced construction if the owner or operator has obtained the federal, state, and local approvals or permits necessary to begin physical construction and a continuous on-site, physical construction program had begun after October 14, 2015.

(45) "Operator" means the person(s) responsible for the overall operation of a CCR unit.

(46) "Overfill" means a new CCR landfill constructed over a closed CCR surface impoundment.

(47) "Owner" means the person(s) who owns a CCR unit or part of a CCR unit.

(48) "Poor foundation conditions" mean those areas where features exist which indicate that a natural or human-induced event may result in inadequate foundation support for the structural components of an existing or new CCR unit. For example, failure to maintain static and seismic factors of safety as required in Subsections R315-319-73(e) and 74(e) would cause a poor foundation condition.

(49) "Probable maximum flood" means the flood that may be expected from the most severe combination of critical meteorologic and hydrologic conditions that are reasonably possible in the drainage basin.

(50) "Qualified person" means a person or persons trained to recognize specific appearances of structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit by visual observation and, if applicable, to monitor instrumentation.

(51) "Qualified professional engineer" means an individual who is licensed by Utah as a Professional Engineer to practice one or more disciplines of engineering and who is qualified by education, technical knowledge and experience to make the specific technical certifications required under Sections R315-319-50 through 107.

(52) "Recognized and generally accepted good engineering practices" means engineering maintenance or operation activities based on established codes, widely accepted standards, published technical reports, or a practice widely recommended throughout the industry. Such practices generally detail approved ways to perform specific engineering, inspection, or mechanical integrity activities.

(53) "Retrofit" means to remove all CCR and contaminated soils and sediments from the CCR surface impoundment, and to ensure the unit complies with the requirements in Section R315-319-72

(54) "Representative sample" means a sample of a universe or whole, e.g., waste pile, lagoon, and groundwater, which can be expected to exhibit the average properties of the universe or whole. See EPA publication SW-846, Test Methods for Evaluating Solid Waste, Physical/Chemical Methods, Chapter 9, available at http://www.epa.gov/epawaste/hazard/testmethods/sw846/online/index.htm, for a discussion and examples of representative samples.

(55) "Run-off" means any rainwater, leachate, or other liquid that drains over land from any part of a CCR landfill or lateral expansion of a CCR landfill.

(56) "Run-on" means any rainwater, leachate, or other liquid that drains over land onto any part of a CCR landfill or lateral expansion of a CCR landfill.

(57) "Sand and gravel pit or quarry" means an excavation for the extraction of aggregate, minerals or metals. The term sand and gravel pit and/or quarry does not include subsurface or surface coal mines.

(58) "Seismic factor of safety" means the factor of safety (safety factor) determined using analysis under earthquake conditions using the peak ground acceleration for a seismic event with a 2% probability of exceedance in 50 years, equivalent to a return period of approximately 2,500 years, based on the U.S. Geological Survey (USGS) seismic hazard maps for seismic events with this return period for the region where the CCR surface impoundment is located.

(59) "Seismic impact zone" means an area having a 2% or greater probability that the maximum expected horizontal acceleration, expressed as a percentage of the earth's gravitational pull (g), will exceed 0.10 g in 50 years.

(60) "Slope protection" means engineered or non-engineered measures installed on the upstream or downstream slope of the CCR surface impoundment to protect the slope against wave action or erosion, including but not limited to rock riprap, wooden pile, or concrete revetments, vegetated

wave berms, concrete facing, gabions, geotextiles, or fascines.

(61) "Solid waste management or management" means the systematic administration of the activities which provide for the collection, source separation, storage, transportation, processing, treatment, or disposal of solid waste.

(62) State means the State of Utah unless otherwise indicated.

(63) State Director or Director means the director of the Division of Waste Management and Radiation Control.

(64) "Static factor of safety" means the factor of safety, safety factor, determined using analysis under the long-term, maximum storage pool loading condition, the maximum surcharge pool loading condition, and under the end-of-construction loading condition.

(65) "Structural components" mean liners, leachate collection and removal systems, final covers, run-on and run-off systems, inflow design flood control systems, and any other component used in the construction and operation of the CCR unit that is necessary to ensure the integrity of the unit and that the contents of the unit are not released into the environment.

(66) "Unstable area means a location that is susceptible to natural or human-induced events or forces capable of impairing the integrity, including structural components of some or all of the CCR unit that are responsible for preventing releases from such unit. Unstable areas can include poor foundation conditions, areas susceptible to mass movements, and karst terrains.

(67) "Uppermost aquifer" means the geologic formation nearest the natural ground surface that is an aquifer, as well as lower aquifers that are hydraulically interconnected with this aquifer within the facility's property boundary. Upper limit is measured at a point nearest to the natural ground surface to which the aquifer rises during the wet season.

(68) "Waste boundary" means a vertical surface located at the hydraulically downgradient limit of the CCR unit. The vertical surface extends down into the uppermost aquifer.

R315-319-60. Location Restrictions.

Placement above the uppermost aquifer.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units shall be constructed with a base that is located no less than 1.52 meters, five feet, above the upper limit of the uppermost aquifer, or shall demonstrate that there will not be an intermittent, recurring, or sustained hydraulic connection between any portion of the base of the CCR unit and the uppermost aquifer due to normal fluctuations in groundwater elevations, including the seasonal high water table. The owner or operator shall demonstrate by the dates specified in Subsection R315-319-60(c) that the CCR unit meets the minimum requirements for placement above the uppermost aquifer.

(b) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the demonstration meets the requirements of Subsection R315-319-60(a).

(c) The owner or operator of the CCR unit shall complete the demonstration required by Subsection R315-319-60(a) by the date specified in either Subsection R315-319-60(c)(1) or (2).

(1) For an existing CCR surface impoundment, the owner or operator shall complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator shall complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by Subsection R315-319-60(a) when the demonstration has been submitted to and has received approval from the Director and is placed in the facility's operating record as required by Subsection R315-319-105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of Subsection R315-319-60(a) by the date specified in Subsection R315-319-60(c)(1) is subject to the requirements of Subsection R315-319-101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of Subsection R315-319-60(a) is prohibited from placing CCR in the CCR unit.

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(e), the notification requirements specified in Subsection R315-319-106(e), and the internet requirements specified in Subsection R315-319-107(e).

R315-319-61. Wetlands.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units shall not be located in wetlands, as defined in Section R315-301-2, unless the owner or operator demonstrates by the dates specified in Rule R315-319 (c) that the CCR unit meets the requirements of Subsections R315-319-61(a)(1) through (5).

(1) Where applicable under section 404 of the Clean Water Act or applicable Utah wetlands laws, a clear and objective rebuttal of the presumption that an alternative to the CCR unit is reasonably available that does not involve wetlands.

(2) The construction and operation of the CCR unit will not cause or contribute to any of the following:

(i) A violation of any applicable Utah or federal water quality standard;

(ii) A violation of any applicable toxic effluent standard or prohibition under section 307 of the Clean Water Act; and

(iii) Jeopardize the continued existence of endangered or threatened species or result in the destruction or adverse modification of a critical habitat, protected under the Endangered Species Act of 1973.

(3) The CCR unit will not cause or contribute to significant degradation of wetlands by addressing all of the following factors:

(i) Erosion, stability, and migration potential of native wetland soils, muds and deposits used to support the CCR unit;

(ii) Erosion, stability, and migration potential of dredged and fill materials used to support the CCR unit;

(iii) The volume and chemical nature of the CCR;

(iv) Impacts on fish, wildlife, and other aquatic resources and their habitat from release of CCR;

(v) The potential effects of catastrophic release of CCR to the wetland and the resulting impacts on the environment; and

(vi) Any additional factors, as necessary, to demonstrate that ecological resources in the wetland are sufficiently protected.

(4) To the extent required under section 404 of the Clean Water Act or applicable state wetlands laws, steps have been taken to attempt to achieve no net loss of wetlands, as defined by acreage and function, by first avoiding impacts to wetlands to the maximum extent reasonable as required by Subsections R315-319-61(a)(1) through (3), then minimizing unavoidable impacts to the maximum extent reasonable, and finally offsetting remaining unavoidable wetland impacts through all appropriate and reasonable compensatory mitigation actions, e.g., restoration of existing degraded

wetlands or creation of man-made wetlands; and

(5) Sufficient information is available to make a reasoned determination with respect to the demonstrations in Subsections R315-319-61(a)(1) through (4).

(b) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the demonstration meets the requirements of Subsection R315-319-61(a).

(c) The owner or operator of the CCR unit shall complete the demonstrations required by Subsection R315-319-61(a) by the date specified in either Subsection R315-319-61(c)(1) or (2).

(1) For an existing CCR surface impoundment, the owner or operator shall complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator shall complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by Subsection R315-319-61(a) when the demonstration has been submitted to and has received approval from the Director and the demonstration is placed in the facility's operating record as required by Subsection R315-319-105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of Subsection R315-319-61(a) by the date specified in Subsection R315-319-61(c)(1) is subject to the requirements of Subsection R315-319-101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstrations showing compliance with the requirements of Subsection R315-319-61(a) is prohibited from placing CCR in the CCR unit.

(d) The owner or operator shall comply with the recordkeeping requirements specified in Subsection R315-319-105(e), the notification requirements specified in Subsection R315-319-106(e), and the Internet requirements specified in Subsection R315-319-107(e).

R315-319-62. Fault Areas.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units shall not be located within 60 meters, 200 feet, of the outermost damage zone of a fault that has had displacement in Holocene time unless the owner or operator demonstrates by the dates specified in Subsection R315-319-62(c) that an alternative setback distance of less than 60 meters, 200 feet, will prevent damage to the structural integrity of the CCR unit.

(b) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the demonstration meets the requirements of Subsection R315-319-62(a).

(c) The owner or operator of the CCR unit shall complete the demonstration required by Subsection R315-319-62(a) by the date specified in either Subsection R315-319-62(c)(1) or (2).

(1) For an existing CCR surface impoundment, the owner or operator shall complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator shall complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by Subsection R315-319-62(a) when the demonstration has been submitted to and has received approval from the Director and the demonstration is placed in the facility's operating record as required by Subsection R315-319-105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of Subsection R315-319-62(a) by the date specified in Subsection R315-319-62(c)(1) is subject to the requirements of Subsection R315-319-101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of Subsection R315-319-62 (a) is prohibited from placing CCR in the CCR unit.

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(e), the notification requirements specified in Subsection R315-319-106(e), and the Internet requirements specified in Subsection R315-319-107(e).

R315-319-63. Seismic Impact Zones.

(a) New CCR landfills, existing and new CCR surface impoundments, and all lateral expansions of CCR units shall not be located in seismic impact zones unless the owner or operator demonstrates by the dates specified in Subsection R315-319-63(c) that all structural components including liners, leachate collection and removal systems, and surface water control systems, are designed to resist the maximum horizontal acceleration in lithified earth material for the site.

(b) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the demonstration meets the requirements of Subsection R315-319-63(a).

(c) The owner or operator of the CCR unit shall complete the demonstration required by Subsection R315-319-63(a) by the date specified in either Subsection R315-319-63(c)(1) or (2).

(1) For an existing CCR surface impoundment, the owner or operator shall complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator shall complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by Subsection R315-319-63(a) when the demonstration has been submitted to and has received approval from the Director and the demonstration is placed in the facility's operating record as required by Subsection R315-319-105(e).

(4) An owner or operator of an existing CCR surface impoundment who fails to demonstrate compliance with the requirements of Subsection R315-319-63(a) by the date specified in Subsection R315-319-63(c)(1) is subject to the requirements of Subsection R315-319-101(b)(1).

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of Subsection R315-319-63(a) is prohibited from placing CCR in the CCR unit.

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(e), the notification requirements specified in Subsection R315-319-106(e), and the Internet requirements specified in Subsection R315-319-107(e).

R315-319-64. Unstable Areas.

(a) An existing or new CCR landfill, existing or new CCR surface impoundment, or any lateral expansion of a CCR unit shall not be located in an unstable area unless the owner or operator demonstrates by the dates specified in

Subsection R315-319-64(d) that recognized and generally accepted good engineering practices have been incorporated into the design of the CCR unit to ensure that the integrity of the structural components of the CCR unit will not be disrupted.

(b) The owner or operator shall consider all of the following factors, at a minimum, when determining whether an area is unstable:

(1) On-site or local soil conditions that may result in significant differential settling;

(2) On-site or local geologic or geomorphologic features; and

(3) On-site or local human-made features or events, both surface and subsurface.

(c) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the demonstration meets the requirements of Subsection R315-319-64(a).

(d) The owner or operator of the CCR unit shall complete the demonstration required by Subsection R315-319-64(a) by the date specified in either Subsection R315-319-64(d)(1) or (2).

(1) For an existing CCR landfill or existing CCR surface impoundment, the owner or operator shall complete the demonstration no later than October 17, 2018.

(2) For a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit, the owner or operator shall complete the demonstration no later than the date of initial receipt of CCR in the CCR unit.

(3) The owner or operator has completed the demonstration required by Subsection R315-319-64(a) when the demonstration has been submitted to and has received approval from the Director and the demonstration is placed in the facility's operating record as required by Subsection R315-319-105(e).

(4) An owner or operator of an existing CCR surface impoundment or existing CCR landfill who fails to demonstrate compliance with the requirements of Subsection R315-319-64(a) by the date specified in Subsection R315-319-64(d)(1) is subject to the requirements of Subsection R315-319-101(b)(1) or (d)(1), respectively.

(5) An owner or operator of a new CCR landfill, new CCR surface impoundment, or any lateral expansion of a CCR unit who fails to make the demonstration showing compliance with the requirements of Subsection R315-319-64(a) is prohibited from placing CCR in the CCR unit.

(e) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(e), the notification requirements specified in Subsection R315-319-106(e), and the Internet requirements specified in Subsection R315-319-107(e).

R315-319-70. Design Criteria for New CCR Landfills and Any Lateral Expansion of a CCR Landfill.

(a)(1) New CCR landfills and any lateral expansion of a CCR landfill shall be designed, constructed, operated, and maintained with either a composite liner that meets the requirements of Subsection R315-319-70(b) or an alternative composite liner that meets the requirements in Subsection R315-319-70(c), and a leachate collection and removal system that meets the requirements of Subsection R315-319-70(d).

(2) Prior to construction of an overfill the underlying surface impoundment shall meet the requirements of Subsection R315-319-102(d).

(b) A composite liner shall consist of two components; the upper component consisting of, at a minimum, a 30-mil geomembrane liner (GM), and the lower component consisting of at least a two-foot layer of compacted soil with a hydraulic conductivity of no more than 1 x 10-7 centimeters per second (cm/sec). GM components consisting of high density polyethylene (HDPE) shall be at least 60-mil thick. The GM or upper liner component shall be installed in direct and uniform contact with the compacted soil or lower liner component. The composite liner shall be:

(1) Constructed of materials that have appropriate chemical properties and sufficient strength and thickness to prevent failure due to pressure gradients, including static head and external hydrogeologic forces, physical contact with the CCR or leachate to which they are exposed, climatic conditions, the stress of installation, and the stress of daily operation;

(2) Constructed of materials that provide appropriate shear resistance of the upper and lower component interface to prevent sliding of the upper component including on slopes;

(3) Placed upon a foundation or base capable of providing support to the liner and resistance to pressure gradients above and below the liner to prevent failure of the liner due to settlement, compression, or uplift; and

(4) Installed to cover all surrounding earth likely to be in contact with the CCR or leachate.

(c) If the owner or operator elects to install an alternative composite liner, all of the following requirements shall be met:

(1) An alternative composite liner shall consist of two components; the upper component consisting of, at a minimum, a 30-mil GM, and a lower component, that is not a geomembrane, with a liquid flow rate no greater than the liquid flow rate of two feet of compacted soil with a hydraulic conductivity of no more than 1 x 10-7 cm/sec. GM components consisting of high density polyethylene (HDPE) shall be at least 60-mil thick. If the lower component of the alternative liner is compacted soil, the GM shall be installed in direct and uniform contact with the compacted soil.

(2) The owner or operator shall obtain certification from a qualified professional engineer that the liquid flow rate through the lower component of the alternative composite liner is no greater than the liquid flow rate through two feet of compacted soil with a hydraulic conductivity of 1 x 10-7 cm/sec. The hydraulic conductivity for the two feet of compacted soil used in the comparison shall be no greater than 1 x 10-7 cm/sec. The hydraulic conductivity of any alternative to the two feet of compacted soil shall be determined using recognized and generally accepted methods. The liquid flow rate comparison shall be made using Equation 1 of Section R315-319-70, which is derived from Darcy's Law for gravity flow through porous media.

Equation 1

$Q/A=q=k(h/t+1)$

Where,

Q = flow rate, cubic centimeters/second;

A = surface area of the liner, squared centimeters;

q = flow rate per unit area, cubic centimeters/second/squared centimeter;

k = hydraulic conductivity of the liner, centimeters/second;

h = hydraulic head above the liner, centimeters; and

t = thickness of the liner, centimeters.

(3) The alternative composite liner shall meet the requirements specified in Subsections R315-319-70(b)(1) through (4).

(d) The leachate collection and removal system shall be designed, constructed, operated, and maintained to collect and remove leachate from the landfill during the active life and post-closure care period. The leachate collection and removal system shall be:

(1) Designed and operated to maintain less than a 30-

centimeter depth of leachate over the composite liner or alternative composite liner;

(2) Constructed of materials that are chemically resistant to the CCR and any non-CCR waste managed in the CCR unit and the leachate expected to be generated, and of sufficient strength and thickness to prevent collapse under the pressures exerted by overlying waste, waste cover materials, and equipment used at the CCR unit; and

(3) Designed and operated to minimize clogging during the active life and post-closure care period.

(e) Prior to construction of the CCR landfill or any lateral expansion of a CCR landfill, the owner or operator shall obtain a certification from a qualified professional engineer that the design of the composite liner; or, if applicable, alternative composite liner; and the leachate collection and removal system meets the requirements of Section R315-319-70.

(f) Upon completion of construction of the CCR landfill or any lateral expansion of a CCR landfill, the owner or operator shall obtain a certification from a qualified professional engineer that the composite liner; or, if applicable, alternative composite liner; and the leachate collection and removal system has been constructed in accordance with the requirements of Section R315-319-70.

(g) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(f), the notification requirements specified in Subsection R315-319-106(f), and the Internet requirements specified in Subsection R315-319-107(f).

R315-319-71. Liner Design Criteria for Existing CCR Surface Impoundments.

(a)(1) No later than October 17, 2016, the owner or operator of an existing CCR surface impoundment shall document whether or not such unit was constructed with any one of the following:

(i) A liner consisting of a minimum of two feet of compacted soil with a hydraulic conductivity of no more than 1 x 10-7 cm/sec;

(ii) A composite liner that meets the requirements of Subsection R315-319-70(b); or

(iii) An alternative composite liner that meets the requirements of Subsection R315-319-70(c).

(2) The hydraulic conductivity of the compacted soil shall be determined using recognized and generally accepted methods.

(3) An existing CCR surface impoundment is considered to be an existing unlined CCR surface impoundment if either:

(i) The owner or operator of the CCR unit determines that the CCR unit is not constructed with a liner that meets the requirements of Subsection R315-319-71(a)(1)(i), (ii), or (iii); or

(ii) The owner or operator of the CCR unit fails to document whether the CCR unit was constructed with a liner that meets the requirements of Subsection R315-319-71 (a)(1)(i), (ii), or (iii).

(4) All existing unlined CCR surface impoundments are subject to the requirements of Subsection R315-319-101(a).

(b) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer attesting that the documentation as to whether a CCR unit meets the requirements of Subsection R315-319-71(a) is accurate.

(c) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(f), the notification requirements specified in Subsection R315-319-106(f), and the Internet requirements specified in Subsection R315-319-107(f).

R315-319-72. Liner Design Criteria for New CCR Surface Impoundments and Any Lateral Expansion of a CCR Surface Impoundment.

(a) New CCR surface impoundments and lateral expansions of existing and new CCR surface impoundments shall be designed, constructed, operated, and maintained with either a composite liner or an alternative composite liner that meets the requirements of Subsection R315-319-70(b) or (c).

(b) Any liner specified in Section R315-319-72 shall be installed to cover all surrounding earth likely to be in contact with CCR. Dikes shall not be constructed on top of the composite liner.

(c) Prior to construction of the CCR surface impoundment or any lateral expansion of a CCR surface impoundment, the owner or operator shall obtain certification from a qualified professional engineer that the design of the composite liner or, if applicable, the design of an alternative composite liner complies with the requirements of Section R315-319-72.

(d) Upon completion, the owner or operator shall obtain certification from a qualified professional engineer that the composite liner or if applicable, the alternative composite liner has been constructed in accordance with the requirements of Section R315-319-72.

(e) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(f), the notification requirements specified in Subsection R315-319-106(f), and the Internet requirements specified in Subsection R315-319-107(f).

R315-319-73. Structural Integrity Criteria for Existing CCR Surface Impoundments.

(a) The requirements of Subsections R315-319-73(a)(1) through (4) apply to all existing CCR surface impoundments, except for those existing CCR surface impoundments that are incised CCR units. If an incised CCR surface impoundment is subsequently modified, e.g., a dike is constructed, such that the CCR unit no longer meets the definition of an incised CCR unit, the CCR unit is subject to the requirements of Subsections R315-319-73(a)(1) through (4).

(1) No later than, December 17, 2015, the owner or operator of the CCR unit shall place on or immediately adjacent to the CCR unit a permanent identification marker, at least six feet high showing the identification number of the CCR unit, if one has been assigned by the state, the name associated with the CCR unit and the name of the owner or operator of the CCR unit.

(2) Periodic hazard potential classification assessments.

(i) The owner or operator of the CCR unit shall conduct initial and periodic hazard potential classification assessments of the CCR unit according to the timeframes specified in Subsection R315-319-73(f). The owner or operator shall document the hazard potential classification of each CCR unit as either a high hazard potential CCR surface impoundment, a significant hazard potential CCR surface impoundment, or a low hazard potential CCR surface impoundment. The owner or operator shall also document the basis for each hazard potential classification.

(ii) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the initial hazard potential classification and each subsequent periodic classification specified in Subsection R315-319-73(a)(2)(i) was conducted in accordance with the requirements of Section R315-319-73.

(3) Emergency Action Plan (EAP)

(i) Development of the plan. No later than April 17, 2017, the owner or operator of a CCR unit determined to be either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment under Subsection R315-319-73(a)(2) shall prepare and maintain a

written EAP. At a minimum, the EAP shall:

(A) Define the events or circumstances involving the CCR unit that represent a safety emergency, along with a description of the procedures that will be followed to detect a safety emergency in a timely manner;

(B) Define responsible persons, their respective responsibilities, and notification procedures in the event of a safety emergency involving the CCR unit;

(C) Provide contact information of emergency responders;

(D) Include a map which delineates the downstream area which would be affected in the event of a CCR unit failure and a physical description of the CCR unit; and

(E) Include provisions for an annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders.

(ii) Amendment of the plan.

(A) The owner or operator of a CCR unit subject to the requirements of Subsection R315-319-73(a)(3)(i) may amend the written EAP at any time provided the revised plan is has been submitted to and has received approval from the Director and placed in the facility's operating record as required by Subsection R315-319-105(f)(6). The owner or operator shall amend the written EAP whenever there is a change in conditions that would substantially affect the EAP in effect.

(B) The written EAP shall be evaluated, at a minimum, every five years to ensure the information required in Subsection R315-319-73(a)(3)(i) is accurate. As necessary, the EAP shall be updated and a revised EAP has been submitted to and has received approval from the Director and placed in the facility's operating record as required by Subsection R315-319-105(f)(6).

(iii) Changes in hazard potential classification.

(A) If the owner or operator of a CCR unit determines during a periodic hazard potential assessment that the CCR unit is no longer classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit is no longer subject to the requirement to prepare and maintain a written EAP beginning on the date the periodic hazard potential assessment documentation is has been submitted to and has received approval from the Director and placed in the facility's operating record as required by Subsection R315-319-105(f)(5).

(B) If the owner or operator of a CCR unit classified as a low hazard potential CCR surface impoundment subsequently determines that the CCR unit is properly re-classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit shall prepare a written EAP for the CCR unit as required by Subsection R315-319-73(a)(3)(i) within six months of completing such periodic hazard potential assessment and submit the EAP to the Director for approval.

(iv) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the written EAP, and any subsequent amendment of the EAP, meets the requirements of Subsection R315-319-73(a)(3) and submit the certification to the Director.

(v) Activation of the EAP. The EAP shall be implemented once events or circumstances involving the CCR unit that represent a safety emergency are detected, including conditions identified during periodic structural stability assessments, annual inspections, and inspections by a qualified person.

(4) The CCR unit and surrounding areas shall be designed, constructed, operated, and maintained with vegetated slopes of dikes except for slopes which are protected with an alternate form(s) of slope protection.

(b) The requirements of Subsections R315-319-73(c) through (e) apply to an owner or operator of an existing CCR surface impoundment that either:

(1) Has a height of five feet or more and a storage volume of 20 acre-feet or more; or

(2) Has a height of 20 feet or more.

(c)(1) No later than October 17, 2016, the owner or operator of the CCR unit shall compile and submit to the Director a history of construction, which shall contain, to the extent feasible, the information specified in Subsections R315-319-73(c)(1)(i) through (xi).

(i) The name and address of the person(s) owning or operating the CCR unit; the name associated with the CCR unit; and the identification number of the CCR unit if one has been assigned by the state.

(ii) The location of the CCR unit identified on the most recent U.S. Geological Survey (USGS) 71/2 minute or 15 minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available.

(iii) A statement of the purpose for which the CCR unit is being used.

(iv) The name and size in acres of the watershed within which the CCR unit is located.

(v) A description of the physical and engineering properties of the foundation and abutment materials on which the CCR unit is constructed.

(vi) A statement of the type, size, range, and physical and engineering properties of the materials used in constructing each zone or stage of the CCR unit; the method of site preparation and construction of each zone of the CCR unit; and the approximate dates of construction of each successive stage of construction of the CCR unit.

(vii) At a scale that details engineering structures and appurtenances relevant to the design, construction, operation, and maintenance of the CCR unit, detailed dimensional drawings of the CCR unit, including a plan view and cross sections of the length and width of the CCR unit, showing all zones, foundation improvements, drainage provisions, spillways, diversion ditches, outlets, instrument locations, and slope protection, in addition to the normal operating pool surface elevation and the maximum pool surface elevation following peak discharge from the inflow design flood, the expected maximum depth of CCR within the CCR surface impoundment, and any identifiable natural or manmade features that could adversely affect operation of the CCR unit due to malfunction or mis-operation.

(viii) A description of the type, purpose, and location of existing instrumentation.

(ix) Area-capacity curves for the CCR unit.

(x) A description of each spillway and diversion design features and capacities and calculations used in their determination.

(xi) The construction specifications and provisions for surveillance, maintenance, and repair of the CCR unit.

(xii) Any record or knowledge of structural instability of the CCR unit.

(2) Changes to the history of construction. If there is a significant change to any information compiled under Subsection R315-319-73(c)(1), the owner or operator of the CCR unit shall update the relevant information, submit it to the Director, and place it in the facility's operating record as required by Subsection R315-319-105(f)(9).

(d) Periodic structural stability assessments.

(1) The owner or operator of the CCR unit shall conduct initial and periodic structural stability assessments and document whether the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering practices for the

maximum volume of CCR and CCR wastewater which can be impounded therein. The assessment shall, at a minimum, document whether the CCR unit has been designed, constructed, operated, and maintained with:

(i) Stable foundations and abutments;

(ii) Adequate slope protection to protect against surface erosion, wave action, and adverse effects of sudden drawdown;

(iii) Dikes mechanically compacted to a density sufficient to withstand the range of loading conditions in the CCR unit;

(iv) Vegetated slopes of dikes and surrounding areas except for slopes which have an alternate form or forms of slope protection;

(v) A single spillway or a combination of spillways configured as specified in Subsection R315-319-73(d)(1)(v)(A). The combined capacity of all spillways shall be designed, constructed, operated, and maintained to adequately manage flow during and following the peak discharge from the event specified in Subsection R315-319-73(d)(1)(v)(B).

(A) All spillways shall be either:

(I) Of non-erodible construction and designed to carry sustained flows; or

(II) Earth- or grass-lined and designed to carry short-term, infrequent flows at non-erosive velocities where sustained flows are not expected.

(B) The combined capacity of all spillways shall adequately manage flow during and following the peak discharge from a:

(I) Probable maximum flood (PMF) for a high hazard potential CCR surface impoundment; or

(II) 1000-year flood for a significant hazard potential CCR surface impoundment; or

(III) 100-year flood for a low hazard potential CCR surface impoundment.

(vi) Hydraulic structures underlying the base of the CCR unit or passing through the dike of the CCR unit that maintain structural integrity and are free of significant deterioration, deformation, distortion, bedding deficiencies, sedimentation, and debris which may negatively affect the operation of the hydraulic structure; and

(vii) For CCR units with downstream slopes which can be inundated by the pool of an adjacent water body, such as a river, stream or lake, downstream slopes that maintain structural stability during low pool of the adjacent water body or sudden drawdown of the adjacent water body.

(2) The periodic assessment described in Subsection R315-319-73(d)(1) shall identify any structural stability deficiencies associated with the CCR unit in addition to recommending corrective measures. If a deficiency or a release is identified during the periodic assessment, the owner or operator unit shall remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken and submit the documentation to the Director.

(3) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment was conducted in accordance with the requirements of Section R315-319-73 and submit the certification to the Director.

(e) Periodic safety factor assessments.

(1) The owner or operator shall conduct and submit to the Director an initial and periodic safety factor assessments for each CCR unit and document whether the calculated factors of safety for each CCR unit achieve the minimum safety factors specified in Subsections R315-319-73(e)(1)(i) through (iv) for the critical cross section of the embankment. The critical cross section is the cross section anticipated to be the most susceptible of all cross sections to structural failure based on appropriate engineering considerations, including loading conditions. The safety factor assessments shall be supported by appropriate engineering calculations.

(i) The calculated static factor of safety under the long-term, maximum storage pool loading condition shall equal or exceed 1.50.

(ii) The calculated static factor of safety under the maximum surcharge pool loading condition shall equal or exceed 1.40.

(iii) The calculated seismic factor of safety shall equal or exceed 1.00.

(iv) For dikes constructed of soils that have susceptibility to liquefaction, the calculated liquefaction factor of safety shall equal or exceed 1.20.

(2) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment specified in Subsection R315-319-73(e)(1) meets the requirements of Section R315-319-73.

(f) Timeframes for periodic assessments

(1) Initial assessments. Except as provided by Subsection R315-319-73(f)(2), the owner or operator of the CCR unit shall complete the initial assessments required by Subsections R315-319-73(a)(2), (d), and (e) no later than October 17, 2016. The owner or operator has completed an initial assessment when the owner or operator has and submit to the Director and placed the assessment required by Subsections R315-319-73(a)(2), (d), and (e) in the facility's operating record as required by Subsections R315-319-105(f)(5), (10), and (12).

(2) Use of a previously completed assessment(s) in lieu of the initial assessment(s). The owner or operator of the CCR unit may elect to use a previously completed assessment to serve as the initial assessment required by Subsections R315-319-73(a)(2), (d), and (e) provided that the previously completed assessment(s):

(i) Was completed no earlier than 42 months prior to October 17, 2016; and

(ii) Meets the applicable requirements of Subsections R315-319-73 (a)(2), (d), and (e).

(3) Frequency for conducting periodic assessments. The owner or operator of the CCR unit shall conduct and complete and submit to the Director the assessments required by Subsections R315-319-73 (a)(2), (d), and (e) every five years. The date of completing the initial assessment is the basis for establishing the deadline to complete the first subsequent assessment. If the owner or operator elects to use a previously completed assessment(s) in lieu of the initial assessment as provided by Subsection R315-319-73 (f)(2), the date of the report for the previously completed assessment is the basis for establishing the deadline to complete the first subsequent assessment. The owner or operator may complete any required assessment prior to the required deadline provided the owner or operator submits the assessment to the Director and places the completed assessment(s) into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent assessments is based on the date of completing the previous assessment. For purposes of Subsection R315-319-73(f)(3), the owner or operator has completed an assessment when the relevant assessment(s) required by Subsections R315-319-73 (a)(2), (d), and (e) has been submitted and approved by the Director and has been placed in the facility's operating record as required by Subsections R315-319-105(f)(5), (10), and (12).

(4) Closure of the CCR unit. An owner or operator of a CCR unit who either fails to complete a timely safety factor assessment or fails to demonstrate minimum safety factors as

required by Subsection R315-319-73 (e) is subject to the requirements of Subsection R315-319-101(b)(2).

(g) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(f), the notification requirements specified in Subsection R315-319-106(f), and the internet requirements specified in Subsection R315-319-107(f).

R315-319-74. Structural Integrity Criteria for New CCR Surface Impoundments and Any Lateral Expansion of a CCR Surface Impoundment.

(a) The requirements of Subsections R315-319-74(a)(1) through (4) apply to all new CCR surface impoundments and any lateral expansion of a CCR surface impoundment, except for those new CCR surface impoundments that are incised CCR units. If an incised CCR surface impoundment is subsequently modified, e.g., a dike is constructed, such that the CCR unit no longer meets the definition of an incised CCR unit, the CCR unit is subject to the requirements of Subsections R315-319-74(a)(1) through (4).

(1) No later than the initial receipt of CCR, the owner or operator of the CCR unit shall place on or immediately adjacent to the CCR unit a permanent identification marker, at least six feet high showing the identification number of the CCR unit, if one has been assigned by the state, the name associated with the CCR unit and the name of the owner or operator of the CCR unit.

(2) Periodic hazard potential classification assessments.

(i) The owner or operator of the CCR unit shall conduct initial and periodic hazard potential classification assessments of the CCR unit according to the timeframes specified in Subsection R315-319-74(f). The owner or operator shall document the hazard potential classification of each CCR unit as either a high hazard potential CCR surface impoundment, a significant hazard potential CCR surface impoundment, or a low hazard potential CCR surface impoundment. The owner or operator shall also document the basis for each hazard potential classification.

(ii) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the initial hazard potential classification and each subsequent periodic classification specified in Subsection R315-319-74(a)(2)(i) was conducted in accordance with the requirements of Section R315-319-74.

(3) Emergency Action Plan (EAP)

(i) Development of the plan. Prior to the initial receipt of CCR in the CCR unit, the owner or operator of a CCR unit determined to be either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment under Subsection R315-319-74 (a)(2) shall prepare, and maintain a written EAP. At a minimum, the EAP shall:

(A) Define the events or circumstances involving the CCR unit that represent a safety emergency, along with a description of the procedures that will be followed to detect a safety emergency in a timely manner;

(B) Define responsible persons, their respective responsibilities, and notification procedures in the event of a safety emergency involving the CCR unit;

(C) Provide contact information of emergency responders;

(D) Include a map which delineates the downstream area which would be affected in the event of a CCR unit failure and a physical description of the CCR unit; and

(E) Include provisions for an annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders.

(ii) Amendment of the plan.

(A) The owner or operator of a CCR unit subject to the requirements of Subsection R315-319-74(a)(3)(i) may amend the written EAP at any time provided the revised plan is placed in the facility's operating record as required by Subsection R315-319-105(f)(6). The owner or operator shall amend the written EAP whenever there is a change in conditions that would substantially affect the EAP in effect.

(B) The written EAP shall be evaluated, at a minimum, every five years to ensure the information required in Subsection R315-319-74(a)(3)(i) is accurate. As necessary, the EAP shall be updated and a revised EAP placed in the facility's operating record as required by Subsection R315-319-105(f)(6).

(iii) Changes in hazard potential classification.

(A) If the owner or operator of a CCR unit determines during a periodic hazard potential assessment that the CCR unit is no longer classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit is no longer subject to the requirement to prepare and maintain a written EAP beginning on the date the periodic hazard potential assessment documentation has been submitted to and has received approval from the Director and placed in the facility's operating record as required by Subsection R315-319-105(f)(5).

(B) If the owner or operator of a CCR unit classified as a low hazard potential CCR surface impoundment subsequently determines that the CCR unit is properly re-classified as either a high hazard potential CCR surface impoundment or a significant hazard potential CCR surface impoundment, then the owner or operator of the CCR unit shall prepare and submit to the Director a written EAP for the CCR unit as required by Subsection R315-319-74(a)(3)(i) within six months of completing such periodic hazard potential assessment.

(iv) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the written EAP, and any subsequent amendment of the EAP, meets the requirements of Subsection R315-319-74(a)(3).

(v) Activation of the EAP. The EAP shall be implemented once events or circumstances involving the CCR unit that represent a safety emergency are detected, including conditions identified during periodic structural stability assessments, annual inspections, and inspections by a qualified person.

(4) The CCR unit and surrounding areas shall be designed, constructed, operated, and maintained with vegetated slopes of dikes except for slopes which are protected with an alternate form(s) of slope protection.

(b) The requirements of Subsections R315-319-74(c) through (e) apply to an owner or operator of a new CCR surface impoundment and any lateral expansion of a CCR surface impoundment that either:

(1) Has a height of five feet or more and a storage volume of 20 acre-feet or more; or

(2) Has a height of 20 feet or more.

(c)(1) No later than the initial receipt of CCR in the CCR unit, the owner or operator unit shall compile the design and construction plans for the CCR unit, which shall include, to the extent feasible, the information specified in Subsection R315-319-74 (c)(1)(i) through (xi).

(i) The name and address of the person(s) owning or operating the CCR unit; the name associated with the CCR unit; and the identification number of the CCR unit if one has been assigned by the state.

(ii) The location of the CCR unit identified on the most recent U.S. Geological Survey (USGS) 71/2 minute or 15 minute topographic quadrangle map, or a topographic map of equivalent scale if a USGS map is not available.

(iii) A statement of the purpose for which the CCR unit is being used.

(iv) The name and size in acres of the watershed within which the CCR unit is located.

(v) A description of the physical and engineering properties of the foundation and abutment materials on which the CCR unit is constructed.

(vi) A statement of the type, size, range, and physical and engineering properties of the materials used in constructing each zone or stage of the CCR unit; the method of site preparation and construction of each zone of the CCR unit; and the dates of construction of each successive stage of construction of the CCR unit.

(vii) At a scale that details engineering structures and appurtenances relevant to the design, construction, operation, and maintenance of the CCR unit, detailed dimensional drawings of the CCR unit, including a plan view and cross sections of the length and width of the CCR unit, showing all zones, foundation improvements, drainage provisions, spillways, diversion ditches, outlets, instrument locations, and slope protection, in addition to the normal operating pool surface elevation and the maximum pool surface elevation following peak discharge from the inflow design flood, the expected maximum depth of CCR within the CCR surface impoundment, and any identifiable natural or manmade features that could adversely affect operation of the CCR unit due to malfunction or mis-operation.

(viii) A description of the type, purpose, and location of existing instrumentation.

(ix) Area-capacity curves for the CCR unit.

(x) A description of each spillway and diversion design features and capacities and calculations used in their determination.

(xi) The construction specifications and provisions for surveillance, maintenance, and repair of the CCR unit.

(xii) Any record or knowledge of structural instability of the CCR unit.

(2) Changes in the design and construction. If there is a significant change to any information compiled under Subsection R315-319-74 (c)(1), the owner or operator of the CCR unit shall update the relevant information and place it in the facility's operating record as required by Subsection R315-319-105(f)(13).

(d) Periodic structural stability assessments.

(1) The owner or operator of the CCR unit shall conduct initial and periodic structural stability assessments and document whether the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering practices for the maximum volume of CCR and CCR wastewater which can be impounded therein. The assessment shall, at a minimum, document whether the CCR unit has been designed, constructed, operated, and maintained with:

(i) Stable foundations and abutments;

(ii) Adequate slope protection to protect against surface erosion, wave action, and adverse effects of sudden drawdown;

(iii) Dikes mechanically compacted to a density sufficient to withstand the range of loading conditions in the CCR unit;

(iv) Vegetated slopes of dikes and surrounding areas except for slopes which have an alternate form or forms of slope protection;

(v) A single spillway or a combination of spillways configured as specified in Subsection R315-319-74(d)(1)(v)(A). The combined capacity of all spillways shall be designed, constructed, operated, and maintained to adequately manage flow during and following the peak discharge from the event specified in Subsection R315-319-74 (d)(1)(v)(B).

(A) All spillways shall be either:

(I) Of non-erodible construction and designed to carry sustained flows; or

(II) Earth- or grass-lined and designed to carry short-term, infrequent flows at non-erosive velocities where sustained flows are not expected.

(B) The combined capacity of all spillways shall adequately manage flow during and following the peak discharge from a:

(I) Probable maximum flood (PMF) for a high hazard potential CCR surface impoundment; or

(II) 1000-year flood for a significant hazard potential CCR surface impoundment; or

(III) 100-year flood for a low hazard potential CCR surface impoundment.

(vi) Hydraulic structures underlying the base of the CCR unit or passing through the dike of the CCR unit that maintain structural integrity and are free of significant deterioration, deformation, distortion, bedding deficiencies, sedimentation, and debris which may negatively affect the operation of the hydraulic structure; and

(vii) For CCR units with downstream slopes which can be inundated by the pool of an adjacent water body, such as a river, stream or lake, downstream slopes that maintain structural stability during low pool of the adjacent water body or sudden drawdown of the adjacent water body.

(2) The periodic assessment described in Subsection R315-319-74(d)(1) shall identify any structural stability deficiencies associated with the CCR unit in addition to recommending corrective measures. If a deficiency or a release is identified during the periodic assessment, the owner or operator unit shall remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(3) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment was conducted in accordance with the requirements of Section R315-319-74.

(e) Periodic safety factor assessments.

(1) The owner or operator shall conduct an initial and periodic safety factor assessments for each CCR unit and document whether the calculated factors of safety for each CCR unit achieve the minimum safety factors specified in Subsections R315-319-74(e)(1)(i) through (v) for the critical cross section of the embankment. The critical cross section is the cross section anticipated to be the most susceptible of all cross sections to structural failure based on appropriate engineering considerations, including loading conditions. The safety factor assessments shall be supported by appropriate engineering calculations.

(i) The calculated static factor of safety under the end-of-construction loading condition shall equal or exceed 1.30. The assessment of this loading condition is only required for the initial safety factor assessment and is not required for subsequent assessments.

(ii) The calculated static factor of safety under the long-term, maximum storage pool loading condition shall equal or exceed 1.50.

(iii) The calculated static factor of safety under the maximum surcharge pool loading condition shall equal or exceed 1.40.

(iv) The calculated seismic factor of safety shall equal or exceed 1.00.

(v) For dikes constructed of soils that have susceptibility to liquefaction, the calculated liquefaction factor of safety shall equal or exceed 1.20.

(2) The owner or operator of the CCR unit shall obtain a

certification from a qualified professional engineer stating that the initial assessment and each subsequent periodic assessment specified in Subsection R315-319-74(e)(1) meets the requirements of Section R315-319-74.

(f) Timeframes for periodic assessments

(1) Initial assessments. Except as provided by Subsection R315-319-74 (f)(2), the owner or operator of the CCR unit shall complete the initial assessments required by Subsections R315-319-74(a)(2), (d), and (e) prior to the initial receipt of CCR in the unit. The owner or operator has completed an initial assessment when the owner or operator has placed the assessment required by Subsections R315-319-74 (a)(2), (d), and (e) in the facility's operating record as required by Subsection R315-319-105(f)(5), (10), and (12).

(2) Frequency for conducting periodic assessments. The owner or operator of the CCR unit shall conduct, complete the assessments required by Subsections R315-319-74 (a)(2), (d), and (e) every five years. The date of completing the initial assessment is the basis for establishing the deadline to complete the first subsequent assessment. The owner or operator may complete any required assessment prior to the required deadline provided the owner or operator places the completed assessment(s) into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent assessments is based on the date of completing the previous assessment. For purposes of Subsection R315-319-74 (f)(2), the owner or operator has completed an assessment when the relevant assessment(s) required by Subsections R315-319-74 (a)(2), (d), and (e) has been placed in the facility's operating record as required by Subsection R315-319-105(f)(5), (10), and (12).

(3) Failure to document minimum safety factors during the initial assessment. Until the date an owner or operator of a CCR unit documents that the calculated factors of safety achieve the minimum safety factors specified in Subsections R315-319-74 (e)(1)(i) through (v), the owner or operator is prohibited from placing CCR in such unit.

(4) Closure of the CCR unit. An owner or operator of a CCR unit who either fails to complete a timely periodic safety factor assessment or fails to demonstrate minimum safety factors as required by Subsection R315-319-74 (e) is subject to the requirements of Subsection R315-319-101(c).

(g) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(f), the notification requirements specified in Subsection R315-319-106(f), and the internet requirements specified in Subsection R315-319-107(f).

R315-319-80. Operating Criteria - Air Criteria.

(a) The owner or operator of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit shall adopt measures that will effectively minimize CCR from becoming airborne at the facility, including CCR fugitive dust originating from CCR units, roads, and other CCR management and material handling activities.

(b) CCR fugitive dust control plan. The owner or operator of the CCR unit shall prepare and operate in accordance with a CCR fugitive dust control plan has been submitted to and has received approval from the Director and as specified in Subsections R315-319-80(b)(1) through (7). This requirement applies in addition to, not in place of, any applicable standards under the Occupational Safety and Health Act.

(1) The CCR fugitive dust control plan shall identify and describe the CCR fugitive dust control measures the owner or operator will use to minimize CCR from becoming airborne at the facility. The owner or operator shall select, and include in the CCR fugitive dust control plan, the CCR fugitive dust control measures that are most appropriate for site conditions, along with an explanation of how the measures selected are applicable and appropriate for site conditions. Examples of control measures that may be appropriate include: Locating CCR inside an enclosure or partial enclosure; operating a water spray or fogging system; reducing fall distances at material drop points; using wind barriers, compaction, or vegetative covers; establishing and enforcing reduced vehicle speed limits; paving and sweeping roads; covering trucks transporting CCR; reducing or halting operations during high wind events; or applying a daily cover.

(2) If the owner or operator operates a CCR landfill or any lateral expansion of a CCR landfill, the CCR fugitive dust control plan shall include procedures to emplace CCR as conditioned CCR. Conditioned CCR means wetting CCR with water to a moisture content that will prevent wind dispersal, but will not result in free liquids. In lieu of water, CCR conditioning may be accomplished with an appropriate chemical dust suppression agent.

(3) The CCR fugitive dust control plan shall include procedures to log citizen complaints received by the owner or operator involving CCR fugitive dust events at the facility.

(4) The CCR fugitive dust control plan shall include a description of the procedures the owner or operator will follow to periodically assess the effectiveness of the control plan.

(5) The owner or operator of a CCR unit shall prepare an initial CCR fugitive dust control plan for the facility no later than October 19, 2015, or by initial receipt of CCR in any CCR unit at the facility if the owner or operator becomes subject to Sections R315-319-50 through 107 after October 19, 2015. The owner or operator has completed the initial CCR fugitive dust control plan when the plan has been placed in the facility's operating record as required by Subsection R315-319-105(g)(1).

(6) Amendment of the plan. The owner or operator of a CCR unit subject to the requirements of Section R315-319-80 may amend the written CCR fugitive dust control plan at any time provided the revised plan is placed in the facility's operating record as required by Subsection R315-319-105(g)(1). The owner or operator shall amend the written plan whenever there is a change in conditions that would substantially affect the written plan in effect, such as the construction and operation of a new CCR unit.

(7) The owner or operator shall obtain a certification from a qualified professional engineer that the initial CCR fugitive dust control plan, or any subsequent amendment of it, meets the requirements of Section R315-319-80.

(c) Annual CCR fugitive dust control report. The owner or operator of a CCR unit shall prepare an annual CCR fugitive dust control report that includes a description of the actions taken by the owner or operator to control CCR fugitive dust, a record of all citizen complaints, and a summary of any corrective measures taken. The initial annual report shall be completed no later than 14 months after placing the initial CCR fugitive dust control plan in the facility's operating record. The deadline for completing a subsequent report is one year after the date of completing the previous report. For purposes of Subsection R315-319-80(c), the owner or operator has completed the annual CCR fugitive dust control report when the plan has been placed in the facility's operating record as required by Subsection R315-319-105(g)(2).

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(g), the notification requirements specified in Subsection R315-319-106(g), and the internet requirements specified in Subsection R315-319-107(g).

R315-319-81. Operating Criteria Run-On and Run-Off

Controls for CCR Landfills.

(a) The owner or operator of an existing or new CCR landfill or any lateral expansion of a CCR landfill shall design, construct, operate, and maintain:

(1) A run-on control system to prevent flow onto the active portion of the CCR unit during the peak discharge from a 24-hour, 25-year storm; and

(2) A run-off control system from the active portion of the CCR unit to collect and control at least the water volume resulting from a 24-hour, 25-year storm.

(b) Run-off from the active portion of the CCR unit shall be handled in accordance with the surface water requirements under Subsection R315-303-2(3).

(c) Run-on and run-off control system plan

(1) Content of the plan. The owner or operator shall prepare initial and periodic run-on and run-off control system plans for the CCR unit according to the timeframes specified in Subsections R315-319-81(c)(3) and (4). These plans shall document how the run-on and run-off control systems have been designed and constructed to meet the applicable requirements of Section R315-319-81. Each plan shall be supported by appropriate engineering calculations. The owner or operator has completed the initial run-on and run-off control system plan when the plan has been placed in the facility's operating record as required by Subsection R315-319-105(g)(3).

(2) Amendment of the plan. The owner or operator may amend the written run-on and run-off control system plan at any time provided the revised plan is placed in the facility's operating record as required by Subsection R315-319-105(g)(3). The owner or operator shall amend the written run-on and run-off control system plan whenever there is a change in conditions that would substantially affect the written plan in effect.

(3) Timeframes for preparing the initial plan

(i) Existing CCR landfills. The owner or operator of the CCR unit shall prepare the initial run-on and run-off control system plan no later than October 17, 2016.

(ii) New CCR landfills and any lateral expansion of a CCR landfill. The owner or operator shall prepare the initial run-on and run-off control system plan no later than the date of initial receipt of CCR in the CCR unit.

(4) Frequency for revising the plan. The owner or operator of the CCR unit shall prepare periodic run-on and run-off control system plans required by Subsection R315-319-81(c)(1) every five years. The date of completing the initial plan is the basis for establishing the deadline to complete the first subsequent plan. The owner or operator may complete any required plan prior to the required deadline provided the owner or operator places the completed plan into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing a subsequent plan is based on the date of completing the previous plan. For purposes of Subsection R315-319-81(c)(4), the owner or operator has completed a periodic run-on and run-off control system plan when the plan has been placed in the facility's operating record as required by Subsection R315-319-105(g)(3).

(5) The owner or operator shall obtain a certification from a qualified professional engineer stating that the initial and periodic run-on and run-off control system plans meet the requirements of Section R315-319-81.

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(g), the notification requirements specified in Subsection R315-319-106(g), and the internet requirements specified in Subsection R315-319-107(g).

R315-319-82. Operating Criteria - Hydrologic and Hydraulic Capacity Requirements for CCR Surface Impoundments.

(a) The owner or operator of an existing or new CCR surface impoundment or any lateral expansion of a CCR surface impoundment shall design, construct, operate, and maintain an inflow design flood control system as specified in Subsections R315-319-82(a)(1) and (2).

(1) The inflow design flood control system shall adequately manage flow into the CCR unit during and following the peak discharge of the inflow design flood specified in Subsection R315-319-82(a)(3).

(2) The inflow design flood control system shall adequately manage flow from the CCR unit to collect and control the peak discharge resulting from the inflow design flood specified in Subsection R315-319-82(a)(3).

(3) The inflow design flood is:

(i) For a high hazard potential CCR surface impoundment, as determined under Subsection R315-319-73(a)(2) or Subsection R315-319-74(a)(2), the probable maximum flood;

(ii) For a significant hazard potential CCR surface impoundment, as determined under Subsection R315-319-73(a)(2) or Subsection R315-319-74(a)(2), the 1,000-year flood;

(iii) For a low hazard potential CCR surface impoundment, as determined under Subsection R315-319-73(a)(2) or Subsection R315-319-74(a)(2), the 100-year flood; or

(iv) For an incised CCR surface impoundment, the 25-year flood.

(b) Discharge from the CCR unit shall be handled in accordance with the surface water requirements under Subsection R315-303-2(3).

(c) Inflow design flood control system plan

(1) Content of the plan. The owner or operator shall prepare initial and periodic inflow design flood control system plans for the CCR unit according to the timeframes specified in Subsections R315-319-82 (c)(3) and (4). These plans shall document how the inflow design flood control system has been designed and constructed to meet the requirements of Section R315-319-82. Each plan shall be supported by appropriate engineering calculations. The owner or operator of the CCR unit has completed the inflow design flood control system plan when the plan has been placed in the facility's operating record as required by Subsection R315-319-105(g)(4).

(2) Amendment of the plan. The owner or operator of the CCR unit may amend the written inflow design flood control system plan at any time provided the revised plan is placed in the facility's operating record as required by Subsection R315-319-105(g)(4). The owner or operator shall amend the written inflow design flood control system plan whenever there is a change in conditions that would substantially affect the written plan in effect.

(3) Timeframes for preparing the initial plan

(i) Existing CCR surface impoundments. The owner or operator of the CCR unit shall prepare the initial inflow design flood control system plan no later than October 17, 2016.

(ii) New CCR surface impoundments and any lateral expansion of a CCR surface impoundment. The owner or operator shall prepare the initial inflow design flood control system plan no later than the date of initial receipt of CCR in the CCR unit.

(4) Frequency for revising the plan. The owner or operator shall prepare periodic inflow design flood control system plans required by Subsection R315-319-82(c)(1) every five years. The date of completing the initial plan is the basis for establishing the deadline to complete the first

periodic plan. The owner or operator may complete any required plan prior to the required deadline provided the owner or operator places the completed plan into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing a subsequent plan is based on the date of completing the previous plan. For purposes of Subsection R315-319-82(c)(4), the owner or operator has completed an inflow design flood control system plan when the plan has been placed in the facility's operating record as required by Subsection R315-319-105(g)(4).

(5) The owner or operator shall obtain a certification from a qualified professional engineer stating that the initial and periodic inflow design flood control system plans meet the requirements of Section R315-319-82.

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(g), the notification requirements specified in Subsection R315-319-106(g), and the internet requirements specified in Subsection R315-319-107(g).

R315-319-83. Operating Criteria - Inspection Requirements for CCR Surface Impoundments.

(a) Inspections by a qualified person.

(1) All CCR surface impoundments and any lateral expansion of a CCR surface impoundment shall be examined by a qualified person as follows:

(i) At intervals not exceeding seven days, inspect for any appearances of actual or potential structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit;

(ii) At intervals not exceeding seven days, inspect the discharge of all outlets of hydraulic structures which pass underneath the base of the surface impoundment or through the dike of the CCR unit for abnormal discoloration, flow or discharge of debris or sediment; and

(iii) At intervals not exceeding 30 days, monitor all CCR unit instrumentation.

(iv) The results of the inspection by a qualified person shall be recorded in the facility's operating record as required by Subsection R315-319-105(g)(5).

(2) Timeframes for inspections by a qualified person

(i) Existing CCR surface impoundments. The owner or operator of the CCR unit shall initiate the inspections required under Subsection R315-319-83(a) no later than October 19, 2015.

(ii) New CCR surface impoundments and any lateral expansion of a CCR surface impoundment. The owner or operator of the CCR unit shall initiate the inspections required under Subsection R315-319-83(a) upon initial receipt of CCR by the CCR unit.

(b) Annual inspections by a qualified professional engineer.

(1) If the existing or new CCR surface impoundment or any lateral expansion of the CCR surface impoundment is subject to the periodic structural stability assessment requirements under Subsection R315-319-73(d) or Subsection R315-319-74(d), the CCR unit shall additionally be inspected on a periodic basis by a qualified professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. The inspection shall, at a minimum, include:

(i) A review of available information regarding the status and condition of the CCR unit, including, but not limited to, files available in the operating record, e.g., CCR unit design and construction information required by Subsections R315-319-73(c)(1) and 74(c)(1), previous periodic structural stability assessments required under Subsections R315-319-73(d) and 74(d), the results of inspections by a qualified person, and results of previous annual inspections;

(ii) A visual inspection of the CCR unit to identify signs of distress or malfunction of the CCR unit and appurtenant structures; and

(iii) A visual inspection of any hydraulic structures underlying the base of the CCR unit or passing through the dike of the CCR unit for structural integrity and continued safe and reliable operation.

(2) Inspection report. The qualified professional engineer shall prepare a report following each inspection that addresses the following:

(i) Any changes in geometry of the impounding structure since the previous annual inspection;

(ii) The location and type of existing instrumentation and the maximum recorded readings of each instrument since the previous annual inspection;

(iii) The approximate minimum, maximum, and present depth and elevation of the impounded water and CCR since the previous annual inspection;

(iv) The storage capacity of the impounding structure at the time of the inspection;

(v) The approximate volume of the impounded water and CCR at the time of the inspection;

(vi) Any appearances of an actual or potential structural weakness of the CCR unit, in addition to any existing conditions that are disrupting or have the potential to disrupt the operation and safety of the CCR unit and appurtenant structures; and

(vii) Any other change(s) which may have affected the stability or operation of the impounding structure since the previous annual inspection.

(3) Timeframes for conducting the initial inspection

(i) Existing CCR surface impoundments. The owner or operator of the CCR unit shall complete the initial inspection required by Subsections R315-319-8 (b)(1) and (2) no later than January 18, 2016.

(ii) New CCR surface impoundments and any lateral expansion of a CCR surface impoundment. The owner or operator of the CCR unit shall complete the initial annual inspection required by Subsections R315-319-83(b)(1) and (2) is completed no later than 14 months following the date of initial receipt of CCR in the CCR unit.

(4) Frequency of inspections.

(i) Except as provided for in Subsection R315-319-83(b)(4)(ii), the owner or operator of the CCR unit shall conduct the inspection required by Subsections R315-319-83(b)(1) and (2) on an annual basis. The date of completing the initial inspection report is the basis for establishing the deadline to complete the first subsequent inspection. Any required inspection may be conducted prior to the required deadline provided the owner or operator places the completed inspection report into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent inspection reports is based on the date of completing the previous inspection report. For purposes of Section R315-319-83, the owner or operator has completed an inspection when the inspection report has been placed in the facility's operating record as required by Subsection R315-319-105(g)(6).

(ii) In any calendar year in which both the periodic inspection by a qualified professional engineer and the quinquennial, occurring every five years, structural stability assessment by a qualified professional engineer required by Subsections R315-319-73(d) and 74(d) are required to be completed, the annual inspection is not required, provided the structural stability assessment is completed during the calendar year. If the annual inspection is not conducted in a year as provided by Subsection R315-319-83(b)(4)(ii), the

deadline for completing the next annual inspection is one year from the date of completing the quinquennial structural stability assessment.

(5) If a deficiency or release is identified during an inspection, the owner or operator shall remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(c) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(g), the notification requirements specified in Subsection R315-319-106(g), and the internet requirements specified in Subsection R315-319-107(g).

R315-319-84. Operating Criteria - Inspection Requirements for CCR Landfills.

(a) Inspections by a qualified person.

(1) All CCR landfills and any lateral expansion of a CCR landfill shall be examined by a qualified person as follows:

(i) At intervals not exceeding seven days, inspect for any appearances of actual or potential structural weakness and other conditions which are disrupting or have the potential to disrupt the operation or safety of the CCR unit; and

(ii) The results of the inspection by a qualified person shall be recorded in the facility's operating record as required by Subsection R315-319-105(g)(8).

(2) Timeframes for inspections by a qualified person

(i) Existing CCR landfills. The owner or operator of the CCR unit shall initiate the inspections required under Subsection R315-319-84(a) no later than October 19, 2015.

(ii) New CCR landfills and any lateral expansion of a CCR landfill. The owner or operator of the CCR unit shall initiate the inspections required under Subsection R315-319-84(a) upon initial receipt of CCR by the CCR unit.

(b) Annual inspections by a qualified professional engineer.

(1) Existing and new CCR landfills and any lateral expansion of a CCR landfill shall be inspected on a periodic basis by a qualified professional engineer to ensure that the design, construction, operation, and maintenance of the CCR unit is consistent with recognized and generally accepted good engineering standards. The inspection shall, at a minimum, include:

(i) A review of available information regarding the status and condition of the CCR unit, including, but not limited to, files available in the operating record, e.g., the results of inspections by a qualified person, and results of previous annual inspections; and

(ii) A visual inspection of the CCR unit to identify signs of distress or malfunction of the CCR unit.

(2) Inspection report. The qualified professional engineer shall prepare a report following each inspection that addresses the following:

(i) Any changes in geometry of the structure since the previous annual inspection;

(ii) The approximate volume of CCR contained in the unit at the time of the inspection;

(iii) Any appearances of an actual or potential structural weakness of the CCR unit, in addition to any existing conditions that are disrupting or have the potential to disrupt the operation and safety of the CCR unit; and

(iv) Any other change(s) which may have affected the stability or operation of the CCR unit since the previous annual inspection.

(3) Timeframes for conducting the initial inspection

(i) Existing CCR landfills. The owner or operator of the CCR unit shall complete the initial inspection required by Subsections R315-319-84(b)(1) and (2) no later than January 18, 2016.

(ii) New CCR landfills and any lateral expansion of a CCR landfill. The owner or operator of the CCR unit shall complete the initial annual inspection required by Subsections R315-319-84(b)(1) and (2) no later than 14 months following the date of initial receipt of CCR in the CCR unit.

(4) Frequency of inspections. The owner or operator of the CCR unit shall conduct the inspection required by Subsections R315-319-84(b)(1) and (2) on an annual basis. The date of completing the initial inspection report is the basis for establishing the deadline to complete the first subsequent inspection. Any required inspection may be conducted prior to the required deadline provided the owner or operator places the completed inspection report into the facility's operating record within a reasonable amount of time. In all cases, the deadline for completing subsequent inspection reports is based on the date of completing the previous inspection report. For purposes of Section R315-319-84, the owner or operator has completed an inspection when the inspection report has been placed in the facility's operating record as required by Subsection R315-319-105(g)(9).

(5) If a deficiency or release is identified during an inspection, the owner or operator shall remedy the deficiency or release as soon as feasible and prepare documentation detailing the corrective measures taken.

(c) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(g), the notification requirements specified in Subsection R315-319-106(g), and the internet requirements specified in Subsection R315-319-107(g).

R315-319-90. Groundwater Monitoring and Corrective Action - Applicability.

(a) Except as provided for in Subsection R315-319-100 for inactive CCR surface impoundments, all CCR landfills, CCR surface impoundments, and lateral expansions of CCR units are subject to the groundwater monitoring and corrective action requirements under Subsections R315-319-90 through 98.

(b) Initial timeframes

(1) Existing CCR landfills and existing CCR surface impoundments. No later than October 17, 2017, the owner or operator of the CCR unit shall be in compliance with the following groundwater monitoring requirements:

(i) Install the groundwater monitoring system as required by Subsection R315-319-91;

(ii) Develop the groundwater sampling and analysis program to include selection of the statistical procedures to be used for evaluating groundwater monitoring data as required by Subsection R315-319-93;

(iii) Initiate the detection monitoring program to include obtaining a minimum of eight independent samples for each background and downgradient well as required by Subsection R315-319-94(b); and

(iv) Begin evaluating the groundwater monitoring data for statistically significant increases over background levels for the constituents listed in appendix III of Rule R315-319 as required by Subsection R315-319-94.

(2) New CCR landfills, new CCR surface impoundments, and all lateral expansions of CCR units. Prior to initial receipt of CCR by the CCR unit, the owner or operator shall be in compliance with the groundwater monitoring requirements specified in Subsections R315-319-90(b)(1)(i) and (ii). In addition, the owner or operator of the CCR unit shall initiate the detection monitoring program to include obtaining a minimum of eight independent samples for each background well as required by Subsection R315-319-94(b).

(c) Once a groundwater monitoring system and

groundwater monitoring program has been established at the CCR unit as required by Sections R315-319-50 through 107, the owner or operator shall conduct groundwater monitoring and, if necessary, corrective action throughout the active life and post-closure care period of the CCR unit.

(d) In the event of a release from a CCR unit, the owner or operator shall immediately take all necessary measures to control the source(s) of releases so as to reduce or eliminate, to the maximum extent feasible, further releases of contaminants into the environment. The owner or operator of the CCR unit shall comply with all applicable requirements in Subsections R315-319-96, 97, and 98.

(e) Annual groundwater monitoring and corrective action report. For existing CCR landfills and existing CCR surface impoundments, no later than January 31, 2018, and annually thereafter, the owner or operator shall prepare an annual groundwater monitoring and corrective action report and forward the report to the Director by March 1 of each year. For new CCR landfills, new CCR surface impoundments, and all lateral expansions of CCR units, the owner or operator shall prepare the initial annual groundwater monitoring and corrective action report no later than January 31 of the year following the calendar year a groundwater monitoring system has been established for such CCR unit as required by Sections R315-319-50 through 107, and annually thereafter. For the preceding calendar year, the annual report shall document the status of the groundwater monitoring and corrective action program for the CCR unit, summarize key actions completed, describe any problems encountered, discuss actions to resolve the problems, and project key activities for the upcoming year. For purposes of Sections R315-319-90, the owner or operator has prepared the annual report when the report is placed in the facility's operating record as required by Subsection R315-319-105(h)(1). At a minimum, the annual groundwater monitoring and corrective action report shall contain the following information, to the extent available:

(1) A map, aerial image, or diagram showing the CCR unit and all background, or upgradient, and downgradient monitoring wells, to include the well identification numbers, that are part of the groundwater monitoring program for the CCR unit;

(2) Identification of any monitoring wells that were installed or decommissioned during the preceding year, along with a narrative description of why those actions were taken;

(3) In addition to all the monitoring data obtained under Sections R315-319-90 through 98, a summary including the number of groundwater samples that were collected for analysis for each background and downgradient well, the dates the samples were collected, and whether the sample was required by the detection monitoring or assessment monitoring programs;

(4) A narrative discussion of any transition between monitoring programs, e.g., the date and circumstances for transitioning from detection monitoring to assessment monitoring in addition to identifying the constituent(s) detected at a statistically significant increase over background levels; and

(5) Other information required to be included in the annual report as specified in Section R315-319-90 through 98.

(f) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the internet requirements specified in Subsection R315-319-107(h).

R315-319-91. Groundwater Monitoring and Corrective Action - Groundwater Monitoring Systems.

(a) Performance standard. The owner or operator of a CCR unit shall install a groundwater monitoring system consists of a sufficient number of wells, installed at appropriate locations and depths, to yield groundwater samples from the uppermost aquifer that:

(1) Accurately represent the quality of background groundwater that has not been affected by leakage from a CCR unit. A determination of background quality may include sampling of wells that are not hydraulically upgradient of the CCR management area where:

(i) Hydrogeologic conditions do not allow the owner or operator of the CCR unit to determine what wells are hydraulically upgradient; or

(ii) Sampling at other wells will provide an indication of background groundwater quality that is as representative or more representative than that provided by the upgradient wells; and

(2) Accurately represent the quality of groundwater passing the waste boundary of the CCR unit. The downgradient monitoring system shall be installed at the waste boundary that ensures detection of groundwater contamination in the uppermost aquifer. All potential contaminant pathways shall be monitored.

(b) The number, spacing, and depths of monitoring systems shall be determined based upon site-specific technical information that shall include thorough characterization of:

(1) Aquifer thickness, groundwater flow rate, groundwater flow direction including seasonal and temporal fluctuations in groundwater flow; and

(2) Saturated and unsaturated geologic units and fill materials overlying the uppermost aquifer, materials comprising the uppermost aquifer, and materials comprising the confining unit defining the lower boundary of the uppermost aquifer, including, but not limited to, thicknesses, stratigraphy, lithology, hydraulic conductivities, porosities and effective porosities.

(c) The groundwater monitoring system shall include the minimum number of monitoring wells necessary to meet the performance standards specified in Subsection R315-319-91(a), based on the site-specific information specified in Subsection R315-319-91(b). The groundwater monitoring system shall contain:

(1) A minimum of one upgradient and three downgradient monitoring wells; and

(2) Additional monitoring wells as necessary to accurately represent the quality of background groundwater that has not been affected by leakage from the CCR unit and the quality of groundwater passing the waste boundary of the CCR unit.

(d) The owner or operator of multiple CCR units may install a multiunit groundwater monitoring system instead of separate groundwater monitoring systems for each CCR unit.

(1) The multiunit groundwater monitoring system shall be equally as capable of detecting monitored constituents at the waste boundary of the CCR unit as the individual groundwater monitoring system specified in Subsections R315-319-91(a) through (c) for each CCR unit based on the following factors:

(i) Number, spacing, and orientation of each CCR unit;

(ii) Hydrogeologic setting;

(iii) Site history; and

(iv) Engineering design of the CCR unit.

(2) If the owner or operator elects to install a multiunit groundwater monitoring system, and if the multiunit system includes at least one existing unlined CCR surface impoundment as determined by Subsection R315-319-71(a), and if at any time after October 19, 2015 the owner or operator determines in any sampling event that the concentrations of one or more constituents listed in appendix

IV to Rule R315-319 are detected at statistically significant levels above the groundwater protection standard established under Subsection R315-319-95(h) for the multiunit system, then all unlined CCR surface impoundments comprising the multiunit groundwater monitoring system are subject to the closure requirements under Subsection R315-319-101(a) to retrofit or close.

(e) Monitoring wells shall be cased in a manner that maintains the integrity of the monitoring well borehole. This casing shall be screened or perforated and packed with gravel or sand, where necessary, to enable collection of groundwater samples. The annular space, i.e., the space between the borehole and well casing, above the sampling depth shall be sealed to prevent contamination of samples and the groundwater.

(1) The owner or operator of the CCR unit shall document and include in the operating record the design, installation, development, and decommissioning of any monitoring wells, piezometers and other measurement, sampling, and analytical devices. The qualified professional engineer shall be given access to this documentation when completing the groundwater monitoring system certification required under Subsection R315-319-91(f).

(2) The monitoring wells, piezometers, and other measurement, sampling, and analytical devices shall be operated and maintained so that they perform to the design specifications throughout the life of the monitoring program.

(f) The owner or operator shall obtain a certification from a qualified professional engineer stating that the groundwater monitoring system has been designed and constructed to meet the requirements of Section R315-319-91. If the groundwater monitoring system includes the minimum number of monitoring wells specified in Subsection R315-319-91(c)(1), the certification shall document the basis supporting this determination.

(g) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the internet requirements specified in Subsection R315-319-107(h).

R315-319-93. Groundwater Monitoring and Corrective Action - Groundwater Sampling and Analysis Requirements.

(a) The groundwater monitoring program shall include consistent sampling and analysis procedures designed to ensure monitoring results that provide an accurate representation of groundwater quality at the background and downgradient wells required by Subsection R315-319-91. The owner or operator of the CCR unit shall develop and receive approval from the Director for a sampling and analysis program that includes procedures and techniques for:

(1) Sample collection;

(2) Sample preservation and shipment;

(3) Analytical procedures;

(4) Chain of custody control; and

(5) Quality assurance and quality control.

(b) The groundwater monitoring program shall include sampling and analytical methods that are appropriate for groundwater sampling and that accurately measure hazardous constituents and other monitoring parameters in groundwater samples. For purposes of Subsections R315-319-90 through 98, the term constituent refers to both hazardous constituents and other monitoring parameters listed in either appendix III or IV of Rule R315-319.

(c) Groundwater elevations shall be measured in each well immediately prior to purging, each time groundwater is sampled. The owner or operator of the CCR unit shall determine the rate and direction of groundwater flow each time groundwater is sampled. Groundwater elevations in wells which monitor the same CCR management area shall be measured within a period of time short enough to avoid temporal variations in groundwater flow which could preclude accurate determination of groundwater flow rate and direction.

(d) The owner or operator of the CCR unit shall establish background groundwater quality in a hydraulically upgradient or background well(s) for each of the constituents required in the particular groundwater monitoring program that applies to the CCR unit as determined under Subsection R315-319-94(a) or Subsection R315-319-95(a). Background groundwater quality may be established at wells that are not located hydraulically upgradient from the CCR unit if it meets the requirements of Subsection R315-319-91(a)(1).

(e) The number of samples collected when conducting detection monitoring and assessment monitoring, for both downgradient and background wells, shall be consistent with the statistical procedures chosen under Subsection R315-319-93(f) and the performance standards under Subsection R315-319-93(g). The sampling procedures shall be those specified under Subsections R315-319-94(b) through (d) for detection monitoring, Subsection R315-319-95(b) through (d) for assessment monitoring, and Subsection R315-319-96(b) for corrective action.

(f) The owner or operator of the CCR unit shall select one of the statistical methods specified in Subsections R315-319-93(f)(1) through (5) to be used in evaluating groundwater monitoring data for each specified constituent. The statistical test chosen shall be conducted separately for each constituent in each monitoring well.

(1) A parametric analysis of variance followed by multiple comparison procedures to identify statistically significant evidence of contamination. The method shall include estimation and testing of the contrasts between each compliance well's mean and the background mean levels for each constituent.

(2) An analysis of variance based on ranks followed by multiple comparison procedures to identify statistically significant evidence of contamination. The method shall include estimation and testing of the contrasts between each compliance well's median and the background median levels for each constituent.

(3) A tolerance or prediction interval procedure, in which an interval for each constituent is established from the distribution of the background data and the level of each constituent in each compliance well is compared to the upper tolerance or prediction limit.

(4) A control chart approach that gives control limits for each constituent.

(5) Another statistical test method that meets the performance standards of Subsection R315-319-93(g) and has been approved by the Director.

(6) The owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer stating that the selected statistical method is appropriate for evaluating the groundwater monitoring data for the CCR management area. The certification shall include a narrative description of the statistical method selected to evaluate the groundwater monitoring data.

(g) Any statistical method chosen under Subsection R315-319-93(f) shall comply with the following performance standards, as appropriate, based on the statistical test method used:

(1) The statistical method used to evaluate groundwater monitoring data shall be appropriate for the distribution of constituents. Normal distributions of data values shall use parametric methods. Non-normal distributions shall use non-parametric methods. If the distribution of the constituents is

shown by the owner or operator of the CCR unit to be inappropriate for a normal theory test, then the data shall be transformed or a distribution-free, non-parametric, theory test shall be used. If the distributions for the constituents differ, more than one statistical method may be needed.

(2) If an individual well comparison procedure is used to compare an individual compliance well constituent concentration with background constituent concentrations or a groundwater protection standard, the test shall be done at a Type I error level no less than 0.01 for each testing period. If a multiple comparison procedure is used, the Type I experiment wise error rate for each testing period shall be no less than 0.05; however, the Type I error of no less than 0.01 for individual well comparisons shall be maintained. This performance standard does not apply to tolerance intervals, prediction intervals, or control charts.

(3) If a control chart approach is used to evaluate groundwater monitoring data, the specific type of control chart and its associated parameter values shall be such that this approach is at least as effective as any other approach in Section R315-319-93 for evaluating groundwater data. The parameter values shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

(4) If a tolerance interval or a predictional interval is used to evaluate groundwater monitoring data, the levels of confidence and, for tolerance intervals, the percentage of the population that the interval shall contain, shall be such that this approach is at least as effective as any other approach in Section R315-319-93 for evaluating groundwater data. These parameters shall be determined after considering the number of samples in the background data base, the data distribution, and the range of the concentration values for each constituent of concern.

(5) The statistical method shall account for data below the limit of detection with one or more statistical procedures that shall at least as effective as any other approach in Section R315-319-93 for evaluating groundwater data. Any practical quantitation limit that is used in the statistical method shall be the lowest concentration level that can be reliably achieved within specified limits of precision and accuracy during routine laboratory operating conditions that are available to the facility.

(6) If necessary, the statistical method shall include procedures to control or correct for seasonal and spatial variability as well as temporal correlation in the data.

(h) The owner or operator of the CCR unit shall determine whether or not there is a statistically significant increase over background values for each constituent required in the particular groundwater monitoring program that applies to the CCR unit, as determined under Subsection R315-319-94(a) or Subsection R315-319-95(a).

(1) In determining whether a statistically significant increase has occurred, the owner or operator shall compare the groundwater quality of each constituent at each monitoring well designated pursuant to Subsection R315-319-91(a)(2) or (d)(1) to the background value of that constituent, according to the statistical procedures and performance standards specified under Subsections R315-319-93(f) and (g).

(2) Within 90 days after completing sampling and analysis, the owner or operator shall determine whether there has been a statistically significant increase over background for any constituent at each monitoring well.

(i) The owner or operator shall measure "total recoverable metals" concentrations in measuring groundwater quality. Measurement of total recoverable metals captures both the particulate fraction and dissolved fraction of metals in natural waters. Groundwater samples shall not be field-filtered prior to analysis.

(j) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the Internet requirements specified in Subsection R315-319-107(h).

R315-319-94 Groundwater Monitoring and Corrective Action - Detection Monitoring Program.

(a) The owner or operator of a CCR unit shall conduct detection monitoring at all groundwater monitoring wells consistent with Section R315-319-94. At a minimum, a detection monitoring program shall include groundwater monitoring for all constituents listed in appendix III to Rule R315-319.

(b) Except as provided in Subsection R315-319-94(d), the monitoring frequency for the constituents listed in appendix III to Rule R315-319 shall be at least semiannual during the active life of the CCR unit and the post-closure period. For existing CCR landfills and existing CCR surface impoundments, a minimum of eight independent samples from each background and downgradient well shall be collected and analyzed for the constituents listed in appendix III and IV to Rule R315-319 no later than October 17, 2017. For new CCR landfills, new CCR surface impoundments, and all lateral expansions of CCR units, a minimum of eight independent samples for each background well shall be collected and analyzed for the constituents listed in appendices III and IV to Rule R315-319 during the first six months of sampling.

(c) The number of samples collected and analyzed for each background well and downgradient well during subsequent semiannual sampling events shall be consistent with Subsection R315-319-93(e), and shall account for any unique characteristics of the site, but shall be at least one sample from each background and downgradient well.

(d) The owner or operator of a CCR unit may demonstrate the need for an alternative monitoring frequency for repeated sampling and analysis for constituents listed in appendix III to Rule R315-319 during the active life and the post-closure care period based on the availability of groundwater. This demonstration shall be submitted and approved by the Director. If there is not adequate groundwater flow to sample wells semiannually, the alternative frequency shall be no less than annual. The need to vary monitoring frequency shall be evaluated on a site-specific basis. The demonstration shall be supported by, at a minimum, the information specified in Subsections R315-319-94(d)(1) and (2).

(1) Information documenting that the need for less frequent sampling. The alternative frequency shall be based on consideration of the following factors:

(i) Lithology of the aquifer and unsaturated zone;

(ii) Hydraulic conductivity of the aquifer and unsaturated zone; and

(iii) Groundwater flow rates.

(2) Information documenting that the alternative frequency will be no less effective in ensuring that any leakage from the CCR unit will be discovered within a timeframe that will not materially delay establishment of an assessment monitoring program.

(3) The owner or operator shall obtain a certification from a qualified professional engineer stating that the demonstration for an alternative groundwater sampling and analysis frequency meets the requirements of Section R315-319-94. The owner or operator shall include the demonstration providing the basis for the alternative monitoring frequency and the certification by a qualified

professional engineer in the annual groundwater monitoring and corrective action report required by Subsection R315-319-90(e).

(e) If the owner or operator of the CCR unit determines, pursuant to Subsection R315-319-93(h) that there is a statistically significant increase over background levels for one or more of the constituents listed in appendix III to Rule R315-319 at any monitoring well at the waste boundary specified under Subsection R315-319-91(a)(2), the owner or operator shall:

(1) Except as provided for in Subsection R315-319-94(e)(2), within 90 days of detecting a statistically significant increase over background levels for any constituent, establish an assessment monitoring program meeting the requirements of Subsection R315-319-95.

(2) The owner or operator may demonstrate that a source other than the CCR unit caused the statistically significant increase over background levels for a constituent or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. The owner or operator shall complete the written demonstration within 90 days of detecting a statistically significant increase over background levels to include obtaining a certification from a qualified professional engineer verifying the accuracy of the information in the report. If a successful demonstration is completed within the 90-day period, the owner or operator of the CCR unit may continue with a detection monitoring program under Section R315-319-94. If a successful demonstration is not completed within the 90-day period, the owner or operator of the CCR unit shall initiate an assessment monitoring program as required under Subsection R315-319-95. The owner or operator shall also include the demonstration in the annual groundwater monitoring and corrective action report required by Subsection R315-319-90(e), in addition to the certification by a qualified professional engineer.

(3) The owner or operator of a CCR unit shall prepare a notification stating that an assessment monitoring program has been established. The owner or operator has completed the notification when the notification is placed in the facility's operating record as required by Subsection R315-319-105(h)(5).

(f) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the Internet requirements specified in Subsection R315-319-107(h).

R315-319-95. Groundwater Monitoring and Corrective Action - Assessment Monitoring Program.

(a) Assessment monitoring is required whenever a statistically significant increase over background levels has been detected for one or more of the constituents listed in appendix III to Rule R315-319.

(b) Within 90 days of triggering an assessment monitoring program, and annually thereafter, the owner or operator of the CCR unit shall sample and analyze the groundwater for all constituents listed in appendix IV to Rule R315-319. The number of samples collected and analyzed for each well during each sampling event shall be consistent with Subsection R315-319-93(e), and shall account for any unique characteristics of the site, but shall be at least one sample from each well.

(c) The owner or operator of a CCR unit may demonstrate the need for an alternative monitoring frequency for repeated sampling and analysis for constituents listed in appendix IV to Rule R315-319 during the active life and the post-closure care period based on the availability of groundwater. If there is not adequate groundwater flow to sample wells semiannually, the alternative frequency shall be no less than annual. The need to vary monitoring frequency shall be evaluated on a site-specific basis. The demonstration shall be supported by, at a minimum, the information specified in Subsections R315-319-95(c)(1) and (2).

(1) Information documenting that the need for less frequent sampling. The alternative frequency shall be based on consideration of the following factors:

(i) Lithology of the aquifer and unsaturated zone;

(ii) Hydraulic conductivity of the aquifer and unsaturated zone; and

(iii) Groundwater flow rates.

(2) Information documenting that the alternative frequency will be no less effective in ensuring that any leakage from the CCR unit will be discovered within a timeframe that will not materially delay the initiation of any necessary remediation measures.

(3) The owner or operator shall obtain a certification from a qualified professional engineer stating that the demonstration for an alternative groundwater sampling and analysis frequency meets the requirements of Section R315-319-95. The owner or operator shall include the demonstration providing the basis for the alternative monitoring frequency and the certification by a qualified professional engineer in the annual groundwater monitoring and corrective action report required by Subsection R315-319-90(e).

(d) After obtaining the results from the initial and subsequent sampling events required in Subsection R315-319-95(b), the owner or operator shall:

(1) Within 90 days of obtaining the results, and on at least a semiannual basis thereafter, resample all wells that were installed pursuant to the requirements of Section R315-319-91, conduct analyses for all parameters in appendix III to Rule R315-319 and for those constituents in appendix IV to Rule R315-319 that are detected in response to Subsection R315-319-95(b), and record their concentrations in the facility operating record. The number of samples collected and analyzed for each background well and downgradient well during subsequent semiannual sampling events shall be consistent with Subsection R315-319-93(e), and shall account for any unique characteristics of the site, but shall be at least one sample from each background and downgradient well;

(2) Establish groundwater protection standards for all constituents detected pursuant to Subsection R315-319-95(b) or (d). The groundwater protection standards shall be established in accordance with Subsection R315-319-95(h); and

(3) Include the recorded concentrations required by Subsection R315-319-95(d)(1), identify the background concentrations established under Subsection R315-319-94(b), and identify the groundwater protection standards established under Subsection R315-319-95(d)(2) in the annual groundwater monitoring and corrective action report required by Subsection R315-319-90(e).

(e) If the concentrations of all constituents listed in appendices III and IV of Rule R315-319 are shown to be at or below background values, using the statistical procedures in Subsection R315-319-93(g), for two consecutive sampling events, the owner or operator may return to detection monitoring of the CCR unit. The owner or operator shall prepare a notification stating that detection monitoring is resuming for the CCR unit and submit the notification to the Director for approval. The owner or operator has completed the notification when the notification is placed in the facility's operating record as required by Subsection R315-319-105(h)(7).

(f) If the concentrations of any constituent in appendices

III and IV to Rule R315-319 are above background values, but all concentrations are below the groundwater protection standard established under Subsection R315-319-95(h), using the statistical procedures in Subsection R315-319-93(g), the owner or operator shall continue assessment monitoring in accordance with Section R315-319-95.

(g) If one or more constituents in appendix IV to Rule R315-319 are detected at statistically significant levels above the groundwater protection standard established under Subsection R315-319-95(h) in any sampling event, the owner or operator shall prepare a notification identifying the constituents in appendix IV to Rule R315-319 that have exceeded the groundwater protection standard. The owner or operator has completed the notification when the notification is placed in the facility's operating record as required by Subsection R315-319-105(h)(8). The owner or operator of the CCR unit also shall:

(1) Characterize the nature and extent of the release and any relevant site conditions that may affect the remedy ultimately selected. The characterization shall be sufficient to support a complete and accurate assessment of the corrective measures necessary to effectively clean up all releases from the CCR unit pursuant to Subsection R315-319-96. Characterization of the release includes the following minimum measures:

(i) Install additional monitoring wells necessary to define the contaminant plume(s);

(ii) Collect data on the nature and estimated quantity of material released including specific information on the constituents listed in appendix IV of Rule R315-319 and the levels at which they are present in the material released;

(iii) Install at least one additional monitoring well at the facility boundary in the direction of contaminant migration and sample this well in accordance with Subsection R315-319-95(d)(1); and

(iv) Sample all wells in accordance with Subsection R315-319-95(d)(1) to characterize the nature and extent of the release.

(2) Notify all persons who own the land or reside on the land that directly overlies any part of the plume of contamination if contaminants have migrated off-site if indicated by sampling of wells in accordance with Subsection R315-319-95(g)(1). The owner or operator has completed the notifications when they are placed in the facility's operating record as required by Subsection R315-319-105(h)(8).

(3) Within 90 days of finding that any of the constituents listed in appendix IV to Rule R315-319 have been detected at a statistically significant level exceeding the groundwater protection standards the owner or operator shall either:

(i) Initiate an assessment of corrective measures as approved by the Director and as required by Subsection R315-319-96; or

(ii) Demonstrate that a source other than the CCR unit caused the contamination, or that the statistically significant increase resulted from error in sampling, analysis, statistical evaluation, or natural variation in groundwater quality. Any such demonstration shall be submitted to and has received approval from the Director and supported by a report that includes the factual or evidentiary basis for any conclusions and shall be certified to be accurate by a qualified professional engineer. If a successful demonstration is made, the owner or operator shall continue monitoring in accordance with the assessment monitoring program pursuant to Section R315-319-95, and may return to detection monitoring if the constituents in appendices III and IV to Rule R315-319 are at or below background as specified in Subsection R315-319-95(e). The owner or operator shall also include the demonstration in the annual groundwater monitoring and corrective action report required by Subsection R315-319-90(e), in addition to the certification by a qualified professional engineer.

(4) If a successful demonstration has not been made at the end of the 90 day period provided by Subsection R315-319-95(g)(3)(ii), the owner or operator of the CCR unit shall initiate the assessment of corrective measures requirements under Subsection R315-319-96.

(5) If an assessment of corrective measures is required under Subsection R315-319-96 by either Subsection R315-319-95(g)(3)(i) or (g)(4), and if the CCR unit is an existing unlined CCR surface impoundment as determined by Subsection R315-319-71(a), then the CCR unit is subject to the closure requirements under Subsection R315-319-101(a) to retrofit or close. In addition, the owner or operator shall prepare a notification stating that an assessment of corrective measures has been initiated.

(h) The owner or operator of the CCR unit shall establish a groundwater protection standard for each constituent in appendix IV to Rule R315-319 detected in the groundwater. The groundwater protection standard shall be:

(1) For constituents for which a ground water protection standard has been estaliblished in rule R315-308, the ground water protection standard in Rule R315-308;

(2) For constituents for which a ground water protection standard has not been established in Rule R315-308, the background concentration for the constituent established from wells in accordance with Section R315-319-91; or

(3) For constituents for which the background level is higher than the ground water protection standard identified under Subsection R315-319-95(h)(1), the background concentration.

(i) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the Internet requirements specified in Subsection R315-319-107(h).

R315-319-96. Groundwater Monitoring and Corrective Action Assessment of Corrective Measures.

(a) Within 90 days of finding that any constituent listed in appendix IV to Rule R315-319 has been detected at a statistically significant level exceeding the groundwater protection standard defined under Subsection R315-319-95(h), or immediately upon detection of a release from a CCR unit, the owner or operator shall initiate an assessment of corrective measures to prevent further releases, to remediate any releases and to restore affected area to original conditions. The assessment of corrective measures shall be completed within 90 days, unless the owner or operator demonstrates the need for additional time to complete the assessment of corrective measures due to site-specific conditions or circumstances. The owner or operator shall obtain a certification from a qualified professional engineer attesting that the demonstration is accurate. The 90-day deadline to complete the assessment of corrective measures may be extended for no longer than 60 days. The owner or operator shall also include the demonstration in the annual groundwater monitoring and corrective action report required by Subsection R315-319-90(e), in addition to the certification by a qualified professional engineer.

(b) The owner or operator of the CCR unit shall continue to monitor groundwater in accordance with the assessment monitoring program as specified in Subsection R315-319-95.

(c) The assessment under Subsection R315-319-96(a) shall include an analysis of the effectiveness of potential corrective measures in meeting all of the requirements and objectives of the remedy as described under Subsection

R315-319-97 addressing at least the following:

(1) The performance, reliability, ease of implementation, and potential impacts of appropriate potential remedies, including safety impacts, cross-media impacts, and control of exposure to any residual contamination;

(2) The time required to begin and complete the remedy;

(3) The institutional requirements, such as state or local permit requirements or other environmental or public health requirements that may substantially affect implementation of the remedy(s).

(d) The owner or operator shall place the completed assessment of corrective measures in the facility's operating record. The assessment has been completed when it is placed in the facility's operating record as required by Subsection R315-319-105(h)(10).

(e) The owner or operator shall discuss the results of the corrective measures assessment at least 30 days prior to the selection of remedy, in a public meeting with interested and affected parties.

(f) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the Internet requirements specified in Subsection R315-319-107(h).

R315-319-97. Groundwater Monitoring and Corrective Action Selection of Remedy.

(a) Based on the results of the corrective measures assessment conducted under Subsection R315-319-96, the owner or operator shall, as soon as feasible, select a remedy that, at a minimum, meets the standards listed in Subsection R315-319-97(b). This requirement applies to, not in place of, any applicable standards under the Occupational Safety and Health Act. The owner or operator shall prepare a semiannual report describing the progress in selecting and designing the remedy. Upon selection of a remedy, the owner or operator shall prepare a final report describing the selected remedy and how it meets the standards specified in Subsection R315-319-97(b). The remedy and report shall be approved by the Director. The owner or operator shall obtain a certification from a qualified professional engineer that the remedy selected meets the requirements of Section R315-319-97. The report has been completed when it is placed in the operating record as required by Subsection R315-319-105(h)(12).

(b) Remedies shall:

(1) Be protective of human health and the environment;

(2) Attain the groundwater protection standard as specified pursuant to Subsection R315-319-95(h);

(3) Control the source(s) of releases so as to reduce or eliminate, to the maximum extent feasible, further releases of constituents in appendix IV to Rule R315-319 into the environment;

(4) Remove from the environment as much of the contaminated material that was released from the CCR unit as is feasible, taking into account factors such as avoiding inappropriate disturbance of sensitive ecosystems;

(5) Comply with standards for management of wastes as specified in Subsection R315-319-98(d).

(c) In selecting a remedy that meets the standards of Subsection R315-319-97(b), the owner or operator of the CCR unit shall consider the following evaluation factors:

(1) The long- and short-term effectiveness and protectiveness of the potential remedy(s), along with the degree of certainty that the remedy will prove successful based on consideration of the following:

(i) Magnitude of reduction of existing risks;

(ii) Magnitude of residual risks in terms of likelihood of further releases due to CCR remaining following implementation of a remedy;

(iii) The type and degree of long-term management required, including monitoring, operation, and maintenance;

(iv) Short-term risks that might be posed to the community or the environment during implementation of such a remedy, including potential threats to human health and the environment associated with excavation, transportation, and re-disposal of contaminant;

(v) Time until full protection is achieved;

(vi) Potential for exposure of humans and environmental receptors to remaining wastes, considering the potential threat to human health and the environment associated with excavation, transportation, re-disposal, or containment;

(vii) Long-term reliability of the engineering and institutional controls; and

(viii) Potential need for replacement of the remedy.

(2) The effectiveness of the remedy in controlling the source to reduce further releases based on consideration of the following factors:

(i) The extent to which containment practices will reduce further releases; and

(ii) The extent to which treatment technologies may be used.

(3) The ease or difficulty of implementing a potential remedy(s) based on consideration of the following types of factors:

(i) Degree of difficulty associated with constructing the technology;

(ii) Expected operational reliability of the technologies;

(iii) Need to coordinate with and obtain necessary approvals and permits from other agencies;

(iv) Availability of necessary equipment and specialists; and

(v) Available capacity and location of needed treatment, storage, and disposal services.

(4) The degree to which community concerns are addressed by a potential remedy(s).

(d) The owner or operator shall specify as part of the selected remedy a schedule(s) for implementing and completing remedial activities. Such a schedule shall require the completion of remedial activities within a reasonable period of time taking into consideration the factors set forth in Subsections R315-319-97 (d)(1) through (6). The owner or operator of the CCR unit shall consider the following factors in determining the schedule of remedial activities:

(1) Extent and nature of contamination, as determined by the characterization required under Subsection R315-319-95(g);

(2) Reasonable probabilities of remedial technologies in achieving compliance with the groundwater protection standards established under Subsection R315-319-95(h) and other objectives of the remedy;

(3) Availability of treatment or disposal capacity for CCR managed during implementation of the remedy;

(4) Potential risks to human health and the environment from exposure to contamination prior to completion of the remedy;

(5) Resource value of the aquifer including:

(i) Current and future uses;

(ii) Proximity and withdrawal rate of users;

(iii) Groundwater quantity and quality;

(iv) The potential damage to wildlife, crops, vegetation, and physical structures caused by exposure to CCR constituents;

(v) The hydrogeologic characteristic of the facility and surrounding land; and

(vi) The availability of alternative water supplies; and

(6) Other relevant factors as required by the Director.

(e) The owner or operator of the CCR unit shall comply

with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the Internet requirements specified in Subsection R315-319-107(h).

R315-319-98. Groundwater Monitoring and Corrective Action Implementation of the Corrective Action Program.

(a) Within 90 days of selecting a remedy under Subsection R315-319-97, the owner or operator shall initiate remedial activities. Based on the schedule established under Subsection R315-319-97(d) for implementation and completion of remedial activities the owner or operator shall:

(1) Establish and implement a corrective action groundwater monitoring program that:

(i) At a minimum, meets the requirements of an assessment monitoring program under Subsection R315-319-95;

(ii) Documents the effectiveness of the corrective action remedy; and

(iii) Demonstrates compliance with the groundwater protection standard pursuant to Subsection R315-319-98(c).

(2) Implement the corrective action remedy selected under Subsection R315-319-97; and

(3) Take any interim measures necessary to reduce the contaminants leaching from the CCR unit, and/or potential exposures to human or ecological receptors. Interim measures shall, to the greatest extent feasible, be consistent with the objectives of and contribute to the performance of any remedy that may be required pursuant to Subsection R315-319-97. The following factors shall be considered by an owner or operator in determining whether interim measures are necessary:

(i) Time required to develop and implement a final remedy;

(ii) Actual or potential exposure of nearby populations or environmental receptors to any of the constituents listed in appendix IV of Rule R315-319;

(iii) Actual or potential contamination of drinking water supplies or sensitive ecosystems;

(iv) Further degradation of the groundwater that may occur if remedial action is not initiated expeditiously;

(v) Weather conditions that may cause any of the constituents listed in appendix IV to this part to migrate or be released;

(vi) Potential for exposure to any of the constituents listed in appendix IV to Rule R315-319 as a result of an accident or failure of a container or handling system; and

(vii) Other situations that may pose threats to human health and the environment.

(b) If an owner or operator of the CCR unit, determines, at any time, that compliance with the requirements of Subsection R315-319-97(b) is not being achieved through the remedy selected, the owner or operator shall, with approval of the Director, implement other methods or techniques that could feasibly achieve compliance with the requirements.

(c) Remedies selected pursuant to Subsection R315-319-97 shall be considered complete when:

(1) The owner or operator of the CCR unit demonstrates compliance with the groundwater protection standards established under Subsection R315-319-95(h) has been achieved at all points within the plume of contamination that lie beyond the groundwater monitoring well system established under Subsection R315-319-91 and has received Director approval.

(2) Compliance with the groundwater protection standards established under Subsection R315-319-95(h) has been achieved by demonstrating that concentrations of constituents listed in appendix IV to Rule R315-319 have not exceeded the groundwater protection standard(s) for a period of three consecutive years using the statistical procedures and performance standards in Subsection R315-319-93(f) and (g).

(3) All actions required to complete the remedy have been satisfied.

(d) All CCR that are managed pursuant to a remedy required under Section R315-319-97, or an interim measure required under Subsection R315-319-98(a)(3), shall be managed in a manner that complies with all applicable Utah requirements.

(e) Upon completion of the remedy, the owner or operator shall prepare a notification stating that the remedy has been completed. The notification shall be submitted to and be approved by the Director. The owner or operator shall obtain a certification from a qualified professional engineer attesting that the remedy has been completed in compliance with the requirements of Subsection R315-319-98(c). The report has been completed when it is placed in the operating record as required by Subsection R315-319-105(h)(13).

(f) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(h), the notification requirements specified in Subsection R315-319-106(h), and the internet requirements specified in Subsection R315-319-107(h).

R315-319-100. Closure and Post-Closure Care Inactive CCR Surface Impoundments.

(a) Inactive CCR surface impoundments are subject to all of the requirements of Sections R315-319-50 through 107 applicable to existing CCR surface impoundments.

R315-319-101. Closure and Post-Closure Care - Closure or Retrofit of CCR Units.

(a) The owner or operator of an existing unlined CCR surface impoundment, as determined under Subsection R315-319-71(a), is subject to the requirements of Subsection R315-319-101(a)(1).

(1) Except as provided by Subsection R315-319-101(a)(3), if at any time after October 19, 2015 an owner or operator of an existing unlined CCR surface impoundment determines in any sampling event that the concentrations of one or more constituents listed in appendix IV to Rule R315-319 are detected at statistically significant levels above the groundwater protection standard established under Subsection R315-319-95(h) for such CCR unit, within six months of making such determination, the owner or operator of the existing unlined CCR surface impoundment shall cease placing CCR and non-CCR wastestreams into such CCR surface impoundment and either retrofit or close the CCR unit in accordance with the requirements of Subsection R315-319-102.

(2) An owner or operator of an existing unlined CCR surface impoundment that closes in accordance with Subsection R315-319-101(a)(1) shall include a statement in the notification required under Subsection R315-319-102(g) or (k)(5) that the CCR surface impoundment is closing or retrofitting under the requirements of Subsection R315-319-101(a)(1).

(3) The timeframe specified in Subsection R315-319-101(a)(1) does not apply if the owner or operator complies with the alternative closure procedures specified in Subsection R315-319-103.

(4) At any time after the initiation of closure under Subsection R315-319-101(a)(1), the owner or operator may cease closure activities and initiate a retrofit of the CCR unit in accordance with the requirements of Subsection R315-319-102(k).

(b) The owner or operator of an existing CCR surface impoundment is subject to the requirements of Subsection

R315-319-101(b)(1).

(1) Except as provided by Subsection R315-319-101(b)(4), within six months of determining that an existing CCR surface impoundment has not demonstrated compliance with any location standard specified in Subsections R315-319-60(a), 61(a), 62(a), 63(a), and 64(a), the owner or operator of the CCR surface impoundment shall cease placing CCR and non-CCR wastestreams into such CCR unit and close the CCR unit in accordance with the requirements of Subsection R315-319-102.

(2) Within six months of either failing to complete the initial or any subsequent periodic safety factor assessment required by Subsection R315-319-73(e) by the deadlines specified in Subsections R315-319-73(f)(1) through (3) or failing to document that the calculated factors of safety for the existing CCR surface impoundment achieve the minimum safety factors specified in Subsections R315-319-73(e)(1)(i) through (iv), the owner or operator of the CCR surface impoundment shall cease placing CCR and non-CCR wastestreams into such CCR unit and close the CCR unit in accordance with the requirements of Subsection R315-319-102.

(3) An owner or operator of an existing CCR surface impoundment that closes in accordance with Subsection R315-319-101(b)(1) or (2) shall include a statement in the notification required under Subsection R315-319-102(g) that the CCR surface impoundment is closing under the requirements of Subsection R315-319-101(b)(1) or (2).

(4) The timeframe specified in Subsection R315-319-101(b)(1) does not apply if the owner or operator complies with the alternative closure procedures specified in Subsection R315-319-103.

(c) The owner or operator of a new CCR surface impoundment is subject to the requirements of Subsection R315-319-101(c)(1).

(1) Within six months of either failing to complete the initial or any subsequent periodic safety factor assessment required by Subsection R315-319-74(e) by the deadlines specified in Subsections R315-319-74(f)(1) through (3) or failing to document that the calculated factors of safety for the new CCR surface impoundment achieve the minimum safety factors specified in Subsections R315-319-74(e)(1)(i) through (v), the owner or operator of the CCR surface impoundment shall cease placing CCR and non-CCR wastestreams into such CCR unit and close the CCR unit in accordance with the requirements of Section R315-319-102.

(2) An owner or operator of an new CCR surface impoundment that closes in accordance with Subsection R315-319-101(c)(1) shall include a statement in the notification required under Subsection R315-319-102(g) that the CCR surface impoundment is closing under the requirements of Subsection R315-319-101(c)(1).

(d) The owner or operator of an existing CCR landfill is subject to the requirements of Subsection R315-319-101(d)(1).

(1) Except as provided by Subsection R315-319-101(d)(3), within six months of determining that an existing CCR landfill has not demonstrated compliance with the location restriction for unstable areas specified in Subsection R315-319-64(a), the owner or operator of the CCR unit shall cease placing CCR and non-CCR waste streams into such CCR landfill and close the CCR unit in accordance with the requirements of Section R315-319-102.

(2) An owner or operator of an existing CCR landfill that closes in accordance with Subsection R315-319-101(d)(1) shall include a statement in the notification required under Subsection R315-319-102(g) that the CCR landfill is closing under the requirements of Subsection R315-319-101(d)(1).

(3) The timeframe specified in Subsection R315-319-101(d)(1) does not apply if the owner or operator complies with the alternative closure procedures specified in Section R315-319-103.

R315-319-102. Closure and Post-Closure Care - Criteria for Conducting the Closure or Retrofit of CCR Units.

(a) Closure of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit shall be completed either by leaving the CCR in place and installing a final cover system or through removal of the CCR and decontamination of the CCR unit, as described in Subsections R315-319-102(b) through (j). Retrofit of a CCR surface impoundment shall be completed in accordance with the requirements in Subsection R315-319-102(k).

(b) Written closure plan

(1) Content of the plan. The owner or operator of a CCR unit shall prepare a written closure plan that describes the steps necessary to close the CCR unit at any point during the active life of the CCR unit consistent with recognized and generally accepted good engineering practices. The written closure plan shall include, at a minimum, the information specified in Subsections R315-319-102(b)(1)(i) through (vi).

(i) A narrative description of how the CCR unit will be closed in accordance with Section R315-319-102.

(ii) If closure of the CCR unit will be accomplished through removal of CCR from the CCR unit, a description of the procedures to remove the CCR and decontaminate the CCR unit in accordance with Subsection R315-319-102(c).

(iii) If closure of the CCR unit will be accomplished by leaving CCR in place, a description of the final cover system, designed in accordance with Subsection R315-319-102(d), and the methods and procedures to be used to install the final cover. The closure plan shall also discuss how the final cover system will achieve the performance standards specified in Subsection R315-319-102(d).

(iv) An estimate of the maximum inventory of CCR ever on-site over the active life of the CCR unit.

(v) An estimate of the largest area of the CCR unit ever requiring a final cover as required by Subsection R315-319-102(d) at any time during the CCR unit's active life.

(vi) A schedule for completing all activities necessary to satisfy the closure criteria in Section R315-319-102, including an estimate of the year in which all closure activities for the CCR unit will be completed. The schedule should provide sufficient information to describe the sequential steps that will be taken to close the CCR unit, including identification of major milestones such as coordinating with and obtaining necessary approvals and permits from other agencies, the dewatering and stabilization phases of CCR surface impoundment closure, or installation of the final cover system, and the estimated timeframes to complete each step or phase of CCR unit closure. When preparing the written closure plan, if the owner or operator of a CCR unit estimates that the time required to complete closure will exceed the timeframes specified in Subsection R315-319-102(f)(1), the written closure plan shall include the site-specific information, factors and considerations that would support any time extension sought under Subsection R315-319-102(f)(2).

(2) Timeframes for preparing the initial written closure plan

(i) Existing CCR landfills and existing CCR surface impoundments. No later than October 17, 2016, the owner or operator of the CCR unit shall prepare an initial written closure plan consistent with the requirements specified in Subsection R315-319-102(b)(1).

(ii) New CCR landfills and new CCR surface impoundments, and any lateral expansion of a CCR unit. No

later than the date of the initial receipt of CCR in the CCR unit, the owner or operator shall prepare an initial written closure plan consistent with the requirements specified in Subsection R315-319-102(b)(1).

(iii) The owner or operator has completed the written closure plan when the plan, including the certification required by Subsection R315-319-102(b)(4), has been placed in the facility's operating record as required by Subsection R315-319-105(i)(4).

(3) Amendment of a written closure plan.

(i) The owner or operator may amend the initial or any subsequent written closure plan developed pursuant to Subsection R315-319-102 (b)(1) at any time.

(ii) The owner or operator shall amend the written closure plan whenever:

(A) There is a change in the operation of the CCR unit that would substantially affect the written closure plan in effect; or

(B) Before or after closure activities have commenced, unanticipated events necessitate a revision of the written closure plan.

(iii) The owner or operator shall amend the closure plan at least 60 days prior to a planned change in the operation of the facility or CCR unit, or no later than 60 days after an unanticipated event requires the need to revise an existing written closure plan. If a written closure plan is revised after closure activities have commenced for a CCR unit, the owner or operator shall amend the current closure plan no later than 30 days following the triggering event.

(4) The owner or operator of the CCR unit shall obtain a written certification from a qualified professional engineer that the initial and any amendment of the written closure plan meets the requirements of Section R315-319-102.

(c) Closure by removal of CCR. An owner or operator may elect to close a CCR unit by removing and decontaminating all areas affected by releases from the CCR unit. CCR removal and decontamination of the CCR unit are complete when constituent concentrations throughout the CCR unit and any areas affected by releases from the CCR unit have been removed and groundwater monitoring concentrations do not exceed the groundwater protection standard established pursuant to Subsection R315-319-95(h) for constituents listed in appendix IV to Rule R315-319.

(d) Closure performance standard when leaving CCR in place

(1) The owner or operator of a CCR unit shall ensure that, at a minimum, the CCR unit is closed in a manner that will:

(i) Control, minimize or eliminate, to the maximum extent feasible, post-closure infiltration of liquids into the waste and releases of CCR, leachate, or contaminated run-off to the ground or surface waters or to the atmosphere;

(ii) Preclude the probability of future impoundment of water, sediment, or slurry;

(iii) Include measures that provide for major slope stability to prevent the sloughing or movement of the final cover system during the closure and post-closure care period;

(iv) Minimize the need for further maintenance of the CCR unit; and

(v) Be completed in the shortest amount of time consistent with recognized and generally accepted good engineering practices.

(2) Drainage and stabilization of CCR surface impoundments. The owner or operator of a CCR surface impoundment or any lateral expansion of a CCR surface impoundment shall meet the requirements of Subsections R315-319-102(d)(2)(i) and (ii) prior to installing the final cover system required under Subsection R315-319-102(d)(3).

(i) Free liquids shall be eliminated by removing liquid wastes or solidifying the remaining wastes and waste residues.

(ii) Remaining wastes shall be stabilized sufficient to support the final cover system.

(3) Final cover system. If a CCR unit is closed by leaving CCR in place, the owner or operator shall install a final cover system that is designed to minimize infiltration and erosion, and at a minimum, meets the requirements of Subsection R315-319-102(d)(3)(i), or the requirements of the alternative final cover system specified in Subsection R315-319-102(d)(3)(ii).

(i) The final cover system shall be designed and constructed to meet the criteria in Subsections R315-319-102(d)(3)(i)(A) through (D). The design of the final cover system shall be included in the written closure plan required by Subsection R315-319-102(b).

(A) The permeability of the final cover system shall be less than or equal to the permeability of any bottom liner system or natural subsoils present, or a permeability no greater than 1 x 10-5 cm/sec, whichever is less.

(B) The infiltration of liquids through the closed CCR unit shall be minimized by the use of an infiltration layer that contains a minimum of 18 inches of earthen material.

(C) The erosion of the final cover system shall be minimized by the use of an erosion layer that contains a minimum of six inches of earthen material that is capable of sustaining native plant growth.

(D) The disruption of the integrity of the final cover system shall be minimized through a design that accommodates settling and subsidence.

(ii) The owner or operator may select an alternative final cover system design, provided the alternative final cover system is designed and constructed to meet the criteria in Subsections R315-319-102(f)(3)(ii)(A) through (D). The design of the final cover system shall be included in the written closure plan required by Subsection R315-319-102(b).

(A) The design of the final cover system shall include an infiltration layer that achieves an equivalent reduction in infiltration as the infiltration layer specified in Subsections R315-319-102(d)(3)(i)(A) and (B).

(B) The design of the final cover system shall include an erosion layer that provides equivalent protection from wind or water erosion as the erosion layer specified in Subsection R315-319-102(d)(3)(i)(C).

(C) The disruption of the integrity of the final cover system shall be minimized through a design that accommodates settling and subsidence.

(iii) The owner or operator of the CCR unit shall obtain a written certification from a qualified professional engineer that the design of the final cover system meets the requirements of Section R315-319-102.

(e) Initiation of closure activities. Except as provided for in Subsection R315-319-102(e)(4) and Section R315-319-103, the owner or operator of a CCR unit shall commence closure of the CCR unit no later than the applicable timeframes specified in either Subsection R315-319-102(e)(1) or (2).

(1) The owner or operator shall commence closure of the CCR unit no later than 30 days after the date on which the CCR unit either:

(i) Receives the known final receipt of waste, either CCR or any non-CCR waste stream; or

(ii) Removes the known final volume of CCR from the CCR unit for the purpose of beneficial use of CCR.

(2)(i) Except as provided by Subsection R315-319-102(e)(2)(ii), the owner or operator shall commence closure of a CCR unit that has not received CCR or any non-CCR waste stream or is no longer removing CCR for the purpose

of beneficial use within two years of the last receipt of waste or within two years of the last removal of CCR material for the purpose of beneficial use.

(ii) Notwithstanding Subsection R315-319-102(e)(2)(i), the owner or operator of the CCR unit may secure an additional two years to initiate closure of the idle unit provided the owner or operator provides written documentation that the CCR unit will continue to accept wastes or will start removing CCR for the purpose of beneficial use. The documentation shall be supported by, at a minimum, the information specified in Subsections R315-319-102(e)(2)(ii)(A) and (B). The owner or operator may obtain two-year extensions provided the owner or operator continues to be able to demonstrate that there is reasonable likelihood that the CCR unit will accept wastes in the foreseeable future or will remove CCR from the unit for the purpose of beneficial use. The owner or operator shall place each completed demonstration, if more than one time extension is sought, in the facility's operating record as required by Subsection R315-319-105(i)(5) prior to the end of any two-year period.

(A) Information documenting that the CCR unit has remaining storage or disposal capacity or that the CCR unit can have CCR removed for the purpose of beneficial use; and

(B) Information demonstrating that that there is a reasonable likelihood that the CCR unit will resume receiving CCR or non-CCR waste streams in the foreseeable future or that CCR can be removed for the purpose of beneficial use. The narrative shall include a best estimate as to when the CCR unit will resume receiving CCR or non-CCR waste streams. The situations listed in Subsections R315-319-102(e)(2)(ii)(B)(1) through (4) are examples of situations that would support a determination that the CCR unit will resume receiving CCR or non-CCR waste streams in the foreseeable future.

(1) Normal plant operations include periods during which the CCR unit does not receive CCR or non-CCR waste streams, such as the alternating use of two or more CCR units whereby at any point in time one CCR unit is receiving CCR while CCR is being removed from a second CCR unit after its dewatering.

(2) The CCR unit is dedicated to a coal-fired boiler unit that is temporarily idled, e.g., CCR is not being generated, and there is a reasonable likelihood that the coal-fired boiler will resume operations in the future.

(3) The CCR unit is dedicated to an operating coal-fired boiler, i.e., CCR is being generated; however, no CCR are being placed in the CCR unit because the CCR are being entirely diverted to beneficial uses, but there is a reasonable likelihood that the CCR unit will again be used in the foreseeable future.

(4) The CCR unit currently receives only non-CCR waste streams and those non-CCR waste streams are not generated for an extended period of time, but there is a reasonable likelihood that the CCR unit will again receive non-CCR waste streams in the future.

(iii) In order to obtain additional time extension(s) to initiate closure of a CCR unit beyond the two years provided by Subsection R315-319-102(e)(2)(i), the owner or operator of the CCR unit shall include with the demonstration required by Subsection R315-319-102(e)(2)(ii) the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(3) For purposes of Sections R315-319-50 through 107, closure of the CCR unit has commenced if the owner or operator has ceased placing waste and completes any of the following actions or activities:

(i) Taken any steps necessary to implement the written closure plan required by Subsection R315-319-102(b);

(ii) Submitted a completed application for any required state or agency permit or permit modification; or

(iii) Taken any steps necessary to comply with any state or other agency standards that are a prerequisite, or are otherwise applicable, to initiating or completing the closure of a CCR unit.

(4) The timeframes specified in Subsections R315-319-102(e)(1) and (2) do not apply to any of the following owners or operators:

(i) An owner or operator of an inactive CCR surface impoundment closing the CCR unit as required by Subsection R315-319-100(b);

(ii) An owner or operator of an existing unlined CCR surface impoundment closing the CCR unit as required by Subsection R315-319-101(a);

(iii) An owner or operator of an existing CCR surface impoundment closing the CCR unit as required by Subsection R315-319-101(b);

(iv) An owner or operator of a new CCR surface impoundment closing the CCR unit as required by Subsection R315-319-101(c); or

(v) An owner or operator of an existing CCR landfill closing the CCR unit as required by Subsection R315-319-101(d).

(f) Completion of closure activities.

(1) Except as provided for in Subsection R315-319-102(f)(2), the owner or operator shall complete closure of the CCR unit:

(i) For existing and new CCR landfills and any lateral expansion of a CCR landfill, within six months of commencing closure activities.

(ii) For existing and new CCR surface impoundments and any lateral expansion of a CCR surface impoundment, within five years of commencing closure activities.

(2)(i) Extensions of closure timeframes. The timeframes for completing closure of a CCR unit specified under Subsection R315-319-102(f)(1) may be extended if the owner or operator can demonstrate that it was not feasible to complete closure of the CCR unit within the required timeframes due to factors beyond the facility's control. If the owner or operator is seeking a time extension beyond the time specified in the written closure plan as required by Subsection R315-319-102(b)(1), the demonstration shall include a narrative discussion providing the basis for additional time beyond that specified in the closure plan. The owner or operator shall place each completed demonstration, if more than one time extension is sought, in the facility's operating record as required by Subsection R315-319-105(i)(6) prior to the end of any two-year period. Factors that may support such a demonstration include:

(A) Complications stemming from the climate and weather, such as unusual amounts of precipitation or a significantly shortened construction season;

(B) Time required to dewater a surface impoundment due to the volume of CCR contained in the CCR unit or the characteristics of the CCR in the unit;

(C) The geology and terrain surrounding the CCR unit will affect the amount of material needed to close the CCR unit; or

(D) Time required or delays caused by the need to

coordinate with and obtain necessary approvals and permits from a state or other agency.

(ii) Maximum time extensions.

(A) CCR surface impoundments of 40 acres or smaller may extend the time to complete closure by no longer than two years.

(B) CCR surface impoundments larger than 40 acres may extend the timeframe to complete closure of the CCR unit multiple times, in two-year increments. For each two-year extension sought, the owner or operator shall substantiate the factual circumstances demonstrating the need for the extension. No more than a total of five two-year extensions may be obtained for any CCR surface impoundment.

(C) CCR landfills may extend the timeframe to complete closure of the CCR unit multiple times, in one-year increments. For each one-year extension sought, the owner or operator shall substantiate the factual circumstances demonstrating the need for the extension. No more than a total of two one-year extensions may be obtained for any CCR landfill.

(iii) In order to obtain additional time extension(s) to complete closure of a CCR unit beyond the times provided by Subsection R315-319-102(f)(1), the owner or operator of the CCR unit shall include with the demonstration required by Subsection R315-319-102(f)(2)(i) the following statement signed by the owner or operator or an authorized representative:

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this demonstration and all attached documents, and that, based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

(3) Upon completion, the owner or operator of the CCR unit shall obtain a certification from a qualified professional engineer verifying that closure has been completed in accordance with the closure plan specified in Subsection R315-319-102(b) and the requirements of Section R315-319-102.

(g) No later than the date the owner or operator initiates closure of a CCR unit, the owner or operator shall prepare a notification of intent to close a CCR unit. The notification shall include the certification by a qualified professional engineer for the design of the final cover system as required by Subsection R315-319-102(d)(3)(iii), if applicable. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by Subsection R315-319-105(i)(7).

(h) Within 30 days of completion of closure of the CCR unit, the owner or operator shall prepare a notification of closure of a CCR unit. The notification shall include the certification by a qualified professional engineer as required by Subsection R315-319-102(f)(3). The owner or operator has completed the notification when it has been placed in the facility's operating record as required by Subsection R315-319-105(i)(8).

(i) Deed notations.

(1) Except as provided by Subsection R315-319-102(i)(4), following closure of a CCR unit, the owner or operator shall record a notation on the deed to the property, or some other instrument that is normally examined during title search.

(2) The notation on the deed shall in perpetuity notify any potential purchaser of the property that:

(i) The land has been used as a CCR unit; and

(ii) Its use is restricted under the post-closure care requirements as provided by Subsection R315-319-104(d)(1)(iii).

(3) Within 30 days of recording a notation on the deed to the property, the owner or operator shall prepare a notification stating that the notation has been recorded. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by Subsection R315-319-105(i)(9).

(4) An owner or operator that closes a CCR unit in accordance with Subsection R315-319-102(c) is not subject to the requirements of Subsections R315-319-102(i)(1) through (3).

(j) The owner or operator of the CCR unit shall comply with the closure recordkeeping requirements specified in Subsection R315-319-105(i), the closure notification requirements specified in Subsection R315-319-106(i), and the closure Internet requirements specified in Subsection R315-319-107(i).

(k) Criteria to retrofit an existing CCR surface impoundment.

(1) To retrofit an existing CCR surface impoundment, the owner or operator shall:

(i) First remove all CCR, including any contaminated soils and sediments from the CCR unit; and

(ii) Comply with the requirements in Subsection R315-319-72.

(iii) A CCR surface impoundment undergoing a retrofit remains subject to all other requirements of Sections R315-319-50 through 107, including the requirement to conduct any necessary corrective action.

(2) Written retrofit plan

(i) Content of the plan. The owner or operator shall prepare a written retrofit plan that describes the steps necessary to retrofit the CCR unit consistent with recognized and generally accepted good engineering practices. The written retrofit plan shall include, at a minimum, all of the following information:

(A) A narrative description of the specific measures that will be taken to retrofit the CCR unit in accordance with Section R315-319-102.

(B) A description of the procedures to remove all CCR and contaminated soils and sediments from the CCR unit.

(C) An estimate of the maximum amount of CCR that will be removed as part of the retrofit operation.

(D) An estimate of the largest area of the CCR unit that will be affected by the retrofit operation.

(E) A schedule for completing all activities necessary to satisfy the retrofit criteria in Section R315-319-102, including an estimate of the year in which retrofit activities of the CCR unit will be completed.

(ii) Timeframes for preparing the initial written retrofit plan.

(A) No later than 60 days prior to date of initiating retrofit activities, the owner or operator shall prepare an initial written retrofit plan consistent with the requirements specified in Subsection R315-319-102(k)(2). For purposes of Sections R315-319-50 through 107, initiation of retrofit activities has commenced if the owner or operator has ceased placing waste in the unit and completes any of the following actions or activities:

(1) Taken any steps necessary to implement the written retrofit plan; and

(2) Submitted a completed application for a permit or permit modification.

(B) The owner or operator has completed the written retrofit plan when the plan, including the certification required by Subsection R315-319-102(k)(2)(iv), has been placed in the facility's operating record as required by Subsection R315-319-105(j)(1).

(iii) Amendment of a written retrofit plan.

(A) The owner or operator may amend the initial or any subsequent written retrofit plan at any time.

(B) The owner or operator shall amend the written retrofit plan whenever:

(1) There is a change in the operation of the CCR unit that would substantially affect the written retrofit plan in effect; or

(2) Before or after retrofit activities have commenced, unanticipated events necessitate a revision of the written retrofit plan.

(C) The owner or operator shall amend the retrofit plan at least 60 days prior to a planned change in the operation of the facility or CCR unit, or no later than 60 days after an unanticipated event requires the revision of an existing written retrofit plan. If a written retrofit plan is revised after retrofit activities have commenced for a CCR unit, the owner or operator shall amend the current retrofit plan no later than 30 days following the triggering event.

(iv) The owner or operator of the CCR unit shall obtain a written certification from a qualified professional engineer that the activities outlined in the written retrofit plan, including any amendment of the plan, meet the requirements of Section R315-319-102.

(3) Deadline for completion of activities related to the retrofit of a CCR unit. Any CCR surface impoundment that is being retrofitted shall complete all retrofit activities within the same time frames and procedures specified for the closure of a CCR surface impoundment in Subsection R315-319-102(f) or, where applicable, Subsection R315-319-103.

(4) Upon completion, the owner or operator shall obtain a certification from a qualified professional engineer verifying that the retrofit activities have been completed in accordance with the retrofit plan specified in Subsection R315-319-102(k)(2) and the requirements of Section R315-319-102.

(5) No later than the date the owner or operator initiates the retrofit of a CCR unit, the owner or operator shall prepare a notification of intent to retrofit a CCR unit. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by Subsection R315-319-105(j)(5).

(6) Within 30 days of completing the retrofit activities specified in Subsection R315-319-102(k)(1), the owner or operator shall prepare a notification of completion of retrofit activities. The notification shall include the certification by a qualified professional engineer as required by Subsection R315-319-102 (k)(4). The owner or operator has completed the notification when it has been placed in the facility's operating record as required by Subsection R315-319-105(j)(6).

(7) At any time after the initiation of a CCR unit retrofit, the owner or operator may cease the retrofit and initiate closure of the CCR unit in accordance with the requirements of Subsection R315-319-102.

(8) The owner or operator of the CCR unit shall comply with the retrofit recordkeeping requirements specified in Subsection R315-319-105(j), the retrofit notification requirements specified in Subsection R315-319-106(j), and the retrofit Internet requirements specified in Subsection R315-319-107(j).

R315-319-103. Closure and Post-Closure Care - Alternative Closure Requirements.

The owner or operator of a CCR landfill, CCR surface impoundment, or any lateral expansion of a CCR unit that is subject to closure pursuant to Subsection R315-319-101(a), (b)(1), or (d) may continue to receive CCR in the unit provided the owner or operator meets the requirements of either Subsection R315-319-103(a) or (b).

(a)(1) No alternative CCR disposal capacity. Notwithstanding the provisions of Subsection R315-319-101(a), (b)(1), or (d), a CCR unit may continue to receive CCR if the owner or operator of the CCR unit certifies that the CCR shall continue to be managed in that CCR unit due to the absence of alternative disposal capacity both on-site and off-site of the facility. To qualify under Subsection R315-319-103(a)(1), the owner or operator of the CCR unit shall document that all of the following conditions have been met:

(i) No alternative disposal capacity is available on-site or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under Section R315-319-103;

(ii) The owner or operator has made, and continues to make, efforts to obtain additional capacity. Qualification under this subsection lasts only as long as no alternative capacity is available. Once alternative capacity is identified, the owner or operator shall arrange to use such capacity as soon as feasible;

(iii) The owner or operator shall remain in compliance with all other requirements of Sections R315-319-50 through 107, including the requirement to conduct any necessary corrective action; and

(iv) The owner or operator shall prepare an annual progress report documenting the continued lack of alternative capacity and the progress towards the development of alternative CCR disposal capacity.

(2) Once alternative capacity is available, the CCR unit shall cease receiving CCR and initiate closure following the timeframes in Subsections R315-319-102(e) and (f).

(3) If no alternative capacity is identified within five years after the initial certification, the CCR unit shall cease receiving CCR and close in accordance with the timeframes in Subsections R315-319-102(e) and (f).

(b)(1) Permanent cessation of a coal-fired boiler(s) by a date certain. Notwithstanding the provisions of Subsections R315-319-101(a), (b)(1), and (d), a CCR unit may continue to receive CCR if the owner or operator certifies that the facility will cease operation of the coal-fired boilers within the timeframes specified in Subsections R315-319-103(b)(2) through (4), but in the interim period, prior to closure of the coal-fired boiler, the facility shall continue to use the CCR unit due to the absence of alternative disposal capacity both on-site and off-site of the facility. To qualify under this Subsection R315-319-103(b)(1), the owner or operator of the CCR unit shall document that all of the following conditions have been met:

(i) No alternative disposal capacity is available on-site or off-site. An increase in costs or the inconvenience of existing capacity is not sufficient to support qualification under Section R315-319-103.

(ii) The owner or operator shall remain in compliance with all other requirements of Sections R315-319-50 through 107, including the requirement to conduct any necessary corrective action; and

(iii) The owner or operator shall prepare an annual progress report documenting the continued lack of alternative capacity and the progress towards the closure of the coal-fired boiler.

(2) For a CCR surface impoundment that is 40 acres or smaller, the coal-fired boiler shall cease operation and the CCR surface impoundment shall have completed closure no later than October 17, 2023.

(3) For a CCR surface impoundment that is larger than 40 acres, the coal-fired boiler shall cease operation, and the CCR surface impoundment shall complete closure no later than October 17, 2028.

(4) For a CCR landfill, the coal-fired boiler shall cease

operation, and the CCR landfill shall complete closure no later than April 19, 2021.

(c) Required notices and progress reports. An owner or operator of a CCR unit that closes in accordance with Subsection R315-319-103(a) or (b) shall complete the notices and progress reports specified in Subsections R315-319-103(c)(1) through (3).

(1) Within six months of becoming subject to closure pursuant to Subsection R315-319-101(a), (b)(1), or (d), the owner or operator shall prepare and place in the facility's operating record a notification of intent to comply with the alternative closure requirements of Section R315-319-103. The notification shall describe why the CCR unit qualifies for the alternative closure provisions under either Subsection R315-319-103(a) or (b), in addition to providing the documentation and certifications required by Subsection R315-319-103(a) or (b).

(2) The owner or operator shall prepare the periodic progress reports required by Subsection R315-319-103(a)(1)(iv) or (b)(1)(iii), in addition to describing any problems encountered and a description of the actions taken to resolve the problems. The annual progress reports shall be completed according to the following schedule:

(i) The first annual progress report shall be prepared no later than 13 months after completing the notification of intent to comply with the alternative closure requirements required by Subsection R315-319-103(c)(1).

(ii) The second annual progress report shall be prepared no later than 12 months after completing the first annual progress report. Additional annual progress reports shall be prepared within 12 months of completing the previous annual progress report.

(iii) The owner or operator has completed the progress reports specified in Subsection R315-319-103(c)(2) when the reports are placed in the facility's operating record as required by Subsection R315-319-105(i)(10).

(3) An owner or operator of a CCR unit shall also prepare the notification of intent to close a CCR unit as required by Subsection R315-319-102(g).

(d) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(i), the notification requirements specified in Subsection R315-319-106(i), and the Internet requirements specified in Subsection R315-319-107(i).

R315-319-104. Closure and Post-Closure Care - Post-Closure Care Requirements.

(a) Applicability.

(1) Except as provided by either Subsection R315-319-104(a)(2) or (3), Section R315-319-104 applies to the owners or operators of CCR landfills, CCR surface impoundments, and all lateral expansions of CCR units that are subject to the closure criteria under Section R315-319-102.

(2) An owner or operator of a CCR unit that elects to close a CCR unit by removing CCR as provided by Subsection R315-319-102(c) is not subject to the post-closure care criteria under Section R315-319-104.

(3) An owner or operator of an inactive CCR surface impoundment that elects to close a CCR unit pursuant to the requirements under Subsection R315-319-100(b) is not subject to the post-closure care criteria under Section R315-319-104.

(b) Post-closure care maintenance requirements. Following closure of the CCR unit, the owner or operator shall conduct post-closure care for the CCR unit, which shall consist of at least the following:

(1) Maintaining the integrity and effectiveness of the final cover system, including making repairs to the final cover as necessary to correct the effects of settlement, subsidence, erosion, or other events, and preventing run-on and run-off from eroding or otherwise damaging the final cover;

(2) If the CCR unit is subject to the design criteria under Section R315-319-70, maintaining the integrity and effectiveness of the leachate collection and removal system and operating the leachate collection and removal system in accordance with the requirements of Section R315-319-70; and

(3) Maintaining the groundwater monitoring system and monitoring the groundwater in accordance with the requirements of Sections R315-319-90 through 98.

(c) Post-closure care period.

(1) Except as provided by Subsection R315-319-104(c)(2), the owner or operator of the CCR unit shall conduct post-closure care for 30 years.

(2) If at the end of the post-closure care period the owner or operator of the CCR unit is operating under assessment monitoring in accordance with Section R315-319-95, the owner or operator shall continue to conduct post-closure care until the owner or operator returns to detection monitoring in accordance with Section R315-319-95.

(d) Written post-closure plan

(1) Content of the plan. The owner or operator of a CCR unit shall prepare a written post-closure plan and any amendments to the plan. The plan shall include, at a minimum, the information specified in Subsections R315-319-104(d)(1)(i) through (iii).

(i) A description of the monitoring and maintenance activities required in Subsection R315-319-104(b) for the CCR unit, and the frequency at which these activities will be performed;

(ii) The name, address, telephone number, and email address of the person or office to contact about the facility during the post-closure care period; and

(iii) A description of the planned uses of the property during the post-closure period. Post-closure use of the property shall not disturb the integrity of the final cover, liner(s), or any other component of the containment system, or the function of the monitoring systems unless necessary to comply with the requirements in Sections R315-319-50 through 107. Any other disturbance is allowed if the owner or operator of the CCR unit demonstrates that disturbance of the final cover, liner, or other component of the containment system, including any removal of CCR, will not increase the potential threat to human health or the environment. The demonstration shall be certified by a qualified professional engineer, and notification shall be provided to the Director that the demonstration has been placed in the operating record and on the owners or operator's publicly accessible Internet site.

(2) Deadline to prepare the initial written post-closure plan

(i) Existing CCR landfills and existing CCR surface impoundments. No later than October 17, 2016, the owner or operator of the CCR unit shall prepare an initial written post-closure plan consistent with the requirements specified in Subsection R315-319-104(d)(1).

(ii) New CCR landfills, new CCR surface impoundments, and any lateral expansion of a CCR unit. No later than the date of the initial receipt of CCR in the CCR unit, the owner or operator shall prepare an initial written post-closure plan consistent with the requirements specified in Subsection R315-319-104(d)(1).

(iii) The owner or operator has completed the written post-closure plan when the plan, including the certification required by Subsection R315-319-104(d)(4), has been placed in the facility's operating record as required by Subsection R315-319-105(i)(4).

(3) Amendment of a written post-closure plan.

(i) The owner or operator may amend the initial or any subsequent written post-closure plan developed pursuant to Subsection R315-319-104(d)(1) at any time.

(ii) The owner or operator shall amend the written closure plan whenever:

(A) There is a change in the operation of the CCR unit that would substantially affect the written post-closure plan in effect; or

(B) After post-closure activities have commenced, unanticipated events necessitate a revision of the written post-closure plan.

(iii) The owner or operator shall amend the written post-closure plan at least 60 days prior to a planned change in the operation of the facility or CCR unit, or no later than 60 days after an unanticipated event requires the need to revise an existing written post-closure plan. If a written post-closure plan is revised after post-closure activities have commenced for a CCR unit, the owner or operator shall amend the written post-closure plan no later than 30 days following the triggering event.

(4) The owner or operator of the CCR unit shall obtain a written certification from a qualified professional engineer that the initial and any amendment of the written post-closure plan meets the requirements of Section R315-319-104.

(e) Notification of completion of post-closure care period. No later than 60 days following the completion of the post-closure care period, the owner or operator of the CCR unit shall prepare a notification verifying that post-closure care has been completed. The notification shall include the certification by a qualified professional engineer verifying that post-closure care has been completed in accordance with the closure plan specified in Subsection R315-319-104(d) and the requirements of Section R315-319-104. The owner or operator has completed the notification when it has been placed in the facility's operating record as required by Subsection R315-319-105(i)(13).

(f) The owner or operator of the CCR unit shall comply with the recordkeeping requirements specified in Subsection R315-319-105(i), the notification requirements specified in Subsection R315-319-106(i), and the Internet requirements specified in Subsection R315-319-107(i).

R315-319-105. Recordkeeping, Notification, and Posting of Information to the Internet - Recordkeeping Requirements.

(a) Each owner or operator of a CCR unit subject to the requirements of Sections R315-319-50 through 107 shall maintain files of all information required by Section R315-319-105 in a written operating record at their facility.

(b) Unless specified otherwise, each file shall be retained for at least five years following the date of each occurrence, measurement, maintenance, corrective action, report, record, or study.

(c) An owner or operator of more than one CCR unit subject to the provisions of Sections R315-319-50 through 107 may comply with the requirements of Section R315-319-105 in one recordkeeping system provided the system identifies each file by the name of each CCR unit. The files may be maintained on microfilm, on a computer, on computer disks, on a storage system accessible by a computer, on magnetic tape disks, or on microfiche.

(d) The owner or operator of a CCR unit shall submit to the Director any demonstration or documentation required by Sections R315-319-50 through 107.

(e) Location restrictions. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the demonstrations documenting whether or not the CCR unit is in compliance with the requirements under Subsections R315-319-60(a), 61(a), 62(a), 63(a), and 64(a), as it becomes available, in the facility's operating record.

(f) Design criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the following information, as it becomes available, in the facility's operating record:

(1) The design and construction certifications as required by Subsections R315-319-70(e) and (f).

(2) The documentation of liner type as required by Subsection R315-319-71(a).

(3) The design and construction certifications as required by Subsections R315-319-72(c) and (d).

(4) Documentation prepared by the owner or operator stating that the permanent identification marker was installed as required by Subsections R315-319-73(a)(1) and 74(a)(1).

(5) The initial and periodic hazard potential classification assessments as required by Subsections R315-319-73(a)(2) and 74(a)(2).

(6) The emergency action plan (EAP), and any amendment of the EAP, as required by Subsections R315-319-73(a)(3) and 74(a)(3), except that only the most recent EAP shall be maintained in the facility's operating record irrespective of the time requirement specified in Subsection R315-319-105(b).

(7) Documentation prepared by the owner or operator recording the annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders as required by Subsections R315-319-73(a)(3)(i)(E) and 74(a)(3)(i)(E).

(8) Documentation prepared by the owner or operator recording all activations of the emergency action plan as required by Subsections R315-319-73(a)(3)(v) and 74(a)(3)(v).

(9) The history of construction, and any revisions of it, as required by Subsection R315-319-73(c), except that these files shall be maintained until the CCR unit completes closure of the unit in accordance with Section R315-319-102.

(10) The initial and periodic structural stability assessments as required by Subsections R315-319-73(d) and 74(d).

(11) Documentation detailing the corrective measures taken to remedy the deficiency or release as required by Subsections R315-319-73(d)(2) and 74(d)(2).

(12) The initial and periodic safety factor assessments as required by Subsections R315-319-73(e) and 74(e).

(13) The design and construction plans, and any revisions of it, as required by Subsection R315-319-74(c), except that these files shall be maintained until the CCR unit completes closure of the unit in accordance with Section R315-319-102.

(g) Operating criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall, as it becomes available, place the following information in the facility's operating record:

(1) The CCR fugitive dust control plan, and any subsequent amendment of the plan, required by Subsection R315-319-80(b), except that only the most recent control plan shall be maintained in the facility's operating record irrespective of the time requirement specified in Subsection R315-319-105(b).

(2) The annual CCR fugitive dust control report required by Subsection R315-319-80(c).

(3) The initial and periodic run-on and run-off control system plans as required by Subsection R315-319-81(c).

(4) The initial and periodic inflow design flood control system plan as required by Subsection R315-319-82(c).

(5) Documentation recording the results of each inspection and instrumentation monitoring by a qualified person as required by Subsection R315-319-83(a).

(6) The periodic inspection report as required by

Subsection R315-319-83(b)(2).

(7) Documentation detailing the corrective measures taken to remedy the deficiency or release as required by Subsections R315-319-83(b)(5) and 84(b)(5).

(8) Documentation recording the results of the weekly inspection by a qualified person as required by Subsection R315-319-84(a).

(9) The periodic inspection report as required by Subsection R315-319-84(b)(2).

(h) Groundwater monitoring and corrective action. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall, as it becomes available, place the following information in the facility's operating record:

(1) The annual groundwater monitoring and corrective action report as required by Subsection R315-319-90(e).

(2) Documentation of the design, installation, development, and decommissioning of any monitoring wells, piezometers and other measurement, sampling, and analytical devices as required by Subsection R315-319-91(e)(1).

(3) The groundwater monitoring system certification as required by Subsection R315-319-91(f).

(4) The selection of a statistical method certification as required by Subsection R315-319-93(f)(6).

(5) Within 30 days of establishing an assessment monitoring program, the notification as required by Subsection R315-319-94(e)(3).

(6) The results of appendices III and IV to Rule R315-319 constituent concentrations as required by Subsection R315-319-95(d)(1).

(7) Within 30 days of returning to a detection monitoring program, the notification as required by Subsection R315-319-95(e).

(8) Within 30 days of detecting one or more constituents in appendix IV to Rule R315-319 at statistically significant levels above the groundwater protection standard, the notifications as required by Subsection R315-319-95(g).

(9) Within 30 days of initiating the assessment of corrective measures requirements, the notification as required by Subsection R315-319-95(g)(5).

(10) The completed assessment of corrective measures as required by Subsection R315-319-96(d).

(11) Documentation prepared by the owner or operator recording the public meeting for the corrective measures assessment as required by Subsection R315-319-96(e).

(12) The semiannual report describing the progress in selecting and designing the remedy and the selection of remedy report as required by Subsection R315-319-97(a), except that the selection of remedy report shall be maintained until the remedy has been completed.

(13) Within 30 days of completing the remedy, the notification as required by Subsection R315-319-98(e).

(i) Closure and post-closure care. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall, as it becomes available, place the following information in the facility's operating record:

(1) The notification of intent to initiate closure of the CCR unit as required by Subsection R315-319-100(c)(1).

(2) The annual progress reports of closure implementation as required by Subsections R315-319-100(c)(2)(i) and (ii).

(3) The notification of closure completion as required by Subsection R315-319-100(c)(3).

(4) The written closure plan, and any amendment of the plan, as required by Subsection R315-319-102(b), except that only the most recent closure plan shall be maintained in the facility's operating record irrespective of the time requirement specified in Subsection R315-319-105(b).

(5) The written demonstration(s), including the certification required by Subsection R315-319-102(e)(2)(iii), for a time extension for initiating closure as required by Subsection R315-319-102(e)(2)(ii).

(6) The written demonstration(s), including the certification required by Subsection R315-319-102(f)(2)(iii), for a time extension for completing closure as required by Subsection R315-319-102(f)(2)(i).

(7) The notification of intent to close a CCR unit as required by Subsection R315-319-102(g).

(8) The notification of completion of closure of a CCR unit as required by Subsection R315-319-102(h).

(9) The notification recording a notation on the deed as required by Subsection R315-319-102(i).

(10) The notification of intent to comply with the alternative closure requirements as required by Subsection R315-319-103(c)(1).

(11) The annual progress reports under the alternative closure requirements as required by Subsection R315-319-103(c)(2).

(12) The written post-closure plan, and any amendment of the plan, as required by Subsection R315-319-104(d), except that only the most recent closure plan shall be maintained in the facility's operating record irrespective of the time requirement specified in Subsection R315-319-105(b).

(13) The notification of completion of post-closure care period as required by Subsection R315-319-104(e).

(j) Retrofit criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall, as it becomes available, place the following information in the facility's operating record:

(1) The written retrofit plan, and any amendment of the plan, as required by Subsection R315-319-102(k)(2), except that only the most recent retrofit plan shall be maintained in the facility's operating record irrespective of the time requirement specified in Subsection R315-319-105 (b).

(2) The notification of intent that the retrofit activities will proceed in accordance with the alternative procedures in Subsection R315-319-103.

(3) The annual progress reports required under the alternative requirements as required by Subsection R315-319-103.

(4) The written demonstration(s), including the certification in Subsection R315-319-102(f)(2)(iii), for a time extension for completing retrofit activities as required by Subsection R315-319-102(k)(3).

(5) The notification of intent to initiate retrofit of a CCR unit as required by Subsection R315-319-102(k)(5).

(6) The notification of completion of retrofit activities as required by Subsection R315-319-102(k)(6).

R315-319-106. Recordkeeping, Notification, and Posting of Information to the Internet Notification Requirements.

(a) The notifications required under Subsections R315-319-106(e) through (i) shall be sent to the Director before the close of business on the day the notification is required to be completed. For purposes of Section R315-319-106, before the close of business means the notification shall be postmarked or sent by electronic mail (email). If a notification deadline falls on a weekend or federal holiday, the notification deadline is automatically extended to the next business day.

(b) Reserved

(c) Notifications may be combined as long as the deadline requirement for each notification is met.

(d) Unless otherwise required in Section R315-319-106, the notifications specified in Section R315-319-106 shall be sent to the Director within 30 days of placing in the operating record the information required by Subsection R315-319-105.

(e) Location restrictions. The owner or operator of a CCR unit subject to the requirements of Sections R315-319-

50 through 107 shall notify the Director that each demonstration specified under Subsection R315-319-105(e) has been placed in the operating record and on the owner or operator's publicly accessible internet site.

(f) Design criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall notify the Director when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator shall:

(1) Within 60 days of commencing construction of a new CCR unit, provide notification of the availability of the design certification specified under Subsection R315-319-105(f)(1) or (3). If the owner or operator of the CCR unit elects to install an alternative composite liner, the owner or operator shall also submit to the Director a copy of the alternative composite liner design.

(2) No later than the date of initial receipt of CCR by a new CCR unit, provide notification of the availability of the construction certification specified under Subsection R315-319-105(f)(1) or (3).

(3) Provide notification of the availability of the documentation of liner type specified under Subsection R315-319-105(f)(2).

(4) Provide notification of the availability of the initial and periodic hazard potential classification assessments specified under Subsection R315-319-105(f)(5).

(5) Provide notification of the availability of emergency action plan (EAP), and any revisions of the EAP, specified under Subsection R315-319-105(f)(6).

(6) Provide notification of the availability of documentation prepared by the owner or operator recording the annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders specified under Subsection R315-319-105(f)(7).

(7) Provide notification of documentation prepared by the owner or operator recording all activations of the emergency action plan specified under Subsection R315-319-105(f)(8).

(8) Provide notification of the availability of the history of construction, and any revision of it, specified under Subsection R315-319-105(f)(9).

(9) Provide notification of the availability of the initial and periodic structural stability assessments specified under Subsection R315-319-105(f)(10).

(10) Provide notification of the availability of the documentation detailing the corrective measures taken to remedy the deficiency or release specified under Subsection R315-319-105(f)(11).

(11) Provide notification of the availability of the initial and periodic safety factor assessments specified under Subsection R315-319-105(f)(12).

(12) Provide notification of the availability of the design and construction plans, and any revision of them, specified under Subsection R315-319-105(f)(13).

(g) Operating criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall notify the Director when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator shall:

(1) Provide notification of the availability of the CCR fugitive dust control plan, or any subsequent amendment of the plan, specified under Subsection R315-319-105(g)(1).

(2) Provide notification of the availability of the annual CCR fugitive dust control report specified under Subsection R315-319-105(g)(2).

(3) Provide notification of the availability of the initial and periodic run-on and run-off control system plans specified under Subsection R315-319-105(g)(3).

(4) Provide notification of the availability of the initial and periodic inflow design flood control system plans specified under Subsection R315-319-105(g)(4).

(5) Provide notification of the availability of the periodic inspection reports specified under Subsection R315-319-105(g)(6).

(6) Provide notification of the availability of the documentation detailing the corrective measures taken to remedy the deficiency or release specified under Subsection R315-319-105(g)(7).

(7) Provide notification of the availability of the periodic inspection reports specified under Subsection R315-319-105(g)(9).

(h) Groundwater monitoring and corrective action. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall notify the Director when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator shall:

(1) Provide notification of the availability of the annual groundwater monitoring and corrective action report specified under Subsection R315-319-105(h)(1).

(2) Provide notification of the availability of the groundwater monitoring system certification specified under Subsection R315-319-105(h)(3).

(3) Provide notification of the availability of the selection of a statistical method certification specified under Subsection R315-319-105(h)(4).

(4) Provide notification that an assessment monitoring programs has been established specified under Subsection R315-319-105(h)(5).

(5) Provide notification that the CCR unit is returning to a detection monitoring program specified under Subsection R315-319-105(h)(7).

(6) Provide notification that one or more constituents in appendix IV to Rule R315-319 have been detected at statistically significant levels above the groundwater protection standard and the notifications to land owners specified under Subsection R315-319-105(h)(8).

(7) Provide notification that an assessment of corrective measures has been initiated specified under Subsection R315-319-105(h)(9).

(8) Provide notification of the availability of assessment of corrective measures specified under Subsection R315-319-105(h)(10).

(9) Provide notification of the availability of the semiannual report describing the progress in selecting and designing the remedy and the selection of remedy report specified under Subsection R315-319-105(h)(12).

(10) Provide notification of the completion of the remedy specified under Subsection R315-319-105(h)(13).

(i) Closure and post-closure care. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall notify the Director when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator shall:

(1) Provide notification of the intent to initiate closure of the CCR unit specified under Subsection R315-319-105(i)(1).

(2) Provide notification of the availability of the annual progress reports of closure implementation specified under Subsection R315-319-105(i)(2).

(3) Provide notification of closure completion specified under Subsection R315-319-105(i)(3).

(4) Provide notification of the availability of the written closure plan, and any amendment of the plan, specified under Subsection R315-319-105(i)(4).

(5) Provide notification of the availability of the

demonstration(s) for a time extension for initiating closure specified under Subsection R315-319-105(i)(5).

(6) Provide notification of the availability of the demonstration(s) for a time extension for completing closure specified under Subsection R315-319-105(i)(6).

(7) Provide notification of intent to close a CCR unit specified under Subsection R315-319-105(i)(7).

(8) Provide notification of completion of closure of a CCR unit specified under Subsection R315-319-105(i)(8).

(9) Provide notification of the deed notation as required by Subsection R315-319-105(i)(9).

(10) Provide notification of intent to comply with the alternative closure requirements specified under Subsection R315-319-105(i)(10).

(11) The annual progress reports under the alternative closure requirements as required by Subsection R315-319-105(i)(11).

(12) Provide notification of the availability of the written post-closure plan, and any amendment of the plan, specified under Subsection R315-319-105(i)(12).

(13) Provide notification of completion of post-closure care specified under Subsection R315-319-105(i)(13).

(j) Retrofit criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall notify the Director when information has been placed in the operating record and on the owner or operator's publicly accessible Internet site. The owner or operator shall:

(1) Provide notification of the availability of the written retrofit plan, and any amendment of the plan, specified under Subsection R315-319-105(j)(1).

(2) Provide notification of intent to comply with the alternative retrofit requirements specified under Subsection R315-319-105(j)(2).

(3) The annual progress reports under the alternative retrofit requirements as required by Subsection R315-319-105(j)(3).

(4) Provide notification of the availability of the demonstration(s) for a time extension for completing retrofit activities specified under Subsection R315-319-105(j)(4).

(5) Provide notification of intent to initiate retrofit of a CCR unit specified under Subsection R315-319-105(j)(5).

(6) Provide notification of completion of retrofit activities specified under Subsection R315-319-105(j)(6).

R315-319-107. Recordkeeping, Notification, and Posting of Information to the Internet - Publicly Accessible Internet Site Requirements.

(a) Each owner or operator of a CCR unit subject to the requirements of Sections R315-319-50 through 107 shall maintain a publicly accessible Internet site, CCR Web site, containing the information specified in Section R315-319-107. The owner or operator's Web site shall be titled "CCR Rule Compliance Data and Information."

(b) An owner or operator of more than one CCR unit subject to the provisions of Sections R315-319-50 through 107 may comply with the requirements of Section R315-319-107 by using the same Internet site for multiple CCR units provided the CCR Web site clearly delineates information by the name or identification number of each unit.

(c) Unless otherwise required in Section R315-319-107, the information required to be posted to the CCR Web site shall be made available to the public for at least five years following the date on which the information was first posted to the CCR Web site.

(d) Unless otherwise required in Section R315-319-107, the information shall be posted to the CCR Web site within 30 days of placing the pertinent information required by Subsection R315-319-105 in the operating record.

(e) Location restrictions. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place each demonstration specified under Subsection R315-319-105(e) on the owner or operator's CCR Web site.

(f) Design criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the following information on the owner or operator's CCR Web site:

(1) Within 60 days of commencing construction of a new unit, the design certification specified under Subsection R315-319-105(f)(1) or (3).

(2) No later than the date of initial receipt of CCR by a new CCR unit, the construction certification specified under Subsection R315-319-105(f)(1) or (3).

(3) The documentation of liner type specified under Subsection R315-319-105(f)(2).

(4) The initial and periodic hazard potential classification assessments specified under Subsection R315-319-105(f)(5).

(5) The emergency action plan (EAP) specified under Subsection R315-319-105(f)(6), except that only the most recent EAP shall be maintained on the CCR Web site irrespective of the time requirement specified in Subsection R315-319-107(c).

(6) Documentation prepared by the owner or operator recording the annual face-to-face meeting or exercise between representatives of the owner or operator of the CCR unit and the local emergency responders specified under Subsection R315-319-105(f)(7).

(7) Documentation prepared by the owner or operator recording any activation of the emergency action plan specified under Subsection R315-319-105(f)(8).

(8) The history of construction, and any revisions of it, specified under Subsection R315-319-105(f)(9).

(9) The initial and periodic structural stability assessments specified under Subsection R315-319-105(f)(10).

(10) The documentation detailing the corrective measures taken to remedy the deficiency or release specified under Subsection R315-319-105(f)(11).

(11) The initial and periodic safety factor assessments specified under Subsection R315-319-105(f)(12).

(12) The design and construction plans, and any revisions of them, specified under Subsection R315-319-105(f)(13).

(g) Operating criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the following information on the owner or operator's CCR Web site:

(1) The CCR fugitive dust control plan, or any subsequent amendment of the plan, specified under Subsection R315-319-105(g)(1) except that only the most recent plan shall be maintained on the CCR Web site irrespective of the time requirement specified in Subsection R315-319-107(c).

(2) The annual CCR fugitive dust control report specified under Subsection R315-319-105(g)(2).

(3) The initial and periodic run-on and run-off control system plans specified under Subsection R315-319-105(g)(3).

(4) The initial and periodic inflow design flood control system plans specified under Subsection R315-319-105(g)(4).

(5) The periodic inspection reports specified under Subsection R315-319-105(g)(6).

(6) The documentation detailing the corrective measures taken to remedy the deficiency or release specified under Subsection R315-319-105(g)(7).

(7) The periodic inspection reports specified under Subsection R315-319-105(g)(9).

(h) Groundwater monitoring and corrective action. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the following information on

the owner or operator's CCR Web site:

(1) The annual groundwater monitoring and corrective action report specified under Subsection R315-319-105(h)(1).

(2) The groundwater monitoring system certification specified under Subsection R315-319-105(h)(3).

(3) The selection of a statistical method certification specified under Subsection R315-319-105(h)(4).

(4) The notification that an assessment monitoring programs has been established specified under Subsection R315-319-105(h)(5).

(5) The notification that the CCR unit is returning to a detection monitoring program specified under Subsection R315-319-105(h)(7).

(6) The notification that one or more constituents in appendix IV to Rule R315-319 have been detected at statistically significant levels above the groundwater protection standard and the notifications to land owners specified under Subsection R315-319-105(h)(8).

(7) The notification that an assessment of corrective measures has been initiated specified under Subsection R315-319-105(h)(9).

(8) The assessment of corrective measures specified under Subsection R315-319-105(h)(10).

(9) The semiannual reports describing the progress in selecting and designing remedy and the selection of remedy report specified under Subsection R315-319-105(h)(12), except that the selection of the remedy report shall be maintained until the remedy has been completed.

(10) The notification that the remedy has been completed specified under Subsection R315-319-105(h)(13).

(i) Closure and post-closure care. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the following information on the owner or operator's CCR Web site:

(1) The notification of intent to initiate closure of the CCR unit specified under Subsection R315-319-105(i)(1).

(2) The annual progress reports of closure implementation specified under Subsection R315-319-105(i)(2).

(3) The notification of closure completion specified under Subsection R315-319-105(i)(3).

(4) The written closure plan, and any amendment of the plan, specified under Subsection R315-319-105(i)(4).

(5) The demonstration(s) for a time extension for initiating closure specified under Subsection R315-319-105(i)(5).

(6) The demonstration(s) for a time extension for completing closure specified under Subsection R315-319-105(i)(6).

(7) The notification of intent to close a CCR unit specified under Subsection R315-319-105(i)(7).

(8) The notification of completion of closure of a CCR unit specified under Subsection R315-319-105(i)(8).

(9) The notification recording a notation on the deed as required by Subsection R315-319-105(i)(9).

(10) The notification of intent to comply with the alternative closure requirements as required by Subsection R315-319-105(i)(10).

(11) The annual progress reports under the alternative closure requirements as required by Subsection R315-319-105(i)(11).

(12) The written post-closure plan, and any amendment of the plan, specified under Subsection R315-319-105(i)(12).

(13) The notification of completion of post-closure care specified under Subsection R315-319-105(i)(13).

(j) Retrofit criteria. The owner or operator of a CCR unit subject to Sections R315-319-50 through 107 shall place the following information on the owner or operator's CCR Web site:

(1) The written retrofit plan, and any amendment of the plan, specified under Subsection R315-319-105(j)(1).

(2) The notification of intent to comply with the alternative retrofit requirements as required by Subsection R315-319-105(j)(2).

(3) The annual progress reports under the alternative retrofit requirements as required by Subsection R315-319-105(j)(3).

(4) The demonstration(s) for a time extension for completing retrofit activities specified under Subsection R315-319-105(j)(4).

(5) The notification of intent to retrofit a CCR unit specified under Subsection R315-319-105(j)(5).

(6) The notification of completion of retrofit activities specified under Subsection R315-319-105(j)(6).

R356. Governor, Criminal and Juvenile Justice (State Commission on).
R356-101. Judicial Nominating Commissions.
R356-101-1. Definitions.

As used in R356-101:

(1) "Application period" means the period of time during which applications for a judicial vacancy may be submitted and begins with the posting of a notice of vacancy and ends with the closing period for submitting applications as identified in the notice of vacancy. The application period is part of the recruitment period.

(2) "CCJJ" means the staff of the Commission on Criminal and Juvenile Justice.

(3) "Commission" means the judicial nominating commission having authority over the judicial vacancy.

(4) "Commission staff" means the individuals assigned by the governor to provide staff support to the commission pursuant to Utah Code Annotated Section 78A-10-203(2) or 78A-10-303(2).

(5) "Notice of vacancy" means the announcement of a current or pending judicial vacancy by CCJJ to the public as provided in R356-101-3.

(6) "Organizational meeting" means the first meeting of a commission after the close of the recruitment period.

(7) "Recruitment period" means the period of time beginning with the posting of a notice of vacancy and ending with the completion of all tasks necessary to convene the commission. The recruitment period includes the application period.

R356-101-2. Recruitment Period.

(1) CCJJ shall begin the recruitment period for a judicial vacancy 235 days before the effective date of the judicial vacancy unless sufficient notice is not given, in which case CCJJ shall begin the recruitment period within 10 days of receipt of notice of the judicial vacancy by the governor.

(2) The application period for a judicial vacancy shall be a minimum of 30 days.

(3) The recruitment period for a judicial vacancy shall be a minimum of 30 days but not more than 90 days unless fewer than nine applications are received for a judicial vacancy in which case the recruitment period may be extended up to an additional 30 days.

R356-101-3. Notice of Vacancy.

(1) As part of the recruitment period, CCJJ shall post a notice of vacancy on its website and shall provide a notice of vacancy to:

(a) the Utah State Bar to be distributed to its members;

(b) members of the media;

(c) the Administrative Office of the Courts;

(d) the president of the Utah Senate; and

(e) other offices and associations as CCJJ determines appropriate.

(2) The notice of vacancy shall include:

(a) the jurisdiction of the court in which the vacancy occurs;

(b) the constitutional minimum requirements for judicial office;

(c) a brief description of the work of the court;

(d) the method for obtaining application forms;

(e) the application deadline; and

(f) the method for submitting oral or written comments at a meeting of the commission.

R356-101-4. Applications.

(1) Applications for a judicial vacancy shall include:

(a) an application form established by CCJJ which shall require applicants to provide:

(i) education history;

(ii) work history;

(iii) evidence of constitutional qualifications;

(iv) information regarding litigation as a party;

(v) attorney and judicial references as provided in R395-101-5; and

(vi) other information relevant to fitness to serve as a judge as determined by CCJJ;

(b) a waiver of the right to review the records in the nomination and appointment processes;

(c) a waiver of confidentiality of records which are the subject of investigation by the commission;

(d) an authorization for CCJJ to obtain consumer reports about the applicant; and

(e) a one paragraph summary of professional qualifications that will be made available to the public if the applicant's name is released for public comment prior to nomination.

(2) Applicants shall submit:

(a) an original and eight copies of the complete application;

(b) an original and eight copies of the applicant's resume; and

(c) a check made payable to CCJJ in an amount specified by CCJJ to cover the cost of a credit check.

(3) If the applicant has applied for another judicial position within the prior year, the applicant may satisfy the application requirements by submitting:

(a) a letter to CCJJ expressing interest in applying for the judicial vacancy and in using the previously submitted application; and

(b) a check made payable to CCJJ in an amount specified by CCJJ to cover the cost of a credit check.

(4) CCJJ shall establish application forms and make the forms available electronically and in hard copies.

(5) Applications are considered timely submitted if CCJJ receives all application materials prior to the application deadline. Applications mailed, but not received by CCJJ, prior to the application deadline are not considered timely submitted. Partial applications are not considered timely submitted.

(6) Following receipt of applications, CCJJ shall conduct investigations in the following areas for each applicant:

(a) criminal background;

(b) disciplinary actions taken by the Utah State Bar;

(c) disciplinary actions taken by the Judicial Conduct Commission; and

(d) consumer credit.

R356-101-5. References.

(1) Applicants who are engaged in an adversarial practice shall submit the following types of references as specified in the application:

(a) lawyers adverse to the applicant in litigation or negotiations;

(b) lawyers with whom the applicant has had a substantial professional interaction within the previous two years;

(c) judges assigned to cases in which the applicant acted as a lawyer; and

(d) judges who know the applicant.

(2) Applicants who are engaged in a non-adversarial practice and who are not judges shall submit the following types of references as specified in the application:

(a) lawyers with whom the applicant has had a substantial professional interaction within the previous two years; and

(b) judges who know the applicant.

(3) Applicants who are judges shall submit the following types of references as specified in the application:

(a) lawyers with whom the applicant has had a substantial professional interaction within the previous two years;

(b) judges who know the applicant; and

(c) lawyers who represented parties in cases over which the applicant presided as judge.

(4) CCJJ shall select which references will be contacted and requested to complete a standard reference form established by CCJJ.

R356-101-6. Pre-Screening of Applications.

(1) CCJJ shall review the applications upon the passing of the application deadline and remove all applications submitted by applicants who do not meet the constitutional qualifications.

(2) CCJJ shall provide to all members of the commission a list of all applicants identified as not meeting the constitutional qualifications.

R356-101-7. Meetings of the Commission.

(1) The commission shall convene an organizational meeting within 10 days of the end of the recruitment period.

(2) During the organizational meeting the commission shall:

(a) allow public comment concerning:

(i) the nominating process;

(ii) qualifications for judicial office;

(iii) issues facing the judiciary; and

(iv) other issues as determined appropriate by the commission; and

(b) following public comment, close the meeting to the public to:

(i) establish a timeframe for certifying a list of nominees to the governor;

(ii) discuss applicants; and

(iii) discuss conflicts of interest as provided in R356-101-9.

(3) The Commission may meet as necessary to certify the list of nominees to the governor, but shall certify the list of nominees no later than 45 days after convening the organizational meeting.

(4) The chair of the commission presides at all meetings and ensures that each commissioner has the opportunity to be a full participant in the commission process.

(5) The member of the Judicial Council appointed by the chief justice of the Utah Supreme Court pursuant to Utah Code Annotated Section 78A-10-202(6) or 78A-10-302(8) shall be a full participant in discussions of the commission, but may not vote.

(6) The commission staff shall:

(a) ensure that the commission follows the rules promulgated by CCJJ;

(b) resolve any questions regarding the rules promulgated by CCJJ;

(c) take summary minutes of commission meetings which shall include:

(i) the date, time and place of the meeting;

(ii) a list of the commission members present and a list of those absent or excused;

(iii) a list of commission staff present;

(iv) a general description of the decisions made;

(v) any declarations by commission members of a relationship, interest or bias concerning any applicant;

(vi) a record of the total tally of all votes, but not the vote of individual commission members;

(vii) written statements submitted to the commission; and

(viii) any other matter desired by the commission to be included; and

(d) perform other tasks assigned by the commission that are consistent with governing statutes and rules.

(7)(a) The commission shall determine which applicants will be invited to interview.

(b) Each commission member shall have the opportunity to question applicants during interviews and to discuss the qualifications of applicants.

(c) In questioning applicants and discussing the qualifications of applicants, the chair shall speak last and the member of the Judicial Council appointed by the chief justice of the Utah Supreme Court shall speak next to last.

(8)(a) If a commission member refuses to follow governing statutes or rules, the commission member is disqualified from the commission and the governor shall appoint a replacement.

(b) The commission staff determines whether a commission member refuses to follow governing statutes or rules.

(9)(a) Following all applicant interviews, commission members shall determine by confidential ballot which applicants will be certified to the governor as nominees.

(b) The Appellate Court Nominating Commission shall certify a list of seven names to the governor.

(c) Trial Court Nominating Commissions shall certify a list of five names to the governor.

(10)(a) Prior to certifying the list of nominees to the governor, the commission shall allow public comment on the nominees for a minimum of 10 days.

(b) Following the public comment, the commission may remove an applicant from the list of nominees if:

(i) the commission receives new information about an applicant that demonstrates the applicant is unfit to serve as a judge;

(ii) provides to the applicant being considered for removal from the list of nominees a copy of any written comments received during the public comment period about that applicant;

(iii) allows the applicant being considered for removal from the list the opportunity to respond to the information received during the public comment period; and

(iv) not less than one fewer than the total number of commission members at the meeting vote in favor of removing the applicant from the list of nominees.

(d) If the commission removes an applicant from the list of nominees the commission shall select another nominee from among the interviewed applicants and again allow public comment on the nominees for a minimum of 10 days.

R356-101-8. Certifying the List of Nominees.

(1) After the commission has determined which applicants to include in the list of nominees, it shall deliver the list of nominees to the governor, the president of the Senate and the Office of Legislative Research and General Counsel by letter from the chair of the commission.

(2) Commission staff shall deliver to the governor a copy of the complete application and all related documents for each nominee.

(3)(a) If a nominee withdraws before the governor has made an appointment, the commission may, at the request of the governor, nominate a replacement if it can do so before the expiration of the commission's original 45-day deadline.

(b) Unless time permits, the commission does not need to publish the name of the replacement nominee for public comment.

R356-101-9. Conflicts of Interest.

(1) Commission members shall disclose during the

organizational meeting the existence and nature of a relationship with an applicant that may impact the commission member's ability to fairly and impartially evaluate the applicant or any other applicant.

(2)(a) A commission member who believes they have a relationship with an applicant that will impact their ability to fairly and impartially evaluate an applicant shall recuse themself from the nominating process.

(b) If a commission member discloses a relationship with an applicant and does not recuse themself from the nominating process, the commission may, by majority vote, disqualify the commission member from participation if the commission believes the relationship will impact the commission member's ability to fairly and impartially evaluate an applicant.

(c) A commission member who has recused themself or been disqualified by the commission may rejoin the nominating process if:

(i) the applicant with whom the commission member has a relationship is no longer being considered by the commission; and

(ii) the commission decides, by majority vote, to allow the commission member to participate.

(3) A commission member who is related to an applicant within the third degree shall be disqualified from the nominating process.

R356-101-10. Evaluation Criteria.

(1) In addition to criteria established by the Utah Constitution and the Utah Code Annotated, commission members shall during the nomination process consider the applicants':

(a) integrity;
(b) legal knowledge and ability;
(c) professional experience;
(d) judicial temperament;
(e) work ethic;
(f) financial responsibility;
(g) public service;
(h) ability to perform the work of a judge; and
(i) impartiality.

(2) When evaluating applicants for a juvenile court judge position, commission members shall consider the applicants' interest in, understanding of, and experience with the issues and problems facing children and families.

(3) When evaluating applicants for an appellate court position, commission members shall consider the applicants' ability to give and receive criticism of opinions and arguments without taking offense.

(4) When deciding among applicants for any judicial position whose qualifications, taken as a whole, appear in all other respects to be comparable, it is relevant to consider the background and experience of the applicants in relation to the current composition of the bench for which the appointment is being made.

R356-101-11. Confidentiality.

(1) All applications and related documents for a judicial vacancy, names of applicants and all discussions during commission meetings are confidential.

(2)(a) Except as provided in R356-101-8(2) and in this Subsection (2) or as otherwise required by law, commission members and commission staff shall not disclose the details of applications or the details of commission discussions to any person other than commission members or commission staff.

(b) Commission members may disclose the names of applicants only as necessary to make inquiries regarding the qualifications of applicants.

(3)(a) Commission members shall return all applications and related documents to commission staff at the conclusion of the nomination process.

(b) Notes taken by a commission member are not returned to commission staff.

(c) Commission staff shall retain one copy of the application materials in accordance with an approved retention schedule and shall destroy other copies of the application materials.

(4) Commission staff shall destroy all ballots used during the nomination process.

R356-101-12. Notice that a Judge is Removed or Intends to Resign or Retire.

The Administrative Office of the Courts shall immediately notify the governor and CCJJ if it learns that a state judge:

(1) has submitted formal notice of intent to retire;
(2) has submitted formal notice of intent to resign;
(3) has been removed from office: or
(4) has otherwise vacated the judicial office.

Notice of Continuation June 26, 2015

R357. Governor, Economic Development.
R357-6. Technology and Life Science Economic Development and Related Tax Credits.
R357-6-1. Purpose.

(1) The purpose of these rules is to provide:

(a) the criteria upon which the Governor's Office of Economic Development will determine whether to award tax credits to applicants;

(b) the procedures for documenting the Governor's Office of Economic Development's application of this criteria;

(c) the procedures by which the Governor's Office of Economic Development issues tax credit certificates;

(d) the available tax credits for which applicants may apply.

R357-6-2. Authority.

(1) UCA 63N-2-807 requires the office to make rules establishing criteria to prioritize the issuance of tax credits among applicants and to establish procedures for documenting the office's application of the criteria.

R357-6-3. Definitions.

(1) Terms in these rules are used as defined in UCA 63N-2-802.

R357-6-4. Conditions.

(1) Applicants shall use the application form provided by the office and follow the procedures and requirements set forth in UCA 63N-2-805 for obtaining a tax credit certificate.

(2) Applicants shall submit the application form to the office to be eligible to receive a tax credit, quarterly throughout the fiscal year as set forth in UCA 63N-2-808, on or before the following quarterly deadlines:

(a) September 1; and

(b) December 1; and

(c) March 1; and

(d) June 1.

(3) The office shall review and rank for approval accepted applications based upon the following criteria:

(a) The overall economic impact on the state related to providing tax credits, taking into account such factors as:

(i) the number of new incremental jobs to Utah; or

(ii) capital investment in the state; or

(iii) new state revenues; or

(iv) any combination of Subsections (i), (ii), or (iii).

(4) The office shall keep a record of the review and ranking of applications based on the criteria in subsection (2).

(5) The office, with advice from the board, may enter into an agreement with a business entity authorizing a tax credit if the business entity meets the standards under subsections (2) and (3) and according to the requirements and procedures set forth in UCA 63N-2-809.

(6) A business entity is eligible for an economic development tax credit only if the office has entered into an agreement under subsection (4) with the business entity.

R357-6-5. Available Tax Credits.

(1) An applicant may seek one of two types of tax credits, drawn from funds expressly set aside by the Legislature:

(a) a refundable tax credit for generating state tax revenue; or

(b) a non-refundable tax credit for investment in certain life sciences establishments.

(2) Eligibility shall be determined by:

(a) statutory requirements; and

(b) the criteria listed in R357-6-4(2).

KEY: economic development, life sciences, new state revenue

Notice of Continuation August 2, 2016

R398. Health, Family Health and Preparedness, Children with Special Health Care Needs.
R398-5. Birth Defects Reporting.
R398-5-1. Purpose and Authority.

This rule establishes reporting requirements for birth defects and stillbirths in Utah and for related test results. Sections 26-1-30(5), (6), (7), (9), (18), (22), 26-10-1(2), 26-10-2, and 26-10-6(1)(d) authorize this rule.

R398-5-2. Definitions.

As used in this rule:

(1) "Birthing center" means a birthing center licensed under Title 26, Chapter 21.

(2) "Birth defect" means any medical disorder of organ structure, function or biochemistry which is of possible genetic or prenatal origin. This includes any congenital anomaly, indication of hypoxia or genetic metabolic disorder listed in the ICD-9-CM (International Classification of Diseases, 9th Revision, Clinical Modification, established by the United States Center for Health Statistics) with any of the following diagnostic codes: 243, 255.2, 255.4, from 269.2 to 279.9, from 740.0 to 759.9; and from 768.0 to 768.9; or listed in the ICD-10 (International Classification of Diseases, 10th Revision, established by the World Health Organization) with any of the following diagnostic codes: E03, E25, from E70 to E90, from D55 to D58, J96.00 to J96.91, P09, and from Q00-Q99.

(3) "Hospital" means general acute hospital, children's specialty hospital, remote-rural hospital licensed under Title 26, Chapter 21.

(4) "Stillbirth" means a pregnancy resulting in a fetal death at 20 weeks gestation or later.

(5) "Clinic" means physician-owned or operated clinic that regularly provide services for the diagnosis or treatment of birth defects, genetic counseling, or prenatal diagnostic services.

R398-5-3. Reporting by Hospitals and Birthing Centers.

Each hospital or birthing center that admits a patient and detects or screens for a birth defect as a result of any outcome of pregnancy, or admits a child under 24 months of age with a birth defect, or is presented with the event of a stillbirth shall report or cause to report to the department within 40 days of discharge the following:

(1) if live born, child's name;
(2) child's date of birth (or date of delivery);
(3) mother's name;
(4) mother's date of birth;
(5) delivery hospital;
(6) birth defects and hypoxia/hypoxemia diagnoses;
(7) pulse oximetry results for all initial and repeat screenings, including limb location;
(8) mother's state of residency at delivery;
(9) child's sex; and
(10) mother's zip code.

R398-5-4. Reporting by Laboratories.

Each laboratory operating in the state that identifies a human chromosomal or genetic abnormality or other evidence of a birth defect shall report the following on a calendar quarterly basis to the department within 40 days of the end of the preceding calendar quarter:

(1) if live born, child's name and date of birth;
(2) mother's name;
(3) mother's date of birth;
(4) date the sample is accepted by the laboratory;
(5) test conducted;
(6) test result; and
(7) mother's state of residency at delivery.

R398-5-5. Record Abstraction.

Hospitals, birthing centers, and clinics as well as community health care providers shall allow personnel from the department or its contractors to abstract information from the mother's and child's files on their demographic characteristics, family history of birth defects, prenatal and postnatal procedures or treatments (including diagnostics) related to the birth defect or stillbirth, and outcomes of that and other pregnancies by that mother. Hospitals, birthing centers, and clinics as well as community health care providers shall allow personnel from the department or its contractors to abstract information from the affected child's files, throughout their lifespan.

R398-5-6. Liability.

As provided in Title 26, Chapter 25, persons who report, either voluntarily or as required by this rule, information covered by this rule may not be held liable for reporting the information to the Department of Health.

R398-5-7. Penalties.

Pursuant to Section 26-23-6, any person that willfully violates any provision of this rule may be assessed an administrative civil money penalty not to exceed $1,000 upon an administrative finding of a first violation and up to $3,000 for a subsequent similar violation within two years. A person may also be subject to penalties imposed by a civil or criminal court.

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-19A. Coverage for Dialysis Services by an End Stage Renal Disease Facility.
R414-19A-0. Policy Statement.

Dialysis services are provided under the Medicaid State Plan to cover Medicaid recipients principally for the 90-day period between the first dialysis service and commencement of Medicare End-Stage Renal Disease (ESRD) benefits. The State Plan also covers dialysis services for Medicaid recipients who do not qualify for Medicare coverage.

R414-19A-1. Authority.

The provision of clinic services for outpatient dialysis is authorized under the authority of 42 CFR 440.20, 440.90, and the Medicaid State Plan under Clinic Services.

R414-19A-2. Definition.

(1) "Composite Payment" means a per treatment unit of payment that applies to all claims for dialysis services. The composite payment rate includes payment for all training, services, evaluations, laboratory tests, items, supplies, medications, and equipment necessary to treat ESRD or perform dialysis.

(2) "Dialysis" means the type of care or service furnished to an ESRD patient and includes all training, services, evaluations, laboratory tests, items, supplies, medications, and equipment necessary to perform dialysis in a facility, outpatient, or home setting.

(3) "End Stage Renal Disease (ESRD)" means that stage of renal impairment that appears irreversible and permanent, and requires a regular course of dialysis or kidney transplantation to maintain life.

(4) "ESRD facility" means a facility which is enrolled with Utah Medicaid and Medicare to furnish at least one specific dialysis service. Such facilities include:

(a) Renal transplantation center: A hospital unit which is approved to furnish directly transplantation and other medical and surgical specialty services required for the care of the ESRD transplant patients, including inpatient dialysis furnished directly or under arrangement. A renal transplantation center may also be a renal dialysis center.

(b) Renal dialysis center: A hospital unit which is approved to furnish the full spectrum of diagnostic, therapeutic, and rehabilitative services required for the care of ESRD dialysis patients (including inpatient dialysis furnished directly or under arrangement). A hospital need not provide renal transplantation to qualify as a renal dialysis center.

(c) Renal dialysis facility: A unit which is approved to furnish dialysis services directly to ESRD patients.

(d) Self -dialysis unit: A unit that is part of an approved renal transplantation center, renal dialysis center, or renal dialysis facility and furnishes self-dialysis services.

(e) Special purpose renal dialysis facility: A renal dialysis facility which is approved to furnish dialysis at special locations on a short term basis to a group of dialysis patients otherwise unable to obtain treatment in the geographical area. The special locations must be either special rehabilitative (including vacation) locations serving ESRD patients temporarily residing there, or locations in need of ESRD facilities under emergency circumstances.

R414-19A-3. Eligibility Requirements.

Dialysis services are available to both categorically and medically needy Medicaid recipients who are not enrolled in a managed care organization.

R414-19A-4. Program Access Requirements.

Dialysis services are available to Medicaid recipients when performed through a state-licensed Medicare-approved dialysis facility that is enrolled with Utah Medicaid.

R414-19A-5. Service Coverage.

(1) Dialysis services, including hemodialysis and peritoneal dialysis treatments provided by an ESRD facility, are a covered service for categorically or medically needy Medicaid recipients for three months pending the establishment of Medicare eligibility.

(a) Medicaid may cover dialysis services for longer than three months if a recipient is not eligible for Medicare.

(b) Medicaid reimburses dialysis services through a composite payment.

(2) Medicaid covers dialysis services, including hemodialysis and peritoneal dialysis treatments performed at home, when they are supervised by an enrolled ESRD facility and performed by an appropriately trained Medicaid recipient for three months pending the establishment of Medicare eligibility.

(3) Medicare becomes the primary reimbursement source for individuals who meet Medicare eligibility criteria. ESRD facilities must assist patients in applying for and pursuing final Medicare eligibility.

R414-19A-6. Standards of Care.

ESRD facilities must comply with the Medicare conditions of participation set forth in 42 CFR 405 and all other applicable federal, state and local laws and regulations for the licensure, certification and registration of the ESRD facility.

R414-19A-7. Limitations.

(1) Payments for dialysis services are eligible only to ESRD facilities that have enrolled with Utah Medicaid and are also enrolled with Medicare as an ESRD provider.

(2) Medicaid reimburses dialysis services through a composite rate. Payment for services which are part of the composite rate may not be reimbursed separately.

(3) Regardless of the dialysis method used, composite payments are limited to one unit per session and no more than one unit per day. Continuous cycling peritoneal dialysis, or any other dialysis services that occur overnight, are eligible for one composite payment.

R414-19A-8. Prior Authorization.

Prior authorization is not required.

R414-19A-9. Reimbursement for Services.

Payment for renal dialysis is based on the established fee schedule unless a lower amount is billed. The amount billed cannot exceed usual and customary charges.

August 10, 2016 26-1-5
Notice of Continuation April 7, 2015 26-18-3

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-505. Participation in the Nursing Facility Non-State Government-Owned Upper Payment Limit Program.
R414-505-1. Introduction and Authority.

This rule defines the participation requirements in the Nursing Care Facility Non-State Government-Owned Upper Payment Limit (NF NSGO UPL) program. This rule is authorized under Attachment 4.19-D of the Utah Medicaid State Plan, and by Sections 26-1-5 and 26-18-3.

R414-505-2. Definitions.

In addition to the following, the definitions in Section 26-18-502 and Attachment 4.19-D of the Medicaid State Plan apply to this rule:

(1) "Non-state governmental entity (NSGE)" means a hospital authority, hospital district, healthcare district, special services district, county, or city.

(2) "Non-state government-owned (NSGO) nursing care facility" means a nursing care facility where an NSGE holds the license and is party to the facility's Medicaid provider contract.

(3) "Eligible nursing care facilities" means facilities that are NSGO nursing facilities which comply with the requirements described in this rule.

(4) "Public funds" means funds derived from taxes, assessments, levies, investments, governmental operations, and revenue generated by a special services district and other public revenues within the sole and unrestricted control of an NSGE that holds the license and is party to the Medicaid contract of the eligible nursing care facility. Public funds do not include gifts, grants, trusts, or donations, the use of which is conditioned on supplying a benefit solely to the donor or grantor of the funds and may not be derived from an impermissible source, including recycled Medicaid payments, federal money precluded from use as the non-federal share, impermissible taxes, and non-bona fide provider-related donations.

(5) "Effective date of the change of ownership" means the issue date of the license for the new owner by the Utah Department of Health.

R414-505-3. Nursing Care Facility Non-State Government-Owned Upper Payment Limit Payment Program.

The NF NSGO UPL supplemental payment program is governed by Attachment 4.19-D of the Medicaid State Plan.

R414-505-4. Notice of Intent to Participate.

(1) Required application. Before an NSGO nursing care facility may receive supplemental payments, the appropriate NSGE must certify certain facts, representations, and assurances regarding program requirements. The NSGE must complete the "NF NSGO UPL Program Notice of Participation Form", prescribed by the Medicaid agency.

(2) The required application must be mailed to the correct address, as follows:

Via United States Postal Service:
Utah Department of Health
DMHF, BCRP
Attn: Reimbursement Unit
P.O. Box 143102
Salt Lake City, UT 84114-3102
Via United Parcel Service, Federal Express, and similar:
Utah Department of Health
DMHF, BCRP
Attn: Reimbursement Unit
288 North 1460 West
Salt Lake City, UT 84116-3231

(3) The "NSGO NF UPL Program Notice of Participation Form" must be complete and accurate or it will be returned. Incomplete forms shall not be considered as providing notice of intent to participate.

R414-505-5. Requirements to Participate in the NF NSGO UPL Program.

(1)(a) The nursing care facility must be owned by an NSGE.

(b) Prior to the Medicaid agency initiating a contract, the nursing care facility owner shall provide appropriate legal evidence, as determined by the Medicaid agency, demonstrating the nursing care facility is owned by an NSGE.

(c) A nursing care facility participating in this supplemental payment program must notify the Reimbursement Unit within the Bureau of Coverage and Reimbursement Policy, at the address noted above, of changes in ownership that may affect the nursing care facility's continued eligibility within 14 calendar days after such change.

(2) The Utah Medicaid provider enrollment process must be complete.

(3)(a) The NSGE must have an NF NSGO UPL contract in effect, signed by the Utah Department of Health's authorized representative.

(b) The effective date for an NF NSGO UPL contract for a nursing care facility to participate in the NF NSGO UPL supplemental payments shall be the latter of the following dates:

(i) The effective date of the Change of Ownership (CHOW);

(ii) The postmark date of the notice of intent to participate as noted in Section R414-505-4; or

(iii) The effective date of the Medicaid provider enrollment.

(4) Once a contract is in effect, the payments will be made in accordance with Attachment 4.19-D of the Medicaid State Plan and the NF NSGO UPL contract.

(5)(a) State funding for supplemental payments authorized in this rule is limited to and obtained through Intergovernmental Transfer (IGT) Agreements of public funds or other permissible source-of-seed funding from the NSGE that holds the license and is party to the Medicaid contract of the nursing care facility.

(b) The NSGE shall ensure that the funds provided to the Department for the non-federal share, via IGT, meet the requirements of 42 CFR 433, Subpart B.

R414-505-6. Intergovernmental Transfer (IGT) Certification.

With its IGT, using the "IGT Certification Form" prescribed by the Medicaid agency, the NSGE shall specify the dollar amount and certify the source of the IGT funds. The NSGE shall specify, on the form, a detailed description of the IGT monies and the legal basis for the monies ability to be used to match federal funds.

26-18-3

R414. Health, Health Care Financing, Coverage and Reimbursement Policy.
R414-513. Intergovernmental Transfers.
R414-513-1. Introduction and Authority.

This rule requires documentation accompanying intergovernmental transfer of funds for use as non-federal share of Medicaid payments or administration costs. This rule is authorized by Sections 26-1-5 and 26-18-3.

R414-513-2. Intergovernmental Transfer (IGT) Certification.

With its IGT, using the "IGT Certification Form" prescribed by the Medicaid agency, governmental entities shall specify the dollar amount and certify the source of the IGT funds transferred to the Medicaid agency. The governmental entity shall specify, on the form, a detailed description of the IGT monies and the legal basis for the monies ability to be used to match federal funds.

26-18-3

R432. Health, Family Health and Preparedness, Licensing.
R432-2. General Licensing Provisions.
R432-2-1. Legal Authority.

This rule is adopted pursuant to Title 26, Chapter 21.

R432-2-2. Purpose.

The purpose of this rule is to define the standards that health care facilities and agencies must follow in order to obtain a license. No person or governmental unit acting severally or jointly with any other person, or governmental unit shall establish, conduct, or maintain a health facility in this state without first obtaining a license from the Department. Section 26-21-8.

R432-2-3. Exempt Facilities.

The provisions of Section 26-21-7 apply for exempt facilities.

R432-2-4. Distinct Part.

Licensed health care facilities that wish to offer services outside the scope of their license or services regulated by another licensing rule, with the exception of federally recognized Swing Bed Units, shall submit for Department review a program narrative defining the levels of service to be offered and the specific patient population to be served. If the program is determined to require a license, the facility must meet the definition of a distinct part entity and all applicable codes and standards and obtain a separate license.

R432-2-5. Requirements for a Satellite Service Operation.

(1) A "satellite operation" is a health care treatment service that:

(a) is administered by a parent facility within the scope of the parent facility's current license,

(b) is located further than 250 yards from the licensed facility or other areas determined by the department to be a part of the provider's campus,

(c) does not qualify for licensing under Section 26-21-2, and

(d) is approved by the Department for inclusion under the parent facility's license and identified as a remote service.

(2) A licensed health care facility that wishes to offer a satellite operation shall submit for Department review a program narrative and one set of construction drawings. The program narrative shall define at least the following:

(a) location of the remote facility (street address);

(b) capacity of the remote facility;

(c) license category of the parent facility;

(d) service to be provided at the remote facility (must be a service authorized under the parent facility license);

(e) ancillary administrative and support services to be provided at the remote facility; and

(f) International Building Code occupancy classification of the remote facility physical structure.

(3) Upon receipt of the satellite service program narrative and construction drawings, the Department shall make a determination of the applicable licensing requirements including the need for licensing the service. The Department shall verify at least the following items:

(a) There is only a single health care treatment service provided at the remote site and that it falls within the scope of the parent facility license;

(b) The remote facility physical structure complies with all construction codes appropriate for the service provided;

(c) All necessary administrative and support services for the specified treatment service are available, on a continuous basis during the hours of operation, to insure the health, safety, and welfare of the clients.

(4) If a facility qualifies as a single satellite service treatment center the Department shall issue a separate license identifying the facility as a "satellite service" of the licensed parent facility. This license shall be subject to all requirements set forth in R432-2 of the Health Facility Rules.

(5) A parent facility that wishes to offer more than one health care service at the same remote site shall either obtain a satellite service license for each service offered as described above or obtain a license for the remote complex as a free-standing health care facility.

(6) A satellite facility is not permitted within the confines of another licensed health care facility.

(7) A licensed hospital is limited to one emergency department satellite location.

R432-2-6. Requirements for a Branch Location.

(1) A "Branch Location" is a licensed Home Health, Personal Care or Hospice agency location which:

(a) is administered by a parent agency within the scope of the parent agency's current license;

(b) is located no further than 150 miles from the licensed parent agency or within a designated geographical service area as determined by the Department; and

(c) is approved by the Department as a branch location under the parent agency's license.

(2) An applicant for a branch location license shall submit a narrative of the program for Department review. The narrative shall include the following:

(a) street address of the parent and branch;

(b) license category of the parent agency;

(c) service(s) to be provided at the branch location, which must be a service authorized under the parent agency license; and

(d) ancillary administrative and support services to be provided at the branch location.

(3) Upon receipt of the branch location program narrative, the Department shall make a determination of the applicable licensing requirements including the need for licensing the service. The Department shall verify at least the following items:

(a) the service provided at the remote site falls within the scope of the parent agency license; and

(b) all necessary administrative and support services are available, on a continuous basis during the hours of operation, to insure the health, safety, and welfare of the clients.

(4) If a location qualifies as a branch location the Department shall issue a separate license identifying the agency as a "Branch Location" of the licensed parent agency. This license shall be subject to all requirements set forth in R432-2 of the Health Facility Rules.

R432-2-7. Applications for License Actions.

(1) An applicant for a license shall file a Request for Agency Action/License Application with the Utah Department of Health on a form furnished by the Department.

(2) Each applicant shall comply with all zoning, fire, safety, sanitation, building and licensing laws, regulations, ordinances, and codes of the city and county in which the facility or agency is located. The applicant shall obtain the following clearances and submit them as part of the completed application to the licensing agency:

(a) A certificate of fire clearance from the State Fire Marshal or designated local fire authority certifying compliance with local and state fire codes is required with initial and renewal application, change of ownership, and at any time new construction or substantial remodeling has occurred.

(b) A satisfactory Food Services Sanitation Clearance

report by a local or state sanitarian is required for facilities providing food service at initial application and upon a change of ownership.

(c) Certificate of Occupancy from the local building official at initial application, change of location and at the time of any new construction or substantial remodeling.

(3) The applicant shall submit the following:

(a) a list of all officers, members of the boards of directors, trustees, stockholders, partners, or other persons who have a greater than 25 percent interest in the facility;

(b) the name, address, percentage of stock, shares, partnership, or other equity interest of each person; and

(c) a list, of all persons, of all health care facilities in the state or other states in which they are officers, directors, trustees, stockholders, partners, or in which they hold any interest;

(4) The applicant shall provide the following written assurances on all individuals listed in R432-2-7(3):

(a) None of the persons has been convicted of a felony;

(b) None of the persons has been found in violation of any local, state, or federal law which arises from or is otherwise related to the individual's relationship to a health care facility; and

(c) None of the persons who has currently or within the five years prior to the date of application had previous interest in a licensed health care facility that has been any of the following:

(i) subject of a patient care receivership action;

(ii) closed as a result of a settlement agreement resulting from a decertification action or a license revocation;

(iii) involuntarily terminated from participation in either Medicaid or Medicare programs; or

(iv) convicted of patient abuse, neglect or exploitation where the facts of the case prove that the licensee failed to provide adequate protection or services for the person to prevent such abuse.

R432-2-8. License Fee.

In accordance with Subsection 26-21-6(1)(d), the applicant shall submit a license fee with the completed application form. A current fee schedule is available from the Bureau of Health Facility Licensing upon request. Any late fees is assessed according to the fee schedule.

R432-2-9. Additional Information.

The Department may require additional information or review other documents to determine compliance with licensing rules. These include:

(1) architectural plans and a description of the functional program.

(2) policies and procedures manuals.

(3) verification of individual licenses, registrations or certification required by the Utah Department of Commerce.

(4) data reports including the submission of the annual report at the Departments request.

(5) documentation that sufficient assets are available to provide services: staff, utilities, food supplies, and laundry for at least a two month period of time.

R432-2-10. Initial License Issuance or Denial.

(1) The Department shall render a decision on an initial license application within 60 days of receipt of a complete application packet or within six months of the date the first component of an application packet is received; provided, in either case, a minimum of 45 days is allowed for the initial policy and procedure manual review.

(2) Upon verification of compliance with licensing requirements the Department shall issue a provisional license.

(3) The Department shall issue a written notice of agency decision under the procedures for adjudicative proceedings (R432-30) denying a license if the facility is not in compliance with the applicable laws, rules, or regulations. The notice shall state the reasons for denial.

(4) An applicant who is denied licensing may reapply for initial licensing as a new applicant and shall be required to initiate a new request for agency action as described in R432-2-7.

(5) The Department shall assess an administrative fee on all denied license applications. This fee shall be subtracted from any fees submitted as part of the application packet and a refund for the balance returned to the applicant.

R432-2-11. License Contents and Provisions.

(1) The license shall document the following:

(a) the name of the health facility,

(b) licensee,

(c) type of facility,

(d) approved licensed capacity including identification of operational and banked beds,

(e) street address of the facility,

(f) issue and expiration date of license,

(g) variance information, and

(h) license number.

(2) The license is not assignable or transferable.

(3) Each license is the property of the Department. The licensee shall return the license within five days following closure of a health care facility or upon the request of the Department.

(4) The licensee shall post the license on the licensed premises in a place readily visible and accessible to the public.

R432-2-12. Expiration and Renewal.

(1) Each standard license shall expire at midnight on the day designated on the license as the expiration date, unless the license is revoked or extended under subsection (2) or (4) by the Department.

(2) If a facility is operating under a conditional license for a period extending beyond the expiration date of the current license, the Department shall establish a new expiration date.

(3) The licensee shall submit a Request for Agency Action/License Application form, applicable fees, clearances, and the annual report for the previous calendar year (if required by the Department under R432-2-9) 15 days before the current license expires.

(4) A license shall expire on the date specified on the license unless the licensee requests and is granted an extension from the Department.

(5) The Department shall renew a standard license upon verification that the licensee and facility are in compliance with all applicable license rules.

(6) Facilities no longer providing patient care or client services may not have their license renewed.

R432-2-13. New License Required.

(1) A prospective licensee shall submit a Request for Agency Action/License Application, fees, and required documentation for a new license at least 30 days before any of the following proposed or anticipated changes occur:

(a) occupancy of a new or replacement facility.

(b) change of ownership.

(2) Before the Department may issue a new license, the prospective licensee shall provide documentation that:

(a) all patient care records, personnel records, staffing schedules, quality assurance committee minutes, in-service program records, and other documents required by applicable rules remain in the facility and have been transferred to the

custody of the new licensee.

(b) the existing policy and procedures manual or a new manual has been approved by the Department and adopted by the facility governing body before change of ownership occurs.

(c) new contracts for professional or other services not provided directly by the facility have been secured.

(d) new transfer agreements have been drafted and signed.

(e) written documentation exists of clear ownership or lease of the facility by the new owner.

(3) Upon sale or other transfer of ownership, the licensee shall provide the new owner with a written accounting, prepared by an independent certified public accountant, of all patient funds being transferred, and obtain a written receipt for those funds from the new owner.

(4) A prospective licensee is responsible for all uncorrected rule violations and deficiencies including any current plan of correction submitted by the previous licensee unless a revised plan of correction, approved by the Department, is submitted by the prospective licensee before the change of ownership becomes effective.

(5) If a license is issued to the new owner the previous licensee shall return his license to the Department within five days of the new owners receipt of the license.

(6) Upon verification that the facility is in compliance with all applicable licensing rules, the Department shall issue a new license effective the date compliance is determined as required by R432-2-9.

R432-2-14. Change in Licensing Status.

(1) A licensee shall submit a Request for Agency Action/License Application to amend or modify the license status at least 30 days before any of the following proposed or anticipated changes:

(a) increase or decrease of licensed capacity.

(b) change in name of facility.

(c) change in license category.

(d) change of license classification.

(e) change in administrator.

(2) An increase of licensed capacity may incur an additional license fee if the increase exceeds the maximum number of units in the fee category division of the existing license. This fee shall be the difference in license fee for the existing and proposed capacity according to the license fee schedule.

(3) Upon verification that the licensee and facility are in compliance with all applicable licensing rules, the Department shall issue an amended or modified license effective the date that the Department determines that the licensee is in compliance.

R432-2-15. Facility Ceases Operation.

(1) A licensee that voluntarily ceases operation shall complete the following:

(a) notify the Department and the patients or their next of kin at least 30 days before the effective date of closure.

(b) make provision for the safe keeping of records.

(c) return all patients' monies and valuables at the time of discharge.

(d) The licensee must return the license to the Department within five days after the facility ceases operation.

(2) If the Department revokes a facility's license or if it issues an emergency closure order, the licensee shall document for Department review the following:

(a) the location and date of discharge for all residents,

(b) the date that notice was provided to all residents and responsible parties to ensure an orderly discharge and assistance with placement; and

(c) the date and time that the facility complied with the closure order.

R432-2-16. Provisional License.

(1) A provisional license is an initial license issued to an applicant for a probationary period of six months.

(2) In granting a provisional license, the Department shall determine that the facility has the potential to provide services and be in full compliance with licensing rules during the six month period.

(3) A provisional license is nonrenewable. The Department may issue a provisional license for no longer than six months.

(4) If the licensee fails to meet terms and conditions of licensing before the expiration date of the provisional license, the license shall automatically expire.

R432-2-17. Conditional License.

(1) A conditional license is a remedial license issued to a licensee if there is a determination of substandard quality of care, immediate jeopardy or a pattern of violations which would result in a ban on admissions at the facility or if the licensee is found to have:

(a) a Class I violation or a Class II violation that remains uncorrected after the specified time for correction;

(b) more than three cited repeat Class I or II violations from the previous year; or

(c) fails to fully comply with administrative requirements for licensing.

(2) A standard license is revoked by the issuance of a conditional license.

(3) The Department may not issue a conditional license after the expiration of a provisional license.

(4) In granting a conditional license, the Department shall be assured that the lack of full compliance does not harm the health, safety, and welfare of the patients.

(5) The Department shall establish the period of time for the conditional license based on an assessment of the nature of the existing violations and facts available at the time of the decision.

(6) The Department shall set conditions whereby the licensee must comply with an accepted plan of correction.

(7) If the licensee fails to meet the conditions before the expiration date of the conditional license, the license shall automatically expire.

R432-2-18. Standard License.

A standard license is a license issued to a licensee if:

(1) the licensee meets the conditions attached to a provisional or conditional license;

(2) the licensee corrects the identified rule violations; or

R432-2-19. Variances.

(1) A health facility may submit a request for agency action to obtain a variance from state rules at any time.

(a) An applicant requesting a variance shall file a Request for Agency Action/Variance Application with the Utah Department of Health on forms furnished by the Department.

(b) The Department may require additional information from the facility before acting on the request.

(c) The Department shall act upon each request for variance in writing within 60 days of receipt of a completed request.

(2) If the Department grants a variance, it shall amend the license in writing to indicate that the facility has been granted a variance. The variance may be renewable or non-renewable. The licensee shall maintain a copy of the approved

variance on file in the facility and make the copy available to all interested parties upon request.

(a) The Department shall file the request and variance with the license application.

(b) The terms of a requested variance may be modified upon agreement between the Department and the facility.

(c) The Department may impose conditions on the granting of a variance as it determines necessary to protect the health and safety of the residents or patients.

(d) The Department may limit the duration of any variance.

(3) The Department shall issue a written notice of agency decision denying a variance upon determination that the variance is not justified.

(4) The Department may revoke a variance if:

(a) The variance adversely affects the health, safety, or welfare of the residents.

(b) The facility fails to comply with the conditions of the variance as granted.

(c) The licensee notifies the Department in writing that it wishes to relinquish the variance and be subject to the rule previously varied.

(d) There is a change in the statute, regulations or rules.

R432-2-20. Change In Ownership.

(1) As used in this section, an "owner" is any person or entity:

(a) ultimately responsible for operating a health care facility; or

(b) legally responsible for decisions and liabilities in a business management sense or that bears the final responsibility for operating decisions made in the capacity of a governing body.

(2) The owner of the health care facility does not need to own the real property or building where the facility operates.

(3) A property owner is also an owner of the facility if he:

(a) retains the right or participates in the operation or business decisions of the enterprise;

(b) has engaged the services of a management company to operate the facility; or

(c) takes over the operation of the facility.

(4) A licensed provider whose ownership or controlling ownership interest has changed must submit a Request for Agency Action/License Application and fees to the department 30 days prior to the proposed change

(5) Changes in ownership that require action under subsection (4) include any arrangement that:

(a) transfers the business enterprise or assets to another person or firm, with or without the transfer of any real property rights;

(b) removes, adds, or substitutes an owner or part owner; or

(c) in the case of an incorporated owner:

(i) is a merger with another corporation if the board of directors of the surviving corporation differs by 20 percent or more from the board of the original licensee; or

(ii) creates a separate corporation, including a wholly owned subsidiary, if the board of directors of the separate corporation differs by 20 percent or more from the board of the original licensee.

(6) A person or entity that contracts with an owner to manage the enterprise, subject to the owner's general approval of operating decisions it makes is not an owner, unless the parties have agreed that the managing entity is also an owner.

(7) A transfer between departments of government agencies for management of a government-owned health care facility is not a change of ownership under this section.

	26-21-13

R432. Health, Family Health and Preparedness, Licensing.
R432-14. Birthing Center Construction Rule.
R432-14-1. Legal Authority.

This rule is adopted pursuant to Title 26, Chapter 21.

R432-14-2. Purpose.

This rule provides construction and physical plant standards for birthing centers.

R432-14-3. General Design Requirements.

(1) Birthing centers shall be constructed in accordance with the requirements of R432-4-1 through R432-4-23 and the requirements of section 5.2 of the Guidelines for Design and Construction of Health Care Facilities, 2010 edition (Guidelines) and are adopted and incorporated by reference.

(2) Birthing centers shall consist of at least one, but not more than five birth rooms. Licensure is not required for birthing centers with only one birth room.

(3) Birthing rooms and ancillary service areas shall be organized in a contiguous physical arrangement.

(4) Birthing centers with 4 or 5 birth rooms shall comply with NFPA 101, Life Safety Code, Chapter 20, New Ambulatory Health Care Occupancies. Birthing centers with one to three birth rooms shall comply with NFPA 101, Life Safety Code, Chapter 38, New Business Occupancies and NFPA 101 A.3.3.178.3, as indicated in section 5.2-7.1 of the Guidelines.

(5) A Birthing center located contiguous with a general hospital may share radiology services, laboratory services, pharmacy services, engineering services, maintenance services, laundry services, housekeeping services, dietary services, and business functions. The owner shall retain in the birthing center a written agreement for the shared services.

R432-14-4. General Construction Patient Facilities.

(1) Requirements of section 5.2 of the Guidelines shall be met except as modified in this section.

(2) When a modification is cited, the modification supersedes conflicting requirements of the Guidelines.

(3) The facility shall be designed to allow access to service areas and common areas without compromising patient privacy.

(4) Birth rooms and service areas shall be grouped to form a physically defined service unit.

(5) Spaces shall be provided for each of the required services.

(6) Interior finishes, lighting, and furnishings shall reflect a residential rather than an institutional setting.

(7) Maximum room occupancy shall be one mother and her newborn infant or infants.

(8) Windows in a birth room with a sight line which permits observation from the exterior shall be arranged or draped to ensure patient privacy.

(9) Birth rooms shall provide each patient a wardrobe, closet, or locker, having minimum clear dimensions of 24 inches by 20 inches, suitable for hanging full-length garments. A clothes rod and adjustable shelf shall be provided.

(10) A toilet room with direct access from the birth room shall be accessible to each birth room.

(a) The toilet room shall contain a toilet and a lavatory. A shower or tub shall be accessible to each birth room and may be located in the toilet room.

(b) A toilet room may serve two birth rooms.

(c) All toilet room fixtures shall be handicapped accessible and shall have grab bars in compliance with ADA/ABA-AG.

(11) Newborn infant resuscitation equipment, including electrical receptacles, oxygen, and suction shall be immediately available to each birth room in addition to resuscitation equipment provided for the mother. Portable oxygen and suction equipment shall be permitted.

(12) A mechanically exhausted area for storage of facility maintenance materials and equipment shall be provided and may be combined with the environmental services room.

(13) Special surgical lighting is not required.

(14) An examination light shall be readily available in each birth room.

(15) An emergency lighting system is required and must include:

(a) emergency exit signs;

(b) sufficient lighting to safely exit the building; and

(c) an examination light.

R432-14-5. Excluded Guidelines and Administrative Code.

(1) The following sections of the Guidelines do not apply:

(a) Location, Subsection 5.2-1.3.1.1;

(b) Soiled workroom 5.2-2.6.10.1; and

(c) Soiled holding room 5.2-2.6.10.2;

(d) Ventilation of Health Care Facilities, Part 6.

(2) The following sections of Administrative Code do not apply:

(a) General construction R432-4-23(5); and

(b) General construction R432-4-23(17).

R432-14-6. Penalties.

The Department may assess a civil money penalty of up to $10,000 and deny approval for patient utilization of new or remodeled areas if a health care provider does not submit architectural drawings to the Bureau of Licensing. The Department may assess a civil money penalty of up to $10,000 if the licensee fails to follow Department-approved architectural plans. The Department may assess a civil money penalty of up to $1,000 per day for each day a new or renovated area is occupied prior to licensing agency approval.

August 26, 2016 26-21-5
Notice of Continuation April 10, 2014 26-21-16

R432. Health, Family Health and Preparedness, Licensing.
R432-101. Specialty Hospital - Psychiatric.
R432-101-1. Legal Authority.
This rule is adopted pursuant to Title 26, Chapter 21.

R432-101-2. Purpose.
This rule applies to a hospital that chooses to be licensed as a specialty hospital and where its major single service is psychiatric service. If a specialty hospital chooses to have a dual service, e.g., psychiatric and substance abuse or chemical dependency, then both of the appropriate specialty hospital rules apply.

R432-101-3. Time for Compliance.
All psychiatric specialty hospitals obtaining initial licensure shall fully comply with this rule.

R432-101-4. Definitions.
(1) See Common Definitions in R432-1-3.
(2) Special Definitions.
(a) "Specialty Hospital" means a facility with the following:
(i) a duly constituted governing body with overall administrative and professional responsibility;
(ii) an organized medical staff which provides 24 hour inpatient care;
(iii) a chief executive officer to whom the governing body delegates the responsibility for the operation of the hospital;
(iv) a distinct nursing unit of at least six inpatient beds;
(v) current and complete medical records;
(vi) provide continuous registered nursing supervision and other nursing services;
(vii) provide in house the following basic services:
(A) laboratory;
(B) pharmacy;
(C) emergency services and provision for interim care of traumatized patients coordinated with an appropriate emergency transportation service;
(D) specialized diagnostic and therapeutic facilities, medical staff, and equipment required to provide the type of care in the recognized specialty or specialties for which the hospital is organized.
(viii) provide on-site all basic services required of a general hospital that are needed for the diagnosis, therapy and treatment offered or required by patients admitted to or cared for in the specialty facility;
(b) "Investigational Drug" means a drug that is being investigated for human or animal use by the manufacturer or the Food and Drug Administration (FDA); a drug which has not been approved for use by the FDA;
(c) A "physical restraint" means an involuntary intervention employing any device intended to control or restrict the physical movement of a patient, whether applied directly to the patient's body or applied indirectly to act as a barrier to voluntary movement. Simple safety devices are a type of physical restraint.
(d) "Seclusion" means an involuntary intervention employing a procedure that isolates the patient in a specific room or designated area to temporarily remove the patient from the therapeutic community and reduce external stimuli.
(e) "Secure hospital" means a hospital where traffic in and out of the hospital setting is controlled in order to maintain safety for both patients and the community.
(f) "Stable" means a patient is no longer a danger to himself or others, and is able to function and demonstrate the ability to maintain improvements outside the hospital setting.
(g) "Time out" means isolating a patient for a period of time, on a voluntary basis in an unlocked room. This shall be based on hospital policy, as a procedure designed to remove the patient who is exhibiting a specified behavior from the source of stimulation or reinforcement.
(h) "Activity services" means therapies which involve the principles of art, dance, movement, music, occupational therapy, recreational therapy and other disciplines.
(i) "Plan for Patient Care Services" means a written plan which ensures the care, treatment, rehabilitation, and habilitation services provided are appropriate to the needs of the patient population served and the severity of the disease, condition, impairment, or disability.
(j) "Partial Hospitalization" means a time-limited, ambulatory, active treatment program that offers therapeutically intensive, coordinated and structured clinical services where the daily stay lasts no more than 23 hours with the goal of stabilizing the patient to avert inpatient hospitalization or of reducing the length of a hospital stay.

R432-101-5. Licensure.
License required. See R432-2.

R432-101-6. General Construction Rules.
See R432-7, Psychiatric Construction Rule.

R432-101-7. Organization.
(1) The Governing Body, R432-100-5 applies.
(2) The governing body shall develop through its officers, committees, medical and other staff, a mission statement that includes a Plan for Patient Care Services.

R432-101-8. Administrator.
(1) Refer to R432-100-6.
(2) The administrator shall organize and staff the hospital according to the nature, scope and extent of services offered.

R432-101-9. Professional Staff.
(1) The psychiatric services of the hospital shall be organized, staffed and supported according to the nature, scope and extent of the services provided.
(2) Medical and professional staff standards shall comply with R432-100-7. The medical direction of the psychiatric care and services of the hospital shall be the responsibility of a licensed physician who is a member of the medical staff, appointed by the governing body and certified or eligible for certification by the American Board of Psychiatry and Neurology.
(3) Nursing staff standards shall comply with R432-100-13.
(4) The hospital shall provide sufficient qualified, and competent, health care professional and support staff to assess and address patient needs within the Plan for Patient Care Services.
(5) Qualified professional staff members may be employed on a full-time, on a part-time basis or be retained by contract.
(6) Professional staff shall be assigned or assume specific responsibilities on the treatment team as qualified by training and educational experience and as permitted by hospital policy and the scope of the professional license.

R432-101-10. Personnel Management Service.
(1) The hospital shall provide licensed, certified or registered personnel who are able and competent to perform their respective duties, services, and functions.
(2) Written personnel policies and procedures shall include:
(a) job descriptions for each position, including job title,

job summary, responsibilities, minimum qualifications, required skills and licenses, and physical requirements;

(b) a method to handle and resolve grievances from the staff.

(3) All personnel shall have access to hospital policy and procedure manuals, a copy of their position description, and other information necessary to effectively perform duties and carry out responsibilities.

(a) The facility shall conduct a criminal background check with the Department of Public Safety for all employees prior to beginning employment.

(b) The facility is responsible for the security and confidentiality of all information obtained in the criminal background check.

(4) All employees shall be oriented to job requirements and personnel policies, and be provided job training beginning the first day of employment. Documentation shall be signed by the employee and supervisor to indicate basic orientation has been completed during the first 30 days of employment.

(a) Registered nurses, licensed practical nurses and psychiatric technologists shall receive additional orientation to the following:

(i) concepts of treatment provided within the hospital;

(ii) roles and functions of nurses in the treatment programs;

(iii) psychotropic medications.

(b) In-service sessions shall be planned and held at least quarterly and be available to all employees. Attendance standards shall be established by policy.

(c) Licensed professional staff shall receive continuing education to keep informed of significant new developments and to be able to develop new skills.

(d) The following in-service staff development topics shall be addressed annually:

(i) fire prevention;

(ii) review and drill of emergency procedures and evacuation plan;

(iii) prevention and control of infections;

(iv) training in the principles of emergency medical care and cardiopulmonary resuscitation for physicians, licensed nursing personnel, and others as appropriate;

(v) proper use and documentation of restraints and seclusion;

(vi) patients' rights, refer to R432-101-15;

(vii) confidentiality of patient information;

(viii) reporting abuse, neglect or exploitation of adults or children; and

(ix) provision of care appropriate to the age of the patient population served.

(5) Volunteers may be utilized in the daily activities of the hospital but shall not be included in the hospital's staffing plan in lieu of hospital employees.

(a) Volunteers shall be screened by the administrator or designee and supervised according to hospital policy.

(b) Volunteers shall be familiar with the hospital's policies and procedures on volunteers, including patient rights and facility emergency procedures.

(6) All hospital personnel shall be licensed, registered, or certified as required by the Utah Department of Commerce. Copies of the current license, registration or certification shall be in the personnel files. Failure to ensure that the individual is appropriately licensed, registered or certified may result in sanctions to the facility license.

R432-101-11. Quality Assurance.

(1) The facility shall have a well-defined quality assurance plan designed to improve the delivery of patient care through evaluation of the quality of patient care services and resolution of identified problems. The plan shall be consistent with the Plan for Patient Care Services.

(2) The plan shall be implemented and include a method for:

(a) identification and assessment of problems, concerns, or opportunities for improvement of patient care;

(b) implementation of actions that are designed to:

(i) eliminate identified problems where possible;

(ii) improve patient care;

(c) documentation of corrective actions and results;

(d) reporting findings and concerns to the medical, nursing, and allied health care staffs, the administrator, and the governing board.

(3) Documentation of minutes of meetings shall be maintained for Department review.

R432-101-12. Infection Control.

(1) The facility shall have a written plan to effectively prevent, identify, report, evaluate and control infections.

(2) The plan shall include a method to collect and monitor data and carry out necessary follow-up actions.

(3) Infection control actions shall be documented consistent with the requirements of the plan and in accordance with Department requirements and standards of medical practice.

(4) In-service education and training of employees shall be provided to all service and program components of the hospital.

(5) The infection control plan shall be reviewed and revised as necessary, but at least annually.

(6) The hospital shall implement an employee health surveillance program and infection control policy which meets the requirements of R432-100-10 and the following:

(a) complete at the time a person is hired, an employee health inventory that includes the following:

(i) conditions that may predispose the employee to acquiring or transmitting infectious diseases;

(ii) conditions that may prevent the employee from satisfactorily performing assigned duties.

(b) develop employee health screening and immunization components of personnel health programs in accordance with Rule R386-702, concerning communicable diseases;

(c) employee skin testing by the Mantoux Method or other FDA approved in-vitro serologic test and follow up for tuberculosis shall be done in accordance with R388-804, Special Measures for the Control of Tuberculosis.

(i) The licensee shall ensure that all employees are skin tested for tuberculosis within two weeks of:

(A) initial hiring;

(B) suspected exposure to a person with active tuberculosis; and

(C) development of symptoms of tuberculosis.

(ii) all employees with known positive reaction to skin tests are exempt from skin testing.

(d) report all infections and communicable diseases reportable by law to the local health department in accordance with Section R386-702-3, concerning reportable diseases; and

(e) comply with the Occupational Safety and Health Administration's Bloodborne Pathogen Standard.

R432-101-13. Patient Security.

(1) The facility shall provide sufficient internal and external security measures consistent with the Plan for Patient Care Services. There shall be positive supervision and control of the patient populations at all times to assure patient and public safety.

(2) If a facility offers more than one treatment program or serves more than one age group, patient population or

program, the patients shall not be mixed or be co-mingled.

(3) There shall be sufficient supervision to ensure a safe and secure living environment which is defined in the Plan for Patient Care Services.

R432-101-14. Special Treatment Procedures.

There shall be a hospital policy regarding the use of special treatment procedures. It shall include as a minimum:

(1) the use of seclusion, refer to R432-101-23;

(2) the use of restraint, refer to R432-101-23;

(3) the use of convulsive therapy including electroconvulsive therapy;

(4) the use of psychosurgery or other surgical procedures for the intervention or alteration of a mental, emotional or behavioral disorder;

(5) the use of behavior modification with painful stimuli;

(6) the use of unusual, investigational and experimental drugs;

(7) the use of drugs associated with abuse potential and those having substantial risk or undesirable side effects;

(8) an explanation as to whether the hospital will conduct research projects involving inconvenience or risk to the patient; and

(9) involuntary medication administration for emergent and ongoing treatment.

R432-101-15. Patients' Rights.

(1) Each patient shall be provided care and treatment in accordance with the standards and ethics accepted under Title 58 for licensed, registered or certified health care practitioners.

(2) There shall be a committee appointed by the administrator that consists of members of the facility staff, patients or family members, as appropriate, other qualified persons with knowledge of the treatment of mental illness, and at least one person who has no ownership or vested interest in the facility. This committee shall:

(a) review, monitor and make recommendations concerning individual treatment programs established to manage inappropriate behavior, and other programs that, in the opinion of the committee, involve risks to patient safety or restrictions of a patient's rights, or both;

(b) review, monitor and make recommendations concerning facility practices and policies as they relate to drug usage, restraints, seclusion and time out procedures, applications of painful or noxious stimuli, control of inappropriate behavior, protection of patient rights and any other area that the committee believes need to be addressed;

(c) keep minutes of all meetings and communicate the findings to the administrator for appropriate action;

(d) designate a person to act as a patient advocate, to be available to respond to questions and requests for assistance from the patients and to bring to the attention of the committee any issues or items of interest that concern the rights of the patients or their care and status;

(e) recommend written policies with regard to patient rights which are consistent with state law. Once adopted, these policies shall be posted in areas accessible to patients, and made available upon request to the patient, family, next of kin or the public.

(3) The individual treatment plan and clinical orders shall address the following rights to ensure patients are permitted communication with family, friends and others. Restrictions to these rights shall be reviewed by the Patient Rights or Ethics Committee. Limitations to the rights identified in R432-101-15(3)(a) through (d) may be established to protect the patient, other patients or staff or where prohibited by law.

(a) Each patient shall be permitted to send and receive unopened mail.

(b) Each patient shall be afforded reasonable access to a telephone to make and receive unmonitored telephone calls.

(c) Each patient shall be permitted to receive authorized visitors and to speak with them in private.

(d) Each patient shall be permitted to attend and participate in social, community and religious groups.

(e) Each patient shall be afforded the opportunity to voice grievances and recommend changes in policies and services to hospital staff and outside representatives of personal choice, free from restraint, interference, coercion, discrimination, or reprisal.

(f) Each patient shall be permitted to communicate via sealed mail with the Utah Department of Human Services, the Utah Department of Health, the Legal Center for the People with Disabilities, legal counsel and the courts. The patient shall be permitted to communicate with and to visit with legal counsel or clergy of choice or both.

(4) Each patient shall be afforded the opportunity to participate in the planning of his care and treatment. The patient's participation in the treatment planning shall be documented in the medical record.

(a) Each patient shall receive an explanation of treatment goals, methods, therapies, alternatives and associated costs.

(b) Each patient shall be able to refuse care and treatment, as permitted by law, including experimental research and any treatment that may result in irreversible conditions.

(c) Each patient shall be informed of his medical condition, upon request, unless medically contraindicated. If contraindicated, the circumstances must be documented in the patient record.

(d) Each patient shall be free from mental and physical abuse and free from chemical and physical restraints except as part of the authorized treatment program, or when necessary to protect the patient from injury to himself or to others.

(5) Each patient shall be afforded the opportunity to exercise all civil rights, including voting, unless the patient has been adjudicated incompetent and not restored to legal capacity.

(a) Patients shall not be required to perform services for the hospital that are not included for therapeutic purposes in the plans of care.

(b) Patients shall not be required to participate in publicity events, fund raising activities, movies or anything that would exploit the patients.

(c) Each patient shall be permitted to exercise religious beliefs and participate in religious worship services without being coerced or forced into engaging in any religious activity.

(d) Each patient shall be permitted to retain and use personal clothing and possessions as space permits, unless doing so would infringe upon rights of other patients or interfere with treatment.

(e) Each patient shall be permitted to manage personal financial affairs, or to be given at least a monthly accounting of financial transactions made on their behalf should the hospital accept a patient's written delegation of this responsibility.

R432-101-16. Emergency and Disaster.

(1) The hospital shall be responsible to assure the safety and well-being of patients.

(a) There must be provisions for the maintenance of a safe environment in the event of an emergency or disaster.

(b) An emergency or disaster may include to utility interruption, such as gas, water, sewer, fuel and electricity,

explosion, fire, earthquake, bomb threat, flood, windstorm, epidemic, and injury.

(2) The administrator or his designee shall be responsible for the development of a plan, coordinated with state and local emergency or disaster offices, to respond to emergencies or disasters.

(a) This plan shall be in writing and list the coordinating authorities by name and title.

(b) The plan shall be distributed or made available to all hospital staff to assure prompt and efficient implementation.

(c) The plan shall be reviewed and updated as necessary in coordination with local emergency or disaster management authorities. The plan shall be available for review by the Department.

(d) The administrator shall be in charge of operations during any significant emergency. If not on the premises, the administrator shall make every reasonable effort to get to the hospital to relieve subordinates and take charge of the situation.

(e) Disaster drills, in addition to fire drills, shall be held semiannually for all staff. Drills and staff response to drills shall be documented.

(f) The facility shall identify and post in a prominent location the name of the person in charge and names and telephone numbers of emergency medical personnel, agencies and appropriate communication and emergency transport systems.

(3) The hospital's emergency response procedures shall address the following:

(a) evacuation of occupants to a safe place within the hospital or to another location;

(b) delivery of essential care and services to hospital occupants by alternate means regardless of setting;

(c) delivery of essential care and services when additional persons are housed in the hospital during an emergency;

(d) delivery of essential care and services to hospital occupants when staff is reduced by an emergency;

(e) maintenance of safe ambient air temperatures within the hospital.

(i) Emergency heating must have the approval of the local fire department.

(ii) An ambient air temperature of 58 degrees F (14 degrees C) or lower may constitute a danger to the health and safety of the patients in the hospital. The person in charge shall take immediate and appropriate action.

(4) The hospital's emergency plan shall delineate shall include:

(a) the person or persons with decision-making authority for fiscal, medical, and personnel management;

(b) on-hand personnel, equipment, and supplies and how to acquire additional help, supplies, and equipment after an emergency or disaster;

(c) assignment of personnel to specific tasks during an emergency;

(d) methods of communicating with local emergency agencies, authorities, and other appropriate individuals;

(e) the individuals who shall be notified in an emergency in order of priority;

(f) method of transporting and evacuating patients and staff to other locations;

(g) conversion of hospital for emergency use.

(5) The facility shall schedule and hold at least one fire drill per shift per quarter. The facility shall document the date and time the drill was held, including a brief description of the event and participants. Documentation shall be maintained for review by the Department.

(a) There shall be a fire emergency evacuation plan, written in consultation with qualified fire safety personnel.

(b) A physical plant evacuation diagram delineating evacuation routes, location of fire alarm boxes and fire extinguishers, and emergency telephone numbers of the local fire department shall be posted in exit access ways throughout the hospital.

(c) The written plan shall include fire-containment procedures and how to use the hospital alarm systems and signals.

(d) The actual evacuation of patients during a drill is optional.

R432-101-17. Admission and Discharge.

(1) The hospital shall develop written admission, exclusion and discharge policies consistent with the Plan for Patient Care Services and the Utilization Review plan. These policies shall be available to the public upon request.

(2) The hospital shall make available to the public and each potential patient information regarding the various services provided, methods and therapies used by the hospital, and associated costs of such services.

(3) Admission criteria shall be clearly stated in writing in hospital policies.

(a) The facility shall assess and screen all potential patients prior to admission and admit a patient only if it determines that the facility is the least restrictive setting appropriate for their needs. The pre-screening process shall include an evaluation of the patient's past criminal and violent behavior.

(b) Patients shall be admitted for treatment and care only if the hospital is properly licensed for the treatment required and has the staff and resources to meet the medical, physical, and emotional needs of the patient.

(c) Patients shall be admitted by, and remain under the care of, a member of the medical staff. There shall be a written order for admission and care of the patient at the time of admission. A documented telephone order is acceptable.

(d) There shall be procedures to govern the referral of ineligible patients to alternate sources of treatment where possible.

(e) Involuntary commitment must be in accordance with Section 62A-5-312.

(f) All out of state adjudicated delinquent juveniles admitted to the hospital shall be processed and monitored through the appropriate Interstate Compact.

(4) The patient shall be discharged when the hospital is no longer able to meet the patient's identified needs, when care can be delivered in a less restrictive setting, or when the patient no longer needs care.

(a) There shall be an order for patient discharge by a member of the medical staff except as indicated in R432-101-17(4)(b) below.

(b) In cases of discharge against medical advice, AMA, the attending physician or qualified designee shall be contacted and the response documented in the patient record.

(c) Discharge planning shall be coordinated with the patient, family, and other parties or agencies who are able to meet the patient's needs.

(d) Upon discharge of a patient, all money and valuables of that patient which have been entrusted to the hospital shall be surrendered to the patient in exchange for a signed receipt.

R432-101-18. Transfer Agreements.

(1) The hospital shall maintain a written transfer agreement with one or more general acute hospitals to facilitate the placement of patients and transfer of essential patient information in case of medical emergency.

(2) Patients shall not be referred to another facility without prior contact with that facility.

R432-101-19. Pets in Hospitals.

(1) If a hospital chooses to allow pets in the facility, it shall develop a written policy in accordance with these rules and local ordinances.

(2) Household pets, such as dogs, cats, birds, fish, and hamsters, can be permitted only under the following conditions:

(a) pets must be clean and disease free;

(b) the immediate environment of pets must be kept clean;

(c) small pets such as birds and hamsters are kept in appropriate enclosures;

(d) pets not confined in enclosures must be hand held, under leash control, or under voice control;

(e) pets that are kept at the hospital or are frequent visitors shall have current vaccinations, including, but not limited to, rabies, as recommended by a designated licensed veterinarian.

(3) The hospital shall have written policies and procedures for pet care.

(a) The administrator or designee shall determine which pets may be brought into the hospital. Family members may bring a patient's pet to visit provided they have approval from the administrator and offer reasonable assurance that the pets are clean, disease free, and vaccinated as appropriate.

(b) Hospitals with birds shall have procedures which protect patients, staff, and visitors from psittacosis. Procedures should ensure minimum handling of droppings. Droppings shall be placed in a plastic bag for disposal.

(c) Hospitals with pets that are kept overnight shall have written policies and procedures for the care, feeding, and housing of such pets and for proper storage of pet food and supplies.

(4) Pets are not permitted in food preparation or storage areas. Pets shall not be permitted in any area where their presence would create a significant health or safety risk to others. Persons caring for any pets shall not have patient care or food handling responsibilities.

R432-101-20. Inpatient Services.

(1) Upon admission, a physician or qualified designee shall document the need for admission. A brief narrative of the patient's condition, including, the nurses admitting notes, temperature, pulse, respirations, blood pressure, and weight, shall be documented in the patient's record. The admission record shall be completed according to hospital policy.

(a) A physician or qualified designee shall make an assessment of each patient's physical health and a preliminary psychiatric assessment within 24 hours of admission. The history and physical exam shall include appropriate laboratory work-up, a determination of the type and extent of special examinations, tests, or evaluations needed, and when indicated, a thorough neurological exam.

(b) A psychiatrist or psychologist or qualified designee shall make an assessment of each patient's mental health within 24 hours of admission. A written emotional or behavioral assessment of each patient shall be entered in the patient's record.

(c) There shall be a written assessment of the patient's legal status to include but not be limited to:

(i) a history with information about competency, court commitment, prior criminal convictions, and any pending legal actions;

(ii) the urgency of the legal situation;

(iii) how the individual's legal situation may influence treatment.

(2) A written individual treatment plan shall be initiated for each patient upon admission and completed no later than 7 working days after admission. The individual treatment plan shall be based upon the information resulting from the assessment of patient needs, see R432-101-20(1).

(a) The individual treatment plan shall be part of the patient record and signed by the person responsible for the patient's care. Patient care shall be administered according to the individual treatment plan.

(b) Individual treatment plans must be reviewed on a weekly basis for the first three months, and thereafter at intervals determined by the treatment team but not to exceed every other month.

(c) The written individual treatment plan shall be based on a comprehensive functional assessment of each patient. When appropriate, the patient and family shall be invited to participate in the development and review of the individual treatment plan. Patient and family participation shall be documented.

(d) The individual treatment plan shall be available to all personnel who provide care for the patient.

(e) The Utah State Hospital is exempt from the R432-101-20(2) and R432-101-20(2)(b) time frames for initiating and reviewing the individual treatment plan. The Utah State Hospital shall initiate for each patient admitted an individual treatment plan within 14 days and shall review the plan on a monthly basis.

R432-101-21. Adolescent or Child Treatment Program.

(1) A hospital that admits adolescents or children for care and treatment shall have the organization, staff, and space to meet the specialized needs of this specific group of patients.

(a) Children shall be classified as age five to 12 and adolescents ages 13 - 18.

(b) If a child is considered for admission to an adolescent program, the facility shall assess and document that the child's developmental growth is appropriate for the adolescent program.

(c) Adolescent patients who reach their eighteenth birthday, the age of majority, may remain in the facility on the adolescent unit to complete the treatment program.

(2) A mental health professional with training in adolescent or child psychiatry, or adolescent or child psychology, as appropriate, shall be responsible for the treatment program.

(3) Adolescent or child nursing care shall be under the direction of a registered nurse qualified by training, experience, and ability to effectively direct the nursing staff. All nursing personnel shall have training in the special needs of adolescents or children.

(4) There must be educational provision for all patient's of school age who are in the hospital over one month.

(5) Adolescents may be admitted to an adult unit when specifically ordered by the attending member of the medical staff, but may not remain there more than three days unless the clinical director approves orders for the adolescent to remain on the adult unit.

(6) Specialized programs for children must be flexible enough to meet the needs of the children being served.

(a) There shall be a written statement of philosophy, purposes and program orientation including short and long term goals.

(b) The types of services provided and the characteristics of the child population being served shall also be included in the service's policy document. It shall be available to the public on request.

(c) There shall be a written description of the program's overall approach to family involvement in the care of the patient.

(d) There shall be a written policy regarding visiting and other forms of patient communication with family, friends

and significant others.

(e) There shall be a written plan of basic daily routines. It shall be available to all personnel and shall be revised as necessary.

(f) There shall be a written complaint process for children in clear and simple language that identifies an avenue to make a complaint without fear of retaliation.

(g) There shall be a comprehensive written guide of preventive, routine, and emergency medical care for all children in the program, including written policies and procedures on the use and administration of psychotropic and other medication.

(h) There shall be a complete health record for each child including:

(i) immunizations;

(ii) medications;

(iii) medical examination;

(iv) vision and dental examination, if indicated by the medical examination;

(v) a complete record of treatment for each specific illness or medical emergency.

(i) The use of emergency medication shall be specifically ordered by a physician or other person licensed to prescribe and be related to a documented medical need.

(j) In addition to the medical record requirements, the child's record shall contain:

(i) documents related to the referral of the child to the program;

(ii) documentation of the child's current parental custody status or legal guardianship status;

(iii) the child's court status, if applicable;

(iv) cumulative health records, where possible;

(v) education records and reports.

(k) The following standards apply to children's programs within a secure, locked treatment facility:

(i) There shall be a statement in the child's record identifying the specific security measures employed and demonstrating that these measures are necessary in order to provide appropriate services to the child.

(ii) There shall be evidence that the staff and the child are aware of the hospital's emergency procedures and the location of emergency exits.

(iii) If children are locked in their rooms during sleeping hours, there shall be a method to unlock the rooms simultaneously from a central point or upon activation of a fire alarm system.

(iv) There shall be a recreational program offering a wide variety of activities suited to the interests and abilities of the children in care.

R432-101-22. Residential Treatment Services.

(1) If offered, the residential treatment service shall be organized as a distinct part of the hospital service, either free-standing or as part of the licensed facility. Residential treatment services shall be under the direction of the medical director or designee.

(2) "Residential Treatment" means a 24-hour group living environment for four or more individuals unrelated to the owner or provider. Individuals are assisted in acquiring the social and behavioral skills necessary for living independently.

(3) The hospital administrator shall appoint a program manager responsible for the day-to-day operation and resident supervision.

(a) The program manager's responsibilities shall be clearly defined in the job description.

(b) Whenever the manager is absent, a substitute manager shall be appointed.

(4) Residential treatment staff shall have specialized training in the area of psychiatric treatment. Staff shall consist of:

(a) a licensed physician;

(b) a certified or licensed clinical social worker;

(c) a licensed psychologist;

(d) a licensed registered nurse; and

(e) unlicensed staff who are trained to work with psychiatric residents and who shall be supervised by a health care practitioner.

(5) Programs admitting children or adolescents shall ensure that their education is continued through grade 12.

(a) Curriculum shall be approved by the Utah Office of Education.

(b) Education services provided by the licensee must be accredited by the Utah State Board of Education or Board Northwest Association of School and Colleges.

(c) Teachers must be certified by the Utah State Board of Education. Certification in Special Education is required where clearly necessary to supervise or carry out educational curriculum.

(6) An individual treatment plan developed by an interdisciplinary team shall be initiated for each resident upon admission and a completed copy placed in the resident record within seven days.

(a) The treatment plan shall identify the resident's needs, as described by a comprehensive functional assessment.

(b) The resident, his responsible party (if available), and facility staff shall participate in the planning of treatment. The facility staff shall encourage the resident's attendance at interdisciplinary team meetings.

(c) The written treatment plan shall set forth goals and objectives stated in terms of desirable behavior that prescribes an integrated program of activities, therapies, and experiences necessary for the resident to reach the goals and objectives.

(7) The comprehensive functional assessment shall consider the resident's age and the implications for treatment. The assessment shall identify:

(a) the presenting problems and disabilities for admission and, where possible, their cause;

(b) specific individual strengths;

(c) special behavioral management needs;

(d) physical health status to include:

(i) a history and physical exam performed by a physician or nurse practitioner which includes appropriate laboratory work-up;

(ii) a determination of the type and extent of special examinations, tests or evaluations needed.

(e) alcohol and drug history;

(f) degree of psychological impairment and measures to be taken to relieve treatable diseases;

(g) the capacity for social interaction and habilitation and rehabilitation measures to be taken;

(h) the emotional or behavioral status based on an assessment of:

(i) a history of previous emotional or behavioral problems and treatment;

(ii) the resident's current level of emotional or behavioral functioning;

(iii) an evaluation by a psychiatrist, psychologist or qualified designee within 30-days prior to admission, or within 24 hours after admission.

(i) if indicated, psychological testing shall include intellectual and personality testing.

(8) The comprehensive assessment shall be amended to reflect any changes in the resident's condition.

(9) An individual treatment plan shall be implemented which provides services to improve the resident's condition which are offered in an environment that encompasses physical, interpersonal, cultural, therapeutic, rehabilitative,

and habilitative components.

(10) The resident shall be encouraged to participate in professionally developed and supervised activities, experiences or therapies in accordance with the individualized treatment plan.

(11) The provisions of R432-101-23. Physical Restraints, Seclusion, and Behavior Management shall apply.

R432-101-23. Physical Restraints, Seclusion, and Behavior Management.

(1) Physical restraints, including seclusion shall only be used to protect the patient from injury to himself or to others or to assist patients to attain and maintain optimum levels of physical and emotional functioning.

(2) Restraints shall not be used for the convenience of staff, for punishment or discipline, or as substitutes for direct patient care, activities, or other services.

(3) Each hospital shall develop written policies and procedures that will govern the use of physical restraints and seclusion. A major focus of these policies shall be to provide patient safety and ensure civil and patient rights.

(4) Policies shall incorporate and address at least the following:

(a) examples of the types of restraints and safety devices that are acceptable for use and possible patient conditions for which the restraint may be used;

(b) guidelines for periodic release and position change or exercise, with instructions for documentation of this action.

(5) Bed sheets or other linens shall not be used as restraints.

(6) Restraints shall not unduly hinder evacuation of the patient in the event of fire or other emergency.

(7) Physical restraints must be authorized by a member of the medical staff in writing every 24 hours. PRN orders for restraints are prohibited. If a physical restraint is used in behavior management, there must be an individualized behavior management program and an ongoing monitoring system to assure effectiveness of the treatment, see Subsection R432-101-4(2)(c).

(a) Use of restraints will be reviewed routinely in the patient care conference, as the order is renewed by the member of the medical staff, and on a day-to-day basis as care is delivered. This shall be considered an ongoing process, and documented in the patient's record.

(b) Use of physical restraints, including simple safety devices, may be used only if a specific hazard or need for restraint is present. The physician order must indicate the type of physical restraint or safety device to be used and the length of time to be used. A facility restraint policy may be developed addressing the above items and accepted by reference in the patient care plan.

(c) Physical restraints must be applied by properly trained staff, to ensure a minimum of discomfort, allowing sufficient body movement to ensure that circulation will not be impaired. No restraint shall be used or applied in such a manner as to cause injury or the potential for injury.

(d) Staff shall monitor and assess a patient who is restrained. The restraint shall be released or the patient's position changed at least every two hours, unless written justification is provided for why such restraint release is dangerous to the patient or others.

(e) Physical restraints may be used in an emergency, if there is an obvious threat to life or immediate safety, as follows:

(i) Verbal orders may be given by the physician to a licensed nurse by telephone.

(ii) A licensed health care professional, identified by policy, may initiate the use of a restraint; however, verbal or written approval from the physician must be obtained within one hour.

(iii) A verbal order must be signed by a physician within 24 hours.

(iv) Staff members shall document in the patient's record the circumstances necessitating emergency use of the restraint and the patient's response.

(8) Seclusion must be used in accordance with hospital policy and authorized by a member of the medical staff.

(a) If seclusion is used for behavior management, there must be an individualized behavior management program and an ongoing monitoring system to assure effectiveness of the treatment, see Subsection R432-101-4(2)(e).

(b) Use of seclusion shall be reviewed routinely in the patient care conference, as the order is renewed by the member of the medical staff, and on a day-to-day basis as care is delivered. This shall be considered an ongoing process. The patient shall be monitored for adverse effects. The evaluations and reviews shall be part of the patient record.

(9) Time out shall be used in accordance with hospital policy, but does not have to be authorized by a member of the medical staff for each use.

The use of time out shall be included in the patient care plan and documented in the patient record.

(10) Hospital policy must establish criteria for admission and retention of patients who require behavior management programs, and shall specify the data to be collected and the location of these data in the clinical record.

(a) The program must be developed by the interdisciplinary team. There must be an opportunity for involvement of the patient, next of kin or designated representative.

(b) A behavior management program must be approved for a patient by the team leader, as described by hospital policy.

(c) Behavior management programs must employ the least restrictive methods to produce the desired outcomes and incorporate a process to identify and reinforce desirable behavior. Consent for use of any behavior management program that employs aversive stimuli must be obtained from the patient, next of kin, or designated representative.

(d) The behavior management program shall be incorporated into the patient care plan.

(e) The behavior management program shall be reviewed routinely by the interdisciplinary team as the patient care conference is conducted, as the order is renewed by the member of the medical staff, and on a day-to-day basis as care is delivered. This shall be considered an ongoing process.

(f) Documentation in the patient's record shall include:

(g) a behavior baseline profile, including a description of the undesirable behavior, as well as a statement whether there is a known history of previous undesirable behaviors and prior treatment;

(i) conditions under which the behavior occurs;

(ii) interventions used and their results;

(iii) a behavior management program including specific measurable behavioral objectives, time frames, names, titles, and signature of the person responsible for conducting the program, and monitoring and evaluation methods;

(iv) summaries and dates of the evaluations and reviews by the interdisciplinary team.

R432-101-24. Involuntary Medication Administration.

(1) The facility shall adopt and implement a policy and procedure for patients who refuse a prescribed medication. The policy shall include the following:

(a) the facility staff shall document the refusal of medications in the individual care plan; and

(b) the interdisciplinary team shall review and assess the patient's refusal of medication, ensuring that the patient's

rights are protected.

(2) If the interdisciplinary team determines that the patient requires medication, as part of a behavior management program, or for emergency patient management, or for clinical treatment, and a physician or licensed practitioner orders the medication, then the facility staff shall document the physician's order in the individual treatment plan and administer the medication.

(3) If a patient is administered involuntary medications, the facility staff shall review the administration of medications in a patient care conference, each time the physician renews the medication order, and on a day-to-day basis as care is delivered.

(4) The facility staff shall evaluate and assess the patient for adverse side effects. The facility staff shall document the evaluation and assessment in the patient record.

R432-101-25. Outpatient Emergency Psychiatric Services.

(1) If the hospital offers outpatient emergency psychiatric services, the service shall be organized as a service specifically designated for this purpose and under the direction of the medical director or designee.

(a) Services shall be available 24 hours a day to persons presenting themselves for assistance.

(b) If the hospital chooses not to offer emergency outpatient psychiatric services, it shall have a written plan for referral of persons making inquiry regarding such services or presenting themselves for assistance.

(2) The outpatient service shall be supported by policies and procedures including admission, and treatment procedures, and medical and psychiatric reference materials.

(3) Involuntary detention of a person must be according to applicable hospital policy and Utah Law.

R432-101-26. Emergency Services.

(1) Each facility shall provide physician and registered nurse coverage 24 hours per day. Nursing and other allied health professional staff shall be readily available in the hospital. Staff may have collateral duties elsewhere in the hospital, but must be able to respond when needed without adversely affecting patient care or treatment elsewhere in the hospital.

(2) The facility shall have trained staff to triage emergency care for each patient, staff and visitor, to stabilize the presenting condition, and transfer to an appropriately licensed facility.

(3) The facility must have an emergency area which includes a treatment room, storage for supplies and equipment, provisions for reception and control of patients, convenient patient toilet room, and communication hookup and access to a poison control center.

(4) If the hospital offers additional or expanded emergency services, the service must comply with the provisions of the appropriate sections of R432-100-17.

(5) The hospital shall have protocols for contacting local emergency medical services.

R432-101-27. Clinical Services.

(1) If the following services are used, R432-100 shall apply:

(a) Surgical Services, R432-100-15.

(b) Critical Care Unit, R432-100-14.

(c) Inpatient Hospice, R432-750.

(2) If chemical dependency or substance abuse services are provided, the R432-102 Specialty Hospital - Chemical Dependency/Substance Abuse Rules apply.

R432-101-28. Laboratory.

(1) Each specialty hospital must have a CLIA certificate. If an outside lab is contracted for providing services, the outside lab shall have a CLIA certificate.

(2) If outside laboratory services are secured through contract, the hospital must maintain an in-house ability to collect, preserve and arrange for delivery to the outside laboratory for testing. If additional laboratory services are provided, the hospital must comply with the appropriate sections of R432-100-23.

R432-101-29. Pharmacy.

(1) Each specialty hospital must have the ability to provide in house certain basic services, such as storage, dispensing, and administration of medication.

(2) All pharmacy services must comply with the appropriate sections of R432-100-25.

(3) The facility must have a policy approved by the board and the medical staff on the use of investigational drugs.

R432-101-30. Social Services.

(1) The facility shall provide social services to assist staff, patients, and patients' families to understand and cope with a patient's social, emotional, and related health problems.

(a) Social services shall be under the direction of a licensed clinical social worker. The role and function of social services shall be listed in policy documents and meet generally accepted practices of Mental Health Professional Practice Act.

(b) Social services personnel shall serve as a patient advocate to:

(i) provide services to maximize each patient's ability to adjust to the social and emotional aspects of his situation, treatments, and continued stay in the hospital;

(ii) participate in ongoing discharge planning to assure continuity of care for the patient;

(iii) initiate referrals to official agencies when the patient needs legal or financial assistance;

(iv) maintain appropriate liaison with the family or other responsible persons concerning the patient's placement and rights;

(v) preserve the dignity and rights of each patient.

(2) Each hospital shall develop social services policies and procedures which include at least the following:

(a) a system to identify, plan, and provide services according to the social and emotional needs of patients;

(b) job descriptions, including title and qualifications of all persons who provide social services;

(c) a method to refer patients to outside social services agencies when the hospital is unable to resolve a patient's problems.

(3) The Social Service director shall participate in any pertinent quality assurance activities of the hospital.

R432-101-31. Activity Therapy.

(1) The hospital shall provide activity therapy services to meet the physical, social, cultural, recreational, health maintenance and rehabilitational needs of patients as defined in the patient care plan.

(a) The activity therapy service shall have policies that describe the organization of the service and provision for services to the patient population.

(i) Program goals and objectives shall be stated in writing.

(ii) Appropriate activities shall be provided to patients during the day, in the evening, and on the weekend.

(iii) Patient participation in planning shall be sought, whenever possible.

(iv) Activity schedules shall be posted in places

accessible to patients and staff.

(b) Activity therapy shall be incorporated into the patient care plan.

(c) Patients shall be permitted leisure time and encouraged to use it in a way that fulfills their cultural and recreational interests and their feelings of human dignity.

(2) The activity therapy service shall be supervised by an individual.

(3) The facility shall provide sufficient space, equipment, and facilities to meet the needs of the patients. Space, equipment, and facilities shall meet federal, state and local requirements for safety, fire prevention, health, and sanitation.

R432-101-32. Other Services.

If the following services are provided, R432-100 shall apply:

(a) Anesthesia Services, R432-100-16.

(b) Rehabilitation Therapy Services, R432-100-21.

(c) Radiology, R432-100-22.

(d) Respiratory Care Services, R432-100-20.

R432-101-33. Medical Records.

(1) The hospital shall comply with the provisions of R432-100-34.

(2) Contents of the patient record shall describe a patient's physical, social and mental health status at the time of admission, the services provided, the progress made, and a patient's physical, social and mental health status at the time of discharge.

(a) The patient record identification data recorded on standardized forms shall include the patient's name, home address, date of birth, sex, next of kin, marital status, and date of admission.

(b) The patient record shall include:

(i) involuntary commitment status, including relevant legal documents;

(ii) date the information was gathered, and names and signatures of the staff members gathering the information.

(c) The patient record shall contain pertinent information on the course of treatment to include:

(i) signed orders by physicians and other authorized practitioners for medications and treatments;

(ii) relevant physical examination, medical history, and physical and mental diagnoses using a recognized diagnostic coding system;

(iii) information on any unusual occurrences, such as treatment complications, accidents, or injuries to or inflicted by the patient, and procedures that place the patient at risk;

(iv) documentation of patient and family involvement in the treatment program;

(v) progress notes written by the psychiatrist, psychologist, social worker, nurse, and others significantly involved in active treatment;

(vi) temperature, pulse, respirations, blood pressure, height, and weight notations, when indicated;

(vii) reports of laboratory, radiologic, or other diagnostic procedures, and reports of medical or surgical procedures when performed;

(viii) correspondence with signed and dated notations of telephone calls concerning the patient's treatment;

(ix) a written plan for discharge including an assessment of patient needs;

(x) documentation of any instance in which the patient was absent from the hospital without permission;

(xi) the patient care plan.

(d) There shall be a discharge summary signed by the attending member of the medical staff and entered into the patient record within 30 calendar days from the date of discharge. In the event a patient dies, the discharge statement shall include a summary of events leading to the death.

(e) The patient record shall contain evidence of informed consent or the reason it is unattainable.

(f) The patient record shall contain consent for release of information, the actual date the information was released, and the signature of the staff member who released the information. The patient shall be informed of the release of information as soon as possible.

(g) The hospital may release pertinent information to personnel responsible for the individual's care without the patient's consent under the following circumstances:

(i) in a life-threatening situation;

(ii) when an individual's condition or situation precludes obtaining written consent for release of information;

(iii) when obtaining written consent for release of information would cause an excessive delay in delivering essential treatment to the individual.

R432-101-34. Ancillary Services.

If the following services are used, R432-100 shall apply:

(1) Central Supply, R432-100-35.

(2) Dietary, R432-100-32.

(3) Laundry, R432-100-36.

(4) Maintenance Services, R432-100-38.

(5) Housekeeping, R432-100-37.

R432-101-35. Partial Hospitalization Services.

(1) If the hospital offers a partial hospitalization program, the following services may be included:

(a) crisis stabilization or the provision of intensive, short-term daily programming which averts psychiatric hospitalization or offers transitional treatment back into community life in order to shorten an episode of acute inpatient care; and

(b) intermediate term treatment which provides more extended, daily, goal directed clinical services for a population at high risk for hospitalization or readmission due to the serious or persistent nature of their psychiatric, emotional behavioral, or addictive disorder.

(2) If the specialty hospital offers partial hospitalization services, the hospital shall establish policies and procedures to address the following:

(a) Criteria for admission indicating a DSM IV Mental or Nervous condition;

(b) Assessment;

(c) Treatment Planning;

(d) Active treatment;

(e) Coordination of Care; and

(f) Discharge criteria.

R432-101-36. Penalties.

Any person who violates any provision of this rule may be subject to the penalties enumerated in 26-21-11 and R432-3-7 and be punished for violation of a class A misdemeanor as provided in 26-21-16.

R432. Health, Family Health and Preparedness, Licensing.
R432-104. Specialty Hospital - Long-Term Acute Care.
R432-104-1. Legal Authority.

This rule is adopted pursuant to Title 26, Chapter 21.

R432-104-2. Purpose.

The purpose of this rule is to promote the public health and welfare through the establishment and enforcement of program standards for the operation of long-term acute care (LTAC) hospitals.

R432-104-3. License.

(1) To be licensed as an LTAC hospital, the facility shall:

(a) Have a duly constituted governing body with overall administrative and professional responsibility;

(b) Have an organized medical staff which provides 24-hour inpatient care;

(c) Have a chief executive officer to whom the governing body delegates the responsibility for the operation of the hospital;

(d) Maintain at least one nursing unit containing patient rooms, patient care spaces, and service spaces defined in construction rules R432-10-4;

(e) Each nursing unit shall contain at least six patient beds;

(f) Rooms and spaces comprising each nursing unit shall be organized in a contiguous arrangement.

(g) Maintain current and complete medical records.

(h) Provide continuous registered nurse supervision and other nursing services;

(i) Provide in house the following basic services:

(i) Pharmacy;

(ii) Laboratory;

(iii) Nursing services;

(iv) Occupational, Physical, Respiratory and Speech therapies;

(v) Dietary;

(vi) Social Services; and

(vii) Specialized Diagnosis and therapeutic services.

(2) The LTAC hospital shall provide on site all basic service required of a general hospitals that are needed for the diagnosis, therapy, and treatment offered or required by all patients admitted to the hospital.

R432-104-4. General Design Requirements.

(1) See R432-10, Long-Term Acute Care Hospital Construction Rules.

(2) The LTAC hospital may be located within an existing licensed health care facility or be freestanding.

R432-104-5. Hospital located within an Acute Care Hospital.

(1) If an LTAC is located within a licensed acute care hospital, it must:

(a) have a separate governing body, chief executive officer, chief medical officer, and medical staff from the co-located hospital;

(b) perform basic functions independently from the host hospital;

(c) incur not more than 15 per cent of its total inpatient operating costs for items and services supplied by the host hospital;

(d) admit 75 per cent of patients from other sources than the host hospital;

(e) maintain admission and discharge records separately from those of the hospital in which it is co-located;

(f) not commingle beds with beds in which it is located; and

(g) be serviced by the same Medicare fiscal intermediary as the hospital of which it is a part.

R432-104-6. Organization and Staff.

(1) The following services and policies shall comply with R432-100.

(a) Governing Body, R432-100-5.

(b) Administrator, R432-100-6.

(c) Medical and Professional Staff, R432-100-7.

(d) Nursing Care Services, R432-100-12.

(e) Personnel Management Services, R432-100-8.

(f) Infection Control, R432-100-10.

(g) Quality Improvement Plan, R432-100-9.

(h) Patient Rights, R432-100-11.

R432-104-7. Admission and Discharge Policy.

(1) An LTAC shall implement as an admission policy an average inpatient length of stay greater than 25 days and which complies with R432-104-7(2).

(2) Patients who have one or more of the following conditions may be admitted to an LTAC:

(a) the patient is medically unstable due to chronic or long-term illness and requires a weekly physician visit; or

(b) the patient requires dangerous drug therapy, continuous use of a respirator or ventilator, or suctioning or nasopharyngeal aspiration at least once per nursing shift.

(c) the patient requires skilled nursing services and care which requires a registered nurse present for care 24 hours per day for at least three of the following treatments at the specified frequency;

(i) extensive dressings for deep decubiti, surgical wounds, or vascular ulcers daily;

(ii) isolation for infectious disease 24 hours per day;

(iii) suctioning three days per week;

(iv) occupational therapy, physical therapy, or speech therapy five days a week;

(v) respiratory therapy;

(vi) special ostomy care daily;

(vii) oxygen daily;

(viii) traction; or

(ix) catheter or wound irrigation daily.

(3) Within 24 hours of admission the attending physician shall document:

(i) The patient's current medical and respiratory status, including pertinent clinical parameters;

(ii) Treatment plan and goals;

(iii) Estimated length of stay; and

(iv) Anticipated discharge plan.

(4) The LTAC shall discharge the patient from the facility if:

(a) the physician documents that the patient:

(i) requires additional intense services in an acute hospital;

(ii) exhibits no evidence of progress towards current, documented goals over an eight-week period and a medically appropriate alternative for discharge exists; or

(iii) has met documented goals established at or modified following admission and medically appropriate alternatives for discharge exist; or

(b) the patient or care giver exhibit ability to care for the patient's physical needs.

R432-104-8. Clinical Services.

(1) The following services shall be provided in-house and comply with R432-100.

(a) Pharmacy Service, R432-100-25.

(b) Laboratory Service, R432-100-23.

(c) Rehabilitation Therapy Services, R432-100-21.

(d) Dietary Service, R432-100-32.
(e) Social Services, R432-100-26.
(2) Occupational Therapy Services shall be available for all patients who require the service.
(a) The occupational therapy services shall be directed by a licensed occupational therapist who shall have administrative responsibility for the occupational therapy department.
(b) Staff occupational therapists shall be licensed by the Utah Department of Commerce Title 58, Chapter 42.
(i) If Occupational Therapy Assistants are employed to provide patient services they shall be supervised by a licensed therapist.
(ii) Patient services shall be commensurate with each person's documented training and experience.
(c) Occupational Therapy services shall be initiated by an order from the medical staff.
(d) Written policies and procedures shall be developed and approved in conjunction with the medical staff to include:
(i) Methods of referral for services;
(ii) Scope of services to be provided;
(iii) Responsibilities of professional therapists;
(iv) Admission and discharge criteria for treatment;
(v) infection control;
(vi) safety;
(vii) individual treatment plans, objectives, clinical documentation and assessment;
(viii) incident reporting system; and
(ix) emergency procedures.
(e) Equipment shall be calibrated to manufacturer's specifications.
(f) There shall be a written individual treatment plan for each patient appropriate to the diagnoses and condition.
(g) The Occupational Therapy department shall organize and participate in continuing education programs.
(3) Speech Therapy services shall be available for all patients who require the service.
(a) The Speech-Pathology language services shall be directed by a licensed Speech-Pathologist or Audiologist who shall have administrative responsibility for the Speech-Audiology therapy department.
(b) Staff speech therapist and audiologist shall be licensed the Utah Department of Commerce, see Title 58, Chapter 41.
(i) If Speech-language pathology aides or audiology aides are employed to provide patient services they shall be supervised by a licensed therapist.
(ii) Patient services shall be commensurate with each person's documented training and experience.
(c) Speech and Audiology services shall be initiated by an order from the medical staff.
(d) Written policies and procedures shall be developed and approved in conjunction with the medical staff to include:
(i) Methods of referral for services;
(ii) Scope of services to be provided;
(iii) Responsibilities of professional therapists;
(iv) Admission and discharge criteria for treatment;
(v) Infection control;
(vi) Assistive Technology;
(vii) Individual treatment plans, objectives, clinical documentation and assessment;
(viii) Incident reporting system; and
(ix) Emergency procedures.
(e) Equipment shall be calibrated to manufacturer's specifications.
(f) There shall be a written individual treatment plan for each patient appropriate to the diagnoses and condition.
(g) The Department shall organize and participate in continuing education programs.
(4) Respiratory Care Services shall comply with R432-100-19.

R432-104-9. Emergency Services.
(1) Each specialty hospital shall have the ability to provide emergency first aid treatment to patients, staff, and visitors and to persons who may be unaware of or unable to immediately reach services in other facilities.
(2) Provisions for services shall include:
(a) Treatment room;
(b) Storage for supplies;
(c) reception area and control of walk-in traffic;
(d) Patient toilet room;
(e) Telephone service in order to call the poison control center;
(f) Staff available in the facility to respond in case of an emergency.
(3) Each hospital shall have available an automated external defibrillator unit and at least one staff on duty who is competent on its use.

R432-104-10. Complementary Services.
(1) If the following services are provided in-house, they shall comply with R432-100.
(a) Radiology Services, R432-100-22.
(b) Outpatient Services, R432-100-29.
(c) Pediatric Services, R432-100-19.
(d) Surgical Services, R432-100-15.

R432-104-11. Ancillary Services.
(1) The following services shall be provided in-house and shall comply with R432-100.
(a) Central Supply, R432-100-35.
(b) Laundry, R432-100-36.
(c) Medical Records, R432-100-34.
(d) Maintenance, R432-100-38.
(e) Housekeeping, R432-100-37.
(f) Emergency and Disaster Plans, R432-100-39.

R432-104-12. Penalties.
Any person who violates any provision of this rule may be subject to the penalties enumerated in 26-21-11 and R432-3-7 and be punished for violation of a class A misdemeanor as provided in 26-21-16.

KEY: health care facilities
August 3, 2016 26-21-5
Notice of Continuation November 9, 2015 26-21-2.1
26-21-20

R432. Health, Family Health and Preparedness, Licensing.
R432-550. Birthing Centers.
R432-550-1. Legal Authority.

This rule is adopted pursuant to Title 26, Chapter 21.

R432-550-2. Purpose.

This rule provides health and safety standards for the organization, physical plant, maintenance and operation of birthing centers.

(1) Birthing centers shall consist of one to five birth rooms. Licensure is not required for birthing centers with only one birth room.

(2) Birthing centers provide quality care and services in a pleasing and safe environment to a select low risk population of healthy maternal patients who choose a safe and cost-effective alternative to the traditional hospital childbirth experience.

(3) Birthing center clinical staff assess the maternal patient's risk for obstetric complications through careful review of the patient's records for prenatal screening of potential problems.

(4) Birthing centers recognize the individual needs of, and provide service to, low risk maternal patients expected to have an uncomplicated labor and delivery.

R432-550-3. Time for Compliance.

Facilities governed by these rules shall be in full compliance with these rules at the time of licensure.

R432-550-4. Definitions.

(1) Common definitions R432-1-3.

(2) Special Definitions:

(a) "Birth room" means a room and environment designed, equipped and arranged to provide for the care of a maternal patient and newborn and to accommodate a maternal patient's support person during the process of vaginal birth and recovery. "Birth room" does not include rooms intended for pre-admittance or post-discharge accommodations of maternal patients and their newborns.

(b) "Birthing center" means a freestanding facility, receiving maternal patients and providing care during labor, delivery and immediately after delivery.

(c) "Patient" means a woman or newborn receiving care and services provided by a birthing center during labor, childbirth and recovery.

(d) "Clinical staff" means a licensed maternity care practitioner appointed by the governing authority to practice within the birthing center and governed by rules approved by the governing body.

(e) "Support person" means the individual or individuals selected or chosen by a patient to provide emotional support and to assist her during the process of labor and childbirth.

(f) "Vaginal birth" means the three stages of labor.

(g) "Licensed maternity care practitioner" means a person licensed to provide maternity care services including physicians licensed under Title 58, Chapters 67 and 68, Certified Nurse-Midwives licensed under Title 58, Chapter 44a, Naturopathic Physicians licensed under Title 58, Chapter 71, Licensed Direct-Entry Midwives licensed under Title 58, chapter 77, and others licensed to provide maternity, midwifery, or obstetric care under Title 58.

R432-550-5. General Construction Rules.

See R432-14 Birthing Center Construction Rules.

R432-550-6. Governing Body.

(1) The licensee shall appoint in writing an individual or group to constitute the facility's governing body. The governing body shall:

(a) comply with federal, state and local laws, rules and regulations;

(b) adopt written policies and procedures which describe the functions and services of the birthing center and protect patient rights;

(c) adopt a policy prohibiting discrimination because of race, color, sex, religion, ancestry, or national origin in accordance with Title 13, Chapter 7, Sections 1 through 4.

(d) develop an organizational structure establishing lines of authority and responsibility;

(e) when the governing body is more than one individual, conduct meetings in accordance with facility policy, but at least annually, and maintain written minutes of the meetings;

(f) appoint by name and in writing a qualified administrator;

(g) appoint by name and in writing a qualified director of the clinical staff;

(h) appoint members of the clinical staff and delineate their clinical privileges;

(i) review and approve at least annually a quality assurance program for birthing center operation and patient care provided.

(j) establish a system for financial management and accountability;

(k) provide for resources and equipment to provide a safe working environment for personnel;

(l) act on findings and recommendations of facility-created committees relevant to compliance with these birthing center rules;

(m) ensure that facility patient admission eligibility criteria are strictly applied by clinical staff and are evaluated through quality assurance review in accordance with R432-550-11.

(2) Written policies and procedures shall:

(a) clearly, accurately and comprehensively define the methods by which the facility will be operated to protect the health and safety of patients;

(b) provide for meeting the patient's needs;

(c) provide for continuous compliance with federal, state and local laws, rules and regulations.

(d) Written policies and procedures shall include:

(i) defining the term "low risk maternal patient" which shall include eligibility criteria for birth services offered in the birthing center;

(ii) defining specific criteria, which shall in normally anticipated circumstances render a maternal patient ineligible for birth services or continued care at the birthing center;

(iii) identifying and outlining methods for transferring patients who, during the course of labor or recovery, are determined to be ineligible for birthing center services or continued care at the birthing center, including;

(A) information required for proper care and treatment of the individual(s) transferred, including patient records; and

(B) security and accountability of the personal effects of the individual being transferred.

(iv) planning for consultation, back-up services, transfer and transport of a newborn and maternal patient to a hospital where necessary care is available;

(v) documenting the maternal patient has been informed of the eligibility requirements of an out-of-hospital birthing center labor and birth;

(vi) providing instructions in postpartum and newborn care to the patient and any other family or support person designated by the patient;

(vii) registering birth, fetal death or death certificates in accordance with Title 26, Chapter 2, Sections 5, 13, 14, 23 and rules promulgated pursuant thereto in R436.

(viii) prescribing and instilling a prophylactic solution approved by the Department of Health in the eyes of the newborn in accordance with R386-702-8, Special Measures for the Control of Ophthalmia Neonatorum;

(ix) performing phenylketonuria (PKU) and other disease tests in accordance with Department of Health Laboratory rules developed pursuant to Section 6;

(x) verifying prenatal laboratory screening to include:

(A) blood type and Rh Factor and provision for appropriate use of Rh immunoglobulin;

(B) hematocrit or hemoglobin;

(C) antibody screen;

(D) rubella; and

(E) syphilis;

(xi) providing for infection control to include:

(A) housekeeping;

(B) cleaning, sterilization, sanitization and storage of supplies and equipment; and

(C) prevention of transmission of infection in personnel, patients and visitors.

R432-550-7. Administrator.

(1) Direction.

(a) The administrator shall be responsible for the overall management and operation of the birthing center.

(b) The administrator shall designate in writing a competent employee to act as administrator in the temporary absence of the administrator.

(c) The administrator's designee shall have authority and responsibility to:

(i) act in the best interests of patient safety and well-being;

(ii) operate the facility in a manner which ensures compliance with these birthing center rules.

(2) Qualifications.

The administrator and administrator's designee shall be knowledgeable:

(a) by education, training or experience in administration and supervision of personnel and qualified as required by facility policy;

(b) in birthing center protocols;

(c) in applicable federal, state and local laws, rules and regulations.

(3) The administrator's responsibilities shall be included in a written job description available for Department review. The administrator shall:

(a) complete, submit and file records and reports required by the Department;

(b) develop and implement facility policies and procedures;

(c) review facility policies and procedures at least annually and report to the governing body on the review;

(d) employ or contract with competent personnel whose qualifications are commensurate with job responsibilities and authority and who have the appropriate Utah license or certificate of completion;

(e) develop, for all employee positions, job descriptions that delineate functional responsibilities and authority; and

(f) review and act on incident or accident reports.

R432-550-8. Clinical Director.

(1) The clinical director shall be responsible for implementing, coordinating and assuring the quality of patient care services.

(2) The clinical director shall:

(a) be currently licensed to practice medicine or midwifery in Utah;

(b) have training and expertise in obstetric and newborn services offered to ensure adequate supervision of patient care services.

(3) The clinical director's responsibilities shall be included in a written job description available for Department review. The clinical director shall:

(a) review and update facility protocols;

(b) review and evaluate clinical staff privileges and revise them as necessary;

(c) recommend, to the governing body, names of qualified licensed health care practitioners to perform approved procedures and the corresponding clinical staff privileges to be granted;

(d) coordinate, direct and evaluate clinical operations of the facility;

(e) evaluate and recommend to the administrator the type and amount of equipment needed in the facility;

(f) ensure that qualified staff are on the premises while patients are admitted to the facility;

(g) ensure clinical staff documentation is recorded immediately and reflects a description of care given;

(h) ensure that planned birthing center services are within the scope of privileges granted to the clinical staff; and

(i) recommend to the administrator appropriate remedial action and disciplinary action, when necessary, to correct violations of clinical protocols.

R432-550-9. Personnel.

(1) The administrator shall employ a sufficient number of qualified professional and support staff who are competent to perform their respective duties, services and functions.

(2) The facility shall maintain written personnel policies and procedures which shall be available to personnel and shall address the following:

(a) content of personnel records;

(b) job descriptions, qualifications and validation of licensure or certificates of completion as appropriate for the position held;

(c) conditions of employment; and

(d) management of employees.

(3) The facility shall maintain personnel records for employees and shall retain personnel records for terminated employees for a minimum of one year following termination of employment.

(4) The facility shall establish a personnel health program through written personnel health policies and procedures which shall protect the health and safety of personnel and patients commensurate with the services offered.

(5) An employee placement health evaluation shall include at a health inventory which shall be completed when an employee is hired. The health inventory shall obtain the employee's history of the following:

(a) conditions that predispose the employee to acquiring or transmitting infectious diseases; and

(b) conditions which may prevent the employee from performing certain assigned duties satisfactorily.

(6) Employee health screening and immunization components of personnel health programs shall be developed in accordance with R386-702, Code of Communicable Disease Rules.

(7) Employee skin testing by the Mantoux method or other FDA approved in-vitro serologic test and follow-up for tuberculosis shall be done in accordance with R388-804, Special Measures for the Control of Tuberculosis.

(a) The licensee shall ensure that all employees are skin-tested for tuberculosis within two weeks of:

(i) initial hiring;

(ii) suspected exposure to a person with active tuberculosis; and

(iii) development of symptoms of tuberculosis.

(b) Skin testing shall be exempted for all employees with known positive reaction to skin tests.

(8) The birthing center personnel must receive documented orientation to the facility and the job for which they are hired.

(9) The birthing center personnel must receive documented ongoing in-service training to include:

(a) an annual review of facility policies and procedures; and

(b) infection control, personal hygiene and each employee's responsibility in the personnel health program.

(10) The birthing center Personnel shall have access to the facility's policy and procedure manuals when on duty.

(11) Personnel shall maintain current licensing, certification or registration appropriate for the work performed and as required by the Utah Department of Commerce.

(a) Personnel shall provide evidence of current licensure, registration or certification to the Department upon request.

(b) Failure to ensure personnel are licensed, certified or registered may result in sanctions to the facility license.

R432-550-10. Contracts.

(1) The licensee shall provide a written contract for any birthing center services that are not provided directly by the facility. The licensee shall ensure that the contracted entity:

(a) performs according to facility policies and procedures;

(b) conforms to standards required by laws, rules and regulations;

(c) provides services that meet professional standards and are timely.

(2) Contracts shall be available for Department review.

R432-550-11. Quality Assurance.

(1) The administrator shall establish a quality assurance committee and program. This committee shall review regularly clinic operations, protocols, policies and procedures, incident reports, infection control, patient care policies and safety.

(2) The quality assurance committee shall initiate action to resolve identified quality assurance problems by filing a written report of findings and recommendations with the licensee.

(3) The quality assurance committee shall meet as prescribed in facility policy or at least quarterly and shall keep written minutes available for department review.

(4) The quality assurance program shall include surveillance, prevention and control of infection.

R432-550-12. Emergency and Disaster.

(1) The facility shall assure the safety and well-being of patients in the event of an emergency or disaster. An emergency or disaster may include but is not limited to interruption of public utilities, explosion, fire, earthquake, bomb threat, flood, windstorm, epidemic and injury.

(2) The administrator shall educate, train and drill staff to respond appropriately in an emergency in accordance with NFPA 101, Life Safety Code.

(3) The administrator shall be responsible for the development of an emergency and disaster plan, coordinated with state and local emergency or disaster authorities, to respond to emergencies and disasters as appropriate. The plan shall:

(a) be in writing and personnel shall have ready access when on duty;

(b) be reviewed and updated at least annually by the administrator and the licensee; and

(c) address evacuation of occupants to a safe place within the facility or to another location.

(4) The facility must maintain safe ambient air temperatures within the facility.

(a) Emergency heating must have the approval of the local fire department.

(b) The facility shall have, and be capable of implementing contingency plans regarding excessively high or low ambient air temperatures within the facility that may affect the health and safety of the patients.

R432-550-13. Patients' Rights.

(1) Written patients' rights shall be established and made available to the patient as determined by facility policy which shall include the following:

(a) to be fully informed, prior to or at the time of admission, and during stay, of these rights and of facility rules that pertain to the patient;

(b) to be fully informed, prior to admission, of the treatment to be received, potential complications and expected outcomes;

(c) to refuse treatment to the extent permitted by law and to be informed of the medical consequences of such refusal;

(d) to be informed, prior to or at the time of admission and during stay, of services available in the facility and of any expected charges for which the patient may be liable;

(e) to be afforded the opportunity to participate in decisions involving personal health care, except when contraindicated;

(f) to refuse to participate in experimental research;

(g) to be ensured confidential treatment of personal and medical records and to approve or refuse release to any individual outside the facility, except in the case of transfer to another health facility, or as required by law or third party payment contract;

(h) to be treated with consideration, respect and full recognition of personal dignity and individuality, including privacy in treatment and in care for personal needs.

R432-550-14. Clinical Staff and Personnel.

(1) Information identifying current clinical staff and on-call and emergency telephone numbers shall be readily available to birthing center personnel.

(2) Clinical staff and licensed personnel of the birthing center shall be trained in emergency and resuscitation measures for infants and adults, including but not limited to, cardiopulmonary resuscitation certification through an American Heart Association or American Red Cross approved course.

(3) A licensed maternity care practitioner shall be present at each birth and remain until the maternal patient and newborn are stable postpartum.

(4) A second member of the birthing center staff who is licensed or certified to give cardiopulmonary resuscitation shall be present at each birth.

(5) Clinical staff, licensed personnel and support staff shall be provided to meet patients' needs, to ensure patients' safety and to ensure that patients in active labor are attended.

R432-550-15. Clinical Staff.

(1) The attending member of the clinical staff shall ensure the supervision of, and quality of, care delivered to the patient admitted to the facility.

(2) Each patient shall be under the care of a member of the clinical staff.

(3) Clinical staff members shall comply with applicable professional practice laws and written birthing center protocols approved by the clinical director.

(4) The attending member of the clinical staff shall verify in writing that the patient conforms to facility eligibility criteria.

(5) The attending member of the clinical staff shall decide when transfer of a patient to a hospital is necessary and document in writing the conditions warranting the decision.

R432-550-16. Equipment and Supplies.

(1) The administrator shall provide necessary equipment in good working order to meet the patient's needs.

(2) The type and amount of equipment shall be indicated in facility policy and approved by the clinical director.

(3) An emergency cart or tray equipped to allow completion of emergency procedures defined by facility policy shall be readily available.

(a) The facility shall safely store the emergency cart or tray in a designated area that is accessible to authorized personnel.

(b) The facility shall maintain a written log of all upkeep of the emergency cart or tray.

(4) The inventory of supplies shall be sufficient to care for the number of patients registered for care.

(5) Properly maintained equipment and supplies for the maternal patient and the newborn shall include at least the following:

(a) furnishings suitable for labor, birth and recovery;

(b) oxygen with flow meters and masks or equivalent;

(c) bulb suction;

(d) resuscitation equipment to include resuscitation bags, laryngeal mask airways and oral airways;

(e) firm surfaces suitable for use in resuscitating patients;

(f) emergency medications and related supplies and equipment;

(g) fetal monitoring equipment, minimally to include a fetoscope or doppler;

(h) equipment to monitor and maintain the optimum body temperature of the newborn;

(i) a clock indicating hours, minutes and seconds;

(j) sterile suturing equipment and supplies;

(k) adjustable examination light;

(l) infant scale;

(m) a telephone or equivalent two-way communication device capable of reaching other facilities or emergency agencies; and

(n) a delivery log for recording birth data.

R432-550-17. Medications.

(1) Licensed personnel shall prescribe, order and administer medication in accordance with applicable professional practice acts, pharmacy and controlled substances laws.

R432-550-18. Anesthesia Services.

(1) The birthing center shall provide facilities and equipment for the provision of anesthesia services commensurate with the obstetric procedures planned for the facility.

(2) The clinical director shall ensure the safety of anesthesia services administered to patients by clinical staff through written policies and protocols approved by the clinical staff for anesthetic agents, delivery of anesthesia and potential hazards of anesthesia.

(3) A clinical staff member shall monitor patients who receive anesthesia or analgesics.

R432-550-19. Laboratory Services.

(1) The birthing center shall provide direct or contract laboratory and associated services according to facility policy and to meet the needs of patients.

(2) Laboratory reports or results shall be reported promptly to the attending clinical staff member and documented in the patient's medical record.

(3) Laboratory services shall be provided according to CLIA requirements.

R432-550-20. Medical Records.

(1) Medical records shall be complete, accurately documented and systematically organized to facilitate retrieval and compilation of information.

(2) An employee designated by the administrator shall be responsible and accountable for the processing of medical records.

(3) The medical record and its contents shall be safeguarded from loss, defacement, tampering, fires and floods.

(4) Medical records shall be protected against access by unauthorized individuals.

(a) Medical record information shall be confidential.

(b) The birthing center may disclose medical record information only to authorized persons in accordance with federal, state and local laws.

(c) The birthing center shall obtain consent from the patient before releasing client information identifying the client, including photographs, unless release is otherwise allowed or required by law.

(5) Medical records shall be retained for at least five years after the last date of patient care. Records of minors, including records of newborn infants, shall be retained for three years after the minor reaches legal age under Utah law, but in no case less than five years.

(6) The birthing center shall maintain an individual medical record for each patient which shall include but is not limited to written documentation of the following:

(a) admission record with demographic information and patient identification data;

(b) history and physical examination which shall be up-to-date upon the patient's admission;

(c) written and signed informed consent;

(d) orders by a clinical staff member;

(e) record of assessments, plan of care and services provided;

(f) record of medications and treatments administered;

(g) laboratory and radiology reports;

(h) discharge summary for mother and newborn to include a note of condition, instructions given and referral as appropriate;

(i) prenatal care record containing at least prenatal blood serology, Rh factor determination, past obstetrical history and physical examination and documentation of fetal status;

(j) monitoring of progress in labor with assessment of maternal and newborn reaction to the process of labor;

(k) fetal monitoring record;

(l) labor and delivery record, including type of delivery, record of anesthesia and operative procedures if any; and

(m) documentation that the patient is informed of the statement of patient rights.

(7) The records of newborn infants shall include the following:

(a) date and hour of birth, birth weight and length, period of gestation, gender and condition of infant on delivery including Apgar scores and resuscitative measures;

(b) mother's name or unique identification;

(c) record of ophthalmic prophylaxis; and

(d) the identification number of the screening kit used to screen for metabolic diseases, documentation that metabolic screening, genetic screening, PKU or other metabolic

disorders reports were completed or refused by the client.

R432-550-21. Housekeeping Services.

(1) The facility shall provide adequate housekeeping services to maintain a clean and sanitary environment.

(2) The facility shall develop and implement written housekeeping policies and procedures.

R432-550-22. Laundry Services.

(1) The facility shall develop and implement written policies and procedures for storage and processing of clean and soiled linen.

(2) Clean linen shall be stored, handled and transported to prevent contamination. Linens shall be maintained in good repair.

(3) Soiled linen shall be handled, transported, stored and processed in a manner to prevent both leakage and the spread of infection.

R432-550-23. Maintenance, Physical Environment, and Safety.

(1) The facility shall provide adequate maintenance service to ensure that facility equipment and grounds are maintained in a clean and sanitary condition and in good repair.

(2) The facility shall develop and implement a written maintenance program which shall include a preventive maintenance schedule for major equipment and physical plant systems.

R432-550-24. General Maintenance.

(1) The facility shall maintain facility buildings, fixtures, equipment and spaces in operable condition.

(2) The facility shall provide a safe, clean and sanitary environment.

(3) The facility shall conduct a pest-control program that ensures the facility is free from vermin.

(4) Direct or contract pest-control programs shall comply with Title 4, Chapter 14.

(5) Documentation shall be maintained for Department review.

R432-550-25. Waste Processing Service.

Facilities and equipment shall be provided for the sanitary storage and treatment or disposal of all categories of waste, including hazardous and infectious wastes if applicable, using techniques acceptable to the Department of Environmental Quality, and the local health department having jurisdiction.

R432-550-26. Lighting.

The facility shall provide adequate and comfortable lighting to meet the needs of patients and personnel.

R432-550-27. Limitations of Services.

(1) Birthing center policy shall establish a written risk assessment system to assess the individual risk for each maternal patient.

(2) A clinical staff member shall perform and document a risk assessment for each maternal patient to ensure the patient needs:

(a) fall within the scope of practice and standards of care included in the clinical staff member's professional practice act and within facility policy; and

(b) meet the eligibility requirements for a low risk maternal patient.

(3) Clients shall become ineligible for birthing center care upon development of:

(a) a clinical need for anesthesia or analgesia other than those used in a setting where anesthesia and analgesia are limited in accordance with the facility's written protocols; or

(b) any condition identified intrapartum or postpartum which will be likely to adversely affect the health of the maternal patient or infant and will require management in a general hospital.

R432-550-28. Penalties.

Any person who violates any provision of this rule may be subject to the penalties enumerated in Title 26, Chapter 21, Section 11 and R432-3-7 and be punished for violation of a class A misdemeanor as provided in Title 26, Chapter 21, Section 16.

KEY: health care facilities
August 26, 2016 26-21-5
Notice of Continuation November 9, 2015 26-21-16

R527. Human Services, Recovery Services.
R527-5. Release of Information.
R527-5-1. Statutory Authority and Purpose.

(1) The Office of Recovery Services (ORS) is authorized to adopt, amend, and enforce rules by Title 62A, Chapter 11, Section 107(8).

(2) This rule establishes how ORS records may be accessed under Title 63G, Chapter 2, the Government Records Access and Management Act (GRAMA).

R527-5-2. Definitions.

(1) Terms used in this rule are defined either explicitly in section 63G-2-103 or implicitly in the text of subsection 63G-2-201.

(2) "Restricted", as used in subsection 63G-2-201(3)(b), refers to records to which access is restricted pursuant to court rule, another state statute, federal statute, or federal regulation. These records are not subject to the procedures for access and disclosure outlined in GRAMA.

R527-5-3. Request for Release of Information.

(1) Written requests for information governed by GRAMA may be submitted in accordance with section 63G-2-204 to:

(a) Office of Recovery Services
ATTN: ORS Records
515 East 100 South
P.O. Box 45033
Salt Lake City, UT 84145-0033.

(2) Written requests for expedited release of information in accordance with section 63G-2-204 may be submitted to:

(a) Office of Recovery Services
ATTN: ORS Records
515 East 100 South
P.O. Box 45033
Salt Lake City, UT 84145-0033.

R527-5-4. Appeal of Denial of Request for Release of Information.

A request to appeal the denial to access a record governed by GRAMA shall be submitted in accordance with Section 63G-2-401 to:

(1) the Director of the Office of Recovery Services for records maintained by ORS.

R527-5-5. Public Information.

(1) In accordance with Utah Code Sections 63G-2-103 (21) and 63G-2-201 a record is public unless classified as private, controlled, protected, or exempt.

(2) In accordance with Utah Code Section 63G-2-307, a record may be classified or reclassified at any time, including after the record has been requested.

R527-5-6. Private Information.

(1) Private records include the following:

(a) the address, date of birth, and Social Security number (SSN)of ORS case participants;

(b) information about state employees, former employees and applicants, except as provided for in 63G-2-302.

(2) Private records may be disclosed when:

(a) disclosure is required by other statutes;

(b) disclosure is for purposes directly connected with any investigation, prosecution, or criminal or civil proceeding conducted in connection with Utah's child support enforcement plan and all other programs administered by the Office of Recovery Services;

(c) a parent who has physical custody of the child, a parent without physical custody of the child, a relative to whom physical custody of the child has voluntarily been given, or a parent's attorney, demonstrates that the other party's address is required in order to serve legal process as the result of a judicial action to establish or modify an order or judgment for bona fide child support, spousal support, medical support, or child care. This information may not be disclosed if the person whose address is being sought has requested that case information be safeguarded;

(d) a parent who has physical custody of the child, a parent without physical custody of the child, a relative to whom physical custody of the child has been voluntarily given, or a parent's attorney, requests the other party's address related to parent-time based on Title 62A, Section 11, Subsection 304.4;

(e) income information is needed to establish a support order or review a support order for possible modification. This information may only be released to the court or administrative Presiding Officer, the other party or the other party's authorized representative;

(f) a case participant's Social Security number, address or employment information is needed by authorized governmental entities, including law enforcement agencies and;

(i) the requesting entity enforces, litigates or investigates civil, criminal or administrative law and the record is necessary to a proceeding or investigation; or

(ii) the requesting entity is one that collects information for pre-sentence, probationary or parole purposes.

(g) a governmental agency provides written assurance that the record is necessary to the governmental entity's duties and functions and will be used for a purpose similar to the purposes for which ORS collected or obtained the information and that the record use produces a public benefit outweighing the individual privacy right protecting the record;

(3) A private record shall be disclosed in accordance with the requirements of Utah Code Section 63G-2-202.

(4) Private records may not be released when a protective order has been issued in violation of 42 USC 654(26), or if there is reason to believe the release of information may result in physical or emotional harm to the person.

R527-5-7. Controlled Information.

(1) A record is controlled if it meets the requirements of Utah Code Section 63G-2-304.

(2) Controlled records can only be released under the provisions of Utah Code Section 63G-2-202(2).

R527-5-8. Protected Information.

(1) A record is protected if it meets the requirements of Utah Code Section 63G-2-305.

(2) Protected records can only be released under the provisions of Utah Code Section 63G-2-202(4).

R527-5-9. Restricted Records Exempt from Release Under GRAMA.

(1) A record is restricted from release by ORS if it meets the requirements of Utah Code Section 63G-2-201(3)(b).

R527-5-10. Fees.

(1) ORS may provide requested records without a charge unless:

(a) The request is for records which require programmer assistance.

(b) The request is a repeat request by the same requester for information already provided within the last three months.

(2) Contact ORS Records for specific fee amounts.

Notice of Continuation August 8, 2016 62A-11-304.4(4)
63G-2

R527. Human Services, Recovery Services.
R527-201. Medical Support Services.
R527-201-1. Authority and Purpose.

1. The Department of Human Services is authorized to create rules necessary for the provision of social services by Section 62A-1-111 and 62A-11-107.

2. The purpose of this rule is to specify the responsibilities and procedures for the Office of Recovery Services/Child Support Services for providing medical support services.

R527-201-2. Federal Requirements.

The Office of Recovery Services/Child Support Services, (ORS/CSS), adopts the federal regulations as published in 45 CFR 303.30, 303.31, and 303.32 (2008) which are incorporated by reference in this rule.

R527-201-3. Definitions.

1. Accessibility: Insurance is considered accessible to the child if non-emergency services covered by the health plan are available to the child within 90 minutes or 90 miles of the child's primary residence.

2.National Medical Support Notice (NMSN) is the federally approved form that ORS/CSS shall use, when appropriate, to notify an employer to enroll dependent children in an employment-related group health insurance plan in accordance with a child support order.

3. Cash Medical Support: An obligation to equally share all reasonable and necessary medical and dental expenses of children.

R527-201-4. Limitation of Services.

ORS/CSS shall not:

1. pursue establishment of specific amounts for ongoing medical support,

2. initiate an action to obtain a judgment for uninsured medical expenses, or

3. collect and disburse premium payments to insurance companies.

R527-201-5. Conditions Under Which Non-IV-A Medicaid Recipients May Decline Support Services.

ORS/CSS shall provide child and spousal support services; however, a Non-IV-A Medicaid recipient may decline child and spousal support services if paternity is not an issue and there is an order for the non-custodial parent to provide medical support.

R527-201-6. Securing a Medical Support Provision in the Support Order.

1. Notice to potentially obligated parents: The notice to potentially obligated parents shall include a provision that an administrative or judicial proceeding will occur to:

a. order either parent to purchase and maintain appropriate medical insurance for the children, and

b. order both parents to pay cash medical support. This notification shall be provided when either of the following conditions is met:

a. the state initiates an action to establish a final support order or to adjust an existing child support order; or

b. the state joins a divorce or modification action initiated by either the custodial or the non-custodial parent.

2. If a judicial support order does not include a medical support provision, ORS/CSS shall commence judicial action to include a medical support provision.

R527-201-7. Reasonable Cost of Insurance Premiums.

Employment-related or other group coverage that does not exceed 5% of the obligated parent's monthly gross income is generally considered reasonable in cost. However, an employer may not withhold more than the lesser of the amount allowed under the Consumer Credit Protection Act, the amount allowed by the state of the employee's principal place of employment, or the amount allowed for health insurance premiums by the child support order. If the combined child support and medical support obligations exceed the allowable deduction amount, the employer shall withhold according to the law, if any, of the state of the employee's principal place of employment requiring prioritization between child support and medical support. If the employee's principal place of employment is in Utah, the employer shall deduct current child support before deducting amounts for health insurance coverage. If the amount necessary to cover the health insurance premiums cannot be deducted due to prioritization or limitations on withholding, the employer shall notify ORS/CSS.

R527-201-8. Insurance Credit.

1. If an obligated parent is required to provide health insurance for his or her minor child(ren) and the order was issued by a Utah tribunal, in accordance with U.C.A. 78B-12-212, the parent may receive an insurance credit. ORS/CSS will calculate and apply the insurance credit if the office receives a completed Insurance Premium Credit Request letter. The Insurance Premium Credit Request must include the following information:

a. availability of insurance;
b. policy number;
c. names of all individuals covered by the policy;
d. the out-of-pocket cost for the insurance;
e. proof of the monthly insurance premium paid;
f. the obligated parent's signature; and,
g. the date the letter was completed.

2. Credit will be given to the obligated parent beginning the first day of the month following the date ORS/CSS receives the completed Insurance Premium Credit Request letter.

3. The insurance credit will be ended each calendar year, January 2, in accordance with U.C.A. 78B-12-212 (7), unless the obligated parent provides verification of coverage and costs to ORS/CSS on an updated Insurance Premium Credit Request. To allow sufficient time for ORS to process the annual insurance verification, the obligated parent may provide verification of the coverage as early as November 1 of the previous year.

R527-201-9. Credit for Premium Payments and Effect of Changes to the Premium Amount Subsequent to the Order.

1. If the order or underlying worksheet does not mention a specific credit for insurance premiums, ORS/CSS shall give credit for the child(ren)'s portion of the insurance premium when the obligated parent provides the necessary verification coverage.

2. ORS/CSS shall notify both parents in writing whenever the credit is changed.

R527-201-10. Enforcement of Obligation to Maintain Medical and Dental Insurance.

1. In Non-IV-A cases and in IV-A Medicaid cases, appropriate steps shall be taken to ensure compliance with orders which require the obligated parent to maintain insurance. Obligated parents shall demonstrate compliance by providing ORS/CSS with policy numbers and the insurance provider name for the dependent children for whom the medical support is ordered.

2. In Non-IV-A cases and in IV-A Medicaid cases, if an obligated parent has been ordered to maintain insurance and

insurance is accessible and available at a reasonable cost, ORS/CSS shall use the NMSN to transfer notice of the insurance provision to the obligated parent's employer unless ORS/CSS is notified pursuant to Section 62A-11-326.1 that the children are already enrolled in an insurance plan in accordance with the order.

3. When appropriate, ORS/CSS shall send the NMSN to the obligated parent's employer within two business days after the name of the obligated parent has been entered into the registry of the State Directory of New Hires, matched with ORS/CSS records, and reported to ORS/CSS in accordance with Subsection 35A-7-105(2).

4. The employer shall transfer the NMSN to the appropriate group health plan for which the children are eligible within twenty business days of the date of the NMSN if all of the following criteria are met:

a. the obligated parent is still employed by the employer;

b. the employer maintains or contributes to plans providing dependent or family health coverage;

c. the obligated parent is eligible for the coverage available through the employer; and

d. state or federal withholding limitations, prioritization, or both, do not prevent withholding the amount required to obtain coverage.

5. If more than one coverage option is available under a group insurance plan and the obligated parent is not already enrolled, ORS/CSS in consultation with the custodial parent may select the least expensive option if the option complies with the child support order and benefits the children. The insurer shall enroll the children in the plan's default option or least expensive option in accordance with Subsection 62A-11-326.2(1)(b) unless another option is specified by ORS/CSS.

6. The employer shall determine if the necessary employee contributions for the insurance coverage are available. If the amounts necessary are available, the employer shall begin withholding when appropriate and remit directly to the plan.

7. In accordance with Subsections 62A-11-326.1(2) and (3), the obligated parent may contest withholding insurance premiums based on a mistake of fact. The employer shall continue withholding under the NMSN until notified by ORS/CSS to terminate withholding insurance premiums.

8. If a parent successfully contests the action to enroll the children in a group health plan based on a mistake of fact, ORS/CSS shall notify the employer to discontinue enrollment and withholding insurance premiums for the children.

9. In accordance with Subsection 62A-11-406(9), the employer shall:

a. notify ORS/CSS within five days after the obligated parent terminates employment;

b. provide the office with the obligated parent's last-known address; and

c. the name and address of any new employer, if known.

10. ORS/CSS shall promptly notify the employer when a current order for medical support is no longer in effect for which ORS/CSS is responsible.

R527-201-11. Coordination of Health Insurance Benefits.

If, at any point in time, a dependent child is covered by the health, hospital, or dental insurance plans of both parents, the health, hospital, or dental insurance plan of the parent whose birthday occurs first in the calendar year, shall be designated as primary coverage for the dependent child. The health, hospital, or dental insurance plan of the other parent shall be designated as secondary coverage for the dependent child.

R527-201-12. Obligated Parent Receiving Medicaid.

In an unestablished paternity case, if the alleged father's income was taken into consideration when determining the household's eligibility for Medicaid, ORS/CSS shall not enforce payment of medical expenses regardless of the medical support provisions in the order, but shall enforce the health insurance provision.

R590. Insurance, Administration.
R590-178. Securities Custody.
R590-178-1. Authority.

This rule is promulgated by the Insurance Commissioner pursuant to Utah Insurance Code Sections 31A-2-201, 31A-2-206, and 31A-4-108.

R590-178-2. Purpose and Scope.

This rule authorizes domestic insurance companies to utilize modern systems for holding and transferring securities without physical delivery of securities certificates. This rule establishes standards for national banks, state banks, trust companies and broker/dealers to qualify and operate as custodians for insurance company securities.

R590-178-3. Definitions.

As used in this rule:

A. "Agent" means a national bank, state bank, trust company or broker/dealer that maintains an account in its name in a clearing corporation or that is a member of the Federal Reserve System and through which a custodian participates in a clearing corporation or the Federal Reserve book-entry system.

B. "Clearing corporation" means a corporation, as defined in Subsection 70A-8-101(1), that is organized for the purpose of effecting transactions in securities by computerized book-entry. Clearing corporation also includes "Treasury/Reserve Automated Debt Entry Securities System" and "Treasury Direct" book-entry securities systems established pursuant to 31 U.S.C. Section 3100 et seq., 12 U.S.C. pt. 391 and 5 U.S.C. pt. 301.

C. "Custodian" means:

1. a national bank, state bank, or trust company that shall at all times during which it acts as a custodian pursuant to this rule, be no less than adequately capitalized as determined by the standards adopted by United States banking regulators and that is regulated by either state banking laws or is a member of the Federal Reserve System and that is legally qualified to accept custody of securities in accordance with the standards set forth below; or

2. a trust company with minimum net worth of $1,500,000 at all times during which it acts as a custodian, is licensed by the United States or any state thereof as a trust company, and is in compliance with the regulatory authority as verified through regular examination by the regulatory authority; or

3. A broker/dealer that shall be registered with and subject to jurisdiction of the Securities and Exchange Commission, maintains membership in the Securities Investor Protection Corporation, and has a tangible net worth equal to or greater than two hundred fifty million dollars ($250,000,000).

D. "Custodied securities" means securities held by the custodian or its agent, or that are being cleared or transferred through a clearing corporation.

E. "Federal Reserve book-entry system" means the computerized systems sponsored by the United States Department of the Treasury and other agencies and instrumentalities of the United States for holding and transferring securities of the United States government and the agencies and instrumentalities.

F. "Security" has the same meaning as that defined in 70A-8-101(1).

G. "Securities' certificate" has the same meaning as that defined in 70A-8-101(1).

H. "Tangible net worth" means shareholders equity, less intangible assets, as reported in the broker/dealer's most recent Annual or Transition Report pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 (S.E.C. Form 10-K) filed with the Securities and Exchange Commission.

I. "Treasury/Reserve Automated Debt Entry Securities System" (TRADES) and "Treasury Direct" mean the book entry securities systems established pursuant to 31 U.S.C. Section 3100 et seq., 12 U.S.C. pt. 391 and 5 U.S.C. pt. 301. The operation of TRADES and Treasury Direct are subject to 31 C.F.R. pt. 357 et seq.

R590-178-4. Use of Book-Entry Systems.

A custodian may utilize a clearing corporation to clear and transfer securities when depositing or arranging for the deposit of securities held in or purchased for a domestic insurance company's general account or its separate accounts. When a clearing corporation is used to clear and transfer securities, securities of the same class of the same issuer may be merged and held in bulk in the name of the nominee of such clearing corporation regardless of the ownership of such securities and securities of small denominations may be merged into larger denominations. The records of any custodian utilizing a clearing corporation to clear and transfer securities shall at all times show that such securities are held for such insurance company and for which accounts thereof. Ownership of, and other interest in, such securities may be transferred by bookkeeping entry on the books of such clearing corporation without physical delivery of certificates representing such securities.

R590-178-5. Requirements for Custodial Agreements.

A. An insurance company may, by written agreement with a custodian, provide for the custody of its securities with that custodian. The securities that are the subject of the agreement may be held by the custodian or its agent, by the Federal Reserve book-entry system, or may be cleared or transferred through a clearing corporation.

B. Agreements shall be in writing and shall be authorized by a resolution of the Board of Directors of the insurance company or of an authorized committee of the board pursuant to 31A-5-412. The terms of the agreement shall comply with the following:

1. Securities' certificates held by the custodian shall be held separate from the securities' certificates of the custodian and of all of its other customers.

2. Securities held indirectly by the custodian or its agent, by the Federal Reserve book-entry system, and securities being cleared or transferred through a clearing corporation shall be separately identified on the custodian's official records as being owned by the insurance company. The records shall identify which securities are held by the custodian or its agent, by the Federal Reserve book-entry system, and which securities are being cleared or transferred through a clearing corporation. If the securities are with the Federal Reserve book-entry system or are being cleared or transferred through a clearing corporation, the records shall also identify where the securities are and the name of the clearing corporation. If the securities are held by an agent of the custodian, the records shall contain the name of the agent.

3. All custodied securities shall be registered in the name of the insurance company or in the name of a nominee of the insurance company or in the name of the custodian or its nominee or, if in a clearing corporation, in the name of the clearing corporation or its nominee.

4. Custodied securities shall be held subject to the instructions of the insurance company and shall be withdrawable upon the demand of the insurance company, except that custodied securities used to meet the deposit requirements set forth in Subsection 31A-2-206(2) shall, to the extent required by Subsection 31A-2-206(2), be under the control of the insurance commissioner and shall not be withdrawn by the insurance company without the prior

written approval of the insurance commissioner. Broker/dealers are not authorized to hold custodied securities that are used to meet the deposit requirements set forth in Subsection 31A-2-206(2). To the extent that national banks, state banks, and trust companies hold custodied securities that are used to meet the deposit requirements set forth in Subsection 31A-2-206(2), these custodied securities must be held in an account separate from other custodied securities of the insurance company.

5. The custodian shall be required to send or cause to be sent to the insurance company a confirmation of all transfers of custodied securities to or from the account of the insurance company. In addition, the custodian shall be required to furnish no less than monthly the insurance company with reports of holdings of custodied securities at times and containing information reasonably requested by the insurance company. The custodian's annual report of the insurance company's accounts shall also be provided to the insurance company. Reports and verifications may be transmitted in electronic or paper form.

6. During the course of the custodian's regular business hours, an officer or employee of the insurance company, an independent accountant selected by the insurance company or a representative of the Insurance Department shall be entitled to examine, on the premises of the custodian, the custodian's records relating to custodied securities, but only upon furnishing the custodian with written instructions to that effect from an appropriate officer of the insurance company.

7. Upon written request from the insurance company, the custodian and its agents shall be required to send to the insurance company:

(a) all reports they receive from a clearing corporation on their respective systems of internal accounting control, and

(b) reports prepared by outside auditors on the custodian's or its agent's internal accounting control of custodied securities that the insurance company may reasonably request.

8. The custodian shall maintain records sufficient to determine and verify information relating to custodied securities that may be reported in the insurance company's annual statement and supporting schedules and information required in an audit of the financial statements of the insurance company.

9. The custodian shall provide, upon written request from an appropriate officer of the insurance company, the appropriate affidavits with respect to custodied securities. These shall be substantially in the form of Custodian Affidavits, Form A, 298-6, Form B, 298-7, and Form C, 298-8, published by NAIC Model Regulation Service.

a. "Form A" is to be used by a custodian where securities entrusted to its care have not been redeposited elsewhere;

b. "Form B" is to be used in instances where a custodian corporation maintains securities on deposit with The Depository Trust Company or like entity; and

c. "Form C" is to be used where ownership is evidenced by book entry at a Federal Reserve Bank.

10. A national bank, state bank or trust company shall secure and maintain insurance protection in an adequate amount covering the bank's or trust company's duties and activities as custodian for the insurance company's assets, and shall state in the custody agreement that protection is in compliance with the requirements of the custodian's banking regulator or other regulator of a trust company. A broker/dealer shall secure and maintain insurance protection for each insurance company's custodied securities in excess of that provided by the Securities Investor Protection Corporation in an amount equal to or greater than the market value of each respective insurance company's custodied securities. The commissioner may determine whether the type of insurance is appropriate and the amount of coverage is adequate.

11. The custodian shall be obligated to indemnify the insurance company for any loss of custodied securities occasioned by the negligence or dishonesty of the custodian's officers or employees, and for burglary, robbery, holdup, theft and mysterious disappearance, including loss by damage or destruction.

12. In the event that there is loss of custodied securities, for which the custodian shall be obligated to indemnify the insurance company as provided in paragraph (11) above, the custodian shall promptly replace the securities or the fair value thereof and the value of any loss of rights or privileges resulting from the loss of securities.

13. The agreement may provide that the custodian will not be liable for failure to take an action required under the agreement in the event and to the extent that the taking of such action is prevented or delayed by war, whether declared or not and including existing wars, revolution, insurrection, riot, civil commotion, act of God, accident, fire, explosion, stoppage of labor, strikes or other differences with employees, laws, regulations, orders, other acts of any governmental authority, or any other cause beyond its reasonable control.

14. In the event that the custodian gains entry in a clearing corporation through an agent, there shall be an agreement between the custodian and the agent under which the agent shall be subject to the same liability for loss of custodied securities as the custodian. However, if the agent shall be subject to regulation under the laws of a jurisdiction that is different from the jurisdiction the laws of which regulate the custodian, the Commissioner of Insurance of the state of domicile of the insurance company may accept a standard of liability applicable to the agent that is different from the standard of liability applicable to the custodian.

15. The custodian shall provide written notification to the insurance company's domiciliary commissioner if the custodial agreement with the insurance company has been terminated or if 100% of the account assets in any one custody account have been withdrawn. This notification shall be remitted to the insurance commissioner within three (3) business days of the receipt by the custodian of the insurance company's written notice of termination or within three (3) business days of the withdrawal of 100% of the account assets.

R590-178-6. Requirements for Deposits with Affiliates.

A. Nothing in this rule shall prevent an insurance company from depositing securities with another insurance company with which the depositing insurance company is affiliated, provided that the securities are deposited pursuant to a written agreement authorized by the board of directors of the depositing insurance company or an authorized committee thereof and that the receiving insurance company is organized under the laws of one of the states of the United States of America or of the District of Columbia. If the respective states of domicile of the depositing and receiving insurance companies are not the same, the depositing insurance company shall have given notice of the deposit to the insurance commissioner in the state of its domicile and the insurance commissioner shall not have objected to it within thirty (30) days of the receipt of the notice.

B. The terms of the agreement shall comply with the following:

1. The insurance company receiving the deposit shall maintain records adequate to identify and verify the securities belonging to the depositing insurance company.

2. The receiving insurance company shall allow representatives of an appropriate regulatory body to examine

records relating to securities held subject to the agreement.

3. The depositing insurance company may authorize the receiving insurance company:

a. To hold the securities of the depositing insurance company in bulk, in certificates issued in the name of the receiving insurance company or its nominee, and to commingle them with securities owned by other affiliates of the receiving insurance company, and

b. To provide for the securities to be held by a custodian, including the custodian of securities of the receiving insurance company or in a clearing corporation.

R590-178-7. Penalties and Prohibitions.

A. Insurance companies found to be or to have been in violation of this rule shall be subject to fine, suspension, and revocation of license or other penalties permitted by Section 31A-2-308.

B. Insurance companies are not authorized to provide for the custody of their securities except as granted in this rule. Custodial securities held in violation of this rule shall be disregarded in determining and reporting the financial condition of an insurer.

R590-178-8. Enforcement Date.

The commissioner will begin enforcing this rule 90 days from the rule's effective date.

R590-178-9. Separability.

If any provision of this rule or the application to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of such provisions may not be affected.

KEY: insurance law
September 19, 2006 31A-4-108
Notice of Continuation August 2, 2016

R590. Insurance, Administration.
R590-207. Health Producer Commissions for Small Employer Groups.
R590-207-1. Authority.

This rule is issued and based upon the authority granted the commissioner under Subsections 31A-2-201(3)(a) and 31A-30-104(7).

R590-207-2. Purpose.

The purpose of this rule is to establish guidelines relating to commission structure for insurance producers in the small employer group market that affect access to health insurance coverage for small employer groups.

R590-207-3. Applicability.

This rule applies to all licensed carriers doing health insurance business under Title 31A, Chapter 30, the Individual and Small Employer Health Insurance Act.

R590-207-4. Definitions.

The definitions in Sections 31A-1-301 and 31A-30-103 apply to this rule.

R590-207-5. Commission Schedule Structure.

(1) A health insurance carrier shall not structure producer commission schedule in a way that, directly or indirectly, creates a restriction, hindrance, or barrier to access to coverage for the smallest size groups or groups with the greatest health risks.

(2) The commission in the commission schedule for the smallest size groups or the groups with the greatest health risks may not be designed to avoid, directly or indirectly, the requirements of guaranteed issue or renewal in the marketing of health insurance to small business owners.

(3) An insurer shall not design a commission structure that lessens the incentive to insure a small employer group that is smallest in size or with the greatest health risks.

(4) An insurer is not required to base commissions on a percentage. An insurer is permitted to pay no commissions on all business or to pay a dollar amount based on factors other than risk characteristics.

R590-207-6. Commission Structure Examples.

(1) Examples of commission structures that are in compliance would be:

(a)(i) a 10% commission for employer group size 2-5;

(ii) a 9% commission for group size 6-25; and

(iii) a 7% commission for group size 26-50; or

(b)(i) $20/ Per Member Per Month (PMPM) for employer group size 2-5;

(ii) $18/PMPM for group size 6-25; and

(c) $16/PMPM for group size 26-50.

(2) An example of a commission structure that is not in compliance would be:

(i) 3% commission for employer group size 2-5;

(ii) 8% commission for group size 6-25; and

(iii) 7% commission for group size 26-50.

R590-207-7. Penalties.

Any carrier with a commission structure found to be in violation of this rule shall be subject to the penalties provided for in Section 31A-2-308.

R590-207-8. Enforcement Date.

The commissioner will begin enforcing the amendments to this rule 45 days from the rule's effective date.

R590-207-9. Severability.

If any provision or clause of this rule or its application to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of these provisions shall not be affected.

KEY: insurance law

August 2, 2011	**31A-2-201**
Notice of Continuation August 31, 2016	**31A-2-202**

R590. Insurance, Administration.
R590-210. Privacy of Consumer Information Exemption for Manufacturer Warranties and Service Contracts.
R590-210-1. Authority.

This rule is promulgated pursuant to Subsections 31A-2-202(1), 31A-2-201(2) and 31A-2-201(3)(a) in which the commissioner is empowered to administer and enforce Title 31A, to perform duties imposed by Title 31A and to make administrative rules to implement the provisions of Title 31A. Furthermore, Title V, Section 505 (15 United States Code (U.S.C.) 6805)) empowers the Utah Insurance Commissioner to enforce Subtitle A of Title V of the Gramm-Leach-Bliley Act of 1999 (15 U.S.C. 6801 through 6820). The commissioner is also authorized under Subsection 31A-23a-417(3) to adopt rules implementing the requirements of Title V, Sections 501 to 505 of the federal act (15 U.S.C 6801 through 6807).

R590-210-2. Purpose.

The purpose of this rule is to exempt any person that is licensed or registered by the department that sells or provides the following from the requirements of the department's rule, R590-206:

(1) manufacturer warranties;

(2) manufacturer service contracts paid for with consideration that is in addition to the consideration paid for the product; and

(3) service contracts paid for with consideration in addition to the consideration paid for the product and the service contract is for the repair or maintenance of goods, including motor vehicles.

R590-210-3. Applicability and Scope.

This rule applies only to persons licensed or registered by the department that sell or provide manufacturer warranties, manufacturer service contracts paid for with consideration that is in addition to the consideration paid for the product, and service contracts paid for with consideration in addition to the consideration paid for the product and the service contract is for the repair or maintenance of goods, including motor vehicles.

R590-210-4. Enforcement.

Persons licensed or registered by the department that sell or provide manufacturer warranties, manufacturer service contracts paid for with consideration that is in addition to the consideration paid for the product, and service contracts paid for with consideration in addition to the consideration paid for the product and the service contract is for the repair or maintenance of goods, including motor vehicles are hereby exempted from the requirements of the department's rule, R590-206.

R590-210-5. Severability.

If any provision or clause of this rule or its application to any person or situation is held invalid, such validity shall not affect any other provision or application of this rule which can be given effect without the invalid provision or application, and to this end the provisions of this rule are declared to be severable.

31A-23a-417
15 U.S.C. 6801-6807

R590. Insurance Administration.
R590-237. Access to Health Care Providers in Rural Counties.
R590-237-1. Authority.

This rule is promulgated pursuant to Subsections 31A-2-201(2), 31A-2-201(3)(a), and 31A-8-501(7)(c) wherein the commissioner is empowered to administer and enforce Title 31A and make administrative rules to implement Section 31A-8-501.

R590-237-2. Purpose.

The purpose of this rule is to

(1) identify the counties with a population density of less than 100 people per square mile;

(2) identify independent hospitals;

(3) identify federally qualified health centers in Utah; and

(4) describe how a health maintenance organization (HMO) shall:

(a) use the information identifying the counties, independent hospitals and federally qualified health centers described in (1), (2), and (3) above; and

(b) notify the subscribers, independent hospitals and federally qualified health centers; and

(c) ensure an HMO provides the notice required by Subsection 31A-8-501(7)(d)(ii).

R590-237-3. Applicability and Scope.

This rule applies to all licensed health maintenance organizations as defined in Subsection 31A-8-101(8).

R590-237-4. Definitions.

In addition to the definitions in Sections 31A-1-301 and 31A-8-101, the following definitions apply to this rule:

(1) "Board of Directors," for the purpose of this rule, means the local board of directors for the independent hospital that is directly responsible for the daily policy and financial decisions. board of directors does not include a corporate board of directors for the entity that owns the independent hospital.

(2) "Credentialed staff member" means a health care provider with active staff privileges at an independent hospital or a federally qualified health center. A credentialed staff member is not required to be an employee of the independent hospital or federally qualified health center.

(3) "Federally Qualified Health Center," as defined in the Social Security Act 42 U.S.C., Sec. 1395x, means an entity which:

(a)(i) is receiving a grant under Section 330, other than Subsection (h) of the Public Health Service Act 42 U.S.C, 254b; or

(ii)(A) is receiving funding from a grant under a contract with the recipient of such a grant; and

(B) meets the requirements to receive a grant under Section 330, other than Subsection (h) of the Public Health Service Act 42 U.S.C. 254b;

(b) based on the recommendation of the Health Resources and Services Administration within the Public Health Service is determined by the Secretary of Health and Human Services to meet the requirements for receiving such a grant;

(c) was treated by the Secretary of Health and Human Services as a comprehensive Federally funded health center as of January 1, 1990; or

(d) is an outpatient health program or facility operated by a tribe or tribal organization under the Indian Self-Determination Act, 25 U.S.C. 450f, or by an urban Indian organization receiving funds under title V of the Indian Health Care Improvement Act, 25 U.S.C. 1651.

(4) "Local practice location" means the provider's office where services are rendered which is:

(a) permanently located within a county with a population density of less than 100 people per square mile; and

(b) is within 30 miles of paved roads of:

(i) the place where the enrollee lives or resides; or

(ii) the location of the independent hospital or federally qualified health center at which the enrollee may receive covered benefits pursuant to Subsection 31A-8-501(2) or (3).

(5) "Policy and financial decisions" means the day-to-day decisions made by the local Board of directors with regard to hospital policy and financial solvency.

(6) "Provider" means any person who:

(a) furnishes health care directly to the enrollee; and

(b) is licensed or otherwise authorized to furnish the health care in this state.

(7) "Referral" means:

(a) the request by a health care provider for an item, service, test, or procedure to be performed by another health care provider;

(b) the request by a physician for a consultation with another physician; or

(c) the request or establishment of a plan of care by a physician.

(8) "Rural County" means a county as described in Subsection 31A-8-501(2)(b).

R590-237-5. Rural Counties.

(1) For the purposes of Subsection 31A-8-501(2)(b), rural counties where independent hospitals built prior to December 31, 2000 include all Utah counties except Davis, Salt Lake, Utah and Weber.

(2) For the purposes of Subsection 31A-8-501(2)(b), rural counties where independent hospitals built after December 31, 2000 include all Utah counties except Cache, Davis, Salt Lake , Utah, Washington and Weber.

(3) For purposes of Subsection 31A-8-501(5)(b)(i), non-contracting provider referrals to non-contracting providers are allowed in all counties except: Cache, Davis, Salt Lake, Utah, Washington, and Weber counties.

R590-237-6. Independent Hospitals.

The following are the independent hospitals that fall under Section 31A-8-501:

(1) Allen Memorial Hospital, Moab, Grand County, Utah

(2) Ashley Valley Medical Center, Vernal, Uintah County, Utah

(3) Beaver Valley Hospital, Beaver, Beaver County, Utah

(4) Brigham City Community Hospital, Brigham City, Box Elder County, Utah

(5) Cache Specialty Hospital, Logan, Cache County, Utah (Subject to the provisions of Subsection 31A-8-501(2)).

(6) Central Valley Medical Center, Nephi, Utah

(7) Garfield Memorial Hospital, Panguitch, Utah

(8) Gunnison Valley Hospital, Gunnison, Sanpete County, Utah

(9) Kane County Hospital, Kanab, Kane County, Utah

(10) Milford Valley Memorial Hospital, Milford, Beaver County, Utah

(11) Mountain West Medical Center, Tooele, Tooele County, Utah

(12) San Juan Hospital, Monticello, San Juan County, Utah

(13) Uintah Basin Medical Center, Roosevelt, Duchesne County, Utah

R590-237-7. Federally Qualified Health Centers.

The following are the federally qualified health centers that fall under Section 31A-8-501:

(1) Beaver Medical Clinic, Beaver, Beaver County, Utah

(2) Blanding Family Practice/Blanding Medical Center, Blanding, Utah

(3) Bryce Valley Clinic, Cannonville, Utah

(4) Carbon Medical Services, Carbon, Carbon County, Utah

(5) Circleview Clinic, Circleview, Piute County, Utah

(6) Duchesne Valley Medical Clinic, Duchesne, Duchesne County, Utah

(7) Emery Medical Center, Castledale, Emery County, Utah

(8) Enterprise Valley Medical Clinic, Enterprise, Washington County, Utah

(9) Garfield Memorial Clinic, Panguitch, Garfield County, Utah

(10) Green Valley/River Clinic, Green River, Emery/Grand Counties, Utah

(11) Halchita Clinic, San Juan County, Utah

(12) Hurricane Family Practice Clinic, Hurricane, Washington County, Utah

(13) Kamas Health Center, Kamas, Summit County, Utah

(14) Kazan Memorial Clinic, Escalante, Garfield County, Utah

(15) Long Valley Medical, Kane County, Utah

(16) Milford Valley Clinic, Milford, Beaver County, Utah

(17) Montezuma Creek Health Center, Montezuma Creek, San Juan County, Utah

(18) Monument Valley Health Center, Monument Valley, Utah

(19) Navajo Mountain Health Center, San Juan County, Utah

(20) Wayne County Medical Clinic, Bicknell, Wayne County, Utah

R590-237-8. Rural Health Notification.

(1) An HMO shall provide its subscribers with the notice required by Subsection 31A-8-501(7)(d)(ii) no later than the time of enrollment or the time the group or individual contract and evidence of coverage are issued and upon request thereafter. This information must be included and easily accessible on the HMO's website. When rural counties, independent hospitals, or federally qualified health centers change, the HMO shall provide an updated notice to its affected subscribers within 30 days.

(2) An HMO shall provide to the independent hospitals and federally qualified health centers in the HMO service area the notice required by Subsection 31A-8-501(7)(d)(ii) within 30 days.

R590-237-9. Penalties.

An HMO found, after a hearing or other regulatory process, to be in violation of this rule shall be subject to penalties as provided under Section 31A-2-308.

R590-237-10. Enforcement Date.

The commissioner will begin enforcing the provisions of this rule 45 days from the effective date of the rule.

R590-237-11. Severability.

If any provision of this rule or the application of it to any person or circumstance is for any reason held to be invalid, the remainder of the rule and the application of the provision to other persons or circumstances may not be affected by it.

KEY: health care providers
September 7, 2006 31A-2-201
Notice of Continuation August 31, 2016 31A-8-501

R608. Labor Commission, Antidiscrimination and Labor, Fair Housing.
R608-1. Utah Fair Housing Rules.
R608-1-1. Authority and Purpose.

Pursuant to Section 57-21-8(2)(a), the Utah Labor Commission adopts this rule to establish the procedures necessary to implement the Utah Fair Housing Act.

R608-1-2. Definitions.

The following definitions are in addition to the definitions set forth in Section 57-21-2 of the Utah Fair Housing Act

A. "Act" means the Utah Fair Housing Act, Chapter 21, Title 57.

B. "Commissioner" means the Commissioner of the Utah Labor Commission.

C. "Complaint" means an allegation of an unlawful housing practice, filed with the Division in compliance with these rules. "Complaint" includes amended or supplemental complaints.

D. "Court" means the district court in the judicial district of the state of Utah in which the asserted unfair housing practice occurred, or if this court is not in session at that time, then any judge of any court.

E. "Unlawful housing practice" means any discriminatory housing practice prohibited by the Act.

R608-1-3. Reliance on State and Federal Precedent.

The Division and Commission will consider relevant State and Federal precedent in interpreting and applying the Act.

R608-1-4. Computation of Time Limits.

A. A Determination, Order, or Notice required by the Act or this rule is deemed issued on the date on the face of the Determination, Order or Notice.

B. A complaint, response, request for reconsideration, or election is considered to be "filed" on the date it is received by the Division or Commission, whether by mail or by personal delivery. Each such document shall be date stamped by Division staff on the date of receipt.

C. In computing any period of time prescribed or allowed by these rules or by applicable statute:

1. The day of the act, event, finding, or default, or the date an Order is issued, shall not be included;

2. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a state legal holiday, in which event the period runs until the end of the next working day;

3. When the period of time prescribed is less than seven days, intermediate Saturdays, Sundays, and state legal holidays shall be excluded in the computation;

4. No additional time for mailing will be allowed.

R608-1-5. Designation of Proceedings as Informal-Exception.

A. All proceedings pursuant to the Act and this rule are hereby designated as informal adjudicatory proceedings for purposes of the Utah Administrative Procedures Act, Title 63, Chapter 46b, except that proceedings before the Commission's Adjudication Division for de novo review of the Director's Determination and Order are formal proceedings.

B. Court proceedings are subject to the court's rules of procedure.

R608-1-6. Complaints-Filing-Time Limits-Amendment and Withdrawal.

A. Any person aggrieved by an unlawful housing practice may file a complaint with the Division.

1. The complaint must be in the form designated by the Division and verified by the complainant.

2. The complaint shall contain the complainant's concise statement setting forth, to the extent reasonably possible, the following information:

a. The specific basis for complainant's belief that an unlawful housing practice has occurred, with relevant dates, places and the names of any individual participating in the alleged unlawful housing practice;

b. The specific basis for the complainant's belief that the alleged conduct is subject to the Act; and the dates and places of such unlawful housing practices;

c. The specific damages the complainant believes he or she has suffered as a result of the unlawful housing practice.

B. Division staff shall be available during normal business hours to provide reasonable assistance to complainants in completing and filing complaints.

C. Pursuant to Section 57-21-9(1), the complaint must be filed with the Division within 180 days after the alleged unlawful housing practice occurred.

D. The Director shall permit a complaint to be reasonably and fairly amended or supplemented, either by the Division or by the complainant, in order to accomplish the purpose of the Act. Such amendment or supplement may include additional respondents identified in the investigation as persons engaged in the unlawful housing practice on which the complaint is based. Procedures for filing and processing an amended or supplemental complaint shall be the same as for filing an original complaint.

E. With the Director's approval, a complainant may withdraw a complaint at any time by submitting a signed request for withdrawal to the Division.

R608-1-7. Notice Requirements.

A. Within ten days of the filing of a complaint, the Division shall provide notice by registered mail to the complainant, including:

1. The date the complaint was filed with the Division;

2. A copy of the complaint;

3. The time limits applicable to the complaint and investigation process;

4. A statement of the complainant's rights and obligations under the Act;

5. A statement of the complainant's right to commence a private civil action in state or federal court, with a statement of applicable time limits for commencing such action;

6. A statement advising the complainant that retaliation against any person, or individual associated with that person, who is filing, testifying, assisting, or participating in an investigation, conciliation or administrative proceeding, is a discriminatory housing practice prohibited by the Act; and

7. A statement, if applicable, that the terms of any rental agreement remain in effect.

B. Within ten days of the filing of a complaint, the Division shall provide notice by registered mail to the respondent, which notice shall include:

1. Identification of the alleged unlawful housing practice on which the complaint is based;

2. The date the complaint was filed with the Division;

3. A copy of the complaint;

4. A statement of time limits applicable to the complaint and investigation process;

5. A statement of the respondent's rights and obligations under the Act, including respondent's obligation to submit a response to the complaint, as required by R608-1-8.

6. A statement informing the respondent of the complainant's right to commence a private civil action in state or federal court, with a statement of applicable time limits for

commencing such action;

7. A statement advising the respondent that retaliation against any person, or individual associated with that person, who is filing a complaint, testifying, assisting, or participating in an investigation, conciliation, or administrative proceeding, is a discriminatory housing practice prohibited by the Act.

R608-1-8. Response to Complaint.

A. A respondent shall file a signed response to the complaint with the Division within 10 days from the date of the notice required by R608-1-7.B.

B. The response must address each allegation contained in the complaint, including any available and relevant data and information regarding respondent's business practices.

C. Division staff shall be available during normal business hours to provide reasonable assistance to respondents in completing and filing responses.

D. Failure to file a response may result in the Division concluding its investigation based on information provided by the complainant and such other information as is reasonably available to the Division. Alternatively, the Commission may use its subpoena powers to compel production of the information required by this rule.

R608-1-9. Investigation-Report.

A. Within 30 days of the filing of a complaint, the Division shall commence proceedings to throughly investigate and, if possible, conciliate the complaint.

B. The Division shall complete its investigation within 100 days after filing of a complaint. If the Division is unable to do, it shall notify the parties in writing of the reason for the delay.

C. The Division may, with reasonable notice to the parties, conduct on-site visits, interviews, and fact-finding conferences, and take such other action as is reasonably necessary to investigate the complaint. Pursuant to Section 57-21-8(2)(c) of the Act, the Commission may issue subpoenas to compel production of necessary evidence. Additionally, a party's unjustified failure to cooperate with the Division's reasonable investigative requests may result in the Division concluding its investigation based on such other information as is available to the Division.

D. The Division shall prepare a final investigative report on each complaint, which shall include:

1. A summary of all contacts with complainants and respondents, including the dates of such contacts;

2. A summary of contacts with witnesses, including the dates of contact; and

3. A summary of pertinent records.

R608-1-10. Determination.

A. On completion of the investigation, the Director shall review the investigative report and determine whether reasonable cause exists to believe that an unlawful housing practice has occurred.

B. If the Director finds no reasonable cause to believe that an unlawful housing practice has occurred, the Director shall issue a determination dismissing the complaint. The complainant may then take such other action as described in R608-1-12.

C. If the Director finds reasonable cause to believe that an unlawful housing practice has occurred, the Director shall take such further action as described in Rule R608-1-13.

R608-1-11. Conciliation.

A. During the period beginning with the filing of the complaint and ending with the Director's determination, the Division shall, to the extent feasible, engage in conciliation to settle the matter or, in accordance with HUD procedures, enter into an enforcement agreement.

1. Conciliation proceedings are confidential pursuant to Section 57-21-9(7)(a).

2. Any conciliation agreement shall be subject to approval by the Director.

3. Any party can enforce the signed and approved conciliation agreement in court proceedings.

B. Nothing in these rules prevents complainants and respondents from settling a complaint through their own efforts. However, the Division will not dismiss the complaint until the parties' settlement agreement has been submitted to, and approved by, the Director.

R608-1-12. Order of Dismissal-Reconsideration-Right to Private Civil Action.

A. If the Director finds no reasonable cause to believe that an unlawful housing practice has occurred, or is about to occur, the Director shall issue a Determination and Order dismissing the Complaint.

B. The complainant may ask the Director to reconsider such order of dismissal by complying with the requirements of Section 63G-4-302 of the Utah Administrative Procedures Act.

C. The Director shall issue a decision either granting or denying the request for reconsideration.

1. If the Director grants reconsideration, the Director shall reopen the investigation, amend the Director's prior Determination and Order, or take such other necessary action.

2. If the Director denies reconsideration, the Director's Determination and Order is not subject to any additional agency or judicial review. However, the complainant may commence a private civil action pursuant to Section 57-21-12(1).

R608-1-13. Order Finding Unlawful Housing Practice-Appeal-Choice of Forum.

A. If the Director concludes that an unlawful housing practice has occurred, the Division shall informally attempt to eliminate or correct the unlawful housing practice by conducting a conciliation conference pursuant to R608-1-11.

B. If conciliation is unsuccessful, the Director shall issue a determination ordering appropriate relief as authorized by Section 57-21-11. The Director's determination shall be made public unless the Director determines that the matter involves a privacy interest entitled to protection by law, or that disclosure is not required to further the purposes of the Act.

C. A respondent disagreeing with the Director's determination may obtain de novo review by filing a written request for review with the Director within 30 days from the date the Director's determination.

1. If no timely request for de novo review is filed, the Director's determination is the Commission's final order and not subject to additional agency or judicial review.

2. If a timely request for de novo review is filed, the Director shall:

a. Notify the parties of such request for review by regular mail at their last known address of record; and

b. Inform the parties that the review proceeding will be conducted by the Commission's Adjudication Division unless any party elects to have such review conducted in court.

3. Any election for court review must be received by the Director within 20 days of the date of mailing of the Director's notice.

R608-1-14. Representation of Complainants.

A. If a respondent has requested de novo review of the Director's Determination, the Commission shall consider whether the Determination is supported by substantial

evidence.

B. If the Commission concludes the Determination is supported by substantial evidence, the Commission shall provide legal representation to support the Determination in the de novo review proceeding.

C. If the Commission concludes the Determination is not supported by substantial evidence, the Commission shall not provide legal representation to support the Determination in the de novo review proceeding.

D. The Commission shall notify the parties of its conclusion regarding the existence or nonexistence of substantial evidence to support the Director's Determination within twenty days from the date the respondent files a request for de novo review.

E. The Commission's conclusion regarding the existence or nonexistence of substantial evidence to support the Director's Determination is not subject to further agency or judicial review.

R608-1-15. Procedures For De novo Review.

A. If, in accordance with the provisions of these rules, a de novo review proceeding is to be conducted by the Commission's Adjudication Division, the following standards apply:

1. The Division shall refer the matter to the Adjudication Division, which shall designate an Administrative Law Judge to serve as presiding officer;

2. The proceeding shall be conducted as a formal agency adjudicative proceeding pursuant to the relevant provisions of the Utah Administrative Procedures Act, Title 63G, Chapter 4;

3. Within 30 days from referral, the Administrative Law Judge shall schedule an evidentiary hearing to be held within 120 days of the referral, unless it is impracticable to do so;

4. Any aggrieved party may intervene in the action;

5. The Commission shall make final administrative disposition of the complaint within one year after the complaint is filed unless it is impracticable to do so. If the agency is unable to make a final administrative disposition within one year, the Commission shall notify the parties in writing of the reason for the delay.

B. If, in accordance with the provisions of these rules, a de novo review proceeding is to be conducted in court, the following standards apply:

1. If, pursuant to Rule R608-1-14, the Commission has concluded the Director's Determination is supported by substantial evidence, the Commission shall commence a court action to support the Determination. Such action shall be commenced within 30 days from the date of the election for court review.

2. If, pursuant to Rule R608-1-14, the Commission has concluded the Determination is not supported by substantial evidence, the Commission shall not commence a court action to support the Determination. In such case, the complainant may commence a civil action in a court of competent jurisdiction as provided by the Act.

R608-1-16. Declaratory Orders.

A. Purpose. As required by Section 63G-4-503, this rule provides the procedures for submission, review, and disposition of petitions for agency Declaratory Orders on the applicability of statutes, rules, and orders governing or issued by the agency.

B. Petition Form and Filing.

1. The petition shall be addressed and delivered to the Director who shall mark the petition with the date of receipt.

2. The petition shall:

a. be clearly designated as a request for an agency Declaratory Order;

b. clearly identify the statute, rule, or order to be reviewed;

c. describe in detail the situation or circumstances in which applicability is to be reviewed;

d. describe the reason or need for the applicability review, addressing in particular why the review should not be considered frivolous;

e. include an address and telephone number where the petitioner can be contacted during normal business hours;

f. declare whether the petitioner has participated in a completed or on-going adjudicative proceeding concerning the same issue within the past 12 months; and

g. be signed by the petitioner.

C. Review.

1. the agency shall not review a petition for a Declaratory Order that is:

a. not within the jurisdiction and competency of the agency;

b. trivial, irrelevant, or immaterial; or

c. otherwise excluded by state or federal law.

2. The Director shall promptly review and consider the petition and may:

a. meet with the petitioner;

b. consult with counsel or the Attorney General; or

c. take any action consistent with law that the agency deems necessary to provide adequate review and due consideration of the petition.

3. The Director may issue a Declaratory Order pursuant to Section 63G-4-503(6).

D. Administrative Review.

1. Administrative review of the Director's Declaratory Order shall be conducted pursuant to Section 63G-4-302.

R608-1-17. Assistance Animals.

A. General

1. Pursuant to the Utah Fair Housing Act and the federal Fair Housing Act, this rule defines the circumstances in which an individual with a disability is entitled to an assistance animal as a reasonable accommodation in a dwelling that would otherwise restrict or prohibit the presence of an animal. The term "assistance animals" as used in this rule means animals that assist, support, or provide service to persons with disabilities and may include or otherwise be referred to as service animals, emotional support animals, assistive animals, or therapy animals.

2. The assistance animal must be necessary to afford the individual an equal opportunity to use and enjoy a dwelling or to participate in the housing service or program. This requires a demonstrable relationship between the individual's disability and the assistance the animal provides.

a. Housing providers are entitled to verify the existence of the individual's disability as well as the need for the assistance animal as an accommodation for that disability if either is not readily apparent. Accordingly, an individual proposing an assistance animal as a reasonable accommodation for a disability may be required to provide documentation form a physician, psychiatrist, or other qualified healthcare professional that the animal provides support that alleviates a symptom or effect of the disability.

b. Housing providers need not permit an assistance animal as an accommodation to a person with a disability if the provider demonstrates that allowing the assistance animal would impose an undue financial or administrative burden or would fundamentally alter the nature of a housing facility, program or service.

c. Housing providers are not required to provide an accommodation that poses a direct threat to the health or safety of others. Thus, if a particular assistance animal has a history of dangerous behavior, if the animal is out of control

and its handler does not take effective action to control it, the housing provider is not required to accept the assistance animal.

B. Relationship of this rule to other laws addressing service animals.

1. The federal Fair Housing Act, the Utah Fair Housing Act and this rule establish the standards for assistance animals as a reasonable accommodation in housing.

2. This rule does not apply to use of service animals in public areas, common carriers, public conveyances, public accommodations or places of amusement, which are governed by standards set forth in Utah Code Ann. Section 62A-5b-101 et seq., "Rights and Privileges of a Person with a Disability."

KEY: housing, fair housing, discrimination, time
November 21, 2011 57-21-1 et seq.
Notice of Continuation August 29, 2016 63G-4-102 et seq.

R610. Labor Commission, Antidiscrimination and Labor, Labor.
R610-1. Minimum Wage, Clarify Tip Credit, and Enforcement.
R610-1-1. Authority.

This rule is enacted under authority of Section 34-40-105.

R610-1-2. Definitions.

The following definitions are in addition to the statutory definitions specified in Section 34-40-102.

A. "Division" means the Division of Antidiscrimination and Labor within the Labor Commission and includes the personnel within the Division responsible for enforcement.

B. "Hours employed" includes all time during which an employee is required to be working, to be on the employer's premises ready to work, to be on duty, to be at a prescribed work place, to attend a meeting or training, and for time utilized during established rest or break periods excluding meal periods of 30 minutes or more where the employee is relieved of all responsibilities.

R610-1-3. Coverage.

A. All employers employing workers in the state of Utah, except those exempted by Section 34-40-104, shall pay the established minimum hourly wages of $5.85 an hour for all hours employed effective September 8, 2007; $6.55 an hour for all hours employed effective July 24, 2008; and $7.25 an hour for all hours employed effective July 24, 2009.

B. As per Sections 34-23-301 and 34-40-103, effective July 23, 2007, a minor employee shall be paid at least $4.25 per hour for the first 90 days of employment with an employer; and thereafter, minimum wage established in subsection A of this rule.

C. Any employer claiming exemption under Subsection 34-40-104(1)(k), shall provide to the Division a statistical report of the average wage paid within 60 days of the end of the regular operating season. The Division may, upon notice, perform an on-site inspection to verify the report in accordance with Sections 34-40-201 and 34-40-203.

R610-1-4. Tips and Commissions.

A. An employer may credit the tips, sometimes referred to as gratuities, received by tipped employees (an example would be waiters and waitresses) against the employer's minimum wage obligation. The tips must be received by the employee, reported to the employer, and must reach a threshold of at least $30.00 per month before credit can be allowed.

B. An employer has a cash wage obligation of at least $2.13 per hour in meeting the required minimum wage. If an employee's tips combined with the employer's cash wage obligation of $2.13 per hour do not equal the minimum hourly wage requirement, the employer must increase its cash wage obligation to make up the difference.

C. A compulsory charge for service imposed on a customer by an employer's establishment, is not a tip. Such charges are part of the employer's gross receipts and within its discretion to allocate. Where service charges are imposed and the employee receives no tips, the employer must pay the entire minimum wage and overtime required by law.

D. All tips shall be retained by the employee receiving the tips. However, this requirement does not preclude tip pooling or sharing arrangements where an employer mandates that tips be pooled and divided or shared among those employees who customarily and regularly receive tips.

1. A bona fide tip pooling or sharing arrangement may include employees who customarily and regularly receive tips from customers directly or via a tip pooling or sharing arrangement.

2. Dishwashers, chefs, cooks, and janitors are not tipped employees and do not qualify for a tip credit nor are they eligible to participate in an employer mandated tip pooling or sharing arrangement.

E. Every employer using the tip credit must so inform the affected employee at the time of hire. Any tip pooling or sharing arrangement must be made in writing and provided to each affected employee at the time of hire or prior to implementation.

F. Where tips are charged on a credit card, and the employer must pay the credit card company a percentage of the bill for its use, the employer may reduce the amount of the credit card tips paid over to the employee by a percentage no greater than that charged by the credit card company.

G. In computing the minimum wage, tips and commissions must be counted in the payroll period in which the tip or commission is earned.

H. This section does not apply to tips or commissions as delineated in Section 34-40-104(1).

R610-1-5. Enforcement of Minimum Wage.

A. The Division may enforce compliance with the state minimum wage in the same manner as outlined in R610-3.

B. When more than one employee is affected by noncompliance of minimum wage requirements, the Division shall treat this alleged infraction of noncompliance as a class action.

C. The Division may commence agency action in accordance with Section 63G-4-201 to investigate and determine compliance or noncompliance.

D. If an employer is found in noncompliance with the state minimum wage requirements, that employer shall be subject to penalties under Section 34-40-204.

E. If the employees determine that a civil action to enforce compliance with state minimum wage is necessary, they may bring an action under Section 34-40-205.

R610-1-6. Filing Procedure and Commencement of Agency Action.

For purposes of Section 63G-4-201, commencement of an adjudicative proceeding at the Division to resolve a complaint under minimum wage requirements is accomplished by the complainant filing a complaint form. The complaint form shall act as a request for agency action and the form and accompanying agency cover letter shall together include all information specified in Subsection 63G-4-201 (2).

R610-1-7. Investigation and Enforcement.

If, upon investigation, the Division concludes that a violation of Sections 34-40-103, 34-40-104, 34-40-201, or 34-40-203 has occurred it may impose a penalty pursuant to Sections 34-40-202 and 34-40-204.

R610-1-8. Time.

A. An Order is deemed issued on the date on the face of the Order which is the date the presiding officer signs the Order.

B. In computing any period of time prescribed or allowed by these rules or by applicable statute:

1. The day of the act, event, finding, or default, or the date an Order is issued, shall not be included;

2. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a state legal holiday, in which event the period runs until the end of the next working day;

3. When the period of time prescribed is less than seven days, intermediate Saturdays, Sundays, and state legal

holidays shall be excluded in the computation;

4. No additional time for mailing shall be allowed.

R610. Labor Commission, Antidiscrimination and Labor, Labor.
R610-2. Employment of Minors.
R610-2-1. Authority.

This rule is enacted under authority of Section 34-23-104.

R610-2-2. Definitions.

A. "Commission" means the Labor Commission.

B. "Complainant" means any person making a claim, or a representative of a minor alleging a violation.

C. "Complaint" means a properly completed Complaint Form filed with the Division by a complainant or a representative of the complainant.

D. "Defendant" means any person or entity against whom a claim is made.

E. "Director" is the Director of the Division of Antidiscrimination and Labor. Director also means a designee denoted by the Commission to serve in the Director's absence.

F. "Division" means the Division of Antidiscrimination and Labor within the Commission and the personnel within the Division responsible for enforcement.

G. "Employer" includes every person, firm, partnership, association, limited liability company, corporation, receiver, or other officer of any of the above mentioned classes, employing any person in this state or who permits any person to perform work, labor, or services.

H. "Employer's immediate family" includes children, step children, brothers, and sisters living in the home of a sole proprietor or partnership, but may not apply to a corporation.

I. "Hazardous occupation" means any occupation defined as hazardous by the United States Department of Labor under 29 U.S.C. 201 et seq. of the Fair Labor Standards Act.

J. "Hearing Officer" means a presiding officer who is designated by the Commission to commence adjudicative proceedings, process claims and complaints, conduct investigations, hold hearings, assess penalties, issue subpoenas, and enter Orders.

K. "License" means a document issued by the Division to an employer employing minors in door-to-door sales.

L. "Nonprofit group" means a group recognized under Section 501(c) of the Internal Revenue Code as having nonprofit exempt status.

M. "Presiding Officer" includes those defined by Section 63G-4-103(1)(h)(I).

N. Additional definitions may be found in Section 34-23-103.

R610-2-3. Employment of Minors - General.

A. Every employer must allow the opportunity for a meal period of not less than 30 minutes and not later than five hours after the beginning of a minor employee's workday. If, during the meal period, the employee cannot be completely relieved of all duties and permitted to leave the work station or area, the meal period must be paid as time worked.

B. At least a 10 minute paid rest period for each four hours, or fraction thereof, shall be provided for each minor employee; however, no minor employee shall be required to work over three consecutive hours without a 10 minute rest period.

C. In those unusual situations where the specific provisions of subsections A. or B. cannot be met, the Division may decide whether the general intent of the rules has been met to ensure attainment of reasonable safeguards for a minor's health, safety, and education.

R610-2-4. Employment of Minors Engaged in Door-to-Door Sales, License.

A. The following shall apply for minors in the age range of 12 through 15 who work for income by engaging in sales of cookies, candies, magazines, merchandise coupons, and other similar products by door-to-door methods at locations including residential housing areas, shopping centers, and malls:

1. An employer-employee relationship is determined to exist if minors are paid by time, piece, carton, quantity, task, bonus, or any other basis of calculation;

a. employees shall be paid at least the Utah minimum wage in effect at the time the work is performed and shall include all time from the time of pickup to the time the minor is returned to the minor's home, except for that time utilized as a meal period as specified in R610-2-3.A.;

b. minors engaged in door-to-door sales of goods, products, or services are not independent contractors or outside sales personnel for purposes of payment of minimum wage;

2. Minors cannot be transported further than 30 miles from where they reside;

3. Minors so engaged must work in pairs, as a team, on the same or opposite side of the street while selling in residential housing areas;

4. Minors so engaged must be supervised by an adult supervisor for each crew of ten or fewer minors;

5. Minors must be within the sight or sound of the adult supervisor at least once every hour while selling in residential housing areas;

6. Minors must be returned to their respective homes daily after each day's work by 9:30 p.m.;

7. Minors must be allowed an opportunity to use rest room facilities at least once every three hours;

8. Minors must be allowed to partake of food and drink if they work more than three consecutive hours. This benefit cannot be utilized by the employer to coerce minors into making a set number of sales;

9. The driver of the vehicle that transports minor workers must be licensed by the state to transport minors;

10. Businesses must be licensed in accordance with the respective city or county ordinances in which they are employed;

11. Five days prior to conducting business in Utah, every employer employing minors who operates a door-to-door sales business must obtain a license from the Division. A written application for a license shall be filed with the Division and shall include:

a. the company or business name, address, and telephone number;

b. the name, address, and telephone number of the owner, each partner from applicant partnerships, each member of applicant limited liability companies, or the principals, officers, and directors of applicant corporations;

c. the business or occupation engaged in by the owner, partners, members, principals, officers, and directors for at least two years immediately preceding the filing of the application;

d. the name and address of any supplier of any item to be sold by minors for the door-to-door sales operation;

e. the identity of any out of state affiliation, and the name, address, and telephone number of local contact person;

f. certified results of a criminal history background check by the Utah Bureau of Criminal Identification for the owner, each partner from applicant partnerships, each member of applicant limited liability companies, the principals, officers, and directors of applicant corporations, and of all supervisors and van drivers who have contact with the minor employees; the criminal history background check must be current for the year the license is sought;

g. a recent photograph of the owner, each partner from applicant partnerships, each member of applicant limited liability companies, or the principals, officers, and directors of applicant corporations; and

h. two separate letters of recommendation attesting to the reliability and responsibility of each owner, partner, member, principal, officer, director, supervisor, and van driver. These letters must be written and signed by persons who are residents of the state of Utah and who have known the owner, partner, member, principal, officer, director, supervisor, or van driver at least one year.

12. For each supervisor or van driver hired subsequent to submission of application for license the business operator shall submit to the Division the certified results of a criminal history background check as delineated in Subsection R610-2-4.A.11.f. and letters of recommendation as delineated in Subsection R610-2-4.A.11.h. prior to contact with any minor employee by the supervisor or van driver.

13. Before a license shall be issued pursuant to this rule, the applicant shall deposit with the Commission a bond in the penal sum of $10,000 with two or more sureties. The bond shall be made payable to the Labor Commission and shall be conditioned that the applicant, supervisor, and van driver will comply with the provisions of Title 34, Chapters 23, 28, and 40, and with the provisions of R610-1, R610-2, and R610-3, and shall pay all penalties or damages occasioned by any violation of these provisions in carrying on the business for which the license is issued.

14. The Division may deny or revoke a license when:

a. an applicant, supervisor, or van driver has been adjudged guilty of a violation of any criminal act, other than a minor traffic violation, in any state; or

b. an applicant has been determined by any state or federal agency to be in violation of any labor law within the past five years; or

c. any information provided as a part of the application process is false or misleading; or

d. any applicant fails to complete the licensing process and fails to provide the information requested; or

e. any business operator fails to submit to the Division the name and address of any van driver or supervisor hired along with the results of a criminal history background check as delineated in Subsection R610-2-4.A.11.f. or letters of recommendation as delineated in Subsection R610-2-4.A.11.h. at the time of hiring the van driver or supervisor; or

f. any business operator fails to comply with the provisions of Utah labor law or Labor Rules 610-1, 610-2, or 610-3.

15. Each license issued pursuant to this rule shall expire on December 31 of the year issued.

16. Annually, a completed application for renewal of license form must be completed and submitted to the Division along with all requested documents prior to December 31.

17. A door-to-door sales business shall not publish, print, or otherwise represent that the Commission has approved of any product or service offered by the door-to-door sales business.

B. Any school sponsored group, scout group, or fund raising group selling for the benefit of its organization must provide group members with an identification card, signed by an official of the organization with the organization's official telephone number affixed for verification purposes. Subsections R610-2-4.A.3. through R610-2-4.A.10. shall apply to these groups and the minor participants.

C. Nothing contained in Subsections R610-2-4.A. and R610-2-4.B. shall apply to nonprofit groups where the individual selling for the group is a true volunteer and there is no intention, understanding, expectation, agreement, or representation that the individual selling for the nonprofit group will receive any individual compensation or reimbursement for the sale.

D. Nothing in Subsections R610-2-4.A. and R610-2-4.B. shall prohibit or abridge the right of a minor to deliver, sell, or solicit subscriptions for newspapers or other regularly printed material door-to-door when the minor is a news carrier of the newspaper or other regularly printed material and delivers them to an established readership for consideration.

R610-2-5. Written Authorization.

Minors seeking employment in occupations where authorization is required by the Commission as set forth in Sections 34-23-201 and 34-23-207(4), shall file a written request for authorization. Requests for authorization shall be made in writing and provide the name of the minor, his or her address, telephone number, date of birth, the name and address of the parent or guardian approving of the employment, and specify any related training completed or in progress. The name of the prospective employer, the address and telephone number, the name and title of the employer's representative, the type of business, the specific duties of the minor, and the specific equipment or machinery the minor would be allowed to operate or repair shall also be provided in sufficient detail to allow a decision regarding the request for authorization. The Division shall review all requests for authorization and may issue authorization signed by the Division Director where appropriate, but shall in such cases determine and establish the hours and conditions of labor and employment for such authorization.

R610-2-6. Filing Procedure and Commencement of Agency Action.

For purposes of Section 63G-4-201, commencement of an adjudicative proceeding at the Division to resolve an alleged violation of Utah statutes or rules regarding employment of minors is accomplished by the filing of a complaint or by a notice of agency action filed by the Division at its discretion.

A. The alleged violation shall be filed in writing by the complainant or an authorized representative of the complainant on a form provided by the Division. The complaint form shall act as a request for agency action and the form and accompanying agency cover letter shall together include all information specified in Subsection 63G-4-201(2). The complaint shall include the complainant's name and address, the defendant's name and address, a brief and concise statement of the complaint or allegation, and the complainant's or his authorized representative's signature.

1. Upon receipt of a complaint, the Division shall enter its receipt and assign a complaint number.

2. The Division may telephone the Defendant and attempt to resolve the complaint.

3. When a rapid resolution is not effected, the Division shall mail a copy of the complaint and a blank answer form together with an accompanying agency cover letter.

4. The Defendant shall have ten working days from the date of the letter to submit an answer to such complaint.

5. The Defendant's answer shall be mailed to the Complainant who may submit an answer within ten working days.

6. Upon receiving a third complaint against an employer within a 12 month period, the Division shall invoke the penalty provision pursuant to Section 34-23-402, and notify the Defendant of the penalty at the time of notice under Subsection A.3.

B. The Division may at its discretion bring an agency action to determine any violation of any statute or rule pertaining to employment of minors, or any appropriate

penalties, wages, or other enforcement relief. Commencement of an adjudicative proceeding is accomplished by a notice of agency action filed by the Division.

C. An adjudicative proceeding initiated pursuant to Subsection A. or B. is designated as an informal adjudicative proceeding and shall be conducted informally.

D. An informal adjudicative proceeding may be converted to a formal adjudicative proceeding pursuant to Subsection 63G-4-202(3).

R610-2-7. Default.

The presiding officer may enter an order of default against a party pursuant to Section 63G-4-209.

R610-2-8. Investigation.

For the purpose of determining the validity or invalidity of the filed complaint, the Division pursuant to Section 34-23-401, may:

A. Interview and obtain additional statements from either party;

B. Attempt to obtain from the Defendant an answer and statement where the Defendant has failed to submit an answer to the complaint;

C. Examine, copy, inspect, and summarize any relevant records or documents held by the parties or other persons;

D. Obtain written statements of third persons relevant to the complaint;

E. Contact and receive relevant information from other government agencies or officials; or

F. Make any and all relevant inquiries necessary in making a preliminary decision.

R610-2-9. Preliminary Findings.

A. At the conclusion of the investigation or upon the Defendant's failure to respond to the allegations of the complaint, the Division may issue a Preliminary Finding.

B. Preliminary Findings shall set forth the issue or issues of the complaint and state the findings based on the information contained in the file. When:

1. The complaint has been determined to be valid the Preliminary Finding shall contain a brief statement of the reason thereof, the statute(s) or rule(s) violated, and specify the remedy which must be complied with within ten working days from the date of the document.

2. The complaint has been determined to be invalid the Preliminary Finding shall contain a brief statement of the reason thereof and contain notice that the complaint is being dismissed.

C. Preliminary Findings shall be mailed to the parties and any attorney of record.

D. Any party may submit a request for review or request an informal hearing; such request must be made in writing and received by the Division within ten working days of the date of the Preliminary Finding and shall state the reason for the request and include any available evidence to support their position.

E. Failure to request a review or request an informal hearing within the time prescribed in Subsection D precludes any such review or hearing.

R610-2-10. Order To Cease And Desist and Penalty.

A. A hearing officer may issue an Order To Cease And Desist the act of violation and may include an order of penalty based on the Preliminary Finding issued by the Division.

B. An Order To Cease And Desist the act of violation and an Order Of Penalty may be issued following an investigation and bypassing a Preliminary Finding where:

1. The act of violation is of such magnitude as to clearly exceed the standard of reasonable safeguards for a minor's health, safety, and education pursuant to Section 34-23-101.

2. The employer admits the violation has occurred or is occurring.

3. The employer failed to respond to the allegations of the complaint within the time specified or to participate in the investigation, or when the Division deems appropriate.

C. Attorney fees, in addition to the Order To Cease And Desist and a penalty, if any, shall be allowed in accordance with Section 34-28-13.

D. After issuance of the Order To Cease And Desist, the only agency review available is that specified in Section R610-2-12.

R610-2-11. Hearings.

A. Pursuant to Subsection 63G-4-202(1), the Division may resolve the complaint for violation filed pursuant to Subsection R610-2-6.A., or an agency action commenced pursuant to Subsection R610-2-6.B. by holding an informal hearing subject to the provisions of Section 63G-4-203.

B. Where the Division deems appropriate, or upon a timely request of either party, an informal hearing may be scheduled.

C. Notice of hearing shall be mailed to the parties involved in the complaint advising them of the time, date, and place of the hearing. Notice of hearing shall be mailed to the last known address on the Commission's record and shall constitute proper notice.

D. Any request for continuance or change in the scheduled hearing date or time must be made to the Division at least seven working days prior to the scheduled date and shall state the reason for the request. The hearing officer may grant or deny the request.

E. The hearing officer may at his or her option record any hearing or accept testimony under oath.

F. The parties shall submit all relevant evidence, not previously submitted to the Division, at the hearing.

G. The hearing officer may request additional evidence of either party and set time limits for its submission, prior to the close of the hearing.

H. A signed Order issued by the hearing officer shall be pursuant to Section 63G-4-203, and shall be promptly mailed to each of the parties. Attorney fees in addition to the Order and penalty, if any, may be allowed in all Orders. The Order issued may be:

1. An Order To Cease And Desist any act of violation and may include a penalty pursuant to Section 34-23-401.

2. An Order specifying appropriate penalties, wages or other enforcement relief.

3. An Order For Dismissal terminating proceedings on the complaint or agency action by the Division.

I. After issuance of the hearing officer's Order, the only agency review available is that specified in Section R610-2-12.

R610-2-12. Agency Review.

A. After issuance of an Order To Cease And Desist or of a hearing officer's Order, the only agency review available to any party is a request for reconsideration as specified in Section 63G-4-302.

B. Reconsideration shall be based on the contents of the file. No new evidence will be accepted.

C. The Division Director is the reviewer for the purpose of reviewing all matters where a request for reconsideration was properly filed and shall do so pursuant to Section 63G-4-302(3).

R610-2-13. Judicial Review.

Judicial review of an Order To Cease And Desist or of a

hearing officer's Order are pursuant to Section 63G-4-402.

R610-2-14. Declaratory Orders.

As required by Section 63G-4-503, this rule provides the procedure for submission, review, and disposition of petitions for agency Declaratory Orders on the applicability of statutes, rules, and Orders governing or issued by the agency.

A. Petition form and filing.

1. The petition shall be addressed and delivered to the Director, who shall mark the petition with the date of receipt.

2. The petition shall:

a. be clearly designated as a request for an agency Declaratory Order;

b. identify the statute, rule, or Order to be reviewed;

c. describe in detail the situation or circumstance in which applicability is to be reviewed;

d. describe the reason or need for the applicability review, addressing in particular why the review should not be considered frivolous;

e. include an address and telephone number where the petitioner can be contacted during the regular work days;

f. declare whether the petitioner has participated in a completed or on-going adjudicative proceeding concerning the same issue within the past 12 months; and

g. be signed by the petitioner.

B. Reviewability.

1. The agency shall not review a petition for Declaratory Orders that is:

a. not within the jurisdiction and competence of the agency;

b. trivial, irrelevant, or immaterial; or

c. otherwise excluded by state or federal law.

C. Petition review and disposition.

1. The Director shall promptly review and consider the petition and may:

a. meet with the petitioner;

b. consult with counsel or the Attorney General; or

c. take any action consistent with the law that the agency deems necessary to provide the petition adequate review and due consideration.

2. The Director may issue an Order pursuant to Subsection 63G-4-503(6).

D. Administrative review of the Declaratory Order is per Section 63G-4-302, only.

R610-2-15. Enforcement.

A. Abstracts and docketing of Orders.

1. An abstract of the final Order shall be docketed by the Commission in the office of the clerk of the district court of any county in the state. Time of receipt of the abstract must be noted thereon and entered in the judgment docket.

2. The docketing of such Order shall constitute a lien against the real property of the defendant situated in the county for a period of eight years.

B. Execution may be issued on the lien within the same time and in the same manner and with the same effect as if the Order were a judgment of the district court.

C. Appeals and judgment enforcement and fees.

1. A copy of each Order or final agency action not complied with after 30 days of its issuance and all notices of appeal of any Order or final agency action may be sent to the office of the appropriate County Attorney, or to counsel employed or appointed by the Commission, to represent the Commission on all appeals and to enforce judgments.

2. Counsel employed or appointed by the Commission or the County Attorney for the county in which the defendant resides or conducts business shall represent the Commission on all appeals and shall enforce judgments.

3. Reasonable attorney's fees and costs on de novo appeals where the Commission prevails and for judgment enforcing procedures shall be awarded the Commission, the appointed counsel, or the county.

R610-2-16. Mailing.

The Division shall send all mailings to the parties and attorneys of record by regular first class mail to the last known address in the Division's records.

R610-2-17. Time.

A. An Order is deemed issued on the date on the face of the Order which is the date the presiding officer signs the Order.

B. In computing any period of time prescribed or allowed by these rules or by applicable statute:

1. The day of the act, event, finding, or default, or the date an Order is issued, shall not be included;

2. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a state legal holiday, in which event the period runs until the end of the next working day;

3. When the period of time prescribed is less than seven days, intermediate Saturdays, Sundays, and state legal holidays shall be excluded in the computation;

4. No additional time for mailing shall be allowed.

	34-40-101 et seq.
	63G-4-102 et seq.

R610. Labor Commission, Antidiscrimination and Labor, Labor.
R610-3. Filing, Investigation, and Resolution of Wage Claims.
R610-3-1. Authority.

This rule is enacted under the authority of Sections 34-23-104, 34-28-9, 34-28-19 and 34-40-105.

R610-3-2. Definitions.

The following definitions are in addition to the statutory definitions specified in Sections 34-23-103, 34-28-2, and 34-40-102.

A. "Claim" means a properly completed Wage Claim Assignment Form, filed with the Division by a wage claimant.

B. "Claimant" means a person making a claim, as stated in subsection A.

C. "Commission" means the Labor Commission.

D. "Defendant" means a person against whom a claim is made.

E. "Director" is the Director of the Division of Antidiscrimination and Labor. Director also means a designee denoted by the Commission to serve in the Director's absence.

F. "Division" means the Division of Antidiscrimination and Labor within the Labor Commission and the personnel responsible for receiving, investigating and resolving claims.

G. "Hearing Officer" means a presiding officer who is designated by the Commission to commence adjudicative proceedings, process claims and complaints, conduct investigations, hold hearings, assess penalties, issue subpoenas, and enter Orders.

H. "Hours employed" includes all time during which an employee is required to be working, to be on the employer's premises ready to work, to be on duty, to be at a prescribed work place, to attend a meeting or training, and for time utilized during established rest or break periods excluding meal periods of 30 minutes or more where the employee is relieved of all responsibilities.

I. "Mail" or "Mailed" means first class mailing sent to the parties of a wage claim or claim of retaliation, to the last known address on the Commission's record.

J. "Presiding Officer" includes those defended by Section 63G-4-103(1)(h)(i).

R610-3-3. Exceptions.

Public, general agricultural, household domestic, and certain other employments are excepted from the provisions of these rules pursuant to Section 34-28-1.

R610-3-4. Filing Procedure and Commencement of Agency Action.

A. For purposes of Section 63G-4-201, commencement of an adjudicative proceeding at the Division to resolve a claim for wages is accomplished by the wage claimant filing a wage claim assignment form. The wage claim assignment form shall act as a request for agency action and the form and accompanying agency cover letter shall together include all information specified in Section 63G-4-201(2).

B. An employee who is denied full payment of wages due or is affected or aggrieved by a violation of a statutory provision may file a claim with the Division on a form provided by the Division for that purpose.

1. Besides amounts due an employee for labor or services on a time, task, piece, commission, or other reasonable method of calculating the amount, wages also includes the following items, if due under an agreement with the employer or under a policy of the employer:

a. vacation;

b. holiday;

c. sick leave;

d. paid time off; and

e. severance payments and bonuses.

C. The claim shall include the Claimant's name and address, the Defendant's name and address, a brief and concise statement of the claims, complaints, or allegations, the amount of money which is alleged to be due the Claimant and the Claimant's signature or the signature of the Claimant's authorized representative.

D. Upon receipt of a claim, the Division shall enter its receipt and assign a claim number.

E. The Division may telephone the Defendant and attempt to resolve the claim.

F. When a rapid resolution is not effected, the Division shall mail to the Defendant a copy of the claim and a blank answer form together with an accompanying agency cover letter.

G. The Defendant shall have ten working days from the date of the letter to submit an answer to the claim.

H. Where the Defendant concedes the validity of the claim, the Defendant may pay or otherwise satisfy the claim within ten working days from the date of the letter without being subject to a penalty, under Section 34-28-9(2).

1. As an exception to Subsection H, defendants that are repeat offenders by having more than two wage claims filed against them within a running year, which claims are determined by the Division to be valid and to not have resulted from the same facts or circumstances, shall be subject to a penalty in accordance with Section 34-28-9(2).

I. The Division shall by mail provide a copy of the defendant's answer to the claimant. The claimant shall have ten working days from the date of the letter to submit a rebuttal, if any.

R610-3-5. Investigation.

For the purpose of determining the validity or invalidity of the filed claim, the Division pursuant to Sections 34-28-9 and 34-28-10, may:

A. Interview and obtain additional statements from either party;

B. Attempt to obtain from the Defendant an answer and statement where the Defendant has failed to submit an answer to the claim;

C. Examine, copy, inspect, and summarize relevant records or documents held by the parties or other persons;

D. Obtain written statements of third persons relevant to the claim;

E. Contact and receive relevant information from other government agencies or officials; or

F. Make relevant inquiries necessary in making a preliminary decision.

R610-3-6. Preliminary Findings.

A. At the conclusion of the investigation or upon the Defendant's failure to respond to the allegations of the claim, the Division may issue a Preliminary Finding.

B. Preliminary Findings shall set forth the issue or issues of the claim and state the findings based on the information contained in the wage claim file.

1. If the claim has been determined to be valid the Preliminary Finding shall contain a brief statement of the reason thereof, the statute(s) or rule(s) violated, and specify the remedy which shall be complied with within ten working days from the date of the document.

2. If the claim has been determined to be invalid the Preliminary Finding shall contain a brief statement of the reason thereof and contain notice that the claim is being dismissed.

C. Preliminary Findings shall be mailed to the parties

and any attorney of record.

D. A party may submit a request for review or request an informal hearing. This request shall be made in writing and received by the Division within ten working days of the date of the Preliminary Finding and shall state the reason for the request and include any available evidence to support their position.

E. Failure to request a review or request an informal hearing within the time prescribed in Subsection D. precludes a review or hearing.

R610-3-7. Default Order.

A. A hearing officer may issue an Order On Default And Order To Pay based on the Preliminary Finding issued by the Division.

B. An Order On Default And Order To Pay may be issued following an investigation and bypassing a Preliminary Finding if any of the following occur:

1. The Claimant is issued a non-negotiable check in the payment of wages in violation of Section 34-28-3(2).

2. The Defendant admits the validity of the claim.

3. The Defendant failed to respond to the allegations of the claim within the time specified or to participate in the investigation, or when the Division deems appropriate.

C. The penalty provided for by Section 34-28-9(2) may be awarded in addition to the award for wages.

D. After issuance of the Order On Default And Order To Pay, the only agency review available is that specified in R610-3-11.

R610-3-8. Agreements and Settlements.

A. No provision of Title 34, Chapter 28, can be contravened by a mutual agreement between an employee and employer unless the agreement is approved by the Division.

B. Notice of settlement conference shall be mailed to the parties involved in the wage claim advising them of the time, date, and place of the conference. A continuance shall only be granted for good cause, at the option of the hearing officer.

C. In the event of settlement the parties shall sign a settlement agreement stating the terms of the settlement, and shall include:

1. A stipulation that in the event of breach of the agreement the Division may enter an Order enforcing the settlement agreement; and

2. Approval of the settlement agreement by a representative designated by the Division.

R610-3-9. Hearings.

A. Pursuant to Section 63G-4-202(1), the Division may resolve the claim for wages filed pursuant to R610-3-4 by holding an informal hearing subject to the provisions of Section 63-46b-5. This hearing may be converted to a formal hearing pursuant to Section 63G-4-202(3).

B. Where the Division deems appropriate or upon a timely request of either party, an informal hearing may be scheduled.

C. Notice of hearing shall be mailed to the parties involved in the wage claim advising them of the time, date, and place of the hearing and shall specify if the hearing is an informal or a formal proceeding. Notice of hearing shall be mailed and shall constitute proper notice.

D. A continuance shall only be granted for good cause at the option of the hearing officer.

E. The hearing officer may at his or her option record a hearing or accept testimony under oath.

F. The parties shall submit all relevant evidence, not previously submitted to the Division, at the hearing.

G. The hearing officer may request additional evidence of either party and set time limits for its submission, prior to the close of the hearing.

H. A signed Order issued by the hearing officer shall be pursuant to Section 63G-4-203, and shall be promptly mailed to each of the parties. The Order issued may be:

1. An Order awarding payment to the Claimant and may include a penalty pursuant to Section 34-28-9(2), in addition to the wages determined due.

2. An Order For Dismissal terminating proceedings on the wage claim by the Division.

I. After issuance of the hearing officer's Order, the only agency review available is that specified in R610-3-11.

R610-3-10. Attorney Fees.

A. Pursuant to Section 34-28-9(4)(b), attorney fees and costs shall be allowed to counsel employed by the commission, the attorney general or the county representing the commission in appeals when the plaintiff prevails and in judgment enforcement proceedings. Attorney fees shall be allowed in the amount of $500 or one-third of the award, whichever is greater.

R610-3-11. Agency Review.

A. After issuance of an Order On Default And Order To Pay or of a hearing officer's Order, the only agency review available to a party is a request for reconsideration as specified in Section 63G-4-302.

B. Reconsideration shall be based on the contents of the file. No new evidence shall be accepted.

C. The Division Director is the reviewer for the purpose of reviewing all matters where a request for reconsideration was properly filed and shall do so pursuant to Section 63G-4-302(3).

R610-3-12. Judicial Review.

Judicial review of a wage claim Order is pursuant to Section 63G-4-402.

R610-3-13. Declaratory Orders.

As required by Section 63G-4-503, this rule provides the procedure for submission, review, and disposition of petitions for agency Declaratory Orders on the applicability of statutes, rules, and Orders governing or issued by the agency.

A. Petition form and filing.

1. The petition shall be addressed and delivered to the Director, who shall mark the petition with the date of receipt.

2. The petition shall:

a. be clearly designated as a request for an agency Declaratory Order;

b. identify the statute, rule, or Order to be reviewed;

c. describe in detail the situation or circumstance in which applicability is to be reviewed;

d. describe the reason or need for the applicability review, addressing in particular why the review should not be considered frivolous;

e. include an address and telephone number where the petitioner can be contacted during the regular work days;

f. declare whether the petitioner has participated in a completed or on-going adjudicative proceeding concerning the same issue within the past 12 months; and

g. be signed by the petitioner.

B. Reviewability.

1. The agency shall not review a petition for Declaratory Orders that is:

a. not within the jurisdiction and competence of the agency;

b. trivial, irrelevant, or immaterial; or

c. otherwise excluded by state or federal law.

C. Petition review and disposition.

1. The Director shall promptly review and consider the

petition and may:

a. meet with the petitioner;

b. consult with counsel or the Attorney General; or

c. take action consistent with the law that the agency deems necessary to provide the petition adequate review and due consideration.

2. The Director may issue an Order pursuant to Section 63G-4-503(6).

D. Administrative review of the Declaratory Order is per Section 63G-4-302, only.

R610-3-14. Enforcement.

A. Docketing of Order or final agency action as a lien.

1. An abstract of the final Order shall be docketed by the Division in the office of the clerk of the district court of any county in the state. Time of receipt of the abstract shall be noted thereon and entered in the judgment docket pursuant to Section 34-28-9(3)(a), (b), and (c).

2. The docketing of an Order shall constitute a lien against the real property of the defendant situated in the county for a period of eight years.

B. Execution may be issued on the lien within the same time and in the same manner and with the same effect as if the Order were a judgment of the district court.

C. Appeals and judgment enforcement and fees.

1. A copy of each Order or final agency action not complied with after 30 days of its issuance and all notices of appeal of an Order or final agency action may be sent to the office of the appropriate County Attorney, or to counsel employed or appointed by the Commission, to represent the Commission on all appeals and to enforce judgments.

2. Counsel employed or appointed by the Commission or the County Attorney for the county in which the plaintiff or the defendant resides, depending on the district in which the final Order is docketed, shall represent the Commission on all appeals and shall enforce judgments.

3. Reasonable attorney's fees and costs on de novo appeals where the Commission prevails and for judgment enforcing procedures shall be awarded the Commission, the appointed counsel, or the county.

R610-3-15. Time.

A. An Order is deemed issued on the date on the face of the Order which is the date the presiding officer signs the Order.

B. In computing a period of time prescribed or allowed by these rules or by applicable statute:

1. The day of the act, event, finding, or default, or the date an Order is issued, shall not be included;

2. The last day of the period so computed shall be included, unless it is a Saturday, a Sunday, or a state legal holiday, in which event the period runs until the end of the next working day;

3. When the period of time prescribed is less than seven days, intermediate Saturdays, Sundays, and state legal holidays shall be excluded in the computation;

4. No additional time for mailing shall be allowed.

R610-3-16. Retaliation.

A. Section 34-28-19 prohibits an employer from retaliating against employees. Claims of unlawful retaliation shall be resolved as follows:

1. An employee alleging retaliatory action by his employer may file a complaint with the Division. The Division shall mail a copy of the complaint to the employer and allow ten working days for the employer to submit a written response to the complaint. Additionally, the Division may attempt to resolve the complaint by informal means.

2. After the time allowed for response and if informal resolution has been unsuccessful, the Division shall conduct a hearing to determine whether the employer has violated Section 34-28-19 by retaliating against the employee. The Division's determination shall be mailed to each party.

a. If the Division determines that no retaliation has occurred, it shall dismiss the employee's complaint.

b. If the Division determines retaliation has occurred, it shall order the employer to end the retaliatory action and reimburse the employee for lost wages and benefits.

B. Right of Appeal:

1. The only agency review available to any party is a request for reconsideration as specified in Section 63G-4-302.

2. Reconsideration shall be based on the contents of the file and submitted within 20 days of the date of the issued order. No new evidence will be accepted.

3. The Division Director is the reviewer for the purpose of reviewing all matters where a request for reconsideration was properly filed and shall do so pursuant to Section 63G-4-302 (3).

4. Judicial review of the order may be pursued as specified in Section 63G-4-402.

C. The Division may enforce any final order as provided in Section 34-28-9(3) and (4).

R610-3-17. Bankruptcy.

In the event the defendant files a petition with the U.S. Bankruptcy Court, the Division shall suspend its administrative action until the bankruptcy case is concluded or dismissed.

R610-3-18. Deductions and Offsets.

The following sums shall constitute lawful deductions or offsets from wages due an employee:

A. Sums deducted from wages pursuant to the Internal Revenue Code or other Federal tax provision;

B. Sums deducted from wages pursuant to the Social Security Administration Act and Federal Insurance Contribution Act;

C. Sums deducted from wages pursuant to any Utah city, county, or state tax;

D. Sums deducted from wages as dues, contributions, or other fees to a labor, employee, professional, or other employer-related organization or association; and sums as contributions for an employee's participation or eligibility in a health, welfare, insurance, retirement, or other benefit plan or program, provided that the:

1. Employee has granted written authorization for the deductions; and

2. Deductions shall terminate upon the written revocation of the authorization;

E. Sums deducted from wages as payments, repayments, contributions, deposits, to a credit union, banking, savings, loan, trust or other financial institution, provided that the:

1. Employee has granted written authorization for the deductions; and

2. Deductions shall terminate upon the written revocation of the authorization;

F. Sums deducted from wages as payment for the purchase of goods or services by the employee from the employer, provided that the:

1. Employee has actual or constructive possession of the goods or services purchased; and

2. Employee's purchase is evidenced by the employee's written acknowledgment;

G. Sums deducted from wages for damages suffered by the employer due to the employee's negligence:

1. A potential deduction shall meet the following pre-conditions:

a. negligence and damages arise out of the course of

employment;

b. employer has not received payments, compensation, or any form of restitution for the same monetary loss from an insurer, assurer, surety, or guarantor to cover the injuries, losses, or damages;

c. offset is reasonably related to the amount of the damage; and

d. damage is over and above wear and tear reasonably expected in the normal course of business.

2. Methods of determining an employee's negligence and amount of damage are:

a. by a judicial proceeding;

b. by an employer's written and published procedures coupled with an employee's express authorization for the deduction in writing; or

c. by any other provision allowed or required by law pursuant to Section 34-28-3(5).

H. Sums deducted from wages, in the proper amounts, for enforcement of a valid attachment or garnishment shall be honored by the Division;

I. Sums deducted from wages as repayment to the employer by the employee of advances or loans made to the employee by the employer, provided that the:

1. Advance or loan to the employee occurred while the employee was in the employ of the employer; and

2. Employee's receipt of the advance or loan is evidenced by the employee's written acknowledgment;

J. Sums deducted from wages as a result of loss or damage occurring from the criminal conduct of the employee against the property of the employer, provided that:

1. The employee has been adjudged guilty by a judicial proceeding of the specified crime committed against the property of the employer;

2. The crime occurred during the employment relationship or out of the employment relationship; and

3. The property of the employer cannot or has not been reunited with the employer; or

4. The employee willfully and through his own admission did in fact destroy company property. An offset against the earned wages may be allowed at the hearing officer's discretion.

K. Sums deducted from the wages resulting from cash shortages, provided that the:

1. Employee gives written acknowledgment upon beginning employment that he or she shall be responsible for shortages;

2. Employee shall at the beginning of his or her work period be checked in or verified on the register or with the cash amount by the employer in the employee's presence and give written acknowledgment of the verification;

3. Employee at the end of the work period be checked out or verified on the register or with the cash amount by the employer in the employee's presence and give written acknowledgment of the verification; and

4. Employee be the sole and absolute user and have sole access to the register or cash amount from the time checked in under Subsection (2) until the time checked out under Subsection (3);

L. Sums deducted from wages as payment for the purchase of goods, tools, equipment, or other items required for the employment of a person, provided that the:

1. Employee's purchase and receipt of the items is evidenced by a written acknowledgment;

2. Employee has actual or constructive possession of the goods or items; and

3. Employer repurchase the items from the employee at the employee's option upon the termination of employment at a fair and reasonable price;

M. Sums deducted from wages as payment for goods, tools, equipment, or other items furnished and assigned to the employee by the employer, provided that:

1. The item was assigned during the employment of the employee;

2. The employee gave written acknowledgment of the receipt of the item; and

3. The item was not returned to the employer upon termination.

R610-3-19. Timely and Unconditional Payment of Wages.

A. In case of a dispute over wages, the employer shall give written notice to the employee, of the amount of wages which he concedes to be due and shall pay that amount without condition within the time required by statute;

B. Acceptance by the employee of a payment made hereunder shall not constitute a release or waiver as to the balance of a claim for wages;

C. The employer shall not be entitled or permitted to deduct any sums where the employer has failed to make payment of wages within the time period required by statute.

R610-3-20. Check Stubs.

All lawful offsets enumerated in this rule shall be itemized on a statement or a detachable check stub and provided to the employee as required by Section 34-28-3(4).

R610-3-22. Payment of Wages Via Pay Cards.

A pay card is a stored value card that can be used at an ATM-type machine to access wages that are credited to the card. An employer may use a pay card to pay an employee's wages if the following conditions are met:

A. With one use, the employee shall be able to withdraw the full amount of earned wages without incurring a fee. "One use" means a single transaction.

B. The full amount of wages for a pay period shall be available for the employee via the pay card on the applicable payday.

C. On each payday, the employer shall provide the employee a statement of deductions from the employee's gross wages for the subject pay period. This statement shall be provided:

1. in writing, or

2. electronically, provided that the employee must be able to easily and immediately access the information and print a paper copy of the same, without cost.

R616. Labor Commission, Boiler and Elevator Safety.
R616-2. Boiler and Pressure Vessel Rules.
R616-2-1. Authority.

This rule is established pursuant to Title 34A, Chapter 7 for the purpose of establishing reasonable safety standards for boilers and pressure vessels to prevent exposure to risks by the public and employees.

R616-2-2. Definitions.

A. "ASME" means the American Society of Mechanical Engineers.

B. "Boiler inspector" means a person who is an employee of:

1. The Division who is authorized to inspect boilers and pressure vessels by having met nationally recognized standards of competency and having received the Commission's certificate of competency; or

2. An insurance company writing boiler and pressure vessel insurance in Utah who is deputized to inspect boilers and pressure vessels by having met nationally recognized standards of competency, receiving the Commission's certificate of competency, and having paid a certification fee.

C. "Commission" means the Labor Commission created in Section 34A-1-103.

D. "Division" means the Division of Boiler and Elevator Safety of the Labor Commission.

E. "National Board" means the National Board of Boiler and Pressure Vessel Inspectors.

F. "Nonstandard" means a boiler or pressure vessel that does not bear ASME and National Board stamping and registration.

G. "Owner/user agency" means any business organization operating pressure vessels in this state that has a valid owner/user certificate from the Commission authorizing self-inspection of unfired pressure vessels by its owner/user agents, as regulated by the Commission, and for which a fee has been paid.

H. "Owner/user agent" means an employee of an owner/user agency who is authorized to inspect unfired pressure vessels by having met nationally recognized standards of competency, receiving the Commission's certificate of competency, and having paid a certification fee.

R616-2-3. Safety Codes and Rules for Boilers and Pressure Vessels.

The following safety codes and rules shall apply to all boilers and pressure vessels in Utah, except those exempted pursuant to Section 34A-7-101, and are incorporated herein by this reference in this rule.

A. ASME Boiler and Pressure Vessel Code -- 2015.

1. Section I Rules for Construction of Power Boilers.

2. Section IV Rules for Construction of Heating Boilers.

3. Section VIII Rules for Construction of Pressure Vessels.

B. Power Piping ASME B31.1 -- 2014.

C. Controls and Safety Devices for Automatically Fired Boilers ASME CSD-1-2015. Except:

1. Part CG-130(c).

D. National Board Inspection Code ANSI/NB-23 -- 2015 Part 3.

E. NFPA 85 Boiler and Combustion Systems Hazard Code 2015.

F. Recommended Administrative Boiler and Pressure Vessel Safety Rules and Regulations NB-132 Rev. 4.

G. Pressure Vessel Inspection Code: Maintenance Inspection, Rating, Repair and Alteration API 510 Tenth Edition, 2014. Except:

1. Section-8, and

2. Appendix-A.

R616-2-4. Quality Assurance for Boilers, Pressure Vessels and Power Piping.

A. Consistent with the requirements of the Commission and its predecessor agency since May 1, 1978, all boilers and pressure vessels installed on or after May 1, 1978 shall be registered with the National Board and the data plate must include the National Board number.

B. Pursuant to Section 34A-7-102(2), any boiler or pressure vessel of special design must be approved by the Division to ensure it provides a level of safety equivalent to that contemplated by the Boiler and Pressure Vessel Code of the ASME. Any such boiler or pressure vessel must thereafter be identified by a Utah identification number provided by the Division.

C. All steam piping, installed after May 1, 1978, which is external (from the boiler to the first stop valve for a single boiler and the second stop valve in a battery of two or more boilers having manhole openings) shall comply with Section 1 of the ASME Boiler and Pressure Vessel Code or ASME B31.1 Power Piping as applicable.

D. Nonstandard boilers or pressure vessels installed in Utah before July 1, 1999 may be allowed to continue in operation provided the owner can prove the equivalence of its design to the requirements of the ASME Boiler and Pressure Vessel Code. Nonstandard boilers or pressure vessels may not be relocated or moved.

E. Effective July 1, 1999, all boiler and pressure vessel repairs or alterations must be performed by an organization holding a valid Certificate of Authorization to use the "R" stamp from the National Board. Repairs to pressure relief valves shall be performed by an organization holding a valid Certificate of Authorization to use the "VR" stamp from the National Board.

R616-2-5. Code Applicability.

A. The safety codes which are applicable to a given boiler or pressure vessel installation are the latest versions of the codes in effect at the time the installation commenced.

B. If a boiler or pressure vessel is replaced, this is considered a new installation.

C. If a boiler or pressure vessel is relocated to another location or moved in its existing location, this is considered a new installation.

R616-2-6. Variances to Code Requirements.

A. In a case where the Division finds that the enforcement of any code would not materially increase the safety of employees or general public, and would work undue hardships on the owner or user, the Division may allow the owner or user a variance pursuant to Section 34A-7-102. Variances must be in writing to be effective, and can be revoked after reasonable notice is given in writing.

B. Persons who apply for a variance to a safety code requirement must present the Division with the rationale as to how their boiler or pressure vessel installation provides safety equivalent to the safety code.

C. No errors or omissions in these codes shall be construed as permitting any unsafe or unsanitary condition to exist.

R616-2-7. Boiler and Pressure Vessel Compliance Manual.

A. The Division shall develop and issue a safety code compliance manual for organizations and personnel involved in the design, installation, operation and maintenance of boilers and pressure vessels in Utah.

B. This compliance manual shall be reviewed annually for accuracy and shall be re-issued on a frequency not to exceed two years.

C. If a conflict exists between the Boiler and Pressure Vessel compliance manual and a safety code adopted in R616-2-3, the code requirements will take precedence.

R616-2-8. Inspection of Boilers and Pressure Vessels.

A. It shall be the responsibility of the Division to make inspections of all boilers or pressure vessels operated within its jurisdiction, when deemed necessary or appropriate.

B. Boiler inspectors shall examine conditions in regards to the safety of the employees, public, machinery, ventilation, drainage, and into all other matters connected with the safety of persons using each boiler or pressure vessel, and when necessary give directions providing for the safety of persons in or about the same. For boilers or pressure vessels inspected by an inspector employed by the Division, the owner or user is required to freely permit entry, inspection, examination and inquiry, and to furnish a guide when necessary. For boilers or pressure vessels inspected by a deputy inspector employed by an insurance company, the deputy inspector's right of entry on the premises where the boiler or pressure vessel is located is subject to the agreement between the insurance company and the owner or operator of the boiler or pressure vessel. In the event an internal inspection of a boiler or pressure vessel is required the owner or user shall, at a minimum, prepare the boiler or pressure vessel by meeting the requirements of 29 CFR Part 1910.146 "Permit Required Confined Spaces" and 29 CFR Part 1910.147 "Control of Hazardous Energy (Lockout/Tagout)".

C. If the Division finds a boiler or pressure vessel complies with the safety codes and rules, the owner or user shall be issued a Certificate of Inspection and Permit to Operate.

D. If the Division finds a boiler or pressure vessel is not being operated in accordance with safety codes and rules, the owner or user shall be notified in writing of all deficiencies and shall be directed to make specific improvements or changes as are necessary to bring the boiler or pressure vessel into compliance.

E. Pursuant to Sections 34A-1-104, 34A-2-301 and 34A-7-102, if the improvements or changes to the boiler or pressure vessel are not made within a reasonable time, the boiler or pressure vessel is being operated unlawfully.

F. If the owner or user refuses to allow an inspection to be made, the boiler or pressure vessels is being operated unlawfully.

G. If the owner or user refuses to pay the required fee, the boiler or pressure vessel is being operated unlawfully.

H. If the owner or user operates a boiler or pressure vessel unlawfully, the Commission may order the boiler or pressure vessel operation to cease pursuant to Sections 34A-1-104 and 34A-7-103.

I. If, in the judgment of a boiler inspector, the lives or safety of employees or public are or may be endangered should they remain in the danger area, the boiler inspector shall direct that they be immediately withdrawn from the danger area, and the boiler or pressure vessel be removed from service until repairs have been made and the boiler or pressure vessel has been brought into compliance.

J. An owner/user agency may conduct self inspection of its own unfired pressure vessels with its own employees who are owner/user agents under procedures and frequencies established by the Division.

R616-2-9. Fees.

Fees to be charged as required by Section 34A-7-104 shall be adopted by the Labor Commission and approved by the Legislature pursuant to Section 63J-1-301(2).

R616-2-10. Notification of Installation, Revision, or Repair.

A. Before any boiler covered by this rule is installed or before major revision or repair, particularly welding, begins on a boiler or pressure vessel, the Division must be advised at least one week in advance of such installation, revision, or repair unless emergency dictates otherwise.

B. It is recommended that a business organization review its plans for purchase and installation, or of revision or repair, of a boiler or pressure vessel well in advance with the Division to ensure meeting code requirements upon finalization.

R616-2-11. Initial Agency Action.

Issuance or denial of a Certificate of Inspection and Permit to Operate by the Division, and orders or directives to make changes or improvements by the boiler inspector are informal adjudicative actions commenced by the agency per Section 63G-4-201.

R616-2-12. Presiding Officer.

The boiler inspector is the presiding officer referred to in Section 63G-4-201. If an informal hearing is requested pursuant to R616-2-13, the Commission shall appoint the presiding officer for that hearing.

R616-2-13. Request for Informal Hearing.

Within 30 days of issuance, any aggrieved person may request an informal hearing regarding the reasonableness of a permit issuance or denial or an order to make changes or improvements. The request for hearing shall contain all information required by Sections 63G-4-201(2)(a) and 63G-4-201(3).

R616-2-14. Classification of Proceeding for Purpose of Utah Administrative Procedures Act.

Any hearing held pursuant to R616-2-13 shall be informal and pursuant to the procedural requirements of Section 63G-4-203 and any agency review of the order issued after the hearing shall be per Section 63G-4-302. An informal hearing may be converted to a formal hearing pursuant to Section 63G-4-202(3).

R616-2-15. Deputy Boiler/Pressure Vessel Inspectors.

A. Purpose -- Section 34A-7-10 of the Safety Act ("the Act"; Title 34A, Chapter 7, Part One, Utah Code Annotated) permits the Division of Boiler, Elevator and Coal Mine Safety ("the Division") to authorize qualified individuals to inspect boilers and pressure vessels as "deputy inspectors." This rule sets forth the Division's procedures and standards for authorizing deputy inspectors, monitoring their performance, and suspending or revoking such authority when appropriate.

B. Initial appointment of deputy inspectors.

1. An applicant for initial Division authorization to inspect boilers and pressure vessels as a deputy inspector must satisfy the following requirements in the order listed below:

a. A company insuring boilers and pressure vessels in Utah ("sponsoring employer" hereafter) must submit a letter to the Division certifying that:

i. the applicant is employed by the sponsoring employer; and

ii. the sponsoring employer requests the Division authorize the applicant to inspect boilers and pressure vessels insured by that employer;

b. The applicant or sponsoring employer must submit to the Division a current, valid certification from the National Board of Boiler and Pressure Vessel Certification ("National Board") that the applicant is qualified to inspect boilers and pressure vessels;

c. The applicant or sponsoring employer must submit an application fee of $25 to the Division;

d. The applicant must complete training for deputy inspectors provided by the Division;

e. The applicant must pass an oral examination administered by the Division pertaining to boiler and pressure vessel inspection standards and processes; and

f. The applicant must pass a written, closed-book examination administered by the Division on the Division's boiler/Pressure Vessel Compliance Manual, Rules, and codes adopted;

2. Upon successful completion of the foregoing requirements, the Division will appoint the applicant as a deputy inspector and will issue credentials to that effect. The Division will also notify the sponsoring employer of the appointment.

3. Initial appointment as a deputy inspector terminates at the end of the calendar year in which such appointment is made unless a deputy inspector qualifies for reappointment under paragraph C of this rule.

C. Annual reappointment of deputy inspectors.

1. Effective January 1 of each year, the Division will renew the appointment of each deputy inspector for an additional year if the inspector satisfies the following requirements:

a. The individual was authorized to serve as a deputy inspector as of December 31 of the previous year;

b. A sponsoring employer has submitted a letter to the Division certifying that:

i. the individual is employed by the sponsoring employer; and

ii. The sponsoring employer requests the Division to reappoint that individual as a deputy inspector to inspect boilers and pressure vessels for that employer;

c. The individual or sponsoring employer has submitted to the Division a current, valid certification from the National Board establishing that the individual is qualified as a boiler and pressure vessel inspector;

d. The individual or sponsoring employer has submitted to the Division the required renewal fee of $20;

e. The individual has completed the Division's required training for deputy inspectors.

2. An individual who does not meet each of the foregoing requirements is not eligible for reappointment as a deputy inspector and must instead meet each of the requirements for initial appointment under paragraph B of this rule.

D. Lapse, change of employment and loss of National Board certification.

1. Lapse. An individual's appointment as a deputy inspector will lapse if the individual:

a. Does not renew the appointment by satisfying the requirements of paragraph C of this rule;

b. Does not perform and submit to the Division at least one boiler or pressure vessel inspection during the previous calendar year; or

c. Fails to inform the Division of any change in status of employment with his or her sponsoring employer as required in the following paragraph D.2. of this rule.

2. Change in employment.

a. A deputy inspector must immediately notify the Division in writing of any change in the status of the inspector's employment with his or her sponsoring employer.

b. If the Division determines that an individual previously appointed as a deputy inspector is no longer employed by a company authorized to insure boilers and pressure vessels in Utah, the Division will immediately revoke that individual's appointment.

c. If the Division determines that a deputy inspector has changed employment to another company that insures boilers and pressure vessels in Utah, the Division will require the new employer or deputy inspector to submit the following:

i. A letter from the new employer:

AA. certifying that the individual is employed by that sponsoring employer; and

BB. requesting that the individual's appointment as a deputy inspector be continued;

ii. A current, valid certification as a boiler/pressure vessel inspector from the National Board; and

iii. Payment to the Division of the required fee of $20.

3. National Board Certification.

a. Every deputy inspector shall at all times hold a current valid certification as a boiler/pressure vessel inspector from the National Board.

b. Each deputy inspector shall immediately notify the Division if his or her National Board certification has been revoked or suspended.

c. If the Division has reason to believe that a deputy inspector's National Board certification has been revoked or suspended, the Division will obtain written verification from the National Board. IF the National Board has in fact revoked or suspended the deputy inspector's certification, the Division will revoke the inspector's appointment as a deputy inspector.

E. Scope of authority. Appointment as a deputy inspector has the limited effect of authorizing the deputy inspector to inspect boilers and pressure vessels insured by his or her sponsoring employer for compliance with engineering codes and other standards adopted by the Division in Utah Administrative Code Rule R616-2. The Division expressly does not confer any other authority to deputy inspectors. Deputy inspectors remain employees of their respective sponsoring employers and are not employees of the Division or agents of the Division for any other purpose. A deputy inspector's right to inspect any particular boiler or pressure vessel, including the deputy inspector's right of entry on the premises where the boiler or pressure vessel is located, is subject to the agreement between the sponsoring employers and the owner or operator of the boiler or pressure vessel. Appointment as a deputy inspector by the Division does not confer any right of entry independent from the terms of such agreement.

F. Inspection Standards

1. In inspecting any boiler or pressure vessel, a deputy inspector shall apply the standards and engineering codes adopted in Utah Administrative Code R616-2 - Boiler and Pressure Vessel Rules.

2. Each deputy inspector must use the Division's web-based applications to accurately record and submit all information regarding boilers and pressure vessels, including;

a. inspection reports;

b. scrapped and inactive items;

c. information changes other than those requiring submission of a Change of Insurance Status Form (NB4); and

d. a Web Issue Form (Form WIF-01) to identify any error or other issue resulting from the deputy inspector's use of the Division's web-based applications.

G. Quality Control. The Division will evaluate the performance of each deputy inspector to assure compliance with the Division's standards for boiler and pressure vessel inspections.

1. The Division's Business Analyst will review each inspection report submitted by a deputy inspector and will report any serious errors to the Chief Boiler and Pressure Vessel Inspector ("Chief Inspector") for appropriate action.

2. Each year, the Chief Inspector will evaluate a sample of each deputy inspector's inspections performed during that year for compliance with Division standards.

3. In addition to the reviews undertaken pursuant to paragraph G.2. of this rule, the Chief Inspector will also investigate any observation or report of an inspection deficiency to determine whether the deputy inspector complied with Division standards and rules in performing and reporting the inspection.

H. Corrective Action, Revocation and Right to Hearing.

1. If the Chief Inspector concludes that a deputy inspector does not satisfy requirements of this rule for continued appointment as a deputy inspector or has performed an inspection in a manner that is inconsistent with Division standards, the Chief Inspector will submit a written report and may recommend corrective action to the Division Director.

2. Depending on the circumstances and the seriousness of the situation, corrective action may include;

a. warning letter;

b. requirements for additional training;

c. requirements for retesting;

d. request review by the National Board;

e. additional supervision; and

f. revocation of appointment as a deputy inspector.

3. The Division Director shall forward a copy of the Chief Inspector's written report and any recommendation for corrective action to the deputy inspector and the sponsoring employer. If the deputy inspector or sponsoring employer dispute the report or recommended corrective action, the Division Director shall schedule time and place to conduct a hearing on the matter, such hearing to be conducted as an informal adjudicative proceeding under the Utah Administrative Procedures Act. After conducting such hearing, the Division Director will issue a written decision setting forth the material facts and ordering appropriate corrective action, if any. The Division Director shall forward a copy of the decision to the deputy inspector, sponsoring employer, and the National Board.

4. If the deputy inspector or sponsoring employer is dissatisfied with the Division Director's decision, the inspector or sponsoring employer may seek judicial review as provided by the Utah Administrative Procedures Act.

KEY: boilers, certification, safety
July 1, 2016 **34A-7-101 et seq.**
Notice of Continuation August 23, 2016

R616. Labor Commission, Boiler and Elevator Safety.
R616-3. Elevator Rules.
R616-3-1. Authority.

This rule is established pursuant to Section 34A-7-201 for the purpose of the Labor Commission ascertaining, fixing, and enforcing reasonable standards regarding elevators for the protection of life, health, and safety of the general public and employees.

R616-3-2. Definitions.

A. "ANSI" means the American National Standards Institute, Inc.

B. "ASME" means the American Society of Mechanical Engineers.

C. "Commission" means the Labor Commission created in Section 34A-1-103.

D. "Division" means the Division of Boiler and Elevator Safety of the Labor Commission.

E. "Elevator" means a hoisting and lowering mechanism equipped with a car or platform and that moves in guides in a substantially vertical direction.

F. "Escalator" means a stairway, moving walkway, or runway that is power driven, continuous and used to transport one or more individuals.

R616-3-3. Safety Codes for Elevators.

The following safety codes are adopted and incorporated by reference within this rule:

A. ASME A17.1-2013/CSA B44-10, Safety Code for Elevators and Escalators, and amended as follows:

1. Delete 2.2.2.5;

2. Amend 8.6.5.8 as follows: Existing hydraulic cylinders installed below ground when found to be leaking shall be replaced with cylinders conforming to 3.18.3.4 or the car shall be provided with safeties conforming to 3.17.1 and guide rails, guide rail supports and fastenings conforming to 3.23.1. This code is issued every two years. New issues become mandatory only when a formal change is made to these rules. Elevators are required to comply with the A17.1 code in effect at the time of installation.

B. ASME A17.3 - 2015 Safety Code for Existing Elevators and Escalators. This code is adopted for regulatory guidance only for elevators classified as remodeled elevators by the Division of Boiler and Elevator Safety.

C. ASME A90.1-2015, Safety Standard for Belt Manlifts.

D. ANSI A10.4-2016, Safety Requirements for Personnel Hoists and Employee Elevators for Construction and Demolition Operations.

E. ICC/ANSI A117.1 (2009) Accessible and Usable Buildings and Facilities, sections 407 and 408, and 410 approved October 20, 2010.

F. ASME A18.1-2014 Safety Standard For Platform Lifts And Stairway Chairlifts.

G. ASME A17.6-2010 Standard for Elevator Suspension, Compensation, and Governor Systems.

R616-3-4. Inspector Qualification.

A. Any person who performs elevator safety inspections must have a current certification as a Qualified Elevator Inspector as outlined in ASME QEI-1, Qualifications for Elevator Inspectors.

R616-3-5. Modifications and Variances to Codes.

A. In a case where the Division finds that the enforcement of any code would not materially increase the safety of employees or general public, and would work undue hardships on the owner/user, the Division may allow the owner/user a variance. Variances must be in writing to be effective and can be revoked after reasonable notice is given in writing.

B. Persons who apply for a variance to a safety code requirement must present the Division with the rationale as to how their elevator installation provides safety equivalent to the applicable safety code.

C. No errors or omissions in these codes shall be construed as permitting any unsafe or unsanitary condition to exist.

D. The Commission may, by rule, add or delete from the applicable safety codes for any good and sufficient safety reason.

E. In the event that adopted safety codes are in conflict with one another, the ASME A17.1, Safety Code for Elevators and Escalators will take precedence. The exception to this is for compliance with the accessibility guidelines of Pub. L. No. 101-336 "The Americans with Disability Act of 1990". In this instance, the International Building Code standards adopted in R616-3-3 for accessibility as applied to elevators take precedence over ASME A17.1.

R616-3-6. Exemptions.

A. These rules apply to all elevators in Utah with the following exemptions:

1. Private residence elevators installed inside a single family dwelling. Common elevators which serve multiple private residences are not exempt from these rules.

2. Elevators in buildings owned by the Federal government.

B. Owners of elevators exempted in R616-3-6.A. may request a safety inspection by Division of Boiler and Elevator Safety inspectors. Code non-compliance items will be treated as recommendations by the inspector with the owner having the option as to which, if any, are corrected. Owners requesting these inspections will be invoiced at the special inspection rate. If the owner requests a State of Utah Certificate to Operate for the elevator, all of the recommendations must be completed to the satisfaction of the inspector and the owner will be invoiced the appropriate certificate fee.

R616-3-7. Inspection of Elevators, Permit to Operate, Unlawful Operations.

A. It shall be the responsibility of the Division to make inspections of all elevators when deemed necessary or appropriate.

B. Elevator inspectors shall examine conditions in regards to the safety of the employees, public, machinery, drainage, methods of lighting, and into all other matters connected with the safety of persons using or in close proximity to each elevator, and when necessary give directions providing for the better health and safety of persons in or about the same. The owner/user is required to freely permit entry, inspection, examination and inquiry, and to furnish a guide when necessary.

C. If the Division finds that an elevator complies with the applicable safety codes and rules, the owner/user shall be issued a Certificate of Inspection and Permit to Operate.

1. The Certificate of Inspection and Permit to Operate is valid for 24 months.

2. The Certificate of Inspection and Permit to Operate shall be displayed in a conspicuous location for the entire validation period. If the certificate is displayed where accessible to the general public, as opposed to being in the elevator machine room, it must be protected under a transparent cover.

D. If the Division finds an elevator is not being operated in accordance with the safety codes and rules, the owner/user shall be notified in writing of all deficiencies and shall be

directed to make specific improvements or changes as are necessary to bring the elevator into compliance.

E. Pursuant to Section 34A-7-204, if the improvements or changes are not made within a reasonable time, by agreement of the division and the owner, the elevator is being operated unlawfully.

F. If the owner/user refuses to allow an inspection to be made, the elevator is being operated unlawfully.

G. If the owner/user refuses to pay the required fee, the elevator is being operated unlawfully.

H. If the owner/user operates an elevator unlawfully, the Commission may order the elevator operation to cease pursuant to Section 34A-1-104.

I. If, in the judgment of an elevator inspector, the lives or safety of employees or public are, or may be, endangered should they remain in the danger area, the elevator inspector shall direct that they be immediately withdrawn from the danger area, and the elevator removed from service until repairs have been made and the elevator has been brought into compliance.

R616-3-8. Inclined Wheelchair Lift Headroom Clearance.

A. Headroom clearance for inclined wheelchair lifts throughout the range of travel shall be not less than 80 inches (2032 mm) as measured vertically from the leading edge of the platform floor.

B. For existing facilities only, in the event that it is not technically or economically feasible to provide other means of access for disabled persons, inclined wheelchair lifts may be installed if all of the following conditions are met:

1. The appropriate building inspection jurisdiction approves the use of an inclined wheelchair lift for the specific application.

2. Headroom clearance throughout the range of travel shall be not less than 60 inches as measured vertically from the leading edge of the platform floor.

3. The passenger restriction sign as required by ASME A18.1 3.1.2.3 shall be amended as follows: "PHYSICALLY DISABLED PERSONS ONLY. NO FREIGHT. HEADROOM CLEARANCE IS LIMITED. USE ONLY IN THE SITTING POSITION".

R616-3-9. Valves in Hydraulic Elevator Operating Fluid Systems.

A. Due to the potential loss of pressure retaining capability when over torqued, bronze-bodied valves shall not be installed in the hydraulic systems of a hydraulic elevator.

B. This requirement is in effect for all new installations and remodel installations involving the hydraulic system.

C. If a bronze-bodied valve installed on an existing elevator begins to leak, that valve shall be replaced by a steel-bodied valve.

R616-3-10. Hydraulic Elevator Piping.

A. This rule establishes minimum standards for hydraulic fluid piping in hydraulic elevators. The piping specifications referred to in this rule are governed by ASME or ASTM piping specifications (e.g. ASME Specification SA-53 Table X2.4).

B. Hydraulic elevators not incorporating a safety valve may use schedule 40 piping.

C. For newly installed hydraulic elevators that do incorporate a safety valve:

1. Where piping is protected by the safety valve, schedule 40 piping may be used;

2. Where grooved or threaded connections are used in piping that is unprotected by the safety valve, i.e. between the safety valve and the hydraulic jack(s), nominal pipe size (NPS)3 or schedule 80 piping may be used;

3. Where piping is unprotected by the safety valve, but welded or bolted flange connections are used, schedule 40 piping may be used.

R616-3-11. Shunt Trips in Elevator Systems.

A. The means (shunt trip) to automatically disconnect the main line power supply to the elevator discussed in 2.8.2.3.2 of A17.1 is not required for hydraulic elevators with a rise of 50 feet or less.

R616-3-12. Hoistway Vents.

Hoistway ventilation as outlined in the International Building Code is under the jurisdiction of the local building official.

R616-3-13. Hand Line Control Elevators.

A. Operation of a hand line control elevator is not permitted.

B. Owners of hand line control elevators are required to render the elevator electrically and mechanically incapable of operation.

R616-3-14. Remodeled Elevators.

A. When an elevator is classified as a remodeled (modernized) elevator by the Division, the components of the elevator involved in the modernization must comply with the standards of the latest version of A17.1 and A17.3 in effect at the time the remodeling of the elevator commences.

B. When a hydraulic elevator has been remodeled it is considered a new installation.

R616-3-15. Fees.

A. Fees to be charged as provided by Section 34A-1-106 and 63J-1-303 shall be adopted by the Labor Commission and approved by the Legislature pursuant to Section 63J-1-301(2).

B. The fee for the initial certification permit shall be invoiced to and paid by the company or firm installing the elevator.

C. The renewal certification permit shall be invoiced to and paid by the owner/user.

D. Any request for a special inspection shall be invoiced to and paid by the person/company requesting the inspection, at the hourly rate plus mileage and expenses.

R616-3-16. Notification of Installation, Revision or Remodeling.

A. Before any elevator covered by this rule is installed or a major revision or remodeling begins on the elevator, the Division must be advised at least one week in advance of such installation, revision, or remodeling unless emergency dictates otherwise.

R616-3-17. Initial Agency Action.

Issuance or denial of a Certificate of Inspection and Permit to Operate by the Division, and orders or directives to make changes or improvements by the elevator inspector are informal adjudicative actions commenced by the agency per Section 63G-4-201.

R616-3-18. Presiding Officer.

The elevator inspector is the presiding officer referred to in Section 63G-4-201. If an informal hearing is requested pursuant to R616-3-18, the Commission shall appoint the presiding officer for that hearing.

R616-3-19. Request for Informal Hearing.

Within 30 days of issuance, any aggrieved person may request an informal hearing regarding the reasonableness of a

permit issuance or denial or an order to make changes or improvements. The request for hearing shall contain all information required by Sections 63G-4-201(3)(a) and 63G-4-201(3)(b).

R616-3-20. Classification of Proceeding for Purpose of Utah Administrative Procedures Act.

Any hearing held pursuant to R616-3-18 shall be informal and pursuant to the procedural requirements of Section 63G-4-203 and any agency review of the order issued after the hearing shall be per Section 63G-4-302. An informal hearing may be converted to a formal hearing pursuant to Subsection 63G-4-202(3).

KEY: elevators, certification, safety
July 1, 2016 34A-1-101 et seq.
Notice of Continuation August 23, 2016

R642. Natural Resources; Oil, Gas and Mining; Administration.
R642-100. Records of the Division and Board of Oil, Gas and Mining.
R642-100-100. Responsibility and Authority.

110. Authority for the R642-100 rules is found in the Government Records Access and Management Act (GRAMA) (U.C.A. 63G-2-101, et seq.)

120. The Utah Division and Board of Oil, Gas and Mining ("Division" and "Board") will be considered as an agency for the purposes of the GRAMA.

130. The Director of the Division of Oil, Gas and Mining ("Director") will be considered to be the Agency Head for the purposes of activities under the GRAMA.

140. The Division and Board maintain an office at 1594 West North Temple, Suite 1210, P.O. Box 145801, Salt Lake City, Utah 84114-5801.

R642-100-200. Requests for Records.

210. Records may be requested by any person desiring access to Division or Board records.

220. Requests will be submitted in writing to the Administrative Assistant to the Director and Secretary to the Board.

230. All requests will be made at the Division office address listed in R642-100-140 in person during regular office hours or through the U.S. Mail and will be set forth with reasonable specificity:

231. The name of the record requested;

232. The date the record was made;

233. The form in which the record is needed, and;

234. The name and address and daytime phone number of the requester.

240. Forms are available at the Division to make records requests.

R642-100-300. Fees for Records.

310. The Division and Board of Oil, Gas and Mining will charge fees to supply records to all requestors, except as provided in R642-100-400 and R642-100-700.

320. Fees for records will reflect direct and indirect costs incurred by the Division and Board and will follow any policy guidance of the Division of Finance, Department of Administrative Services. The Division and Board may require payment of past fees and future estimated fees before processing a request if fees are expected to exceed $50.00, or if a requester has not paid fees from previous requests.

330. Fees will be reasonable and at a minimum, enable the Division and Board to obtain its actual cost of duplicating, compiling, or retrieving records from archival storage.

340. When a record is requested for inspection or review by a requester within the Division offices and no extraordinary efforts are made by the Division or Board in compiling or retrieving the record, no fee will be assessed to the requester.

R642-100-400. Waiver of Fees for Records.

410. Under the Government Records Access and Management Act (GRAMA) (U.C.A. 63G-2-101 et seq.), fees may be waived by the Director under any of the following circumstances:

411. When release of the record, in the opinion of the Director, benefits the public interest;

412. If the individual making the records request is the subject of a record and access is not otherwise restricted under U.C.A. 63G-2-101 et seq.

413. If the requestor is an individual specified in Section 63G-2-202(1) or (2), or

414. If the requester's rights are directly implicated by a record and he or she is impecunious.

420. Requests for a waiver of fees will be made in writing to the Director and will set forth the reasons why a requester desires a waiver of fees. The Director may delegate the authority to waive fees.

R642-100-500. Classification and Release of Records and Exceptions.

510. Records of the Division and Board will be classified and released in accordance with the Government Records Access and Management Act (GRAMA).

520. All records of the Division and Board which are not public as described in the GRAMA will be maintained as having restricted access as authorized under the GRAMA.

530. Any person denied access to a record of the Division or Board under the procedures outlined in GRAMA has the opportunity to appeal to the Director for more liberal access to a particular record. Appeals will be in writing and include:

531. A description of the record requested;

532. An explanation of how the release of the record would serve the interest of the public and how, in the appellant's opinion, the public's interest outweighs the privacy interests of restricted access.

533. The identity of the requester and an address where he or she may be contacted.

540. The Division will share its records with other agencies on a case-by-case basis in consideration of applicable laws.

R642-100-600. Responses to Requests for Records.

610. Responses to requests for records by the Division will be in writing and will be performed in accordance with the provisions of the Government Records Access and Management Act (GRAMA), U.C.A. 63G-2-101 et seq.

620. The Division and Board may respond to requests for information by means of prepared forms.

630. Rule 6 of the Utah Rules of Civil Procedure will apply to calculate time periods specified in GRAMA.

R642-100-700. Official Transcripts of Division and Board Proceedings.

710. The right to copy verbatim transcripts of Board and Division proceedings prepared by a Certified Court Reporter will be considered to be the property of the Reporter.

720. Unless otherwise classified as eligible for a more restricted classification by the Board or Division, all official transcripts will be considered as public records which are open for inspection or review in the Division offices at the address listed in R642-100-140.

730. Persons desiring copies of the official transcripts of the Board and Division proceedings will be provided with the name and address of the court reporter.

KEY: public records
1994 63G-2-101 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-870. Abandoned Mine Reclamation Regulation Definitions.
R643-870-500. Definitions as Used in R643-870 through R643-886.

"Abandoned Mine Reclamation Account" or "Account" means an account created in the general fund which is established for the purpose of providing monies to administer the abandoned mine reclamation program.

"Act" means Title 40, Chapter 10, Utah Code Annotated, known as Regulation of Coal Mining and Reclamation Operations.

"Director" means the Director of the Office of Surface Mining Reclamation and Enforcement.

"Division" means the Division of Oil, Gas and Mining.

"Eligible lands and water" means land and water eligible for reclamation or drainage abatement expenditures which were mined for coal or which were affected by such mining, wastebanks, coal processing, or other coal mining processes and left or abandoned in either an unreclaimed or inadequately reclaimed condition prior to August 3, 1977, and for which there is no continuing reclamation responsibility. Provided, however, that lands and water damaged by coal mining operations after that date may also be eligible if they meet the requirements specified in R643-874-124 and R643-874-125. For additional eligibility requirements for water projects, see R643-874-140. For additional eligibility requirements for lands affected by remining operations see R643-874-128. For eligibility requirements for lands affected by mining for minerals other than coal, see R643-875-140.

"Emergency" means a sudden danger or impairment that presents a high probability of substantial physical harm to the health, safety, or general welfare of people before the danger can be abated under normal program operation procedures.

"Expended" means that moneys have been obligated, encumbered, or committed by contract by the Division for work to be accomplished or services to be rendered.

"Extreme danger" means a condition that could reasonably be expected to cause substantial physical harm to persons, property, or the environment and to which persons or improvements on real property are currently exposed.

"Left or abandoned in either an unreclaimed or inadequately reclaimed condition" means lands and water:

(a) Which were mined or which were affected by such mining, wastebanks, processing or other mining processes prior to August 3, 1977,and on which all mining has ceased;

(b) Which continue, in their present condition, to degrade substantially the quality of the environment, prevent or damage the beneficial use of land or water resources, or endanger the health and safety of the public; and

(c) For which there is no continuing reclamation responsibility under State or Federal Laws, except as provided in R643-874-124 and R643-874-142.

"Office" or "OSM" means the Federal Office of Surface Mining Reclamation and Enforcement.

"Owner" means the owner of real property who is shown to be the owner of record on the plats located in the county courthouse of the county in which the real property is located.

"Permanent facility" means any structure that is built, installed, or established to serve a particular purpose or any manipulation or modification of the surface that is designed to remain after the reclamation activity is completed, such as a relocated stream channel or diversion ditch.

"Project" means a delineated area containing one or more abandoned mine land problems. A project may be a group of related reclamation activities with a common objective within a political subdivision of a state or within a logical, geographically defined area, such as a watershed or conservation district.

"Reclamation activity" means the restoration, reclamation, abatement, control, or prevention of adverse effects of past mining.

"Reclamation Plan" means a plan submitted by the Division and approved by the Office of Surface Mining Reclamation and Enforcement.

"Reclamation Program" means the program established by the Division in accordance with this chapter for reclamation of lands and water adversely affected by past mining, including the reclamation plan and annual applications for grants.

"Secretary" means the Secretary of the Department of Interior or his or her representative.

KEY: mines, reclamation
December 16, 1997 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-872. Abandoned Mine Reclamation Fund.
R643-872-100. Scope.

The rules under R643-872 set forth general responsibilities for administration of Abandoned Mine Land Reclamation Programs and procedures for the Abandoned Mine Reclamation Fund to finance such programs.

120. Abandoned Mine Reclamation Fund.

121. A Fund known as the Abandoned Mine Reclamation Fund is established under the authority of Section 40-10-25.1 for the purpose of providing moneys to administer the Abandoned Mine Reclamation Program. This Fund will be managed in accordance with the Federal Office of Management and Budget Circular No. A-102 and applicable state guidelines.

KEY: mines, reclamation
1994 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-874. General Reclamation Requirements.
R643-874-100. Scope.

The rules under R643-874 establish land and water eligibility requirements, reclamation objectives and priorities, and reclamation contractor responsibility.

110. Applicability. The provisions of R643-874 apply to all reclamation projects carried out with monies from the Account.

120. Eligible Lands and Water. Lands and water are eligible for reclamation activities if:

121. They were mined or affected by mining processes;

122. They were mined prior to August 3, 1977, and left or abandoned in either an unreclaimed or inadequately reclaimed condition; and

123. There is no continuing responsibility for reclamation by the operator, permittee, or agent of the permittee under statutes of the state or federal government, or the state as a result of bond forfeiture. Bond forfeiture will render lands or water ineligible only if the amount forfeited is sufficient to pay the total cost of the necessary reclamation. In cases where the forfeited bond is insufficient to pay the total cost of reclamation, additional moneys from the Account may be sought.

124. Notwithstanding paragraphs 120, 121, 122, and 123 of this section, coal lands and waters damaged and abandoned after August 3, 1977, by coal mining processes are also eligible for funding if the Division finds in writing that:

124.100. They were mined for coal or affected by coal mining processes; and

124.200. The mining occurred and the site was left in either an unreclaimed or inadequately reclaimed condition between August 4, 1977, and:

124.210. January 21, 1981, and that any funds for reclamation or abatement that are available pursuant to a bond or other form of financial guarantee or from any other source are not sufficient to provide for adequate reclamation or abatement at the site; or

124.220. November 5, 1990, that the surety of the mining operator became insolvent during such period and that, as of November 5, 1990, funds immediately available from proceedings relating to such insolvency or from any financial guarantee or other source are not sufficient to provide for adequate reclamation or abatement at the site; and

124.300. The site qualifies as a priority 1 or 2 site pursuant to Section 40-10-25(2)(a) and (b) of the Act. Priority will be given to those sites that are in the immediate vicinity of a residential area or that have an adverse economic impact upon a community.

125. The Reclamation Program may expend funds made available under Sections 40-10-25.1(2) and (3) of the Act for reclamation and abatement of any site eligible under paragraph 124 of this section, if the Reclamation Program, with the concurrence of the Secretary, makes the findings required in paragraph 124 of this section and the Reclamation Program determines that the reclamation priority of the site is the same or more urgent than the reclamation priority for the lands and water eligible pursuant to paragraphs 120, 121, 122, or 123 of this section that qualify as a priority 1 or 2 site under Section 40-10-25(2) of the Act.

126. With respect to lands eligible pursuant to paragraph 124 or 125 of this section, monies available from sources outside the Account or that are ultimately recovered from responsible parties shall either be used to offset the cost of the reclamation or transferred to the Account if not required for further reclamation activities at the permitted site.

127. If reclamation of a site covered by an interim or permanent program permit is carried out under the Abandoned Mine Reclamation Program, the permittee of the site shall reimburse the Account for the cost of reclamation that is in excess of any bond forfeited to ensure reclamation. Neither the Secretary nor the State performing reclamation under paragraph 124 or 125 of this section shall be held liable for any violations of any performance standards or reclamation requirements specified in the Coal Regulatory portion of the Act (Section 40-10-1 et seq.) nor shall a reclamation activity undertaken on such lands or waters be held to any standards set forth in the Coal Regulatory portion of the Act (Section 40-10-1 et seq.).

128. Surface coal mining operations on lands eligible for remining pursuant to Section 40-10-25(6) of the Act shall not affect the eligibility of such lands for reclamation activities after the release of the bonds or deposits posted by any such operation as provided by R645-301-800. If the bond or deposit for a surface coal mining operation on lands eligible for remining is forfeited, funds available under this title may be used if the amount of such bond or deposit is not sufficient to provide for adequate reclamation or abatement, except that if conditions warrant the director of the Division shall immediately exercise his/her authority under Section 40-10-25(6)(c) of the Act.

130. Reclamation Objectives and Priorities.

131. Reclamation projects should be accomplished in accordance with OSM's "Final Guidelines for Reclamation Programs and Projects" (45 FR 14810-14819, March 6, 1980).

132. Reclamation projects shall reflect the priorities of Section 40-10-25(2) of the Act. Generally, projects lower than a priority 2 should not be undertaken until all known higher priority coal projects either have been accomplished, are in the process of being reclaimed, or have been approved for funding by the Secretary, except in those instances where such lower priority projects may be undertaken in conjunction with a priority 1 or 2 site in accordance with OSM's "Final Guidelines for Reclamation Programs and Projects."

140. Utilities and other facilities.

141. The Reclamation Program, prior to certification of the completion of all coal-related reclamation under Section 40-10-28.1 of the Act, may expend up to 30 percent of the funds granted annually pursuant to Section 40-10-25(1) of the Act for the purpose of protecting, repairing, replacing, constructing, or enhancing facilities relating to water supplies, including water distribution facilities and treatment plants, to replace water supplies adversely affected by coal mining practices.

142. If the adverse effect on water supplies referred to in this section occurred both prior to and after August 3, 1977, the project shall remain eligible, notwithstanding the criteria specified in R643-874-122, if the Reclamation Program finds in writing, as part of its eligibility opinion, that such adverse effects are due predominantly to effects of mining processes undertaken and abandoned prior to August 3, 1977.

143. If the adverse effect on water supplies referred to in this section occurred both prior to and after the dates (and under the criteria set forth under Section 40-10-25(4) of the Act, the project shall remain eligible, notwithstanding the criteria specified in R643-874-122, if the Reclamation Program finds in writing, as part of its eligibility opinion, that such adverse effects are due predominately to the effects of mining processes undertaken and abandoned prior to those dates.

144. Enhancement of facilities or utilities under this section shall include upgrading necessary to meet any local, State, or Federal public health or safety requirement. Enhancement shall not include, however, any service area expansion of a utility or facility not necessary to address a specific abandoned mine land problem.

150. Limited liability. The State shall not be liable under any provision of Federal law for any costs or damages as a result of action taken or omitted in the course of carrying out an approved abandoned mine reclamation plan. This section shall not preclude liability for costs or damages as a result of gross negligence or intentional misconduct by the State. For purposes of this section, reckless, willful, or wanton misconduct shall constitute gross negligence or intentional misconduct.

160. Contractor responsibility. Every successful bidder for a Reclamation Program contract must be eligible under federal regulation 30 CFR 773.12 through 773.14 at the time of contract award to receive a permit or conditional permit to conduct surface coal mining operations. Bidder eligibility must be confirmed by OSM's automated Applicant/Violator System for each contract to be awarded.

KEY: mines, reclamation
November 1, 1997 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-875. Noncoal Reclamation.
R643-875-100. Scope.

The rules under R643-875 establish land and water eligibility requirements for noncoal reclamation.

120. Eligible lands and water prior to certification. Noncoal lands and water are eligible for reclamation if:

121. They were mined or affected by mining processes;

122. They were mined and left or abandoned in either an unreclaimed or inadequately reclaimed condition prior to August 3, 1977;

123. There is no continuing responsibility for reclamation by the operator, permittee, or agent of the permittee under statutes of the state or federal government or by the state as a result of bond forfeiture. Bond forfeiture will render lands or water ineligible only if the amount forfeited is sufficient to pay the total cost of the necessary reclamation. In cases where the forfeited bond is insufficient to pay the total cost of reclamation, monies sufficient to complete the reclamation may be sought under R643-886 or R643-888;

124. The reclamation has been requested by the Governor; and

125. The reclamation is necessary to protect the public health, safety, general welfare, and property from extreme danger of adverse effects of noncoal mining practices.

130. Certification of completion of coal sites.

131. The Governor may submit to the Secretary a certification of completion expressing the finding that the Reclamation Program has achieved all existing known coal-related reclamation objectives for eligible lands and waters pursuant to Section 40-10-25(3) of the Act, or has instituted the necessary processes to reclaim any remaining coal related problems. In addition to the above finding, the certification of completion shall contain:

131.100. A description of both the rationale and the process utilized to arrive at the above finding for the completion of all coal-related reclamation pursuant to Section 40-10-25(2) of the Act.

131.200. A brief summary and resolution of all relevant public comments concerning coal-related impacts, problems, and reclamation projects received by the Reclamation Program prior to preparation of the certification of completion.

131.300. A Reclamation Program agreement to acknowledge and give top priority to any coal-related problem(s) that may be found or occur after submission of the certification of completion and during the life of the approved abandoned mine reclamation program.

132. After review and verification of the certification, the Director will provide notice in the Federal Register and opportunity for public comment. After evaluation, the Director will concur with the certification and provide final notice in the Federal Register.

133. Following concurrence by the Director, the Reclamation Program may implement a noncoal reclamation program pursuant to provisions in Section 40-10-28.1 of the Act.

140. Eligible lands and water subsequent to certification.

141. Following certification by the Reclamation Program of the completion of all known coal projects and the Director's concurrence in such certification, eligible noncoal lands, waters, and facilities shall be those-

141.100. Which were mined or processed for minerals or which were affected by such mining or processing, and abandoned or left in an inadequate reclamation status prior to August 3, 1977. In determining the eligibility under this subsection of Federal lands, waters, and facilities under the jurisdiction of the Forest Service or Bureau of Land Management, in lieu of the August 3, 1977, date, the applicable date shall be August 28, 1974, and November 26, 1980, respectively; and

141.200. For which there is no continuing reclamation responsibility under State or other Federal laws.

142. If eligible coal problems are found or occur after certification under R643-875-130, the Reclamation Program must address the coal problem utilizing State share funds no later than the next grant cycle, subject to the availability of funds distributed to the Reclamation Program in that cycle. The coal project would be subject to the coal provisions specified in Sections 40-10-25 through 40-10-28 of the Act.

150. Reclamation priorities for noncoal program.

151. This section applies to reclamation projects involving the restoration of lands and water adversely affected by past mineral mining; projects involving the protection, repair, replacement, construction, or enhancement of utilities (such as those relating to water supply, roads, and other such facilities serving the public adversely affected by mineral mining and processing practices); and the construction of public facilities in communities impacted by coal or other mineral mining and processing practices.

152. Following certification pursuant to R643-875-130, the projects and construction of public facilities identified in paragraph 151 of this section shall reflect the following priorities in the order stated:

152.100. The protection of public health, safety, general welfare and property from the extreme danger of adverse effects of mineral mining and processing practices;

152.200. The protection of public health, safety, and general welfare from the adverse effects of mineral mining and processing practices; and

152.300. The restoration of land and water resources and the environment previously degraded by the adverse effects of mineral mining and processing practices.

153. Enhancement of facilities or utilities shall include upgrading necessary to meet local, State, or Federal public health or safety requirements. Enhancement shall not include, however, any service area expansion of a utility or facility not necessary to address a specific abandoned mine land problem.

154. Notwithstanding the requirements specified in paragraph 151 of this section, where the Governor, after determining that there is a need for activities or construction of specific public facilities related to the coal or minerals industry in the State, submits a grant application as required by paragraph 154 of this section and the Director concurs in such need, as set forth in paragraph 155 of this section, then the Division may use annual grants made available under Section 40-10-25(1) of the Act to carry out such activities or construction.

155. To qualify for funding pursuant to the authority in paragraph 153 of this section, the Reclamation Program must submit a grant application that specifically sets forth:

155.100. The need or urgency for the activity or the construction of the public facility;

155.200. The expected impact the project will have on the coal or minerals industry in the State;

155.300. The availability of funding from other sources and, if other funding is provided, its percentage of the total costs involved;

155.400. Documentation from other local, State, and Federal agencies with oversight for such utilities or facilities regarding what funding resources they have available and why this specific project is not being fully funded by their agency;

155.500. The impact on the State, the public, and the minerals industry if the activity or facility is not funded;

155.600. The reason why this project should be selected before a priority project relating to the protection of the public health and safety or the environment from the damages caused by past mining activities; and

155.700. An analysis and review of the procedures used by the Reclamation Program to notify and involve the public in this funding request and a copy of all comments received and their resolution by the Reclamation Program.

160. Exclusion of certain noncoal reclamation sites. Money from the Account shall not be used for the reclamation of sites and areas designated for remedial action pursuant to the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901 et seq.) or that have been listed for remedial action pursuant to the Comprehensive Environmental Response Compensation and Liability Act of 1980 (42 U.S.C. 9601 et seq.).

170. Land acquisition authority-noncoal. The requirements specified in R643-877 (Rights of Entry) and R643-879 (Acquisition, Management and Disposition of Lands and Water) shall apply to the Reclamation Program's noncoal program except that, for purposes of this section, the references to "coal" shall not apply. In lieu of the term "coal", the word "noncoal" should be used.

180. Lien requirements. The lien requirements found in R643-882 (Reclamation on Private Land) shall apply to the Reclamation Program's noncoal reclamation program under Section 40-10-28.1 of the Act, except that for purposes of this section, references made to "coal" shall not apply. In lieu of the term "coal", the word "noncoal" should be used.

190. Limited liability. The State shall not be liable under any provision of Federal law for any costs or damages as a result of action taken or omitted in the course of carrying out an approved state abandoned mine reclamation program or plan. This section shall not preclude liability for costs or damages as a result of gross negligence or intentional misconduct by the Reclamation Program. For purposes of the preceding sentence, reckless, willful, or wanton misconduct shall constitute gross negligence or intentional misconduct.

200. Contractor responsibility. Every successful bidder for a Reclamation Program contract must be eligible under federal regulation 30 CFR 773.12 through 773.14 at the time of contract award to receive a permit or conditional permit to conduct surface coal mining operations. Bidder eligibility must be confirmed by OSM's automated Applicant/Violator System for each contract to be awarded.

KEY: mines, reclamation
June 22, 1995 **40-10-1 et seq.**
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-877. Rights of Entry.
R643-877-100. Scope.

The rules under R643-877 establish procedures for entry upon lands or property by the Division for reclamation purposes.

110. Written Consent for Entry. Written consent from the owner of record and lessee, or their authorized agents, is the preferred means for obtaining agreements to enter lands in order to carry out reclamation activities. Nonconsentual entry will be undertaken only after good faith efforts to obtain written consent have failed.

120. Entry for Studies or Exploration. The state or its agents, employees, or contractors, will have the right to enter upon any property for the purpose of conducting studies or exploratory work to determine the existence of adverse effects of past mining practices and the feasibility of restoration, reclamation, abatement, control, or prevention of such adverse effects.

130. Entry and Consent to Reclaim.

131. The Division will take all reasonable actions to obtain written consent from the owner of record of the land or property to be entered in advance of such entry. The consent will be in the form of a signed statement by the owner of record or his authorized agent which, as a minimum, includes a legal description of the land to be entered, the projected nature of work to be performed on the lands and any special conditions for entry. The statement will not include any commitment by the state to perform reclamation work nor to compensate the owner for entry.

132. The Division will give notice of its intent to enter for purposes of conducting reclamation at least 30 days before entry upon the property. The notice will be in writing and will be mailed, return receipt requested, to the owner, if known, with a copy of the findings required by R643-877. If the owner is not known, or if the current mailing address of the owner is not known, notice will be posted in one or more places on the property to be entered where it is readily visible to the public and advertised once in a newspaper of general circulation in the locality in which the land is located. The notice posted on the property and advertised in the newspaper will include a statement of where the findings required by R643-877 may be inspected or obtained.

133. If consent is not obtained, then, prior to entry under R643-877, the Board will find in writing with supporting reasons that:

133.100. Land or water resources have been or may be adversely affected by past mining practices;

133.200. The adverse effects are at a state where, in the interest of the public health, safety, or the general welfare, action to restore, reclaim, abate, control, or prevent should be taken; and

133.300. The owner of the land or water resources where entry must be made to restore, reclaim, abate, control, or prevent the adverse effects of past coal mining practices is not known or readily available, or the owner will not give permission for the Division, its agents, employees, or contractors to enter upon such property to restore, reclaim, abate, control, or prevent the effects of past mining practices.

140. Entry for Emergency Reclamation.

141. The Division, its agents, employees, or contractors will have the right to enter upon any land where an emergency exists and on any other land to have access to the land where the emergency exists to restore, reclaim, abate, control, or prevent the adverse effects of mining practices and to do all things necessary to protect the public health, safety, or general welfare.

142. Prior to entry under R643-877, the Board will, after notice and hearing, make a finding of fact in accordance with Section 40-10-27 of the Act.

KEY: mines, mining law, reclamation
June 22, 1995 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-879. Acquisition, Management, and Disposition of Lands and Water.
R643-879-100. Scope.

The rules under R643-879 establish procedures for acquisition of eligible land and water resources for emergency and reclamation purposes by the Division under an approved Reclamation Program. It also provides for the management and disposition of lands acquired by the state and establishes requirements for the redeposit of proceeds from the use or sale of land.

110. Land Eligible for Acquisition.

111. Land adversely affected by past coal mining practices may be acquired with moneys from the Account by the Division if, after notice and hearing, the Board finds that acquisition is necessary for successful reclamation and that:

111.100. The acquired land will serve recreation, historic, conservation, and reclamation purposes or provide open space benefits after restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal mining practices, and

111.200. Permanent facilities will be constructed on the land for the restoration, reclamation, abatement, control, or prevention of the adverse effects of past coal mining practices.

112. Coal refuse disposal sites and all coal refuse thereon may be acquired with moneys from the Account if, after notice and hearing, the Board finds that the acquisition of such land is necessary for successful reclamation and will serve the purposes of the Abandoned Mine Reclamation Program or that public ownership is desirable to meet an emergency situation and prevent recurrence of adverse effects of past coal mining practices.

113. Land or interests in land needed to fill voids, seal abandoned tunnels, shafts, and entry ways or reclaim surface impacts of underground or surface mines may be acquired by the Division if the Board finds that acquisition is necessary under R643-874-120 or R643-875-120.

114. The Division will acquire only such interests in the land as are necessary for the reclamation work planned or the post-reclamation use of the land. Interests in improvements on the lands, mineral rights, or associated water rights may be acquired if:

114.100. The customary practices and laws of the state will not allow severance of such interests from the surface estate; or

114.200. Such interests are necessary for the reclamation work planned or for the post-reclamation use of the land; and

114.300. Adequate written assurance cannot be obtained from the owner of the severed interest that future use of the severed interest will not be in conflict with the reclamation to be accomplished.

115. Title to all lands or interests in and acquired under R643-879 will be in the name of the state.

120. Procedures for Acquisition.

121. An appraisal of all land or interest in land to be acquired will be obtained by the Division. The appraisal will state the fair market value of the land as adversely affected by past mining and will otherwise conform to the requirements of the handbook on "Uniform Appraisal Standards for Federal Land Acquisition" (Interagency Land Acquisition Conference, 1973).

122. When practical, acquisition will be by purchase from a willing seller. The amount paid for interests acquired will reflect the fair market value of the interests as adversely affected by past mining.

123. When necessary, land or interest in land may be acquired by condemnation. Condemnation procedures will not be started until all reasonable efforts have been made to purchase the land or interests in lands from a willing seller.

124. The Division will comply, at a minimum, with the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970, U.S.C. 4601, et seq., and 41 CFR Parts 114-50.

130. Acceptance of Gifts of Land.

131. The Division and/or the Board, under an approved Reclamation Plan, may accept donations of title to land or interests in land.

132. Offers to make a gift of land or interest in land will be in writing and comply with state regulations for donations.

140. Management of Acquired Land.

141. Land acquired under R645-879 may be used for any lawful purpose that is consistent with the necessary reclamation activities. Procedures for collection of user charges or the waiver of such charges by the Board will be determined on the basis of the fair market value of the benefits granted to the user, charges for comparable uses within the surrounding area or the costs to the state for providing the benefit, whichever is appropriate. The fee may be waived if found in writing that such a waiver is in the public interest.

142. All use fees collected will be deposited in the Abandoned Mine Reclamation Account in accordance with R643-872.

150. Disposition of Reclaimed Land.

151. Prior to the disposition of any land acquired under R643-879, the Division will publish a notice of proposed land disposition, hold public hearings if requested, and make written findings in accordance with the authority contained in Section 40-10-27 of the Act.

152. The Division may transfer administrative responsibility for land acquired by the state to any state department or agency, with or without cost to the department or agency. The Division may transfer title for land acquired by the state to any agency or political subdivision of the state, with or without cost to that entity. The agreement under which a transfer is made will specify:

152.100. The purposes for which the land may be used, which will be consistent with the authorization under which the land was acquired; and

152.200. That the title or administrative responsibility for the land will revert to the Division if, at any time in the future, the Division finds that the land is not used for the purposes specified.

153. The Division and/or the Board may accept title for abandoned and unreclaimed land to be reclaimed and administered by the state. If the state transfers land to the United States under R643-879, the state will have a preference right to purchase such land after reclamation is completed. The price to be paid by the state will be the fair market value of the land in its reclaimed condition less any portion of the land acquisition price paid by the state.

154. The Division may sell land acquired and reclaimed under R643-879 to the local government within whose boundaries the land is located. The conditions of sale will be in accordance with the authorities contained in Section 40-10-27 of the Act.

155. Sale of Land.

155.100. The Division may sell land acquired under R643-879 by public sale if:

155.110. Such land is suitable for industrial, commercial, residential, or recreational development;

155.120. Such development is consistent with local, state, or federal land use plans for the area in which the land is located; and

155.130. If it is found that retention by the state or disposal under other paragraphs of R643-879, is not in the

public interest.

155.200. Disposal procedures will be in accordance with Section 40-10-27 of the Act.

155.300. The Division may transfer title or administrative responsibility for land to cities, municipalities, or quasi-governmental bodies, provided that the Division provides for the reverter of the title or administrative responsibility if the land is no longer used for the purposes originally proposed.

156. All moneys received from disposal of land under R643-879 will be deposited in the Abandoned Mine Reclamation Account in accordance with R643-872.

KEY: mines, mining law, reclamation, water policy
June 22, 1995 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-882. Reclamation on Private Land.
R643-882-100. Scope.

The rules under R643-882 authorize reclamation on private land and establish procedures for recovery of the cost of reclamation activities conducted on privately owned land by the Division.

120. Appraisals.

121. A notarized appraisal of the fair market value of private land to be reclaimed which may be subject to a lien under R643-882-130 will be obtained from an independent appraiser.

122. A notarized appraisal of all land reclaimed which was appraised under R643-882-121 will also be obtained from an independent appraiser. The appraisal will state the market value of the land as reclaimed. Where reclamation will require more than six months to complete, the appraisal will not be started until actual completion of reclamation activities.

123. The landowner upon whose property a lien is filed is to be provided with a statement of the increase in market value, an itemized statement of reclamation expenses, and a notice that a lien is being or has been filed in accordance with R643-882-130.

130. Liens.

131. The Division has the discretionary authority to place or waive a lien against land reclaimed if the reclamation results in a significant increase in the fair market value based on the appraisals obtained under R643-882-120; however,

131.100. A lien will not be placed against the property of a surface owner who acquired title prior to May 2, 1977, and who did not consent to participate in or exercise control over the mining operation which necessitated the reclamation work.

131.200. The basis for making a determination of what constitutes a significant increase in market value or what factual situation constitutes a waiver of lien will be made by the Division.

132. The lien may be waived by the Division if the reclamation work performed on private land primarily benefits health, safety, or environmental values of the greater community or area in which the land is located, or if the reclamation is necessitated by an unforeseen occurrence and the work performed to restore that land will not result in a significant increase in the market value of the land as it existed immediately before the occurrence.

133. If a lien is to be filed, the Division will, within six months after the completion of the reclamation work, file a statement in the office of the County Recorder in which the land is located. Such statement will consist of an account of moneys expended for the reclamation work, together with notarized copies of the appraisals obtained under R643-882-120. The amount reported to be the increase in value of the property will constitute the lien to be recorded and will have priority as a lien second only to the lien of real estate taxes imposed upon the land.

134. Within 60 days after the lien is filed the landowner may petition under local law to determine the increase in market value of the land as a result of reclamation work. Any aggrieved party may appeal in the manner provided by local law.

140. Satisfaction of Liens.

141. A lien placed on private property will be satisfied, to the extent of the value of the consideration received, at the time of transfer of ownership. Any unsatisfied portion will remain as a lien on the property.

142. The Division will maintain or renew the lien from time to time as may be required under state or local law.

143. Moneys derived from the satisfaction of liens established under R643-882 will be deposited in the Abandoned Mine Reclamation Account.

KEY: mines, reclamation
June 22, 1995 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-884. State Reclamation Plan.
R643-884-100. Scope.

The rules under R643-884 establish the procedures and requirements for the preparation, submission, and approval of the Reclamation Plan.

130. Content of Proposed State Reclamation Plan. The proposed Reclamation Plan will be submitted to the Director in writing and will include the following information:

131. A designation by the Governor for the Division to administer the Reclamation Program and to receive and administer grants under 30 CFR Part 886.

132. A legal opinion from the State Attorney General that the Division has the authority under state law to conduct the program.

133. A description of the policies and procedures to be followed by the Division in conducting the reclamation program, including:

133.100. The purposes of the Reclamation Program;

133.200. The specific criteria for ranking and identifying projects to be funded;

133.300. The coordination of reclamation work among the Abandoned Mine Reclamation Program and the Rural Land Reclamation Program administered by the Soil Conservation Service and OSM's reclamation programs; and

133.400. Policies and procedures regarding land acquisition, management, and disposal under R643-879;

133.500. Policies and procedures regarding reclamation on private land under R643-882;

133.600. Policies and procedures regarding rights of entry under R643-877; and

133.700. Public participation and involvement in the preparation of the Reclamation Plan and in the Reclamation Program.

134. A description of the administrative and management structure to be used in conducting the reclamation program, including:

134.100. The organization of the Division and its relationship to other state organizations or officials that will participate in or augment the Division's reclamation capacity;

134.200. The personnel staffing policies which will govern the assignment of personnel to the Reclamation Program;

134.300. The purchasing and procurement systems to be used by the Division. Such systems will meet the requirements of Office of Management and Budget Circular No. A-102, Attachment O;

134.400. The accounting system to be used by the Division, including specific procedures for the operation of the Abandoned Mine Reclamation Account.

135. A general description, derived from available data, of the reclamation activities to be conducted under the Reclamation Plan, including the known or suspected eligible lands and waters within the state which require reclamation, including:

135.100. A map showing the general location of known or suspected eligible lands and waters;

135.200. A description of the problems occurring on these lands and waters;

135.300. How the plan proposes to address each of the problems occurring on these lands and waters;

135.400. How the land to be reclaimed relates to existing and planned uses of lands in surrounding areas.

136. A general description, derived from available data, of the conditions prevailing in the different geographic areas of the state where reclamation is planned, including:

136.100. The economic base;

136.200. Significant esthetic, historic or cultural, and recreational values; and

136.300. Endangered and threatened plant, fish, and wildlife and their habitats.

150. State Reclamation Plan Amendment. The Division may, at any time, submit to the Director a proposed amendment or revision to its approved Reclamation Plan. If the amendment or revision changes the objectives, scope, or major policies followed by the Division in the conduct of its reclamation program, the Division will include a description of the extent of public involvement in the preparation of the amendment or revision.

170. Impact Assistance. The Reclamation Plan may provide for construction of specific public facilities in communities impacted by coal development. This form of assistance is available when the Governor has certified, and the Director has concurred that:

171. All reclamation with respect to past coal mining and with respect to the mining of other minerals and materials has been accomplished;

172. The specific public facilities are required as a result of coal development; and

173. Impact funds which may be available under the Federal Mineral Leasing Act of 1920, as amended, or the act of October 20, 1978, Pub. L. 94-565 (9 Stat. 2662) are inadequate for such construction.

KEY: mines, reclamation
1987 40-10-1 et seq.
Notice of Continuation August 24, 2016

R643. Natural Resources; Oil, Gas and Mining; Abandoned Mine Reclamation.
R643-886. State Reclamation Grants.
R643-886-100. Scope.

The rules under R643-886 set forth procedures for grants to the Division for the reclamation of eligible lands and water and other activities necessary to carry out the plan as approved.

110. Eligibility for Grants. The Division is eligible for grants under R643-886 if it has a Reclamation Plan approved under 30 CFR Part 884.

120. Coverage and Amount of Grants.

121. The Division may use moneys granted under R643-886 to administer the approved Reclamation Program and to carry out the specific reclamation activities included in the plan and described in the annual grant agreement. The moneys may be used to cover direct costs to the Division for services and materials obtained from other state agencies or local jurisdictions.

122. Grants will be approved for reclamation of eligible lands and water, construction of public facilities, program administration, the incremental cost of filling voids and sealing tunnels with waste from mine waste piles reworked for conservation purposes, and community impact assistance. To the extent technologically and economically feasible, public facilities that are planned, constructed, or modified in whole or in part with abandoned mine land grant funds should utilize fuel other than petroleum or natural gas.

123. Acquisition of land or interests in land and any mineral or water rights associated with the land will be approved for up to 90 percent of the costs.

R643-886-200. Administrative Procedures.

The Division will follow administrative procedures governing accounting, payment, property, and related requirements contained in Office of Management and Budget Circular No. A-102.

210. Allowable Costs.

211. Reclamation project costs which will be allowed include actual costs of construction, operation and maintenance, planning and engineering, inspection, other necessary administration costs and up to 90 percent of the costs of the acquisition of land.

212. Costs must conform with any limitation, conditions, or exclusions set forth in the grant agreement.

220. Financial Management.

221. The Division will account for grant funds in accordance with the requirement of Office of Management and Budget Circular No. A-102. The Division will use generally accepted accounting principles and practices consistently applied. Accounting for grant funds must be accurate and current.

222. The Division will adequately safeguard all accounts, funds, property, and other assets and will assure that they are used solely for authorized purposes.

223. The Division will provide a comparison of actual amounts spent with budgeted amounts for each grant.

224. When advances are made by a letter-of-credit method, the Division will make drawdowns from the U.S. Treasury through its commercial bank as closely as possible to the time of making the disbursements.

225. The Division will design a systematic method to assure timely and appropriate resolution of audit findings and recommendations.

230. Reports.

231. The Division will for each grant/cooperative agreement submit quarterly to the Office the following reports prepared according to Office of Management and Budget Circular No. A-102, Attachments H and I:

231.100. Financial Status Report, Form SF-269 for the agency's administrative grant/cooperative agreement and the Performance Report, Form OSM-51 covering the performance aspects of the grant/cooperative agreement.

231.200. Outlay Report and Request for Reimbursement for Construction Programs, Form SF-271 and the Performance Report, Form OSM-51 for each activity or project including projects previously funded or completed during the quarter.

232. The Division will for each grant/cooperative agreement submit annually to the Office the following reports prepared according to Office of Management and Budget Circular No. A-102, Attachments H and I:

232.100. A final Financial Status Report, Form SF-269 for the agency's administrative grant/cooperative agreement and a final Performance Report, Form OSM-51 covering the performance aspects of the grant/cooperative agreement.

232.200. A cumulative fourth quarter Outlay Report and Request for Reimbursement for Construction Programs, Form SF-271 and a cumulative annual Performance Report, Form OSM-51 which includes:

232.210. For each project or activity, a brief description and the type of reclamation performed, the project location, the landowner's name, the amounts of land or water reclaimed or being reclaimed and a summary of achieved or expected benefits.

232.220. For any land previously acquired but not disposed of, a statement of current or planned uses, location and size in acres, and any revenues derived from use of the land.

232.230. For any permanent facilities acquired or constructed but not disposed of, a description of the facility and a statement of current or planned uses, location, and any revenues derived from the use of the facility.

232.240. A Form OSM-76, "Abandoned Mine Land Problem Area Description," shall be submitted upon project completion to report the accomplishments achieved through the project.

240. Records.

241. The Division will maintain complete records in accordance with Office of Management and Budget Circular No. A-102, Attachment C. This includes, but is not limited to, books, documents, maps, and other evidence and accounting procedures and practices sufficient to reflect properly:

241.100. The amount and disposition by the Division of all assistance received for the program.

241.200. The total direct and indirect costs of the program for which the grant was awarded.

242. Subgrantees and contractors, including contractors for professional services, will maintain books, documents, papers, maps, and records which are pertinent to a specific grant award.

KEY: mines, reclamation
June 22, 1995 40-10-1 et seq.
Notice of Continuation August 24, 2016

R649. Natural Resources; Oil, Gas and Mining; Oil and Gas.
R649-1. Oil and Gas Definitions.
R649-1-1. Definitions.

"Authorized Agent" means a representative of the director as authorized by the board.

"Aquifer" means a geological formation including a group of formations or part of a formation that is capable of yielding a significant amount of water to a well or spring.

"Artificial Liner" means a pit liner made of material other than clay or other in-situ material and which meets the requirements of R649-9-3, Permitting of Disposal Pits.

"Barrel" means 42 (US) gallons at 60 degrees Fahrenheit at atmospheric pressure.

"Board" means the Board of Oil, Gas and Mining.

"Carrier, Transporter or Taker" means any person moving or transporting oil or gas away from a well or lease or from any pool.

"Casing Pressure" means the pressure within the casing or between the casing and tubing at the wellhead.

"Central Disposal Facility" means a facility that is used by one or more producers for disposal of exempt E and P wastes and for which the operator of the facility receives no monetary remuneration, other than operating cost sharing.

"Class II Injection Well" means a well that is used for:

1. The disposal of fluids that are brought to the surface in connection with conventional oil or natural gas production and that may be commingled with wastewater produced from the operation of a gas plant that is an integral part of production operations, unless that wastewater is classified as a hazardous waste at the time of injection, or

2. Enhanced recovery of oil or gas, or

3. Storage of hydrocarbons that are liquids at standard temperature and pressure conditions.

"Closed System" means but is not limited to, the use of a combination of solids control equipment (i.e., shale shakers, flowline cleaners, desanders, desilters, mud cleaners, centrifuges, agitators, and necessary pumps and piping) incorporated in a series on the rig's steel mud tanks, or a self contained unit that eliminates the use of a reserve pit for the purpose of dumping and dilution of drilling fluids for the removal of entrained drill solids. A closed system for the purpose of these rules may with Division approval include the use of a small pit to receive cuttings, but does not include the use of trenches for the collection of fluids of any kind.

"Coalbed Methane" means natural gas that is produced, or may be produced, from coalbeds and rock strata associated with the coalbed.

"Commercial Disposal Facility" means a disposal well, pit or treatment facility whose owner(s) or operator(s) receives compensation from others for the temporary storage, treatment, and disposal of produced water, drilling fluids, drill cuttings, completion fluids, and any other exempt E and P wastes, and whose primary business objective is to provide these services.

"Completion of a Well" means that the well has been adequately worked to be capable of producing oil or gas or that well testing as required by the division has been concluded.

"Confining Strata" refers to a body of material that is relatively impervious to the passage of liquids or gases and that occurs either below, above, or lateral to a more permeable material in such a way that it confines or limits the movement of liquids or gases that may be present.

"Correlative Rights" means the opportunity of each owner in a pool to produce his just and equitable share of the oil and gas in the pool without waste.

"Cubic Foot" of gas means the volume of gas contained in one cubic foot of space at a standard pressure base of 14.73 psia and a standard temperature base of 60 degrees Fahrenheit.

"Day" means a period of 24 consecutive hours.

"Development Wells" means all oil and gas producing wells other than wildcat wells.

"Director" means the executive and administrative head of the division.

"Disposal Facility" means an injection well, pit, treatment facility or combination thereof that receives E and P Wastes for the purpose of disposal. This includes both commercial and noncommercial facilities.

"Disposal Pit" means a lined or unlined pit approved for the disposal and/or storage of E and P Wastes.

"Division" means the Division of Oil, Gas and Mining.

"Drilling Fluid" means a circulating fluid usually called mud, that is introduced in a drill hole to lubricate the action of the rotary bit, remove the drilling cuttings, and control formation pressures.

"E and P Waste" means Exploration and Production Waste, and is defined as those wastes resulting from the drilling of and production from oil and gas wells as determined by the Environmental Protection Agency (EPA), prior to January 1, 1992, to be exempt from Subtitle C of the Resource Conservation and Recovery Act (RCRA).

"Emergency Pit" means a pit used for containing fluids at an operating well during an actual emergency or for a temporary period of time.

"Enhanced Recovery" means the process of introducing fluid or energy into a pool for the purpose of increasing the recovery of hydrocarbons from the pool.

"Enhanced Recovery Project" means the injection of liquids or hydrocarbon or non-hydrocarbon gases directly into a reservoir for the purpose of augmenting reservoir energy, modifying the properties of the fluids or gases in the reservoir, or changing the reservoir conditions to increase the recoverable oil, gas, or oil and gas through the joint use of two or more well bores.

"Entity" means a well or a group of wells that have identical division of interest, have the same operator, produce from the same formation, have product sales from a common tank, LACT meter, gas meter, or are in the same participating area of a properly designated unit. Entity number assignments are made by the division in cooperation with other state government agencies.

"Field" means the general area underlaid by one or more pools.

"Gas" means natural gas or natural gas liquids or other gas or any mixture thereof defined as follows:

1. "Natural Gas" means those hydrocarbons, other than oil and other than natural gas liquids separated from natural gas, that occur naturally in the gaseous phase in the reservoir and are produced and recovered at the wellhead in gaseous form. Natural gas includes coalbed methane.

2. "Natural Gas Liquids" means those hydrocarbons initially in reservoir natural gas, regardless of gravity, that are separated in gas processing plants from the natural gas as liquids at the surface through the process of condensation, absorption, adsorption, or other methods.

3. "Other Gas" means hydrogen sulfide (H_2S), carbon dioxide (CO_2), helium (He), nitrogen (N), and other nonhydrocarbon gases that occur naturally in the gaseous phase in the reservoir or are injected into the reservoir in connection with pressure maintenance, gas cycling, or other secondary or enhanced recovery projects.

"Gas-Oil Ratio" means the ratio of the number of cubic feet of natural gas produced to the number of barrels of oil concurrently produced during any stated period. The term GOR is synonymous with gas-oil ratio.

"Gas Processing Plant" means a facility in which

liquefiable hydrocarbons are removed from natural gas, including wet gas or casinghead gas, and the remaining residue gas is conditioned for delivery for sale, recycling or other use.

"Gas Well" means any well capable of producing gas in substantial quantities that is not an oil well.

"Ground Water" means water in a zone of saturation below the ground surface.

"Hearing" means any matter heard before the board or its designated hearing examiner.

"Horizontal Well" means a well bore drilled laterally at an angle of at least eighty (80) degrees to the vertical or with a horizontal projection exceeding one hundred (100) feet measured from the initial point of penetration into the productive formation through the terminus of the lateral in the same common source of supply.

"Illegal Oil or Illegal Gas" means oil or gas that has been produced from any well within the state in violation of Chapter 6 of Title 40, or any rule or order of the board.

"Illegal Product" means any product derived in whole or in part from illegal oil or illegal gas.

"Incremental Production" means that part of production that is achieved from an enhanced recovery project that would not have economically occurred under the reservoir conditions existing before the project and that has been approved by the division as incremental production.

"Injection or Disposal Well" means any Class II Injection Well used for the injection of air, gas, water or other substance into any underground stratum.

"Interest Owner" means a person owning an interest (working interest, royalty interest, payment out of production, or any other interest) in oil or gas, or in the proceeds thereof.

"Load Oil" means any oil or liquid hydrocarbon that is used in any remedial operation in an oil or gas well.

"Log or Well Log" means the written record progressively describing the strata, water, oil or gas encountered in drilling a well with such additional information as is usually recorded in the normal procedure of drilling including electrical, radioactivity, or other similar conventional logs, a lithologic description of samples and drill stem test information.

"Multiple Zone Completion" means a well completion in which two or more separate zones, mechanically segregated one from the other, are produced simultaneously from the same well.

"Oil" means crude oil or condensate or any mixture thereof, defined as follows:

1. "Crude Oil" means those hydrocarbons, regardless of gravity, that occur naturally in the liquid phase in the reservoir and are produced and recovered at the wellhead in liquid form.

2. "Condensate" means those hydrocarbons, regardless of gravity, that occur naturally in the gaseous phase in the reservoir that are separated from the natural gas as liquids through the process of condensation either in the reservoir, in the well bore or at the surface in field separators.

3. "Oil and Gas" shall not include gaseous or liquid substances derived from coal, oil shale, tar sands or other hydrocarbons classified as synthetic fuel.

"Oil and Gas Field" means a geographical area overlying an oil and gas pool.

"Oil Well" means any well capable of producing oil in substantial quantities.

"Operator or Designated Agent" means the person who has been designated by the owners or the board to operate a well or unit.

"Owner" means the person who has the right to drill into and produce from a reservoir and to appropriate the oil and gas that he produces, either for himself or for himself and others.

"Person" means and includes any natural person, bodies politic and corporate, partnerships, associations and companies.

"Pit" means an earthen surface impoundment constructed to retain fluids and oil field wastes.

"Pollution" means such contamination or other alteration of the physical, chemical or biological properties of any waters of the state, or the discharge of any liquid, gaseous or solid substance into any waters of the state in such manner as will create a nuisance or render such waters harmful, detrimental or injurious to the public health, safety or welfare; to domestic, commercial, industrial, agricultural, recreational, or other legitimate beneficial uses; or to livestock, wild animals, birds, fish or other aquatic life.

"Pool" means an underground reservoir containing a common accumulation of oil or gas or both. Each zone of a general structure that is completely separated from any other zone in the structure is a separate pool. "Common source of supply" and "reservoir" are synonymous with "pool."

"Pressure Maintenance" means the injection of gas, water or other fluids into a reservoir, either to increase or maintain the existing pressure in such reservoir or to retard the natural decline in the reservoir pressure.

"Produced Water" means water produced in conjunction with the conventional production of oil and/or gas.

"Producer" means the owner or operator of a well capable of producing oil or gas.

"Producing Well" means a well capable of producing oil or gas.

"Product" means any commodity made from oil and gas.

"Production Facilities" means all storage, separation, treating, dehydration, artificial lift, power supply, compression, pumping, metering, monitoring, flowline, and other equipment directly associated with oil wells, gas wells or injection wells, prior to any processing plant or refinery.

"Purchaser or Transporter" means any person who, acting alone or jointly with any other person, by means of his own, an affiliated, or designated carrier, transporter or taker, shall directly or indirectly purchase, take or transport by any means whatsoever, or who shall otherwise remove from any well or lease, oil or gas produced from any pool, excepting royalty portions of oil or gas taken in kind by an interest owner who is not the operator.

"Recompletion" means any completion in a new perforated interval or pool within an established wellbore and approved as a recompletion by the division.

"Refinery" means a facility, other than a gas processing plant, where controlled operations are performed by which the physical and chemical characteristics of petroleum or petroleum products are changed.

"Reserve Pit" means a pit used to retain fluid during the drilling, completion, and testing of a well.

"Seismic Operator" means a person who conducts seismic exploration for oil or gas, whether for himself or as a contractor for others.

"Shut-in Well" means a well that is completed, is shown to be capable of production in paying quantities, and is not presently being operated.

"Spud In" means the first boring of a hole in the drilling of a well by any type of rig.

"State" means the State of Utah.

"Stratigraphic Test or Core Hole" means any hole drilled for the sole purpose of obtaining geological information. The general rules applicable to the drilling of a well will apply to the drilling of a stratigraphic test or core hole.

"Temporarily Abandoned Well" means a well that is completed, is shown not capable of production in paying quantities, and is not presently being operated.

"Temporary Spacing Unit" means a specified area of land designated by the board for purposes of determining well density and location. A temporary spacing unit shall not be a drilling unit as provided for in U.C.A. 40-6-6, Drilling Units, and does not provide a basis for pooling the interest therein as does a drilling unit.

"Underground Source of Drinking Water" (or USDW) means a fresh water aquifer or a portion thereof that supplies drinking water for human consumption or that contains less than 10,000 mg/1 total dissolved solids and that is not an exempted aquifer under R649-5-4.

"Waste" means:

1. The inefficient, excessive or improper use or the unnecessary dissipation of oil or gas or reservoir energy.

2. The inefficient storing of oil or gas.

3. The locating, drilling, equipping, operating, or producing of any oil or gas well in a manner that causes reduction in the quantity of oil or gas ultimately recoverable from a reservoir under prudent and economical operations, or that causes unnecessary wells to be drilled, or that causes the loss or destruction of oil or gas either at the surface or subsurface.

4. The production of oil or gas in excess of:

4.1. Transportation or storage facilities.

4.2. The amount reasonably required to be produced in the proper drilling, completing, testing, or operating of a well or otherwise utilized on the lease from which it is produced.

5. Underground or above ground waste in the production or storage of oil or gas.

"Waste Crude Oil Treatment Facility" means any facility or site constructed or used for the purpose of wholly or partially reclaiming, treating, processing, cleaning, purifying or in any manner making non-merchantable waste crude oil marketable.

"Well" means an oil or gas well, injection or disposal well, or a hole drilled for the purpose of producing oil or gas or both. The definition of well shall not include water wells, or seismic, stratigraphic test, core hole, or other exploratory holes drilled for the purpose of obtaining geological information only.

"Well Site" means the areas that are directly disturbed during the drilling and subsequent use of, or affected by production facilities directly associated with any oil well, gas well or injection well.

"Wildcat Wells" means oil and gas producing wells that are drilled and completed in a pool in which a well has not been previously completed as a well capable of producing in commercial quantities.

"Working Interest Owner" means the owner of an interest in oil or gas burdened with a share of the expenses of developing and operating the property.

"Workover" means any operation designed to sustain, to restore, or to increase the production rate, the ultimate recovery, or the reservoir pressure system of a well or group of wells and approved as a workover, a secondary recovery, a tertiary recovery, or a pressure maintenance project by the division. The definition shall not include operations that are conducted principally as routine maintenance or the replacement of worn or damaged equipment.

KEY: oil and gas law
June 2, 1998 **40-6-1 et seq.**
Notice of Continuation August 26, 2016

R649. Natural Resources; Oil, Gas and Mining; Oil and Gas.
R649-2. General Rules.
R649-2-1. Scope of Rules.

1. The following general rules adopted by the board pursuant to Chapter 6 of Title 40 shall apply to all lands in the state in order to conserve the natural resources of oil and gas in the state, to protect human health and the environment, to prevent waste, to protect the correlative rights of all owners and to realize the greatest ultimate recovery of oil and gas.

2. Special rules and orders have been and will be issued by the board when required and shall prevail as against the general rules and orders of the board if in conflict therewith.

3. Exceptions to the general rules may also be granted by the director or authorized agent for good cause shown and shall prevail as against the general rules.

4. No exceptions granted by the board, director, or authorized agent to the rules applicable to the Underground Injection Control Program will be effective without the consent of the federal Environmental Protection Agency.

R649-2-2. Application of Rules to Lands Owned or Controlled By the United States.

These general rules shall apply to all lands in the state including lands of the United States and lands subject to the jurisdiction of the United States to the extent lawfully subject to the state's power.

R649-2-3. Application of Rules to Unit Agreements.

1. The board may suspend the application of the general rules or orders or any part thereof, with regard to any unit agreement approved by a duly authorized officer of the appropriate federal agency, so long as the conservation of oil or gas and the prevention of waste is accomplished thereby.

2. Such suspension shall not relieve any operator from making such reports as are otherwise required by the general rules or orders, or as may reasonably be requested by the board or the division in order to keep the board and the division fully informed as to operations under such unit agreements.

R649-2-4. Designation of Agent or Operator.

1. A designation of agent or operator shall be submitted to the division prior to the commencement of operations.

2. A designation of agent or operator will, for purposes of the general rules and orders, be accepted as evidence of authority of agent to fulfill the obligations of the owner, to sign any required documents or reports on behalf of the owner, and to receive all authorized orders or notices given by the board or the division.

3. All changes of address and any termination of the designated agent's or operator's authority shall be promptly reported in writing to the division, and in the latter case a designation of a new agent or operator shall be promptly made.

R649-2-5. Right to Inspect.

1. The director or authorized agent shall have the right at all reasonable times to go upon and inspect any oil or gas properties and wells for the purpose of making any investigations or tests reasonably necessary to ensure compliance with the provisions of the statutes, the general rules and orders of the board or any special field rules and orders. The director or authorized agent shall report any observed violation to the board.

2. The documentation of off lease transportation of crude oil required by R649-2-6, Access to Records, shall be carried in the motor vehicle during transportation and shall be available for examination and inspection by the director or an authorized agent upon request.

R649-2-6. Access to Records.

1. Any person who produces, operates, sells, purchases, acquires, stores, transports, refines, or processes oil or gas or who injects fluids for cycling, pressure maintenance, secondary or enhanced recovery, or disposal of salt water or oil field waste within the state, shall make and keep appropriate books and records covering his operations in the state from which he shall be able to make and substantiate all reports required by the board or the division.

1.1. Such books and records, together with copies of all reports and notices submitted to the board or the division shall be kept on file and available for inspection by the director or an authorized agent at all reasonable times for a period of at least six years.

1.2. The director or the authorized agent shall also have access to all pertinent well records wherever located.

2. Each owner or operator shall permit the director or authorized agent at his sole risk and expense, in the absence of negligence on the part of the owner or operator, to come upon any lease, property or well operated or controlled by him; to inspect the records pertaining to and the manner of operation of such property or well; and to have access at all reasonable times to any and all records pertaining to such well. All information so obtained by the director or authorized agent shall be kept confidential and shall be reported only to the division or its authorized agent, unless the owner or operator gives written permission to the director to release such information.

3. All off lease transportation of oil by motor vehicle shall be accompanied by a run ticket or equivalent document. The documentation shall identify the name and address of the transporter, the name of the operator, the lease or facility from which the oil was taken, the date of removal, the API gravity of the oil, the calculated percentage of BS and W, the volume of oil or the opening and closing tank gauges or meter readings, and the destination of the oil.

R649-2-7. Naming of Oil and Gas Fields or Pools.

1. The division shall name oil and gas fields or pools within the state in cooperation with a Fields Names Advisory Committee and with due regard and consideration for any recommendation from the owners or operators of such fields or pools. The Field Names Advisory Committee shall be composed of a representative of the United States Bureau of Land Management and representatives of appropriate state agencies and the oil and gas industry.

R649-2-8. Measurement of Production.

1. The volume of oil production shall be computed in barrels of clean oil, on the basis of acceptable meter measurements, tank measurements, or with such greater accuracy as may be required by the division. Computations of the volume of oil production shall be subject to the following corrections:

1.1. The gross volume of oil shall be corrected to exclude the entire volume of impurities not constituting a natural component part of the oil.

1.2. The observed volume of oil after correction for impurities shall be further corrected to the standard volume at 60 degrees Fahrenheit, in accordance with Table 6A of the API/ASTM D-1250, Chapter 11.1, Manual of Petroleum Measurement (1980), or any revisions or supplements, or any alternative publication or tables approved by the division.

1.3. The observed gravity of oil shall be corrected to the standard API gravity at 60 degrees Fahrenheit in accordance with Table 5A of API/ASTM, D-1250, Chapter 11.1, Manual of Petroleum Measurement (1980), or any revisions or

supplements, or any alternative publication or tables approved by the division.

2. All gas shall be measured by an orifice type meter unless otherwise authorized by the division.

2.1. In computing the volumes of all gas produced, sold, or injected, the standard pressure base shall be 14.73 pounds per square inch absolute (psia), and the standard temperature base shall be 60 degrees Fahrenheit.

2.2. All measurements of gas shall be adjusted by computation to these standards, regardless of the pressure and temperature at which the gas was actually measured, unless otherwise authorized by the division.

R649-2-9. Refusal to Agree.

1. An owner shall be deemed to have refused to agree to bear his proportionate share of the costs of the drilling and operation of a well under Section 40-6-6.5 if:

1.1. The operator of the proposed well has, in good faith, attempted to reach agreement with such owner for the leasing of the owner's mineral interest or for that owner's voluntary participation in the drilling of the well.

1.2. The owner and the operator have been unable to agree upon terms for the leasing of the owner's interest or for the owner's participation in the drilling of the well.

2. If the operator of the proposed well shall fail to attempt, in good faith, to reach agreement with the owner for the leasing of that owner's mineral interest or for voluntary participation by that owner in the well prior to the filing of a Request for Agency Action for involuntary pooling of interests in the drilling unit under Section 40-6-6.5 then, upon written request and after notice and hearing, the hearing on the Request for Agency Action for involuntary pooling may, at the discretion of the board or its designated hearing examiner, be delayed for a period not to exceed 30 days, to allow for negotiations between the operator and the owner.

R649-2-10. Notification of Lease Sale or Transfer.

The owner of a lease shall provide notification to any person with an interest in such lease, when all or part of that interest in the lease is sold or transferred.

R649-2-11. Confidentiality of Well Log Information.

1. Well logs marked confidential shall be kept confidential for one year after the date on which the log is required to be filed with the division, unless the operator gives written permission to release the log at an earlier date.

2. Information on a newly permitted well will be held confidential only upon receipt by the division of a written request from the owner or operator.

3. The period of confidentiality may begin at the time the APD is submitted for approval if a request for confidentiality is received at that time. The information on the application itself will not be considered confidential.

4. Information that shall be held confidential includes well logs, electrical or radioactivity logs, electromagnetic, electrical, or magnetic surveys, core descriptions and analysis, maps, other geological, geophysical, and engineering information, and well completion reports that contain such information.

5. The owner or operator shall clearly mark documents as confidential. Such marking shall be in red and be clearly visible.

6. Confidential wells or information shall be reported separately from wells or information that is not in confidential status.

R649-2-12. Tests and Surveys.

1. When deemed necessary or advisable the Director or authorized agent can require that tests or surveys be made to determine the presence of waste of oil, gas, water, or reservoir energy; the quantity of oil, gas or water; the amount and direction of deviation of any well from the vertical; formation, casing, tubing, or other pressures; or any other test or survey deemed necessary to carry out the purposes of the Oil and Gas Conservation Act.

2. Directional, deviation, and/or measurements-while-drilling (MWD) surveys must be run on horizontal wells and submitted in accordance with R649-3-21, Well Completion and Filing of Well Logs, as amended for horizontal wells.

KEY: oil and gas law
June 2, 1998 **40-6-1 et seq.**
Notice of Continuation August 26, 2016

R649. Natural Resources; Oil, Gas and Mining; Oil and Gas.
R649-3. Drilling and Operating Practices.
R649-3-1. Bonding.

1. An owner or operator shall furnish a bond to the division prior to approval of a permit to drill a new well, reenter an abandoned well or assume responsibility as operator of existing wells.

1.1. An owner or operator shall furnish a bond to the division on Form 4, for wells located on lands with fee or privately owned minerals.

1.2. An owner or operator shall furnish evidence to the division that a bond has been filed in accordance with state, federal or Indian lease requirements and approved by the appropriate agency for all wells located on state, federal or Indian leases.

2. A bond furnished to the division shall be payable to the division and conditioned upon the faithful performance by the operator of the duty to plug each dry or abandoned well, repair each well causing waste or pollution, and maintain and restore the well site.

3. Bond liability shall be for the duration of the drilling, operating and plugging of the well and restoration of the well site.

3.1. The bond for drilling or operating wells shall remain in full force and effect until liability thereunder is released by the division.

3.2. Release of liability shall be conditioned upon compliance with the rules and orders of the Board.

4. For all drilling or operating wells, the bond amounts for individual wells and blanket bonds required in subsections 5. and 6. represent base amounts adjusted to year 2002 average costs for well plugging and site restoration. The base amounts are effective immediately upon adoption of this bonding rule, subject to division notification as described in subsection 4.1.

4.1. The division shall provide written notification to each operator of the need to revise or establish bonds in amounts required by this bonding rule.

4.2. Within 120 days of such notification by the division, the operator shall post a bond with the division in compliance with this bonding rule.

4.3. If the division finds that a well subject to this bonding rule is in violation of Rule R649-3-36., Shut-in and Temporarily Abandoned Wells, the division shall require a bond amount for the applicable well in the amount of actual plugging and site restoration costs.

4.4. The division shall provide written notification to an operator found in violation of Rule R649-3-36., and identify the need to establish increased bonding for shut-in wells.

4.4.1. Within 30 days of notification by the division, the operator shall submit to the division an estimate of plugging and site restoration costs for division review and approval.

4.4.2. Upon review and approval of the cost estimate, the division will provide a notice of approval back to the operator specifying the approved bond amount for shut-in wells.

4.4.3. Within 120 days of receiving such notice of approval, the operator shall post a bond with the division in compliance with this bonding rule.

5. The bond amount for drilling or operating wells located on lands with fee or privately owned minerals shall be one of the following:

5.1. For wells of less than 1,000 feet in depth, an individual well bond in the amount of at least $1,500, for each such well.

5.2. For wells of more than 1,000 feet in depth but less than 3,000 feet in depth, an individual well bond in the amount of at least $15,000 for each such well.

5.3. For wells of more than 3,000 feet in depth but less than 10,000 feet in depth, an individual well bond in the amount of at least $30,000 for each such well.

5.4. For wells of more than 10,000 feet in depth, an individual well bond in the amount of at least $60,000 for each such well.

6. If, prior to the July 1, 2003 revision of this bonding rule, an operator is drilling or operating more than one well on lands with fee or privately owned minerals, and a blanket bond was furnished and accepted by the division in lieu of individual well bonds, that operator shall remain qualified for a blanket bond with the division subject to the amounts described by this bonding rule.

6.1. A blanket bond shall be conditioned in a manner similar to individual well bonds and shall cover all wells that the operator may drill or operate on lands with fee or privately owned minerals within the state.

6.2. For wells of less than 1,000 feet in depth, a blanket bond in the amount of at least $15,000 shall be required.

6.3. For wells of more than 1,000 feet in depth, a blanket bond in the amount of at least $120,000 shall be required.

6.4. Subsequent to the July 1, 2003 revision of this rule, operators who desire to establish a new blanket bond that consists either fully or partially of a collateral bond as described in subsection 10.2. shall be qualified by the division for such blanket bond.

6.4.1. Operators who elect to establish a surety bond as a blanket bond shall not require qualification by the division.

6.4.2. In those cases where operator qualification for blanket bond is required, the division will review the following criteria and make a written finding of the operator's adequacy to meet the criteria before accepting a new blanket bond:

6.4.3. The ratio of current assets to current liabilities shall be 1.20 or greater, as evidenced by audited financial statements for the previous two years and the most current quarterly financial report.

6.4.4. The ratio of total liabilities to stockholder's equity shall be 2.50 or less, as evidenced by audited financial statements for the previous two years and the most current quarterly financial report.

7. If an operator desires bond coverage in a lesser amount than required by these rules, the operator may file a Request for Agency Action with the Board for a variance from the requirements of these rules.

7.1. Upon proper notice and hearing and for good cause shown, the Board may allow bond coverage in a lesser amount for specific wells.

8. If after reviewing an application to drill or reenter a well or when reviewing a change of operator for a well, the division determines that bond coverage in accordance with these rules will be insufficient to cover the costs of plugging the well and restoring the well site, the division may require a change in the form or the amount of bond coverage. In such cases, the division will support its case for a change of bond coverage in the form of written findings to the operator of record of the well and provide a schedule for completion of the requisite changes.

8.1 Appeals of mandated bond amount changes will follow procedures established by Rule R649-10., Administrative Procedures.

9. The bond shall provide a mechanism for the surety or other guarantor of the bond, to provide prompt notice to the division and the operator of any action alleging the insolvency or bankruptcy of the surety or guarantor, or alleging any violations that would result in suspension or revocation of the suretys or guarantor's charter or license to do business.

9.1. Upon the incapacity of the surety or guarantor to guarantee payment of the bond by reason of bankruptcy, insolvency, or suspension or revocation of a charter or license, the operator shall be deemed to be without bond coverage.

9.2. Upon notification of insolvency or bankruptcy, the division shall notify the operator in writing and shall specify a reasonable period, not to exceed 90 days, to provide bond coverage.

9.3. If an adequate bond is not furnished within the allowed period, the operator shall be required to cease operations immediately, and shall not resume operations until the division has received an acceptable bond.

10. The division shall accept a bond in the form of a surety bond, a collateral bond or a combination of these bonding methods.

10.1. A surety bond is an indemnity agreement in a sum certain payable to the division, executed by the operator as principal and which is supported by the performance guarantee of a corporation authorized to do business as a surety in Utah.

10.1.1. A surety bond shall be executed by the operator and a corporate surety authorized to do business in Utah that is listed in "A.M. Best's Key Rating Guide" at a rating of A- or better or a Financial Performance Rating (FPR) of 8 or better, according to the "A.M. Best's Guide". All surety companies also will be continuously listed in the current issue of the U.S. Department of the Treasury Circular 570. Operators who do not have a surety bond with a company that meets the standards of subsection 10.1.1. will have 120 days from the date of division notification after enactment of the changes to subsection 10.1.1., or face enforcement action. When the division in the course of examining surety bonds notifies an operator that a surety company guaranteeing its performance does not meet the standards of subsection 10.1.1., the operator has 120 days after notice from the division by mail to correct the deficiency, or face enforcement action.

10.1.2. Surety bonds shall be noncancellable during their terms, except that surety bond coverage for wells not drilled may be canceled with the prior consent of the division.

10.1.3. The division shall advise the surety, within 30 days after receipt of a notice to cancel a bond, whether the bond may be canceled on an undrilled well.

10.2. A collateral bond is an indemnity agreement in a sum certain payable to the division, executed by the operator that is supported by one or more of the following:

10.2.1. A cash account.

10.2.1.1. The operator may deposit cash in one or more accounts at a federally insured bank authorized to do business in Utah, made payable upon demand only to the division.

10.2.1.2. The operator may deposit the required amount directly with the division.

10.2.1.3. Any interest paid on a cash account shall be retained in the account and applied to the bond value of the account unless the division has approved the payment of interest to the operator.

10.2.1.4. The division shall not accept an individual cash account in an amount in excess of $100,000 or the maximum insurable amount as determined by the Federal Deposit Insurance Corporation.

10.2.2. Negotiable bonds of the United States, a state, or a municipality.

10.2.2.1. The negotiable bond shall be endorsed only to the order of and placed in the possession of the division.

10.2.2.2. The division shall value the negotiable bond at its current market value, not at face value.

10.2.3. Negotiable certificates of deposit.

10.2.3.1. The certificates shall be issued by a federally insured bank authorized to do business in Utah.

10.2.3.2. The certificates shall be made payable or assigned only to the division both in writing and upon the records of the bank issuing the certificate.

10.2.3.3. The certificates shall be placed in the possession of the division or held by a federally insured bank authorized to do business in Utah.

10.2.3.4. If assigned, the division shall require the banks issuing the certificates to waive all rights of setoff or liens against those certificates.

10.2.3.5. The division shall not accept an individual certificate of deposit in an amount in excess of $100,000 or the maximum insurable amount as determined by the Federal Deposit Insurance Corporation.

10.2.4. An irrevocable letter of credit.

10.2.4.1. Letters of credit shall be placed in the possession of and payable upon demand only to the division.

10.2.4.2. Letters of credit shall be issued by a federally insured bank authorized to do business in Utah.

10.2.4.3. Letters of credit shall be irrevocable during their terms.

10.2.4.4. Letters of credit shall be automatically renewable or the operator shall ensure continuous bond coverage by replacing letters of credit, if necessary, at least 30 days before their expiration date with other acceptable bond types or letters of credit.

11. The required bond amount specified in subsections 5. and 6. of all collateral posted as assurance under this section shall be subject to a margin determined by the division which is the ratio of the face value of the collateral to market value, as determined by the division.

11.1. The margin shall reflect legal and liquidation fees, as well as value depreciation, marketability and fluctuations that might affect the net cash available to the division to complete plugging and restoration.

12. The market value of collateral may be evaluated at any time, and in no case shall the market value of collateral be less than the required bond amount specified in subsections 5. and 6.

12.1. Upon evaluation of the market value of collateral by the division, the division will notify the operator of any required changes in the amount of the bond and shall allow a reasonable period, not to exceed 90 days, for the operator to establish acceptable bond coverage.

12.2. If an adequate bond is not furnished within the allowed period the operator shall be required to cease operations immediately and shall not resume operations until the division has received an acceptable bond.

13. Persons with an interest in collateral posted as a bond, and who desire notification of actions pursuant to the bond, shall request the notification in writing from the division at the time collateral is offered.

14. The division may allow the operator to replace existing bonds with other bonds that provide sufficient coverage.

14.1. Replacement of a bond pursuant to this section shall not constitute a release of bond under subsection15.

14.2. The division shall not allow liability to cease under an existing bond until the operator has furnished, and the division has approved, an acceptable replacement bond.

14.3. When the operator of wells covered by a blanket bond changes, the division will review the financial eligibility of a new operator for blanket bonding as described in subsection 6.4., and the division will make a written finding concerning the applicability of blanket bonding to the prospective new operator.

14.4. Transfer of the ownership of property does not cancel liability under an existing bond until the division reviews and approves a change of operator for any wells

affected by the transfer of ownership.

14.5. If a transfer of the ownership of property is made and an operator wishes to request a change to a new operator of record for the affected wells, then the following requirements shall be met:

14.5.1. The operator shall notify the division in writing when ownership of any well associated with the property has been transferred to a named transferee, and the operator shall request a change of operator for the affected wells.

14.5.2. The request shall describe each well by reference to its well name and number, API number, and its location, as described by the section, township, range, and county, and shall also include a proposed effective date for the operator change.

14.5.3. The request shall contain the endorsement of the new operator accepting such change of operator.

14.5.4. The request shall contain evidence of the new operator's bond coverage.

14.5.5. The request may include a request to cancel liability for the well(s) included in the operator change that are listed under the existing operator's bond upon approval by the division of an adequate replacement bond in the name of the new operator.

14.6. Upon receipt of a request for change of operator, the division will review the proposed new operator's bond coverage, and if bond coverage is acceptable, the division will issue a notice of approval of the change of operator.

14.6.1. If the division determines that the new operator's bond coverage will be insufficient to cover the costs of plugging and site restoration for the applicable well(s), the division may deny the change of operator, or the division may require a change in the form and amount of the new operator's bond coverage in order to approve the change of operator. In such cases, the division will support its case for a change of the new operator's bond coverage in the form of written findings, and the division will provide a schedule for completion of the requisite changes in order to approve the operator change. The written findings and schedule for changes in bond coverage will be sent to both the operator of record of the applicable well(s) and the proposed new operator.

14.7. If the request for operator change included a request to cancel liability under the existing operator's bond in accordance with subsection 14.5.5., and the division approves the operator change, then the division will issue a notice of approval of termination of liability under the existing bond for the wells included in the operator change. When the division has approved the termination of liability under a bond, the original operator is relieved from the responsibility of plugging or repairing any wells and restoring any well site affected by the operator change.

14.8. If all of the wells covered by a bond are affected by an operator change, the bond may be released by the division in accordance with subsection 15.

15. Bond release procedures are as follows:

15.1. Requests for release of a bond held by the division may be submitted by the operator at any time after a subsequent notice of plugging of a well has been submitted to the division or the division has issued a notice of approval of termination of liability for all wells covered by an existing bond.

15.1.1. Within 30 days after a request for bond release has been filed with the division, the operator shall submit signed affidavits from the surface landowner of any previously plugged well site certifying that restoration has been performed as required by the mineral lease and surface agreements.

15.1.2. If such affidavits are not submitted, the division shall conduct an inspection of the well site in preparation for bond release as explained in subsection 15.2.

15.1.3. Within 30 days after a request for bond release has been filed with the division, the division shall publish notice of the request in a daily newspaper of general circulation in the city and county of Salt Lake and in a newspaper of general circulation in the county in which the proposed well is located.

15.1.4. If a written objection to the request for bond release is not received by the division within 15 days after publication of the notice of request, the division may release liability under the bond as an administrative action.

15.1.5. If a written objection to the request for bond release is received by the division within 15 days after publication of the notice of request, the request shall be set for hearing and notice thereof given in accordance with the procedural rules of the Board.

15.2. If affidavits supporting the bond release application are not received by the division in accordance with subsection 15.1.1., the division shall within 30 days or as soon thereafter as weather conditions permit, conduct an inspection and evaluation of the well site to determine if restoration has been adequately performed.

15.2.1. The operator shall be given notice by the division of the date and time of the inspection, and if the operator is unable to attend the inspection at the scheduled date and time, the division may reschedule the inspection to allow the operator to participate.

15.2.2. The surface landowner, agent or lessee shall be given notice by the operator of such inspection and may participate in the inspection; however, if the surface landowner is unable to attend the inspection, the division shall not be required to reschedule the inspection in order to allow the surface landowner to participate.

15.2.3. The evaluation shall consider the adequacy of well site restoration, the degree of difficulty to complete any remaining restoration, whether pollution of surface and subsurface water is occurring, the probability of future occurrence of such pollution, and the estimated cost of abating such pollution.

15.2.4. Upon request of any person with an interest in bond release, the division may arrange with the operator to allow access to the well site or sites for the purpose of gathering information relevant to the bond release.

15.2.5. The division shall retain a record of the inspection and the evaluation, and if necessary and upon written request by an interested party, the division shall provide a copy of the results.

15.3. Within 60 days from the filing of the bond release request, if a public hearing is not held pursuant to subsection 15.1.5., or within 30 days after such public hearing has been held, the division shall provide written notification of the decision to release or not release the bond to the following parties:

15.3.1. The operator.

15.3.2. The surety or other guarantor of the bond.

15.3.3. Other persons with an interest in bond collateral who have requested notification under R649-3-1.13.

15.3.4. The persons who filed objections to the notice of application for bond release.

15.4. If the decision is made to release the bond, the notification specified in subsection 15.3. shall also state the effective date of the bond release.

15.5. If the division disapproves the application for release of the bond or portion thereof, the notification specified in subsection 15.3. shall also state the reasons for disapproval, recommending corrective actions necessary to secure the release, and allowing an opportunity for a public hearing.

15.6. The division shall notify the municipality in which

the well is located by certified mail at least 30 days prior to the release of the bond.

16. The following guidelines will govern the Forfeiture of Bonds.

16.1. The division shall take action to forfeit the bond if any of the following occur:

16.1.1. The operator refuses or is unable to conduct plugging and site restoration.

16.1.2. Noncompliance as to the conditions of a permit issued by the division.

16.1.3. The operator defaults on the conditions under which the bond was accepted.

16.2. In the event forfeiture of the bond is necessary, the matter will be considered by the Board.

16.3. For matters of bond forfeiture, the division shall send written notification to the parties identified in subsection 15.3., in addition to the notice requirements of the Board procedural rules.

16.4. After proper notice and hearing, the Board may order the division to do any of the following:

16.4.1. Proceed to collect the forfeited amount as provided by applicable laws for the collection of defaulted bonds or other debts.

16.4.2. Use funds collected from bond forfeiture to complete the plugging and restoration of the well or wells to which bond coverage applies.

16.4.3. Enter into a written agreement with the operator or another party to perform plugging and restoration operations in accordance with a compliance schedule established by the division as long as such party has the ability to perform the necessary work.

16.4.4. Allow a surety to complete the plugging and restoration, if the surety can demonstrate an ability to complete the plugging and restoration.

16.4.5. Any other action the Board deems reasonable and appropriate.

16.5. In the event the amount forfeited is insufficient to pay for the full cost of the plugging and restoration, the division may complete or authorize completion of plugging and restoration and may recover from the operator all costs of plugging and restoration in excess of the amount forfeited.

16.6. In the event the amount of bond forfeited was more than the amount necessary to complete plugging and restoration, the unused funds shall be returned by the division to the party from whom they were collected.

16.7. In the event the bond is forfeited and there exists any unplugged well or wells previously covered under the forfeited bond, then the operator must establish new bond coverage in accordance with these rules.

16.8. If the operator requires new bond coverage under the provisions of subsection 16.7., then the division will notify the operator and specify a reasonable period, not to exceed 90 days, to establish new bond coverage.

R649-3-2. Location And Siting of Vertical Wells and Statewide Spacing for Horizontal Wells.

1. In the absence of special orders of the board establishing drilling units or authorizing different well density or location patterns for particular pools or parts thereof, each oil and gas well shall be located in the center of a 40 acre quarter-quarter section, or a substantially equivalent lot or tract or combination of lots or tracts as shown by the most recent governmental survey, with a tolerance of 200 feet in any direction from the center location, a "window" 400 feet square.

1.1.No oil or gas well shall be drilled less than 920 feet from any other well drilling to or capable of producing oil or gas from the same pool.

1.2. No oil or gas well shall be completed in a known pool unless it is located more than 920 feet from any other well completed in and capable of producing oil or gas from the same pool.

2. The division shall have the administrative authority to determine the pattern location and siting of wells adjacent to an area for which drilling units have been established or for which a request for agency action to establish drilling units has been filed with the board and adjacent to a unitized area, where there is sufficient evidence to indicate that the particular pool underlying the drilling unit or unitized area may extend beyond the boundary of the drilling unit or unitized area and the uniformity of location patterns is necessary to ensure orderly development of the pool.

3. In the absence of special orders of the Board, no portion of the horizontal interval within the potentially productive formation shall be closer than six hundred-sixty (660) feet to a drilling or spacing unit boundary, federally unitized area boundary, uncommitted tract within a unit, or boundary line of a lease not committed to the drilling of such horizontal well.

4. The surface location for a horizontal well may be anywhere on the lease.

5. Any horizontal interval shall not be closer than one thousand three hundred and twenty (1,320) feet to any vertical well completed in and producing from the same formation. Vertical wells drilled to and completed in the same formation as in a horizontal well are subject to applicable drilling unit orders of the board or the other conditions of this rule that do not specifically pertain to horizontal wells and may be drilled and produced as provided therein.

6. A temporary six hundred and forty (640) acre spacing unit, consisting of the governmental section in which the horizontal well is located, is established for the orderly development of the anticipated pool.

7. In addition to any other notice required by the statute or these rules, notice of the Application for Permit to Drill for a horizontal well shall be given by certified mail to all owners within the boundaries of the designated temporary spacing unit.

8. Horizontal wells to be located within federally supervised units are exempt from the above referenced conditions of 5, 6 and 7.

9. Exceptions to any of the above referenced conditions of 3 through 7 may be approved upon proper application pursuant to R649-3-3, Exception to Location and Siting of Wells, or R649-10, Administrative Procedures.

10. Additional horizontal wells may be approved by order of the Board after hearing brought upon by a Request for Agency Action (Petition) filed in accordance with the Board's Procedural Rules.

R649-3-3. Exception to Location and Siting of Wells.

1. Subject to the provisions of R649-3-11.1.2, the division shall have the administrative authority to grant an exception to the locating and siting requirements of R649-3-2 or an order of the board establishing oil or gas well drilling units after receipt from the operator of the proposed well of the following items:

1.1. Proper written application for the exception well location.

1.2. Written consent from all owners within a 460 foot radius of the proposed well location when such exception is to the requirements of R649-3-2, or;

1.3. Written consent from all owners of directly or diagonally offsetting drilling units when such exception is to an order of the board establishing oil or gas well drilling units.

2. If for any reason the division shall fail or refuse to approve such an exception, the board may, after notice and

hearing, grant an exception.

3. The application for an exception to R649-3-2 or board drilling unit order shall state fully the reasons why such an exception is necessary or desirable and shall be accompanied by a plat showing:

3.1. The location at which an oil or gas well could be drilled in compliance with R649-3-2 or Board drilling unit order.

3.2. The location at which the applicant requests permission to drill.

3.3. The location at which oil or gas wells have been drilled or could be drilled, in accordance with R649-3-2 or board drilling unit order, directly or diagonally offsetting the proposed exception.

3.4. The names of owners of all lands within a 460 foot radius of the proposed well location when such exception is to the requirements of R649-3-2, or

3.5. The names of owners of all directly or diagonally offsetting drilling units when such exception is to an order of the board establishing oil or gas drilling units.

4. No exception shall prevent any owner from drilling an oil or gas well on adjacent lands, directly or diagonally offsetting the exception, at locations permitted by R649-3-2, or any applicable order of the board establishing oil or gas well drilling units for the pool involved.

5. Whenever an exception is granted, the board or the division may take such action as will offset any advantage that the person securing the exception may obtain over other producers by reason of the exception location.

R649-3-4. Permitting of Wells to be Drilled, Deepened or Plugged-Back.

1. Prior to the commencement of drilling, deepening or plugging back of any well, exploratory drilling such as core holes and stratigraphic test holes, or any surface disturbance associated with such activity, the operator shall submit Form 3, Application for Permit to Drill, Deepen, or Plug Back and obtain approval. Approval shall be given by the division if it appears that the contemplated location and operations are not in violation of any rule or order of the board for drilling a well.

2. The following information shall be included as part of the complete Application for Permit to Drill, Deepen, or Plug Back.

2.1. The telephone number of the person to contact if additional information is needed.

2.2. Proper identification of the lease as state, federal, Indian, or fee.

2.3. Proper identification of the unit, if the well is located within a unit.

2.4. A plat or map, preferably on a scale of one inch equals 1,000 feet, prepared by a licensed surveyor or engineer, that shows the proposed well location. For directional wells, both surface and bottomhole locations should be marked.

2.5. A copy of the Division of Water Rights approval or the identifying number of the approval for use of water at the drilling site.

2.6. A drilling program containing the following information shall also be submitted as part of a complete APD.

2.6.1. The estimated tops of important geologic markers.

2.6.2. The estimated depths at which the top and the bottom of anticipated water, oil, gas, or other mineral-bearing formations are expected to be encountered, and the owner's or operator's plans for protecting such resources.

2.6.3. The owner's or operator's minimum specifications for pressure control equipment to be used and a schematic diagram thereof showing sizes, pressure ratings or API series, proposed testing procedures and testing frequency.

2.6.4. Any supplementary information more completely describing the drilling equipment and casing program as required by Form 3, Application for Permit to Drill, Deepen, or Plug Back.

2.6.5. The type and characteristics of the proposed circulating medium or mediums to be employed in drilling, the quantities and types of mud and weighting material to be maintained, and the monitoring equipment to be used on the mud system.

2.6.6. The anticipated type and amount of testing, logging, and coring.

2.6.7. The expected bottomhole pressure and any anticipated abnormal pressures or temperatures or potential hazards, such as hydrogen sulfide, H_2S rules are found in R649-3-12 expected to be encountered, along with contingency plans for mitigating such identified hazards.

2.6.8. Any other facets of the proposed operation that the lessee or operator desires to point out for the division's consideration of the application.

2.6.9. If an Application for Permit to Drill, Deepen, or Plug Back is for a proposed horizontal well, a horizontal well diagram clearly showing the well bore path from the surface through the terminus of the lateral shall be submitted.

2.7. Form 5, Designation of Agent or Operator shall be filed when the operator is a person other than the owner.

2.8. If located on State or Fee surface, an APD will not be approved until an Onsite Predrill Evaluation is performed as outlined in R649-3-18.

3. Two legible copies, carbon or otherwise, of the APD filed with the appropriate federal agency may be used in lieu of the forms prescribed by the board.

4. Approval of the APD shall be valid for a period of 12 months from the date of such approval. Upon approval of an APD, a well will be assigned an API number by the division. The API number should be used to identify the permitted well in all future correspondence with the division.

5. If a change of location or drilling program is desired, an amended APD shall be filed with the division and its approval obtained. If the new location is at an authorized location in the approved drilling unit, or the change in drilling program complies with the rules for that area, the change may be approved verbally or by telegraph. Within five days after obtaining verbal or telegraphic authorization, the operator shall file a written change application with the division.

6. After a well has been completed or plugged and abandoned, it shall not be reentered without the operator first submitting a new APD and obtaining the division's approval. Approval shall be given if it appears that a bond has been furnished or waived, as required by R649-3-1, Bonding, and the contemplated work is not in violation of any rule or order of the board.

7. An operator or owner who applies for an APD in an area not subject to a special order of the board establishing drilling units, may contemporaneously or subsequently file a Request for Agency Action to establish drilling units for an area not to exceed the area reasonably projected by the operator or owner to be underlaid by the targeted reservoir.

8. An APD for a well within the area covered by a proper Request for Agency Action that has been filed by an interested person, or the division or the board on its own motion, for the establishment of drilling units or the revision of existing drilling units for the spacing of wells shall be held in abeyance by the division until such time as the matter has been noticed, fully heard and determined.

9. An exception to R649-3-4-8 shall be made and a permit shall be issued by the division if an owner or operator files a sworn statement demonstrating to the division's satisfaction that on and after the date the Request for Agency

Action requesting the establishment of drilling units was filed, or the action of the division or board was taken; and

9.1. The owner or operator has the right or obligation under the terms of an existing contract to drill the requested well; or

9.2. The owner or operator has a leasehold estate or right to acquire a leasehold estate under a contract that will be terminated unless he is permitted to commence the drilling of the required well before the matter can be fully heard and determined by the board.

R649-3-5. Identification.

1. Every drilling and producible well shall be identified by a sign posted on the derrick or in a conspicuous place near the well.

2. The sign shall be of durable construction. The lettering on the sign shall be kept in a legible condition and shall be large enough to be legible under normal conditions at a distance of 25 feet.

3. The wells on each lease or property shall be numbered in nonrepetitive, logical, and distinctive sequence. Each sign shall show the number or name of the well, the name of the owner or operator, the lease name, and the location of the well by quarter section, township, and range.

R649-3-6. Drilling Operations.

1. Drilling operations shall be conducted according to the drilling program submitted on the original APD and as approved by the division. Any change of plans to the original drilling program shall be submitted to the division by using Form 9, Sundry Notices and Reports on Wells and shall receive division approval prior to implementation. A change of plans necessary because of emergency conditions may be implemented without division approval. The operator shall provide the division with verbal notice of the emergency change within 24 hours and written notice within five days.

2. An operator of a drilling well as designated in R649-2-4 shall comply with reporting requirements as follows:

2.1. The spudding in of a well shall be reported to the division within 24 hours. The report should include the well name and number, drilling contractor, rig number and type, spud date and time, the date that continuous drilling will commence, the name of the person reporting the spud, and a contact telephone number.

2.2. The operator shall file Form 6, Entity Action Form with the division within five working days of spudding in a well. The division will assign the well an entity number that will identify the well on the operator's monthly oil and gas production and disposition reports.

2.3. The operator shall notify the division 24 hours in advance of all testing to be performed on the blowout preventer equipment on a well.

2.4. The operator shall submit a monthly status report for each drilling well on Form 9, Sundry Notices and Reports on Wells. The report should include the well depth and a description of the operations conducted on the well during the month. The report shall be submitted no later than the fifth day of the following calendar month until such time as the well is completed and the well completion report is filed.

2.5. The operator shall notify the division 24 hours in advance of all casing tests performed in accordance with R649-3-13.

2.6. The operator shall report to the division all fresh water sand encountered during drilling on Form 7, Report of Water Encountered During Drilling. The report shall be filed with Form 8, Well Completion or Recompletion Report and Log.

R649-3-7. Well Control.

1. When drilling in wildcat territory, the owner or operator shall take all reasonably necessary precautions for keeping the well under control at all times and shall provide, at the time the well is started, proper high pressure fittings and equipment. All pressure control equipment shall be maintained in good working condition at all times.

2. In all proved areas, the use of blowout prevention equipment "BOPE" shall be in accordance with the established and approved practice in the area. All pressure control equipment shall be maintained in good working condition at all times.

3. Upon installation, all ram type BOPE and related equipment, including casing, shall be tested to the lesser of the full manufacturer's working pressure rating of the equipment, 70% of the minimum internal yield pressure of any casing subject to test, or one psi/ft of the last casing string depth. Annular type BOPE are to be tested in conformance with the manufacturer's published recommendations. The operator shall maintain records of such testing until the well is completed and will submit copies of such tests to the division if required.

4. In addition to the initial pressure tests, ram and annular type preventers shall be checked for physical operation each trip. All BOPE components, with the exception of an annular type blowout preventer, shall be tested monthly to the lesser of 50% of the manufacturer's rated pressure of the BOPE, the maximum anticipated pressure to be contained at the surface, one psi/ft of the last casing string depth, or 70% of the minimum internal yield pressure of any casing subject to test.

5. If a pressure seal in the assembly is disassembled, a test of that seal shall be conducted prior to the resumption of any drilling operation. A shell test of the affected seal shall be adequate. If the affected seal is integral with the BOP stack, either pipe or blind ram, necessitating a test plug to be set in order to test the seal, the division may grant approval to proceed without testing the seal if necessary for prudent operations.

6. All tests of BOPE shall be noted on the driller's log, IADC report book, or equivalent and shall be available for examination by the director or an authorized agent during routine inspections.

7. BOPE used in possible or probable hydrogen sulfide or sour gas formations shall be suitable for use in such areas.

R649-3-8. Casing Program.

1. The method of cementing casing in the hole shall be by pump and plug method, displacement method, or other method approved by the division.

2. When drilling in wildcat territory or in any field where high pressures are probable, the conductor and surface strings of casing must be cemented throughout their lengths, unless another procedure is authorized or prescribed by the division, and all subsequent strings of casing must be securely anchored.

3. In areas where the pressures and formations to be encountered during drilling are known, sufficient surface casing shall be run to:

3.1. Reach a depth below all known or reasonably estimated, utilizable, domestic, fresh water levels.

3.2. Prevent blowouts or uncontrolled flows.

4. The casing program adopted must be planned to protect any potential oil or gas horizons penetrated during drilling from infiltration of waters from other sources and to prevent the migration of oil, gas, or water from one horizon to another.

R649-3-9. Protection of Upper Productive Strata.

1. No well shall be deepened for the purpose of

producing oil or gas from a lower stratum until all upper productive strata are protected, either permanently by casing and cementing or temporarily through the use of tubing and packer, to the satisfaction of the division.

2. In any well that appears to have defective, poorly cemented, or corroded casing that will permit or may create underground waste or may contaminate underground or surface fresh water, the operator shall proceed with diligence to use the appropriate method and means to eliminate such hazard of underground waste or contamination of fresh water. If such hazard cannot be eliminated, the well shall be properly plugged and abandoned.

3. Natural gas that is encountered in substantial quantities in any section of a drilled hole above the ultimate objective shall be shut off with reasonable diligence, either by mudding, casing or other approved method, and shall be confined to its original source to the satisfaction of the division.

R649-3-10. Tolerances for Vertical Drilling.

1. Deviation from the vertical for short distances is permitted in the drilling of a well without special approval to straighten the hole, sidetrack junk, or correct other mechanical difficulties.

2. All wells shall be drilled such that the surface location of the well and all points along the intended well bore shall be within the tolerances allowed by R649-3-2, Location and Siting of Vertical Wells and Statewide Spacing for Horizontal Wells, or the appropriate board order.

R649-3-11. Directional Drilling.

1. Except for the tolerances allowed under R649-3-10, no well may be intentionally deviated unless the operator shall first file application and obtain approval from the division.

1.1. An application for directional drilling may be approved by the division without notice and hearing when the applicant is the owner of all the oil and gas within a radius of 460 feet from all points along the intended well bore, or the applicant has obtained the written consent of the owner to the proposed directional drilling program.

1.2. An application pertaining to a well with a surface location outside the tolerances allowed by R649-3-2 or the appropriate board order, but with the point of penetration of the targeted productive zone(s) and bottom hole location within said tolerances, may be approved by the division without notice and hearing conditioned upon the operator filing a certification included with the application that it will not perforate and complete the well in any other zone(s) outside of said tolerances without complying with the requirements of R649-3-11.1.1. Under these circumstances, no additional exception location approval under R649-3-3 is required.

1.3. An application for directional drilling may be included as part of the initial APD for a proposed well.

2. An application for directional drilling shall include the following information:

2.1. The name and address of the operator.

2.2. The lease name, well number, field name, reservoir name, and county where the proposed well is located.

2.3. A plat or sketch showing the distance from the surface location to section and lease lines, the target location within the intended producing interval, and any point along the intended well bore outside the 460 foot radius for which the consent of the owner has been obtained.

2.4. The reason for the intentional deviation.

2.5. The signature of designated agent or representative of operator.

3. Within 30 days following completion of a directionally drilled well, a complete angular deviation and directional survey of the well obtained by an approved well survey company shall be filed with the division, together with other regularly required reports.

R649-3-12. Drilling Practices for Hydrogen Sulfide H_2S Areas and Formations.

1. This rule shall apply to drilling, redrilling, deepening, or plugging back operations in areas where the formations to be penetrated are known to contain or are expected to contain H_2S in excess of 20 ppm and to areas where the presence or absence thereof is unknown.

2. A written contingency plan, providing details of actions to be taken to alert and protect operating personnel and members of the public in the event of an accidental release of H_2S gas shall be submitted to the division as part of the initial APD for a well or as a sundry notice.

3. All proposed drill site locations shall be planned to obtain the maximum safety benefits consistent with the rig configuration, terrain, prevailing winds, etc.

3.1. The drilling rig shall, where possible, be situated so that prevailing winds blow across the rig in a direction toward the reserve pit and away from escape routes.

3.2. On-site trailers shall be located to allow reasonably safe distances from both the well and the outlet of the flare line.

4. At least two cleared areas shall be designated as crew briefing or safety areas.

4.1. Both areas shall be located at least 200 feet from the well, with at least one area located generally upwind from the well.

5. Protective equipment shall be provided by the operator or its drilling contractor for operating personnel and shall include the following:

5.1. An adequate number of positive pressure type self-contained breathing apparatus to allow all personnel normally involved on a drilling location immediate access to such equipment, with a minimum of one working apparatus available for the immediate use of each rig hand in emergencies.

5.2. Chalk boards or note pads to be used for communication when wearing protective breathing apparatus.

5.3. First aid supplies.

5.4. One resuscitator complete with medical oxygen.

5.5. A litter or stretcher.

5.6. Harnesses and lifelines.

5.7. A telephone, radio, mobile phone, or other communication device that provides emergency two-way communication from a safe area near the well location.

6. Each drill site shall have an H_2S detection and monitoring system that activates audible and visible alarms when the concentration of H_2S reaches the threshold limit of 20 ppm in air. This equipment shall have a rapid response time and be capable of sensing a minimum of ten ppm H_2S in air, with at least three sensing points, located at the shale shaker, on the derrick floor, and in the cellar. Other sensing points shall be located at other critical areas where H_2S might accumulate. Portable H_2S detection equipment capable of sensing an H_2S concentration of 20 ppm shall be available for all working personnel and shall be equipped with an audible warning signal.

7. Equipment to indicate wind direction at all times shall be installed at prominent locations. At least two wind socks or streamers shall be located at separate elevations at the well location and shall be easily visible from all areas of the location. Windsocks or streamers shall be located in illuminated areas for night operations.

8. When H_2S is encountered during drilling, well marked, highly visible warning signs shall be displayed at the

rig and along all access routes to the well location.

8.1. The signs shall warn of the presence of H_2S and shall prohibit approach to the well location when red flags are displayed.

8.2. Red flags shall be displayed when H_2S is present in concentrations greater than 20 ppm in air as measured on the equipment required under R649-3-12-6.

9. Unless adequate natural ventilation is present, portable fans or ventilation equipment shall be located in work areas to disperse H_2S when it is encountered.

10. A flare system shall be utilized to safely gather and burn H_2S bearing gas.

10.1. Flare lines shall be located as far from the operating site as feasible and shall be located in a manner to compensate for wind changes.

10.2. The outlets of all flare lines shall be located at least 150 feet from the well head unless otherwise approved by the division.

11. Sufficient quantities of additives shall be maintained on location to add to the mud system to scavenge or neutralize H_2S.

R649-3-13. Casing Tests.

1. In order to determine the integrity of the casing string set in the well, the operator shall, unless otherwise requested by the division, perform a pressure test of the casing to the pressures specified under R649-3-7.4 before drilling out of any casing string, suspending drilling operations, or completing the well.

R649-3-14. Fire Hazards on the Surface.

1. All rubbish or debris that might constitute a fire hazard shall be removed to a distance of a least 100 feet from the well location, tanks, separator, or any structure. All waste oil or gas shall be burned or disposed of in a manner to avert creation of a fire hazard.

2. Any gas other than poisonous gas escaping from the well during drilling operations shall be, so far as practicable, conducted to a safe distance from the well site and burned in a suitable flare.

R649-3-15. Pollution and Surface Damage Control.

1. The operator shall take all reasonable precautions to avoid polluting lands, streams, reservoirs, natural drainage ways, and underground water.

1.1. The owner or operator shall carry on all operations and maintain the property at all times in a safe and workmanlike manner having due regard for the preservation and conservation of the property and for the health and safety of employees and people residing in close proximity to those operations.

1.2. At a minimum, the owner or operator shall:

1.2.1. Take reasonable steps to prevent and shall remove accumulations of oil or other materials deemed to be fire hazards from the vicinity of well locations, lease tanks and pits.

1.2.2. Remove from the property or store in an orderly manner, all scrap or other materials not in use.

1.2.3. Provide secure workmanlike storage for chemical containers, barrels, solvents, hydraulic fluid, and other non-exempt materials.

1.2.4. Maintain tanks in a workmanlike manner that will preclude leakage and provide for all applicable safety measures, and construct berms of sufficient height and width to contain the quantity of the largest tank at the storage facility.

1.2.4.1. The use of crude or produced water storage tanks without tops is strictly prohibited except during well testing operations.

1.2.5. Catch leaks and drips, contain spills, and cleanup promptly.

1.2.6. Waste reduction and recycling should be practiced in order to help reduce disposal volumes.

1.2.7. Produced water, tank bottoms and other miscellaneous waste should be disposed of in a manner that is in compliance with these rules and other state, federal, or local regulations or ordinances.

1.2.8. In general, good housekeeping practices should be used.

R649-3-16. Reserve Pits and Other On-site Pits.

1. Small onsite oil field pits including, but not limited to, reserve pits, emergency pits, workover and completion pits, storage pits, pipeline drip pits, and sumps shall be located and constructed in such a manner as to contain fluids and not cause pollution of waters and soils. They shall be located and constructed according to the Division guidelines for onsite pits. See Ranking Criteria for Reserve and Onsite Pit Liner Requirements, on the Oil, Gas and Mining web page.

2. Reserve pit location and construction requirements including liner requirements will be discussed at the predrill site evaluation. Special stipulations concerning the reserve pit will be included as part of the Division's approval to drill.

3. Following drilling and completion of the well the reserve pit shall be closed within one year, unless permission is granted by the Division for a longer period.

4. Pit contents shall meet the Division's Cleanup Levels (guidance document for numeric clean-up levels) or background levels prior to burial.

5. The contents may require treatment to reduce mobility and/or toxicity in order to meet cleanup levels.

6. The alternative to meeting cleanup levels would be transporting of material to an appropriate disposal facility.

R649-3-17. Inspection.

1. Inspection of wells shall be performed by the division to determine operator compliance with the rules and orders of the board.

2. The inspection shall not interfere with the mechanical operation of facilities or equipment used in drilling and production operations.

3. Inspections of operations involving a safety hazard shall not be conducted, nor shall an inspection be conducted that may cause a safety hazard.

R649-3-18. On-site Predrill Evaluation.

1. An on-site predrill evaluation of drilling operations located on state or private land shall be scheduled and conducted by the division prior to approval of an APD and no later than 30 days after receipt by the division of a complete APD.

1.1. An on-site predrill evaluation may be performed by the division prior to submittal of a complete APD at the written request of the operator.

1.2. The division, the operator, and other persons associated with the surface management or construction of the well site shall attend the predrill evaluation.

1.3. When appropriate, the operator's surveyor and archaeologist may also participate in the predrill evaluation.

1.4. When the surface of the land involved is privately owned, the operator shall include in the APD the name, address, and telephone number of the private surface owner as shown on the real property records of the county where the well is located.

1.5. The surface owner shall be invited by the division to attend the predrill evaluation.

1.6. The surface owner's inability to attend the predrill

evaluation shall not delay the scheduled evaluation.

2. Special stipulations concerning surface use or justifications for well spacing exceptions may be addressed and developed at the predrill evaluations.

2.1. Special stipulations shall be incorporated as conditions of the approved APD, together with any additional conditions determined by the division to be necessary following a review of the complete application.

R649-3-19. Well Testing.

1. Each operator shall conduct a stabilized production test of at least 24 hours duration not later than 15 days following the completion or recompletion of any well for the production of oil or gas.

1.1. The results of the test shall be reported in writing to the division within 15 days after completion of the test.

1.2. Additional tests shall be made as requested by the division.

2. The division may request subsurface pressure measurements on a sufficient number of wells in any pool to provide adequate data to determine reservoir characteristics.

3. Upon written request, the division may waive or extend the time for conducting any test.

4. A gas-oil ratio "GOR" test shall be conducted not later than 15 days following the completion or recompletion of each well in a pool that contains both oil and gas.

4.1. The average daily oil production, the average daily gas production and the average GOR shall be recorded.

4.2. The results of the GOR test shall be reported in writing to the division within 15 days after completion of the test.

4.3. A GOR test of at least 24 hours duration shall satisfy the requirements of R649-3-19-1.

5. When the results of a multipoint test or other approved test for the determination of gas well potential have not been submitted to the division within 30 days after completion or recompletion of any producible gas well, the division may order this test to be made.

5.1. All data pertinent to the test shall be submitted to the division in legible, written form within 15 days after completion of the test.

5.2. The performance of a multipoint or other approved test shall satisfy the requirements of R649-3-19-1.

6. All tests of any producible gas well will be taken in accordance with the Manual of Back-Pressure Testing of Gas Wells published by the Interstate Oil and Gas Compact Commission, with necessary modifications as approved by the division.

R649-3-20. Gas Flaring or Venting.

1. Produced gas from an oil well, also known as associated gas or casinghead gas, may be flared or vented only in the following amounts:

1.1. Up to 1,800 MCF of oil well gas may be vented or flared from an individual well on a monthly basis at any time without approval.

1.2. During the period of time allowed for conducting the stabilized production test or other approved test as required by R649-3-19, the operator may vent or flare all produced oil well gas as needed for conducting the test.

1.2.1. The operator shall not vent or flare gas that is not necessary for conducting the test or beyond the time allowed for conducting the test.

1.3. During the first calendar month immediately following the time allowed for conducting the initial stabilized production test as required by R649-3-19.1, the operator may vent or flare up to 3,000 MCF of oil well gas without approval.

1.4. Unavoidable or short-term oil well gas venting or flaring may occur without approval in accordance with R649-3-20.4, 4.1, 4.2, and 4.3.

2. Produced gas from a gas well may be vented or flared only in the following amounts:

2.1. During the period of time allowed for conducting the stabilized production test, the multipoint test, or other approved test as required by R649-3-19, the operator may vent or flare all produced gas well gas as needed for conducting the test.

2.2. The operator shall not vent or flare gas which is not necessary for conducting the tests or beyond the time allowed for conducting the tests.

2.3. Unavoidable or short-term gas well gas venting or flaring may occur without approval in accordance with R649-3-20.4, 4.1, 4.2, and 4.3.

3. If an operator desires to produce a well for the purpose of testing and evaluation beyond the time allowed by R649-3-19 and vent or flare gas in excess of the aforementioned limits of gas venting or flaring, the operator shall make written request for administrative action by the division to allow gas venting or flaring during such testing and evaluation.

3.1. The operator shall provide any information pertinent to a determination of whether marketing or otherwise conserving the produced gas is economically feasible.

3.2. Upon such request and based on the justification information presented, the division may authorize gas venting or flaring at unrestricted rates for up to 30 days of testing or no more than 50 MMCF of gas vented or flared, whichever is less.

4. Once a well is completed for production and gas is being transported or marketed, the operator is allowed unavoidable or short-term gas venting or flaring without approval only in the following cases:

4.1. Gas may be vented or released from oil storage tanks or other low pressure oil production vessels unless the division determines that the recovery of such vapors is warranted.

4.2. Gas may be vented or flared from a well during periods of line failures, equipment malfunctions, blowouts, fires, or other emergencies if shutting in or restricting production from the well would cause waste or create adverse impact on the well or producing reservoir.

4.3. The operator shall provide immediate notification to the division in all such cases in accordance with R649-3-32, Reporting of Undesirable Events.

4.4. Upon notification, the division shall determine if gas venting or flaring is justified and specify conditions of approval if necessary.

4.5. Gas may be vented or flared from a well during periods of well purging or evaluation tests not exceeding a period of 24 hours or a maximum of 144 hours per month.

4.6. The operator shall provide subsequent written notification to the division in all such cases.

5. If an operator wishes to flare or vent a greater amount of produced gas than allowed by this rule, the operator must submit a Request for Agency Action to the board to be considered as a formal board docket item. The request should include the following items:

5.1. A statement justifying the need to vent or flare more than the allowable amount.

5.2. A description of production test results.

5.3. A chemical analysis of the produced gas.

5.4. The estimated oil and gas reserves.

5.5. A description of the reinjection potential or other conservation oriented alternative for disposition of the produced gas.

5.6. A description of the amount of gas used in lease

operations.

5.7. An economic evaluation supporting the operator's determination that conservation of the gas is not economically viable. The evaluation should utilize any engineering or geologic data available and should consider total well production, not just gas production, in presenting the profitability and costs for beneficial use of the gas.

5.8. Any other information pertinent to a determination of whether marketing or otherwise conserving the produced gas is economically feasible.

6. Upon review of the request for approval to vent or flare gas from a well, the board may elect to:

6.1. Allow the requested venting or flaring of gas.

6.2. Restrict production until the gas is marketed or otherwise beneficially utilized.

6.3. Take any other action the board deems appropriate in the circumstances.

7. When gas venting or flaring from a well has not been approved by the division or the magnitude and duration of venting or flaring exceeds the amounts specified in these rules or any division or board approval, then the board may issue a formal order to alleviate the noncompliance and/or require the operator to appear before the board to provide justification of such venting or flaring. The division shall notify the appropriate governmental taxing and royalty agencies of any unapproved venting or flaring and of any subsequent board action.

8. No extraction plant processing gas in Utah shall flare or vent such gas unless such venting or flaring is made necessary by mechanical difficulty of a very limited temporary nature or unless the gas vented or flared is of no commercial value.

9. In the event of a more prolonged mechanical difficulty or in the event of plant shut-downs or curtailment because of scheduled or nonscheduled maintenance or testing operations or other reasons, or in the event a plant is unable to accept, process, and market all of the casinghead gas produced by wells connected to its system, the plant operator shall notify the division as soon as possible of the full details of such shut-down or curtailment, following which the division shall take such action as is necessary.

R649-3-21. Well Completion and Filing of Well Logs.

1. For the purposes of this rule only, a well shall be determined to be completed when the well has been adequately worked to be capable of producing oil or gas or when well testing as required by the division is concluded.

2. Within 30 days after the completion of any well drilled or redrilled for the production of oil or gas, Form 8, Well Completion or Recompletion Report and Log, shall be filed with the division, together with a copy of the electric and radioactivity logs, if run.

3. In addition, one copy of all drillstem test reports, formation water analyses, porosity, permeability or fluid saturation determinations, core analyses and lithologic logs or sample descriptions if compiled, shall be filed with the division.

4. As prescribed under R649-2-12, Test and Surveys, the directional, deviation and/or measurement-while-drilling (MWD) survey for a horizontal well shall be filed within 30 days of being run. Such directional, deviation and/or MWD survey specifically related to well location or well bore path shall not be held confidential. Other MWD survey data that presents well log, or other geological, geophysical, or engineering information may be held confidential as provided in R649-2-11, Confidentiality of Well Log Information.

R649-3-22. Completion Into Two or More Pools.

1. The completion of a single well into more than one pool may be permitted by submitting an application to the division and securing its approval.

1.1. The application shall be submitted on Form 9, Sundry Notice and Report and shall be accompanied by an exhibit showing the location of all wells on contiguous oil and gas leases or drilling units overlying the pool.

1.2. The application shall set forth all material facts involved and the manner and method of completion proposed.

2. If oil or gas is to be produced from two or more pools open to each other through the same string of casing so that commingling will take place, the application must also be accompanied by a description of the method used to account for and to allocate production from each pool so commingled.

3. The application shall include an affidavit showing that the operator has provided a copy of the application to the owners of all contiguous oil and gas leases or drilling units overlying the pool.

3.1. If none of these owners file a written objection to the application within 15 days after the date the application is filed with the division, the application may be considered and approved by the division without a hearing.

3.2. If a written objection is filed that cannot be resolved administratively, the application may be approved only after notice and hearing by the board.

R649-3-23. Well Workover and Recompletion.

1. Requests for approval of a notice of intention to perform a workover or recompletion shall be filed by an operator with the division on Form 9, Sundry Notices and Reports on Wells, or if the operation includes substantial redrilling, deepening, or plugging back of an existing well, on Form 3, Application for Permit to Drill, Deepen or Plug Back.

2. The division shall review the proposed workover or recompletion for conformance with the Oil and Gas Conservation General Rules and advise the operator of its decision and any necessary conditions of approval.

3. Recompletions shall be conducted in a manner to protect the original completion interval(s) and any other known productive intervals.

4. The same tests and reports are required for any well recompletion as are required following an original well completion.

5. The applicant shall file a subsequent report of workover on Form 9, Sundry Notices and Reports, or a subsequent report of recompletion on Form 8, Well Completion or Recompletion Report and Log, within 30 days after completing the workover or recompletion operations.

6. For the purpose of qualifying for a tax credit under Utah Code Ann. Section 59-5-102(7), the operator on his behalf and on behalf of each working interest owner must file a request with the division on Form 15, Designation of Workover or Recompletion. The request must be filed within 90 days after completing the workover or recompletion operations.

7. A workover which may qualify under Utah Code Ann. Section 59-5-102(7) shall be downhole operations conducted to maintain, restore or increase the producibility or serviceability of a well in the geologic interval(s) that the well is currently completed in, but shall not include:

7.1. Routine maintenance operations such as pump changes, artificial lift equipment or tubing repair, or other operations that do not involve changes to the wellbore configuration or the geologic interval(s) that it penetrates and that do not stimulate production beyond that which would be anticipated as the result of routine maintenance.

7.2. Operations to convert any well for use as a disposal well or other use not associated with enhancing the recovery of hydrocarbons.

7.3. Operations to convert a well to a Class II injection well for enhanced recovery purposes may qualify if the secondary or enhanced recovery project has received the necessary board approval.

8. A recompletion that may qualify under Utah Code Ann. Section 59-5-102(7) shall be downhole operations conducted to reestablish producibility or serviceability of a well in any geologic interval(s).

9. The division shall review the request for designation of a workover or recompletion and advise the operator and the State Tax Commission of its decision to approve or deny the operations for the purposes of Utah Code Ann. Section 59-5-102(7).

10. The division is responsible for approval of workover and recompletion operations that qualify for the tax credit.

10.1. If the operator disagrees with the decision of the division, the decision may be appealed to the board.

10.2. Appeals of all other workover and recompletion tax credit decisions should be made to the State Tax Commission.

R649-3-24. Plugging and Abandonment of Wells.

1. Before operations are commenced to plug and abandon any well the owner or operator shall submit a notice of intent to plug and abandon to the division for its approval.

1.1. The notice shall be submitted on Form DOGM-9, Sundry Notice and Report on Wells.

1.2. A legible copy of a similar report and form filed with the appropriate federal agency may be used in lieu of the forms prescribed by the board.

1.3. In cases of emergency the operator may obtain verbal or telegraphic approval to plug and abandon.

1.4. Within five days after receiving verbal or telegraphic approval, the operator shall submit a written notice of intent to plug and abandon on Form 9.

2. Both verbal and written notice of intent to plug and abandon a well shall contain the following information:

2.1. The location of the well described by section, township, range, and county.

2.2. The status of the well, whether drilling, producing, injecting or inactive.

2.3. A description of the well bore configuration indicating depth, casing strings, cement tops if known, and hole size.

2.4. The tops of known geologic markers or formations.

2.5. The plugging program approved by the appropriate federal agency if the well is located on federal or Indian land.

2.6. An indication of when plugging operations will commence.

3. A dry or abandoned well must be plugged so that oil, gas, water, or other substance will not migrate through the well bore from one formation to another.

3.1. Unless a different method and procedure is approved by the division, the method and procedure for plugging the well shall be as follows:

3.2. The bottom of the hole shall be filled to, or a bridge shall be placed at, the top of each producing formation open to the well bore, and a cement plug not less than 100 feet in length shall be placed immediately above each producing formation open to the well bore.

3.3. A solid cement plug shall be placed from 50 feet below a fresh water zone to 50 feet above the fresh water zone, or a 100 foot cement plug shall be centered across the base of the fresh water zone and a 100 foot plug shall be centered across the top of the fresh water zone.

3.4. At least ten sacks of cement shall be placed at the surface in a manner completely plugging the entire hole. If more than one string of casing remains at the surface, all annuli shall be so cemented.

3.5. The interval between plugs shall be filled with noncorrosive fluid of adequate density to prevent migration of formation water into or through the well bore.

3.6. The hole shall be plugged up to the base of the surface string with noncorrosive fluid of adequate density to prevent migration of formation water into or through the well bore, at which point a plug of not less than 50 feet of cement shall be placed.

3.7. Any perforated interval shall be plugged with cement and any open hole porosity zone shall be adequately isolated to prevent migration of fluids.

3.8. A cement plug not less than 100 feet in length shall be centered across the casing stub if any casing is cut and pulled, a second plug of the same length shall be centered across the casing shoe of the next larger casing.

4. An alternative method of plugging, required under a federal or Indian lease, will be accepted by the division.

5. Within 30 days after the plugging of any well has been accomplished, the owner or operator shall file a subsequent report of plugging with the division. The report shall give a detailed account of the following items:

5.1. The manner in which the plugging work was carried out, including the nature and quantities of materials used in plugging and the location, nature, and extent by depths, of the plugs.

5.2. Records of any tests or measurements made.

5.3. The amount, size, and location, by depths of any casing left in the well.

5.4. A statement of the volume of mud fluid used.

5.5. A complete report of the method used and the results obtained, if an attempt was made to part any casing.

6. Upon application to and approval by the division, and following assumption of liability for the well by the surface owner, a well or other exploratory hole that may safely be used as a fresh water well need not be filled above the required sealing plugs set below the fresh water formation. The owner of the surface of the land affected may assume liability for any well capable of conversion to a water well by sending a letter assuming such liability to the division and by filing an application with and obtaining approval for appropriation of underground water from the Division of Water Rights.

7. Unless otherwise approved by the division, all abandoned wells shall be marked with a permanent monument showing the well number, location, and name of the lease. The monument shall consist of a portion of pipe not less than four inches in diameter and not less than ten feet in length, of which four feet shall be above the ground level and the remainder shall be securely embedded in cement. The top of the pipe must be permanently sealed.

8. If any casing is to be pulled after a well has been abandoned, a notice of intent to pull casing must be filed with the division and its approval obtained before the work is commenced.

8.1. The notice shall include full details of the contemplated work. If a log of the well has not already been filed with the division, the notice shall be accompanied by a copy of the log showing all casing seats as well as all water strata and oil and gas shows.

8.2. Where the well has been abandoned and liability has been terminated with respect to the bond previously furnished under R649-3-1, a $10,000 plugging bond shall be filed with the division by the applicant.

R649-3-25. Underground Disposal of Drilling Fluids.

1. Operators shall be permitted to inject and dispose of reserve pit drilling fluids downhole in a well upon submitting an application for such operations to the division and obtaining its approval. Injection of reserve pit fluids shall be

considered by the division on a case-by-case basis.

2. Each proposed injection procedure will be reviewed by the division for conformance to the requirements and standards for permitting disposal wells under R649-5-2 to assure protection of fresh-water resources.

3. The subsurface disposal interval shall be verified by temperature log, or suitable alternative, during the disposal operation.

4. The division shall designate other conditions for disposal, as necessary, in order to ensure safe, efficient fluid disposal.

R649-3-26. Seismic Exploration.

1. Form 1, Application for Permit to Conduct Seismic Exploration shall be submitted to the division by the seismic contractor at least seven days prior to commencing any type of seismic exploration operations. In cases of emergency, approval may be obtained either verbally or by telegraphic communication.

1.1. Changes of plans or line locations may be implemented in an emergency situation without division approval.

1.2. Within five days after the change is performed, the seismic contractor shall submit written notice of the change to the division.

1.3. The permit may be revoked at any time by the division for failure to comply with the rules and orders of the board.

1.4. Any request to deviate from the general plugging and operations procedures of these rules shall be included on the permit application.

1.5. The name, address, and telephone number of the seismic contractor's local contact shall be submitted to the division as soon as determined if not available when the permit application is submitted.

1.6. After review of the application for a seismic permit, the division may require written permission of the owner of the surface of the affected land if it is determined that the seismic operation may significantly impact any building, pipeline, water well, flowing spring, or other cultural or natural feature in the area.

1.7. The permit will be in effect for six months from the date of approval. The permit may be extended upon application to and approval by the division.

2. Bonding shall not be required for seismic exploration requiring the drilling of shot holes.

3. Seismic contractors shall give the division at least 24 hours advance notice of the plugging of seismic holes. The notice shall include the date and time the plugging activities are expected to commence, the name and address of the seismic contractor responsible for the holes, and, if different, the name and address of the hole plugging company.

4. Unless the seismic contractor can prove to the satisfaction of the division that another method will provide adequate protection to ground water resources and other man-made or natural features and will provide long-term land stability, the following procedures shall be required for the conduct of seismic operations and hole plugging:

4.1. Seismic contractors shall take reasonable precautions to avoid conducting shot hole operations closer than 1,320 feet to any building, pipeline, water well, flowing spring, or other cultural/natural feature, e.g., a historical monument, marker, or structure, that may be adversely affected by the seismic operations.

4.2. When nonartesian water is encountered while drilling seismic shot holes, the holes shall be filled from the bottom up with a high grade bentonite/water slurry mixture.

4.3. The slurry shall have a density that is at least four percent greater than the density of fresh water and shall have a marsh funnel viscosity of at least 60 seconds per quart.

4.4. The density and viscosity of the slurry are to be measured prior to adding cuttings. Cuttings not added to the slurry are to be disposed of in accordance with R649-3-26-4.6.

4.5. Upon approval by the division, any other suitable plugging material commonly used in the industry may be substituted for the bentonite/water slurry as long as the physical characteristics of the substitute plugging material are at least comparable to those of the bentonite/water slurry.

4.6. The hole shall be filled with the substitute plugging material from the bottom up to a depth of three feet below ground level.

4.7. A nonmetallic permaplug shall be set at a depth of three feet. The remaining hole shall be filled and tamped to the surface with cuttings and native soil.

4.8. The permaplug shall be imprinted with an approved identification number or mark.

4.9. When drilling with air only, and in completely dry holes, plugging may be accomplished by returning the cuttings to the holes, tamping the returned cuttings to the depth of three feet below ground level, and setting the permaplug topped with more cuttings and soil. A small mound shall be left over the hole for settling allowance.

4.10. If artesian flow, water flowing at the surface, is encountered in the drilling of any seismic hole, cement shall be used to seal off the water flow to prevent cross-flow, erosion, or contamination of fresh water supplies.

4.11. Unless severe weather conditions prevent access, the holes shall be cemented immediately.

4.12. Approval may be granted to seismic operator to plug a flowing hole in another manner, if it is proved to this division that the alternate method will provide adequate protection to ground water resources and provide long term land stability.

4.13. The owner of the surface of the land affected may assume liability for a seismic hole capable of conversion to a water well by sending a letter assuming such liability to the division and by filing an application with and obtaining approval for appropriation of underground water from the Division of Water Rights.

4.14. Shotholes shall be properly plugged and abandoned as soon as practical after the shot has been fired.

4.15. No shothole shall be left unplugged for more than 30 days without approval of the division.

4.16. Until properly plugged, shotholes shall be covered with a tin hat or other similar cover.

4.17. The hats shall be imprinted with the seismic contractor's name or initials.

4.18. Any slurry, drilling fluids, or cuttings that are deposited on the surface around the seismic hole shall be raked or otherwise spread out to a height of not more than one inch above the surface, so that the growth of the natural grasses or foliage will not be impaired.

4.19. Restoration plans required by the Mined Land Reclamation Act, Chapter 8 of Title 40, or by any other surface management agency will be accepted by the division.

4.20. The surface area around each seismic shothole shall be reclaimed and reseeded to its original condition insofar as such restoration is practical and is required by the surface management agency.

4.21. All flagging, stakes, cables, cement, or mud sacks shall be removed from the drill site and disposed of in an acceptable manner.

5. Upon application to the division, approval may be obtained for preplugging of shotholes using coarse bentonite material or a suitable alternative used in the industry. Preplugging of holes in this manner shall be performed according to the following procedures:

5.1. A sales receipt indicating proof of purchase of an adequate amount of coarse bentonite to properly plug all shotholes shall be submitted to the division upon request.

5.2. For shotholes drilled with air that are completely dry, the seismic contractor shall have the option of preplugging with the coarse bentonite material or of using an alternate plugging material under R649-3-26-4.3.

5.3. For conventionally drilled, wet holes, enough approved material shall be used to cover the initial water level, i.e., the depth of the initial water level in the hole prior to adding coarse bentonite material shall be equal to the final plug depth.

5.4. An additional ten feet of approved material shall be placed above this depth and hole cuttings shall be used to fill the remainder of the hole to a depth of three feet below ground level.

5.5. A nonmetallic plug imprinted with an approved identification number or mark shall be installed at this depth.

5.6. The remaining three feet of hole shall be filled and tamped to the surface with cuttings and native soil.

5.7. The remaining cuttings shall be raked or spread to a height not to exceed one inch above ground level.

5.8. When using heliportable drills and insufficient cuttings are available, the hole shall be preplugged with bentonite plugging material or an approved alternate material to a depth of three feet below ground level.

5.9. Installation of a nonmetallic plug and filling the remainder of the hole shall be performed as required by R649-3-26-5.3.

5.10. The coarse bentonite plugging material shall have the following specifications - chemically unaltered sodium bentonite, coarse ground, three quarter inch maximum size, not more than 19% moisture content and not more than 15% inert solids by volume.

6. Form 2, Seismic Exploration Completion Report shall be submitted to the Division within 60 days after completion of each seismic exploration project. The report shall include: Certification by the seismic contractor that all shot holes have been plugged as prescribed by the division.

R649-3-27. Multiple Mineral Development.

1. Drilling operations conducted in areas designated by the board for multiple mineral development shall comply with all rules or orders of the board for drilling, casing, cementing, and plugging except as the general rules or orders may be modified by this rule.

2. It is the policy of the division to promote the development of all mineral resources on land under its jurisdiction. Consistent with that policy, operators engaged in oil and gas operations on lands on which operators are exploring for and developing mineral resources other than oil and gas may enter into a cooperative agreement with these other operators with respect to multiple mineral development. The agreement shall define:

2.1. The extent and limits of liability when one operator, either intentionally or unintentionally, interferes with or damages the deposits of another.

2.2. The coordination of access to and development of the area.

2.3. Mitigation of surface impact including but not limited to issues pertaining to relocation of natural gas pipeline gathering and distribution systems and other surface facilities occasioned by placement of a spent shale pile; phased or coordinated surface occupancy so as to allow each operator to enjoy his respective mineral estate with the least disruption of operations and damage to the oil and gas deposits, either directly or indirectly, through waste; and limitation of oil and gas operations in areas of concentrated surface oil shale facilities.

2.4. Mitigation of subsurface impact including but not limited to issues pertaining to the interface in the underground environment of oil shale mining operations with other mineral operations.

2.5. The extent of exchange of geological, engineering, and production data.

2.6. Other cooperative efforts consistent with multiple mineral development under the rules and orders of the board pertaining to oil and gas operations, oil shale operations, and mined land reclamation.

3. The division, together with the Division of Forestry, Fire and State Lands, and School and Institutional Trust Lands Administration shall be signatory to the agreement, where applicable.

4. In the event the operators cannot agree on cooperative development of their respective mineral deposits, or having once entered into a cooperative agreement subsequently disagree on the application of the terms and provisions thereof, any operator whose oil and gas or mining operation or deposit may be adversely affected or damaged by the operations of another operator may apply to the board for, or the board may on its own motion enter an order, after notice and hearing, delineating the respective rights and obligations of all operators with respect to development of all minerals concerned.

5. After notice and hearing the board may modify its order to more effectively carry out the policies of multiple mineral development.

R649-3-28. Designated Potash Areas.

1. In any area designated as a potash area, either by the board, or an appropriate state or federal government agency, all wells shall be drilled, cased, cemented, and plugged in accordance with the rules and orders of the board. The following minimum requirements and definitions shall also apply to the drilling, logging, casing, and plugging operations within the Salt Section to protect against migration of oil, gas, or water into or within any formation or zone containing potash. As used in this rule, Salt Section shall mean the Paradox Salt Section of Pennsylvanian Age.

2. Any drilling media used through the Salt Section shall be such that sodium chloride is not soluble in the media at normal temperatures.

3. Gamma ray-neutron, gamma ray-sonic or other appropriate logs shall be run promptly through the Salt Section. One field copy of the log through the Salt Section shall be submitted to the division within ten days, or upon the request of the division, whichever is the earlier.

4. A directional survey shall be run from a point at least 20 feet below the Salt Section to the surface. The survey shall be filed with the division prior to completion or plugging and abandonment of the well.

5. In addition to the requirements of the R649-3-8, any casing set into or through the Salt Section shall be cemented solidly through the Salt Section above the casing shoe.

6. Any cement used in setting casing or in plugging that comes in contact with the Salt Section shall be of such chemical composition as to avoid dissolution of the Salt Section and to provide weight, strength, and physical properties sufficient to protect uphole formations and prevent blowouts or uncontrolled flows.

7. If a well is dry, cement plugs at least 200 feet in length shall be placed across the top and the base of the Salt Section, across any oil, gas or water show, and across any potash zone.

7.1. Plugs shall not be required inside a properly cemented casing string. The division shall approve the location of the plugs after examining the appropriate logs, drilling and testing records for the well.

7.2. No well shall be temporarily abandoned with open hole in the Salt Section.

8. The division may inspect the drilling operations at all times, including any mining operations that may affect any drilling or producing well bores. A potash owner, if contributing by agreement to the logging and directional survey costs of a well, may inspect the well for compliance with this rule.

9. Before commencing drilling operations for oil or gas on any land within designated potash area, the operator shall furnish by registered mail, a copy of the APD, together with the plat or map required under R649-3-4, to all potash owners and lessees whose interests are within a radius of 2,640 feet of the proposed well.

10.After proper notice and hearing, the board may modify this rule for a particular well or area by requiring that greater or lesser precautions be taken to prevent the escape of oil, gas, or water from one stratum into another. The board may also expand or contract from the designated potash areas.

R649-3-29. Workable Coal Beds.

1. Prior to commencing drilling operations for oil and gas on any lands where there are mine workings, the operator shall furnish a copy of the APD, a plat or map as required under R649-3-4, and a designation of the proposed angle and direction of the well, if the well is to be deviated substantially from a vertical course, to all coal owners and lessees whose interests are within a radius of 5,280 feet of the proposed well.

2. A well penetrating one or more workable coal beds or mine workings shall be drilled to a depth and shall be of a size, to permit the placing of casing in the hole at the points and in the manner necessary to exclude all oil, gas or gas pressure from the coal bed, other than oil, gas or gas pressure originating in the coal bed.

3. Unless otherwise authorized by the division, the casing run through a coal bed shall be seated at least 50 feet into the closest impervious formation below the coal bed. The casing shall be cemented solidly through the coal bed to a height at least 50 feet into the closest impervious formation above the coal bed.

4. A directional survey or a cement bond log shall be performed and furnished to the division upon written request by the division.

5. Upon penetrating a coal bed the operator shall notify the division, in writing, before completing or plugging and abandoning the well.

R649-3-30. Underground Mining Operations.

1. Prior to commencing drilling operations for oil and gas on any land where there are known or suspected underground mining operations, solution mining operations or surface mining operations, including solar evaporation ponds, the operator shall include in the APD or in a separate cover letter, any information known to the operator concerning the name and address of the owner or operator of the mining workings.

2. The division may, with the concurrence of the operator, change the surface location of the proposed well if there appears to be any possibility of interference between the proposed well bore and the mine workings.

R649-3-31. Designated Oil Shale Areas.

1. Designated oil shale areas are subject to the general drilling, plugging and other performance standards described in this section, except where the board has adopted, by order, specific standards for individual oil shale areas. As of June 8, 2001, the board has adopted specific standards for individual oil shale areas by board orders in Cause Nos. 190-5(b), 190-3, and 190-13. The board may adopt specific standards in other areas, or modify the above orders, in the future.

2. Lands may be designated as an oil shale area by the board, either upon its own motion, or upon the petition of an interested person following notice and hearing.

3. As used in this rule, oil shale section means the sequence of strata containing oil shale beds, including any interbedded strata not containing oil shale, consisting of the Parachute Creek Member of the Green River Formation of Tertiary Age, defined as the stratigraphic equivalent of the interval between 1,428 feet and 2,755 feet below the Kelly Bushing on the induction-electrical log of the Ute Trail No. 10 API No. 43-047-15382 well drilled by Dekalb Agricultural Association, Inc. and located in the NE 1/4 of Section 34, Township 9 South, Range 21 East, S.L.M., Uintah County, Utah. The Mahogany Zone is defined as the stratigraphic equivalent of the interval between 2,230 feet and 2,360 feet below the Kelly Bushing on the induction-electrical log of the well cited above.

4. For purposes of identifying the oil shale intervals, an appropriate electrical log shall be run through the oil shale section. One field copy of the log through the oil shale section shall be made available to the division pursuant to R649-3-23 or upon written request by the division.

5. On all wells that are intentionally deviated from the vertical within the oil shale section, pursuant to the provisions of R649-3-10 and R649-3-11, a directional survey shall be run from a point at least 20 feet below the oil shale section to the surface and shall thereafter be filed with the division within 20 days after reaching total depth.

6.Any oil shale lessee or operator whose oil shale mine workings reach a distance of 2,640 feet from a producing well or any oil and gas lessee or operator whose producing well is approached by oil shale mine workings within a distance of 2,640 feet shall request agency action with the board. The board may promulgate an order after notice and hearing with respect to the running of a directional survey through the oil shale section, the cost and potential resource loss liability and responsibility as to the oil and gas operator and the oil shale lessee or operator and any other issues regarding multiple mineral development.

7. The directional survey shall be the confidential property of the parties paying for the survey and shall be kept confidential until released by said parties or the division.

8. In addition to the requirements pertaining to the cementing of casing contained in the R649-3-8, any casing set into or through the oil shale section shall be cemented over the entire oil shale section.

9. If a well is dry, junked or abandoned, a cement plug shall be placed across that portion of the oil shale section extending 200 feet above and 200 feet below the longitudinal center of the Mahogany Zone. The cement plug shall not be required inside a casing cemented in accordance with R649-3-31-8. When the casing is cemented, cement plugs 200 feet in length shall be centered across the top and across the base of the Parachute Creek Member of the Green River Formation.

10. In the event the casing is not cemented in accordance with R649-3-31-8, the division shall approve the method and procedure to prevent the migration of oil, gas, and other substances through the wellbore from one formation to another.

11. The division shall approve the adequacy and location of the cement plugs after examining the appropriate logs and drilling and testing records for the well, to ensure that the oil shale section is adequately protected.

12. Upon written request of the owner or operator under R649-8-6, the division shall keep all well logs confidential. The division may inspect the drilling operations at all times,

including any mining operations that may affect drilling or producing well bores.

13. Before commencing drilling operations for oil or gas on any land within a designated oil shale area, the operator shall furnish a copy of the APD, together with a plat or map as directed under R649-3-4, to all oil shale owners or their lessees whose interests are within a radius of 2,640 feet of the proposed well. The operator shall furnish a notice of intention to plug and abandon any well in the oil shale area, as required under R649-3-24-1, to the owners or their lessees prior to commencement of plugging operations.

14. The operator shall use generally accepted techniques for vertical or directional drilling as defined under R649-3-10 and R649-3-11 to maintain the well bore within an intact core of a mine pillar. Within 20 days of reaching the total depth or before completion of the well, whichever is the earlier, a directional survey shall be run as prescribed by this rule.

R649-3-32. Reporting of Undesirable Events.

1. The division shall be notified of all fires, leaks, breaks, spills, blowouts, and other undesirable events occurring at any oil or gas drilling, producing, or transportation facility, or at any injection or disposal facility.

2. Immediate notification shall be required for all major undesirable events as outlined in R649-3-32-5.

2.1. Immediate notification shall mean a verbal report submitted to the division as soon as practical but within a maximum of 24 hours after discovery of an undesirable event.

2.2. A complete written report of the incident shall also be submitted to the division within five days following the conclusion of an undesirable event.

2.3. The requirements for written reports are specified in R649-3-32-4.

3. Subsequent notification shall be required for all minor undesirable events as outlined in R649-3-32-6.

3.1. Subsequent notification shall mean a complete written report of the incident submitted to the division within five days following the conclusion of an undesirable event.

3.2. The requirements for written reports are specified in R649-3-32-4.

4. Complete written reports of undesirable events may be submitted on Form 9, Sundry Notice and Report on Wells. The report shall include:

4.1. The date and time of occurrence and, if immediate notification was required, the date and time the occurrence was reported to the Division.

4.2. The location where the incident occurred described by section, township, range, and county.

4.3. The specific nature and cause of the incident.

4.4. A description of the resultant damage.

4.5. The action taken, the length of time required for control or containment of the incident, and the length of time required for subsequent cleanup.

4.6. An estimate of the volumes discharged and the volumes not recovered.

4.7. The cause of death if any fatal injuries occurred.

5. Major undesirable events include the following:

5.1. Leaks, breaks or spills of oil, salt water or oil field wastes that result in the discharge of more than 100 barrels of liquid, that are not fully contained on location by a wall, berm, or dike.

5.2. Equipment failures or other accidents that result in the flaring, venting, or wasting of more than 500 Mcf of gas.

5.3. Any fire that consumes the volumes of liquid or gas specified in R649-3-32-5.1 and R649-3-32-5.2.

5.4. Any spill, venting, or fire, regardless of the volume involved, that occurs in a sensitive area stipulated on the approval notice of the initial APD for a well, e.g., parks, recreation sites, wildlife refuges, lakes, reservoirs, streams, urban or suburban areas.

5.5. Each accident that involves a fatal injury.

5.6. Each blowout, loss of control of a well.

6. Minor undesirable events include the following:

6.1. Leaks, breaks or spills or oil, salt water, or oil field wastes that result in the discharge of more than ten barrels of liquid and are not considered major events in R649-3-32-5.

6.2 Equipment failures or other accidents that result in the flaring, venting or wasting of more than 50 Mcf of gas and are not considered major events in R649-3-32-5.

6.3. Any fire that consumes the volumes of liquid or specified in R649-3-32-6.1 and R649-3-32-6.2.

6.4. Each accident involving a major or life-threatening injury.

R649-3-33. Drilling Procedures in the Great Salt Lake.

1. For all drilling activities proposed within the Great Salt Lake, the APD required by R649-3-4 shall be filed at least 30 days prior to the date on which the operator intends to commence operations. As part of the APD, the operator shall include:

1.1. The name of the drilling contractor and the number and type of rig to be used.

1.2. An illustration of the boundaries of all state or federal parks, wildlife refuges, or waterfowl management areas within one mile of the proposed well location.

1.3. An illustration of the locations of all evaporation pits, producing wells, structures, buildings, and platforms within one mile of the proposed well location.

1.4.An oil spill emergency contingency plan.

2. Unless permitted by the board after notice and hearing, no well shall be drilled that has a surface location:

2.1. Within 1,320 feet from an evaporation pit without the consent of the operator of such pit.

2.2. Within one mile from the boundary of a state or federal park, wildlife refuge, or waterfowl management area without the consent of the appropriate state or federal regulatory agency.

2.3. Within three miles of Gunnison Island during the Pelican nesting season (March 15 through September 30) or within one mile from said island at any other time.

2.4. Within any area south of the Salt Lake Base Meridian Line.

2.5. Within any area north of Township 10 North.

2.6. Within one mile inside of what would be the water's edge if the water level of the Great Salt Lake were at the elevation of 4,193.3 feet above sea level.

3. Well casing and cementing shall be subject to the following special requirements for the purpose of this rule, the several casing strings in order of normal installation are drive or structural casing, conductor casing, surface casing, intermediate casing, and production casing. All depths refer to true vertical depth:

3.1. The drive or structural casing shall be set by drilling, driving or jetting to a minimum depth of 50 feet below the floor of the lake bed or to such greater depth required to support unconsolidated deposits and to provide hole stability for initial drilling operations. If drilled in, the drilling fluid shall be a type that will not pollute the lake; in addition, a quantity of cement sufficient to fill the annular space back to the lake floor with returns circulated, must be used.

3.2. The conductor casing shall be set at a minimum depth of 200 feet below the floor of the lake, and shall be cemented with a quantity sufficient to fill the annular space back to the lake surface with returns circulated.

3.3. The surface casing shall be set at a minimum depth of 500 feet if the proposed depth of the well is less than 7,000 feet; or 1,000 feet if the proposed depth is over 7,000 feet but

less than 11,000 feet; or 1,500 feet if the depth is 11,000 feet. The casing shall be cemented with a quantity sufficient to fill the annular space back to the lake surface with returns circulated, and the bottom of the casing shall be in competent rock.

3.4. The intermediate and production casing shall be set at any time when drilling below the surface casing and hole conditions justify setting casing. This casing will be cemented in such a manner that all hydrocarbons, water aquifers, lost-circulation or zones of significant porosity and permeability, significant beds containing priority minerals, and abnormal pressure intervals are covered or isolated.

3.5. Prior to drilling the plug after cementing, all casing strings except the drive or structural casing, shall be pressure tested. This test shall not exceed the rated working pressure of the casing. If the pressure declines more than ten percent in 30 minutes, or if there are other indications of a leak, corrective measures must be taken until a satisfactory test is obtained. All casing pressure tests shall be recorded on the driller's log.

4. Blowout preventers and related well control equipment shall be installed, and tested in a manner necessary to prevent blowouts and shall be subject to the following special conditions:

4.1. Prior to drilling below the surface casing, blowout prevention equipment shall be installed and maintained ready for use until drilling operations are completed.

4.2. An inside blowout preventer assembly and a full opening string safety valve in the open position shall be maintained on the rig floor at all times while drilling operations are being conducted.

4.2.1. Valves shall be maintained on the rig floor to fit all pipe in the drill string.

4.2.2. A top kelly cock shall be installed below the swivel and another at the bottom of the kelly of such design that it can be run through the blowout preventers.

4.3. Before drilling below the surface casing the blowout prevention equipment shall include a minimum of:

4.3.1. Three remotely and manually controlled, hydraulically operated blowout preventers with a rated working pressure that exceeds the maximum anticipated surface pressure, including one equipped with pipe rams, one with blind rams and one hydril type.

4.3.2. A drilling spool with side outlets, if side outlets are not provided in the blowout preventer body.

4.3.3. A choke manifold.

4.3.4. A kill line.

4.3.5. A fill-up line.

4.4. Ram-type blowout preventers and related control equipment shall be tested to the rated working pressure of the stack assembly or to the working pressure of the casing, whichever is the lesser, at the following times:

4.4.1. When installed.

4.4.2. Before drilling out after each string of casing is set.

4.4.3. Not less than once each week while drilling.

4.4.4. Following repairs that require disconnecting a pressure seal in the assembly.

4.5. The hydril-type blowout preventer shall be tested to 70 percent of the pressure testing requirements of ram-type blowout preventers. The hydril-type blowout preventer shall be actuated on the drill pipe once each week.

4.6. Accumulators or accumulators and pumps shall maintain a reserve capacity at all times to provide for repeated operation of hydraulic preventers.

4.7. A blowout prevention drill shall be conducted weekly for each drilling crew to insure that all equipment is operational and that crews are properly trained to carry out emergency duties. All blowout preventer tests and crew drills shall be recorded on the driller's log.

5. The characteristics and use of drilling mud and the conduct of related drilling procedures shall be such as are necessary to maintain the well in a safe condition to prevent uncontrolled blowouts of any well. Quantities of mud materials sufficient to insure well control shall be maintained and readily accessible for use at all times.

6. Mud testing equipment shall be maintained on the derrick floor at all times, and mud tests consistent with good operating practice shall be performed daily, or more frequently as conditions warrant. The following mud system monitoring equipment must be installed, with derrick floor indicators, and used throughout the period of drilling after setting and cementing the surface casing:

6.1. A recording mud pit level indicator including a visual and audio warning device to determine mud pit volume gains and losses.

6.2. A mud return indicator to determine when returns have been obtained, or when they occur unintentionally, and additionally to determine that returns essentially equal the pump discharge rate.

7. In the conduct of all oil and gas operations, the operator shall prevent pollution of the waters of the Great Salt Lake. The operator shall comply with the following pollution prevention requirements:

7.1. Oil in any form, liquid or solid wastes containing oil, shall not be disposed of into the waters of the lake.

7.2. Liquid or solid waste materials containing substances that may be harmful to aquatic life or wildlife, or injurious in any manner to life and property, or that in any way unreasonably adversely affects the chemicals or minerals in the lake shall not be disposed of into the waters of the lake.

7.3. Waste materials, exclusive of cuttings and drilling media, shall be transported to shore for disposal.

8. All spills or leakage of oil and liquid or solid pollutants shall be immediately reported to the division. A complete written statement of all circumstances, including subsequent clean-up operation, shall be forwarded to said agencies within 72 hours of such occurrences.

9. Standby pollution control equipment consistent with the state of the art, shall be maintained by, and shall be immediately available to, each operator.

R649-3-34. Well Site Restoration.

1. The operator of a well shall upon plugging and abandonment of the well restore the well site in accordance with these rules.

2. For all land included in the well site for which the surface is federal, Indian, or state ownership, the operator shall meet the well site restoration requirements of the appropriate surface management agency.

3. For all land included in the well site for which the surface is fee or private ownership, the operator shall meet the well site restoration requirements of the private landowner or the minimum well site restoration requirements established by the division.

4. Well site restoration on lands with fee or private ownership shall be completed within one (1) year following the plugging of a well unless an extension is approved by the division for just and reasonable cause.

5. These rules shall not preclude the opportunity for a private landowner to assume liability for the well as a water well in accordance with R649-3-24.6.

6. The operator shall make a reasonable effort to establish surface use agreements with the owners of land included in the well site prior to the commencement of the following actions on fee or private surface:

6.1. Drilling a new well.

6.2. Reentering an abandoned well.

6.3. Assuming operatorship of existing wells.

7. Upon application to the division to perform any of the aforementioned and prior to approval of such actions by the division, the operator shall submit an affidavit to the division stating whether appropriate surface use agreements have been established with and approved by the surface landowners of the well site.

8. If necessary and upon request by the division, the operator shall submit a copy of the established surface use agreements to the division.

9. If no surface use agreement can be established, the division shall establish minimum well site restoration requirements for any well located on fee or private surface for the purposes of final bond release.

10. Established surface use agreements may be modified or terminated at any time by mutual consent of the involved parties; however, the operator shall notify the division if such is the case and if a surface use agreement is terminated without a new agreement established, the division shall establish minimum well site reclamation requirements.

11. The operator shall be responsible for meeting the requirements of any surface use agreement, and it shall be assumed by the division until notified otherwise that surface use agreements remain in full force and effect until all the requirements of the agreement are satisfied or until the agreement has been terminated by mutual consent of the involved parties.

12. The surface use agreement shall stipulate the minimum well site restoration to be performed by the operator in order to allow final release of the bond.

13. The final bond release by the division shall include a determination by the division whether or not the operator has met the requirements of an established surface use agreement, and the division may suspend final bond release until the operator has completed all the requirements of the surface use agreement.

14. The agreement may state requirements for well site grading, contouring, scarification, reseeding, and abandonment of any equipment or facilities for which the landowner agrees to assume liability.

15. The agreement shall not address operations regulated by the rules and orders of the board such as:

15.1. Disposal of drilling fluid, produced fluid, or other fluid waste associated with the drilling and production of the well.

15.2. Reclamation or treating of waste crude oil.

15.3. Any other operation or condition for which the board has jurisdiction.

16. If the operator cannot establish surface use agreements then the operator shall so notify the division.

17. Within 30 days of the notification or as soon as weather conditions permit, the division shall conduct an inspection and evaluation of the well site in order to establish minimum well site restoration requirements for the purpose of final bond release.

18. The operator shall be given notice by the division of the date and time of the inspection, and if the operator cannot attend the inspection at the scheduled date and time, the division may reschedule the inspection to allow the operator to participate.

19. The surface landowner, agent or lessee shall be given notice by the operator of such inspection and may participate in the inspection; however, if the surface landowner cannot attend the inspection, the division shall not be required to reschedule the inspection in order to allow the surface landowner to participate.

20. The evaluation shall consider the condition of the land prior to disturbance, the extent of proposed disturbance, the degree of difficulty to conduct complete restoration, the potential for pollution, the requirements for abating pollution, and the possible land use after plugging and restoration are completed.

21. Within 30 days after performing the inspection, the division shall provide the operator with the results of the inspection and the evaluation listing the minimum well site restoration requirements established by the division.

22. The division shall retain a record of the inspection and the evaluation, and if necessary and upon written request by an interested party, the division shall provide a copy of the minimum well site restoration requirements established by the division.

23. If any person disagrees with the results of the inspection and the evaluation and desires a reconsideration of the minimum well site restoration requirements established by the division, such person may submit a request to the board for a hearing and order to modify the requirements.

24. The board, after proper notice and hearing, may issue an order modifying the minimum well site restoration requirements established by the division.

25. The minimum well site restoration requirements established by the division or by board order shall be considered part of any permit granted by the division to conduct operations at a well site, and the inability of the operator to meet such requirements shall be considered grounds for forfeiture of the bond.

26.If the minimum well site restoration requirements suggest to the division that bond coverage for a well should be increased, the division shall take action as stated in R649-3-1.

R649-3-35. Wildcat Wells.

1. For purposes of qualifying for a severance tax exemption under Section 59-5-102(5)(b), an operator must file an application with the division for designation of a wildcat well.

1.1. The application may be filed prior to drilling the well, and a tentative determination of the wildcat designation will be issued at that time. An application or request for final designation of wildcat status as appropriate, must be filed at the time of filing of Form 8, Well Completion or Recompletion Report and Log.

1.2. The application shall contain, where applicable, the following information:

1.2.1. A plat map showing the location of the well in relation to producing wells within a one mile radius of the wellsite.

1.2.2. A statement concerning the producing formation or formations in the wildcat well and also the producing formation or formations of the producing wells in the designated area, including completion reports and other appropriate data.

1.2.3. Stratigraphic cross sections through the producing wells in the designated area and the proposed wildcat well.

1.2.4. A statement as to whether the well is in a known geologic structure. However, whether the well is in a known geologic structure shall not be the sole basis of determining whether the well is a wildcat.

1.2.5. Bottomhole pressures, as applicable, in a wildcat well compared to the wells producing in the designated area from the same zone.

1.2.6. Any other information deemed relevant by the applicant or requested by the division.

2. Information derived from well logs, including certain information in completion reports, stratigraphic cross sections, bottomhole pressure data, and other appropriate data provided in R649-3-35-1 will be held confidential in accordance with R649-2-11 at the request of the operator.

3. The division shall review the submitted information

and advise the operator and the State Tax Commission of its decision regarding the wildcat well designation as related to Section 59-5-102(5)(b).

4. The division is responsible for approval of a request for designation of a well as a wildcat well. If the operator disagrees with the decision of the division, the decision maybe appealed to the board. Appeals of all other tax-related decisions concerning wildcat wells should be made to the State Tax Commission.

R649-3-36. Shut-in and Temporarily Abandoned Wells.

1. Wells may be initially shut-in or temporarily abandoned for a period of twelve (12) consecutive months. If a well is to be shut-in or temporarily abandoned for a period exceeding twelve (12) consecutive months, the operator shall file a Sundry Notice providing the following information:

1.1. Reasons for shut-in or temporarily abandonment of the well,

1.2. The length of time the well is expected to be shut-in or temporarily abandoned, and

1.3. An explanation and supporting data, for showing the well has integrity, meaning that the casing, cement, equipment condition, static fluid level, pressure, existence or absence of Underground Sources of Drinking Water and other factors do not make the well a risk to public health and safety or the environment.

2. After review the Division will either approve the continued shut-in or temporarily abandoned status or require remedial action to be taken to establish and maintain the well's integrity.

3. After five (5) years of nonactivity or nonproductivity, the well shall be plugged in accordance with R649-3-24, unless approval for extended shut-in time is given by the Division upon a showing of good cause by the operator.

4. If after a five (5) year period the well is ordered plugged by the Division, and the operator does not comply, the operator shall forfeit the drilling and reclamation bond and the well shall be properly plugged and abandoned under the direction of the Division.

R649-3-37. Enhanced Recovery Project Certification.

1. In order for incremental production achieved from an enhanced recovery project to qualify for the severance tax rate reduction provided under Subsection 59-5-102(7), the operator on behalf of the producers shall present evidence demonstrating that the recovery technique or techniques utilized qualify for an enhanced recovery determination and the Board must certify the project as an enhanced recovery project.

2. For enhanced recovery projects certified by the Board after January 1, 1996:

2.1. As part of the process of certifying incremental production that qualifies for a reduction in the severance tax rate under Subsection 59-5-102(7), the operator shall furnish the Division:

2.1.1. An extrapolation (projection) and tabulation of expected non-enhanced recovery of oil and gas production from the project.

2.1.2. The projection shall be for not less than seventy-two (72) months commencing with the first month following the project certification by the Board.

2.1.3. The projection shall be based on production history of all wells within the project area for not less than twelve (12) months immediately preceding either certification or commencement of the project; reservoir and production characteristics; and the application of generally accepted petroleum engineering practices.

2.1.4. The projected production volumes approved by the division shall serve as the base level production for purposes of determining the incremental oil and gas production that qualifies for a reduction in the severance tax rate.

2.2. The operator shall provide a statement as to all assumptions made in preparing the projection and any other information concerning the project that the division may reasonably require in order to evaluate the operator's projection.

2.3. An operator's request for incremental production certification may be approved administratively by the Director or authorized agent. The Director or authorized agent shall review the request within 30 days after its receipt and advise the operator of the decision. If the operator disagrees with the Director or authorized agent's decision, the operator may request a hearing before the Board at its next regularly scheduled hearing. The Director or authorized agent may also refer the matter to the Board if a decision is in doubt.

2.4. Upon approval of a request for incremental production certification, the Director or authorized agent shall forward a copy of the certification to the Utah Tax Commission.

R649-3-38. Surface Owner Protection Act Provisions.

1. These rules and all subsequent revisions as approved by the board are developed pursuant to the requirements of the Surface Owner Protection Act of 2012 in Title 40, Chapter 6. It is the intent of the board and the division to encourage owners or operators and surface land owners to enter into surface use agreements. Surface use agreements should fairly consider the respective rights of the owner or operator and the surface land owner and also comply with the requirements of R649-3-34.

2. For the purposes of R649-3-38, these definitions are utilized.

2.1. "Crops" means any growing vegetative matter used for an agricultural purpose, including forage for grazing and domesticated animals.

2.2. "Oil and gas operations" means to explore for, develop, or produce oil and gas.

2.3. "Surface land" means privately owned land overlying privately owned oil and gas resources, upon which oil and gas operations are conducted, and owned by a surface land owner.

2.4. "Surface land owner" means a person who owns, in fee simple absolute, all or part of the surface land as shown by the records of the county where the surface land is located. Surface land owner does not include the surface land owner's lessee, renter, tenant, or other contractually related person.

2.5. "Surface land owner's property" means a surface land owner's surface land, crops on the surface land, and existing improvements on the surface land.

2.6. "Surface use agreement" means an agreement between an owner or operator and a surface land owner addressing the use and reclamation of surface land owned by the surface land owner and compensation for damage to the surface land caused by oil and gas operations that result in loss of the surface land owner's crops on the surface land, loss of value of existing improvements owned by the surface land owner on the surface land, and permanent damage to the surface land.

3. Oil and gas operations shall be conducted in such manner as to prevent unreasonable loss of a surface land owner's crops on surface land, unreasonable loss of value of existing improvements owned by a surface land owner on surface land, and unreasonable permanent damage to surface land.

4. In accordance with Section 40-6-20, an owner or operator may enter onto surface land under which the owner

or operator holds rights to conduct oil and gas operations and use the surface land to the extent reasonably necessary to conduct oil and gas operations and consistent with allowing the surface land owner the greatest possible use of the surface land owner's property, to the extent that the surface land owner's use does not interfere with the owner's or operator's oil and gas operations.

4.1. Except as is reasonably necessary to conduct oil and gas operations, an owner or operator shall mitigate the effects of accessing the surface land owner's surface land, minimize interference with the surface land owner's use of the surface land owner's property, and compensate a surface land owner for unreasonable loss of a surface land owner's crops on the surface land, unreasonable loss of value to existing improvements owned by a surface land owner on the surface land, and unreasonable permanent damage to the surface land.

4.2. An owner or operator may but is not required to obtain location or spacing exceptions from the division or board or utilize directional or horizontal drilling techniques that are not technologically feasible, economically practicable, or reasonably available.

5. In accordance with Section 40-6-21, non-binding mediation may be requested by a surface land owner and an owner or operator, by providing written notice to the other party, if they are unable to agree on the amount of damages for unreasonable crop loss on the surface land, unreasonable loss of value to existing improvements owned by the surface land owner on the surface land, or unreasonable permanent damage to the surface land.

5.1. A mediator may be mutually selected by a surface land owner and an owner or operator from a listing of qualified mediators maintained by the division and the Utah Department of Agriculture and Food, which includes the mediators identified on the Utah State Courts website with "property" or "real estate" as an area of expertise, or a mediator may be selected from any other source.

5.2. The surface land owner and the owner or operator shall equally share the cost of the mediator's services.

5.3. The mediation provisions of this subsection do not prevent or delay an owner or operator from conducting oil and gas operations in accordance with applicable law.

6. A surface use bond shall be furnished to the division by the owner or operator, in accordance with the following provisions of Subsection R649-3-38-6.

6.1. A surface use bond does not apply to surface land where the surface land owner is a party to, or a successor of a party to:

6.1.1. A lease of the underlying privately owned oil and gas;

6.1.2. A surface use agreement applicable to the surface land owner's surface land; or

6.1.3. A contract, waiver, or release addressing an owner's or operator's use of the surface land owner's surface land.

6.2. The surface use bond shall be in the amount of $6,000 per well site and shall be conditioned upon the performance by the owner or operator of the duty to protect a surface land owner against unreasonable loss of crops on surface land, unreasonable loss of value of existing improvements, and unreasonable permanent damage to surface land.

6.3. The surface use bond shall be furnished to the division on Form 4S after good faith negotiation and prior to the approval of the application for permit to drill. The mediation process identified in R649-3-38-5 may commence and is encouraged to be completed.

6.4. The division may accept a surface use bond in the form of a cash account as provided in R649-3-1-10.2.1 or a certificate of deposit as provided in R649-3-1-10.2.3. Interest will remain within the account.

6.5. The division may allow the owner or operator, or a subsequent owner or operator, to replace an existing surface use bond with another bond that provides sufficient coverage.

6.6. The surface use bond shall remain in effect by the operator until released by the division.

6.7. The surface use bond shall be payable to the division for the use and benefit of the surface land owner, subject to the provisions of these rules.

6.8. The surface use bond shall be released to the owner or operator after the division receives sufficient information that:

6.8.1. A surface use agreement or other contractual agreement has been reached;

6.8.2. Final resolution of the judicial appeal process for an action for unreasonable damages, as defined in R649-3-38-6.2, has occurred and have been paid; or

6.8.3. Plugging and abandonment of the well is completed.

6.9. The division shall make a reasonable effort to contact the surface land owner prior to the division's release of the surface use bond.

R649-3-39. Hydraulic Fracturing.

1. Chemical disclosure.

1.1. The amount and type of chemicals used in a hydraulic fracturing operation shall be reported to www.fracfocus.org within 60 days of hydraulic fracturing completion for public disclosure.

2. Wellbore integrity.

2.1. The operator shall comply with R649-3-8, Casing Program.

1. The method of cementing casing in the hole shall be by pump and plug method, displacement method, or other method approved by the division.

2. When drilling in wildcat territory or in any field where high pressures are probable, the conductor and surface strings of casing must be cemented throughout their lengths, unless another procedure is authorized or prescribed by the division, and all subsequent strings of casing must be securely anchored.

3. In areas where the pressures and formations to be encountered during drilling are known, sufficient surface casing shall be run to:

3.1. Reach a depth below all known or reasonably estimated, utilizable, domestic, fresh water levels.

3.2. Prevent blowouts or uncontrolled flows.

4. The casing program adopted must be planned to protect any potential oil or gas horizons penetrated during drilling from infiltration of waters from other sources and to prevent the migration of oil, gas, or water from one horizon to another.

2.2. The operator shall comply with R649-3-9, Protection of Upper Productive Strata.

1. No well shall be deepened for the purpose of producing oil or gas from a lower stratum until all upper productive strata are protected, either permanently by casing and cementing or temporarily through the use of tubing and packer, to the satisfaction of the division.

2. In any well that appears to have defective, poorly cemented, or corroded casing that will permit or may create underground waste or may contaminate underground or surface fresh water, the operator shall proceed with diligence to use the appropriate method and means to eliminate such hazard of underground waste or contamination of fresh water. If such hazard cannot be eliminated, the well shall be properly plugged and abandoned.

3. Natural gas that is encountered in substantial quantities in any section of a drilled hole above the ultimate

objective shall be shut off with reasonable diligence, either by mudding, casing or other approved method, and shall be confined to its original source to the satisfaction of the division.

2.3. The operator shall comply with R649-3-13, Casing Tests.

1. In order to determine the integrity of the casing string set in the well, the operator shall, unless otherwise requested by the division, perform a pressure test of the casing to the pressures specified under R649-3- 7.4 before drilling out of any casing string, suspending drilling operations, or completing the well.

2.4. The operator shall comply with R649-3-6, Drilling Operations.

1. Drilling operations shall be conducted according to the drilling program submitted on the original APD and as approved by the division. Any change of plans to the original drilling program shall be submitted to the division by using Form 9, Sundry Notices and Reports on Wells and shall receive division approval prior to implementation. A change of plans necessary because of emergency conditions may be implemented without division approval. The operator shall provide the division with verbal notice of the emergency change within 24 hours and written notice within five days.

2. An operator of a drilling well as designated in R649-2-4 shall comply with reporting requirements as follows:

2.1. The spudding in of a well shall be reported to the division within 24 hours. The report should include the well name and number, drilling contractor, rig number and type, spud date and time, the date that continuous drilling will commence, the name of the person reporting the spud, and a contact telephone number.

2.2. The operator shall file Form 6, Entity Action Form with the division within five working days of spudding in a well. The division will assign the well an entity number that will identify the well on the operator's monthly oil and gas production and disposition reports.

2.3. The operator shall notify the division 24 hours in advance of all testing to be performed on the blowout preventer equipment on a well.

2.4. The operator shall submit a monthly status report for each drilling well on Form 9, Sundry Notices and Reports on Wells. The report should include the well depth and a description of the operations conducted on the well during the month. The report shall be submitted no later than the fifth day of the following calendar month until such time as the well is completed and the well completion report is filed.

2.5. The operator shall notify the division 24 hours in advance of all casing tests performed in accordance with R649-3-13.

2.6. The operator shall report to the division all fresh water sand encountered during drilling on Form 7, Report of Water Encountered During Drilling. The report shall be filed with Form 8, Well Completion or Recompletion Report and Log.

2.5. The operator shall comply with R649-3-7, Well Control.

1. When drilling in wildcat territory, the owner or operator shall take all reasonably necessary precautions for keeping the well under control at all times and shall provide, at the time the well is started, proper high pressure fittings and equipment. All pressure control equipment shall be maintained in good working condition at all times.

2. In all proved areas, the use of blowout prevention equipment "BOPE" shall be in accordance with the established and approved practice in the area. All pressure control equipment shall be maintained in good working condition at all times.

3. Upon installation, all ram type BOPE and related equipment, including casing, shall be tested to the lesser of the full manufacturer's working pressure rating of the equipment, 70% of the minimum internal yield pressure of any casing subject to test, or one psi/ft of the last casing string depth. Annular type BOPE are to be tested in conformance with the manufacturer's published recommendations. The operator shall maintain records of such testing until the well is completed and will submit copies of such tests to the division if required.

4. In addition to the initial pressure tests, ram and annular type preventers shall be checked for physical operation each trip. All BOPE components, with the exception of an annular type blowout preventer, shall be tested monthly to the lesser of 50% of the manufacturer's rated pressure of the BOPE, the maximum anticipated pressure to be contained at the surface, one psi/ft of the last casing string depth, or 70% of the minimum internal yield pressure of any casing subject to test.

5. If a pressure seal in the assembly is disassembled, a test of that seal shall be conducted prior to the resumption of any drilling operation. A shell test of the affected seal shall be adequate. If the affected seal is integral with the BOP stack, either pipe or blind ram, necessitating a test plug to be set in order to test the seal, the division may grant approval to proceed without testing the seal if necessary for prudent operations.

6. All tests of BOPE shall be noted on the driller's log, IADC report book, or equivalent and shall be available for examination by the director or an authorized agent during routine inspections.

7. BOPE used in possible or probable hydrogen sulfide or sour gas formations shall be suitable for use in such areas.

2.6. The operator shall comply with R649-3-23, Well Workover and Recompletion.

1. Requests for approval of a notice of intention to perform a workover or recompletion shall be filed by an operator with the division on Form 9, Sundry Notices and Reports on Wells, or if the operation includes substantial redrilling, deepening, or plugging back of an existing well, on Form 3, Application for Permit to Drill, Deepen or Plug Back.

2. The division shall review the proposed workover or recompletion for conformance with the Oil and Gas Conservation General Rules and advise the operator of its decision and any necessary conditions of approval.

3. Recompletions shall be conducted in a manner to protect the original completion interval(s) and any other known productive intervals.

4. The same tests and reports are required for any well recompletion as are required following an original well completion.

5. The applicant shall file a subsequent report of workover on Form 9, Sundry Notices and Reports, or a subsequent report of recompletion on Form 8, Well Completion or Recompletion Report and Log, within 30 days after completing the workover or recompletion operations.

3. Management of flowback water and surface protection.

3.1. The operator shall comply with R649-3-15, Pollution and Surface Damage Control.

1. The operator shall take all reasonable precautions to avoid polluting lands, streams, reservoirs, natural drainage ways, and underground water.

1.1. The owner or operator shall carry on all operations and maintain the property at all times in a safe and workmanlike manner having due regard for the preservation and conservation of the property and for the health and safety of employees and people residing in close proximity to those operations.

1.2. At a minimum, the owner or operator shall:

1.2.1. Take reasonable steps to prevent and shall remove accumulations of oil or other materials deemed to be fire hazards from the vicinity of well locations, lease tanks and pits.

1.2.2. Remove from the property or store in an orderly manner, all scrap or other materials not in use.

1.2.3. Provide secure workmanlike storage for chemical containers, barrels, solvents, hydraulic fluid, and other non-exempt materials.

1.2.4. Maintain tanks in a workmanlike manner that will preclude leakage and provide for all applicable safety measures, and construct berms of sufficient height and width to contain the quantity of the largest tank at the storage facility.

1.2.4.1. The use of crude or produced water storage tanks without tops is strictly prohibited except during well testing operations.

1.2.5. Catch leaks and drips, contain spills, and cleanup promptly.

1.2.6. Waste reduction and recycling should be practiced in order to help reduce disposal volumes.

1.2.7. Produced water, tank bottoms and other miscellaneous waste should be disposed of in a manner that is in compliance with these rules and other state, federal, or local regulations or ordinances.

1.2.8. In general, good housekeeping practices should be used.

3.2. The operator shall comply with R649-3-16, Reserve Pits and Other On-site Pits.

1. Small onsite oil field pits including, but not limited to, reserve pits, emergency pits, workover and completion pits, storage pits, pipeline drip pits, and sumps shall be located and constructed in such a manner as to contain fluids and not cause pollution of waters and soils. They shall be located and constructed according to the Division guidelines for onsite pits. See Ranking Criteria for Reserve and Onsite Pit Liner Requirements, on the Oil, Gas and Mining web page.

2. Reserve pit location and construction requirements including liner requirements will be discussed at the predrill site evaluation. Special stipulations concerning the reserve pit will be included as part of the Division's approval to drill.

3. Following drilling and completion of the well the reserve pit shall be closed within one year, unless permission is granted by the Division for a longer period.

4. Pit contents shall meet the Division's Cleanup Levels (guidance document for numeric clean-up levels) or background levels prior to burial.

5. The contents may require treatment to reduce mobility and/or toxicity in order to meet cleanup levels.

6. The alternative to meeting cleanup levels would be transporting of material to an appropriate disposal facility.

3.3. The operator shall comply with R649-9-2, General Waste Management.

1. Wastes addressed by these rules are E and P Wastes that are exempt from the RCRA hazardous waste management requirements.

1.1. Before using a commercial disposal facility the operator may contact the Division to verify the status of the facility. The Division regularly updates this information on the Division of Oil, Gas and Mining web site.

1.2. Each site and/or facility used for disposal must be permitted and in good standing with the division.

2. Reduction of the amount of material generated that must be disposed of is the preferred practice.

2.1. Recycling should be used whenever possible and practical.

2.2. In general, good housekeeping practices shall be used.

2.3. Operators shall catch leaks, drips, contain spills, and cleanup promptly.

3. The method of disposal used shall be compatible with the waste that is the subject of disposal.

3.1. RCRA exempt waste shall not be mixed with nonexempt waste.

4. Every operator shall file an Annual Waste Management Plan by January 15 of each year to account for the proper disposition of produced water and other E and P Wastes.

4.1. If changes are made to the plan during the year, then the operator shall notify the division in writing of this change.

4.2. This plan will include the type and estimated annual volume of wastes that will be or have been generated.

4.3. The disposal facilities private or to be used for disposal,

4.4. The description of any waste reduction or minimization procedures.

4.5. Any onsite disposal/treatment methods or programs to be implemented by the operator.

3.4. The operator shall comply with R649-5-1, Requirements for Injection of Fluids Into Reservoirs.

1. Operations to increase ultimate recovery, such as cycling of gas, the maintenance of pressure, the introduction of gas, water or other substances into a reservoir for the purpose of secondary or other enhanced recovery or for storage and the injection of water into any formation for the purpose of water disposal shall be permitted only by order of the board after notice and hearing.

2. A petition for authority for the injection of gas, liquefied petroleum gas, air, water, or any other medium into any formation for any reason, including but not necessarily limited to the establishment of or the expansion of waterflood projects, enhanced recovery projects, and pressure maintenance projects shall contain:

2.1. The name and address of the operator of the project.

2.2. A plat showing the area involved and identifying all wells, including all proposed injection wells, in the project area and within one-half mile radius of the project area.

2.3. A full description of the particular operation for which approval is requested.

2.4. A description of the pools from which the identified wells are producing or have produced.

2.5. The names, description and depth of the pool or pools to be affected.

2.6. A copy of a log of a representative well completed in the pool.

2.7. A statement as to the type of fluid to be used for injection, its source and the estimated amounts to be injected daily.

2.8. A list of all operators or owners and surface owners within a one-half mile radius of the proposed project.

2.9. An affidavit certifying that said operators or owners and surface owners within a one-half mile radius have been provided a copy of the petition for injection.

2.10. Any additional information the board may determine is necessary to adequately review the petition.

3. Applications as required by R649-5-2 for injection wells that are located within the project area, may be submitted for board consideration and approval with the request for authorization of the recovery project.

4. Established recovery projects may be expanded and additional wells placed on injection only upon authority from the board after notice and hearing or by administrative approval.

5. If the proposed injection interval can be classified as an USDW, approval of the project is subject to the

requirements of R649-5-4.

3.5. The operator shall comply with R649-5-2, Requirements for Class II Injection Wells Including Water Disposal, Storage and Enhanced Recovery Wells.

1. Injection wells shall be completed, equipped, operated, and maintained in a manner that will prevent pollution and damage to any USDW, or other resources and will confine injected fluids to the interval approved.

2. The application for an injection well shall include a properly completed UIC Form 1 and the following:

2.1. A plat showing the location of the injection well, all abandoned or active wells within a one- half mile radius of the proposed well, and the surface owner and the operator of any lands or producing leases, respectively, within a one-half mile radius of the proposed injection well.

2.2. Copies of electrical or radioactive logs, including gamma ray logs, for the proposed well run prior to the installation of casing and indicating resistivity, spontaneous potential, caliper, and porosity.

2.3. A copy of a cement bond or comparable log run for the proposed injection well after casing was set and cemented.

2.4. Copies of logs already on file with the division should be referenced, but need not be refiled.

2.5. A description of the casing or proposed casing program of the injection well and of the proposed method for testing the casing before use of the well.

2.6. A statement as to the type of fluid to be used for injection, its source and estimated amounts to be injected daily.

2.7. Standard laboratory analyses of:

2.7.1. The fluid to be injected,

2.7.2. The fluid in the formation into which the fluid is being injected, and

2.7.3. The compatibility of the fluids.

2.8. The proposed average and maximum injection pressures.

2.9. Evidence and data to support a finding that the proposed injection well will not initiate fractures through the overlying strata or a confining interval that could enable the injected fluid or formation fluid to enter any fresh water strata.

2.10. Appropriate geological data on the injection interval with confining beds clearly labeled,

2.10.1. Nearby Underground Sources of Drinking Water, including the geologic formation name,

2.10.2. Lithologic descriptions, thicknesses, depths, water quality, and lateral extent;

2.10.3. Information relative to geologic structure near the proposed well that may effect the conveyance and/or storage of the injected fluids.

2.11. A review of the mechanical condition of each well within a one-half mile radius of the proposed injection well to assure that no conduit exists that could enable fluids to migrate up or down the wellbore and enter improper intervals.

2.12. An affidavit certifying that a copy of the application has been provided to all operators, owners, and surface owners within a one-half mile radius of the proposed injection well.

2.13. Any other additional information that the board or division may determine is necessary to adequately review the application.

3. Applications for injection wells that are within a recovery project area will be considered for approval:

3.1. Pursuant to R649-5-1-3.

3.2. Subsequent to board approval of a recovery project pursuant to R649-5-1-1.

4. Approval of an injection well is subject to the requirements of R649-5-4, if the proposed injection interval can be classified as an USDW.

5. In addition to the requirements of this section, the provisions of R649-3-1, R649-3-4, R649-3-24, R649-3-32, and R649-8-1 and R649-10 shall apply to all Class II injection wells.

3.6. The operator shall comply with R649-5-3, Noticing and Approval of Injection Wells.

1. Applications for injection wells submitted pursuant to R649-5-1-3 shall be noticed in conformance with the procedural rules of the board as part of the hearing for the recovery project. Any person desiring to object to approval of such an application for an injection well shall file the objection in conformance with the procedural rules of the board.

2. The receipt of a complete and technically adequate application, other than an application submitted pursuant to R649-5-3-1, shall be considered as a request for agency action by the Division and shall be published in a daily newspaper of general circulation in the city and county of Salt Lake and in a newspaper of general circulation in the county where the proposed well is located. A copy of the notice of agency action shall also be sent to all parties including government agencies. The notice of agency action shall contain at least the following information:

2.1. The applicant's name, business address, and telephone number.

2.2. The location of the proposed well.

2.3. A description of proposed operation.

3. If no written objection to the application for administrative approval of an injection well is received by the division within 15 days after publication of the notice of agency action, or an aquifer exemption is not required in accordance with R649-5-4, and a board hearing is not otherwise required, the application may be considered and approved administratively.

4. If a written objection to an application for administrative approval of an injection well is received by the division within 15 days after publication of the notice of application, or if a hearing is required by these rules or deemed advisable by the director, the application shall be set for notice and hearing by the board.

5. The director shall have the authority to grant an exception to the hearing requirements of R649-5- 1.1 for conversion to injection of additional wells that constitute a modification or expansion of an authorized project provided that any such well is necessary to develop or maintain thorough and efficient recovery operations for any authorized project and provided that no objection is received pursuant to R649-5-3-3.

6. The director shall have authority to grant an exception to the hearing requirements of R649-5-1-1 for water disposal wells provided disposal is into a formation or interval that is not currently nor anticipated to be an underground source of drinking water and provided that no objection is received pursuant to R649-5-3-3.

3.7. The operator shall comply with R649-5-4, Aquifer Exemption.

1. The board may, after notice and hearing and subject to the EPA approval, authorize the exemption of certain aquifers from classification as an USDW based upon the following findings:

1.1. The aquifer does not currently serve as a source of drinking water.

1.2. The aquifer cannot now and will not in the future serve as a source of drinking water for any of the following reasons:

1.2.1. The aquifer is mineral, hydrocarbon or geothermal energy producing, or it can be demonstrated by the applicant as part of a permit application for a Class II well operation, to contain minerals or hydrocarbons that,

considering their quantity and location, are expected to be commercially producible.

1.2.2. The aquifer is situated at a depth or location that makes recovery of water for drinking water purposes economically or technologically impractical.

1.2.3. The aquifer is contaminated to the extent that it would be economically or technologically impractical to render water from the aquifer fit for human consumption.

1.2.4. The aquifer is located above a Class III well mining area subject to subsidence or catastrophic collapse.

1.3. The total dissolved solids content of the water from the aquifer is more than 3,000 and less than 10,000 mg/l, and the aquifer is not reasonably expected to be used as a source of fresh or potable water.

2. Interested parties desiring to have an aquifer exempted from classification as a USDW, shall submit to the division an application that includes sufficient data to justify the proposal. The division shall consider the application and if appropriate, will advise the applicant to submit a request to the board for an aquifer exemption.

3.8. The operator shall comply with R649-5-5, Testing and Monitoring of Injection Wells.

1. Before operating a new injection well, the casing shall be tested to a pressure not less than the maximum authorized injection pressure, or to a pressure of 300 psi, whichever is greater.

2. Before operating an existing well newly converted to an injection well, the casing outside the tubing shall be tested to a pressure not less than the maximum authorized injection pressure, or to a pressure of 1,000 psi, whichever is lesser, provided that each well shall be tested to a minimum pressure of 300 psi.

3. In order to demonstrate continuing mechanical integrity after commencement of injection operations, all injection wells shall be pressure tested or monitored as follows:

3.1. Pressure Test. The casing-tubing annulus above the packer shall be pressure tested not less than once each five years to a pressure equal to the maximum authorized injection pressure or to a pressure of 1,000 psi, whichever is lesser, provided that no test pressure shall be less than 300 psi. A report documenting the test results shall be submitted to the division.

3.2. Monitoring. If approved by the director, and in lieu of the pressure testing requirement, the operator may monitor the pressure of the casing-tubing annulus monthly during actual injection operations and report the results to the division.

3.3. Other test procedures or devices such as tracer surveys, temperature logs or noise logs may be required by the division on a case-by-case basis.

3.4. The operator shall sample and analyze the fluids injected in each disposal well or enhanced recovery project at sufficiently frequent time intervals to yield data representative of fluid characteristics, and no less frequently than every year.

3.5. The operator shall submit a copy of the fluid analysis to the division with the Annual Fluid Injection Report, UIC Form 4.

3.9. The operator shall comply with R649-5-6, Duration of Approval for Injection Wells.

1. Approvals or orders authorizing injection wells shall be valid for the life of the well, unless revoked by the board for just cause, after notice and hearing.

2. An approval may be administratively amended if:

2.1. There is a substantial change of conditions in the injection well operation.

2.2. There are substantial changes to the information originally furnished.

2.3. Information as to the permitted operation indicates that an USDW is no longer being protected.

R649. Natural Resources; Oil, Gas and Mining; Oil and Gas.
R649-5. Underground Injection Control of Recovery Operations and Class II Injection Wells.
R649-5-1. Requirements for Injection of Fluids Into Reservoirs.

1. Operations to increase ultimate recovery, such as cycling of gas, the maintenance of pressure, the introduction of gas, water or other substances into a reservoir for the purpose of secondary or other enhanced recovery or for storage and the injection of water into any formation for the purpose of water disposal shall be permitted only by order of the board after notice and hearing.

2. A petition for authority for the injection of gas, liquefied petroleum gas, air, water, or any other medium into any formation for any reason, including but not necessarily limited to the establishment of or the expansion of waterflood projects, enhanced recovery projects, and pressure maintenance projects shall contain:

2.1. The name and address of the operator of the project.

2.2. A plat showing the area involved and identifying all wells, including all proposed injection wells, in the project area and within one-half mile radius of the project area.

2.3. A full description of the particular operation for which approval is requested.

2.4. A description of the pools from which the identified wells are producing or have produced.

2.5. The names, description and depth of the pool or pools to be affected.

2.6. A copy of a log of a representative well completed in the pool.

2.7. A statement as to the type of fluid to be used for injection, its source and the estimated amounts to be injected daily.

2.8. A list of all operators or owners and surface owners within a one-half mile radius of the proposed project.

2.9. An affidavit certifying that said operators or owners and surface owners within a one-half mile radius have been provided a copy of the petition for injection.

2.10. Any additional information the board may determine is necessary to adequately review the petition.

3. Applications as required by R649-5-2 for injection wells that are located within the project area, may be submitted for board consideration and approval with the request for authorization of the recovery project.

4. Established recovery projects may be expanded and additional wells placed on injection only upon authority from the board after notice and hearing or by administrative approval.

5. If the proposed injection interval can be classified as an USDW, approval of the project is subject to the requirements of R649-5-4.

R649-5-2. Requirements for Class II Injection Wells Including Water Disposal, Storage and Enhanced Recovery Wells.

1. Injection wells shall be completed, equipped, operated, and maintained in a manner that will prevent pollution and damage to any USDW, or other resources and will confine injected fluids to the interval approved.

2. The application for an injection well shall include a properly completed UIC Form 1 and the following:

2.1. A plat showing the location of the injection well, all abandoned or active wells within a one-half mile radius of the proposed well, and the surface owner and the operator of any lands or producing leases, respectively, within a one-half mile radius of the proposed injection well.

2.2. Copies of electrical or radioactive logs, including gamma ray logs, for the proposed well run prior to the installation of casing and indicating resistivity, spontaneous potential, caliper, and porosity.

2.3. A copy of a cement bond or comparable log run for the proposed injection well after casing was set and cemented.

2.4. Copies of logs already on file with the division should be referenced, but need not be refiled.

2.5. A description of the casing or proposed casing program of the injection well and of the proposed method for testing the casing before use of the well.

2.6. A statement as to the type of fluid to be used for injection, its source and estimated amounts to be injected daily.

2.7. Standard laboratory analyses of:

2.7.1. The fluid to be injected,

2.7.2. The fluid in the formation into which the fluid is being injected, and

2.7.3. The compatibility of the fluids.

2.8. The proposed average and maximum injection pressures.

2.9. Evidence and data to support a finding that the proposed injection well will not initiate fractures through the overlying strata or a confining interval that could enable the injected fluid or formation fluid to enter any fresh water strata.

2.10. Appropriate geological data on the injection interval with confining beds clearly labeled,

2.10.1. Nearby Underground Sources of Drinking Water, including the geologic formation name,

2.10.2. Lithologic descriptions, thicknesses, depths, water quality, and lateral extent;

2.10.3. Information relative to geologic structure near the proposed well that may effect the conveyance and/or storage of the injected fluids.

2.11. A review of the mechanical condition of each well within a one-half mile radius of the proposed injection well to assure that no conduit exists that could enable fluids to migrate up or down the wellbore and enter improper intervals.

2.12. An affidavit certifying that a copy of the application has been provided to all operators, owners, and surface owners within a one-half mile radius of the proposed injection well.

2.13. Any other additional information that the board or division may determine is necessary to adequately review the application.

3. Applications for injection wells that are within a recovery project area will be considered for approval:

3.1. Pursuant to R649-5-1-3.

3.2. Subsequent to board approval of a recovery project pursuant to R649-5-1-1.

4. Approval of an injection well is subject to the requirements of R649-5-4, if the proposed injection interval can be classified as an USDW.

5. In addition to the requirements of this section, the provisions of R649-3-1, R649-3-4, R649-3-24, R649-3-32, and R649-8-1 and R649-10 shall apply to all Class II injection wells.

R649-5-3. Noticing and Approval of Injection Wells.

1. Applications for injection wells submitted pursuant to R649-5-1-3 shall be noticed in conformance with the procedural rules of the board as part of the hearing for the recovery project. Any person desiring to object to approval of such an application for an injection well shall file the objection in conformance with the procedural rules of the board.

2. The receipt of a complete and technically adequate application, other than an application submitted pursuant to R649-5-3-1, shall be considered as a request for agency action by the Division and shall be published in a daily

newspaper of general circulation in the city and county of Salt Lake and in a newspaper of general circulation in the county where the proposed well is located. A copy of the notice of agency action shall also be sent to all parties including government agencies. The notice of agency action shall contain at least the following information:

2.1. The applicant's name, business address, and telephone number.

2.2. The location of the proposed well.

2.3. A description of proposed operation.

3. If no written objection to the application for administrative approval of an injection well is received by the division within 15 days after publication of the notice of agency action, or an aquifer exemption is not required in accordance with R649-5-4, and a board hearing is not otherwise required, the application may be considered and approved administratively.

4. If a written objection to an application for administrative approval of an injection well is received by the division within 15 days after publication of the notice of application, or if a hearing is required by these rules or deemed advisable by the director, the application shall be set for notice and hearing by the board.

5. The director shall have the authority to grant an exception to the hearing requirements of R649-5-1.1 for conversion to injection of additional wells that constitute a modification or expansion of an authorized project provided that any such well is necessary to develop or maintain thorough and efficient recovery operations for any authorized project and provided that no objection is received pursuant to R649-5-3-3.

6. The director shall have authority to grant an exception to the hearing requirements of R649-5-1-1 for water disposal wells provided disposal is into a formation or interval that is not currently nor anticipated to be an underground source of drinking water and provided that no objection is received pursuant to R649-5-3-3.

R649-5-4. Aquifer Exemption.

1. The board may, after notice and hearing and subject to the EPA approval, authorize the exemption of certain aquifers from classification as an USDW based upon the following findings:

1.1. The aquifer does not currently serve as a source of drinking water.

1.2. The aquifer cannot now and will not in the future serve as a source of drinking water for any of the following reasons:

1.2.1.The aquifer is mineral, hydrocarbon or geothermal energy producing, or it can be demonstrated by the applicant as part of a permit application for a Class II well operation, to contain minerals or hydrocarbons that, considering their quantity and location, are expected to be commercially producible.

1.2.2. The aquifer is situated at a depth or location that makes recovery of water for drinking water purposes economically or technologically impractical.

1.2.3. The aquifer is contaminated to the extent that it would be economically or technologically impractical to render water from the aquifer fit for human consumption.

1.2.4. The aquifer is located above a Class III well mining area subject to subsidence or catastrophic collapse.

1.3. The total dissolved solids content of the water from the aquifer is more than 3,000 and less than 10,000 mg/l, and the aquifer is not reasonably expected to be used as a source of fresh or potable water.

2. Interested parties desiring to have an aquifer exempted from classification as a USDW, shall submit to the division an application that includes sufficient data to justify the proposal. The division shall consider the application and if appropriate, will advise the applicant to submit a request to the board for an aquifer exemption.

R649-5-5. Testing and Monitoring of Injection Wells.

1. Before operating a new injection well, the casing shall be tested to a pressure not less than the maximum authorized injection pressure, or to a pressure of 300 psi, whichever is greater.

2. Before operating an existing well newly converted to an injection well, the casing outside the tubing shall be tested to a pressure not less than the maximum authorized injection pressure, or to a pressure of 1,000 psi, whichever is lesser, provided that each well shall be tested to a minimum pressure of 300 psi.

3. In order to demonstrate continuing mechanical integrity after commencement of injection operations, all injection wells shall be pressure tested or monitored as follows:

3.1. Pressure Test. The casing-tubing annulus above the packer shall be pressure tested not less than once each five years to a pressure equal to the maximum authorized injection pressure or to a pressure of 1,000 psi, whichever is lesser, provided that no test pressure shall be less than 300 psi. A report documenting the test results shall be submitted to the division.

3.2. Monitoring. If approved by the director, and in lieu of the pressure testing requirement, the operator may monitor the pressure of the casing-tubing annulus monthly during actual injection operations and report the results to the division.

3.3. Other test procedures or devices such as tracer surveys, temperature logs or noise logs may be required by the division on a case-by-case basis.

3.4. The operator shall sample and analyze the fluids injected in each disposal well or enhanced recovery project at sufficiently frequent time intervals to yield data representative of fluid characteristics, and no less frequently than every year.

3.5. The operator shall submit a copy of the fluid analysis to the division with the Annual Fluid Injection Report, UIC Form 4.

R649-5-6. Duration of Approval for Injection Wells.

1. Approvals or orders authorizing injection wells shall be valid for the life of the well, unless revoked by the board for just cause, after notice and hearing.

2. An approval may be administratively amended if:

2.1. There is a substantial change of conditions in the injection well operation.

2.2. There are substantial changes to the information originally furnished.

2.3. Information as to the permitted operation indicates that an USDW is no longer being protected.

R649-5-7. Unit or Cooperative Development or Operation.

Any person desiring to obtain the benefits of Section 40-6-7(1) insofar as the same relates to any method of unit or cooperative development or operation of a field or pool or a part of either, shall file a Request for Agency Action and a copy of such agreement with the board for approval after notice and hearing.

KEY: oil and gas law
June 2, 1998 40-6-1 et seq.
Notice of Continuation August 26, 2016

R649. Natural Resources; Oil, Gas and Mining; Oil and Gas.
R649-8. Reporting and Report Forms.
R649-8-1. General Report Forms.

1. The forms listed below, as modified by the Division from time to time shall be used for the purpose indicated in accordance with the instructions and the applicable rule.

Form 1 Application for Permit to Conduct Seismic Exploration R649-8-2

Form 2 Seismic Exploration Completion Report R649-8-3

Form 3 Application for Permit to Drill, Deepen, or Plug Back (APD) R649-8-4

Form 4 Bond R649-8-5

Form 5 Designation of Agent or Operator R649-8-6

Form 6 Entity Action Form R649-8-7

Form 7 Report of Water Encountered During Drilling R649-8-8

Form 8 Well Completion or Recompletion Report and Log R649-8-9

Form 9 Sundry Notices and Reports on Wells R649-8-10

Form 10 Monthly Oil and Gas Production Report R649-8-11

Form 11 Monthly Oil and Gas Disposition Report R649-8-12

Form 12 Report of Transferred Oil R649-8-13

Form 13-A Monthly Summary Report of Gas Processing Plant Operations R649-8-14

Form 13-B Monthly Report of Gas Processing Plant Product Allocations R649-8-15

Form 14 Monthly Report of Waste Crude Oil Treatment Facility Operations R649-8-16

Form 15 Designation of Workover or Recompletion R649-8-17

UIC Form 1 Application for Injection Well R649-8-18

UIC Form 2 Monthly Report of Enhanced Recovery Project R649-8-19

UIC Form 3 Monthly Injection Report R649-8-20

UIC Form 4 Annual Fluid Injection Report R649-8-21

UIC Form 5 Transfer of Authority to Inject R649-8-22

2. Any permitted well which is referenced on a report form, correspondence, or well log should be identified by its assigned API number.

R649-8-2. Form 1, Application for Permit to Conduct Seismic Exploration.

At least seven days prior to commencing any type of seismic exploration operations, an Application for Permit to Conduct Seismic Exploration shall be submitted in duplicate to the division by the seismic contractor in accordance with R649-3-26.

R649-8-3. Form 2, Seismic Exploration Completion Report.

Within 60 days of the completion of each seismic exploration project, a Seismic Exploration Completion Report shall be submitted to the division by the seismic contractor in accordance with R649-3-26.

R649-8-4. Form 3, Application for Permit to Drill, Deepen, or Plug Back (APD).

Prior to the commencement of drilling, deepening, or plugging back any well or the commencement of exploratory drilling such as core holes and stratigraphic test holes, and prior to the commencement of any surface disturbance associated with such activity, the operator shall submit in duplicate an Application for Permit to Drill, Deepen, or Plug Back in accordance with R649-3-4.

R649-8-5. Form 4, Bond.

Except where a bond in satisfactory form has been filed by the operator in accordance with state, federal, or Indian lease requirements and evidence has been furnished to the division that such bond has been approved by the appropriate agency, the division shall require from the operator a good and sufficient bond in accordance with R649-3-1.

R649-8-6. Form 5, Designation of Agent or Operator.

Prior to the commencement of operations, a Designation of Agent or Operator shall be filed with the division in accordance with R649-2-4.

R649-8-7. Form 6, Entity Action Form.

1. For the purpose of accurately establishing the division's computerized oil and gas production accounting system and properly maintaining division of interest data for each well in the system, the operator shall file an Entity Action Form with the division within five working days of any of the following actions:

1.1. Spudding of a well, R649-3-6.

1.2. A change in operations which requires adding or removing a well from a group of wells that have identical division of interests, produce from the same formation, have product sales from a common tank, LACT meter, or gas meter, and have the same operator.

1.3. A change in operations when a service well is converted to a producing oil or gas well.

1.4. A change in operations when a well is recompleted and is capable of producing from another formation, R649-3-23.

1.5. A change in interest which requires adding or removing a well from a participating area of a properly designated unit.

2. Upon receipt of an Entity Action Form, the division will assign an entity number to a new well or change the entity number as needed for an existing well.

2.1. This number identifies the well on the operator's monthly oil and gas production and disposition reports.

2.2. Entity numbers are used by the State Tax Commission and other state government agencies to properly account for all production taxes and the divisions of royalty interest on state leases.

3. This form does not take the place of Form 9, Sundry Notices and Reports on Wells, which is to be used to provide detailed accounts of physical operations on wells.

R649-8-8. Form 7, Report of Water Encountered During Drilling.

The operator shall report to the division all fresh water sands encountered during drilling in accordance with R649-3-6. The report shall be filed with the Well Completion or Recompletion Report and Log, Form 8.

R649-8-9. Form 8, Well Completion or Recompletion Report and Log.

In accordance with R649-3-11, R649-3-21, R649-3-23, and R649-3-24, the operator shall file a Well Completion or Recompletion Report and Log and a copy of the electric and radioactivity logs, if run, within 30 days after completing, recompleting, or plugging a well.

R649-8-10. Form 9, Sundry Notices and Reports on Wells.

1. This report form shall be used to notify the division of the intention to do miscellaneous work on any well for which a specific report form is not provided, and to report the subsequent results of that work.

1.1. A notice of intention to do work on a well located on lands with state, fee or privately owned minerals or to

change plans previously approved shall be submitted in duplicate and must be received and approved by the division before the work is commenced.

1.2. The operator is responsible for receipt of the notice by the division in ample time for proper consideration and action. In cases of emergency the operator may obtain verbal approval to commence work.

1.3. Within five days after receiving verbal approval, the operator shall submit a Sundry Notice describing the work and acknowledging the verbal approval.

2. In addition to the types of work listed on the form, a Sundry Notice is required for the following:

2.1. Monthly status report for each drilling well in accordance with R649-3-6.

2.2. Application for permit to complete a well into more than one pool in accordance with R649-3-22.

2.3. Notice of intent to plug and abandon a well in accordance with R649-3-24.

2.4. Notice of intent to pull casing in accordance with R649-3-24.

2.5. Notice of change of operator. The report form should be submitted by both the previous operator and the new operator.

R649-8-11. Form 10, Monthly Oil and Gas Production Report.

1. The division will provide this report monthly to operators of all oil and gas wells within the state. Each operator shall complete the form to properly account for all oil, gas, and water produced from each well.

2. This report shall be submitted in conjunction with Form 11, Monthly Oil and Gas Disposition Report before the fifteenth day of the second calendar month following the month of production.

R649-8-12. Form 11, Monthly Oil and Gas Disposition Report.

1. All oil and gas well operators shall complete this form monthly to account for all oil and gas dispositions from each entity.

1.1. The report should account for the physical dispositions of all oil and gas produced during the report month from each well or group of wells (entity).

1.2. Only the initial disposition of each product as it leaves the well site or is used at the well site should be reported.

1.3. Residue gas and/or load oil received from another well, plant, or field should not be shown on this report.

2. This report shall be submitted in conjunction with Form 10, Monthly Oil and Gas Production Report and Form 12, Report of Transferred Oil on or before the fifteenth day of the second calendar month following the month of production.

R649-8-13. Form 12, Report of Transferred Oil.

1. This report is to be used only in accounting for oil that is transferred from one entity to another entity or oil that is acquired and used during remedial operations on a well.

This includes situations such as the following:

1.1. Oil that is produced at one entity or is acquired from another company, is then used as load oil at a "second" entity, and is then recovered and sold, or

1.2. Oil that is produced and then transferred to a "second" entity for treatment and sale due to mechanical problems at the producing entity.

2. Load oil that is recovered at the "second" entity and non-load oil that is transferred to the "second" entity should be excluded from all reported production, dispositions, and stocks of the "second" entity on Form 11, Monthly Oil and Gas Disposition Report. This allows the reporting of the "second" entity's true production and sales on Form 11, while the remainder of any sales is accounted for on this form.

2.1. The transported volumes reported on this form plus the transported volume for the "second" entity on Form 11 should equal the total run ticket volume as reported by the trucking or pipeline company serving this entity.

2.2. This report is to be filed as an attachment to Form 11, Monthly Oil and Gas Disposition Report during the month in which recovered load oil or any other transferred oil (non-load oil) is sold from the "second" entity.

R649-8-14. Form 13-A, Monthly Summary Report of Gas Processing Plant Operations.

1. Gas processing plant operators shall complete and submit a monthly report in accordance with R649-6-1, to account for the receipt, processing and disposition of all gas by the plant.

2. The report is due on or before the fifteenth day of the second calendar month following the operations month covered by the report.

R649-8-15. Form 13-B, Monthly Report of Gas Processing Plant Product Allocations.

1. Gas processing plant operators that are required by contractual arrangements to allocate residue gas and extracted liquids to the individual producing wells must complete and submit this form monthly in accordance with R649-6-1.

2. The report is to be filed as an attachment to Form 13-A, Monthly Summary Report of Gas Processing Plant Operations on or before the fifteenth day of the second calendar month following the operations month covered by the report.

R649-8-16. Form 14, Monthly Report of Waste Crude Oil Treatment Facility Operations.

1. Each operator of treatment or reclaiming facilities handling tank bottoms, oil from pits or ponds, or any other waste crude oil, shall complete and submit this report monthly in accordance with R649-6-2 to account for stocks, receipts, and deliveries of processed and unprocessed waste crude oil.

2. The report is due on or before the fifteenth day of the second calendar month following the operations month covered by the report.

R649-8-17. Form 15, Designation of Workover or Recompletion.

1. In accordance with Rule R649-3-23, each operator desiring to claim a tax credit for workover or recompletion work performed must submit this report within 90 days after the workover or recompletion work is completed. Upon determination and notification by the division that the described work qualifies for a tax credit under this rule, the operator may claim the tax credit on reports submitted to the Tax Commission during the third quarter after completion of the work.

2. The following workover and recompletion operations qualify for a tax credit:

2.1. Perforating,

2.2. Stimulation (e.g., acid jobs, frac jobs, solvent treatments, nitrogen cleanouts),

2.3. Sand control,

2.4. Water control or shut-off,

2.5. Wellbore cleanout,

2.6. Casing or liner repair,

2.7. Well deepening,

2.8. Initiation of enhanced recovery (excluding surface equipment and associated costs),

2.9. Change of lift system (excluding surface equipment and associated costs),
2.10. Gas well tubing changes (i.e., down-sizing),
2.11. Thief zone identification and elimination.
3. The following workover and recompletion operations do not qualify for a tax credit:
3.1. Pump changes,
3.2. Rod string fishing and repair/replacement,
3.3. Tubing repair/replacement,
3.4. Surface equipment installation and repair,
3.5. Operations generally classified as routine maintenance or repair.
4. Division approval is conditional subject to audit, and actual final expenses may be disallowed if they are not appropriate workover or recompletion expenses.

R649-8-18. UIC Form 1, Application for Injection Well.

Prior to the commencement of operations for injecting any fluid into a well for the purpose of enhanced recovery, disposal, or storage, the operator shall submit an Application for Injection Well and obtain division approval in accordance with R649-5-2.

R649-8-19. UIC Form 2, Monthly Report of Enhanced Recovery Project.

1. The operator shall submit this report monthly to report the injection pressure, rate, and volume for each enhanced recovery injection well or project.
2. The report is due within 30 days following the end of the month of operations.

R649-8-20. UIC Form 3, Monthly Injection Report.

1. The operator shall submit this report monthly to report the daily injection pressure, rate, and volume for each disposal well and/or storage well.
2. The report is due within 30 days following the end of the month of operations.

R649-8-21. UIC Form 4, Annual Fluid Injection Report.

1. The operator of disposal wells, storage wells, or enhanced recovery projects shall file an annual report with the division using this form.
2. The report is due within 60 days following the end of the year.

R649-8-22. UIC Form 5, Transfer of Authority to Inject.

1. The authority to inject for any injection well shall not be transferred from one operator to another without the approval of the division. The transfer of authority to inject for any injection well from one operator to another shall be submitted to the division on this form prior to the date of the proposed transfer.
2. The division shall, within 30 days after receipt of a properly completed form, return a copy of the form to each operator indicating approval or denial of the transfer of authority to inject. If approved, a copy of the order authorizing injection shall be attached to the form returned to the new operator.

KEY: oil and gas conservation, reporting
June 2, 1998 40-6-1 et seq.
Notice of Continuation August 26, 2016

R649. Natural Resources; Oil, Gas and Mining; Oil and Gas.
R649-9. Waste Management and Disposal.
R649-9-1. Introduction.

1. Section 40-6-5 UCA authorizes the board to regulate the disposal of produced water and oil-field wastes. It is the intent of the board and division to regulate E and P wastes and facilities for the disposal of these wastes in a manner that protects the environment, limits liability to producers, and minimizes the volume of waste.

2. These rules specify the informational and procedural requirements for waste management and disposal, the permitting of disposal facilities and the cleanup requirements for E and P waste related sites.

3. Design and construction requirements for disposal facilities approved prior to July 1, 2013 shall remain as previously permitted. Design and construction changes to these facilities after July 1, 2013 shall meet the following requirements as determined by the division.

4. These rules are intended for E and P waste disposal facilities excluding Class II injection wells and pits associated with wells.

R649-9-2. General Waste Management.

1. Wastes addressed by these rules are E and P Wastes that are exempt from the RCRA hazardous waste management requirements.

1.1. Before using a commercial disposal facility the operator may contact the division to verify the status of the facility. The division regularly updates this information on the Division of Oil, Gas and Mining web site.

1.2. Each site and/or facility used for disposal must be permitted and in good standing with the division.

1.3. All approved disposal facilities not located at a well site shall be identified with a suitable sign showing facility name, operator, location and emergency number.

1.4. The disposal facility shall be fenced and maintained to deter access by livestock and wildlife and, if determined necessary by the division, equipped with flagging or netting to deter entry by birds and waterfowl.

2. Reduction of the amount of material generated that must be disposed of is the preferred practice.

2.1. Recycling should be used whenever possible and practical.

2.2. In general, good housekeeping practices shall be used.

2.3. Operators shall catch leaks, drips, contain spills, and cleanup promptly.

2.4. Disposal facilities shall be operated in accordance with an approved application and in a manner that does not cause safety or health hazards.

3. The method of disposal used shall be compatible with the waste that is the subject of disposal.

3.1. Whenever possible, injection of E and P waste into approved Class II wells is the division's preference.

3.2. RCRA exempt waste shall not be mixed with nonexempt waste.

4. Every operator shall submit, to the division, an Annual Waste Management Plan by January 15 of each year to account for the proper disposition of produced water and other E and P Wastes. This plan will include:

4.1. The type and estimated annual volume of wastes that will be or have been generated.

4.2. The facilities to be used for disposal.

4.3. The description of any waste reduction or minimization procedures.

4.4. Any onsite disposal/treatment methods or programs to be implemented by the operator.

4.5. If changes are made to the plan during the year, then the operator shall notify the division in writing, within 30 days, of this change.

R649-9-3. Permit and Application Requirements for Disposal Facilities.

1. No waste disposal facility shall operate without a division-issued permit.

2. Applications for new disposal facilities or modifications shall be submitted to the division and shall include the following:

2.1. Previously submitted material may be included by reference provided they are current and readily available to the division.

2.2. Evidence justifying the need for the proposed facility or expansion of an existing facility.

2.3. Names and addresses of all applicants, principal officers and owners with 25 percent or more interest in the facility.

2.4. Materials or products to be applied to the land surface or subsurface shall meet the division's current cleanup levels for contaminated soil and other wastes.

2.5. If leachability and/or toxicity are of concern due to the type or source(s) of wastes, tests will be required and may utilize the Toxicity Characteristic Leaching Procedure (TCLP), Synthetic Precipitation Leaching Procedure (SPLP) or any other test approved by the division.

2.6. A contingency plan designed to minimize any hazards to fresh water, public health and safety, or the environment in the event of an unplanned fire, explosion, or a release of contaminants or oil field waste to the air, soil, surface water or ground water.

2.7. A solid waste stream management plan describing all chemical processes, estimated volumes and chemical profiles used in the treatment of waste and odor, any products generated by these processes, method and schedule for disposal of precipitated solids and complete list of all wastes to be accepted at the facility.

2.8. A topographic map and drawing of the site, on a suitable scale, that identifies all geologic cross sections, side slopes, equipment, secondary containment, test borings, roads, fences, gates, wells and springs, drainage patterns, pipelines, surface area to be disturbed, buildings and chemical storage areas within one mile of the site perimeter and location relative to other site facilities. The drawings shall be of professional quality.

3. Siting requirements for new disposal facilities and modifications.

3.1. The disposal facility shall be located on level, stable ground, and an acceptable distance away from any established or intermittent drainage.

3.2. The disposal facility shall be located a minimum of one mile from residences or occupied buildings not associated with the facility unless a wavier has been signed by the owners of the residences and buildings within one mile.

4. Geologic and hydrological requirements for new disposal facilities or modifications.

4.1. The disposal facility shall not be located in a geologically or hydrologically unsuitable area, such as aquifer recharge areas, protection zones for public drinking water sources, flood plains, drainage bottoms, and areas on or near faults, within 500 feet of a wetland, water-course or lakebed, permeable soil where ground water is less than 50 feet below the lowest elevation at which the operator will place oilfield waste, or within the area overlying a subsurface mine.

4.2. Regional and local geologic information shall include bedrock strike and dip, fracture patterns, slope stability, faulting, folding, rockfall, landslides, subsidence or erosion potential, and surface water features that may affect the design and operation of the facility.

4.3. Geological and hydrological evidence showing that the proposed disposal method will not adversely affect existing water quality or major uses of such waters.

4.3.1. Any intentional discharge of water will require an additional permit from the Division of Water Quality.

4.4. Test borings shall be taken in sufficient quantity and to an adequate depth, not to exceed 50 feet, to define subsurface conditions to assure that the facility will be constructed on a firm stable base.

4.5. Representative analysis of facility surface and subsurface soils submitted to the division shall include TDS, major cations and anions or other analysis determined necessary by the division for establishing background soil concentrations.

4.6. Geologic cross-sections submitted to the division shall include depth to shallow ground water, formation names, and type and name of the shallowest fresh water aquifer beneath the proposed site.

4.7. If determined necessary by the division, applicant shall submit ground water analysis of the aquifer(s) beneath the proposed site.

4.8. If determined necessary by the division, applicant shall submit potentiometric maps of the shallowest aquifer(s).

5. Engineering and design requirements for new disposal facilities and modifications.

5.1. Disposal facilities shall be designed and sealed by a registered engineer and inspected by a registered engineer during construction.

5.1.1. A construction certification shall be submitted, by the engineer, prior to the Division issuing an operation permit for the facility.

5.2. The disposal facility shall be designed appropriately for the intended purpose.

5.3. Facilities shall be designed, constructed and operated so as to contain liquids and solids in a manner that will protect fresh water, public health and safety, and the environment for the life of the operation.

5.3.1. The disposal facility shall be designed with secondary containment to capture the largest potential release in the event of a catastrophic failure.

5.4. Facilities shall be designed and constructed so as to prevent run-on and run-off of surface water, up to peak discharge from a 25 year, 24 hour storm.

5.5. The facility shall be designed such that disposal can only occur when an attendant is on duty, unless loads can be monitored or otherwise isolated for inspection before disposal or other security measures approved by the division.

R649-9-4. Specific Requirements Applicable to Evaporation Facilities.

1. Evaporation facilities shall be designed, constructed and operated to meet the following specific requirements in addition to R649-9-3, Permit and Application Requirements for Disposal Facilities.

2. Applicant shall submit detailed construction/installation diagrams of ponds, side slopes, liners, pond storage capacity, leak detection systems, dikes or levees, wind fences, piping, enhanced evaporation systems with justification, water treatment systems and tanks.

2.1. Detailed information shall be submitted for all enhanced evaporation systems which demonstrates that unlawful discharge will not occur.

2.2. The facility shall be designed, maintained and operated to separate oil from produced water prior to discharge into a pond.

3. Applicant shall submit detailed construction/installation diagrams of unloading facilities and an explanation of the method for controlling and disposing of any liquid hydrocarbon accumulation on the ponds.

3.1. The unloading facility shall be designed, maintained and operated to adequately process the anticipated maximum daily quantity of produced water.

3.2. The unloading facility shall be designed with a leak detection system if determined necessary by the division.

3.2.1. Applicant shall submit procedures for repair should leakage occur.

4. Applicant shall submit the maximum daily quantity of water to be disposed of and a representative water analysis of such water that includes the concentrations of chlorides and sulfates, pH, total dissolved solids "TDS", and information regarding any other significant constituents if requested by the division.

5. Applicant shall submit climatological data describing the average annual evaporation and precipitation.

6. Ponds shall be designed, maintained and operated to meet the following requirements.

6.1. Ponds shall be designed for 10 acre-feet of water or less, unless otherwise approved by the division.

6.2. Ponds shall have adequate storage capacity to safely contain all produced water even during those periods when evaporation rates are at a minimum.

6.3. Ponds shall be designed to prevent unauthorized surface or subsurface discharge of water.

6.4. Ponds shall be designed to include a 2-foot free-board at all times.

6.5. Pond levees shall be constructed so that the inside grade of the levee is no steeper than 3:1 and the outside grade no steeper than 2:1.

6.5.1. The top of the levee shall be level and of sufficient width to allow for adequate compaction.

6.5.2. Vertical height of the levees shall not exceed 25 percent of the total vertical depth of the pond.

7. Ponds shall be designed with two synthetic liners, an upper primary and lower secondary liner, with a leak detection system between them. Synthetic liners shall be installed according to the manufacturer's instructions.

7.1. The primary liner shall be impervious (a hydraulic conductivity no greater than 1 x 10-9 cm/sec) and constructed with a minimum 60-mil HDPE or equivalent liner approved by the division.

7.2. The secondary liner shall be impervious and constructed with a minimum 40-mil HDPE or equivalent liner approved by the division.

7.3. If rigid materials are used, leak proof expansion joints shall be provided, or the material shall be of sufficient thickness and strength to withstand expansion, contraction and settling movements in the underlying earth, without cracking.

7.4. Materials used in lining ponds shall be impervious and resistant to weather, tears and punctures, sunlight, hydrocarbons, aqueous acids, alkalies, salt, fungi, or other substances that might be contained in the produced water.

7.5. Applicant shall submit the type, thickness, strength, and life span of material(s) to be used for lining the pond and the method of installation.

7.6. Applicant shall submit procedures for repair of the liner, should leakage occur.

8. Applicant shall submit detailed construction/installation diagram for the leak detection system.

8.1. The leak detection design shall include, a drainage and collection system placed between the upper and lower liners and sloped so as to facilitate the earliest possible detection of a leak.

8.2. The leak detection design shall include a vertical riser outside the dike allowing direct visual inspection of the sump from the surface.

8.2.1. The sump shall be designed to extend a minimum

of two feet below the inlet line from the pond, allowing visual detection of any fluid and sampling of fluid.

8.2.2. Designed with a removable top for the sump riser that will prevent entry of fluids.

8.3. Designed with leak detection piping capable of withstanding chemical attack from oil field waste, structural loading from stresses and disturbances from overlying oil field waste and cover materials, equipment operation, expansion and/or contraction, and facilitate clean-out maintenance.

9. Evaporation facilities shall be operated to separate oil from produced water prior to discharge into a pond and prevent unauthorized surface discharge of water.

9.1. Hydrocarbon accumulation, other than de minimis quantities, on an evaporation pond is considered a violation and shall be removed within 24 hours.

9.2. Overspray from sprinklers and/or overspray caused by wind, including foam, outside lined areas are considered a violation and shall be corrected immediately.

9.3. Sampling and testing of soils suspected to be contaminated from overspray may be required by the division.

R649-9-5. Specific Requirements Applicable to Landfarms.

1. Landfarms for the bioremediation of oil contaminated soils and materials shall be designed and constructed to meet the following specific requirements in addition to R649-9-3, Permit and Application Requirements for Disposal Facilities.

1.1. Landfarms shall be constructed on native soil with a hydraulic conductivity of no greater than 1 x 10-6 cm/sec.

1.2. With division approval, fresh water may be added as necessary to enhance bioremediation and control dust.

1.3. Application of microbes and nutrients for enhancing bioremediation requires prior division approval.

2. Landfarms shall be operated to meet the following requirements:

2.1. E and P waste accepted by the landfarm shall be sufficiently free of liquid content to pass a 60-mesh liquid paint filter test.

2.2. Pooling of liquids in the landfarm is prohibited. The operator shall remove freestanding liquid within 24 hours.

2.3. Within 72 hours after receipt of E and P waste the operator shall spread and disk the waste in twelve-inch or less lifts.

2.4. Soils shall be disked and turned regularly, a minimum of once a month.

2.5. Conduct treatment and soil monitoring to ensure that prior to adding an additional lift the soil concentrations do not exceed the division's current salinity and hydrocarbon cleanup standards.

2.6. Maintain records of the landfarm remediation activity. The records shall be readily accessible for division review.

R649-9-6. Other Disposal Facility Requirements.

1. Facilities used for the treatment and disposal of E and P wastes other than evaporation ponds and landfarms shall be permitted by the division. This may include activities such as composting, solidifying, other bioremediation, water treatment, and others.

2. Application Requirements for Other Disposal Facilities require the following in addition to R 649-9-3, Permit and Application Requirements for Disposal Facilities:

2.1. A complete description of the proposed facility.

2.2. Processes involved including a complete list of all wastes to be accepted at the facility and products generated.

2.3. Maps and drawings of suitable scale showing all facilities and equipment.

R649-9-7. Noticing of Disposal Facilities.

1. The applicant for a new facility or major modification shall give written notice of the application, by certified mail, return receipt requested, to surface and mineral owners of record within one-half mile of the facility, the county commission of the county where the facility is located, and affected tribal and government agencies.

1.1. The notice shall include information describing the facility's location, basic plan of operations, and the applicant's name and address.

1.2. The applicant shall furnish the division proof of required notices.

1.3. The division may extend the distance requirements for notice if the division determines that the proposed disposal facility has the potential to adversely impact fresh water, public health, safety or the environment at a distance greater than one-half mile.

2. Within 30 days of the submission of an application for a disposal facility, the division shall review the application as to its completeness and adequacy for the intended purpose and shall require such changes that are found necessary to assure compliance with the applicable rules. If the application is in order, the division shall provide for a public notice to be published in a newspaper of general circulation in the county where the facility is to be located.

R649-9-8. Bonding of Disposal Facilities.

1. Disposal facilities, other than injection wells and their associated facilities, shall be bonded according to this rule in order to protect the State and oil and gas producers from unnecessary liabilities and cleanup costs in the future. The objectives are to provide the State with adequate security for site reclamation and post closure cost should a facility owner default.

2. Permits issued after July 1, 2013 for new disposal facilities or modifications and facilities being reviewed for 5-year permit renewals, shall submit site reclamation and post closure cost estimates from a responsible third party contractor for division approval.

2.1. The applicant shall bond in the amount of the approved estimated site reclamation and post closure costs, or $25,000, whichever is greatest.

3. Bonds accepted shall be of the same type as those accepted for wells i.e. surety, collateral, or a combination of the two as described in R649-3-1.

4. The total bond will be held by the division or financial institution until the facility has been closed and inspected by the division in accordance with a division approved closure plan.

5. Bond amounts, for permits approved prior to July 1, 2013 will be calculated as follows, and the per volume or per acre figures may be adjusted periodically to compensate for change in cost to perform the necessary cleanup work:

$14,000 per acre of pit, partial acres will be calculated at the rate of $14,000 per acre; plus

$1.00 per barrel of produced water for one-quarter of the total storage capacity of the facility; plus

$30 per cubic yard of solid or semi-solid waste material stockpiled at the facility.

$10,000 Minimum bond amount.

5.1. Operators of disposal facilities permitted prior to July 1, 2013 shall have until July 1, 2018 (five years) to submit, to the division, a disposal facility site reclamation and post closure bond as required above in R649-9-8.2.

6. All disposal facilities, except injection wells covered by R649-3-1, will be covered by an adequate and acceptable bond before being permitted to accept any E and P waste.

7. Forfeiture of the bond shall be the same as those for wells as described in R649-3-1.16.

R649-9-9. Permit and Renewal Approval, Denial, Revocation, Suspension, Modification or Transfer.

1. Permit and renewal approval.

1.1. Construction approvals issued by the division are valid for one year from approval date. An extension may be granted by the division.

1.2. Operating approvals issued by the division for waste management facilities shall remain in effect for five years from the approval date.

1.3. After division review, permits may be renewed for successive 5-year terms.

1.3.1. Prior to renewal approval, the division shall review the operation, compliance history, bonding and technical requirements for the disposal facility.

1.3.2. The division, after notice to the operator, may require modifications of the disposal facility permit, including modifications necessary to the facility permit terms and conditions consistent with statutes, rules or judicial decisions.

2. An application may be denied if:

2.1. A complete application is not submitted.

2.2. The application does not meet R649-9-3.3 on siting and/or R649-9-3.4 on geologic and hydrologic requirements.

2.3. The proposed disposal facility or modification may be detrimental to fresh water, public health, safety or the environment.

2.4. The applicant is unable to justify good cause for the proposed facility.

2.5. An applicant or owner in the facility has a history of failure to comply with division rules and orders, state or federal environmental laws, or is in current violation of a division or board order requiring corrective action.

3. Revocation, suspension, or modification of a permit.

3.1. The division may revoke, suspend, or impose additional operating conditions or limitations on a disposal facility permit at any time, for good cause, after notice to the operator.

3.2. The division may suspend a waste disposal permit or impose additional conditions or limitations in an emergency to forestall an imminent threat to fresh water, public health, safety or the environment.

3.3. Suspension of a disposal facility permit may be for a fixed period of time or until the operator remedies the violation or potential violation.

3.4. If the division suspends a disposal facility permit, the disposal facility shall not accept oil field waste during the suspension period.

4. Transfer of a permit.

4.1. The operator shall not transfer a permit without the division's prior written approval.

4.2. A request for transfer of a permit shall identify officers, directors and owners of 25 percent or greater in the transferee.

4.3. Unless the director otherwise orders, public notice or hearing are not required for the transfer request's approval.

4.4. If the division denies the transfer request, it shall notify the operator and the proposed transferee of the denial by certified mail, return receipt requested, and either the operator or the transferee may request, within 10 days of receipt of the notice, a public hearing before the board.

4.5. Until the division approves the transfer and the required assurance is in place, the division shall not release the transferor's financial assurance.

R649-9-10. Construction and Inspection Requirements for Disposal Facilities.

1. Division personnel shall be afforded a reasonable opportunity for inspection of any proposed disposal facility during the construction and operation of the facility.

2. The division shall be notified at least 72 hours prior to the installation of leak detection systems or liners.

3. The division shall be notified after completion of facility construction so that a final inspection can be conducted to verify that the facility has been constructed in accordance with the approved application.

4. Failure to meet the requirements and standards for construction and operation of a disposal facility shall be considered as noncompliance and will result in the imposition of corrective actions and compliance schedules or a cessation of operations order.

R649-9-11. Reporting and Recordkeeping for Disposal Facilities.

1. All unauthorized discharges or spills from disposal facilities including water observed in a leak detection system shall be reported, within 24 hours, to the division.

2. Each producer who utilizes any approved produced water disposal facility shall comply with the reporting requirements of R649-8-11.

3. Each operator of a disposal facility, excluding disposal wells, shall report to the division on a quarterly basis.

3.1. This report shall include the volume and type of wastes received at the facility during the quarter and results of the weekly leak detection system inspections.

3.2. Berms and outside walls shall be inspected quarterly and after a major rainfall or windstorm. Berm erosion or loss of integrity shall be reported to the division and may require immediate action.

4. The occurrence of water in a leak detection system during operation constitutes liner failure and requires immediate action.

4.1. The division has the option of allowing the operator a short period of time to take corrective action.

4.2. Further utilization will be allowed only after liner repairs and an inspection by the division.

5. Each owner/operator of a disposal facility shall keep records showing at a minimum the following: date and time waste was received, origin, volume, type, transporter, and generator of the waste. These records shall be available for inspection by the division for at least six years.

R649-9-12. Closure and Post Closure of Disposal Facilities.

1. A plan for final closure of a disposal facility shall be submitted to the division, for approval, at least 60 days prior to cessation of operations. The closure plan shall include the following:

1.1. Provisions for removal of all equipment, buildings, fences and roads at the site.

1.2. Removal of berms.

1.3. Removal of liquids and solid waste to a division approved facility.

1.4. Disposal method for liners.

1.5. Plans and procedures for sampling and testing soils and ground water at the site.

1.5.1. Soils shall meet division cleanup standards or background levels whichever is less stringent.

1.6. A monitoring plan if required by the division.

1.7. Consideration of post disposal land use and landowner requests when the closure plan is developed.

2. During closure operations, the operator shall maintain the disposal facility to protect fresh water, public health, safety and the environment.

3. Location of the closed disposal facility shall be documented with the county recorder's office.

4. The bond for the disposal facility will be released when the division approved closure plan requirements have been met, as determined by the division.

R649-9-13. Variances from Requirements and Standards.

Requests for approval of a variance from any of the requirements or standards of these rules shall be submitted to the director in writing and provide information as to the circumstances that warrant approval of the requested variance and the proposed alternative means by which the requirements or standards will be satisfied.

July 1, 2013 40-6-5(3)
Notice of Continuation August 26, 2016

R698. Public Safety, Administration.
R698-1. Public Petitions for Declaratory Orders.
R698-1-1. Authority.

(1) As required by Section 63G-4-503, this rule provides the procedures for submission, review and disposition of petitions for agency declaratory orders on the applicability of statutes, rules and orders governing or issued by the agency.

(2) In order of importance, procedures governing declaratory orders are:

(a) procedures specified in this rule pursuant to Chapter 4 of Title 63G;

(b) the applicable procedures of Chapter 4 of Title 63G;

(c) applicable procedures of other governing state and federal law; and

(d) the Utah Rules of Civil Procedure.

R698-1-2. Definitions.

(1) Terms used in this rule are defined in Section 63G-4-103, except and in addition:

(a) "agency" means the pertinent division, bureau or office within the Department of Public Safety;

(b) "declaratory order" means an administrative interpretation or explanation of rights, status and other legal relations under a statute, rule or order;

(c) "director" means the agency head or governing body with jurisdiction over the agency's adjudicative proceedings;

(d) "order" is defined in Section 63G-3-102; and

(e) "superior agency" means Commissioner of the Department of Public Safety.

R698-1-3. Petition Form and Filing.

(1) The petition shall be addressed and delivered to the director who shall mark the petition with the date of receipt.

(2) The petition shall:

(a) be clearly designated as a request for an agency declaratory order;

(b) identify the statute, rule or order to be reviewed;

(c) describe in detail the situation or circumstances in which applicability is to be reviewed;

(d) describe the reason or need for the applicability review, addressing, in particular, why the review should not be considered frivolous;

(e) include an address and telephone number where the petitioner can be contacted during regular working hours;

(f) declare whether the petitioner has participated in a completed or on-going adjudicative proceeding concerning the same issue within the past 12 months; and

(g) be signed by the petitioner.

R698-1-4. Reviewability.

(1) The agency shall not review a petition for declaratory orders that is:

(a) not within the jurisdiction or competence of the agency;

(b) trivial, irrelevant or immaterial; or

(c) otherwise excluded by state or federal law.

R698-1-5. Intervention.

A person may file a petition for intervention under Section 63G-4-207 if delivered to the director within 20 days of the director's receipt of the declaratory order petition filed under Section R698-1-3.

R698-1-6. Petition Review and Disposition.

(1) The director shall promptly review and consider the petition and may:

(a) meet with the petitioner;

(b) consult with counsel or the Attorney General; or

(c) take any action consistent with law that the agency deems necessary to provide the petition adequate review and due consideration.

(2) The director may issue an order pursuant to Subsection 63G-4-503(6).

(3) If the director orders an adjudicative proceeding under Subsection 63G-4-503(6):

(a) the proceeding shall be formal and governed by the procedures of Title 63G, Chapter 4, Administrative Procedures Act, or other applicable law if a petition for intervention has been filed within the limits of Section R698-1-5; or

(b) the proceeding may be designated as formal or informal and follow the appropriate procedures of Title 63G, Chapter 4, Administrative Procedures Act,, agency rules or other applicable law if a petition for intervention has not been filed within the limits of Section R698-1-5.

R698-1-7. Administrative Review.

(1) A petitioner may seek review or reconsideration of a declaratory order by petitioning the director under the procedures of Title 63G, Chapter 4, Part 3, Agency Review, or as otherwise provided by law.

(2) If the presiding officer issuing the declaratory order is the director, the petitioner may seek the review of the superior agency.

(3) The petitioner may appeal a director's review or reconsideration decision to the superior agency unless otherwise provided by law.

(4) If the petitioner receives no response from the superior agency within 20 days of filing a petition for review or reconsideration, the appeal shall be considered denied.

KEY: administrative procedure, enforcement (administrative)
1993 63G-4-503
Notice of Continuation December 16, 2011

R710. Public Safety, Fire Marshal.
R710-1. Concerns Servicing Portable Fire Extinguishers.
R710-1-1. Purpose.

The purpose of this rule is to establish licensing requirements for business concerns servicing portable fire extinguishers and to establish the requirements for certificates of registration of persons servicing portable fire extinguishers, to establish service tag requirements, to outline adjudicative proceedings and to establish a fee schedule.

R710-1-2. Authority.

This rule is authorized by Section 53-7-204.

R710-1-3. Definitions.

(1) "Annual" means a period of one year or 365 calendar days.

(2) "Board" means Utah Fire Prevention Board.

(3) "Branch Office" means any location, other than the primary business location, where business license, telephone, advertising and servicing equipment is utilized.

(4) "Certificates of Registration" means a written document issued by the SFM to any person for the purpose of granting permission to such person to perform any act or acts for which authorization is required.

(5) "Concern" means a person, firm, corporation, partnership, or association, licensed by the SFM.

(6) "Employee" means those persons who work for a licensed concern, and may include, but shall not be limited to, those persons who work on a contractual basis.

(7) "License" means a written document issued by the SFM authorizing a concern to engage in the business of servicing portable fire extinguishers.

(8) "NFPA" means National Fire Protection Association.

(9) "Repair" means any work performed on, or to, any portable fire extinguisher, and not defined as charging, recharging, or hydrostatic testing.

(10) "USDOT" means the United States Department of Transportation.

R710-1-4. Licensing.

(1) License Required.

No person or concern shall engage in the servicing of portable fire extinguishers without a license issued by the SFM, pursuant to these rules, expressly authorizing such concern to perform such acts.

(2) Application.

(a) Application for a license to engage in the business of, or perform the servicing of portable fire extinguishers, shall be made in writing to the SFM on forms provided by the SFM. A separate application for license shall be made for each separate place or business location of the applicant (branch office).

(b) The application for a license to engage in the business of, or perform the servicing of portable fire extinguishers, shall be accompanied with proof of public liability insurance. The public liability insurance shall be issued by a public liability insurance carrier showing coverage of at least $100,000 for each incident, and $300,000 in total coverage. The licensee shall notify the SFM within thirty days after the public liability insurance coverage required is no longer in effect for any reason.

(3) Signature of Application.

The application shall be signed by the applicant. If the application is made by a partnership, it shall be signed by all partners. If the application is made by a corporation or association other than a partnership, it shall be signed by a principal officer.

(4) Equipment Inspection.

The applicant or licensee shall allow the SFM, and any of his properly authorized deputies to enter, examine, and inspect any premise, building, room, establishment, or vehicle, used by the applicant in servicing portable fire extinguishers to determine compliance with the provisions of these rules. The inspection will be conducted during normal business hours, and the owner or manager will be given a minimum of 24 hour notice before the appointed inspection. The equipment inspection may be conducted on an annual basis, and consent to inspect will be obtained. The applicant, license holder or certified employee of the license holder, may be asked during the inspection by the SFM or any of his deputies, to demonstrate skills or knowledge used in servicing of portable fire extinguishers.

(5) Issuance.

Following receipt of the properly completed application, and compliance with the provision of the statute and these rules, the SFM shall issue a license.

(6) Original License and Inspection.

Original licenses shall be valid for one year from the date of application. Thereafter, each license shall be renewed annually and renewals shall be valid for one year from issuance. No original license shall be issued until the satisfactory completion of a materials, equipment and performance inspection by the SFM.

(7) Renewal License and Inspection.

Application for renewal shall be made as directed by the SFM. The failure to renew the license will cause the license to become invalid. No renewal license will be issued until the satisfactory completion of a materials, equipment and performance inspection by the SFM. Renewal dates for licensed concerns will be based upon the expiration date. Licenses are valid for a one year period of time.

(8) Change of Address.

Every licensee shall notify the SFM, in writing, within thirty (30) days, of any change of his address or location.

(9) Under Another Name.

No licensee shall conduct his licensed business under a name other than the name or names which appears on his license.

(10) Inspection.

The holder of any license shall submit such license for inspection upon request of the SFM, or any of his properly authorized deputies, or any local fire official.

(11) SFM Notification and Certification of Registration.

Every licensed concern shall, within thirty (30) days of employment, and within thirty (30) days of termination of any employee, report to the SFM in writing, the name, address, and certificate of registration number, of every person performing any act of servicing portable fire extinguishers for such licensed concern.

(12) Type.

(a) Every license shall be identified by type. The type of license issued shall be determined on the basis of the act or acts performed by the licensee or by any of the employees. Every licensed concern shall be staffed by qualified personnel, and shall be properly equipped to perform the act or acts for the type of license issued.

(b) Licenses shall authorize any one, or any combination of the following types of activities:

(i) Type 1 - Conducting of all activities, as per (2), (3), and (4) below, or

(ii) Type 2 - Conducting hydrostatic tests of fire extinguisher cylinders using the water jacket or ultrasonic test methods after receiving a Retesters Identification Number (RIN) issued by the United States Department of Transportation (USDOT), or

(iii) Type 3 - Conducting hydrostatic tests of fire extinguisher cylinders using the proof pressure test method after receiving a Retesters Identification Number (RIN) issued

by the United States Department of Transportation (USDOT), or

(iv) Type 4 - Servicing, inspecting, and maintaining all types of extinguishers, excluding hydrostatic testing.

(c) No licensed concern shall be prohibited from taking orders for the performance of any act or acts for which the concern has not been licensed to perform. Such orders shall be consigned to another licensed concern that is authorized to perform such act or acts.

(13) Examination.

Every person who performs any act or acts within the scope of the license shall pass an examination in accordance with the provisions of section 4 of these rules.

(14) Duplicate License.

A duplicate license may be issued by the SFM to replace any previously issued license, which has been lost or destroyed, upon the submission of a written statement from the licensee to the SFM. Such statement shall attest to the fact that the license has been lost or destroyed.

(15) Employer Responsibility.

Every concern shall be responsible for the acts of its employees insofar as such acts apply to the marketing, sale, distribution, and servicing of any portable fire extinguisher.

(16) Minimum Age.

No license shall be issued to any person as licensee who is under eighteen (18) years of age.

(17) Restrictive Use.

(a) No license shall constitute authorization for any licensee, or any of their employees, to enter upon, or into, any property or building other than by consent of the owner or manager.

(b) No license shall constitute authorization for any licensee, or any of their employees, to enforce any provision, or provisions, of this rule, or the International Fire Code.

(18) Non-Transferable.

No license issued pursuant to this section shall be transferred from one concern to another.

(19) Registration Number.

(a) Every license shall be identified by a number, delineated as E-(number). Such number may be transferred from one concern to another only when approved by the SFM.

(20) Minimum Materials and Equipment Required.

At each business location or vehicle of the applicant where servicing work is performed the following minimum material and equipment requirements shall be maintained:

(a) Type 4 license:

(i) Nitrogen tank.

(ii) Nitrogen regulator and hose assembly.

(iii) Minimum of twelve (12) recharge adapters.

(iv) Valve cleaning brush.

(v) Scoop.

(vi) Funnel for A:B:C.

(vii) Funnel for B:C.

(viii) A closed receptacle for dry chemical.

(ix) Fifty pound scale.

(x) A scale for cartridges.

(xi) 'O' Ring lubricant.

(xii) Tag hole Punch.

(xiii) Approved seals maximum 14 pound break strength.

(xiv) A copy of NFPA Standard 10 2010 Edition, statute, and these rules.

(xv) Minimum parts:

(A) A supply of O rings needed for standard service.

(B) A supply of valve stems for standard service.

(C) A supply of nozzles and hoses for standard extinguishers.

(D) Pressure gauges for extinguisher types: 100, 150, 175, 195, 240 lbs.

(E) Carry handles and replacement handles for extinguishers.

(F) Rivets or steel roll pins for handles and levers.

(G) Dry chemical cartridges as required by manufacture specifications, to include 4 lb., 10 lb., 20 lb. and 30 lb.

(H) Inspection light for cylinders.

(J) A variety of pull pins to secure handle.

(K) Carbon Dioxide continuity tester for hoses.

(L) Halon closed recovery system.

(b) Type 3 License:

(i) Approved testing pump with a current calibration certificate for the attached gauges.

(ii) Test cage or suitable safety barrier.

(iii) Approved hydro test labels.

(iv) Hydrostatic test adapters or approved equal.

(v) Heater which produces a heated air or dry air for drying cylinders, or other approved dryer not to exceed 150 degrees Far. (66 degrees C).

(c) Type 2 License:

Current registration number from the United States Department of Transportation (USDOT), verifying the concern as a qualified cylinder requalification facility under the provisions of the Code of Federal Regulations, 49 CFR, Section 173.34, shall be maintained for all concerns holding a type 1 or 2 license. A copy of the certification letter must be submitted to the SFM. All equipment required to perform the functions allowed as a qualified cylinder requalification facility, shall be maintained in good working order and available for inspection by the SFM.

(d) Type 1 License:

All of the equipment, provisions, and numbers as required in License types 2, 3, and 4 shall be required for a Type 1 License.

(21) Records.

Accurate records shall be maintained for five (5) years by the licensee of all service work performed. These records shall include the name and address of all servicing locations, and the date and name of the person performing the work. These records shall be made available to the SFM, or authorized deputies, upon request.

R710-1-5. Certificates of Registration.

(1) Required Certificates of Registration.

No person shall service any portable fire extinguisher without a certificate of registration issued by the SFM pursuant to these rules expressly authorizing such person to perform such acts. The provisions of this section apply to the state, universities, a county, city, district, public authority, and any other political subdivision or public corporation in this State.

(2) Exemptions.

The provisions of this section shall not apply to any person servicing any portable fire extinguisher owned by such person, when the portable fire extinguisher is not required by any statute, rule, or ordinance, to be provided or installed.

(3) Application.

Application for a certificate of registration to service portable fire extinguishers shall be made in writing to the SFM on forms provided by him. The application shall be signed by the applicant.

(4) Examination.

The SFM shall require all applicants for a certificate of registration to take and pass a written examination, which may be supplemented by practical tests, when deemed necessary, to determine the applicant's knowledge of servicing portable fire extinguishers. Picture identification of the applicant for a certificate of registration may be requested by the SFM or his deputies. Examinations will be given according to the following schedule and requirements:

(a) On the first and third Tuesdays of each month. When holidays conflict with these days, the day immediately following will be used. An appointment shall be made to take an examination at least 24 hours in advance of the examination date.

(b) Examinations may be given at various field locations, or on line, as deemed necessary by the SFM. Appointments for field examinations are required.

(c) All certification examinations given are open book examinations. The applicant is allowed to use the statute, the administrative rule, and the NFPA standard that applies to the certification examination. Any other materials to include cellular telephones, I-Pads, tablets, etc. are prohibited in the examination room unless specifically approved by the SFM.

(d) Completion of the certification examination will not be allowed if it appears to the test administrator that the applicant has not prepared to take the examination.

(e) Each certification examination taken has a time limit of two hours to completion. To successfully pass the written examination, the applicant must obtain a minimum grade of seventy percent (70%). Leaving the office or testing location before the completion of the examination voids the examination and will require the examination to be retaken by the applicant.

(f) If there are different levels of proficiency in the subject matter, the lower proficiency level will be fully completed before the next higher proficiency will be administered.

(5) Issuance.

Following receipt of the properly completed application, compliance with the provisions of these rules, and the successful completion of the required examination, the SFM shall issue a certificate of registration.

(6) Original and Renewal Valid Date.

Original certificates of registration shall be valid for one year from the date of application. Thereafter, each certificate of registration shall be renewed annually and renewals shall be valid for one year from issuance. The holder of an invalid certificate of registration shall not perform any work on portable fire extinguishers.

(7) Renewal Date.

Application for renewal shall be made as directed by the SFM. The failure to renew will cause the certificate of registration to become invalid. Renewal dates for certification of registration will be based upon the concern license renewal date and be valid for one year. Renewal certificate of registrations shall be prorated monthly, and monthly fees already paid in that time period shall be credited towards the renewal fee.

(8) Re-examination.

Every holder of a valid certificate of registration shall take a re-examination every five years, from date of original certificate, to comply with the provisions of Section 4.4 of these rules as follows:

(a) The re-examination to comply with the provisions of Section 4.4 of these rules shall consist of one open book examination, to be administered by the SFM at least 60 days before the renewal date.

(b) The re-examination will consist of questions that focus on changes in the last five years to NFPA 10, the statute, or the adopted administrative rules. The re-examination may also consist of questions that focus on practices of concern as noted by the Board or the SFM.

(c) The certificate holder is responsible to complete the re-examination in sufficient time to renew.

(d) The certificate holder is responsible to return to the SFM the correct renewal fees to complete that certificate renewal.

(9) Refusal to Renew.

The SFM may refuse to renew any certificate of registration in the same manner and for any reason that he is authorized, pursuant to Section 10, to deny an original certificate of registration. The applicant shall, upon such refusal, have the same rights as are granted by Section 10 of these rules to an applicant for an original certificate of registration which has been denied by the SFM.

(10) Inspection.

The holder of a certificate of registration shall submit such certificate for inspection, upon request of the SFM, any of his properly authorized deputies, or any local fire official.

(11) Type.

(a) Every certificate of registration shall indicate the type of act or acts to be performed and for which the applicant has qualified.

(b) No person holding a valid certificate of registration shall be authorized to perform any act unless he is a licensee or is employed by a licensed concern.

(12) Change of Address.

Any change in home address of any holder of a valid certificate of registration shall be reported in writing, by the registered person to the SFM within thirty (30) days of such change. Such change shall also be made on the reverse side of the certificate of registration by the holder.

(13) Duplicate.

A duplicate certificate of registration may be issued by the SFM to replace any previously issued certificate which has been lost or destroyed upon the submission of a written statement to the SFM from the certified person. Such statement shall attest to the certificate having been lost or destroyed.

(14) Minimum Age.

No certificate of registration shall be issued to any person who is under 18 years of age.

(15) Restrictive Use.

(a) A certificate of registration may be used for identification purposes only as long as such certificate remains valid and while the holder is employed by a licensed concern.

(b) Regardless of the acts authorized to be performed by a licensed concern, only those acts for which the applicant for a certificate of registration has qualified shall be permissible by such applicant.

(16) Right to Contest.

(a) Every person who takes an examination for a certificate of registration shall have the right to contest the validity of individual questions of such examination.

(b) Every contention as to the validity of individual questions of an examination shall be made in writing within 48 hours after taking said examination. Contentions shall state the reason for the objection.

(c) The decision as to the action to be taken on the submitted contention shall be by the SFM, and such decision shall be final.

(d) The decision made by the SFM, and the action taken, shall be reflected in all future examinations, but shall not affect the grades established in any past examination.

(17) Non-Transferable.

Certificates of Registration shall not be transferable. Individual certificates of registration shall be carried by the person to whom issued.

(18) New Employees.

New employees of a licensed concern may perform the various acts while under the direct supervision of persons holding a valid certificate of registration for a period not to exceed forty-five (45) days from the initial date of employment. By the end of such period, new employees shall have taken and passed the required examination.

(19) Certificate Identification.

Every certificate shall be identified by a number, delineated as EE-(number). Such number shall not be transferred from one person to another.

R710-1-6. Seal of Registration.

(1) Description.

The official seal of registration of the SFM shall consist of the following:

(a) The image of the State of Utah shall be in the center with an outer ring stating, "Utah State Fire Marshal".

(i) The top portion of the outer ring shall have the wording "Utah State".

(ii) The Bottom portion of the outer ring shall have the wording "Fire Marshal".

(b) Appending above the top portion and in a centered position, shall be a box provided for displaying the type of license.

(c) Appending below the bottom portion and in a centered position, shall be a box provided for the displaying of the license number assigned to the concern.

(2) Use of Seal.

No person or concern shall produce, reproduce, or use this seal in any manner or for any purpose except as herein provided.

(3) Permissive Use.

Licensed concerns shall use the Seal of Registration on every service tag conforming to section 10.

(4) Cease Use Order.

No person or concern shall continue the use of the Seal of Registration in any manner or for any purpose after receipt of a notice in writing from the SFM to that effect, or upon the suspension or revocation of the concern's license.

(5) Legibility.

Every reproduction of the Seal of Registration and every letter and number placed thereon, shall be of sufficient size to render such seal, letter, and number distinct and clearly legible.

R710-1-7. Service Tags.

(1) Size and Color.

Tags shall be not more than five and one-half inches in height, nor less than four and one-half inches in height, and not more than three inches in width, nor less than two and one-half inches in width.

(2) Attaching Tag.

One service tag shall be attached to each portable fire extinguisher in such a position as to be conveniently inspected.

(3) Tag Information.

(a) Service tags shall bear the following information:

(i) Provisions of Section 6.7.

(ii) Type of license.

(iii) Approved Seal of Registration of the SFM.

(iv) License registration "E" number.

(v) Certificate of registration "EE" number of individual who performed or supervised the service or services performed.

(vi) Signature of individual whose certificate of registration number appears on the tag.

(vii) Concern's name.

(viii) Concern's address.

(ix) Type of service performed.

(x) Type of extinguisher serviced.

(xi) Date service is performed.

(b) The above information shall appear on one side of the service tag. All other desired printing or information shall be placed on the reverse side of the tag.

(4) Legibility.

(a) The certificate of registration number required in Section 7.3(5), and the signature required in Section 7.3(6), shall be printed or written distinctly.

(b) All information pertaining to date, type of servicing, and type of extinguisher serviced shall be indicated on the card by perforations in the appropriate space provided. Each perforation shall clearly indicate the desired information.

(5) Format.

Subject to the use requirements of Section 6.4, the following format shall be used for all service tags:

EXAMPLE OF SERVICE TAG

Exception: Service tags may be printed or otherwise established for any number of years not in excess of five years.

ILLUSTRATION ON FILE IN STATE FIRE MARSHAL'S OFFICE

(6) New Tag.

A new service tag shall be attached to the extinguisher each time a service is performed.

(7) Tag Wording.

The following wording shall be placed at the top or reinforced ring end of every tag: "DO NOT REMOVE, BY ORDER OF THE STATE FIRE MARSHAL".

(8) Removal.

No person or persons shall remove a service tag, hydrostatic test tag or label, 6 year maintenance service tag or label, or verification of service collar, except when further service is performed. At that time the expired tag, label or collar shall be removed and a new tag, label or collar shall replace the expired one. No person or persons shall deface, modify, or alter any service tag, hydrostatic test tag or label, 6 year maintenance service tag or label, or verification of service collar that is required to be attached to any portable fire extinguisher.

(9) Restrictive Use.

(a) Portable fire extinguishers which do not conform with the minimum rules, shall be permanently removed from service, and shall not be tagged.

(b) Any extinguisher which fails a hydrostatic test shall be condemned, and so stamped or etched into the cylinder or shell.

(c) Extinguishers, other than one which has failed a hydrostatic test, may be provided with a tag stating the extinguisher is "Condemned" or "Rejected". Such tags shall be red in color, and shall be not less, in size, than that of an approved service tag.

(d) Service tags shall only be placed on portable fire extinguishers and wheeled units as allowed in these rules.

R710-1-8. Portable Fire Extinguisher Rated Classification Labels.

(1) Use of Label.

Any label bearing the rated classification and listing shall not be placed upon any extinguisher unless specifically authorized by the manufacturer. Any extinguisher, other than carbon dioxide, without this manufacturer's label shall not be serviced.

(2) Labels Prohibited.

Company labels or advertisement stickers other than those required herein shall not be affixed to fire extinguishers.

R710-1-9. Amendments and Additions.

(1) Restricted Service.

Any extinguisher requiring a hydrostatic test as required, shall not be serviced until such extinguisher has been subjected to, and passed the required hydrostatic test.

(2) Service.

At the time of installation, and at each annual inspection, all servicing shall be done in accordance with the manufacturer's instructions, adopted statutes, and these rules.

Extinguishers shall be placed in an operable condition, free from defects which may cause malfunctions. Nozzles and hoses shall be free of obstructions or substances which may cause an obstruction.

(3) Seals or Tamper Indicator.

Seals or tamper indicators shall be constructed of approved plastic or non-ferrous wire which can be easily broken, and so arranged that removal cannot be accomplished without breakage. Such seals or tamper indicators shall be used to retain the locking pin in a locked position. Seals or tamper indicators shall be removed annually to ensure that the pull pin is free.

(4) New Extinguishers

A new extinguisher that has the date of manufacture printed on the label by the manufacturer, or date of manufacture stamped on the extinguisher by the manufacturer, does not require a service tag attached to the extinguisher until one year after the date of manufacture.

(5) Those existing sodium or potassium bicarbonate dry-chemical portable fire extinguishers, having a minimum rating of 40-B, and specifically placed for protection of commercial food heat-processing equipment, may remain in the kitchen to be used for other applications, except the protection of commercial food heat-processing equipment using vegetable or animal oils or fat cooking media.

R710-1-10. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as authorized by UCA, Sections 63G-4-202 and 63G-4-203.

(2) The issuance, renewal, or continued validity of a license or certificate of registration may be denied, suspended, or revoked, if the SFM finds that the applicant, person employed for, or the person having authority and management of a concern servicing portable fire extinguishers commits any of the following violations:

(a) The person or applicant is not the real person in interest.

(b) The person or applicant provides material misrepresentation or false statement on the application.

(c) The person or applicant refuses to allow inspection by the SFM, or his duly authorized deputies.

(d) The person or applicant for a license or certificate of registration does not have the proper facilities and equipment to conduct the operations for which application is made.

(e) The person or applicant for a certificate of registration does not possess the qualifications of skill or competence to conduct the operations for which application is made, as evidenced by failure to pass the examination and/or practical tests pursuant to Section 4.15 of these rules.

(f) The person or applicant fails to place a verification of service collar when required on the valve assembly of any fire extinguisher when the following occurs:

(i) re-charge;

(ii) required maintenance.

(g) The person or applicant refuses to take the examination required by Section 5.3 and Section 4.14 of these rules.

(h) The person or applicant has been convicted of one or more federal, state or local laws.

(j) The person or applicant has been convicted of a violation of the adopted rules or been found by a Board administrative proceeding to have violated the adopted rules.

(k) Any offense or finding of unlawful conduct, or there is or may be, a threat to the public's health or safety if the applicant or person were granted a license or certificate of registration.

(l) There are other factors upon which a reasonable and prudent person would rely to determine the suitability of the applicant or person to safely and competently engage in the practice of servicing portable fire extinguishers.

(3) A person whose license or certificate of registration is suspended or revoked by the SFM shall have an opportunity for a hearing before the Board if requested by that person within 20 days after receiving notice.

(4) All adjudicative proceedings, other than criminal prosecution, taken by the SFM to enforce the Utah Fire Prevention and Safety Act, and these rules, shall commence in accordance with UCA, Section 63G-4-201.

(5) The Board shall act as the hearing authority, and shall convene after timely notice to all parties involved. The Board shall be the final authority on the suspension or revocation of a license or certificate of registration.

(6) The Board shall direct the SFM to issue a signed order to the parties involved giving the decision of the Board within a reasonable time of the hearing pursuant to UCA, Section 63G-4-203.

(7) Reconsideration of the Board decision may be requested in writing within 20 days of the date of the decision pursuant to UCA, Section 63G-4-302.

(8) After a period of three years from the date of revocation, the Board shall review the submitted written application of a person whose license or certificate of registration has been revoked. After timely notice to all parties involved, the Board shall convene to review the revoked persons application, and that person shall be allowed to present themselves and their case before the Board. After the hearing, the Board shall direct the SFM to allow the person to complete the licensing or certification process or shall direct that the revocation be continued.

(9) Judicial review of all final Board actions resulting from informal adjudicative proceedings shall be conducted pursuant to UCA, Section 63G-4-402.

R710-1-11. Fees.

(1) Payment of Fees.

The required fee shall accompany the application for license or certificate of registration. License or certificate of registration fees will be refunded if the application is denied.

(2) Late Renewal Fees.

(a) Any license or certificate of registration not renewed before the license or certificate of registration expiration date will be subject to an additional fee equal to 10% of the fee.

(b) When a certificate of registration has expired for more than one year, an application shall be made for an original certificate as if the application was being made for the first time. Examinations will be re-taken with initial examination fees.

KEY: fire prevention, extinguishers
August 15, 2016 **53-7-204**
Notice of Continuation May 15, 2012

R710. Public Safety, Fire Marshal.
R710-3. Assisted Living Facilities.
R710-3-1. Purpose.

The purpose of this rule is to establish the minimum standards for prevention of fire and for the protection of life and property against fire and panic in assisted living facilities.

R710-3-2. Authority.

This rule is authorized by Section 53- 7- 204.

R710-3-3. Definitions.

(1) Ambulatory means a person who is capable of achieving mobility sufficient to exit without the physical assistance of another person. An equivalency to Ambulatory may be approved under the conditions stated in Subsections R710-3-4(2)(h), R710-3-4(3)(f), or R710-3-4(4)(j).

(2) Assisted Living Facility means:

(a) a Type 1 Assisted Living Facility, which is a residential facility subject to licensure by the Utah Department of Health, that provides a protected living arrangement for ambulatory, non-restrained persons who are capable of achieving mobility sufficient to exit the facility without the physical assistance of another person;

(b) a Type 2 Assisted Living Facility, which is a residential facility subject to licensure by the Utah Department of Health, that provides an array of coordinated supportive personal and health care services to residents who meet the definition of semi-independent; or

(c) a Residential Treatment/Support Assisted Living Facility, which creates a group living environment for four or more residents contracted by the Division of Services to People with Disabilities and subject to licensure by the Utah Department of Human Services, and provides a protected living arrangement for ambulatory, non-restrained persons who are capable of achieving mobility sufficient to exit the facility without the physical assistance of another person.

(d) Assisted Living Facilities shall be classified by size as follows:

(i) Type 1, 2, and Residential Treatment/Support Limited Capacity Facility means an assisted living facility accommodating five or less residents, excluding staff.

(ii) Type 1, 2, and Residential Treatment/Support Small Facility means an assisted living facility accommodating at least six and not more than 16 residents, excluding staff.

(iii) Type 1, 2, and Residential Treatment/Support Large Facility means an assisted living facility accommodating more than sixteen residents, excluding staff.

(3) Authority Having Jurisdiction (AHJ) means the State Fire Marshal, his duly authorized deputies, or the local fire enforcement authority.

(4) Board means Utah Fire Prevention Board.

(5) Compromised Ambulatory Capacity means physical or mental incapacitations that inhibit a persons ability to exit a facility unassisted.

(6) IBC means International Building Code.

(7) ICC means International Code Council, Inc.

(8) IFC means International Fire Code.

(9) Licensing Authority means the Utah Department of Health or the Utah Department of Human Services.

(10) Semi-independent means a person who is:

(a) physically disabled but able to direct his or her own care; or

(b) cognitively impaired or physically disabled but able to evacuate from the facility with the physical assistance of one person.

(11) SFM means State Fire Marshal.

R710-3-4. Amendments and Additions.

(1) General Requirements

(a) All facilities shall be inspected annually and obtain a certificate of fire clearance signed by the AHJ.

(b) All facility administrators shall develop emergency plans and preparedness as required in IFC, Chapter 4.

(c) An approved automatic fire detection system shall be installed in accordance with the provisions of this code and NFPA 72. Devices, combinations of devices, appliances, and equipment shall be approved. The automatic fire detectors shall be smoke detectors, except an approved alternative type of detector shall be installed in spaces such as boiler rooms where, during normal operation, products of combustion are present in sufficient quantity to actuate a smoke detector.

(2) Type I Assisted Living Facilities

(a) Type I Limited Capacity Assisted Living Facilities shall be constructed in accordance with IBC, Residential Group R-3, and maintained in accordance with the IBC and IFC.

(b) Type I Limited Capacity Assisted Living Facility required exits shall not be secured with dead bolts, chains, or hasps. Deadbolts that are interconnected with the latch, and provide simultaneous retraction of both the deadbolt and the latch, by the turning of the latch, is permitted.

(c) Residents in Type I Limited Capacity Assisted Living Facilities shall be housed on the first story only, unless an approved outside exit leading to the ground level is provided from any upper or lower level. Split entry/split level type homes in which stairs to the lower and upper level are equal or nearly equal, may have residents housed on both levels when approved by the AHJ.

(d) In Type I Limited Capacity Assisted Living Facilities, resident rooms on the ground level, shall have emergency escape or rescue opening as required in IFC, Chapter 10, Section 1030.

(e) In Type I Limited Capacity Assisted Living Facilities an approved independent smoke detector shall be installed and maintained by location as required in IFC, Chapter 9, Section 907.2.11.2.

(f) Type I Small Assisted Living Facilities shall be constructed in accordance with IBC, Residential Group R-4, and maintained in accordance with the IBC and IFC.

(g) Type I Small Assisted Living Facility required exits shall not be secured with dead bolts, chains, or hasps. Deadbolts that are interconnected with the latch, and provide simultaneous retraction of both the deadbolt and the latch, by the turning of the latch, is permitted.

(h) In a Type I Assisted Living Facility, non-ambulatory persons are permitted after receiving approval for a variance from the Utah Department of Health as allowed in Utah Administrative Code, R432-2-18.

(3) Type II Assisted Living Facilities

(a) Type II Limited Capacity Assisted Living Facilities shall be constructed in accordance with IBC, Residential Group R-4, and maintained in accordance with the IBC and IFC.

(b) Type II Limited Capacity Assisted Living Facilities shall have an approved automatic fire extinguishing system installed in compliance with the IBC and IFC, or provide a staff to a resident ratio of one to one on a 24 hour basis.

(c) Type II Small Assisted Living Facilities shall be constructed in accordance with IBC, Institutional Group I-1, and maintained in accordance with the IBC and IFC.

(d) Type II Small Assisted Living Facilities shall have a minimum corridor width of six feet.

(i) Type II Small Assisted Living Facilities licensed before November 16, 2004, shall have a minimum corridor width of six feet or a path of egress that is acceptable to the AHJ.

(e) Type II Large Assisted Living Facilities shall be constructed in accordance with IBC, Institutional Group I-2,

and maintained in accordance with the IBC and IFC.

(i) An automatic fire sprinkler system shall be provided throughout buildings classified as Group I. Listed quick response or residential sprinkler heads shall be installed in patient or resident sleeping areas.

(f) In a Type II Assisted Living Facility, non-ambulatory persons are permitted after receiving approval for a variance from the Utah Department of Health as allowed in Utah Administrative Code, R432-2-18.

(4) Residential Treatment/Support Assisted Living Facilities

(a) Residential Treatment/Support Limited Capacity Assisted Living Facility shall be constructed in accordance with IBC, Residential Group R-3, and maintained in accordance with the IBC and IFC.

(b) Residential Treatment/Support Limited Capacity Assisted Living Facility required exits shall not be secured with dead bolts, chains, or hasps. Deadbolts that are interconnected with the latch, and provide simultaneous retraction of both the deadbolt and the latch, by the turning of the latch, is permitted.

(c) Residents in Residential Treatment/Support Limited Capacity Assisted Living Facilities shall be housed on the first story only, unless an approved outside exit leading to the ground level is provided from any upper or lower level. Split entry/split level type homes in which stairs to the lower and upper level are equal or nearly equal, may have residents housed on both levels when approved by the AHJ.

(d) In Residential Treatment/Support Limited Capacity Assisted Living Facilities, resident rooms on the ground level, shall have emergency escape or rescue windows as required in IFC, Chapter 10, Section 1029.

(e) In Residential Treatment/Support Limited Capacity Assisted Living Facilities an approved independent smoke detector shall be installed and maintained by location as required in IFC, Chapter 9, Section 907.2.11.2.

(f) Residential Treatment/Support Small Assisted Living Facilities shall be constructed in accordance with IBC, Residential Group R-4, and maintained in accordance with the IBC and IFC.

(i) IFC, Chapter 9, Section 903.2.8 is amended to add the following: Exception: Residential Treatment/Support Assisted Living Facility classified as Group R-4, not more than 4500 gross square feet, and not containing more than 16 ambulatory, non-restrained residents, is allowed provided the building is equipped throughout with an approved fire alarm system that is interconnected and receives its primary power from the building wiring.

(g) Residential Treatment/Support Small Assisted Living Facility required exits shall not be secured with dead bolts, chains, or hasps. Deadbolts that are interconnected with the latch, and provide simultaneous retraction of both the deadbolt and the latch, by the turning of the latch, is permitted.

(h) Residential Treatment/Support Large Assisted Living Facilities shall be constructed in accordance with IBC, Institutional Group I-1, and maintained in accordance with the IBC and IFC.

(i) An automatic fire sprinkler system shall be provided throughout buildings classified as Group I. Listed quick response or residential sprinkler heads shall be installed in patient or resident sleeping areas.

(j) In a Residential Treatment/Support Assisted Living Facility, residents with compromised ambulatory capacity that can demonstrate the ability to exit the facility unassisted in two minutes or less, and meet the requirements listed in Utah Administrative Code, R501-2-11, Emergency Plans, may receive approval from the Office of Licensing, Utah Department of Human Services, to remain in the facility as a resident.

(i) In those facilities where the Office of Licensing, Department of Human Services, determines that the resident cannot exit the facility unassisted in two minutes or less, the facility management shall complete one of the following:

(A) make accommodations, changes or enact an emergency plan that guarantees the exiting of the resident in two minutes or less;

(B) provide a staff to resident ratio of one to one on a 24 hour basis;

(C) install an approved automatic fire sprinkler system; or

(D) move the resident from the facility.

R710-3-5. Repeal of Conflicting Board Actions.

All former Board actions, or parts thereof, conflicting or inconsistent with the provisions of this Board action or of the codes hereby adopted, are hereby repealed.

R710-3-6. Validity.

The Board hereby declares that should any section, paragraph, sentence, or word of this Board action, or the codes adopted, be declared invalid, it is the intent of the Board that it would have passed all other portions of this action, independent of the elimination of any portions as may be declared invalid.

R710-3-7. Conflicts.

In the event where separate requirements pertain to the same situation in the adopted codes, the more restrictive requirement shall govern, as determined by the AHJ.

R710-3-8. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as set forth herein and as authorized by UCA, Sections 63G-4-202 and 63G-4-203.

(2) A person may request a hearing on a decision made by the AHJ by filing an appeal to the Board within 20 days after receiving final decision from the AHJ.

(3) All adjudicative proceedings, other than criminal prosecution, taken by the AHJ to enforce the Utah Fire Prevention and Safety Act, and these rules, shall commence in accordance with UCA, Section 63G-4-201.

(4) The Board shall act as the hearing authority, and shall convene as an appeals board after timely notice to all parties involved.

(5) The Board shall direct the SFM to issue a signed order to the parties involved giving the decision of the Board within a reasonable time of the hearing pursuant to UCA, Section 63G-4-203.

(6) Reconsideration of the Boards decision may be requested in writing within 20 days of the date of the decision pursuant to UCA, Section 63G-4-302.

(7) Judicial review of all final Board actions resulting from informal adjudicative proceedings is available pursuant to UCA, Section 63G-4-402.

KEY: assisted living facilities
August 15, 2016 **53-7-204**
Notice of Continuation May 23, 2012

R710. Public Safety, Fire Marshal.
R710-4. Buildings Under the Jurisdiction of the State Fire Prevention Board.
R710-4-1. Purpose.

The Purpose of this rule is to establish minimum rules for the prevention of fire and for the protection of life and property against fire and panic in any publicly owned building, including all public and private schools, colleges, and university buildings, and in any building or structure used or intended for use, as an asylum, hospital, mental hospital, sanitarium, home for the aged, assisted living facility, children's home or day care center, or any similar institutional type occupancy of any capacity; and in any place of assemblage where 50 or more persons may gather together in a building, structure, tent, or room, for the purpose of amusement, entertainment, instruction, or education.

R710-4-2. Authority.

This rule is authorized by Section 53-7- 204.

R710-4-3. Adoption.

The following chapters from NFPA, Standard 101 are the only chapters adopted: Chapter 18 - New Health Care Occupancies; Chapter 19 - Existing Health Care Occupancies; Chapter 20 - New Ambulatory Health Care Occupancies; Chapter 21 - Existing Ambulatory Health Care Occupancies; Chapter 22 - New Detention and Correctional Occupancies; Chapter 23 - Existing Detention and Correctional Occupancies; and other sections referenced within and pertaining to these chapters only. Wherever there is a section, figure or table in NFPA 101 that references "NFPA 5000 - Building Construction and Safety Code", that reference shall be replaced with the similar reference in the state adopted building code.

R710-4-4. Definitions.

(1) "Authority Having Jurisdiction (AHJ)" means the State Fire Marshal, his authorized deputies, or the local fire enforcement authority.

(2) "Board" means Utah Fire Prevention Board.

(3) "Bureau of Fire Prevention or Fire Prevention Bureau" means the AHJ.

(4) "Fire Chief or Chief of the Department" means the AHJ.

(5) "Fire Department" means the AHJ.

(6) "Fire Marshal" means the AHJ.

(7) "Fire Officer" means the State Fire Marshal, the state fire marshal's deputies, the fire chief or fire marshal of any county, city, or town fire department, the fire officer of any fire district or special service district organized for fire protection purposes is the AHJ.

(8) "IBC" means International Building Code.

(9) "ICC" means International Code Council, Inc.

(10) "IFC" means International Fire Code.

(11) "IFGC" means International Fuel Gas Code.

(12) "IMC" means International Mechanical Code.

(13) "IPC" means International Plumbing Code.

(14) "LSC" means Life Safety Code.

(15) "NEC" means National Electric Code.

(16) "NFPA" means National Fire Protection Association.

(17) "SFM" means State Fire Marshal.

R710-4-5. Amendments and Additions.

(1) Water Supply Analysis

(a) For proposed construction in both sprinklered and nonsprinklered occupancies, the architect or engineer shall provide a water supply analysis as required in NFPA, Standard 13, Chapter 22.

(b) The architect or engineer shall provide the water supply analysis during the preliminary design phase of the proposed construction. The AHJ shall not approve the plan review without the water supply analysis being provided or previously submitted water supply information within the last 12 months that is approved by the AHJ.

(c) The water analysis shall be representative of the supply that may be available at the time of a fire as required in NFPA, Standard 13, 23.2.1.1 and A23.2.1.1.

(2) Fire Alarm Systems

(a) Required Installations

(i) All state-owned buildings, college and university buildings, other than institutional, with an occupant load of 300 or more, all schools with an occupant load of 50 or more, shall have an approved fire alarm system with the following features:

(A) Automatic detection devices that detect smoke shall be installed throughout all corridors and spaces open to the corridor at the maximum prescribed spacing of thirty feet on center and no more than fifteen feet from the walls or smoke detectors shall be installed as required in NFPA, Standard 72, Section 17.7.

(B) Where structures are not protected or partially protected with an automatic fire sprinkler system, approved automatic detectors shall be installed in accordance with the complete coverage requirements of NFPA, Standard 72.

(C) Manual fire alarm boxes shall be provided as required. In public and private elementary and secondary schools, manual fire alarm boxes shall be provided in the boiler room, kitchen, and main administrative office of each building, and any other areas as determined by the AHJ.

(b) Main Panel

(i) An approved key plan drawing and operating instructions shall be posted at the main fire alarm panel which displays the location of all alarm zones and if applicable, device addresses.

(ii) The main panel shall be located in a normally attended area such as the main office or lobby. Location of the Main Panel other than as stated above, shall require the review and authorization of the SFM. Where location as required above is not possible, an electronically supervised remote annunciator from the main panel shall be located in a supervised area of the building. The remote annunciator shall visually indicate system power status, alarms for each zone, and give both a visual and audible indication of trouble conditions in the system. All indicators on both the main panel and remote annunciator shall be adequately labeled.

(c) System Wiring Class

(i) Fire alarm system wiring shall be designated and installed as follows:

(A) The initiating device circuits shall be designated and installed Class A as defined in NFPA, Standard 72.

(B) The notification appliance circuits shall be designated and installed Class A as defined in NFPA, Standard 72.

(C) Signaling line circuits shall be designated and installed Class A loop as defined in NFPA, Standard 72.

(d) Fan Shut Down

(A) Fan shut down shall be as required in IMC, Chapter 6, Section 606.

(B) Duct detectors required by the IMC, shall be interconnected, and compatible with the fire alarm system.

(3) Time Out and Seclusion Rooms

(a) Time Out and Seclusion Rooms are allowed in occupancies protected by an automatic fire alarm system.

(b) A vision panel shall be provided in the room door for observation purposes.

(c) Time Out and Seclusion Room doors may not be fitted with a lock unless it is a self-releasing latch that releases

automatically if not physically held in the locked position by an individual on the outside of the door.

(d) Time Out and Seclusion Rooms shall be located where a responsible adult can maintain visual monitoring of the person and room.

R710-4-6. Repeal of Conflicting Board Actions.

All former Board actions, or parts thereof, conflicting or inconsistent with the provisions of this Board action or of the codes hereby adopted, are hereby repealed.

R710-4-7. Validity.

The Board hereby declares that should any section, paragraph, sentence, or word of this Board action, or of the codes hereby adopted, be declared, for any reason, to be invalid, it is the intent of the Board that it would have passed all other portions of this Board action, independent of the elimination here from of any such portion as may be declared invalid.

R710-4-8. Conflicts.

In the event where separate requirements pertain to the same situation in the same code, or between different codes as adopted, the more restrictive requirement shall govern, as determined by the AHJ, or his authorized representative.

R710-4-9. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as set forth herein and as authorized by UCA, Sections 63G-4-202 and 63G-4-203.

(2) A person may request a hearing on a decision made by the AHJ, by filing an appeal to the Board within 20 days after receiving final decision from the AHJ.

(3) All adjudicative proceedings, other than criminal prosecution, taken by the AHJ to enforce the Utah Fire Prevention and Safety Act, and these rules, shall commence in accordance with UCA, Section 63G-4-201.

(4) The Board shall act as the hearing authority, and shall convene as an appeals board after timely notice to all parties involved.

(5) The Board shall direct the SFM to issue a signed order to the parties involved giving the decision of the Board within a reasonable time of the hearing pursuant to UCA, Section 63G-4-203.

(6) Reconsideration of the Board's decision may be requested in writing within 20 days of the date of the decision pursuant to UCA, Section 63G-4-302.

(7) Judicial review of all final Board actions resulting from informal adjudicative proceedings is available pursuant to UCA, Section 63G-4-402.

KEY: fire prevention, public buildings
August 15, 2016 **53-7-204**
Notice of Continuation May 24, 2012

R710. Public Safety, Fire Marshal.
R710-5. Automatic Fire Sprinkler System Inspecting and Testing.
R710-5-1. Purpose.

The purpose of this rule is to establish the minimum rules to provide regulation to those who inspect and test Automatic Fire Sprinkler Systems.

R710-5-2. Authority.

This rule is authorized by Section 53-7-204.

R710-5-3. Definitions.

(1) "Annual" means a period of one year or 365 calendar days.

(2) "Authority Having Jurisdiction (AHJ)" means the State Fire Marshal, his duly authorized deputies, or the local fire enforcement authority.

(3) "Board" means Utah Fire Prevention Board.

(4) "Certificates of Registration" means a written document issued by the SFM to any person for the purpose of granting permission to such person to perform any act or acts for which authorization is required.

(5) "NFPA" means National Fire Protection Association.

(6) "NICET" means National Institute for Certification in Engineering Technologies.

(7) "SFM" means State Fire Marshal or authorized deputy.

R710-5-4. Certificates of Registration.

(1) No person shall engage in the inspecting and testing of automatic fire sprinkler systems without first receiving a certificate of registration issued by the SFM as required in Section 53-7-225.5.

(2) The following groups are exempted from the requirements of this part:

(a) the AHJ that is performing the initial installation acceptance testing of the automatic fire sprinkler system or ongoing inspections to verify compliance with the adopted NFPA standards and these rules; or

(b) the building owner or designee that performs additional periodic inspections beyond the annual inspection required in Section R710-5-7(2), to satisfy requirements set by company policy, insurance, or risk management.

(3) Application for a certificate of registration to inspect and test automatic fire sprinkler systems shall be made in writing to the SFM on forms provided the SFM and signed by the applicant.

(a) The SFM or his deputies may request picture identification of the applicant for a certificate of registration.

(b) The applicant shall indicate on the application which of the four technician levels the applicant will apply for:

(i) Technician I;

(ii) Technician II

(iii) Technician III; or

(iv) Master Technician.

(c) The application for a certificate of registration shall be accompanied with proof of public liability insurance from the certificate holder or employing concern.

(i) A public liability insurance carrier showing coverage of at least $100,000 for each incident, and $300,000 in total coverage shall issue the public liability insurance.

(ii) The certificate of registration holder shall notify the SFM within 30 days after the public liability insurance coverage required is no longer in effect for any reason.

(4) The SFM shall require all applicants for a certificate of registration as a technician to complete the following:

(a) Technician I shall:

(i) pass a written examination on wet pipe sprinkler systems, antifreeze sprinkler systems, and standpipes; and

(ii) complete the manipulative skills task book;

(b) Technician II shall:

(i) pass all the requirements listed for Technician I;

(ii) pass a written examination on dry pipe sprinkler systems, deluge sprinkler systems, preaction sprinkler systems, combined dry pipe-preaction systems, fire pumps, and water storage tanks; and

(iii) complete the manipulative skills task book;

(c) Technician III shall:

(i) pass all the requirements listed for Technician I and II;

(ii) pass a written examination on water spray fixed systems, foam-water sprinkler systems, and foam-water spray systems; and

(iii) complete the manipulative skills task book; and

(d) Master Technician shall:

(i) have successfully completed and be certified as NICET III in Inspection and Testing of Water-based Systems; and

(ii) complete the manipulative skills task book.

(5) Examinations will be given according to the following requirements:

(a) all certification examinations given are open book examinations, the applicant is allowed to use the statute, the administrative rule, and the NFPA standard that applies to the certification examination. Any other materials to include cellular telephones are prohibited in the examination room;

(b) completion of the certification examination will not be allowed if it appears to the test administrator that the applicant has not prepared to take the examination;

(c) each certification examination taken has a time limit of two hours to completion;

(d) to successfully pass the written examination, the applicant must obtain a minimum grade of 70%;

(e) leaving the office or testing location before the completion of the examination voids the examination and will require the examination to be retaken by the applicant;

(f) if there are different levels of proficiency in the subject matter, the lower proficiency level will be fully completed before the next higher proficiency will be administered; and

(g) to successfully complete the manipulative skills task book, all required skill tasks shall be signed as completed by a person duly qualified or certified in that skill.

(6) As required in Subsection R710-5-4(4)(d), those applicants that have successfully completed the requirements of NICET III, in Inspection and Testing of Water-based Systems, and that corresponds to the work to be performed by the applicant, shall have the requirement for initial written examination waived, after appropriate documentation is provided to the SFM by the applicant.

(7) Following receipt of the properly completed application and successful completion of required testing, the SFM shall issue a certificate of registration.

(8) Original certificates of registration shall be valid for one year from the date of application. Thereafter, each certificate of registration shall be renewed annually and renewals shall be valid for one year from issuance.

(9) Application for renewal shall be made as directed by the SFM.

(10) Every holder of a valid certificate of registration shall take a re-examination every three years, from date of original certificate, to comply with the provisions of Section R710-5-4 as follows:

(a) the re-examination to comply with the provisions of Section 3.3 of these rules shall consist of an open book examination for each level of certification, to be mailed to the certificate holder at least 60 days before the renewal date;

(b) the re-examination will consist of questions that

focus on changes in the last three years to the adopted NFPA standards, the statute, and the adopted administrative rules. The re-examination may also consist of questions that focus on practices of concern as noted by the board or the SFM;

(c) the certificate holder is responsible to complete the re-examination and return it to the SFM in sufficient time to renew; and

(d) the certificate holder is responsible to return to the SFM the correct renewal fees to complete that certificate renewal.

(11) The SFM may refuse to renew any certificate of registration pursuant to R710-5-8(2). The applicant shall, upon such refusal, have the same rights as are granted by Section R710-5-8.

(12) The holder of a certificate of registration shall submit such certificate for inspection, upon request of the AHJ.

(13) Every certificate of registration shall indicate the type of act or acts to be performed and for which the applicant has qualified as follows:

(a) Technician I: A person who is engaged in the inspection and testing of wet pipe sprinkler systems, antifreeze sprinkler systems, and standpipes;

(b) Technician II: A person who is engaged in the inspection and testing of dry pipe sprinkler systems, deluge sprinkler systems, preaction sprinkler systems, combined dry pipe-preaction systems, fire pumps and water storage tanks;

(c) Technician III: A person who is engaged in the inspection and testing of foam-water sprinkler systems, foam-water spray systems, and water spray fixed systems; and

(d) Master Technician: A person who has obtained NICET III certification in Inspection and Testing of Water-based Systems.

(14) Any change in home address of any holder of a valid certificate of registration shall be reported in writing, by the registered person to the SFM within 30 days of such change.

(15) A duplicate certificate of registration may be issued by the SFM to replace any previously issued certificate, which has been lost or destroyed.

(16) No certificate of registration shall be issued to any person who is under 18 years of age.

(17) Restrictive Use.

(a) A certificate of registration may be used for identification purposes only as long as such certificate remains valid.

(b) Regardless of the acts authorized to be performed by a licensed concern, only those acts for which the applicant for a certificate of registration has qualified shall be permissible by such applicant.

(18) Right to Contest.

(a) Every person who takes an examination for a certificate of registration shall have the right to contest the validity of individual questions of such examination.

(b) Every contention as to the validity of individual questions of an examination shall be made within 48 hours after taking said examination.

(c) The decision as to the action to be taken on the submitted contention shall be made by the SFM, and such decision shall be final.

(d) The decision made by the SFM, and the action taken, shall be reflected in all future examinations, but shall not affect the grades established in any past examination.

(19) Certificates of Registration shall not be transferable. The person to whom issued shall carry individual certificates of registration.

(20) Every certificate shall be identified by a number, delineated as AFS-(number). Such number shall not be transferred from one person to another.

(21) New or existing employees desiring to attain a Certificate of Registration may perform the various acts required while under the constant direct supervision of a person holding a valid certificate of registration for a period not to exceed 60 days from the initial date of employment or beginning service in the field.

R710-5-5. Service Tags.

(1) Size and Color.

(a) Tags shall be not more than five and one-half inches in height, nor less than four and one-half inches in height, and not more than three inches in width, nor less than two and one-half inches in width.

(b) Tags may be produced in any color except red or a variation of red.

(c) A red tag shall be used to indicate the system fails to ensure a reasonable degree of protection for life and property from fire through inspecting and testing of automatic fire sprinkler systems as required in NFPA, Standard 25, and the requirements of these rules.

(i) After placing the red tag on the system, the certified person shall notify the AHJ and provide the AHJ with a written copy of the noted deficiencies.

(2) The service tag shall be attached at the sprinkler riser for each system inspected or at other locations as needed to show compliance. The service tag shall be attached to the riser in such a position as to be conveniently inspected by the AHJ.

(3) Service tags shall bear the following information:

(a) provisions of Section 4.7;

(b) approved Seal of Registration of the SFM;

(c) certificate of registration "AFS" number of individual who performed or supervised the service or services performed;

(d) signature of individual whose certificate of registration number appears on the tag;

(e) concern's name;

(f) concern's address;

(g) type of service performed;

(h) type of system serviced; and

(i) date service is performed.

(4) The above information shall appear on one side of the service tag. All other desired printing or information shall be placed on the reverse side of the tag.

(5) Legibility.

(a) The certificate of registration number required in Section R710-5-5(3)(c), and the signature required in Section R710-5-5(3)(d), shall be printed or written distinctly.

(b) All information pertaining to date and type of service shall be indicated on the card by perforations in the appropriate space provided. Each perforation shall clearly indicate the desired information.

(6) A sample service tag is on file in the State Fire Marshal's Office for review.

(7) A new service tag shall be attached to a system each time a service is performed.

(8) The following wording shall be placed at the top or reinforced ring end of every tag: "DO NOT REMOVE, BY ORDER OF THE STATE FIRE MARSHAL".

(9) Removal.

(a) No person or persons shall remove a service tag except when further service is performed.

(b) No person shall deface, modify, or alter any service tag that is required to be attached to the system.

(c) A red tag can only be removed by written authority from the AHJ.

(10) Service tags may be printed for any number of years not to exceed eight years.

R710-5-6. Seal of Registration.

(1) The official seal of registration of the SFM shall consist of the following:

(a) the image of the State of Utah shall be in the center with an outer ring stating, "Utah State Fire Marshal";

(i) the top portion of the outer ring shall have the wording "Utah State";

(ii) the bottom portion of the outer ring shall have the wording "Fire Marshal"; and

(b) appending below the bottom portion and in a centered position, shall be a box provided for the displaying of the certification number assigned to the person.

(2) No person shall produce, reproduce, or use this seal in any manner or for any purpose except as herein provided.

(3) Certificate holders or concerns shall use the Seal of Registration on every service tag.

(4) No person or concern shall continue the use of the Seal of Registration in any manner or for any purpose after receipt of a notice in writing from the SFM to that effect, or upon the suspension or revocation of the certificate of registration.

(5) Every reproduction of the Seal of Registration and every letter and number placed thereon, shall be of sufficient size to render such seal, letter, and number distinct and clearly legible.

R710-5-7. Amendments and Additions.

(1) At the time of service, all servicing shall be done in accordance with the adopted NFPA standard, adopted statutes, and these rules.

(2) NFPA 25, Chapter 5, Section 5.1, Table 5.1 is amended as follows: On line 16 of the "Inspection" section, the "Obstruction Reference" is changed from 14.2.2 to 14.2.1.

(3) NFPA 25, Chapter 5, Section 5.1, Table 5.1 is amended as follows: On line one of the "Investigation" section, the "Obstruction Reference" is changed from 14.2.1 to 14.2.2.

(4) Frequency and Labels.

(a) Automatic fire sprinkler systems, standpipes, and fire pumps shall be inspected annually by a person holding a certificate of registration as required in Section 3.1 of these rules.

(b) Automatic fire sprinkler systems that pass the three-year and five-year inspection requirements as required in NFPA 25, Tables 5.1 and 13.1, shall have a label affixed to the riser indicating the specific inspection or inspections that was completed, the month and year those inspections was performed, the person who performed the inspection, and the person performing the inspections certificate of registration number.

(c) The label shall be affixed to the riser using a heatless process, shall be 3 in. X 5 in., shall have the official seal of registration of the SFM affixed to the label, shall be constructed of durable material, and shall be the self-destructive type when removal is attempted.

(5) Accepted Inspection Forms.

(a) Inspection forms listed in NFPA 25, Annex B, Section B.2, shall be used as the accepted inspection forms.

(b) Inspection form format shall be as required in NFPA 25, Annex B, Section B.1(4).

(c) A similar equivalent inspection form approved by the SFM may be used as the accepted forms for inspection, testing, and maintenance of water-based fire protection systems.

(d) A copy of the completed inspection forms shall be left in a water proof container affixed to the riser.

(6) Newly installed automatic fire sprinkler systems, standpipes, and fire pumps are exempt from the annual testing requirement required in Section 6.2 of these rules, for one year from the approval date of the initial installation acceptance testing.

R710-5-8. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as authorized by Sections 63G-4-202 and 63G-4-203.

(2) The issuance, renewal, or continued validity of a certificate of registration may be denied, suspended, or revoked, if the SFM finds that the applicant or the person has committed any of the following violations:

(a) the applicant or person is not the real person in interest;

(b) the applicant or person provides material misrepresentation or false statements on the application;

(c) the applicant or person refuses to allow inspection by the SFM, or his duly authorized deputies;

(d) the applicant or person for a certificate of registration does not have the proper equipment to conduct the operations for which application is made;

(e) the applicant or person for a certificate of registration does not possess the qualifications of skill or competence to conduct the operations for which application is made, as evidenced by failure to pass the examination pursuant to Section 3.3 of these rules;

(f) the applicant or person refuses to take the examination required by Section 3.3 of these rules;

(g) the applicant or person fails to pay the certification of registration, examination or other required fees as required in Section 8 of these rules;

(h) the applicant or person has been convicted of one or more federal, state or local laws;

(i) the applicant or person has been convicted of a violation of the adopted rules or been found by a board administrative proceeding to have violated the adopted rules;

(j) any offense or finding of unlawful conduct, or there is or may be, a threat to the public's health or safety if the applicant or person were granted a certificate of registration; or

(k) there are other factors upon which a reasonable and prudent person would rely to determine the suitability of the applicant or person to safely and competently engage in the practice of servicing fire sprinkler system equipment.

(3) A person whose certificate of registration is suspended or revoked by the SFM shall have an opportunity for a hearing before the board if requested by that person within 20 days after receiving notice.

(4) All adjudicative proceedings, other than criminal prosecution, taken by the SFM to enforce the Utah Fire Prevention and Safety Act, and these rules, shall commence in accordance with Section 63G-4-201.

(5) The board shall act as the hearing authority, and shall convene after timely notice to all parties involved. The board shall be the final authority on the suspension or revocation of a certificate of registration.

(6) The board shall direct the SFM to issue a signed order to the parties involved giving the decision of the board within a reasonable time of the hearing pursuant to Section 63G-4-203.

(7) Reconsideration of the board decision may be requested in writing within 20 days of the date of the decision pursuant to Section 63G-4-302.

(8) After a period of three years from the date of revocation, the board shall review the submitted written application of a person whose certificate of registration has been revoked. After timely notice to all parties involved, the board shall convene to review the revoked persons application, and that person shall be allowed to present themselves and their case before the board. After the hearing,

the board shall direct the SFM to allow the person to complete the certification process or shall direct that the revocation be continued.

(9) Judicial review of all final board actions resulting from informal adjudicative proceedings shall be conducted pursuant to Section 63G-4-402.

R710-5-9. Fees.

(1) The required fee shall accompany the application for certificate of registration.

(a) Certificate of registration fees will be refunded if the application is denied.

(2) When a certificate of registration has expired for more than one year, an application shall be made for an original certificate as if the application was being made for the first time.

KEY: automatic fire sprinklers
August 23, 2016 53-7-204
Notice of Continuation March 25, 2013

R710. Public Safety, Fire Marshal.
R710-8. Day Care Rules.
R710-8-1. Purpose.

The purpose of this rule is to establish minimum standards for the prevention of fire and for the protection of life and property against fire and panic in any day care facility or children's home.

R710-8-2. Authority.

This rule is authorized by Section 53-7-204.

R710-8-3. Definitions.

(1) "Authority Having Jurisdiction (AHJ)" means the State Fire Marshal, his duly authorized deputies, or the local fire enforcement authority.

(2) "Board" means Utah Fire Prevention Board.

(3) "Client" means a child or adult receiving care from other than a parent, guardian, relative by blood, marriage or adoption.

(4) "Day Care Facility" means any building or structure occupied by clients of any age who receive custodial care for less than 24 hours by individuals other than parents, guardians, relatives by blood, marriage or adoption.

(5) "Day Care Center" means providing care for five or more clients in a place other than the home of the person cared for. This would also include Child Care Centers or Hourly Child Care Centers licensed by the Department of Health.

(6) "Family Day Care" means providing care for clients listed in the following two groups:

(a) Type 1 - Services provided for five to eight clients in a home. This would also include a home that is certified by the Department of Health as Residential Certificate Child Care or licensed as Family Child Care; and

(b) Type 2 - Services provided for nine to sixteen clients in a home with sufficient staffing. This would also include a home that is licensed by the Department of Health as Family Child Care.

(7) "ICC" means International Code Council, Inc.

(8) "IFC" means International Fire Code.

(9) "NFPA" means National Fire Protection Association.

(10) "SFM" means State Fire Marshal.

R710-8-4. Additions.

(1) Places of religious worship shall not be required to meet the provisions of this rule in order to operate a nursery or day care while religious services are being held in the building.

(2) Family day care.

(a) Family day care units shall have on each floor occupied by clients, two separate means of egress, arranged so that if one is blocked the other will be available.

(b) Family day care units that are located in the basement or on the second story shall be provided with two means of egress, one of which shall discharge directly to the outside.

(i) Type 1 family day care units, located on the ground level or in a basement, may use an emergency escape or rescue openings as allowed in IFC, Chapter 10, Section 1030.

(c) Family day care units shall not be located above the second story.

(d) In family day care units, clients under the age of two shall not be located above or below the first story.

(i) Clients under the age of two may be housed above or below the first story where there is at least one exit that leads directly to the outside and complies with IFC, Section 1011 or Section 1012 or Section 1027.

(e) Family day care units located in split entry/split level type homes in which stairs to the lower level and upper level are equal or nearly equal, may have clients housed on both levels when approved by the AHJ.

(f) Family day care units shall have a portable fire extinguisher on each level occupied by clients, which shall have a classification of not less than 2A:10BC, and shall be serviced in accordance with NFPA, Standard 10, Standard for Portable Fire Extinguishers.

(g) Family day care units shall have single station smoke detectors in good operating condition on each level occupied by clients. Battery operated smoke detectors shall be permitted if the facility demonstrates testing, maintenance, and battery replacement to insure continued operation of the smoke detectors.

(h) Rooms in family day care units that are provided for clients to sleep or nap, shall have at least one opening or door approved for emergency escape.

(i) Fire drills shall be conducted in family day care units quarterly and shall include the complete evacuation from the building of all clients and staff.

(i) At least annually, in type I family day care units, the fire drill shall include the actual evacuation using the escape or rescue opening, if one is used as a substitute for one of the required means of egress.

(3) Day care centers.

(a) Day care centers shall comply with either I-4 requirements or E requirements of the IBC, whichever is applicable for the type of day care center.

(b) Emergency evacuation drills shall be completed as required in IFC, Chapter 4, Section 405.

(4) Requirements for all day care.

(a) Heating equipment in spaces occupied by children shall be provided with partitions, screens, or other means to protect children from hot surfaces and open flames.

(b) A fire escape plan shall be completed and posted in a conspicuous place.

(i) All staff shall be trained on the fire escape plan and procedure.

(c) The AHJ shall insure at each inspection there is sufficient adult staff to client ratios to allow safe and orderly evacuation in case of fire.

(i) For day care involving children, the AHJ may use the care giver to children ratios established in rule by the Department of Health as an established guideline.

R710-8-5. Repeal of Conflicting Board Actions.

All former board actions, or parts thereof, conflicting or inconsistent with the provisions of this board action or of the codes hereby adopted, are hereby repealed.

R710-8-6. Validity.

The board hereby declares that should any section, paragraph, sentence, or word of this board action, or of the codes hereby adopted, be declared invalid, it is the intent of the board that it would have passed all other portions of this action, independent of the elimination of any portion as may be declared invalid.

R710-8-7. Conflicts.

In the event where separate requirements pertain to the same situation in the same code, or between different codes as adopted, the more restrictive requirement shall govern, as determined by the AHJ.

R710-8-8. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as set forth herein and as authorized by Sections 63G-4-202 and 63G-4-203.

(2) A person may request a hearing on a decision made by the AHJ by filing an appeal to the board within 20 days

after receiving the final decision from the AHJ.

(3) All adjudicative proceedings, other than criminal prosecution, taken by the AHJ to enforce the Utah Fire Prevention and Safety Act, and these rules, shall commence in accordance with Section 63G-4-201.

(4) The board shall act as the hearing authority, and shall convene as an appeals board after timely notice to all parties involved.

(5) The board shall direct the SFM to issue a signed order to the parties involved giving the decision of the board within a reasonable time of the hearing pursuant to Section 63G-4-203.

(6) Reconsideration of the board's decision may be requested in writing within 20 days of the date of the decision pursuant to Section 63G-4-302.

(7) Judicial review of all final board actions resulting from informal adjudicative proceedings is available pursuant to Section 63G-4-402.

KEY: fire prevention, day care
August 23, 2016 53-7-204
Notice of Continuation March 13, 2012

R710. Public Safety, Fire Marshal.
R710-9. Rules Pursuant to the Utah Fire Prevention and Safety Act.
R710-9-1. Purpose.

The purpose of this rule is to provide minimum rules for safeguarding life and property from the hazards of fire and explosion, for board meeting conduct, deputizing Special Deputy State Fire Marshals, procedures to amend incorporated references, establishing board subcommittees, enforcement of the rules of the State Fire Marshal, requirements for the firefighter support restricted account, regulation of novelty lighters, procedures for the issuance of blasting permits, and amendments and additions.

R710-9-2. Authority.

This rule is authorized by Section 53-7-204.

R710-9-3. Definitions.

(1) "Authority Having Jurisdiction (AHJ)" means the State Fire Marshal, his authorized deputies, or the local fire enforcement authority.

(2) "Board" means Utah Fire Prevention Board.

(3) "Committee" means the Firefighter Support Restricted Account Advisory Committee.

(4) "Division" means State Fire Marshal.

(5) "Dwelling Unit" means one or more rooms arranged for the use of one or more individuals living together, as in a single housekeeping unit normally having cooking, living, sanitary, and sleeping facilities. For purposes of this standard, dwelling unit includes hotel rooms, dormitory rooms, apartments, condominiums, sleeping rooms in nursing homes, and similar living units.

(6) "IFC" means International Fire Code.

(7) "LFA" means Local Fire Authority.

(8) "Premixed" means the mixing of antifreeze with water that is prepared by the manufacturer with a quality control procedure that ensures that the antifreeze and water solution does not separate.

(9) "Restricted Account" means Firefighter Support Restricted Account.

(10) "SFM" means State Fire Marshal or authorized deputy.

(11) "Subcommittee" means Fire Prevention Board Budget Subcommittee or Amendment Subcommittee.

R710-9-4. Conduct of Board Members and Board Meetings.

(1) Board meetings shall be presided over and conducted by the chair and in the chair's absence, by the vice chair or the chair's designee.

(2) A quorum shall be required to approve any action of the board.

(3) The chair of the board and board members shall be entitled to vote on all issues considered by the board. A board member who declares a conflict of interest or where a conflict of interest has been determined, shall not vote on that particular issue.

(4) Meetings of the board shall be conducted in accordance with an agenda, which shall be submitted to the members by the division, not less than 14 days before the regularly scheduled board meetings.

(5) Public notice of board meetings shall be made by the division as prescribed in Section 52-4-6.

(6) The division shall provide the board with a secretary who shall prepare minutes and shall perform all secretarial duties necessary for the board to fulfill its responsibility. The minutes of board meetings shall be completed and sent to board members at least 14 days prior to the scheduled board meeting.

(7) A board member's standing on the board shall come under review after two unexcused absences in one year from regularly scheduled board meetings.

(a) The board member's name shall be submitted to the governor's office for status review.

R710-9-5. Deputizing Persons to Act as Special Deputy State Fire Marshals.

(1) Special deputy state fire marshals may be appointed by the SFM to positions of expertise within the regular scope of the Fire Marshal's Office.

(2) Pursuant to Section 53-7-101, special deputy state fire marshals may also be appointed to assist the Fire Marshal's Office in establishing and maintaining minimum fire prevention standards in those occupancy classifications listed in the International Fire Code.

(3) Special deputy state fire marshals shall be appointed after review by the State Fire Marshal in regard to their qualifications and the overall benefit to the Office of the State Fire Marshal.

(4) Special deputy state fire marshals shall be appointed by completing an oath and shall be appointed for a specific period of time.

(5) Special deputy state fire marshals shall have a picture identification card and shall carry that card when performing their assigned duties.

R710-9-6. Procedures to Amend the International Fire Code.

(1) All requests for amendments to the IFC shall be submitted to the division on forms created by the division, for presentation to the board at the next regularly scheduled board meeting.

(2) Requests for amendments received by the division less than 21 days prior to any regularly scheduled meeting of the board may be delayed in presentation until the next regularly scheduled board meeting.

(3) Upon presentation of a proposed amendment, the board shall do one of the following:

(a) accept the proposed amendment as submitted or as modified by the board;

(b) reject the proposed amendment;

(c) submit the proposed amendment to the Board Amendment Subcommittee for further study; or

(d) return the proposed amendment to the requesting person or agency, accompanied by board comments, allowing the requesting person or agency to resubmit the proposed amendment with modifications.

(4) The Board Amendment Subcommittee shall report its recommendation to the board at the next regularly scheduled board meeting.

(5) The board shall make a final decision on the proposed amendment at the next board meeting following the original submission.

(6) The board may reconsider any request for amendment, reverse or modify any previous action by majority vote.

(7) When approved by the board, the requesting agency shall provide to the division within 45 days, the completed ordinance.

(8) The division shall maintain a list of amendments to the IFC that have been granted by the board.

(9) The division shall make available to any person or agency copies of the approved amendments upon request, and may charge a reasonable fee for multiple copies in accordance with the provisions of Section 63-2-203.

R710-9-7. Fire Advisory and Code Analysis Committee.

(1) There is created by the board a Fire Advisory and

Code Analysis Committee whose duties are to provide direction to the board in the matters of fire prevention and building codes.

(2) The committee shall serve in an advisory position to the board, members shall be appointed by the board, shall serve for a term of three years, and shall consist of the following members:

(a) a representative from the State Fire Marshal's Office;

(b) the Code Committee Chairman of the Fire Marshal's Association of Utah;

(c) a fire marshal or fire inspector from a local fire department or fire district;

(d) a representative from the Department of Health;

(e) the Chief Elevator Inspector from the Utah Labor Commission;

(f) a representative from the Department of Human Services; and

(g) a representative from Forestry, Fire and State Lands.

(3) This committee shall join together with the Uniform Building Code Commission Fire Protection Advisory Committee to form the Unified Code Analysis Council.

(4) The Council shall meet as directed by the board or as directed by the Building Codes Commission or as needed to review fire prevention and building code issues that require definitive and specific analysis.

(5) The Council shall select one of its members to act in the position of chair and another to act as vice chair. The chair and vice chair shall serve for one year terms on a calendar year basis. Elections for chair and vice chair shall occur at the meeting conducted in the last quarter of the calendar year.

(6) The chair or vice chair of the council shall report to the board or Building Codes Commission recommendations of the Council with regard to the review of fire and building codes.

R710-9-8. Enforcement of the Rules of the State Fire Marshal.

(1) Fire and life safety plan reviews of new construction, additions, and remodels of state owned facilities shall be conducted by the SFM, or his authorized deputies. State owned facilities shall be inspected by the SFM, or his authorized deputies.

(2) Fire and life safety plan reviews of new construction, additions, and remodels of public and private schools shall be completed by the SFM, or his authorized deputies, and the LFA.

(3) Fire and life safety plan reviews of new construction, additions, and remodels of publicly owned buildings, privately owned colleges and universities, and institutional occupancies, with the exception of state owned buildings, shall be completed by the LFA. If not completed by the LFA, the SFM, or his authorized deputies shall complete the plan review.

(4) The following listed occupancies shall be inspected by the LFA, the SFM, or his authorized deputies:

(a) publicly owned buildings other than state owned buildings;

(b) public and private schools;

(c) privately owned colleges and universities;

(d) institutional occupancies; and

(e) places of assembly.

(5) The board shall require prior to approval of a grant the following:

(a) that the applying fire agency be actively participating in the statewide fire statistics reporting program; and

(b) that the applying fire agency be actively working towards structural or wildland firefighter certification through the Utah Fire Service Certification System.

R710-9-9. Fire Prevention Board Budget and Amendment Subcommittees.

(1) There are created two Fire Prevention Board subcommittees known as the Budget Subcommittee, and the Amendment Subcommittee. Each subcommittee's membership shall be appointed from members of the board.

(2) Subcommittee membership shall be by appointment of the board chair or as volunteered by board members. Subcommittee membership shall be limited to four board members.

(3) Each subcommittee shall meet as necessary and shall vote and appoint a chair to represent the subcommittee at regularly scheduled board meetings.

R710-9-10. Firefighter Support Restricted Account.

(1) There is created by the board a Firefighter Support Restricted Account Advisory Committee whose duties are to provide direction to the division in the distribution of funds in the restricted account.

(2) The Committee shall be appointed by the division, approved by the board, and shall consist of the following members:

(a) two representatives from the Utah State Firemen's Association;

(b) two representatives from the Utah State Fire Chiefs Association;

(c) two representatives from the Professional Firefighters of Utah; and

(d) one representative from the general public.

(3) The committee members shall serve for a term of three years, shall meet as directed by the division, and a majority of members shall be present to constitute a quorum.

(4) The committee shall select one of its members to act in the position of chair. The chair shall serve for a term of one year, and shall be a voting member only in the event of a tie vote.

(5) The committee shall assist the division in preparing application forms to be used to apply for distributions from the restricted account.

(6) The Division shall set a specific time period each year for the receiving of applications, the review of applications by the committee, and the distribution of the restricted account funds.

(7) The division shall distribute the restricted account funding to charitable organizations meeting the requirements listed in Subsection 53-7-109(4), and to be expended for only the purposes allowed in accordance with Subsection 53-7-109(5)(b).

(8) In the event of a conflict in the distribution of the restricted account funds, an appeal for resolution shall be made to the board. The board shall be the final authority in the resolution of the conflict.

R710-9-11. Regulation of Novelty Lighters.

All novelty lighters that have been identified as toy-like lighters by the Novelty and Toy-Like Lighter Assessment Committee, and placed by picture and description on the Utah Department of Public Safety, State Fire Marshal Website, Toy and Novelty Lighter Initiative, Toy-like Lighters Disavowed List, http://publicsafety.utah.gov/firemarshal, shall not be sold or offered for sale in the State of Utah.

R710-9-12. Amendments and Additions.

There are currently no amendments and additions adopted by the Board for application statewide.

R710-9-13. Repeal of Conflicting Board Actions.

All former board actions, or parts thereof, conflicting or inconsistent with the provisions of this board action or of the

codes hereby adopted, are hereby repealed.

R710-9-14. Validity.

The Utah Fire Prevention Board hereby declares that should any section, paragraph, sentence, or word of this board action, or of the codes hereby adopted, be declared invalid, it is the intent of the Utah Fire Prevention Board that it would have passed all other portions of this action, independent of the elimination of any portion as may be declared invalid.

R710-9-15. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as set forth herein and as authorized by Sections 63G-4-202 and 63G-4-203.

(2) If a city, county, or fire protection district refuses to establish a method of appeal regarding a portion of the IFC, the appealing party may petition the board to act as the board of appeals.

(3) A person may request a hearing on a decision made by the SFM, his authorized deputies, or the LFA, by filing an appeal to the board within 20 days after receiving final decision.

(4) All adjudicative proceedings, other than criminal prosecution, taken by the SFM, his authorized deputies, or the LFA, to enforce the Utah Fire Prevention and Safety Act and these rules, shall commence in accordance with Section 63G-4-201.

(5) The board shall act as the hearing authority, and shall convene as an appeals board after timely notice to all parties involved.

(6) The board shall direct the SFM to issue a signed order to the parties involved giving the decision of the board within a reasonable time of the hearing pursuant to Section 63G-4-203.

(7) Reconsideration of the board's decision may be requested in writing within 20 days of the date of the decision pursuant to Section 63G-4-302.

(8) Judicial review of all final board actions resulting from informal adjudicative proceedings is available pursuant to Section 63G-4-402.

KEY: fire prevention, law
August 23, 2016 53-7-204
Notice of Continuation June 7, 2012

R710. Public Safety, Fire Marshal.
R710-10. Rules Pursuant to Fire Service Training, Education, and Certification.
R710-10-1. Purpose.

The purpose of this rule is to provide minimum rules for fire service training, education and certification by establishing a Fire Service Education Administrator, a Fire Education Program Coordinator, the Fire Service Standards and Training Council, the Fire Service Certification Council, the Utah Fire and Rescue Academy, and standards for those agencies conducting non-affiliated fire service training.

R710-10-2. Authority.

This rule is authorized by Section 53-7-204.

R710-10-3. Definitions.

(1) "Academy" means Utah Fire and Rescue Academy.

(2) "Academy Director" means the Director of the Utah Fire and Rescue Academy.

(3) "Administrator" means Fire Service Education Administrator.

(4) "Board" means Utah Fire Prevention Board.

(5) "Career Firefighter" means one whose primary employment is directly related to the fire service.

(6) "Certification Council" means the Fire Service Certification Council.

(7) "Certification System" means the Utah Fire Service Certification System.

(8) "Coordinator" means Fire Service Education Program Coordinator.

(9) "EMT" means Emergency Medical Technician.

(10) "Non-Affiliated" means an individual who is not a member of an organized fire department.

(11) "Plan" means Fire Academy Strategic Plan.

(12) "RCA" means Recruit Candidate Academy

(13) "SFM" means State Fire Marshal or authorized deputy.

(14) "Standards Council" means Fire Service Standards and Training Council.

(15) "Volunteer/Part-Paid Firefighter" means one whose primary employment is not directly related to the fire service.

R710-10-4. Fire Service Education Administrator.

(1) There is created by the Board a Fire Service Education Administrator for the State of Utah. This administrator shall be the State Fire Marshal.

(2) The administrator shall oversee statewide fire service education of all personnel receiving training monies from the Fire Academy Support Account.

(a) The administrator shall oversee fire service education in fire suppression, fire prevention, fire administration, operations, hazardous materials, rescue, fire investigation, and public fire education in the State of Utah.

(3) The administrator shall dedicate sufficient time and efforts to ensure that those monies dedicated from the Fire Academy Support Account are expended in the best interests of all personnel receiving fire service education.

(4) The administrator shall ensure equitable monies are expended in fire service education to volunteer, career, and prospective fire service personnel.

(5) The administrator shall as directed by the board, solicit the legislature for funding to ensure that fire service personnel receive sufficient monies to receive the education necessary to prevent loss of life or property.

(6) The administrator shall oversee the Fire Department Assistance Grant program by completing the following:

(a) ensure that a broad based selection committee is impaneled each year;

(b) compile for presentation to the board the proposed grants; and

(c) receive the board's approval before issuing the grants.

(7) The administrator shall if necessary, establish proposed changes to fire service education statewide, insuring personnel receive the most proficient and professional training available, ensure completion of agreements and contracts, and ensure that payments on agreements and contracts are completed expeditiously.

(8) The administrator shall report to the board at each regularly scheduled board meeting the current status of fire service education statewide.

(a) The administrator shall present any proposed changes in fire service education to the board, and receive direction and approval from the board, before making those changes.

R710-10-5. Fire Service Education Program Coordinator.

(1) The Fire Service Education Program Coordinator shall assist the administrator in statewide fire service education.

(2) The coordinator shall conduct fire service education evaluations, budget reviews, performance audits, and oversee the effectiveness of fire service education statewide.

(3) The coordinator shall ensure that there is an established Utah Fire Service Strategic Training Plan for fire service education statewide. The coordinator shall work with the academy director to update the Strategic Plan and keep it current to the needs of the fire service.

(4) The coordinator shall report findings of audits, budgetary reviews, training contracts or agreements, evaluation of training standards, and any other necessary items of interest with regard to fire service education to the administrator.

(5) The coordinator shall ensure that contracts are established each year for training and education of fire personnel that meets the needs of those involved in fire service education statewide.

(6) The coordinator shall be the staff assistant to the Fire Service Standards and Training Council and shall present agenda items to the council chair that need resolution or review. As the staff assistant to the Training Council, the coordinator shall ensure that appointed members attend, encourage that the decisions made further the interests of fire service education statewide, and ensure that the board is kept informed of the Training Council's decisions.

R710-10-6. Fire Service Standards and Training Council.

(1) There is created by the board, the Fire Service Standards and Training Council, whose duties are to provide direction to the board and academy in matters relating to fire service standards, training, and certification.

(2) The Standards Council shall serve in an advisory position to the board, members shall be appointed by the board, shall serve four year terms, and shall consist of the following members:

(a) representative from the Utah State Fire Chiefs Association;

(b) representative from the Utah State Firemen's Association;

(c) representative from the Fire Marshal's Association of Utah;

(d) specialist in hazardous materials representing the State Fire Marshals Office;

(e) fire/arson investigator representing the Utah Chapter of the International Association of Arson Investigators;

(f) specialist in wildland fire suppression and prevention from the Utah State Division of Forestry, Fire and State Lands;

(g) representative from the International Association of Firefighters;

(h) representative from the Utah Fire Service Certification Council;

(i) representative from the Utah Fire and Life Safety Education Association; and

(j) representative from the Utah Fire Training Officers Association.

(3) The Standards Council shall meet quarterly and may hold other meetings as necessary for proper transaction of business.

(a) A majority of the Standards Council members shall be present to constitute a quorum.

(4) The Standards Council shall select one of its members to act in the position of chair, and another member to act as vice chair.

(a) The chair and vice chair shall serve one year terms on a calendar year basis.

(b) Elections for chair and vice chair shall occur at the meeting conducted in the last quarter of the calendar year.

(c) If voted upon by the council, the vice chair will become the chair the next succeeding calendar year.

(5) If a Standards Council member has two or more unexcused absences during a 12 month period, from regularly scheduled Standards Council meetings, it is considered grounds for dismissal pending review by the board.

(a) The coordinator shall submit the name of the Standards Council member to the board for status review.

(6) A member of the Standards Council may have a representative of their respective organization sit in proxy of that member, if submitted and approved by the coordinator prior to the meeting.

(7) The chair or vice chair of the Standards Council shall report to the board the activities of the Standards Council at regularly scheduled board meetings. The coordinator may report to the board the activities of the Standards Council in the absence of the chair or vice chair.

(8) The Standards Council shall consider all subjects presented to them, subjects assigned to them by the board, and shall report their recommendations to the board at regularly scheduled board meetings.

(9) One-half of the members of the Standards Council shall be reappointed or replaced by the board every two years.

R710-10-7. Utah Fire Service Certification Council.

(1) There is created by the board, the Utah Fire Service Certification Council, whose duties are to oversee fire service certification in the State of Utah.

(2) The Certification Council shall be made up of 12 members, appointed by the academy director, approved by the board, and each member shall serve three year terms.

(3) The Certification Council shall be made up of users of the certification system and be comprised of both paid and volunteer fire personnel, members with special expertise, and members from various geographical locations in the state.

(4) The purpose of the Certification Council is to provide direction on all aspects of certification, and shall report the activities of the Certification Council to the Fire Service Standards and Training Council.

(5) Functioning of the Certification Council with regard to certification, re-certification, testing, meeting procedures, examinations, suspension, denial, annulment, revocation, appeals, and reciprocity, shall be conducted as specified in the Utah Fire Service Voluntary Certification Program, Policy and Procedures Manual.

(6) A copy of the Utah Fire Service Voluntary Certification Program, Policy and Procedures Manual, shall be kept on file at the State Fire Marshal's Office and the Utah Fire and Rescue Academy.

R710-10-8. Utah Fire and Rescue Academy.

(1) The primary fire service training school shall be known as the Utah Fire and Rescue Academy.

(2) The director of the Utah Fire and Rescue Academy shall report to the administrator the activities of the academy with regard to completion of the agreed academy contract.

(3) The academy director may recommend to the administrator or coordinator new or expanded standards regarding fire suppression, fire prevention, public fire education, safety, certification, and any other items of necessary interest about the academy.

(4) The academy shall receive approval from the administrator, after being presented to the Standards and Training Council, any substantial changes in academy training programs that vary from the agreed contract.

(5) The academy director shall provide to the coordinator by October 1st of each year, a numerical summary of those career, volunteer/part-paid, and non-affiliated students attending the academy in the following categories:

(a) Those who have received certification during the previous contract period at each certification level.

(b) Those who have received an academic degree in any Fire Science category in the previous contract period.

(c) Those who have completed other academy classes during the previous contract period.

(6) The academy director shall provide to the coordinator by October 1st of each year, a numerical comparison of the categories required in Subsection R710-10-8(5), comparing attendance in the previous contract period.

(7) The academy director shall provide to the coordinator by October 1st of each year, in accepted budgeting practices, the following:

(a) A cost analysis of classes to include the total spent for each class title, the average cost per class, the number of classes delivered, the number of participants per class title, and the cost per participant for each class title provided by the academy.

(b) A budget summary comparing amounts budgeted to actual expenditures for each budget code funded by the contract.

(8) The academy director shall provide to the coordinator by October 1st of each year, a numerical summary of those students attending academy courses in the following categories:

(a) Non-affiliated personnel enrolled in college courses.

(b) Career fire service personnel enrolled in college credit courses.

(c) Volunteer and part-paid fire service personnel enrolled in college credit courses.

(d) Non-affiliated personnel enrolled in non-credit continuing education courses.

(e) Career fire service personnel enrolled in non-credit continuing education courses.

(f) Volunteer and part-paid fire service personnel enrolled in non-credit continuing education courses.

(9) The academy director shall present to the coordinator by January of each year, proposals to be incorporated in the academy contract for the next fiscal year.

R710-10-9. Non-Affiliated Fire Service Training.

(1) Those training organizations that desire to offer certification through the Certification System for non-affiliated personnel must receive accreditation in writing from the Standards Council and the academy director.

(2) Before accreditation is granted, the training organization requesting approval shall demonstrate the following:

(a) Complete a written application requesting approval

to conduct the training course.

(b) Designate an approved course coordinator to oversee the course delivery and ensure the course meets each of the applicable objectives.

(c) Ensure that qualified instructors are used to teach each subject.

(d) Ensure sufficient student to instructor ratios for all subjects or skills to be taught to include those designated high hazard.

(e) Demonstrate that sufficient equipment and facilities will be provided to meet the training requirements of the course being taught.

(f) Maintain course documentation as required through the Certification System to ensure that all elements of the necessary training is completed.

(g) Follow the accepted requirements of the Certification System for requesting testing and certification.

(3) As required in Subsection R710-10-9(2)(b), the designated course coordinator shall meet the following requirements:

(a) Be currently certified at the certification level as established by the Standards Council.

(b) Ensure that all assigned instructors meet the requirements as required in Subsection R710-10-9(4).

(c) Ensure that the course syllabus and practical skills guide meet the requirements of the Certification System.

(d) Ensure that the requirements of Subsections R710-10-9(2)(d), (e), (f) and (g) are met.

(4) As required in Subsection R710-10-9(2)(c), qualified instructors shall meet the following requirements:

(a) Must be currently certified at the certification level as established by the Standards Council.

(b) If the instructor is not certified, instructor qualification can be satisfied by special knowledge, experience or establishment of expertise.

(5) An Introduction to Emergency Services class shall be completed by the non-affiliated student wishing to receive an RCA within the time period stated in Subsection R710-10-9(7). The Introduction to Emergency Services class may be waived if the applicant can demonstrate to the academy sufficient competency or prior experience in the fire service to make the class unwarranted.

(6) Non-affiliated training providers shall follow the curriculum outline that is taught at the academy in the RCA program in order to award students an RCA Certificate of Completion. Any changes to the curriculum of the RCA program at the academy shall be provided by the academy to the non-affiliated training providers to maintain consistency in the RCA program.

(7) An RCA Certificate of Completion may be issued to the non-affiliated student by the academy upon successful completion of the following within a 24 month period:

(a) Introduction to Emergency Services class or accepted waiver.

(b) EMT Basic Course.

(c) Completion of an accredited RCA.

(8) Non-affiliated training providers that have received accreditation shall be reaccredited every five years from the date of initial accreditation.

R710-10-10. Repeal of Conflicting Board Actions.

All former board actions, or parts thereof, conflicting or inconsistent with the provisions of this board action or of the codes hereby adopted, are hereby repealed.

R710-10-11. Validity.

The Utah Fire Prevention Board hereby declares that should any section, paragraph, sentence, or word of this board action, or of the codes hereby adopted, be declared invalid, it is the intent of the Utah Fire Prevention Board that it would have passed all other portions of this action, independent of the elimination of any portion as may be declared invalid.

R710-10-12. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as set forth herein and as authorized by Sections 63G-4-202 and 63G-4-203.

(2) A person may request a hearing on a decision made by the SFM, his authorized deputies, or the LFA, by filing an appeal to the board within 20 days after receiving final decision.

(3) All adjudicative proceedings, other than criminal prosecution, taken by the SFM, his authorized deputies, or the LFA, to enforce the Utah Fire Prevention and Safety Act and these rules, shall commence in accordance with Section 63G-4-201.

(4) The board shall act as the hearing authority, and shall convene as an appeals board after timely notice to all parties involved.

(5) The board shall direct the SFM to issue a signed order to the parties involved giving the decision of the board within a reasonable time of the hearing pursuant to Section 63G-4-203.

(6) Reconsideration of the board's decision may be requested in writing within 20 days of the date of the decision pursuant to Section 63G-4-302.

(7) Judicial review of all final board actions resulting from informal adjudicative proceedings is available pursuant to Section 63G-4-402.

KEY: fire training
August 23, 2016 **53-7-204**
Notice of Continuation October 5, 2015

R710. Public Safety, Fire Marshal.
R710-11. Fire Alarm System Inspecting and Testing.
R710-11-1. Purpose.

The purpose of this rule is to establish minimum rules to provide regulation to those who inspect and test fire alarm systems.

R710-11-2. Authority.

This rule is authorized by Section 53-7-204.

R710-11-3. Definitions.

(1) "Annual" means a period of one year or 365 calendar days.

(2) "Authority Having Jurisdiction (AHJ) means the State Fire Marshal, his duly authorized deputies, the local fire enforcement authority, and building officials.

(3) "Board" means Utah Fire Prevention Board.

(4) "Certificates of Registration" means a written document issued by the SFM to any person for the purpose of granting permission to such person to perform any act or acts for which authorization is required.

(5) "Inspecting and Testing" means work completed to ensure that the system operates properly as required by applicable statute, codes and standards.

(6) "IFC" means International Fire Code.

(7) "NFPA" means National Fire Protection Association.

(8) "NICET" means National Institute for Certification in Engineering Technologies.

(9) "SFM" means State Fire Marshal or authorized deputy.

(10) "Service" means inspecting and testing of fire alarm systems.

R710-11-4. Certificates of Registration.

(1) No person shall engage in the inspecting and testing of fire alarm systems without first receiving a certificate of registration issued by the SFM.

(2) The following groups are exempted from the requirements of this part:

(a) the AHJ that is performing the initial installation acceptance testing of the fire alarm system or ongoing inspections to verify compliance with the adopted NFPA standards and these rules; and

(ii) the building owner or designee that performs additional periodic inspections beyond the annual inspection required in Section R710-11-7(2), to satisfy requirements set by company policy, insurance, or risk management.

(3) Application for a certificate of registration to inspect and test fire alarm systems shall be made in writing to the SFM on forms provided by the SFM and signed by the applicant.

(a) The SFM or his deputies may request picture identification of the applicant for a certificate of registration.

(b) The applicant shall indicate on the application which of the three technician levels the applicant will apply for:

(i) Basic Fire Alarm Technician;

(ii) Fire Alarm Technician; or

(iii) Master Fire Alarm Technician.

(c) The application for a certificate of registration shall be accompanied with proof of public liability insurance from the certificate holder or employing concern.

(i) A public liability insurance carrier showing coverage of at least $100,000 for each incident, and $300,000 in total coverage shall issue the public liability insurance.

(ii) The certificate of registration holder shall notify the SFM within 30 days after the public liability insurance coverage required is no longer in effect for any reason.

(4) The SFM shall require all applicants for a certificate of registration as a technician to complete the following:

(a) Basic Fire Alarm Technician shall:

(i) pass a written examination on basic testing of fire alarm systems or shall be certified as a NICET I; and

(ii) complete the manipulative skills task book.

(iii) Work as a Basic Fire Alarm Technician shall be performed under direct supervision of a Fire Alarm Technician or Master Fire Alarm Technician.

(b) Fire Alarm Technician shall:

(i) pass all the requirements listed for Basic Fire Alarm Technician; and

(ii) pass a written examination on basic testing and maintenance of fire alarm systems limited up to and including four story buildings or shall be certified as a NICET II.

(c) Master Fire Alarm Technician shall;

(i) pass all the requirements listed for Basic Fire Alarm Technician and Fire Alarm Technician; and

(ii) pass a written examination on fire alarm systems in buildings over four stories, voice alarm/evacuation systems, and smoke control systems or shall be certified as a NICET III or as NICET IV.

(5) Examinations.

(a) All certification examinations given are open book examinations;

(i) The applicant is allowed to use the statute, the administrative rule, and the NFPA standard that applies to the certification examination; and

(ii) Any other materials to include cellular telephones are prohibited in the examination room.

(b) Completion of the certification examination will not be allowed if it appears to the test administrator that the applicant has not prepared to take the examination.

(c) Each certification examination taken has a time limit of two hours to completion.

(i) To successfully pass the written examination, the applicant must obtain a minimum grade of 70%.

(ii) Leaving the office or testing location before the completion of the examination voids the examination and will require the examination to be retaken by the applicant.

(d) If there are different levels of proficiency in the subject matter, the lower proficiency level will be fully completed before the next higher proficiency will be administered.

(e) To successfully complete the manipulative skills task book, all required skill tasks shall be signed as completed by a person duly qualified or certified in that skill.

(6) Those applicants that have successfully completed the requirements outlined in Section R710-11-5, and are certified by NICET in the skills that correspond to the work to be performed by the applicant, shall have the requirement for written examination waived after appropriate documentation is provided to the SFM by the applicant.

(7) Following receipt of the properly completed application and successful completion of required testing, the SFM shall issue a certificate of registration.

(8) Original certificates of registration shall be valid for one year from the date of application. Thereafter, each certificate of registration shall be renewed annually and renewals shall be valid for one year from issuance.

(9) Application for renewal shall be made as directed by the SFM.

(10) Every holder of a valid certificate of registration shall take a re-examination every three years, from date of original certificate.

(a) The re-examination shall consist of an examination for each level of certification, to be mailed to the certificate holder at least 60 days before the renewal date.

(b) The re-examination will consist of questions that focus on changes in the last three years to the adopted NFPA standards, the statute, and the adopted administrative rules.

The re-examination may also consist of questions that focus on practices of concern as noted by the board or the SFM.

(c) The certificate holder is responsible to complete the re-examination and return it to the SFM in sufficient time to renew.

(d) The certificate holder is responsible to return to the SFM the correct renewal fees to complete that certificate renewal.

(11) The SFM may refuse to renew any certificate of registration pursuant to R710-11-8(2).

(a) The applicant shall, upon such refusal, have the same rights as are granted by Section R710-11-8.

(12) The holder of a certificate of registration shall submit such certificate for inspection, upon request of the AHJ.

(13) Every certificate of registration shall indicate the type of act or acts to be performed and for which the applicant has qualified.

(14) Any change in home address of any holder of a valid certificate of registration shall be reported in writing, by the registered person to the SFM within 30 days of such change.

(15) A duplicate certificate of registration may be issued by the SFM to replace any previously issued certificate, which has been lost or destroyed.

(16) No certificate of registration shall be issued to any person who is under 18 years of age.

(17) Restrictive Use.

(a) A certificate of registration may be used for identification purposes only as long as such certificate remains valid.

(b) Regardless of the acts authorized to be performed by a licensed concern, only those acts for which the applicant for a certificate of registration has qualified shall be permissible by such applicant.

(18) Right to Contest.

(a) Every person who takes an examination for a certificate of registration shall have the right to contest the validity of individual questions of such examination.

(b) Every contention as to the validity of individual questions of an examination shall be made within 48 hours after taking said examination.

(c) The decision as to the action to be taken on the submitted contention shall be made by the SFM, and such decision shall be final.

(d) The decision made by the SFM, and the action taken, shall be reflected in all future examinations, but shall not affect the grades established in any past examination.

(19) Certificates of Registration shall not be transferable. The person to whom issued shall carry individual certificates of registration.

(20) Every certificate shall be identified by a number. The certificate of registration shall be worn in a visible manner when inspecting and testing fire alarm systems.

(21) New or existing employees desiring to attain a certificate of registration may perform the various acts required while under the constant direct supervision of a person holding a valid certificate of registration for a period not to exceed 90 days from the initial date of employment or beginning service in the field.

R710-11-5. Service Tags.

(1) Size and Color.

(a) Tags shall be not more than five and one-half inches in height, nor less than four and one-half inches in height, and not more than three inches in width, nor less than two and one-half inches in width.

(b) Tags may be produced in any color except red or a variation of red.

(c) A red tag shall be used to indicate the system fails to ensure a reasonable degree of protection for life and property from fire through inspecting and testing of fire alarm systems as required in NFPA, Standard 72, and the requirements of these rules.

(i) After placing the red tag on the system, the certified person shall notify the AHJ and provide the AHJ with a written copy of the noted deficiencies.

(d) If the AHJ reviews the noted deficiencies on the attached red tag and finds the deficiencies are not consistent with the requirements in NFPA, Standard 72, the red tag shall be removed by the certified person that attached the red tag.

(2) The service tag shall be attached at the fire alarm control panel for each system inspected or at other locations as needed to show compliance.

(a) The service tag shall be attached to the control panel in such a position as to be conveniently inspected by the AHJ.

(3) Service tags shall bear the following information:

(a) provisions of Section 4.7;

(b) approved Seal of Registration of the SFM;

(c) certificate of registration number of individual who performed or supervised the service or services performed;

(d) signature of individual whose certificate of registration number appears on the tag;

(e) concern's name;

(f) concern's address;

(g) type of service performed;

(h) type of system serviced; and

(i) date service is performed.

(b) The above information shall appear on one side of the service tag. All other desired printing or information shall be placed on the reverse side of the tag.

(4) Legibility.

(a) The certificate of registration number required in Section R710-11-5(3)(c), and the signature required in Section R710-11-5(3)(d), shall be printed or written distinctly.

(b) All information pertaining to date and type of service shall be indicated on the card by perforations in the appropriate space provided. Each perforation shall clearly indicate the desired information.

(5) An sample service tag is on file in the State Fire Marshal's Office for review.

(6) A new service tag shall be attached to a system each time a service is performed.

(7) The following wording shall be placed at the top or reinforced ring end of every tag: "DO NOT REMOVE BY ORDER OF THE STATE FIRE MARSHAL".

(8) Removal.

(a) No person or persons shall remove a service tag except when further service is performed.

(b) No person shall deface, modify, or alter any service tag that is required to be attached to the system.

(c) A red tag can only be removed by written authority from the AHJ. Verbal authority to initially remove the tag is allowed as long as it is followed by written authority.

(9) Service tags may be printed for any number of years not to exceed eight years.

R710-11-6. Seal of Registration.

(1) The official seal of registration of the SFM shall consist of the following:

(a) the image of the State of Utah shall be in the center with an outer ring stating, "Utah State Fire Marshal";

(i) the top portion of the outer ring shall have the wording "Utah State"; and

(ii) the bottom portion of the outer ring shall have the wording "Fire Marshal".

(b) Appending below the bottom portion and in a

centered position, shall be a box provided for the displaying of the certification number assigned to the person.

(2) No person shall produce, reproduce, or use this seal in any manner or for any purpose except as herein provided.

(3) Certificate holders or concerns shall use the Seal of Registration on every service tag.

(4) No person or concern shall continue the use of the Seal of Registration in any manner or for any purpose after receipt of a notice in writing from the SFM to that effect, or upon the suspension or revocation of the certificate of registration.

(5) Every reproduction of the Seal of Registration and every letter and number placed thereon, shall be of sufficient size to render such seal, letter, and number distinct and clearly legible.

R710-11-7. Amendments and Additions.

(1) At the time of service, all servicing shall be done in accordance with the adopted NFPA standard, adopted statutes, and these rules.

(2) Fire alarm systems shall be inspected annually by a person holding the appropriate certificate of registration as required in Section R710-11-4(1).

(3) Newly installed fire alarm systems are exempt from the annual testing requirement required in Section R710-11-7(2), for one year from the approval date of the initial installation acceptance testing.

R710-11-8. Adjudicative Proceedings.

(1) All adjudicative proceedings performed by the agency shall proceed informally as authorized by Sections 63G-4-202 and 63G-4-203.

(2) The issuance, renewal, or continued validity of a certificate of registration may be denied, suspended, or revoked, if the SFM finds that the applicant or the person has committed any of the following violations:

(a) the applicant or person is not the real person of interest;

(b) the applicant or person provides material misrepresentation or false statements on the application;

(c) the applicant or person refuses to allow inspection by the SFM, or his duly authorized deputies;

(d) the applicant or person for a certificate of registration does not have the proper equipment to conduct the operations for which application is made;

(e) the applicant or person for a certificate of registration does not possess the qualifications of skill or competence to conduct the operations for which application is made, as evidenced by failure to pass the examination or manipulative skills pursuant to Section R710-11-4(3) of these rules;

(f) the applicant or person refuses to take the examination required by Section R710-11-4(3) of these rules;

(g) the applicant or person fails to pay the certification of registration, examination or other required fees as required in Section R710-11-9;

(h) the applicant or person has been convicted of violating one or more federal, state or local laws;

(j) the applicant or person has been convicted of a violation of the adopted rules or been found by a board administrative proceeding to have violated the adopted rules;

(k) any offense or finding of unlawful conduct, or there is or may be, a threat to the public's health or safety if the applicant or person were granted a certificate of registration; or

(l) there are other factors upon which a reasonable and prudent person would rely to determine the suitability of the applicant or person to safely and competently engage in the practice of servicing fire alarm system equipment.

(3) A person whose certificate of registration is suspended or revoked by the SFM shall have an opportunity for a hearing before the board if requested by that person within 20 days after receiving notice.

(4) All adjudicative proceedings, other than criminal prosecution, taken by the SFM to enforce the Utah Fire Prevention and Safety Act, and these rules, shall commence in accordance with Section 63G-4-201.

(5) The board shall act as the hearing authority, and shall convene after timely notice to all parties involved. The board shall be the final authority on the suspension or revocation of a certificate of registration.

(6) The board shall direct the SFM to issue a signed order to the parties involved giving the decision of the board within a reasonable time of the hearing pursuant to Section 63G-4-203.

(7) Reconsideration of the board decision may be requested in writing within 20 days of the date of the decision pursuant to Section 63G-4-302.

(8) After a period of three years from the date of revocation, the board shall review the submitted written application of a person whose certificate of registration has been revoked. After timely notice to all parties involved, the board shall convene to review the revoked person's application, and that person shall be allowed to present themselves and their case before the board. After the hearing, the board shall direct the SFM to allow the person to complete the certification process or shall direct that the revocation be continued.

(9) Judicial review of all final board actions resulting from informal adjudicative proceedings shall be conducted pursuant to Section 63G-4-402.

R710-11-9. Fees.

(1) The required fee shall accompany the application for certificate of registration.

(a) Certificate of registration fees will be refunded if the application is denied.

(2) When a certificate of registration has expired for more than one year, an application shall be made for an original certificate as if the application was being made for the first time.

KEY: fire alarm systems
August 23, 2016 **53-7-204**
Notice of Continuation October 11, 2011

R710. Public Safety, Fire Marshal.
R710-12. Hazardous Materials Training and Certification.
R710-12-1. Purpose.

The purpose of this rule is to establish minimum rules establishing ongoing training standards for hazardous materials emergency response agencies. The Board also adopts minimum rules for certification for persons who provide hazardous materials emergency response services.

R710-12-2. Authority.

This rule is authorized by Section 53-7-204.

R710-12-3. Adoption.

There is adopted as part of these rules the National Fire Protection Association (NFPA), Standard 472, Standard for Competence of Responders to Hazardous Materials/Weapons of Mass Destruction Incidents, 2008 edition, except as amended by provisions as outlined in this rule.

R710-12-4. Definitions.

(1) "AHJ" means Authority Having Jurisdiction.

(2) "Board" means Utah Fire Prevention Board.

(3) "Certificate" means a written document issued by the Institute of Emergency Services and Homeland Security through the Utah Fire Service Certification System, to any person for the purpose of granting permission to such person to perform any act or acts for which authorization is required.

(4) "Council" means Hazardous Materials Advisory Council.

(5) "Emergency response agencies" means those agencies that are created and under the control of local, state or federal government or regional inter-governmental agencies to provide emergency response for hazardous materials.

(6) "Hazardous Material" means a substance that can be solid, liquid or gas, that when released is capable of creating harm to people, the environment and property and includes weapons of mass destruction as well as illicit labs, environmental crimes, and industrial sabotage.

(7) "Emergency Response Services" means providing or coordinating on-site protective or offensive actions to reduce the risk of harm to people, the environment and property during the initial, time-critical phase of a hazardous materials/WMD incident.

(8) "Institute of Emergency Services and Homeland Security" means a college entity of Utah Valley University of that same name.

(9) "NFPA" means National Fire Protection Association.

(10) "SFM" means State Fire Marshal or authorized deputy.

(11) "Utah Fire Service Certification System" means the system approved by the Board to provide certification to those emergency personnel certifying in hazardous materials.

R710-12-5. Hazardous Materials Advisory Council.

(1) There is created by the board, the Hazardous Materials Advisory Council, whose duties are to provide direction to the board in matters relating to training and certification standards for hazardous materials emergency responders and emergency response agencies.

(2) The council's members shall be appointed by the board, shall serve four year terms, and shall consist of the following members:

(a) a representative from the career fire service;

(b) a representative from the volunteer fire service;

(c) a representative from the Department of Environmental Quality;

(d) a representative from the Department of Transportation;

(e) a representative from law enforcement;

(f) a representative from the Fire and Rescue Academy;

(g) a representative from the State Fire Marshal office;

(h) a representative from the National Guard;

(j) a representative from a Local Emergency Planning Committee; and

(k) a representative from private industry.

(3) The council shall meet quarterly or as directed, and a majority of the members shall be present to constitute a quorum.

(4) The council shall select one of its members to act in the position of chair, and another member to act as vice chair.

(a) The chair and vice chair shall serve one year terms on a calendar year basis.

(b) Elections for chair and vice chair shall occur at the meeting conducted in the last quarter of each calendar year.

(c) If voted upon by the council, the vice chair will become the chair the next succeeding calendar year.

(5) If a council member has two or more unexcused absences during a 12 month period, from regularly scheduled meetings, it is considered grounds for dismissal pending review by the board. The Coordinator shall submit the name of the member to the board for status review.

(6) A member of the council that cannot be in attendance, may have a representative of their respective organization attend and vote by proxy for that member or the member may have another council member vote by proxy, if submitted and approved by the coordinator prior to the meeting.

(7) The chair or vice chair of the council shall report to the board the activities of the council at regularly scheduled board meetings. The coordinator may report to the board the activities of the council in the absence of the chair or vice chair.

(8) The council shall consider all subjects presented to them, subjects assigned to them by the board, and shall report their recommendations to the board at regularly scheduled board meetings.

(9) One-half of the members of the council shall be reappointed or replaced by the board every two years.

R710-12-6. Training.

(1) Instruction materials designed for statewide use that will teach minimum core competencies for those persons certifying to provide response services regarding hazardous material emergencies shall be approved by the council and accepted by the Utah Fire Service Certification Council. (2) Written examinations, practical or actual demonstrations, and any other required testing given for core competency, for those persons certifying to provide response services regarding hazardous material emergencies statewide, shall be approved by the council and accepted by the Utah Fire Service Certification Council.

R710-12-7. Certificates.

(1) No person shall provide hazardous materials services as a member of an emergency response agency without first receiving a certification issued by the Utah Fire Service Certification Council.

(2) To be certified in hazardous material response, a request for certification shall be made in writing to the Utah Fire Service Certification System.

(a) The applicant shall indicate which of the five certification levels the applicant will apply for:

(i) Awareness Level;

(ii) Operations Level Responder;

(iii) Hazardous Materials Technician;

(iv) Hazardous Materials Officer; or

(v) Hazardous Materials Incident Commander.

(3) Examination.

(a) An applicant certifying at the Awareness Level shall be trained to meet all the competencies in Chapter 4 of NFPA 472 and pass a written examination with a minimum score of 70%.

(b) An applicant certifying as an Operations Level Responder shall meet all the requirements listed in Section R710-12-7(3)(a), and shall be trained to meet all the competencies in Chapter 5 of NFPA 472, and pass a written examination with a minimum score of 70%. The applicant shall also pass a practical or actual demonstration on some selected aspects of hazardous materials consistent with the level seeking certification.

(c) An applicant certifying as a Hazardous Materials Technician shall pass all the requirements listed in Sections R710-12-7(3)(a) and R710-12-7(3)(b), and shall be trained to meet all the competencies in Chapter 7 of NFPA 472, and shall pass a written examination with a minimum score of 70%. The applicant shall also pass a practical or actual demonstration on some selected aspects of hazardous materials consistent with the level seeking certification.

(d) An applicant certifying as a Hazardous Materials Officer shall meet all the requirements listed in Sections R710-12-7(3)(a) through R710-12-7(3)(b), and shall be trained to meet all the competencies in Chapter 10 of NFPA 472, and shall pass a written examination with a minimum score of 70%. The applicant shall also pass a practical or actual demonstration on some selected aspects of hazardous materials consistent with the level seeking certification.

(e) An applicant certifying as a Hazardous Materials Incident Commander shall meet all the requirements listed in Sections R710-12-7(3)(a) through R710-12-7(3)(b), and shall be trained to meet all the competencies in Chapter 8 of NFPA 472, and shall pass a written examination with a minimum score of 70%. The applicant shall also pass a practical or actual demonstration on some selected aspects of hazardous materials consistent with the level seeking certification.

(4) Following receipt of the properly completed application and compliance with Section R710-12-7(3), the Institute of Emergency Services and Homeland Security through the Utah Fire Service Certification Council shall issue a certificate.

(5) Original certificates shall be valid for three years from the date of certification issuance. Thereafter, each certificate of registration shall be renewed every three years from issuance, unless otherwise specified by a Utah certification standard.

(6) Renewal shall be made as directed by the Utah Fire Service Certification Council.

(7) Every holder of a valid certificate shall provide to the Utah Fire Service Certification Council written verification from the authorizing agency that they have received continuing training in hazardous materials necessary to maintain competency over the previous three-year period of certification issuance.

R710-12-8. Adjudicative Proceedings.

All adjudicative proceedings performed with regard to a certificate issued under Section R710-12-7 shall proceed as outlined in the Utah Fire Service Certification System, Policy and Procedures Manual.

R710-12-9. Fees.

The required fee for certification and recertification shall be paid to the Utah Fire Service Certification System.

Notice of Continuation March 8, 2013

R710. Public Safety, Fire Marshal.
R710-13. Reduced Cigarette Ignition Propensity and Firefighter Protection Act.
R710-13-1. Purpose.

The purpose of this rule is to establish minimum rules for the enactment of the Reduced Cigarette Ignition Propensity and Firefighter Protection Act.

R710-13-2. Authority.

This rule is authorized by Section 53-7-407.

R710-13-3. Definitions.

(1) "AG" means Attorney General
(2) "Board" means Utah Fire Prevention Board.
(3) "NFPA" means National Fire Protection Association.
(4) "SFM" means State Fire Marshal or authorized deputy.
(5) "Tax Commission" means the Utah State Tax Commission.

R710-13-4. Certification and Product Change.

(1) If the SFM intends to remove a brand from the certified list, it will send a notice of intent to deny to the manufacturer. The notice of intent shall include the following:
(a) the factual and legal deficiencies upon with the SFM intended action rests;
(b) the actions the manufacturer must take to satisfy the factual or legal deficiencies upon with the intended action is based; and
(c) the notification that the manufacturer shall have 15 working days to cure the deficiencies and submit documentation or other information to correct the deficiencies. The SFM may extend the time period for a manufacturer to cure the deficiencies.

R710-13-5. Adjudicative Proceedings.

(1) Adjudicative proceedings performed by the agency shall proceed informally as authorized by Sections 63G-4-202 and 63G-4-203.

R722. Public Safety, Criminal Investigations and Technical Services, Criminal Identification.
R722-910. Non-Reportable Traffic Offenses.
R722-910-1. Purpose.

The purpose of this rule is to establish procedures regarding the collection and dissemination of non-reportable traffic offenses.

R722-910-2. Authority.

This rule is authorized by Subsection 53-10-104(13).

R722-910-3. Definitions.

(1) Terms used in this rule are defined in Section 53-10-102.

(2) In addition:

(a) "traffic offense" has the same meaning as defined in Subsection 77-40-102(11).

R722-910-4. Dissemination of Criminal History Record Information.

(1) The division shall collect and disseminate criminal history record information in accordance with Utah Code Ann. Section 53-10-101 et seq., except when it is information corresponding to a non-reportable traffic offense as defined in Subsection 77-40-102(11).

(2) A law enforcement agency is not required to submit fingerprints as provided in Section 53-10-207 in connection with any offense that meets the definition of a non-reportable traffic offense.

77-40-102(11)

R728. Public Safety, Peace Officer Standards and Training.
R728-401. Training Academy Requirements.
R728-401-1. Authority.

This rule is authorized by Subsection 53-6-105(1)(k), which provides that the director shall, with the advice of the council, make rules necessary to administer Title 53 Chapter 6.

R728-401-2. Purpose.

The purpose of this rule is to provide procedures regarding the operation of training programs.

R728-401-3. Definitions.

(1) Terms used in this rule are defined in Section 53-6-102.

(2) In addition:

(a) "Agency-sponsored applicant" means a person seeking admission into a training program who is a full time, paid employee of a governmental entity, and who the division has responsibility to train as defined in Section 53-6-212, "agency-sponsored applicant" does not include a part-time, reserve, or contract employee;

(b) "Satellite academy" means a certified academy or training program administered by a governmental entity or institution of higher education that is established primarily for the training of its employees or self-sponsored applicants;

(c) "Self-sponsored applicant" means a person seeking admission into a training program who is responsible for paying the cost of the training program;

(d) "Training program" means the basic training courses offered by the division or one of the satellite academies, which are required to become a:

(i) special function officer;

(ii) correctional officer;

(iii) law enforcement officer; or

(iv) dispatcher.

R728-401-4. Admission into a Training Program.

(1) All applicants seeking to attend a training program must submit an application packet to the division in accordance with R728-403.

(2) The division shall pay the costs of an agency-sponsored applicant to attend the training program offered at POST.

(a) The agency-sponsored applicant's employer must verify the applicant is a full-time employee of a governmental entity who will be functioning as a peace officer.

(3) Self-sponsored applicants shall be responsible for paying all costs associated with the training program.

(a) Self-sponsored applicants may only attend a training program offered at POST if special circumstances exist and approval has been granted by the director.

R728-401-5. Approval of Satellite Academies.

(1) A law enforcement agency, correctional agency, or institution of higher learning that meets the conditions and requirements set forth below may conduct a basic peace officer training program that is primarily established for the training of self-sponsored applicants, with the approval of the council.

(2) An entity seeking to operate a satellite academy shall submit to the director, a request in writing and include documentation of:

(a) the background and qualifications of the individual who will be the director of the satellite academy; and

(b) the need to operate the satellite academy through evidence that:

(i) there are no satellite academies within a 30 mile radius of the location where the new academy will operate;

(ii) a law enforcement agency in the county or region has requested, in writing, that the entity operate a satellite academy;

(iii) a satellite academy operating within the county, region or within 30 miles of the location of the applying entity has indicated that it is unable to meet the demand for training; or

(iv) the entity will provide a unique or specialized training program that is not currently offered in the county, region, or within 30 miles of the location of the applying entity.

(3) The division, with the approval of the council, may authorize an entity to operate a satellite academy if the entity demonstrates there is a need for additional training programs:

(a) in the county or region where the proposed satellite academy is to operate; or

(b) that cannot reasonably be met by the division.

R728-401-6. Procedures for Course Validation.

(1) Courses taught at training programs shall contain the content and meet the requirements established by the division and approved by the council.

(2) A satellite academy shall provide the division with a class schedule and a list of instructors before training may begin.

(3) A satellite academy shall ensure that all equipment required to perform the training be furnished by the sponsoring agency, self-sponsored applicant, or training facility; and that such equipment meets POST standards.

(4) All instructors must be POST certified instructors, and approved to instruct in their assigned topic.

(a) Instructors teaching academic portions of the curriculum must have completed an instructor development course recognized by the division and received POST certification as outlined in R728-502-5.

(b) Instructors teaching skill portions of the curriculum must have completed the specialty instructor requirements for the specific skill area being taught and received POST certification as outlined in R728-502-9.

(c) Subject matter experts may be used as guest instructors.

(5) Lesson plans for each topic must be prepared in accordance with the currently approved student performance objectives.

(6) The POST approved on-line assessment system shall be utilized to administer all tests and examinations.

(a) Tests and examinations shall be administered as outlined in the approved curriculum.

(b) Program coordinators must proctor all tests and examinations.

(c) The final certification exam shall not be administered until the student has completed all academic requirements of the course.

(d) The final certification examination shall be a comprehensive examination and shall require a minimum score of 80% to pass.

(7) Physical fitness assessment standards are set by the division and approved by the council.

(a) Program coordinators must administer the physical fitness assessment in accordance with POST approved procedures.

(8) Attendance rosters shall be kept to satisfy statutory requirements and copies of these rosters shall be submitted to the division.

(a) A student who has missed more than 16 hours of a basic peace officer course, or four hours of a basic dispatcher course, may not become certifiable until appropriate makeup work has been completed.

(b) If, as determined by the academy staff, a student has missed a significant part of any subject or block of instruction, that student may not be certifiable until appropriate make-up work is completed.

(9) Successful completion of the course and completion of all POST required documentation is necessary before the student may be certifiable.

(a) All documentation must be completed and submitted to the division within 14 calendar days of completion of the course.

(10) The division shall conduct audits and site visits of each satellite academy to ensure compliance with all rules established herein.

Notice of Continuation December 13, 2011	**53-6-202**
	53-6-212
	53-6-310

R728. Public Safety, Peace Officer Standards and Training.
R728-403. Procedures for Certification.
R728-403-1. Authority.

This rule is authorized by Subsection 53-6-105(1)(k), which provides that the director shall, with the advice of the council, make rules necessary to administer Title 53 Chapter 6.

R728-403-2. Purpose.

The purpose of this rule is to provide procedures for a dispatcher or peace officer to become certified or reactivate certification.

R728-403-3. Definitions.

(1) Terms used in this rule are defined in Section 53-6-102.

(2) In addition:

(a) "Actively Engaged" means a currently certified peace officer as defined in Section 53-13-102 through 53-13-105 who works while on duty as defined in 53-13-101 for a minimum of 60 hours per reporting year and receives annual training as defined in Section 53-6-306(3)(a).

(b) "Applicant" means a person seeking to become certified or reinstate certification as a dispatcher or peace officer;

(c) "Certification examination" means the written test given to an applicant to become certified or to reactivate certification as a dispatcher or peace officer;

(d) "Physical fitness test" means the physical fitness standards adopted by the council on June 4, 2009, which must be met in order to become a peace officer;

(e) "Reporting year" means an annual period starting on July 1, and ending on June 30 of the following year;

(f) "Training program" means the basic training courses offered by the division or one of the certified academies, which are required to become a:

(i) special function officer;

(ii) correctional officer;

(iii) law enforcement officer; or

(iv) dispatcher; and

(g) "Training year" means the same as reporting year.

R728-403-4. Application for Training and Certification.

(1) An applicant seeking to become certified as a dispatcher or peace officer shall submit a completed application packet to the division that includes:

(a) a written or electronic application form provided by the division;

(b) a photocopy of a government-issued identification card;

(c) evidence that the applicant is a United States citizen to include a photocopy of a birth certificate or a photocopy of a United States passport, or, in the case of naturalized citizen, a naturalization number;

(d) one completed FBI applicant fingerprint card (Form FD-258) with the applicant's legible fingerprints;

(e) one recent color photograph of passport quality with the applicant's name written on the back of the photograph;

(f) evidence that the applicant has completed high school or obtained the educational equivalent; and

(g) the application fee, unless the applicant has been hired as a dispatcher or peace officer by a governmental entity.

(2) An applicant seeking to become a certified peace officer shall also submit:

(a) proof that the applicant has achieved a passing score on the National Peace Officer Selection Test (NPOST), unless the applicant was certified as a special functions officer prior to 1997 and is applying to become a law enforcement officer or correctional officer; and

(b) a medical evaluation from a medical doctor indicating the applicant is able to participate in all aspects of the training program.

(3) The applicant must submit the application packet four weeks prior to the start of a training program to allow the division adequate time to process the application packet.

(a) The division shall not accept nor process any application that is not complete or fails to include all required attachments.

(4) An application shall be considered valid for one year from the time the application is completed by the applicant.

(5)(a) Once a completed application packet is received by the division, the packet shall be reviewed to determine if the applicant meets the requirements in Sections 53-6-203 or 53-6-302.

(b) If the division does not have sufficient information to make this determination, the division may request the applicant provide additional information.

(6)(a) In determining whether an applicant has demonstrated good moral character as required by Sections 53-6-203 or 53-6-302, the division shall conduct a criminal history background check of local, state, and national criminal history files to determine if the applicant has a criminal record.

(b) An applicant with a criminal history that contains any of the following shall be denied entrance into a training program and shall not receive certification:

(i) a conviction of a felony under state or federal law in this or any other state;

(ii) dismissal from the armed services under dishonorable conditions; or

(iii) a conviction of domestic violence, unless the conviction has been expunged or set aside.

(c) An applicant who has been convicted of, or involved in conduct which is a state or federal criminal offense, may not be allowed to attend a basic training program or receive POST certification for a period of time consistent with the POST Council disciplinary guidelines as approved by the council on June 5, 2013.

(i) The waiting period shall run from the date of the involvement, unless the applicant is still under court supervision (i.e. probation) for the violation, in which case the applicant will not be allowed to make application until the probation has been successfully completed or the applicant is no longer under court supervision.

(ii) Waiting periods shall run consecutively for applicants who have been convicted of or involved in multiple violations.

(d) Any activity involving the abuse of alcohol or drugs may be considered in determining whether an applicant will be allowed to attend a basic training program or receive POST certification.

(e) An applicant convicted of or involved in minor crimes not otherwise identified in this rule, including traffic violations that reflect a willful disregard for lawful behavior as evidenced by repetitiveness of conduct or other aggravating factors, shall not be allowed to attend a basic training program or receive POST certification prior to one year from the latest conviction or involvement.

(i) In cases where arrest warrants are issued, the one-year waiting period will begin at the time the warrant is served on the applicant.

(f) If an applicant is found to have falsified any information to gain admittance into a basic training program, a two-year waiting period shall be applied from the date the division becomes aware of the falsification.

(i) If the information falsified is covered by other

sections of this rule, (i.e., state or federal criminal offense) and a specific waiting period is required, the division shall require the applicant to wait the longer of the two periods. Waiting periods will not be combined to run consecutively.

(ii) If an applicant completes the basic training program and prior to taking the certification examination the division becomes aware of a falsification, the applicant shall not be allowed to take the certification examination.

(iii) An applicant who is dismissed during the course of a basic training program for falsifying any information to obtain certification shall not be eligible for further POST training or certification until the two-year waiting period has been met.

(iv) If an applicant becomes certifiable and then is subsequently discovered to have falsified information to obtain certified status, that individual may be subject to suspension of their POST certification.

(7) If the applicant is the subject of an ongoing investigation by the division, the applicant shall not be deemed eligible to attend a training program until the investigation is completed.

(8) If the division determines that the applicant meets all of the requirements in Sections 53-6-203 or 53-6-302, the division shall notify the applicant that the applicant is eligible to attend a training program.

(9) If the division determines that the applicant does not meet the requirements in Sections 53-6-203 or 53-6-302, the applicant shall be denied admission to a training program.

(10) Applicants who are accepted into a peace officer training program shall pass the POST physical fitness requirements for entrance into the specific training program as approved by the Council and outlined in POST policy and procedure 2390-Physical Training Requirements.

(11) Applicants who are accepted into a peace officer training program shall be subject to random and "for cause" drug testing as outlined in POST policy and procedure 2400-Drug Testing for Applicants and Cadets.

(12) Applicants seeking dispatcher certification must also provide evidence of:

(a) Utah Emergency Medical Dispatcher (EMD) certification;

(b) Bureau of Criminal Identification (BCI) proficiency certificate; and

(c) documentation showing completion of:

(i) Incident Command System (ICS) 100 training;

(ii) ICS 200 training; and

(iii) National Incident Management System (NIMS) 700 training.

R728-403-5. Completion of a Training Program.

(1) An applicant successfully completes the training program by:

(a) attending all required training courses;

(b) obtaining passing scores on all intermediate and subject specific tests; and

(c) participating in all required physical fitness, practical skill training and other required activities.

(2) Applicants shall be subject to all officially published policy at the training academy they attend.

(3) An applicant who fails to complete any portion of the academic training program may not take the certification examination.

(4) An applicant may take the certification examination prior to passing the physical fitness, defensive tactics, firearms, or emergency vehicle operations tests.

(5) An applicant who is unable to pass the physical fitness, defensive tactics or firearms tests, within one year after completing the training program or within one year of taking the certification examination shall be denied certification.

(6) An applicant who is unable to pass the emergency vehicle operations tests within one year from completion of the emergency vehicle operations training program shall be denied certification.

(7) An applicant who fails the certification examination shall have one opportunity to take a make-up examination within one year of the first examination.

(a) An applicant who fails the certification examination after two attempts shall be denied certification and shall not be permitted to take the certification examination again until the applicant satisfactorily completes another approved basic training program.

(8) An applicant who successfully completes the training program shall be certified as a peace officer in the state of Utah.

R728-403-6. Waiver of Basic Training Program.

(1) An applicant who has not attended a training program offered by the division or a satellite academy, may seek to waive a training program by submitting a completed waiver packet to the division, which includes:

(a) a completed application packet as provided in R728-403-4;

(b) documentation showing that the applicant has completed training equivalent to the training program the applicant is seeking to waive, such as:

(i) a copy of the training curriculum;

(ii) the number of hours completed; and

(iii) the date the training was completed; and

(c) evidence of any prior employment as a dispatcher or peace officer that includes:

(i) a detailed job description; and

(ii) verification from the applicant's employer of the last date the applicant worked as a dispatcher or peace officer.

(2) Once the division has received a completed waiver packet, the division shall review the packet to determine if the training completed by the applicant is the equivalent of the training program the applicant seeks to waive.

(a) If the division does not have sufficient information to make this determination, the division may request that the applicant submit additional information.

(3) If the division determines the peace officer training completed by the applicant is the equivalent of the peace officer training program the applicant seeks to waive, and the program was completed less than four years prior to the date the applicant will take the certification examination, or the applicant has been actively engaged in performing the duties of a peace officer within the past four years, and the applicant meets all of the requirements in R728-403-4 and Sections 53-6-203 and 53-6-206, the applicant may take the physical fitness test and the certification examination.

(a) If the applicant passes both the physical fitness test and the certification examination, the applicant shall be certified as a peace officer in the state of Utah.

(b) If the applicant fails to pass the certification examination, the applicant shall be given one additional opportunity to pass the certification examination, which must be completed within one year of the first examination.

(c) An applicant who fails the certification examination after two attempts shall be denied certification and shall not be permitted to take the certification examination again until the applicant satisfactorily completes an approved basic training program.

(d) If the applicant fails to pass the physical fitness test, the applicant may be given additional opportunities to pass during regularly scheduled fitness tests provided by POST.

(e) The applicant must pass the certification examination and the physical fitness test within four years

from the date of completion of the original training program, or four years from the date they were last actively engaged in the duties of a peace officer.

(f) An applicant who successfully completes the waiver process for law enforcement officer certification or correctional officer certification shall be deemed to have also completed requirements for special functions officer certification.

(g) An applicant seeking to be certified as both a law enforcement officer and a correctional officer must complete the waiver process and pass the certification examinations for each of those peace officer classifications.

(4) If the division determines that the dispatcher training completed by the applicant is the equivalent of the training program the applicant seeks to waive, and the program was completed less than four years prior to the date the applicant will take the certification examination, or the applicant has been actively engaged in performing the duties of a dispatcher within the past four years, and the applicant meets all of the requirements in R728-403-4 and Sections 53-6-302 and 53-6-304, the applicant may take the certification examination.

(a) If the applicant passes the certification examination, the applicant shall be certified as a dispatcher in the state of Utah.

(b) If the applicant fails to pass the certification examination, the applicant shall be given one additional opportunity to pass the certification examination, which must be completed within one year of the first examination.

(c) An applicant who fails the certification examination after two attempts shall be denied certification and shall not be permitted to take the certification examination again until the applicant satisfactorily completes an approved basic training program.

(5) If the applicant fails to meet any of the requirements set forth in this rule, the applicant may not waive the training program.

R728-403-7. Reactivation of Certification.

(1) Pursuant to Section 53-6-208 or 53-6-306, the certification of a peace officer or dispatcher who has not been actively engaged in performing the duties of a peace officer or dispatcher for 18 months shall be designated "inactive".

(a) The certification of a peace officer or dispatcher that has been suspended for more than 18 consecutive months due to disciplinary action or failure to complete in-service training shall be considered "inactive".

(2) An applicant whose certification has become inactive may reactivate the applicant's peace officer or dispatcher certification by submitting a completed reactivation packet to the division, which includes:

(a) a completed application packet as provided in R728-403-4; and

(b) evidence of the applicant's prior employment as a dispatcher or peace officer.

(3) Once the division has received a completed reactivation packet, the division shall review the packet to determine if the applicant meets all of the requirements in Sections 53-6-203 and 53-6-208, or 53-6-302 and 53-6-306.

(a) If the division does not have sufficient information to make this determination, the division may request the applicant submit additional information.

(4) If an applicant for reactivation of peace officer certification meets all of the requirements in Sections 53-6-203 and 53-6-208, the applicant may take the physical fitness test and the certification examination as provided in R728-403-5.

(a) If the applicant passes both the physical fitness test and the certification examination, the applicant shall be certified as a peace officer in the state of Utah.

(b) If the applicant fails to pass the certification examination, the applicant shall be given one additional opportunity to pass the certification examination, which must be completed within one year of the first examination.

(c) An applicant who fails the certification examination after two attempts shall be denied certification and shall not be permitted to take the certification examination again until the applicant satisfactorily complete an approved basic training program.

(d) If an applicant fails to pass the physical fitness test, the applicant may be given additional opportunities to pass during regularly scheduled fitness tests provided by POST.

(4) If an applicant for reactivation of dispatcher certification meets all of the requirements in Sections 53-6-302 and 53-6-306, the applicant may take the certification examination, as provided in R728-403-5.

(a) If the applicant passes the certification examination, the applicant shall be certified as a dispatcher in the state of Utah.

(b) If the applicant fails to pass the certification examination they will be given one additional opportunity to pass the certification examination which must be completed within one year of the first examination.

(c) An applicants who fails the certification examination after two attempts shall be denied certification and shall not be permitted to take the certification examination again until the applicant satisfactorily complete an approved basic training program.

(5) If the applicant for reactivation of peace officer or dispatcher certification fails to meet any of these requirements, the applicant's certification may not be reactivated.

(6) The certification of a peace officer or dispatcher that has been suspended or inactive for more than four consecutive years shall be considered "lapsed" and the peace officer or dispatcher shall comply with the requirements in Section 53-6-208 or 53-6-306 before certification may be reinstated.

R728-403-8. Denial of Certification.

(1) An applicant shall be denied certification for failing to satisfy any of the requirements under administrative rule R728-403.

(2) An applicant who is the subject of an ongoing investigation by the division, or who is under court supervision for a state or federal criminal offense, may not be certified until the investigation has been completed and/or the court supervision has been terminated.

(3) If the division denies an applicant certification, the division shall issue a letter of denial by mail.

(a) The letter of denial shall state the reasons for denial and indicate that the applicant may appeal the decision to the director by filing a written request for review within 30 days from the date of the division's decision as provided by Section 63G-4-301.

(b) Within a reasonable time after receiving the appeal, the director shall review the matter and determine whether the applicant may be certified.

(c) If upon further review the director denies the applicant's appeal, the director shall notify the applicant by letter and indicate that the applicant has the right to appeal the director's decision by filing a petition for judicial review within 30 days as provided in Section 63G-4-402.

(4) An applicant who has been denied certification shall meet all of the requirements in this rule before being certified.

(5) All adjudicative proceedings under this rule shall be informal according to the provisions in Sections 63G-4-202 through 63G-4-203.

R728. Public Safety, Peace Officer Standards and Training.
R728-410. Guidelines Regarding Annual Statutory Training.
R728-410-1. Authority.

This rule is authorized by Subsection 53-6-105(1)(k), which provides that the director shall, with the advice of the council, make rules necessary to administer Title 53 Chapter 6.

R728-410-2. Purpose.

The purpose of this rule is to provide procedures regarding the reporting of annual statutory training.

R728-410-3. Definitions.

(1) Terms used in this rule are defined in Section 53-6-102.

(2) In addition:

(a) "Annual statutory training" means the annual training requirement for peace officers and dispatchers as established in sections 53-6-202 and 53-6-306;

(b) "In-service training" has the same meaning as annual statutory training;

(c) "Reporting year" means an annual period starting on July 1, and ending on June 30; and

(d) "Training year" means the same as reporting year.

R728-410-4. Annual Training Requirement.

(1) The director may waive a portion of the annual statutory training requirement under the following circumstances:

(a) a peace officer who is employed for only part of a year shall obtain three and one-half hours for each month employed during the reporting year;

(b) a dispatcher who is employed for only part of a year shall obtain one and three-fourth hours for each month employed during the reporting year; and

(c) a peace officer or dispatcher who terminates employment and then returns to work within 18 months shall be required to make up any annual training deficiency from the previous year.

(d) A peace officer or dispatcher who is on long term disability, medical leave, or restricted duty, may obtain a waiver of training by providing a letter from a physician stating that participation in any type of training, including watching video or computer based courses would be detrimental to the individual's health.

(e) A peace officer or dispatcher who is actively deployed in military service may obtain a waiver of training hours for active military service by submitting a copy of the active duty order to the division.

(i) The peace officer or dispatcher must obtain the prorated number of training hours for each month not actively deployed during the reporting year.

R728-410-5. Training Record Maintenance.

(1) The chief administrative officer of an agency employing peace officers or dispatchers shall be responsible for the recording of all training obtained by peace officers or dispatchers in his or her agency.

(2) The record must be accurate and available in the event of an audit or subpoena of training records.

(3) The training record shall contain the following:

(a) the subject or topic instructed;

(b) the number of classroom or field hours;

(c) the location and date of the training; and

(d) the name of the instructor.

R728-410-6. Reporting Training -- Agency Responsibility.

(1) At the conclusion of each training year, a chief administrative officer employing peace officers or certified dispatchers shall report to the division the number of training hours received by each officer or certified dispatcher employed by that agency at any time during the training year, regardless of the employee's current employment status.

(2) This report is due to the division by July 31.

(a) The report shall be submitted electronically and must contain the following information:

(i) name of the officer or dispatcher;

(ii) the POST identification number of each peace officer or dispatcher; and

(iii) the number of training hours received by each peace officer or dispatcher during the reporting year.

(3) The chief administrative officer shall follow procedures outlined in POST policy and procedures on reporting training hours.

R728-410-7. Authorized Training.

(1) All training offered by or though the division is authorized for in-service credit.

(2) The chief administrative officer of an agency may authorize other forms of training for peace officers or dispatchers employed by that agency.

(a) The chief administrative officer shall assume responsibility and liability for course content and instructor qualification not provided by the division.

R728-410-8. Suspension for Failure to Obtain Annual Statutory Training.

(1) The division shall suspend the certification of any peace officer or dispatcher who:

(a) fails to receive the required annual training hours by July 31; or

(b) for whom the chief administrative officer of the employing agency fails to report required training hours to the division by July 31.

(2) The individual and the employing agency shall be notified of this action in writing.

(3) The suspension shall remain in effect until the deficient training hours are completed and reported to the division.

(4) The division shall notify the individual and employing agency when the certification has been reinstated.

(5) If the individual fails to make up the deficient training by October 1, the individual's name shall be reported to Utah Retirement Systems (URS) for determination by URS as to how the deficient hours may affect the individual's retirement credit.

(a) Deficient hours reported to the division after October 1, shall only be used to reinstate peace officer status and will not be reported to URS.

(6) Training received by a suspended officer or dispatcher in a new training year shall be credited to the previous deficient training year until the deficiency is satisfied.

(a) Training hours used to satisfy an old deficiency may not be credited to the new training year.

R728. Public Safety, Peace Officer Standards and Training.
R728-411. Guidelines for Administrative Action Against Individuals Functioning As Peace Officers Without Valid Peace Officer Certification.
R728-411-1. Authority.

This rule is authorized by Subsection 53-6-105(1)(k), which provides that the director shall, with the advice of the council, make rules necessary to administer Title 53 Chapter 6.

R728-411-2. Purpose.

The purpose of this rule is to provide procedures for administrative action when an individual is found to be exercising the authority of a peace officer without valid peace officer certification.

R728-411-3. Definitions.

Terms used in this rule are defined in Section 53-6-102.

R728-411-4. Impersonating a Peace Officer.

(1) If the division becomes aware that an individual is illegally exercising the authority of a peace officer, the division shall refer the matter to the proper law enforcement agency having jurisdiction, for the following circumstances:

(a) when an individual has never been certified as a peace officer;

(b) when an individual's certification has been revoked by the council; and

(c) when an individual's certification has lapsed pursuant to Section 53-6-208.

R728-411-5. Unauthorized Exercise of Authority.

(1) If the division becomes aware that an individual whose peace officer certification is not currently active is exercising the authority of a peace officer, the division shall follow the administrative process outlined in Section R728-411-6, for the following circumstances;

(a) when an individual's certification has been suspended by the council;

(b) when an individual's certification has been suspended due to an annual training deficiency pursuant to Section 53-6-202;

(c) when an individual's certification has been designated "inactive" pursuant to Section 53-6-208; and

(d) when an individual has completed a basic training program and become certified, but is not "sworn" as provided in Sections 53-13-103 to 53-13-106.

(2) In any of the above circumstances the division may also refer the matter to the proper law enforcement agency having jurisdiction.

R728-411-6. Procedures Governing Unauthorized Exercise of Authority.

(1) If an individual is found to be performing the duties and functions of a peace officer without valid certification or authority as outlined in Section R728-411-5, the following procedures will be initiated by the division:

(a) written notice will be sent by standard mail, or electronically, to the individual and the individual's employing agency administrator indicating that the individual does not have the statutory authority to act as a peace officer in the State of Utah;

(b) The written notice shall:

(i) state that the individual should cease any and all activities as a peace officer; and

(ii) indicate the appropriate procedures for the individual and employing agency to follow in order for the individual to acquire peace officer authority.

(c) The individual must respond to the written notice within ten business days.

(2) Failure to submit a response within ten business days or failure to immediately cease the unauthorized exercise of authority, shall cause the division to seek a writ from the Attorney General's Office to cease and desist from acting as a peace officer in the State of Utah.

(a) The writ will be directed to the individual and the individual's employing agency.

(3) Failure to cease the unauthorized exercise of authority after the issuance of the writ, may result in:

(a) criminal charges being sought against the individual for a violation of Section 76-8-512.; and

(b) administrative action against the individual's certification for a violation of Section 53-6-211.

R728. Public Safety, Peace Officer Standards and Training.
R728-502. Procedure for POST Instructor Certification.
R728-502-1. Authority.

This rule is authorized by Subsection 53-6-105(1)(k), which provides that the director shall, with the advice of the council, make rules necessary to administer Title 53 Chapter 6.

R728-502-2. Purpose.

The purpose of this rule is to provide guidelines for the certification of training instructors and to establish standards for the revocation of POST instructor certification pursuant to Section 53-6-105(1)(c).

R728-410-3. Definitions.

(1) Terms used in this rule are defined in Section 53-6-102.

(2) In addition:

(a) "Annual statutory training" means the annual training requirement for peace officers and dispatchers as established in Sections 53-6-202 or 53-6-306;

(b) "Applicant" means an individual who has applied to become a POST certified instructor;

(c) "Basic training" means the basic training courses offered by the division or one of the satellite academies, which are required to become a:

(i) special function officer;

(ii) correctional officer;

(iii) law enforcement officer; or

(iv) dispatcher;

(d) "DT" means defensive tactics;

(e) "EVO" means emergency vehicle operation;

(f) "IW" means impact weapon;

(g) "In-service training" has the same meaning as annual statutory training;

(h) "K9" means canine;

(i) "POST certified instructor" means an individual who has completed the requirements set forth in this rule and is authorized by the division to conduct basic training courses;

(j) "Satellite academy" means a certified academy or training program administered by a governmental entity or institution of higher education which is established primarily for the training of its employees or self-sponsored applicants; and

(k) "Specialty instructor" means an individual who has completed the requirements set forth in this rule and is authorized by the division to conduct specific practical skill training courses.

R728-502-4. POST Certified Instructors Authority and Duties.

(1) A POST certified instructor shall be authorized to teach classes sponsored by the division including basic training, in-service, and regional classes.

(2) An instructor presenting in-service training must be in harmony with the division's current basic training curriculum.

(3) An instructor presenting basic training classes must follow the basic training student performance objectives approved by the division and the council.

(a) If POST approved student performance objectives are not available for the subject matter, an instructor shall have a lesson plan approved by the division prior to teaching in a basic training class.

R728-502-5. Instructor Certification Requirements.

(1) An applicant must meet the following requirements before being certified as an instructor:

(a) have two years of experience as a full-time peace officer or dispatcher;

(b) receive a recommendation from the chief administrative officer of the agency employing the applicant; and

(c) complete an approved instructor development course or specialty instructor certification course as outlined below.

(2) The requirements in this Subsection (1) may be waived if the applicant has specialized training or expertise in an area which, in the opinion of the director, would be beneficial in the training of law enforcement officers.

(a) An individual wishing to qualify for instructor certification wavier under this Subsection (2), must submit a written request to the director providing evidence of their specialized training or experience and justification as to why this training or experience would be beneficial in the training of law enforcement officers.

R728-502-6. Instructor Recertification.

(1) Instructor recertification is not required except in specialty areas as provided in Section R728-502-9.

(2) An instructor teaching in a professional specialty area, including but not limited to, law classes, first aid, CPR, intoxilyzer, and chemical munitions, shall maintain current certification and continuing education requirements of the respective professional certification or licensing entity.

(3) An instructor teaching in other specialty areas may be subject to industry standards that establish specific recertification requirements.

R728-502-7. Application for Instructor Certification.

(1) To obtain a POST instructor certification, an applicant shall submit a completed application for POST Instructor Development School to the division and include the following:

(a) documentation of years of experience;

(b) a letter of recommendation from the applicant's chief administrative officer; and

(c) documentation of specialized training.

(2) If the application is approved, the applicant shall be invited to attend a POST instructor development course.

(3) An applicant shall receive POST instructor certification upon successfully completing the instructor development course, which includes demonstrating to the course instructor the ability to develop a lesson plan following the style and format taught in the instructor development course.

R728-502-8. Agency In-Service Instructors.

(1) An agency is not required to utilize POST certified instructors for in-service training programs presented to members of their agency, which will allow the agency to formulate training programs designed to meet their needs utilizing local resources.

(2) If a POST certified instructor is not used for in-service training programs, the chief administrative officer of the agency sponsoring the training shall be solely responsible for the content of the class and the qualifications of the instructor.

R728-502-9. Specialty Instructors.

(1) An instructor who teaches practical skills and technical or high liability law enforcement subjects shall attend a specialty instructor course as provided in this Section.

(2) An instructor who completes a specialty instructor school may only instruct the specific skills covered in the specialty instructor school.

(a) An instructor who teaches other academic courses in

the classroom shall complete a POST approved instructor development course as provided in Sections R728-502-4 through R728-502-7.

(3) An EVO instructor shall be trained and certified in accordance with POST policy and procedure.

(a) EVO instructor certification shall be valid for three years from the date of issue.

(b) An EVO instructor must teach EVO for a minimum of 40 hours every three years in order to maintain certification.

(c) An EVO instructor must teach at least 20 of the 40 required hours at the POST EVO range under the direction of the POST EVO training supervisor.

(d) An EVO instructor may teach the remaining 20 hours of EVO instruction at individual agencies.

(4) A firearms instructor, including handgun instructor or rifle instructor, shall be trained and certified in accordance with POST policy and procedure.

(a) Firearms instructor certification is valid for three years from the date of issue.

(b) A firearms instructor must attend an eight hour recertification class conducted by POST and pass a practical examination every three years in order to maintain certification.

(5) A DT instructor shall be trained and certified in accordance with POST policy and procedure;

(a) DT instructor certification is valid for three years from the date of issue.

(b) A DT instructor must attend a POST defensive tactics instructor training course and successfully pass a practical and written examination every three years in order to maintain certification.

(6) An IW instructor shall be trained and certified in accordance with POST policy and procedure.

(a) IW instructor certification is valid for three years from the date of issue.

(b) An IW instructor must attend an impact weapon instructor training course and successfully pass a practical and written examination every three years in order to maintain certification.

(7) A K-9 instructor shall be trained and certified in accordance with POST policy and procedure.

(a) A K-9 instructor may conduct K-9 training, but is not authorized to conduct K-9 certification evaluations.

(b) K-9 instructor certification is valid for three years from the date of issue.

(c) A K-9 instructor shall attend 40 hours of K-9 instructor training and successfully pass a practical examination every three years in order to maintain certification

(8) A K-9 judge shall be trained and certified in accordance with POST policy and procedure.

(a) A K-9 judge shall be trained and certified as a K-9 instructor prior to being certified as a K-9 judge.

(b) A K-9 judge may conduct K-9 certification evaluations and K-9 training.

(c) K-9 judge certification is valid for three years from the date of issue.

(d) A K-9 judge shall attend 40 hours of K-9 judge training and successfully pass a practical examination every three years in order to maintain certification.

(e) A K-9 judge who successfully re-certifies is automatically re-certified as a K-9 instructor.

(9) RADAR/LIDAR instructors shall be trained and certified in accordance with POST policy and procedure;

(a) RADAR/LIDAR instructor certification is valid for three years from the date of issue.

(b) A RADAR/LIDAR instructor shall participate in one RADAR/LIDAR instructor school and successfully pass a written examination every three years in order to maintain certification.

R728-502-10. Revocation of Instructor Certification.

(1) The division may revoke an individual POST instructor certification if the instructor fails to meet any of the requirements specified in this rule.

(2)(a) If the division revokes an individual's POST instructor certification, the division shall issue a letter to the individual by regular mail.

(b) The letter shall state the reasons for termination of the individual's POST instructor certification and indicate that the individual has a right to appeal the decision to the director by filing a written request for review within 30 days from the date of the division's decision.

(3) An instructor whose peace officer or dispatcher certification is suspended or revoked by the POST Council, in accordance with Section 53-6-211 or Section 53-6-309, shall also have his or her POST instructor certification revoked or suspended for the period of time his or her peace officer or dispatcher certification is suspended.

	53-6-306

R746. Public Service Commission, Administration.
R746-200. Residential Utility Service Rules for Electric, Gas, Water, and Sewer Utilities.
R746-200-1. General Provisions.

A. Title -- These rules shall be known and may be cited as the Residential Utility Service Rules.

B. Purpose -- The purpose of these Rules is to establish and enforce uniform residential utility service practices and procedures governing eligibility, deposits, account billing, termination, and deferred payment agreements.

C. Policy --

1. The policy of these rules is to assure the adequate provision of residential utility service, to restrict unreasonable termination of or refusal to provide residential utility service, to provide functional alternatives to termination or refusal to provide residential utility service, and to establish and enforce fair and equitable procedures governing eligibility, deposits, account billing, termination, and deferred payment agreements.

2. Nondiscrimination -- Residential utility service shall be provided to qualified persons without regard to employment, occupation, race, handicap, creed, sex, national origin, marital status, or number of dependents.

D. Requirement of Good Faith -- Each agreement or obligation within these rules imposes an obligation of good faith, honesty, and fair dealings in its performance and enforcement.

E. Customer Information -- When residential service is extended to an account holder, a public utility shall provide the consumer with a consumer information pamphlet approved by the Commission which clearly describes and summarizes the substance of these rules. The utility shall mail or deliver a copy of this pamphlet, or a summarized version approved by the Commission, to its residential customers annually in September or October. Copies of this pamphlet shall be prominently displayed in the business offices maintained by the utility and furnished to consumers upon request. The utility has a continuing obligation to inform its consumers of significant amendments to these rules. Each utility with over 10,000 customers receiving service shall print and make available upon request a Spanish edition of a consumer information pamphlet. The English edition of the pamphlet shall contain a prominent notice, written in Spanish and English, that the utility has a Spanish edition of its pamphlet and whether or not it has qualified personnel available to help Spanish-speaking customers. In this section, utilities with fewer than 10,000 users may use the pamphlets printed by the Division of Public Utilities for the distribution and availability requirements.

F. Scope --

1. These rules shall apply to gas, water, sewer, and electric utilities that are subject to the regulatory authority of the Commission. Except as provided in R746-200-7(G)(4), Notice of Proposed Termination, these rules do not apply to master metered apartment dwellings. Commercial, industrial, government accounts and special contracts are also excluded from the requirements of these rules.

2. Upon a showing that specified portions of these rules impose an undue hardship and provide limited benefit to its customers, a utility may petition the Commission for an exemption from specified portions of these rules.

G. Customer's Statement of Rights and Responsibilities -- When utility service is extended to an account holder, annually, and upon first notice of an impending service disconnection, a public utility shall provide a copy of the "Customer's Statement of Rights and Responsibilities" as approved by the Commission. The Statement of Rights and Responsibilities shall be a single page document. It shall be prominently displayed in each customer service center.

R746-200-2. General Definitions.

A. "Account Holder" -- A person, corporation, partnership, or other entity which has agreed with a public utility to pay for receipt of residential utility service and to which the utility provides service.

B. "Applicant" -- As used in these rules means a person, corporation, partnership, or other entity which applies to a public utility for residential utility service.

C. "Budget Billing" -- Monthly residential payment plan under which the customer's estimated annual billing is divided into 12 monthly payments.

D. "Deferred Payment Agreement" -- As used in these rules means an agreement to receive, or to continue to receive, residential utility service pursuant to Section R746-200-5 and to pay an outstanding debt or delinquent account owed to a public utility.

E. "Residential Utility Service" -- Means gas, water, sewer, and electric service provided by a public utility to a residence.

F. "Termination of Service" -- The terms "termination," "disconnection," and "shutoff" as used in these rules are synonymous and mean the stopping of service for whatever cause.

G. "Load Limiter" -- Device which automatically interrupts electric service at a residence when the preset kW demand is exceeded. Service is restored when the customer decreases usage and then presses the reset button on the device.

R746-200-3. Deposits, Eligibility for Service, and Shared Meter or Appliance.

A. Deposits and Guarantees --

1. Each utility shall submit security deposit policies and procedures to the Commission for its approval before the implementation and use of those policies and procedures. Each utility shall submit third-party guarantor policies and procedures to the Commission.

2. Each utility collecting security deposits shall pay interest thereon at a rate as established by the Commission. For electric cooperatives and electric service districts, interest rates shall be determined by the governing board of directors of the cooperative or district and filed with the Commission and shall be deemed approved by the Commission unless ten percent or more of the customers file a request for agency action requesting an investigation and hearing. The deposit paid, plus accrued interest, is eligible for return to the customer after the customer has paid the bill on time for 12 consecutive months.

3. A residential customer shall have the right to pay a security deposit in at least three equal monthly installments if the first installment is paid when the deposit is required.

B. Eligibility for Service --

1. Residential utility service is to be conditioned upon payment of deposits, where required, and of any outstanding debts for past utility service which are owed by the applicant to that public utility, subject to Subsections R746-200-3(B)(2), and R746-200-7(C)(2), Reasons for Termination. Service may be denied when unsafe conditions exist, when the applicant has furnished false information to get utility service, or when the customer has tampered with utility-owned equipment, such as meters and lines. An applicant is ineligible for service if at the time of application, the applicant is cohabiting with a delinquent account holder, whose utility service was previously disconnected for non-payment, and the applicant and delinquent account holder also cohabited while the delinquent account holder received the utility's service, whether the service was received at the applicants present address or another address.

2. When an applicant cannot pay an outstanding debt in

full, residential utility service shall be provided upon execution of a written, deferred payment agreement as set forth in Section R746-200-5.

C. Shared Meter or Appliance - In rental property where one meter provides service to more than one unit or where appliances provide service to more than one unit or to other occupants at the premises, and this situation is known to the utility, the utility will recommend that service be in the property owner's name and the property owner be responsible for the service. However, a qualifying applicant will be allowed to put service in their own name provided the applicant acknowledges that the request for services is entered into willingly and he has knowledge of the account responsibility.

R746-200-4. Account Billing.

A. Billing Cycle -- Each gas, electric, sewer and water utility shall use a billing cycle that has an interval between regular periodic billing statements of not greater than two months. This section applies to permanent continuous service customers, not to seasonal customers.

B. Estimated Billing --

1. A gas, electric, sewer or water public utility using an estimated billing procedure shall try to make an actual meter reading at least once in a two-month period and give a bill for the appropriate charge determined from that reading. When weather conditions prevent regular meter readings, or when customers are served on a seasonal tariff, the utility will make arrangements with the customer to get meter reads at acceptable intervals.

2. If a meter reader cannot gain access to a meter to make an actual reading, the public utility shall take appropriate additional measures in an effort to get an actual meter reading. These measures shall include, but are not limited to, scheduling of a meter reading at other than normal business hours, making an appointment for meter reading, or providing a prepaid postal card with a notice of instruction upon which an account holder may record a meter reading. If after two regular route visits, access has not been achieved, the utility will notify the customer that he must make arrangements to have the meter read as a condition of continuing service.

3. If, after compliance with Subsection R746-200-4(B)(2), a public utility cannot make an actual meter reading it may give an estimated bill for the current billing cycle in accordance with Subsection R746-200-7(C)(1)(f), Reasons for Termination.

C. Periodic Billing Statement -- Except when a residential utility service account is considered uncollectible or when collection or termination procedures have been started, a public utility shall mail or deliver an accurate bill to the account holder for each billing cycle at the end of which there is an outstanding debit balance for current service, a statement which the account holder may keep, setting forth each of the following disclosures to the extent applicable:

1. the outstanding balance in the account at the beginning of the current billing cycle using a term such as "previous balance";

2. the amount of charges debited to the account during the current billing cycle using a term such as "current service";

3. the amount of payments made to the account during the current billing cycle using a term such as "payments";

4. the amount of credits other than payments to the account during the current billing cycle using a term such as "credits";

5. the amount of late payment charges debited to the account during the current billing cycle using a term such as "late charge";

6. the closing date of the current billing cycle and the outstanding balance in the account on that date using a term such as "amount due";

7. a listing of the statement due date by which payment of the new balance must be made to avoid assessment of a late charge;

8. a statement that a late charge, expressed as an annual percentage rate and a periodic rate, may be assessed against the account for late payment;

9. the following notice: "If you have any questions about this bill, please call the Company."

D. Late Charge --

1. Commencing not sooner than the end of the first billing cycle after the statement due date, a late charge of a periodic rate as established by the Commission may be assessed against an unpaid balance in excess of new charges debited to the account during the current billing cycle. The Commission may change the rate of interest.

2. No other charge, whether described as a finance charge, service charge, discount, net or gross charge may be applied to an account for failure to pay an outstanding bill by the statement due date. This section does not apply to reconnection charges or return check service charges.

E. Statement Due Date -- An account holder shall have not less than 20 days from the date the current bill was prepared to pay the new balance, which date shall be the statement due date.

F. Disputed Bill --

1. In disputing a periodic billing statement, an account holder shall first try to resolve the issue by discussion with the public utility's collections personnel.

2. When an account holder has proceeded pursuant to Subsection R746-200-4(F)(1), the public utility's collections personnel shall investigate the disputed issue and shall try to resolve that issue by negotiation.

3. If the negotiation does not resolve the dispute, the account holder may obtain informal and formal review of the dispute as set forth in Section R746-200-8, Informal Review, and R746-200-9, Formal Review.

4. While an account holder is proceeding with either informal or formal review of a dispute, no termination of service shall be permitted if amounts not disputed are paid when due.

G. Unpaid Bills - Utilities transferring unpaid bills from inactive or past accounts to active or current accounts shall follow these limitations:

1. A utility company may only transfer bills between similar classes of service, such as residential to residential, not commercial to residential.

2. Unpaid amounts for billing cycles older than four years before the time of transfer cannot be transferred to an active or current account.

3. The customer shall be provided with an explanation of the transferred amounts from earlier billing cycles and informed of the customer's ability to dispute the transferred amount.

4. The customer may dispute the transferred amount pursuant to R746-200-4(F).

R746-200-5. Deferred Payment Agreement.

A. Deferred Payment Agreement --

1. An applicant or account holder who cannot pay a delinquent account balance on demand shall have the right to receive residential utility service under a deferred payment agreement subject to R746-200-5(B) unless the delinquent account balance is the result of unauthorized usage of, or diversion of, residential utility service. If the delinquent account balance is the result of unauthorized usage of, or diversion of, residential utility service, the use of a deferred

payment agreement is at the utility's discretion.

2. An applicant or account holder shall have the right to a deferred payment agreement, consisting of 12 months of equal monthly payments, if the full amount of the delinquent balance plus interest shall be paid within the 12 months and if the applicant or account holder agrees to pay the initial monthly installment. The account holder shall have the right to pre-pay a monthly installment, pre-pay a portion of, or the total amount of the outstanding balance due under a deferred payment agreement at any time during the term of the agreement. The account holder also has the option, when negotiating a deferred payment agreement, to include the amount of the current month's bill plus the reconnection charges in the total amount to be paid over the term of the deferred payment agreement.

3. Payment Options

a. If a utility has a budget billing or equal payment plan available, it shall offer the account holder the option of:

i. agreeing to pay monthly bills for future residential utility service as they become due, plus the monthly deferred payment installment, or

ii. agreeing to pay a budget billing or equal payment plan amount set by the utility for future residential utility service plus the monthly deferred payment installment.

b. When negotiating a deferred payment agreement with a utility that does not offer a budget billing or equal payment plan, the account holder shall agree to pay the monthly bills for future residential utility service plus the monthly deferred payment installment necessary to liquidate the delinquent bill.

4. The terms of the deferred payment agreement shall be set forth in a written agreement, a copy of which shall be provided to the customer.

5. A deferred payment agreement may include a finance charge as approved by the Commission. If a finance charge is assessed, the deferred payment agreement shall contain notice of the charge.

B. Breach -- If an applicant or account holder breaches a condition or term of a deferred payment agreement, the public utility may treat that breach as a delinquent account and shall have the right to disconnect service pursuant to these rules, subject to the right of the customer to seek review of the alleged breach by the Commission, and the account holder shall not have the right to a renewal of the deferred payment agreement. Renewal of deferred payment agreements after the breach shall be at the utility's discretion.

R746-200-6. Reconnection of Discontinued Service.

A. Public utilities shall have personnel available 24 hours each day to reconnect utility service. Service shall be reconnected as soon as possible, but no later than the next generally recognized business day after the customer has requested reconnection and complied with all necessary conditions for reconnection of service; which may include payment of reconnection charges and compliance with deferred payment agreement terms.

B. If a customer requests reconnection or other services outside of the utility's normal business days or hours of operation, the utility shall inform the customer of any additional charges or terms, as specified in the utility's tariff provisions, applicable to the customer's request.

R746-200-7. Termination of Service.

A. Definitions. As used in this section (R746-200-7):

1. "Licensed medical provider" means a medical provider:

a. who holds a current and active medical license under Utah Code Title 58; and

b. whose scope of practice authorizes the medical provider to diagnose the condition described by the medical provider under this rule.

2. "Life-supporting equipment" means life-supporting medical equipment:

a. with normal operation that requires continuation of public utility service; and

b. used by an individual who would require immediate assistance from medical personnel to sustain life if the life supporting equipment ceased normal operations.

3. "Life-supporting equipment statement" means a written statement:

a. signed by the licensed medical provider for the account holder or resident who utilizes life-supporting equipment; and

b. including:

i. a description of the medical need of the account holder or resident who utilizes life-supporting equipment;

ii. the account holder's name and address;

iii. name of resident using life-supporting equipment and relationship to account holder, if different than account holder;

iv. the health infirmity and expected duration;

v. identification of the life-support equipment that requires the utility's service;

vi. a determination by the licensed medical provider that immediate assistance from medical personnel to sustain life would be required if the life supporting equipment ceased normal operations; and

vii. the name and contact information of the licensed medical provider for the resident who utilizes life-supporting equipment,

4. "Serious illness or infirmity statement" means a written statement:

a. signed by a licensed medical provider;

b. written on:

i. a form obtained from the public utility; or

ii. the licensed medical provider's letterhead stationary;

c. legibly describing:

i. a diagnosed medical condition under which termination of utility service will injure the person's health or aggravate the person's illness; and

ii. the anticipated duration of the diagnosed medical condition.

B. Delinquent Account --

1. A residential utility service bill that has remained unpaid beyond the statement due date is a delinquent account.

2. When an account is a delinquent account, a public utility, before termination of service, shall issue a written late notice to inform the account holder of the delinquent status. A late notice or reminder notice must include the following information:

a. A statement that the account is a delinquent account and should be paid promptly;

b. A statement that the account holder should communicate with the public utility's collection department, by calling the company, if the account holder has a question concerning the account;

c. A statement of the delinquent account balance, using a term such as "delinquent account balance."

3. When the account holder responds to a late notice or reminder notice the public utility's collections personnel shall investigate disputed issues and shall try to resolve the issues by negotiation. During this investigation and negotiation no other action shall be taken to disconnect the residential utility service if the account holder pays the undisputed portion of the account subject to the utility's right to terminate utility service pursuant to R746-200-7(F), Termination of Service Without Notice.

4. A copy of the "Statement of Customer Rights and Responsibilities" referred to in Subsection R746-200-1(G) of

these rules shall be issued to the account holder with the first notice of impending service disconnection.

C. Reasons for Termination of Service --

1. Residential utility service may be terminated for the following reasons:

a. Nonpayment of a delinquent account;

b. Nonpayment of a deposit when required;

c. Failure to comply with the terms of a deferred payment agreement or Commission order;

d. Unauthorized use of, or diversion of, residential utility service or tampering with wires, pipes, meters, or other equipment;

e. Subterfuge or deliberately furnishing false information; or

f. Failure to provide access to meter during the regular route visit to the premises following proper notification and opportunity to make arrangements in accordance with R746-200-4(B), Estimated Billing, Subsection (2).

2. The following shall be insufficient grounds for termination of service:

a. A delinquent account, accrued before a divorce or separate maintenance action in the courts, in the name of a former spouse, cannot be the basis for termination of the current account holder's service;

b. Cohabitation of a current account holder with a delinquent account holder whose utility service was previously terminated for non-payment, unless the current and delinquent account holders also cohabited while the delinquent account holder received the utility's service, whether the service was received at the current account holder's present address or another address;

c. When the delinquent account balance is less than $25.00, unless no payment has been made for two months;

d. Failure to pay an amount in bona fide dispute before the Commission;

e. Payment delinquency for third party services billed by the regulated utility company, unless prior approval is obtained from the Commission.

D. Restrictions upon Termination of Service -- Medical Reasons --

1. Serious Illness or Infirmity. If a public utility receives a serious illness or infirmity statement:

a. the public utility shall continue or restore residential utility service for the period set forth in the statement or one month, whichever is less;

b. the public utility is not required to provide the continuation or restoration described in R746-200-7.D.1.a. more than two times to an individual customer or residence during the same calendar year; and

c. the account holder is liable for the cost of residential utility service during the period of continued or restored service.

2. Life-Supporting Equipment.

a. After receiving a life-supporting equipment statement, the public utility:

i. shall mark and identify applicable meter boxes where the life-supporting equipment is used;

ii. may not terminate service to the residence unless the public utility has complied with this Subsection (R746-200-7.D.2); and

iii. may request annual verification from the licensed medical provider of the life-supporting equipment.

b. A public utility may terminate service on an account where the public utility has received a life-supporting equipment statement and the related medical provider verification, if:

i. the account is in default;

ii. the public utility has:

AA. followed R746-200-5 on offering a deferred payment agreement; or

BB. if R746-200-5 does not apply, allowed the customer one month to enter into a deferred payment agreement that may last up to 12 months;

iii. after complying with R746-200-7.D.2.b.ii, the public utility has provided to the customer a written notice of proposed termination of service that:

AA. clearly and plainly informs the customer of the customer's rights under R746-200-7.D.2 and of the customer's right to an expedited complaint hearing under R746-200-8.E.; and

BB. complies with R746-200-7.G.1;

iv. the public utility has provided to the customer a 48 hour notice of termination of utility service that complies with R746-200-7.G.2; and

v. the public utility has complied with all other applicable provisions of R746-200-7.

c. The account holder is liable for the cost of residential utility service during the period of service, including throughout all proceedings related to life-supporting equipment.

E. Payments from the Home Energy Assistance Target (HEAT) Program -- Suppliers may not discontinue utility service to a low-income household for at least 30 days after receiving utility payment or verification of utility payment from the HEAT Program on behalf of the low-income household.

F. Termination of Service Without Notice -- Any provision contained in these rules notwithstanding, a public utility may terminate residential utility service without notice when, in its judgment, a clear emergency or serious health or safety hazard exists for so long as the conditions exist, or when there is unauthorized use or diversion of residential utility service or tampering with wires, pipes, meters, or other equipment owned by the utility. The utility shall immediately try to notify the customer of the termination of service and the reasons therefor.

G. Notice of Proposed Termination of Service --

1. At least 10 calendar days before a proposed termination of residential utility service, or at least 30 calendar days before a proposed termination if the residential utility service customer has provided to the public utility a life-supporting equipment statement, a public utility shall give written notice of disconnection for nonpayment to the account holder. The 10-day or 30-day time period is computed from the date the notice is postmarked. The notice shall be given by first class mail or delivery to the premises and shall contain a summary of the following information:

a. a Statement of Customer Rights and Responsibilities under existing state law and Commission rules;

b. the Commission-approved policy on termination of service for that utility;

c. the availability of deferred payment agreements and sources of possible financial assistance including but not limited to state and federal energy assistance programs;

d. informal and formal procedures to dispute bills and to appeal adverse decisions, including the Commission's address, website, and telephone number;

e. specific steps, printed in a conspicuous fashion, that may be taken by the consumer to avoid termination of service;

f. the date on which payment arrangements must be made to avoid termination of service; and

g. subject to the provision of Subsection R746-200-1(E), Customer Information, a conspicuous statement, in Spanish, that the notice is a termination of service notice and that the utility has a Spanish edition of its customer information pamphlet and whether it has personnel available during regular business hours to communicate with Spanish-speaking customers.

2. At least 48 hours before termination of service is scheduled, the utility shall make good faith efforts to notify the account holder or an adult member of the household, by mail, by telephone or by a personal visit to the residence. If personal notification has not been made either directly by the utility or by the customer in response to a mailed notice, the utility shall leave a written termination of service notice at the residence. Personal notification, such as a visit to the residence or telephone conversation with the customer, is required only during the winter months, October 1 through March 31. Other months of the year, the mailed 48-hour notice can be the final notice before the termination of service.

If termination of service is not accomplished within 15 business days following the 48-hour notice, the utility company will follow the same procedures for another 48-hour notice.

3.a.i. A public utility that issues a 30-day notice of termination of service to a customer who has provided the public utility with a life-supporting equipment statement shall provide to the Division an electronic copy of the notice at or before the time the public utility issues the notice to the customer.

ii. Within two business days after receiving the electronic notice described in this Subsection (G)(3)(a)(i), the Division shall provide a letter to the account holder by regular mail:

AA. informing the account holder that the public utility has issued a notice of termination;

BB. noting the method and deadline by which the account holder may request an expedited hearing from the Commission; and

CC. directing the account holder to contact the public utility for additional information.

b. A public utility shall send duplicate copies of 10-day or 30-day termination of service notices to a third party designated by the account holder and shall make reasonable efforts to personally contact the third party designated by the account holder before termination of service occurs, if the third party resides within its service area. A utility shall inform its account holders of the third-party notification procedure at the time of application for service and at least once each year.

4. In rental property situations where the tenant is not the account holder and that fact is known to the utility, the utility shall post a notice of proposed termination of service on the premises in a conspicuous place and shall make reasonable efforts to give actual notice to the occupants by personal visits or other appropriate means at least five calendar days before the proposed termination of service. The posted notice shall contain the information listed in Subsection R746-200-7(G)(1). This notice provision applies to residential premises when the account holder has requested termination of service or the account holder has a delinquent bill. If nonpayment is the basis for the termination of service, the utility shall also advise the tenants that they may continue to receive utility service for an additional 30 days by paying the charges due for the 30-day period just past.

H. Termination of Service -- Upon expiration of the notice of proposed termination of service, the public utility may terminate residential utility service. Except for service diversion or for safety considerations, utility service shall not be disconnected between Thursday at 4:00 p.m. and Monday at 9:00 a.m. or on legal holidays recognized by Utah, or other times the utility's business offices are not open for business. Service may be disconnected only between the hours of 9:00 a.m. and 4:00 p.m.

I. Customer-Requested Termination of Service --

1. A customer shall advise a public utility at least three days in advance of the day on which the customer wants service disconnected to the customer's residence. The public utility shall disconnect the service within four working days of the requested disconnect date. The customer shall not be liable for the services rendered to or at the address or location after the four days, unless access to the meter has been delayed by the customer.

2. A customer who is not an occupant at the residence for which termination of service is requested shall advise the public utility at least 10 days in advance of the day on which the customer wants service disconnected and sign an affidavit that the customer is not requesting termination of service as a means of evicting the customer's tenants. Alternatively, the customer may sign an affidavit that there are no occupants at the residence for which termination of service is requested and thereupon the disconnection may occur within four days of the requested disconnection date.

J. Restrictions Upon Termination of Service Practices -- A public utility shall not use termination of service practices other than those set forth in these rules. A utility shall have the right to use or pursue legal methods to ensure collections of obligations due it.

K. Policy Statement Regarding Elderly and Disabled -- The state recognizes that the elderly and disabled may be seriously affected by termination of utility service. In addition, the risk of inappropriate termination of service may be greater for the elderly and disabled due to communication barriers that may exist by reason of age or infirmity. Therefore, this section is specifically intended to prevent inappropriate terminations of service which may be hazardous to these individuals. In particular, Subsection R746-200-7(G), requiring adequate notice of impending terminations of service, including notification to third parties upon the request of the account holder, Subsection R746-200-7(D)(1), restricting termination of service when the termination of service will cause or aggravate a serious illness or infirmity of a person living in the residence, and Subsection R746-200-7(D)(2), restricting terminations of service to residences when life-supporting equipment is in use, are intended to meet the special needs of elderly and disabled persons, as well as those of the public in general.

L. Load Limiter as a Substitute for Termination of Service, Electric Utilities --

1. An electric utility may, but only with the customer's consent, install a load limiter as an alternative to terminating electric service for non-payment of a delinquent account or for failure to comply with the terms of a deferred payment agreement or Commission order. Conditions precedent to the termination of electric service must be met before the installation of a load limiter.

2. Disputes about the level of load limitation are subject to the informal review procedure of Subsection R746-200-8.

3. Electric utilities shall submit load limiter policies and procedures to the Commission for their review before the implementation and use of those policies.

R746-200-8. Informal Review.

A. A person who is unable to resolve a dispute with the utility concerning a matter subject to Public Service Commission jurisdiction may obtain informal review of the dispute by a designated employee within the Division of Public Utilities. This employee shall investigate the dispute, try to resolve it, and inform both the utility and the consumer of his findings within five business days from receipt of the informal review request. Upon receipt of a request for informal review, the Division employee shall, within one business day, notify the utility that an informal complaint has been filed. Absent unusual circumstances, the utility shall attempt to resolve the complaint within five business days. In

no circumstances shall the utility fail to respond to the informal complaint within five business days. The response shall advise the complainant and the Division employee regarding the results of the utility's investigation and a proposed solution to the dispute or provide a timetable to complete any investigation and propose a solution. The utility shall make reasonable efforts to complete any investigation and resolve the dispute within 30 calendar days. A proposed solution may be that the utility request that the informal complaint be dismissed if, in good faith, it believes the complaint is without merit. The utility shall inform the Division employee of the utility's response to the complaint, the proposed solution and the complainant's acceptance or rejection of the proposed solution and shall keep the Division employee informed as to the progress made with respect to the resolution and final disposition of the informal complaint. If, after 30 calendar days from the receipt of a request for informal review, the Division employee has received no information that the complainant has accepted a proposed solution or otherwise completely resolved the complaint with the utility, the complaint shall be presumed to be unresolved.

B. Mediation -- If the utility or the complainant determines that they cannot resolve the dispute by themselves, either of them may request that the Division attempt to mediate the dispute. When a mediation request is made, the Division employee shall inform the other party within five business days of the mediation request. The other party shall either accept or reject the mediation request within ten business days after the date of the mediation request, and so advise the mediation-requesting party and the Division employee. If mediation is accepted by both parties or the complaint continues to be unresolved 30 calendar days after receipt, the Division employee shall further investigate and evaluate the dispute, considering both the customer's complaint and the utility's response, their past efforts to resolve the dispute, and try to mediate a resolution between the complainant and the utility. Mediation efforts may continue for 30 days or until the Division employee informs the parties that the Division has determined that mediation is not likely to result in a mutually acceptable resolution, whichever is shorter.

C. Division Access to Information During Informal Review or Mediation -- The utility and the complainant shall provide documents, data or other information requested by the Division, to evaluate the complaint, within five business days of the Division's request, if reasonably possible or as expeditiously as possible, if they cannot be provided within five business days.

D. Commission Review -- If the utility has proposed that the complaint be dismissed from informal review for lack of merit and the Division concurs in the disposition, if either party has rejected mediation or if mediation efforts are unsuccessful and the Division has not been able to assist the parties in reaching a mutually accepted resolution of the informal dispute, or the dispute is otherwise unresolved between the parties, the Division in all cases shall inform the complainant of the right to petition the Commission for a review of the dispute, and shall make available to the complainant a standardized complaint form with instructions approved by the Commission. The Division itself may petition the Commission for review of a dispute in any case which the Division determines appropriate. While a complainant is proceeding with an informal or a formal review or mediation by the Division or a Commission review of a dispute, no termination of service shall be permitted, if any amounts not disputed are paid when due, subject to the utility's right to terminate service pursuant to R746-200-7(F), Termination of Service Without Notice.

E. Notwithstanding any other provision of this rule (R746-200-8), a customer who has provided to a public utility a life-supporting equipment statement and who has received the 30-day written notice of proposed termination of service described in R746-200-7.D.2 may bypass informal review and receive an expedited hearing before the Commission if the Commission receives a written complaint and request for a hearing from the customer within 10 calendar days after the date the notice is postmarked.

R746-200-9. Formal Agency Proceedings Based Upon Complaint Review.

The Commission, upon its own motion or upon the petition of any person, may initiate formal or investigative proceedings upon matters arising out of informal complaints.

R746-200-10. Penalties.

A. A residential account holder who claims that a regulated utility has violated a provision of these customer service rules, other Commission rules, company tariff, or other approved company practices may use the informal and formal grievance procedures. If considered appropriate, the Commission may assess a penalty pursuant to Section 54-7-25.

B. Fines collected shall be used to assist low income Utahns to meet their basic energy needs.

R746. Public Service Commission, Administration.
R746-360. Universal Public Telecommunications Service Support Fund.
R746-360-1. General Provisions.

A. Authorization -- Section 54-8b-15 authorizes the Commission to establish an expendable trust fund, known as the Universal Public Telecommunications Service Support Fund, the "universal service fund," "USF" or the "fund," to promote equitable cost recovery and universal service by ensuring that customers have access to basic telecommunications service at just, reasonable and affordable rates, consistent with the Telecommunications Act of 1996.

B. Purpose -- The purposes of these rules are:

1. to govern the methods, practices and procedures by which:

a. the USF is created, maintained, and funded by end-user surcharges applied to retail rates;

b. funds are collected for and disbursed from the USF to qualifying telecommunications corporations so that they are able to recover the reasonable and prudent costs of providing basic telecommunications service while charging just, reasonable and affordable rates; and,

2. to ensure funds collected and disbursed from the USF are used efficiently and in the public interest.

C. Application of the Rules -- The rules apply to all retail providers that provide intrastate public telecommunications services.

R746-360-2. Definitions.

A. Affordable Base Rate (ABR) -- means the monthly per line retail rates, charges or fees for basic telecommunications service which the Commission determines to be just, reasonable, and affordable for a designated support area. The Affordable Base Rate shall be established by the Commission. The Affordable Base Rate does not include the applicable USF retail surcharge, municipal franchise fees, taxes, and other incidental surcharges.

B. Average Revenue Per Line -- means the average revenue for each access line computed by dividing the sum of all revenue derived from a telecommunications corporation's provision of public telecommunications services, including, but not limited to, revenues received from the provision of services in both the interstate and intrastate jurisdictions, whether designated "retail," "wholesale," or some other categorization, all revenues derived from providing network elements, services, functionalities, etc. required under the Federal Telecommunications Act of 1996, Pub. L. 104-104,110 Stat.56 or the Utah Telecommunications Reform Act, Laws of Utah 1995, Chapter 269, all support funds received from the Federal Universal Service Support Fund, and each and every other revenue source or support or funding mechanism used to assist in recovering the costs of providing public telecommunications services in a designated support area by that telecommunications corporation's number of access lines in the designated support area.

C. Basic Telecommunications Service -- means a local exchange service consisting of access to the public switched network; touch-tone, or its functional equivalent; local flat-rated, unlimited usage, exclusive of extended area service; single-party service with telephone number listed free in directories that are received free; access to operator services; access to directory assistance, lifeline and telephone relay assistance; access to 911 and E911 emergency services; access to long-distance carriers; access to toll limitation services; and other services as may be determined by the Commission.

D. Designated Support Area -- means the geographic area used to determine USF support distributions. A designated support area, or "support area," need not be the same as a USF proxy model's geographic unit. The Commission will determine the appropriate designated support areas for determining USF support requirements. Unless otherwise specified by the Commission, the designated support area for a rate-of-return regulated Incumbent telephone corporation shall be its entire certificated service territory located in the State of Utah.

E. Facilities-Based Provider -- means a telecommunications corporation that uses its own facilities, a combination of its own facilities and essential facilities or unbundled network elements obtained from another telecommunications corporation, or a telecommunications corporation which solely uses essential facilities or unbundled network elements obtained from another telecommunications corporation to provide public telecommunications services.

F. Geographic Unit -- means the geographic area used by a USF proxy cost model for calculating costs of public telecommunications services. The Commission will determine the appropriate geographic area to be used in determining public telecommunications service costs.

G. Net Fund Distributions -- means the difference between the gross fund distribution to which a qualifying telecommunications corporation is entitled and the gross fund surcharge revenues collected by that company, when the former amount is greater than the latter amount.

H. Net Fund Contributions -- means the difference between the gross fund distribution to which a qualifying telecommunications corporation is entitled and the gross fund surcharge revenues generated by that company, when the latter amount is greater than the former amount.

I. USF Proxy Model Costs -- means the total, jurisdictionally unseparated, cost estimate for public telecommunications services, in a geographic unit, based on the forward-looking, economic cost proxy model(s) chosen by the Commission. The level of geographic cost disaggregation to be used for purposes of assessing the need for and the level of USF support within a geographic unit will be determined by the Commission. These models shall be provided by the Commission by January 2, 2001.

J. Universal Service Fund (USF or fund) -- means the Universal Public Telecommunications Service Support Fund established by 54-8b-15 and set forth by this rule.

R746-360-3. Duties of Administrator.

A. Selection of Administrator -- The Division of Public Utilities will be the fund administrator. If the Division is unable to fulfill that responsibility, the administrator, who must be a neutral third party, unaffiliated with any fund participant, shall be selected by the Commission.

B. Cost of Administration -- The cost of administration shall be borne by the fund; unless administered by a state agency.

C. Access to Books -- Upon reasonable notice, the administrator shall have access to the books of account of all telecommunications corporations and retail providers, which shall be used to verify the intrastate retail revenue assessed in an end-user surcharge, to confirm the level of eligibility for USF support and to ensure compliance with this rule.

D. Maintenance of Records -- The administrator shall maintain the records necessary for the operation of the USF and this rule.

E. Report Forms -- The administrator shall develop report forms to be used by telecommunications corporations and retail providers to effectuate the provisions of this rule and the USF. An officer of the telecommunications corporation or retail provider shall attest to and sign the reports to the administrator.

F. Administrator Reports -- The administrator shall file

reports with the Commission containing information on the average revenue per line calculations, projections of future USF needs, analyses of the end-user surcharges and Affordable Base Rates, and recommendations for calculating them for the following 12-month period. The report shall include recommendations for changes in determining basic telecommunications service, designated support areas, geographic units, USF proxy cost models and ways to improve fund collections and distributions.

G. Periodic Review -- The administrator, under the direction of the Commission, shall perform a periodic review of fund recipients to verify eligibility for future support and to verify compliance with all applicable state and federal laws and regulations.

H. Proprietary Information -- Information received by the administrator which has been determined by the Commission to be proprietary shall be treated in conformance with Commission practices.

I. Information Requested -- Information requested by the administrator which is required to assure a complete review shall be provided within 45 days of the request. Failure to provide information within the allotted time period may be a basis for withdrawal of future support from the USF or other lawful penalties to be applied.

R746-360-4. Application of Fund Surcharges to Customer Billings.

A. Commencement of Surcharge Assessments -- Commencing June 1, 1998, end-user surcharges shall be the source of revenues to support the fund. Surcharges will be applied to intrastate retail rates, and shall not apply to wholesale services.

B. Surcharge Based on a Uniform Percentage of Retail Rates -- The retail surcharge shall be a uniform percentage rate, determined and reviewed annually by the Commission and billed and collected by all retail providers.

C. Surcharge -- The surcharge to be assessed is as follows:

1. through September 30, 2016, 1 percent of billed intrastate retail rates; and

2. beginning October 1, 2016, 1.65 percent of billed intrastate retail rates.

R746-360-5. Fund Remittances and Disbursements.

A. Remitting Surcharge Revenues --

1. Telecommunications corporations, not eligible for USF support funds, providing telecommunications services subject to USF surcharges shall collect and remit surcharge revenues to the Commission as follows:

a. if the average monthly USF surcharge collections over the prior six months was ten dollars or greater, within 45 days after the end of each month,

b. if the average monthly USF surcharge collections over the prior six months was less than ten dollars, the telecommunications corporation may accrue the USF surcharge collections and submit the accrued collections on a semiannual basis.

2. Telecommunications corporations eligible for USF support funds shall make remittances as follows:

a. Prior to the end of each month, the fund administrator shall inform each qualifying telecommunications corporation of the estimated amount of support that it will be eligible to receive from the USF for that month.

b. Net fund contributions shall be remitted to the Commission within 45 calendar days after the end of each month. If the net amount owed is not received by that date, remedies, including withholding future support from the USF, may apply.

3. The Commission will forward remitted revenues to the Utah State Treasurer's Office for deposit in a USF account.

B. Distribution of Funds -- Net Fund distributions to qualifying telecommunications corporations for a given month shall be made 60 days after the end of that month, unless withheld for failure to maintain qualification or failure to comply with Commission orders or rules.

R746-360-6. Eligibility for Fund Distributions.

A. Qualification --

1. To qualify to receive USF support funds, a telecommunications corporation shall be designated an "eligible telecommunications carrier," pursuant to 47 U.S.C. Section 214(e), and shall be in compliance with Commission orders and rules. Each telecommunications corporation receiving support shall use that support only to provide basic telecommunications service and any other services or purposes approved by the Commission.

2. Additional qualification criteria for Incumbent telephone corporations - In addition to the qualification criteria of R746-360-6A.1.,

a. Non-rate-of-return Incumbent telephone corporations, except Incumbent telephone corporations subject to pricing flexibility pursuant to 54-8b-2.3 shall make Commission approved, aggregate rate reductions for public telecommunications services, provided in the State of Utah, equal to each incremental increase in USF distribution amounts received after December 1, 1999.

b. Rate-of-return Incumbent telephone corporations shall complete a Commission review of their revenue requirement and public telecommunications services' rate structure prior to any change in their USF distribution which differs from a prior USF distribution, beginning with the USF distribution for December, 1999.

B. Rate Floor.

1. Unless a petition brought pursuant to Subsection (B)(2) is granted after adjudication, to be eligible for USF subsidization, a telecommunications corporation shall charge, at a minimum, the following Affordable Base Rate for basic telecommunications service:

a. As of July 1, 2016:

i. $18 per residential line; and

ii. $26.00 per business line.

b. As of July 1, 2017:

i. $20 per residential line; and

ii. $26.00 per business line.

2.a. A telecommunications corporation may petition the Commission to deviate from the Affordable Base Rate set forth in this Subsection (B)(1).

b. A telecommunications corporation that files a petition under this Subsection (B)(2)(a) shall:

i. demonstrate that the Affordable Base Rate is not reasonable in the particular geographic area served; or

ii. impute income up to the Affordable Base Rate in calculating the telecommunications corporation's state USF subsidization.

C. Lifeline Requirement -- A telecommunications corporation may qualify to receive distributions from the fund only if it offers Lifeline service on terms and conditions prescribed by the Commission.

D. Exclusion of Resale Providers -- Only facilities-based providers, will be eligible to receive support from the fund. Where service is provided through one telecommunications corporation's resale of another telecommunications corporation's service, support may be received by the latter only.

R746-360-7. Calculation of Fund Distributions in Non-rate-of-Return Regulated Incumbent Telephone

Corporation Territories.

A. Use of Proxy Cost Models -- The USF proxy cost model(s) selected by the Commission and average revenue per line will be used to determine fund distributions within designated support areas.

B. Use of USF Funds --Telecommunications corporations shall use USF funds to support each primary residential line in active service which it furnishes in each designated area.

C. Determination of Support Amounts --

1. Incumbent telephone corporation - Monies from the fund will equal the numerical difference between USF proxy model cost estimates of costs to provide residential Basic Telecommunications Service in the designated support area and the product of the Incumbent telephone corporation's Average Revenue per line, for the designated support area, times the number of Incumbent telephone corporation's active residential access lines in the designated support area.

2. Telecommunications corporations other than Incumbent telephone corporations - Monies from the fund will equal the Incumbent telephone corporation's average residential access line support amount for the respective designated support area, determined by dividing the Incumbent telephone corporation's USF monies for the designated support area by the Incumbent telephone corporation's active residential access lines in the designated support area, times the eligible telecommunications corporation's number of active residential access lines.

D. Lifeline Support -- Eligible telecommunications corporations shall receive additional USF funds to recover any discount granted to lifeline customers, participating in a Commission approved Lifeline program, that is not recovered from federal lifeline support mechanisms.

E. Exemptions -- Telecommunications corporations may petition to receive an exemption for any provision of this rule or to receive additional USF support, for use in designated support areas, to support additional services which the Commission determines to be consistent with universal service purposes and permitted by law.

R746-360-8. Calculation of Fund Distributions in Rate-of-Return Incumbent Telephone Corporation Territories.

(A) Determination of Support Amounts --

(1) Incumbent telephone corporation - Monies from the fund will equal the numerical difference between the Incumbent telephone corporation's total embedded costs of providing public telecommunications services, for a designated support area, less the product of the Incumbent telephone corporation's Average Revenue Per Line, for the designated support area, times the Incumbent telephone corporation's active access lines in the designated support area. To the extent the Commission finds that inclusion of any cost will result in an inefficient use of USF funds or in a use of USF funds that is inconsistent with the public interest, such cost will be excluded from total embedded costs. Total embedded costs shall include a weighted average rate of return on capital of the intrastate and interstate jurisdictions. For example, in the case of an Incumbent telephone corporation whose costs are allocated fifty percent to each jurisdiction and whose interstate return is 11.25 percent and whose intrastate return authorized by the Commission is 9 percent, the weighted average return on capital would be 10.125 percent.

(a) In order to determine the interstate return on capital to calculate the weighted average rate of return on capital for Incumbent telephone corporations, the Commission shall:

(i) use the prior year return reported by the National Exchange Carriers Association (NECA) to the Federal Communications Commission (FCC) on FCC Form 492 for Incumbent telephone corporations that do separations between intrastate and interstate jurisdictions under 47 CFR Part 36. In the event that the Incumbent local telephone corporation uses a future test period as provided in Utah Code Ann. Subsection 54-4-4(3)(b)(i), the interstate return for these Incumbent telephone corporations shall be the average of the actual return for the prior three years as reported on FCC Form 492.

(ii) use NECA's most recent interstate allocation computation filed at the FCC under 47 CFR Part 69.606 and the actual interstate return on capital reported by NECA as described in R746-360-8 A.1.a.i. for average schedule Incumbent telephone corporations.

(iii) use the actual interstate return of an Incumbent telephone corporation's relevant tariff group reported to the FCC in its most recent FCC Form 492A for Incumbent telephone corporations that are regulated on a price-cap basis in the interstate jurisdiction.

(2) Telecommunications corporations other than Incumbent telephone corporations - Monies from the fund will equal the respective Incumbent telephone corporation's average access line support amount for the designated support area, determined by dividing the Incumbent telephone corporation's USF monies for the designated support area by the Incumbent telephone corporation's active access lines in the designated support area, times the eligible telecommunications corporation's number of active access lines in the designated support area.

(B) Lifeline Support -- Eligible telecommunications corporations shall receive additional USF funds to recover any discount granted to lifeline customers, participating in a Commission-approved Lifeline program, that is not recovered from federal lifeline support mechanisms.

(C) Exemptions -- Telecommunications corporations may petition to receive an exemption for any provision of this rule or to receive additional USF support, for use in designated support areas, to support additional services which the Commission determines to be consistent with universal service purposes and permitted by law.

R746-360-9. One-Time Distributions From the Fund.

A. Applications for One-Time Distributions -- Telecommunications corporations, whether they are or are not receiving USF funds under R746-360-7 or R746-360-8, potential customers not presently receiving service because facilities are not available, or customers receiving inadequate service may apply to the Commission for one-time distributions from the fund for extension of service to a customer, or customers, not presently served or for amelioration of inadequate service.

1. These distributions are to be made only in extraordinary circumstances, when traditional methods of funding and service provision are infeasible.

2. One-time distributions will not be made for:

a. New subdivision developments;

b. Property improvements, such as cable placement, when associated with curb and gutter installations; or

c. Seasonal developments that are exclusively vacation homes.

i. Vacation home is defined as: A secondary residence which is primarily used for recreation and is unoccupied for a period of four consecutive weeks per year.

3. An application for a one-time distribution may be filed with the Commission by an individual or group of consumers desiring telephone service or improved service, a telecommunications corporation on behalf of those consumers, the Division of Public Utilities, or any entity permitted by law to request agency action. An application shall identify the service(s) sought, the area to be served and

the individuals or entities that will be served if the one-time distribution is approved.

4. Following the application's filing, affected telecommunications corporations shall provide engineering, facilities, costs, and any other pertinent information that will assist in the Commission's consideration of the application.

5. In considering the one-time distribution application, the Commission will examine relevant facts including the type and grade of service to be provided, the cost of providing the service, the demonstrated need for the service, whether the customer is within the service territory of a telecommunications corporation, whether the proposed service is for a primary residence, the provisions for service or line extension currently available, and other relevant factors to determine whether the one-time distribution is in the public interest.

B. Presumed Reasonable Amounts and Terms -- Unless otherwise ordered by the Commission, the maximum one-time distribution will be no more than $10,000 per customer for customers of rate-of-return regulated companies. For customers of non-rate of return companies, the maximum one-time distribution shall be calculated so that the required customer payments would equal the payments required from a customer of a rate-of-return regulated company. The Commission will presume a company's service or line extension terms and conditions reasonable, for a subscriber in connection with one-time universal service fund distribution requests, if the costs of service extension, for each extension, are recovered as follows:

1. For rate-of-return regulated Local Exchange Carriers who request USF One-Time Distribution support for facility placement: The first $2,500 of cost coverage per account is provided by the company; and for cost amounts exceeding $2,500 per account up to two times the statewide average loop investment per account for rate-of-return regulated telecommunication companies, as determined annually by the Division of Public Utilities, the company will pay 50 percent of the costs of the project.

2. For non-rate-of-return Local Exchange Carriers who request USF One-Time Distribution support for facility placement the first $2,500 of cost coverage per account is provided by the company; and all other costs are shared between the customer and the fund as provided herein.

3. For projects that exceed $2,500 per account, but are equal to or less than $10,000 per account, the customer shall pay 25 percent of the costs that exceed $2,500. For projects that exceed $10,000 per account, but are equal to or less than $20,000 per account, the customer shall pay 50 percent of the costs that are greater than $10,000 plus the previously calculated amount. For projects exceeding $20,000 per account the customer shall pay 75 percent of the cost above $20,000 until the State Universal Service Support Fund has paid the maximum amount as provided herein, any project costs above that level will be paid for 100 percent by the customer.

4. The State Universal Service Support Fund shall pay the difference between the sum of the defined company contributions plus customer contribution amounts and the total project cost up to the maximum amount provided herein. To the extent the Commission finds that inclusion of any cost will result in an inefficient use of USF funds or in a use of USF funds that is inconsistent with the public interest, such cost will be excluded from the total project cost.

5. Other terms and conditions for service extension shall be reviewed by the Commission in its consideration of an application and may be altered by the Commission in order to approve the use of universal service funds through the requested one-time distribution.

C. Combination of One-Time Distribution Funds with Additional Customer Funds and Future Customer Payment Recovery --

1. At least 51 percent of the potential customers must be full-time residents in the geographic area being petitioned for and must be willing to pay the initial up-front contribution to the project as calculated by the Commission or its agent.

2. Qualified customers in the area shall be notified by the telecommunications corporation of the nature and extent of the proposed service extension including the necessary customer contribution amounts to participate in the project. Customer contribution payments shall be made prior to the start of construction. In addition to qualified customers, the Local Exchange Company needs to make a good faith effort to contact all known property owners within the geographic boundaries of the proposed project and invite them to participate on the same terms as the qualified customers. Local Exchange Companies may ask potential customers to help in the process of contacting other potential customers.

3. New developments and empty lots will not be considered in the cost analysis for USF construction projects unless the property owner is willing to pay the per account costs for each lot as specified in this rule.

4. Potential customers who are notified and initially decline participation in the line extension project, but subsequently decide to participate, prior to completion of the project, may participate in the project if they make a customer contribution payment, prior to completion of the project, of 105 percent of the original customer contribution amount.

5. For a period of five years following completion of a project, new customers who seek telecommunications service in the project area, shall pay a customer contribution payment equal to 110 percent of the amount paid by the original customers in the project.

6. The telecommunications corporation shall ensure that all customer contribution payments required by R746-360-9(C)(3), (4), and (5) are collected. Funds received through these payments shall be sent to the universal service fund administrator. The company is responsible for tracking and notification to the Commission when the USF has been fully compensated. All monies will be collected and reported by the end of each calendar year, December 31st.

7. For each customer added during the five-year period following project completion, the telecommunications corporation and new customers shall bear the costs to extend service pursuant to the company's service or line extension terms and conditions, up to the telecommunications corporation's original contribution per customer for the project and the customer contributions required by this rule. The company may petition the Commission for a determination of the recovery from the universal service fund and the new customer for costs which exceed this amount.

D. Impact of Distribution on Rate of Return Companies -- A one-time distribution from the fund shall be recorded on the books of a rate base, rate of return regulated LEC as an aid to construction and treated as an offset to rate base.

E. Notice and Hearing -- Following notice that a one-time distribution application has been filed, any interested person may request a hearing or seek to intervene to protect his interests.

F. Bidding for Unserved Areas -- If only one telecommunications corporation is involved in the one-time distribution request, the distribution will be provided based on the reasonable and prudent actual or estimated costs of that company. If additional telecommunications corporations are involved, the distribution will be determined on the basis of a competitive bid. The estimated amount of the one-time distribution will be considered in evaluating each bid. Fund distributions in that area will be based on the winning bid.

R746-360-10. Altering the USF Charges and the End-User Surcharge Rates.

The uniform surcharge shall be adjusted periodically to minimize the difference between amounts received by the fund and amounts disbursed.

R746-360-11. Support for Schools, Libraries, and Health Care Facilities. Calculation of Fund Distributions.

The Universal Service Fund rules for schools, libraries and health care providers, as prescribed by the Federal Communications Commission in Docket 96-45, 97-157 Sections X and XI, paragraphs 424 - 749, of Order issued May 8, 1996, and CFR Sections 54.500 through 54.623 inclusive, incorporated by this reference, is the prescribed USF method that shall be employed in Utah. Funding shall be limited to funds made available through the federal universal service fund program.

R907. Transportation, Administration.
R907-1. Administrative Procedures.
R907-1-1. General Provisions.

All applications, Requests for Agency Action, Notices of Agency Action, and requests for review shall be processed as informal adjudicative proceedings pursuant to Title 63G, Chapter 4, Utah Administrative Procedures Act (UAPA), unless another rule specifically designates a proceeding as formal or either party requests conversion to a formal proceeding and the presiding officer decides that conversion is in the public interest and does not prejudice the rights of any party. An evidentiary hearing will be held only for formal adjudicative proceedings. However, nothing in this rule is intended to prohibit the presiding officer from holding a meeting of all parties for purposes of settlement, fleshing out of the issues, oral argument, or presentation of evidence. Adjudicative proceedings are subject to agency review pursuant to Section 63G-4-301, only when statute or a rule specifically provides for review. This rule does not apply to employee grievances, personnel actions, or requests for records under the Governmental Records Access and Management Act (GRAMA). When used in these rules, "director" means Presiding Officer except when used as Executive Director.

R907-1-2. Commencement by Department -- Notice of Agency Action -- Procedures.

(1) An adjudicative proceeding commenced by the department is initiated by a Notice of Agency Action, which the department shall mail or personally deliver to the person or persons against whom the action is proposed to be taken (respondents). UDOT shall publish the Notice of Agency Action if required by statute, any other rule, or the Utah Transportation Commission.

(2) A Notice of Agency Action shall include the following information:

(a) the names and mailing addresses of all respondents and any other persons to whom notice is being given;

(b) the department's file number or other reference number;

(c) a name or caption of the adjudicative proceeding, i.e., Utah Department of Transportation, Motor Carrier Safety Division v. XXXX Trucking Company;

(d) the date on which the Notice was placed in U.S. Mail, or personally served upon the respondents;

(e) a statement that, if the person requests an appeal of the agency action, the adjudicative proceeding will be conducted informally pursuant to these rules unless either the department or the respondent requests conversion to a formal adjudicative proceeding and the appropriate presiding officer identified in R907-1-3(2) grants the request;

(f) a statement of the legal authority and jurisdiction under which the adjudicative proceeding is to be maintained;

(g) the name, title, mailing address, and telephone number of the office initiating the Notice of Agency Action and the appropriate hearing officer;

(h) a general statement of the purpose of the adjudicative proceeding and, to the extent known, the questions to be decided;

(i) if the department is proposing to assess a fine or penalty, the amount of the fine or penalty and a summary of the evidence supporting the proposed amount; and

(j) a statement that the respondent is entitled to agency review if he or she files a Request for Agency Review with the initiating division or office within 30 days from the date the Notice is deposited in U.S. Mail or personally served.

(3) Absent filing of a timely request, the department will issue an order that the respondent is in default. If the defaulting party is the sole respondent, the Notice of Agency Action will then become the department's final order. The initiating division, office, or appropriate hearing officer shall revise the Notice of Agency Action to effect this change, captioning the Notice as the Final Order, affixing the appropriate signature the new date. The department may not change the contents in any substantive manner. However, the final order shall include a provision that notifies the respondent of his right to judicial review. The department shall then either mail or personally serve the respondent with a copy of the default order and the final order.

(4) If the defaulting party is not the sole respondent, the initiating division, office, or the appropriate hearing officer shall mail the Order of Default to all parties. The adjudicative proceeding may continue and the department may determine all issues in the proceeding, including those affecting the defaulting party.

(5) A defaulting party may seek agency review of an Order of Default by sending a written request for review to the appropriate hearing officer identified in R907-1-3(2). If the Order of Default was issued by that hearing officer, then the defaulting party must seek reconsideration of the Order of Default pursuant to R907-1-5. The sole issue is whether entering default was appropriate.

R907-1-3. Commencement By a Member of the Public -- Complete or Partial Denials of Applications or Requests for Agency Action -- Default.

(1) If the department denies, either completely or in part, an application or Request for Agency Action and that action is subject to agency review, the division or office issuing the denial shall send to the applicant a written reply as promptly as possible. The reply should include a brief summary of the reasons for the decision along with a listing of any statutes or rules that were interpreted or relied upon for it, along with UDOT's file or reference number. It shall advise the applicant of his or her right to request agency review by filing a written request with the initiating division or office within 30 days after issuance of the notice. In addition, the reply shall inform the applicant that his written request for review must include any supporting documentation, including legal memoranda, that he or she wishes to be considered. The reply shall constitute the proposed order of the division or office making the decision and shall so indicate on the reply. If there is no appeal within 30 days, it shall become the final order of the department.

(2) Upon receiving a Request for Agency Review, the division or office shall first evaluate it to determine whether it meets the requirements of Section 63G-4-301(1), i.e., whether it is signed, states the grounds upon which review is requested, the relief sought, and stating the date upon which it was mailed. If the request does not meet the statutory requirements, or was received at the division or office after the 30-day appeals period, it shall be returned to the sender with explanation as to the reason for the return. If the request meets the statutory requirements, the division or office shall promptly forward the material and a copy of any relevant material in its files to:

(a) the Operations Engineer, if the action involves Title 72, Chapter 7, Part 5, Utah Outdoor Advertising Act;

(b) the Deputy Director, if the action involves Title 72, Chapter 9, Motor Carrier Safety Act;

(c) the Project Development Director or designee, if the matter relates to:

(i) construction contract disputes; or

(ii) construction bids or the Disadvantaged Business Enterprise (DBE) program, in which case, the agency review also constitutes "administrative reconsideration" under federal regulation;

(d) the Region Director, if the action involves

something other than the items listed in Subsections (a), (b), or (c), and a specific appellate procedure is not otherwise specified in these rules or in statute;

(e) the Executive Director or designee, if the action involves something other than the items listed in subsections (a), (b), (c), or (d) and was initiated by department personnel located at department headquarters at the Calvin Rampton Complex.

(3) The positions listed above shall be the respective presiding officers. However, either the Executive Director or Deputy Director may designate another to act as a substitute. Additionally, when called to preside over adjudicative proceeding that involves access management or has potential "takings" or inverse condemnation implications, the Region Director may designate a group of individuals either to advise on the issue or to take over presiding officer duties. If the Region Director designates a group to take over presiding officer duties, he or she shall appoint:

(a) an odd-numbered group so that any decision will not result in a tie; and

(b) a chairperson.

(4) The person who issued the agency order to be reviewed may not be included in either of the groups established in paragraph (3). However, the person who issued the decision may be consulted, asked for the reasons underlying his decision, and called as a witness if the proceeding is converted to a formal one.

(5) Absent filing of a timely Request for Agency Review, the department will issue an order that the respondent is in default. If the defaulting party is the sole respondent, the Request for Agency Action will be dismissed. The department shall either mail a copy of the default order and the dismissal order to the person who requested the action.

(6) If the defaulting party is not the sole requester, the initiating division, office, or the appropriate hearing officer shall mail the Order of Default to all parties. The adjudicative proceeding may continue and the department may determine all issues in the proceeding, including those affecting the defaulting party.

(7) A defaulting party may seek agency review of an Order of Default by sending a request for agency review to the presiding officer. If the Order of Default was issued by that officer, then the defaulting party must seek reconsideration of the Order of Default pursuant to R907-1-5. The sole issue is whether entering default was appropriate.

R907-1-4. Agency Review -- Procedures.

(1) Discovery is prohibited, but subpoenas may be issued for the production of necessary evidence. Upon request, the applicant shall have access to information contained in the agency's files and to all materials and information gathered in any investigation, except as otherwise provided by law.

(2)Within 20 days after receipt of a request for agency review, any party, including the division or office that issued the original decision, may submit additional documentation, which may include legal briefs, to the person required to decide on review. The person deciding on review may grant either party an extension of time. The decision should be made on the record appearing after the responses have been submitted, but the person required to decide on review may meet with the parties, if he or she considers it necessary. This meeting is not a hearing as contemplated under Title 63G, Chapter 4 Utah Administrative Procedures Act.

(3)The person deciding the review shall issue a final agency order as promptly as possible. The order shall contain:

(a) a designation of the statute or rule permitting or requiring review;

(b) a statement of the issues reviewed;

(c) findings as fact as to each of the issues;

(d) conclusions of law as to each of the issues;

(e) the reasons for the disposition;

(f) whether the decision of the division or office initiating the decision is affirmed, reversed, modified, or remanded; and

(g) notice of the right to judicial review pursuant to Section 63G-4-402 by filing a petition in district court within 30 days.

R907-1-5. Reconsideration.

(1) Within 20 days after issuance of the final order, any party may request reconsideration, stating the specific grounds upon which relief is requested.

(2) The person filing the request shall mail a copy to each party.

(3) The Executive Director, or his designee, shall issue a written order either denying or granting the request. If no order is issued within 20 days, the request shall be considered denied. If the request is granted in any part and a new final order is issued, it shall include the same information listed in R907-1-4, or R907-1-6 if the matter concerned motor carriers.

R907-1-6. Administrative Procedures for Motor Carrier Actions.

(1) When a motor carrier appeals the imposition of a penalty under Title 72, Chapter 9, Motor Carrier Safety Act, he or she shall follow the procedures established in R907-1. This proceeding is an informal adjudicative proceeding under Section 63G-4-402, Utah Administrative Procedures Act; therefore, discovery is prohibited, but the administrative hearing officer may issue subpoenas or other orders to compel production of necessary evidence. The department shall provide the applicant, upon request, information in the agency's files, including records that are part of any investigation unless those records are otherwise made confidential or protected from disclosure.

(2) If the proceeding is converted to a formal adjudicative proceeding and an evidentiary hearing held, the department's Executive Director may act as the administrative hearing officer. At the hearing, the motor carrier shall go first and is burdened to show why the department's civil penalties should not be assessed. The division shall respond, with the motor carrier being given an opportunity to rebut the division's evidence. If the administrative hearing officer decides doing so will be beneficial to his understanding of the issues, he may allow closing statements or arguments and he may tape the proceedings. The rules of evidence do not apply.

(3) The person deciding the review shall issue a final agency order as promptly as possible. The order shall contain:

(a) a designation of the statute or rule permitting or requiring review;

(b) a statement of the issues reviewed;

(c) findings as fact as to each of the issues;

(d) conclusions of law as to each of the issues;

(e) the reasons for the disposition;

(f) whether the decision of the division or office initiating the decision is affirmed, reversed, modified, or remanded; and

(g) notice of the right to judicial review pursuant to Section 63G-4-402 by filing a petition in district court within 30 days.

R907-1-7. Formal Process and Hearing: Initiation.

(1) If, notwithstanding R907-1-1, the department wishes to initiate an adjudicative proceeding as a formal proceeding,

the formal hearing process shall be conducted as follows:

(2) A Notice of Agency Action shall include the following information:

(a) the names and mailing addresses of all respondents and any other persons to whom notice is being given;

(b) the department's file number or other reference number;

(c) a name or caption of the adjudicative proceeding, i.e., Utah Department of Transportation, Motor Carrier Safety Division v. XXXX Trucking Company;

(d) the date on which the Notice was placed in U.S. Mail, or personally served upon the respondents;

(e) a statement of the legal authority and jurisdiction under which the adjudicative proceeding is to be maintained;

(f) the name, title, mailing address, and telephone number of the office initiating the Notice of Agency Action and the appropriate hearing officer;

(g) a general statement of the purpose of the adjudicative proceeding and, to the extent known, the questions to be decided;

(h) if the department is proposing to assess a fine or penalty, the amount of the fine or penalty and a summary of the evidence supporting the proposed amount;

(i) a statement that the adjudicative proceeding is to be conducted formally according to the provisions of these Rules and Sections 63G-4-204 to 63G-4-209;

(j) a statement that a written response must be filed within 30 days of the mailing date of the Notice of Agency Action; and

(k) a statement of the time and place of the hearing, a statement of the purpose for which the hearing is to be held, and a statement that a party who fails to attend or participate in the hearing may be held in default.

(3) Absent filing of a timely request, the department will issue an order that the respondent is in default. If the defaulting party is the sole respondent, the Notice of Agency Action will then become the department's final order. The initiating division, office, or appropriate hearing officer shall revise the Notice of Agency Action to effect this change, captioning the Notice as the Final Order, affixing the appropriate signature and the new date. The department may not change the contents in any substantive manner. However, the final order shall include a provision that notifies the respondent of his right to judicial review. The department shall then either mail or personally serve the respondent with a copy of the default order and the final order.

(4) If the defaulting party is not the sole respondent, the initiating division, office, or the appropriate hearing officer shall mail the Order of Default to all parties. The adjudicative proceeding may continue and the department may determine all issues in the proceeding, including those affecting the defaulting party.

(5) A defaulting party may seek agency review of an Order of Default by sending a written request to the appropriate hearing officer identified in R907-1-3(2). If the Order of Default was issued by that hearing officer, then the defaulting party must seek reconsideration of the Order of Default pursuant to R907-3-1. The sole issue is whether entering default was appropriate.

R907-1-8. Formal Process and Hearing: Responses.

(1) In all formal adjudicative proceedings, the respondent shall file and serve a written response signed by the respondent or a representative within 30 days of the mailing date of the Notice of Agency Action that shall include:

(a) UDOT's file number or other reference number;

(b) the name of the adjudicative proceeding;

(c) a statement of the relief that the respondent seeks;

(d) a statement of the facts; and

(e) a statement summarizing the reasons that the relief requested should be granted.

(2) The response shall be filed with UDOT and one copy shall be sent by mail to each party.

(3) All papers permitted or required to be filed under these rules shall be filed with UDOT and one copy shall be sent by mail to each party.

(4) In the discretion of the Presiding Officer Director, any respondent may be heard without written pleadings or an order of default may be entered pursuant to the Rules below.

R907-1-9. Formal Process and Hearing: Intervention.

(1) Order Granting Leave to Intervene Required. Any person, not a party, desiring to intervene in a formal proceeding shall obtain an order from the presiding officer granting leave to intervene before being allowed to participate. Such order shall be requested by means of a signed, written petition to intervene which shall be filed with UDOT by the time a response is due as prescribed in R907-1-8 and a copy promptly mailed to each party. Any petition to intervene or materials filed after the date a response is due, may be considered by the presiding officer only upon separate motion of the intervenor made at or before the hearing for good cause shown.

(2) Content of Petition. Petitions for leave to intervene must identify the proceedings. The petition must contain a statement of facts demonstrating that the petitioner's legal rights or interest are substantially affected by the formal adjudicative proceeding, or that the petitioner qualifies as an intervenor under any provision of law. Additionally, the petition shall include a statement of the relief, including the basis thereof, that the petitioner seeks from the presiding officer.

(3) Response to Petition. Any party to a proceeding in which intervention is sought may make an oral or written response to the petition for intervention. Such response shall state the basis for opposition to intervention and may suggest limitations to be placed upon the intervenor if intervention is granted. The response must be presented or filed at or before the hearing.

(4) Granting of Petition. The presiding officer shall grant a petition for intervention if he or she determines that:

(a) The petitioner's legal interests may be substantially affected by the formal adjudicative proceeding; and

(b) The interests of justice and the orderly and prompt conduct of the adjudicative proceedings will not be materially impaired by allowing the intervention.

(5) Order Requirements.

(a) Any order granting or denying a petition to intervene shall be in writing and sent by mail to the petitioner and each party.

(b) An order permitting intervention may impose conditions on the intervenor's participation in the adjudicative proceeding that are necessary for a just, orderly, and prompt conduct of the adjudicative proceeding.

(c) The presiding officer may impose conditions at any time after the intervention.

(d) If it appears during the course of the proceeding that an intervenor has no direct or substantial interest in the proceeding and that the public interest does not require the intervenor's participation therein, the presiding officer may dismiss the intervenors from the proceeding.

(e) In the interest of expediting a hearing, the presiding officer may limit the extent of participation of an intervenor. Where two or more intervenors have substantially like interests and positions, the presiding officer may at any time during the hearing limit the number of intervenors who will be permitted to testify, cross-examine witnesses or make and

argue motions and objections.

R907-1-10. Formal Process and Hearing: Conduct of Hearings.

All hearings before the Presiding Officer Director shall be governed by the following procedures:

(1) Public Hearings. All hearings shall be open to the public, unless otherwise ordered by the Presiding Officer Director for good cause shown. All hearings shall be open to all parties

(2) Full Disclosure. The Presiding Officer Director shall regulate the course of the hearing to obtain full disclosure of relevant facts and to afford all the parties a reasonable opportunity to present their positions.

(3) Rules of Evidence. The Director shall use as appropriate guides, the Utah Rules of Evidence insofar as the same may be applicable and not inconsistent with these rules. Notwithstanding this, on its own motion or upon objection of a party, the Director:

(a) may exclude evidence that is irrelevant, immaterial, or unduly repetitious;

(b) shall exclude evidence privileged in the courts of Utah;

(c) may receive documentary evidence in the form of a copy or excerpt if the copy or excerpt contains all pertinent portions of the original document; and

(d) may take official notice of any facts that could be judicially noticed under the Utah Rules of Evidence, of the record or other proceedings before the agency, and of technical or scientific facts within the agency's specialized knowledge.

(4) Hearsay. Notwithstanding subsection C. above, the Director may not exclude evidence solely because it is hearsay.

(5) Parties Rights. The Director shall afford to all parties the opportunity to present evidence, argue, respond, conduct cross-examination, and submit rebuttal evidence.

(6) Public Participation. The Director may give persons not a party to the adjudicative proceeding the opportunity to present oral or written statements at the hearing.

(7) Oath. All testimony presented at the hearing, if offered as evidence to be considered in reaching a decision on the merits, shall be given under oath.

(8) Failure to Appear. When a party to a proceeding fails to appear at a hearing after due notice has been given, the Director may enter an order of default in accordance with this rule.

(9) Time Limits. The Director may set reasonable time limits for the participants of the hearing.

(10) Continuances of the Hearing. Any hearing may be continued to a time and date certain announced at the hearing, which shall not require any new notification. The continuance of the hearing may be made upon motion of a party indicating good cause why such a continuance is necessary and not due to the fault of the party requesting the continuance. The continuance of the hearing may also be made by the request of the Director when in the public interest.

(11) Oral Argument and Briefs. Upon the conclusion of the taking of evidence, the Director may, at his discretion, permit the parties to make oral arguments or submit additional briefs or memoranda upon a schedule to be designated by the Director.

(12) Record of Hearing. The Director shall cause an official record of the hearing to be made, at the agency's expense.

(a) The record may be made by means of a certified shorthand reporter employed by the Director or by a party desiring to employ a certified shorthand reporter at its own cost in the event that the Director chooses not to employ a reporter. If a party employs a certified shorthand reporter, the original transcript of the hearing shall be filed with the Director. Parties desiring a copy of the certified shorthand reporter's transcript may purchase it from the reporter.

(b) The record of the proceedings may also be made by means of a tape recorder or other recording device if the Director determines that it is unnecessary or impracticable to employ a certified shorthand reporter and the parties do not desire to employ a certified shorthand reporter. Any party, at its own expense, may have a person approved by the Director prepare a transcript of the hearing, subject to any restrictions that the Director is permitted by statute to impose to protect confidential information disclosed at the hearing. Whenever a transcript or tape recording of a hearing is made, it will be made available at the appropriate UDOT office for use, but may not be taken out of the office. If the party agrees to pay the costs, the department will make a copy to give to them.

(13) Preserving Integrity. This section does not preclude the Director from taking appropriate measures necessary to preserve the integrity of the hearing.

(14) Summons, Witness Fees and Discovery. The Director may allow appropriate witness fees as provided by statute or rule.

(a) Summons. The Director may issue a summons or subpoena on its own motion, or upon request of a party, shall issue summons or subpoenas for the attendance of witnesses and the production of any pertinent paper, book, record, document, or other appropriate discovery of evidence.

(b) Discovery. Upon the motion of a party and for good cause shown that it is to obtain relevant information necessary to support a claim or defense, the Director may authorize such manner of discovery against another party or person, including the UDOT staff, as may be prescribed by and in the manner provided by the Utah Rules of Civil Procedure.

(c) Construction. Nothing in this section restricts or precludes any investigative right or power given to the Transportation Commission or Director by law.

R907-1-11. Formal Process and Hearing: Decisions and Orders.

(1) Decision. The Director shall sign and issue an order that includes:

(a) a statement of the Director's findings of fact, conclusions of law and decision, based exclusively on the evidence of the record in the adjudicative proceedings or on facts officially noted;

(b) a statement of the reasons for the Director's decision;

(c) a statement of any relief ordered;

(d) a notice of the right to apply for reconsideration;

(e) a notice of any right to administrative or judicial review of the order available to aggrieved parties; and

(f) The time limits applicable to any reconsideration or review.

(2) Preparation of Order. The Director may direct the prevailing party to prepare proposed findings of fact, conclusions of law and an order consistent with the requirements of this rule, which shall be completed within ten days of the direction, unless otherwise instructed by the Director. Copies of the proposed findings of fact, conclusions of law and order shall be served by the prevailing party upon all parties of record prior to being presented by the Director for signature. Notice of objection thereto shall be submitted to the Director and all parties of record within ten days of service.

(3) Entry of Order. The Director shall sign the order and cause the same to be entered and indexed in books kept for that purpose. The order shall be effective on the date of issuance, unless otherwise provided in the order. Upon the

petition of a person subject to the order and for good cause shown, the Director may extend the time for compliance fixed in its order.

(4) Evaluation of Evidence. The Director may use his expertise, technical competence, and specialized knowledge to evaluate the evidence.

(5) Hearsay. No finding of fact that was contested may be based solely on hearsay evidence.

(6) Interim Orders. This section does not preclude the Director from issuing interim orders to:

(a) notify the parties of further hearings;

(b) notify the parties of provisional rulings on a portion of the issues presented; or

(c) otherwise provide for the fair and efficient conduct of the adjudicative proceeding.

(7) Notice. The Director shall notify all parties to the proceeding of its decision. A copy of the order with accompanying findings of fact and conclusions of law shall be delivered or mailed to each party.

R907-1-12. Formal Process and Hearing: Reconsideration and Modification of Existing Orders.

(1) Time for Filing. Within 20 days after the date that a final order is issued in the formal adjudicative process, any party may file a written request for reconsideration or rehearing, stating the specific grounds upon which relief is requested.

(2) Not Prerequisite for Judicial Review. Unless otherwise provided by law, the filing of the request for reconsideration is not a prerequisite for seeking judicial review of the order.

(3) Mailing Requirement. The request for reconsideration shall be filed with the Director. One copy shall be sent by mail to each party by the person making the request.

(4) Contents of Petition. A petition for reconsideration shall set forth specifically the particulars in which it is claimed the Director's order or decision is unlawful, unreasonable, or unfair. If the petition is based upon a claim that the Director failed to consider certain evidence, it shall include an abstract of that evidence. If the petition is based upon newly discovered evidence, then the petition shall be accompanied by an affidavit setting forth the nature and extent of such evidence, its relevancy to the issues involved, and a statement that the party could not, with reasonable diligence, have discovered the evidence prior to the hearing.

(5) Response to Petition. All other parties to the proceeding upon which a reconsideration is sought may file a response to the petition no later than ten days from the filing of the petition. A copy of such responses shall be mailed to the petitioner by the person so responding on the date the response is filed.

(6) Action on the Petition. The Director is authorized to act upon the petition for reconsideration. If the Director does not issue an order within 20 days after the filing of the request, the request for reconsideration shall be considered denied. The Director may, by written order, set a time for hearing on said petition or deny the petition.

(7) Modification of Existing Orders. A request for modification or amendment of an existing order of the Director shall be treated as a new Request for Agency Action for the purposes of this rule. Such request for modification or amendment shall include as directly affected persons all parties to the previous adjudicative proceeding and their successors in interest.

R907-1-13. Declaratory Rulings.

(1) Petition for Declaratory Orders. Any person may petition the Director for a declaratory order on the applicability of any administrative rule, regulation or order as well as any provision of the Utah Code within the jurisdiction of UDOT, which relate to the operations or activities of that person. The petition shall include the questions and answers sought and reasons in support of or in opposition to the applicability of the statute, rule, regulation or order involved.

(2) Not Subject to Declaratory Rulings. The Director shall not issue a declaratory ruling if:

(a) the person requesting the declaratory ruling participated in an adjudicative proceeding concerning the same issue within 12 months of the date of the present request; or

(b) there would be substantial prejudice to the rights of a person who would be a necessary party, unless that person consents in writing to the determination of the matter by a declaratory proceeding.

(3) Intervention. Persons may intervene in declaratory proceedings if they meet the requirements of R907-1-9.

(4) Forms of Rulings. After receipt of a petition for a declaratory order, the Director may issue a written order:

(a) declaring the applicability of the statute, rule, regulation or order in question to the specified circumstances; or

(b) decline to issue a declaratory order and state the reasons for its action.

(5) Contents of Order. A declaratory order shall contain:

(a) the names of all parties to the proceeding on which it is based;

(b) the particular facts on which it is based; and

(c) the reasons for its conclusion.

(6) Mailing of Order. A copy of all orders issued in response to a request for a declaratory proceeding shall be mailed promptly to the petitioner and any other parties.

(7) Binding Effect. A declaratory order has the same status and binding effect as any other order issued in an adjudicative proceeding.

(8) Time Limit. Unless the petitioner and the Director agree in writing to an extension, if the Director has not issued a declaratory order within 60 days after receipt of the request for a declaratory order, the petition is denied.

R907-1-14. Emergency Orders.

Emergency orders will be issued in accordance with the following guidelines: notwithstanding the other provisions of these Rules, the Director or any member of the Transportation Commission is authorized to issue an emergency order without notice and hearing in accordance with applicable law. The emergency order shall remain in effect no longer than until the next regular meeting of the Transportation Commission, or such shorter period of time as shall be prescribed by statute.

(1) Prerequisites for Emergency Order. The following must exist to allow an emergency order:

(a) the facts known to the Director or Commission member or presented to the Director or Commission member show that an immediate and significant danger to the public health, safety, or welfare exists; and

(b) the threat requires immediate action by the Director of Commission member.

(2) Limitations. In issuing its Emergency Order, the Director or Commission member shall:

(a) limit its order to require only the action necessary to prevent or avoid the danger to the public health, safety, or welfare;

(b) issue promptly a written order, effective immediately, that includes a brief statement of findings of fact, conclusions of law, and reasons for the Director or Commission member's utilization of emergency adjudicative

proceedings;

(c) give immediate notice to the persons who are required to comply with the order; and

(d) if the emergency order issued under this section will result in the continued infringement or impairment of any legal right or interest of any party, the Director shall commence a formal adjudicative proceeding before the Director in accordance with R907-1.

R907-1-15. Exhaustion of Administrative Remedies.

(1) Persons must exhaust their administrative remedies in accordance with Section 63G-4-401, prior to seeking judicial review.

(2) In any adjudicative proceeding before the Director, there is an opportunity for affected parties to respond and participate. Only those aggrieved parties that so exhausted these available and adequate remedies before the Director may be allowed to seek judicial review of the final Director action.

R907-1-16. Deadline for Judicial Review.

A party shall file a petition for judicial review of final agency action within 30 days after the date that the order constituting the final agency action is issued. The petition shall name the agency and all other appropriate parties as respondents and shall meet the form requirements specified in Title 63G, Chapter 4.

R907-1-17. Judicial Review of Formal Adjudicative Proceedings.

Judicial review of formal adjudicative proceedings shall be conducted in conformance with Sections 63G-4-403.

R907-1-18. Civil Enforcement.

(1) Agency Action. In addition to other remedies provided by law and other Rules of the Transportation Commission or UDOT, the Commission or UDOT may seek enforcement of an order by seeking civil enforcement in the district courts.

(a) The action seeking civil enforcement must name, as defendants, each alleged violator against whom civil enforcement is sought.

(b) Venue for an action seeking civil enforcement shall be determined by the Utah Rules of Civil Procedure.

(c) The action may request, and the court may grant, any of the following:

(i) declaratory relief;

(ii) temporary or permanent injunctive relief;

(iii) any other civil remedy provided by law; or

(iv) any combination of the foregoing.

(2) Individual Action. Any person whose interests are directly impaired or threatened by the failure of an agency to enforce its order may timely file a complaint seeking civil enforcement of that order. The complaint must name as defendants, the agency whose order is sought to be enforced, the agency that is vested with the power to enforce the order, and each alleged violator against whom the plaintiff seeks civil enforcement. The action may not be commenced:

(a) until at least 30 days after the plaintiff has given notice of its intent to seek civil enforcement of the alleged violation to the Commission or UDOT, the attorney general, and to each alleged violator against whom the petitioner seeks civil enforcement;

(b) if the Commission or UDOT has filed and is diligently prosecuting a complaint seeking civil enforcement of the same order against the same or similarly situated defendant; or

(c) if a petition for judicial review of the same order has been filed and is pending in court.

R907-1-19. Waivers.

Notwithstanding any other provision of this rule, any procedural matter, including any right to notice or hearing, may be waived by the affected person by a signed, written waiver in a form acceptable to UDOT. This waiver provision may not be construed to prohibit a finding of default as defined in this rule.

R907-1-20. Construction.

The Utah Administrative Procedures Act described in Title 63G, Chapter 4 or any other federal, state statute, or federal regulation shall supersede any conflicting provision of this rule. It is the department's intent that, where possible, the provisions of this rule be construed to be in compliance with those superseding provisions.

R907. Transportation, Administration.
R907-63. Structure Repair and Loss Recovery Procedure.
R907-63-1. Authority and Purpose.

This rule establishes a procedure for loss recovery for damages to structures, appurtenances, thereto and the roadway as provided in Section 72-7-301.

R907-63-2. Procedure to Collect for Damage to Structures and Highways.

(1) Upon notification of damage to the Department's property, the Department shall repair or replace damaged structures and highway elements.

(2) All costs associated with the repair or replacement of the damaged property shall then be invoiced to the owner of the vehicle causing the damage, or to the person directly responsible for the damage.

(3) If the damage is caused by a vehicle, the person responsible shall reimburse the Department for the full cost of repairing the damage.

(4) If payment is not received by the Department within 60 days of the date of the invoice, the Department may pursue payment by one of the following means:

(a) UDOT may pursue collection of a delinquent account in accordance with Sections 63A-3-301 through 63A-3-310, Accounts Receivable Collection.

(b) The account may be tendered to a collection agency for immediate collection.

(5) In cases where undue financial pressure would be caused by full payment of an invoice, the owner of the vehicle or person responsible for the damage may arrange to make installment payments on the debt.

R907-63-3. Eligible Region Recovery Costs.

The appropriate Region may seek recovery of all costs associated with an incident, including traffic control, maintenance and repair when such work is performed by Region work forces to maintain the integrity of the highway system, structure, or to restore the damaged system and facilities to their preexisting condition.

R907-63-4. Eligible Division Recovery Costs.

When damage occurs to a bridge structure:

(1) The Structures Division shall accumulate all costs for preparing design calculations, design plans, specifications and engineering estimates, including professional engineering services and construction engineering with associated overhead costs, along with all costs related to publication, preparation, and advertising the bid package.

(2) The Structures Division shall award the project to the lowest responsive and responsible bidder. The Structures Division shall submit the final accumulated project costs, including all eligible Region charges to UDOT Risk Management for the cost recovery process.

R907-63-5. Department Settlement Policy.

(1) The Department's intent is to secure full recovery from the responsible party(s) based on the full actual cost of such repairs to the structure or highway system damaged including all indirect costs associated with or resulting from an occurrence.

(2) The Department may at its discretion elect to accept settlement based on detailed engineering estimates and any direct or indirect costs associated with or resulting from an occurrence when the Department determines that it is in the best interest of the motoring public and tax payers to delay or forgo repairs to the damaged structures or highway system.

(3) Settlements shall conform to the requirements of the State Settlement Agreements Act, Sections 63G-10-101 through 503.

(4) The Department may submit to the Attorney General any claim for recovery, which is in dispute, requesting legal action be taken to recover the State's losses and settle such claims based on the laws of liability or as directed by the courts.

R909. Transportation, Motor Carrier.
R909-1. Safety Regulations for Motor Carriers.
R909-1-1. Authority and Purpose.

This Rule is enacted under the authority of Section 72-9-103 to enable the department to enforce the Federal Motor Carrier Safety Regulations as contained in Title 49, Code of Federal Regulations related to the operation of a motor carrier within the state, as required by Section 72-9-301.

R909-1-2. Adoption of Federal Regulations.

(1) Safety Regulations for Motor Carriers, 49 CFR Parts 350 through 384, Parts 387 through 399, and Part 40,(October 1, 2014), as amended by the Federal Register through April 23, 2015 are incorporated by reference, except for Parts 391.11(b)(1) and 391.49 as it applies to intrastate drivers only. These requirements apply to all motor carrier(s) as defined in 49 CFR Part 390.5, excluding commercial motor vehicles which are designed or used to transport more than 8 and less than 15 passengers (including the driver) for compensation and Section 72-9-102(2) engaged in intrastate commerce.

(2) Intrastate trucking operations in which the carriers operate double trailer combinations only are not required to comply with 49 CFR Part 380.203(a)(2).

(3) Exceptions to Part 391.41, Physical Qualification may be granted under the rules of Department of Public Safety, Driver's License Division, Section 53-3-303.5 for intrastate drivers under R708-34.

(4) Drivers involved wholly in intrastate commerce shall be at least 18 years old. However, if they are transporting placarded amounts of hazardous materials or carrying 16 or more passengers, including the driver, they must be 21 years old.

(5) Licensed child care providers operating a passenger vehicle with a seating capacity of not more than 30 passengers, and wholly in intrastate commerce, are exempt from 49 CFR Part 387 Subpart B but are subject to the minimum coverage requirements in Section 72-9-103.

R909-1-3. Insurance for Private Intrastate/Interstate Motor Carriers.

(1) "Private Motor Carrier" means a person who provides transportation of property or passengers by commercial motor vehicle and is not a for-hire motor carrier.

(2) All intrastate private motor carriers shall have a minimum amount of $750,000 liability.

(3) All intrastate for-hire and private motor carriers transporting any quantities of oil listed in 49 CFR 172.101; hazardous waste, hazardous material and hazardous substances defined in 49 CFR 171.101, shall have $1,000,000 minimum level of financial responsibility and a MCS-90 endorsement maintained at the principal place of business.

R909-1-4. Implements of Husbandry.

"Implements of Husbandry" is defined in Section 41-1a-102(23) and must be in compliance with all provisions of Chapter 6, Title 41, Utah Code Annotated. Vehicles meeting this definition are exempt from 49 CFR Part 393 - Parts and Accessories Necessary for Safe Operations.

R909-1-5. Cease and Desist Order - Registration Sanctions.

As authorized by Section 72-9-303, the department may issue cease and desist orders to any motor carrier that fails or neglects to comply with State and Federal Motor Carrier Safety Regulations or any part of this rule.

R909-1-6. Penalties and Fines.

Any motor carrier that fails or neglects to comply with State or Federal Motor Carrier Safety Regulations or any part of this rule is subject to a civil penalty as authorized by Sections 72-9-701 and 72-9-703.

R909-1-7. Motor Carriers Delinquent in Paying Civil Penalties; Prohibition on Transportation.

Pursuant to Section 72-9-303, a motor carrier that has failed to pay civil penalties imposed by the department, or has failed to abide by a payment plan, may be prohibited from operating commercial motor vehicles in intrastate or interstate commerce.

R909. Transportation, Motor Carrier.
R909-75. Safety Regulations for Motor Carriers Transporting Hazardous Materials and/or Hazardous Wastes.
R909-75-1. Purpose and Authority.

The purpose of this rule is to adopt regulations that are applicable to the offering, acceptance and transportation of hazardous materials related to the operation of a motor carrier within the State of Utah. This rule is authorized by Sections 72-9-103, 72-9-104 and 72-9-301.

R909-75-2. Adoption of Federal Regulations.

Safety Regulations for Motor Carriers Transporting Hazardous Materials and/or Hazardous Wastes, 49 CFR, Sub-Chapter C, Parts 107, 171, 172, 173, 177, 178, 179, and 180 (October 1, 2012), as amended by the Federal Register through April 17, 2013 are incorporated by reference. These changes apply to all private, common, and contract carriers by highway in commerce.

R916. Transportation, Operations, Construction.
R916-2. Prequalification of Contractors.
R916-2-1. Authority and Purpose.

This rule establishes procedures for prequalifying contractors desiring to submit bids and proposals for Utah Department of Transportation construction projects. This rule is authorized under Utah Code Ann. Sections 72-1-201 and 63G-6a-106(3)(a).

R916-2-2. Definitions.

(1) Terms used in this rule are defined in Section 72-1-102.

(2) "Board" means the prequalification board, consisting of 4 positions: Department of Transportation Comptroller, Director of Construction and Materials, an engineer for construction, and the Prequalification Specialist, or designees.

(3) "Applicant" means any person who submits an application for prequalification.

R916-2-3. Prequalification.

(1) Contractors desiring to submit bids or proposals for construction contracts shall be prequalified by the Department to ensure they have the resources and capability to successfully complete awarded contracts. Prequalification is not required for projects that have an advertised estimate of $3,000,000 or under.

(a) Prequalification information is due at least 10 calendar days before submitting a proposal or bid on projects of more than $3,000,000.

(b) The Department may change an Applicant's prequalification status at any time if the Department receives favorable or unfavorable information about the Applicant's job or financial performance.

(c) The prequalification amount limits the size of individual contracts and type of work for which a prequalified contractor may submit proposals or bids.

(2) Qualification ratings establish the type of construction work contractors may be permitted to perform and the maximum dollar value of contracts they are allowed to undertake at any one time.

(3) Applicants who attain a total prequalification of $50,000,000 shall be classified as unlimited. Each Applicant's prequalification shall be reviewed at least annually; more often if circumstances so warrant as determined by the Department.

(4) Qualification ratings shall be based on evaluation of the Applicant's:

(a) experience;

(b) past performance;

(c) personnel; and

(d) analysis of certified audited financial statements, including balance sheet, income statements, equipment and changes in financial condition.

(e) reviewed financial statements for the same time period may be accepted in lieu of the required certified audited financial statements, however, providing these documents shall result in a lower prequalification rating of one-half of the financial factor allowed under the usual procedure.

(5) An applicant may submit a guaranty of financial support provided by an affiliated but independent entity. The Department shall provide a guarantee form for this purpose. Applicants must submit the Department's guarantee form with their applications. The guarantee may increase an applicant's adjusted equity by a maximum of 50% of the applicant's calculated adjusted equity in the formula.

(6) The applicant shall only provide the experience and past performance of the applicant, and must submit financial documents that accurately represent the past financial performance and present financial condition of the applicant.

(7) The Department may reject an application and not pre-qualify an Applicant if the Applicant:

(a) fails to provide all requested information;

(b) provides false, misleading, or incorrect information;

(c) has now or in the past had an officer, member or owner who was convicted of a felony;

(d) is now or has been suspended or debarred by any governmental entity;

(e) has failed to complete a construction contract as the prime contractor;

(f) has been convicted or held liable for any crime or civil offense that involved collusive or deceptive activity related to a procurement process; or

(g) otherwise fails to meet the Department's requirements.

(8) This rule shall be administered to ensure that Applicants possess adequate financial resources to provide complete performance of contracts awarded to them by the Department, and to foster and protect competition in the Department's bidding processes.

(9) The Department will not accept any pledges.

R916-2-4 Joint Venture.

(1) Joint ventures must submit a letter of intent to the Department's Prequalification Board Specialist that states the exact name of the joint venture and identifies the joint venture's designated administrative partner before submitting a joint proposal on a project. Joint ventures must submit their joint proposals at least four working days before the scheduled bid opening. The Department will consolidate individual prequalification amounts for joint venture bids or proposals.

(2) Applicants shall obtain the following under the joint venture designation before bid openings:

(a) Bid bond; and

(b) UDOT Contractor identification and password.

R916-2-5. Prequalification Board.

(1) The Prequalification board is established to:

(a) direct the prequalification of contractors;

(b) review and analyze prequalification applications; and

(c) establish the amount and type of prequalification to be granted to contractors.

December 8, 2014 **72-1-102**
Notice of Continuation August 3, 2016 **72-1-201**
63G-6a-106(3)(a)

R916. Transportation, Operations, Construction.
R916-3. Design-Build Contracts.
R916-3-1. Purpose.

(1) This rule is to provide guidance under which the Utah Department of Transportation (UDOT) may use the Design-Build approach to contracting pursuant to Section 63G-6a-1402(3)(a). Design-Build seeks to provide a project delivery method which may result in: a savings of time, cost, and administrative burden; improved quality expectations as to the end product, schedule, and budget; and risk management savings due to lack of duplication of expenses and improved coordination of efforts.

R916-3-2. Authority.

(1) The provisions of this rule are authorized by the following grants of rulemaking authority and provisions of Utah Code: Subsection 63G-6a-1402(3)(a), Title 63G, Chapter 3; and Sections 72-1-201 and 72-2-206 of the Utah Transportation Code.

R916-3-3. Policy.

(1) UDOT may use, where determined appropriate by the Executive Director, or designee, the Design-Build method of project delivery. When Design-Build is used, UDOT shall enter into a contract with a single entity to provide both engineering/design services, construction services, and/or maintenance services pursuant to a UDOT provided scope of work statement. Design-Build is not recommended for every project. The use of the Design-Build method may be determined by the individual needs and merits of the project.

R916-3-4. Pre-qualification.

(1) UDOT may issue a Request for Qualifications (RFQ,) soliciting qualification statements from contractors wishing to submit proposals on a UDOT Design-Build project. The RFQ shall state the minimum and maximum number of highly qualified proposers that will be invited to submit final proposals.

(2) Pre-qualification shall be based on an evaluation of the criteria set forth in the RFQ, including construction experience; design experience; technical competence; capability to perform, including financial, manpower and equipment resources; experience in other Design-Build projects; and past performance.

(3) The field of competing proposers shall be narrowed to the most qualified proposers, not to exceed the number designated in the RFQ. Failure to achieve at least two qualified proposers shall necessitate re-soliciting the project.

R916-3-5. Preparation of Specifications.

(1) UDOT may use any method of specifying construction items the Executive Director determines to be in the best interest of UDOT. Engineering firms who participate in the preparation of specifications or other information used in a procurement may not participate as proposers on such projects if a conflict of interest exists as determined by UDOT.

R916-3-6. Request for Proposals (RFP).

(1) Pre-qualified proposers shall be invited to submit proposals on designated Design-Build project pursuant to an RFP. UDOT may elect to ask for initial proposals followed by discussions and may request best and final offers, or may elect to award the contract without discussions or requesting best and final offers. The RFP may ask for proposals based on a predetermined sum.

(2) UDOT may award a predetermined fee to the proposers who submit responsive proposals but who are not selected for contract award. The amount of the fee (if any) shall be identified in the RFP.

(3) The RFP shall require separate technical and price proposals, meeting requirements as stated in the RFP. The RFP may require proposals to meet a mandatory technical level, and may include a provision for submitting alternative technical concepts.

(4) Technical solutions/design concepts contained in proposals shall be considered proprietary information unless a predetermined fee is accepted.

R916-3-7. Evaluation of Proposals and Discussions with Proposers.

(1) UDOT shall evaluate the technical and price proposals separately, in accordance with the evaluation criteria set forth in the RFP.

(2) UDOT may offer the proposers the opportunity to participate in presentations and/or discussions regarding their proposals. Discussions, either oral or in writing, may be held with proposers for the purpose of clarification of the proposals and/or to identify deficiencies in initial proposals. If presentations or discussions are held with one proposer, they must be held with all pre-qualified proposers.

(3) If discussions are held, best and final offers will be requested. If best and final offers are requested they will be the basis for award and will be evaluated as stated in the RFP.

(4) UDOT may follow any of the criteria included in 23 CFR 636 Subpart E when conducting discussions with proposers, which is incorporated as part of this Rule R916-3-7.

R916-3-8. Acceptable Bid Security; Performance and Payment Bonds.

(1) The Executive Director, or designee, shall have authority to waive the requirement to provide bid security, or may reduce the amount of such security, if he or she determines that the bid security otherwise required by Part 11 of the Utah Procurement Code to be unnecessary to protect the State.

(2) The Executive Director, or designee, shall have authority to reduce the amount of the payment and performance bonds below the 100% level required by Part 11 of the Utah Procurement Code if he or she determines that a 100% bond is unnecessary to protect the State.

(3) Bid security, payment bonds and performance bonds must be provided on the forms included in the RFP.

R916-3-9. Required Contract Clauses.

The Design-Build contract documents shall include the contract clauses set forth in Utah Administrative Code R23-1-60, subject to such modifications as the Executive Director deems advisable. Any modifications shall be supported by a written determination of the Executive Director that describes the circumstances justifying the variations, and notice of any material variation shall be included in the RFP.

R916-3-10. Award and Contract.

(1) The basis for award shall be stated in the RFP. Award may be based on any of the following approaches, all of which shall be deemed to constitute award to the responsive and responsible offeror whose proposal is most advantageous to UDOT as such terms are used in Utah Code Section 63G-6a-1402:

(a) Award to the responsible proposer offering the lowest priced responsive proposal. If the RFP includes a mandatory technical level, no proposal shall be considered responsive unless it meets that level.

(b) Award to the responsible proposer whose proposal is evaluated as providing the best value to UDOT.

(c) If the RFP provides for a stipulated sum, award to

the responsible proposer whose proposal is evaluated as providing the best value to UDOT.

(2) There is no requirement that a contract be awarded. Following award, a contract shall be executed and notice given to the successful Design-Build proposer to proceed with the work.

Notice of Continuation August 3, 2016

R920. Transportation, Operations, Traffic and Safety.
R920-50. Ropeway Operation Safety.
R920-50-1. Purpose.

This rule establishes regulations, requirements, and provides standards for the design, construction, and operation of a passenger ropeway, except private residence passenger ropeways as defined in Section 72-11-102(11), and establishes the procedures necessary to implement the powers and duties of the Utah Passenger Ropeway Safety Committee (Committee). Previously the Committee was known as the Utah Passenger Tramway Safety Committee. The Committee has also been referred to as the Tramway Board.

R920-50-2. Authority.

This rule is authorized by Section 72-11-210 to implement Title 72, Chapter 11, Passenger Ropeway Systems Act.

R920-50-3. Definitions.

In addition to terms defined at Section 72-11-102, the following terms are defined:

(1) "Aerial lift specialist" as used in American National Standards Institute (ANSI) B77.1 sections 3.3.4.1 and 4.3.4.1, means a Ropeway Inspector.

(2) "Aerial tramway specialist" as used in ANSI B77.1 section 2.3.4.1 means a Ropeway Inspector.

(3) "Air Space" means the area bounded by vertical planes commencing at a point thirty-five (35) feet from the intersection of the vertical planes of the ropes and ground surface.

(4) "Annual general inspection" means an inspection of a passenger ropeway made by a Ropeway Inspector to verify preservation of original design integrity and to determine that components and systems of the passenger ropeway are in proper working order and in accordance with this rule.

(5) "Audible warning devices" means an audible warning device that signals an impending start of the aerial lift.

(6) "Conveyor specialist" as used in ANSI B77.1 section 7.3.4.1 means a Ropeway Inspector.

(7) "Dynamic Testing Logs" means a record of the data collected during the dynamic test.

(8) "Experienced personnel" means an individual who has acquired knowledge and skills through study, training, or experience in ropeway maintenance, operation, or testing.

(9) "Existing ropeway" means any passenger ropeway that shall have been operated for passengers in excess of one calendar year.

(10) "Incident inspection" means an inspection of a passenger ropeway incident made by an approved Ropeway Inspector or a qualified engineer at the request of the Committee.

(11) "Land surveyor" means an individual licensed under Section 58-22-102 as a professional land surveyor.

(12) "Modification" means any change as defined in ANSI B77.1 Section 1.2.4.4, ANSI B77.2 Section 1.2.4.4, and the replacement of a ropeway component by one that alters the certified design or construction provided by the passenger ropeway manufacturer or designer.

(13) "New ropeway" means any passenger ropeway that is registered for the first time for passenger operation during its first calendar year of operation.

(14) "Operational inspection" means an inspection of a passenger ropeway made by a Ropeway Inspector to determine compliance with the operation and maintenance requirements of the Governing Standard and with this rule.

(15) "Operating personnel" means persons employed by the operator for the purpose of supervising the operation, or engaged in servicing, checking, inspecting or maintaining the machinery or structures of a ropeway and when specifically on duty for such purpose on that ropeway.

(16) "Passenger" means any person riding a ropeway, other than "operating personnel."

(17) "Passenger Ropeway Incident" means:

(a) Any structural, mechanical, or electrical malfunction or failure of a passenger ropeway component that results in bodily injury to any person on, or inside the load or unload zone of, a passenger ropeway;

(b) Any deropement regardless of whether or not the passenger ropeway is evacuated;

(c) Any evacuation of the passenger ropeway other than by prime mover or auxiliary power unit, regardless of cause;

(d) Any fire involving a passenger ropeway component or adjacent structure;

(e) Any structural, mechanical, or electrical malfunction or failure of a passenger ropeway component that results in a loss of control of the passenger ropeway as defined in ANSI B77.1 Section X.2.3.1 or ANSI B77.2 Section 2.2.1.7.2;

(f) Any wire rope damage which exceeds the requirement in ANSI B77.1 Section A.4.1.3 or ANSI B77.2 Section 3.4.1.1; and

(g) Any structural, mechanical, or electrical malfunction or failure of a passenger ropeway component or its primary connection that has the apparent potential for causing bodily injury to any person, including but not limited to, the following:

(i) Terminal Structure;
(ii) Bullwheel;
(iii) Brake System;
(iv) Tower Structure;
(v) Sheave, Axle, or Sheave Assembly;
(vi) Carrier; and
(vii) Grip.

(18) "Portable Ropeway" means a ropeway expressly designed to be portable, operated without a permanent foundation, and that has a design range of maximum grade.

(19) "Pre-operational inspection" means an inspection made by a Ropeway Inspector prior to the operation of any new or modified passenger ropeway requiring an Acceptance Inspection and Test.

(20) "Qualified engineer" means any engineer who is licensed to practice engineering in the state of Utah and who has been approved by the Committee.

(21) "Qualified personnel" as used in ANSI B77.1 sections 2.1.1.11, 3.1.1.11, 4.1.1.11, 5.1.1.11, 6.1.1.11, and 7.1.1.11 means a qualified engineer.

(22) "Relocated ropeway" means any passenger ropeway moved to a new location.

(23) "Responsible charge" means effective control and direction of the installation or modification of a passenger ropeway.

(24) "Ropeway Inspector" means an engineer licensed to practice engineering in the state of Utah, independent of the ropeway owner, and approved by the Committee to inspect passenger ropeways.

(25) "Structure" means any edifice, including residential and public buildings, or any other structure or equipment that could reasonably be expected to interfere with the safe operation of a ropeway. Ropeway components required for the operation of the ropeway are not structures.

(26) "Surface lift specialist" as used in ANSI B77.1 section 5.3.4.1, means a Ropeway Inspector.

(27) "Tow specialist" as used in ANSI B77.1 section 6.3.4.1 means a Ropeway Inspector.

R920-50-4. General Requirements for Passenger Ropeways.

(1) Passenger ropeways operating in the State of Utah

shall be registered annually with the Committee, and no passenger ropeway shall be operated for passengers without a valid certificate of registration.

(2) Ropeways require a qualified engineer to certify the design, manufacturing, and construction of the ropeway. A Qualified Engineer or Land Surveyor is required to complete the "as-built" profile and certification.

(3) Existing ropeways, when removed and reinstalled, shall be classified as new installations.

(4) Ropeway operators shall be covered by a liability insurance of a minimum of $300,000. The Utah Passenger Ropeway Safety Committee shall be notified of a lapse or termination of insurance coverage pursuant to the terms of the policy.

R920-50-5. Application to Register a Passenger Ropeway.

(1) Each year prior to operating a passenger ropeway the ropeway operator shall apply to the Committee, for a Certificate of Registration. In the event a new operator is assigned, the operator shall notify the Committee of such action and shall apply for a Certificate of Registration.

(2) Term - Passenger ropeways shall be registered annually starting November 1st of each year, and each registration expires on October 31st next following date of issue.

(3) Application for Certificate of Registration for existing ropeways shall include the following:

(a) Annual General Inspection Report;

(b) Annual registration fee;

(c) Approved request for exception, if applicable;

(d) Certification of Compliance; and

(e) Certificate of Insurance.

(4) Application for Certificate of Registration for new ropeways shall include the following:

(a) Annual registration fee;

(b) Approved request for exception, if applicable;

(c) Certification of Compliance;

(d) Certificate of Insurance;

(e) Certifications required in R920-50-6;

(f) Documents required in R920-50-7; and

(g) Preoperational Inspection Report.

(5) Submittal of application for registration of ropeways - All applications for registration of new or existing ropeways shall be submitted in such form as the Committee shall designate and in accordance with requirements of these rules. Applications shall be made in writing and addressed to:

Utah Department of Transportation
Passenger Ropeway Safety Committee
Traffic and Safety Division
4501 South 2700 West
Salt Lake City, Utah 84119

R920-50-6. Certifications Required for Ropeways.

(1) The Certifications listed below must include the following information:

(a) Name, address and telephone number of operator of the ropeway, name of ropeway supervisor, operator's designation of the ropeway;

(b) Designated certifying statement;

(c) A certification of design, and construction must also include the name, address, seal, and Utah license of the qualified engineer making the certification; and

(d) A certification of "as-built" profile must also include the name, address, seal, and Utah license of the qualified engineer or land surveyor making the certification.

(2) A Certification of Compliance for Passenger Ropeway shall be made on the Application for Certificate of Registration for the Ropeway.

(a) The certification shall be signed and dated by the ropeway owner or area operator.

(b) The certification shall include the following statement: "I certify that the reports, requests and certificates attached hereto were provided and signed by the persons required by law to provide them, and the deficiencies noted in the inspection report have been corrected with the exception of those listed in the Request for Exception from Standards for Passenger Ropeway."

(3) A Certification of Ropeway Design for New or Modified Passenger Ropeways, must be submitted.

(a) The Qualified Engineer in responsible charge of the design shall certify to the Committee that the design, plans and specifications conform to the Utah Passenger Ropeway Safety Act, the Governing Standard and the Utah Ropeway Operation Safety Rule.

(b) The Certification must be submitted prior to the performance of the Acceptance Inspection and Test.

(c) The certification must state the following:

"I hereby certify that the design for this ropeway or ropeway modification is in complete compliance with the Utah Passenger Ropeway Safety Act, Governing Standard and the Utah Ropeway Operation Safety Rule."

(d) This statement shall be placed on the top of the drawing packet and signed and sealed by the qualified engineer. Each additional sheet of this drawing packet shall be sealed by the qualified engineer.

(e) The drawings and specifications shall include the quality assurance methods used for the evaluation of the re-used components and shall be submitted for review a minimum of 30 days prior to installation. Any component on the Utah Passenger Ropeway Safety Committee Lift Data Form must be addressed.

(4) A Certification of Construction for Passenger Ropeways must be submitted by a Qualified Engineer directly responsible for the construction for the ropeway.

(a) The Certification must be submitted prior to the performance of the Acceptance Inspection and Test.

(b) The certification must state the following:

"I hereby certify that the construction and installation has been completed in accordance with the drawings and specifications issued for this ropeway or ropeway modification by the Qualified Design Engineer."

(5) A Certification of "as-built" profile for the Passenger Ropeway must be submitted by a Qualified Engineer or Land Surveyor licensed in the State of Utah.

(a) The "as-built" profile must be submitted prior to the performance of the Acceptance Inspection and Test.

(b) The certification must state the following:

"I hereby certify that the attached "as-built" profile of the herein-identified ropeway is as represented on the attached profile drawing and that the completed ropeway conforms to the profile as identified in the plans and specifications prepared by the Qualified Design Engineer."

R920-50-7. Documents Required for Ropeways.

(1) A Utah Passenger Ropeway Safety Committee Lift Data Form must be submitted along with other requested supporting documents. This form must be submitted prior to the performance of the Acceptance Test.

(2) A copy of the acceptance test procedure proposed and submitted by the designer or manufacturer must be provided to the Committee for review at least fourteen (14) days before acceptance testing begins. The qualified engineer determines the acceptance test requirements.

(3) The owner or area operator shall notify the Committee in writing before the acceptance test that the continuous operation requirements of ANSI B77.1 section X.1.1.11 or ANSI B77.2 section 2.1.1.11.2 have been completed.

(4) A final acceptance test report must be submitted to the Committee prior to opening the lift to the public. The qualified engineer shall approve any changes to the acceptance test procedure.

(5) "As-built" drawings for each passenger ropeway shall be submitted no later than 60 days after the project is completed and the Acceptance Test is finished. Any variation from the design drawings shall be noted in the as-built drawings and approved by the Qualified Design Engineer.

(6) The area operator shall send a "letter of intent" to the Committee at least 45 days prior to beginning the construction of a new lift. The letter of intent must include the name of the qualified engineer, the design standard, the anticipated dates to begin and complete construction, and the available lift manufacturing data.

R920-50-8. Certificate of Registration.

(1) If the application for Certificate of Registration and supporting documentation attest that the ropeway complies with the Governing Standard and this rule, the Committee, if satisfied with the facts stated in the application, shall issue a Certificate of Registration to the operator.

(2) Identification number - For each ropeway, upon receipt of the first application for a Certificate of Registration, the Committee shall assign an identification number to the ropeway, which shall remain as a permanent identification number for the life of the ropeway. All correspondence with the Committee pertaining to any ropeway shall refer to the identification number assigned to that ropeway.

R920-50-9. Governing Standards.

(1) The governing standards in Utah include "ANSI B-77.1, 2011" and "ANSI B77.2, 2014" as modified by rule of the Committee. Use of these standards is authorized by Section 72-11-201.

(2) The Utah Passenger Ropeway Safety Committee reserves the right to modify, add, or delete provisions included in the Governing Standard.

(3) Existing installations need not comply with the new or revised requirements of the Governing Standard and this rule except as set forth in R920-50-11 "Applicable Provisions."

R920-50-10. Revised and Additional Provisions.

The revised and additional provisions of this section shall only apply when referenced in R920-50-11 "Applicable Provisions."

(1) "New installations and relocated installations." ANSI B77.1 Section 1.2.4.3 is modified by the following requirement: New ropeways and relocated ropeways shall comply with the new or revised requirements of the Governing Standard and with these rules at the time of the acceptance test.

(2) "Auxiliary drives." Installations shall meet the requirements for auxiliary drives, as set forth in ANSI B77.1-1992, 2.1.2.1.1, 3.1.2.1.1, 4.1.2.1.1.

(3) "Electronic speed-regulated drives." Installations shall meet the requirements for electronic speed-regulated drives as set forth in ANSI B77.1-1992, 2.2.1.8.2, 3.2.1.8.2, 4.2.1.8.2, 5.2.1.8.2, 6.2.1.8.2.

(4) "Rope position monitoring." Installations shall meet the requirements for rope position monitoring, as set forth in ANSI B77.1-1992, 3.1.3.3.2, paragraph 6.

(5) "Friction type brakes." Installations shall meet the requirements for friction type brakes, as set forth in ANSI B77.1-1992, 2.1.2.5, 3.1.2.5, 4.1.2.5, 5.1.2.5, 6.1.2.5.

(6) "Fire detection." All machine rooms that are in an enclosed structure located adjacent to the rope of the tramway (vaulted) shall have a fire detection system installed in accordance with the National Fire Alarm Code. This system shall initiate a visual and audible alarm monitored at the drive terminal operator station.

(7) "Grips, clips, and carrier testing." Testing shall be completed according to section ANSI B77.1 sections 2.3.4.3, 3.3.4.3, 4.3.4.3, and ANSI B77.2 section 2.3.4.4 except as modified by this rule.

(a) Testing personnel shall be qualified in accordance with American Society for Nondestructive Testing (ASNT) Recommended Practice No. SNT-TC-1A-1992. Testing agency shall provide certification of qualification of personnel performing testing.

(b) Testing agency inspector shall certify to the owner or area operator that the passenger ropeway components tested were non-destructively tested in accordance with current acceptance criteria established by the designer or manufacturer, or in case the designer or manufacturer is no longer in business, by a Qualified Engineer.

(c) Sampling size and method of obtaining the sample shall comply with the Governing Standard or the manufacturer's requirement, which ever is more stringent.

(d) Rejection rate and retest procedures shall comply with current acceptance criteria established by the designer or manufacturer, or in case the designer or manufacturer is no longer in business, by a Qualified Engineer.

(e) Types of inspections to be performed and the procedures to be used shall comply with current acceptance criteria established by the designer or manufacturer, or in case the designer or manufacturer is no longer in business, by a Qualified Engineer.

(f) Criteria for acceptance/rejection of samples shall comply with current acceptance criteria established by the designer or manufacturer, or in case the designer or manufacturer is no longer in business, by a Qualified Engineer.

(8) "Wire rope inspection." Inspections shall be performed according to ANSI B77.1 Annex A.4.1 and ANSI B77.2 3.4.1 and shall be performed by a competent inspector defined by the Governing Standard and who is approved by the Committee. The wire rope inspector shall certify to the owner or area operator whether the wire rope in its present condition meets requirements for continued operation.

(9) "Operation and maintenance." All installations shall comply with the Operation and Maintenance requirements of the Governing Standard. These requirements are stated in ANSI B77.1, 2.3, 3.3, 4.3, 5.3, 6.3, 7.3, and ANSI B77.2 2.3.

(10) "Audible warning devices." Requirements for audible warning devices.

(a) Installations shall meet the requirements for audible warning devices as specified by ANSI B77.1, 2.2.10, 3.2.10.

(b) ANSI B77.1 Section 4.2.10 is modified by the following requirement: The aerial lift shall incorporate an audible warning device that signals an impending start of the aerial lift. After the start button is pressed, the device shall sound an audible alarm for a minimum of two seconds before the aerial lift begins to move. The audible device shall be heard inside and outside all terminals and machine rooms above the ambient noise level.

(11) "Conveyor Standards."

(a) Loading and unloading area requirements of ANSI B77.1 section 7.1.1.9 shall also accommodate the use of adaptive devices.

(b) Power units referred to in ANSI B77.1 section 7.1.2.1 may not have reverse capability.

(c) "Power supply cords" referred to in ANSI B77.1 section 7.2.1.5.6 shall be protected from snow grooming, skiers, and other equipment and shall be ground fault protected.

(d) The belt transition entry stop device referred to in

ANSI B77.1 section 7.2.3.3 shall include redundant (double) sensors. Each sensor shall be part of an independent control circuit that can initiate an emergency shutdown of the conveyor. The device shall be so designed and maintained that no single point of failure can cause the entry stop device to malfunction. The device shall not be remotely resettable and shall require the operator to reset the device prior to restarting the conveyor.

(12) "Dynamic Testing Logs." Maintenance logs shall include documentation of the dynamic testing.

(13) "Air Space Requirements." ANSI B77.1-2006, 2.1.1.3, 3.1.1.3, 4.1.1.3, 5.1.1.3, and 6.1.1.3 and ANSI B77.2 section 2.1.1.2 shall also include the following: No structure (temporary or permanent) shall be permitted to encroach into the air space of the ropeway.

(14) "Portable Ropeways." Portable ropeways shall not be considered new ropeways when moved to different locations but remaining under the jurisdiction of the same operator.

(15) "Tows Requirements."

(a) The requirements of ANSI B77.1 section 6.2.3.2.b) shall also require the stop gate to extend across the incoming and outgoing rope.

(b) Handle Tows shall have stop gates above and below the rope.

(16) "Existing Installations - Annex F" ANSI B77.1-2011 Section 1.2.4.1 Existing installations is modified by the following: Operation and maintenance is not required to comply with normative Annex F Combustion engine(s) and fuel handling.

R920-50-11. Applicable Provisions.

Installations shall comply with the "Revised and Additional Provisions" of R920-50-10 in the categories listed below, on or before the date specified. These provisions establish the minimum requirement.

(1) The following apply to all ropeways:

(a) New installations and relocated installations R920-50-10(1);

(b) Fire detection R920-50-10(6); effective November 1, 1995;

(c) Wire rope inspection R920-50-10(8); and

(d) Operation and maintenance R920-50-10(9).

(e) Existing Installations - Annex F R920-50-10(16); effective June 7,2012.

(2) The following provisions apply to an Aerial Tramway:

(a) Auxiliary drives R920-50-10(2); effective November 1, 1994;

(b) Electronic speed-regulated drives R920-50-10(3); effective November 1, 1994;

(c) Friction type brakes R920-50-10(5); effective November 1, 1995;

(d) Grips, clips, and carrier testing R920-50-10(7);

(e) Audible warning devices R920-50-10(10); effective November 1, 2001;

(f) Dynamic testing logs R920-50-10(12); and

(g) Air space requirements R920-50-10(13); effective November 1, 2006.

(3) The following provisions apply to a Detachable Grip Aerial Lift:

(a) Auxiliary drives R920-50-10(2); effective November 1, 1994;

(b) Electronic speed-regulated drives R920-50-10(3); effective November 1, 1994;

(c) Rope position monitoring R920-50-10(4); effective November 1, 1994;

(d) Friction type brakes R920-50-10(5); effective November 1, 1995;

(e) Grips, clips, and carrier testing R920-50-10(7);

(f) Audible warning devices R920-50-10(10);

(g) Dynamic testing logs R920-50-10(12); and

(h) Air space requirements R920-50-10(13); effective November 1, 2006.

(4) The following provisions apply to a Fixed Grip Aerial Lift:

(a) Auxiliary Drives R920-50-10(2); effective November 1, 1994;

(b) Electronic speed-regulated drives R920-50-10(3); effective November 1, 1994;

(c) Friction type brakes R920-50-10(5); effective November 1, 1995;

(d) Grips, clips, and carrier testing R920-50-10(7);

(e) Audible warning devices R920-50-10(10);

(f) Dynamic testing logs R920-50-10(12); and

(g) Air space requirements R920-50-10(13); effective November 1, 2006.

(5) The following provisions apply to a Surface Lift:

(a) Electronic speed-regulated drives R920-50-10(3); effective November 1, 1994;

(b) Friction type brakes R920-50-10(5); effective November 1, 1995; and

(c) Air space requirements R920-50-10(13); effective November 1, 2006.

(6) The following provisions apply to a Rope Tow:

(a) Electronic speed-regulated drives R920-50-10(3); effective November 1, 1994;

(b) Friction type brakes R920-50-10(5); effective November 1, 1995;

(c) Air space requirements R920-50-10(13); effective November 1, 2006;

(d) Tow requirements R920-50-10(15); and

(e) Portable Ropeways R920-50-10(14).

(7) The following provisions apply to a Conveyor:

(a) Conveyor standards R920-50-10(11); and

(b) Portable Ropeways R920-50-10(14).

R920-50-12. Exceptions to Standards.

(1) In the event that the ropeway does not conform with the governing standards and the Ropeway Operation Safety Rule, the Committee may issue a certificate of registration with an exception. Two types of exceptions may be granted after a Request for Exception from Standards is submitted.

(a) Annual Exception - This type of exception must be reviewed annually by the Committee. This type of exception is subject to cancellation at any time pursuant to a determination by the Committee that a change is necessary.

(b) Limited Exception - This type of exception is granted only for a fixed time period to be determined by the Committee.

(2) The nature of the exception shall be stated in the Request for Exception from Standards.

(3) The Committee shall, as expeditiously as possible, and within thirty (30) days of receipt of a Request for Exception from Standards, notify the operator in writing of its action on the Request.

(4) The Request for Exception from Standards shall include the following information:

(a) Reasons for requesting an exception;

(b) Identification of the manner in which the ropeway does not conform to the governing standards or this rule; and

(c) Procedures, with estimated time and cost, which would be required to bring the ropeway into conformance.

(5) Except as required in R920-50-12(7), the Committee shall issue a Certification of Registration with an exception if the operator satisfies the requirements stated in R920-50-12(4) and also supplies the following for new or existing ropeways:

(a) New Ropeways.

(i) A design certification by a qualified engineer attesting that the ropeway is so designed and equipped that its devices or methods provide features that are comparable in performance and safety to those that meet requirements set forth in the Governing Standard and this rule.

(ii) Any known items that require a Request for Exception from Standards for Passenger Ropeways must be submitted to the Committee before work begins.

(b) Existing Ropeways.

(i) A design certification by a qualified engineer attesting that the ropeway is so designed and equipped that it's devices or methods provide features that are comparable in performance and safety to the requirements of the Governing Standard and this rule.

(ii) A statement by the operator certifying that the ropeway feature for which the exception is requested has been operated safely and without any passenger ropeway incident, as defined in R920-50-3(17) item (a) or (g), for at least 2 years prior to the date of the Request for Exception from Standards.

(6) In exceptional circumstances, the Committee may issue a certificate of registration with an exception even if the operator does not satisfy the requirements defined in the Governing Standard or this rule if the Committee determines that the ropeway is so designed and equipped that its devices or methods provide features that are comparable in performance and safety.

(7) Where doubt exists as to the safety of a ropeway, the Committee may require an inspection to ascertain that the ropeway is so designed and equipped that its devices or methods provide features that are comparable in performance and safety to those of the governing standards and this rule.

(8) The issuance of a certificate of registration with an annual exception shall not bind the Committee to issue such a certificate for the ropeway involved in subsequent years, nor to issue such a certificate for another ropeway of same or similar design.

R920-50-13. Operation of Ropeways.

(1) Every passenger ropeway incident shall be reported to the Committee regardless of the time of year in which it occurs and regardless of whether or not the ropeway was open to the public at the time of the incident. The operator shall meet the requirements stated in R920-50-14.

(2) When a ropeway is modified the ropeway operator shall notify the Committee, or its appointed representative. The operator shall meet the requirements stated in R920-50-15.

R920-50-14. Incidents.

(1) Reporting of Incidents.

(a) Every passenger ropeway incident, as defined in R920-50-3(18) shall be verbally reported to the Committee, or the Committee's appointed representative, as soon as reasonably possible, but no later than twenty-four (24) hours after the time of the incident. A written report shall be delivered to the Committee within five (5) days of the incident.

(b) The reports required by this section are to be maintained for administrative enforcement, licensing and certification purposes only. The reports are "protected" records under the Government Records Management Act, Section 63G-2-305 and are also governed by Section 63G-2-207.

(2) Suspension of Operations. When a passenger ropeway incident, as defined in R920-50-3(17) (a) or (g), occurs, the owner or area operator of the ropeway shall suspend operation of the ropeway and shall notify the Committee through the Committee's appointed representative. The owner or area operator of the ropeway, with the Committee or the Committee's appointed representative, shall perform a joint incident inspection of the ropeway. The inspection shall precede any authorization to resume public operation of the passenger ropeway.

R920-50-15. Modification of a Ropeway.

(1) The Committee, or its appointed representative shall determine the certifications that will be required.

(2) Depending on the nature and extent of the modification the Committee, or its appointed representative may require an Acceptance Inspection and Test.

(3) The following certifications may be required: design; construction, and As-Built profile.

(4) The certifications must be submitted by a qualified engineer and attached to the cover of the modification documents. The modification documents shall include the drawings, descriptions, or specifications pertaining to the affected systems and their connections with existing systems.

(5) A revised lift data form shall be submitted.

(6) The ropeway shall not resume operating until authorized by the Committee, or its appointed representative.

R920-50-16. Inspections and Testing.

(1) Inspections shall verify that the intent of the design and operational requirements imposed by the Governing Standard and this rule are met. The Committee may order other inspections in accordance with Section 72-11-211. Ropeway inspectors may inspect ropeways at any time during the operation of the ropeway (spot check). All reports, logs, etc. shall be made available to them upon request.

(2) Acceptance Inspection and Test.

(a) The Committee, or its appointed representative, will schedule acceptance inspection and test as the procedures are received.

(3) Annual General Inspection.

All existing ropeway shall have an annual general inspection.

(a) A ropeway inspector shall make the inspection.

(b) The inspection shall occur prior to approval of any registration application.

(c) A report signed by the Ropeway Inspector listing items found either deficient or in noncompliance shall be filed with the owner.

(d) The report shall include the name and address of the inspector and the date of the inspection.

(e) The area operator shall notify the Committee, or its appointed representative of the annual general inspection. The area operator should give 7 days notice of the inspection.

(f) The owner shall correct all deficiencies and noncompliance items listed in the Ropeway Inspector's report.

(4) Incident Inspection.

Incident inspections shall occur as required in R920-50-14.

(5) Operational Inspection.

An Operational inspections may be made periodically during each season of use.

(a) A ropeway inspector shall make the inspection.

(b) A report signed by the Ropeway Inspector listing items found either deficient or in noncompliance shall be filed with the owner.

(c) The report shall include the name and address of the inspector and the date of the inspection.

(d) The owner shall correct all deficiencies and noncompliance items listed in the Ropeway Inspector's report.

(6) Pre-operational Inspection.

A pre-operational inspection is required for new and modified lifts.

(a) A ropeway inspector shall make the inspection.

(b) The inspection shall occur prior to approval of any registration application.

(c) A report signed by the Ropeway Inspector listing items found either deficient or in noncompliance shall be filed with the owner.

(d) The report shall include the name and address of the inspector and the date of the inspection.

(e) If the inspection does not take place at the acceptance inspection and testing the area operator shall notify the Committee, or its appointed representative of the inspection. The area operator should give 7-days notice of the inspection.

(f) The owner shall correct all deficiencies and noncompliance items listed in the Ropeway Inspector's report.

R920-50-17. Ropeway Inspector and Qualified Engineer.

(1) General.

(a) Any person performing inspection services must be a "ropeway inspector" as required by this rule, and any person performing design services must be a "qualified engineer", as required by this rule.

(b) The Committee shall maintain up-to-date lists of qualified engineers and ropeway inspectors, which lists shall be open to inspection by the public.

(c) Any person desiring to be approved by the Committee as a ropeway inspector or qualified engineer shall submit a written request to the Committee enumerating his or her professional experience and attesting as far as possible to meeting the requirements stated in R920-50-17(2).

(2) Requirements.

(a) Applicant shall satisfy the Committee that by his or her education, training and experience gained by participation in ropeway inspections or designs as a principal or an assistant to a recognized ropeway inspector or ropeway designer, he or she is qualified to be, respectively, an approved inspector or designer or both.

(b) Applicant shall satisfy the Committee that he has a working familiarity and understanding of drawings and design data such as are furnished to design, construct, test, and inspect passenger ropeways, and that he or she has an understanding and working knowledge of the governing standard and this rule.

(c) The Committee may approve qualifications based on experience gained by an applicant through work under direct supervision of a qualified ropeway inspector or qualified ropeway designer.

(d) The Committee may approve employees of the state or individuals retained by the state as qualified ropeway inspectors. Such engineers may be given certain assignments where time is of the essence or a private engineer is not available or willing to undertake the inspection or investigation. It shall be the policy of the Committee to use the services and talents of qualified private engineers wherever possible.

(3) Revocation or suspension of approval as ropeway inspector or qualified engineer.

The committee may revoke or suspend the approval of any qualified engineer or ropeway inspector who is found by the committee to have:

(a) practiced any fraud, misrepresentation, or deceit in applying for approval;

(b) caused damage to another by gross negligence in the practice of passenger ropeway designing, construction, or inspection; or

(c) been engaged in acts of unlawful or unprofessional conduct.

R920-50-18. Violations.

The Committee may address violations of this rule pursuant to Sections 72-11-212 and 72-11-213.

R920-50-19. Administrative Procedures.

Appeals from orders issued pursuant to any provision of this rule shall be governed by R907-1.

KEY: transportation safety, tramways, ropeways, tramway permits
August 9, 2016 72-11-201 through 72-11-216
Notice of Continuation April 16, 2012

R926. Transportation, Program Development.
R926-14. Utah Scenic Byway Program Administration; Scenic Byways Designation, De-designation, and Segmentation Processes.
R926-14-1. Purpose.

The purpose of this rule is to establish the following:

(1) administration of the Utah Scenic Byway program;

(2) the criteria that a highway shall possess to be considered for designation as a state scenic byway;

(3) the process for nominating a highway to be designated as a state scenic byway;

(4) the process for nominating an existing state scenic byway to be considered for designation as a National Scenic Byway or All-American Road;

(5) the process and criteria for removing the designation of a highway as a scenic byway or segmentation of a portion thereof; and

(6) the requirements for public hearings to be conducted regarding proposed changes to the scenic byway status of corridor, and related notifications.

R926-14-2. Authority.

The provisions of this rule are authorized by the following grants of rulemaking authority and provisions of Utah Code: Title 52, Chapter 4; Title 63G, Chapter 3; and the Designation of Highways Act, Title 72, Chapter 4.

R926-14-3. Definitions.

Terms used in this rule are defined in Title 72, Chapter 4. The following additional terms are defined for this rule:

(1) "All-American Road" means a scenic byway designation made at the national level for state scenic byways that significantly meet criteria for multiple qualities out of the six defined intrinsic qualities.

(2) "America's Byways" means the brand utilized by the National Scenic Byways Program for promotion of the National Scenic Byways and All American Roads.

(3) "Committee" or "State Committee" means the Utah State Scenic Byway Committee as defined in Title 74, Chapter 4 and does not refer to any local scenic byway committee herein defined.

(4) "Corridor management plan" means a written document prepared by the local scenic byway committee in accordance with federal policies that specifies the actions, procedures, controls, operational practices, and administrative strategies necessary to maintain the intrinsic qualities of a scenic byway.

(5) "De-designation" means removing a current state scenic byway designation by the committee from an entire existing scenic byway.

(6) "Department" means the Utah Department of Transportation.

(7) "Designation" means selection of a roadway by the committee as a state scenic byway or selection of an existing state scenic byway by the U.S. Secretary of Transportation as one of America's Byways.

(8) "Federal policies" means those rules outlining the National Scenic Byway Program and that set forth the criteria for designating roadways as National Scenic Byways or All-American Roads, specifically the FHWA Interim Policy.

(9) "Local legislative body" means the elected governing board of a political subdivision, such as a town, city, county, or tribal government.

(10) "GOED" means the Utah Governor's Office of Economic Development.

(11) "Grant" means discretionary funding available on a competitive basis to designated scenic byways from the Federal Highway Administration through the National Scenic Byways Program.

(12) "Intrinsic quality" means scenic, historic, recreational, cultural, archaeological, or natural features that are considered representative, unique, irreplaceable, or distinctly characteristic of an area. The National Scenic Byways Program further defines each of these qualities.

(13) "Local Scenic Byway Committee" means the committee consisting of the local byway coordinator and representatives from nearby local legislative bodies, agencies, tourism related groups and interested individuals that recommends and prioritizes various projects and applications relating to a scenic byway. The local scenic byway committee promotes and preserves intrinsic values along the byway.

(14) "Local Byway Coordinator" means an individual recognized by the local scenic byway committee as chair. If a local scenic byway committee does not exist for a scenic byway, the local byway coordinator is an individual recognized by the state committee chair as the person to contact for applications and other administrative business for the state scenic byway.

(15) "National Scenic Byway" means a scenic byway designation made at the national level for byways that significantly meet criteria for at least one quality out of the six defined intrinsic qualities.

(16) "National Scenic Byways Program" or "NSBP" means a program provided by the Federal Highway Administration to promote the recognition and enjoyment of America's memorable roads.

(17) "State Scenic Byway" means a Utah roadway corridor that has been duly designated by the committee for its intrinsic qualities.

(18) "Status" refers to the current designation of a scenic byway, i.e., state scenic byway, National Scenic Byway, All-American Road, undesignated roadway, segmented scenic byway or de-designated scenic byway.

R926-14-4. Utah State Scenic Byway Committee Organization and Administration.

(1) The authorization of the committee, its membership, administration, powers, and duties are defined in Title 72, Chapter 4.

(2) The committee shall conduct business to administer the State Scenic Byway program within the State of Utah. This business shall include, but not be limited to:

(a) designating, de-designating, hearing appeals of segmentation denials of state scenic byways, and consideration of segmentation under a Request for Agency Action;

(b) recommending considerations for National and All-American Road recognition to the Legislature;

(c) recommending applications to the NSBP;

(d) prioritizing applications for Scenic Byway Discretionary funding and other funding that may be available; and

(e) other business as may be needed to administer the scenic byway program.

(3) The committee shall meet to conduct business necessary to administer the state scenic byway program.

(a) The meeting is intended to be an in-person gathering of the full committee at a single anchor location. Where the need arises, and as authorized by Title 52, Chapter 4, individual members may request to be connected to the meeting via teleconference, video conference, web conference, or other emerging electronic technology, if they make the request at least three days prior to the committee meeting to allow for arrangements to be made for the connection.

(b) All additional meetings called by the chair, including committee meetings to consider factors associated with a Request for Agency Action to segment property

adjacent to a scenic byway, may be held as either in-person or electronic meetings, at the discretion of the chair, as authorized by Title 52, Chapter 4.

(i) Electronic meetings may be fully electronic, i.e. each member may join on an individual remote connection (depending on the technology used), but an anchor location must be provided for the public at one or more connections, preferably at a conference room available to either the department or the Utah Office of Tourism, that is large enough to accommodate anticipated demand.

(ii) Electronic meetings may be via teleconference, video conference, web conference, or other emerging electronic technology, at the discretion of the chair, as long as adequate time is provided to set up the required electronic connections for all participants and the technology used is generally publicly available.

(iii) All meetings, whether in-person or electronic, must be advertised and accessible to the public for both hearing and comment, which in the case of electronic meetings will require publication of connection details and anchor locations.

(iv) The published agenda for electronic meetings needs to include details on the format of how and when public comment will be received and addressed by the committee. For example, comment during a web conference may be taken continuously via a chat window, then read by the moderator during the time set aside for public input, with committee responding. In a teleconference, public participants may be requested to hold their comments until a designated period is opened by the chair.

R926-14-5. Criteria Required of a Highway to Be Considered for Designation as a State Scenic Byway.

(1) A road being considered for state scenic byway designation must meet all of the following criteria:

(a) the nominated road must possess at least two unusual, exceptional, or distinctive intrinsic qualities, as defined;

(b) the nominated road may be either a planned or existing route and in the case of a planned route, legal public access, safety standards and all-weather pavement must be guaranteed at completion of construction;

(c) roadway safety on the nominated road must be evaluated against and guided by American Association of State Highway and Transportation Officials (AASHTO) safety standards for federal aid primary or secondary roads;

(d) the nominated road must have strong local support for byway designation and the proponents must demonstrate this support and coordination;

(e) the nominated road must accommodate recreational vehicles or provisions should be made for travel by recreational vehicles;

(f) the nominated road need not lead to or provide connection to other road networks; it may be dead-ended, or provide only a single outlet for traffic;

(g) the nominated road need not be open during the winter months, but seasonal road closures must be clearly posted, shown on applicable maps, and specified in any promotional literature; and

(h) the nominated road may include portions of the Interstate Highway System, but only if the Interstate component is a small part of the mileage of the overall nominated scenic byway and is included primarily for continuity of travel.

(2) It is the intent of these criteria to be restrictive in nature so as to limit the number of designated state scenic byways in order to maintain the quality and integrity of the scenic byway system.

R926-14-6. Process for Nominating a Highway to Be Designated a State Scenic Byway.

(1) Nominations for a corridor to be designated a state scenic byway shall be forwarded to the committee by a local legislative body.

(2) The nomination application must demonstrate how the nominated road meets the criteria to qualify as a state scenic byway.

(3) The committee will act on a byway-related application only after the responsible organization has held public hearings and submitted minutes of the hearings, including names and addresses of people making comments, a detailed summary of comments made, and proof of public notification.

(4) The committee will consider the nomination after review of the application and after a presentation by the nominating sponsor group, either at the byway location, or at a committee meeting. The committee will vote on proposed designations at the next committee meeting. The committee will report the results of the vote to the nomination sponsor.

(5) Individual communities along the byway corridor that do not support the designation of the byway within the limits of their community have the statutory right, as prescribed in Title 72, Chapter 4, to opt out of any new byway designation through official segmentation action of their local legislative body, but they become ineligible for byway grants and promotional considerations by doing so.

(6) Upon approval by the committee of a scenic byway nomination, the committee shall notify the Utah Office of Tourism, the department and other interested agencies of the new designation and of the approved alignment and limits of the designated corridor.

(a) The committee will make a request to these agencies that they modify reference of the segment, to reflect the change in scenic byway status, on maps and in materials and website applications identifying scenic byways.

(7) On receiving notification of a newly designated state scenic byway, the department shall amend Rule 926-13 to include the description of the byway and the date of its approval. The department shall forward to the NSBP any electronic files needed to describe or display the new byway in online maps, brochures, or other publications of the NSBP. The department will add the scenic byway to the official highway map at its next printing.

R926-14-7. Process for Nominating a Highway to Be Designated a National Scenic Byway or All-American Road.

In addition to state recognition, state scenic byways may be nominated to the National Scenic Byways Program so that they may be recognized as a byway of national significance through designation as a National Scenic Byway or All-American Road.

(1) Local scenic byway committees shall notify the state committee of their intent to apply for National Scenic Byway or All-American Road status and the state committee shall in turn notify the Legislature of this intent.

(2) Local scenic byway committees desiring national designation are required by the National Scenic Byways Program to prepare nomination applications, adhering to the criteria outlined in applicable federal policies.

(a) A corridor management plan for the byway will be required by the NSBP to be prepared before a nomination application will be considered. The required information and criteria to be included in the corridor management plan are outlined in the federal policies.

(b) The NSBP will issue a call for applications, at which time the local scenic byway committee may submit a nomination application as long as the state scenic byway has

been approved for consideration in accordance with the requirements of Title 72, Chapter 4.

(3) Local scenic byway committees are to confer with the state committee during the preparation of a corridor management plan and will submit their nomination applications to the committee for review prior to submitting to the NSBP.

(4) The committee will refer all considerations for America's Byways designations to the Legislature for approval, along with the recommendation of the committee. As required in Title 72, Chapter 4, Legislative approval must be obtained before any application for nomination may be submitted to the NSBP.

(5) Upon approval by the NSBP of a National Scenic Byway nomination, the committee shall notify the Utah Office of Tourism, the department and other interested agencies of the new designation and of any differences in alignment or limits as related to existing state scenic byway designations.

(a) The committee will make a request to these agencies that they modify reference of the segment, to reflect the change in scenic byway status, on maps and in materials and website applications identifying scenic byways.

(6) On receiving notification of a change in byway status to National Scenic Byway or All-American Road, the department shall amend Rule 926-13 to update the description of the byway to reflect the approved changes and the date of NSBP approval.

R926-14-8. Process and Criteria for Removing the Designation of a Highway as a Scenic Byway or Segmentation of a Portion Thereof.

(1) The committee may de-designate a scenic byway if the intrinsic values for which the corridor was designated have become significantly degraded and no longer meet the requirements for which it was originally designated.

(2) The local legislative body may remove designation on a localized segment of a designated byway if the intrinsic values within the segment have become degraded or if the segment being considered was included primarily for continuity of travel along the designated corridor, does not in and of itself contain the intrinsic values for which the corridor was designated, and the segmentation has strong community-based support.

(3) Highways that are part of the National Highway System (NHS) are still subject to certain federal outdoor advertising regulations, regardless of their scenic byway status. When considering a de-designation or segmentation on an NHS route, either the committee or the local legislative body should become familiar with the regulatory differences between scenic byway status and NHS status, since de-designation or segmentation would not affect the ongoing applicability of NHS regulations and may not always produce the desired effect.

(4) De-designated corridors and communities or parcels segmented out of the scenic byway designation are no longer subject to byways-related regulations and are no longer eligible for byways-related grants and promotional considerations.

(5) Committee processes for de-designation may be initiated by the committee itself or by request from a local legislative body.

(6) Segmentation of specific parcels or portions of a scenic byway may be considered directly by the local legislative body of a county, city, or town where the segmentation is proposed, as provided in Title 72, Chapter 4. The same public hearing requirements are followed for local legislative actions as are provided herein for committee actions.

(7) Alternately, segmentation of specific parcels of property adjacent to a scenic byway may be requested by the property owner by submitting a written Request for Agency Action, as provided in the Administrative Procedures Act, Title 63G, Chapter 4, Part 2.

(a) The Request for Agency Action shall contain the information required by 63G-4-201(3)(a), and shall include a statement why the owner considers the property to be non-scenic as defined in 72-4-301.

(b) The written Request for Agency Action shall be mailed to the Office of Tourism, Film and Global Branding within the GOED, with a copy of the request mailed to the Program Development Group within the Utah Department of Transportation to the attention of Program Development;

(c) Segmentation of property under a Request for Agency Action shall take effect 60 days after receipt of the written request by the Office of Tourism within GOED, unless the committee demonstrates to an administrative law judge within 60 days, with subsequent action by the administrative law judge, that the property fails to meet the definition of "non-scenic" as defined in 72-4-301;

(i) Pursuant to Section 72-4-303(3)(d), "receipt" of the request for Agency Action shall be the date on which the mailed copy of the request is received by GOED's Office of Tourism.

(ii) Requests for Agency Action shall be mailed to:
GOED OFFICE OF TOURISM
Attention: Scenic Byway Committee
300 North State Street
Council Hall/ Capitol Hill
Salt Lake City Utah 84114

(iii) A copy of the Request for Agency Action shall be mailed to:
Program Development Group of the
Utah Department of Transportation
P.O. Box 143600
4501 South 2700 West
Salt Lake City Utah 84114

(d) a request for agency action segmentation is classified as an informal adjudicative proceeding.

(8) Requests to the committee for de-designation of state scenic byways shall be submitted by a local legislative body along or adjacent to the scenic byway corridor. Each request shall include discussion of the specific reasons for de-designation. Reasons may include, but are not limited to:

(a) segment or corridor is no longer consistent with the state's criteria for selection as a scenic byway;

(b) failure to have maintained or enhanced intrinsic values for which the scenic byway was designated;

(c) degradation of the intrinsic values for which the scenic byway was selected;

(d) segment of byway is not representative of the intrinsic values for which the scenic byway was designated and was included primarily for connectivity; or

(e) state scenic byway designation has become a liability to the corridor.

(9) Local legislative bodies shall inform the committee and UDOT Program Development of their action to segment within 30 days of the date of the action to segment. The local legislative body shall include the discussion of the specific reasons for segmenting. Reasons may include, but are not limited to those identified in R926-14-8(7)(a) through (e).

(10) Parcels on existing byways may not be segmented out of a byway solely for the purpose of evading state and federal regulations pertaining to byway designation, but must also be considered non-scenic or otherwise meet the criteria listed in Paragraph (7). However, towns, cities, and counties may remove themselves entirely for any purpose, as provided in Title 72, Chapter 4.

(11) State and federal highway regulations require that

no regulated outdoor advertising be located within 500 feet of a designated scenic area. Therefore, the size of any parcel or parcels being considered for segmentation would need to be large enough to meet that offset requirement.

(12) Upon receipt of the local legislative body's action to segment, the committee chair will add the action to the agenda of the next committee meeting.

(13) The local legislative body shall provide the committee the following information at the next committee meeting:

(a) the date of segmentation, being the day the local legislative body took action on the request to segment;

(b) the defined limits of the segmented portion of the scenic byway, including route and milepost details and definitions;

(c) the approved meeting minutes from the public meeting(s); and

(d) a copy of the signed resolution from the local legislative body.

(14) After the responsible legislative body has heard and denied a request to segment a state scenic byway, the denial can be appealed to the committee. The appeal must include information regarding the public hearings, minutes of the hearings, including names and addresses of people making comments, a detailed summary of comments made, and proof of public notification.

(15) Following discussion of the request or appeal, the committee will vote on the request for de-designation or appeal of the denial of segmentation. The committee will then forward the result of the vote to the requesting local legislative body or appealing party. For segmentation denial appeals heard by the committee and for de-designation actions, the date of approval by the committee is considered the official date of the segmentation or de-designation, for the intent and purpose of how it affects byway program eligibility and subjection to byway regulations.

(16) Upon approval or disapproval of a de-designation or segmentation request or decision on appeal, the acting body, whether the committee or the local legislative body, shall notify the Utah Office of Tourism, the department and other interested agencies of the action taken.

(a) In the case of approval of a de-designation or segmentation, the acting body will make a request to these agencies that they modify reference of the segment, to reflect the change in scenic byway status, on maps and in materials and website applications identifying scenic byways.

(b) In the case where the committee approves the de-designation of a scenic byway that had also been designated as a National Scenic Byway, the committee will inform the National Scenic Byway Program of the decision and make a request to the NSBP that they modify reference of the segment, to reflect the change in scenic byway status, on maps and in materials and website applications identifying scenic byways.

(c) In the case of a local legislative action on a segmentation request, the local legislative body shall also notify the committee and the local byway coordinator of the action taken. For segmentation requests heard by a local legislative body, the date of approval by the local legislative body is considered the official date of the segmentation, for the intent and purpose of how it affects byway program eligibility and subjection to byway regulations.

(17) Appeals to the committee concerning local legislative actions are handled as provided in Title 72, Chapter 4.

(18) Upon receiving notification of segmentation or de-designation, the department shall amend Rule 926-13 to update the description of the byway to reflect the approved changes. The department shall forward to the NSBP any changes that would have a substantive effect on online maps, brochures, or other publications of the NSBP. The department will also show substantive changes on the official highway map at its next printing.

R926-14-9. Local Government Consent.

Consent of affected local governments along the byway corridor is required by Title 72, Chapter 4 for any change in scenic byway status.

R926-14-10. Requirements for Public Hearings to Be Conducted Regarding Changes to Status of a State Scenic Byway and Related Notifications.

(1) Whenever changes to the scenic byway status of a corridor or of a segment thereof are considered, one or more public hearings must be held for the purpose of receiving the public's views and to respond to questions and concerns expressed before action is taken.

(2) Upon the receipt of a Request for Agency Action from a property owner to segment property adjacent to a scenic byway, the Chair of the committee shall call a meeting for the committee to consider factors associated with the request, including consideration of information listed in paragraph (4).

(3) For all other changes to scenic byway status:

(a) The organization initiating the request for change in status is responsible for arrangement, notification, and execution of the hearing(s). The responsible organization may be:

(i) an organization (local scenic byway committee, community, county or association of governments) submitting an application or request to the committee;

(ii) the committee, in the case of a process initiated by the committee itself; or

(iii) a local legislative body considering a segmentation request.

(b) The hearing(s) shall be held in the area affected by the proposed status changes.

(c) Multiple hearings in varied locations may be appropriate, based on the length of the corridor or the affected area within the corridor. The committee chair will review and approve the number and locations of hearings as proposed by the nominating organization to ensure collection of a broad base of public comments throughout the length of the corridor where the scenic byway status changes are proposed.

(d) The responsible organization shall invite the state committee and the local scenic byway committee to attend the public hearing(s).

(2) The required public hearing(s) may be held separately, or as an identifiable agenda item of a regular meeting of a local legislative body.

(3) Notification of all public hearings shall be made as required by the laws governing the responsible organization.

(4) At a minimum, the following information related to the proposed change in status is to be addressed at each public hearing:

(a) the impact on outdoor advertising;

(b) the potential impact of traffic volumes;

(c) the potential impact of land use along the byway;

(d) the potential impact on grant eligibility; and

(e) the potential impact on the local tourist industry.

(5) The responsible organization shall keep minutes of the hearing, including a detailed summary of comments and the names and addresses of those making comments and shall make these available to the committee, along with proof of required notifications.

R926-14-11. Requirements for Consideration of Adjudicative Proceedings Associated with a Segmentation

Request Submitted by a Property Owner Under a Request for Agency Action.

(1) If the committee determines at a public hearing that property associated with a property owner's request for agency action to segment property does not meet the definition of non-scenic as defined in 72-4-301, the Chair of the committee shall notify the property owner that its Request for Agency Action is denied pending administrative hearing.

(2) The Chair of the committee shall notify the property owner in writing of:

(a) The committee's denial of the Request for Agency Action;

(b) the Committee's intent to have the matter considered by an administrative law judge;

(c) A list of available administrative law judges, if known.

(3) No more than 10 days after the written notice is sent advising the property owner of the committee's denial of the request for agency action and intent to have the matter considered by an administrative law judge, the property owner shall notify the committee in writing of their agreement on selection of the administrative law judge named by the committee, or advise the committee of an alternate judge agreed upon by the committee.

(4) Administrative Hearings initiated under this provision shall be designated as informal hearings under the Utah Administrative Procedures Act and conducted as set forth in Utah Code Section 63G-4-203.

	72-4-303
	72-4-304

R926. Transportation, Program Development.
R926-15. Designated Scenic Backways.
R926-15-1. Purpose.

(1) The primary purpose of this rule is to identify the specific roadways designated as state scenic backways by the Utah State Scenic Byways Committee in 1990, and any additions or deletions made by that body since then, in order to preserve the historical record of those designations and the general definition of the extents of these backways provided by the committee at the time of designation.

(2) A secondary purpose of this rule is to clarify the jurisdiction and limitations of authority for maintaining the intrinsic qualities, quality of life, and wayfinding signs on scenic backway routes.

R926-15-2. Authority.

The provisions of this rule are authorized by the following grants of rulemaking authority and provisions of Utah Code: Title 63G, Chapter 3; and the Designation of Highways Act, Title 72, Chapter 4.

R926-15-3. Definitions.

Terms used in this rule are defined in Title 72, Chapter 4 and in Rules 926-13-3 and 926-14-3. The following additional term is defined for this rule:

(1) "Scenic backway" is a route that has been designated by the committee in recognition of its intrinsic qualities, as defined for scenic byways, but that does not meet either the width, grade, curvature, paving, or safety criteria necessary to be considered a state scenic byway.

(a) The route must be on a road that is legally accessible to the public.

(b) Preference is given to roads that form a loop or are part of a network of scenic roads or trails.

(c) Travel on a scenic backway route is considered to be reasonably safe, although a certain amount of risk may be involved.

(d) Scenic backways fall into three categories or types, depending on the characteristics of the road. These characteristics are typically outlined in tourist information, but not specified here in the list of designated backways because there may be segments of each type in any given backway.

(i) Type I scenic backways are roads that may be partly paved or have an all-weather surface and grades that are negotiable by a normal touring car. These are usually narrow, slow speed, secondary roads.

(ii) Type II scenic backways are roads that are usually not paved, but may have some type of surfacing. Grades, curves, and road surfaces may be negotiated with a two-wheel-drive, high-clearance vehicle without undue difficulty.

(iii) Type III scenic backways are roads that are usually not surfaced and have grades, tread surface, and other characteristics that require four-wheel-drive or other specialized off-highway vehicles such as dirt bikes or ATVs.

R926-15-4. Jurisdiction Over State Scenic Backways and Limitations of Authority.

(1) The Utah State Scenic Byways Committee has authority to designate and de-designate scenic backways.

(a) The network of scenic backways is already extensive and the committee intends to limit the number of backways in order to maintain the quality and integrity of the scenic backway system. For this reason, the likelihood of new designations is low, but proposals for new backway routes will be considered.

(b) Backway routes that are improved after designation to the point of meeting the criteria required of state scenic byways may be presented to the committee for consideration of a re-designation to scenic byway status.

(2) Scenic backways do not qualify for the National Scenic Byways Program nor are any of them part of the National Highway System. They are not subject to any federal regulations pertaining to designated scenic byways, including outdoor advertising restrictions, and they are not eligible for federal byway grants.

(3) The authority and responsibility for maintaining the intrinsic qualities for which each scenic backway was designated, including the regulation of outdoor advertising, rests with the cities, towns, counties and resource agencies through which the route passes.

(a) Preserving the intrinsic qualities of and quality of life along each backway corridor, as determined locally, is dependant on local zoning and signing ordinances.

(b) Except for routes on state highways, the Utah Department of Transportation holds no oversight authority on backway routes.

(4) Installation and maintenance of scenic backway wayfinding signs is a local responsibility.

(a) The design, size, and installation details of the signs are maintained by the Utah Office of Tourism, in consultation with the Utah Department of Transportation, for continuity across the state and to ensure conformity to the Manual on Uniform Traffic Controls.

(b) Historically, the UDOT Traffic and Safety Division has allowed local agencies and local committees to purchase scenic backway signs from its sign shops and through its outside vendors under its sign contracts, to help provide statewide continuity and to help reduce taxpayer costs through shared volume buying.

R926-13-5. Highways Within the State That Are Designated as State Scenic Backways.

The following roads are designated as state scenic backways (date of designation is April 9, 1990 unless otherwise specified):

(1) Central Pacific Railroad Trail Scenic Backway. Following the abandoned railroad grade from Locomotive Springs (south of Snowville and west of Golden Spike National Monument) through Lucin to the Utah/Nevada State Line.

(2) Silver Island Mountain Loop Scenic Backway. From Danger Cave Archaeological Site near Wendover, around Silver Island Mountain.

(3) Bountiful/Farmington Loop Scenic Backway. Along Skyline Drive from east Bountiful, over Bountiful Peak and down Farmington Canyon, through Farmington to US-89.

(4) Trappers Loop Road Scenic Backway. State Route 167 from Mountain Green through Wasatch-Cache National Forest to Huntsville and the Ogden River Scenic Byway.

(5) Willard Peak Road Scenic Backway. From Mantua through Wasatch-Cache National Forest to Inspiration Point near Willard Peak.

(6) Hardware Ranch Road Scenic Backway. From Hyrum on SR-101 through Hardware Ranch and then north through Wasatch-Cache National Forest and past the Sinks to US-89, ten miles west of Bear Lake on the Logan Canyon National Scenic Byway.

(7) Middle Canyon Road Scenic Backway. From Tooele up Middle Canyon, over Butterfield Peak, and down Butterfield Canyon to Highway 111 (former Lark site).

(8) South Willow Road Scenic Backway. From Mormon Trail Road, five miles south of Grantsville, west to Deseret Peak.

(9) Alpine Scenic Loop. State Route 92 from the mouth of American Fork Canyon through Uinta National Forest and along the back side of Mount Timpanogos to US-189, one mile east of Vivian Park on the Provo Canyon Scenic Byway.

(10) Cascade Springs Scenic Backway. From Alpine Scenic Loop east past Cascade Springs and north to Wasatch Mountain State Park.

(11) Guardsman Pass Road Scenic Backway. From Wasatch Mountain State Park to Park City and Brighton on the Big Cottonwood Canyon Scenic Byway.

(12) Pioneer Memorial Backway. State Route 65 from Henefer past East Canyon State Park to Emigration Canyon Road and Emigration Canyon Road from SR-65 to Hogle Zoo.

(13) North Slope Road Scenic Backway. From Mirror Lake Scenic Byway (SR-150), six miles south of the Utah/Wyoming State Line, east past China Lake and north to Stateline Reservoir.

(14) Broadhead Meadow Road Scenic Backway. Murdock Basin Road from Mirror Lake Scenic Byway (SR-150), 24 miles east of Kamas, to Broadhead Meadow Road, then north past Broadhead Meadow and back to Mirror Lake Highway just south of Upper Provo River Falls.

(15) Red Cloud/Dry Fork Loop Scenic Backway. From US-191, 14 miles north of Vernal on the Flaming Gorge-Uintas National Scenic Byway, west through Ashley National Forest, then south to Dry Fork near Maeser.

(16) Sheep Creek/Spirit Lake Loop Scenic Backway. From SR-44, 15 miles west of the junction of SR-44 and US-191 on the Flaming Gorge-Uintas National Scenic Byway, looping back through Sheep Creek Canyon to SR-44 six miles south of Manila, plus the spur road to Spirit Lake starting about 3 miles west of SR-44.

(17) Jones Hole Road Scenic Backway. From 500 North Street, 4 miles east of Vernal, north and east to Diamond Mountain Plateau and east to Jones Hole at the Utah/Colorado State Line.

(18) Brown's Park Road Scenic Backway. From Jones Hole Road Scenic Backway at Diamond Mountain Plateau, north down Crouse Canyon and through Brown's Park, then west through Jessie Ewing Canyon to US-191, five miles north of Dutch John on the Flaming Gorge-Uintas National Scenic Byway.

(19) Notch Peak Loop Scenic Backway. From US-50, 43 miles west of Delta, north around the House Range Mountains to Dome Canyon Pass and south around the western side of the range back to US-50.

(20) Pony Express Trail Scenic Backway. From Fairfield west through Faust, over Lookout Summit, and past Simpson Springs and Fish Springs to Callao, Clifton, and Ibapah.

(21) Deep Creek Mountains Scenic Backway. From Pony Express Trail Scenic Backway at Callao, south to Trout Creek, plus the side roads into each of the five canyons into the Deep Creek Mountains.

(22) Reservation Ridge Scenic Backway. From US-191 at the Avantaquin Campground turnoff on the Dinosaur Diamond Prehistoric Highway National Scenic Byway, west along the ridge line to US-6, just east of Soldier Summit.

(23) White River/Strawberry Road Scenic Backway. From US-6, just east of Soldier Summit, north to Trail Hollow and north past Strawberry Reservoir to US-40, 23 miles east of Heber.

(24) Nine Mile Canyon Scenic Backway. From US-191, two miles east of Wellington on the Dinosaur Diamond Prehistoric Highway National Scenic Byway, north and east through Nine Mile Canyon to Myton.

(25) Chicken Creek Road Scenic Backway. From Levan to Chester through the Uinta National Forest over the San Pitch Mountains.

(26) Skyline Drive Scenic Backway. From the Tucker Rest Area on US-6 up the left fork of Clear Creek, crossing the Energy Loop National Scenic Byway, and south through the Manti-La Sal and Fishlake National Forests to I-70 at Taylor Flat, 18 miles east of Salina.

(27) Mayfield-Ferron Scenic Backway. From Mayfield to Ferron, crossing Skyline Drive Scenic Backway in the Manti-La Sal National Forest.

(28) Wedge Overlook/Buckhorn Draw Scenic Backway. From Castle Dale on SR-10 to the Wedge Overlook and from the Wedge Overlook turnoff, 13 miles east of SR-10, through Buckhorn Draw to I-70 at Exit 131.

(29) Dinosaur/Cedar Overlook Scenic Backway. From Cleveland south and east to the Cleveland-Lloyd Dinosaur Quarry and from the turnoff, six miles west of the quarry, on south and east to Cedar Mountain.

(30) Temple Mountain/Goblin Valley Road Scenic Backway. From SR-24, 24 miles south of I-70, west to the base of Temple Mountain, then south to Goblin Valley State Park.

(31) Kimberly/Big John Flat Road Scenic Backway. State Route 153 from Junction on US-89 to the east end of the Beaver Canyon Scenic Byway, then from SR-153 north along Big John Flat Road, Beaver Creek Road, and Kimberly Road to I-70 at Castle Rock, plus the Kent's Lake Loop (Forest Road 137).

(32) Cove Mountain Road. From Koosharem on SR-62 through Fishlake National Forest to Glenwood on SR-119.

(33) Cathedral Valley Road Scenic Backway. From SR-24, 1/2 mile west of Caineville on the Capitol Reef Country Scenic Byway, north along Cathedral Valley into the northern part of Capitol Reef National Park, then north to Fremont Junction on I-70.

(34) Thousand Lake Mountain Road Scenic Backway. From SR-72, five miles northeast of Fremont, to Baler Ranch Road which connects to Factory Butte Road and Elkhorn Road, which passes through Capitol Reef National Park and connects to Factory Butte.

(35) Gooseberry/Fremont Road Scenic Backway. From Johnson Valley Reservoir at the Fishlake Scenic Byway, north through Fishlake National Forest to I-70, 6.5 miles east of Salina.

(a) Originally defined as running from SR-72, two miles north of Fremont, to I-70.

(b) The southern segment of this backway, between Fremont and Johnson Valley Reservoir, was redesignated a scenic byway and added to the Fishlake Scenic Byway November 18, 1992.

(36) La Sal Mountain Loop Road Scenic Backway. From US-191, six miles south of Moab, over the La Sal Mountains in the Manti-La Sal National Forest and through Castle Valley to SR-128 and the Dinosaur Diamond Prehistoric Highway National Scenic Byway.

(37) Lockhart Basin Road Scenic Backway. From Moab south through Kane Creek Canyon, Lockhart Basin and alongside Canyonlands National Park to SR-211 and the Indian Creek Corridor Scenic Byway.

(38) Needles/Anticline Overlook Road Scenic Backway. From US-191, 12 miles south of La Sal Junction, north to Anticline Overlook and Needles Overlook.

(39) The Trail of the Ancients Scenic Backway. State Route 261 from SR-95 south to US-163, plus SR-316 from SR-261 to Goosenecks Overlook. Also the roadways running on SR-262 between US-191 and County Road FAS-2416, and on FAS-2416 starting at SR-262 and running southeasterly to County Road FAS-2422, then northeasterly on FAS-2422 to the Utah/Colorado State Line near Hovenweep National Monument.

(a) Originally designated as the Moki Dugway Scenic Backway.

(b) Renamed and extended on February 7, 1994, to also include the route between US-191 and Hovenweep.

(c) Redesignated on September 22, 2005 as part of the Trail of the Ancients National Scenic Byway.

(40) Elk Ridge Road Scenic Backway. From SR-275 near Natural Bridges National Monument, one mile west of the junction of SR-95 on the Trail Of the Ancients National Scenic Byway, north and east through Bears Ears and across Elk Ridge to SR-211 and the Indian Creek Corridor Scenic Byway.

(41) Abajo Loop Scenic Backway. From Monticello west around Abajo Peak and south to Blanding at the northern end of the Trail of the Ancients National Scenic Byway.

(42) Bull Creek Pass Road Scenic Backway. From SR-95, 15 miles south of SR-24 on the Bicentennial Highway Scenic Byway, to McMillan Springs through Steven Narrows and east to SR-276, five miles south of SR-95.

(a) Originally called Bull Mountain Road Scenic Backway.

(43) Notom Road Scenic Backway. From SR-24 at the Capitol Reef National Park boundary on the Capitol Reef Country Scenic Byway, south to the Burr Trail Scenic Backway.

(44) Burr Trail Scenic Backway. From SR-12 at Boulder on the Scenic Byway 12 All-American Road, east and south across the Waterpocket Fold in Capitol Reef National Park to SR-276 near Bullfrog.

(45) Hole in the Rock Scenic Backway. From SR-12, five miles east of Escalante on the Scenic Byway 12 All-American Road, southeast through Grand Staircase-Escalante National Monument and Glen Canyon National Recreation Area to the Hole in the Rock at Lake Powell.

(46) Smoky Mountain Road Scenic Backway. From SR-12 at Escalante on the Scenic Byway 12 All-American Road, south across the Kaiparowits Plateau and through the Grand Staircase-Escalante National Monument to Big Water on US-89.

(47) Posey Lake Road Scenic Backway. From Escalante on the Scenic Byway 12 All-American Road, north through the Dixie National Forest, past Death Hollow Wilderness Area and Posey Lake, to Bicknell on the Capitol Reef Country Scenic Byway.

(48) Griffin Top Road Scenic Backway. From Posey Lake on the Posey Lake Road Scenic Backway west and south through the Dixie National Forest to the historic Widtsoe settlement (Widtsoe Junction).

(49) Cottonwood Canyon Road Scenic Backway. From US-89 at the Paria Ranger Station, north through the Grand Staircase-Escalante National Monument to Cannonville on the Scenic Byway 12 All-American Road.

(50) Johnson Canyon/Alton Amphitheater Scenic Backway. From US-89, eight miles east of Kanab, north and west to Glendale through the Grand Staircase National Monument and the Vermillion Cliffs, White Cliffs, and Pink Cliffs. Also a spur route from 8 miles east of Glendale, north to Alton.

(51) Paria River Valley Scenic Backway. From US-89, at the Spur, 40 miles east of Kanab, north to the Paria ghost town and movie set.

(52) East Fork of the Sevier Scenic Backway. From SR-12, 14 miles east of the US-89 junction on the Scenic Byway 12 All-American Road, south through the Dixie National Forest and parallel to the west boundary of Bryce Canyon National Park, to the southern terminus at the clifftop.

(53) Ponderosa/Coral Pink Sand Dunes Scenic Backway. From US-89, seven miles northwest of Kanab, southwest past Ponderosa Campground to Coral Pink Sand Dunes State Park.

(54) Smithsonian Butte Scenic Backway. From SR-9 at Rockville on the Zion Park Scenic Byway, south to US-89 at Apple Valley.

(55) Kolob Reservoir Road Scenic Backway. From SR-9 at Virgin on the Zion Park Scenic Byway, through Zion National Park to SR-14, six miles east of Cedar City on the Cedar Breaks Scenic Byway.

(56) Dry Lakes/Summit Canyon Scenic Backway. From Summit on Old US-91 (near I-15), east through Dixie National Forest to SR-143, eight miles south of Parowan on the Utah's Patchwork Parkway National Scenic Byway.

(57) Mojave Desert/Joshua Tree Road Scenic Backway. From Old US-91, two miles south of Shivwits, south around Jarvis Peak and west back to Old US-91, two miles north of the Utah/Arizona State Line.

(58) Snow Canyon Road Scenic Backway. From Ivins north through Snow Canyon State Park to SR-18.

August 22, 2011 72-4-303
Notice of Continuation August 3, 2016 63G-3-201

R940. Transportation Commission, Administration.
R940-5. Approval of Highway Facilities on Sovereign Lands.
R940-5-1. Authority.

This rule is required by Section 72-6-303 and is enacted under the authority of Title 63G, Chapter 3, Utah Administrative Rulemaking Act.

R940-5-2. Purpose.

(1) This rule establishes minimum guidelines for the Commission to consider when reviewing a proposed plan to construct a highway facility over sovereign lakebed lands as part of an application to lease sovereign land through the Division of Forestry, Fire and State Lands of the Department of Natural Resources, as provided in Section 65A-7-5.

(2) When considering a proposed plan to construct a highway facility over sovereign lakebed lands, it is the obligation of the Utah Transportation Commission to safeguard the public interest by thoroughly evaluating the financial viability of the project to ensure the project can be constructed and completed as proposed, that the project can be completed within the proposed time frame, to ensure the long-term viability and operability of the project by the proposer; and to ensure that the facility is safe and meets current engineering standards for design, construction, operation, and maintenance.

(3) Commission approval of a plan to construct a highway facility over sovereign lakebed lands does not constitute approval of an application to lease state lands by the Division of Forestry, Fire and State Lands as provided under Section 65A-7-5. Issuance of surface leases of state lands is determined separately under a process determined by the Division of Forestry, Fire and State Lands as provided under state law and administrative rule.

R940-5-3. Definitions.

Except as otherwise stated in this rule, terms used in this rule are defined in Section 72-6-302. The following additional terms are defined for this rule.

(1) "Commission" means the Utah Transportation Commission, created in Section 72-1-301.

(2) "Department" means the Utah Department of Transportation, created in Section 72-1-101.

(3) "Proposed plan" means a plan submitted by a private entity to the Commission for approval to construct a highway facility over sovereign lakebed lands.

(4) "Proposer" means the private entity that submits an application to the Commission.

R940-5-4. Submission of Proposed Plan and Application.

(1) The Commission may accept delivery of a proposed plan to construct a highway facility over sovereign lakebed lands as part of an application to lease sovereign land through the Division of Forestry, Fire and State Lands.

(2) The proposer must submit a minimum of 20 copies of the proposed plan to the Commission.

(3) The proposed plan must be submitted to the Commission in a format that corresponds to the required information contained within this rule and must contain the specific information requested under this rule. Any supporting documentation not required under this rule may be submitted in an appendix.

R940-5-5. Preliminary Review of the Qualifications and Financial Resources of the Proposer.

(1) The Commission will conduct a preliminary review of the proposed plan to determine the qualifications and financial resources of the proposer.

(2) The proposer must submit the following information:

(a) a description of the legal structure of the proposer, including equity ownership structure of the entity;

(b) information on third-party consultants (five page limit per entity), including investment bankers, lawyers, engineers, traffic consultants and other entities that will provide information necessary for the submission of the proposed plan. Consultant information must include the contact information, experience and a brief biography of each individual consultant, and must describe the prior experience of similar projects for each consulting firm (the submission must contain a letter, printed on company letterhead and signed by an officer of the respective firm, stating that the firm has been retained by the proposer to do the scope of work required and detail the elements of the said scope);

(c) a maximum two-page description of the physical elements of the proposed project;

(d) a maximum two-page description of the permitting and environmental elements of the proposed project;

(e) a maximum five-page description of the funding and finance plan for the proposed project;

(f) an explanation of whether the proposer plans to own the asset for at least the first 10 years of the operation. If not, provide a description of the proposer's plan to transfer or otherwise sell part or all of the asset to other entities;

(g) information describing the financial strength of the proposer, including:

(i) a comprehensive budget for the preliminary developmental elements of the proposed project, including but not limited to:

(A) preliminary design and engineering (30 percent);

(B) traffic and revenue study;

(C) financial plan and pro-formas for the life of the project;

(D) independent engineer's report;

(E) permitting and other preliminary environmental work;

(F) proposer staff budget, including a list of the staff members and proposed budget;

(G) an estimate of the cost to review the proposed plan by the Utah Department of Transportation; and

(H) a timeline of the aggregated development budget payments, including all elements required through financial close;

(ii) proof of financial sufficiency showing that the proposer's corporate entity has sufficient funds to pay for the items listed in the comprehensive development budget and at the required times shown in the budget timeline. If development funds are to come from third parties, present proof of financial sufficiency for those entities;

(h) a statement whether the proposer will indemnify the state and what resources are at the proposers disposal to backstop the indemnification;

(i) terms the proposer seek from the state for the sovereign state lands impacted by the proposed plan;

(j) the type and amount of insurance that will be carried by the proposer.

R940-5-6. Final Review of Final Statement of Qualifications and Financial Resources, and Final Review of Technical Proposal.

(1) As specified under section 72-6-303, the proposer must submit the following information:

(a) a map indicating the location and legal description of the highway facility and all proposed interconnections with other highway facilities;

(b) a description of the highway facility, including the conceptual design of the highway facility and a statement whether the facility will be operated and maintained as a tollway facility;

(c) a list of the major permits and approvals required for developing or operating improvements to the highway facility from local, state or federal agencies and a projected schedule for obtaining the permits and approvals;

(d) a description of the types of public utility facilities, if any, that will be crossed by the highway facility and a statement of the plans to accommodate the crossing;

(e) a description of the types of public utilities used, carried, or accommodated by the highway facility and a statement of the plans to use, carry or accommodate the public utilities;

(f) an estimate of the design and construction costs of the highway facility;

(g) a statement setting forth the private entity's general plans for constructing, operation, and maintaining the highway facility, including:

(i) the proposed date for development, operation, or both of the highway facility ;

(ii) the proposed term of the lease over sovereign lakebed lands; and

(iii) a demonstration by the private entity that the proposed plan is financially viable;

(h) the names and addresses of the persons who may be contacted for further information concerning the highway facility application.

(i) demonstration that the proposed highway facility is contained within the long-range highway plan prepared by the Department or by a metropolitan planning organization, including the visionary long-range highway plan.

(j) a statement whether or how the highway facility can safely accommodate recreational fishing or other recreational activities on the highway facility.

(2) The commission also requires the following information:

(a) a copy of the agreement entered into by the Department and the proposer, pursuant to Section 72-6-303, demonstrating that the proposed construction plan meets engineering and design standards specified by the Department, including authorization for the Department to assure the safety of the design, construction, operation, and maintenance of the facility;

(b) proof of a performance bond issued for the project pursuant to the provisions of Section 63G-6-505 and 507;

(c) verification of executed steps identified in the funding and finance plan required and submitted as part of the Preliminary Review required under R940-5-5 necessary to complete proof of financial strength of the proposed plan (for example, if the funding and finance plan submitted under the Preliminary Review states that the proposer would have a letter of credit available for a portion of the funding and financing plan, and the proposer had demonstrated during the Preliminary Review that such proof is available, the Commission will likely require the letter of credit executed and delivered as part of Final Review required under this part);

(d) final submission of information requested by the Commission under the Preliminary Review; and

(e) any additional information required by the Commission and posted by the Commission on the Department's website necessary to determine the feasibility and financial viability of the proposal.

R940-5-7. Review of Proposal.

(1) As part of the Commission review of a proposed plan to construct a highway facility over sovereign lakebed lands, the Commission will consider the public interest to ensure the proposed plan is feasible, financially viable, and that the facility is safe by meeting current engineering standards. At the same time, the Commission will provide timely review of the proposed plan to help meet business time lines and provide greater certainty for the proposer.

(2) The Commission reserves the right to require or permit the proposer to submit revisions, clarifications, or supplementals of the proposal during the review process.

(3) The Commission may appoint a committee of its members to evaluate a proposal for recommendation to the full Commission.

(4) The Commission shall consider recommendations made by the Department, including whether the highway construction plan contained within the proposal meets engineering and design standards outlined in an agreement entered into by the Department and the proposer.

(5) The Commission may, at any time in its sole discretion, refuse to review an application if the proposal fails to meet the guidelines established in Section 72-6-303 and this rule.

R940-5-8. Approval of Proposed Plan.

(1) The Commission shall not approve any proposal until the proposer has entered into an agreement with the Department as required in Section 72-6-303.

(2) If the Commission approves a proposal:

(a) a notice will be given to the proposer;

(b) the notice will be posted on the Department's website; and

(c) a copy of the notice will be given to the Division of Forestry, Fire and State Lands.

KEY: highway, construction, lakebed, sovereign lands
September 15, 2011 72-6-303
Notice of Continuation August 3, 2016

R986. Workforce Services, Employment Development.
R986-700. Child Care Assistance.
R986-700-701. Authority for Child Care Assistance (CC) and Other Applicable Rules.

(1) The Department administers Child Care Assistance (CC) pursuant to the authority granted in Section 35A-3-310.

(2) Rule R986-100 applies to CC except as noted in this rule.

(3) Applicable provisions of R986-200 apply to CC, except as noted in this rule or where in conflict with this rule.

R986-700-702. General Provisions.

(1) CC is provided to support employment and job search activities.

(2) CC is available, as funding permits, to the following clients who are employed or are participating in activities that lead to employment:

(a) parents;

(b) specified relatives; or

(c) clients who have been awarded custody or appointed guardian of the child by court order and both parents are absent from the home. If there is no court order, an exception can be made on a case by case basis in unusual circumstances by the Department program specialist.

(3) Child care is provided only for children living in the home and only during hours when neither parent is available to provide care for the children.

(4) If a client is eligible to receive CC, the following children, living in the household unit, are eligible:

(a) children under the age of 13; and

(b) children up to the age of 18 years if the child;

(i) meets the requirements of rule R986-700-717, and/or

(ii) is under court supervision.

(5) Clients who qualify for child care services will be paid if and as funding is available. When the child care needs of eligible applicants exceed available funding, applicants will be placed on a waiting list. Eligible applicants on the list will be served as funding becomes available. Special needs children, homeless children and FEP or FEPTP eligible children will be prioritized at the top of the list and will be served first. "Special needs child" is defined in rule R986-700-717.

(6) The amount of CC might not cover the entire cost of care.

(7) A client is only eligible for CC if the client has no other options available for child care. The client is encouraged to obtain child care at no cost from a parent, sibling, relative, or other suitable provider. If suitable child care is available to the client at no cost from another source, CC cannot be provided.

(8) CC can only be provided by an eligible provider approved by the Department and will not be provided for illegal or unsafe child care. Illegal child care is care provided by any person or facility required to be licensed or certified but where the provider has not fulfilled the requirements necessary to obtain the license or certification.

(9) CC will not be paid to a client for the care of his or her own child(ren) when the client is working in a residential setting. CC may be approved where the client is working for an approved child care center, regularly watches children other than her own, and does not have an ownership interest in the child care center. CC will not be paid to a client for the care of his or her own child(ren) if the client is a stockholder, officer, director, partner, manager or member of a corporation, partnership, limited liability partnership or company or similar legal entity providing the CC.

(10) Neither the Department nor the state of Utah is liable for injuries that may occur when a child is placed in child care even if the parent receives a subsidy from the Department.

(11) Foster care parents receiving payment from the Department of Human Services are not eligible to receive CC for the foster children.

(12) Once eligibility for CC has been established, eligibility must be reviewed at least once every six months. The review is not complete until the client has completed, signed and returned all necessary review forms to the local office. All requested verifications must be provided at the time of the review. If the Department has reason to believe the client's circumstances have changed, affecting either eligibility or payment amount, the Department will reduce or terminate CC even if the certification period has not expired.

R986-700-703. Client Rights and Responsibilities.

In addition to the client rights and responsibilities found in R986-100, the following client rights and responsibilities apply:

(1) A client has the right to select the type of child care which best meets the family's needs.

(2) If a client requests help in selecting a provider, the Department will refer the client to the local Care About Child Care agency.

(3) A client is responsible for monitoring the child care provider. The Department will not monitor the provider.

(4) A client is responsible to pay all costs of care charged by the provider. If the child care assistance payment provided by the Department is less than the amount charged by the provider, the client is responsible for paying the provider the difference.

(5) The only changes a client must report to the Department within ten days of the change occurring are:

(a) that the household's gross monthly income exceeds the percentage of the state median income as determined by the Department in R986-700-710(3);

(b) that the client is no longer in an approved training or educational program;

(c) if the client's schedule changes so that child care is no longer needed during the hours of approved employment and/or training activities;

(d) that the client does not meet the minimum work requirements of an average of 15 hours per week or 15 and 30 hours per week when two parents are in the household and it is expected to continue;

(e) the client is separated from his or her employment;

(f) a change of address;

(g) any of the following changes in household composition; a parent, stepparent, spouse, or former spouse moves into the home, a child receiving child care moves out of the home, or the client gets married; or

(h) a change in the child care provider, including when care is provided at no cost.

(6) If a material change which would result in a decrease in the amount of the CC payment is reported within 10 days, the decrease will be made effective beginning the next month and sums received in the month in which the change occurred will not be treated as an overpayment. If it is too late to make the change to the next month's CC payment, the client is responsible for repayment even if the 10 days for reporting the change has not expired. If the client fails to report the change within 10 days, the decrease will occur as soon as the Department learns of the change and the overpayment will be assessed back to the date of the change.

(7) If an overpayment is established and it is determined that the client was at fault in the creation of the overpayment, the client must repay the overpayment to the Department. In some situations, the client and provider may be jointly liable. In the case of joint liability, both parties can be held liable for the entire overpayment.

(8) The Department is authorized to release the following information to the designated provider:

(a) limited information regarding the status of a CC payment including that no payment was issued or services were denied;

(b) the date the child care subsidy was issued;

(c) the subsidy amount for that provider;

(d) the copayment amount;

(e) information available in the Department Provider Portal. The Provider Portal provides a provider with computer access to limited, secure information;

(f) the month the client is scheduled for review;

(g) the date the client's application was received; and

(h) general information about what additional information and/or verification is needed to approve CC such as the client's work schedule and income.

(9) If a client uses a child care provider at least eight hours by the 15th of the calendar month, and that provider has been paid for that month, the Department will not pay another provider for child care for the rest of that month even if the client changed providers. However, if it is the provider that decided not to provide care and the client is required to change providers, the Department may pay that second provider for a portion of that same month.

R986-700-704. Establishment of Paternity.

The provisions of rules R986-100 and R986-200 pertaining to cooperation with ORS in the establishment of paternity and collection of child support do not apply to ES CC.

R986-700-705. Eligible Providers and Provider Settings.

(1) The Department will only pay CC to clients who select eligible providers. All eligible providers, including providers who receive CC grants from the Department, must meet all Child Care Development Fund (CCDF) requirements. The only eligible providers are:

(a) providers regulated through Department of Health Child Care Licensing (CCL):

(i) licensed homes;

(ii) licensed child care centers; and

(iii) homes with a residential certificate.

(b) license exempt providers who are not required by law to be licensed and are either;

(i) license exempt centers as defined in R430-8-3. Programs or centers must have a current letter of exempt status from CCL; or

(ii) DWS Family, Friend and Neighbor providers (FFN) as approved by CCL. The requirements for FFN approval are provided in subsection (3) of this section and in Department policy.

(2) The following providers are not eligible for receipt of a CC payment:

(a) a provider living in the same home as the parent client unless the provider is caring for a child who has special needs who cannot be otherwise accommodated;

(b) a sibling of the child living in the home can never be approved, even for a special needs child;

(c) a parent, foster care parent, stepparent or former stepparent, even if living in another residence;

(d) undocumented aliens;

(e) persons under age 18;

(f) a provider providing care for the child in another state;

(g) a provider who has committed an IPV as a provider, or as a recipient of any funds from the Office of Child Care including subsidy and grant payments, as determined by the Department or by a court. The disqualification for an IPV will remain in effect until the IPV disqualification period has run, any resulting overpayment has been satisfied, and the provider is otherwise eligible;

(h) any provider disqualified under R986-700-718;

(i) a provider who does not provide necessary information or cooperate with a Department investigation or audit or is not an approved provider; or

(j) a provider whose child care subsidies are being taken pursuant to an IRS levy or garnishment.

(3) FFN providers must comply with all CCDF and Department requirements and will not be approved for a CC subsidy payment unless all of the following requirements have been successfully completed and verification has been provided to CCL:

(a) complete, sign and submit an application to CCL;

(b) provide a copy of a certificate of completion of New Provider orientation and agree to comply with Department requirements and policy, including ongoing training, as explained in the orientation;

(c) pass a home inspection as provided in Department policy;

(d) complete an infant/child CPR training;

(e) complete first aid training; and,

(f) the provider and all individuals 12 years old or older living in the home where care is provided must submit to and pass a background check as provided in R986-700-751 et seq.

(4) A FFN provider must also comply with all Department policy including abiding by the ratio requirements.

(5) FFN approval must be renewed annually. Renewal information is found in Department or CCL policy. The FFN CC Provider must complete an announced inspection and show compliance with all regulations at least 30 calendar days before the expiration date of the current approval.

(6) FFN CCL provider approval is for the provider and the location(s) and is not assignable or transferable.

(7) A FFN provider or applicant has a right to file an appeal when an adverse action has been taken against him or her in regards to FFN approval status or health and safety compliance. Prior to filing an appeal, the provider or applicant must request a review with the CCL manager. If unresolved after that review, the provider may file an appeal by requesting a fair hearing with DWS in accordance with R986-1-123 et seq.

R986-700-706. Provider Rights and Responsibilities.

(1) Providers assume the responsibility to collect copayments and any other fees for child care services rendered. Neither the Department nor the state of Utah assumes responsibility for payment to providers.

(2) A provider may not charge clients receiving a CC subsidy a higher rate than their customers who do not receive a CC subsidy.

(3) Providers must keep accurate records of subsidized child care payments, and time and attendance. The Department has the right to investigate child care providers and audit their records. Time and attendance records for all subsidized clients must be kept for at least three years.

(4) Providers must provide initial verification information to determine eligibility. Providers must also cooperate with an investigation or audit to determine ongoing eligibility or if eligibility was correctly determined. Cooperation includes providing information and verification and returning telephone calls or responding to emails from Department employees or other persons authorized by the Department to obtain information such as an employee of ORS in a timely manner. "A timely manner" is usually considered to be ten business days for written documentation and two business days to return a phone call or email request. Providing incomplete or incorrect information will be treated

the same as a failure to provide information if the incorrect or insufficient information results in an improper decision with regard to the eligibility. Failure to disclose a material fact that might affect the eligibility determination can also lead to criminal prosecution. If a provider fails to cooperate with an investigation or audit, provide any and all information or verification requested, or fails to keep records for one year without good cause, the provider will no longer be an approved provider. Good cause is limited to circumstances where the provider can show that the reasons for the delay in filing were due to circumstances beyond the provider's control or were compelling and reasonable. The period the provider will not be an approved provider will be from the date the information or verification was due until when it is received by the Department.

(5) If a provider accepts payment from funds provided by the Department for services which were not provided, the provider is responsible for repayment of the resulting overpayment and there may be a disqualification period and/or criminal prosecution.

(6) CCL will keep a list of all providers that have been disqualified as a provider or against whom a referral or complaint is received.

(7) All providers, except FFN providers as defined in R986-700-705(1)(b)(ii), are required to report their child care rates to the local Care About Child Care agency.

(8) Providers are required to access the Provider Portal at jobs.utah.gov/childcare and:

(a) submit and manage bank account information;

(b) read and agree to the terms and conditions contained in the Provider Guide and in the Portal;

(c) view child care payment information;

(d) manage Provider Portal user access to ensure only those users with authority to make changes can do so. The provider is liable for all changes made and information provided through the Provider Portal;

(e) report the following changes within 10 days, or by the 25th of the month, whichever is sooner:

(i) a child is no longer in child care;

(ii) a child was not in child care during that month;

(iii) that the provider decided not to charge the full subsidy amount for one month. The provider should notify the Department and the difference will be deducted from the next payment;

(iv) that a child attended for less than eight hours by the 15th of the month, payment for the month was received and the child is not expected to return; or

(v) a change in financial institution account information for direct deposit.

(9) Providers must submit a W-9 Form if required by the Department and a 1099 will be issued annually.

(10) A provider who provides services for any part of a month and then terminates services with the client/child during the month, must reimburse the Department for the days when care was not provided. However, if it was necessary to remove the child from care because the child or others were endangered, and the incident was reported to CCL or local authorities, the Department may waive repayment.

R986-700-707. Copayment and Transitional Child Care.

(1) "Copayment" means a dollar amount which is deducted by the Department from the standard CC subsidy for Employment Support CC. The copayment is determined on a sliding scale and the amount of the copayment is based on the parent(s) countable earned and unearned income and household size.

(2) The parent is responsible for paying the amount of the copayment directly to the child care provider.

(3) If the copayment exceeds the actual cost of child care, the family is not eligible for child care assistance.

(4) The Department will deduct the full monthly copayment from the subsidy even if the client receives CC for only part of the month.

(5) The following clients are not subject to the copayment requirement:

(a) clients at or below 100% of the poverty level including families receiving Homeless Families CC under rule 986-700-712;

(b) clients receiving transitional child care; and

(c) clients receiving FEP CC.

(6) Transitional child care is available during the six months immediately following a FEP or FEPTP termination if the termination was due to increased income and the parent is otherwise eligible for ESCC. The copayment will resume in the seventh month after the termination of FEP or FEPTP. The six month time limit is the same regardless of whether the client receives TCA or not. A client does not need to fill out a new application for child care during the six month transitional period even if there is a gap in services during those six months.

R986-700-708. FEP CC.

FEP CC may be provided to clients receiving financial assistance from FEP or FEPTP. FEP CC will only be provided to cover the hours a client needs child care to support the activities required by the employment plan.

R986-700-709. Employment Support (ES) CC.

(1) Parents who are not eligible for FEP CC may be eligible for Employment Support (ES) CC. To be eligible, a parent must be employed or be employed while participating in educational or training activities. Work Study is not considered employment. A parent who attends school but is not employed at least 15 hours per week, is not eligible for ES CC. ES CC will only be provided to cover the hours a client needs child care for work or work and approved educational or training activities.

(2) If the household has only one parent, the parent must be employed at least an average of 15 hours per week.

(3) If the family has two parents, CC can be provided if:

(a) one parent is employed at least an average of 30 hours per week and the other parent is employed at least an average of 15 hours per week and their work schedules cannot be changed to provide care for the child(ren). CC will only be provided during the time both parents are in approved activities and neither is available to care for the children; or

(b) one parent is employed and the other parent cannot work, or is not capable of earning $500 per month and cannot provide care for their own children because of a physical, emotional or mental incapacity. Any employment or educational or training activities invalidate a claim of incapacity. The incapacity must be expected to last 30 days or longer. The individual claiming incapacity must verify that incapacity in one of the following ways:

(i) receipt of disability benefits from SSA;

(ii) 100% disabled by VA; or

(iii) by submitting a written statement from:

(A) a licensed medical doctor;

(B) a doctor of osteopathy;

(C) a licensed Mental Health Therapist as defined in UCA 58-60-102;

(D) a licensed Advanced Practice Registered Nurse; or

(E) a licensed Physician's Assistant.

(4) Employed or self-employed parent client(s) must make, either through wages or profit from self-employment, a rate of pay equal to or greater than minimum wage multiplied by the number of hours the parent is working. To be eligible for ES CC, a self employed parent must provide business

records for the most recent three month time period to establish that the parent is likely to make at least minimum wage. If a parent has a barrier to other types of employment, exceptions can be made in extraordinary cases with the approval of the state program specialist.

(5) Americorps*Vista is not supported. Job Corps activities are considered to be training and a client in the Job Corps would also have to meet the work requirements to be eligible for ES CC.

(6) Applicants must verify identity but are not required to provide a Social Security Number (SSN) for household members. Benefits will not be denied or withheld if a customer chooses not to provide a SSN if all factors of eligibility are met. SSN's that are supplied will be verified. If an SSN is provided but is not valid, further verification will be requested to confirm identity.

R986-700-710. Income and Asset Limits for ES CC.

(1) Rule R986-200 is used to determine:

(a) who must be included in the household assistance unit for determining whose income must be counted to establish eligibility. In some circumstances, determining household composition for a ES CC household is different from determining household composition for a FEP or FEPTP household. ES CC follows the parent and the child, not just the child so, for example, if a parent in the household is ineligible, the entire ES CC household is ineligible. A specified relative may not opt out of the household assistance unit when determining eligibility for CC. The income of the specified relatives needing ES CC in the household must be counted. For ES CC, only the income of the parent/client is counted in determining eligibility regardless of who else lives in the household. If both parents are living in the household, the income of both parents is counted. Recipients of SSI benefits are included in the household assistance unit.

(b) what is counted as income except:

(i) the earned income of a minor child who is not a parent is not counted;

(ii) child support, including in kind child support payments, is counted as unearned income, even if it exceeds the court or ORS ordered amount of child support, if the payments are made directly to the client. If the child support payments are paid to a third party, only the amount up to the court or ORS ordered child support amount is counted; and

(iii) earned and unearned income of SSI recipients is counted with the exception of the SSI benefit.

(c) how to estimate income.

(2) The following income deductions are the only deductions allowed on a monthly basis:

(a) the first $50 of child support received by the family;

(b) court ordered and verified child support and alimony paid out by the household;

(c) $100 for each person with countable earned income; and

(d) a $100 medical deduction. The medical deduction is automatic and does not require proof of expenditure.

(3) The household's countable income, less applicable deductions in paragraph (2) above, must be at, or below, a percentage of the state median income as determined by the Department. The Department will make adjustments to the percentage of the state median income as funding permits. The percentage currently in use is available at the Department's administrative office.

(4) Charts establishing income limits and the copayment amounts are available at all local Department offices.

(5) An independent living grant paid by DHS to a minor parent is not counted as income.

(6) If a non-applicant parent pays a portion of the child care costs directly to the applicant parent, that amount is counted as income. If the non-applicant parent pays the child care provider directly, that amount will be deducted from the subsidy amount. If the court orders the non-applicant to pay one-half of the child care costs, the non-applicant parent must pay one-half of the total cost of child care.

(7) Clients must meet the CCDF asset limit.

R986-700-711. ES CC to Support Education and Training Activities.

(1) CC may be provided when the client(s) is engaged in education or training and employment, provided the client(s) meet the work requirements under Section R986-700-709(1).

(2) The education or training is limited to courses that directly relate to improving the parent(s)' employment skills.

(3) ES CC will only be paid to support education or training activities for a total of 24 calendar months. The months need not be consecutive.

(a) On a case by case basis, and for a reasonable length of time, months do not count toward the 24-month time limit when a client is enrolled in a formal course of study for any of the following:

(i) obtaining a high school diploma or equivalent,

(ii) adult basic education, and/or

(iii) learning English as a second language.

(b) Months during which the client received FEP child care while receiving education and training do not count toward the 24-month time limit.

(c) CC can not ordinarily be used to support short term workshops unless they are required or encouraged by the employer. If a short term workshop is required or encouraged by the employer, and approved by the Department, months during which the client receives child care to attend such a workshop do not count toward the 24- month time limit.

(4) Education or training can only be approved if the parent can realistically complete the course of study within 24 months.

(5) Any child care assistance payment made for a calendar month, or a partial calendar month, counts as one month toward the 24-month limit.

(6) There are no exceptions to the 24-month time limit, and no extensions can be granted.

(7) CC is not allowed to support education or training if the parent already has a bachelor's degree.

(8) CC cannot be approved for graduate study or obtaining a teaching certificate if the client already has a bachelor's degree.

R986-700-712. CC for Certain Homeless Families.

(1) CC can be provided for homeless families with one or two parents when the family meets the following criteria:

(a) The family must present a referral for CC from an agency known by the local office to be an agency that works with homeless families, including shelters for abused women and children. This referral will serve as proof of their homeless state. Local offices will provide a list of recognized homeless agencies in local office area.

(b) The family must show a need for child care to resolve an emergency crisis.

(c) The family must meet all other relationship and income eligibility criteria.

(2) CC for homeless families is only available for up to three months in any 12-month period. When a payment is made for any part of a calendar month, that month counts as one of the three months. The months need not be consecutive.

(3) Qualifying families may use child care assistance for any activity including, but not limited to, employment, job search, training, shelter search or working through a crisis

situation.

(4) If the family is eligible for a different type of CC, the family will be paid under the other type of CC.

R986-700-713. Amount of CC Payment.

CC will be paid at the lower of the following levels:

(1) the maximum monthly local market rate as calculated using the Local Market Survey. The Local Market Survey is conducted by the Department and based on the provider category and age of the child. The Survey results are available for review at any Department office through the Department web site on the Internet; or

(2) the rate established by the provider for services and, if required, reported to the local Care About Child Care agency; or

(3) the unit cost multiplied by the number of hours approved by the Department. The unit cost is determined by dividing the maximum monthly local market rate by 137.6 hours.

R986-700-714. CC Payment Method.

(1) The provider must provide a valid financial account and routing number to allow for payment by direct deposit. For open, ongoing cases, payment will be issued on the first day of the month for services to be provided during that month. The provider is not an employee of the Department, the Office of Child Care, or the state of Utah even if the provider is only providing care for one client.

(2) Under unusual or extraordinary circumstances, the Department can issue payment by check. If a provider cannot obtain a financial account for direct deposit, the provider must contact the Department and explain why direct deposit is not possible.

(3) In the event that a check is reported as lost or stolen, the provider is required to sign a statement that they have not received funds from the original check before a replacement check can be issued. The check must be reported as lost or stolen within 60 days of the date the check was mailed. The statement must be signed on an approved Department form. If the original check has been redeemed, the Department will conduct an investigation and the provider, or the parent and provider in the case of a two party check, may be required to provide a sworn, notarized statement that the signature on the endorsed check is a forgery. If the Department determines the redeemed check was a forgery, the Department may require a waiting period prior to issuing a replacement check.

(4) The Department is authorized to stop payment on a CC check without prior notice if:

(a) the Department has determined that the client or the provider was not eligible for the CC payment, the Department has confirmed with the child care provider that no services were provided for the month in question or the provider cannot be located, and the Department has made an attempt to contact the provider: or

(b) when the check has been outstanding for at least 90 days; or

(c) the check is lost or stolen.

(5) No stop payment will be issued by the Department without prior notice to the provider unless the provider is not providing services or cannot be contacted.

R986-700-715. Overpayments.

(1) An overpayment occurs when a client or provider received CC for which they were not eligible including when a provider accepts payment but does not provide care. If the Department fails to establish one or more of the eligibility criteria and through no fault of the client, payments are made, it will not be considered to have been an overpayment if the client would have been eligible and the amount of the subsidy would not have been affected.

(2) Even if CC funds are authorized by the Department, a CC provider cannot receive and retain funds for any month during which no CC services were provided. If authorized or unauthorized subsidy funds received and retained by a provider but no CC services were provided during the month, the provider will be required to reimburse the Department for the excess funds and may be disqualified from receipt of further CC subsidy funds as provided in R986-700-718. A provider is considered to have retained subsidy funds if the provider knew or should have known the child would not receive services that month and fails to notify the Department within ten days or the provider does not notify the Department within ten days of the end of the month when the child was not in care at least eight hours that month. If the client does not use at least eight hours of child care by the 15th of the month but uses at least eight hours of child care after the 15th of the month, it may result in a partial overpayment for that month.

(3) All CC overpayments must be repaid to the Department.

(a) Client overpayments may be deducted from ongoing CC payments for clients who are receiving CC. If the Department is at fault in the creation of an overpayment, the Department will deduct $10 from each month's CC payment unless the client requests a larger amount.

(b) Provider overpayments. If a provider does not repay any outstanding overpayment within 30 days of notice of the overpayment, the Department will commence collection procedures which may include recouping the overpayment by deducting a portion of the overpayment from ongoing child care subsidies from the Department. This is true even if the child or client no longer receives child care from the provider. The decision whether to recoup the overpayment from ongoing child care payments or to commence collection procedures lies with the Department and not the provider or client/s.

(i) If the Department elects to recoup the overpayment from ongoing child care payments, and the overpayment is less than $1,000, the Department will recoup the full amount within 90 days. If the overpayment is more than $1,000 the Department will recoup the amount within six months. If the recoupment presents a hardship because it is more than 50% of the provider's ongoing monthly subsidy amount, the provider can contact the Department to discuss alternative arrangements for repayment.

(ii) If a provider stops providing care and has a balance due on an overpayment, and seeks approval to become a provider at a later date, approval cannot be granted until the overpayment is paid in full even if any disqualification period has expired.

(4) CC will be terminated if a client fails to cooperate with the Department's efforts to investigate alleged overpayments.

(5) If the Department has reason to believe an overpayment has occurred and it is likely that the client will be determined to be disqualified or ineligible as a result of the overpayment, payment of future CC may be withheld, at the discretion of the Department, to offset any overpayment which may be determined.

(6) A CC provider may appeal an overpayment as provided for public assistance appeals in rule R986-100. Any appeal must be filed in writing within 30 days of the date of the notice of agency action establishing the overpayment.

(7) If a provider receives and retains three overpayments in a rolling 12 month period, the provider will be taken off the approved provider list until all outstanding overpayments are paid in full, even if the time frames outlined in subsection (3)(b)(i) of this section have not expired.

(8) If a provider fails to enter into a payment plan to repay the overpayment or abide by the terms of the payment plan for 12 consecutive months, the provider will be taken off the approved provider list until all overpayments are paid in full or the arrearage on the payment plan is brought current. This is true even if there is only one overpayment.

R986-700-716. CC in Unusual Circumstances.

(1) CC may be provided for study time, to support clients in education or training activities if the parent has classes scheduled in such a way that it is not feasible or practical to pick up the child between classes. For example, if a client has one class from 8:00 a.m. to 9:00 a.m. and a second class from 11:00 a.m. to noon it might not be practical to remove the child from care between 9:00 a.m. and 11:00 a.m.

(2) An away-from-home study hall or lab may be required as part of the class course. A client who takes courses with this requirement must verify study hall or lab class attendance. The Department will not approve more study hall hours or lab hours in this setting than hours for which the client is enrolled in school. For example: A client enrolled for ten hours of classes each week may not receive more than ten hours of this type of study hall or lab.

(3) CC will not be provided for private kindergarten or preschool activities when a publicly funded education program is available.

(4) CC may be authorized to support employment for clients who work graveyard shifts and need child care services during the day for sleep time. If no other child care options are available, child care services may be authorized for the graveyard shift or during the day, but not for both. A maximum of seven hours per day will be approved for sleep time.

(5) CC may be authorized to support employment for clients who work at home, provided the client makes at least minimum wage from the at home work, and the client has a need for child care services. The client must choose a provider setting outside the home.

R986-700-717. Child Care for Children With Disabilities or Special Needs.

(1) The Department will fund child care for children with disabilities or special needs at a higher rate if the child has a physical, social, or mental condition or special health care need that requires;

(a) an increase in the amount of care or supervision and/or

(b) special care, which includes but is not limited to the use of special equipment, assistance with movement, feeding, toileting or the administration of medications that require specialized procedures.

(2) To be eligible under this section, the client must submit a statement from one of the professionals listed in rule R986-700-709(3)(b)(ii) or one of the following agencies documenting the child's disability or special child care needs;

(a) Social Security Administration showing that the child is a SSI recipient,

(b) Division of Services for People with Disabilities,

(c) Division of Mental Health,

(d) State Office of Education, or

(e) Baby Watch, Early Intervention Program.

(3) Verification to support that the child is disabled or has a special need must be dated and signed by the preparer and include the following;

(a) the child's name,

(b) a description of the child's disability, and

(c) the special provisions that justify a higher payment rate.

(4) The Department may require additional information and may deny requests if adequate or complete information or justification is not provided.

(5) The higher rate is available through the month the child turns 18 years of age.

(6) Clients qualify for child care under this section if the household is at or below 85% of the state median income.

(7) The higher rate in effect for each child care category is available at any Department office.

R986-700-718. Provider Disqualification.

(1) If a parent or provider commits an IPV, as defined in R986-100-117, the parent or provider will be responsible for repayment of the overpayment, if there is one, and will be disqualified from receipt of any funds from the Office of Child Care, including subsidy funds, grants and funds as a provider or as a parent:

(a) for a period of one year for the first IPV;

(b) for a period of two years for the second IPV; and

(c) for life for the third IPV.

(2) If the overpayment resulted from parent or provider fault not amounting to fraud or an agency error, the client and or provider will be responsible for repayment of the overpayment. There is no disqualification or ineligibility period for a fault overpayment.

(4) A CC provider may appeal an overpayment or disqualification as provided for public assistance appeals in rule R986-100. Any appeal must be filed in writing within 30 days of the date of the notice of agency action establishing the overpayment or disqualification. A provider who has been disqualified may continue to receive CC subsidy funds pending appeal until a decision is issued by the ALJ. The disqualification period will take effect even if the provider files an appeal of the decision issued by the ALJ. If the provider fails to file an appeal within 30 days of the date of the notice of agency action and the Department issues a default decision, and the provider files a request to set aside the default, CC subsidy funds will not continue unless or until the default is set aside by the ALJ. If the request to set aside the default is denied, the provider will be disqualified pending appeal of the denial to set aside the default.

(5) A provider is ineligible for CC subsidy funds after a disqualification until all overpayments established in conjunction with the disqualification have been paid in full even if the disqualification period has ended.

(6) A provider that intentionally breaches any program rule as provided in R986-100-117, except as provided in subsection (1) of this section, or violates CC rule R986-700-706(2) through (5) or who assumes a client's identity in order to gain access to client information or payment of Department funds will be disqualified for one year for the first offense, two years for the second offense and for life for the third offense.

(7) All disqualification periods run concurrently.

(8) A disqualification issued to a provider, including a child care center, under this subsection will follow both the provider, the principal provider, and any successor center or provider.

(a) A "successor" provider, including a child care center, that acquires the business or acquires substantially all of the assets of the provider or child care center. This includes a provider who changes from one status to another like a provider who was disqualified as a licensed family provider who then changes to be a license exempt provider.

(b) "Acquired" means to come into possession of, obtain control of, or obtain the right to use the assets of a business by any legal means including a gift, lease, repossession or purchase. For purposes of succession, a purchase through bankruptcy court proceedings where assets are being

liquidated is not considered an acquisition, if the court places restrictions on the transfer of liabilities to the purchaser. It is not necessary to purchase the assets in order to have acquired the right to their use, nor is it necessary for the predecessor to have actually owned the assets for the successor to have acquired them. The right to the use of the asset is the determining factor.

(c) "Assets" are commonly defined to include any property, tangible or intangible, which has value. Assets may also include the acquisition of the name of the business, customers, accounts receivable, patent rights, goodwill, employees, or an agreement by the predecessor not to compete.

(d) "Substantially all" means acquisition of 90 percent or more of all of the predecessor's assets.

(f) A "principal" is the individual or individuals who were responsible for the day to day business of the child care center provided that individual had an ownership interest in the center. An ownership interest includes a shareholder, director or officer of a corporation and a partner, member or manager of a limited liability partnership or company.

R986-700-719. Job Search Child Care (JS CC).

(1) JS CC is available to a client who is otherwise eligible for child care but is separated from his or her job and meets the eligibility criteria.

(2) JS CC is available for a maximum of two additional months provided the client:

(a) was employed at least 32 hours per week and was separated from his or her job;

(b) was receiving ES CC or Transitional Child Care (TR CC) in the month of the job separation and;

(c) reports the job loss within 10 days and requests continued child care payments while searching for a job. In that case, the client will be eligible for one additional month of child care. The month of the job loss does not count.

(3) If the client verifies the job loss in a timely manner, as directed by the Department, a second month of CC will be paid while the client looks for a job.

(4) The JS CC extension is only available once in a rolling 12 month period even if the client received only one month of JS CC assistance.

(5) A client is not eligible for JS CC if the client has two or more jobs and is separated from one or more of them but still has one job.

(6) Two parent households are not eligible for JS CC.

(7) The JS CC copayment will be at the lowest copayment amount required by the Department disregarding all earned income.

(8) A client who is receiving TR CC when the job separation occurs, and meets the requirements of this section, can be eligible for a maximum of two months of JS CC but those two months will count against the six month maximum under TR CC as provided in R986-700-707. If the job separation occurs in the last month of TR CC, the client can be eligible for JS CC which would be in addition to the TR CC.

R986-700-751. Background Checks.

(1) Sections R986-700-751 through 756 apply to child care providers identified in Utah Code Section 35A-3-310.5(1).

(2) The provider and each person age 12 years old or older living in the household where the child care is provided must submit to a background check.

(3) If child care is provided in the child's home, a background check must be done on each person age 12 years old or older living in the child's home who is not on the client's child care case.

(4) A client is not eligible for a subsidy if the client chooses a provider and the provider or any person age 12 years old or older living in the household where the child care is provided has:

(a) a supported finding of severe abuse or neglect by the Department of Human Services, a substantiated finding by a Juvenile court under Subsection 78-3a-320 or a criminal conviction related to neglect, physical abuse, or sexual abuse of any person; or

(b) a conviction for an offense as identified in R986-700-754; or

(c) an adjudication in juvenile court of an act which if committed by an adult would be an offense identified in R986-700-754.

R986-700-752. Definitions.

Terms used in the section R986-700-751 through 756 are defined as followed:

(1) "Convicted" includes a conviction by a jury or court, a guilty plea or a plea of no contest, an adjudication in juvenile court or an individual who is currently subjected to a deferred judgment and sentence agreement, a deferred prosecution agreement, a deferred adjudication agreement, or a plea in abeyance.

(2) "Covered Individual" means:

(a) each person providing child care;

(b) all individuals 12 years old or older residing in a residence where child care is provided.

(3) "Supported" means a finding by the Utah Department of Human Services (DHS), at the completion of an investigation by DHS, that there is a reasonable basis to conclude that one or more of the following severe types of abuse or neglect has occurred:

(a) if committed by a person 18 years of age or older;

(i) severe or chronic physical abuse;

(ii) sexual abuse;

(iii) sexual exploitation;

(iv) abandonment;

(v) medical neglect resulting in death, disability, or serious illness;

(vi) chronic or severe neglect; or

(vii) chronic or severe emotional abuse

(b) if committed by a person under the age of 18:

(i) serious physical injury, as defined in Subsection 76-5-109(1)(f) to another child which indicates a significant risk to other children, or

(ii) sexual behavior with or upon another child which indicates a significant risk to other children.

R986-700-753. Criminal Background Screening.

(1) The Department will contract with the CCL to perform a criminal background screening, which includes a review of the Bureau of Criminal Identification, (BCI) database maintained by the Department of Public Safety pursuant to Part 2 of Chapter 10, Title 53; and if a fingerprint card, waiver and fee are submitted, CCL will submit the fingerprint card and fee to the Utah Department of Public Safety for submission to the FBI for a national criminal history record check.

(2) Each client requesting approval of a covered child care provider must submit to CCL a form, which will include a waiver and certification, completed and signed by the child care provider as part of the DWS FFN approved provider process. Additional household members must give permission to run the background check. A fingerprint card and fee, prepared either by the local law enforcement agency or an agency approved by local law enforcement, shall also be submitted.

(3) The provider must state in writing, based upon the

provider's best information and belief, that no covered person, including the provider's own children, has ever been convicted of a felony, misdemeanor or had a supported finding from DHS or a substantiated finding from a juvenile court of severe abuse or neglect of a child. If the provider is aware of any such conviction or supported or substantiated finding, but is not certain it will result in a disqualification, CCL will obtain information from the provider to assess the threat to children. If the provider knowingly makes false representations or material omissions to CCL regarding a covered individual's record, the provider will be responsible for repayment to the Department of the child care subsidy paid by the Department. If a provider signs an attestation, a disqualification based on a covered individual who no longer lives in the home can be cured under certain conditions.

(4) All providers and other persons required to submit a fingerprint card under these rules must submit a new fingerprint card and fee every five years. In addition, the Department may conduct background screening annually.

(5) If CCL takes an action adverse to any covered individual based upon the background screening, CCL will send a denial letter to the provider and the covered individual.

R986-700-754. Exclusion from Child Care Due to Criminal Convictions.

(1) As required by Utah Code Subsection 35A-3-310.5(4), if the criminal conviction was a felony, or is a misdemeanor that is not excluded under paragraphs (2) or (3) below, the covered individual may not provide child care or reside in a home where child care is provided.

(2) As allowed by Utah Code Subsection 35A-3-310.5(5), the Department hereby excludes the following misdemeanors and determines that a misdemeanor conviction listed below does not disqualify a covered individual from providing child care:

(a) any class B or C misdemeanor offense under Title 32A, Alcoholic Beverage Control Act, except for 32A-12-203, Unlawful sale or furnishing to minors;

(b) any class B or C misdemeanor offense under Title 41, Chapter 6a, Traffic Code except for 41-6a-502, Driving under the influence of alcohol, drugs, or a combination of both or with specified or unsafe blood alcohol concentration, when the individual had a child in the car at the time of the offense;

(c) any class B or C misdemeanor offense under Title 58, Chapter 37, Utah Controlled Substances Act;

(d) any Class B or C misdemeanor offense under Title 58, Chapter 37a, Utah Drug Paraphernalia Act;

(e) any class B or C misdemeanor offense under Title 58, Chapter 37b, Imitation Controlled Substances Act;

(f) any class B or C misdemeanor offense under Title 76, Chapter 4, Inchoate Offenses, except for 76-4-401, Enticing a Minor;

(g) any class B or C conviction under Chapter 6, Title 76, Offenses Against Property, Utah Criminal Code;

(h) any class B or C conviction under Chapter 6a, Title 76, Pyramid Schemes, Utah Criminal Code;

(i) any class B or C misdemeanor offense under Title 76, Chapter 7, Subsection 103, Adultery, and 104, Fornication;

(j) any class B or C conviction under Chapter 8, Title 76, Offenses Against the Administration of Government, Utah Criminal Code except 76-8-1201 through 1207, Public Assistance Fraud; and 76-8-1301 False statements regarding unemployment compensation;

(k) any class B or C conviction under Chapter 9, Title 76, Offenses Against Public Order and Decency, Utah Criminal Code, except for:

(i) 76-9-301, Cruelty to Animals;

(ii) 76-9-301.1, Dog Fighting;

(iii) 76-9-301.8, Bestiality;

(iv) 76-9-702, Lewdness;

(v) 76-9-702.5, Lewdness Involving Child; and

(vi) 76-9-702.7, Voyeurism; and

(l) any class B or C conviction under Chapter 10, Title 76, Offenses Against Public Health, Welfare, Safety and Morals, Utah Criminal Code, except for:

(i) 76-10-509.5, Providing Certain Weapons to a Minor;

(ii) 76-10-509.6, Parent or guardian providing firearm to violent minor;

(iii) 76-10-509.7, Parent or Guardian Knowing of a Minor's Possession of a Dangerous Weapon;

(iv) 76-10-1201 to 1229.5, Pornographic Material or Performance;

(v) 76-10-1301 to 1314, Prostitution; and

(vi) 76-10-2301, Contributing to the Delinquency of a Minor and

(m) any class A misdemeanor where the conviction occurred more than ten years ago and the offense would be an excludable offense listed in this section.

(3) The Executive Director or designee may consider and approve individual cases where a covered individual will be allowed to provide child care who would otherwise be excluded by this section.

(4) The Department will rely on the criminal background screening as conclusive evidence of the conviction and the Department may revoke or deny approval for a provider based on that evidence.

(5) If a covered individual causes a provider to be disqualified as a provider based upon the criminal background screening and the covered individual disagrees with the information provided by BCI, the covered individual may challenge the information by contacting BCI directly. If the information causing the disqualification came from a Utah court, the covered individual must contact that court or seek an expungement as provided in Utah Code Ann. Sections 77-18-10 through 77-18-15.

(6) All child care providers must report all felony and misdemeanor arrests, charges or convictions of covered individuals to DOH within 48 hours of the arrest, notice of the charge, or conviction. All child care providers must also report a person aged 12 or older moving into the home where child care is provided within ten calendar days of that person moving in. A release for a background check must also be provided for that person within the time requested by the Department or DOH.

R986-700-755. Covered Individuals with Arrests or Pending Criminal Charges.

If CCL determines there exists credible evidence that a covered individual has been arrested or charged with a felony or a misdemeanor that would not be excluded under R986-700-754, the Department will act to protect the health and safety of children in child care that the covered individual may have contact with. The Department may revoke or suspend approval of the provider if necessary to protect the health and safety of children in care.

R986-700-756. Exclusion From Child Care Due to Finding of Abuse, Neglect, or Exploitation.

(1) Pursuant to Utah Code Subsection 62A-4a-1005(2)(a)(v) CCL will screen all covered individuals, including children residing in a home where child care is provided, for a history of a supported finding of severe abuse, neglect, or exploitation from the licensing information system maintained by the Utah Department of Human Services (DHS) and the juvenile court records. The juvenile court records need only be accessed as provided in 35A-3-310.5(2)(c).

(2) If a covered individual appears on the licensing information system, the threat to the safety and health of children will be assessed. The Department or CCL may revoke any existing approval and refuse to permit child care in the home until the Department or CCL is reasonably convinced that the covered individual no longer resides in the home.

(3) If the Department or CCL denies or revokes approval of a child care subsidy based upon the licensing information system, the Department will send a written decision to the client.

(4) If the DHS determines a covered individual has a supported finding of severe abuse, neglect or exploitation after the Department approves a child care subsidy, the covered individual has ten calendar days to notify CCL. Failure to notify CCL may result in the child care provider being liable for an overpayment for all subsidy amounts paid to the client between the finding and when it is reported or discovered.

R986-700-775. High Quality School Readiness Grant Program.

(1) The Office of Child Care (OCC) administers this program pursuant to the authority granted in Utah Code Section 53A-1b-106.

(2) The OCC will solicit proposals from eligible private providers and eligible home-based educational technology providers and make recommendations to the School Readiness Board (SRB) as provided in 53A-1b-106(3).

(3) Eligible private providers and eligible home-based educational technology providers must submit an application, together with a proposal to the OCC by the date provided in the application.

(4) The proposal must contain the components outlined in 53A-1b-105(1) or (2) and details as required in 53A-1b-106(7).

(5) A grant recipient must report annually to the OCC the information required in 53A-1b-106(12) in addition to other information as required by the OCC.

R986-700-776. Intergenerational Poverty School Readiness Scholarship Program.

(1) Scholarships are available, as funding permits, for a child who

(a) will be four years of age on or before September 2 of the school year in which the individual intends to participate in a school readiness program;

(b) has not entered kindergarten; and

(c) is experiencing intergenerational poverty, as determined by the Department.

(2) The Department will mail scholarship applications to individuals who the Department has identified as potentially eligible and who live in an area where one or more high quality preschool programs is available. Individuals who do not receive an application from the Department may still apply by contacting the OCC and requesting an application. The Department will notify potential applicants of the due date for filing a completed application.

(3) An applicant may be required to show that transportation to a high quality preschool program is available if the child does not live within a reasonable commuting distance from the high quality preschool.

(4) An applicant may be required to provide verification and supporting documentation if necessary to determine eligibility.

(5) The value of the scholarship will be determined by which program the parent chooses.

(6) Scholarships are transferable however funds cannot be prorated during a given month. So if a child attends one day or more during a given month at one program, and wishes to transfer to a second program at any time during that month, the full scholarship payment will be made to the first program.

(7) Payment will be made directly to the high quality preschool provider. The provider must send the OCC an invoice at the end of the month, or as soon thereafter as feasible, when services were provided.

R986-700-777. Prioritizing Criteria.

If the Department does not receive sufficient funding to award scholarships to all eligible individuals, the Department will award scholarships by ranking eligible children who are considered at the highest risk according to Department policy. A list of the criteria for determining highest risk is available from the Department.

R986-700-778. Training and Scholarships for Early Childhood Teachers.

The Department may contract without outside entities, as funding permits, to provide training, scholarships and consulting services to assist individuals who intend to receive a Child Development Associate Credential (CDA).

KEY: child care

Notice of Continuation September 3, 2015 53A-1b-110

R994. Workforce Services, Unemployment Insurance.
R994-403. Claim for Benefits.
R994-403-101a. Filing a New Claim.

(1) A new claim for unemployment benefits is made by filing with the Department of Workforce Services Claims Center. A new claim can be filed by telephone, completing an application at the Department's web site, or as otherwise instructed by the Department.

(2) The effective date of a new claim for benefits is the Sunday of the week in which the claim is filed, provided the claimant did not work full-time during that week, or is not entitled to earnings equal to or in excess of the WBA for that week. A claim for benefits can only be made effective for a prior week if the claimant can establish good cause for late filing in accordance with R994-403-106a.

(3) When a claimant files a new claim during the last week of a quarter and has worked less than full-time for that week, the Department will make the claim effective that week if it is advantageous to the claimant, even if the claimant has earnings for that week that are equal to or in excess of the WBA.

(4) Wages used to establish eligibility for a claim cannot be used on a subsequent claim.

R994-403-102a. Cancellation of Claim.

(1) Once a weekly claim has been filed and the claimant has been deemed monetarily eligible, the claim is considered to have been established, even if no payment has been made or waiting week credit granted. The claim then remains established for 52 weeks during which time another regular claim may not be filed against the state of Utah unless the claim is canceled.

(2) A claim may be canceled if the claimant requests that the claim be canceled and one of the following circumstances can be shown:

(a) no weekly claims have been filed;

(b) cancellation is requested prior to the issuance of the monetary determination;

(c) the request is made within the same time period permitted for an appeal of the monetary determination and the claimant returns any benefits that have been paid;

(d) the claimant had earnings, severance, or vacation payments equal to or greater than the WBA applicable to all weeks for which claims were filed;

(e) the claimant meets the eligibility requirements for filing a new claim following a disqualification due to a strike in accordance with the requalifying provisions of Subsection 35A-4-405(4)(c);

(f) the claimant meets the requirements for cancellation established under the provisions for combined wage claims in R994-106-107; or

(g) the claimant has filed an unemployment compensation for ex-military (UCX) claim, and it is determined the claimant does not have wage credits under Title 5, chapter 85, U.S. Code.

(3) If a claimant is disqualified from the receipt of unemployment benefits because he or she was discharged for a crime in connection with work under R994-405-210, whether the claimant was deemed monetarily eligible or not, the claim will be established for 52 weeks and cannot be canceled even if the requirements of subsection (2) have been satisfied.

R994-403-103a. Reopening a Claim.

(1) A claim for benefits is considered "closed" when a claimant reports four consecutive weeks of earnings equal to or in excess of the WBA or does not file a weekly claim within 27 days from the last week filed. In those circumstances, the claimant must reopen the claim before benefits can be paid.

(2) A claimant may reopen the claim any time during the 52-week period after first filing by contacting the Claims Center. The effective date of the reopened claim will be the Sunday of the week in which the claimant requests reopening unless good cause is established for failure to request reopening during a prior week in accordance with R994-403-106a.

R994-403-104g. Using Unused Wages for a Subsequent Claim.

(1) A claimant may have sufficient wage credits to monetarily qualify for a subsequent claim without intervening employment.

(2) With the exception of subsection (3), benefits will not be paid under Subsection 35A-4-403(1)(g) from the effective date of the claim and continuing until the week the claimant provides proof of covered employment equal to at least six times the WBA. Each of the following elements must be satisfied:

(a) the claimant must have performed work in covered employment after the effective date of the original claim, but not necessarily during the benefit year of the original claim;

(b) actual services must have been performed. Vacation, severance pay, or a bonus cannot be used to requalify; and

(c) the claimant must have earnings from covered employment, as defined in R994-201-101(9), equal to at least six times the WBA of the original or subsequent claim, whichever is lower.

(3) Intervening covered employment is not required if the claimant did not receive benefits during the preceding benefit year.

R994-403-105a. Filing Weekly Claims.

(1) Claims must be filed on a weekly basis. For unemployment benefit purposes, the week begins at 12:01 a.m. on Sunday and ends at midnight on Saturday. The claimant is the only person who is authorized to file weekly claims. The responsibility for filing weekly claims cannot be delegated to another person.

(2) Each weekly claim should be filed as soon as possible after the Saturday week ending date. If the claim has not been closed, the Department will allow 20 days after the week ending date to file a timely claim. A weekly claim filed 21 or more calendar days after the week ending date will be denied unless good cause for late filing is established in accordance with R994-403-106a.

R994-403-106a. Good Cause for Late Filing.

(1) Claims must be filed timely to insure prompt, accurate payment of benefits. Untimely claims are susceptible to errors and deprive the Department of its responsibility to monitor eligibility. Benefits may be paid if it is determined that the claimant had good cause for not filing in a timely manner.

(2) The claimant has the burden to establish good cause by competent evidence. Good cause is limited to circumstances where it is shown that the reasons for the delay in filing were due to circumstances beyond the claimant's control or were compelling and reasonable. Some reasons for good cause for late filing may raise other eligibility issues. Some examples that may establish good cause for late filing are:

(a) a crisis of several days duration that interrupts the normal routine during the time the claim should be filed;

(b) hospitalization or incarceration; or

(c) coercion or intimidation exercised by the employer to prevent the prompt filing of a claim.

(3) The Department is the only acceptable source of information about unemployment benefits. Relying on inaccurate advice from friends, relatives, other claimants or similar sources does not constitute good cause.

(4) Good cause for late filing cannot extend beyond 65 weeks from the filing date of the initial claim.

R994-403-107b. Registration, Workshops, Deferrals - General Definition.

(1) A claimant must register for work with the Department, unless, at the discretion of the Department, registration is waived or deferred.

(2) The Department may require attendance at workshops designed to assist claimants in obtaining employment.

(3) Failure, without good cause, to comply with the requirements of Subsections (1) and (2) of this section may result in a denial of benefits. The claimant has the burden to establish good cause through competent evidence. Good cause is limited to circumstances where it is shown that the failure to comply was due to circumstances beyond the control of the claimant or which were compelling and reasonable. The proof of inability to register or report may raise an able or available issue.

(4) The denial of benefits begins with the Sunday of the week the claimant failed to comply and will continue through the Saturday prior to the week the claimant contacts the Department and complies by either registering for work, reporting as required, or scheduling an appointment to attend the next available workshop or conference. The denial can be waived if the Department determines the claimant complied within 7 calendar days of the decision date.

R994-403-108b. Deferral of Work Registration and Work Search.

(1) The Department may elect to defer the work registration and work search requirements. A claimant placed in a deferred status is not required to actively seek work but must meet all other availability requirements of the act. Deferrals are generally limited to the following circumstances:

(a) Labor Disputes.

A claimant who is unemployed due to a labor dispute may be deferred while an eligibility determination under Subsection 35A-4-405(4) is pending. If benefits are allowed, the claimant must register for work immediately.

(b) Union Attachment.

(i) A claimant who is a union member in good standing, is on the out-of-work list, or is otherwise eligible for a job referral by the union, and has earned at least half of his or her base period earnings through the union, may be eligible for a deferral. If a deferral is granted to a union member, it shall not be extended beyond the mid-point of the claim unless the claimant can demonstrate a reasonable expectation of obtaining employment through the union.

(ii) If the claimant is not in deferred status because the claimant did not earn at least 50 percent of his or her base period wage credits in employment as a union member, or the deferral has ended, the claimant must meet the requirements of an active, good faith work search by contacting employers in addition to contacts with the union. This work search is required even though unions may have regulations and rules which penalize members for making independent contacts to try to find work or for accepting nonunion employment.

(c) Employer Attachment.

A claimant who has an attachment to a prior employer and reasonable assurance of returning to full-time employment within ten weeks of filing or reopening a claim may have the work registration requirement deferred to the expected date of recall. A claimant is presumed to have reasonable assurance of employment if he or she previously worked for the employer and there has been no change in the conditions of his or her employment which would indicate severance of the employment relationship. The deferral should generally not extend longer than ten weeks. To extend beyond ten weeks, the claimant must have earned at least half of his or her base period earnings with the employer in question and the employer must submit a request to the department.

(d) Three Week Deferral.

A claimant who accepts a definite offer of full-time work to begin within three weeks, shall be deferred for that period.

(e) Seasonal.

A claimant may be deferred when, due to seasonal factors, work is not available in the claimant's primary base period occupation and other suitable work is not available in the area.

(f) Department approval.

If Department approval is granted under the elements of R994-403-202, the claimant will be placed in deferred status once the training begins and will not be required to register for work or to seek and accept work. The deferral also applies to break periods between successive terms as long as the break period is four weeks or less. A claimant must make a work search prior to the onset of training, even if the claimant has been advised that the training has been approved.

(2) Deferrals cannot be granted if prohibited by state or federal law for certain benefit programs.

R994-403-109b. Profiled Claimants.

(1) The Department will identify individuals who are likely to exhaust unemployment benefits through a profiling system and require that they participate in reemployment services. These services may include job search workshops, job placement services, counseling, testing, and assessment.

(2) In order to avoid disqualification for failure to participate in reemployment services, the claimant must show good cause for nonparticipation. Good cause is limited to circumstances where the claimant can show that the reasons for the delay in filing were due to circumstances beyond the claimant's control or were compelling and reasonable.

(3) Failure to participate in reemployment services without good cause will result in a denial of benefits beginning with the week the claimant refuses or fails to attend scheduled services and continuing until the week the claimant contacts the Employment Center to arrange participation in the required reemployment service.

(4) Some reasons for good cause for nonparticipation may raise other eligibility issues.

R994-403-110c. Able and Available - General Definition.

(1) The primary obligation of the claimant is to become reemployed. A claimant may meet all of the other eligibility criteria but, if the claimant cannot demonstrate ability, availability, and an active good faith effort to obtain work, benefits cannot be allowed.

(2) A claimant must be attached to the labor force, which means the claimant can have no encumbrances to the immediate acceptance of full-time work. The claimant must:

(a) be actively engaged in a good faith effort to obtain employment; and

(b) have the necessary means to become employed including tools, transportation, licenses, and childcare if necessary.

(3) The continued unemployment must be due to the lack of suitable job opportunities.

(4) The only exception to the requirement that a claimant actively seek work is if the Department has approved

schooling under Section 35A-4-403(2) and the claimant meets the requirements of R994-403-107b.

(5) The only exception to the requirements that the claimant be able to work and actively seeking full-time work are that the claimant meets the requirements of R994-403-111c(6).

R994-403-111c. Able.

(1) The claimant must have no physical or mental health limitation which would preclude immediate acceptance of full-time work. A recent history of employment is one indication of a claimant's ability to work. If there has been a change in the claimant's physical or mental capacity since his or her last employment, there is a presumption of inability to work which the claimant must overcome by competent evidence. The claimant must show that there is a reasonable likelihood that jobs exist which the claimant is capable of performing before unemployment insurance benefits can be allowed. Pregnancy is treated the same as other physical limitations.

(2) For purposes of determining weekly eligibility for benefits, it is presumed a claimant who is not able to work more than one-half the normal workweek will be considered not able to perform full-time work. The normal workweek means the normal workweek in the claimant's occupation. A claimant will be denied under this section for any week in which the claimant refuses suitable work due to an inability to work, regardless of the length of time the claimant is unable to work.

(a) Past Work History.

Benefits will not be denied solely on the basis of a physical or mental health limitation if the claimant earned base period wages while working with the limitation and is:

(i) willing to accept any work within his or her ability;

(ii) actively seeking work consistent with the limitation; and

(iii) otherwise eligible.

Under these circumstances, the unemployment is considered to be due to a lack of employment opportunities and not due to an inability to work.

(b) Medical Verification.

When an individual has a physical or mental health limitation, medical information from a competent health care provider is one form of evidence used to determine the claimant's ability to work. The provider's opinion is presumed to be an accurate reflection of the claimant's ability to work, however, the provider's opinion may be overcome by other competent evidence. The Department will determine if medical verification is required.

(3) Temporary Disability.

(a) Employer Attached.

A claimant is not eligible for benefits if the claimant is not able to work at his or her regular job due to a temporary disability and the employer has agreed to allow the claimant to return to the job when he or she is able to work. In this case, the claimant's unemployment is due to an inability to work rather than lack of available work. The claimant is not eligible for benefits even if there is other work the claimant is capable of performing with the disability. If a claimant is precluded from working due to Federal Aviation Administration regulations because of pregnancy, and the employer has agreed to allow the claimant to return to the job, the claimant is considered to be on a medical leave of absence and is not eligible for benefits.

(b) No Employer Attachment.

If the claimant has been separated from employment with no expectation of being allowed to return when he or she is again able to work, or the temporary disability occurred after becoming unemployed, benefits may be allowed even though the claimant cannot work in his or her regular occupation if the claimant can show there is work the claimant is capable of performing and for which the claimant reasonably could be hired. The claimant must also meet other eligibility requirements including making an active work search.

(4) Hospitalization.

A claimant is unable to work if hospitalized unless the hospitalization is on an out-patient basis or the claimant is in a rehabilitation center or care facility and there is independent verification that the claimant is not restricted from immediately working full-time. Immediately following hospitalization, a rebuttable presumption of physical inability continues to exist for the period of time needed for recuperation.

(5) Workers' Compensation.

(a) Compensation for Lost Wages.

A claimant is not eligible for unemployment benefits while receiving temporary total disability workers' compensation benefits.

(b) Subsequent Awards.

The Department may require that a claimant who is receiving permanent partial disability benefits from workers' compensation show that he or she is able and available for full-time work and can reasonably expect to obtain full-time work even with the disability.

(c) Workers' compensation disability payments are not reportable as wages.

(6) Physical or Mental Health Limitation.

(a) A claimant who is not able to work full-time due to a physical or mental health limitation, may be considered eligible under this rule if:

(i) the claimant's base period employment was limited to part-time because of the claimant's physical or mental health limitations;

(ii) the claimant's prior part-time work was substantial. Substantial is defined as at least 50 percent of the hours customarily worked in the claimant's occupation;

(iii) the claimant is able to work at least as many hours as he or she worked prior to becoming unemployed;

(iv) there is work available which the claimant is capable of performing; and

(v) the claimant is making an active work search.

(b) The Department may require that the claimant establish ability by competent evidence.

R994-403-112c. Available.

(1) General Requirement.

The claimant must be available for full-time work. Any restrictions on availability, such as lack of transportation, domestic problems, school attendance, military obligations, church or civic activities, whether self-imposed or beyond the control of the claimant, lessen the claimant's opportunities to obtain suitable full-time work.

(2) Activities Which Affect Availability.

It is not the intent of the act to subsidize activities which interfere with immediate reemployment. A claimant is not considered available for work if the claimant is involved in any activity which cannot be immediately abandoned or interrupted so that the claimant can seek and accept full-time work.

(a) Activities Which May Result in a Denial of Benefits.

For purposes of establishing weekly eligibility for benefits, a claimant who is engaged in an activity for more than half the normal workweek that would prevent the claimant from working, is presumed to be unavailable and therefore ineligible for benefits. The normal workweek means the normal workweek in the claimant's occupation. This presumption can be overcome by a showing that the activity did not preclude the immediate acceptance of full-

time work, referrals to work, contacts from the Department, or an active search for work. When a claimant is away from his or her residence but has made arrangements to be contacted and can return quickly enough to respond to any opportunity for work, the presumption of unavailability may be overcome. The conclusion of unavailability can also be overcome in the following circumstances:

(i) Definite Offer of Work or Recall.

If the claimant has accepted a definite offer of full-time employment or has a date of recall to begin within three weeks, the claimant does not have to demonstrate further availability except as provided in subparagraphs (B) and (C) of this section and is not required to seek other work. Because the statute requires that a claimant be able to work, if a claimant is unable to work for more than one-half of any week due to illness or hospitalization, benefits will be denied.

(ii) Jury Duty or Court Attendance.

Jury duty or court attendance is a public duty required by law and a claimant will not be denied benefits if he or she is unavailable because of a lawfully issued summons to appear as a witness or to serve on a jury unless the claimant:

(A) is a party to the action;

(B) had employment which he or she was unable to continue or accept because of the court service; or

(C) refused or delayed an offer of suitable employment because of the court service.

The time spent in court service is not a personal service performed under a contract of hire and therefore is not considered employment.

(b) Activities Which Will Result in a Denial of Benefits.

(i) Refusal of Work.

When a claimant refuses any suitable work, the claimant is considered unavailable. Even though the claimant had valid reasons for not accepting the work, benefits will not be allowed for the week or weeks in which the work was available. Benefits are also denied when a claimant fails to be available for job referrals or a call to return to work under reasonable conditions consistent with a previously established work relationship. This includes referral attempts from a temporary employment service, a school district for substitute teaching, or any other employer for which work is "on-call."

(ii) Failure to Perform All Work During the Week of Separation.

(A) Benefits will be denied for the week in which separation from employment occurs if the claimant's unemployment was caused because the claimant was not able or available to do his or her work. In this circumstance, there is a presumption of continued inability or unavailability and an indefinite disqualification will be assessed until there is proof of a change in the conditions or circumstances.

(B) If the claimant was absent from work during the last week of employment and the claimant was not paid for the day or days of absence, benefits will be denied for that week. The claimant will be denied benefits under this section regardless of the length of the absence.

(3) Hours of Availability.

(a) Full-Time.

Except as provided in R994-403-111c(5), in order to meet the availability requirement, a claimant must be ready and willing to immediately accept full-time work. Full-time work generally means 40 hours a week but may vary due to customary practices in an occupation. If the claimant was last employed less than full-time, there is a rebuttable presumption that the claimant continues to be available for only part-time work.

(b) Other Than Normal Work Hours.

If the claimant worked other than normal work hours and the work schedule was adjusted to accommodate the claimant, the claimant cannot continue to limit his or her hours of availability even if the claimant was working 40 hours or more. The claimant must be available for full-time work during normal work hours as is customary for the industry.

(4) Type of Work and Wage Restrictions.

(a) The claimant must be available for work that is considered suitable based on the length of time he or she has been unemployed as provided in R994-405-306.

(b) Contract Obligation.

If a claimant is restricted due to a contractual obligation from competing with a former employer or accepting employment in the claimant's regular occupation, the claimant is not eligible for benefits unless the claimant can show that he or she:

(i) is actively seeking work outside the restrictions of the noncompete contract;

(ii) has the skills and/or training necessary to obtain that work; and

(iii) can reasonably expect to obtain that employment.

(5) Employer/Occupational Requirements.

If the claimant does not have the license or special equipment required for the type of work the claimant wants to obtain, the claimant cannot be considered available for work unless the claimant is actively seeking other types of work and has a reasonable expectation of obtaining that work.

(6) Temporary Availability.

When an individual is limited to temporary work because of anticipated military service, school attendance, travel, church service, relocation, a reasonable expectation of recall to a former employer for which the claimant is not in deferral status, or any other anticipated restriction on the claimant's future availability, availability is only established if the claimant is willing to accept and is actively seeking temporary work. The claimant must also show there is a realistic expectation that there is temporary work in the claimant's occupation, otherwise the claimant may be required to accept temporary work in another occupation. Evidence of a genuine desire to obtain temporary work may be shown by registration with and willingness to accept work with temporary employment services.

(7) Distance to Work.

(a) Customary Commuting Patterns.

A claimant must show reasonable access to public or private transportation, and a willingness to commute within customary commuting patterns for the occupation and community.

(b) Removal to a Locality of Limited Work Opportunities.

A claimant who moves from an area where there are substantial work opportunities to an area of limited work opportunities must demonstrate that the new locale has work for which the claimant is qualified and which the claimant is willing to perform. If the work is so limited in the new locale that there is little expectation the claimant will become reemployed, the continued unemployment is the result of the move and not the failure of the labor market to provide employment opportunities. In that case, the claimant is considered to have removed himself or herself from the labor market and is no longer eligible for benefits.

(8) School.

(a) A claimant attending school who has not been granted Department approval for a deferral must still meet all requirements of being able and available for work and be actively seeking work. Areas that need to be examined when making an eligibility determination with respect to a student include reviewing a claimant's work history while attending school, coupled with his or her efforts to secure full-time work. If the hours of school attendance conflict with the claimant's established work schedule or with the customary work schedule for the occupation in which the claimant is

seeking work, a rebuttable presumption is established that the claimant is not available for full-time work and benefits will generally be denied. An announced willingness on the part of a claimant to discontinue school attendance or change his or her school schedule, if necessary, to accept work must be weighed against the time already spent in school as well as the financial loss the claimant may incur if he or she were to withdraw.

(b) A presumption of unavailability may also be raised if a claimant moves, for the purpose of attending school, from an area with substantial labor market to a labor market with more limited opportunities. In order to overcome this presumption, the claimant must demonstrate there is full-time work available in the new area which the claimant could reasonably expect to obtain.

(9) Employment of Youth.

Title 34, Chapter 23 of the Utah Code imposes limitations on the number of hours youth under the age of 16 may work. The following limitations do not apply if the individual has received a high school diploma or is married. Claimants under the age of 16 who do not provide proof of meeting one of these exceptions are under the following limitations whether or not in student status because they have a legal obligation to attend school. Youth under the age of 16 may not work:

(a) during school hours except as authorized by the proper school authorities;

(b) before or after school in excess of 4 hours a day;

(c) before 5:00 a.m. or after 9:30 p.m. on days preceding school days;

(d) in excess of 8 hours in any 24-hour period; or

(e) more than 40 hours in any week.

(10) Domestic Obligations.

When a claimant has an obligation to care for children or other dependents, the claimant must show that arrangements for the care of those individuals have been made for all hours that are normally worked in the claimant's occupation and must show a good faith, active work search effort.

R994-403-113c. Work Search.

(1) General Requirements.

Unless the claimant qualifies for a work search deferral pursuant to R994-403-108b, a claimant must make an active, good faith effort to secure employment each and every week for which benefits are claimed. Efforts to find work must be judged by the standards of the occupation and the community.

(2) Active.

An active effort to look for work means that the claimant must make a minimum of four new job contacts each week unless the claimant is otherwise directed by the unemployment division. Those contacts should be made with employers that hire people in the claimant's occupation or occupations for which the claimant has work experience or would otherwise be qualified and willing to accept employment. If the claimant fails to make four new job contacts during the first week filed, involvement in job development activities that are likely to result in employment will be accepted as reasonable, active job search efforts.

(3) Good Faith.

Good faith efforts are defined as those methods which a reasonable person, anxious to return to work, would make if desirous of obtaining employment. A good faith effort extends beyond simply making a specific number of contacts to satisfy the Department requirement.

R994-403-114c. Claimant's Obligation to Prove Weekly Eligibility.

The claimant:

(1) has the burden of proving that he or she is able, available, and actively seeking full-time work:

(2) must report any information that might affect eligibility;

(3) must provide any information requested by the Department which is required to establish eligibility;

(4) must immediately notify the Department if the claimant is incarcerated; and

(5) must keep a detailed record of his or her weekly job contacts so that the Department can verify the contact at any time for an audit or eligibility review. A detailed record includes the following information:

(a) the date of the contact,

(b) the name of the employer or other identifying information such as a job reference number,

(c) employer contact information such as the employer's mailing address, phone number, email address, or website address, and name of the person contacted if available,

(d) details of the position for which the claimant applied,

(e) method of contact, and

(f) results of the contact.

R994-403-115c. Period of Ineligibility.

(1) Eligibility for benefits is established on a weekly basis. If the Department has determined that the claimant is not able or available for work, and it appears the circumstances will likely continue, an indefinite disqualification will be assessed, and the claimant must requalify by showing that he or she is able and available for work.

(2) If the Department has reason to believe a claimant has not made a good faith effort to seek work, or the Department is performing a routine audit of a claim, the Department can only require that the claimant provide proof of work search activities for the four weeks immediately preceding the Department's request. However, if the claimant admits he or she did not complete the work search activities required under this rule, the Department can disqualify a claimant for more than four weeks. The claimant will be disqualified for any week during which he or she fails to provide the information required under R994-403-114c(5).

(3) If the Department seeks verification of a job contact from an employer, the claimant will only be disqualified if the employer provides clear and convincing evidence that there was no contact.

(4) The claimant will be disqualified for all weeks in which it is discovered that the claimant was not able or available to accept work without regard to the four-week limitation.

R994-403-116e. Eligibility Determinations: Obligation to Provide Information.

(1) The Department cannot make proper determinations regarding eligibility unless the claimant and the employer provide correct information in a timely manner. Claimants and employers therefore have a continuing obligation to provide any and all information and verification which may affect eligibility.

(2) Providing incomplete or incorrect information will be treated the same as a failure to provide information if the incorrect or insufficient information results in an improper decision with regard to the claimant's eligibility.

R994-403-117e. Claimant's Responsibility.

(1) The claimant must provide all of the following:

(a) his or her correct name, social security number, citizenship or alien status, address and date of birth;

(b) the correct business name and address for each base period employer and for each employer subsequent to the

base period;

(c) information necessary to determine eligibility or continuing eligibility as requested on the initial claim form, or on any other Department form including work search information. This includes information requested through the use of an interactive voice response system or the Internet;

(d) the reasons for the job separation from base period and subsequent employers when filing a new claim, requalifying for a claim, or any time the claimant is separated from employment during the benefit year. The Department may require a complete statement of the circumstances precipitating the separation; and

(e) any other information requested by the Department. The Claimant is required to return telephone calls and respond to requests that are made electronically, verbally, or by U.S. Mail. Generally, claimants will be given 48 hours, excluding hours during weekends or legal holidays, to respond to requests made verbally or electronically and five (5) full business days to respond to requests mailed through the U. S. Mail.

(2) Claimants are also required to report, at the time and place designated, for an in-person interview with a Department representative if so requested.

(3) By filing a claim for benefits, the claimant has given consent to the employer to release to the Department all information necessary to determine eligibility even if the information is confidential.

R994-403-118e. Disqualification Periods if a Claimant Fails to Provide Information.

(1) A claimant is not eligible for benefits if the Department does not have sufficient information to determine eligibility. Except as provided in subsection (5) of this section, a claimant who fails to provide necessary information without good cause is disqualified from the receipt of unemployment benefits until the information is received by the Department. Good cause is limited to circumstances where the claimant can show that the reasons for the delay in filing were due to circumstances beyond the claimant's control or were compelling and reasonable.

(2) If insufficient or incorrect information is provided when the initial claim is filed, the disqualification will begin with the effective date of the claim.

(3) If a potentially disqualifying issue is identified as part of the weekly certification process and the claimant fails to provide the information requested by the Department, the disqualification will begin with the Sunday of the week for which eligibility could not be determined.

(4) If insufficient or incorrect information is provided as part of a review of payments already made, the disqualification will begin with the week in which the response to the Department's request for information is due.

(5) The disqualification will continue through the Saturday prior to the week in which the claimant provides the information. The denial can be waived if the Department determines the claimant complied within 7 calendar days of the date the decision was issued.

R994-403-119e. Overpayments Resulting from a Failure to Provide Information.

(1) Any overpayment resulting from the claimant's failure to provide information, or based on incorrect information provided by the claimant, will be assessed as a fault overpayment in accordance with Subsection 35A-4-406(4) or as a fraud overpayment in accordance with Subsection 35A-4-405(5).

(2) Any overpayment resulting from the employer's failure to provide information will be assessed as a nonfault overpayment in accordance with Subsection 35A-4-406(5).

(3) If more than one party was at fault in the creation of an overpayment, the overpayment will be assessed as:

(a) a fraud or fault overpayment if the claimant was more at fault than the other parties; or

(b) a nonfault overpayment if the employer and/or the Department was more at fault, or if the parties were equally at fault.

R994-403-120e. Employer's Responsibility.

Employers must provide wage, employment, and separation information and complete all forms and reports as requested by the Department. The employer also must return telephone calls from Department employees in a timely manner and answer all questions regarding wages, employment, and separations.

R994-403-121e. Penalty for the Employer's Failure to Comply.

(1) A claimant has the right to have a claim for benefits resolved quickly and accurately. An employer's failure to provide information in a timely manner results in additional expense and unnecessary delay.

(2) If an employer or agent fails to provide adequate information in a timely manner without good cause, the ALJ will determine on appeal that the employer has relinquished its rights with regard to the affected claim and is no longer a party in interest. The employer's appeal will be dismissed and the employer is liable for benefits paid.

(3) The ALJ may, in his or her discretion, choose to exercise continuing jurisdiction with respect to the case and subpoena or call the employer and claimant as witnesses to determine the claimant's eligibility. If, after reaching the merits, the ALJ determines to reverse the initial decision and deny benefits, the employer is not eligible for relief of charges resulting from benefits overpaid to the claimant prior to the date of the ALJ's decision.

(4) In determining whether to exercise discretion and reach the merits, the ALJ may take into consideration:

(a) the flagrancy of the refusal or failure to provide complete and accurate information. An employer's or agent's refusal to provide information at the time of the initial Department determination on the grounds that it wants to wait and present its case before an ALJ, for instance, will be subject to the most severe penalty;

(b) whether or not the employer or agent has failed to provide complete and accurate information in the past or on more than one case; and

(c) whether the employer is represented by counsel or a professional representative. Counsel and professional representatives are responsible for knowing Department rules and are therefore held to a higher standard.

R994-403-122e. Good Cause for Failure to Comply.

If the employer or claimant has good cause for failing to provide the information in the time frame requested, no disqualification or penalty will be assessed. Good cause is limited to circumstances where the claimant or employer can show that the reasons for the delay in filing were due to circumstances that were compelling and reasonable or beyond the party's control.

R994-403-123. Obligation of Department Employees.

Employees of the Department are obligated, regardless of when the information is discovered, to bring to the attention of the proper Department representatives any information that may affect a claimant's eligibility for unemployment insurance benefits or information affecting the employer's contributions.

R994-403-201. Department Approval for School Attendance - General Definition.

(1) Unemployment insurance is not intended to subsidize schooling. However, it is recognized that training may be a practical way to reduce chronic and persistent unemployment due to a lack of work skills, job obsolescence or foreign competition. Even though the claimant is granted Department approval, the claimant must still be able to work. With Department approval, a claimant meets the availability requirement based on his or her school attendance and successful performance. With the exception of very short-term training, Department approval is intended for classroom training as opposed to on-the-job training. Department approval is to be used selectively and judiciously. It is not to be used as a substitute for selective placement, job development, on-the-job training, or other available programs.

(2) If a claimant is ineligible under 35A-4-403(1)(c) due to school attendance, Department approval will be considered.

(3) Department approval will be granted when required by state or federal law for specific training programs.

R994-403-202. Qualifying Elements for Approval of Training.

All of the following nine elements must be satisfied for a claimant to qualify for Department approval of training. Some of these elements will be waived or modified when required by state or federal law for specific training programs.

(1) The claimant's unemployment is chronic or persistent, or likely to be chronic or persistent, due to any one of the following three circumstances:

(a) A lack of basic work skills. A lack of basic work skills may not be established unless a claimant:

(i)(A) has a history of repeated unemployment attributable to lack of skills and has no recent history of employment earning a wage substantially above the federal minimum wage or

(B) qualifies for Department sponsored training because the claimant meets the eligibility requirements for public assistance;

(ii) has had no formal training in occupational skills;

(iii) does not have skills developed over an extended period of time by training or experience; and

(iv) does not have a marketable degree from an institution of higher learning; or

(b) a change in the marketability of the claimant's skills has resulted due to new technology, or major reductions within an industry; or

(c) inability to continue working in occupations using the claimant's skills due to a verifiable, permanent physical or emotional disability,

(2) a claimant must have a reasonable expectation for success as demonstrated by:

(a) an aptitude for and interest in the work the claimant is being trained to perform, or course of study the claimant is pursuing; and

(b) sufficient time and financial resources to complete the training.

(3) The training is provided by an institution approved by the Department.

(4) The training is not available except in school. For example, on-the-job training is not available to the claimant.

(5) The length of time required to complete the training should generally not extend beyond 18 months.

(6) The training should generally be vocationally oriented unless the claimant has no more than two terms, quarters, semesters, or similar periods of academic training necessary to obtain a degree.

(7) There is a reasonable expectation of employment following completion of the training. Reasonable expectation means the claimant will find a job using the skills and education acquired while in training pursuant to a fair and objective projection of job market conditions expected to exist at the time of completion of the training.

(8) A claimant did not leave work to attend school even if the employer required the training for advancement or as a condition of continuing employment.

(9) The schooling is full-time, as defined by the training facility.

R994-403-203. Extensions of Department Approval.

Initial approval shall be granted, for the school term beginning with the week in which the attendance began, or the effective date of the claim, whichever is later. The Department may extend the approval if the claimant establishes proof of:

(1) satisfactory attendance;

(2) passing grades;

(3) continuance of the same course of study and classes originally approved; and

(4) compliance with all other qualifying elements.

R994-403-204. Availability Requirements When Approval is Granted.

(1) The work search and registration requirements for a claimant who is granted Department approval are found in R994-403-108b(1)(f). Once the claimant is actually in training, benefits will not be denied when work is refused as satisfactory attendance and progress in school serves as a substitute for the availability requirements of the act.

(2) Absences from school will not necessarily result in a denial of benefits during those weeks the claimant can demonstrate he or she is making up any missed school work and is still making satisfactory progress in school. Satisfactory progress is defined as passing all classes with a grade level sufficient to qualify for graduation, licensing, or certification, as appropriate.

(3) A disqualification will be effective with the week the claimant knew or should have known he or she was not going to receive a passing grade in any of his or her classes or was otherwise not making satisfactory progress in school. It is the claimant's responsibility to immediately report any information that may indicate a failure to maintain satisfactory progress.

(4) The claimant must attend school full-time as defined by the educational institution. If a claimant discontinues school attendance, drops or changes any classes before the end of the term, Department approval may be terminated immediately. However, discontinuing a class that does not reduce the school credits below full-time status will not result in the termination of Department approval. Department approval may be reinstated during any week a claimant demonstrates, through appropriate verification, the claimant is again attending class regularly and making satisfactory progress.

(5) Notwithstanding any other provisions of this section, if the claimant was absent from school for more than one-half of the workweek due to illness or hospitalization, the claimant is considered to be unable to work and unemployment benefits will be denied for that week. A claimant has the responsibility to report any sickness, injury, or other circumstances that prevented him or her from attending school.

(6) A claimant is ineligible for Department approval if the claimant is retaking a class that was originally taken while receiving benefits under Department approval. However, if Department approval was denied during the time the course was originally in progress, approval may be reinstated to cover that portion of the course not previously subsidized if

the claimant can demonstrate satisfactory progress.

R994-403-205. Short-Term Training.

Department approval may be granted even though a claimant has marketable skills and does not meet the requirements for Department approval as defined in R994-403-202 if the entire course of training is no longer than eight weeks and will enhance the claimant's employment prospects. A claimant will not be granted a waiver for training that is longer than eight weeks even if the claimant needs only eight weeks or less to complete the training. This is intended as a one-time approval per benefit year and may not be extended beyond eight weeks.

R994-403-301. Requirements for Special Benefits.

Some benefit programs, including Extended Benefits, have different availability and work search requirements. The rule governing work search for Extended Benefits is R994-402. Other special programs are governed by the act or federal law.

R994-403-302. Foreign Travel.

(1) Benefits will not be denied if the claimant is required to travel to seek, apply for, or accept work within the United States or in a foreign country where the claimant has authorization to work and where there is a reciprocal agreement. The trip itself must be for the purpose of obtaining work. There is a rebuttable presumption that the claimant is not available for work when the trip is extended to accommodate the claimant's personal needs or interests, and the extension is for more than one-half of the workweek.

(2) Unemployment benefits cannot be paid to a claimant located in a foreign country unless the claimant has authorization to work there and there is a reciprocal agreement concerning the payment of unemployment benefits with that foreign country.

(3) Unemployment benefits are intended, in part, to stimulate the economy of Utah and the United States and thus are expected to be spent in this country. A claimant who travels to a foreign country must report to the Department that he or she is out of the country, even if it is for a temporary purpose and regardless of whether the claimant intends to return to the United States if work becomes available. Failure to inform the Department will result in a fraud overpayment for the weeks benefits were paid while the claimant was in a foreign country. The claimant may be eligible if the travel is to Canada but must notify the Department of that travel. Canada is the only country with which Utah has a reciprocal agreement. If the claimant travels to, but is not eligible to work in, Canada and fails to notify the Department of the travel, it will result in a fraud overpayment for the weeks benefits were paid while the claimant was in Canada.

KEY: filing deadlines, registration, student eligibility, unemployment compensation
